COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductory music theory and musicianship) to various musical cultures (African, American, Asian, Caribbean, and European) and styles within those cultures (classical, folk, and popular). Most 100-level courses are designed for the general student and have no prerequisites; they assume no prior musical training, and are open to all students interested in increasing their understanding and appreciation of music. Two exceptions are the specific 100-level music-theory courses that fulfill the Music Theory and Musicianship/Materials and Structures requirement for the music major (MUS 103 and 104): these courses require a working knowledge of musical notation. MUS 103 and 104 are geared to potential majors and students with strong instrumental or vocal background, and are particularly suitable for first-year students interested in taking more advanced courses in music. Students without previous theory and aural skills training are encouraged to enroll in MUS 102, which also counts toward the Materials and Structures requirement of the major for students in the class of 2028 and later.

200-level courses offer students the opportunity to explore a range of more specialized musical topics, from performance, technology, and musicianship-based classes to courses focused on specific styles, periods, composers, and examinations of meaning in music. Most regular 200-level courses have no prerequisites but do require the ability to read music, and are usually open to all students who can do so, regardless of class year. Some 200-level tutorials and writing intensive courses have no prerequisites and do not require the ability to read music, but the workload and more advanced approach to the subject matter makes these courses best suited to sophomores, juniors, and seniors. For students in class years 2025, 2026 and 2027, the two 200-level courses that complete the music theory requirements for the music major (MUS 201 and 202) have prerequisites; these courses are geared to potential majors, majors, and students with strong instrumental or vocal background.

300-level courses are designed for sophomores, juniors, and seniors with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

400-level courses are intended for advanced juniors and seniors, usually music majors, wishing to pursue thesis, independent study, or small seminar coursework in composition, theory and analysis, musicology, ethnomusicology, or performance, under the guidance of an individual faculty advisor.
MAJOR (Class of 2028 and beyond)

A minimum of nine courses are required for the major, as detailed below.

MUSICAL MATERIALS AND STRUCTURES:

Four courses are required, which must include MUS 103 and MUS 104. The other two courses may be selected from any of the department’s offerings in music theory and analysis, jazz theory and arranging, composition and electronic music.

MUSICAL PERFORMANCE:

Majors are required to participate in faculty-directed departmental ensembles for at least four semesters, and enroll in partial credit music lessons for at least two semesters.

CAPSTONE:

Any 400-level seminar, 400-level Independent Study course, or second semester of a year-long Honors Thesis course. The capstone requirement may be satisfied in either the Junior or Senior years.

MAJOR (Class of 2025, 2026 and 2027)

A minimum of ten courses are required for the major, as detailed below.

Four courses in Music Theory and Musicianship to be taken in sequence:

- Music 103
- Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)
- Music 201
- Music 202

Three courses in European and American Music History:

- Music 231
- Music 232
- Music 233

Majors may choose to replace a maximum of one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:

- Music 231: 133, 164, 172, 234, 235 or 261
- Music 232: 143, 146, 165, or 166
- Music 233: 118, 119, 138, 150, 151, 238, 239, 244, 251, 252, 254, or 316

One course in World Music/Ethnomusicology from the following:

Two electives:

One must be taken in the senior year and at the 400-level to serve as a capstone course. The second semester of a year-long honors thesis, MUS 494, will satisfy the 400-level elective requirement; for students in the class of 2024 and subsequent years, Advanced Musical Performance, MUS 491 or 492, will not satisfy the 400-level capstone elective. The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.
Performance:
Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.
Majors must enroll in partial credit music lessons for at least two semesters.

THE DEGREE WITH HONORS IN MUSIC
Three routes provide the opportunity for honors or highest honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student’s work or analysis of a major 20th century or contemporary work. The student’s general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student’s general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved, a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors), and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)-W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

LESSONS
Courses in individual vocal or instrumental instruction are fully subsidized for all students. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

STUDY ABROAD
One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department.

