Politics is most fundamentally about forging and maintaining community, about how we manage to craft a common destiny guided by shared values. It is also about how we engage in problem solving, facilitate citizen action, and participate in world-making. All communities need a way to reconcile conflicts of interest among their members and to determine their group interest; they need to allocate power and to determine its just uses. Power may be used wisely or foolishly, rightly or cruelly, but it is always there; it cannot be wished away. Political science attends to the ways that social power is grasped, maintained, challenged, or justified. The contests over power and the values that it should be used to further give politics its drama and pathos. The effort to understand politics aims not only to describe and explain, but also to improve political life.

The Political Science major is structured to allow students either to participate in the established ways of studying politics or to develop their own focus. To this end, the department offers two routes to completing the major, each requiring nine courses. We invite students either to organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, and comparative politics), or to develop individual concentrations reflecting their particular interests, regardless of subfields.

**MAJOR**

**Subfield Concentration Route:** Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 110-140, two electives of the student’s choice at the 200 or 300 level and the senior seminar (or an individual project) in the student’s subfield. Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield courses, in addition to taking Political Science 130 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth
requirement). The faculty advisor must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level elective courses (courses outside of the 110-140 core courses) can count toward the major.

**Individual Concentration Route:** Alternatively, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, one is from the 110-140 core courses, three are electives at the 200 or 300 level, and one is a senior seminar or individual project. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level elective courses (courses outside of the 110-140 core courses) can count toward the major.

**ADVISEMENT**

When a student chooses to major in Political Science (usually at the end of the sophomore year), they may register with any Political Science faculty member. The registering faculty member will ask for preferences for a permanent faculty advisor and an effort will be made to match students with their preferred advisor. In all cases, students will be paired by the beginning of junior year with an advisor who will continue with them through graduation.

**COURSE NUMBERING**

The course numbering used by the Political Science Department reflects the format and specialization of a course. The 100-level courses are divided between our core courses and electives. The core courses, numbered from 110-140, serve as introductions both to the substance of politics and the subfields organizing the study of politics. The introductory subfield course must be completed before the senior year and preferably before junior year. The 100-level electives are designed to address political topics from multiple subfield perspectives; many are seminars designed for first-year students. The 200-level courses are electives that delve into political processes, problems, and philosophies, typically within one of the four subfields though occasionally in ways that cut across subfields. 100-level and 200-level courses have no prerequisites. 300-level courses are more specialized and have prerequisites. 400-level courses are senior seminars offered for students in the major; senior seminars also are open to juniors and to non-majors if space permits. In general, the main subfield of non-core courses can be read from the middle digit of the course number: 0, 1 or 5 for American politics; 2 or 6 for international relations; 3 or 7 for political theory; 4 or 8 for comparative politics. Because the relevant course number may not be available, and as some courses may not fit the subfields or may fit multiple subfields, please check the “attributes” entry to confirm how the course is categorized by the department.

**WINTER STUDY PROJECT**

The department welcomes relevant WSP 99 proposals that can make important contributions to the student’s understanding of public affairs and politics. Majors, seniors, and students without previous WSP 99 experience have preference.

**THE JUNIOR YEAR ABROAD**

A major in Political Science can be readily and usefully combined with study off-campus. Generally, only one course taken per semester abroad in a program approved by the College may be counted toward the requirements for a degree in Political Science.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, though sometimes a syllabus may be needed. How much we need may depend on our familiarity with the institution or program.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. Typically we allow not more than one course per semester, or two per year, to count for major credit. In special circumstances, the chair may consider granting an exemption and allow an additional course.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No, although this depends on the course. If, after considering description and institution, we feel it is not rigorous enough, we will not count it.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. We do not allow the senior seminar requirement to be fulfilled by study abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. One such required course (either Ancient or Modern Political Thought for those specializing in political theory within the major) can be fulfilled by an appropriate study abroad course.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

When issues arise that’s almost always because the student did not keep department adequately informed of evolving plans.

PREPARATION FOR GRADUATE STUDY

The Department recommends that students contemplating graduate school, especially if they plan to study fields outside of political theory, take a course in research methods, such as PSCI 493, and/or a class in quantitative methods, such as POEC 253.

THE DEGREE WITH HONORS IN POLITICAL SCIENCE

To become a candidate for honors, the student must apply in the second semester of their junior year for PSCI 493(F), the Senior Thesis Research Design Seminar, by (1) submitting a “statement of interest and qualifications” and (2) having a record of academic excellence in Political Science, generally a major GPA of 3.5 or above. Accepted students who write a successful thesis research proposal in PSCI 493 will then be invited to continue on to PSCI 494(S), Senior Thesis Research and Writing Workshop. Also required for these students is participation in the senior thesis winter study course (PSCI 31). The fall and spring semester senior thesis courses are in addition to the required nine (9) courses for the major. Additional details can be found at the department website.

PSCI 110  (F)(S)  Introduction to American Politics: Power, Politics, and Democracy in America

Begun as an experiment over 200 years ago, the United States has grown into a polity that is simultaneously praised and condemned, critiqued and mythologized, modeled by others and remodeled itself. This course introduces students to the dynamics and tensions that have animated the American political order and that have nurtured these conflicting assessments. Topics include the founding of the American system and the primary documents (the Declaration of Independence, the Constitution, and the Federalist Papers), the primary institutions of national government then and now (Congress, the presidency, and the Supreme Court), and the politics of policy-making in the United States. We study structures, processes, key events, and primary actors that have shaped American political development. In investigating these topics, we explore questions such as these: How is power allocated? What produces political change? Is there is a trade-off between democratic accountability and effective governance? How are tensions between liberty and equality resolved? Do the institutions produce good policies, and how do we define what is good?

Requirements/Evaluation:  depending on the section, some combination of response papers, short-to-medium papers, projects, exams, and class participation

Prerequisites:  this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances

Enrollment Limit:  30

Enrollment Preferences:  first-years and sophomores

Expected Class Size:  30

Grading:  no pass/fail option,  no fifth course option

PSCI 120  (F)(S)  Introduction to International Relations: World Politics
This course provides an overview of the central theories, concepts and debates in international relations. It entertains competing answers to central questions in the field: What are the implications of an anarchic political structure for order and justice in world politics? What are the primary causes of war and conflict? What are the necessary conditions for peace and stability? What role do moral and legal considerations play in world politics? How has globalization changed the international system?

Requirements/Evaluation:  Depending on the section, some combination of a midterm paper, one or two short response papers, a group project and presentations, a podcast, and an in-person final exam.

Prerequisites:  none
Enrollment Limit:  30
Enrollment Preferences:  first-year students and sophomores

PSCI 130  (F)(S)  Introduction to Political Theory
Is politics war by other means? Is it merely a practical way to meet our needs? Or is it, rather, the activity through which citizens pursue justice and the good life? And what is justice? How can it be established and secured? Where does it apply? To whom? What are the powers and obligations of citizenship? Who decides? On what basis? Political theory addresses questions such as these as it investigates the fundamental problems of how people can, do, and ought to live together. The questions have sparked controversy since the origins of political thinking; the answers remain controversial now. This course addresses the controversies, drawing examples from struggles over such matters as racism, colonialism, revolution, political founding, economic order, and the politics of sex and gender, while focusing on major works of ancient, modern, and contemporary theory by such authors as Plato, Aristotle, Machiavelli, Hobbes, Rousseau, Mill, Marx, Nietzsche, Beauvoir, Arendt, Fanon, Rawls, Foucault, and Young. Themes may include power, authority, freedom, justice, equality, democracy, neoliberalism, feminism, and violence, though the emphases will vary from semester to semester.

Requirements/Evaluation:  Three papers, class participation, and occasional informal writing/Glow posts.

Prerequisites:  none; this is an introductory course, open to all, including first-year students
Enrollment Limit:  25
Enrollment Preferences:  first-years and sophomores

PSCI 140 (F)(S) Introduction to Comparative Politics

The comparative study of politics looks mainly at what goes on inside countries, the domestic dynamics of power, institutions, and identities. This class considers analytic concepts central to the study of politics generally--the state, legitimacy, democracy, authoritarianism, clientelism, nationalism--to comprehend political processes and transformations in various parts of the world. Themes include: Where does political power come from? Does economic development drive political change, or the other way around? What is democracy, how does it arise, and how might it fail? How does international war leave its mark on domestic politics? How do religion and politics interact? Materials include classic texts, recent theoretical works, journalism, commentary, fiction, and a variety of sources related to current events in Ukraine and elsewhere.

Class Format: directed discussion
Requirements/Evaluation: Three 3-page papers, a short interpretive exercise, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-years and sophomores
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

PSCI 155 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Cross-listings: PSCI 155 LEAD 155
Secondary Cross-listing

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality-can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Unit Notes: subfield open in Political Science major
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 155(D2) LEAD 155(D2)
Attributes: LEAD American Domestic Leadership
PSCI 158 (F) Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, contestation over basic citizenship rights, and political violence. The pandemic, related economic distress, social protests and insurrection have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. Our investigation will include substantial class-time collaboration with a similarly structured undergraduate course taught by a sociologist at Johns Hopkins University and may include an optional weekend research trip.

Requirements/Evaluation: active class participation, three 4-page essays, multiple group assignments, and class presentations

Prerequisites: first-year students

Enrollment Limit: 14

PSCI 160 (F) Refugees in International Politics (DPE) (WS)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation: Ten essays: five lead, five response. The first two weeks' essay grades will be unrecorded.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, to be selected randomly from list of those enrolled.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In addition to writing every week, students will have a chance work on specific skills cumulatively.

Difference, Power, and Equity Notes: This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 161 (S) America and the World

Cross-listings: PSCI 161 LEAD 165 GBST 103
This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a “grand strategy.” By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: discussion

Requirements/Evaluation: short papers, class participation, and final exercise

PSCI 171  (S)  Contemporary Africana Social and Political Philosophy

Cross-listings: PSCI 171 AMST 132 AFR 132

Secondary Cross-listing

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy: the African, Afro-North American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Dionne Brand, Aimé Césaire, Angela Davis, Édouard Glissant, Kwame Gyekye, Paget Henry, bell hooks, Katherine McKittrick, Charles Mills, Nkiru Nzegwu, Oyèrónke Oyewùmí, Ngugi wa Thiong'o, Cornel West, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: first- and second-year students

PSCI 172  (F)  Politics after the Apocalypse

Cross-listings: STS 135 PSCI 172
Primary Cross-listing

What shape will politics take after the apocalypse? Even before the coronavirus pandemic gave us reason to wonder if we are, in fact, living through an apocalypse, speculation about the end of the world and its aftermath pervaded recent television, movies, literature, philosophy, and critical theory. In this class we draw these works into conversation with political theories of the "state of nature" and "state of exception" to better understand what political possibilities are opened and foreclosed in times of crisis. What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? What does it say about pre-pandemic politics that we were so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? And how will the unfolding pandemic change how we respond to these stories? Class will be driven primarily by discussion, typically introduced by a brief lecture.

Requirements/Evaluation: two 3-5 page papers, one short story (7-15 pages and including an explanatory cover letter), contributions to a class project documenting and analyzing the pandemic, and class participation

Prerequisites: first- or second-year students, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: first-year students

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

PSCI 173  (F)  Islamophobia: A Global Perspective  (DPE)

Cross-listings: PSCI 173 REL 107 GBST 105

Secondary Cross-listing

This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Cross-listings: PSCI 181 GBST 101 REL 126

Secondary Cross-listing
In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

PSCI 207  (S) Approaches to Asian Studies

Cross-listings: ASIA 210 PSCI 207

Secondary Cross-listing
Home to over half of the world's population and to more than twenty of the world's largest cities, Asia has gained global prominence in recent years; the twenty-first century in fact has widely been deemed the 'Asian Century'. But what is Asia? And what does it mean to study this richly diverse region? This seminar will address these questions with the aim of introducing students to important theoretical topics and key concepts that are relevant to the comparative and critical study of Asia. One central concern will be to consider the different ways of understanding "Asia", both in terms
of how the term and the region have been historically constituted; another will be to facilitate an understanding some of the salient factors (geography, belief systems, economy and polity)--past and present--that make for Asia's coherence and divergences; a third concern will be to unpack the troubled notions of "East" and "West" and re-center Asia within the newly emerging narratives of global interconnectedness. Beginning with the evolution of the field, this course will equip students with the methodological tools to critically navigate their own specific regional, inter-regional, or interdisciplinary tracks in the Asian Studies concentration.

