ENGL 339 (S) Black Counterpublic Sphere in Early America (DPE)

This course examines the emergence of black writing and chronicles the major movements of African American print culture from the early American republic to the antebellum era. We will investigate what Joanna Brooks identifies as a distinct tradition of black publication, or a black print “counterpublic” sphere, and determine how this counterpublic emerges around questions of agency, humanity, and the law. We also will consider its role in setting and sustaining communal and intellectual agendas for black people through our engagement with such questions as: how did print culture become central to liberation efforts in early America? And how did black people participate through print in the making of the early republic and the transatlantic exchange of ideas? We will discuss such authors as Briton Hammon, Phillis Wheatley, and Olaudah Equiano. Collaborating with Williams College Special Collections, we will analyze a broad range of literary forms and documents (e.g. pamphlets, orations, epistles, and sermons) and study the institutions that made early black print publication possible.

**Class Format:** seminar

**Requirements/Evaluation:** three critical response papers of two pages each and a culminating research project with Special Collections

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Expected Class Size:** 20

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: This course centers black writing and print culture during the nascence of the American empire, illuminating the ways in which black people wrote themselves into the early American public sphere. Through reading and discussion, analytical essays, and archival investigation, this course introduces students to discourses that shaped the early American republic and teaches students how to examine and articulate ideas about race, rights, nation, citizenship, self-mastery, agency, authorship, aesthetics, and freedom.

ENGL 340 (S) Elizabeth Bishop in the Americas (DPE)

Crosslistings: COMP342 / WGSS340 / ENGL340 / AMST340
Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: seminar; seminar, three hours per week, small group discussion, archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 15

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AMST or WGSS DPE: This course examines difference, power, and equity in poetry and other writing produced during the Cold War period in the Americas. As the course description indicates, Elizabeth Bishop provides the central focus of our interrogation of questions and constructions of race, class, sexuality, national identity, and power in the U.S. and Brazil during a time of intense exchange between the two nations. This course employs critical tools (case studies, translation theory, archival research, poetics, close reading, comparative approaches, postcolonial theory) to help students question and articulate the way that social injustice, such as racial inequality, poverty, and colonial conquest, shapes national and individual identities. Students will learn how to articulate how our aesthetic and cultural products also serve to shape these identities but also can challenge the dominant power structures.

ENGL 342 (S) Race and Feeling in Twentieth Century Literature

Crosslistings: AFR345 / ENGL342

Primary Crosslisting

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Class Format: seminar

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 343 (S) Whitman and Dickinson in Context (WI)

In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings—in Whitman's case, his essays, in Dickinson's, her letters—we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Class Format: tutorial

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

TUT Section: T1    TBA     Kathryn R. Kent

**ENGL 344 (S) Aestheticism & Decadence**

Crosslistings: COMP364 / ENGL344

**Primary Crosslisting**

"Fin de Siècle": Despair over a seemingly perilous decline in moral standards, scandalous forms of art and writing, anxieties brought on by Britain's uneasy relation to its colonies, and the emergence of new dissident sexual and social identities, led some to fear (and others to celebrate) that the ways of Victorian Britain were not long for this world at end of the 19th century. This course will consider two loosely affiliated artistic movements, aestheticism and decadence, as responses both scandalized and scandalizing to this exhilarating period. The terms themselves are elusive; so, much of our work will entail tracing out the multiple and often contradictory uses of them. Do they designate a distinct cultural and historical moment, a loose set of writers and artists, a set of thematic preoccupations? Or, might we better understand aestheticism and decadence as a style of writing, or even of the self--one we are as likely to find in 21st-century New York as 19th-century London? We'll read writers such as Oscar Wilde, who reveled in amoral manifestos like "art for art's sake" by elevating artifice and shallowness to first principles of life; as well as Sherlock Holmes, who pursued something like "detection for detection's sake". Our reading will range across novels, plays, poetry, essays, and works that seem to exceed or fall short of those genres, all in the period that gave us both science fiction and the detective story. We'll be especially interested in attempts to rethink traditional social bonds in works that value solitude over sociality, the transient encounter over the enduring relationship, new forms of affective communities, and to think about how literary form might relate to those efforts. Along with fiction, essays, and drama, we'll explore their interrelation with the broad and compelling range of visual art produced in this period. Likely authors include: Huysmans, Wilde, H.G. Wells, Conan Doyle, RL Stevenson, Kipling, Edith Wharton.

**Class Format:** seminar

**Requirements/Evaluation:** 2 papers (one shorter, one longer), a series of shorter response papers, regular and substantial contributions to class discussions

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**ENGL 345 (S) Shakespeare's Women** (WI)

Crosslistings: ENGL345 / WGSS345

**Primary Crosslisting**

Shakespeare's plays portray a remarkably wide range of female characters from serving women to queens, from innocent, subservient young women to powerful authoritative adults. His plays explore female friendships, parents and children, love affairs and marriages, male actors playing female roles and female characters playing male roles. Looking closely at five plays--*Twelfth Night,* *Much Ado Nothing,* *Hamlet,* *Macbeth,* Antony and Cleopatra--we will examine the ways in which attitudes toward female stereotypes, sexuality, gender, subjectivity, social norms and performance evolve as Shakespeare's poetic style and dramatic technique mature, and the genre shifts from comedy to tragedy.

**Class Format:** tutorial
ENGL 346 (S) Negative Affects in African American Literature

Primary Crosslisting

"My pessimism was stronger than my longing," wrote Saidiya Hartman in her genre-breaking Lose Your Mother in her search for the afterlife of kinship in the remains of a Ghanaian slave fort. In this course we will discuss a mixture of contradictory "bad" feelings burdening the individual and the collective; for example, how hope and desire compete in Hartman's statement with habituated disappointment and exhaustion. How do black subjects creatively overcome the racial foreclosure to write and recite violence, rage, refusal, anxiety, depression, idleness, grief, silence, etc.? And, further, how do we make sense of the sorts of affects that become negative when practiced by black subjects, such as love, empathy, and desire? Together, we will explore interventions by critical theorists of blackness, gender, and sexuality including Saidiya Hartman, Darieck Scott, Abdul JanMohamed, Christina Sharpe, Frantz Fanon, Ann Cvetkovich, Heather Love, and Lauren Berlant to assist us in confronting the sometimes perilous terrain of negative expression for black subjects. Primary texts will include work by Toni Morrison, James Baldwin, Kara Walker, Jamaica Kincaid, and Richard Wright. This course will be driven by student discussion and collaboration.

Class Format: seminar

ENGL 347 (F) Big Game: Adventure, Empire, Ecology

Primary Crosslisting

"Big Game: Adventure, Empire, Ecology" asks how the era of imperial expansion and the study of "natural history" leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin, and Captain Cook's travel journals, and in-class work with archival materials like the Indian Botanical Survey and the Elphinstone Family Book. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British Empire in both the East Indies and India, and ramifies elsewhere in the Dutch, French, Spanish, Portuguese, and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

Class Format: seminar
ENGL 348 (S)  Women, Men and Other Animals  (DPE)
Crosslistings: SCST348 / WGSS348 / ARTH348 / ENGL348
Secondary Crosslisting
In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal--indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

Class Format: seminar
Requirements/Evaluation: individual research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ENGL 349 (S)  Contemporary Theatre and Performance
Crosslistings: COMP355 / ENGL349 / THEA345
Secondary Crosslisting
As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie
Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgus, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling through performance right now?" Students may be required to attend theatre, dance, and other performances at the '62 Center and beyond.

**Class Format:** seminar

**Requirements/Evaluation:** written and dramaturgical-based assignments, an oral presentation, a mid-term paper, in-class discussions, and a final paper or performance

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre majors; Comparative Literature or English majors

**Expected Class Size:** 8-10

**ENGL 350 (F) Modern Poetry**

A study of British and American poetry between 1890 and 1945, centering on the radical aesthetic, formal and political shifts which took place during the Modernist era. We will consider the changing authorial and public perceptions of the place and function of poetry during the period, the cross-pollinations and strains between the British and American literary traditions, and the writers' individual relationships with the culture of their times. Readings will focus primarily on the poetry of W.B. Yeats, Robert Frost, T.S. Eliot, William Carlos Williams, Ezra Pound, Marianne Moore, Wallace Stevens and W.H. Auden.

**Class Format:** discussion/seminar

**Requirements/Evaluation:** two 6+ page papers, several shorter writing assignments, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**ENGL 351 (S) After Nature: Writing About Science and The Environment** (WI)

Crosslistings: ENGL351 / ENVI352

**Secondary Crosslisting**

Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

**Class Format:** seminar

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ENVI 101 or 102 suggested

**Enrollment Limit:** 15

**Enrollment Preferences:** Environmental Studies majors
Expected Class Size: 15
Distributions: (D1) (WI)
Not offered current academic year

ENGL 352 (F) Anticolonial Avant Garde: Literature, Film, Theory
Crosslistings: COMP353 / ENGL352

Primary Crosslisting
Chic, sophisticated, experimental, bohemian, radical: the words we think of when we think of the "avant garde" call to mind the great cities of Europe and America in the early decades of the twentieth century. The usual suspects hail from Paris, London, Moscow, Rome, and New York, but many of them claimed to be mining the "naïve arts" and primitive energies of the "uncivilized societies" in Africa, Asia, and beyond. Can we recover these Others, these understudied but essential artists, as more than unconscious transmitters of unfamiliar cultures, and locate in their work a distinct set of aesthetic and political practices? Can we trace the global vectors of a representational strategy that is not Euro-American but is nevertheless politically and formally radical? Writers, artists, and filmmakers like Jean Toomer, G.V. Desani, Amos Tutuola, Émile Habiby, Jean Genet, Aimé Césaire, Haroun Farocki, Patrick Chamoiseau, Claire Denis, and Antjie Krog will help us locate and consider the explosive diversity of a broader avant garde’s experiments with image, sound, and language, as well as how these texts have contributed to and put pressure on more traditionally Western modernisms. In posing a question about the geographical and cultural purview of the Avant Garde around the time of the world wars, this class encourages students to interrogate the transmissibility of aesthetic practice in an age of global upheaval. We will look to writers and artists working in a variety of traditions and, equally importantly, against those traditions, in order to examine how power and resistance inflected the avant grade strains of modernist expression.

Class Format: seminar
Requirements/Evaluation: class participation; one short 2- to 3-page provocation paper to be revised into a formal 5- to 6-page essay; presentation; final 10- to 12-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors
Expected Class Size: 25
Distributions: (D1)

ENGL 353 (F) The Brontës
Crosslistings: ENGL353 / WGSS353

Primary Crosslisting
Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, Jane Eyre, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily's singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, "the first full-length biography of a woman novelist by a woman novelist", which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Charlotte's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Class Format: seminar
Requirements/Evaluation: discussion, two critical essays and two short creative pieces
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: none
Enrollment Preferences: English majors, WGSS majors, seniors
ENGL 354 (F) Asian American Literature: Fiction and Creative Nonfiction (WI)

Crosslistings: AMST354 / ENGL354

Primary Crosslisting

This tutorial is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. This course will be perfect both for students who are already familiar with Asian American studies and literature and want to dive deeper into one strand of the rich Asian American literary tradition (its prose: novels, memoirs, and short stories), as well as for students who are new to Asian American literary studies and want an introduction to this exciting and important (but too-little taught) side of American literature. The tutorial format will make it easy to pair students based on their level of familiarity with Asian American history and literature. Likely readings include: Carlos Bulosan's *America is in the Heart* (1946); John Okada’s *No-No Boy* (1957); Maxine Hong Kingston's *Woman Warrior* (1976); Chang-rae Lee's *Native Speaker* (1995); lê thi diem thúy, *The Gangster We are All Looking For* (2003); Rajesh Parameswaran, *I Am An Executioner: Love Stories* (2012); Celeste Ng, *Everything I Never Told You* (2014); Viet Thanh Nguyen, *The Sympathizer* (2015); and Williams College's own Karen Shepard (an historical novel about the experience of Chinese laborers in 1870's North Adams). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective. Students who take this course should be prepared to read one book and two or three supplementary historical/theoretical essays each week.

Class Format: tutorial

Requirements/Evaluation: quality of tutorial papers and participation during tutorial discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

ENGL 355 (F) Shakespeare's Political Thought: Sovereignty and History

Shakespeare is, among many other things, an exceptionally keen analyst of the political institutions of his time. Going beyond simply displaying instances of good and bad kingship, for instance, he thinks deeply about the foundations of monarchy as a political form: the nature of hereditary right, the relation between the ruler and the law, the tension between symbolic authority and practical power. He is also an acute observer of the way in which the high politics of sovereignty depends upon the activities of women, children, servants, and others who find themselves at once empowered and endangered by their proximity to the throne. This course considers from three distinct angles what it might mean to read Shakespeare as a theorist of politics. We'll discuss his insights into political systems with an eye to how these illuminate perennial and enduring questions about responsible government and legitimate authority. But we'll also examine how the historical conditions of Shakespeare's theater---including official censorship and dependence on royal patronage---complicate any attempt to find usable meanings in the plays. Finally, we'll look at some ways critics have sought to reconcile these two perspectives, reflecting on the uses as well as the limitations of historical evidence as a guide to interpretation. Shakespeare's cycles of plays on English political history will be at the center of our inquiry, but we'll also read in a variety of genres, possibly including Measure for Measure, Macbeth, Coriolanus, and The Winter's Tale, along with classical and Renaissance thinkers such as Tacitus, Seneca,
Erasmus, Machiavelli, and Montaigne.

Class Format: seminar

Requirements/Evaluation: 2 shorter essays (5-6 pp); 1 longer paper involving independent research; class participation

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Crosslistings: AFR323 / ARTH223 / ENGL356 / AMST323 / COMP322

Secondary Crosslisting

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love’s *Bayou* and Ho Che Anderson’s *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

ENGL 357 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers

Crosslistings: ENGL357 / AMST359 / AFR351

Secondary Crosslisting

When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash’s *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Allie Sharon Larkin, Billy Woodberry, among many, many others, and
how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned Lemonade and Barry Jenkins’ *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** previous courses in American Studies, critical studies in race and ethnicity or cultural studies, or permission of the instructor

**ENGL 358 (S)  The Myth of Venice and its Modern Aftermath**

Crosslistings: GBST356 / ENGL358 / COMP356

**Secondary Crosslisting**

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

**Class Format:** seminar

**Requirements/Evaluation:** mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

**Prerequisites:** familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

**Enrollment Limit:** 20

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 10

**Department Notes:** Core course

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under GBST

Not offered current academic year

**ENGL 359 (S) Hitchcock**

This course surveys the work of arguably the most studied, admired, parodied, and debated filmmaker of the twentieth century, Alfred Hitchcock.
Perhaps no figure has been more central to how we think about cinema as an aesthetic, philosophical, and commercial medium. Intellectually unassuming in interviews and publicity, insistent on his image as a popular entertainer, Hitchcock has nonetheless served as a key inspiration, test case, or object of critique for nearly every major movement in film studies of the past half century and more. Widely regarded as among the most significant documents of midcentury America's sexual, political, and existential anxieties, his films remain inexhaustibly rich in their exploration of guilt, innocence, and complicity; of the subjective nature of perception and the fragility of what we accept as "normal"; and of the voyeuristic and sadistic dimension underlying much of modern life. We will view works spanning the range of Hitchcock's British and American career, including The Lodger, Shadow of a Doubt, Rear Window, Vertigo, and Psycho. We'll also sample the critical tradition to consider how Hitchcock has been seen through such various lenses as auteur theory, psychoanalysis, feminism, semiotics, and historical and reception studies.

Class Format: seminar

Requirements/Evaluation: two shorter essays (4-5 pp.); final paper (~10 pp.); class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: graduating seniors

Expected Class Size: 25

Distributions: (D1)

Spring 2019

ENGL 360 (S) James Joyce’s “Ulysses”

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce's Ulysses, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing Ulysses as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce's novel, readings will include its epic precursor, Homer’s Odyssey, as well as critical essays. Students unfamiliar with Joyce's short novel A Portrait of the Artist as a Young Man, which introduces characters later followed in Ulysses, are urged to read it in advance of the course.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

Expected Class Size: 20

Distributions: (D1)

Spring 2019

ENGL 361 (F) Nabokov and Pynchon

After a brief comparative study of their short stories, the course will focus on selected novels by each author. Texts include: Pnin, Lolita, and Pale Fire by Nabokov; and, by Pynchon, The Crying of Lot 49, and Gravity's Rainbow (to which a substantial portion of the latter part of the course will be devoted).

Class Format: seminar
ENGL 362 (S) Approaches to W. B. Yeats (WI)

We will read the poetry and selected prose and plays of William Butler Yeats. Widely regarded as one of the most influential English-language poets of the twentieth century, Yeats was also a novelist, playwright, critic, autobiographer, and a founder of the Irish national theater. We will consider how his writings were shaped by, and responded to, the literary and political contexts of his time; how he conceived of authorial selfhood, its construction in language, and the functions of literature; and his transactions with his contemporaries (from Wilde to Pound to Auden). Applying a range of critical and theoretical approaches to his writings, and giving particular attention to textual materialism, we will study closely Yeats's compositional process and his habits of repeated revision of published works, as well as his formal techniques.

Class Format: tutorial
Requirements/Evaluation: 5-7 page papers every other week, assessment of partner's essays, tutorial performance, and one substantial revision
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 10
Enrollment Preferences: preference given to English majors

Not offered current academic year

ENGL 363 (S) Literature and Psychoanalysis (WI)
Crosslistings: COMP340 / ENGL363

Secondary Crosslisting
The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. All readings in English.

Class Format: lecture/discussion
Requirements/Evaluation: active engagement with the material and with each other, plus two 5-7-page papers, one 8-10-page paper, and a symposium presentation
Prerequisites: one previous course in either COMP or ENGL, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: AMST Critical and Cultural Theory Electives; ENGL Criticism Courses;
ENGL 364 (F) Boucicault to McDonagh: Irish Theatre, 1870 to the present
Crosslistings: COMP360 / ENGL364 / THEA336

Secondary Crosslisting
A survey of Irish drama since 1870, to include plays by Dion Boucicault, Oscar Wilde, W.B. Yeats, J.M. Synge, Lady Gregory, George Bernard Shaw, Douglas Hyde, Sean O’Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Conor McPherson, and Martin McDonagh.

Class Format: seminar
Requirements/Evaluation: 18-plus pages of writing, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Theatre majors, English and Comparative Literature majors

SEM Section: 01 MR 1:10 pm - 2:25 pm James L. Pethica

ENGL 365 (F) Beckett, Pinter and Stoppard
Crosslistings: ENGL365 / COMP365 / THEA365

Secondary Crosslisting
Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art’s value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: Endgame, The Caretaker, Rosenkantz and Gueldenstern are Dead, Krapp’s Last Tape, The Homecoming, No Man’s Land, Betrayal, Waiting for Godot, Dogg’s Hamlet, The Invention of Love, Arcadia, Rock ‘n’ Roll, Not I, Rockaby, A Kind of Alaska, Catastrophe, The Real Thing, Indian Ink, Artist Descending a Staircase and One for the Road. Throughout, we will give consideration to these works as both literary and theatrical texts.

Class Format: seminar
Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Limit: 18
Enrollment Preferences: Theatre and English majors
Expected Class Size: 18
Distributions: (D1)
Attributes: ENGL Literary Histories C
Not offered current academic year

ENGL 366 (F) Modern British Fiction
This course focuses on British novels from the early decades of the twentieth century. We will study the emergence of innovative stylistic and narrative
forms characteristic of modernism, and consider the ways in which such innovations shape the works' exploration of questions of psychology and sexuality, moral integrity and betrayal, epistemology and aesthetics, race and empire. Readings will include such works as Ford's *The Good Soldier*, James's *The Ambassadors*, Conrad's *Heart of Darkness*, Forster's *A Passage to India*, and Woolf's *To the Lighthouse*.

**Class Format:** seminar

**Requirements/Evaluation:** regular class participation, two 8- to 10-page papers

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** a 100-level English course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 20

**Enrollment Preferences:** English majors

**Attributes:** ENGL Literary Histories C; FMST Core Courses

*Not offered current academic year*

---

**ENGL 368 (S) Ireland in Film**

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges and The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. 
Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Class Format: seminar

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

ENGL 369 (S) American Poetry

This course is devoted to studying the work of key figures in American poetry, from Whitman and Dickinson to writers of our own moment, attentive to the social, historical, and aesthetic pressures that shape their work. We will read widely in the major poetic traditions, from Modernism, Objectivism, and the Harlem Renaissance through the mid-century work of the New York School, Beats, Black Arts, Confessional, and Language poets. We'll also keep a close eye on the contemporary scene, in part through interactions with visiting poets. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form in the long "American century."

Class Format: seminar

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: English Majors using the course to fulfill a requirement

Distributions: (D1)

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 370 (F) Literary and Critical Theory in the Twentieth Century

Crosslistings: COMP380 / ENGL370

Secondary Crosslisting

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, new varieties of hermeneutic criticism, and a welter of post-prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? The course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Class Format: seminar

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Extra Info: may not be taken on a pass/fail basis
**Prerequisites:** at least one previous literature or theory course

**ENGL 371 (S) The Brothers Karamazov (WI)**

Crosslistings: COMP331 / ENGL371 / RUSS331

**Secondary Crosslisting**

Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Attributes:** JLST Interdepartmental Electives;

---

**ENGL 372 (F) Taste in the Renaissance**

How can we account for taste, and what does taste account for? In the Christian tradition, our knowledge of good and evil comes (as John Milton put it) "from out of the rind of one apple tasted." What other forms of knowledge does our talk about taste lay claim to, and what (and whom) does taste exclude? In this course, we will sample plays, poetry, and prose texts primarily from early modern England that are caught up in the aesthetic and social dramas of taste. Our primary assumption will be that metaphors of taste and consumption naturalize a set of discriminations pertaining to categories like class, gender, and race; and that by unpacking the cultural dynamics of taste and disgust, we can understand literary style's vital connections to its social contexts. We will consider Renaissance authors' appeals to the language of taste to define themselves through and against the authority of classical antiquity, the competition of the cosmopolitan early modern city, the otherness of the New World, and the transcendence of the divine. Our readings will include authors such as Seneca, Petronius, Martial, Montaigne, Jonson, Shakespeare, Nashe, Donne, Herbert, Marvell, Cavendish, and Milton.

**Class Format:** seminar

**Requirements/Evaluation:** one 7-page paper; one 12-page paper; short, informal writing assignments; participation in class discussions; one in-class presentation

ENGL 373 (S) Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Kenan.

Class Format: seminar
Requirements/Evaluation: two or three short papers and a longer final paper of about fifteen pages
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Expected Class Size: 20
Distributions: (D1)
Attributes: ENGL Literary Histories A

ENGL 377 (S) Advanced Memoir Workshop

An advanced workshop designed to further explore the problems and possibilities that arise in the composition of memoir. Workshop sessions will be devoted to both published and student work. Individual conferences will supplement the workshop sessions, and considerable emphasis will be placed on the process of revision. Students will receive written critiques from other students as well as the instructor.

Class Format: seminar
Requirements/Evaluation: class participation, exercises, and final portfolio
Prerequisites: an introductory creative writing class and/or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: selection is based on writing sample, interested students should pre-register for the class and will be emailed with instructions for a writing sample if the class is over-enrolled
Expected Class Size: 12
Distributions: (D1)
Attributes: ENGL Creative Writing Courses

ENGL 378 (F) Nature/Writing

Crosslistings: ENGL378 / ENVI378

Primary Crosslisting
What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion/seminar

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 379 (F)  Mobility and Confinement in Black Women's Personal Narratives

Black women have used personal narratives to negotiate mobility and confinement in different ways from Harriet Jacobs's "escape" into her grandmother's garret in *Incidents in the Life of a Slave Girl* to Maya Angelou's refusal to speak in *I Know Why the Caged Bird Sings*. This course will introduce students to personal narratives by black women in the form of slave narratives, autobiographies, and prison narratives. Prison narratives are an understudied genre of literature by authors such as the activist and former Black Panther Assata Shakur. Focusing on mobility and confinement, we will discover how black women challenge notions of freedom, power, and empowerment through their interrogations of space, voice, and social position. We will examine not only the similarities among the concerns of these writers as women, activists, and artists, but also the differences that separate them due to time, culture, and geography. To assist us in our inquiry, we will engage key works of the anti-slavery, black feminist, and prison abolition movements.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, weekly journal entries, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 380 (S)  Motherhood and Horror: The Movie

Horror might be the most durable of film genres as well as the genre that's done the most work in terms of transforming the medium as a whole, and its transgressive nature has insured it attention, giving its most famous texts enormous cultural reach when it comes to ongoing conversations as to what defines evil, what constitutes normality, or what comprises the taboo. A look at the particular anxieties the genre has--especially recently--mobilized through its portraits of mothers and motherhood. The course will also touch on other genres that suggest an unspeakable invisible beneath the maternal quotidian. Films to be studied will include Alfred Hitchcock's *Psycho*, Roman Polanski's *Rosemary's Baby*, Jee-Woo Kim's *A Tale of Two Sisters*, Juan Antonio Bayona's *The Orphanage*, Jennifer Kent's *The Babadook*, James Cameron's *Aliens*, Michael Curtiz's *Mildred Pierce*, Mike Nichols' *Who's Afraid of Virginia Woolf?*, Juan Carlos Fresnadillo's *28 Weeks Later*, and Veronika Franz's and Severin Fiala's *Goodnight Mommy*.

Class Format: tutorial

Requirements/Evaluation: bi-weekly papers and responses for each student in the tutorial pairings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: English 203 or 204 or permission of the instructor

Enrollment Limit: 10
ENGL 381 (F) Freedom Dreams, Afro-Futures & Visionary Fictions
Crosslistings: AFR380 / ENGL381 / AMST380 / WGSS380 / SCST380

Secondary Crosslisting

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. “Freedom” is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Class Format: seminar

Requirements/Evaluation: active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

Extra Info: may not be taken on a pass/fail basis

Spring 2019

SEM Section: 01   W 1:10 pm - 3:50 pm    Jessica M. Fisher
Moments of political turmoil expose the highly charged ways in which a culture structures itself around a narrative past. In this course, we will read literary and cinematic works that invoke such moments of upheaval—the French and Russian Revolutions as well as those of 1848, the rise of fascism and the Great Depression of the 1930s, the battle for Algerian independence, the AIDS crisis, among others—in order to explore those fraught narratives of the past. We will consider such issues as the rise of the historical novel, the aesthetics of fascism and of democracy under pressure, fantasies of decolonization, representational clashes of culture, forms of affective and sexual disorientation, and the uses of melancholy in representing historical loss. Readings will be drawn from literary works by Gay, Edgeworth, Scott, Shelley, Balzac, Eliot, Conrad, Kafka, Babel, Mann, Borges, Stoppard, Kushner, Morrison, Pamuk, Bolano, and Philip, and theoretical essays by Kant, Burke, Carlyle, Marx, Benjamin, Adorno, Foucault, de Certeau, Jameson, Lefort and Ahmed. Films will include such works as Eisenstein’s *October*, Reifenstahl’s *The Blue Light*, Wellman’s *Nothing Sacred* and Pontecorvo’s *The Battle of Algiers*.

**ENGL 385 (S) Advanced Fiction Workshop: Form and Technique**

A course for students with experience writing fiction and an understanding of the basics of plot, character, setting, and scene. Through close study of stories in both traditional and unusual forms, we’ll examine how a story’s significant elements are chosen, ordered, and arranged; how the story is shaped; how, by whom, and to what purpose it’s told. Students will write new stories, employing the forms and techniques studied, and discuss them in workshop.

**Class Format:** seminar

**Requirements/Evaluation:** regular attendance, active participation in workshop, weekly 1- to 2-page brief imitations, two 8- to 18-page story drafts for workshop, and a final portfolio of at least two stories

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ENGL 283 or 384, or permission of instructor

**Enrollment Limit:** 12
Enrollment Preferences: preregistered students; selection is based on writing samples, if course is overenrolled

Expected Class Size: 12

Distributions: (D1)

ENGL 386 (S) Fiction of Beckett and Sebald

Crosslistings: COMP386 / ENGL386

Primary Crosslisting

This seminar explores the work of two of the most original and influential fiction-writers of the last half of the 20th century, Samuel Beckett and W. G. Sebald. The work of both writers was profoundly influenced by World War II and the Holocaust, and their fiction centers on issues of loss and memory, of decay (of bodies, things, cultures, traditions), of reason and imagination as fragile means of enduring privation. Yet material so sobering and often bleak has rarely been rendered so absorbingly, or with such unorthodox forms of beauty. Their methods for reinventing fiction differ. Beckett increasingly strips his fiction of details of time, place, and even event, and ultimately struggles to free his speaking voice from the burdens of narration itself, the better to focus attention on the simple but logically rigorous, brilliant, often comic effects of his spare language. Sebald, who sometimes called his novels "documentary fiction," fashions a blend of recollection, fiction, geo-cultural history, and dream-like meditation, focused on the decline of European civilizations; his more chromatic prose, marked by obliquity, melancholy, and dry wit, is filled with curious facts and haunting anecdotes. We will read some of Beckett's short fiction and his great trilogy, Molloy, Malone Dies, and The Unnamable; Sebald's major works of fiction, Vertigo, The Emigrants, The Rings of Saturn, and Austerlitz; and a few short stories and novellas by precursors or successors such as Kafka, Borges, and Thomas Bernhard.

Class Format: seminar

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors, Comparative Literature majors

Expected Class Size: 15

ENGL 387 (F) Catastrophe/Apocalypse: The Movie

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and over the last few decades the apocalyptic and post-apocalyptic sensibility appears everywhere in our mass culture, such that being plugged into the zeitgeist might necessarily entail a familiarity with the emerging tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating and unforeseeable realities of our physical world and political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will likely include W.S. Van Dyke's San Francisco, Steven Spielberg's Schindler's List, Roman Polanski's The Pianist, George Romero's Night of the Living Dead, Ridley Scott's Blade Runner, Edgar Wright's Shaun of the Dead, Michael Heneke's Time of the Wolf, Danny Boyle's 28 Days Later, Alfonso Cuaron's Children of Men, Bruce McDonald's Pontypool, Yoshiro Nakamura's Fish Story, Jordan Peele's Get Out, and Joshua Oppenheimer's The Act of Killing.

Class Format: seminar

Requirements/Evaluation: four short papers and in-class presentations

Prerequisites: ENGL 203, or 204, or permission of the instructor

Enrollment Limit: 20
Enrollment Preferences: senior majors in English or Comparative Literature; then junior majors in either; then newly declared majors in either

ENGL 388 (S)  Asian American Writing and the Visual Arts

Crosslistings: AMST304 / COMP307 / ENGL388

Secondary Crosslisting

This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poetry, poetry "inspired by" paintings, video work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Berssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.

Class Format: seminar

Requirements/Evaluation: two papers, short assignments, presentation, participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses

ENGL 389 (F)  Fiction of Virginia Woolf

Crosslistings: ENGL389 / WGSS389

Primary Crosslisting

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Class Format: seminar

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: none

Enrollment Preferences: English majors, WGSS majors, seniors

Expected Class Size: 25

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under WGSS

Attributes: ENGL Literary Histories C
ENGL 392 (F)  Wonder
Crosslistings: COMP392 / ENGL392

Primary Crosslisting
We tend to imagine "wonder" as a naïve, wide-eyed response, something quite distinct from the cold and sophisticated act of critical analysis. In this discussion class, we will consider wonder as an eminently analyzable concept, but one that raises provocative questions about the nature and limits of our own, distinctly modern forms of critical engagement. The course examines three historical incarnations of "wonder," each involving complex relations among the aesthetic, philosophical, and social domains: the Renaissance tradition on wonder and the marvelous; the eighteenth-century analysis of the sublime; and twentieth-century accounts of the culture of spectacle. We will consider writers such as Shakespeare, Sir Thomas Browne, Wordsworth, Borges, and W.G. Sebald (all wonderful); painters such as Leonardo and Vermeer, the photography of Andreas Gursky and Thomas Struth; films including Lang's *Metropolis* and Scott's *Blade Runner*; and critical or philosophical writers, including Aristotle, Descartes, Kant, and Walter Benjamin.

Class Format: seminar
Requirements/Evaluation: three papers totaling 20 pages
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English and Comparative Literature majors
Expected Class Size: 15
Distributions: (D1)

Not offered current academic year

ENGL 395 (F)  Signs of History
Crosslistings: COMP395 / HIST395 / ENGL395

Primary Crosslisting
What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Class Format: seminar
Requirements/Evaluation: evaluation based on two papers, one 6 and one 10-12 pages in length, and general participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English, Comparative Literature, History and German majors

ENGL 402 (S) The Historical Novel

Crosslistings: ENGL402 / COMP406

Primary Crosslisting
Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.

Class Format: seminar
Requirements/Evaluation: class discussion and a 20-page final paper
Prerequisites: a 100-level English course and a 300-level English course or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: English majors
Expected Class Size: 15
Distributions: (D1)
Attributes: ENGL Criticism Courses; ENGL Literary Histories B; ENGL Literary Histories C

Spring 2019
SEM Section: 01 W 1:10 pm - 3:50 pm Anita R. Sokolsky
ENGL 407 (S) Literature, Justice and Community

Crosslistings: ENGL407 / COMP407

Primary Crosslisting

Can we imagine possibilities of justice not dictated by already determined norms? What would a community founded on such a conception of justice look like? Can we imagine a version of community not founded on exclusion? What would the members of such a community look like—what version of subjectivity would that community imply? And might literature in particular have something to say about the possibilities for such versions of community, selfhood, and justice? This course will look at recent, theoretically-oriented writing on justice and community, with an emphasis on the work of Hannah Arendt, Jacques Derrida, Jean-Luc Nancy and Giorgio Agamben. We will place this challenging and exciting philosophical work in relation to fiction from Euripides to Kafka, Farah and Kushner, films (Almodóvar, Farhadi), photography (Silva, Badlands) and worldly examples of competing claims to justice. The course pursues the aims of the EDI initiative by engaging works in which cultural differences reveal the limits of universalizing accounts of law and justice, works such as Euripides' Bacchae, Nuruddin Farah's Maps, Louise Erdrich's poetry, and Farhadi's A Separation. But the course will equally suggest that such contingency is inherent in the concept of justice as such, insofar as the problem of justice is bound up with forms of constituting indebtedness that define humans as communal beings. In that sense, contingency and difference mark justice even in its most familiar instances-intimately and close to home, as it were.

Class Format: seminar

Requirements/Evaluation: one 5-page paper, and a final 15-page paper

Prerequisites: a 300-level ENGL course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: English Majors; Comparative Literature Majors

Expected Class Size: 10

Distributions: (D1)

Attributes: ENGL Criticism Courses; JLST Interdepartmental Electives

Not offered current academic year

ENGL 410 (F) Black Literary and Cultural Theories

Crosslistings: COMP410 / AMST410 / ENGL410 / AFR410

Secondary Crosslisting

This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

Extra Info: may not be taken on a pass/fail basis

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST or AFR; meets Division 1 requirement if registration is under COMP or ENGL

Attributes: AMST Critical and Cultural Theory Electives;

Not offered current academic year
ENGL 412 (F) An Infinity of Traces: Haunting, Historical Violence, and Alternative Futures
Crosslistings: COMP412 / ENGL412 / AMST412

Secondary Crosslisting

In *Prison Notebooks*, Antonio Gramsci writes that history has "deposited in you an infinity of traces, without leaving an inventory." In this senior seminar, we will adopt a comparative, interdisciplinary, and mixed media approach to inventory some of these uncanny traces as they manifest in the form of social hauntings through narratives of repressed or suspended historical violence. Animated by a whole host of names like "ghost," "spirit," "specter," "zombie," "things that go bump in the night," "the unborn," or "the undead," we will ask what other stories/other knowledges these halting and haunted figures might seek to tell us. How do they dis-order our experience of a modern world whose space/time is shaped by ongoing processes of chattel slavery, settler colonialism, capitalism, mass incarceration, immigration, imperialism, militarism, and war? How do they unsettle, arrest, disrupt, and even seek vengeance for a "common sense" that is structured in human dispossession, exploitation, repression, and death? Finally, how do they leave us with a radical urgency to unlearn and reorient our ways of knowing, being, living, and imagining toward alternative futures where such systems of power and domination can be dismantled for good? Texts to be considered may include: *All They Will Call You* by Tim Z. Hernandez, *The Lone Ranger and Tonto Fistfight in Heaven* and short stories by Sherman Alexie, *Lose Your Mother* by Saidiya Hartman, *Burning Vision* by Marie Clements, *The Gangster We Are All Looking For* by lê thi diem thúy, *Daughters of the Dust* by Julie Dash, and *The Watermelon Woman* by Cheryl Dunye.

Class Format: seminar

Requirements/Evaluation: attendance and class participation; weekly journal entries (1-2 pages); in-class group presentation; midterm paper (5-6 pages); final creative project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

---

ENGL 415 (S) Theorizing Aesthetic Outrage

Outrage has become an increasingly charged and prominent feature of public life in our current political climate. Yet it is surprisingly difficult to analyze and understand, particularly when we confront public forms of outrage, in which collective behavior may shape, complicate, and change its nature. Why are accounts of the reasons for one's outrage so often inadequate to its vehemence? How are we to understand the strange, unconscious mimicry into which the antagonists in public outrage are so often drawn? What are the sources of the pleasure that shadows outrage? In this seminar we will attempt to theorize public outrage, drawing on a range of theoretical models from several disciplines: aesthetics, cultural and political theory, psychoanalysis, gender and sexuality studies, anthropology and sociology. We will be particularly concerned with aesthetic outrage--riots, censorship, and trials in response to literary and cinematic works, particularly where such outrage has been well documented--and will explore the possibility that such outrage is discernibly different from more straightforward instances of political outrage, such as bread riots or Black Lives Matter activism. We will also analyze the basic nature of outrage in the context of affect studies. Theoretical work by such writers as Sedgwick, Berlant, Foucault, Freud, Weber, Lévi-Strauss, Girard, Arendt, Bakhtin, Butler, Douglas, and Zizek; literary and cinematic works by such authors as Sade, Synge, O'Casey, Jarry, and Eisenstein.

Class Format: seminar; tutorial format once or twice during the semester to discuss writing

Requirements/Evaluation: active, regular class participation, a final paper of about 20 pages, written in stages (some discussed in tutorial format)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 300-level ENGL course or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: English majors

Expected Class Size: 12

Distributions: (D1)
ENGL 416 (S)  Postcolonial Theory and the World Literature Debates (DPE)

Crosslistings: COMP416 / ENGL416

Primary Crosslisting

When publishers, scholars, reviewers, and critics talk about the massive, beautiful, prismatic literary and cultural traditions outside of Western culture, they sometimes refer to them by their geographical provenance--African literature, say, or Sumerian art--or perhaps by their historical moment--Ottoman architecture, or postcolonial Indonesian poetry--but more and more, the catch-all category of World Literature has begun to hold sway in influential places, and is changing the shape of how we think, learn, and write about non-Western aesthetics, as well as how we participate in our "own" cultures in all their complexity. If we can imagine a kind of literature that truly goes under the headings of "World Literature," or "Global Literature," what can we possibly exclude? Doesn't all literature belong to the world? What might we gain by using this term, and what might we lose? What histories are attached to the various names and classifications we assign to culture and how does cultural "othering" uphold or resist forms of economic, political, and military dominance? In this advanced seminar, we will work carefully through the history and influential writings of postcolonialism as a particular challenge to hegemonic forms of representation, cultural production, and naming, starting with a close consideration of the writings of the movement's founders and key commentators, including Aimé Césaire, Frantz Fanon, Edward Said, Gayatri Spivak, Robert J.C. Young, Gauri Viswanathan, Partha Chatterjee, and Homi Bhabha, and consider their influence on later postcolonial writers and critics around the world. In the second half of the semester, we will turn our attention to the historical underpinnings and current firestorm of debates about World Literature, beginning with Goethe, Marx, Adorno, Frederic Jameson, Franco Moretti, and Pascale Casanova and shifting finally to critics of the ideas of World and Global Literature.

Class Format: seminar

Requirements/Evaluation: two to three papers

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: students who have done relevant coursework in Division I or II

Expected Class Size: 10

Department Notes: Theory Course

Distributions: (D1) (DPE)

Distribution Notes: DPE: This advanced course in literature and theory will consider literary canonicity and postcolonial theory's challenges thereto through a deep examination of genre, criticism, institutional power, material conditions of publication, and postcolonial culture's relationship to the legacies of colonialism. We will interrogate power and the writing of history, material and cultural resource extraction, and narrative theory against developmental discourse. Students will additionally consider through their writing the role of academic and cultural institutions in perpetuating race and class hierarchy.

ENGL 420 (S)  Senior Seminar: The Drag of Black Masculinity (DPE)

Crosslistings: AMST420 / AFR331 / ENGL420 / WGSS420

Secondary Crosslisting

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 19th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory, and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. By examining representations and presentations of
Black masculinities, we will pursue questions such as: How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? Can we/should we be moving beyond heteropatriarchy and gender binaries? What is the future of Black Gender? By reading critical and creative texts, viewing films and engaging other kinds of media, students will hone their critical theorization skills.

Class Format: seminar

Requirements/Evaluation: each student will be asked to facilitate a class discussion; students will write three short creative/critical papers; there will also be a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and others with substantial background in Women's, Gender, and Sexuality Studies or Africana Studies; statements of interest will be solicited

Expected Class Size: 14

Distributions: (D1) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR, OR AMST; meets Division 1 requirement if registration is under ENGL DPE: This course fulfills the DPE requirement in that it centers questions of power and privilege.

Spring 2019

SEM Section: 01      Cancelled

ENGL 421 (F) Fanaticism

Crosslistings: COMP421 / ENGL421

Primary Crosslisting

Eighteenth and nineteenth-century writers of literature and political philosophy repudiate fanaticism, whether as a religious, political or amorous posture. But what is fanaticism, and why should it be considered such a threat, particularly during a period that embraced an enlightened secular rationalism? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will include novels by M. Shelley, Hogg, Dickens, Eliot, Conrad, and political philosophy and historical writings by Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.

Class Format: seminar

Requirements/Evaluation: two 10- to 12-page essays or one long final essay

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English majors

Expected Class Size: 15

Distributions: (D1)

Attributes: ENGL Criticism Courses; ENGL Literary Histories B

Not offered current academic year

ENGL 440 (S) Wittgenstein and Literary Studies  (WI)

Crosslistings: COMP440 / ENGL440

Primary Crosslisting

Wittgenstein is widely regarded as one of the most important figures in twentieth-century philosophy, yet his groundbreaking writings remain perplexingly under-appreciated in the world of literary studies. In this course we will address this shortcoming in two ways. First, we will familiarize ourselves with some of Wittgenstein's key works (and the works of thinkers deeply influenced by him, like Stanley Cavell and Cora Diamond) and try to see what is so radical about them. Second, we'll explore the still untapped potential of Wittgenstein's writings for those of us whose primary home is in
the field of literary studies. Topics and concepts we may cover include: meaning, intention, and interpretation (Derrida, de Man); ethical alterity and the concept of the Other (Levinas); sex, gender, and the body (Butler, Foucault, Moi); emotion, affect, and expression (Deleuze, Terada, Adorno); authenticity, voice, and style (Fried, Taylor); modernism and modernity (Pippin); experimental writing (Perloff, Bruns); and the relationship between humans and animals (Wolfe). Some prior experience with philosophy and/or literary theory will obviously be helpful but is not necessary. This course will have much to offer students who are majoring in English, Comparative Literature, or Philosophy. If you have questions about this course and its suitability for you and your intellectual interests, feel free to contact me at brhie@williams.edu.