MUS 101  (F)  Listening to Music
The goals of this course are 1) to encourage active, critical, and comparative listening practices, and 2) to consider the functions of music as an embodied, social, and context-dependent phenomenon. We will encounter music from across history and the globe, engaging with examples from a wide range of musicians and musical traditions. Topics will include: political protest music, music in religious contexts, the relationship between music and text, performing gender in music, the meaning of authenticity in musical contexts, and the ethics of musical listening. Through a variety of specific case studies, we will seek to become discerning listeners while also thinking critically about music’s capacities and limitations.

Requirements/Evaluation: class participation, occasional GLOW posts, three short essays, and a final exam
Prerequisites: none; intended for non-major students with little or no formal training in music
Enrollment Limit: 20
Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course
Expected Class Size: 20
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)
MUS 102  (F)(S)  Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of applied and theoretical exercises and projects, students will develop an understanding of the elements of music (e.g. pitch, scales, triads, rhythm, meter, and their notation) and explore their combination and interaction in the larger-scale organization of works of classical, jazz and popular music (i.e. harmony, counterpoint, form, rhetoric). Practical musicianship skills will be developed through singing, keyboard, and rhythmic exercises in lecture, and through dictation and sight-singing exercises in a weekly aural-skills lab.

Requirements/Evaluation:  regular worksheets (1-2 pages), written and applied quizzes, model composition projects, midterm and final exam, participation

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  first- and second-year students

Expected Class Size:  16

Grading:  yes pass/fail option,  yes fifth course option

MUS 103  (F)  Music Theory and Musicianship I

Students in MUS 103 study some materials, structures, and procedures of tonal music, with a particular emphasis on subjects like tertian harmony, voice leading, counterpoint, rhythm, and form. Baroque chorales will serve as a central resource for this study, as will musical examples from a variety of times and places. Through a combination of keyboard harmony exercises, sight singing, dictation, analysis of musical scores, written exercises, and emulation composition projects, students will develop an intellectual, aural, and embodied understanding of tonal music. MUS 103 is designed for potential music majors and for students with prior experience interacting with notated music. Students should consult the music department website for information about music theory placement.

Class Format:  In addition to the two lecture meetings each week, the class requires three weekly lab meetings (for keyboard skills, music writing skills, and aural skills).

Requirements/Evaluation:  weekly written work, written and applied quizzes, and midyear and final emulation composition projects

Prerequisites:  MUS 102, music theory placement test, or satisfactory performance on an Advanced Placement Examination

Enrollment Limit:  16

Enrollment Preferences:  first-years, potential Music majors, and those with strong musicianship backgrounds

Expected Class Size:  16

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)

Attributes:  MUS Materials and Structures

Fall 2024
MUS 104  (S)  Music Theory and Musicianship I

Music 104 continues and expands the study of tonal music begun in Music 103, focusing particularly on counterpoint, seventh and ninth chords, larger musical forms, and chromatic harmony. The study of these topics is reinforced by musical analysis, written exercises, and emulation composition projects, as well as by applied musicianship work that includes exercises in sight singing, dictation, and keyboard harmony. MUS 104 is designed for potential music majors and for students with prior experience interacting with notated music. Students should consult the music department website for information about music theory placement.

Class Format: lecture two days a week; lab meetings (for keyboard skills, music writing skills, and ear training) three days a week
Requirements/Evaluation: weekly written work, written and applied quizzes, and midterm and final emulation composition projects
Prerequisites: MUS 103 or music theory placement test
Enrollment Limit: 16
Enrollment Preferences: first-year students, potential or declared Music majors, and those with strong musicianship backgrounds
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option