Requirements/Evaluation: Two short papers (5-6); one longer final paper (10-15); discussion participation.

Prerequisites: At least one prior course related to Asia

Enrollment Limit: 20

Enrollment Preferences: Asian Studies concentrators; seniors; juniors; sophomores

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

PSCI 208 (F) Wealth in America (WS)

The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation: four 5-page papers and a final 10-page paper that is a revision and extension of a short paper

Prerequisites: none; not suitable for first-year students

Enrollment Limit: 19

Enrollment Preferences: Political Science majors with concentration in American politics and Political Economy majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: American concentration

Distributions: (D2) (WS)

Writing Skills Notes: Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PSCI 209 (F) Poverty in America

Cross-listings: PSCI 209 WGSS 209

Primary Cross-listing

Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?
Requirements/Evaluation: class participation, two or three short papers, and a final paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science, Political Economy, and Women's, Gender and Sexuality Studies majors and concentrators in Public Health

Cross-listings: LEAD 205 PSCI 212
Secondary Cross-listing
America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?
Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Leadership Studies concentrators and Political Science majors

PSCI 213  (F)  Mass Media and American Politics
According to recent estimates, the average American spends 11 hours per day consuming media—the is, watching television and movies, reading print sources, listening to music, radio, and podcasts, and scrolling social media. How does all of that media consumption influence the American political system? Scholars, practitioners, and observers of American politics have debated whether the net effect is positive or negative. Critics argue that today’s media is shallow and uninformative, a vector of misinformation, and a promoter of extremism and violence. Some defenders argue that the media is a convenient scapegoat for problems that are endemic to human societies, while others claim that it actually facilitates political action aimed at addressing long-ignored injustices. In addition to addressing this important question about the health of American democracy, students will learn how the traditional media and social media influences Americans' political attitudes and behaviors. Among the topics we will discuss are the incentives, norms, and practices of news-making organizations; how politicians try to sway the public during campaigns; how the media covers campaigns; and how the media influences Americans’ racial attitudes.

**Requirements/Evaluation:** two short (4-5 page) papers, one non-written assignment roughly equivalent to a 8-12 page paper in terms of workload, a final exam, and class participation

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Political science majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PSCI American Politics Courses

---

Arguably, the dominant discourse in American politics today is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

**Requirements/Evaluation:** class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** poli sci majors first, seniors second, juniors third, sophomores fourth

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

PSCI 215 (S) Race and Inequality in the American City

Cross-listings: PSCI 215 LEAD 215

Primary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

PSCI 216 (S) American Constitutionalism I: Structures of Power

Cross-listings: PSCI 216 LEAD 216

Primary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendance. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion

Requirements/Evaluation: three essays (3-4 pages, 5-6 pages, 7-8 pages), a two-part final exam, and class participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors

Cross-listings: PSCI 217 LEAD 217

Primary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

PSCI 218 (S) The American Presidency
Cross-listings: PSCI 218 LEAD 218

Primary Cross-listing

Impeachments. Investigations. Polarization. Many argue that the presidency has been fundamentally altered by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, rules and norms, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with the protection of civil rights and liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? Exploration of these and other questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership, congressional-executive interactions, social movement and interest group relations, and media interactions. Attention will focus largely on the modern, twentieth and twenty-first century, presidency, though older historical examples will also be used to help us gain perspective on these problems.

Class Format: The course will feature both seminar discussion and several small group research projects.
**Requirements/Evaluation:** three 5 to 7-page papers, small group projects, and class participation involving weekly writing

**PSCI 220 (F) The U.S. and Afghanistan: A Post-Mortem (DPE)**

**Cross-listings:** PSCI 220 ASIA 208 GBST 208 ANTH 208

**Secondary Cross-listing**

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerrilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

**Requirements/Evaluation:** grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper
Prerequisites: none
Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Expected Class Size: 15-20
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

PSCI 222 (F) International Relations in the Cyber Age

This is a class about international politics in the age of cyberweapons. At a general level, it focuses on a set of core conceptual questions: How has the advent of cyberweapons changed how international politics works? Are cyberweapons that target critical infrastructure similar to nuclear weapons, or is that comparison fundamentally flawed? Do concerns about information security alter states' most basic political calculations? How can we expect cyberweapons to shape the future of warfare, intelligence, and security competition? How effective are strategies like cross-domain deterrence? Should the world try to regulate the use of these technologies and, if so, how exactly? The course begins with several sessions that provide a technical
overview of key information security concepts and an examination of some prominent hacks. In addition, the beginning of the course will include several classes on the theoretical implications of the advent of the cyber age, as well as a brief historical overview of information security in the post-World War II period. From there, the course will cover a number of important topics and case studies, such as Stuxnet, NotPetya, cyber espionage, intellectual property theft, threats to critical infrastructure, misinformation, propaganda, election interference, the potential implications of quantum computing, and the prospects for the establishment of an international cyber arms control regime. In general, the course will focus on competition between some of the world's premier cyber powers, such as China, Iran, Israel, North Korea, Russia, and the United States.

Requirements/Evaluation: Class participation; Two analytical essays, 6-7 pages in length; Final exam

PSCI 223  (F)  International Law

International law embodies the rules that govern the society of states. It spells out who can be a sovereign state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also creates status for other actors, such as international organizations, soldiers, national liberation movements, refugees, terrorists, transnational air and sea shipping companies, and multinational corporations. International law is similar to domestic law, with one very crucial difference: it is not enforced by a centralized, sovereign state. There is no world government. In most other respects, it is the same: it protects the status quo, including the unequal distribution of power among its members; it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful and legitimates their interests; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. Like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice and, perhaps, for power to be tamed by the pressure to be legitimate.

Requirements/Evaluation: quizzes, Glow posts, two papers on assigned topics, two projects (video, audio, or paper)

Prerequisites: None, although those who have not taken PSCI 202 at Williams will be required to review one lecture ppt, then pass a basic quiz based on it by the end of the first week.

PSCI 224  (F)  Neo-liberalism: What Is It and Why Does It Matter?

We live in the era of neo-liberalism. But what does this mean? This course will focus on neo-liberalism in comparative perspective, looking mainly at the US and Europe. It will consider how neo-liberalism is defined, the role of states in making and maintaining neo-liberalism, the centrality of markets to neo-liberal conceptions, and the kinds of politics that produced and are produced by neo-liberalism. Economically, the course will look at the institutional configuration of neo-liberalism, changes in economies, growing inequality, the financial crises, and prevalence of debt. Politically, the course will address changes in the role of government, what governments do and do not do, the growing influence of financial interests, the role of identities in mobilizing support for and legitimating governments, and the impact of these developments on the status of citizenship and democracy.
PSCI 225 (S) International Security

This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

PSCI 226 (S) Nuclear Weapons and World Politics

This is a course about international politics in the nuclear age. The class will address a combination of conceptual, empirical, and policy questions, such as: Have nuclear weapons had a "revolutionary" effect on world politics, such that, fundamentally, international relations no longer works in more or less the same way that it did before the advent of nuclear weapons in 1945? Do nuclear weapons have an essentially stabilizing or destabilizing effect? How, if at all, do nuclear weapons affect how political disputes run their course? How significant of a threat are concerns like nuclear proliferation, nuclear terrorism, and nuclear accidents? How does a state's nuclear posture affect basic political outcomes? Is it possible to return to a world without nuclear weapons? The course will focus on these questions using an interdisciplinary perspective that leverages political science

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

PSCI 227 (S) International Relations of the Middle East

Cross-listings: PSCI 227 LEAD 227

Primary Cross-listing

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures—either posted on the class website beforehand or given at the start of each class—with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

Prerequisites: none

PSCI 228 (S) International Organization

Tens of thousands of international organizations populate our world. IGOs, whose members are sovereign states, range from the Nordic Association for Reindeer Research to NATO and the UN; INGOs, whose members are private groups and individuals, include the International Seaweed Association as well as Doctors Without Borders and Human Rights Watch. We will investigate theories about where they come from, what they do, and to whom they matter, and explore controversies surrounding their agency, legitimacy, efficiency, and accountability. We cover the history,
structures and functions of international organizations using case studies.

Requirements/Evaluation: two short papers, a presentation, one longer paper, one group project.

Prerequisites: none, but the introduction to international politics (202) is strongly recommended. If you have not taken that, you will need to go through a four-hour online tutorial I have set up by the end of our first week. Open to first-year students

Enrollment Limit: 25

Enrollment Preferences: Political Science majors, Political Economy majors, Public Health concentrators

PSCI 229 (S) Global Political Economy
This course offers a broad introduction to the contemporary global political economy, emphasizing the inherent and inseparable intertwining of politics and economics, power and wealth, the state and the market. The core of the course is made up of analyses of global trade, global finance, natural resources, and migration, with special attention to subjects such as free trade, currency wars, and border walls. Four class debates will focus general concepts on a specific topic: the global implications of the Russo-Ukrainian War. We conclude the course with a look toward the future of global capitalism and of the liberal world order.

Requirements/Evaluation: two 2000-2500 word papers, in-class debate, final exam, class participation

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Political Science and Political Economy majors and prospective majors

PSCI 231 (F) Ancient Political Thought

Cross-listings: PSCI 231 PHIL 231

Primary Cross-listing

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: discussion

Requirements/Evaluation: three 7- to 8-page papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors
PSCI 232 (S) Modern Political Thought

Cross-listings: PHIL 232 PSCI 232

Primary Cross-listing

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings

Prerequisites: none; open to all

Enrollment Limit: 25

Enrollment Preferences: Political Theory concentrators, then Political Science majors

Spring 2024

SEM Section: 01 MR 2:35 pm - 3:50 pm Laura D. Ephraim

PSCI 234 (S) Freedom

We all want to be free--at least most of us say we do. The desire for political freedom is as old as the ancient world and as new as today's movements and liberation struggles. But what do we mean when we claim to want freedom? What institutions and social conditions make political freedom possible? For instance, do the claims of individual freedom conflict with those of community? With equality? With authority? Does freedom make us happy? Is it what we really want? And if it is, will we find it by engaging or turning away from politics? This course confronts these questions through readings drawn from a variety of classic and contemporary sources, including works of fiction, autobiography, journalism, law, philosophy and political theory, and social science. Our discussions will address such topics as activism and stoicism; equality and economic freedom; sexual freedom and gender politics; freedom of speech and religion; citizenship, migration, and cosmopolitanism; racism and colonialism; mass incarceration; and the uses and limits of state power. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, T. 4:45-8:30 pm*

Requirements/Evaluation: Class attendance and active participation, short essays, and a final paper.

Prerequisites: Not open to first-year students.

Enrollment Limit: 9

Enrollment Preferences: Final selection will be made on the basis of statements of interest solicited after pre-registration, and interviews with the
PSCI 235  (S) Survival and Resistance: Environmental Political Theory

Cross-listings:  PSCI 235 ENVI 235

Primary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  formal and informal writing assignments and class participation

PSCI 236  (S) Feminist Legal Theory  (DPE)

Cross-listings:  WGSS 236 PSCI 236

Primary Cross-listing

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of "new" categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law. Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

Requirements/Evaluation:  One oral presentation; three 6-8 page papers; regular class participation.
Prerequisites: None.
Enrollment Limit: 25
Enrollment Preferences: Preference will be given to PSCI and WGSS majors and JLST concentrators.

PSCI 238 (F) Economic Liberalism and Its Critics
Cross-listings: PSCI 238 POEC 250 ECON 299

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

PSCI 240 (S) Political Theory and Comparative Politics

We live in a society that takes liberalism and capitalism for granted, as the norm that naturally centers collective life. This course draws on foundational thinkers in political theory and comparative politics to explore that premise. To that end, the course will discuss the origins, logic, and meaning of liberalism and capitalism and the relationships between them. Asking whether liberal thought, to borrow the famous joke about economists, assumes the can openers of liberalism and capitalism, taking as given that which is constructed historically, the course will look at leading theories about the role states play in constituting and maintaining capitalist economies, the definition and nature of power in liberal societies, and, more recently, the connection between identities, politics, classes, and states. The readings include Alexis de Tocqueville, Karl Marx, Max Weber, Karl Polanyi, Barrington Moore, Robert Putnam, Michel Foucault, and Edward Said.