Class Format: seminar

Requirements/Evaluation: quality of class participation, a final 20- to 25-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: English majors, by seniority; then Comparative Literature and Philosophy majors

Expected Class Size: 15

Distributions: (D1) (WI)

Attributes: ENGL Criticism Courses; PHIL Related Courses;

Not offered current academic year

ENGL 445 (F) World's End: Literary Ecologies of the Limit

Crosslistings: ENGL445 / ENVI445

Primary Crosslisting

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It; Marvell, "Upon Appleton House"; Ovid, Metamorphosis; Browne, Urn Burial; Titian, Wordsworth, McCarthy, The Road; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.

Class Format: seminar; combination discussion seminar and tutorial conferences

Requirements/Evaluation: one 5-page paper and one final 15-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors; Comparative Studies majors

Expected Class Size: 12

Distributions: (D1)

Attributes: ENGL Criticism Courses; ENGL Literary Histories A; PHIL Related Courses

Fall 2018

SEM Section: 01    MR 1:10 pm - 2:25 pm    Christopher L. Pye

ENGL 450 (S) Melville, Mark Twain, & Ellison

As an epigraph to his novel, Invisible Man, Ralph Ellison selects a quotation from Herman Melville's story, "Benito Cereno." In the prologue to Invisible Man, Ellison invokes a sermon that appears briefly in the opening chapter of Moby-Dick. In his essays on comedy and American culture, Ellison comments trenchantly on Adventures of Huckleberry Finn. Melville and Mark Twain were, in many obvious ways, as different as two writers can be. Nonetheless, they also have many surprising similarities, and it is not difficult to understand why both are so important to Ellison. This course will
examine the novels, stories, and essays of these three writers, with particular attention to the themes that they have in common and to the traits that make each of them distinctive. Race, slavery, epistemology, and the nature of American democracy are among those themes.

**Class Format:** seminar

**Requirements/Evaluation:** journal, a final 15-page paper

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 20

**Enrollment Preferences:** English majors

**Distributions:** (D1)

**Attributes:** AMST Arts in Context Electives;

Spring 2019

**SEM Section:** 01 Cancelled

**ENGL 456 (F) Topics in Critical Theory: Hegel and the Dialectic**

**Crosslistings:** COMP456 / ENGL456

**Primary Crosslisting**

This course is for students of any major who wish to continue studying critical, cultural, or literary theory. Students will give close attention to a single theorist or philosophical school or perhaps to a single question as taken up by several theorists. Prior coursework in critical theory or continental philosophy, no matter the department, is strongly recommended. The subject of this semester's seminar is the dialectic. "Dialectical" is one of those collegiate words, the kind of word that some people use a lot without knowing for sure what it means. That said, there are a couple of different ways of making sense of dialectics. The word's nearest synonym is "dialogue." Broadly, then, "dialectics" is a name for any philosophy that incorporates into itself the back-and-forth of conversation. Modern dialectics, meanwhile, sets out from two ideas: first, that it is impossible to think about anything in isolation, that we understand all things via relation and contradistinction, that we couldn't call any person "female" if we weren't also compelled to call some people "male"; and second, that all such conceptual pairs (male/female, black/white, east/west) are less settled than they look. You can't not divide the world into oppositions, and all such oppositions will collapse. This is an idea that, systematically pursued, can change the way we think about language, ethics, politics, literature, and art. We will read key texts from major dialectical thinkers: Hegel, Marx, Adorno, but mostly Hegel.

**Class Format:** seminar

**Requirements/Evaluation:** seminar paper of 25 pages; informal weekly writing; class participation

**Prerequisites:** prior coursework in critical theory or continental philosophy is recommended but not necessary, no prior coursework in English is required

**Enrollment Limit:** 15

**Enrollment Preferences:** seniors with background in critical theory

**Expected Class Size:** 15

**Distributions:** (D1)

**Attributes:** ENGL Criticism Courses; PHIL Related Courses

Fall 2018

**SEM Section:** 01 TF 2:35 pm - 3:50 pm Christian Thorne

**ENGL 493 (F) Honors Colloquium: English**

A colloquium for students pursuing critical theses and critical specializations. Students will present and critique their work in progress, and discuss issues particular to researching and structuring a long analytical thesis. We will also discuss the work of a variety of recent critics representing a range of methods of literary study. Satisfactory completion of the course will be required for students to continue on in the honors program.

**Class Format:** independent study

**Requirements/Evaluation:** evaluation will be based on participation and on individual progress on the thesis projects, which will be determined in
consultation with each student's honors advisor

Prerequisites: admission to the department Honors program

Enrollment Limit: none

Distributions: (D1)

Fall 2018
HON Section: 01   W 1:10 pm - 3:50 pm   Bernard J. Rhie

ENGL 494 (S) Honors Thesis: English
English honors thesis. Required of all senior English majors pursuing critical theses and critical specialization.
Class Format: independent study
Distributions: (D1)

Spring 2019
HON Section: 01   TBA   Bernard J. Rhie

ENGL 497 (F) Honors Independent Study: English
English honors thesis. Required of all senior English majors pursuing departmental honors in creative writing.
Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Distributions: (D1)

Fall 2018
HON Section: 01   TBA   Kathryn R. Kent
ENVIRONMENTAL STUDIES
Chair: Professor Henry Art
Associate Director: Lecturer Sarah Gardner

On Leave Fall/Spring: Professor R. Bradburd

Mystic Executive Director: T. Van Winkle.

MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES
Alex Apotsos, Visiting Lecturer in Geosciences
Henry W. Art, Professor of Biology and Environmental Studies
Sonya Auer, Visiting Assistant Professor of Biology
Lois M. Banta, Professor of Biology
Ron D. Bassar, Assistant Professor of Biology
Ben Benedict, Lecturer in Art
Mary K. Bercaw-Edwards, Associate Professor for Literature of The Sea, Williams-Mystic Maritime Studies Program
Julie C. Blackwood, Assistant Professor of Mathematics
Roger E. Bolton, Professor of Economics, Emeritus
Cory E. Campbell, instructional Technology Specialist
Phoebe A. Cohen, Associate Professor of Geosciences
Anthony J. Carrasquillo, Assistant Professor of Chemistry
David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
Jose E.A. Constantine, Assistant Professor of Geosciences
Mea S. Cook, Associate Professor of Geosciences
David P. Dether, Professor of Geosciences*
Joan Edwards, Professor of Biology
Laura Ephraim, Associate Professor of Political Science
Michael Evans, Assistant Director of The Zilkha Center for Environmental initiatives
Jessica M. Fisher, Assistant Professor of English
Antonia Foias, Professor of Anthropology and Sociology
Jennifer L. French, Professor of Spanish
Sarah S. Gardner, Lecturer in Environmental Studies
Matthew Gibson, Assistant Professor of Economics
Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The three curricular options in Environmental Studies—the major in Environmental Studies and the concentrations in Environmental and Maritime Studies—are designed to help majors and concentrators to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
Apply scientific methods to collect environmental data and evaluate environmental quality;

Understand the political and economic factors that inform, enable, and constrain environmental policy;

Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;

Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;

Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

The requirements for the environmental studies major and concentration have been revised. The requirements for students from the class of 2020 and subsequent classes are immediately below, followed by the requirements for the students from the class of 2019.

Overview of the Major and Concentrations for Classes of 2020 and Subsequent Classes

The Environmental Studies major is an eleven course concentration. The major has a “core” of seven courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 411, and the ENVI senior seminar, ENVI 412. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving (offered every fall), and ENVI 412, Environmental Studies Senior Seminar (offered every spring). The remaining component of the “core” is comprised of three foundational 200-level courses, one from each of three lists of courses (see below), with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven course foundation, each ENVI major devises an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement under special circumstances.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a seven course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 411 and ENVI 412. Students pursuing the concentration will take one elective each from each of three lists of courses, each list (see below) representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and ENVI 412, Environmental Studies Senior Seminar. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies concentration.
Submitting your Proposed “Course Cluster” and “Plan of Study” to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring Pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (cies.williams.edu). The proposals will be reviewed by the CES Advisory Board.

Credit for AP, IB, A-levels and other pre-Williams courses

At this time, students are not allowed to place out of ENVI 101 or ENVI 102.

Planning for prerequisites on your path through the Environmental Studies major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOL 203 (Ecology) or ENVI/BIOL 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Director or Associate Director.

Study Away

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Furthermore, the Williams-Mystic Program is the foundation of the Maritime Studies concentration. Students considering either a semester or year away who intend to major or concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major or concentration, but must have advance approval in writing from the Chair of Environmental Studies.

Advising

Majors and concentrators (or first years and sophomores interested in the major or concentrations offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming majors and concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2018-19: Ralph Bradburd, Henry Art, Sarah Gardner, Nicolas Howe, Pia Kohler, Laura Martin, Mea Cook, Luana Maroja, James Manigault-Bryant.

Overview of the Major and Concentrations for the Classes of 2019

The Environmental Studies major is an eleven course major. The major has a “core” of six courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take two of the courses, ENVI 101 and ENVI 102. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), one 400-level Environmental Studies capstone research practicum that involves either collaborative research on a specific environmental problem or client-driven team project on issues of environmental significance in the Berkshire region. Two such courses will be offered in the 2018-19 academic year: ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving, and ENVI 412, Environmental Studies Senior Seminar. The remaining component of the “core” is comprised of three 200-level courses, one from each of three lists of courses, with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this six-course foundation, each ENVI major devises an individualized five-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these five electives in the cluster must be among those listed by the Program as a research methods course.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will
need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a six course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, and one of the 400-level ENVI capstone practicum courses, students pursuing the concentration will take one elective each from each of three lists of courses, each list representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and one of the 400-level ENVI capstone practicum courses. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies concentration.

HONORS IN ENVIRONMENTAL STUDIES (MAJOR OR CONCENTRATION)

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus winter study project, or a full-year project (two semesters plus winter study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Environmental Studies concentrators may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be approved by the department chair and the Chair of Environmental Studies by the end of the junior year. Students will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

WINTER STUDY AND INDEPENDENT STUDY

In addition to courses fulfilling the environmental studies major and concentration requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- MAST 397, 398 Independent Study: Maritime Studies
- ENVI 493-W31-494 Honors Thesis and Senior Research
- MAST 493-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.
THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major, distributed according to the requirements detailed below. Because the ENVI curriculum was restructured, students in the class of 2019 have different requirements than those for the class of 2020 and subsequent classes. The requirements for the class of 2020 follow immediately below. Those for the class of 2019 are provided below those for the class of 2020.

For students in the class of 2020 and subsequent classes:

Introductory required courses (2 courses):

- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science

200-level foundational courses required for all ENVI majors (3 courses, 1 from each category):

Culture/Humanities

- ENVI 217 Landscape, Place, and Power (formerly Environmental Humanities: Theory and Practice)
- ENVI 244 Environmental Ethics
- ENVI 250 Environmental Justice
- ENVI 259 New England Environmental History

Social Science/Policy

- ENVI/ECON 213 Introduction to Environmental and Natural Resource Economics (ECON 110 prerequisite)
- ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions
- ENVI/PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
- ENVI 307/PSCI 317 Environmental Law

Environmental Science (with lab)

- ENVI 203 Ecology
- ENVI 205 Geomorphology
- ENVI 215 Climate Changes

Specialization (4-course) Cluster (including a “methods course” and in some cases one “living systems” course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental economics, environmental justice, environmental literature, environmental chemistry, environmental biology, environmental geosciences, environmental planning and design, urban environmental studies, water and energy, sustainable food and agriculture, environmental justice.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Board, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

One “methods course” requirement:

- ENVI 214/GEOS 214 Geographic Information Systems
- STAT 201 Statistics and Data Analysis
- STAT 202 Introduction to Statistical Modeling
This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

**One “living systems course” requirement:**

- BIOL 203/ENVI 203 Ecology
- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- BIOL 220/ENVI 220 Field Botany and Plant Natural History
- BIOL 231/MAST 311 Marine Ecology
- GEOS 210/MAST 211 Oceanic Processes
- BIOL 302/ENVI 312 Communities and Ecosystems

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

**Senior Seminar Requirement:**

In the senior year—or, under special circumstances during the junior year—students will take two 400-level seminars, ENVI 411 and ENVI 412, that together serve as a capstone experience for the major and concentrations. These courses are interdisciplinary, issue-based and project-driven. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshires involving urban and rural land use planning and sustainable design. Offered in the spring semester, the Senior Research Seminar engages students in research on a policy-related environmental problem.

**Required Courses (2 courses)**

- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar

**CONCENTRATION IN ENVIRONMENTAL STUDIES**

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College. The concentration in Environmental Studies consists of seven courses: four core courses and one elective course from each of the three categories below: The Natural World; Humanities, Arts and Social Sciences; and Environmental Policy.

**Required Courses (4 courses)**

- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science
- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar

**Distribution Courses (3 courses, 1 from each group)**
In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major. (It is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

The Natural World

BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
BIOL 203/ENVI 203 Ecology
BIOL 220/ENVI 220 Field Botany and Plant Natural History
BIOL 302/ENVI 312 Communities and Ecosystems

ECON 228/ENVI 228 Water as a Scarce Resource
CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Note: Students who take MAST 211/GEOS 210 (Oceanographic Processes) at Williams-Mystic can substitute an extra elective in lieu of GEOS 104

Capstone Course

One Practicum course:

ENVI/MAST 412 Practicum: Environmental Science and Policy

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes
Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

Maritime History

HIST 127 The Expansion of Europe
HIST/AFR 248 The Caribbean: From Slavery to Independence
HIST/JAPN/ASST 321 History of U.S.-Japan Relations
HIST/ASST/INST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Maritime Literature

CLAS 101/COMP 107 The Trojan War

Marine Policy

ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
ECON/ENVI 386/ ECON 518 Environmental and Natural Resource Policy
ENVI 307/PSCI 317 Environmental Law
PSCI 223 International Law
PSCI 229 Global Political Economy
PSCI 347 Law of the Sea
ENVI/PSCI 328 Global Environmental Politics

Marine Science

BIOL 414 Life at Extremes: Molecular Mechanisms
GEOS 212 / BIOL 211 Paleobiology
GEOS/ENVI 215 Climate Changes
GEOS/ENVI/MAST 226 The Oceans and Climate
GEOS 302 Sedimentology
GEOS/ENVI/MAST 314 Sediment Records of Climate Change

ENVI 12 (W) Geology of the National Parks

Crosslistings: ENVI12 / GEOS12

Secondary Crosslisting

A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well-illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and bibliography will be distributed by the presenter at the time
ENVI 15 (W) From Basalt to Balsam to Beavers: The Natural History of New England

In this course we will explore, far and wide, the New England Landscape and try to make some sense of the amazing physiographic and biological diversity that it offers in a relatively small area. From the spruce clad Berkshires to the broad Connecticut River Valley to the glacially forged coastal plain, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna. We'll learn the predominant trees and shrubs and search for patterns to their occupation of the landscape. We will observe the behavior and evidence of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. How do they manage to cope in their often rigorous and fickle environments and how might they be affected by climate change and other human influences? Through field trips, museum visits, individual investigations, readings, discussions and guest presentations, you'll become a little more aware and appreciative of the natural heritage of the region that you have made your recent home. Students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions; some trips will require students to be away from campus beyond normal class hours.  

Adjunct Instructor Bio: Drew Jones is Manager of Hopkins Memorial Forest where he oversees the management of the facilities, coordinates research and teaching activities and outreach programs for the public and local schools. He also operates an owl banding station in the fall and intermittently engages in other field research. In the past, he has worked as a wildlife biologist and educator from the Southern Appalachians to the North Woods.

ENVI 18 (W) Games!

We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with
the games. The semester will culminate in students designing games of their own—negotiation games, economic games, mathematical games, or board games—and presenting them and playing them with the group.

Class Format: Tuesday, Wednesday & Thursday 1-4pm
Requirements/Evaluation: final project; game journal
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: expressed interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01   TWR 1:00 pm - 3:50 pm PORG 1:00 pm - 3:50 pm   Sarah A. Jacobson, Pia M. Kohler

ENVI 19 (W)  Methods in Environmental Chemistry
Crosslistings: CHEM19 / ENVI19
Secondary Crosslisting
This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.
Requirements/Evaluation: evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments
Prerequisites: CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: preference will be given to CHEM and/or ENVI majors/concentrators
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01   TR 10:00 am - 12:50 pm PORG 10:00 am - 12:50 pm   Anthony J. Carrasquillo

ENVI 20 (W) Winter Naturalist's Journal
Crosslistings: ENVI20 / ENGL20
Primary Crosslisting
This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.
Class Format: mornings
Requirements/Evaluation: daily journal and 2- to 3-page papers
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: random selection
Materials/Lab Fee: $80 plus cost of books
Distributions: (D2)
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01  MW 10:00 am - 12:30 pm  Christian McEwen

ENVI 24 (W) Touring Black Religion in the 'New' South
Crosslistings: ENVI24 / AFR24 / REL24
Secondary Crosslistings

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel
Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation
Prerequisites: none; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews
Materials/Lab Fee: cost to student: $3362
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01  TBA  Rhon S. Manigault-Bryant, James A. Manigault-Bryant

ENVI 25 (W) Sustainable Agriculture in California
Crosslistings: BIOL25 / ENVI25
Primary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8
students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

Class Format: travel

Requirements/Evaluation: 10-page paper; synthetic journal of field experiences to be produced by the group

Prerequisites: none, but see preferences for over-enrollment; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01 TBA Henry W. Art, Sarah Gardner

ENVI 26 (W) Material Culture and Craft of 19th Century Coastal New England

Crosslistings: ENVI26 / MAST25

Secondary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvasworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses

Winter 2019
TVL Section: 01 Cancelled

ENVI 31 (W) Senior Research and Thesis: Environmental Studies

To be taken by students registered for Environmental Studies 493-494.

Class Format: thesis

Distributions: (D2)
ENVI 99 (W) Independent Study: Environmental Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

ENVI 100 (S) Introduction to Weather and Climate

Crosslistings: GEOS100 / ENVI100

Secondary Crosslisting

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that oceans and glaciers interact with the climate. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and learning how to run a climate model on a computer.

Class Format: lecture

Requirements/Evaluation: class participation, labs, one midterm and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Distributions: (D3)

Attributes: EXPE Experiential Education Courses

ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.
Class Format: lecture/discussion
Requirements/Evaluation: participation, in-class exercises, several shorter writing assignments, and a final exam
Prerequisites: none
Enrollment Limit: 35
Expected Class Size: 35
Department Notes: required course for the Environmental Studies major and concentration
Distributions: (D2)
Attributes: AMST Space and Place Electives; ENVI Core Courses; GBST Urbanizing World Electives; SCST Elective Courses

Fall 2018
LEC Section: A1 T 1:10 pm - 2:25 pm Pia M. Kohler
CON Section: A2 F 1:10 pm - 2:25 pm Pia M. Kohler
CON Section: A3 F 2:35 pm - 3:50 pm Pia M. Kohler
LEC Section: B1 TR 8:30 am - 9:45 am Laura J. Martin

ENVI 102 (S) Introduction to Environmental Science
Environmental Science is the study of how the global earth system functions within the context of its four distinct yet interconnected "spheres," the geosphere, atmosphere, hydrosphere, and biosphere. This course introduces students to scientific methods from physics, chemistry, geology and biology that are applied to understanding both how these spheres interact and how we as scientists can interpret and assess human impacts. Discussions are accompanied by in-depth examinations of real-world case studies at the local and global scale. Topics may include: anthropogenic carbon dioxide, the ozone hole, groundwater contamination, resource sustainability, and loss of biodiversity. In weekly fieldwork and laboratory sessions students collect and analyze environmental samples, and interpret and write about these datasets. In addition to these group projects, students design, complete and present independent projects on a topic of their choice.

Class Format: two 75-minute lecture/discussion sessions, and one 3-hour field/laboratory session each week
Requirements/Evaluation: quizzes/exam, lab reports, independent project and presentation, participation in discussions
Prerequisites: none; no seniors without permission of the instructors
Enrollment Limit: 32
Enrollment Preferences: first-year students
Expected Class Size: 32
Department Notes: required course for Environmental Studies major and concentration
Distributions: (D3)
Attributes: ENVI Core Courses; EXPE Experiential Education Courses

Spring 2019

LAB Section: 02 T 1:00 pm - 4:00 pm Mea S. Cook
LAB Section: 03 W 1:00 pm - 4:00 pm Anthony J. Carrasquillo

ENVI 103 (F) Global Warming and Environmental Change
Crosslistings: ENVI103 / GEOS103
Secondary Crosslisting
Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth’s surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends are where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an
understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

**Class Format:** lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

**Requirements/Evaluation:** evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 48

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses; SCST Related Courses

**ENVI 104 (S) Oceanography**

**Crosslistings:** MAST104 / ENVI104 / GEOS104

**Secondary Crosslisting**

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

**Class Format:** lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

**Requirements/Evaluation:** evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

**Extra Info:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 48

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses

**Not offered current academic year**

---

**ENVI 105 (F) The Co-Evolution of Earth and Life**

**Crosslistings:** GEOS101 / ENVI105

**Secondary Crosslisting**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence
biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: underclassmen

Expected Class Size: 30

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

Fall 2018

LEC Section: 01 MWF 10:00 am - 10:50 am Phoebe A. Cohen

LAB Section: 02 M 1:00 pm - 3:00 pm Phoebe A. Cohen

LAB Section: 03 T 1:00 pm - 3:00 pm Phoebe A. Cohen

ENVI 108 (F) Energy Science and Technology (QFR)

Crosslistings: ENVI108 / PHYS108

Secondary Crosslisting

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; SCST Related Courses

Fall 2018

LEC Section: 01 MR 1:10 pm - 2:25 pm Kevin M. Jones

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age (WI)

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How have we arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including
works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

**Class Format:** tutorial

**Requirements/Evaluation:** each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first years and sophomores

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Attributes:** AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;

Not offered current academic year

### ENVI 134 (S) The Tropics: Biology and Social Issues

**Crosslistings:** BIOL134 / ENVI134

**Secondary Crosslisting**

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses on specifically on the peoples and cultures of tropical regions in Africa, Asia, Latin America, Oceanea, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment.

**Class Format:** lecture/debate, three hours per week

**Requirements/Evaluation:** evaluation will be based on two hour exams, a short paper, panel preparation, and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** seniors, juniors, sophomores, and first-year students--in that order

**Expected Class Size:** 60

**Department Notes:** does not count for major credit in Biology; does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; GBST African Studies Electives; PHLH Biomedical Determinants of Health; SCST Elective Courses

Not offered current academic year

### ENVI 203 (F) Ecology (QFR)

**Crosslistings:** BIOL203 / ENVI203

**Secondary Crosslisting**

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).
Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor
Enrollment Limit: none
Expected Class Size: 35
Department Notes: satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Environmental Science; EVST Living Systems Courses;

Fall 2018
LEC Section: 01 MWF 10:00 am - 10:50 am Ron D. Bassar
LAB Section: 02 T 1:00 pm - 4:00 pm Ron D. Bassar
LAB Section: 03 W 1:00 pm - 4:00 pm Ron D. Bassar

ENVI 205 (F) Geomorphology
Crosslistings: GEOS201 / ENVI205
Secondary Crosslisting

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation
Prerequisites: any 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Expected Class Size: 15
Distributions: (D3)
Attributes: AMST Space and Place Electives; ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses

Fall 2018

LAB Section: 02 R 1:00 pm - 4:00 pm José A. Constantine

ENVI 207 (F) Earth Resources
Crosslistings: ENVI207 / GEOS205
Secondary Crosslisting

The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging--all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we
have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses.

**Class Format:** lecture

**Requirements/Evaluation:** one hour exam, a final exam, lab exercises, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** sophomores and Geosciences majors

**Expected Class Size:** 18

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives

*Not offered current academic year*

---

**ENVI 208 (S) Saharan Imaginations** (DPE) (WI)

*Crosslistings: COMP234 / ARAB209 / ENVI208*

**Secondary Crosslisting**

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies majors and certificate students

**Expected Class Size:** 15

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

---

**ENVI 211 (F) Race and the Environment**

*Crosslistings: AFR211 / SOC211 / AMST211 / ENVI211*

**Secondary Crosslisting**

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and
climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**Distributions:** (D2)

---

**ENVI 213 (S) Introduction to Environmental and Natural Resource Economics** (QFR)

**Crosslistings:** ECON213 / ENVI213

**Secondary Crosslisting**

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets, short essays, paper(s); exam(s) are possible

**Prerequisites:** ECON 110

**Enrollment Limit:** 30

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 30

**Department Notes:** this course will count toward both the Environmental Studies major and concentration

**Distributions:** (D2) (QFR)

**Attributes:** ENVI Environmental Policy; POEC Comparative POEC/Public Policy Courses;

---

**ENVI 214 (S) Mastering GIS**

**Crosslistings:** GEOS214 / ENVI214

**Secondary Crosslisting**

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field
data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** at least one introductory course in BIOL, ENVI, or GEOS

**Enrollment Limit:** 20

**Enrollment Preferences:** Geosciences and Biology majors and Environmental Studies majors and concentrators

**Expected Class Size:** 20

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Methods Courses; EXPE Experiential Education Courses

---

**ENVI 215 (F) Climate Changes**

Crosslistings: GEOS215 / ENVI215

**Secondary Crosslisting**

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 14

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses; MAST Interdepartmental Electives; SCST Related Courses

---

**ENVI 216 (S) Philosophy of Animals**

Crosslistings: ENVI216 / PHIL216

**Secondary Crosslisting**
Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

**Class Format:** seminar

**Requirements/Evaluation:** four 4- to 5-page papers and one 10- to 12-page final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course

**Expected Class Size:** 19

**Department Notes:** meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

**Distributions:** (D2) (WI)

**Attributes:** COGS Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses;

*Not offered current academic year*

**ENVI 217 (F) Landscape, Place and Power**

Crosslistings: AMST216 / ENVI217

**Primary Crosslisting**

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

**Class Format:** seminar

**Requirements/Evaluation:** three 5- to 7-page essays; several shorter writing assignments

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Distributions:** (D2)

**Attributes:** AMST Critical and Cultural Theory Electives; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EVST Culture/Humanities; SCST Related Courses

*Fall 2018*

**SEM Section:** 01    TR 8:30 am - 9:45 am    Nicolas C. Howe

**ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America**  (DPE)

Crosslistings: ENVI218 / RLSP214

**Secondary Crosslisting**

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon...
in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

**Class Format:** seminar

**Requirements/Evaluation:** brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** RLSP 105, placement exam results, or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish and Environmental Studies majors

**Expected Class Size:** 12

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Spring 2019

SEM Section: 01  MWF 12:00 pm - 12:50 pm  Jennifer L. French

**ENVI 219 (S)  Evolution of and on Volcanic Islands  (WI)**

**Crosslistings:** ENVI219 / GEOS220

**Secondary Crosslisting**

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation based on five written papers.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** 100-level GEOS course or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** geosciences majors and students with a demonstrated interest in geosciences

**Expected Class Size:** 10

**Distributions:** (D3) (WI)

**Attributes:** ENVI Natural World Electives;

**Not offered current academic year**

**ENVI 220 (S)  Field Botany and Plant Natural History**

**Crosslistings:** BIOL220 / ENVI220

Not offered current academic year
Secondary Crosslisting

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. The "lectures," that are assigned as "homework" in this "flipped" course, focus on the evolution of the land plants, the most recent developments in plant systematics, characteristics of plant families, and cultural-economic uses of plants, especially native species. The in-class session will be organized as workshops with short quizzes and hands-on explorations of plant materials. The labs cover field identification, natural history, and ecology of local species.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on quizzes, exams, field quizzes, field notebook and a class project.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Extra Info 2: "flipped" lectures and homework

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 25

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3)

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS220 / AMST221 / ENVI221

Secondary Crosslisting

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Not offered current academic year
Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial
Requirements/Evaluation: weekly papers and a final oral presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students
Expected Class Size: 10
Distributions: (D3) (WI)
Distribution Notes: WI: This course will involve significant writing in terms of weekly assignments.
Attributes: EXPE Experiential Education Courses;

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: lecture/class discussion
Requirements/Evaluation: midterm, final exam, paper, two quizzes
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
ENVI 225 (F) Sustainable Food & Agriculture (WI)

Crosslistings: ENVI225 / BIOL225

Secondary Crosslisting

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Class Format: tutorial

Requirements/Evaluation: Evaluation will be based on writing assignments, tutorial presentation, performance in the role of paper critic, and course participation.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors.

Expected Class Size: 8

Department Notes: satisfies the distribution requirement in the Biology major, the Natural World distributional requirement of the Environmental Studies program

Distributions: (D2) (WI)

Distribution Notes: WI: Each student will write five papers that deal with questions requiring extensive reading of primary resources. Paper presentations will alternate with serving as a critic of other student papers. Students will be given the opportunity to revise and rewrite two of the five papers in the week following their tutorial presentation thereby being able to respond to the criticism and discussion of the tutorial group.

Attributes: ENVI Natural World Electives;

ENVI 228 (F) Water as a Scarce Resource (WI)

Crosslistings: ECON228 / ENVI228

Secondary Crosslisting

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: tutorial, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers

Requirements/Evaluation: evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and
ENVI 232 (S) The Garden in the Ancient World
Crosslistings: ENVI232 / REL235 / CLAS235 / COMP235

Secondary Crosslisting
Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written assignments, and a final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Classics majors
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under CLAS, COMP or ENVI; meets Division 2 requirement if registration is under REL

Spring 2019
SEM Section: 01    MR 1:10 pm - 2:25 pm     Nicole G. Brown

ENVI 234 (F) Economics of Developing Countries  (DPE)
Crosslistings: ENVI234 / ECON204

Secondary Crosslisting
The leaders of poor countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in poor countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: lecture/discussion
Requirements/Evaluation: short essays/assignments; exam; final group project, including a 15-page paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Attributes: GBST African Studies Electives; GBST Economic Development Studies Electives; POEC Comparative POEC/Public Policy Courses

Fall 2018

LEC Section: 01    MWF 8:30 am - 9:45 am    Steven E. Nafziger

ENVI 235 (S) Survival and Resistance: Environmental Political Theory (WI)

Crosslistings: ENVI235 / PSCI235

Secondary Crosslisting

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: seminar

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years and sophomores

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Critical and Cultural Theory Electives; ENVI Humanities, Arts + Social Science Electives; PHIL Related Courses; PSCI Political Theory Courses;

SEM Section: 01    Cancelled

ENVI 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Crosslistings: ENVI236 / ARTH236 / CLAS236

Secondary Crosslisting

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity
of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry;" Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: seminar
Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: first year graduate students, then second year graduate students, then advanced undergraduates
Expected Class Size: 12
Department Notes: pre-1600 undergraduate requirement
Distributions: (D1)
Attributes: ARTH pre-1600 Courses;
Not offered current academic year

ENVI 238 (F) Sustainable Economic Growth

Crosslistings: ENVI238 / ECON238

Secondary Crosslisting

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: lecture
Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 and ECON 120
Enrollment Limit: 30
Enrollment Preferences: potential or declared social science majors
Expected Class Size: 20
Distributions: (D2)

Fall 2018
LEC Section: 01    TR 9:55 am - 11:10 am     Gregory P. Casey
ENVI 240 (F) Conservation and Climate Change  (WI)
What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: WI: Tutorial format

ENVI 242 (S) The Country and the City in the Classical World
Crosslistings: ANTH242 / CLAS242 / ENVI242

Secondary Crosslisting
A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside not just as places, but also as states of mind. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 25

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under CLAS or ENVI; meets Division 2 requirement if registration is under ANTH

Not offered current academic year

ENVI 243 (F) Reimagining Rivers
Crosslistings: ENVI243 / ANTH243

Primary Crosslisting
Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources
of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

**Class Format:** seminar

**Requirements/Evaluation:** three 5- to 7-page papers and several short response papers

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 19

**Distributions:** (D2)

ENVI 244 (S)  Environmental Ethics  (WI)

Crosslistings: PHIL244 / ENVI244

**Primary Crosslisting**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Class Format:** tutorial

**Requirements/Evaluation:** one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners’ essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Department Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WI)

ENVI 247 (S)  Race and Religion in the American West

Crosslistings: ENVI247 / LATS247 / REL247 / AMST247
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**ENVI 248 (S) "Our Response Will Define Our Future": Climate Change Policy Analysis (WI)**

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

**Class Format:** tutorial

**Requirements/Evaluation:** students alternate in preparing 5-7 page papers and 2 page responses (5 papers and 5 responses in total), final paper building on one of the 5-7 page papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** 1. first-year students 2. second-year students 3. Environmental studies concentrators and majors

**ENVI 250 (S) Environmental Justice (DPE)**
Crosslistings: ENVI250 / SCST250

Primary Crosslisting

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar

Requirements/Evaluation: several short essays, final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 255 (F) Environmental Observation

Crosslistings: GEOS255 / ENVI255

Secondary Crosslisting

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, LIDAR/RADAR, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, biosphere, and erosion processes. Students will carry out a research project using observation techniques covered in class to explore a part of the local environment.

Class Format: lecture

Requirements/Evaluation: Labs, one midterm exam, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 10

Enrollment Preferences: sophomores

ENVI 270 (S) Environmental Problems: Social Causes, Consequences, and Policy Solutions

This course will provide an overview of the social causes and consequences of environmental problems, especially within the US context. Special attention will be paid to the variety of actors that shape environmental outcomes, including legislators, administrators, the science community, civil society and the private sector. We will examine different proposed solutions to environmental problems and models of environmental policy-making, including at the local, state and federal level. This course will focus on several case studies, including air and water pollution, agricultural runoff, climate change and endangered species protection.

Class Format: seminar

Requirements/Evaluation: participation, midterm, several smaller assignments, and a final project analyzing an environmental policy

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators, and Political Science majors

ENVI 273 (F) Politics without Humans?

Crosslistings: SCST273 / PSCI273 / ENVI273

Secondary Crosslisting
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: lecture/seminar

Requirements/Evaluation: class participation, three 6- to 8-page papers

Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students

Prerequisites: none

ENVI 283 (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes

Crosslistings: ENVI283 / PSCI283

Primary Crosslisting

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Class Format: seminar

Requirements/Evaluation: participation, several smaller assignments, and a final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators, and Political Science majors

Expected Class Size: 15

Distributions: (D2)

ENVI 285 (S) Writing About Science and Nature  (WI)
Crosslistings: ENGL286 / ENVI285

Over the last few decades, the nature of nature has changed and so, necessarily, has nature writing. In this course we will read essays and articles by some of the most innovative science and nature writers working today. Students will also produce their own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Class Format: seminar

Requirements/Evaluation: short writing exercises and a long final project

Prerequisites: ENVI 101 or 102

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 15

Distributions: (D1) (WI)

Attributes: ENVI Humanities, Arts + Social Science Electives; SCST Related Courses;

Not offered current academic year

ENVI 291 (S) Religion and the American Environmental Imagination  (WI)
Crosslistings: ENVI291 / REL291 / SOC291

Primary Crosslisting

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of ¿eco-spirituality¿ and popular ¿nature religion¿. Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;

Not offered current academic year

ENVI 303 (S) Cultures of Climate Change  (WI)
Crosslistings: ENVI303 / SOC303

Primary Crosslisting

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a “problem” in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental
ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

**Class Format:** seminar

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

**ENVI 307 (F) Environmental Law**

Crosslistings: ENVI307 / PSCI317

**Primary Crosslisting**

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

**Class Format:** seminar

**Requirements/Evaluation:** based on several short writing assignments, a term research project, and active participation in class.

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Department Notes:** satisfies the "Environmental Policy" requirement for the Environmental Studies concentration

**Distributions:** (D2)

**Attributes:** AMST Space and Place Electives; ENVI Environmental Policy; EVST Social Science/Policy; MAST Interdepartmental Electives; POEC U.S. Political Economy + Public Policy Course; SCST Elective Courses

Fall 2018

LEC Section: 01    M 7:00 pm - 9:40 pm     David N. Cassuto

**ENVI 308 (S) Science and Politics in Environmental Decision Making**

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.
Class Format: seminar
Requirements/Evaluation: participation, several smaller assignments, and a final project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: environmental studies majors and concentrators, public health concentrators, and political science majors
Expected Class Size: 15
Attributes: ENVI Environmental Policy; PHLH Nutrition, Food Security + Environmental Health

ENVI 312 (F) Communities and Ecosystems (QFR)
Crosslistings: BIOL302 / ENVI312
Secondary Crosslisting
An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.
Class Format: lecture / laboratory, six hours a week
Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites: BIOL/ENVI 203 or 220
Enrollment Limit: 28
Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators
Expected Class Size: 24
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses;
Not offered current academic year

ENVI 313 (S) Chicago
Crosslistings: LATS312 / AMST312 / ENVI313
Secondary Crosslisting
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221
ENVI 318 (F) California: Myths, Peoples, Places (WI)
Crosslistings: ENVI318 / LATS318 / REL318 / AMST318 / COMP328

Secondary Crosslisting
Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

Class Format: seminar

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 15

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under LATS, AMST, ENVI or REL

Crosslistings: GBST322 / ANTH322 / ENVI322

Secondary Crosslisting
What is waste? What is filth? Why do titles or categories of sanitation workers--“garbage man,” for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: lecture/discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 15

ENVI 324 (S)  Corals and Sea Level
Crosslistings: GEOS324 / MAST324 / ENVI324

Secondary Crosslisting

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 328 (F)  Global Environmental Politics  (WI)
Crosslistings: ENVI328 / PSCI328

Primary Crosslisting

This seminar draws on the last five decades of international efforts to regulate the environmental commons. The process of negotiating and implementing international environmental treaties will be a core focus of the course, yet emphasis will also be placed on emerging non-state means of addressing global environmental challenges. A variety of challenges faced in global environmental policymaking (compliance, participation by civil society and industry, incorporation of science, efficiency.) will be examined through the study of several international regimes, including on climate change, endangered species, biodiversity, biosafety and mercury pollution.

Class Format: seminar

Requirements/Evaluation: participation; several shorter writing assignments; and a research paper to be completed in stages over the course of the semester

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19
**ENVI 329 (S) Our Planet’s Plastic Plight**

#stopsucking, #gotopless, #foodinthenude: these rallying calls to rethinkplastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study international flows of this material, notably following China’s decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

**Class Format:** seminar

**Requirements/Evaluation:** participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Environmental Studies majors, Public Health concentrators

**Expected Class Size:** 15

**Distribution Notes:** No Divisional Credit

**Attributes:** ENVI Environmental Policy

---

**ENVI 339 (F) Conservation Biology (QFR)**

Crosslistings: BIOL329 / ENVI339

**Secondary Crosslisting**

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

**Class Format:** lecture and discussion three hours per week; lab three hours per week

**Requirements/Evaluation:** lab assignments, two exams, and discussion participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 203, or BIOL 202, or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** biology majors, seniors, and juniors

**Expected Class Size:** 24

**Department Notes:** satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

Distribution Notes: QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures, mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

ENVI 341 (S) Toxicology and Cancer
Crosslistings: CHEM341 / ENVI341

Secondary Crosslisting
What is a poison and what makes it poisonous? Paracelcus commented in 1537: “What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison.” Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: lecture, three times per week
Requirements/Evaluation: evaluation is based on two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry
Enrollment Limit: 30
Expected Class Size: 24
Department Notes: satisfies the Natural World requirement for the Environmental studies concentration
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives; ENVI Natural World Electives; PHLH Biomedical Determinants of Health

Not offered current academic year

ENVI 346 (F) Environmental Psychology
Crosslistings: ENVI346 / PSYC346

Secondary Crosslisting
This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: seminar
Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.
Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

Expected Class Size: 16

Distributions: (D2)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; PSYC Area 4 - Social Psychology

Not offered current academic year

ENVI 351 (F) Marine Policy

Crosslistings: ENVI351 / PSCI319 / MAST351

Secondary Crosslisting

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Extra Info: offered only at Mystic Seaport

Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration

Distributions: (D2)

Attributes: ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

ENVI 352 (S) After Nature: Writing About Science and The Environment (W)

Crosslistings: ENGL351 / ENVI352

Primary Crosslisting

Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Class Format: seminar

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 101 or 102 suggested

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors

Expected Class Size: 15

Distributions: (D1) (W)

Not offered current academic year

ENVI 364 (S) Instrumental Methods of Analysis

Crosslistings: ENVI364 / CHEM364

Secondary Crosslisting

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental
chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the
theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods,
electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies,
with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively
applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles
we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics,
laboratory work, and an independent project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

ENVI 368 (F) Technology and Modern Society

Crosslistings: ENVI368 / SOC368

Secondary Crosslisting

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in
various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a
defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to
improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity,
technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus
on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on
community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also
examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology
as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Distributions: (D2)

Attributes: ENVI Humanities, Arts + Social Science Electives; FMST Related Courses; HSCI Interdepartmental Electives; SCST Elective Courses

SEM Section: 01    MWF 8:30 am - 9:45 am    Sarah A. Jacobson

ENVI 378 (F) Nature/Writing

Crosslistings: ENGL378 / ENVI378

Secondary Crosslisting

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion/seminar

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

Distributions: (D1)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 386 (S) Environmental and Natural Resource Policy (QFR)

Crosslistings: ENVI386 / ECON518 / ECON386

Secondary Crosslisting

Economic activity often damages the environment significantly, especially in developing countries. Firms may clear-cut valuable forests, while consumers may drive high-pollution vehicles with little thought for the environmental consequences. Economists have proposed a variety of policy remedies, from pollution taxes to tradable permit schemes and restrictions on the quantity of pollution. This course first examines the relative merits of these policies from a theoretical perspective. When pollution damage is uncertain, is it better to use a pollution tax or a quantity restriction? Is it worse to set a pollution tax too high than to set it too low? It then proceeds to the practical issues that attend policy implementation, particularly where state capacity is limited. What is the best policy when inspectors can be threatened or bribed? When resource extraction is hard to monitor? Case studies will likely include policies aimed at deforestation, mineral ownership and extraction, particulate air pollution from industry and transportation, and carbon emissions from electricity generation. In evaluating policies we will think about both efficiency and the distribution of costs and benefits. (What if environmental regulation only benefits the wealthiest people in a country?) We will also examine the environmental consequences of policies aimed at
other problems, like poverty and low education.