Spring 2025

MUS 105  (S) Jazz Theory and Improvisation I

Cross-listings: AFR 212
Primary Cross-listing

The theory and application of basic harmonic structures and rhythmic language used in jazz performance. An introductory level course to the practice of jazz improvisation. Blues forms, modal compositions, diatonic progressions, secondary and substitute dominant chords, modulations. This is a performance practice course appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Vocalists and drummers will be encouraged to study the piano; all students will complete jazz-specific piano and percussion lab assignments. Pianists, guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire
Requirements/Evaluation: Weekly assignments, (e.g. performance of exercises and repertoire, analysis) a midterm, a transcription project and the end of semester concert. Jazz piano and drum labs. Assignments from aural skills labs.
Prerequisites: MUS 103 or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged
Enrollment Limit: 12
Enrollment Preferences: Prospective Music majors, then Jazz Ensemble members, then Music majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Unit Notes: this course will share aural skills labs (but not piano labs) with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly.
MUS 106  (S)  Skills for Singing
Skills for Singing is a course designed for students who wish to develop their skills in vocal technique and reading music. Students will be given an introduction to vocal technique and physiology through vocalises, repertoire, analysis, and studio class sessions. They will engage in group singing and solo presentation in a collaborative, master-class setting. They will also build knowledge of western music notation through basic music theory, score-reading, and sight-singing. Upon completion of the class, interested students will have established the foundational skills necessary to sing more confidently in both solo and ensemble environments.

Requirements/Evaluation: Reading and listening assignments, daily sight-singing practice and vocal exercises, music theory written assignments, musical preparation of solos, final presentation of prepared solo as part of a class recital.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Interested students will be asked to submit answers to a short survey regarding their experience and goals. Preference given to underclassmen and those who have auditioned unsuccessfully for choir and/or voice lessons.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

MUS 110  (S)  Electronic Music Genres, a Creative Approach
In this course, students will study the theoretical and practical fundamentals of audio technology, MIDI production, sound design, and interactive composition. Students are not required to have any background in Music Technology. We will start by covering the basics of Electronic Music but the class will move at a fast pace covering more advance subjects in a short period of time. We will go over concepts of Physics acoustic, MIDI (sequencing, etc), Sound editing, Digital Signal Processing Effects, Sound Synthesis, and Interactive electronic music composition using Ableton Live, Max4Live, as well as Max MSP for students to learn how to program their own virtual synthesizers and/ or algorithmic composition to create interactive music in real time. Electronic Music Composition is a central part of the class. Students can choose any aesthetic of their choice for the composition projects, since the the focus of the class is on teaching students the technological tools to create the music of their choice. Students will be encouraged to mix different styles of music creating fusion.

Requirements/Evaluation: Four fusion composition projects and weekly presentation of students mini-projects focused on the electronic music techniques studied in class, and based on student research of musical styles chosen for their projects.

Prerequisites: One of the following: MUS 102, MUS 103, or permission of instructor for those students that have taken music lessons in their previous school: please contact iperez@williams.edu

Enrollment Limit: 8

Enrollment Preferences: Music majors, students with previous experience in Music.

Expected Class Size: 8

MUS 111  (F)  Music in Global Circulation  (DPE)
This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their
global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music’s sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music’s global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: “throat singing” genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.

Requirements/Evaluation: class attendance and participation, regular short assignments/study questions, three 5-7 page written assignments, and an 8-10 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music, upperclassmen.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music’s potential in situations of political unrest.

MUS 112  (S)  Musics of Asia

Cross-listings: ASIA 112

Primary Cross-listing

This course offers an introduction to the great diversity of Asian music. Our survey will span from East Asia (China, Korea, and Japan) to Southeast Asia (Thailand and Indonesia) to the Indian subcontinent, Central Asia (Tibet and Afghanistan), to the Middle East (Iran and the Arabian peninsula), and will end with the extension of Asian music across North Africa and into Eastern Europe. Within this broad survey, we will focus on selected and representative musical cultures and genres. In each section of the course, aspects of cultural context (including music’s function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical musics of these cultures, we will also consider the current musical scene. Encounters with this music will include attendance at live performances when possible.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on four tests and two papers

Prerequisites: none; no musical experience necessary

Enrollment Limit: 20

Enrollment Preferences: if overenrolled preference will be given to sophomores and juniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

MUS 119  (F)  Rock and Roll Revolutions, 1950-1999

This course will trace the history of rock music from the 1950s to the end of the 20th century, focusing on those musicians who revolutionized the
genre in various periods. Such "revolutions" are discovered in the use of new sounds and musical forms, in the relationship between lyrics and musical setting, and in the conception of rock's role in society. Three objectives will underpin our studies: to develop listening skills with music that one often hears, but perhaps rarely listens to intently; to determine in what ways popular music can be interpreted as reflecting and shaping its cultural context, particularly in terms of race and gender; and to encounter the work of several of the more innovative musicians in the history of rock.