Class Format: discussion

PSCI 241 (S) Meritocracy

Cross-listings: SOC 241 PSCI 241

Primary Cross-listing

Although fewer than 1% of Americans have a degree from the country's top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy--rule by the intelligent--in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: one short paper, one long paper, take-home final exam, discussion questions, class participation

PSCI 244 (S) Anti-Muslim Racism: A Global Perspective (DPE)
Cross-listings: GBST 243 PSCI 244 REL 247

Secondary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

PSCI 246 (F) Introduction to Capitalism

Must we choose between “socialism or barbarism?” A century after Rosa Luxemburg’s challenge, it is clear that socialism did not win. Does this mean that we have descended to barbarism? Tracing the path of capitalist development in the rich democracies suggests a range of responses. Some states have developed robust institutions that provide for citizens’ basic needs and check the power of business; others leave the poor threatened by starvation and workers exposed to exploitation. How and why has capitalism evolved in different forms in different countries? This course introduces students to capitalism by examining the struggles between social groups that lead to variation in distributional outcomes and economic performance. Students will develop a conceptual toolkit to study the politics of capitalism based in the economic history of the rich democracies (Europe, United States) in the twentieth century. The second half of the course challenges students to apply this toolkit to the twenty-first century, focusing on attempts to transition from industrial manufacturing to services. We engage pressing questions around technological innovation, populism, financialization, and globalization.

Requirements/Evaluation: Class participation, two presentations, three essays.

PSCI 248 (F) The USA in Comparative Perspective (WS)

Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; national identity and authoritarian populist nationalism; war and state-building; American exceptionalism, religion, and foreign policy;
criminal justice; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores and students who have been denied enrollment in the course previously

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students bring a one-page response written in "E-prime," English without the verb "to be."

PSCI 249  (S)  Black and Brown Jacobins  (DPE) (WS)

Cross-listings:  PSCI 249  AMST 218

Secondary Cross-listing

What does it take to be free in the free world? In this class we explore the dark side of democracy. The title is inspired by C.L.R. James' famous book, Black Jacobins, about the Haitian Revolution (1791-1804). This revolution was the most successful revolt of the enslaved in recorded history. But the irony is that their oppressors were the leaders of the French Revolution across the Atlantic. Those who proclaimed "liberty, equality, fraternity" for themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass' famous 1852 speech, "What to the Slave Is the Fourth of July?" Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois' great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.

Requirements/Evaluation: Participation, weekly journal, two 5-page essays

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 249(D2)  AMST 218(D2)

Writing Skills Notes: "Black and Brown Jacobins" is a writing-intensive course that requires weekly journaling. Journal entries are a means for students to track the progress of their learning, reflect on the reading assignments, practice their writing skills, and receive written feedback. In addition, students will write two persuasive essays in response to a prompt.

Difference, Power, and Equity Notes: "Black and Brown Jacobins" calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora  AMST Critical and Cultural Theory Electives  AMST pre-1900 Requirement
PSCI 250 (F) Political Psychology
This course will examine the role of psychology in politics. The goal is to develop a rich understanding of the foundations of public opinion and political behavior. We will examine the role of social identities, partisan affiliation, concrete interests, values, issues, and ideology in shaping opinion and behavior, as well as the role of external forces such as campaigns, the media, and political elites. Along the way, we will consider a number of longstanding questions in the study of politics, such as: is the public rational? What are the root causes of racism? How does racism influence political choices? Why do people identify with political parties? Why do people vote or engage in other types of political action? How does the mass media and campaigns influence public opinion?

Requirements/Evaluation: class participation, 1-2 short papers (5-7 pages), 1 medium paper (8-12 pages), an oral presentation, and a final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: If the course over-enrolls, please give first enrollment preference to political science majors, followed by political economy majors.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

PSCI 252 (F) Campaigns and Elections
The 2022 midterm elections are happening in November. Though midterm elections historically generate less involvement than presidential elections, much is at stake in the upcoming midterms, as control of Congress and statehouses will likely determine what, if anything, President Biden achieves in the remainder of his term. This course will examine how we conduct the most fundamental of democratic processes in the United States: the people's choice of their representatives. We will examine factors that shape election outcomes such as the state of the economy, issues, partisanship, ideology, social identities with a special focus on race, interest groups, media, and the candidates themselves. A central question we will consider throughout the course if how "democratic" the conduct of campaigns actually is. For instance, does the citizenry have the motivation and capacity to hold public officials accountable? How do resource gaps tied to inequality in society (such as race and class) influence who votes and for whom? Do the mass media and political elites inform or manipulate the public? How closely do candidates resemble the constituencies they represent, and does it matter? We will apply our learning on many of these topics to the ongoing 2022 midterm elections.

Requirements/Evaluation: class participation, 1-2 short papers (5-7 pages), 1 medium paper (8-12 pages), an oral presentation, and a final exam

PSCI 253 (S) The Tragedy of Venezuela
The recent history of Venezuela offers a window into many of the most important political and economic issues faced by people in developing countries. Why does an abundance of oil seem to solve some problems while often leading to perverse economic and political outcomes? How can democracy be made to work better for ordinary people? What does it mean for a government to be truly sovereign? How does corruption grow and
what can we do about it? When should we leave important decisions to technocratic experts? What does it mean today to be progressive? The course first briefly reviews Venezuelan post-Independence history, with an emphasis on the post-1958 democratic settlement. It then explores more deeply the reasons for the breakdown of this settlement, the rise of Hugo Chavez, and the decay of the “21st Century Socialist” regime under Chavez and Maduro. Materials include biographies, documentary films, short videos, economic data, and news reports.

**PSCI 256  (S)  Electoral Politics in the Developing World**

Electoral politics in the developing world often differs from democratic politics in Western Europe and the U.S. Electoral volatility, decrepit state institutions, weak parties, clientelism, and electoral violence in developing democracies complicate foundational theories on representation and accountability. The course surveys the electoral politics of low and middle-income democracies in the developing world, investigating its similarities and differences with the historical and contemporary politics of developed democracies. It examines work on electoral systems, formal and informal institutions, bureaucratic politics, political parties, party systems, clientelism, ethnic politics, and political violence. We will draw on case studies from Latin America, Africa, South Asia, Southeast Asia, and the Middle East to analyze the effectiveness of these theories. Assignments focus on crafting solutions to contemporary political challenges in the developing world.

**Requirements/Evaluation:** one to two papers, midterm, group policy brief, presentation

**Prerequisites:** no prerequisites

**Enrollment Limit:** 25

**Enrollment Preferences:** preference given to political science majors
PSCI 259  (F)  George Orwell: Capitalism, Socialism and Totalitarianism

It is hard to overstate the enduring influence of George Orwell on political discourse in the 20th century and beyond. Before his death in 1950 at the young age of forty six, Orwell produced a stunningly large and diverse body of work in the fields of journalism, literature, and political commentary. Much of this work was inspired by his own experiences as a police officer in Burma, several years working and traveling with destitute workers in England and France, as well as his experiences fighting against fascism during the Spanish Civil War in the late 1930s. While a fairly obscure and struggling author for much of his life, Orwell achieved worldwide fame after the Second World War with the publication of Animal Farm (1945) and 1984 (1949). This tutorial has two main objectives. First, it will introduce students to Orwell's most important books and essays in the context of a turbulent political era marked by the Great Depression, the rise of totalitarianism, world war, and the emerging Cold War. Second, the tutorial will examine the past and ongoing uses and abuses of Orwell's legacy by scholars and analysts on both the political left and the right. As Louis Menand argues, "almost everything in the popular understanding of Orwell is a distortion of what he really thought and the kind of writer he was." The course will conclude by examining what Orwell's thought contributes to a consideration of current issues ranging from the emergence of cancel culture to the possibilities of democratic socialism in the 21st century.

Requirements/Evaluation: 4 lead essays of 5-6 pages and 4 response essays of 2 pages.
Prerequisites: At least one introductory political science course.
Enrollment Limit: 10

PSCI 260  (F)  Power, Feminist-Style  (DPE)  (WS)
Cross-listings: PSCI 260 WGSS 260
Secondary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice, the concept of power, from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 260(D2) WGSS 260(D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

Attributes: WGSS Theory Courses

Not offered current academic year
Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

Enrollment Limit: 19

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

PSCI 266 (S) The United States and Latin America  (DPE)

This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of U.S.-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War and recent developments. We consider how this history confirms or undermines influential views about U.S. foreign relations and about international relations generally. We also compare historical U.S. foreign policy toward the hemisphere to U.S. policy toward the entire world after the Cold War. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America; the war on drugs; immigration and border security; and competition with China for influence. At the end we briefly reconsider current U.S. policies in historical perspective.

Class Format: more lecture in the first half, more discussion and several in-class debates in the second

Requirements/Evaluation: a map quiz, a 2-page paper, two 3-page papers, and either another 3-page paper and a regular final exam, or a 12-page research paper and a short final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Political Science majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: In the paper that considers the first part of the course, the students weigh to what extent U.S. policy toward Latin America was affected by the largely derogatory attitudes of U.S. diplomats toward Latin Americans. A unit in the second part of the course critically analyzes current U.S. immigration policy in this context.

PSCI 268 (S) Israeli Politics

This is an introductory course on Israeli politics. Approaching questions historically, it centers on but is not restricted to the conflict between Zionism and Palestinians. It begins by addressing the arrival of Zionists, the pursuit of statehood and the in-gathering of Jews, and the responses of neighboring Arab states and local Palestinians. The course also will examine the arrival of Arab Jews in the 1950-60, the conflicts between them and European Jews, and the effects of their conflicts on Israeli politics. The course then will turn to Israeli settlement policies on the West Bank, the controversies surrounding the Oslo Agreement, and the contemporary situations in the West Bank and Gaza. Finally, the course will address
contemporary controversies about what it means to be a Jew in Israel, about the feasibility of a "two-state" solution to the Palestinian issue, about the prospects and implications of a "one-state" solution, and about the implications for Israel of not resolving the Palestinian issue to the mutual satisfaction of Israelis and Palestinians.

Requirements/Evaluation: two papers totaling 20 pages
Prerequisites: none

PSCI 280 (S) Silicon Valley: Digital Transformation and Democracy (WS)
Nearly every country in the world seeks to drive economic growth by promoting digital technologies. The universal model is Silicon Valley. In this tutorial, students will examine the origins of the Silicon Valley model and other countries' attempts to emulate it. Departing from "just so" stories of technological determinism, we take up the lens of comparative political economy to investigate the politics that allowed US tech firms to shape economic policy to meet their interests. It is no accident that tech became a symbol for economic growth in the 1970s, precisely when it also began to build powerful alliances in Washington. After investigating the origins of the Silicon Valley model, we trace attempts to adopt it in Europe and Asia, which highlight the model's political contingencies and some of the more salient conflicts over the tech sector. We focus on the ways in which the Silicon Valley model can threaten social welfare through economic inequality and precarious employment, and engage a variety of perspectives, including workplace ethnography, to examine these threats, as well as potential regulatory responses. The course concludes by considering what policies could be appropriate for supporting, while also regulating, the tech sector in the twenty-first century.

Requirements/Evaluation: Five 5-page papers; five 2-page responses; participation
Prerequisites: One introductory course in political science and/or permission of the instructor.
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to sophomores and juniors majoring in PSCI and POEC.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)
Writing Skills Notes: Students will write essays each week. In addition, students will read each others' work and engage in structured critique.
Attributes: POEC Comparative POEC/Public Policy Courses  PSCI Comparative Politics Courses

PSCI 281 (S) Contemporary African Politics (DPE)
Cross-listings: PSCI 281 GBST 281

Primary Cross-listing
This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.
Class Format: A typical class session will be about 60% lecture and 40% discussion.

Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 281(D2) GBST 281(D2)

Difference, Power, and Equity Notes: This course takes the racial, ethnic, linguistic, and religious diversity of sub-Saharan Africa as a starting point for understanding the contemporary politics of the region. The course addresses the legacies of systemic inequality as well as strategies of resistance to oppression. We also examine how ethnic and religious diversity shape political institutions, competition, and conflict, comparing different countries and over time.

PSCI 282 (F) Africanist Project to Black Consciousness

Cross-listings: PSCI 282 GBST 282

Primary Cross-listing

In 1957, when it was clear the African Nation Congress was unwilling to change its multiracialist and nonracialist language in favor of Africanist pronouncements, Robert Mangaliso Sobukwe left the party and became the editor of The Africanist newspaper. Two years later he formed the Pan-Africanist Congress. Similarly frustrated that the National Union of South African Students was dominated by white liberals, in 1968 Bantu Steve Biko helped form the black-only South Africa Students' Organization and, four years later, was the key figure in founding of the Black People's Convention, created to promote black consciousness ideas within the broader South African population. This course focuses on Sobukwe's Africanist project and Biko's Black Consciousness Movement, the strategies against apartheid they promoted, and the visions of a free South Africa they imagined.