Class Format: seminar

Requirements/Evaluation: problem sets, paper, brief presentation, a midterm, and a final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 25

Enrollment Preferences: senior Economic majors and CDE fellows

Expected Class Size: 20

Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration

Distributions: (D2) (QFR)

Attributes: ENVI Environmental Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

Not offered current academic year

ENVI 387 (S) Economics of Climate Change (QFR)
Crosslistings: ECON387 / ECON522 / ENVI387

Secondary Crosslisting

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

Class Format: lecture

Requirements/Evaluation: seven problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 19

Enrollment Preferences: senior Economic majors and CDE fellows

Expected Class Size: 19

Distributions: (D2) (QFR)

Attributes: ENVI Environmental Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Crosslistings: ENVI404 / MAST404 / GEOS404

Secondary Crosslisting

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Crosslistings: ENVI405 / GEOS405

Secondary Crosslisting

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these
interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Expected Class Size: 10

ENVI 411 (F) Environmental planning workshop: community-based environmental problem solving
Crosslistings: ENVI411 / AMST302
Primary Crosslisting
This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the greater Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply the concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab
Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only
Enrollment Limit: 16
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 16
Department Notes: required course for Environmental Studies major and concentration
Distribution Notes: does not meet Division 1, 2, or 3 requirements

ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies (WI)

Crosslistings: ENVI412 / MAST402

Primary Crosslisting

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: limited to senior Environmental Studies majors and concentrators and Maritime Studies concentrators

Expected Class Size: 20

Department Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: (WI)

Distribution Notes: does not meet Division 1, 2, or 3 requirements Each student in this course will complete a semester-long research project resulting in a final report of 20-25 pages. The project will proceed in phases, with significant pieces of writing due at regular intervals throughout the semester, and with multiple opportunities for revision and peer review. There will also be several short reading response papers during the first half of the semester.

ENVI 419 (F) Going to Ground: Considering Earth in the Arts of Africa (WI)

Crosslistings: ENVI419 / AFR419 / ARTH419

Secondary Crosslisting

Drawing its inspiration from the landmark exhibition Earth Matters: Land as Material and Metaphor in the Arts of Africa (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base.

Class Format: seminar

Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some coursework in ARTH and/or AFR would be useful

Enrollment Limit: 19

Enrollment Preferences: seniors and majors

Expected Class Size: 19

Distributions: (D1) (WI)
ENVI 420 (S)  Architecture and Sustainability in a Global World (WI)
Crosslistings: ARTH420 / ENVI420 / EXPR420 / GBST420

Secondary Crosslisting
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as “minimizing the negative impact of built form on the surrounding landscape,” and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component
Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed
Enrollment Limit: 6
Enrollment Preferences: Art History majors, Environmental Studies majors
Expected Class Size: 6
Materials/Lab Fee: Travel funds will be provided by a Class of 1963 Sustainability Development Grant
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI or EXPR; meets Division 2 requirement if registration is under GBST

Spring 2019
SEM Section: 01    M 1:10 pm - 3:50 pm     Michelle M. Apotsos

ENVI 421 (F)  Latinx Ecologies
Crosslistings: LATS420 / ENVI421

Secondary Crosslisting
An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes’ *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez’s theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Class Format: seminar
Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and
a final 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Latinx Studies concentrators; Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Distributions:** (D2)

**Attributes:** LATS 400-level Seminars

*Not offered current academic year*

**ENVI 422 (F) Ecology of Sustainable Agriculture**

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

**Class Format:** seminar; two 75 minute sessions per week

**Requirements/Evaluation:** evaluation will be based on writing assignments, seminar presentation, and course participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL/ENVI 203 or BIOL 302 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors

**Expected Class Size:** 12

**Department Notes:** Satisfies the distribution requirement in Biology; the ENVS biology track; the Natural World distributional requirement of the Environmental Studies program

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; PHLH Nutrition, Food Security+Environmental Health

Fall 2018

SEM Section: 01 Cancelled

**ENVI 423 (S) Global Change Ecology** (WI)

Crosslistings: ENVI423 / BIOL413

**Secondary Crosslisting**

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioral mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

**Class Format:** seminar

**Requirements/Evaluation:** class participation and several short papers
ENVI 445 (F) World's End: Literary Ecologies of the Limit
Crosslistings: ENGL445 / ENVI445

Secondary Crosslisting

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It; Marvell, "Upon Appleton House"; Ovid, Metamorphosis; Browne, Urn Burial; Titian, Wordsworth, McCarthy, The Road; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.

Class Format: seminar; combination discussion seminar and tutorial conferences
Requirements/Evaluation: one 5-page paper and one final 15-page paper

ENVI 478 (F) Cold War Landscapes
Crosslistings: ENVI478 / AMST478 / HIST478

Secondary Crosslisting

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research.
papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Space and Place Electives; HIST Group C Electives - Europe and Russia; HIST Group F Electives - U.S. + Canada

Not offered current academic year

ENVI 491 (S) The Suburbs (Wi)

Crosslistings: HIst491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Distributions: (D2) (Wi)

Jessica M. Fisher, Assistant Professor of English
Antonia Foias, Professor of Anthropology and Sociology
Jennifer L. French, Professor of Spanish
Sarah S. Gardner, Lecturer in Environmental Studies
Matthew Gibson, Assistant Professor of Economics
Environmental studies call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The three curricular options in Environmental Studies—the major in Environmental Studies and the concentrations in Environmental and Maritime Studies—are designed to help majors and concentrators to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
• Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

The requirements for the environmental studies major and concentration have been revised. The requirements for students from the class of 2020 and subsequent classes are immediately below, followed by the requirements for the students from the class of 2019.

Overview of the Major and Concentrations for Classes of 2020 and Subsequent Classes

The Environmental Studies major is an eleven course major. The major has a “core” of seven courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 411, and the ENVI senior seminar, ENVI 412. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving (offered every fall), and ENVI 412, Environmental Studies Senior Seminar (offered every spring). The remaining component of the “core” is comprised of three foundational 200-level courses, one from each of three lists of courses (see below), with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven course foundation, each ENVI major devises an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement under special circumstances.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a seven course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 411 and ENVI 412. Students pursuing the concentration will take one elective each from each of three lists of courses, each list (see below) representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and ENVI 412, Environmental Studies Senior Seminar. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies concentration.
Submitting your Proposed “Course Cluster” and “Plan of Study” to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring Pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The proposals will be reviewed by the CES Advisory Board.

Credit for AP, IB, A-levels and other pre-Williams courses

At this time, students are not allowed to place out of ENVI 101 or ENVI 102.

Planning for prerequisites on your path through the Environmental Studies major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOL 203 (Ecology) or ENVI/BIOL 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Director or Associate Director.

Study Away

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Furthermore, the Williams-Mystic Program is the foundation of the Maritime Studies concentration. Students considering either a semester or year away who intend to major or concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major or concentration, but must have advance approval in writing from the Chair of Environmental Studies.

Advising

Majors and concentrators (or first years and sophomores interested in the major or concentrations offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming majors and concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2018-19: Ralph Bradburd, Henry Art, Sarah Gardner, Nicolas Howe, Pia Kohler, Laura Martin, Mea Cook, Luana Maroja, James Manigault-Bryant.

Overview of the Major and Concentrations for the Classes of 2019

The Environmental Studies major is an eleven course major. The major has a “core” of six courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take two of the courses, ENVI 101 and ENVI 102. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), one 400-level Environmental Studies capstone research practicum that involves either collaborative research on a specific environmental problem or client-driven team project on issues of environmental significance in the Berkshire region. Two such courses will be offered in the 2018-19 academic year: ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving, and ENVI 412, Environmental Studies Senior Seminar. The remaining component of the “core” is comprised of three 200-level courses, one from each of three lists of courses, with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this six-course foundation, each ENVI major devises an individualized five-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these five electives in the cluster must be among those listed by the Program as a research methods course.
The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a "living systems" course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a six course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, and one of the 400-level ENVI capstone practicum courses, students pursuing the concentration will take one elective each from each of three lists of courses, each list representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and one of the 400-level ENVI capstone practicum courses. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies concentration.

HONORS IN ENVIRONMENTAL STUDIES (MAJOR OR CONCENTRATION)

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus winter study project, or a full-year project (two semesters plus winter study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Environmental Studies concentrators may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be approved by the department chair and the Chair of Environmental Studies by the end of the junior year. Students will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

WINTER STUDY AND INDEPENDENT STUDY

In addition to courses fulfilling the environmental studies major and concentration requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- MAST 397, 398 Independent Study: Maritime Studies
- ENVI 493-W31-494 Honors Thesis and Senior Research
- MAST 493-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when
reviewing each year’s Winter Study offerings.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major, distributed according to the requirements detailed below. Because the ENVI curriculum was restructured, students in the class of 2019 have different requirements than those for the class of 2020 and subsequent classes. The requirements for the class of 2020 follow immediately below. Those for the class of 2019 are provided below those for the class of 2020.

For students in the class of 2020 and subsequent classes:

Introductory required courses (2 courses):

- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science

200-level foundational courses required for all ENVI majors (3 courses, 1 from each category):

**Culture/Humanities**

- ENVI 217 Landscape, Place, and Power (formerly Environmental Humanities: Theory and Practice)
- or ENVI 244 Environmental Ethics
- or ENVI 250 Environmental Justice
- or ENVI 259 New England Environmental History

**Social Science/Policy**

- ENVI/ECON 213 Introduction to Environmental and Natural Resource Economics (ECON 110 prerequisite)
- or ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions
- or ENVI/PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
- or ENVI 307/PSCI 317 Environmental Law

**Environmental Science (with lab)**

- ENVI 203 Ecology
- or ENVI 205 Geomorphology
- or ENVI 215 Climate Changes

Specialization (4-course) Cluster (including a “methods course” and in some cases one “living systems” course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental economics, environmental justice, environmental literature, environmental chemistry, environmental biology, environmental geosciences, environmental planning and design, urban environmental studies, water and energy, sustainable food and agriculture, environmental justice.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Board, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

One “methods course” requirement:

- ENVI 214/GEOS 214 Geographic Information Systems
- or STAT 201 Statistics and Data Analysis
or STAT 202 Introduction to Statistical Modeling
or ANSO 205 Ways of Knowing
or POEC 253 Empirical Methods in Political Economy
or ECON 255 Econometrics
or STAT 346 Regression and Forecasting
or CHEM 364/ENVI 364 Instrumental Methods of Analysis
or MATH 410/BIOL 214 Mathematical Ecology

This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

One “living systems course” requirement:

- BIOL 203/ENVI 203 Ecology
- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- BIOL 220/ENVI 220 Field Botany and Plant Natural History
- BIOL 231/MAST 311 Marine Ecology
- GEOS 210/MAST 211 Oceanic Processes
- BIOL 302/ENVI 312 Communities and Ecosystems

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Senior Seminar Requirement:

In the senior year—or, under special circumstances during the junior year—students will take two 400-level seminars, ENVI 411 and ENVI 412, that together serve as a capstone experience for the major and concentrations. These courses are interdisciplinary, issue-based and project-driven. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshires involving urban and rural land use planning and sustainable design. Offered in the spring semester, the Senior Research Seminar engages students in research on a policy-related environmental problem.

Required Courses (2 courses)

- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College. The concentration in Environmental Studies consists of seven courses: four core courses and one elective course from each of the three categories below: The Natural World; Humanities, Arts and Social Sciences; and Environmental Policy.

Required Courses (4 courses)

- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science
- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar
Distribution Courses (3 courses, 1 from each group)

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major. (It is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

The Natural World

BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
BIOL 203/ENVI 203 Ecology
BIOL 220/ENVI 220 Field Botany and Plant Natural History
BIOL 302/ENVI 312 Communities and Ecosystems
BIOL 422/ENVI 422 Ecology of Sustainable Agriculture
BIOL 424/ENVI 424 Conservation Biology
CHEM 341/ENVI 341 Toxicology and Cancer
CHEM 364/ENVI 364 Instrumental Methods of Analysis
ENVI 240T Conservation and Climate Change
GEOS 101/ENVI 105 The Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103/ENVI 103 Global Warming and the Reshaping of Landscapes
GEOS 104/ENVI 104/MAST 104 Oceanography
GEOS 201/ENVI 205 Geomorphology
GEOS 205/ENVI 207 Earth Resources
GEOS 206/ENVI 206 Renewable Energy and the Sustainable Campus
GEOS 214/ENVI 214 Remote Sensing and Geographic Information Systems
GEOS 215/ENVI 215 Climate Changes
GEOS 226/ENVI 226/MAST 226 The Oceans and Climate
GEOS 254/ENVI 254 Gulf of California Tectonics and Coastal Ecosystems
GEOS 314/MAST 314/ENVI 314 Sediment Records of Climate Change
GEOS 324/ENVI 324 Corals and Sea Level
GEOS 405/ENVI 405 Geochemistry: Understanding Earth’s Environment
MAST 211/GEOS 210 Oceanographic Processes
MAST 311/BIOL 231 Marine Ecology
MATH 410/BIOL 214 Mathematical Ecology
PHYS 108/ENVI 108 Energy Science and Technology

Humanities, Arts, and Social Sciences

AFR 211/ENVI 211/SOC 211/AMST 211 Race and the Environment
ANTH 214/ENVI 224 The Rise and Fall of Civilizations
ANTH 272/WGSS 272 Sex and the Reproduction of Society
ANTH 332/ENVI 332/JLST 332/GBST 332 Environmental Justice
CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Note: Students who take MAST 211/GEOS 210 (Oceanographic Processes) at Williams-Mystic can substitute an extra elective in lieu of GEOS 104

Capstone Course

One Practicum course:

ENVI/MAST 412 Practicum: Environmental Science and Policy

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea
Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

Maritime History

- HIST 127 The Expansion of Europe
- HIST/AFR 248 The Caribbean: From Slavery to Independence
- HIST/JPN/ASST 321 History of U.S.-Japan Relations
- HIST/ASST/INST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Maritime Literature

- CLAS 101/COMP 107 The Trojan War

Marine Policy

- ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
- ECON/ENVI 386/ ECON 518 Environmental and Natural Resource Policy
- ENVI 307/PSCI 317 Environmental Law
- PSCI 223 International Law
- PSCI 229 Global Political Economy
- PSCI 347 Law of the Sea
- ENVI/PSCI 328 Global Environmental Politics

Marine Science

- BIOL 414 Life at Extremes: Molecular Mechanisms
- GEOS 212 / BIOL 211 Paleobiology
- GEOS/ENVI 215 Climate Changes
- GEOS/ENVI/MAST 226 The Oceans and Climate
- GEOS 302 Sedimentology
- GEOS/ENVI/MAST 314 Sediment Records of Climate Change

ENVI 12 (W) Geology of the National Parks

Crosslistings: ENVI12 / GEOS12

Secondary Crosslisting

A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to
prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well-illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and bibliography will be distributed by the presenter at the time of the report.

Class Format: mornings
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference to first-year students
Materials/Lab Fee: approximately $125 for books

Winter 2019
LEC Section: 01 M-F 10:00 am - 11:50 am PORG 10:00 am - 11:50 am Bud Wobus

ENVI 15 (W) From Basalt to Balsam to Beavers: The Natural History of New England

In this course we will explore, far and wide, the New England Landscape and try to make some sense of the amazing physiographic and biological diversity that it offers in a relatively small area. From the spruce clad Berkshires to the broad Connecticut River Valley to the glacially forged coastal plain, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna. We'll learn the predominant trees and shrubs and search for patterns to their occupation of the landscape. We will observe the behavior and evidence of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. How do they manage to cope in their often rigorous and fickle environments and how might they be affected by climate change and other human influences? Through field trips, museum visits, individual investigations, readings, discussions and guest presentations, you'll become a little more aware and appreciative of the natural heritage of the region that you have made your recent home. Students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions; some trips will require students to be away from campus beyond normal class hours. Adjunct Instructor Bio: Drew Jones is Manager of Hopkins Memorial Forest where he oversees the management of the facilities, coordinates research and teaching activities and outreach programs for the public and local schools. He also operates an owl banding station in the fall and intermittently engages in other field research. In the past, he has worked as a wildlife biologist and educator from the Southern Appalachians to the North Woods.

Class Format: mornings; several class sessions off campus will likely last the entire day
Requirements/Evaluation: 2- to 3-page paper; final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students who demonstrate a special enthusiasm for this subject will be favored; all else being equal, seniors will receive special consideration
Materials/Lab Fee: $260 plus cost of books
Distributions: (D3)
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 MWF 10:00 am - 12:50 pm PORG 10:00 am - 12:50 pm Andrew T. Jones

ENVI 18 (W) Games!

Crosslistings: ENV118 / ECON118
Secondary Crosslisting

We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar
applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

**Class Format:** Tuesday, Wednesday & Thursday 1-4pm

**Requirements/Evaluation:** final project; game journal

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** expressed interest

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

---

**ENVI 19 (W) Methods in Environmental Chemistry**

Crosslistings: CHEM19 / ENVI19

**Secondary Crosslisting**

This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

**Requirements/Evaluation:** evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments

**Prerequisites:** CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to CHEM and/or ENVI majors/concentrators

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

---

**ENVI 20 (W) Winter Naturalist's Journal**

Crosslistings: ENVI20 / ENGL20

**Primary Crosslisting**

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.

**Class Format:** mornings

**Requirements/Evaluation:** daily journal and 2- to 3-page papers
ENVI 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talliveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel

Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

Materials/Lab Fee: cost to student: $3362

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

LEC Section: 01   MW 10:00 am - 12:30 pm   Christian McEwen

ENVI 25 (W) Sustainable Agriculture in California

Crosslistings: BIOL25 / ENVI25

Primary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited
to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

Class Format: travel

Requirements/Evaluation: 10-page paper; synthetic journal of field experiences to be produced by the group

Prerequisites: none, but see preferences for over-enrollment; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01 TBA Henry W. Art, Sarah Gardner

ENVI 26 (W) Material Culture and Craft of 19th Century Coastal New England

Crosslistings: ENVI26 / MAST25

Secondary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvasworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses

Winter 2019
TVL Section: 01 Cancelled

ENVI 31 (W) Senior Research and Thesis: Environmental Studies

To be taken by students registered for Environmental Studies 493-494.

Class Format: thesis

Distributions: (D2)
ENVI 99 (W) Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

Winter 2019
IND Section: 01 TBA Henry W. Art

ENVI 100 (S) Introduction to Weather and Climate
Crosslistings: GEOS100 / ENVI100

Secondary Crosslisting
How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that oceans and glaciers interact with the climate. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and learning how to run a climate model on a computer.

Class Format: lecture
Requirements/Evaluation: class participation, labs, one midterm and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Distributions: (D3)
Attributes: EXPE Experiential Education Courses

Spring 2019
LEC Section: 01 MWF 11:00 am - 11:50 am Alice C. Bradley
LAB Section: 02 M 1:00 pm - 3:00 pm Alice C. Bradley
LAB Section: 03 T 1:00 pm - 3:00 pm Alice C. Bradley

ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies
Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.
ENVI 102 (S) Introduction to Environmental Science

Environmental Science is the study of how the global earth system functions within the context of its four distinct yet interconnected "spheres," the geosphere, atmosphere, hydrosphere, and biosphere. This course introduces students to scientific methods from physics, chemistry, geology and biology that are applied to understanding both how these spheres interact and how we as scientists can interpret and assess human impacts. Discussions are accompanied by in-depth examinations of real-world case studies at the local and global scale. Topics may include: anthropogenic carbon dioxide, the ozone hole, groundwater contamination, resource sustainability, and loss of biodiversity. In weekly fieldwork and laboratory sessions students collect and analyze environmental samples, and interpret and write about these datasets. In addition to these group projects, students design, complete and present independent projects on a topic of their choice.

Class Format: two 75-minute lecture/discussion sessions, and one 3-hour field/laboratory session each week

Requirements/Evaluation: quizzes/exam, lab reports, independent project and presentation, participation in discussions

Prerequisites: none; no seniors without permission of the instructors

Enrollment Limit: 32

Enrollment Preferences: first-year students

Expected Class Size: 32

Department Notes: required course for Environmental Studies major and concentration

Distributions: (D3)

ENVI 103 (F) Global Warming and Environmental Change

Crosslistings: ENVI103 / GEOS103

Secondary Crosslisting

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends are where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an
understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses; SCST Related Courses

---

ENVI 104 (S) Oceanography
Crosslistings: MAST104 / ENVI104 / GEOS104

Secondary Crosslisting

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

Not offered current academic year

---

ENVI 105 (F) The Co-Evolution of Earth and Life
Crosslistings: GEOS101 / ENVI105

Secondary Crosslisting

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence
biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: underclassmen

Expected Class Size: 30

Distributions: (D3)

LAB Section: 03 T 1:00 pm - 3:00 pm Phoebe A. Cohen

ENVI 108 (F) Energy Science and Technology (QFR)

Crosslistings: ENVI108 / PHYS108

Secondary Crosslisting

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; SCST Related Courses

Fall 2018

LEC Section: 01 MR 1:10 pm - 2:25 pm Kevin M. Jones

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age (WI)

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How have we arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including
works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Class Format: tutorial
Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first years and sophomores
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;
Not offered current academic year

ENVI 134 (S) The Tropics: Biology and Social Issues
Crosslistings: BIOL134 / ENVI134
Secondary Crosslisting
Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses on specifically on the peoples and cultures of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment.

Class Format: lecture/debate, three hours per week
Requirements/Evaluation: evaluation will be based on two hour exams, a short paper, panel preparation, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 60
Enrollment Preferences: seniors, juniors, sophomores, and first-year students--in that order
Expected Class Size: 60
Department Notes: does not count for major credit in Biology; does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; GBST African Studies Electives; PHLH Biomedical Determinants of Health; SCST Elective Courses
Not offered current academic year

ENVI 203 (F) Ecology (QFR)
Crosslistings: BIOL203 / ENVI203
Secondary Crosslisting
This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).
Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor
Enrollment Limit: none
Expected Class Size: 35
Department Notes: satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Environmental Science; EVST Living Systems Courses;

ENVI 205 (F) Geomorphology
Crosslistings: GEOS201 / ENVI205
Secondary Crosslisting
Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on geomorphic evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction—planned or unplanned—with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.
Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation
Prerequisites: any 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Expected Class Size: 15
Distributions: (D3)
Attributes: AMST Space and Place Electives; ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses

Fall 2018
LEC Section: 01    TR 11:20 am - 12:35 pm     José A. Constantine
LAB Section: 02    R 1:00 pm - 4:00 pm     José A. Constantine

ENVI 207 (F) Earth Resources
Crosslistings: ENVI207 / GEOS205
Secondary Crosslisting
The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we
have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses.

Class Format: lecture
Requirements/Evaluation: one hour exam, a final exam, lab exercises, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: sophomores and Geosciences majors
Expected Class Size: 18
Distributions: (D3)
Attributes: ENVI Natural World Electives
Not offered current academic year

ENVI 208 (S) Saharan Imaginations  (DPE)  (WI)
Crosslistings: COMP234 / ARAB209 / ENVI208
Secondary Crosslisting

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Class Format: seminar
Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Arabic Studies majors and certificate students
Expected Class Size: 15
Distributions: (D1)  (DPE)  (WI)
Distribution Notes: DPE: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Spring 2019
SEM Section: 01  TR 9:55 am - 11:10 am  Brahim El Guabli

ENVI 211 (F) Race and the Environment
Crosslistings: AFR211 / SOC211 / AMST211 / ENVI211
Secondary Crosslisting

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and
climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**Distributions:** (D2)

**Attributes:** AFR Core Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; PHLH Nutrition, Food Security + Environmental Health; PHLH Social Determinants of Health

---

**ENVI 213 (S) Introduction to Environmental and Natural Resource Economics** (QFR)

**Crosslistings:** ECON213 / ENVI213

**Secondary Crosslisting**

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets, short essays, paper(s); exam(s) are possible

**Prerequisites:** ECON 110

**Enrollment Limit:** 30

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 30

**Department Notes:** this course will count toward both the Environmental Studies major and concentration

**Distributions:** (D2) (QFR)

**Attributes:** ENVI Environmental Policy; POEC Comparative POEC/Public Policy Courses;

**LEC Section: 01** MW 11:00 am - 12:15 pm  James A. Manigault-Bryant

**ENVI 214 (S) Mastering GIS**

**Crosslistings:** GEOS214 / ENVI214

**Secondary Crosslisting**

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field
data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

ENVI 215 (F) Climate Changes
Crosslistings: GEOS215 / ENVI215

Secondary Crosslisting

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture, three hours per week; one three-hour lab per week

Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

Expected Class Size: 14

Distributions: (D3)

ENVI 216 (S) Philosophy of Animals (WI)
Crosslistings: ENVI216 / PHIL216

Secondary Crosslisting
Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: seminar

Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course

Expected Class Size: 19

Department Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

Distributions: (D2) (WI)

Attributes: COGS Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses;

Not offered current academic year

ENVI 217 (F) Landscape, Place and Power
Crosslistings: AMST216 / ENVI217

Primary Crosslisting

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Class Format: seminar

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Critical and Cultural Theory Electives; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EVST Culture/Humanities; SCST Related Courses

Fall 2018

SEM Section: 01    TR 8:30 am - 9:45 am    Nicolas C. Howe

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)
Crosslistings: ENVI218 / RLSP214

Secondary Crosslisting

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon
in the early 20th century to contemporary global warming? How do the realities of Latin American societies—including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism—inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Class Format: seminar

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Extra Info: may not be taken on a pass/fail basis

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Distributions: (D1) (DPE)

Distribution Notes: DPE: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"—economic, ecological, and cultural—forms Latin American responses to environmental degradation.

Spring 2019
SEM Section: 01    MWF 12:00 pm - 12:50 pm     Jennifer L. French

ENVI 219 (S)  Evolution of and on Volcanic Islands  (WI)
Crosslistings: ENVI219 / GEOS220

Secondary Crosslisting

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Class Format: tutorial

Requirements/Evaluation: evaluation based on five written papers.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Distributions: (D3) (WI)

Attributes: ENVI Natural World Electives;

Not offered current academic year

ENVI 220 (S)  Field Botany and Plant Natural History
Crosslistings: BIOL220 / ENVI220
Secondary Crosslisting

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. The "lectures," that are assigned as "homework" in this "flipped" course, focus on the evolution of the land plants, the most recent developments in plant systematics, characteristics of plant families, and cultural-economic uses of plants, especially native species. The in-class session will be organized as workshops with short quizzes and hands-on explorations of plant materials. The labs cover field identification, natural history, and ecology of local species.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on quizzes, exams, field quizzes, field notebook and a class project.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Extra Info 2: "flipped" lectures and homework

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 25

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses; PHLH Nutrition, Food Security + Environmental Health

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS220 / AMST221 / ENVI221

Secondary Crosslisting

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ASAM Related Courses; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; GBST Urbanizing World Electives; LATS Core Electives

Not offered current academic year
Explain the relationship between science and politics in the context of climate change legislation.
ENVI 225 (F) Sustainable Food & Agriculture  (WI)
Crosslistings: ENVI225 / BIOL225

Secondary Crosslisting
A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Class Format:
tutorial

Requirements/Evaluation: Evaluation will be based on writing assignments, tutorial presentation, performance in the role of paper critic, and course participation.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors.

Expected Class Size: 8

Department Notes: satisfies the distribution requirement in the Biology major, the Natural World distributional requirement of the Environmental Studies program

Distributions: (D3) (WI)

Distribution Notes: WI: Each student will write five papers that deal with questions requiring extensive reading of primary resources. Paper presentations will alternate with serving as a critic of other student papers. Students will be given the opportunity to revise and rewrite two of the five papers in the week following their tutorial presentation thereby being able to respond to the criticism and discussion of the tutorial group.

Attributes: ENVI Natural World Electives;

ENVI 228 (F) Water as a Scarce Resource  (WI)
Crosslistings: ECON228 / ENVI228

Secondary Crosslisting
For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: tutorial, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers

Requirements/Evaluation: evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and
ENVI 232 (S) The Garden in the Ancient World
Crosslistings: ENVI232 / REL235 / CLAS235 / COMP235
Secondary Crosslisting
Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written assignments, and a final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

Spring 2019
SEM Section: 01 MR 1:10 pm - 2:25 pm Nicole G. Brown

ENVI 234 (F) Economics of Developing Countries (DPE)
Crosslistings: ENVI234 / ECON204
Secondary Crosslisting
The leaders of poor countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in poor countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: lecture/discussion
Requirements/Evaluation: short essays/assignments; exam; final group project, including a 15-page paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
**Enrollment Limit:** 25  
**Enrollment Preferences:** first-year and sophomore students  
**Expected Class Size:** 25  
**Distributions:** (D2) (DPE)  
**Distribution Notes:** DPE: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

**ENVI 235 (S) Survival and Resistance: Environmental Political Theory** (WI)

**Crosslistings:** ENVI235 / PSCI235

**Secondary Crosslisting**

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

**Class Format:** seminar  
**Requirements/Evaluation:** formal and informal writing assignments and class participation  
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** first years and sophomores  
**Expected Class Size:** 12

**ENVI 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern**

**Crosslistings:** ENVI236 / ARTH236 / CLAS236

**Secondary Crosslisting**

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity
of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

**Class Format:** seminar

**Requirements/Evaluation:** attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** first year graduate students, then second year graduate students, then advanced undergraduates

**ENVI 238 (F) Sustainable Economic Growth**

**Crosslistings:** ENVI238 / ECON238

**Secondary Crosslisting**

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

**Class Format:** lecture

**Requirements/Evaluation:** midterms exams, final exam, problem sets, short writing assignments, class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ECON 110 and ECON 120

**Enrollment Limit:** 30

**Enrollment Preferences:** potential or declared social science majors

**Expected Class Size:** 20

**Distributions:** (D2)

**Attributes:** ENVI Environmental Policy; POEC Comparative POEC/Public Policy Courses

LEC Section: 01    TR 9:55 am - 11:10 am     Gregory P. Casey
What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Fall 2018

TUT Section: T1 TBA Laura J. Martin

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 25

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under CLAS or ENVI; meets Division 2 requirement if registration is under ANTH

Not offered current academic year

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources
of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Class Format: seminar
Requirements/Evaluation: three 5- to 7-page papers and several short response papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 244 (S) Environmental Ethics (WI)
Crosslistings: PHIL244 / ENVI244

Primary Crosslisting

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial
Requirements/Evaluation: one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners' essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 101 or one course in PHIL
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators
Expected Class Size: 10

ENVI 247 (S) Race and Religion in the American West
Crosslistings: ENVI247 / LATS247 / REL247 / AMST247
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

---

**ENVI 250 (S) Environmental Justice**  
(DPE)
Primary Crosslisting

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar
Requirements/Evaluation: several short essays, final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 10
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 255 (F) Environmental Observation
Crosslistings: GEOS255 / ENVI255
Secondary Crosslisting

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, LIDAR/RADAR, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, biosphere, and erosion processes. Students will carry out a research project using observation techniques covered in class to explore a part of the local environment.

Class Format: lecture
Requirements/Evaluation: Labs, one midterm exam, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit: 10
Enrollment Preferences: sophomores
Expected Class Size: 10
Distributions: (D3)

Not offered current academic year

ENVI 273 (F) Politics without Humans?
Crosslistings: SCST273 / PSCI273 / ENVI273

Secondary Crosslisting
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants; shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: lecture/seminar
Requirements/Evaluation: class participation, three 6- to 8-page papers
Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students

Fall 2018
LEC Section: 01 Cancelled

ENVI 283 (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes
Crosslistings: ENVI283 / PSCI283
Primary Crosslisting
Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Class Format: seminar
Requirements/Evaluation: participation, several smaller assignments, and a final research project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Expected Class Size: 15
Distributions: (D2)

Fall 2018
SEM Section: 01 MR 1:10 pm - 2:25 pm Pia M. Kohler

ENVI 285 (S) Writing About Science and Nature (WI)
Crosslistings: ENGL286 / ENVI285

Primary Crosslisting

Over the last few decades, the nature of nature has changed and so, necessarily, has nature writing. In this course we will read essays and articles by some of the most innovative science and nature writers working today. Students will also produce their own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Class Format: seminar

Requirements/Evaluation: short writing exercises and a long final project

Prerequisites: ENVI 101 or 102

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 15

Distributions: (D1) (WI)

Attributes: ENVI Humanities, Arts + Social Science Electives; SCST Related Courses;

Not offered current academic year

ENVI 291 (S) Religion and the American Environmental Imagination (WI)

Crosslistings: ENVI291 / REL291 / SOC291

Primary Crosslisting

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;

Not offered current academic year

ENVI 303 (S) Cultures of Climate Change (WI)

Crosslistings: ENVI303 / SOC303

Primary Crosslisting

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a “problem” in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental
ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Distributions: (D2) (WI)

Attributes: ENVI Humanities, Arts + Social Science Electives; SCST Related Courses;

Spring 2019

SEM Section: 01   TR 11:20 am - 12:35 pm   Nicolas C. Howe

ENVI 307 (F) Environmental Law

Crosslistings: ENVI307 / PSCI317

Primary Crosslisting

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Class Format: seminar

Requirements/Evaluation: based on several short writing assignments, a term research project, and active participation in class.

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Department Notes: satisfies the "Environmental Policy" requirement for the Environmental Studies concentration

Distributions: (D2)

Attributes: AMST Space and Place Electives; ENVI Environmental Policy; EVST Social Science/Policy; MAST Interdepartmental Electives; POEC U.S. Political Economy + Public Policy Course; SCST Elective Courses

Fall 2018

LEC Section: 01   M 7:00 pm - 9:40 pm   David N. Cassuto

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.
ENVI 312 (F) Communities and Ecosystems (QFR)
Crosslistings: BIOL302 / ENVI312
Secondary Crosslisting
An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.
Class Format: lecture/laboratory, six hours a week
Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper
Prerequisites: BIOL/ENVI 203 or 220
Enrollment Limit: 28
Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators
Expected Class Size: 24
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses;
Not offered current academic year

ENVI 313 (S) Chicago
Crosslistings: LATS312 / AMST312 / ENVI313
Secondary Crosslisting
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221
**ENVI 318 (F) California: Myths, Peoples, Places (WI)**

Crosslistings: ENVI318 / LATS318 / REL318 / AMST318 / COMP328

**Secondary Crosslisting**

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

**Class Format:** seminar

**Requirements/Evaluation:** this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 15

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under LATS, AMST, ENVI or REL

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; LATS Core Electives;

*Not offered current academic year*

**ENVI 322 (F) Trash**

Crosslistings: GBST322 / ANTH322 / ENVI322

**Secondary Crosslisting**

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** regular posting of critical response papers and an ethnographic final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20
**Enrollment Preferences:** seniors and juniors

**Expected Class Size:** 20

**Distributions:** (D2)

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

**ENVI 324 (S) Corals and Sea Level**

Crosslistings: GEOS324 / MAST324 / ENVI324

**Secondary Crosslisting**

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**Expected Class Size:** 10

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses

**ENVI 328 (F) Global Environmental Politics** (WI)

Crosslistings: ENVI328 / PSCI328

**Primary Crosslisting**

This seminar draws on the last five decades of international efforts to regulate the environmental commons. The process of negotiating and implementing international environmental treaties will be a core focus of the course, yet emphasis will also be placed on emerging non-state means of addressing global environmental challenges. A variety of challenges faced in global environmental policymaking (compliance, participation by civil society and industry, incorporation of science, efficiency) will be examined through the study of several international regimes, including on climate change, endangered species, biodiversity, biosafety and mercury pollution.

**Class Format:** seminar

**Requirements/Evaluation:** participation; several shorter writing assignments; and a research paper to be completed in stages over the course of the semester

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19
# Our Planet's Plastic Plight

# stopsucking, #gotopless, #foodinthenude: these rallying calls to rethink plastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study international flows of this material, notably following China’s decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

**Class Format:** seminar

**Requirements/Evaluation:** participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Environmental Studies majors, Public Health concentrators

**Expected Class Size:** 15

**Distribution Notes:** No Divisional Credit

**Attributes:** ENVI Environmental Policy

---

**ENI 339 (F) Conservation Biology (QFR)**

Crosslistings: BIOL329 / ENVI339

**Secondary Crosslisting**

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

**Class Format:** lecture and discussion three hours per week; lab three hours per week

**Requirements/Evaluation:** lab assignments, two exams, and discussion participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 203, or BIOL 202, or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** biology majors, seniors, and juniors

**Expected Class Size:** 24

**Department Notes:** satisfies the distribution requirement for the Biology major
ENVI 341 (S)  Toxicology and Cancer
Crosslistings: CHEM341 / ENVI341
Secondary Crosslisting
What is a poison and what makes it poisonous? Paracelsus commented in 1537: “What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison.” Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?
This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.
Class Format: lecture, three times per week
Requirements/Evaluation: evaluation is based on two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry
Enrollment Limit: 30
Expected Class Size: 24
Department Notes: satisfies the Natural World requirement for the Environmental studies concentration
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives; ENVI Natural World Electives; PHLH Biomedical Determinants of Health
Not offered current academic year

ENVI 346 (F)  Environmental Psychology
Crosslistings: ENVI346 / PSYC346
Secondary Crosslisting
This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.
Class Format: seminar
Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.
Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

Expected Class Size: 16

Distributions: (D2)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; PSYC Area 4 - Social Psychology

Not offered current academic year

ENVI 351 (F) Marine Policy
Crosslistings: ENVI351 / PSCI319 / MAST351

Secondary Crosslisting
This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Extra Info: offered only at Mystic Seaport

Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration

Distributions: (D2)
Attributes: ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

Fall 2018

Spring 2019
LEC Section: 01 TBA Catherine Robinson Hall

ENVI 352 (S) After Nature: Writing About Science and The Environment (WI)
Crosslistings: ENGL351 / ENVI352

Primary Crosslisting
Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Class Format: seminar

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 101 or 102 suggested

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors

Expected Class Size: 15

Distributions: (D1) (WI)

Not offered current academic year

ENVI 364 (S) Instrumental Methods of Analysis
Crosslistings: ENVI364 / CHEM364

Secondary Crosslisting
This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental
chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, laboratory work, and an independent project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives; ENVI Natural World Electives; EVST Methods Courses; MTSC Courses

---

**ENVI 368 (F) Technology and Modern Society**

Crosslistings: ENVI368 / SOC368

**Secondary Crosslisting**

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

**Class Format:** seminar

**Requirements/Evaluation:** two short papers, a midterm exam, and a final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 20

**Distributions:** (D2)

**Attributes:** ENVI Humanities, Arts + Social Science Electives; FMST Related Courses; HSCI Interdepartmental Electives; SCST Elective Courses

**Not offered current academic year**

**ENVI 376 (S) Economics of Environmental Behavior (QFR)**

Crosslistings: ENVI376 / ECON477
Secondary Crosslisting

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: seminar

Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Distributions: (D2) (QFR)

Attributes: MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

Spring 2019

SEM Section: 01    MWF 8:30 am - 9:45 am    Sarah A. Jacobson

ENVI 378 (F) Nature/Writing

Crosslistings: ENGL378 / ENVI378

Secondary Crosslisting

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion/seminar

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

Distributions: (D1)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 386 (S) Environmental and Natural Resource Policy  (QFR)

Crosslistings: ENVI386 / ECON518 / ECON386

Secondary Crosslisting

Economic activity often damages the environment significantly, especially in developing countries. Firms may clear-cut valuable forests, while consumers may drive high-pollution vehicles with little thought for the environmental consequences. Economists have proposed a variety of policy remedies, from pollution taxes to tradable permit schemes and restrictions on the quantity of pollution. This course first examines the relative merits of these policies from a theoretical perspective. When pollution damage is uncertain, is it better to use a pollution tax or a quantity restriction? Is it worse to set a pollution tax too high than to set it too low? It then proceeds to the practical issues that attend policy implementation, particularly where state capacity is limited. What is the best policy when inspectors can be threatened or bribed? When resource extraction is hard to monitor? Case studies will likely include policies aimed at deforestation, mineral ownership and extraction, particulate air pollution from industry and transportation, and carbon emissions from electricity generation. In evaluating policies we will think about both efficiency and the distribution of costs and benefits. (What if environmental regulation only benefits the wealthiest people in a country?) We will also examine the environmental consequences of policies aimed at
other problems, like poverty and low education.

**Class Format:** seminar

**Requirements/Evaluation:** problem sets, paper, brief presentation, a midterm, and a final exam

**Prerequisites:** ECON 251, familiarity with statistics

**Enrollment Limit:** 25

**Enrollment Preferences:** senior Economic majors and CDE fellows

**Expected Class Size:** 20

**Department Notes:** satisfies the Environmental Policy requirement for the Environmental studies concentration

**Distributions:** (D2) (QFR)

**Attributes:** ENVI Environmental Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

Not offered current academic year

**ENVI 387 (S) Economics of Climate Change (QFR)**

Crosslistings: ECON387 / ECON522 / ENVI387

**Secondary Crosslisting**

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

**Class Format:** lecture

**Requirements/Evaluation:** seven problem sets, midterm, group presentation, final exam

**Prerequisites:** ECON 251, familiarity with statistics

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Economic majors and CDE fellows

**Expected Class Size:** 19

**Distributions:** (D2) (QFR)

**Attributes:** ENVI Environmental Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

Not offered current academic year

**ENVI 397 (F) Independent Study of Environmental Problems**

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

**Class Format:** independent study

**Prerequisites:** approval by the Chair of Environmental Studies

Fall 2018

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Crosslistings: ENVI404 / MAST404 / GEOS404

Secondary Crosslisting

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: GEOS 104 or permission of instructor

Enrollment Limit: none

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Crosslistings: ENVI405 / GEOS405

Secondary Crosslisting

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these
interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Expected Class Size: 10
Distributions: (D3)
Attributes: ENVI Natural World Electives

Not offered current academic year

ENVI 411 (F) Environmental planning workshop: community-based environmental problem solving

Crosslistings: ENVI411 / AMST302

Primary Crosslisting

This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the greater Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply the concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab
Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only
Enrollment Limit: 16
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 16
Department Notes: required course for Environmental Studies major and concentration
Distribution Notes: does not meet Division 1, 2, or 3 requirements
Attributes: AMST Space and Place Electives; ENVI Core Courses; EXPE Experiential Education Courses; SCST Related Courses

Fall 2018

SEM Section: 01    TR 11:20 am - 12:35 pm     Sarah  Gardner
LAB Section: 02    T 1:00 pm - 4:00 pm     Sarah  Gardner
ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies (WI)

Crosslistings: ENVI412 / MAST402

Primary Crosslisting

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: limited to senior Environmental Studies majors and concentrators and Maritime Studies concentrators

Expected Class Size: 20

Department Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: (WI)

Distribution Notes: does not meet Division 1, 2, or 3 requirements

Each student in this course will complete a semester-long research project resulting in a final report of 20-25 pages. The project will proceed in phases, with significant pieces of writing due at regular intervals throughout the semester, and with multiple opportunities for revision and peer review. There will also be several short reading response papers during the first half of the semester.

Attributes: EVST Senior Practicum; SCST Elective Courses;

Spring 2019

SEM Section: 01 W 1:10 pm - 3:50 pm Nicolas C. Howe

ENVI 419 (F) Going to Ground: Considering Earth in the Arts of Africa (WI)

Crosslistings: ENVI419 / AFR419 / ARTH419

Secondary Crosslisting

Drawing its inspiration from the landmark exhibition Earth Matters: Land as Material and Metaphor in the Arts of Africa (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base.