Requirements/Evaluation: evaluation will be based on two tests, two papers, and a final exam

MUS 120  (F)  Musics of Africa
Cross-listings: AFR 113
Primary Cross-listing
This course introduces musical traditions spanning the geographical breadth of continental Africa. We will prioritize hands-on experience and musical practice, critical listening, and deep social and political contextualization as strategies of musical engagement. Following an introductory exploration of overarching aesthetic and social trends in African musical practice, the course will then focus on 3-4 geographically rooted case studies, allowing us to discuss how different musical practices and subcultures (featuring traditional, contemporary, and popular forms) interrelate in a musical soundscape. The geographical focus of the case studies may vary but previous case studies have included: Ghana, Zimbabwe, Ethiopia, Egypt, Mali and the Democratic Republic of Congo.
Class Format: discussion
Requirements/Evaluation: grade based on attendance and participation, one synthesizing assignment at the end of each unit (for instance a 5-7 pg. paper, a podcast or performance-oriented assignment, an album review or curated listening list) and an 8-10pg final paper.
Prerequisites: no prerequisites: prior musical background is not essential for this class

MUS 125  (F)  Music and Social Dance in Latin America  (DPE)
Cross-listings: DANC 125
Primary Cross-listing
This course offers a full-spectrum introduction to a number of Latin American social dance forms, including samba, salsa, tango, and the Suriname Maroon genre, awasa. Through critical listening and viewing assignments, performance workshops, and readings from disciplines spanning ethnomusicology, anthropology, dance studies, Latin American studies and history, students will combine a technical understanding of the musical and choreographic features of these genres with a consideration of their broader contexts and social impact. Among the questions that will drive class
discussions are: How do sound and movement interrelate? What aspects of gender, sexuality, class, race and ethnicity arise in the performance and consumption of Latin American genres of social dance? How do high political, economic, and personal stakes emerge through activities more commonly associated with play and leisure? This class is driven by academic inquiry into these various social dance practices; it does not prioritize gaining performance skills in the genres discussed. While there will be experiential components included throughout the course (for instance music or dance workshops), the majority of the class will be conducted in a discussion/seminar format. While the ability to read musical notation is helpful, it is not required.

Class Format: seminar/studio

Requirements/Evaluation: Regular short assignments, three 5-7 page papers, final project or paper (10-12pgs)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: upperclassmen, majors in music, dance, Latino/a studies.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 125(D1) DANC 125(D1)

Difference, Power, and Equity Notes: Together, the music and dance genres discussed here indicate the diversity of social dance practices within Latin America, broadly conceived. Each unit of the course delves into aspects of political, historical, and cultural context and their resonance within the realm of music and dance. Specific attention is paid to racial and intercultural aspects each genre’s formulation, practice, and circulation, as well as the politics of representation in embodied expression.

With territories around the globe from the Americas to the Philippines to portions of Western Europe, the Spanish colonial empire was, at its height, one of the largest and most expansive in history. This course explores the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries—from the time of the Spanish arrival in the Americas (as well as southern Italy and the East Indies) during the fifteenth and sixteenth centuries to the empire's eventual decline in the nineteenth century. We will begin by defining the concepts of "colonialism" and "imperialism" in order to understand how such political and socio-economic power structures developed and attempted to exert control and influence over subjugated populations—and consequently over their music. From there, we will investigate some of the musical developments and repertoires that resulted from these efforts through a series of modules on various territories colonized by Spain, including the Spanish territories of Naples/southern Italy, New Spain, and the Philippines. Coursework will include discussion-based and written responses to weekly readings and listening assignments and small group presentations on a Spanish colonized space not covered in one of the central course modules. The ability to read musical notation is not required.

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass, and Adams.

