TUTORIAL PROGRAM

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students’ independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners’ work.

Registration

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

AAS 206 (S) Beyond the Tiger Mom: Depictions of East Asian Mothers in Contemporary American Literature (WS)

Cross-listings: AAS 206 ENGL 206

Secondary Cross-listing

A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The “Tiger Mom”—highly controlling, strict, severe almost to the point of abuse—has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child’s own interests as opposed to success as defined by the parent when it comes to that child’s future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Ed Lin, Maxine Hong Kingston, Trung Le Nguyen, and Amy Chua, among others.
Class Format: In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers.

Requirements/Evaluation: A paper or response each week; extensive comments (verbal and written) on published and student work; active participation in class; creation of writing assignments and discussion questions.

AAS 351 (F) Racism in Public Health (DPE)

Cross-listings: AAS 351 PHLH 351

Secondary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

**AFR 205 (F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings**

**Cross-listings:** AFR 205 WGSS 207

**Primary Cross-listing**

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison’s writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the “color complex” at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.

AMST 299 (F) Let the Record Show: U.S. Literature of Research and Witness (DPE) (WS)

Cross-listings: AMST 299 ENGL 299

Primary Cross-listing

This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, Let the Record Show; Layli Long Soldier, Whereas; Nicholas Lemann, The Promised Land; Theresa Hak Kyung Cha, Dictee; James Agee, Let Us Now Praise Famous Men; Tillie Olsen, Yonnondio; Ida B. Wells, A Red Record; and Harriet Beecher Stowe, Key to Uncle Tom's Cabin.

Requirements/Evaluation: Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner's work.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

Writing Skills Notes: As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. there will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

Difference, Power, and Equity Notes: This course shares the core mission of the DPE initiative: to teach students how to “analyze the shaping of social differences, dynamics of unequal power, and processes of change.” The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

This course will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women...
helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards
temale empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism
continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How
did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions?

How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We
examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our
awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied
within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on
mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as
brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians,
and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness
for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation
practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

ARAB 212  (F) Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

ARTH 229  (F) The Art of Natural History  (WS)

Cross-listings: STS 226 ARTH 229

Primary Cross-listing

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated,
classified and organized, displayed and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge? How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between "objective" science and "subjective" art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.

ARTH 301 (S) Methodologies of Art History (WS)
The purpose of this course is to trace the origin and development of key ideas that define the discipline of art history. They include the idea that art has a history, that style is unique to individuals but also definitive of entire periods or cultures, that interpretation should be contextual, that representation is fundamentally subjective, that art can be an instrument of power, that reception is as much a part of the history of art as production, among many others. This course begins with a series of texts from around 1900, which drew upon nineteenth-century fields such as cultural history, psychology of perception, and psychology of empathy, to articulate the first methodologies of art history. The course then considers the critiques of those methods that emerged in the middle twentieth century from the fields of iconology, marxism, feminism, structuralism, and ethnic studies, among others. The course concludes with a consideration of the current revival of interest in the writings of the first art historians coming from perspectives such as phenomenology, aesthetics, anthropology, new materialism, "Bildwissenschaft," and neo-formalism. In this way, it becomes possible to see that the history of art is not merely the sum total of information available throughout the world about art objects, but also a coherent tradition of methodological debate about what are the most effective and responsible ways of writing the history of art.

Class Format: One one-hour recorded lecture per week will be upload to Glow.

Requirements/Evaluation: Six 1,000-word analytical essays. Six short responses to the papers of tutorial partners. Participation in class discussion. Attendance.

Prerequisites: Two prior ARTH courses (100-level ARTH courses are ideal). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 10

Enrollment Preferences: This course is designed for art-history majors, and they receive first priority (seniors, then juniors). The course is also open to history and studio majors who need to complete the methods requirement. The course is not open to other students.

Expected Class Size: 5-10
Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the ARTH 301 requirement for the art-history major. It will also satisfy the methods requirement for the history and studio major.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

ARTH 304 (S) Indigenous American Urbanism: Teotihuacan and its Legacy in Comparative Perspective

This course offers students the opportunity to undertake close study of Teotihuacan, Mexico, (ca. 0-600 CE) the largest urban development of American antiquity as measured by spatial, and possibly also, population metrics. The first half of the semester involves an immersive look at the urbanism, architectural history, archaeology, and historiography of Teotihuacan, the present-day name of which means, "Where Men Become Gods," in the Mexico (Aztec) language of Nahuatl. The following four weeks of the course will consider those major Ancestral American polities with which Teotihuacan interacted, including Monte Alban, Oaxaca and Tikal, Guatemala, or upon which its legacy exerted influence, including Chichen Itza, Yucatan and Tenochtitlan, Mexico City. The final two weeks of the course will consider comparative settlement and architectural data from Indigenous North and South America. Topics to be addressed over the semester will include the role of space in forging complex ancient societies; criteria for the identification of cities through archaeological remains; definitions of "complexity," economic inequity within and between city-states; and comparative settlement patterns.