Requirements/Evaluation: class participation; 3 two-page response papers; and a 10-12 final paper.

PSCI 284 (F) The Politics of Economic Crises

The dominant world economies -- the USA, China, and the European Union -- are responding to the economic risks that might arise from the coronavirus with what have become the standard responses to economic crises. They are using debt to create liquidity, demand, and uphold credit markets. As a background to understanding the reasons for and histories of these policies, this course will read several important books that deal with the Great Depression, the financial crisis a decade ago, and the risks of debt.

Requirements/Evaluation: Two papers of 8-10 pages are required, along with careful reading of the books.

Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Political Science majors.
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option

PSCI 286 (F) Conservative Political Thought
Conservative thinkers claim to be leading an intellectual transformation away from the tired nostrums of liberalism. They see themselves as original, dynamic, serious. This course will read leading conservative political thinkers with a view to identifying their central tenets, both negative and positive. What is it that they oppose and support? What, if anything, defines contemporary conservative thinking? Is it a coherent body of thought, a doctrine, or a collection of disparate and conflicting thinkers? What is the relationship of thinkers who emphasize the market, order, and traditional values? And what are their views on diversity, citizenship, and race, and how do heterodox leftists fit with conservative critiques of managerial liberalism?
Requirements/Evaluation: Two 8-10 page papers and final exam
Prerequisites: Political Science Majors
Enrollment Limit: 15
Enrollment Preferences: Juniors/Seniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Not offered current academic year

PSCI 288 (F) Transnational Political Movements
This course focuses on the international dimensions of when people demand political change. We explore transnational dynamics of contentious politics, including how international actors shape domestic campaigns for democracy, peace, and justice, as well as how global advocacy movements (e.g., climate change) are organized and mobilized. Building from an international relations framework, the course brings together a variety of texts, including documentaries, social media, and guest speakers working on the front lines of global advocacy (refugee rights, anti-colonial liberation struggles, and contemporary pro-democracy movements). We critically analyze how external actors and resources inform politics on the ground, both around the world and over time, as well as evaluate the normative implications of "foreign intervention."
Requirements/Evaluation: Participation, 3 short papers, final project

PSCI 289 (S) The welfare state in comparative perspective
Cross-listings: PSCI 289
Primary Cross-listing
Modern life has, in some ways, become less risky. You are unlikely to be trampled by a mammoth. But social risk has not disappeared— you could lose your job, get into an accident, or find yourself plunged somehow into poverty. Most countries around the world have built elaborate institutions to ensure citizens' welfare by protecting some people from some risks, but not all people and not all risks. Moreover, these institutions vary considerably
both over time and between countries. This course examines those institutions. Our goal is to explain how and why welfare states vary and why there is so much inequality in the distribution of risk. We will do so by investigating the different kinds of institutions that mediate risks throughout the lifecycle, from parental leave to old age pensions, and by comparing these institutions between different countries. While focusing primarily on the welfare states of Western Europe, we will also examine how the politics of social risk unfold around the world, extending our investigation to Africa, Asia, and Latin America. We will conclude by reflecting on what lessons the welfare state offers for managing this century's biggest social risk: climate change.

Requirements/Evaluation: 3 essays; 2 presentations; participation
Prerequisites: One introductory political science course and/or permission of the instructor
Enrollment Limit: 14
Enrollment Preferences: Political science majors, political economy concentrators

PSCI 291  (S)  American Political Events  (WS)
Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

Requirements/Evaluation: five 5-to 7-page essays, five 2- to 3-page critiques, and a recorded oral final reflection
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-years and sophomores considering a major in Political Science
Expected Class Size: 10

PSCI 306  (S)  What is Power?
Cross-listings: STS 308 SOC 308 PSCI 306 REL 308
Secondary Cross-listing
What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or
What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect.

We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

**PSCI 307 (F) American National Identity and State Power (WS)**

Debates over American national identity, or what it means to be an American, have intensified in recent years, with a resurgent white Christian nationalism challenging progressive aspirations for a multiracial, environmentally sustainable, liberal democracy. At the same time, Republicans and Democrats fight over the scope and limits of government power on policies ranging from taxation and spending, to abortion, immigration, healthcare, policing, gun ownership, and voting rights. Are these conflicts related, and if so, how? Does how Americans define themselves as a nation inform the shape of the American state and the types of policies it creates? Or is it the reverse? Does the state and its policies make the nation, as many scholars claim? This tutorial investigates the relationship between state and nation over time in the United States. We will explore conflicts over how "the people" are defined in different moments, and we will examine how these conflicts connect to the exercise of state power in areas including territorial expansion, census taking, public health, immigration, social welfare, and policing.

**Requirements/Evaluation:**
- Five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

**Prerequisites:** At least one political science class or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Political science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

Fall 2023

TUT Section: T1  MWF 8:30 am - 9:45 am  Nicole E. Mellow
PSCI 308  (F)  In Search of the American State
When Donald Trump campaigned in 2016 to "drain the swamp," he built on the idea held by Republicans since Ronald Reagan's 1981 pronouncement that "government is not a solution to our problem, government is the problem." Skepticism of government has deep roots and strong resonance throughout American political history. Despite this, national government has grown in scope and size for much of this history, including under both Democratic and Republican administrations. This tension over what government is doing and what it should be doing is only heightened in times of crisis, such as the moment the country is in now. This course explores the relationship between citizens and their government by examining the growth of the American state in various arenas over time, as well as the assaults on government legitimacy in recent years. We will assess traditional theories about the weakness of the American state in light of arguments about the state as: regulator of family and "private" life, adjudicator of relations between racial and ethnic groups, manager of economic inequalities, insurer of security, and arbiter of the acceptable uses of violence and surveillance.

Requirements/Evaluation:  Students will be responsible for writing three 5-page papers and three 2-page papers, and will also be asked to take responsibility for managing discussion and presenting work at different points in the semester.

PSCI 310  (F)  New York City Politics: The Urban Crisis to the Pandemic  (WS)

Cross-listings: LEAD 332 PSCI 310

Primary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

PSCI 314  (F) How Change Happens in American Politics

Cross-listings: LEAD 314 PSCI 314

Primary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, a volatile economy, racial reckoning, and rapidly evolving environmental crises have all rocked American politics in the last year. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that political leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, war, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor advances, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been “exceptional”--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Requirements/Evaluation: participation in weekly meetings as well as weekly essays or critiques

Prerequisites: previous course in American politics or American history

Enrollment Limit: 10

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PSCI 315  (S) Parties in American Politics

Cross-listings: PSCI 315 LEAD 315

Primary Cross-listing

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays, and independent research culminating in the writing of a longer (15 to 20 page) research paper.

Requirements/Evaluation: In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer, research paper (15-20 pages).
PSCI 316  (S)  Policy Making Process

Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway?

This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Requirements/Evaluation: several short papers, research paper, class participation

Prerequisites: one course in PSCI or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Political Science and Political Economy majors, and students with an interest in public policy

PSCI 317  (F)  Environmental Law

Cross-listings: PSCI 317 ENVI 307

Secondary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: Several short writing assignments, active participation in class and a final examination

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Preference to Environmental Studies majors and concentrators and sophomores and above.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

**Secondary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 351(D2) PSCI 319(D2) MAST 351(D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Cross-listings: LEAD 320 PSCI 320

Secondary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Leadership Studies concentrators, Political Science majors

PSCI 321  (F)  Immigration Politics in the U.S.

The U.S. Census Bureau estimates that non-Hispanic whites will no longer be the majority racial group in the U.S. by 2044. This demographic change is fueled by past and current immigration, and the politics surrounding American immigration policy have intensified as a result. Donald Trump's rise to the presidency was fueled in part by his pledge to build a wall between the U.S. and Mexico. Meanwhile, efforts to reform the nation's immigration laws have been stuck in gridlock for years. How did we get to this point and what does the future hold? Why is immigration policy so contentious? What is at stake, and what do different groups believe to be at stake? To answer these questions, we will examine immigration from a multidisciplinary lens, but with special attention to immigration politics and policy. We will examine the history of immigration to the U.S. and the policies that have shaped it; recent developments in electoral and protest politics; the policy initiatives of recent presidential administrations, Congress, and state and local governments; and the incorporation of immigrants into U.S. society and politics, past and present.

Requirements/Evaluation: one 2- to 3-page paper; one 5- to 7-page paper; one oral presentation; one 15- to 20-page research paper; and class participation

Cross-listings: LEAD 324 GBST 321 PSCI 322

Primary Cross-listing

This class is interested in thinking critically and empirically about one of the most polarizing and relevant issues of our time: how countries regulate cross-border mobility. Currently over 281 million international migrants live in a country different from where they were born, about 1 out of every 30 humans in the world and a population that has roughly doubled since 1990. How are international organizations and domestic governments regulating this level of unprecedented global mobility in destination countries as well as countries of origin? Throughout the semester we interrogate three themes central to migration politics (and political science): rights, access, and agency. The course is organized with a focus on legal status: which "categories" of people (i.e. illegal migrants, refugees) have differential access to rights, services, and representation depending on how they are classified where they live (and where they are from). We will critically analyze how those categories are constructed at the international and domestic levels, as well as how those categorizations are also racialized, politicized, and gendered. While we address current debates over migration governance in the United States, we situate US migration policy within the contemporary global context. The course places the US in conversation not only with European countries, but also (and especially) considerations of migration governance in destination countries in Latin America, the Middle East, Asia and Africa. We also attend to the emigration governance of diaspora citizens particularly from the Global South. Students will have the opportunity to apply course readings to real-world contexts through guest speakers from global organizations at the frontlines of migration policy (UNHCR, Doctors without Borders), and filmmakers documenting border crossing around the world.

Requirements/Evaluation: Participation, 3 Short Response Papers, Research Paper (15 pages)

Prerequisites: PSCI 202 or PSCI 204 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and Leadership Studies Concentrators

PSCI 328 (F) Human Rights Claims in International Politics (WS)

For decades, people and countries have used "human rights" to advance their position, delegitimize their opposition, and lodge their interests in an unassailable political category. This research seminar investigates who uses this category, to what ends, and with what success. How people ground this concept—what they think its origin is—does matter, but evaluating those foundations is not our focus. Politics is our focus. Who gains and loses from the idea that people have human rights? Does the concept fit well with, and reinforce, some institutions and configurations of power, and make others difficult to sustain (or even to conceive)? Why not simply claim that something is an interest rather than also a right? How has "human rights" been deployed in international politics, and by whom? The class is divided into four sections. The first concentrates on common readings on these questions, and prioritizes discussion, explication, and hypothesis brainstorming. The second introduces social science methodology, covering hypotheses, literature reviews, and evidence while continuing half time with materials about human rights. The third emphasizes research design, allowing students to finalize their own project while bringing in primary sources such as original documents, debates, and data. The last quarter of class focuses on student projects, on integrating and revising research to produce a set of findings and an evaluation of their meaning. The course is designed to teach political science majors the nuts, and maybe also the bolts, of social science research.

Requirements/Evaluation: Class discussion, short writing, worksheets, peer reviews, drafts of various sections, final paper, final presentation

Prerequisites: Two classes in political science, at least one of which must be in international politics.

Enrollment Limit: 12

Enrollment Preferences: Political science majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students write frequent short pieces, and revise/rewrite an increasingly long draft in sections over the course of the semester.

PSCI 329 Politics of the Powerless
American politics is often unequal, and well-organized advantaged interests tend to triumph. What do disadvantaged interests do in light of these power dynamics? Give up? Compromise? Struggle on? Why do relatively powerless interests sometimes win in American politics? Is it because they have an exceptional leader? A strategic advantage? Fortuitous events? This course examines the political dynamics of disputes in which disadvantaged interests push for major change. We will study past campaigns and then research and discuss contemporary reform efforts.