MUS 149  (F) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Mica Levi, or Björk. In this class, we will look at and listen to films from different times and places, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, Tesori, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

"There are only three things that America will be remembered for 200 years from now when they study the civilization: The Constitution, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."--(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movements that changed the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross instrumental-influence) and cultural connections (racial, technological and economic) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane, and Wayne Shorter.

Nuns, shepherds, demi-gods, tyrants, warriors, angels, and saints. No matter what story you tell, spectacle is never just spectacle. Whether in an opera, a pageant, or a comic play, the costumes, stage machinery, and visual effects are deeply encoded with political, religious, and cultural meanings. In this course, we will explore how music and spectacle worked together to create complex layers of meaning in various cultural contexts throughout the late medieval and early modern world (ca. 1400-1750). In doing so, we will consider how the magnificent representations of aristocratic, imperial, and colonial power central to such dramatic performances reveal wider cultural issues of gender, race, and religion. The course structure will follow a series of thematic modules, each addressing several case studies, on topics such as colonial power, women and madness, religious fervor, political propaganda, and patronage. Each week, students will take an active role in analyzing, discussing, and presenting on these topics and their related case studies both in and outside of class. For the final project, students will work in groups to develop fictional podcast interviews between historical spectators of an early modern musical-dramatic performance of their choosing. MUS 176  (F)  Protest Song

What's in a song? And how might it connect to our disparate cultures, politics, and identities? Throughout history, the genre of song has been a compelling mode of self-expression. It encodes specific elements of identity, emotion, history, and culture by combining the power of lyric poetry with that of the human voice. It is no wonder, then, that it has also functioned as a primary vehicle for expressions of political resistance, protest, and
dissent within a range of socio-cultural movements around the world. In this course, we will consider the fundamental question of what makes a song a
protest song. We will begin by defining key ideas of resistance and protest within music more broadly. We will then go on to consider what kinds of
socio-political meaning can be encoded within a song through its lyrics, musical composition, and performance style. To that end, the class will spend
the semester investigating a series of case studies from around the world in historical context, including examples from southern Italy, Mexico, South
Korea, Egypt, Ireland, South Africa, and the United States. Examples will include songs by well-known figures such as Big Mama Thornton, Janis
Joplin, Kendrick Lamar, Bob Dylan, Umm Kulthum, and Roberto Murolo, as well as anonymous examples from traditions like the Mexican son jarocho,
African American spiritual, Irish rebel song, classic Neapolitan song, and South Korean protest song. In addition to weekly reading and listening
assignments, students will spend the semester creating curated playlists of songs associated with socio-cultural movements of political protest,
resistance, and/or dissent to be presented and discussed during the final week of class.

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across
cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered
ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing.
We will explore the ways that ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption.
Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will
consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of
culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (e.g. Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel), international forums for the expression of national sentiment (the Olympics, World Cup, and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Homi K. Bhabha, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region’s sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab “heritage” and “modernity,” and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

**Difference, Power, and Equity Notes:** This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

We will examine two forms that embody continuity of tradition or the impact of societal, political or economic change. Lamban was created by the Djeli, popularly called Griots served many roles in the kingdoms of Ghana and Old Mali from the 12th century to current times. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it is practiced by the Mandinka people. Bira is an ancient and
contemporary spiritual practice of Zimbabwe's Shona people. While these forms are enduring cultural practices, Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth and their aspirations for independence at the end of the 1950s. We will also consider the introduction of these forms outside of their origin. This course can be taken for academic and/or PE credit.

**Class Format:** Class hours will be used to learn and use the dance and music of at least two forms including historical context, and individual or group performance project. When possible, our process will include guest artists and field trips to see live performances. As well as use of the archives at Jacob's Pillow Dance Festival, Sawyer Library and the art collection at Williams College Museum of Art.