Requirements/Evaluation: Weekly readings (80-100 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (20%); Six 3-page thematic essays addressing topics of the student's choice (60%); Final presentation of research findings (20%).

Prerequisites: None

ARTS 314 (F) Design for the Pluriverse: Architecture, Urban Design, and Difference (DPE)

Cross-listings: ARTS 314 ENVI 310

Primary Cross-listing

The built environment has a critical role in shaping how people enact, reproduce, and refashion social relations over time. Spatial forms, such as architecture and urbanism, are enmeshed in relationships, contestations, and change processes. This studio tutorial investigates the role of different environments in supporting or preventing specific spatial practices and ensuring spatial justice. Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist—the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: 200-level course on students' medium of choice (for the final project) or permission of instructor.
Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

ARTS 328  (F)  The Art of Almost Nothing

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

Class Format: studio class, 3 hours per week

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: Three studio art classes of any kind at Williams or previous studio experience with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who has taken at least three or more previous studio art classes at Williams

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ARTS 333  (S) Narrative Strategies

In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, sound art, and mixed media work. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of artists like Allison Janae Hamilton, Lorna Simpson, Joe Sacco, Lydia Davis, and Omer Fast among others. One of the aims of this course is to challenge traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How do different mediums allow for time to unfold in unexpected ways? How does omission play a powerful role in a narrative? How might the role of the narrator (often so powerful and present in novels and short stories) change in a visual arts context? This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings, outside lectures, and screenings may be

ASIA 111 (F) The Asia-Pacific War (WS)

Cross-listings: ASIA 111 HIST 112

Secondary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

ASIA 127 (F) Spring Grass: A Peek into Inequality in China (DPE) (WS)
Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls’ right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of “inequality,” including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators--all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Since it first began to circulate in manuscript in the mid-eighteenth century, Cao Xueqin's novel Story of the Stone (Shitou ji), also called Dream of the Red Chamber (Honglou meng), has captured the imaginations of readers young and old with its sprawling story of the coming-of-age of members of a wealthy family on the cusp of ruin. As critically acclaimed as it is beloved, Story of the Stone is widely regarded as China's greatest novel due to the intricacy of its narrative, the complexity of its characters, and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. The focus of this tutorial will be reading the 120-chapter novel. Students will have the option to read either in Chinese or English (though papers and class discussion will be in English). ASTR 402  (F)  Between the Stars: The Interstellar Medium  (QFR)

The matter between the stars--the interstellar medium--tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is
observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

**Class Format:** Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

In this course, we will read texts from Homer's Odyssey (8th cent. BCE) to Heliodorus’ Aethiopica (4th cent. CE), alongside a range of scholarly approaches to them. We will pay particular attention to the prose fiction of the Roman imperial era, including both the texts traditionally called the "ancient novel" as well as the various forms of biography, ethnography, and mythography adjacent to them. Throughout, we will explore narratives and representations of gender, sexuality, race/ethnicity, class, and cultural identity, reflecting on how our primary sources engage with their complex social and political contexts. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students’ capacity to evaluate claims and dismantle false assumptions about the continuity of the “classical” past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

These ancient stories give us valuable opportunities to explore early understandings of “fiction,” the development of narrative, and the construction of the storyteller in both poetry and prose. In this course, we will read texts from Homer’s *Odyssey* (8th cent. BCE) to Heliodorus’ *Aethiopica* (4th cent. CE), alongside a range of scholarly approaches to them. We will pay particular attention to the prose fiction of the Roman imperial era, including both the texts traditionally called the “ancient novel” as well as the various forms of biography, ethnography, and mythography adjacent to them. Throughout, we will explore narratives and representations of gender, sexuality, race/ethnicity, class, and cultural identity, reflecting on how our primary sources engage with their complex social and political contexts. All readings will be in English.

COMP 227  (S)  Outdoor Pools: Where Eros Meets Thanatos  (WS)