Requirements/Evaluation: class discussion, two short papers, and research paper
Prerequisites: one course in Political Science or permission of instructor

PSCI 331 (F) The Politics of Algorithms
Cross-listings: AMST 349 STS 349 PSCI 331

Primary Cross-listing
Every day, you interact with or through computer algorithms. In ways often obscure to users, they structure communication or conduct in social media, education, healthcare, shopping, entertainment, dating, urban planning, policing, criminal sentencing, political campaigns, government regulation, and war. Moving from the emergence of cybernetics during World War II through such contemporary examples as facial recognition software, this seminar approaches algorithms as complex technological artifacts that have social histories and political effects. Asking how algorithms are political and what that tells us about politics today (particularly in the U.S.), we will consider how their design expresses forms of power and their deployment shapes ways of living. What behaviors do different algorithms solicit, reward, discourage, or stigmatize? What kinds of selfhood and relationships do they promote or thwart? How do various algorithms influence political partisanship and beliefs and intersect with existing hierarchies of race, class, gender, and sexuality? When inequities are built into a design, can that be addressed by rooting out "bias," or do such efforts miss something more inherent in the kinds of artifacts algorithms are or what they can be in a capitalist economy? Might developments in artificial intelligence transform our sense of the human or even threaten the species? Many of the seminar's themes, including democracy, power, inequality, judgment, deliberation, publicity, subjectivity, and agency, are central to political theory, but readings and course materials will also be drawn from such fields as media theory, surveillance studies, sociology, American studies, critical data science, film, and contemporary art. The course neither requires nor teaches any computer science skills.

Requirements/Evaluation: Class attendance and participation, regular short posts or exercises, and either three eight-page essays or one 8-page essay and one longer final paper.
Prerequisites: At least one course in political, cultural, or social theory or the critical study of science and technology, or permission of the instructor. Not open to first-year students.
Enrollment Limit: 15
Enrollment Preferences: Political Science and American Studies majors and STS concentrators; then qualified students from all other majors welcome, space permitting.
Expected Class Size: 15

Not offered current academic year

PSCI 332 (S) The Body as Property (DPE)
From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the everyday transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay
Prerequisites: prior coursework in political theory, cultural theory, philosophy, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors (priority given to those concentrating in Political Theory ); Justice & Law Studies concentrators (priority given to those with extensive JLST coursework).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis.

PSCI 333 (F) Asian/African American Cultural and Political Theory
Cross-listings: AFR 344 PSCI 333 AMST 325

Secondary Cross-listing

Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh's anti-lynching writing, the founding conference of the WIDF (Women's International Democratic Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Boggs, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung's *Little Red Book* and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary "Afro-pessimism." Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped solidarity to challenge white supremacy and racial capitalism. **Requirements:** One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10% Course cap: 19 Priority given to AMST majors, Africana concentrators

**PSCI 334 (F) Theorizing Global Justice**

While economic exchanges, cultural convergence, and technological innovations have brought people in different parts of the world closer together than ever before, globalization has also amplified differences in material wealth and social inequalities. Ill health, inadequate sanitation, and lack of access to safe drinking water are increasingly common. Yet, more than ever before, the means exist in affluent regions of the world to alleviate the worst forms of suffering and enhance the well-being of the poorest people. How are we to understand this contradiction as a matter of justice? What is the relationship between justice and equality, and what do we owe one another in a deeply divided world? Course readings will engage your thinking on the central debates in moral philosophy, normative approaches to international political economy, and grassroots efforts to secure justice for women and other severely disadvantaged groups. Key theorists include Amartya Sen, Martha Nussbaum, John Rawls, Thomas Pogge, Nancy Fraser, Paul Farmer, Vandana Shiva, Majid Rahnema, and Enrique Dussel.

**PSCI 336 (S) Far-Right Populism Across the Atlantic**

**Cross-listings:** GBST 300 PSCI 336

**Secondary Cross-listing**

The course will discuss the relationship between nationalism and far-right populism, also often referred to as alt-right politics in the United States. We will explore the causes of the rise of nationalism and far-right populism in the US and Europe, discuss their relations with liberal democracy, conservativism, and authoritarian politics to study varieties of far-right populism and nationalism not only within the nominal far-right but all political parties in Western democracies. We will address basic questions such as 'What is populism?' and discuss the causes of the rise of far-right populism, the origins of far-right ideology, and the phenomenon of successful populist voter mobilization. Central notions such as democracy, identity, and their relation to far-right populism will be discussed alongside questions of contemporary mobilization strategies.

**Requirements/Evaluation:** active class participation; three response papers (2 pages); final research paper (12 pages); no final exam

**Prerequisites:** statement of interest
PSCI 337  (S)  Visual Politics

Cross-listings:  ARTH 337 AMST 370 PSCI 337

Primary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries.

Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Deleuze, Fanon, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

Requirements/Evaluation:  regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* one much longer paper.

Prerequisites:  at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

PSCI 339  (S)  Politics in Dark Times: Hannah Arendt  (WS)

Cross-listings:  JWST 339 PSCI 339

Primary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror
extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

PSCI 340 (S) Why States Fail

This course considers the origins of political violence and state failure at the end of the 20th century. It seeks to address why there was a resurgence of political violence at the dawn of the 21st century. Toward that end, we begin by considering competing explanations of political violence (ethnicity, democratization, natural-resource endowments, and predatory elites). We then move on to the empirical section of the course in which we cover case studies of state failure in parts of Eastern Europe, Africa and the Middle East.

Class Format: discussion

Requirements/Evaluation: seminar participation, two oral presentations and a research paper proposal

Prerequisites: one of the following: PSCI 201, 202, 203, 204, 229, 243, 250, 254 or the permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Political Science majors

PSCI 342 (S) Beyond the welfare state

"Not me. Us" became a rallying cry of Bernie Sanders' presidential campaign in late 2019. Sanders' slogan reflects a vision of a robust welfare state, defined by a widespread commitment to solidarity, where citizens share social risks as well as economic rewards. But what role can the welfare state play in the twenty-first century? How have its constitutive institutions, from pensions to unemployment insurance, evolved since the post-war "Golden Age"? Is solidarity possible only in utopia, or can we realize it in the world as well? This course identifies the political conditions under which welfare states developed in the twentieth century, and examines how they have responded to globalization, immigration, digital transformation, and other contemporary challenges. If the welfare state has a future, it will look different from the past, but how? Taking up a handful of alternative paradigms, from social investment to mutual aid, we will assess different trajectories of solidarity in the twenty-first century.
PSCI 343  (F)  Democratic Erosion

Cross-listings:  PSCI 343 GBST 342

Primary Cross-listing

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is not intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

Requirements/Evaluation:  Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

Prerequisites:  Prior coursework in political science or permission of instructor.

PSCI 344  (S)  Palestinian Nationalism

Palestinian Nationalism: This tutorial will cover the history, bases of support, objectives, and accomplishments and failures of Palestinian nationalism over the past century. It will address how the Palestinian nation has been defined, who has defined it, what factions and classes have controlled its organizations, and the reasons why it has failed to achieve its goals. The tutorial will address the evolution of Palestinian nationalism historically and thematically, employing both primary and secondary sources. The readings will consist mostly of Palestinian authors, with an emphasis on documents, histories, and political analyses. Two questions will anchor the tutorial: how is the nation defined and what, if any, class interests are folded into various definitions?

Requirements/Evaluation:  Read the assigned materials, write a 5-page paper every other week, and comment on the student's partner's paper in the other weeks.

Prerequisites:  Political Science Majors and students with background in Middle East

Enrollment Limit:  10
PSCI 345  (F)  The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings:  PSCI 345 ASIA 345

Primary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yi Jing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Requirements/Evaluation:  two 5-page papers and one 15-page paper

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  preference to seniors but all are welcome.

PSCI 349  (S)  Cuba and the United States  (DPE)  (WS)

We examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. The course begins with the political economy of the colony, then covers the Cuba-US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual identity; the institutions of "popular power"; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format:  a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation:  five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites:  any course on Latin America or permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  Political Science majors

Expected Class Size:  10

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)  (WS)

Writing Skills Notes:  Assignments are graded and returned weekly. After each student has written one long paper and one response, the professor
meets with them individually to discuss the composition and presentation of each genre. For the final class, students write a one-page paper in E’ (E-prime), English without the verb "to be."

**Difference, Power, and Equity Notes:** Among other topics, the course describes an independence war fought by insurgents dedicated to color-blind citizenship (even as the "civilized world" embraced scientific racism); neo-colonialism under the Platt Amendment and after; race and the Revolution; gender and the changing treatment of sexual identity under the Revolution; and the categorical power differences that arise when only one political party is permitted to organize.

**PSCI 351 (S) The New Left and Neoliberalism in Latin America** (DPE)

**Cross-listings:** PSCI 351 GBST 351

**Primary Cross-listing**

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

**Class Format:** discussion then seminar

**Requirements/Evaluation:** three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

**Prerequisites:** a course on Latin America and a course in Economics or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 351(D2) GBST 351(D2)

**Difference, Power, and Equity Notes:** The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

**PSCI 352 (F) Politics in Mexico** (DPE)

**Cross-listings:** GBST 352 PSCI 352

**Primary Cross-listing**

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic
policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

Class Format: lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

Requirements/Evaluation: map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 352(D2) PSCI 352(D2)

Difference, Power, and Equity Notes: One unit of the course directly engages the tension between racial and cultural diversity, on one side, and national identity in 20th century Mexico. Another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA.

PSCI 353 (F) What is Democracy?

This is a research course that will investigate the meaning of democracy through readings and a research paper. The readings will begin with claims that democracy consists of government by elites, that the democratic component consists of elections that amount to choosing between rival slates of elites, and that agreements among elites set the boundaries for permissible democratic decision making. To examine this claim, the readings will address two fundamental issues. First, it will consider the the terms of American foreign policy after the Cold War, how it sets these, and continuities and discontinuities between the Clinton and Bush administrations. Where did Democratic and Republican foreign policy elites agree and disagree and what happened to proposals that were outside the elite consensus? Second, the course will consider the prelude and official responses to the 2008-11 financial crisis. What policies paved the way for and resolved the crisis, how were they reached, and who participated in formulating them? In other words, to what extent and in what respects were these fundamental turning points made "democratically"? Having done preliminary reading on these two issues, students will conduct in-depth research into aspects of one of these questions and write a research paper.

Requirements/Evaluation: One 5 page paper, 25 page research paper, presentation of paper to class, and class participation.

Prerequisites: Instructors permission.

Enrollment Limit: 14

Enrollment Preferences: Political Science majors or prospective majors, sophomores, juniors, and seniors, and permission of instructor.

PSCI 354 (F) Nationalism in East Asia

Cross Listings: ASIA 354 PSCI 354 HIST 318

Primary Cross-listing
Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

Requirements/Evaluation: 2-3 short papers; final exam

PSCI 356 (S) Democratization in South Asia

Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka's democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

Requirements/Evaluation: three 5 to 7-page papers or one research paper; presentation; class participation
Prerequisites: previous course in political science or permission of the instructor
Enrollment Limit: 16
Enrollment Preferences: preference given to political science majors

PSCI 358 (F) Media, Politics, and Power

Concerns about 'misinformation,' 'fakenews,' and 'propaganda' abound in discussions of politics in social media, news, entertainment and movies, and in daily conversations. Conflicting groups regularly accuse each other of being 'duped' by 'biased' sources of information on crucial issues like war, elections, sexuality, racism, and history. But is anyone immune to media influence? What is it and how might it work? And who are the groups who shape how media portray the world to us? This seminar explores such questions by investigating the political use of media in the organization of power. Readings and discussions provide a view on the past and ongoing use of media in the shaping of popular knowledge, collective actions, and public policies. We interrogate the terms 'media,' 'politics,' and 'power.' We study techniques to politically use media as well as research techniques to uncover political practices and relations. The course is divided into three parts. The first module engages students in readings on the economic and
political situation of dominant types of media (AI, social media, news, etc.) and dominant media companies (Google, FaceBook, CNN, FOX, etc.). The second engages students with theory and methods for understanding and analyzing media contents (the stories, images, etc. that media convey). The final module introduces students to theory and methods for analyzing media relations (how a given media connects particular groups in particular ways). In the second and third modules, students develop research questions that they pair with research methods to politically analyze a chosen media channel. The course is designed to introduce students to fundamental components of social science research and critical thinking on media as a political tool.

Requirements/Evaluation: Participation in class discussions and activities, written reflections on readings, data gathering and analysis, two 8-10 page papers, peer review, 2 in-class presentations.