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

**MUS 231  (F)  Music in History I: Music and Culture from Antiquity to 1750**

This course explores over 1500 years of music-making in (and around) Europe and the Americas from antiquity to 1750 through an investigation of significant musical styles, forms, and theories in cultural and historical context. Our primary inquiry will be to consider how and why these musical styles and forms were created and circulated—through both oral performance and the written medium—by considering the major historical, cultural, technological, and aesthetic issues surrounding them. We will further contextualize these developments within a deeper consideration of the political, religious, racial, and gender-based interactions and divisions throughout history. In doing so, the course introduces the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day. Weekly coursework will include readings on music historical topics, as well as listening and score analysis of key repertory in modern transcription. Assessments will take place throughout the semester through listening/score quizzes, exams, primary source presentations, and a research-based essay project focused on repertories and practices outside of the traditional musical canon.

**Class Format:** lecture-discussion

**MUS 232  (S)  Music in History II: Classical and Romantic Music**

MUS 232 traces the development of Western art music from 1750 to 1900. Through listening, reading, and score analysis, we will study a broad range of composers and genres, Classical and Romantic aesthetics, and connections between music and political, philosophical, social, and cultural developments of the period. Composers include Haydn, Mozart, Beethoven, Schubert, Robert Schumann, Clara Schumann, Fanny Mendelssohn Hensel, Berlioz, Chopin, Liszt, Verdi, Wagner, Brahms, Tchaikovsky, Mahler, and others. Some of the topics we will discuss include the changing role of composers in society, music's relationship to the other arts, challenges faced by female composers, controversies surrounding music and meaning, the interaction of music and drama in opera, and musical nationalism.

MUS 233 (F) Music in History III: Art Music Since 1900
A historical survey of European and American art music from the early twentieth century to the present. Encounters with this music often challenge our ears and musical minds and require us to reconsider fundamental conceptions of music itself. Throughout the course, we will pursue a contextual approach and will investigate this music in relation to contemporary developments in the other arts, to popular musical styles, and to global intersections. We will carefully consider the ways in which evolving conceptions of race, ethnicity, and gender shaped this music history. Topics and styles will include: modernism (atonal expressionism, twelve-tone techniques, neoclassicism); new technologies (electronic, multimedia, digital); the impact of jazz at home and abroad; American experimentalism; postmodernism (minimalism, neoromanticism); nationalism (Eastern European, Latin American, East Asian); and the impact of geopolitics on musical composition (totalitarianism; World War II; Cold War).

MUS 234 (F) Soundscapes of Renaissance Europe
What was the sonic experience of living in late-medieval and early-modern Europe? This course will explore the sights and sounds of daily life for cultural elites as well as the average urban resident. Although it is often vocal polyphony that first comes to mind when thinking about Renaissance music, acoustic environments were complex, noisy, and diverse. This course aims to reflect that heterogeneity: topics include bells, processions, music and architecture, instrumental music, plainchant, visual depictions of music-making, and uses of music to project power, as well as sacred and secular vocal polyphony. Students will zoom in on cities, courts, and churches, especially the musical centers of Bruges, Florence, Ferrara, the Imperial Court of Holy Roman Emperor Charles V, and Bavaria. The course will examine music by some of the most important composers of the era, including Guillaume Du Fay, Josquin des Prez, Philippe Verdelot, Nicolas Gombert, and Orlando di Lasso.

Class Format: Meeting twice per week. Class discussion will be central to this course.
Requirements/Evaluation: in-class preparation and participation, short mid-term paper, final presentation, and final paper
Prerequisites: ability to read musical notation

MUS 235 (S) Music in the Global Middle Ages, ca. 500-1500 (WS)

Cross-listings: GBST 231

Primary Cross-listing

Spanning 1000 years, the period encompassing the Middle Ages (ca. 500-1500) was a time of experimentation, exploration, and growing interconnection around the world. From economic expansions to developing trade routes and from violent religious crusades to flourishing universities, cities, and courts, opportunities for cultural investment and exchange among regions in Western Europe, North Africa, and Central and East Asia were plentiful, if not always peaceful. In this seminar, we will consider how a global historical perspective shifts our understanding of music in the Middle Ages from one based on hegemonic European progress in isolation to one that reveals a multitude of influences, interactions, and interconnections among people of various cultures, races, and religions both within and outside of the European continent. In this tutorial, we will investigate a series of case studies in order to address how and where these global interconnections took place and what musical practices flourished as a result. We will give special consideration to the following topics: orality and literacy, race and difference, the politics of religion, economic power, and manuscript culture. In grappling with these topics, students will engage in weekly readings on musical and broader historical topics, listening and score analysis of key repertory in modern transcription, and study of original notation through manuscript facsimiles.