In an outdoor swimming pool is where Eros meets Thanatos: in both F. Scott Fitzgerald's novel The Great Gatsby (1925) and Billy Wilder's movie Sunset Boulevard (U.S.A., 1950), the protagonists are shot dead in their pool, and in his adaptation of Romeo and Juliet (U.S.A., 1996) Baz Luhrmann transposes the balcony scene to an outdoor pool where romance unfolds. What is it about outdoor swimming pools that they irredeemably capture our imagination? This interdisciplinary tutorial explores the function and significance of outdoor swimming pools in French, German, and U.S. culture through literature, painting, photography, and film. Whether we regard them as a symbol of status and wealth, the remnants of Hollywood's Golden Age era, the embodiment of order and discipline, or a major environmental impact factor, they nevertheless fascinate us. Because outdoor swimming pools, whether private or public, are a microcosm of society and a metaphor for human civilization, they have also been at the center of discussions about racial segregation and religious discrimination in Europe as well as in the U.S.A.. Although pools are mostly governed by tacit rules, such as respect for personal space and the desexualization of encounters, visitors have often disregarded and broken these regulations. That explains why outdoor swimming pools have often served as the perfect backdrop for literature and cinema's steamiest and most violent scenes. We will start the course with a brief social history of pools and read a few sociological studies of swimming pools by experts (Jeff Wiltse, Kate Moles, Susie Scott) to lay the theoretical ground for our analysis. In the course of the tutorial, we will explore through novels, photographs, paintings, and films the various functions assigned to outdoor swimming pools depending on the time period. We will also delve into the genre of summer pool side literature (the satirical Summer House with Swimming Pool (2011) by Hermann Koch, the thriller The Swimming Pool (2018) by Clare Mackintosh, and Julie Otsuka's latest novel, The Swimmers (2022)) and try to explain its great popularity. While the outdoor pool functions as a mirror of excess and decadence in the 1920's as evidenced by the lavish pool parties thrown by The Great Gatsby by F. Scott Fitzgerald (1925), it becomes the epitome of white middleclass suburban life in the 60's as John Cheever's short story The Swimmer narrates. During the 70's, the pool advances as a symbol of sexual liberation as the erotic thriller The Swimming Pool (France, 1969) by Jacques Deray, the sexually charged pool paintings Peter Getting Out of Nick's Pool (1966) or Portrait of an Artist (Pool with Two Figures) (1972) by David Hockney, or the male nudes by Tom Bianchi in his Fire Island Pines: Polaroids 1975-1983 attest. In the 80's the outdoor pool becomes once more the mirror of opulence and eroticism, which Helmut Newton's photographs of Hollywood celebrities (Liz Taylor swimming in her jewels) and for Playboy magazine capture as well as Paul Thomas Anderson's film Boogie Nights (U.S.A.,1997) about the booming porn industry during the Reagan-era. Starting in the late 90's, the outdoor swimming pool takes on greater political significance, largely due to the emergence and increasing visibility of female and gay filmmakers. In François Ozon's thriller Swimming Pool (France, 1996), the pool is the setting of female solidarity and feminist revenge. In her character study movie Everyone else (Germany, 2009), Maren Ade carefully examines how gender roles and stereotypes play out and get reinforced during a pool party. At last, in her recent comedy Freibad, (Germany, 2022) Doris Dorrie chooses a women-only public outdoor pool as the backdrop to raise questions of racial segregation and religious discrimination

COMP 241 (S) Sex and Gender in Ancient Greece and Rome

Cross-listings: CLAS 241 COMP 241 WGSS 241

Secondary Cross-listing

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Cross-listings: WGSS 250 THEA 250 ENGL 253 COMP 247

Secondary Cross-listing

What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherríe Moraga, Lisa Kron, Arutchusa Speaks, Maya Krishna Rao, Tracie Chima Utoh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner's papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

COMP 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context  (WS)

Cross-listings: ENGL 256 THEA 252 COMP 256

Secondary Cross-listing

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

COMP 291  (F)  Red Chamber Dreams: Reading China's Greatest Novel  (WS)

Cross-listings: COMP 291 ASIA 291

Primary Cross-listing

Since it first began to circulate in manuscript in the mid-eighteenth century, Cao Xueqin's novel *Story of the Stone* (*Shitou ji*), also called *Dream of the Red Chamber* (*Honglou meng*), has captured the imaginations of readers young and old with its sprawling story of the coming-of-age of members of a wealthy family on the cusp of ruin. As critically acclaimed as it is beloved, *Story of the Stone* is widely regarded as China's greatest novel due to the intricacy of its narrative, the complexity of its characters, and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. The focus of this tutorial will be reading the 120-chapter novel. Students will have the option to read either in Chinese or English (though papers and class discussion will be in English). We will also read scholarly literature to learn about some of the major critical approaches to the novel, and about its enduring importance in the Chinese literary tradition.

Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

ECON 216  (S) Global Crises and Socio-Economic Policies

Socio-economic policies (health, education, welfare, jobs) that respond to global crises have evolved over the past four decades. For most of the last century, macroeconomic priorities in developing countries constrained the potential of these policies during crisis periods when governments faced pressure to cut public spending, with adverse consequences for the most vulnerable. However, over the past two decades, developing country governments have increasingly integrated health, education, welfare and employment policies to counter shocks and build economic resilience. These
more comprehensive responses proved vital during the COVID-19 crisis's cascading series of epidemiological, economic, social, and political shocks, as public health measures created severe livelihoods disasters for the most vulnerable. In this respect, COVID-19 serves as a harbinger of the future shocks that climate change threatens. This tutorial will focus on how developing country governments can build bridges across vital policy sectors—particularly health, education, welfare and employment—and link these to other economic interventions in order to better tackle future global crises. Building on a historical analysis, the course will examine the path-breaking examples of many developing countries' bold responses to the COVID-19 pandemic, the resulting fiscal challenges, and the lessons these offer for future crises including those resulting from climate change. The course will conclude with a forward-looking exercise, examining the role of integrated health, education, welfare and employment policies in better enabling developmental responses to both climate change adaptation and mitigation strategies. This will include an exploration of the emerging work across the global South on a Just Transition to green and sustainable development, which aims to optimally integrate climate, development and equity strategies.