Prerequisites: None

PSCI 360 (S) Right-Wing Populism

After the fall of the Berlin Wall in 1989, the political scientist Francis Fukuyama famously declared "the end of history". From now on only liberal democracy, free market capitalism, and global integration had a future. Everything else—including political ideology, nationalism, conservative religion, and sovereignty—was consigned to the ash heap. Thirty years later the future looks seriously derailed. A right-wing populism marked by Brexit, Trump, Le Pen, and a host of 'far-right' political movements in the very heartland of democratic globalizing capitalism has shaken liberal certainties. This course is an investigation into contemporary right-wing populism in Europe and North America in its social, economic, and political context. We will discuss theories of right-wing populism's appeal from both Left and Right perspectives. We will also investigate cases of right-wing populism including France's National Rally and the Eric Zemmour phenomenon, Sweden's Sweden Democrats, Hungary's Fidesz, Poland's Law and Justice Party, and Trumpism, the alt-right and QAnon. Finally we will entertain right-wing populism as both a cause and a symptom of a crisis in liberal democracy.

PSCI 361 (S) Black Political Thought

Cross-listings: PSCI 361 AFR 364

Primary Cross-listing

This seminar will introduce students to the study of Black Political Thought as a set of critical normative and diagnostic gestures that help theorize the Black experience. By thrusting students into the "problem space" of Black Political Thought, students will examine the historical and structural conditions, normative arguments, theories of action, ideological conflicts, and conceptual evolutions that help define African American political imagination. Students will take up the central philosophical questions that shaped the tradition from the early nineteenth century to the present by engaging historical thinkers like Anna Julia Cooper, W.E.B. DuBois, Frantz Fanon, Ida B. Wells-Barnett, and Ella Baker and contemporary theorists like Saidiya Hartman, Charles Mills, bell hooks, and Frank Wilderson—among others. Guided by a Black diasporic consciousness, students will explore the canon's structural and ideological accounts of slavery, colonialism, patriarchy, racial capitalism, Jim Crow, and state violence and, subsequently, critique and imagine visions of Black liberation. With a theoretical grounding in the "Black radical tradition," students will leave this course with the conceptual resources and philosophical tools needed to realize political theory's potential as an instrument they can employ in their daily lives to normatively and diagnostically evaluate political, economic, cultural, and social institutions.
**Requirements/Evaluation:** Weekly discussion questions; two (1-2 pages) short reading responses; and three essay-style writing assignments, including one short (3-4 pages), one medium (5-6 pages), and one longer (10-12 pages)

**Prerequisites:** at least one prior course in political theory or permission of the instructor

**PSCI 364 (F) Noam Chomsky and the Radical Critique of American Foreign Policy**

Noam Chomsky emerged as one of the most influential figures in the development of modern linguistics during the 1950’s. However, since the Vietnam War, Chomsky has also established himself as perhaps the most influential critic of American foreign policy and the Washington national security establishment. This tutorial will examine his wide-ranging critique of American foreign policy over the last half century, focusing on his analysis of the role that he believes the media and academics have played in legitimizing imperialism and human rights abuses around the world. We will also explore the controversies and criticisms of his work from both the right and the left because of his political stance on issues ranging from the Arab-Israeli conflict to humanitarian intervention to free speech. Finally, we will also examine how Chomsky’s views, largely considered to be radical for much of his life, have become far more mainstream over time.

**Requirements/Evaluation:** Students will write five 6-7 page papers over the course of the semester. On weeks that students are not writing the lead paper, they will write a 1-2 page critique of the essay submitted by their tutorial partner.

**Prerequisites:** One of the following courses is strongly recommended : PSCI 120, 127, 202.

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with some previous coursework in American foreign policy or world politics.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Not offered current academic year**

**PSCI 367 (S) Decolonizing International Relations (DPE)**

**Cross-listings:** GBST 367 PSCI 367

**Primary Cross-listing**

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International
Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

**Requirements/Evaluation:** Participation, 3 response/reflection papers, annotated bibliography

**Prerequisites:** One prior course in International Relations or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 367(D2) PSCI 367(D2)

**Difference, Power, and Equity Notes:** This class encourages students to recognize the power dynamics inherent within, and reproduced by, the study of International Relations as structured by traditionally dominant paradigms. This class provides students with the tools to critically identify, decenter, and deconstruct dominant lenses as well as the opportunity to engage with, and apply, an inclusive approach centering a more expansive range of theoretical perspectives and knowledge production.

**PSCI 372 (S) CAPSTONE: Sylvia Wynter, Black Lives, and Struggle for the Human**

**Cross-listings:** PSCI 372 AFR 450

**Secondary Cross-listing**

How do we judge the value of life? What is the significance of death and arbitrary threats to our existence? Why probe modern notions of black and blackness? What defines optimism, pessimism, enslavement, freedom, creativity, and being human? Do black lives matter? This capstone seminar will explore these and related questions through an examination of the life and work of Jamaican novelist, playwright, cultural critic, and philosopher Sylvia Wynter. Methodologically interdisciplinary, the course shall examine written and audiovisual texts that explore Wynter’s inquiries into the central seminar queries. We will study figures and movements for black lives whose geopolitics frame the milieu of Wynter’s work. Our examination of intellectuals and activists, with their explicit and implicit engagements with Wynter, shall facilitate assessing the possibilities, challenges, and visions of black living. We will also explore the current implications of Wynter’s thought for Africana political theory, Afro-futurism, social justice, human rights, and critiques of liberal humanism. In the latter half of the course, students will have the opportunity to design, conduct, and present their own final research projects.

**Requirements/Evaluation:** attendance and participation; a 7-page midterm essay; class presentation; and a final research project

**Prerequisites:** none

**Enrollment Limit:** 15

PSCI 375 (S) Modern Jewish Political Theory

Cross-listings: REL 330 PSCI 375 JWST 492

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19

PSCI 376 (S) The Impact of Black Panther Party Intellectuals on Political Theory (DPE) (WS)

Cross-listings: LEAD 319 PSCI 376 AMST 308 INTR 320

Attributes: JWST Capstone Course JWST Core Electives
This seminar examines the historical and contemporary impact of the Black Panther Party—and key allies such as Angela Davis—on political theory. Texts include: narratives from 1966-2016; memoirs; political critiques; theoretical analyses; interviews; speeches; government documents. The seminar will examine: original source materials; academic/popular interpretations and representations of the BPP; hagiography; iconography; political rebellion, political theory. Readings: Liberation, Imagination and the Black Panther Party; Soledad Brother: The Prison Writings of George Jackson; Mao’s Little Red Book; The Communist Manifesto; Still Black, Still Strong; Imprisoned Intellectuals; Comrade Sisters: Women in the Black Panther Party.

Requirements/Evaluation: Requirements: students attend each seminar class and come prepared to discuss the readings; participate in discussions; present a collective analysis with Q/A for the seminar; submit a mid-term paper and a final paper or a group project.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

PSCI 378 (F) Origins of the State

When and how did the state come into existence as a form of political organization? This course explores theories of the origins of the state, asking how myths and other speculative accounts in the Western tradition draw boundaries between past and present, as well as between self and other. Paying attention to common oppositions such as nature/civilization, primitive/advanced, anarchy/social order, feminine/masculine, ruler/ruled and stasis/progress, we will investigate how these antagonisms work together to create the conception of the state that still dominates politics today. Course readings touch briefly on social contract theories (Locke, Hobbes, Rousseau, Kant) before turning to the core material for our exploration: alternative accounts of the origins of the state based on ancient Greek and Roman mythology and the ethnological writings of nineteenth-century socialists (Marx, Engels, Bebel, and others). More recent perspectives and critical interpretations will be drawn from feminist theory (Spivak, Pateman, MacKinnon, Folbre) and critical anthropology (Cassirer, Fabian, Graeber & Wengrow). Among our questions: Is it really possible to pinpoint a moment in time when the state came into existence? And if the aim is not to provide a historically accurate account, what exactly is at stake in constructing or demythologizing theories of the origins of the state?

Requirements/Evaluation: oral presentation and three papers (3 pages, 5 pages and 12-15 pages)

Prerequisites: Not open to first-year students.

Enrollment Limit: 16

Enrollment Preferences: Political Science majors and concentrators in Political Theory

**PSCI 380 (S) Sex Marriage Family**

**Cross-listings:** SOC 390 PSCI 380

**Primary Cross-listing**

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defense, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing in both left-wing (Scandinavia) and right-wing (Central Europe) variants.

**Requirements/Evaluation:** Two 4-5 page papers, 12-15 page research paper, discussion questions, class participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Political Economy, Political Science, and Sociology majors and prospective majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

PSCI 381 (S) The Conservative Welfare State
Conservatives in the United States are traditionally hostile to state power in general and the welfare state in particular. In much of the rest of the world, however, conservatives harbor no hatred of the state and, when in power, have constructed robust systems of social welfare to support conservative values. This course offers an analysis of the conservative welfare state with particular interest in public policies around social insurance, employment, the family, and immigration. The course traces the conservative welfare state's development from its origins in late nineteenth and early twentieth century corporatism, through the rise of Christian Democracy and the consolidation of conservative welfare regimes in continental Europe after World War Two, to its contemporary challenges from secularism, feminism, and neoliberalism. The course also investigates divergent conservative models in East Asia and Latin America as well as new 'liberal' welfare states in contemporary Hungary and Poland. It concludes with a discussion of the prospects of right-populist politics in the United States.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.
Prerequisites: One course in Political Science
Enrollment Limit: 19
Enrollment Preferences: Juniors and seniors majoring in Political Science or Political Economy

PSCI 382 (F) The Politics of Migration: Citizen, Immigrant, Alien, Refugee (DPE)
Currently 272 million international migrants live in a country different from where they were born, an increase of 78% since 1990. What are the social, economic, and political consequences of unprecedented global mobility in both destination countries and countries of origin? This class investigates one of the most polarizing and relevant issues of our time: the politics of migration. Throughout the semester we interrogate four themes central to migration politics: rights, representation, access, and agency. The course is organized with a focus on status: which "categories" of people (i.e. citizens, migrants, refugees) have differential access to rights, services, and representation and why. Drawing on political speeches, documentary films, humanitarian campaigns, and a variety of academic texts, we critically analyze how those categories are constructed, as well as the political work they do in making claims, justifying policies, and shaping public opinion. The class situates contemporary US migration policies within a global context and over time, placing the US case in conversation with considerations of migration politics and policies in countries around the world. As an experiential education course, we will (virtually) attend a US naturalization ceremony as well as interview officials from organizations working with migrants and refugees here and abroad.

Requirements/Evaluation: Active class participation, 3 short papers (3 pages each), policy project (8-10 pages), and presentation.
Prerequisites: Prior course work in political science or global studies.
Enrollment Limit: 12
Enrollment Preferences: Political Science majors, Global Studies Concentrators.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course examines the politics of migration with a focus on the power inherent within particular categorizations of people in relation to the state (i.e. citizens, migrants, aliens, refugees). We compare policies shaping the lives of migrants around the world, with particular considerations of how race, gender, age, and religion shape migration experiences (and migration policy). We focus on rights, access, and migrant agency throughout the course.

PSCI 386  (F)  Identity Politics: Conflicts in Bosnia, Israel-Palestine, Northern Ireland, & South Africa

Identities have been either the stakes, or the guise taken by other kinds of conflicts, in Bosnia, Israel-Palestine, Northern Ireland, and South Africa for centuries. They have led to, or expressed, political divisions, clashing loyalties, and persistent and sometimes consuming violence. They also have produced attempts by both internal and external actors to resolve the issues. This research seminar will engage the origins of the conflicts and the role of identities in them, the role of disputes about sovereign power in creating and intensifying them, the strategies for reconciling them that are adopted domestically and internationally, the deals that have been struck or have not been struck to bring peace in these societies, and the outcomes of the various efforts in their contemporary politics. The course will begin by reading about both the general theoretical issues raised by conflicts in these "divided societies" and various responses to them. After familiarizing ourselves with what academic and policy literatures have to say about them, we then will read about the histories and contemporary politics in each society. With that as background, students will choose an aspect or aspects of these conflicts as a subject for their individual research.

Requirements/Evaluation:  2 10-12-page papers

PSCI 387  (S)  The Firm

The rise of gigantic tech firms--Google, Apple, Facebook, Amazon--has sparked widespread worries about the role of business power in capitalist democracy. Are these firms monopolies? How can they be better regulated? Should they be? This course studies the politics of business by centering analysis on the firm. From the perspective of the workplace, we investigate the firm as an arena of power, where workers and managers meet each other in continuous contests for control. From the perspective of the public sphere, we investigate the firm as an actor whose power maps uneasily onto the channels of democratic representation. Approaching the firm as both arena and actor in a number of capitalist democracies, we will compare the politics of business across different sectors, but will focus especially on tech and finance.