Class Format: seminar

Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some coursework in ARTH and/or AFR would be useful

Enrollment Limit: 19

Enrollment Preferences: seniors and majors

Expected Class Size: 19

Distributions: (D1) (WI)
ENVI 420 (S) Architecture and Sustainability in a Global World (WI)
Crosslistings: ARTH420 / ENVI420 / EXPR420 / GBST420

Secondary Crosslisting
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component
Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed
Enrollment Limit: 6
Enrollment Preferences: Art History majors, Environmental Studies majors
Expected Class Size: 6
Materials/Lab Fee: Travel funds will be provided by a Class of 1963 Sustainability Development Grant
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI or EXPR; meets Division 2 requirement if registration is under GBST

Spring 2019
SEM Section: 01  M 1:10 pm - 3:50 pm  Michelle M. Apotsos

ENVI 421 (F) Latinx Ecologies
Crosslistings: LATS420 / ENVI421

Secondary Crosslisting
An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes' Their Dogs Came With Them and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Class Format: seminar
Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and
ENVI 422 (F)  Ecology of Sustainable Agriculture
A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: seminar; two 75 minute sessions per week
Requirements/Evaluation: evaluation will be based on writing assignments, seminar presentation, and course participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors
Expected Class Size: 12
Department Notes: Satisfies the distribution requirement in Biology; the ENVS biology track; the Natural World distributional requirement of the Environmental Studies program
Distributions: (D3)
Attributes: ENVI Natural World Electives; PHLH Nutrition, Food Security+Environmental Health

Fall 2018
SEM Section: 01 Cancelled

ENVI 423 (S)  Global Change Ecology (WI)
Crosslistings: ENVI423 / BIOL413

Secondary Crosslisting

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioral mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: seminar
Requirements/Evaluation: class participation and several short papers
ENVI 445 (F) World's End: Literary Ecologies of the Limit
Crosslistings: ENGL445 / ENVI445

Secondary Crosslisting

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It; Marvell, "Upon Appleton House"; Ovid, Metamorphosis; Browne, Urn Burial; Titian, Wordsworth, McCarthy, The Road; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.

Class Format: seminar; combination discussion seminar and tutorial conferences
Requirements/Evaluation: one 5-page paper and one final 15-page paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors; Comparative Studies majors
Expected Class Size: 12
Distributions: (D1)
Attributes: ENGL Criticism Courses; ENGL Literary Histories A; PHIL Related Courses

Fall 2018

ENVI 478 (F) Cold War Landscapes
Crosslistings: ENVI478 / AMST478 / HIST478

Secondary Crosslisting

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research
papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Space and Place Electives; HIST Group C Electives - Europe and Russia; HIST Group F Electives - U.S. + Canada

Not offered current academic year

ENVI 491 (S) The Suburbs (Wi)

Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Distributions: (D2) (Wi)

Attributes: AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada;

Kenneth Savitsky, Professor of Psychology
David C. Smith, Senior Lecturer in Biology
David L. Smith, Professor of English
John W. Thoman, Jr., Professor of Chemistry
Chad M. Topaz, Professor of Mathematics
Claire Ting, Professor of Biology
Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The three curricular options in Environmental Studies—the major in Environmental Studies and the concentrations in Environmental and Maritime Studies—are designed to help majors and concentrators to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
• Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

The requirements for the environmental studies major and concentration have been revised. The requirements for students from the class of 2020 and subsequent classes are immediately below, followed by the requirements for the students from the class of 2019.

Overview of the Major and Concentrations for Classes of 2020 and Subsequent Classes

The Environmental Studies major is an eleven course major. The major has a “core” of seven courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 411, and the ENVI senior seminar, ENVI 412. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving (offered every fall), and ENVI 412, Environmental Studies Senior Seminar (offered every spring). The remaining component of the “core” is comprised of three foundational 200-level courses, one from each of three lists of courses (see below), with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven course foundation, each ENVI major devises an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement under special circumstances.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a seven course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 411 and ENVI 412. Students pursuing the concentration will take one elective each from each of three lists of courses, each list (see below) representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and ENVI 412, Environmental Studies Senior Seminar. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies
Submitting your Proposed “Course Cluster” and “Plan of Study” to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring Pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The proposals will be reviewed by the CES Advisory Board.

Credit for AP, IB, A-levels and other pre-Williams courses

At this time, students are not allowed to place out of ENVI 101 or ENVI 102. Students who feel that they have a compelling case for placing out of ENVI 101 or 102 must submit a petition to the Chair or Associate Director of Environmental Studies. The petition should include the syllabus, course materials, assignments, etc. for the course(s) that the student wishes to substitute for ENVI 101 or 102.

Substituting laboratory science courses taken at Williams for ENVI 102

Students who have taken two or more laboratory science courses at Williams in BIOL, CHEM, or GEOS may in exceptional circumstances be excused from the requirement to take ENVI 102. Requests should be submitted to the Chair or Associate Director of Environmental Studies prior to the spring of the junior year.

Planning for prerequisites on your path through the Environmental Studies major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOL 203 (Ecology) or ENVI/BIOL 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Director or Associate Director.

Study Away

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Furthermore, the Williams-Mystic Program is the foundation of the Maritime Studies concentration. Students considering either a semester or year away who intend to major or concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major or concentration, but must have advance approval in writing from the Chair of Environmental Studies.

Advising

 Majors and concentrators (or first years and sophomores interested in the major or concentrations offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming majors and concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2018-19: Ralph Bradburd, Henry Art, Sarah Gardner, Nicolas Howe, Pia Kohler, Laura Martin, Mea Cook, Luana Maroja, James Manigault-Bryant.

Overview of the Major and Concentrations for the Classes of 2019

The Environmental Studies major is an eleven course major. The major has a “core” of six courses, with varying amounts of choice for the various “core” course requirements. All majors are required to take two of the courses, ENVI 101 and ENVI 102. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the senior year (or junior year under special circumstances), one 400-level Environmental Studies capstone research practicum that involves either collaborative research on a specific environmental problem or client-driven team project on issues of environmental significance in the Berkshire region. Two such courses will be offered in the 2018-19 academic year: ENVI 411, Environmental Planning Workshop: Community-Based Environmental Problem Solving, and ENVI 412, Environmental Studies Senior Seminar. The remaining component of the “core” is comprised of three 200-level courses, one from each of three lists of courses, with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.
Building on this six-course foundation, each ENVI major devises an individualized five-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, environmental chemistry, sustainable food and agriculture, sustainable cities, environmental ethics, etc. Students are responsible for designing their own specialization cluster in consultation with a faculty advisor and the CES Advisory Board in the spring semester of their sophomore year. One of these five electives in the cluster must be among those listed by the Program as a research methods course.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a "living systems" course (this may be within their specialization cluster or as one of their 200-level foundational courses).

The Environmental Studies concentration is a six course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, and one of the 400-level ENVI capstone practicum courses, students pursuing the concentration will take one elective each from each of three lists of courses, each list representing a broad category of inquiry: the natural world; humanities, arts, and social sciences; and environmental policy.

The Maritime Studies concentration is a seven course concentration that builds on course work completed during the Williams-Mystic Maritime Studies Program. In addition to four intermediate-level core courses completed at Williams-Mystic, students pursuing the Maritime Studies concentration will also take the interdisciplinary introductory course GEOS 104 (Oceanography), an elective, and one of the 400-level ENVI capstone practicum courses. Students may attend the Williams-Mystic Program in their sophomore, junior or senior year. Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Maritime Studies concentration.

HONORS IN ENVIRONMENTAL STUDIES (MAJOR OR CONCENTRATION)

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus winter study project, or a full-year project (two semesters plus winter study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Environmental Studies concentrators may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be approved by the department chair and the Chair of Environmental Studies by the end of the junior year. Students will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

WINTER STUDY AND INDEPENDENT STUDY

In addition to courses fulfilling the environmental studies major and concentration requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- MAST 397, 398 Independent Study: Maritime Studies
Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major, distributed according to the requirements detailed below. Because the ENVI curriculum was restructured, students in the class of 2019 have different requirements than those for the class of 2020 and subsequent classes. The requirements for the class of 2020 follow immediately below. Those for the class of 2019 are provided below those for the class of 2020.

For students in the class of 2020 and subsequent classes:

Introductory required courses (2 courses):
ENVI 101 Nature and Society: An Introduction to Environmental Studies
ENVI 102 Introduction to Environmental Science

200-level foundational courses required for all ENVI majors (3 courses, 1 from each category):

Culture/Humanities
ENVI 217 Landscape, Place, and Power (formerly Environmental Humanities: Theory and Practice)
or ENVI 244 Environmental Ethics
or ENVI 250 Environmental Justice
or ENVI 259 New England Environmental History

Social Science/Policy
ENVI/ECON 213 Introduction to Environmental and Natural Resource Economics (ECON 110 prerequisite)
or ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions
or ENVI/PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
or ENVI 307/PSCI 317 Environmental Law

Environmental Science (with lab)
ENVI 203 Ecology
or ENVI 205 Geomorphology
or ENVI 215 Climate Changes

Specialization (4-course) Cluster (including a “methods course” and in some cases one “living systems” course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental economics, environmental justice, environmental literature, environmental chemistry, environmental biology, environmental geosciences, environmental planning and design, urban environmental studies, water and energy, sustainable food and agriculture, environmental justice.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Board, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the
200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

**One “methods course” requirement:**

- ENVI 214/GEOS 214 Geographic Information Systems
- or STAT 201 Statistics and Data Analysis
- or STAT 202 Introduction to Statistical Modeling
- or ANSO 205 Ways of Knowing
- or POEC 253 Empirical Methods in Political Economy
- or ECON 255 Econometrics
- or STAT 346 Regression and Forecasting
- or CHEM 364/ENVI 364 Instrumental Methods of Analysis
- or MATH 410/BIOL 214 Mathematical Ecology

This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

**One “living systems course” requirement:**

- BIOL 203/ENVI 203 Ecology
- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- BIOL 220/ENVI 220 Field Botany and Plant Natural History
- BIOL 231/MAST 311 Marine Ecology
- GEOS 210/MAST 211 Oceanic Processes
- BIOL 302/ENVI 312 Communities and Ecosystems

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

**Senior Seminar Requirement:**

In the senior year—or, under special circumstances during the junior year—students will take two 400-level seminars, ENVI 411 and ENVI 412, that together serve as a capstone experience for the major and concentrations. These courses are interdisciplinary, issue-based and project-driven. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshires involving urban and rural land use planning and sustainable design. Offered in the spring semester, the Senior Research Seminar engages students in research on a policy-related environmental problem.

**Required Courses (2 courses)**

- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar

**CONCENTRATION IN ENVIRONMENTAL STUDIES**

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The concentration in Environmental Studies consists of seven courses: four core courses and one elective course from each of the three categories below: The Natural World; Humanities, Arts and Social Sciences; and Environmental Policy.

**Required Courses (4 courses)**
ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving

ENVI 412 Practicum: Senior Research Seminar

**Distribution Courses (3 courses, 1 from each group)**

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major. (It is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

**The Natural World**

- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- BIOL 203/ENVI 203 Ecology
- BIOL 220/ENVI 220 Field Botany and Plant Natural History
- BIOL 302/ENVI 312 Communities and Ecosystems
- BIOL 422/ENVI 422 Ecology of Sustainable Agriculture
- BIOL 424/ENVI 424 Conservation Biology
- CHEM 341/ENVI 341 Toxicology and Cancer
- CHEM 364/ENVI 364 Instrumental Methods of Analysis
- ENVI 240T Conservation and Climate Change
- GEOS 101/ENVI 105 The Co-Evolution of Earth and Life
- GEOS 102 An Unfinished Planet
- GEOS 103/ENVI 103 Global Warming and the Reshaping of Landscapes
- GEOS 104/ENVI 104/MAST 104 Oceanography
- GEOS 201/ENVI 205 Geomorphology
- GEOS 205/ENVI 207 Earth Resources
- GEOS 206/ENVI 206 Renewable Energy and the Sustainable Campus
- GEOS 214/ENVI 214 Remote Sensing and Geographic Information Systems
- GEOS 215/ENVI 215 Climate Changes
- GEOS 226/ENVI 226/MAST 226 The Oceans and Climate
- GEOS 254/ENVI 254 Gulf of California Tectonics and Coastal Ecosystems
- GEOS 314/MAST 314/ENVI 314 Sediment Records of Climate Change
- GEOS 324/ENVI 324 Corals and Sea Level
- GEOS 405/ENVI 405 Geochemistry: Understanding Earth’s Environment
- MAST 211/GEOS 210 Oceanographic Processes
- MAST 311/BIOL 231 Marine Ecology
- MATH 410/BIOL 214 Mathematical Ecology
- PHYS 108/ENVI 108 Energy Science and Technology

**Humanities, Arts, and Social Sciences**
Environmental Policy

ANTH 210/ENVI 210/JLST 210 Governing Nature
ANTH 332/ENVI 332/JLST 332/GBST 332 Environmental Justice
ECON 213/ENVI 213 Introduction to Environmental and Natural Resources Economics
ECON 228/ENVI 228 Water as a Scarce Resource
ECON 238/ENVI 238 Sustainable Economic Growth
ECON 386/ENVI 386/ECON 518 Environmental Policy and Natural Resource Management
ECON 387/ECON 522/ENVI 387 Economics of Climate Change
ECON 388/ECON 517/ENVI 388 Urbanization and Development
ECON 465 Pollution and the Labor Market
ENGL 331 Romantic Culture
ENVI 244T Environmental Ethics
ENVI 248T "Our Response Will Define Our Future": Climate Change Policy Analysis
ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions
ENVI 283/PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
ENVI 307/PSCI 317 Environmental Law
ENVI 308 Science and Politics in Environmental Decision Making
ENVI 309/HSCI 309/SCST 309/PSCI 301 Environmental Politics and Policy
ENVI 328/PSCI 328 Global Environmental Politics
ENVI 329 Our Planet's Plastic Plight
MAST 351/ENVI 351/PSCI 319 Marine Policy
PSCI 229 Global Political Economy
PSCI 273/ENVI 273 Politics without Humans?
PSCI 347 Law of the Sea

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Note: Students who take MAST 211/OCEA 210 (Oceanographic Processes) at Williams-Mystic can substitute an extra elective in lieu of GEOS 104
Capstone Course

One Practicum course:

ENVI/MAST 412 Practicum: Environmental Science and Policy

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea
MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes
MAST/ENVI 351/ PSCI 319 Marine Policy
MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

Maritime History

HIST 127 The Expansion of Europe
HIST/AFR 248 The Caribbean: From Slavery to Independence
HIST/JAPN/ASST 321 History of U.S.-Japan Relations
HIST/ASST/INST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Maritime Literature

CLAS 101/COMP 107 The Trojan War

Marine Policy

ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
ECON/ENVI 386/ ECON 518 Environmental and Natural Resource Policy
ENVI 307/PSCI 317 Environmental Law
PSCI 223 International Law
PSCI 229 Global Political Economy
PSCI 347 Law of the Sea
ENVI/PSCI 328 Global Environmental Politics

Marine Science

BIOL 414 Life at Extremes: Molecular Mechanisms
GEOS 212 / BIOL 211 Paleobiology
GEOS/ENVI 215 Climate Changes
GEOS/ENVI/MAST 226 The Oceans and Climate
GEOS 302 Sedimentology
GEOS/ENVI/MAST 314 Sediment Records of Climate Change

MAST 25 (W)  Material Culture and Craft of 19th Century Coastal New England
Primary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvasworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01 Cancelled

MAST 31 (W) Sen Thesis: Maritime Studies

Maritime Studies senior thesis.

Class Format: independent study

Winter 2019

HON Section: 01

MAST 99 (W) Independent Study: Maritime Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019

IND Section: 01

MAST 104 (S) Oceanography

Crosslistings: MAST104 / ENVI104 / GEOS104

Secondary Crosslisting

The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.
Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

Not offered current academic year

MAST 211 (F) Oceanographic Processes

Crosslistings: GEOS210 / MAST211

Primary Crosslisting

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

Fall 2018
LEC Section: 01    TBA     Lisa A. Gilbert

Spring 2019
LEC Section: 01    TBA     Lisa A. Gilbert

MAST 231 (F) Literature of the Sea (WI)

Crosslistings: MAST231 / ENGL231

Primary Crosslisting

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Extra Info: offered only at Mystic Seaport

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Distributions: (D1) (WI)

Attributes: AMST Arts in Context Electives; ENVI Humanities, Arts + Social Science Electives;
MAST 311 (F)  Marine Ecology
Crosslistings: BIOL231 / MAST311

*Primary Crosslisting*
Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

MAST 324 (S)  Corals and Sea Level
Crosslistings: GEOS324 / MAST324 / ENVI324

*Secondary Crosslisting*
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**Expected Class Size:** 10

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses
MAST 351 (F) Marine Policy

Crosslistings: ENVI351 / PSCI319 / MAST351

Primary Crosslisting

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Extra Info: offered only at Mystic Seaport

Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration

Distributions: (D2)

Attributes: ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

Fall 2018
LEC Section: 01 TBA Catherine Robinson Hall

Spring 2019
LEC Section: 01 TBA Catherine Robinson Hall

MAST 352 (F) Americans and the Maritime Environment (WI)

Crosslistings: HIST352 / MAST352

Primary Crosslisting

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern;

MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies  (WI)

Crosslistings: ENVI412 / MAST402

Secondary Crosslisting

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: limited to senior Environmental Studies majors and concentrators and Maritime Studies concentrators

Expected Class Size: 20

Department Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: (WI)

Distribution Notes: does not meet Division 1, 2, or 3 requirements Each student in this course will complete a semester-long research project resulting in a final report of 20-25 pages. The project will proceed in phases, with significant pieces of writing due at regular intervals throughout the semester, and with multiple opportunities for revision and peer review. There will also be several short reading response papers during the first half of the semester.

MAST 404 (S) Coastal Processes and Geomorphology  (QFR)

Crosslistings: ENVI404 / MAST404 / GEOS404

Secondary Crosslisting

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks
and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week  
**Requirements/Evaluation:** lab reports, tests, and an independent research project  
**Prerequisites:** GEOS 104 or permission of instructor  
**Enrollment Limit:** none  
**Expected Class Size:** 10

**MAST 494 (S) Senior Thesis: Maritime Studies**  
Maritime Studies senior thesis.  
**Class Format:** independent study  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  

Spring 2019  
HON Section: 01 TBA  Henry W. Art
Experiential education, involving "learning by doing" outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action website.

EXPE Experiential Education Courses

AFR 212 (S)  Jazz Theory and Improvisation I
Crosslistings: AFR212 / MUS104

Secondary Crosslisting

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: evaluation will be based on weekly assignments, a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Extra Info: may not be taken on a pass/fail basis

Extra Info 2: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: EXPE Experiential Education Courses

Not offered current academic year

AFR 214 (S)  Jazz Theory and Improvisation II
Crosslistings: MUS204 / AFR214

Secondary Crosslisting

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and
hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions

Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project

Prerequisites: MUS 104b or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 5-8

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: EXPE Experiential Education Courses

Not offered current academic year

AFR 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Primary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel

Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

Materials/Lab Fee: cost to student: $3362

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

AMST 10 (W) New(ish) and Rare: Special Collections in the 20th century

What makes relatively recent books and manuscripts worth preserving? Whose voices are missing from the library's collections? Students in this course will explore the market for 20th-century rare books and manuscripts and recommend items for Special Collections to purchase. We will spend our first two weeks exploring the library's existing collections of 20th-century Americana, focusing on what makes these books and manuscripts valuable--not just in terms of their cost but their usefulness in supporting teaching and student research. We'll explore the market for antiquarian books, and we'll consider how social movements and historical events including second-wave feminism, workers' strikes, and the civil rights era are
documented in primary sources. Outside of class, students will spend additional hands-on time with rare materials in the Special Collections reading room. Students will also search printed and online catalogs from booksellers who specialize in 20th-century material to look for potential additions to our collections. Given a theoretical budget of $1000, each student will assemble a proposal to acquire a new collection of books and manuscripts for the Chapin Library or the College Archives. We’ll spend the final week of class presenting these proposals to the Chapin Librarian, who will approve a selection of items to purchase for our collections. Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography.

Class Format: afternoons

Requirements/Evaluation: final collection development proposal/report justifying rationale for acquisition of rare books and manuscripts

Prerequisites: none

Enrollment Limit: 12

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 Cancelled

AMST 101 (F) America: the Nation and Its Discontents (DPE) (WI)
America has always named something more than a geographical place; being “American” has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Class Format: seminar

Requirements/Evaluation: total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: NOTE: Prof. Nelson’s section Spring 2019 only is NOT Writing Intensive. DPE: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities. WI: This course satisfies the WI requirement in its close attention to the processes of writing, argumentation, and revision; and in the total number of pages of writing produced.

AMST 11 (W) North Adams, Massachusetts: Past, Present, and Future

Crosslistings: AMST11 / HIST10
Secondary Crosslisting

This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students' engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

Class Format: afternoons
Requirements/Evaluation: 2- to 3-page paper; final project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first-year students preferred
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 Cancelled

AMST 113 (F) The Feminist Poetry Movement (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113

Secondary Crosslisting

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery
Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 15
Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS

DPE: This course examines difference, power, and equity during Feminism's Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture.
course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 14 (W) The Davis Center Histories

This course will explore the history of the Williams College Davis Center (DC), formerly the Multicultural Center. In exploring this history, the course readings and discussions will contextualize the local specificities of the Center's establishment within broader U.S. academic, political, and cultural discourses on student-led protest, the evolution of multiculturalism, the centrality of Black resistance, and the import of cultural specificity in creating an equitable and just world. The course will thus rely on resources in the College archives, and students will be encouraged to hone their research skills, but will also rely on communal construction of a theoretical framework to analyze the archived history of the Center while attending to the DC’s current mission to facilitate conversations about race, gender identity, sexual orientation, class, religion, and ability. Readings will include work by Kimberlé Crenshaw, Patricia Hill Collins, Roderick Ferguson, Houston Baker, E. Patrick Johnson, Jeff Chang, Sami Schalk, and more. Students will be encouraged to engage in critical and constructive discussion about the historical place and work of the Davis Center, and contribute to that work with assignments that include weekly personal reflections and program proposals to enhance the curriculum and programmatic itinerary of the Center.

Class Format: mornings
Requirements/Evaluation: 2 program proposals, weekly reflections, and class participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference given to first-year students
Attributes: EXPE Experiential Education Courses

AMST 15 (W) Contemporary American Songwriting

Crosslistings: MUS15 / AMST15
Secondary Crosslisting

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

Class Format: mornings
Requirements/Evaluation: final performance and a 2- to 3-page paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: students with a musical background and the ability to play and instrument may be given preference, but anyone interested is encouraged to register
AMST 221 (F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS220 / AMST221 / ENVI221

Secondary Crosslisting
Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators
Expected Class Size: 20
Distributions: (D2)
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ASAM Related Courses; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; GBST Urbanizing World Electives; LATS Core Electives

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting
Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian’s role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether “objective representation” is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar
Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 12
**AMST 241 (F) Performing Masculinity in Global Popular Culture**

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

**Class Format:** seminar

**Requirements/Evaluation:** masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** in the event of over-enrollment, a short statement of interest will be solicited

**Expected Class Size:** 20

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

**Attributes:** EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

Not offered current academic year

**AMST 252 (S) Puerto Rico and its Diaspora**

Crosslistings: AMST252 / LATS252

Secondary Crosslisting

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed
solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

**Class Format:** seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

**Requirements/Evaluation:** class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** students should have some fluency with the Spanish language

**Enrollment Limit:** 8

**Enrollment Preferences:** should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

**Expected Class Size:** 8

**Distributions:** (D2)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; EXPE Experiential Education Courses; LATS Core Electives

**AMST 259 (S) New England Environmental History (WI)**

Crosslistings: AMST259 / ENVI259 / HIST259

**Secondary Crosslisting**

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

**Class Format:** seminar

**Requirements/Evaluation:** several short essays, final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies concentrators

**AMST 302 (F) Environmental planning workshop: community-based environmental problem solving**
Crosslistings: ENVI411 / AMST302

Secondary Crosslisting

This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the greater Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply the concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab

Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Department Notes: required course for Environmental Studies major and concentration

Distribution Notes: does not meet Division 1, 2, or 3 requirements

Attributes: AMST Space and Place Electives; ENVI Core Courses; EXPE Experiential Education Courses; SCST Related Courses

AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Secondary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

AMST 361 (F) Zen and the Art of American Literature

Crosslistings: ENGL312 / REL361 / AMST361 / COMP361

Secondary Crosslisting

In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by a young writer named Henry David Thoreau. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend 20-30 minutes each week practicing and reflecting upon those practices during class hours. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: seminar

Requirements/Evaluation: a weekly meditation journal, various informal in-class and take-home writing assignments, a final 12- to 15-page essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 30

Enrollment Preferences: if the course is over-enrolled, students will be asked to send the instructor an email explaining their reasons for wanting to take this course; these expressions of interest will be used to determine the final course roster; no first year students

Expected Class Size: 30

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under REL or AMST

Attributes: ENGL Literary Histories C; EXPE Experiential Education Courses

ANSO 205 (S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation? What is the relationship between empirical data and the generation of social theory? How does the social organization of social research affect one’s inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers’ personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case
studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods, in which the students will design and undertake their own pilot field projects.

Class Format: seminar

Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D2)

Attributes: EVST Methods Courses; EXPE Experiential Education Courses; SCST Related Courses

Spring 2019

SEM Section: 01    W 1:10 pm - 3:50 pm     Kim Gutschow

ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Class Format: seminar

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Distributions: (D2)

Attributes: EXPE Experiential Education Courses

Spring 2019

SEM Section: 01    TF 2:35 pm - 3:50 pm     Antonia E. Foias

ANTH 15 (W) Photographic Literacy and Practice

Crosslistings: ANTH15 / SOC15

Secondary Crosslisting

When you look at a photograph, what is it really saying? How can you make photograph that says what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week--Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

Requirements/Evaluation: final project; formal public exhibit

Prerequisites: none, but students must own or borrow a digital camera (a DSLR with a 35mm lens is ideal, but compact cameras will also work)

Enrollment Limit: 12

Enrollment Preferences: students can email me
ANTH 230 Musical Ethnography

Often, we experience music's impact on us without fully considering why it achieves such strong effects. The discipline of ethnomusicology confronts the question of musical meaning by combining musical study and analysis with an exploration into the contexts of musical production, circulation, and reception. Musical ethnography is both the means by which scholars pursue this line of questioning, and also the (usually) written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a music-making community within Williamstown and the surrounding area. Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: some musical training/experience necessary, see instructor for more information

Enrollment Limit: 10

Enrollment Preferences: students with some musical experience

Expected Class Size: 6

Department Notes: MUS World Music/Ethnomusicology

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under ANTH

Attributes: EXPE Experiential Education Courses

Not offered current academic year

ANTH 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE) (WI)

Crosslistings: SCST370 / ANTH371 / WGSS371

Primary Crosslisting

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies
concentrators

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering. WI: This class includes; weekly writing exercises and monthly 'writing chats' with instructor.

ARTH 11 (W) Editorial Cartooning and the Art of Propaganda

Crosslistings: ARTH11 / PSCI11

Primary Crosslisting
This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

Class Format: afternoons

Requirements/Evaluation: editorial cartoons to be produced for each class meeting for evaluation by the class; final cartoons to be published in The Williams Record

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to non-art majors

Materials/Lab Fee: $50

Attributes: EXPE Experiential Education Courses

Winter 2019

ARTH 17 (W) Architectural Models

Architectural history is generally taught by photographs, which compress three-dimensional things into two-dimensional projections. But describing the dynamic nature of architectural space with a flat image is like describing an ice cream flavor with a flow chart. In this course groups of four or five students will receive measured drawings of major American buildings and construct models at quarter-inch scale. Possible subjects include works by
Venturi, Wright, Eisenman, and Jefferson. No previous architectural experience is necessary. After the initial two sessions, there will be two three-hour studio sessions each week where the instructor will critique the projects. At a final meeting, a jury will review the models.

**Class Format:** mornings

**Requirements/Evaluation:** final project

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Art majors will have preference

**Materials/Lab Fee:** $25

**ARTH 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making**

Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

**Secondary Crosslisting**

The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums—from art museums to scientific, historical, and specialty collections—and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

**Requirements/Evaluation:** final formal public exhibit

**Prerequisites:** keen interest in museums and culture

**Enrollment Limit:** 12

**Enrollment Preferences:** random selection

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

**ARTH 237 (S) Making Things Visible: Adventures in Documentary Work**

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

**Secondary Crosslisting**

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic...
technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Department Notes: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Distributions: (D1)

ARTH 274 (S) Chinese Calligraphy: Theory and Practice

Crosslistings: ASST274 / ARTH274 / ARTS274

Primary Crosslisting

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

Class Format: lecture/studio instruction

Requirements/Evaluation: weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

Prerequisites: none

Enrollment Limit: 12

Department Notes: this course can count toward the Art History or Studio major

Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Spring 2019

LEC Section: 01 Cancelled

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give
them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

ARTS 12 (W) Portrait Painting: from Fayum mummies to the Obamas

This course will be a hybrid of studio practice and a visual survey of the painted portrait, tracing various approaches to portraiture and mark-making, from the Fayum mummies to the recently unveiled portraits of Barack and Michelle Obama, in order to inform the ways by which we will, throughout the course, paint portraits (of oneself or another). The course will culminate in a final exhibition of each participant's painting, which will be worked on throughout the duration of the winter study, in- and outside of class. We will begin the course by looking to a range approaches to portraiture and engaging in various drawing and painting exercises, before spending the bulk of the remaining time working towards a single, polished painting, in oil or acrylic on canvas or panel. We will analyze many of the touchstone examples of portraiture over the centuries to survey a range of styles and how their respective techniques and painted marks reflected the zeitgeist, or collective psychology of a time and place, in order to inform our own painted works. The course will meet three times per week to engage in dedicated studio work, and group analysis of historic examples of painted portraits. Outside of class, students will be expected to continue their studio work, as well as additional drawing or painting exercises, readings, and possible film screening(s). The final project, a single portrait painting, will be displayed in a group exhibition in the Spencer Art Building at the culmination of the Winter Study period, at which time each artist will present their finished work. No experience necessary, but some background in painting and drawing is a plus. Adjunct Instructor Bio: William Binnie (born Dallas, TX, 1985) is a visual artist living and working in Williamstown, MA and Brooklyn, NY. His work has been exhibited nationally and internationally and is held in a number of public and private collections across the United States, Europe, and Asia. Binnie's work is currently on view at MassMoCA's "The Lure of the Dark: Contemporary Painters Conjure the Night," through 2019. For more information and images of work, please visit: www.william-binnie.com.

Class Format: afternoons

Requirements/Evaluation: final formal public exhibit; completion of one (or more) portrait painting(s), to be worked on over the duration of the course

Prerequisites: no experience necessary, but some background in painting and drawing is a plus

Enrollment Limit: 15

Enrollment Preferences: preference will be given to studio and art history students, and will be given to seniors thereafter

Materials/Lab Fee: $125

Attributes: EXPE Experiential Education Courses
In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom.

By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

**Class Format:** mornings  
**Requirements/Evaluation:** 2- to 3-page paper; formal public exhibit

**ARTS 14 (W) Results May Vary**

An exploration of cross-disciplinary sampling: digital and visual art, sculpture, sound, music, moving image, text, theater. Paul de Jong presents the vast media archive the *Mall of Found* as a point of departure for discussion and as the resource for creative exploration, touching upon issues specific to the inception, production and presentation of art using sampled sources. De Jong will address topics related to the creative process and issues specific to the field of sampling: integrity in appropriation, conflict in collaboration, developing method and technique, making your own rules and having changes of heart, documenting and archiving, commercial considerations, presentation and audience subjectivity. Participants will receive a detailed introduction to the archive and its makeup. Throughout, access will be given to the digital collection. The physical archive (housed in North Adams, MA) will be accessible by appointment and through weekly group excursions. After determination of individual and collective goals, emphasis shall be given to a hands-on creative approach, outside-of-class. In-class time will be set aside for weekly individual presentations and critiques, as well as daily group meetings for topical discussions. The course may result in individual or group works presented in a gallery show, as a theatrical/musical performance, a movie showing, a web production, printed matter, publications, or readings. Paul de Jong's *Mall of Found* is home to a wealth of assorted fringe media and ephemera. This includes some 5,000+ VHS, 1,500 LP's, 5,000 cassette tapes, as well as photography, printed matter and film, numbering over 100,000. The subject matter is sprawling, favoring independent and amateur production and analog forms. Categories include: teleevangelism, self-help, hunting, meditation, technical, instructional, medical and much more. Paul de Jong (formerly of the Books) recently released his second solo album *You Fucken Sucker*.

**Requirements/Evaluation:** final formal public exhibit  
**Prerequisites:** active engagement in the creation of art, photography, film and video, poetry and prose, dance, theater and music

**ARTS 15 (W) Shadow Puppetry**

Crosslistings: ARTS15 / THEA15
The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, "It is in the very limitations of shadows that we learn... It is in the gap between the object and its representation that the image emerges, the gap we fill in." In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

ARTS 16 (W)  Glass and Glassblowing
Crosslistings: ARTS16 / CHEM16

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Class Format: 9:00 a.m. to noon, M-F
Requirements/Evaluation: evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class
Prerequisites: none

ARTS 19 (W)  21st Century Museums--From the Inner Workings to the Future Vision of Culture Making
Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Primary Crosslisting
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums—from art museums to scientific, historical, and specialty collections—and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

Requirements/Evaluation: final formal public exhibit
Prerequisites: keen interest in museums and culture
Enrollment Limit: 12
Enrollment Preferences: random selection
Materials/Lab Fee: none

ARTS 20 (W) Performing Self-Portraiture in the Age of Instagram
Crosslistings: THEA20 / WGSS20 / ARTS20
Secondary Crosslisting

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacobly Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

Class Format: afternoons
Requirements/Evaluation: final performance
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: if overenrolled, students will be selected by submitting a brief statement of interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

ARTS 274 (S) Chinese Calligraphy: Theory and Practice
Crosslistings: ASST274 / ARTH274 / ARTS274
Secondary Crosslisting

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the
literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos “beauty” + graphe “writing”). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

**Class Format:** lecture/studio instruction

**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

**Prerequisites:** none

**Enrollment Limit:** 12

**Department Notes:** this course can count toward the Art History or Studio major

**Materials/Lab Fee:** lab fee TBD will be added to the student’s term bill

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST

**Attributes:** ARTH pre-1600 Courses; EXPE Experiential Education Courses; GBST East Asian Studies Electives

Spring 2019

LEC Section: 01    Cancelled

**ARTS 385 (S) The Sculptural Costume and It's Performance Potential**

**Crosslistings:** THEA385 / ARTS385

**Primary Crosslisting**

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Hello Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Art and Theater majors

**Expected Class Size:** 12

**Materials/Lab Fee:** $125

BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES

BioEYES brings tropical fish to 3rd grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish in the classroom, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week students will learn to set up fish matings, and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks students will present lessons at the schools and review assessment data. Adjunct Instructor Bio:Jennifer Swoap, an elementary school teacher, currently coordinates Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. Adjunct Co-Instructor Bio:Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

Class Format: meeting time varies depending on needs of schools and laboratory requirements

Requirements/Evaluation: final project; review of pre and post survey assessments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: preference to seniors

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

BIOL 12 (W) New Orleans-Style Jazz and Street Performance

This course has a focus on making music based on the principles of improvisation and street performance embodied by New Orleans-Style jazz.
Typically composed of brass instruments, this course welcomes musicians and performers of all types, from the classically trained to those with no experience who are willing to play washboards, kazooes, and experiment with other forms of sound-making. For when you travel the world after Williams, this course will prepare you to "busk," or make money playing music on the street, where some of the most dynamic forms of jazz and improvisation have been created. The course will include various street performances and culminate with a "gig" in a local music venue. We will meet twice a week for three-hour sessions, with extra band practices, five hours per week, and performances to be scheduled in accordance to our needs--attendance mandatory. Adjunct Instructor Bio: Andy Kelly, a local Jazz musician and former busker, Williams College Class of ’80, now travels the world bridging cultures with music, using American jazz to make peace in the world.

**Class Format:** afternoons

**Requirements/Evaluation:** original musical composition with in-class performance; 2-page short research paper and oral presentation; final performance for 'all college' audience

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference given in order to: seniors, juniors, sophomores, first-years

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

**BIOL 13 (W) Introduction to Animal Tracking**

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slideshow. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity.  Adjunct Instructor Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent programs for private groups and associations.

**Class Format:** 10:00am to 3:00pm two days a week

**Requirements/Evaluation:** attendance, participation, a final presentation of their maps and journals, with attention to detail and content, a field test and 3-page research paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** preference given to seniors

**Materials/Lab Fee:** $90 plus cost of book(s)

**Attributes:** EXPE Experiential Education Courses

Winter 2019

**BIOL 211 (S) Paleobiology**

Crosslistings: BIOL211 / GEOS212

**Secondary Crosslisting**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes
including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

**Class Format:** lecture/laboratory; field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 12

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3)

**BIOL 220 (S) Field Botany and Plant Natural History**

**Crosslistings:** BIOL220 / ENVI220

**Primary Crosslisting**

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. The "lectures," that are assigned as "homework" in this "flipped" course, focus on the evolution of the land plants, the most recent developments in plant systematics, characteristics of plant families, and cultural--economic uses of plants, especially native species. The in-class session will be organized as workshops with short quizzes and hands-on explorations of plant materials. The labs cover field identification, natural history, and ecology of local species.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on quizzes, exams, field quizzes, field notebook and a class project.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Extra Info 2:** "flipped" lectures and homework

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors, Biology majors, and Environmental Studies majors & concentrators

**Expected Class Size:** 25

**Department Notes:** satisfies the distribution requirement in the Biology major

**Distributions:** (D3)

LEC Section: 01 TBA Tim J. Pusack

BIOL 25 (W) Sustainable Agriculture in California

Crosslistings: BIOL25 / ENVI25

Secondary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

Class Format: travel

Requirements/Evaluation: 10-page paper; synthetic journal of field experiences to be produced by the group

Prerequisites: none, but see preferences for over-enrollment; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01 TBA Henry W. Art, Sarah Gardner

BIOL 302 (F) Communities and Ecosystems (QFR)
Crosslistings: BIOL302 / ENVI312

Primary Crosslisting

An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses;

Not offered current academic year

CHEM 10 (W) Persuasive Presentation--Maximize your Impact

The objective of this course is to introduce a process for preparing and delivering oral presentations with accompanying visuals to enable anyone to maximize their impact. In many fields the ability to transform detailed personal knowledge of a subject into a more broadly accessible message is critical to both personal and organizational success. Often individuals are well prepared as subject matter experts, however, the ability to leverage that expertise into setting a direction or advocating for policy change is learned through trial and error. The instructor of this course has over 25 years of experience presenting scientific and product information in a corporate environment to internal and external customers. This course will focus on a deliberate method for developing persuasive communication that is both engaging and effective. The in-class portion of this course will focus on instruction with a heavy emphasis of "hands on" practice including iterative brainstorming, group sharing and feedback around presentation design, content optimization and oral delivery. The topics for these in class exercises will primarily be provided practice subjects and data sets related to everyday sales pitches and issue advocacy. Student provided topics will also be encouraged. Assigned work outside of class will focus on selected readings, viewing presentations by relevant thought leaders and developing a final presentation on a topic of interest to the student. Students should be prepared to develop ideas they wish to communicate about and preference will be given to students who can articulate concepts they wish to communicate about. This course will utilize Microsoft PowerPoint and Microsoft Excel; students do not need to have expertise in these platforms, however, basic familiarity will be helpful. Adjunct Instructor Bio: Jamie Gardner holds a Ph.D. in Inorganic Chemistry from MIT and leads 3M's Global Fall Protection Laboratory. Over the last 25 years he has focused on the commercialization of Photosensitive, Pest Elimination, Electronic Adhesive, Lithium Ion Battery, Cleaning and Fall Protection products. In pursuit of these efforts he has developed and taught a process utilized to update and influence co-workers, executive stakeholders, customers, external investors and sponsoring government agencies.

Class Format: afternoons

Requirements/Evaluation: final project: students to identify topic of personal interest, develop presentation and present presentation to class

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference given to students who articulate a subject they would like to present on; majors or concentrations in political science/economy, public health, environmental studies and physical sciences

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

LEC Section: 01 MW 10:00 am - 12:50 pm PORG 10:00 am - 12:50 pm James P Gardner
CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, cleansing, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, healthy skin care, and finding your happiness. Adjunct Instructor Bio: Nicole Anagnos is Health Coach and Director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klo Organic Beauty. She also holds a master's degree in education.

Class Format: twice a week for three-hour sessions as a group

Requirements/Evaluation: completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth

Extra Info: the course will include two individual sessions, an initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques; there will be several books required for this class

Prerequisites: after signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it

Enrollment Limit: 15

Enrollment Preferences: email statements will be used in the event of over-enrollment

Materials/Lab Fee: $85 plus cost of book(s)

Attributes: EXPE Experiential Education Courses

Winter 2019

CHEM 16 (W) Glass and Glassblowing

Crosslistings: ARTS16 / CHEM16

Primary Crosslisting

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.

Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Class Format: 9:00 a.m. to noon, M-F

Requirements/Evaluation: evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Materials/Lab Fee: $75

Distributions: (D3)

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 M-F 9:00 am - 12:00 pm PORG 9:00 am - 12:00 pm John W. Thoman

CHEM 19 (W) Methods in Environmental Chemistry

Crosslistings: CHEM19 / ENVI19

Primary Crosslisting
This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particulate matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

Requirements/Evaluation: evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments

Prerequisites: CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: preference will be given to CHEM and/or ENVI majors/concentrators

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

CHIN 11 (W) Shanghai Cuisine

Food plays a quintessential role in Chinese culture. Approaching the foot ways in various regions in China provides a unique path to a better understanding of the richness and diversity of China's regional cultures. Shanghai cuisine (benbang cai), originated in Shanghai and developed its cooking style under the profound influence of those surrounding regions, is a very popular branch of Chinese food. This hands-on course introduces the culinary tradition of many famous Shanghai dishes. The instructor will demonstrate how to turn those fresh raw ingredients and special seasonings into "color-aroma-tasty" Shanghai style dishes. (e.g. soup dumplings, wontons, eight-treasure rice puddings, red braised pork, sweet and sour spare ribs, crystal shrimp etc.) Through discussions of reading and videos, hands-on practices, as well as independently cooking of certain dishes, students will gain insight into the Shanghainese way of life. Students will be expected to complete assigned readings and videos outside class, participate discussions and cook with the instructor in class, make a few recipes of what they cook, and write a 10-12-page final essay. The final essay should include 5 to 6 finalized recipes of the dishes students cook and a conclusion. There is a mandatory field trip to a traditional Shanghai restaurant. Important reminder: for students who have food allergies and/or who are vegetarians please inform the instructor and consult your healthcare professional before the course starts on January 3rd, 2019. Adjunct Instructor Bio: Wendy Wan has extensive experience teaching Chinese language and culture at K-12 levels in the United States. She is a Shanghai native and a food enthusiast.