ECON 382 (F) Gentrification and Neighborhood Change (DPE)

While the phenomenon we call "gentrification" was first noted in the 1960s, these changes in urban neighborhoods have recently drawn increasing scrutiny and concern. Coming at a time of growing income inequality, the movement of higher income households into neighborhoods previously occupied by lower-income households has raised concerns about displacement, housing affordability, access to employment and other problems that may be associated with a gentrifying city. These problems may be further exacerbated by residential segregation and reduced support for public housing and transportation. This course will provide an opportunity to study these issues in depth. What, exactly, is gentrification? What do we know about the economic causes and consequences of gentrification and neighborhood change? How are these causes and consequences affected by growing income inequality and continued segregation in housing? What policy options might be pursued that could improve the well-being of existing and potential residents of the neighborhoods in US cities?

Requirements/Evaluation: Students will meet in pairs once per week. On alternate weeks students will write a 10-12 page primary paper on an assigned topic, and on the next week write a 4-5 page comment and discussion on the primary paper. At least one of the primary papers written by each student during the course must incorporate some analysis of data on gentrification using data introduced in discussion.

Prerequisites: Economics 251 (Price and Allocation Theory), Statistics 161 or Economics 255 (Econometrics) or POEC 253 (Empirical Methods in Political Economy) or instructor permission.

Difference, Power, and Equity Notes: Gentrification has been identified in the survey of DPE suggestions as a worthwhile and important topic for a course satisfying the DPE requirement. Gentrification, with its consequent displacement of low-income and frequently minority households in cities is widely viewed as a problem and there have been increasing demands for local policies to limit the rate or extent of gentrification. We will address the causes, measurement of gentrification and extent to which it burdens poor households.

ECON 458 (S) Economics of Risk

Risk and uncertainty are pervasive features of economic decisions and outcomes. Individuals face risk about health status and future job prospects. For a firm, developing new products is risky; furthermore, once a product has been developed, the firm faces product liability risk if it turns out to be unsafe. Investment decisions—from managing a portfolio to starting a business—are also fraught with uncertainty. Some risks are environmental—both manmade problems and natural disasters; other risks include the possibility of terrorist attack and, more locally, issues of campus safety. This tutorial explores both the private market responses to risk (e.g., financial markets, insurance markets, private contracting, and precautionary investments and saving) and government policies towards risk (e.g., regulation, taxation, and the legal system). From a theoretical standpoint, the course will build on expected utility theory, diversification, options valuation, principal-agent models, contract theory, and cost-benefit analysis. We will apply these tools to a wide variety of economic issues such as the ones listed above. One goal of the course is to discover common themes across the disparate topics. Students will be expected to read and synthesize a variety of approaches to risk and uncertainty and apply them to various issues.

Class Format: tutorial; students will meet with the instructor in pairs in each week

Requirements/Evaluation: For the first ten weeks, each student will write a 5 - 7 page paper every other week, and comment (of 2 - 3 pages) on their partner's work in the other weeks; the final two weeks will be reserved for papers on a topic of each student's interest (again, 5 - 7 pages but without needing to write a comment on their partner's work); one of the papers during the term will be revised to reflect feedback from the instructor and the student's partner

ENGL 131  (F) All About Sonnets  (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships—God, Nature, art, a particular place, the State, oppressors—while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)—speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state—but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

ENGL 206  (S)  Beyond the Tiger Mom: Depictions of East Asian Mothers in Contemporary American Literature  (WS)
Cross-listings:  AAS 206 ENGL 206
Primary Cross-listing
A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The "Tiger Mom"—highly controlling, strict, severe almost to the point of abuse—has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child's own interests as opposed to success as defined by the parent when it comes to that child's future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Ed Lin, Maxine Hong Kingston, Trung Le Nguyen, and Amy Chua, among others.

ENGL 227  (F)  Elegies  (WS)

This tutorial explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the
special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900—including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists—William Butler Yeats, W.H. Auden, Robert Lowell, and Seamus Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by James Joyce (“The Dead”) and Vladimir Nabokov (“Spring in Fialta”).

ENGL 234  (F)(S)  The Video Essay

While people today experience an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in an effort to understand how these media affect viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in basic video editing, students will spend the term alternating between making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot any original material. No prior experience is required.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner.