Requirements/Evaluation:  Class participation; two 5- to 7-page essays; one presentation; one final essay.

PSCI 388  (S)  Comparative Political Economy

Cross-listings:  PSCI 388
Primary Cross-listing

This course examines the relationships between broad economic structures and political institutions. We consider why and how the spread of capitalism led to the birth of democracy in some countries, but dictatorships in others? Here we look closely at whether it is economic development which leads to the spread of democracy. Or whether it is economic crises which make the movement to democracy possible. Finally, we examine whether the emergence of a neoliberal economic order has affected the organization of political society?

PSCI 412 (F) Senior Seminar: Interpretations of American Politics

American politics are in upheaval, and most Americans believe the country to be headed down "the wrong track." Yet assessments of what is at the heart of the country's problems vary. Many worry that the United States is threatened by anti-democratic actors intent on consolidating white nationalist power and corporate rule. Yet at the same time, others worry that the U.S. has abandoned the Anglo-Protestant traditions that made it strong and has entered a period of moral decay and decline. What are we to make of these different assessments? What do left and right see when they survey the nation, and why is what they see so different? Any diagnosis of contemporary maladies is premised on a vision of what a healthy functioning republic looks like. Our task in the seminar is to uncover and interrogate those visions. We will do this by exploring different interpretations of the American political order, each with its own story of narrative tensions and possible resolutions. We will then use our investigation of how different authors, and different traditions, understand the nation to help us assess contemporary politics and come to our own conclusions about what animates conflicts.

Requirements/Evaluation: brief weekly writing assignments; three short essays; and oral examination

Prerequisites: at least one course in American politics

Enrollment Limit: 12

Enrollment Preferences: senior Political Science majors with a concentration in American politics

Expected Class Size: 10
PSCI 413  (S)  Senior Seminar in American Politics: Polarized America

With red states and blue states, partisan divisions in Congress, and even disputes about wearing masks to protect against the coronavirus, few question the fact of a polarized America. But what is the polarization about and what caused it? Is it manufactured by a political elite using the rules of the game to maintain power while ignoring the concerns of the people? Is it a capitalist strategy to divide the public in order to advance the interests of the wealthy corporate elite? Does it reflect a polity divided by racial and ethnic tensions with different visions of the nation's past and future? Does it reflect increased inequality in a fast-changing global economy? How can a government of separated institutions operate and come to collective decisions given this discord? Can the framers' vision of deliberative, representative government meet the challenges of a polarized polity?

Requirements/Evaluation: class participation, weekly writing assignments, two short papers, final project
Prerequisites: At least one course in American politics
Enrollment Limit: 16
Enrollment Preferences: Seniors majoring in political science with concentration in American politics

PSCI 414  (S)  Senior Seminar: Leadership and the Anxieties of Democracy  (WS)

Cross-listings:  LEAD 425 PSCI 414

Secondary Cross-listing
This course, the senior capstone for both Leadership Studies and the American Politics subfield in Political Science, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by surveying institutional constraints confronting contemporary political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment, among others. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. While the course will focus primarily on the United States, our conceptual framework will be global; though our main interest will be contemporary, we will also examine previous eras in which democratic leadership has come under great pressure. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation:  Seminar participation, research proposal, peer workshop, research paper, in-class research presentation
Prerequisites:  LEAD 125 or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences:  Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

PSCI 420  (F)  Senior Seminar: The Nuclear Revolution

Cross-listings: PSCI 420 LEAD 330

Primary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Requirements/Evaluation: class participation, three 8- to 10-page papers

Prerequisites: PSCI 202

Enrollment Limit: 15

Enrollment Preferences: Political Science major seniors with an International Relations concentration

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

PSCI 421  (F)  Senior Seminar: The Liberal Project in International Relations

The most powerful actors in global politics are liberal ones, and a liberal project around democratic states, international law and organizations, and free trade dominates the global agenda. This course is an investigation into this global liberal project, engaging both theory and practice. We will discuss signature liberal theorists both classic and current as well as some of their most notable critics. We will also attend to empirical evaluations of signature liberal efforts around democratization, development, and human rights. The course ends with a discussion of the successes and failures of the European Union as the principal embodiment of the liberal project today.

Requirements/Evaluation: 1-3 papers of 5-7 pages, short oral presentations, daily discussion questions, 12-15 page final paper, class participation

Prerequisites: senior Political Science major or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: senior Political Science majors concentrating in International Relations

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PSCI International Relations Courses

Not offered current academic year
Since the mid-1980s, humanitarianism has been one dominant attitude that powerful and privileged countries, organizations and people have adopted with regard to poverty or disaster elsewhere. Humanitarianism aims at rescue, striving to keep marginal people alive until some solution can be found. It aims not to address crises’ causes nor to assist with solutions—which it considers political—just to keep human bodies alive. Critics contend that humanitarianism produces harm, provides structural incentives for people to do more or less than they need to, and deepens inequality between actors and targets. They contend that it legitimates a view of the status quo, in which such terrible things are bound to happen without real cause. This course confronts humanitarianism as an ideology through reading its defenders and critics, and as a political strategy assessing its usefulness, to whom.

Class Format: three students start class discussion every day; one reads a short (4-page) essay and two read shorter (two-page) essays

Requirements/Evaluation: three longer essays, six shorter essays, constructive participation

Prerequisites: PSCI 202 and at least one elective in international relations

Enrollment Limit: 16

Enrollment Preferences: Political science seniors then juniors; other seniors, then juniors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course asks students to investigate the way that assumptions about superiority, and “helping practices” adopting those assumptions, can either reinforce or undermine unequal social and political outcomes and categories. We evaluate liberal and postcolonial (structural violence) models of international aid.

PSCI 431  Senior Seminar in Political Theory: Rethinking the Political

What is politics? The question, an important part of political theory at least since Socrates, has taken on renewed significance in recent years, as theorists have sought to rethink the political in response to twentieth century dictatorships and world wars; feminist, queer, anti-racist, post- and decolonial struggles; the transformations wrought by neoliberal globalization; the emergence of “algorithmic governance”; the recent resurgence of populist nationalism; and deepening recognition of climate crises. This seminar engages some of the major attempts at rethinking produced in the 20th and 21st centuries, particularly at those that, characterizing liberalism as masking structures of subordination and elements of conflict in political life, undervaluing the importance of citizen action and public space, or being ill-suited to altered technological and ecological conditions, seek to rework or move beyond it. In addition to those who argue for an expanded and emancipatory conception of politics, we will consider arguments against politics as primary path to improvement or focus of commitment. Authors read may include Schmitt, Strauss, Rawls, Arendt, Wolin, Rancière, Brown, Connolly, Hartman, Sharpe, Moten, Wynter, Sexton, Edelman, Muñoz, Coulthard, Simpson, Lazzarato, Haraway, Latour.

Requirements/Evaluation: Regular, engaged class participation; short Glow posts; one 6-8 page paper; one 10-12 page paper

Prerequisites: Junior or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome

Enrollment Limit: 15

Enrollment Preferences: Juniors and seniors concentrating in political theory

Expected Class Size: 11

Grading: (D2)

Attributes: PSCI Political Theory Courses

Not offered current academic year

PSCI 432  Senior Seminar: Critical Theory
This seminar focuses on the political thought of Herbert Marcuse, investigating the influences of leftist social movements of the 1960s on his critical theory. Marcuse famously supported the aims of student activism, feminism, black liberation movements and Third World anti-colonialism during that period, publicly affirming their efforts to integrate ethical idealism with concrete concerns for the economic wellbeing and political freedom of oppressed groups. Drawing on Freud, and challenged by his philosophical exchanges with Angela Davis, Marcuse came to the view that these movements were addressing not only material deprivations such as poverty and structural oppression, but also the effects of social alienation and a damaged psychic life. He saw these movements as successfully bridging the longstanding tension between the ideal elements of our humanity and the physical conditions for human existence (a tension represented in philosophy by the contrast between Kant and Marx). Yet he stopped short of identifying new social movements with the Marxist notion of a revolutionary class. Why this hesitation? Was his caution warranted? To provide a broader context for Marcuse's critical theory, we will read a selection of his writings alongside related texts by Kant, Marx, Freud, and Davis. Looking at but also beyond his political solidarity with the emancipatory movements of the 1960s, we will then consider how Marcuse's work can be placed in conversation with more recent critical theory, including ideas emerging from the Occupy Wall Street movement and feminist approaches to aesthetics and psychoanalytic theory.

Requirements/Evaluation: regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay

Prerequisites: junior or senior standing required; in addition, prior coursework in political theory, cultural theory, philosophy, or permission of instructor

Fall 2023

SEM Section: 01  TF 1:10 pm - 2:25 pm  George T. Crane

PSCI 493 (F) Senior Thesis Research Design Seminar
Reserved for and required of those students accepted into the honors program during the second semester of their junior year, the fall semester Senior Thesis Research Design Seminar is intended to serve three purposes for aspiring senior thesis writers. First, through a variety of readings and discussions (including, perhaps, with the assigned scholars themselves), it aims to introduce students to the challenges of original scholarly research and expose them to the range of ways political scientists approach those challenges. Second, through a series of regular exercises and assignments, it seeks to stimulate critical thinking about fundamental questions of research design (crafting a question, performing a literature review, selecting appropriate methodological tools, evaluating data sources) and hone an array of practical skills—whether interpretive, historical, or quantitative—involved in political science research. Third, through ongoing, self-guided reading on students' individual topics as well as feedback from both the seminar leader and other seminar participants on their written work about that topic, it endeavors to guide students to frame a viable and meaningful research project. At the conclusion of the seminar, each student will submit a substantial and rigorous 10-12 page research proposal, with an annotated bibliography, for a roughly 35 page "article-length" thesis to be completed during Winter Study and the spring semester. Those whose proposals are accepted by a committee of faculty chosen by the department will continue on as thesis students, under the supervision of an advisor to be assigned by the department, for the remainder of the academic year; those whose proposals are not accepted will complete an abridged version of their project as an independent study in Winter Study but not continue in the honors program in the spring semester.

Requirements/Evaluation: short weekly exercises, a series of written assignments culminating in a 10-12 page research proposal (with an annotated bibliography), and active class participation

Prerequisites: departmental approval during junior spring

Enrollment Limit: 12

Enrollment Preferences: permission of the department

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2023

SEM Section: 01 MWF 10:00 am - 10:50 am Justin Crowe

PSCI 494 (S) Senior Thesis Research and Writing Workshop

Reserved for and required of those students invited to continue in the honors program following the department's approval of their research proposal at the end of the fall semester seminar, the spring semester Senior Thesis Research and Writing Workshop provides a focused forum for the exchange of ideas among thesis writers, who will regularly circulate excerpts of their work-in-progress for peer review and critique. During this time, students will work primarily with their assigned faculty advisor, with the workshop leader's primary role becoming one of coordination, troubleshooting, and general guidance. Near the end of the semester, students will receive feedback on their complete draft from their advisor and two additional faculty readers selected by the workshop leader; following revisions, the final work—a roughly 35 page piece of original scholarship—will be submitted to and evaluated by a committee of faculty chosen by the department for the awarding of honors as well as presented publicly to the departmental community at an end-of-year collective symposium.

Requirements/Evaluation: a roughly 35 page piece of original scholarly work that will be submitted to an advisor and faculty readers and then revised in accordance with their feedback, peer review of other thesis writers' work-in-progress, public presentation at an end-of-year collective symposium

Prerequisites: PSCI 493 and departmental approval at the conclusion of that course

Enrollment Limit: 12

Enrollment Preferences: permission of the department

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Spring 2024

HON Section: 01 MWF 10:00 am - 10:50 am Justin Crowe

PSCI 495 (F) Individual Project: Political Science
With the permission of the department, open to those senior Political Science majors who are not candidates for honors, yet who wish to complete their degree requirements by doing research--rather than taking the Senior Seminar--in their subfield of specialization. The course extends over one semester and the winter study period. The research results must be presented to the faculty supervisor for evaluation in the form of an extended essay.

Requirements/Evaluation: Completion of a substantial independent project, which shall form the basis of evaluation.

Prerequisites: two elective courses in the major's subfield specialization

Enrollment Limit: 1

Enrollment Preferences: Senior majors.