Class Format: two three-hour sessions per week from 10:00 AM to 1:00 PM

Requirements/Evaluation: attendance of all cooking classes and mandatory field trip (50%); in-class efforts (20%); assignments including readings, videos, recipe and reflection paper writing (15%); 10-12-page final essay, which includes student made recipes and conclusion (15%)
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: preference is given to Chinese language students and based on class years
Materials/Lab Fee: $200
Attributes: EXPE Experiential Education Courses

Winter 2019

CHIN 25 (W) Taiwan Study Tour
Interested in learning first-hand about Taiwanese culture and becoming acquainted with what has been called the "Taiwan (economic and political) miracle"? Want to improve your knowledge of Mandarin, the language with the largest number of native speakers in the world? Then join us on this 23-day study tour to Taiwan, Republic of China. We'll spend the first two weeks in Taipei, the capital city, where 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Mandarin Center of National Taiwan Normal University. After class we'll meet as a group for lunch and discussion. Activities with Taiwanese university students and visits to cultural and economic sites of interest will be scheduled for some afternoons and Saturdays, with other afternoons, evenings, and Sundays free for self-study and individual exploration. During the last week, we'll travel to central and southern Taiwan, staying at small hotels and youth hostels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience.

Class Format: travel
Requirements/Evaluation: evaluation will be based on satisfactory completion of the language course, a 10-page paper on a topic related to Taiwan, and active participation in all scheduled activities
Prerequisites: none; not open to first-year students
Enrollment Limit: 10
Enrollment Preferences: statement of rationale and goals for wishing to participate; CHIN and ASST majors and intended majors who have no previous experience in Taiwan may receive preference

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language
This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.
All readings in English with some examples in Chinese.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project
Prerequisites: CHIN 101 or permission of instructor
Enrollment Limit: 19
Expected Class Size: 12
Distributions: (D1)
Attributes: EXPE Experiential Education Courses; Linguistics
COMP 10 (W) Constructing Gender and Body in the Gym

While it may not be written on the campus map, it's common Williams knowledge that the gym on upper Lasell is called "the EstroGym." Have you ever wondered why cardio spaces, like the EstroGym, seem to be occupied predominantly by women while weight rooms (think Lower Level Lasell) are filled with men? We will explore the answers to this and many more questions in this hybrid physical and academic course. Half of this course will be a critical exploration of phenomena that are often taken for granted within the fitness industry. We will discuss the ways in which cultural understandings of gender and bodies are created and reinforced in physical activity spaces. Topics will include the cultural reinforcement of the gender binary, the policing of nonconforming identities in physical spaces, hegemonic masculinity in the gym, and the social construction of ideal femininity and masculinity. Much of our reading will be grounded in feminist and sociological theory (L. Heywood, Bodymakers: A Cultural Anatomy of Women's Body Building; Markula & Pringle, sport, and exercise: Power, knowledge, and transforming the self) but will also include text and visual sources from CrossFit gyms, international weightlifting competitions, bodybuilding shows, and more. The other half of this course will be taught in the weight room, where students will learn proper strength training form and technique. It is a suitable introduction for novice lifters as well as an opportunity for experienced lifters to improve and refine their technique. Students will explore the differences between powerlifting, Olympic weightlifting, and bodybuilding and will have the opportunity to practice these different forms. This includes, but is not limited to, the following exercises: squat, deadlift, overhead press, bench press, clean, jerk, push-up, and pull-up. Outside of class meeting times, students will be expected to complete readings, brief writing assignments (1-2 pages max), gym observations, short film viewings, and gym selfies (seriously). Depending on class size and logistics, we may take 1-2 field trips to other local gyms for observation purposes. Details TBA. **IMPORTANT NOTE: This course is open to students with any type of lifting experience (from zero physical activity background to Olympic athlete). This also includes students with any form of disability, so long as they are cleared by a licensed medical provider.

Requirements/Evaluation: 2- to 3-page paper and final project

Prerequisites: none—open to those with any type of lifting experience (no experience to Olympic athlete), including students with any form of disability as long as they are cleared by a licensed medical provider

Enrollment Limit: 14

Enrollment Preferences: students will write a paragraph explaining why they want to take the course

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Secondary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none
COMP 338 (F) The Culture of Carnival
Crosslistings: COMP338 / THEA335

Secondary Crosslisting
Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Class Format: studio
Requirements/Evaluation: students will be evaluated on regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade.
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: sophomores and first-year students
Expected Class Size: 18
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

Fall 2018

COMP 361 (F) Zen and the Art of American Literature
Crosslistings: ENGL312 / REL361 / AMST361 / COMP361

Secondary Crosslisting
In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by a young writer named Henry David Thoreau. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend 20-30 minutes each week practicing and reflecting upon those practices during class hours. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: seminar
Requirements/Evaluation: a weekly meditation journal, various informal in-class and take-home writing assignments, a final 12- to 15-page essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any literature course at Williams or permission of the instructor
Enrollment Limit: 30
**Enrollment Preferences:** if the course is over-enrolled, students will be asked to send the instructor an email explaining their reasons for wanting to take this course; these expressions of interest will be used to determine the final course roster; no first year students

**Expected Class Size:** 30

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under REL or AMST

**CSCI 11 (W)  Hour of Code**

Knowledge of computing fundamentals empowers people with a unique set of problem-solving skills. These skills are currently in high demand and are expected to remain so in the foreseeable future. Yet computer science isn't just a useful skill—it's also a limitless canvas for expressing one's own creativity. Computer science is interesting and fun! Hour of Code is a one-hour, hands-on workshop that introduces young students to computer science. Not surprisingly, mastery of computer science takes a bit longer than one hour. Therefore, the goal of Hour of Code is simply to demystify computer programming. A typical workshop blends self-paced activities with in-class tutorials. The best Hour of Code experience inspires participants to pursue further study in computer science on their own time. The first half of this winter study course exposes you to elementary programming, the nuts and bolts of pedagogy, and prepares you to run an Hour of Code workshop. The second half puts your training into practice: you will organize and run an Hour of Code workshop in a Berkshire-area middle school. No prior computer science knowledge is required. The only prerequisite is a love of technology and an enthusiasm for working with young learners.

**Class Format:** afternoons

**Requirements/Evaluation:** final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** 1/2 CS students; 1/2 non-CS students, with preference to first- or second-year students

**Materials/Lab Fee:** $35

**CSCI 12 (W)  Stained Glass Tiling: Quasicrystals and Geometric Solids, Building an Invisibility Cloak**

In this course students learn geometric drawing, design, and the traditional craft skills needed to build a stained glass window. Each student will make a single panel of stained glass from a mosaic of transparent colored glass tiles. Students will learn how to cut glass; to paint and print on glass with kiln-fired enamels; to assemble, solder, patinate and frame a stained glass window. Instructional sessions on the use of tools and safe handling of materials are included where necessary. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up a group exhibition of work, and tidying the lab at the end of Winter Study. This course is time-consuming. More information may be found at https://coombscriddle.wordpress.com/2016/03/28/stained-glass-tiling-the-process/  Adjunct Instructor Bio: Debora Coombs' stained glass windows are exhibited and commissioned internationally. She is a Fellow of the British Society of Master Glass Painters with a Masters degree from London's Royal College of Art and 35 years of experience in the design, fabrication and teaching of stained glass. Contact: (802) 423-5640, debora@coombscriddle.com  Photos: http://www.coombscriddle.com and http://coombscriddle.wordpress.com

**Class Format:** mornings, 15 hours per week. Students must be willing and able to put in an additional 5-10 hours per week outside of class

**Requirements/Evaluation:** creativity and effort demonstrated throughout; quality of finished panel and final presentation; teamwork whilst mounting exhibition; attendance; formal public exhibit
Prerequisites: no previous experience in art or geometry is necessary, however, ideal applicants will have an interest in art or mathematics, patience, good hand skills and want to spend at least 20-25 hours per week working on their project

Enrollment Limit: 10

Enrollment Preferences: preference to seniors and those who express an early or specific interest

Materials/Lab Fee: $260

CSCI 16 (W) Introduction to Tech Entrepreneurship

This course provides an introduction to the fundamental aspects of building a technology startup. It's one thing to make software—and it's another to build a successful software company. You will learn how to develop product/market fit, how to build an MVP (minimum viable product), how to market products on a budget, organizing and running a team, shipping software, and the different types of corporate structures. You'll learn from a range of successful entrepreneurs and industry experts, through their writings as well as short guest appearances (via video calls) during classroom sessions. Students will create a demo and a 5-minute pitch (pitch deck optional) by the end of the course. For the product demo, students can choose to produce either working code, a technical white paper, or design mockups/wireframes. Students will be graded on the quality of the product demo and pitch. Attendance and participation will also be taken into account for final grades. Students will have the opportunity to show off their final products, and their pitches, in an optional Demo Day. Adjunct Instructor Bio: Elissa Shevinsky '01 helped launch Geekcorps (acquired), Everyday Health (IPO), Daily Steals, Glimpse, and Brave ($35M ICO.) Shevinsky was featured on the cover of the New York Times Sunday Business, for her startup Glimpse. Shevinsky is Editor of the book "Lean Out: The Struggle for Gender Equality in Tech and Startup Culture."

Class Format: afternoons

Requirements/Evaluation: attendance and participation in class; final project

Prerequisites: CSCI 134 or CSCI 135 or permission from the instructor

Enrollment Limit: 22

Materials/Lab Fees: preference given to Computer Science students, and to students who demonstrate evidence of entrepreneurial initiative

CSCI 28 (W) Solution Design: from Ideas to Implementation

Crosslistings: ECON28 / CSCI28

Secondary Crosslisting

Designing a pair of computerized glasses is not enough. Who will use them, and what problems will they solve? How can you be certain someone will adopt your new technology before you spend millions of dollars building it? Google Glass and other wearable technologies have struggled to answer these questions. In fact, somewhere between 40 and 60 percent of large IT projects fail and all too often, the cause has little to do with the quality of technical engineering. Innovators often solve the wrong problem, misidentify the users of the software, or fail to adapt to evolving requirements. The challenge is that engineers—and Williams students—like to be told what problem they are to solve, but the average consumer is terrible at knowing what they want until they see how the new product will work. Solution design offers a powerful framework for resolving this paradox efficiently. We will examine how to visualize interactions between market forces, corporate directives, and engineering requirements, and how to apply design thinking to generate novel ideas within these constraints. Then, we will interrogate the strength of our ideas by asking author Marty Kagan's questions: is it feasible? is it valuable? will someone use it? and does it have business viability? Readings by Steve Blank and Eric Reis emphasize the importance of low-cost, rapid prototyping/experimentation and statistical analysis thereof that results in actionable development goals. Finally, we will introduce topics in human computer interaction, and organization tools for complex technical collaborations like Git and the Getting Things Done methodology for task management. Throughout the course, small teams will deploy this toolkit against problems of the students’ choosing. One team may wish to design a new app for the WSO website. Another team may choose to interview a local organization and design a technology powered tool that can
improve its operations. You are the innovator. Small teams of students will each execute one iteration of design and prepare a plan for developing a technological solution to a problem of their choosing. The contents of the plans may include: careful descriptions of the product’s goals, stakeholders, target users, assumptions, and constraints; a business plan; sketches of a user interface; first steps in programming an application; write ups of experiments intended to test underlying assumptions; and a direction for future development efforts. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it
Materials/Lab Fee: cost of books

DANC 10 (W) Funk Styles/Hip-Hop Dance
This course will focus on the foundations of Hip-Hop as dance and as culture. The techniques of lockin’, poppin’, breakin’, 90’s and house dance as well as terminology and history. Technique class will include across the floor and center combinations allowing dancers to find their relationship to athleticism, dynamics and articulation of the body. We will also view and discuss media and literature that contextualizes Hip-Hop, deepens understanding of the form as dance and embodied history. Students will journal to reflect and record information. Technique class will meet three times a week followed by a required rehearsal of choreography that will be created. The expected contact hours will meet the required average of 20 weekly.

Class Format: afternoons; required practice times are 10am-11:50am (Technique and Context), 11:50am-1pm (Lunch Break), 1pm-3pm (Practice)
Requirements/Evaluation: final performance
Prerequisites: some experience in any type of dance form or athletics and an interest in the history of Hip-Hop
Enrollment Limit: 20
Enrollment Preferences: instructor will contact waitlisted people via email to determine
Materials/Lab Fee: $25 plus cost of books

ECON 12 (W) Public Speaking
This course will help students become effective and organized public speakers, whether public speaking means giving a class presentation, participating in a debate, or giving a formal speech before a large audience. We will primarily use extemporaneous and prepared class presentations as a means of learning this skill, but we will also study great American speeches, presidential debates, and other examples for further insights into persuasive public speaking techniques. The class will provide a supportive environment to help each student create his or her own public speaking style that is comfortable, confident, and conversational. We will also focus on organizational techniques, handling visual aids effectively, eye contact and body language. Finally, receiving feedback and providing constructive criticism to other students in the class will be an important part of the course.

Class Format: mornings
Requirements/Evaluation: evaluation will be based on in-class presentations, class participation, and a 10-page written critique of the student's own videotaped presentations
Prerequisites: none
**Winter 2019**

**ECON 13 (W) Essential Tools for Startups to Change Good Ideas to Successful Businesses and Organizations**

This course provides a road map for turning business ideas into successful businesses. Students generate business ideas and then work in teams to develop a business model to take the ideas to startup and beyond. The course also provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research projects. The course is appropriate for students in any field of study who want to know how to build a startup that succeeds. The class will meet for two and a half hours three days a week for short lectures, discussions, group work, and presentations. Outside of class, students will be required to watch online lectures and videos, read handouts, and to work in teams to develop and research their business models. Teams will be required to develop a team plan, to interview customers, to analyze the results, to revise their plans, to meet with the instructor, and to develop presentations of their work. Each team will make weekly presentations along with a final presentation of their work. They will also develop a team video of the lessons the team learned during the course. Students will also be required to provide a 2-3 page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has thirty years of experience working with startups. He has helped over 1,000 people start businesses and works with hundreds of entrepreneurs each year. He has used the Lean Launchpad methodology for the past six years and received training at Stanford University.

**Class Format:** mornings

**Requirements/Evaluation:** 2- to 3-page paper; weekly group presentations of the results of investigations done outside of class

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** seniors first

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

**ECON 18 (W) Games!**

Crosslistings: ENVI18 / ECON18

**Primary Crosslisting**

We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

**Class Format:** Tuesday, Wednesday & Thursday 1-4pm

**Requirements/Evaluation:** final project; game journal
ECON 22 (W)  Volunteer Income Tax Assistance

Crosslistings: ECON22 / POEC22

Primary Crosslisting

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS “Link and Learn” online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Materials/Lab Fee: $15

Attributes: EXPE Experiential Education Courses

LEC Section: 01  M-F 10:00 am - 12:50 pm PORG 10:00 am - 12:50 pm William M. Gentry, Paula M. Consolini

ECON 23 (W)  Investing

This class is designed to provide students with an overview of endowment and investment management and is taught by members of the Williams College Investment Office. The Investment Office is responsible for overseeing Williams’ $2.7 billion endowment. Through presentations, discussion, readings, and project work, Winter Study students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, real estate, and fixed income. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors.

Adjunct Instructor Bio: Abigail Wattley ’05, Managing Director--Abigail rejoined Williams College in September 2010 after business school. From 2007 to 2008 Abigail worked in the Williams Investment Office in the role of Investment Analyst. Prior to working for Williams, Abigail was a Senior Consulting Associate at Cambridge Associates. Abigail received a B.A. in Economics from Williams College in 2005 and a Masters of Business Administration from Harvard Business School in 2010.

Class Format: mornings

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 8
**ECON 24 (W) Economics, Geography and Appreciation of Wine**

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

**Class Format:** Tuesday and Thursday evenings

**Requirements/Evaluation:** in addition to the final project presentation, a blind tasting exam

**Prerequisites:** none, but students must be 21 years old on or before the first day of class

**Enrollment Limit:** 10

**Enrollment Preferences:** mix of academic record and diversity of backgrounds and interests

**Materials/Lab Fee:** $300

**Attributes:** EXPE Experiential Education Courses

**ECON 27 (W) Quilting Inspired by Gee's Bend**

Quilting as an art form is present in many communities, but residents of Gee's Bend, Alabama are recognized for their very distinctive quilting style. In this hands-on class students will learn the basics of quilt-making, inspired by the designs and techniques used in Gee's Bend. Students will also learn about the history of this group of African American quilt-makers and the economic forces that influenced their work. The course will involve field trips to a local quilt store and museum, instruction in techniques such as improvisational piecing, and creation of an original art quilt. The course will culminate with a public exhibition of students' quilts. No previous sewing experience required.  Adjunct Co-Instructor Bio: Chris LaLumia is a life-long quilter and retired teacher. She taught one of her daughters to be an award-winning art quilter. Her other daughter is an economics professor at Williams College.

**Class Format:** mornings

**Requirements/Evaluation:** final formal public exhibit

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** statement of interest

**Materials/Lab Fee:** $355

ENGL 11 (W) The Brontes and the Visual Art Journal

Academic courses from all disciplines at Williams often require the use of a journal to help students focus on their work. This course will push that concept to its limit as we explore some of the classic writings of Charlotte, Emily and Anne Bronte. Our goal will be to find real and tangible ways that visual art journaling can enhance our learning of literature. We will create and record visual insights as we read, and we will explore how this practice can help us conceive what we are reading. In addition to reading the entirety of Charlotte Bronte’s Jane Eyre we will read Emily Bronte’s Wuthering Heights as well as selections from Anne Bronte’s The Tenant of Wildfell Hall. There will also be readings from various authors and artists on the subject of journaling as a tool for learning. Adjunct Instructor Bio: Patricia Malanga received her BA in English Literature from the University of Massachusetts in 1990. While working as the Academic Assistant in the English Department here at Williams for the last 20 years, she has explored her love of literature and her love of the visual arts. This course will be the culmination of those interests.

Class Format: afternoons
Requirements/Evaluation: at least 10 pages of free style journal writing, a finished visual journal and participation in class discussion, projects and assignments
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference to English and Art majors
Materials/Lab Fee: $30 plus cost of books
Attributes: EXPE Experiential Education Courses
ENGL 113 (F)  The Feminist Poetry Movement  (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113

Primary Crosslisting
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D1) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS

DPE: This course examines difference, power, and equity during Feminism's Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women’s Liberation Movement.

Attributes: AMST Critical and Cultural Theory Electives; ENGL Criticism Courses; EXPE Experiential Education Courses; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses

Fall 2018

ENGL 12 (W)  The Art of Telling a Good Story

How do you offer an audience, out loud, a compelling and memorable story? This course will aim to develop both a sense of the structure behind a good story and the improvisational skills that bring a told story to life. In class we'll tell stories. We'll explore basic approaches to shaping stories (and elaborations on these approaches), as well as what makes a story a "story" instead of something else, using the models of folktales and narrative nonfiction. We'll engage in improvisational exercises, and explore the expressive capacities of voice, body, tempo and silence, considering how the improvisation of told tales might intersect with or resemble improvisational performance in other arts. We'll also discuss issues facing tellers of traditional tales, personal stories, and other story types. When do you or do you not have the right to tell a particular story? How do you claim "authority" to tell a story? What are the implications of choosing the stories we do tell? What stories need to be told that are not? What stories need amendment? What does storytelling mean for other academic or social realms? Outside class, students will analyze and critique videos of other storytellers with the goal of enhancing their own storytelling strategies. Students will prepare for presentation in class three different kinds of stories and will offer stories to two different public audiences, one on campus and another in a local school. Students will also be asked to write a brief
reflective essay. The class will meet for two hours a day, Monday through Thursday. Adjunct Instructor Bio: Kelly Terwilliger has been telling stories professionally for 17 years in schools, libraries, festivals, parks, museums, community centers, and pubs.

**Class Format:** mornings

**Requirements/Evaluation:** 2- to 3-page paper; performances, one of which will be offered to the wider public

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** statement of student interest

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TWR 1:00 pm - 3:50 pm PORG 1:00 pm - 3:50 pm   Kelly Terwilliger

**ENGL 14 (W) Humor Writing and Analysis**

In this class we'll hijack the tools of fiction writers, dishonor the genre of memoir, perpetuate the problem of fake news and push the bounds of taste in memes. You'll write something for every class, and most of your writing will be discussed in a workshop format. You'll also submit written reflections on the required text, *Just the Funny Parts* by Nell Scovell and make an oral presentation analyzing a specific work that you consider an example of comic excellence. We'll discuss what kind of relationship thinking people should have with sexist, ethnic and religious humor. And we'll talk quite a bit about postmodernism. Hey, it's an English class. Adjunct Instructor Bio: Eric Randall is a journalist whose work has been published in USA Today, Time, Newsweek and The Washington Post, as well as some reputable publications. He has no particular qualifications for teaching this class but is a firm believer in doing what you can get away with.

**Class Format:** MR 1:30-4:30pm

**Requirements/Evaluation:** 2- to 3-page paper; class participation; one group project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** random selection by registrar with roughly equal distribution of class years

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

Winter 2019

**ENGL 17 (W) How to Write Auto-Fiction**

Crosslistings: REL17 / ENGL17

**Secondary Crosslisting**

You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres—namely, "Fiction" and "Non-Fiction"—had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

**Class Format:** afternoons
ENGL 19 (W) Screenwriting Challenge: The Tale of an Underappreciated Musical Genius
Crosslistings: ENGL19 / MATH19
Secondary Crosslisting
The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

Class Format: afternoons
Requirements/Evaluation: final project
Prerequisites: none, but students with a passion for writing and classical music are encouraged to apply
Enrollment Limit: 3
Enrollment Preferences: writing sample and brief application
Materials/Lab Fee: $55
Attributes: EXPE Experiential Education Courses

ENGL 20 (W) Winter Naturalist's Journal
Crosslistings: ENVI20 / ENGL20
Secondary Crosslisting
This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.

Class Format: mornings
Requirements/Evaluation: daily journal and 2- to 3-page papers
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: random selection
Materials/Lab Fee: $80 plus cost of books
ENGL 237 (S) Making Things Visible: Adventures in Documentary Work
Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting
Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar
Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 12

Department Notes: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.
Distributions: (D1)
Distribution Notes: meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL
Attributes: EXPE Experiential Education Courses; FMST Related Courses

Spring 2019

LAB Section: 02 F 1:00 pm - 4:00 pm Barry Goldstein, Olga Shevchenko

ENGL 25 (W) Journalism Today
This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. Christopher graduated from the University of Pennsylvania and the Columbia University Graduate School of
ENGL 312 (F) Zen and the Art of American Literature

Crosslistings: ENGL312 / REL361 / AMST361 / COMP361

Primary Crosslisting

In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by a young writer named Henry David Thoreau. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend 20-30 minutes each week practicing and reflecting upon those practices during class hours. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: seminar
Requirements/Evaluation: a weekly meditation journal, various informal in-class and take-home writing assignments, a final 12- to 15-page essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any literature course at Williams or permission of the instructor
Enrollment Limit: 30
Enrollment Preferences: if the course is over-enrolled, students will be asked to send the instructor an email explaining their reasons for wanting to take this course; these expressions of interest will be used to determine the final course roster; no first year students
Expected Class Size: 30
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under REL or AMST
Attributes: ENGL Literary Histories C; EXPE Experiential Education Courses
ENVI 100 (S)  Introduction to Weather and Climate
Crosslistings: GEOS100 / ENVI100

Secondary Crosslisting

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building on our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that oceans and glaciers interact with the climate. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and learning how to run a climate model on a computer.

Class Format: lecture
Requirements/Evaluation: class participation, labs, one midterm and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Distributions: (D3)
Attributes: EXPE Experiential Education Courses

ENVI 102 (S)  Introduction to Environmental Science

Environmental Science is the study of how the global earth system functions within the context of its four distinct yet interconnected "spheres," the geosphere, atmosphere, hydrosphere, and biosphere. This course introduces students to scientific methods from physics, chemistry, geology and biology that are applied to understanding both how these spheres interact and how we as scientists can interpret and assess human impacts. Discussions are accompanied by in-depth examinations of real-world case studies at the local and global scale. Topics may include: anthropogenic carbon dioxide, the ozone hole, groundwater contamination, resource sustainability, and loss of biodiversity. In weekly fieldwork and laboratory sessions students collect and analyze environmental samples, and interpret and write about these datasets. In addition to these group projects, students design, complete and present independent projects on a topic of their choice.

Class Format: two 75-minute lecture/discussion sessions, and one 3-hour field/laboratory session each week
Requirements/Evaluation: quizzes/exam, lab reports, independent project and presentation, participation in discussions
Prerequisites: none; no seniors without permission of the instructors
Enrollment Limit: 32
Enrollment Preferences: first-year students
Expected Class Size: 32
Department Notes: required course for Environmental Studies major and concentration
Distributions: (D3)
Attributes: ENVI Core Courses; EXPE Experiential Education Courses

LAB Section: 02  T 1:00 pm - 4:00 pm  Mea S. Cook
ENVI 103 (F) Global Warming and Environmental Change
Crosslistings: ENVI103 / GEOS103

Secondary Crosslisting

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

ENVI 104 (S) Oceanography
Crosslistings: MAST104 / ENVI104 / GEOS104

Secondary Crosslisting

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

ENVI 105 (F) The Co-Evolution of Earth and Life
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis?

Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: underclassmen

Expected Class Size: 30

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

Fall 2018

LAB Section: 03 T 1:00 pm - 3:00 pm Phoebe A. Cohen
LAB Section: 02 M 1:00 pm - 3:00 pm Phoebe A. Cohen
LEC Section: 01 MWF 10:00 am - 10:50 am Phoebe A. Cohen

ENVI 15 (W) From Basalt to Balsam to Beavers: The Natural History of New England

In this course we will explore, far and wide, the New England Landscape and try to make some sense of the amazing physiographic and biological diversity that it offers in a relatively small area. From the spruce clad Berkshires to the broad Connecticut River Valley to the glacially forged coastal plain, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna. We'll learn the predominant trees and shrubs and search for patterns to their occupation of the landscape. We will observe the behavior and evidence of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. How do they manage to cope in their often rigorous and fickle environments and how might they be affected by climate change and other human influences? Through field trips, museum visits, individual investigations, readings, discussions and guest presentations, you'll become a little more aware and appreciative of the natural heritage of the region that you have made your recent home. Students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions; some trips will require students to be away from campus beyond normal class hours. Adjunct Instructor Bio: Drew Jones is Manager of Hopkins Memorial Forest where he oversees the management of the facilities, coordinates research and teaching activities and outreach programs for the public and local schools. He also operates an owl banding station in the fall and intermittently engages in other field research. In the past, he has worked as a wildlife biologist and educator from the Southern Appalachians to the North Woods.

Class Format: mornings; several class sessions off campus will likely last the entire day

Requirements/Evaluation: 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who demonstrate a special enthusiasm for this subject will be favored; all else being equal, seniors will receive special consideration

Materials/Lab Fee: $260 plus cost of books
We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

Class Format: Tuesday, Wednesday & Thursday 1-4pm
Requirements/Evaluation: final project; game journal
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: expressed interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

Requirements/Evaluation: evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments
Prerequisites: CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: preference will be given to CHEM and/or ENVI majors/concentrators
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

ENVI 205 (F) Geomorphology

Crosslistings: GEOS201 / ENVI205

Secondary Crosslisting

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Distributions: (D3)

ENVI 214 (S) Mastering GIS
Crosslistings: GEOS214 / ENVI214
Secondary Crosslisting
The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS
Enrollment Limit: 20
Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators
Expected Class Size: 20
Distributions: (D3)
Attributes: ENVI Natural World Electives; EVST Methods Courses; EXPE Experiential Education Courses

ENVI 215 (F) Climate Changes
Crosslistings: GEOS215 / ENVI215
Secondary Crosslisting
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture, three hours per week; one three-hour lab per week
Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data
Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Geosciences majors
Expected Class Size: 14
Distributions: (D3)
ENVI 220 (S)  Field Botany and Plant Natural History

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. The "lectures," that are assigned as "homework" in this "flipped" course, focus on the evolution of the land plants, the most recent developments in plant systematics, characteristics of plant families, and cultural-economic uses of plants, especially native species. The in-class session will be organized as workshops with short quizzes and hands-on explorations of plant materials. The labs cover field identification, natural history, and ecology of local species.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on quizzes, exams, field quizzes, field notebook and a class project.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Extra Info 2: "flipped" lectures and homework
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors & concentrators
Expected Class Size: 25
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses; MAST Interdepartmental Electives; SCST Related Courses

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Not offered current academic year

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WI)

Crosslistings: GEOS221 / ENVI222

Secondary Crosslisting

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students

Expected Class Size: 10

Distributions: (D3) (WI)

Distribution Notes: WI: This course will involve significant writing in terms of weekly assignments.

ENVI 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth
home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Tallahasee Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel

Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

Materials/Lab Fee: cost to student: $3362

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: TBA Rhon S. Manigault-Bryant, James A. Manigault-Bryant

ENVI 25 (W) Sustainable Agriculture in California

Crosslistings: BIOL25 / ENVI25

Primary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

Class Format: travel

Requirements/Evaluation: 10-page paper; synthetic journal of field experiences to be produced by the group

Prerequisites: none, but see preferences for over-enrollment; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course
Winter 2019
TVL Section: 01    TBA     Henry W. Art, Sarah Gardner

ENVI 250 (S) Environmental Justice (DPE)
Crosslistings: ENVI250 / SCST250

Primary Crosslisting
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar
Requirements/Evaluation: several short essays, final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 10
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 255 (F) Environmental Observation
Crosslistings: GEOS255 / ENVI255

Secondary Crosslisting
To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, LIDAR/RADAR, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, biosphere, and erosion processes. Students will carry out a research project using observation techniques covered in class to explore a part of the local environment.

Class Format: lecture
Requirements/Evaluation: Labs, one midterm exam, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit: 10
Enrollment Preferences: sophomores
Expected Class Size: 10
**ENVI 259 (S) New England Environmental History** (WI)

Crosslistings: AMST259 / ENVI259 / HIST259

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research.

**Class Format:** seminar

**Requirements/Evaluation:** several short essays, final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 19

**ENVI 26 (W) Material Culture and Craft of 19th Century Coastal New England**

Crosslistings: ENVI26 / MAST25

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvassworks, and boatbuilding.

**Class Format:** Williams-Mystic

**Requirements/Evaluation:** performance-based evaluation using exemplars, experts and authentic audience; final paper or project

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** by application
Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses

Winter 2019
TVL Section: 01 Cancelled

ENVI 312 (F) Communities and Ecosystems (QFR)
Crosslistings: BIOL302 / ENVI312

Secondary Crosslisting
An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses;

Not offered current academic year

ENVI 324 (S) Corals and Sea Level
Crosslistings: GEOS324 / MAST324 / ENVI324

Secondary Crosslisting
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10
**ENVI 351 (F)  Marine Policy**

Crosslistings: ENVI351 / PSCI319 / MAST351

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

**Class Format:** lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

**Requirements/Evaluation:** an independent research paper, a presentation, and a final exam

**Extra Info:** offered only at Mystic Seaport

**Department Notes:** satisfies the Environmental Policy requirement for the Environmental studies concentration

**Distributions:** (D2)
**Attributes:** ENVI Environmental Policy;  EXPE Experiential Education Courses;  POEC International Political Economy Courses

---

**ENVI 411 (F)  Environmental planning workshop: community-based environmental problem solving**

Crosslistings: ENVI411 / AMST302

This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the greater Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply the concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students’ academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

**Class Format:** seminar discussion/group workshop/project lab

**Requirements/Evaluation:** short written exercises, class discussion, class presentations, final group report

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ENVI 101 or permission of instructor; open to juniors and seniors only

**Enrollment Limit:** 16
Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Department Notes: required course for Environmental Studies major and concentration

Distribution Notes: does not meet Division 1, 2, or 3 requirements

Attributes: AMST Space and Place Electives; ENVI Core Courses; EXPE Experiential Education Courses; SCST Related Courses

GEOS 100 (S) Introduction to Weather and Climate
Crosslistings: GEOS100 / ENVI100

Primary Crosslisting

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that oceans and glaciers interact with the climate. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and learning how to run a climate model on a computer.

Class Format: lecture
Requirements/Evaluation: class participation, labs, one midterm and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Distributions: (D3)
Attributes: EXPE Experiential Education Courses

Spring 2019
LEC Section: 01 MWF 11:00 am - 11:50 am Alice C. Bradley

LAB Section: 02 M 1:00 pm - 3:00 pm Alice C. Bradley

GEOS 101 (F) The Co-Evolution of Earth and Life
Crosslistings: GEOS101 / ENVI105

Primary Crosslisting

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis?
Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: underclassmen

Expected Class Size: 30

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

---

GEOS 102 (S)  An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs—expressed by earthquakes, volcanic eruptions, and shifting plates—are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model—one of the fundamental scientific accomplishments of the past century—to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth’s interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

Class Format: lecture, three hours per week; lab (several involving field work), two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: evaluation will be based on two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 40

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

LAB Section: 02  M 1:00 pm - 3:00 pm  Bud Wobus

GEOS 103 (F)  Global Warming and Environmental Change

Crosslistings: ENVI103 / GEOS103

Primary Crosslisting

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides
and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

**Class Format:** lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

**Requirements/Evaluation:** evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 48

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses; SCST Related Courses
around three sections: Science: Week 1 will primarily involve lectures and classroom exercises and discussion of the literature, learning about the history and evolution of river restoration as well as the basics of the science that drives restoration. Data Collection and Analysis: Week 2 will focus on data collection and analysis typically required for river restoration projects. This will include topographic surveying, geomorphic and habitat mapping, pebble counts, stream discharge measurements, GIS mapping, and hydraulic modeling. Intensive Practicum: Small groups of students will be given a real restoration project example to research, analyze, and design. This practicum will include data collection, GIS analysis, flow modeling, and design plan sheets describing the restoration plan. The class will meet on average 8 hours per week and will include up to 3 day-long field trips. Students should expect to be outside for portions of the day collecting field data in/near rivers in winter conditions.

Adjunct Instructor Bio: Nick Nelson is a fluvial geomorphologist and regional director for Inter-Fluve, a river and wetland restoration company. He has assessed hundreds of miles of river and designed/managed the removal of more than a dozen dams in New England. He has lectured at the University of MN, Tufts University, University of TN, and currently teaches courses at Northeastern University and the Harvard Graduate School of Design.

Class Format: afternoons
Requirements/Evaluation: students will be evaluated based on their final group design submittal
Prerequisites: none, though some background in GIS and a scientific field (geology, biology, ecology, etc.) will be useful
Enrollment Limit: 15
Enrollment Preferences: background in scientific fields of study
Materials/Lab Fee: $16
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 Cancelled

GEOS 201 (F) Geomorphology
Crosslistings: GEOS201 / ENVI205
Primary Crosslisting
Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation
Prerequisites: any 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Expected Class Size: 15
Distributions: (D3)
Attributes: AMST Space and Place Electives; ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses

Fall 2018

LAB Section: 02 R 1:00 pm - 4:00 pm José A. Constantine

GEOS 202 (S) Mineralogy
This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography
through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

**Class Format:** lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

**Requirements/Evaluation:** evaluation will be based on one hour test, lab work, and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

**Expected Class Size:** 12

**Distributions:** (D3)

**Attributes:** EXPE Experiential Education Courses; MTSC Courses

---

**GEOS 210 (F) Oceanographic Processes**

**Crosslistings:** GEOS210 / MAST211

**Secondary Crosslisting**

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

---

**GEOS 212 (S) Paleobiology**

**Crosslistings:** BIOL211 / GEOS212

**Primary Crosslisting**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of
extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

Class Format: lecture/laboratory; field trip to the the Paleozoic of New York State

Requirements/Evaluation: evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomores and juniors

Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: EXPE Experiential Education Courses; MAST Interdepartmental Electives

GEOS 214 (S)  Mastering GIS

Crosslistings: GEOS214 / ENVI214

Primary Crosslisting

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Methods Courses; EXPE Experiential Education Courses

GEOS 215 (F)  Climate Changes

Crosslistings: GEOS215 / ENVI215

Primary Crosslisting
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture, three hours per week; one three-hour lab per week

Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

Expected Class Size: 14

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses; MAST Interdepartmental Electives; SCST Related Courses

Fall 2018

GEOS 221 (F)  Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WI)

Crosslistings: GEOS221 / ENVI222

Primary Crosslisting

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students

Expected Class Size: 10
GEOS 255 (F)  Environmental Observation

Crosslistings: GEOS255 / ENVI255

Primary Crosslisting

To study the environment, we need to observe and measure it. We collect data—numbers that represent system states—and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, LIDAR/RADAR, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, biosphere, and erosion processes. Students will carry out a research project using observation techniques covered in class to explore a part of the local environment.

Class Format: lecture

Requirements/Evaluation: Labs, one midterm exam, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 10

Enrollment Preferences: sophomores

Expected Class Size: 10

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

GEOS 302 (S) Sedimentology (WI)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; two half-day and one all-day field trip

Requirements/Evaluation: evaluation based on lab work, writing assignments, participation in discussions, and a final paper

Extra Info: writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 100-level GEOS course AND GEOS 202 (which may be taken concurrently, with permission of instructor)

Enrollment Limit: 12

Expected Class Size: 12

Distributions: (D3) (WI)
GEOS 324 (S) Corals and Sea Level

Crosslistings: GEOS324 / MAST324 / ENVI324

Primary Crosslisting

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

GEOS 401 (F) Global Tectonics and the Rise of Mountains

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. Digital elevation models integrated with geologic maps and cross-sections will be used to construct 3D models. We will also explore ways in which tectonics, climate, and erosion affect each other during the evolution of mountain ranges. Class meetings will include lectures and discussions of assigned reading. Labs will include field trips and computer-based projects.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; five field trips including one all-day trip

Requirements/Evaluation: participation during class and field trip discussions; five lab reports based on field trips, and 3 four page papers based on journal articles

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Preferences: senior Geosciences majors

Distributions: (D3)

Attributes: EXPE Experiential Education Courses

Not offered current academic year
GEOS 411 (F) Geobiology

Geobiology—the study of interactions between earth and life over geologic timescales—is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Class Format: seminar; two lecture/seminars a week plus a lab
Requirements/Evaluation: labs, short papers, final grant proposal and presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Senior Geoscience majors
Expected Class Size: 10
Distributions: (D3)
Attributes: EXPE Experiential Education Courses

HIST 10 (W) North Adams, Massachusetts: Past, Present, and Future
Crosslistings: AMST11 / HIST10

Primary Crosslisting
This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students' engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

Class Format: afternoons
Requirements/Evaluation: 2- to 3-page paper; final project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first-year students preferred
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019

HIST 259 (S)  New England Environmental History  (WI)
Crosslistings: AMST259 / ENVI259 / HIST259

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Class Format: seminar
Requirements/Evaluation: several short essays, final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies concentrators

HIST 352 (F)  Americans and the Maritime Environment  (WI)
Crosslistings: HIST352 / MAST352

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project
Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style
Extra Info: offered only at Mystic Seaport
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Distributions: (D2) (WI)
Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern;

INTR 19 (W)  21st Century Museums--From the Inner Workings to the Future Vision of Culture Making
Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums—from art museums to scientific, historical, and specialty collections—and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

Requirements/Evaluation: final formal public exhibit

Prerequisites: keen interest in museums and culture

Enrollment Limit: 12

Enrollment Preferences: random selection

Materials/Lab Fee: none

JAPN 25 (W) Kyoto Artisans: Exploring 1200 Years of Cultural History of Kyoto through Modern Craftsmanship

Kyoto, the former imperial capital of Japan has 1200 years of history. It is called Japan's cultural treasure house. The purpose of this travel course is to explore the cultural history of Kyoto and how traditional craftsmanship is perpetuated and transformed in a modern era as the city of Kyoto developed. Students will visit Kyoto artisans at their studio and through a discourse with thriving artists, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course is conducted on campus. Students will intensively study the cultural history of Kyoto with readings, films and discussion. Also in pairs, they will conduct research on one selected area of Kyoto craftsmanship to acquire in-depth knowledge. Each pair will be responsible to educate the entire group for the onsite visit in Kyoto. Then, for the second and third week, the class will travel to Kyoto. We will first visit historic sites to learn the context of how craftsmanship developed from courtly culture in the Heian period, samurai tradition in the Kamakura and Muromachi periods, religious ceremonies and Noh Theater and tea ceremonies. After and during these excursions, we will visit four artisan studios. They are a sacred mirror maker who could be the last of his kind, a textile weaver, a Noh mask maker, a sculptor of Buddhist statues. Some of these artisans are perpetuating hundreds of years of family tradition. Some started out as an apprentice and established his/her own studio. Students will also have hands on experiences at some studios. Students are expected to participate in all the scheduled activities, post a daily journal on the course website and share daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern craftsmanship to the local community and the Kyoto artisans at a public forum.

Class Format: travel

Requirements/Evaluation: final project; post daily blog to the course website and a public PowerPoint presentation in Kyoto

Prerequisites: at least one course in ASST or JAPN; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: personal statement

Materials/Lab Fee: $3,635

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

TVL Section: 01    TBA Kasumi Yamamoto

LATS 220 (F) Introduction to Urban Studies: Shaping and Living the City
Crosslistings: LATS220 / AMST221 / ENVI221

Primary Crosslisting

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

Distributions: (D2)

LATS 241 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

Attributes: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

Not offered current academic year
LATS 252 (S) Puerto Rico and its Diaspora
Crosslistings: AMST252 / LATS252

Primary Crosslisting

On September 20, 2018, Maria—a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship.

Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

Expected Class Size: 8

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; EXPE Experiential Education Courses; LATS Core Electives

Spring 2019

LEAD 18 (W) Wilderness Leadership in Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification.

Class Format: the course runs nine consecutive days straight from 9AM-5PM, with a possible one nighttime rescue exercise

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the instructor explaining why they want to take the course and hope to gain from the experience

Materials/Lab Fee: $465

Attributes: EXPE Experiential Education Courses
LEAD 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making

Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Secondary Crosslisting

The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums--from art museums to scientific, historical, and specialty collections--and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

Requirements/Evaluation: final formal public exhibit

Prerequisites: keen interest in museums and culture

Enrollment Limit: 12

Enrollment Preferences: random selection

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

LEAD 309 (F) Problems and Progress in American Democracy

Crosslistings: LEAD309 / PSCI309

Secondary Crosslisting

"I confess," French aristocrat Alexis de Tocqueville wrote in the introduction to his Democracy in America, "that in America I saw more than America. I sought the image of democracy itself, with its inclinations, its character, its prejudices, and its passions, in order to learn what we have to fear or hope from its progress." What would Tocqueville see if he returned to America today, almost 200 years later? What types of institutions, dynamics, and processes animate American political life in the twenty-first century? With Tocqueville as a guide to thinking about political ethnography, this course investigates four central elements of political life--religion, education, difference, and crime and punishment--that simultaneously pose problems for and represent sites of progress in American democracy. For each subject, we will ask several key questions. How has that particular aspect of political life changed in the recent past? How might it change in the near future? Does it conform to how American politics is designed to work? To how we want American politics to work? Using a diverse set of readings drawn from empirical political science, contemporary democratic theory, American political thought, historical documents, political punditry (from the left and the right), and current events, our focus, like Tocqueville before us, is on teasing out both the lived experience--the character and challenges--of American democracy and examining any disconnect between that experience and the ideals that undergird it. Among the many specific questions we will consider are whether particular religious traditions might be incompatible with democratic values, the extent to which recent changes in higher education have affected the health of democratic politics, the effects of ideological polarization on democratic discourse, and the place of the jury system in securing democratic justice. Throughout the semester, we will not only approach these questions from the joint perspectives of theory and practice but also seek to enrich our understanding by exploring American democracy as it happens all around us with several exercises in the community at large.