Requirements/Evaluation: four written exercises (1-2 pages); five video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

ENGL 253  (F)  Feminist Theatres: A Global Perspective  (DPE) (WS)
What makes a work of theatre “feminist”? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima UtOh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre’s ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

ENGL 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)
Cross-listings: ENGL 256 THEA 252 COMP 256
Secondary Cross-listing

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can’t do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one
student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make
sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

ENGL 290 (S) Technologies of Friendship

Cross-listings: STS 290 ENGL 290

Secondary Cross-listing

Contemporary friendships--whether among roommates, near neighbors, or friends living thousands of miles apart--are highly mediated. We
communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with
people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on
in-person friendships was complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we
will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example
the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and
important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for
friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from
psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes,
letters, telephones, video games, social media, and novels themselves.

Requirements/Evaluation: Students will write essays and critique their partner's essays in alternate weeks. Essays will receive detailed instructor
feedback, including writing instruction.

ENGL 299 (F) Let the Record Show: U.S, Literature of Research and Witness (DPE) (WS)
Cross-listings: AMST 299 ENGL 299

Secondary Cross-listing

This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, Let the Record Show; Layli Long Soldier, Whereas; Nicholas Lemann, The Promised Land; Theresa Hak Kyung Cha, Dictee; James Agee, Let Us Now Praise Famous Men; Tillie Olsen, Yonnondio; Ida B. Wells, A Red Record; and Harriet Beecher Stowe, Key to Uncle Tom’s Cabin.

Requirements/Evaluation: Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner’s work.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

Writing Skills Notes: As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. There will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

Difference, Power, and Equity Notes: This course shares the core mission of the DPE initiative: to teach students how to “analyze the shaping of social differences, dynamics of unequal power, and processes of change.” The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

How can we capture the “liveness” of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

ENGL 343 (S) Whitman and Dickinson in Context (WS)

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist—the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.

Class Format: After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 103, 201, 215, 301, 302, 304, or permission of instructor

GERM 377 (F) Austria and its Borders

For centuries, Austria was characterized not just by the sheer expanse of its territory, extending from the Adriatic Sea to the South to Ukraine in the North, from Switzerland in the west to nearly Turkey in the east. Its identity was also closely associated with the many porous internal borders among its various ethnic groups: German, Polish, Romanian, Slavic, Italian, etc. The first World War put an end to this multiethnic, multilingual identity, leaving a primarily ethnic-German “Rest-Österreich” whose fatal passivity in the face of German expansionism led to the erosion of the nation altogether. After World War II, Austria expended far too much energy cordonning off its own past as a perpetrator, creating through willful ignorance a psychic and political boundary that only began to open with the election of a former Nazi to the symbolic office of president in the mid-eighties. Austria's entrance into the European Union in 1995 coincided with an influx of refugees from the Balkan Wars; it would seem that Austria was on its way back to expansive borders. But the 2000s have seen a two-track development: on the one hand rapidly increasing ethnic, linguistic, and cultural diversity and on the other a ferocious defense of ostensibly “Austrian” identity. This course will trace the Austrian relationship to its internal and external borders by examining literature, history, and popular culture surrounding key touchpoints: 1918, 1945, 1987, and 2015.

Class Format: This will be a “tritorial,” with groups of three students meeting in tutorial format with the instructor.

Requirements/Evaluation: Three-four 5-page papers, three-four 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

Cross-listings: ASIA 111 HIST 112

Primary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation: Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

HIST 488 (F) Sites of Memory and American Wars (WS)

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

Class Format: Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

Requirements/Evaluation: This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History.
Expected Class Size: 10

Distributions: (D2) (WS)

Writing Skills Notes: At the start of the semester, students will outline what their writing goals are for the semester, and they will receive weekly feedback on their writing from the professor and from their tutorial partner. HIST 492 (S) Making Race in Early Modern Europe (DPE)

In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

Requirements/Evaluation: Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

Prerequisites: 200- or 300-level History classes

Enrollment Limit: 10

Enrollment Preferences: Junior and seniors; History majors.

Expected Class Size: 10

Difference, Power, and Equity Notes: The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

JLST 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.
Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activist and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumi and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

Class Format:  Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being
(including, for example, developing rational capacities and self-mastery; succeeding in worthwhile projects, cultivating relationships, living morally,
developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty
here? Does the fact that our lives will end threaten their meaning? How can science contribute to our understanding of these issues? We'll examine
these and related questions through historical and contemporary readings, using rigorous philosophical tools.

PHIL 206 (S) Philosophy and Tragedy (WS)

Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something
fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that
we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can
be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control
of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The
tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born--but the next best thing is to die soon (Aristotle's Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus)." Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the Oresteia and Prometheus Bound by Aeschylus, Sophocles' Theban Cycle, and the Hippolytus, Bacchae and Philoctetes by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotle's Poetics and will continue with Hume's Of Tragedy, Hegel's various writings on tragedy, and Nietzsche's The Birth of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.