Requirements/Evaluation: Students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks. Evaluation will be based on five papers/presentations, and five responses.

MUS 238 (S) Music in Modernism (WS)

The synthesis of the arts was a primary pursuit of modernist composers, artists, choreographers, and writers. Seeking either to realize Wagner's "total work of art" in the theater, or to uncover the more general correspondences celebrated by Baudelaire, modernists consistently looked beyond their own media. Collaborations on works of "total theater" were common: Satie, Cocteau, Massine, Picasso; Brecht, Hindemith, Weill; Stravinsky, Nijinsky, Bakst; Claudel, Honegger, Rubinstein. Modernists explored new connections between music and color (Scriabin, Kandinsky), music and literature (Joyce, Mann), and music and dance (Duncan, Graham). Occasionally, modernists attempted to unite the arts on their own: Schoenberg painted, Pound composed, and Kokoschka wrote. Our focus will be on those works of music, art, dance, and literature that explored new relationships between the arts. One goal will be to investigate whether specific equivalents exist between techniques of modernist painting, poetics, choreography, and composition. Aware of the risks and rewards of interdisciplinary study, we will attempt our own theories of artistic synthesis. This course is designed to bring multiple perspectives to the study of music in modernism.

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

MUS 250 (F) The Musical Language of Louis Armstrong

"You know you can't play anything on a horn that Louis hasn't played" - Miles Davis 1958 The study of jazz language inevitably involves back-scrolling through generations of progenitorial influence, and most of these paths lead back to Louis Daniel Armstrong 1901-1971. Arguably the most historically important musician in American and modern world history, Armstrong is widely credited as being responsible for popularizing the concept of the jazz "solo," as well as marrying the materials and performance traditions of the Blues and American popular song, and forever changing the aesthetic of vocal performance across a wide swath of Black American genres. By virtue of being so studied and imitated, his personal musical vocabulary as a trumpeter and vocalist can be seen to have informed all jazz music that followed in his wake, from stride piano and early big band arrangements to Parker, Davis, Coltrane etc. More than any other individual, his rhythmic language exemplifies the popular but definition-resistant language of "Swing."

This listening and performance intensive seminar will be an opportunity for committed students of jazz music to absorb this language in a focused way. Seminar meetings are anchored by weekly transcription projects sung and played individually and collectively, informed by occasional lectures and readings from biographical, but also and especially Armstrong's own voluminous autobiographical writings. We will focus in particular on the "Rosetta Stone" of jazz recordings, the Hot Fives and Hot Sevens sessions of 1925-29, and in so doing also study the work of selected Armstrong collaborators of the period including Earl Hines, Johnny Dodds, Lil Hardin Armstrong and Kid Ory. We will also cover earlier periods of his career, with ensembles led by King Oliver and Fletcher Henderson, and study the work of other significant early jazz soloists who performed with and mutually evidenced influence on/by Armstrong including Sidney Bechet, Bessie Smith, Fats Waller, and Coleman Hawkins.

Requirements/Evaluation: Weekly Performance of transcription projects, final exam

Cross-listings: AFR 254

Primary Cross-listing
In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study, guided listening and performance, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and its evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

MUS 291 (F)(S) Chamber Music Workshop

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course that can only be taken on a pass/fail basis. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching sessions during the semester. It is recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in to the coaches at the end of the semester. In addition, students are expected to practice the assigned music individually and are required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. The ensembles will be organized based on skill levels and the instruments represented. To register for the course, a student must contact the Chamber Music Performance Coordinator. If you are accepted into a chamber group the instructor will send you a link to an online form to complete registration. The Music Department will submit the registration to the Registrar’s Office. It is not possible for the student to register directly through PeopleSoft. Students will be assigned to course numbers 291-298 based on the number of semesters of instruction already taken in one particular section.