Class Format: discussion

Requirements/Evaluation: two experiential projects with accompanying write-ups of at least 5 and 7 pages, six 2- to 3-page ethnographic reflections, and class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a previous course in American politics or Political Theory or permission of instructor
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2)
Attributes: EXPE Experiential Education Courses; JLST Interdepartmental Electives; LEAD American Domestic Leadership; LEAD Facets or Domains of Leadership; PSCI American Politics Courses
Not offered current academic year

MAST 104 (S)  Oceanography
Crosslistings: MAST104 / ENVI104 / GEOS104

Secondary Crosslisting
The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 48
Distributions: (D3)
Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses
Not offered current academic year

MAST 211 (F)  Oceanographic Processes
Crosslistings: GEOS210 / MAST211

Primary Crosslisting
This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project
Requirements/Evaluation: two tests, a research project, and a presentation
Extra Info: offered only at Mystic Seaport
Distributions: (D3)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

MAST 25 (W)  Material Culture and Craft of 19th Century Coastal New England

Crosslistings: ENVI26 / MAST25

Primary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvassworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01    Cancelled

MAST 311 (F)  Marine Ecology

Crosslistings: BIOL231 / MAST311

Primary Crosslisting

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

LEC Section: 01    TBA    Tim J. Pusack

MAST 324 (S)  Corals and Sea Level

Crosslistings: GEOS324 / MAST324 / ENVI324

Secondary Crosslisting

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what
controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory
Requirements/Evaluation: short papers, labs, participation in discussion, and a research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip
Expected Class Size: 10
Distributions: (D3)
Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

LAB Section: 02 R 1:00 pm - 4:00 pm Mea S. Cook

MAST 351 (F) Marine Policy
Crosslistings: ENVI351 / PSCI319 / MAST351

Primary Crosslisting
This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore
Requirements/Evaluation: an independent research paper, a presentation, and a final exam
Extra Info: offered only at Mystic Seaport
Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration
Distributions: (D2)
Attributes: ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

Fall 2018

Spring 2019
LEC Section: 01 TBA Catherine Robinson Hall

MAST 352 (F) Americans and the Maritime Environment (WI)
Crosslistings: HIST352 / MAST352

Primary Crosslisting
This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans.
Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

**Class Format:** lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

**Requirements/Evaluation:** two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D2) (WI)

**Attributes:** AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern;

**MATH 12 (W) The Mathematics of Lego Bricks**

This course is a modification of five previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell.

**Class Format:** afternoons

**Requirements/Evaluation:** 2- to 3-page paper; final project

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** $40

**Attributes:** EXPE Experiential Education Courses

**MATH 13 (W) The Mathematics of SET (and other games)**

SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredibly variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we'll study these mathematical ideas, as well as those coming from other mathematically interesting games (and we'll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will be meeting for 6 hours per week in class. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project designing a new game based on mathematical ideas. These final projects will be showcased in a board game night at the end of Winter Study.

**Class Format:** afternoons

**Requirements/Evaluation:** final project; small problem sets

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** preference given to students with less mathematical background
MATH 15 (W)  Self Care: Exploring Acupressure, Reflexology and Aromatherapy
Crosslistings: MATH15 / SPEC15

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

Class Format: mornings
Requirements/Evaluation: 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course
Extra Info: the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs
Materials/Lab Fee: $20 plus cost of books
Attributes: EXPE Experiential Education Courses

MATH 17 (W) Modern Dance - Muller Technique

This dance class will be based on the modern dance technique developed by Jennifer Muller, with whom the instructor danced professionally for 5 years in New York City and in Europe. Jennifer Muller was a soloist in the dance company of José Limon before she started her own company in 1974. She has added her own style of movement to the Limon technique, creating an expansive, free flowing dance that is wonderful to do and to watch. The class will be multi leveled and open to both men and women alike. Students will have the opportunity to choreograph a short piece either as a soloist or in small groups. Adjunct Instructor Bio: Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

Class Format: mornings
Requirements/Evaluation: a 1/2-page journal entry is required after each class, a 1/2-page commentary on 10-12 dance videos, attendance, and a short performance at the end of winter study
Prerequisites: none; no previous dance experience necessary
Enrollment Limit: 24
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 Cancelled

**MATH 19 (W) Screenwriting Challenge: The Tale of an Underappreciated Musical Genius**

Crosslistings: ENGL19 / MATH19

*Primary Crosslisting*

The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

**Class Format:** afternoons

**Requirements/Evaluation:** final project

**Prerequisites:** none, but students with a passion for writing and classical music are encouraged to apply

**Enrollment Limit:** 3

**Enrollment Preferences:** writing sample and brief application

**Materials/Lab Fee:** $55

**Attributes:** EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 Cancelled

**MUS 10 (W) Winter Study Chamber Orchestra (WISCO)**

I will organize a classical chamber orchestra to read and perform music of assorted periods and genres. Two student conductors will lead the orchestra, each one having completed my Fall conducting class. In addition to conducting the orchestra, they will act as personnel managers and librarians. I will coach them on every aspect involved in producing a symphonic performance. Berkshire Symphony members and players in the Chamber Orchestra of Williams will make up the majority of the ensemble. The backbone of the training for the orchestra and the student conductors will involve issues of intonation, articulation, balance, bowing, dynamics, tempo, and interpretation. During rehearsals, members of the orchestra will be encouraged to offer ideas and suggestions in order to take part in the ownership of the final product. There will be a final recorded and videotaped concert at the end of Winter Study. Maximum enrollment: Strings: 12 violins, 5 violas, 4 cellos, 2 basses, and Winds: 2 flutes, 2 oboes, 2 clarinets, 2 bassoons, 2 horns, 2 trumpets, timpani.

**Class Format:** MWF 7:00pm-9:00pm

**Requirements/Evaluation:** based on attendance and preparation

**Prerequisites:** none

**Enrollment Limit:** 36

**Enrollment Preferences:** if overenrolled, a short audition on the scheduled repertoire will be held and adjudicated by me and the student conductors

**Attributes:** EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Ronald L. Feldman
MUS 104 (S) Jazz Theory and Improvisation I
Crosslistings: AFR212 / MUS104

Primary Crosslisting
The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: evaluation will be based on weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Extra Info: may not be taken on a pass/fail basis

Extra Info 2: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student’s individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: EXPE Experiential Education Courses

Not offered current academic year

MUS 12 (W) writing sample and brief application
Crosslistings: MUS12 / STAT12

Secondary Crosslisting
The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country—and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook’s music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

Requirements/Evaluation: 10-page paper; final project; musical composition with commentary

Prerequisites: some previous singing or music-reading experience helpful

Enrollment Limit: 30

Enrollment Preferences: seniority

Materials/Lab Fee: $10 plus cost of books

Attributes: EXPE Experiential Education Courses
**MUS 13 (W) The Golden Age of Gospel Music**

A historical look at American Black Gospel, stressing the vocal tradition of the African American Church. Vocalists and instrumentalists are encouraged to participate, but there is no required prerequisite for the course. Course will consist of historical workshops in Gospel music. Required reading *People Get Ready* by Robert Darden, course booklet and will require a minimum of 10-page report. Music covered will be from the mid 1800's to contemporary gospel music. Field trip will include a trip to an African American Church service (Sunday morning). Requirements for the course include a 5-page paper with creative project or performance and a field trip to church. Adjunct Instructor Bio: Legendary Bassist Avery Sharpe has performed with Jazz greats from McCoy Tyner to Dizzy Gillespie. Sharpe is a Gospel Historian and has a strong up bringing in "The Church of God in Christ."

**Requirements/Evaluation:** 5-page paper with creative project or performance and a field trip to church

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** if overenrolled, preference to seniors

**Materials/Lab Fee:** $138 plus cost of books

**Attributes:** EXPE Experiential Education Courses

---

**MUS 14 (W) Classic and Contemporary Musical Theater**

Crosslistings: MUS14 / THEA14

**Primary Crosslisting**

This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus—now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

**Class Format:** afternoons

**Requirements/Evaluation:** a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** the instructor will communicate with those wishing to register either in person or via email

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

---

**MUS 15 (W) Contemporary American Songwriting**

---
Crosslistings: MUS15 / AMST15

Primary Crosslisting

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years. She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

Class Format: mornings
Requirements/Evaluation: final performance and a 2- to 3-page paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: students with a musical background and the ability to play and instrument may be given preference, but anyone interested is encouraged to register
Materials/Lab Fee: cost of books
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 M-F 10:00 am - 11:50 am PORG 10:00 am - 11:50 am Bernice Lewis

MUS 16 (W) Zimbabwean Music Collaboration

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the participants.

Class Format: mornings
Requirements/Evaluation: final performance
Prerequisites: none, but students who play other instruments are encouraged to bring them
Enrollment Limit: 12
Enrollment Preferences: students with musical background; those who play other instruments may have an advantage
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 M 10:00 am - 11:50 am PORG 10:00 am - 11:50 am W 10:00 am - 11:50 am Tendai Muparutsa

MUS 174 (F) The Singing Voice: Structure, Styles and Meaning

What makes an opera singer sound different than a rock singer? Why can't one convincingly sing in the style of the other? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, above all, through singing. The class will learn the basics of yodeling, Tuvan throat singing, and
belting, among other styles, and will explore the cultural and historical contexts of each.

Class Format: lecture/studio/discussion

Requirements/Evaluation: evaluation will be based on one quiz, two papers, and a final project

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

Fall 2018

LEC Section: 01     MR 2:35 pm - 3:50 pm     Brad Wells

MUS 204 (S) Jazz Theory and Improvisation II

Crosslistings: MUS204 / AFR214

Primary Crosslisting

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions

Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project

Prerequisites: MUS 104b or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 5-8

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: EXPE Experiential Education Courses

Not offered current academic year

MUS 205 (F) Composition I

Beginning courses in musical composition. Size and number of required projects will vary from 4 to 5. Each assignment will represent 25% of the student's final grade. A group meeting per week will deal with the presentation of the student's work in progress, analysis of models for composition, performance of work in class, and critiquing of work. There will be a weekly individual meeting with the instructor to discuss each student's progress. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

Class Format: seminar

Requirements/Evaluation: evaluation based on the quality and timeliness of composition projects, attendance, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MUS 202 (may be taken concurrently) or permission of instructor

Enrollment Limit: 6

Enrollment Preferences: Music majors; consideration of non-majors based on qualifications and experience

Expected Class Size: 4

Distributions: (D1)
**MUS 206 (F)  Composition II**

Beginning courses in musical composition. Size and number of required assignments will vary from 3 to 6 in addition to a possible full semester composition project. One to two group meetings per week will deal with the presentation of new assignments, analysis of models for composition, performance of work in class, and critiquing of work. Individual meetings may be added to deal with individual needs. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on the quality and timeliness of composition projects, attendance, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MUS 202 (may be taken concurrently) and permission of instructor

**Enrollment Limit:** 6

**Enrollment Preferences:** Music majors; consideration of non-majors based on qualifications and experience

**Expected Class Size:** 4

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

---

**MUS 230 (S)  Musical Ethnography**

Often, we experience music's impact on us without fully considering why it achieves such strong effects. The discipline of ethnomusicology confronts the question of musical meaning by combining musical study and analysis with an exploration into the contexts of musical production, circulation, and reception. Musical ethnography is both the means by which scholars pursue this line of questioning, and also the (usually) written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a music-making community within Williamstown and the surrounding area. Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** some musical training/experience necessary, see instructor for more information

**Enrollment Limit:** 10

**Enrollment Preferences:** students with some musical experience

**Expected Class Size:** 6

**Department Notes:** MUS World Music/Ethnomusicology

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under ANTH
MUS 25 (W) Creative Art Projects inspired by Southern Florida Native American Indian History & Culture

This travel course will focus on creative work inspired by the history and culture of Native American Indians of Southern Florida. We will discuss the history and culture of Native Americans in the area, focusing mostly on the Calusa, their society, politics, system of government, trading customs, and religion. We will also talk about their construction of canal systems, and their architecture and engineering. Students will arrive to their own conclusion about the impact of Native Americans in our culture. They will also use their experiences during field trips, workshops, lectures, and group discussions as a source of inspiration for their creative work in one or more of the following fields: music composition, visual arts (video, photography), literature, poetry, and theater. They will create their projects individually or could form teams to create interdisciplinary works. If teamwork is selected for the creation of a project there will be a limit of one student per discipline in each team. We will visit archaeological and historical sites, Research Centers, and Museums focused in the History and Culture of Native American Indians of Southwest Florida. We will attend lectures offered by archaeologists, and will participate in the process of screening, cataloging, and analysis of samples extracted from the shell mounds of Useppa Island and Pineland at the Randell Research Center of the University of Florida. Calusa artifacts made with ceramic materials, wood carving, and painting, are recognized worldwide as remarkable examples of Native American artistic achievement. Samples of their art found during excavations in SW FL are part of exhibitions in the Historical Museums that we will visit. Students will learn about music inspired by pre columbian Native American instruments and art. We will discuss information and will visit the estuaries that sustained the world of the Calusas.

Class Format: travel

Requirements/Evaluation: 10-page paper; creative project, and travel journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 7

Enrollment Preferences: priority given to students interested in creating original work in response to field trips and visits to Research Centers and Museums (musical, photography and/ or video, literary, poetry, theater)

Materials/Lab Fee: cost to student $1,995

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

MUS 309 (S) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104b and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Distributions: (D1)

NSCI 10 (W)  The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in collaborative research projects that will develop their use of the medical model to evaluate primary neuroscience research studies for validity. They will develop their own evaluation systems for identifying how valid research interventions and expanded opportunities for successful learning. Students will lead class discussions based on their reading of primary research. Small groups of 2-3 students will be assigned different articles on the same topic and spend time in class. Adjunct Instructor Bio: Dr. Judy Willis ’71 combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to develop her focus in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles, as well as giving invited presentations internationally, applying neuroscience research to potential interventions to facilitate successful learning. She has been on the adjunct faculty of the University of California Graduate School of Education, Santa Barbara.

Class Format: mornings

PHIL 13 (W)  Boxing

Boxing is one of the world’s oldest sports, and there are 3000 year old artistic representations of boxing from ancient Egypt. The history of boxing in the United States during the nineteenth and twentieth centuries reflects the history of the nation. Issues of class, ethnicity, race, and gender have played a central role in the sport. Stories about boxing also play a central role in the popular culture. In this course we will look at some treatments of boxing by social historians, examine some depictions of boxing in documentary and dramatic films, and watch some classic fights. We will also learn some of the fundamental skills involved in boxing. Training as a boxer will give men and women a better appreciation of the physical demands involved. Four days a week we will engage in an intensive training regimen working on basic punching technique, footwork, defense and conditioning. The workouts will involve minimal contact, but will be physically demanding. Students will need to purchase boxing gloves, handwraps, and a jump rope.

Requirements/Evaluation: evaluation will be based on attendance, participation, and a 10-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: $150

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01  Cancelled

PHIL 14 (W)  Yoga and a Grounded Life

"Yoga and a Grounded Life" will examine what the practice of yoga is, and how it can serve as a foundation, guide, and inspiration for living, particularly in the face of personal or societal challenges. Alongside the physical practice of yoga, the class will investigate the philosophical and ethical teachings of yoga’s ancient text, the Yoga Sutras of Patañjali. Students will learn a number of basic yoga poses and breathing techniques in 1.75-hour classes that will meet 5 days a week. In addition, students will read and discuss portions of the Yoga Sutras and several different
commentaries, such as those of BKS Iyengar and Chip Hartranft. Attendance at all classes is required. Missed classes must be made up before the end of Winter Study, usually by attending a regular class at Tasha Yoga. Students will be expected to practice on their own outside of class, to journal, and to participate in class discussions of the readings. Students will submit weekly written assignments in response to prompts relating to class material. Adjunct Instructor Bio: Yoga teacher Anne O'Connor is certified in the Iyengar yoga method, which she has been practicing for 20 years. O'Connor, a freelance editor, also serves on the Williamstown Select Board and is a member of the First Congregational Church of Williamstown.

Class Format: mornings

Requirements/Evaluation: four 1- to 2-page papers and class attendance and participation

Prerequisites: no previous yoga experience required

Enrollment Limit: 14

Enrollment Preferences: instructor's discretion; interviews with enrollees

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA    Anne C. O'Connor

PHIL 25 (W)  Eye Care and Culture in the Atlantic Coast Regions of Nicaragua

We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students—in conjunction with optometrists who volunteer their time for the trip—will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip.

Class Format: travel

Requirements/Evaluation: performance in eye clinics, journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: application essays

Materials/Lab Fee: $3,700

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01    Cancelled

PHLH 13 (W)  Behavioral Health Prevention and Middle School Leadership Development

In this course, students will learn about behavioral health prevention and promotion, with an emphasis on the prevention of substance use disorders and the Substance Abuse & Mental Health Services Administration's (SAMHSA) Strategic Prevention Framework. Following this grounding in prevention science, students will learn about middle school leadership development and community action with a behavioral health and wellness focus, and be trained to deliver core components of the New Hampshire Teen Institute’s (TI) Leaders in Prevention program for students in grades 6-8.

The classroom portion of this course will prepare students to put this knowledge into practice as staff members at the January session of Leaders in Prevention, serving with other youth & adult staff members of TI to facilitate a weekend of education and networking for 50-60 middle school students from around NH and New England. Students in this course will work with teams of middle school students to help them create a student-led action plan for a school or community wellness event to be implemented in their home communities. During the first 2 weeks of the Winter Study period, students will meet on campus for approx. 15 hrs per week. The experiential portion of the course—serving as facilitators at the Leaders in Prevention weekend—will be an overnight trip from Thurs. 1/17–Sun 1/20 to a conference center in Greenfield, NH. (Lodging & food will be provided to students free of charge while at the camp.) This trip is mandatory for the course, and involves working with middle school youth for 3 very full days. Students will meet once again during the final week of Winter Study to debrief and process their facilitation experiences. Academic work will be primarily contained to the classroom time of the first two weeks. A culminating 10-page reflection paper to demonstrate a synthesis of students' classroom and practical learning will be the only sizeable out-of-class work. Adjunct Instructor Bio: Marissa is the Executive Director of the NH Teen Institute and a
trainer for multiple workshops developed by SAMHSA's CAPT and ATTC systems. She is the Secretary of the Prevention Certification Board of NH and the NH Prevention delegate to the IC&RC, and serves on the NH Governor’s Commission Prevention Task Force. Outside of prevention work, she is Assoc. Artistic Dir. of Mill City Productions in North Adams, MA.

Class Format: afternoons

Requirements/Evaluation: 10-page reflection paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: lottery

Materials/Lab Fee: $45

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 Cancelled

PHLH 25 (W) Public Health, Education, and Community Action in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable–and most vital–members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in Spring of 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. With the support of a Fulbright-Nehru student researcher fellowship, she is currently conducting community-based participatory research with FPHED on reproductive health programs in rural UP. She has spent a cumulative 11 months to-date studying and researching reproductive health in rural India.

Class Format: travel

Requirements/Evaluation: 5-page paper 2- to 3-page paper Other: Students will be required to keep a private daily journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: none; not open to first-year students

Materials/Lab Fee: $2800, which includes all transportation, lodging, meals, lectures, and research materials

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

TVL Section: 01 TBA Elizabeth F. Curtis

PHLH 402 (S) Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study;
collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

**Class Format:** seminar/lab

**Requirements/Evaluation:** active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** completion of at least four courses counting towards the PHLH concentration

**Enrollment Limit:** 14

**Enrollment Preferences:** senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

**Expected Class Size:** 14

**Distribution Notes:** does not meet Division 1, 2, or 3 requirements

**Attributes:** EXPE Experiential Education Courses; PHLH Core Courses

---

**Phys 13 (W) Electronics**

Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits and the Arduino, a microcontroller. Class will meet four afternoons a week for a mixture of lab and lecture, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or will write a 10-page paper. If students have prior experience with electronics, they should contact the instructor prior to enrollment. Adjunct Instructor Bio: Daniel Maser is a postdoctoral research fellow in the Department of Physics, working with Professor Tiku Majumder in his atomic physics research laboratory. Adjunct Co-Instructor Bio: Jason Mativi is the electro-mechanical technician in the Bronfman Science Center. He will teach the digital electronics portion of the course.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; final project

**Prerequisites:** MATH 130, equivalent calculus, or permission from instructor; no prior experience with electronic circuits is assumed

**Enrollment Limit:** 14

**Enrollment Preferences:** priority given to seniors first, first-years last

**Materials/Lab Fee:** $100

**Attributes:** EXPE Experiential Education Courses

---

**Phys 15 (W) Cooking for the Real World**

Crosslistings: PHYS15 / SPEC13

**Primary Crosslisting**

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You'll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac 'n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: *Kitchen Confidential*, by Anthony Bourdain, *The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs*, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.
PHYS 16 (W)  The Things That Work

How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What’s inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we’ll explore the ways things work! Class will meet three afternoons a week for a mixture of lecture, discussion, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice.

Class Format: afternoons
Requirements/Evaluation: either building a final project with a short writeup or writing a 10-page paper, and a presentation to the class
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: by seniority
Materials/Lab Fee: $40 plus cost of books
Attributes: EXPE Experiential Education Courses

POEC 22 (W)  Volunteer Income Tax Assistance

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS “Link and Learn” online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons
Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: written statement of interest
Materials/Lab Fee: $15
Attributes: EXPE Experiential Education Courses
POEC 402 (S) Political Economy of Public Policy Issues

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

Class Format: seminar with student presentations
Requirements/Evaluation: group policy projects including an 80- to 100-page paper and 2-hour presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: POEC 253 or ECON 255, POEC 250, POEC 401; open only to Political Economy majors
Department Notes: required in the Political Economy major
Distributions: (D2)
Attributes: EXPE Experiential Education Courses; POEC Required Courses

SEM Section: 01 TF 2:35 pm - 3:50 pm William M. Gentry, Cathy M. Johnson

PSCI 11 (W) Editorial Cartooning and the Art of Propaganda

Crosslistings: ARTH11 / PSCI11

Secondary Crosslisting

This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

Class Format: afternoons
Requirements/Evaluation: editorial cartoons to be produced for each class meeting for evaluation by the class; final cartoons to be published in The Williams Record
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to non-art majors
Materials/Lab Fee: $50
Attributes: EXPE Experiential Education Courses
PSCI 118 (F)  Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies.

What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty—the idea that the people govern themselves? We investigate these and related questions by actively consulting political theory and empirical research in the social sciences. Our investigation will include class-time collaboration with a similarly structured undergraduate course being taught by a sociologist at the University of North Carolina and may include an optional weekend study trip.

Class Format: seminar

Requirements/Evaluation: active class participation, three 5-page essays, several short additional writing assignments, and class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first-year students

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

PSCI 16 (W)  The Martial Art of Politics--Aikido, Gandhi, and King

"The techniques of Aikido are intended as tools for us to use in examining the nature of power, to engage in uncompromising self-scrutiny, and to realize our potential as powerful, compassionate, creative, self-aware human beings."--Mary Heiny Sensei Aikido is a Japanese martial tradition that combines the samurai arts of swordwork and grappling with the philosophical desire to forge a path of harmony in the face of determined opposition.

As such, it addresses situations of conflict that manifest themselves physically, but also offers insight into how to redirect the energies--social, psychological, or political--that might otherwise become conflict in one or another aspect of our lives. As a martial art, Aikido teaches us more than simply how to survive; it also teaches us how to physically express our noblest intentions in movements that protect not only ourselves but the attacker as well. Martin Luther King famously observed that "Returning violence for violence multiplies violence, adding deeper darkness to a night already devoid of stars." Aikido, a physical expression of nonviolence, is the alternative approach made manifest--the light that can drive out darkness and the love that can drive out hate. The physical training (10 am-noon each weekday morning in Currier Ballroom) will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. The academic component of the course will engage with how the physical training resonates with selected writings on nonviolence (Mohandas Gandhi, Martin Luther King Jr., and theoretician Gene Sharp) and the tactical practices of successful nonviolent protest campaigns. Each student will research and profile a successful nonviolent campaign, explain why it worked, explain what was "aikido" about it, and in small groups will pick a target and draft a plan for a contemporary protest campaign on a topic of their choosing. Each group will be responsible for crafting speech text, a tactical analysis of their proposed campaign, and a social media plan. Actually implementing the campaign is not a part of the course. By integrating physical and intellectual components, the course seeks to forge in each student a stronger and more coherent perspective on how the pursuit and embodiment of harmony can resolve the conflicts that we so often encounter. Joining us for several sessions will be local scholar Stewart Burns, author of the award-winning MLK biography To the Mountaintop. Additional relevant experiences, such as meditation practice, outdoor misogi, and feature films (Gandhi, Selma, etc.) will be woven into the course as schedules permit. Students do not have to be especially athletic, and in Aikido women train as equals with men. Students are encouraged to correspond with the instructor (rkent-at-williams.edu) before registration begins if they have questions. Adjunct Instructor Bio: Robert Kent '84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan, where he helped run the youth program for 18 years. He is
currently President of Aiki Extensions, Inc, a nonprofit that supports programs that bring the strategic insights and practical wisdom of Aikido into non-traditional settings. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity. This will be the twelfth year he’s offered a Winter Study class.

**Class Format:** daily, 10 am-noon for aikido training, + 2 times a week for academic discussions, typically over lunch

**Requirements/Evaluation:** quality of participation in both physical and intellectual course components (historical analysis, class discussions, final project)

**Prerequisites:** same physician's approval on file as the school requires to participate on sports teams

**Enrollment Limit:** 20

**Enrollment Preferences:** if overenrolled, selection will be based on a questionnaire

**Materials/Lab Fee:** $175

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    M-F 10:00 am - 12:00 pm M-F 1:00 pm - 2:50 pm PORG 10:00 am - 12:00 pm Robert H. Kent

**PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits**

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

**Class Format:** Meeting prior to start of winter study and again after conclusion

**Requirements/Evaluation:** 10-page paper; 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; daily journal; participation in final meeting

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** selection will be based on a resume and letter of interest; at the time of preregistration interested students should send a resume and letter of interest to Paula Consolini (pconsolini@williams.edu)

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

**PSCI 22 (W) Learning Intervention for Teens**

This course pairs energetic Williams students with adolescents involved in the juvenile court system of Berkshire County. Judges assign teenagers (ages 13-17) to this program, an official Commonwealth of Massachusetts probation program. Our goal is to empower the teenagers through positive peer mentorship and by allowing them to take ownership of an independent project. Each Williams student helps a teen investigate, develop a final project, and present about a topic of the teen's choosing. The project and other program activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting and communication, which the teenagers can transfer to their school, work, and home lives. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work to an audience that includes the Berkshire County Juvenile Court judges and probation officers, town and city chiefs of police, County District Attorney and assistant DAs, the teens' peers and families, Williams
faculty and community members. Williams students develop experience serving in an official capacity, learn to mentor teenagers, and gain insight into
the juvenile justice system. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation,
and keep a weekly journal detailing their meetings. This is a student-led course, sponsored by Chief Wynn and Professor Shanks but entirely run by
trained Williams students who have served as mentors in the past. In order to enroll in the course, all students must write a paragraph explaining why
they believe they’d be a successful mentor in this program. Students should email their paragraphs to student coordinator Nicholas Goldrosen at
ncg1@williams.edu and cc: cshanks@williams.edu.

Class Format: afternoons

Requirements/Evaluation: journal and final reflection totaling 10-15 pages, final project with teenager

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: by paragraph of interest

Materials/Lab Fee: none

PSCI 309 (F) Problems and Progress in American Democracy

Crosslistings: LEAD309 / PSCI309

Primary Crosslisting

"I confess," French aristocrat Alexis de Tocqueville wrote in the introduction to his Democracy in America, "that in America I saw more than America. I
sought the image of democracy itself, with its inclinations, its character, its prejudices, and its passions, in order to learn what we have to fear or hope
from its progress." What would Tocqueville see if he returned to America today, almost 200 years later? What types of institutions, dynamics, and
processes animate American political life in the twenty-first century? With Tocqueville as a guide to thinking about political ethnography, this course
investigates four central elements of political life--religion, education, difference, and crime and punishment--that simultaneously pose problems for
and represent sites of progress in American democracy. For each subject, we will ask several key questions. How has that particular aspect of political
life changed in the recent past? How might it change in the near future? Does it conform to how American politics is designed to work? To how we
want American politics to work? Using a diverse set of readings drawn from empirical political science, contemporary democratic theory, American
political thought, historical documents, political punditry (from the left and the right), and current events, our focus, like Tocqueville before us, is on
teasing out both the lived experience--the character and challenges--of American democracy and examining any disconnect between that experience
and the ideals that undergird it. Among the many specific questions we will consider are whether particular religious traditions might be incompatible
with democratic values, the extent to which recent changes in higher education have affected the health of democratic politics, the effects of
ideological polarization on democratic discourse, and the place of the jury system in securing democratic justice. Throughout the semester, we will not
only approach these questions from the joint perspectives of theory and practice but also seek to enrich our understanding by exploring American
democracy as it happens all around us with several exercises in the community at large.

Class Format: discussion

Requirements/Evaluation: two experiential projects with accompanying write-ups of at least 5 and 7 pages, six 2- to 3-page ethnographic reflections,
and class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a previous course in American politics or Political Theory or permission of instructor

PSYC 14 (W) JA SelCom: A Case Study in Selection Processes

This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in selection? These are just a few of the questions that we will seek to understand through guest speakers from The Davis Center, Psychology Department, Admissions, and the Career Center. The majority of the time will be dedicated towards applying these ideas in selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality.

Class Format: mornings and afternoons

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: preference given to sophomores and admission is based on quality of the application

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

PSYC 15 (W) Ephquilts! An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: Pieces of the Past by Nancy J. Martin; Stitching Memories: African-American Story Quilts by Eva Ungar Grudin; Sunshine and Shadow: The Amish and Their Quilts by Phyllis Haders; A People and Their Quilts by John Rice Irwin; Treasury of American Quilts by Cyril Nelson and Carter Houck; The Quilt: New Directions for an American Tradition, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for hardwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published
Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or other setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Class Format: by appointment
Requirements/Evaluation: evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation
Prerequisites: approval by Noah Sandstrom is required
Enrollment Limit: 20
Enrollment Preferences: random selection
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

PSYC 352 (F) Clinical and Community Psychology
This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.

Class Format: seminar
Requirements/Evaluation: field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 252
Enrollment Limit: 15
**Enrollment Preferences:** senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course

**PSYC 372 (F) Advanced Seminar in Teaching and Learning**

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

**Class Format:** seminar

**Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PSYC 232 or PSYC 272 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 16

**Distributions:** (D2)

**Attributes:** EXPE Experiential Education Courses; PSYC Area 7 - Educational Psychology; TEAC Teaching Sequence Courses

**REL 110 (F) Living Religion: The Study of Religion in Everyday Life**

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

**Class Format:** seminar

**Requirements/Evaluation:** regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first-year students and sophomores

**Expected Class Size:** 12-12

**Distributions:** (D2)
REL 12 (W) The Mumonkan and Tathagata Zen: An Exploration of Mind

Zen is the sect of Buddhism that stresses experience over cognitive formulas and principles. Based on the tenet that all beings have what is called Buddha Nature, practice is entered into with the faith that one can have exactly the same experience that the historical Buddha, Shakyamuni, had and can thereby come to know the process that constitutes the nature of all beings and things that comprise the universe. The primary method of practice is the meditative technique known as zazen, and the type of Zen that focuses on the consciousness that develops from diligent zazen practice is known as Tathagata Zen. Through one’s efforts in zazen, one may come to the intuitive experience of the Dharma Activity, the activity that gives birth to all things and into which all things return. Although the Dharma Activity cannot be described fully in words, it is possible to use words that point to it without running afoul of its truth. The Mumonkan (The Gateless Gate) is a classic Zen text containing 48 such pointers or koans. Utilizing this text as a focus of discussion, students will attempt to grasp the teaching contained in these pointers by means of the principles of Tathagata Zen. The practice of zazen will be part of each class, and the course will culminate in a two-day zen retreat. Those taking the course will keep a daily journal of their course-related experiences which will be reviewed by the instructor. They will also write a series of short papers on selected koan from The Mumonkan. The course will meet from 9am--Noon on Monday, Wednesday and Friday. Anyone wishing to take this course must submit a paragraph stating their purpose for doing so. Up to ten students will be accepted for this course and all are eligible, including those who have taken a prior Winter Study Zen course taught by this instructor. Adjunct Instructor Bio: Williams '62. Retired psychiatrist. Zen practitioner for 48 years, 17 as a monk.

Class Format: mornings

Requirements/Evaluation: journal review; four 2-page papers

Prerequisites: submission of a paragraph stating purpose in taking this course

Enrollment Limit: 10

Enrollment Preferences: paragraph of purpose

Materials/Lab Fee: $121 plus cost of books

Attributes: EXPE Experiential Education Courses

REL 14 (W) Mountain Religion

Sacred mountains play a central role in the founding myths of many religious traditions. Mountains such as Sinai, Olympus, and Kailash are considered divine abodes, entry into which confers spiritual powers. For many religious practitioners, pilgrimage to and practicing in and around the mountains provides a special opportunity to encounter the gods and acquire spiritual benefits. In this comparative course, we will explore the special role and function of mountains in Buddhism, Hinduism, Judaism, and Islam, with a special focus on contemplative practices from Japan’s Shugendo tradition and the kaihogyo nighttime hikes of Tendai monks, circumambulation of Himalayan peaks and mantra recitation, and pilgrimage journeys. Class will meet for three 2-hour sessions per week. Readings will consist mostly of journal articles and selections from books, with a 5-page reflective paper due at the end of the course. Depending on the weather, we will take advantage of the surrounding mountains for short contemplative hikes, applying some of the practices we will study.

Class Format: mornings

Requirements/Evaluation: 5-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: lottery

Materials/Lab Fee: $75

Attributes: EXPE Experiential Education Courses
REL 17 (W) How to Write Auto-Fiction
Crosslistings: REL17 / ENGL17

Primary Crosslisting
You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, "Fiction" and "Non-Fiction"-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

Class Format: afternoons
Requirements/Evaluation: two stories (10-20 pages) and two revisions (10-20 pages)
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: email explaining reasons for interest in the course to Dalena.Storm@gmail.com
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

REL 24 (W) Touring Black Religion in the 'New' South
Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting
In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?: (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel
Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation
Prerequisites: none; not open to first-year students
Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

Materials/Lab Fee: cost to student: $3362

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

REL 25 (W) Yoga and Meditation in India: Theory and Practice

This course delves into the theory and practice of both Hindu and Buddhist yoga in their land of origin, India. In the first half, we stay in the North Indian town of Rishikesh, one of the main centers of Hindu yoga today, located on the banks of the Ganges River. There we practice yoga and meditation daily, study yoga philosophy, and visit leading yoga centers. In addition, we volunteer daily at Mother Miracle Community Development Program, where a K-12 school is dedicated to teaching exceptionally intelligent poor children. In the second part of the course, we travel to South India and stay at Sera Je Monastic University, the largest center of Tibetan Buddhist monastic learning in India. There we continue our daily practice of yoga and meditation, and study with a Tibetan monastic scholar the theory of Tibetan Buddhism. In the afternoons students volunteer with Tibetan students and visit Tibetan service organizations in the area. In this way we gain a solid overview of the practice of yoga and meditation in India. We come to appreciate and learn from the people upholding the living traditions of yoga, as well as helping these people to strengthen the education that will allow them to interact with the global world. Required Reading: The Path to Enlightenment by The Dalai Lama; Yoga and the Luminous: Patanjali's Spiritual Path to Freedom by Christopher Key Chapple; selected articles about yoga and contemporary yoga exchanges. Adjunct Co-Instructor Bio: Tasha Judson, M.Ed., is a certified alignment oriented Hatha yoga teacher and authorized meditation teacher. She has directed Tasha Yoga studio in Williamstown since 2003.

Class Format: travel

Requirements/Evaluation: 10-page paper; daily journal

Prerequisites: none; not open to first-year students

REL 361 (F) Zen and the Art of American Literature

Crosslistings: ENGL312 / REL361 / AMST361 / COMP361

Secondary Crosslisting

In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by a young writer named Henry David Thoreau. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend 20-30 minutes each week practicing and reflecting upon those practices during class hours. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.
Class Format: seminar
Requirements/Evaluation: a weekly meditation journal, various informal in-class and take-home writing assignments, a final 12- to 15-page essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any literature course at Williams or permission of the instructor
Enrollment Limit: 30
Enrollment Preferences: if the course is over-enrolled, students will be asked to send the instructor an email explaining their reasons for wanting to take this course; these expressions of interest will be used to determine the final course roster; no first year students
Expected Class Size: 30
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under REL or AMST
Attributes: ENGL Literary Histories C; EXPE Experiential Education Courses

RLFR 13 (W)  Creative Portraiture in the Darkroom
Crosslistings: ARTS13 / RLFR13
Primary Crosslisting
In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.
Class Format: mornings
Requirements/Evaluation: 2- to 3-page paper; formal public exhibit
Prerequisites: knowledge of black and white analog photography is preferred, but not required
Enrollment Limit: 10
Enrollment Preferences: Art major and minors then random
Materials/Lab Fee: $120
Attributes: EXPE Experiential Education Courses

RUSS 25 (W)  Williams in Georgia
Crosslistings: RUSS25 / SPEC25
Primary Crosslisting
Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-Tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course
Materials/Lab Fee: $2785
Distributions: (D1)

TVL Section: 01    TBA    Vladimir Ivantsov

SCST 250 (S)  Environmental Justice  (DPE)
Crosslistings: ENVI250 / SCST250
Secondary Crosslisting
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar
Requirements/Evaluation: several short essays, final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 10
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

SCST 265 (F)  Digital Performance Lab
Crosslistings: THEA265 / SCST265

Secondary Crosslisting
A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediatized performance practices. Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Class Format: studio and lab
Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 6
Materials/Lab Fee: $100
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under THEA; meets Division 2 requirement if registration is under SCST
Attributes: EXPE Experiential Education Courses

SCST 370 (F)  Medicine, Pathology, and Power: An Ethnographic View  (DPE) (WI)
Crosslistings: SCST370 / ANTH371 / WGSS371

Secondary Crosslisting
How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation—also known as as ‘deep hanging out.’ Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar
Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering. WI: This class includes; weekly writing exercises and monthly 'writing chats' with instructor.

Attributes: EXPE Experiential Education Courses; PHLH Methods in Public Health; SCST Related Courses;

Fall 2018

SOC 15 (W) Photographic Literacy and Practice
Crosslistings: ANTH15 / SOC15

Primary Crosslisting

When you look at a photograph, what is it really saying? How can you make photograph that says what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week--Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

Requirements/Evaluation: final project; formal public exhibit

Prerequisites: none, but students must own or borrow a digital camera (a DSLR with a 35mm lens is ideal, but compact cameras will also work)

Enrollment Limit: 12

Enrollment Preferences: students can email me

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

Winter 2019

SOC 236 (S) Making Things Visible: Adventures in Documentary Work
Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Primary Crosslisting

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent
**Extra Info**: may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites**: none

**Enrollment Limit**: 12

**Enrollment Preferences**: Anthropology and Sociology majors

**Expected Class Size**: 12

**Department Notes**: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

**Distributions**: (D2)

**Distribution Notes**: meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL

**Attributes**: EXPE Experiential Education Courses; FMST Related Courses

---

**SOC 240 (F) Performing Masculinity in Global Popular Culture**

**Crosslistings**: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

**Secondary Crosslisting**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

**Class Format**: seminar

**Requirements/Evaluation**: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

**Prerequisites**: none

**Enrollment Limit**: 20

**Enrollment Preferences**: in the event of over-enrollment, a short statement of interest will be solicited

**Expected Class Size**: 20

**Distributions**: (D2)

**Distribution Notes**: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

**Attributes**: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

**Not offered current academic year**

---

**SPEC 13 (W) Cooking for the Real World**

**Crosslistings**: PHYS15 / SPEC13

**Secondary Crosslisting**

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You'll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac 'n Cheese, quick breads, soups and salads, pie crusts and cookies.
Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: *Kitchen Confidential*, by Anthony Bourdain, *The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs*, by Karen Page and Andrew Dornenburg, and one of the basics cookbooks.

**Class Format:** MWF 3-5:30pm

**Requirements/Evaluation:** daily journal and a final cooking demonstration

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** limited to juniors and seniors but would like an email from the students applying on what food means to them

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

---

**SPEC 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy**

**Crosslistings:** MATH15 / SPEC15

**Secondary Crosslisting**

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

**Class Format:** mornings

**Requirements/Evaluation:** 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

**Extra Info:** the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

**Materials/Lab Fee:** $20 plus cost of books

**Attributes:** EXPE Experiential Education Courses

---

**SPEC 19 (W) Healthcare Internships**

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing
experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which healthcare is delivered. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions (3) will focus on "substance abuse" as a thematic construct for the discussion of related chronic and acute conditions frequently encountered in clinical and social/behavioral contexts. The thematic focus on substance abuse will allow students to reflect on their clinical experiences across a wide range of clinical specialties and also to engage in discussion of a public health crisis affecting quality of life across the lifespans of Berkshires residents. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions. Students will also demonstrate an enhanced awareness of the systems through which medical care is delivered and the challenges of health care delivery within a rural community. Students will also be expected to reflect on their clinical experiences through didactic sessions and case presentations, as well as in a final paper. Adjunct Instructor Bio: Barbara Fuller is the Director of Science and Health Professions Advising.

Class Format: Students are shadowing healthcare providers for 20-25 hours per week.

Requirements/Evaluation: 10-page paper

Prerequisites: must be at least a sophomore, on the "premedical" track, and in good standing

Enrollment Limit: 30-35

Enrollment Preferences: seniors have preference

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Barbara K. Fuller

SPEC 21 (W) Experience the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parents acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Students will be required to read one of two books selected for this course. There will also be reading selected from such works as What Should I do with My Life? by Po Bronson, 2003 and Working by Studs Terkel, 2004. Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific internships listed in the SPEC 21 syllabus. Application are submitted via Handshake.