PHIL 213  (F)(S)  Biomedical Ethics  (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Nietzsche, Marx and Freud have had a profound influence on literature, philosophy, and critical theories of the 20th and 21st centuries. In this tutorial we will treat them as diagnosticians of modernity who engaged in unveiling illusions and opening up possible alternative human futures. Each questioned the emancipatory effects of dominant understandings of reason and freedom as well as idealist and humanist accounts of moral progress in history; each aimed to liberate human beings from unnecessary suffering. We will focus on questions concerning their distinctive diagnostic and critical methods, the problems they identified, and their respective understandings of religion and modern science.

PHIL 225  (S) Existentialism
We will study the philosophical and literary works of Kierkegaard, Nietzsche, Dostoevsky, Tolstoy, Kafka, Sartre, de Beauvoir, and Camus. One of our guiding questions will be: What makes a thinker an "Existentialist"? The answer is not merely that they ask the question, "What gives meaning to a human life?" And, it's not merely that their answer invokes our freedom to determine our own identities. More than this, Existentialists emphasize the subjective relation we bear to our belief systems, moral codes, and personal identities. Existentialists investigate deeply irrational phenomena of human life, including anxiety, boredom, tragedy, melancholy, despair, death, faith, sexuality, love, alienation, hate, sadism, masochism, and authenticity. And, Existentialists express their thought in philosophical treatises as often as in literary works. In this course we will seek to comprehend the dimensions in which Existentialism is a distinctive intellectual tradition.

Class Format: Students will meet in pairs or trios with the instructor for 60 minutes each week.

Requirements/Evaluation: Students will take turns as the lead writer one week, and the respondent the next. The week's lead writer will write a 5- to 6-page essay on the assigned reading, due 36 hours before the meeting. The week's respondent will write a 2-page essay on the leader's essay due at the time of the meeting. At the meetings, both students will present their essays and hold a discussion. PHIL 336 (F) Political Liberalism and its Critics (WS)

Political liberalism has been both celebrated and lamented. The philosopher John Rawls is widely credited with reviving liberalism in the late 20th century and providing its most persuasive defense. In this tutorial, we'll read portions of Rawls' major works, *A Theory of Justice* and *Political Liberalism*, and trace how his theory evolved in response to an array of critics, including libertarians, perfectionists, communitarians, feminist philosophers, and critical race theorists. Among other things, these critics challenged Rawls' interpretation and defense of the social contract framework, the ideals of freedom and equality, the content of principles of justice, political neutrality about the good, the nature of the self, the division between public and private spheres, and the distinction between ideal and non-ideal theory. We'll examine these criticisms in depth. If time permits, we'll also look briefly at some recent post-Rawlsian debates about the nature of distributive justice (e.g., luck vs. relational egalitarianism, or global justice).

PHIL 337 (S) Justice in Health Care (WS)

Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice specifically within the health care context. While social justice and distributive justice are deeply intertwined in the health care context and we will discuss both, we will focus primarily on the concept of distributive justice. This theoretically oriented work will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform; justice in health care rationing and access to health care, with particular attention to the intersections of rationing criteria with gender, sexuality, race, disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in low resource settings.

PHLH 351  (F)  Racism in Public Health  (DPE)

Cross-listings:  AAS 351  PHLH 351

Primary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

PHYS 314 (S) Controlling Quanta (QFR)
This course will explore modern developments in the control of individual quantum systems. Topics covered will include basic physical theories of atoms coupled to photons, underlying mathematical tools (including Lie algebras and groups), and computational methods to simulate and analyze quantum systems. Applications to quantum computing, teleportation, and experimental metaphysics (Bell's inequality) will also be discussed.

Requirements/Evaluation: tutorial preparation and participation, weekly problem sets/papers, and a final project
Prerequisites: PHYS/MATH 210 or MATH 209 or MATH 250

PHYS 405 (F) Electromagnetic Theory (QFR)
This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including electric fields and matter, magnetic materials, light, and radiation. As we explore diverse phenomena, we will learn useful approximation techniques and beautiful mathematical tools. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

Class Format: Class will meet once as a whole to introduce new material and for informal discussion.
Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209 or MATH 309
Enrollment Limit: 30
Enrollment Preferences: Preference will be given to physics and astrophysics majors.
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Physics courses are all heavily dependent on QFR skills. Phys 405 will feature extensive use of vector calculus and differential equations while also asking students to develop facility with approximation techniques in solving complex problems throughout the semester.