Expected Class Size: 1

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2023

Winter Study --------------------------------------------------------------

PSCI 12 (W) Cinema and Politics in Mexico
An introduction to Mexican cinema and its relationship with political history, with some emphasis on the "Golden Age" (c. 1935-55). Important topics include the meaning of the Revolution; the contested representation of national identity; corruption and the state; gender equality; high vs. popular culture; and the problems of democracy. We view films from the early 1930’s to the present.

Class Format: Along with clips and films viewed in class periods, four films are to be viewed outside of class, one in each week of the course.

Requirements/Evaluation: A short, informal oral presentation and a 10-page project

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Students with a command of Spanish (though it is not required).

Expected Class Size: 12

Grading: pass/fail only

Attributes: PSCI Comparative Politics Courses

Winter 2024

SEM Section: 01 TBA James E. Mahon

PSCI 14 (W) JA SelCom: A Case Study in Selection Processes

As a member of SelCom (SELection COMmittee), you will become a cohort with current members of JAAB (the Junior Advisor Advisory Board) to select the next class of JAs. You will participate in every step of the JA application evaluation process -- reading written applications, conducting interviews, discussing applicants with SelCom, and deciding on the final makeup of next year's JA class. Every SelCom member will complete anti-bias training at the beginning of Winter Study; working through biases to make thoughtful evaluations is crucial to this process. This is a fantastic opportunity for students who want to take on a leadership role that requires critical thinking and collaboration. Your input will help to shape the entry system, the JA role, and the very essence of the Williams community in the coming school year. The SelCom schedule is roughly as follows (subject to change). SelCom will likely meet 4-5 days per week. Week 1: SelCom members will undergo anti-bias training and then spend the first week conducting interviews with applicants and cleaning transcripts to ensure readability. Week 2-3: The committee will discuss applications with identifying information blinded to help mitigate bias in the selection process. Week 3-4: SelCom will revisit applications with consideration given to the personal identity of each applicant. The committee will then extend offers to a select number of candidates. Members may reconvene at some point in the spring semester (after the initial round of JA offers have been accepted or rejected) to determine which applicants on the waitlist should receive offers.

If you are interested in serving on SelCom during winter study, you must fill out this application form by October 29 at 11:59pm: https://docs.google.com/forms/d/e/1FAIpQLSefDaCz1P2OhKnKBqArAv8GPxdQXEQ_QfWAWAJ1gayF95prQ/viewform. JAAB will decide which applicants will serve on SelCom and inform all applicants of their application status by the end of the day on Monday, November 7. SelCom applicants who are not selected to serve on SelCom will have until November 9 (winter study registration deadline) to enroll in another winter study course.

Requirements/Evaluation: Attendance and active participation

Prerequisites: Anyone wanting to register for the SelCom Winter Study class needs to fill out the application form.

Enrollment Limit: 25

Enrollment Preferences: Open to students who are in the classes of 2025, 2024.5, 2024, 2023.5, and 2023 AND who are not applying for the JA role for the 2023-2024 academic year.

Expected Class Size: NA

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses
PSCI 15 (W) Climate Art & Activism

"Most of us are terrified by climate change and frozen by the confusion of what we should do to address this issue. Artists transform that energy into a determined roar, urging us all to play our part in stopping climate change with what we have, no matter where we are. Ultimately, we need hope and encouragement to make change happen, and art is a beacon of light." - Dekila Chungyalpa In recent decades we have seen an exciting number of works by contemporary artists that illuminate the climate crisis. Presented by cultural institutions around the world and published in multiple forums, these works highlight a new canon of climate change themed art that engages and inspires the public to affect change. In this Winter Study course students will be exposed to projects that examine environmental themes: indigenous history, fossil fuel destruction, environmental injustice, species extinction, plastic pollution, extreme weather, food sustainability, climate migration and more. Maya Lin's Ghost Forest, Olafur Eliasson's Ice Watch, Mary Mattingly's Swale, Allison Janae Hamilton's A House Called Florida, and Marc Swanson's A Memorial to Ice at the Dead Disco (recently at MASS MoCA) are just a few of the types of works we will examine. We will also look at works by writers, filmmakers, photographers, and theater artists for their different aesthetic portrayals of climate change. Students will then research an environmental topic that interests them and produce a work (this can be a proposal for a future work, a project sketch, or a final work) to be presented at the end of the session. Students will propose strategies for how their projects can engage the public in activism. Projects that explore local environmental issues and history will be encouraged. We will take one field trip to MASS MoCA to see the exhibit Hoosic: The Beyond Place. Students interested in all mediums are welcome: writing, visual arts, theater.

Requirements/Evaluation: Presentation(s); Creative project(s)
Prerequisites: None
Enrollment Limit: 30
Enrollment Preferences: Priority will be given to students in the Art, Theater, Environmental Studies or Political Science departments. I will send a questionnaire to students to evaluate their passion for the topic and how this class will enhance their studies.
Expected Class Size: NA
Grading: pass/fail only

Unit Notes: Eve Morgenstern is a documentary filmmaker and photographer. Her film CHESHIRE, OHIO follows the buyout of a town by a polluting coal plant. She is founder of SOON IS NOW, a climate art, performance and activist festival in Beacon, NY.

PSCI 17 (W) Martial Arts in Movies & Real Life

Short Version: 2 hours of martial arts training each morning, 2 martial arts movies each week, and a 10-page paper or project in which student teams write, choreograph, perform, shoot, edit, insert sound effects, and share their own fight scene. Longer Version: Movies that feature martial arts action rarely win Oscars or get much critical attention. Nevertheless, the best of these films can inspire extraordinary devotion amongst fans and are often the reason new students arrive at the door of a martial arts school and begin a journey which changes their lives forever. They are also a lot more fun to watch when you know something about martial arts - and the only legitimate way to know something about martial arts is to experience them first hand, rather than only on screen. The Martial Arts training (10am-Noon each weekday morning in Currier Ballroom) will be in Aikido, a synthesis of the Samurai arts of Kenjutsu (swordsmanship) and Jujutsu (body techniques). Training will improve each student's strength, balance, posture, and flexibility while also integrating mindfulness, centering, breathing, and relaxation exercises. Everyone will also learn how to throw their friends across the room. 25% of training time will be devoted to sword, staff, and dagger techniques. The provisional list of films we will be screening includes masterpieces of Japanese, Chinese, American, and French cinema: Seven Samurai, Last Samurai, Uzumasa Limelight, Enter the Dragon, Crouching Tiger Hidden Dragon, Brotherhood of the Wolf, Kill Bill (volume 1). Students will be evaluated on the quality of their participation during training and on a 10-page paper or team fight scene project. Students are encouraged to correspond with the instructor (rkent-at-aikiextensions.org) before registration begins if they have questions.

Requirements/Evaluation: Paper(s) or report(s); Performance(s); Creative project(s); Other: Students will be evaluated on the quality of their participation during training and on a 10-page paper or team fight scene project.
Prerequisites: same physician's approval on file as the school requires to participate on sports teams.
**PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits**

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors and members of the Political Science Department are available to help students find placements. Students can also email clia@williams.edu for the most up-to-date information. Students should then make their own contracts with the institution or agency. The student's fieldwork mentor should send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. Interested students should reach out to Paula Consolini at pconsoli@williams.edu by October 30th. A group meeting of all students will occur before winter study to prepare and after to discuss the experience. During winter study, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. Every year, course instructors arrange for some distinct sections of this course to provide specialized fieldwork opportunities in the area for small groups of students.

**Requirements/Evaluation:** A 10-page paper or comparable creative work such as a program or project design, video, webpage, or set of infographics.

**Prerequisites:** Interested students must complete the course interest form located at https://forms.gle/iXyDxFTd27Z9FkMA or email CLIA Director Paula Consolini at clia@williams.edu before the Winter Study Course registration deadline.

**Enrollment Limit:** 25

**Enrollment Preferences:** Political science majors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Paula Consolini will co-teach.

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

**PSCI 22 (W) LIFT: Learning Intervention for Teens**

This mentorship-based course pairs Williams students with teenagers involved in the Berkshire County juvenile justice system, usually due to truancy. LIFT is an official Commonwealth of Massachusetts probation diversion program. Sponsored by Pittsfield Chief of Police Mike Wynn ’93 and Professor Cheryl Shanks, the course is entirely run on a day-by-day basis by Williams students who have served as mentors in the past. Williams students provide positive mentorship, helping the teens to envision, construct, and present an independent project of the teen’s choosing. Past topics have ranged from teen parenting to who is the best point guard, from the history of the quesadilla to the biological process by which the horned lizard shoots blood from its eyes. The project and other course activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting, research, and communication, and to show teens that school can empower them, and not just be another form of incarceration. The course culminates with a presentation in which each mentor/mentee pair formally presents their work to an audience that includes judges and probation officers in the juvenile
court system, state elected officials, chiefs of police, district attorneys, the teens’ peers and families, and faculty and community members. Williams students are expected to attend trainings, meet with their teens three times a week, co-facilitate a final presentation, and contribute to a common log detailing their meetings. Because LIFT is an after-school program, this course meets Tuesday through Thursday from 3:30-5:30pm. Williams students will additionally meet Mondays from 4:00 to 5:00 pm. Absences cannot be accommodated: the teens cannot be let down. Williams students will undergo training as well as a criminal background check prior to the start. To apply, please fill out this form: https://forms.gle/iWvi5fsuVPFLdpJE9 Also register on PeopleSoft. The student leaders, Aliza Cotton and Michael LesStrang, will select the applicants, with some advice from the dean's office and course sponsors, and Professor Shanks will inform those who registered whether they were accepted.

Class Format: The group meets as a whole; additionally, pairs meet separately. At times this is in a classroom, at other times, the library or makerspace or studio.

Requirements/Evaluation: Successful mentorship throughout the term, contribution to the mentors' log, and final joint presentation.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Students will be evaluated based on a statement of application.

Expected Class Size: 10

Grading: pass/fail only

Unit Notes: Mike Wynn just retired as the Chief of the Pittsfield Police Department. He graduated from Williams in 1993.

Winter 2024

STU Section: 01    TBA     Cheryl Shanks

PSCI 28  (W)  Shakespeare and the Law in the Movies

This course will begin with an analysis of the social, political and religious framework of the Elizabethan world into which Shakespeare was born in 1564. We will examine the development of the English common law from its earliest origins in medieval times through Shakespeare's day and then analyze the relationship of a number of his early history plays to the Elizabethan concept of law and social order. We will consider several plays, including but not limited to, The Merchant of Venice, The Winter's Tale, Julius Caesar, Hamlet, and Measure for Measure, to see how Shakespeare used the law and legal principles in those works. Among the questions to be examined are how faithful was he to the law as he understood it? What dramatic licenses did he take? What did his use of the law tell us about Shakespeare the playwright and the dramatist? Film excerpts from Royal Shakespeare Company productions of the trial scenes in four of the plays listed above plus film selections from the Falstaff plays will be utilized to demonstrate the legal principles under discussion. We will visit Shakespeare and Company in Lenox, MA, to meet with its artistic director for a behind the scenes tour and a conversation on the challenges of producing classic Shakespeare in the modern world of social media. Finally, we will all recite soliloquies on top of Stone Hill. In addition, we will take up the "Famous Authorship Question," much beloved by under-employed PhD. candidates. Was William Shakespeare of Stratford-upon-Avon the Author of the Plays, a man all but unknown outside of Oxfordshire, obscure, almost an historical non-person, who could not even spell his own name the same way on any page of his last will and testament? Or was the true Author one of several prominent Elizabethans, who by birth, education and experience far outshone the Stratfordian and who had every compelling reason to keep their Authorship a secret.

Requirements/Evaluation: Presentation(s); Performance(s); Other: Students will work with me on an individual basis to learn how to deliver their assigned soliloquies on stage and then explain how they would direct another actor to make the same delivery.

Prerequisites: None except a love of Shakespeare, the ability to marvel at the Royal Shakespeare Co. productions on film and a willingness to engage in serious, robust discussion whether Shakespeare was true to the common law or rather to the requirements of the stage.

Enrollment Limit: 10

Enrollment Preferences: First senior, then junior, then sophomore, then first years

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Prof. Philip R. McKnight, Esq., J.D., Williams '65, Un. Chicago Law School '68, a trial and appellate attorney. Adjunct Professor, Williams College and the Massachusetts College of Liberal Arts, teaching environmental law and environmental history.