Class Format: At least 30 hours per week, 5 days per week, 6 hours per day

Requirements/Evaluation: completion of readings, daily journal, and a 5- to 7-page expository review and evaluation that will become public record as a resource for other students

Prerequisites: qualifications for internships

Enrollment Preferences: placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Dawn M. Dellea
**SPEC 22 (W) Outdoor Emergency Care**

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques. Specifically, the course teaches how to recognize and provide emergency medical care for: Wounds and Burns; Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion); Musculoskeletal Trauma (e.g., breaks, sprains, etc.); Shock, Respiratory, Poisoning, Substance abuse emergencies; Medical emergencies (e.g., heart attack, stroke, seizures, etc.). The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 16 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Thomas Feist ('85) is a 35-year ski patroller, certified OEC Instructor and Instructor Trainer. He has taught chemistry at Williams College and served as acting director of the Williams Outing Club in 1990-91.

**Class Format:** mornings

**Requirements/Evaluation:** final written and practical exam

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** ski/snowboard interest and ability as well as prior first aid experience

**Materials/Lab Fee:** $175 plus cost of textbook (~$100)

**SPEC 24 (W) Transformative Moments in the Education of a Preschool Child**

This course will provide an opportunity for immersion in the life of a preschool community in the Bronx. Future of America Learning Center (FALC) is a nationally-accredited program that is recognized for its quality and standard of excellence in the field of Early Childhood Education. Students from varied educational institutions, teachers and instructional coaches are recommended by the Department of Education to visit FALC's classrooms to observe, experience and learn about the Plant-a-Dream curriculum. Winter Study students will actively participate in the daily classroom activities with the children in order to develop a sense of best practices in Early Childhood Education. Students will live with families whose children are in the program, in the model of Gaudino's experiential learning, to access a deeper sense of context and a better understanding of the issues facing children and families from this community. Opportunities for dialogue between families, staff, and students, will also be central to the learning experience. Furthermore, our mentors will guide students in robust self-reflection, as well as inquiry into the environment in which they are immersed, and the personal meaning derived from these experiences. More information about FALC and the course mentors can be found at https://goo.gl/PEJsoq.

**SPEC 26 (W) Field Work in a Bay Area Start-Up**

This course is designed to give students insight into how technology start-ups work and as a chance to practice their problem-solving skills and gain deeper insight into the customer discovery process. The course will start in Williamstown with a review of idea development tools used in today's start-up environment, particularly those pioneered by Stanford d.School such as the Lean Start-up method, Business Model Canvas and Design Thinking. Reading will include *The Lean Start-up* by Eric Ries, *Zero to One* by Peter Thiel and Edward deBono’s *Thinking Course* as well as articles and podcasts. The class will be split into three teams of four students and paired with a Bay Area start-up looking to enter a new market, a new customer segment or are considering certain product modifications. The student teams will work on identifying customer needs, qualifying customer feedback and making recommendations to management. The class will tap into the strong Bay Area alumni network which will allow for visits to several different start-ups and fast-growing tech companies and compare how they approach their markets. The final project will be a ten-minute presentation to management. Student should submit a short statement of why they would like to participate and what they expect to learn. Adjunct Instructor Bio: Entrepreneur-in-Residence at Williams.

**Class Format:** travel

**Requirements/Evaluation:** 5-page paper; final project; short summaries of customer interactions

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 12

**Enrollment Preferences:** preference will be given to students with a demonstrated interest in entrepreneurship

**Materials/Lab Fee:** $2,800

SPEC 28 (W) Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship
Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper
Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: statement of interest
Materials/Lab Fee: $400

SPEC 35 (W) Making Pottery on the Potter's Wheel

Learning to form pottery shapes with your hands on the potter's wheel is challenging but accessible to any student who invests time and effort. This is a very old-fashioned skill--archaeologists tell us potter's wheel skills were widespread in world culture by 3000 BCE. YouTube videos will not help you to learn the subtle hand positions and pressures needed to succeed in shaping symmetrical pleasing forms. A teacher/coach will help you understand and learn these skills, but it is up to you to apply yourself with repeated practice, patience and persistence. Each class will begin with an explanatory demonstration followed by student practice on the potter's wheel. Woven into pottery making demonstrations will be presentations, in response to student interest, on various topics relating to the science and history of pottery making. Every student will have exclusive use of a potter's wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, lids, spouts, and knobs. We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The eleventh meeting will be devoted to glazing your biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project positive-orientation critique" in the studio of your finished work. Adjunct Instructor Bio: Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

Class Format: mornings, 9am-12pm; plus 1 afternoon powerpoint slide presentation, and 1 final 1-hour critique session early in the spring semester at times to be arranged
Requirements/Evaluation: attendance at all class sessions and enthusiasm for learning the craft of pottery making
Prerequisites: none
Enrollment Limit: 9
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $385
Distributions: (D1)
Attributes: EXPE Experiential Education Courses
STAT 12 (W)  writing sample and brief application  
Crosslistings: MUS12 / STAT12  

Primary Crosslisting 

_The Sacred Harp_ is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country—and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in _The Sacred Harp_; or to undertake a quantitative analysis of the tunebook's music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings.  Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes. 

Requirements/Evaluation: 10-page paper; final project; musical composition with commentary

Prerequisites: some previous singing or music-reading experience helpful

Enrollment Limit: 30

Enrollment Preferences: seniority

Materials/Lab Fee: $10 plus cost of books

Attributes: EXPE Experiential Education Courses

THEA 14 (W) Classic and Contemporary Musical Theater  
Crosslistings: MUS14 / THEA14  

Secondary Crosslisting 

This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus—now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill’s "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kklbler@williams.edu.

Class Format: afternoons

Requirements/Evaluation: a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: the instructor will communicate with those wishing to register either in person or via email

Materials/Lab Fee: none
THEA 15 (W) Shadow Puppetry
Crosslistings: ARTS15 / THEA15

Primary Crosslisting

The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, “It is in the very limitations of shadows that we learn...It is in the gap between the object and its representation that the image emerges, the gap we fill in.” In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in “Banished”, which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

Requirements/Evaluation: short presentations and works in progress
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: students will be asked to submit a letter of interest
Materials/Lab Fee: $215
Attributes: EXPE Experiential Education Courses

THEA 20 (W) Performing Self-Portraiture in the Age of Instagram
Crosslistings: THEA20 / WGSS20 / ARTS20

Primary Crosslisting

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacobly Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

Class Format: afternoons
Requirements/Evaluation: final performance
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: if overenrolled, students will be selected by submitting a brief statement of interest
THEA 241 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

Attributes: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

Not offered current academic year

THEA 265 (F) Digital Performance Lab

Crosslistings: THEA265 / SCST265

Primary Crosslisting

A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediatized performance practices. Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Class Format: studio and lab

Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: none
THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Primary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under THEA or COMP; meets Division 2 requirement if registration is under AMST

Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; EXPE Experiential Education Courses; FMST Related Courses

Not offered current academic year

THEA 335 (F) The Culture of Carnival

Crosslistings: COMP338 / THEA335

Primary Crosslisting

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Class Format: studio

Requirements/Evaluation: students will be evaluated on regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade.

Prerequisites: none

Enrollment Limit: 20
**THEA 385 (S) The Sculptural Costume and It's Performance Potential**

Crosslistings: THEA385 / ARTS385

Secondary Crosslisting

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Art and Theater majors

**Expected Class Size:** 12

**Materials/Lab Fee:** $125

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

---

**WGSS 113 (F) The Feminist Poetry Movement** (DPE) (WI)

Crosslistings: ENGL113 / WGSS113 / AMST113

Secondary Crosslisting

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** seminar; discussion, some lecture, project work in archives and art gallery
**Requirements/Evaluation:** three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS

**DPE:** This course examines difference, power, and equity during Feminism's Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 25 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment
This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health--especially HIV and AIDS--women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture with a female Prime Minister where women have created and continue to build cooperatively owned enterprises, a West African country that has consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.
Requirements: Before we leave campus, each student will choose a particular focus for the trip, and do preliminary research to inform their visit--including comparative material about the US. Upon our return to campus we will meet to discuss our findings, and students will write 10-page papers drawing upon existing research as well as our conversations and experiences in Senegal.
Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none; not open to first-year students
Enrollment Limit: 6
Enrollment Preferences: preference will be given to students with skills in French and a demonstrated interest in public health and/or women's economic empowerment
Materials/Lab Fee: $3,892

Winter 2019
TVL Section: 01 TBA Kiaran Honderich

WGSS 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE) (WI)
Crosslistings: SCST370 / ANTH371 / WGSS371
How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation—also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to ‘improve’ health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering. WI: This class includes; weekly writing exercises and monthly ‘writing chats’ with instructor.

Fall 2018

SEM Section: 01  W 1:10 pm - 3:50 pm  Kim Gutschow

------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both about and with moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Morgan McGuire (Computer Science), Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

**FMST Core Courses**

**AFR 241 (S) The Banlieue in Literature, Music, and Film**

Crosslistings: RLFR240 / AFR241 / COMP281

Secondary Crosslisting

In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

- **Class Format:** seminar
- **Requirements/Evaluation:** journaling, presentation, in-class discussion, and final project

**AFR 261 (F) Haitian and French Caribbean Literatures and Films**

Crosslistings: COMP283 / AFR261 / RLFR261

Secondary Crosslisting

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking
Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286

Secondary Crosslisting

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR or AMST; meets Division 1 requirement if registration is under ENGL

Attributes: FMST Core Courses; WGSS Racial Sexual + Cultural Diversity Courses

Fall 2018

AFR 315 (S) Blackness 2.0: Race, Film and New Technologies

Crosslistings: AMST315 / AFR315 / SCST315
Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of 'new' technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Africana Studies concentrators

**Expected Class Size:** 15

**Distributions:** (D2)

**Attributes:** AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses

Spring 2019

**SEM Section:** 01   TR 9:55 am - 11:10 am   Rhon S. Manigault-Bryant

**AFR 321 (F) Trending Black: Race & Social Media in the 21st Century**

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based upon class participation, response papers, and a final research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**AFR 325 (F) Television, Social Media, and Black Women 'Unscripted'**

Crosslistings: AFR325 / WGSS325

**Primary Crosslisting**

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television ('scripted' and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.
AMST 205 (F)  Chicana/o Film and Video
Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203
Secondary Crosslisting
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 20
Distributions: (D2)
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; ARTH post-1600 Courses; FMST Core Courses; GBST Borders, Exiles + Diaspora Studies Electives; LATS Core Electives

LEC Section: 01    WF 11:00 am - 12:15 pm M 7:00 pm - 9:40 pm   C. Ondine Chavoya

AMST 229 (S)  Reel Jesus: Reading the Christian Bible and Film in the U.S.A.  (WI)
Crosslistings: REL229 / AMST229
Secondary Crosslisting
In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to
understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 12

**AMST 231 (S) Approaches to Media Studies: Analyzing Mediated Difference**

Crosslistings: AMST231 / LATS231 / WGSS232

**Secondary Crosslisting**

Media’s influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

**Class Format:** seminar

**Requirements/Evaluation:** participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 12

AMST 333 (S)  An American Family and “Reality” Television  (WI)
Crosslistings: COMP316 / AMST333 / ARTH310 / WGSS312
Secondary Crosslisting
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called “Reality TV.” In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the “American dream.” Documenting the family’s life over the course of eight months, the series chronicled the dissolution of the Louds’ marriage and broadcast the “coming out” of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program’s historical reception, and analyze its influence on broadcast and film media, particularly on “reality” television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.
Class Format: seminar
Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: junior majors, followed by senior majors

AMST 346 (F)  Latinas/os and the Media: From Production to Consumption  (WI)
Crosslistings: LATS346 / AMST346
Secondary Crosslisting
This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?
Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page
ARAB 401 (S) Topics in Advanced Arabic I: Contemporary Arab Cinema

Crosslistings: ARAB401 / COMP403

Primary Crosslisting

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: lecture
Requirements/Evaluation: essays, presentations, final paper, exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ARAB 415 (S) Beyond Headlines: Surveying the Arab Landscape through Arabic Media

How does Arabic media represent the Arab landscape? This course will explore Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss Arabic media as a vehicle through which issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Class Format: lecture
Requirements/Evaluation: active participation in class, assignments, blogs, quizzes, presentation, final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARAB 302
Enrollment Limit: 12
Enrollment Preferences: Arabic majors

**ARTS 107 (S)  Creating Games  (QFR)**  
Crosslistings: CSCI107 / ARTS107  
Secondary Crosslisting  
The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. These three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.  
Class Format:  lecture and studio  
Requirements/Evaluation:  evaluation will be based on participation, studio work, and quizzes  
Extra Info:  may not be taken on a pass/fail basis  
Prerequisites:  none; no programming or game experience is assumed  
Enrollment Limit:  24  
Enrollment Preferences:  first-year students  
Expected Class Size:  24  
Department Notes:  not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major  
Materials/Lab Fee:  lab fee of $25 will be added to the student's term bill  
Distributions:  (D3) (QFR)  
Distribution Notes:  meets Division 3 requirement if registration is under CSCI; meets Division 1 requirement if registration is under ARTS
ARTS 124 (F) Introductory Video

In this course we explore how the proliferation of video has transformed the way we relate our own image, and that of others. Video has become a platform for hypervisibility. In an era of selfies, live-streaming, state sanctioned violence (and its digital record), how might we use video as a tool of empathy and accountability? We will pursue answers to these questions through the act of making. In this introductory level course students will gain facility in Adobe Premiere and other post-production tools in the Adobe Creative Suite. Students will explore camera technique, lighting, and how to work with appropriated footage. We will look at early and contemporary video works in order to situate the work being made in class. Video Art will also be contextualized within vernacular applications of video. Through regular technical exercises, readings, and group critiques, students will learn how to use video as critical tool in their practice.

Class Format: studio

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

Expected Class Size: 12

Distributions: (D1)

Attributes: FMST Core Courses

ARTS 260 (S) Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

Class Format: studio

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: 100 level video course

Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

Expected Class Size: 12

Materials/Lab Fee: $125

Distributions: (D1)

Attributes: FMST Core Courses

CHIN 226 (S) Chinese Film and Its Significant Others
From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: lecture
Requirements/Evaluation: attendance and participation, short response papers (1-2 pages each), one final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors
Expected Class Size: 15
Distributions: (D1)
Attributes: FMST Core Courses
Not offered current academic year

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors
Expected Class Size: 10
Distributions: (D1) (WI)
Attributes: FMST Core Courses;
Not offered current academic year

COMP 153 (F) Japanese Film
Crosslistings: JAPN153 / COMP153
Primary Crosslisting
From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

**Class Format:** lecture

**Requirements/Evaluation:** attendance, participation, some responses, two papers (5-7 pages), test

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** students majoring in a related field

**Expected Class Size:** 20

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST

**Attributes:** FMST Core Courses

Not offered current academic year

---

**COMP 221 (F) Hollywood Film**

Crosslistings: ENGL204 / COMP221

**Secondary Crosslisting**

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, and *12 Years a Slave*. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

**Class Format:** lecture

**Requirements/Evaluation:** mandatory attendance at free Sunday 8:00 pm film screenings at Images, two 2-page essays analyzing a short film sequence, two editing exercises (produce a clip and an ~2-page essay), one midterm, and a final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 60

**Enrollment Preferences:** English majors

**Expected Class Size:** 60

**Distributions:** (D1)

**Attributes:** AMST Arts in Context Electives; ENGL Literary Histories C; FMST Core Courses

Not offered current academic year

---

**COMP 246 (S) Bloody Vampires: From Fiction to Film and Fashion** (WI)

Crosslistings: COMP246 / ENGL287

**Primary Crosslisting**

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by
Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films Nosferatu by Murnau and Herzog, Dracula by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by Hardwicke, and Daybreakers by Spierig, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar
Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students majoring or considering a major in language or literature
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: FMST Core Courses;
Not offered current academic year

COMP 258 (F) Film and Media Studies: An Introduction
Crosslistings: COMP258 / ENGL274

Secondary Crosslisting
This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio
Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: no prior production experience is required
Enrollment Limit: 30
Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students
Expected Class Size: 30
Distributions: (D1)
Attributes: FMST Core Courses
Not offered current academic year

COMP 281 (S) The Banlieue in Literature, Music, and Film
Crosslistings: RLFR240 / AFR241 / COMP281

Secondary Crosslisting
In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Class Format: seminar
Requirements/Evaluation: journaling, presentation, in-class discussion, and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors, certificate, Africana and Comparative literature students

**Expected Class Size:** 15

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

**Attributes:** FMST Core Courses

**Not offered current academic year**

**COMP 283 (F) Haitian and French Caribbean Literatures and Films**

**Crosslistings:** COMP283 / AFR261 / RLFR261

**Secondary Crosslisting**

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

**Class Format:** seminar

**Requirements/Evaluation:** in-class discussions, journaling, steps towards final project, final project and presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** French majors, French certificate, Africana and Comparative Literature students

**Enrollment Limit:** 15

**Enrollment Preferences:** 105 and above, French majors, French certificate, Africana and Comparative Literature students

**Expected Class Size:** 10

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

**Attributes:** FMST Core Courses

**Not offered current academic year**

**COMP 294 (S) Philosophy and Narrative Fiction (WI)**

**Crosslistings:** PHIL294 / COMP294

**Secondary Crosslisting**

What is it for a novel, a story, a play or a film to be a *philosophical* narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder’s *Sophie’s World*. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to “get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize.” If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can’t argumentative prose—philosophers’ preferred form of expression—clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students’ interest. Most of the authors will come
from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP

Attributes: FMST Core Courses; PHIL Contemporary Value Theory Courses; Not offered current academic year

COMP 295 (F) Philosophy of Film and Film Theory (WI)

Crosslistings: COMP295 / PHIL295

Secondary Crosslisting

Philosophy of film is a relatively young, but very rich and rapidly growing field. Its central question--What is film?--has been approached and framed in many different ways; naturally, the answers to that question, and the theoretical assumptions that underlie the answers, differ as well. This course will offer a selective overview of the debates that characterized philosophy of film since the early 20th century. Starting with early film theorists (such as Munsterberg, Arnheim, Bazin, and Soviet formalists), we will examine how their insights and disagreements influenced later developments in continental and analytic philosophy of film, and in film theory. While looking at film as art, as document, as experiment and as entertainment, we will always keep in sight specific theoretical assumptions that underlie different understandings of film, and different critical approaches to the medium.

Some of the questions we will ask are: What is the nature of filmic representation? Does film accurately capture reality, as no other art does? Does it advance our thinking and increase our knowledge of the world? Or is it a supreme illusion, a dream-like escape, the domain in which the viewer’s unconscious wishes are magically fulfilled? How does film generate meaning? Is film a creation of a single artist - the director, the author - or is it a result of a loosely synchronized and not quite coherent collaboration of many different people, each guided by her or his particular vision? Is there a room for the notion of collective intention in filmmaking? What is the nature of audience's response to film? Why do we seek to experience through film fear and anguish that we avoid in our daily lives? Are there ethical considerations that should govern both film production and spectatorship? Finally, is there a reason for philosophy of film and film theory to exist as a separate field? Is philosophy of film really autonomous, independent from traditional philosophical disciplines which help generate its central questions, such as aesthetics, philosophy of art, epistemology, ontology, semiotics, ethics, social and political philosophy? Is film today really distinct from a number of new, emerging visual media? How should we think about the boundaries and methods of theorizing about film?

Class Format: seminar

Requirements/Evaluation: this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & two 5 pages long papers

Extra Info: the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and intended majors; students especially interested in film; and by seniority

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP

Attributes: FMST Core Courses; PHIL Contemporary Value Theory Courses;
COMP 296 (S)  Chinese Film and Its Significant Others
Crosslistings: CHIN226 / COMP296
Secondary Crosslisting
From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: lecture
Requirements/Evaluation: attendance and participation, short response papers (1-2 pages each), one final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors
Expected Class Size: 15
Distributions: (D1)
Attributes: FMST Core Courses

COMP 297 (F)  Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films (WI)
Crosslistings: CHIN237 / COMP297
Secondary Crosslisting
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant-readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors
Expected Class Size: 10
Distributions: (D1) (WI)
Attributes: FMST Core Courses
Not offered current academic year
COMP 298 (S) Introduction to French and Francophone Film
Crosslistings: COMP298 / RLFR228
Secondary Crosslisting
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palsy, Peck, and Sissako. Conducted in French.
Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: RLFR 201, 202, or 203, or by permission of instructor
Expected Class Size: 12
Distributions: (D1)
Attributes: FMST Core Courses
Not offered current academic year

COMP 307 (S) Asian American Writing and the Visual Arts
Crosslistings: AMST304 / COMP307 / ENGL388
Secondary Crosslisting
This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poetry, poetry "inspired by" paintings, video work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Berssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.
Class Format: seminar
Requirements/Evaluation: two papers, short assignments, presentation, participation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses
Not offered current academic year

COMP 316 (S) An American Family and "Reality" Television (WI)
Crosslistings: COMP316 / AMST333 / ARTH310 / WGSS312
Secondary Crosslisting
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream."
Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: seminar
Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: junior majors, followed by senior majors
Expected Class Size: 14
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or COMP; meets Division 2 requirement if registration is under AMST or WGSS
Attributes: AMST Arts in Context Electives; ARTH post-1600 Courses; FMST Core Courses;
Not offered current academic year

COMP 341 (F) Cinematic Representations of Work and Migration after the Wall
Crosslistings: COMP341 / WGSS341

Primary Crosslisting
The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Agustin, Angela Melitopoulos, Lauren Berlant and Mieke Bal, Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whores Glory, Le Havre and Time Out.

Class Format: seminar
Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 200-level ENGL or COMP course, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature and Women's Gender & Sexuality majors
Expected Class Size: 10
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under WGSS
Attributes: FMST Core Courses

Not offered current academic year

COMP 403 (S) Topics in Advanced Arabic I: Contemporary Arab Cinema
Crosslistings: ARAB401 / COMP403

Secondary Crosslisting
The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will
analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: lecture

Requirements/Evaluation: essays, presentations, final paper, exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARAB 302

Enrollment Limit: none

Expected Class Size: 5

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARAB

Attributes: FMST Core Courses

Not offered current academic year

CSCI 107 (S) Creating Games (QFR)

Crosslistings: CSCI107 / ARTS107

Primary Crosslisting

The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: evaluation will be based on participation, studio work, and quizzes

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

Expected Class Size: 24

Department Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

Materials/Lab Fee: lab fee of $25 will be added to the student's term bill

Distributions: (D3) (QFR)

Distribution Notes: meets Division 3 requirement if registration is under CSCI; meets Division 1 requirement if registration is under ARTS

Attributes: FMST Core Courses;

Not offered current academic year

CSCI 371 (F) Computational Graphics (QFR)

PhotoShop, medical MRIs, video games, and movie special effects all programmatically create and manipulate digital images. This course teaches the fundamental techniques behind these applications. We begin by building a mathematical model of the interaction of light with surfaces, lenses, and an imager. We then study the data structures and processor architectures that allow us to efficiently evaluate that physical model.

Students will complete a series of programming assignments for both photorealistic image creation and real-time 3D rendering using C++, OpenGL, and GLSL. These assignments cumulate in a multi-week final project. Topics covered in the course include: projective geometry, ray tracing,
bidirectional surface scattering functions, binary space partition trees, matting and compositing, shadow maps, cache management, and parallel processing on GPUs.

Class Format: lecture, with optics laboratory exercises

Requirements/Evaluation: evaluation based on assignments, projects, and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136 and CSCI 237 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Distributions: (D3) (QFR)

Attributes: FMST Core Courses;

Not offered current academic year

CSCI 372 (F) Visual Media Revolution (QFR)

We live at the beginning of the second revolution in visual media. Two centuries ago, the camera and the Jacquard loom introduced machines for creating art. By automating the artist's hand, they also forced questions of how objective technique gives rise to subjective meaning and where the border lies between mechanical and human contributions. Those progenitors eventually led to digital film, computer games, and digital content creation for architecture and industrial design. Today, accessible and pervasive computation provokes a second revolution. Augmented reality, 3D scanning, 3D printing, virtual reality, and computational photography are exploding into mainstream experience. Where previous digital media refined analog practice through evolution, these are forms that could not exist without computation. As the world seeks the promise of new visual forms, we find that fundamentals of earlier media remain valid and take them as our guide. This tutorial investigates the technology of emerging computational media and explores their impact on the relationship between process and aesthetics.

Class Format: This class will follow the meeting structure of a tutorial, with groups of three or four

Requirements/Evaluation: oral presentations and short papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 256

Enrollment Limit: 18

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 18

Distributions: (D3) (QFR)

Attributes: FMST Core Courses;

Not offered current academic year

ENGL 204 (F) Hollywood Film

Crosslistings: ENGL204 / COMP221

Primary Crosslisting

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho; Casablanca; The Godfather; Schindler's List; Bridesmaids; Groundhog Day; and 12 Years a Slave. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Class Format: lecture

Requirements/Evaluation: mandatory attendance at free Sunday 8:00 pm film screenings at Images, two 2-page essays analyzing a short film sequence, two editing exercises (produce a clip and an ~2-page essay), one midterm, and a final exam

Extra Info: may not be taken on a pass/fail basis
ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is not a course in journalism, but rather an experiment in documentary cinema for the ear. We'll do some reading in radio history and technique, and will listen to exemplary works (including episodes of This American Life, RadioLab, Love & Radio, and Serial), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Class Format: seminar
Requirements/Evaluation: five short audio pieces; attendance and active participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: sophomores; English majors; students with radio or studio art training
Expected Class Size: 10
Distributions: (D1)
Attributes: FMST Core Courses

Spring 2019
SEM Section: 01    MR 2:35 pm - 3:50 pm    Shawn J. Rosenheim

ENGL 274 (F) Film and Media Studies: An Introduction

Crosslistings: COMP258 / ENGL274
Primary Crosslisting

This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio
Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: no prior production experience is required
Enrollment Limit: 30
Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

Expected Class Size: 30

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286

Secondary Crosslisting

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR or AMST; meets Division 1 requirement if registration is under ENGL

Attributes: FMST Core Courses; WGSS Racial Sexual + Cultural Diversity Courses

Fall 2018

SEM Section: 01 W 1:10 pm - 3:50 pm Kai M. Green

ENGL 287 (S) Bloody Vampires: From Fiction to Film and Fashion (WI)

Crosslistings: COMP246 / ENGL287

Secondary Crosslisting

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films Nosferatu by Murnau and Herzog, Dracula by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by Hardwicke, and Daybreakers by Spierig, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar
**ENGL 367 (S)  Documentary Fictions**

Crosslistings: ENGL367 / ARTH367

**Primary Crosslisting**

Documentary Fictions investigates the history of reality-based film and video. Using readings drawn from cultural studies, film history and literary theory, we will consider films ranging from *Nanook of the North* through *Grizzly Man* and *Citizenfour*. How do contemporary technologies of representation (medical imaging, FaceTime, video surveillance) inflect our sense of the world, and of ourselves?

**Class Format:** seminar

**Requirements/Evaluation:** several written exercises; two or three media exercises; two multimedia essays

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** English majors; Art History majors; prospective English majors

**Expected Class Size:** 20

**Distributions:** (D1)

**Attributes:** ENGL Literary Histories C; FMST Core Courses

Not offered current academic year

**ENGL 388 (S)  Asian American Writing and the Visual Arts**

Crosslistings: AMST304 / COMP307 / ENGL388

**Secondary Crosslisting**

This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poetry, poetry "inspired by" paintings, video work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Berssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.

**Class Format:** seminar

**Requirements/Evaluation:** two papers, short assignments, presentation, participation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 15

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP

**Attributes:** AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses

Not offered current academic year
JAPN 153 (F) Japanese Film

Crosslistings: JAPN153 / COMP153

Secondary Crosslisting

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Class Format: lecture

Requirements/Evaluation: attendance, participation, some responses, two papers (5-7 pages), test

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students majoring in a related field

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Attributes: FMST Core Courses

Not offered current academic year

LATS 203 (F) Chicana/o Film and Video

Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203

Primary Crosslisting

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; ARTH post-1600 Courses; FMST Core Courses; GBST Borders, Exiles + Diaspora Studies Electives; LATS Core Electives

LATS 231 (S) Approaches to Media Studies: Analyzing Mediated Difference
Crosslistings: AMST231 / LATS231 / WGSS232

Primary Crosslisting

Media’s influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

Expected Class Size: 10

Distributions: (D2)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses; LATS Core Electives; WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

LATS 346 (F) Latinas/os and the Media: From Production to Consumption (WI)

Crosslistings: LATS346 / AMST346

Primary Crosslisting

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses; FMST Related Courses; LATS Core Electives;

MUS 149 (F) The Language of Film Music
Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced YouTube videos. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Bernard Herrmann, John Williams, James Horner, Alexandre Desplat, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: lecture/discussion

Requirements/Evaluation: assignments, quizzes, midterm essay, final creative project; midterm and final will also involve viewing/listening

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: given to juniors and seniors

Expected Class Size: 19

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

MUS 276 (F)  Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: lecture/discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 14

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under SCST

Attributes: FMST Core Courses

Not offered current academic year

PHIL 294 (S)  Philosophy and Narrative Fiction  (WI)

Crosslistings: PHIL294 / COMP294

Primary Crosslisting

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose—philosophers' preferred form of expression—clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by
its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Limit: 10

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP

Attributes: FMST Core Courses;

Not offered current academic year

PHIL 295 (F) Philosophy of Film and Film Theory (WI)

Crosslistings: COMP295 / PHIL295

Primary Crosslisting

Philosophy of film is a relatively young, but very rich and rapidly growing field. Its central question--What is film?--has been approached and framed in many different ways; naturally, the answers to that question, and the theoretical assumptions that underlie the answers, differ as well. This course will offer a selective overview of the debates that characterized philosophy of film since the early 20th century. Starting with early film theorists (such as Munsterberg, Arnheim, Bazin, and Soviet formalists), we will examine how their insights and disagreements influenced later developments in continental and analytic philosophy of film, and in film theory. While looking at film as art, as document, as experiment and as entertainment, we will always keep in sight specific theoretical assumptions that underlie different understandings of film, and different critical approaches to the medium. Some of the questions we will ask are: What is the nature of filmic representation? Does film accurately capture reality, as no other art does? Does it advance our thinking and increase our knowledge of the world? Or is it a supreme illusion, a dream-like escape, the domain in which the viewer's unconscious wishes are magically fulfilled? How does film generate meaning? Is film a creation of a single artist - the director, the author - or is it as a result of a loosely synchronized and not quite coherent collaboration of many different people, each guided by her or his particular vision? Is there a room for the notion of collective intention in filmmaking? What is the nature of audience's response to film? Why do we seek to experience through film fear and anguish that we avoid in our daily lives? Are there ethical considerations that should govern both film production and spectatorship? Finally, is there a reason for philosophy of film and film theory to exist as a separate field? Is philosophy of film really autonomous, independent from traditional philosophical disciplines which help generate its central questions, such as aesthetics, philosophy of art, epistemology, ontology, semiotics, ethics, social and political philosophy? Is film today really distinct from a number of new, emerging visual media? How should we think about the boundaries and methods of theorizing about film?

Class Format: seminar

Requirements/Evaluation: this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & two 5 pages long papers

Extra Info: the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: none; open to first year students

Enrollment Limit: 19
Enrollment Preferences: Philosophy majors and intended majors; students especially interested in film; and by seniority

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP

Not offered current academic year

REL 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A. (WI)

Crosslistings: REL229 / AMST229

Primary Crosslisting

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses;

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE) (WI)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Class Format: seminar

Requirements/Evaluation: three response papers, one short essay on film adaption, one video essay with a student partner

Extra Info: not available for the fifth course option

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on
RLFR 228 (S) Introduction to French and Francophone Film
Crosslistings: COMP298 / RLFR228

Primary Crosslisting
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: RLFR 201, 202, or 203, or by permission of instructor
Expected Class Size: 12
Distributions: (D1)
Attributes: FMST Core Courses

RLFR 240 (S) The Banlieue in Literature, Music, and Film
Crosslistings: RLFR240 / AFR241 / COMP281

Primary Crosslisting
In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Class Format: seminar
Requirements/Evaluation: journaling, presentation, in-class discussion, and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above
Enrollment Limit: 20
Enrollment Preferences: French majors, certificate, Africana and Comparative literature students
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Attributes: FMST Core Courses

Not offered current academic year
RLFR 261 (F) Haitian and French Caribbean Literatures and Films
Crosslistings: COMP283 / AFR261 / RLFR261

Primary Crosslisting

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the “French” Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling “intimist” stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

RLSP 208 (S) The Spanish Civil War in Literature and Film

The Spanish Civil War (1936-1939) has generated a vast bibliography and filmography that to this day reflect widely antagonistic interpretations of the conflict itself, its roots, and its impact. From the Spanish perspective, the war is the most important single event in understanding modern Spain. The ideals, passions, and consequences of the Spanish Civil War still divide Spaniards and have been recreated and relived by writers, artists, and filmmakers, and debated by historians. The course will begin with a historical introduction to the origins, development, and outcome of the war. Was the Spanish war a national struggle or an international struggle played out on Spanish soil? Along with studying internal Spanish political divisions, we will also consider the impact of the foreign policy positions of other countries—including Germany, Italy, the United States, and Russia—vis-à-vis Spain, as well as the role of the thousands of foreign volunteers who formed the International Brigades and came from all over the world to fight against Franco. With this historical basis, we will see how the themes and issues of the war are reflected in Spanish poetry, short fiction, novels, and films from the time of the war up through the present day. Readings will include works by Ayala, Cernuda, Neruda, Goytisolo, Sender, Fernan-Gomez, and Matute. Films will include documentaries as well as classic and contemporary features. Conducted in Spanish.

Class Format: seminar

Requirements/Evaluation: evaluations will be based on lively class participation, an oral report, short written assignments, and two papers

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

SCST 276 Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and
attitudes toward music projected by services like iTunes, YouTube, Spotify, and musically.

Class Format: lecture/discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 14

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under SCST

Attributes: FMST Core Courses

Not offered current academic year

SCST 315 (S) Blackness 2.0: Race, Film and New Technologies

Crosslistings: AMST315 / AFR315 / SCST315

Secondary Crosslisting

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the ‘real’ vs ‘virtual’ world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Distributions: (D2)

Attributes: AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses

WGSS 203 (F) Chicana/o Film and Video

Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203

Secondary Crosslisting

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/o in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays
**WGSS 232 (S) Approaches to Media Studies: Analyzing Mediated Difference**

Crosslistings: AMST231 / LATS231 / WGSS232

**Secondary Crosslisting**

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

**Class Format:** seminar

**Requirements/Evaluation:** participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

**Expected Class Size:** 10

**Distributions:** (D2)

**Attributes:** AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; ARTH post-1600 Courses; FMST Core Courses; GBST Borders, Exiles + Diaspora Studies Electives; LATS Core Electives

**Not offered current academic year**

**WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286

**Primary Crosslisting**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Class Format:** seminar
Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR or AMST; meets Division 1 requirement if registration is under ENGL

WGSS 312 (S) An American Family and “Reality” Television (WI)
Crosslistings: COMP316 / AMST333 / ARTH310 / WGSS312

Secondary Crosslisting
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called “Reality TV.” In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the “American dream.” Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: seminar

Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: junior majors, followed by senior majors

Expected Class Size: 14

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or COMP; meets Division 2 requirement if registration is under AMST or WGSS

WGSS 325 (F) Television, Social Media, and Black Women 'Unscripted'
Crosslistings: AFR325 / WGSS325

Secondary Crosslisting
Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in
television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Class Format: seminar

Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

Expected Class Size: 13

Distributions: (D2)

Attributes: FMST Core Courses

Not offered current academic year

WGS 341 (F) Cinematic Representations of Work and Migration after the Wall

Crosslistings: COMP341 / WGSS341

Secondary Crosslisting

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre and Time Out.

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and Women's Gender & Sexuality majors

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under WGSS

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary
photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

**Class Format:** seminar

**Requirements/Evaluation:** full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 12

**Department Notes:** In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL

**AMST 241 (F) Performing Masculinity in Global Popular Culture**

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

**Secondary Crosslisting**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

**Class Format:** seminar

**Requirements/Evaluation:** masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** in the event of over-enrollment, a short statement of interest will be solicited

**Expected Class Size:** 20

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA
AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Secondary Crosslistings

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none

AMST 332 (S) Race, Gender, and Performance from Literature to Social Media

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslistings

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

Class Format: seminar

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

Extra Info: not available for the fifth course option

Fall 2018

ARTH 221 (F) History of Photography

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to “the real.” By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Class Format: lecture

Requirements/Evaluation: two short papers, mid-term, and final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

ASST 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

Secondary Crosslisting

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper
COMP 111 (F) The Nature of Narrative (WI)
Crosslistings: COMP111 / ENGL120

Primary Crosslisting
This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does “how’ matter as much as, if not more than, “what”? We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Class Format: seminar
Requirements/Evaluation: meaningful class participation, two short papers, and a final paper of 10 pages, which will consist of a draft and a final version
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: FMST Related Courses;
Not offered current academic year

COMP 209 (F) Dolls, Puppets and Automatons (WI)

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer, watch a ballet by Kurt Joos and films by Fritz Lang and Ridley Scott, and watch fashion shows by Alexander McQueen, Jean-Paul Gaultier, and Viktor & Rolf. Conducted in English.

Class Format: seminar
Requirements/Evaluation: active class participation, one oral presentation, three 5- to 8-page papers
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature
Expected Class Size: 12
Distributions: (D1) (WI)
COMP 279 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under REL, ASST or WGSS; meets Division 1 requirement if registration is under COMP

Attributes: FMST Related Courses

Not offered current academic year

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Secondary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafradio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none
COMP 339 (S) Race, Gender, and Performance from Literature to Social Media

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslisting

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks’s *Venus*, David Henry Hwang’s *M. Butterfly*, and Young Jean Lee’s *The Shipment* to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

Class Format: seminar

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under COMP or THEA; meets Division 2 requirement if registration is under AMST, LATS or WGSS

Attributes: ASAM Related Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses

Not offered current academic year

This course provides an opportunity to develop an understanding of the theoretical and practical concepts underlying 2- and 3-dimensional computer graphics. The course will emphasize hands-on studio/laboratory experience, with student work focused around completing a series of projects. Students will experiment with modeling, color, lighting, perspective, and simple animation. As the course progresses, computer programming will be used to control the complexity of the models and their interactions. Lectures, augmented by guided viewings of state-of-the-art computer generated and enhanced images and animations, will be used to deepen understanding of the studio experience.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on progress in project work and two examinations

Prerequisites: this course is not open to students who have successfully completed a CSCI course numbered 136 or above

Enrollment Limit: 36

Enrollment Preferences: first-year students and sophomores who have not previously taken a computer science course

Expected Class Size: 36

Distributions: (D3) (QFR)

Attributes: FMST Related Courses;
ENGL 120 (F) The Nature of Narrative  (WI)
Crosslistings: COMP111 / ENGL120

Secondary Crosslisting
This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Class Format: seminar
Requirements/Evaluation: meaningful class participation, two short papers, and a final paper of 10 pages, which will consist of a draft and a final version
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: FMST Related Courses;

Not offered current academic year

ENGL 214 (S) Playwriting  (WI)
Crosslistings: THEA214 / ENGL214

Secondary Crosslisting
A studio course designed for those interested in writing and creating works for the theatre. The course will include a study of playwriting in various styles and genres, a series of set exercises involving structure and the use of dialogue, as well as individual projects. We will read and we will write, beginning with small exercises and working toward a longer final project. Students will be expected to share in and respond to each other's work on a weekly basis, and to present their own work regularly. At the end of the term, we will share our collaborative work with the community as part of an open studio experience.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance, completion of all class assignments, and class participation
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Theatre and English majors
Expected Class Size: 14
Distributions: (D1) (WI)
Attributes: FMST Related Courses;

Not offered current academic year

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work
Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting
Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a
number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Department Notes: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Distributions: (D1)

Distribution Notes: meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL

Attributes: EXPE Experiential Education Courses; FMST Related Courses

SEM Section: 01  W 1:10 pm - 3:50 pm  Olga Shevchenko, Barry Goldstein

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: Man of Aran, The Informer, The Quiet Man, Eat the Peach, In the Name of the Father, Butcher Boy, Intermission, Into the West, The Field, The Crying Game, December Bride, The Commitments, Michael Collins, Ondine, Six Shooter, In Bruges and The Guard; and we will also assess one or more short independent films such as Budawanny and Adam and Paul. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Class Format: seminar

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 19

Enrollment Preferences: English majors

Expected Class Size: 19

Distributions: (D1)

Attributes: ENGL Post-1900 Courses; FMST Related Courses
ENVI 368 (F)  Technology and Modern Society

Crosslistings: ENVI368 / SOC368

Secondary Crosslisting

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Distributions: (D2)

INTR 223 (S)  Image, Imaging, and Imagining: The Brain and Visual Arts

Crosslistings: NSCI318 / INTR223 / PSYC318

Secondary Crosslisting

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist’s motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how “outsider” artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

Class Format: seminar and empirical lab course

Requirements/Evaluation: evaluation will be based on a midterm, participation in class discussions, and a poster presentation of the empirical project

Extra Info: satisfies one semester of Division III requirement

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 101, an ARTH or ARTS course, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors; Psychology majors and Neuroscience concentrators

Expected Class Size: 12

Distributions: (D3)

Distribution Notes: meets Division 3 requirement if registration is under PSYC or INTR
LATS 241 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

Attributes: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

Not offered current academic year

LATS 335 (S) Race, Gender, and Performance from Literature to Social Media

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslisting

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? LATS 346 (F)  Latinas/os and the Media: From Production to Consumption  (WI)
Crosslistings: LATS346 / AMST346

Primary Crosslisting
This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages
Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority
Expected Class Size: 12
Distributions: (D2) (WI)

**REL 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture**

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

**Primary Crosslisting**

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period—-they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, weekly responses, final 15- to 18-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** REL, ASST, WGSS, and COMP majors will be given preference

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under REL, ASST or WGSS; meets Division 1 requirement if registration is under COMP

**Attributes:** FMST Related Courses

Not offered current academic year

**SOC 219 (S) Images and Society**

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, several response papers, a midterm paper and a take-home final

THEA 322 (S) Race, Gender, and Performance from Literature to Social Media

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslisting

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

Class Format: seminar

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

Extra Info: not available for the fifth course option
THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Primary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none
Enrollment Limit: 12
Expected Class Size: 10
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under THEA or COMP; meets Division 2 requirement if registration is under AMST
Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; EXPE Experiential Education Courses; FMST Related Courses

Not offered current academic year

WGSS 240 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Primary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes - had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper
WGSS 279 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture
Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under REL, ASST or WGSS; meets Division 1 requirement if registration is under COMP

Attributes: FMST Related Courses

Not offered current academic year

-----------------------------------------------------------------------------
MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;
- Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

  - AFR 360 Political Thought Frantz Fanon
  - ARTH 254 Manet to Matisse
  - HIST 390 Haitian and French Revolutions
  - RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and
if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their thesis two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 13 (W) Creative Portraiture in the Darkroom
Crosslistings: ARTS13 / RLFR13

Primary Crosslisting

In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

Class Format: mornings

Requirements/Evaluation: 2- to 3-page paper; formal public exhibit

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Materials/Lab Fee: $120

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 WRF 10:00 am - 12:50 pm PORG 10:00 am - 12:50 pm Daniel Goudrouffe

RLFR 30 (W) Honors Essay: French

To be taken by candidates for honors other than by thesis route.