PSCI 248 (F) The USA in Comparative Perspective (WS)
Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; national identity and authoritarian populist nationalism; war and state-building; American exceptionalism, religion, and foreign policy; criminal justice; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
PSCI 259 (F) George Orwell: Capitalism, Socialism and Totalitarianism

It is hard to overstate the enduring influence of George Orwell on political discourse in the 20th century and beyond. Before his death in 1950 at the young age of forty six, Orwell produced a stunningly large and diverse body of work in the fields of journalism, literature, and political commentary. Much of this work was inspired by his own experiences as a police officer in Burma, several years working and traveling with destitute workers in England and France, as well as his experiences fighting against fascism during the Spanish Civil War in the late 1930s. While a fairly obscure and struggling author for much of his life, Orwell achieved worldwide fame after the Second World War with the publication of Animal Farm (1945) and 1984 (1949). This tutorial has two main objectives. First, it will introduce students to Orwell's most important books and essays in the context of a turbulent political era marked by the Great Depression, the rise of totalitarianism, world war, and the emerging Cold War. Second, the tutorial will examine the past and ongoing uses and abuses of Orwell's legacy by scholars and analysts on both the political left and the right. As Louis Menand argues, "almost everything in the popular understanding of Orwell is a distortion of what he really thought and the kind of writer he was." The course will conclude by examining what Orwell's thought contributes to a consideration of current issues ranging from the emergence of cancel culture to the possibilities of democratic socialism in the 21st century.

Requirements/Evaluation: 4 lead essays of 5-6 pages and 4 response essays of 2 pages.

Prerequisites: At least one introductory political science course.

PSCI 261 (F) The Arab-Israeli Conflict (WS)

This tutorial will cover the Arab-Israeli dispute--from both historical and political science perspectives--from the rise of the Zionist movement in the late nineteenth century to the present day. It will examine the various explanations that scholars have offered for why the conflict has persisted for so long, how it has evolved over time, the role that outside powers have played in shaping it, and how its perpetuation (or settlement) is likely to impact Middle East politics in the future. More specifically, the class will examine the origins of the Zionist movement; the role that the First World War played in shaping the dispute; the period of the British mandate; the rise of Palestinian nationalism; the Second World War and the creation of the state of Israel; the 1948, 1956, 1967, and 1973 Arab-Israeli wars; Israel's 1982 invasion of Lebanon and its consequences; the promise and ultimate collapse of the Oslo peace process during the 1990s and early 2000s; the rise of groups such as Hamas, Hezbollah, and Palestinian Islamic Jihad; the rightward shift
in Israeli politics since 2000; the intensification of Israeli-Iranian antagonism and its implications; the shift in Israel's relations with the Sunni Arab world that has occurred in recent years; and the future of the conflict.

Requirements/Evaluation: Biweekly response papers; Biweekly critiques of partner's response papers; Class participation; Final analytical essay

Prerequisites: None

PSCI 307  (F)  American National Identity and State Power  (WS)

Debates over American national identity, or what it means to be an American, have intensified in recent years, with a resurgent white Christian nationalism challenging progressive aspirations for a multiracial, environmentally sustainable, liberal democracy. At the same time, Republicans and Democrats fight over the scope and limits of government power on policies ranging from taxation and spending, to abortion, immigration, healthcare, policing, gun ownership, and voting rights. Are these conflicts related, and if so, how? Does how Americans define themselves as a nation inform the shape of the American state and the types of policies it creates? Or is it the reverse? Does the state and its policies make the nation, as many scholars claim? This tutorial investigates the relationship between state and nation over time in the United States. We will explore conflicts over how "the people" are defined in different moments, and we will examine how these conflicts connect to the exercise of state power in areas including territorial expansion, census taking, public health, immigration, social welfare, and policing.

Requirements/Evaluation: Five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Prerequisites: At least one political science class or permission of instructor.

PSCI 349  (S)  Cuba and the United States  (DPE) (WS)

We examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. The course begins with the political economy of the colony, then covers the Cuba- US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual identity; the institutions of "popular power"; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts,
polemics, policy statements of the US government, and a wide range of academic works.

**Class Format:** a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

**Requirements/Evaluation:** five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

**Prerequisites:** any course on Latin America or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Assignments are graded and returned weekly. After each student has written one long paper and one response, the professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students write a one-page paper in E’ (E-prime), English without the verb "to be."

**Difference, Power, and Equity Notes:** Among other topics, the course describes an independence war fought by insurgents dedicated to color-blind citizenship (even as the "civilized world" embraced scientific racism); neo-colonialism under the Platt Amendment and after; race and the Revolution; gender and the changing treatment of sexual identity under the Revolution; and the categorical power differences that arise when only one political party is permitted to organize.

**PSYC 127 (S) The Psychology of Success (WS)**

This course will examine the psychology of success from a scientific perspective. After considering what success means, we will examine two broad influences on success: personality (e.g., intelligence, grit, and mental illness) and environment (e.g., schooling, parenting, and practice). We will talk about barriers to success, the search for success, and the cost of searching for success. Each week we will read a book or a set of articles (or possibly documentaries or podcasts). One partner will write a paper and the other will write a response. This course is not meant to make you more successful; the goal is to think critically about important issues, use evidence to make arguments, be skeptical, and practice writing and speaking in a convincing and engaging way.