Class Format: partial credit fifth course

Requirements/Evaluation: preparation for weekly coachings

Prerequisites: Permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability. Enrollment in more than one chamber group must be approved by the chair.

Enrollment Limit: 12

Enrollment Preferences: Preference given to more advanced students, to be determined by audition as necessary.

Cross-listings: AAS 316
Primary Cross-listing
Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging
with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski).

Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation: Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

Writing Skills Notes: Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

Difference, Power, and Equity Notes: Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

MUS 323 (S) Arts Organizing in Africa and the Diaspora (DPE)

Cross-listings: DANC 323 / THEA 321

Primary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls' education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities’ interactions with multinational corporations, and representational politics in performance.

MUS 381 (S) Choral Conducting

The purpose of this course is to become fully acquainted with the fundamentals of conducting gesture, score study, and rehearsal technique as it relates to the choral rehearsal. Using the class as the primary practice choir, students will learn to express specific musical ideas and concepts through conducting patterns and body language, and will develop fluency and ease in these mediums through the study of varied repertoire and techniques. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

MUS 475 (S) Hearing Through Seeing: Music and Visuality (WS)

We hear music, but seldom is the experience purely aural -- the visual also plays a crucial role. Sound and sight converge when we observe musicians performing in concert venues, patterns of notes and rhythms on the musical score, pictures and text on album and sheet music covers, moving images on screens in films, music videos, and video games. A programmatic work conjures specific images, even whole narratives, in our "mind's eye," or imagination. A work of absolute music, such as a fugue or symphony, can do so as well, although what we envision here may be largely abstract. With hybrid genres, such as opera, musical theater, and dance, the musical and the visual jointly command our attention, often in a spectacular display.
This seminar explores myriad ways that "seeing" mediates our experience of hearing, making, and understanding music. We will examine a broad...
range of topics, including synesthesia; visuality in performance and interpretation; visual metaphors such as line, color, and space in music analysis and criticism; music and representation; intersections between music and painting, sculpture, and architecture; operatic staging; illuminated music manuscripts; eye music and graphic notation; and sound and image in digital media.

**Class Format:** Students will give presentations on the subjects of their papers.

**Requirements/Evaluation:** evaluation will be based on three 5-6 page papers, three presentations, and class participation

**Prerequisites:** ability to read music

**Enrollment Limit:** 8

**Enrollment Preferences:** junior and senior music majors, and any student with a demonstrated interest in music

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** satisfies the 400-level course requirement for the music major

**MUS 476 (S)** Orality and Literacy in Historical Musical Practice (WS)

Music is an inherently oral/aural, ephemeral art form. Music history is reliant upon, and tends to privilege, its symbolic rendering in fixed notation. Yet, notated music—described by musicologist Nino Pirrotta as "the visible tip of an iceberg... seven-eighths of [which] remain submerged"—tells only a fraction of the story we seek to understand when studying musics of the past. In this seminar, we will address the unique challenges of studying the relationship between orality and literacy in historical musical practice. We will begin by considering the creative role of memory and embodied ritual in oral musical performance and transmission, as well as the ways in which various cultures have attempted to preserve such practices and the inherently transformative process they undergo when fixed in notation. We will then explore the range of theories and methodologies that scholars and performers have taken in approaching oral musical practices of the past in relation to varying levels of textual and musical literacy. Topics may include studies of epic poetry, jazz improvisation, medieval plainchant, troubadour song, improvised counterpoint, son mexicano, Neapolitan lyric song and dance, Ethiopian Christian chant, medieval and early modern instrumental music practices, Arab-Andalusian music, music in the commedia dell'arte, and various examples of contrafacture. Over the course of the semester, students will develop and present their own independent research aimed at producing a collaborative mock conference/performance as a final project for the class.

**Requirements/Evaluation:** evaluation will be based on three 5-6 page papers, three presentations, a final collaborative conference/performance, and class participation

**Prerequisites:** ability to read music

**Enrollment Limit:** 8

**Enrollment Preferences:** junior and senior music majors, and any student with a demonstrated interest in music