**Requirements/Evaluation:** written work and discussion of that work; a five-page paper will be due every other week and a one-page response will be required other weeks

**Prerequisites:** none

**Enrollment Preferences:** highest priority will be given to incoming first-years followed by rising sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will submit a paper every other week (minimum 5 pages), and in alternate weeks they will write a response to their partner's paper. The instructor will provide detailed feedback on the papers.

**REL 115 (F) Latina Feminist Spiritualities (DPE) (WS)**

**Cross-listings:** LATS 115 REL 115 WGSS 115

Secondary Cross-listing
Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumí and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

REL 210  (F) Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Cross-listings: ASIA 269 STS 269 REL 269 ANTH 269

Primary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

REL 285 (S) Haunted: Ghosts in the Study of Religion

Haunting offers a powerful way to speak about forces that affect us profoundly while remaining invisible or elusive. "What is it that holds sway over us like an unconditional prescription? The distance between us and that which commands our moves—or their opposite, our immobility—approaches us: it is a distance that closes in on you at times, it announces a proximity closer than any intimacy or familiarity you have ever known" (Avital Ronell, Dictations: On Haunted Writing [1986] xvi-xvii). The figure of the ghost has been developed by those seeking to grapple with the ongoing effects of modern slavery, colonialism, state-sponsored terrorism, the holocaust, and personal trauma and loss. Building upon the insights about memory, history, and identity that haunting has been used to address, this course will challenge you to explore the study of religion by way of its "seething absences." We shall ask how the study of religion has endeavored to address loss, trauma, and its persistent effects, what "holds sway" over various approaches to the study of religion, as well as how "religion" constitutes its own ghostly presence, haunting other domains.

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

SOC 348 (S) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)

Cross-listings: GBST 348 SOC 348 RUSS 348

Primary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.

**Cross-listings:** STS 226 ARTH 229

**Secondary Cross-listing**

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated, classified and organized, displayed and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological
insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge? How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between "objective" science and "subjective" art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

**Class Format:** This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 5-7 page paper responding to the week's theme, and one "respondent," who will offer a 2-3 page response to the presenter's paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied.
within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

STS 290 (S) Technologies of Friendship

Cross-listings: STS 290 ENGL 290

Primary Cross-listing

Contemporary friendships—whether among roommates, near neighbors, or friends living thousands of miles apart—are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships was complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, social media, and novels themselves.

Requirements/Evaluation: Students will write essays and critique their partner's essays in alternate weeks. Essays will receive detailed instructor feedback, including writing instruction.

What makes a work of theatre “feminist”? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utoh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. THEA 252  (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context  (WS)

Cross-listings:  ENGL 256  THEA 252  COMP 256

Primary Cross-listing
We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

**WGSS 127  (F) Spring Grass: A Peek into Inequality in China  (DPE) (WS)**

**Cross-listings:** ASIA 127 WGSS 127 CHIN 427

**Secondary Cross-listing**

*Spring Grass (Chuncao)* is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (*gaige kaifang*) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues.

Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women’s roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls’ right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong’s proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (*nannü bu pingdeng*) and the urban/rural-gap (*chengxiang chabie*) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

**Prerequisites:** For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

**Enrollment Limit:** 10

**Enrollment Preferences:** Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students’ drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio
to showcase their best works.

**Difference, Power, and Equity Notes:** The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

**WGSS 207 (F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings**

**Cross-listings:** AFR 205 WGSS 207

**Secondary Cross-listing**

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women
helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha’s day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha’s day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 258(D2) WGSS 225(D2) REL 258(D2) ANTH 258(D2)

Writing Skills Notes: We write every week—either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha’s teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

WGSS 241 (S) Sex and Gender in Ancient Greece and Rome

Cross-listings: CLAS 241 COMP 241 WGSS 241

Secondary Cross-listing

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students’ capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

WGSS 244 (F) Actually Existing Alternative Economies (DPE)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain—and now parts of the U.S.—are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.’ Feminist geographers Julie Graham and Katherine Gibson developed practices of ‘mapping’ local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a ‘script’ of local helplessness to resist the ‘rape’ of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

Requirements/Evaluation: six papers of 5-7 pages, six written responses to partner's papers, participation in tutorial discussion

WGSS 250 (F) Feminist Theatres: A Global Perspective (DPE) (WS)

Cross-listings: WGSS 250 THEA 250 ENGL 253 COMP 247

Secondary Cross-listing

What makes a work of theatre “feminist”? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherríe Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utoh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument,
spoken-word monologue, or activist prompt).

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
WGSS 250(D2) THEA 250(D1) ENGL 253(D1) COMP 247(D1)

**Writing Skills Notes:** This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

**Difference, Power, and Equity Notes:** This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.