Class Format: honors essay

Distributions: (D1)

Winter 2019

HON Section: 01 TBA Jennifer L. French

RLFR 31 (W) Senior Thesis: French

To be taken by students registered for French 493-494.

Class Format: thesis

Distributions: (D1)

Winter 2019

HON Section: 01 TBA Jennifer L. French

HON Section: 02 TBA Brian Martin

RLFR 99 (W) Independent Study: French

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
**Class Format:** independent study

**RLFR 101 (F) Introduction to French Language and Francophone Cultures**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Class Format:** the class meets five hours a week

**Requirements/Evaluation:** evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Extra Info:** students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** none; for students who have never formally studied French; students who have previously studied French must take the French Placement Test during First Days

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)

---

Fall 2018

**LEC Section:** 01    M-F 9:00 am - 9:50 am     Brian Martin

**RLFR 102 (S) Introduction to French Language and Francophone Cultures**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Class Format:** the class meets five hours a week

**Requirements/Evaluation:** evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Extra Info:** students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

**Prerequisites:** none; for students who have taken less than two years of high school French

**Enrollment Limit:** 20

**Enrollment Preferences:** first- and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)
RLFR 103 (F)  Intermediate Studies in French Language and Francophone Cultures
As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world. Conducted in French.

Class Format: lecture; the class meets five days per week
Requirements/Evaluation: active class participation, workbook and grammar exercises, short compositions, chapter tests, midterms, and final exam
Prerequisites: RLFR 101-102, or by placement test
Enrollment Limit: 20
Enrollment Preferences: all are welcome, but if overenrolled, preference is given to first-year and second-year students and those with compelling justification for admission
Expected Class Size: 20
Department Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year
Distributions: (D1)

Fall 2018

RLFR 104 (S)  Intermediate French II: Advanced Intermediate Studies in French
As a continuation of French 103, this course is primarily conceived to enable students to express themselves with fluency and to easily comprehend the spoken and written language. Leveraging imitation and pastiche as a springboard toward original creation, students will read passages taken from French and francophone literature, watch interviews and cinematic productions, listen to French-language music, and examine art and photography made in francophone settings, all while developing a wide range of vocabulary and cultivating their oral and written expression. Conducted in French.

Class Format: class meets two hours a week plus a third conference hour with French teaching associates
Requirements/Evaluation: class participation, short papers, oral class presentations, quizzes and exams
Extra Info: not available for the fifth course option
Prerequisites: RLFR 103; this course is primarily for continuing RLFR 103 students; students who have placed at the advanced intermediate level on the placement exam should register for RLFR 105
Enrollment Limit: 20
Enrollment Preferences: continuing 103 students and potential French majors
Expected Class Size: 20
Department Notes: after successfully completing RLFR 104, students may register for RLFR 201
Distributions: (D1)

Spring 2019

RLFR 105 (F)  Advanced French: Advanced Studies in French Language and Francophone Culture
In this course, we will concentrate on expanding your vocabulary and polishing your written and oral skills while focusing on the analysis of French and Francophone cultures and the concepts that define them. In particular, we will explore three themes: *aimer, avoir peur, and le passé colonial* de la France as they relate to national identity in France, North Africa, and the French Caribbean. We will read short literary, theoretical and historical texts, and explore the production of popular culture and how it informs contemporary France. At the same time, we will review and practice advanced grammar concepts. *Conducted in French.*

**Class Format:** lecture/conference

**Requirements/Evaluation:** class participation, short papers, presentations and quizzes, final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 20

**Expected Class Size:** 15

**Distributions:** (D1)

---

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction**

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1830 to 2010, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ermans, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, grammar exercises, two short papers, midterm, and final paper

**Extra Info:** not available for the fifth course option

**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)

---

**RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1804-2016)**

Crosslistings: RLFR202 / WGSS201

**Primary Crosslisting**

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying “Let us dishonor war!” From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will
focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Anglo, Pontecorvo, and Duras. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106 or 107; or by French placement exam; or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS

Not offered current academic year

RLFR 203 (F) Introduction to Francophone Literatures

Crosslistings: AFR204 / COMP282 / RLFR203

Primary Crosslisting

What is the Francophone world comprised of? Who speaks French today and why? What does the idea of Francophonie really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the littérature-monde manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of Francophonie so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (l'hexagone), and Haïti among others.

Class Format: seminar

Requirements/Evaluation: presentation, journaling, final project, participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLFR 105 and above, placement exam or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate, Africana and Comp. Lit

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

Attributes: GBST African Studies Electives; GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

RLFR 204 (F) Intro to French Literature: French Drama from Classicism to the Theatre of the Absurd

What can we learn about French society through its theater? This course proposes to examine the evolution of French plays from the 17th to the 20th century within their political, social and cultural contexts. Readings plays by Molière, Beaumarchais, Musset, Anouilh, Beckett and Ionesco will allow students to see how the theater as a genre engages the public through self-reflection and analysis. Readings will be complemented by theoretical texts and film versions of the plays. Questions regarding the nature of the play itself (dramatic structure), the role of space and the role of language, the importance of acting and the public's involvement will be examined and will evolve, into a mini staging of our own.

Class Format: seminar

Requirements/Evaluation: one short response paper weekly; 2 short essays and one final paper
Prerequisites: RLFR 105 or permission of instructor

Enrollment Preferences: open to those who have completed RLFR 105, 107 or a 200 level course; if overenrolled, preference will be given to French majors

Distributions: (D1)

Not offered current academic year

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE) (WI)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Class Format: seminar

Requirements/Evaluation: three response papers, one short essay on film adaption, one video essay with a student partner

Extra Info: not available for the fifth course option

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations. WI: This course is WI because students write three response, 4-page papers and one 7-page script for the narration in their video essay.

RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age

The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of patrimoine, visual culture, and (trans)national identity. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10
Distributions: (D1)

RLFR 220 (S)  Fairy Tales: Love and Politics at the Sun King’s Court
This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period—which critics have sometimes called the "Grand Siècle"—develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 15

Distributions: (D1)

RLFR 224 (S)  Sexuality and Seduction in Nineteenth and Twentieth-Century France  (DPE)
Crosslistings: WGSS224 / RLFR224

Primary Crosslisting
In 1857, both Flaubert's Madame Bovary and Baudelaire's Les Fleurs du mal were put on trial for sexual indecency and "crimes against public morality." In 1868, Le Figaro attacked Zola's novel Thérèse Raquin as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers, a midterm, and a longer final paper

Extra Info: not available for the fifth course option

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if overenrolled, preference will be given to French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 18
Department Notes: if the course is overenrolled, students will submit a form online

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS. DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Crosslistings: RLFR225 / COMP224

Secondary Crosslisting

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawning of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jünet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

Expected Class Size: 18

Distributions: (D1) (DPE)

Distribution Notes: DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity during WW1. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

RLFR 226 (S) Black France/France Noire

Crosslistings: RLFR226 / AFR226

Primary Crosslisting
On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French and Africana Studies concentrators
Expected Class Size: 12
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR

RLFR 228 (S) Introduction to French and Francophone Film
Crosslistings: COMP298 / RLFR228
Primary Crosslisting
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Païcy, Peck, and Sissako. Conducted in French.
Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option

RLFR 229 (S) Coffee, Sugar, Wigs, and Desks: Writing and Material Life in Early Modern France (WI)
Crosslistings: RLFR229 / COMP299
Primary Crosslisting
This tutorial considers the relationship between slavery, colonial commerce, and the burgeoning market in material and cultural goods. We look at France's "consumer revolution" through the lens of four material objects--sugar, coffee, wigs, and desks--to consider how eighteenth-century concepts
of race, gender, and social status related to taste, sociability, appearance, and writerly identity. Readings by Voltaire, Aulnoy, Genlis, Bernardin de Saint-Pierre, and others will be paired with critical texts from literary and material historians as well as objects found in local collections.

Class Format: tutorial
Requirements/Evaluation: five papers and five responses
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105, a 200-level course, or instructor permission
Enrollment Limit: 10
Enrollment Preferences: first- and second-year students
Expected Class Size: 10
Distributions: (D1) (WI)

Not offered current academic year

RLFR 240 (S)  The Banlieue in Literature, Music, and Film
Crosslistings: RLFR240 / AFR241 / COMP281
Primary Crosslisting
In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Class Format: seminar
Requirements/Evaluation: journaling, presentation, in-class discussion, and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above
Enrollment Limit: 20
Enrollment Preferences: French majors, certificate, Africana and Comparative literature students
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Attributes: FMST Core Courses

Not offered current academic year

RLFR 250 (S)  Women in Print:Gender, Power, and Publishing in Seventeenth-and Eighteenth-Century France
What did it mean to publish--or not--"as a woman" in seventeenth- and eighteenth-century France? Why did writers adopt or reject a feminine pen name at a time of women's legal, economic, and social subordination? Readings from Scudéry, La Fayette, Guilleragues, Graffigny, Gouges, and Duras will be informed by contemporary theoretical and historical work on gender, authorship, and women's participation in political, religious, and public life. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, two short presentations, two short papers, final paper
Prerequisites: RLFR 201, 202, or 203, or by placement test, or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French, Comparative Literature, Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission
Expected Class Size: 20
Distributions: (D1)

Not offered current academic year

RLFR 260 (F)  Reading Comics from the French-Speaking World
From political cartoons and satire of the 19th century to contemporary graphic novels, the *bande dessinée* has a long history in the French-speaking world. We will read classics such as Astérix and Tintin, and contemporary BD from France, Québec, Côte d'Ivoire, Morocco, Rwanda, and Guadeloupe to analyze how they tackle subjects such as nation, empire, sexuality, biography, war and human rights. We will pay attention to the visual form and critical theory of the genre. *Conducted in French.*

**Class Format:** seminar

**Requirements/Evaluation:** weekly response papers, two short papers, presentation and final research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** RLFR 201, 202, or 203, or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students, Comparative Literature majors

**Expected Class Size:** 15

**Distributions:** (D1)

Not offered current academic year

**RLFR 261 (F) Haitian and French Caribbean Literatures and Films**

Crosslistings: COMP283 / AFR261 / RLFR261

**Primary Crosslisting**

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

**Class Format:** seminar

**Requirements/Evaluation:** in-class discussions, journaling, steps towards final project, final project and presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** French majors, French certificate, Africana and Comparative Literature students

**Enrollment Limit:** 15

**Enrollment Preferences:** 105 and above, French majors, French certificate, Africana and Comparative Literature students

**Expected Class Size:** 10

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

**Attributes:** FMST Core Courses

Not offered current academic year

**RLFR 300 (F) Albert Camus and the Philosophy of Living (DPE)**

Why is Albert Camus so well known? Why has this XXth century humanist, writer and philosopher, touched so many lives? From exile to kinship, from despair to resistance and rebellion, Camus invites us to reflect on the human condition with lucidity and the knowledge that happiness and serenity can cohabit with incomprehension and injustice. We are like Sisyphus, as he rolls the rock back up the hill over and over again, he has time to think of his condition, realizing that in spite of the struggle and because of it, he can find meaning and happiness in life. What remains to define is what is "happiness"? We will examine in depth Camus' major works of fiction: the novels (*L'Etranger*, *La Peste*) and short stories (*in L'Exil et le royaume, L'Envers et l'endroit*), his philosophical essay (*Le Mythe de Sisyphe*) one political work (*Lettres à un ami allemand*) and his last posthumous novel (*Le Premier Homme*). Students must be prepared to actively discuss these works and their themes as we interpret them. *Conducted in French.*

**Class Format:** seminar
Requirements/Evaluation: oral presentations, two papers (5 pages each), one final paper (8-10 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any RLFR 200 level at Williams or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: French majors or certificate candidates
Expected Class Size: 15
Materials/Lab Fee: packet
Distributions: (D1) (DPE)
Distribution Notes: DPE: In this course we will focus on the themes of exile, religion, social injustice and inequalities through the works of Camus. Many discussions will center on the responsibility individual has to refute injustice, rebel against it, and find a balance in a humanistic approach

Fall 2018
SEM Section: 01 Cancelled

RLFR 305 (F) Where We Are & Where We Go: Spaces & Places of Contemporary France
How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from “here” or “there”? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. Conducted in French.

Class Format: seminar
Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)
Extra Info: not available for the fifth course option
Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad (Francophone countries) particularly welcome
Expected Class Size: 20
Distributions: (D1)

Fall 2018
SEM Section: 01 TR 9:55 am - 11:10 am Carl B. Cornell

RLFR 309 (F) Contemporary Short Stories from North Africa
Crosslistings: RLFR309 / AFR307
Primary Crosslisting
Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zalzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.

Class Format: seminar/discussion
**RLFR 310 (S) Le Moyen Âge en images: Decoding the Middle Ages**

This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to *bandes dessinées* that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? *Conducted in French*

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, reading journal (with written reflections), quizzes, mid-semester project: une bande dessinée, and final paper

**Prerequisites:** successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**Expected Class Size:** 12

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR

**Attributes:** GBST African Studies Electives

**RLFR 316 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)**

Crosslistings: WGSS315 / RLFR316

**Primary Crosslisting**

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*
Class Format: seminar
Requirements/Evaluation: active class participation, midterm exam, and two to three papers
Extra Info: not available for the fifth course option

Not offered current academic year

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity
Crosslistings: COMP318 / RLFR318
Primary Crosslisting
In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Loret, Ducastel, Martineau, Téchiné, Charef. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, midterm exam, and two to three papers
Prerequisites: a 200-level course; or by placement test; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission; seniors returning from study abroad (in France or other Francophone countries) are particularly welcome
Expected Class Size: 20
Distributions: (D1)

RLFR 326 (S) Molière in Performance
Like Shakespeare, the work of France's greatest playwright is less a timeless monument than a living body perpetually in motion. This course offers a dual approach to the theater of Molière. The first half of the semester will focus on readings and analysis of printed plays in the context of the seventeenth century. The second half of the semester focuses on a collective project that combines student research and performance of a single play. Possible works: Les Femmes savantes, L'Ecole des femmes, Le Misanthrope, L'Avare, Le Bourgeois gentilhomme. Throughout the semester, we will explore the dynamic relationships between tradition and innovation, elite and popular culture, actors and audience, past and present. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, one presentation, two short papers, final performance project and accompanying final paper
Prerequisites: RLFR 201, 202, or 203, or by placement test, or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French, Comparative Literature, Theater, and Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission
Expected Class Size: 20
Distributions: (D1)

Not offered current academic year

RLFR 410 (S)  Senior Seminar: Landscapes of Movement and Migration in French
How do migration and movement construct and disrupt landscapes of identity—home, city and nation—in the French-speaking world? How do migration and movement contribute to conditions of alienation, nostalgia and violence? This seminar explores such fundamental questions and asks us to think about how in an increasingly mobile and de-territorialized world, place is imagined, experienced and remembered. Over the course of the semester, we will examine theoretical texts on memory, space, identity and movement, and analyze literary and film narratives of migration that focus on: the immigration experience in France, the construction of an Atlantic identity between Africa, the Caribbean, Europe and the Americas, internal migration between the country and the city, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable places of memory. Works by Nora, Benjamin, Deleuze, Barthes, Charef, Chamoiseau, Glissant, Diome, Condé, Mernissi, Poulain, Pineau, Sembene, and Binebine among others. Conducted in French.
Class Format: seminar
Requirements/Evaluation: weekly 1-page response papers, short mid-term paper and a final research paper
Extra Info: qualified students in first, second, or third years of their career at Williams can enroll in the Senior Seminar with the permission of the instructor; however, this will not replace the senior seminar requirement in the senior year of French majors
Prerequisites: any RLFR course above 203, or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: seniors French majors or completing the certificate in French, but open to advanced students of French
Expected Class Size: 10
Distributions: (D1)
Not offered current academic year

RLFR 412 (S)  Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers
Crosslistings: RLFR412 / WGSS408
Primary Crosslisting
In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.
Class Format: seminar
Requirements/Evaluation: active class participation, midterm exam, and two to three papers
Prerequisites: a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor
Enrollment Limit: 16
Enrollment Preferences: French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission
RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film (DPE) (WI)
Crosslistings: RLFR414 / COMP414

Primary Crosslisting

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughedir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

Class Format: seminar
Requirements/Evaluation: three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay
Extra Info: not available for the fifth course option
Prerequisites: 200 RLFR level courses
Enrollment Limit: 19
Enrollment Preferences: French and Comparative Literature majors and certificate students
Expected Class Size: 10
Distributions: (D1) (DPE) (WI)
Distribution Notes: DPE: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. WI: This course is writing-intensive because it includes 9 pages of response papers; 1 page with a thesis statement, methodology, and works cited list; plus 10 pages of script for video essay

Spring 2019
SEM Section: 01 MR 1:10 pm - 2:25 pm Sophie F. Saint-Just

RLFR 415 (S) Senior Seminar: Banned In France: Literature and Censorship in the Eighteenth-Century

This seminar will explore the role of censorship in eighteenth-century France, another complex period transformed in part by unprecedented access to knowledge. Students will critically assess a range of works that were, before or after publication, repressed or altered by various religious and civil authorities, editors, publishers, and, in some cases, audiences. Discussions will focus on the formal and thematic content of each work, as well as its broader place in Enlightenment and French Revolutionary literature and culture. Analysis of such historically-specific concepts as tolerance, obscenity, and public censorship will be supported by critical work and commentary from the eighteenth century and the present day. As a central feature of the course, students will conduct a semester-long research project that will draw on readings which may include Voltaire, Diderot, Rousseau, Sade, Beaumarchais, Chénier, Gouges, Charrière, Staël, and others. Key issues include copyright and the literary market, self-censorship, public opinion and public censure, gender and canon formation, blasphemy, pornography, and the politics of incitement. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, weekly online postings, semester-long research project involving an abstract and annotated bibliography at mid-term, and final research paper
Prerequisites: any 200-level RLFR course
Enrollment Limit: 15
Enrollment Preferences: senior French majors or students completing the Certificate in French, but open to advanced students of French
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

RLFR 493 (F) Senior Thesis: French
French senior thesis.
Class Format: independent study
Extra Info: this is part of a full-year thesis (493-494)
Distributions: (D1)

Fall 2018
HON Section: 01    TBA    Jennifer L. French

RLFR 494 (S) Senior Thesis: French
French senior thesis.
Class Format: independent study
Extra Info: this is part of a full-year thesis (493-494)
Distributions: (D1)

Spring 2019
HON Section: 01    TBA    Jennifer L. French

RLFR 497 (F) Independent Study: French
French independent study.
Class Format: independent study

Fall 2018
IND Section: 01    TBA    Jennifer L. French

RLFR 498 (S) Independent Study: French
French independent study.
Class Format: independent study
Distributions: (D1)

Spring 2019
IND Section: 01    TBA    Jennifer L. French

RLFR 511 (F) Intensive French Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.
Class Format: classes meet twice weekly and are conducted in English
Requirements/Evaluation: evaluation will be based on class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French
Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

Distributions: (D1)

Fall 2018
LEC Section: 01    TR 8:30 am - 9:45 am    Pramila Kolekar

RLFR 512 (S)  Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read (excerpts from museum catalogues; the Gazette des Beaux-Arts and other publications; Salons by Diderot, Baudelaire, and Thoré; artists on their works; and critics such as Francastel, Ch. Sterling, M. Faré, Valéry, Focillon) will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.

Class Format: seminar

Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination

Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

Distributions: (D1)

Spring 2019
LEC Section: 01    TR 8:30 am - 9:45 am    Pramila Kolekar
MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The Geosciences major includes at least one and at most two 100-level courses:

- GEOS 100 Introduction to Weather and Climate
- GEOS 101 The Co-Evolution of Earth and Life
- GEOS 102 An Unfinished Planet
- GEOS 103 Global Warming and the Reshaping of Landscapes
- GEOS 104 Oceanography

At least two 200-level courses selected from this group:

- GEOS 201 Geomorphology
- GEOS 202 Mineralogy
- GEOS 205 Earth Resources
- GEOS 210/MAST 211 Oceanographic Processes
- GEOS 212/BIOL 211 Paleobiology
- GEOS 214 Mastering GIS
- GEOS 215 Climate Changes

At least two 300-level courses selected from this group:

- GEOS 301 Structural Geology
- GEOS 302 Sedimentology
- GEOS 303 Igneous and Metamorphic Petrology

At least one of the following 400-level courses:

- GEOS 401 Global Tectonics and the Rise of Mountains
Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
GEOS 11 (W) River Restoration in Practice
River restoration is a growing billion-dollar international industry. Since the environmental movement began in the 1960s and 1970s, renewed interest in the beauty and benefits of healthy streams has resulted in increased research, funding, and applied restoration of rivers, streams, wetlands, and riparian corridors. The restoration of rivers and streams comes in many different forms including dam removal and in-channel habitat restoration. In this course, we'll learn about the history of restoration and the basics of fluvial geomorphology and hydrology. We will gain applied knowledge and experience with the practice of restoration through a combination of lectures, classroom exercises, conversations with restoration advocates and practitioners, field trips and field data collection. A final practicum will involve the design of a restoration project. The course will generally be structured around three sections: Science: Week 1 will primarily involve lectures and classroom exercises and discussion of the literature, learning about the history and evolution of river restoration as well as the basics of the science that drives restoration. Data Collection and Analysis: Week 2 will focus on data collection and analysis typically required for river restoration projects. This will include topographic surveying, geomorphic and habitat mapping, pebble counts, stream discharge measurements, GIS mapping, and hydraulic modeling. Intensive Practicum: Small groups of students will be given a real restoration project example to research, analyze, and design. This practicum will include data collection, GIS analysis, flow modeling, and design plan sheets describing the restoration plan. The class will meet on average 8 hours per week and will include up to 3 day-long field trips. Students should expect to be outside for portions of the day collecting field data in/near rivers in winter conditions. Adjunct Instructor Bio: Nick Nelson is a fluvial geomorphologist and regional director for Inter-Fluve, a river and wetland restoration company. He has assessed hundreds of miles of river and designed/managed the removal of more than a dozen dams in New England. He has lectured at the University of MN, Tufts University, University of TN, and currently teaches courses at Northeastern University and the Harvard Graduate School of Design.

Class Format: afternoons
Requirements/Evaluation: students will be evaluated based on their final group design submittal
Prerequisites: none, though some background in GIS and a scientific field (geology, biology, ecology, etc.) will be useful
Enrollment Limit: 15
Enrollment Preferences: background in scientific fields of study
Materials/Lab Fee: $16
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 Cancelled

GEOS 12 (W) Geology of the National Parks
Crosslistings: ENVI12 / GEOS12
Primary Crosslisting
A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well-illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and bibliography will be distributed by the presenter at the time of the report.

Class Format: mornings
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference to first-year students
Materials/Lab Fee: approximately $125 for books

Winter 2019
LEC Section: 01  M-F 10:00 am - 11:50 am PORG 10:00 am - 11:50 am  Bud Wobus

GEOS 22 (W) Geosciences Research
Students will spend part of Winter Study doing fieldwork collecting data. Back at Williams, they will analyze the data. Each student will have responsibility for a subset of the data, and the individual sub-projects will contribute to the overall research.
Class Format: to be arranged with instructor
Requirements/Evaluation: final project
Prerequisites: two Geosciences courses; permission of the instructor required before registering for the course
Enrollment Limit: 3
Expected Class Size: 3
Materials/Lab Fee: $0
Not offered current academic year

GEOS 31 (W) Senior Thesis: Geosciences
To be taken by students registered for Geosciences 493-494.
Class Format: thesis
Distributions: (D3)

Winter 2019
HON Section: 01  TBA  Mea S. Cook

GEOS 99 (W) Independent Study: Geosciences
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Distributions: (D3)

Winter 2019
IND Section: 01  TBA  Mea S. Cook

GEOS 100 (S) Introduction to Weather and Climate
Crosslistings: GEOS100 / ENVI100
Primary Crosslisting
How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that oceans and glaciers interact with the climate. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and learning how to run a climate model on a computer.
Class Format: lecture
GEOS 101 (F)  The Co-Evolution of Earth and Life
Crosslistings: GEOS101 / ENVI105

Primary Crosslisting
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Distributions: (D3)
Attributes: EXPE Experiential Education Courses
plate tectonics model—one of the fundamental scientific accomplishments of the past century—to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

**Class Format:** lecture, three hours per week; lab (several involving field work), two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

**Requirements/Evaluation:** evaluation will be based on two hour-tests, weekly lab work, and a scheduled final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 40

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses

---

**GEOS 103 (F) Global Warming and Environmental Change**

Crosslistings: ENVI103 / GEOS103

**Primary Crosslisting**

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends are where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

**Class Format:** lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

**Requirements/Evaluation:** evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 48

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses; SCST Related Courses

GEOS 104 (S) Oceanography
Crosslistings: MAST104 / ENVI104 / GEOS104

Primary Crosslisting
The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 48
Distributions: (D3)
Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses
Not offered current academic year

GEOS 201 (F) Geomorphology
Crosslistings: GEOS201 / ENVI205

Primary Crosslisting
Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains
Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation
Prerequisites: any 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Expected Class Size: 15
Distributions: (D3)
Attributes: AMST Space and Place Electives; ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses

Fall 2018
LEC Section: 01    TR 11:20 am - 12:35 pm    José A. Constantine
LAB Section: 02    R 1:00 pm - 4:00 pm    José A. Constantine

GEOS 202 (S) Mineralogy
This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical
emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Distributions: (D3)

Attributes: EXPE Experiential Education Courses; MTSC Courses

Spring 2019

LEC Section: 01    TR 8:30 am - 9:45 am     Bud Wobus

GEOS 205 (F)  Earth Resources

Crosslistings: ENVI207 / GEOS205

Primary Crosslisting

The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth’s resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses.

Class Format: lecture

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Distributions: (D3)

Attributes: ENVI Natural World Electives

Not offered current academic year

GEOS 210 (F)  Oceanographic Processes

Crosslistings: GEOS210 / MAST211

Secondary Crosslisting

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.
**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

**GEOS 212 (S) Paleobiology**

Crosslistings: BIOL211 / GEOS212

**Primary Crosslisting**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

**Class Format:** lecture/laboratory; field trip to the Paleozoic of New York State

**Requirements/Evaluation:** evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 12

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3)

**Attributes:** EXPE Experiential Education Courses; MAST Interdepartmental Electives

**GEOS 214 (S) Mastering GIS**

Crosslistings: GEOS214 / ENVI214

**Primary Crosslisting**

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field
data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** at least one introductory course in BIOL, ENVI, or GEOS

**Enrollment Limit:** 20

**Enrollment Preferences:** Geosciences and Biology majors and Environmental Studies majors and concentrators

**Expected Class Size:** 20

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Methods Courses; EXPE Experiential Education Courses

**GEOS 215 (F) Climate Changes**

Crosslistings: GEOS215 / ENVI215

**Primary Crosslisting**

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 14

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Environmental Science; EXPE Experiential Education Courses; MAST Interdepartmental Electives; SCST Related Courses

Fall 2018

LAB Section: 02  W 1:00 pm - 4:00 pm  Mea S. Cook

**GEOS 220 (S) Evolution of and on Volcanic Islands** (WI)

Crosslistings: ENVI219 / GEOS220

**Primary Crosslisting**
Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Class Format: tutorial
Requirements/Evaluation: evaluation based on five written papers.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: 100-level GEOS course or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: geosciences majors and students with a demonstrated interest in geosciences
Expected Class Size: 10
Distributions: (D3) (WI)
Attributes: ENVI Natural World Electives;
Not offered current academic year

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WI)
Crosslistings: GEOS221 / ENVI222

Primary Crosslisting

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial
Requirements/Evaluation: weekly papers and a final oral presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students
Expected Class Size: 10
Distributions: (D3) (WI)
Distribution Notes: WI: This course will involve significant writing in terms of weekly assignments.
Attributes: EXPE Experiential Education Courses;
GEOS 234 (S) Introduction to Materials Science  (QFR)
Crosslistings: GEOS234 / PHYS234

Secondary Crosslisting

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week), plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: based on weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Distributions: (D3) (QFR)

Attributes: MTSC Courses;

Not offered current academic year

GEOS 255 (F) Environmental Observation
Crosslistings: GEOS255 / ENVI255

Primary Crosslisting

To study the environment, we need to observe and measure it. We collect data—numbers that represent system states—and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, LIDAR/RADAR, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, biosphere, and erosion processes. Students will carry out a research project using observation techniques covered in class to explore a part of the local environment.

Class Format: lecture

Requirements/Evaluation: Labs, one midterm exam, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 10

Enrollment Preferences: sophomores

Expected Class Size: 10

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses
GEOS 301 (F) Structural Geology (QFR)

The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures, stress and strain analysis, deformation mechanisms in rocks, and the large scale forces responsible for crustal deformation. The laboratories cover geologic maps and cross sections, folds and faults, stereonet analysis, field techniques, strain, and stress.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on weekly laboratory exercises, problem sets, a midterm exam, and a final exam; many of the labs and problem sets use geometry, algebra, and several projection techniques to solve common problems in structural geology

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GEOS 101 or 102, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Distributions: (D3) (QFR)

GEOS 302 (S) Sedimentology (WI)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; two half-day and one all-day field trip

Requirements/Evaluation: evaluation based on lab work, writing assignments, participation in discussions, and a final paper

Extra Info: writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 100-level GEOS course AND GEOS 202 (which may be taken concurrently, with permission of instructor)

Enrollment Limit: 12

Expected Class Size: 12

Distributions: (D3) (WI)

Attributes: EXPE Experiential Education Courses; MAST Interdepartmental Electives;

Not offered current academic year

GEOS 303 (F) Igneous and Metamorphic Petrology

Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks--volcanic, plutonic, and metamorphic--that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; several field trips including one full day trip to central New Hampshire

Requirements/Evaluation: evaluation will be based on lab work, one hour test, and a final exam
GEOS 312 (S) Mass Extinctions: Patterns and Processes (WI)
Over the last 542 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct and groups like the dinosaurs vanished from the planet after over 100 million years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 101 or GEOS 212; or permission of instructor + any 200 level GEOS course
Enrollment Limit: 10
Enrollment Preferences: GEOS majors
Expected Class Size: 10
Distributions: (D3) (WI)
Not offered current academic year

GEOS 324 (S) Corals and Sea Level
Crosslistings: GEOS324 / MAST324 / ENVI324
Primary Crosslisting
In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory
Requirements/Evaluation: short papers, labs, participation in discussion, and a research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip
GEOS 401 (F)  Global Tectonics and the Rise of Mountains

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. Digital elevation models integrated with geologic maps and cross-sections will be used to construct 3D models. We will also explore ways in which tectonics, climate, and erosion affect each other during the evolution of mountain ranges. Class meetings will include lectures and discussions of assigned reading. Labs will include field trips and computer-based projects.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; five field trips including one all-day trip
Requirements/Evaluation: participation during class and field trip discussions; five lab reports based on field trips, and 3 four page papers based on journal articles
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 301 or 303 or permission of instructor
Enrollment Preferences: senior Geosciences majors

Not offered current academic year

GEOS 404 (S)  Coastal Processes and Geomorphology  (QFR)

Crosslistings: ENVI404 / MAST404 / GEOS404

Primary Crosslisting

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: GEOS 104 or permission of instructor
Enrollment Limit: none
GEOS 405 (F) Geochemistry: Understanding Earth's Environment
Crosslistings: ENVI405 / GEOS405

Primary Crosslisting

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Attributes: ENVI Natural World Electives
Not offered current academic year

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data.

Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Class Format: seminar; two lecture/seminars a week plus a lab
Requirements/Evaluation: labs, short papers, final grant proposal and presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Senior Geoscience majors
Expected Class Size: 10

STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is a compact intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202 combines advanced language study with the examination of topics in German-speaking cultures. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case.

THE CERTIFICATE IN GERMAN

To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be...
exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

**Required Courses**

- German 101
- German 102
- German 103
- German 104
- German 201

**Elective Courses**

- at least one course (in German or English) on German cultural history (literature, art, drama, music)
- at least one course (in German or English) on German intellectual, political, or social history

**THE MAJOR**

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

**Examples of appropriate courses in other departments are:**

- Art History 267 Art in Germany: 1960 to the Present
- History 239 Modern German History
- History 338 The History of the Holocaust
- Music 108 The Symphony
- Music 117 Mozart
- Music 118 Bach
- Music 120 Beethoven
- Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

**THE DEGREE WITH HONORS IN GERMAN**

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**GERM 12 (W) The Grand Hotel in Modern Fiction and Film**

Crosslistings: COMP12 / GERM12

Primary Crosslisting
The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and possible class confusion, of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Grand Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality. In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a riotous echo chamber, mirroring precarious lives of illegal migrants and displaced workers.

Class Format: mornings
Requirements/Evaluation: 10-page paper
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $10 plus cost of books

Winter 2019

GERM 16 (W)  The Life and Death of a Vanished Nation: East Germany, 1949-1990
Crosslistings: GERM16 / HIST16
Secondary Crosslisting
In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet twelve times -- three or four times per week (1½ -3½ hours each meeting) for the three full weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference given to History and German majors
Materials/Lab Fee: $20 plus cost of books

Winter 2019

IND Section: 01  TBA   Helga Druxes

**GERM 101 (F) Elementary German**

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

**Class Format:** lecture/discussion; meets five days a week

**Requirements/Evaluation:** active class participation, written homework, short compositions, oral exercises and tests

**Extra Info:** students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 18

**Expected Class Size:** 15

**Distributions:** (D1)

Fall 2018

LEC Section: 01  M-F 10:00 am - 10:50 am   Gail M. Newman

**GERM 102 (S) Elementary German**

German 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework
assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. This language course is conducted in German.

Class Format: seminar
Requirements/Evaluation: active class participation, midterm & final Exams, essays, quizzes, homework
Extra Info: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken
Extra Info 2: not available for the fifth course option
Prerequisites: GERM 101 or equivalent
Enrollment Limit: 18
Enrollment Preferences: first-year students
Expected Class Size: 15
Distributions: (D1)

Spring 2019
SEM Section: 01 M-F 10:00 am - 10:50 am Natalie E. Lozinski-Veach

GERM 103 (F) Intermediate German I
In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, the students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts, to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The course is taught in German. Active and dedicated participation including homework is expected.
Class Format: seminar
Requirements/Evaluation: active class participation, midterm and final exams, quizzes, essays, homework
Prerequisites: GERM 102 or equivalent
Enrollment Limit: 18
Enrollment Preferences: first-year students
Expected Class Size: 15
Distributions: (D1)

Fall 2018
SEM Section: 01 MWF 9:00 am - 9:50 am Natalie E. Lozinski-Veach

GERM 104 (S) Intermediate German II
The prerequisite to all advanced courses in German. Practice in speaking and writing; reading in a variety of contemporary texts ranging from interviews to social documentary to short stories. Conducted in German.
Class Format: discussion, small group work
Requirements/Evaluation: daily short writing assignments, small group work, midterm, and final
Prerequisites: GERM 103 or equivalent
Enrollment Limit: 20
Expected Class Size: 15
Distributions: (D1)
Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Class Format: tutorial
Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 8
Distributions: (D1) (DPE) (WI)
Distribution Notes: DPE: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight. WI: Multiple writing and rewriting assignments that build on one another, totaling 20 pages or more, plus careful attention to writing practice in class.

Fall 2018
TUT Section: T1 TBA Natalie E. Lozinski-Veach

GERM 120 (S) Turbodeutsch: Accelerated Elementary German
An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Class Format: seminar
Requirements/Evaluation: active participation, tests, quizzes, final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: students with demonstrated need to take the language in only one semester; students also need to show a strong commitment to learning German
Enrollment Limit: 12
Enrollment Preferences: students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German
Expected Class Size: 10
Distributions: (D1)
GERM 201 (F) Reisefieber: Germans On the Road for Adventure, Wealth, Escape

We will investigate potent myths of North America and Africa that fuelled German emigration and adventurism, and we will also look at inner-German travel stories. Our subjects are from diverse backgrounds and eras: Glikl, a Jewish businesswoman and mother of fourteen deals in pearls and gold in the seventeenth century, Johann Jacob Astor makes a fortune in the fur trade and real estate, in 1882, Hermann, a young worker exchanges his cramped life in an industrial slum for the Midwest, in 1909, a German worker travels to Cameroon to build a railway line through the jungle, in 1923, Martha, a young single woman, ships out from Bremerhaven to work in the United States, in the 1990s, Louise, a descendant of the famous Jacobs coffee company seeks out the cowboy lifestyle in the American West, in 1988, Freya, a GDR peace activist is deported to the West, the 2016 documentary Heymatloz chronicles the escape of 1,000 German-Jewish academics from Nazi Germany to Atatürk’s Turkey. We may also analyze films and tales about the potent myth of the "Wild West" and noble Indians, promoted by nineteenth-century bestselling author Karl May, and their afterlife in contemporary movies.

Class Format: seminar
Requirements/Evaluation: three short oral presentations, midterm, and 10-page final project
Prerequisites: GERM 104 or see instructor
Enrollment Limit: 15
Enrollment Preferences: German majors
Expected Class Size: 8
Materials/Lab Fee: reader packet
Distributions: (D1)

Fall 2018
SEM Section: 01 MWF 10:00 am - 10:50 am Helga Druxes

GERM 202 (S) Berlin--Multicultural Metropolis Between East and West

We will examine texts and films about Berlin as a center of cultural and social transformations in the late nineteenth and twentieth centuries, with special emphasis on the post-wall period. We will move from the turn of the century (when the city's population had recently tripled in size) to the establishing of Berlin as a world capital in the 1920s, then through Nazi-era transformations, wartime destruction and the cold war division of the city. We will conclude with the reshaping of the city after the fall of the Berlin wall. Texts and films may include: Walter Benjamin, Berliner Kindheit um 1900, excerpts from Ulrich van der Heyden und Joachim Zeller's Kolonialmetropole Berlin, Walter Ruttmann, Sinfonie einer Großstadt, Irmgard Keun's Das kunstseidene Mädchen, Nazi architect Albert Speer's plans for Berlin as the fascist capital "Germania," the 1956 East German youth protest film Ecke Schönhauser, short fiction by Reiner Kunze, Aras Ören, Peter Schneider, Bodo Morshäuser, Irina Liebmann. Recent films to be included are: Sonnenallee, Goodbye, Lenin!, Berlin is in Germany, Geschwister.

Class Format: seminar/discussion
Requirements/Evaluation: frequent short writing assignments
Prerequisites: GERM 201 or equivalent
Distributions: (D1)

Not offered current academic year

GERM 202 (S) German Comics (WI)

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Tim Dinter, Line Hoven, Kati Rickenbach, and Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz, and Elke Steiner, not to forget German mangas Bloody Circus by Jürgen Seebeck! The course will also address a variety of genres such as humor with Der bewegte Mann by Ralf König, biography with Schiller by Horus, and autobiography with Smalltown Boy by Andreas Michalke, and Held by Flix. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. This course is conducted entirely in German.

Class Format: seminar
GERM 202 (S) Hansestadt Hamburg

"Wenn Du in Hamburger Hopn platt snacken kannst, dann geiht immer eine Dör mer auf". Hamburg, the second largest city in Germany (with 1.8 million inhabitants), always had a particular significance within German cultural consciousness. Part of the Hanseatic League since the Middle Ages, the Free City of Hamburg quickly became an important commercial center in Northern Europe and a prosperous city of traders and merchants. Located on the river Elbe and in close proximity to the North Sea, the city-state Hamburg is still a major port city which has long benefited trading activities and fostered an exposure to other cultures. Called the gateway to the world (because the port was for a long time the gateway to the Americas) and the Venice of the North (the city is surrounded by water and features more canals, streams, and bridges than Amsterdam), later on completely destroyed by the World War II bombing raids, Hamburg is a city of contrasts: infamous for its dialect (Plattdeutsch) as well as its red light district (St Pauli), renowned for its journalism (Der Spiegel, Die Zeit) and culture scene, famous for its culinary specialties, (the burger might have been invented there) and its sports culture (soccer, handball, basketball), Hamburg has a rich past and a multicultural present that this course will examine.

In order to gain a deeper insight into the geography, history, and culture of this fascinating city, we will read the autobiography by Hans-Jürgen Massaquoi, novels by Uwe Timm, short stories by Yoko Tawada and Siegfried Lenz, listen to songs by Hans Albers, Wolf Biermann, Udo Lindenberg, the Hip Hop band Fettes Brot, and watch movies by Fatih Akin, Sandra Nettelbeck, Christian Alvart, Özgür Yildirim, and Leander Haußmann. Taught in German.

Class Format: seminar

Requirements/Evaluation: oral presentations, four 3- to 5-page papers in German, midterm and final exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 12

Enrollment Preferences: German majors

Expected Class Size: 8

Distributions: (D1)

Not offered current academic year

GERM 202 (S) Stranger Things: The German Novella

Goethe's famous description of the novella as an "unheard of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. As we trace the development of the novella over the course of two hundred years of German literary history, we will explore how the eerie phenomena at the genre's core reflect specific historic moments only to transcend them. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? Taught in German.

Class Format: seminar

Requirements/Evaluation: three 2-page critical responses, oral presentation, 6-page final paper

Extra Info: not available for the fifth course option

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 20

Enrollment Preferences: German majors

Expected Class Size: 8
GERM 271 (S) From Kleist to Kafka
Crosslistings: COMP271 / GERM271

Primary Crosslisting

Heinrich von Kleist (1777-1811) and Franz Kafka (1883-1924) wrote some of the most puzzling and intriguing work in European literary history. From Kleist's drama *Penthesilea*, which culminates in the consumption of the hero by the heroine (literally!), to Kafka's "A Hunger Artist," profiling a man who starves for a living, the texts in the course attempt to access the most profound—and at times bizarre—regions of the human mind. Works we will read include Kleist's dramas *Prince Friedrich of Homburg*, *Amphitryon*, and *Penthesilea*, and his short stories "The Marquise of O...", "The Earthquake in Chile," "The Foundling," "St Cecilia and the Power of Music," and "The Betrothal in Santo Domingo." By Kafka we will study "The Judgment," "The Metamorphosis," "A Hunger Artist," "In the Penal Colony," "The Burrow," "A Country Doctor," and others. Literary readings will be supplemented by selected letters and essays by Kleist, and by excerpts from Kafka's diaries. *Readings and discussion in English.*

Class Format: seminar
Requirements/Evaluation: intensive participation, four 2- to 3-page response papers, one 5- to 7-page paper, final project
Prerequisites: none
Enrollment Preferences: prospective Comparative Literature majors
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

GERM 276 (S) Black Europeans (WI)
Crosslistings: AFR276 / GERM276 / COMP276

Secondary Crosslisting

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants—such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few—and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Class Format: tutorial
Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-years, sophomores, and juniors
GERM 300 (F) Mannweiber: Masculine Women in German Culture (WI)
The German word "Mannweib" is a literal translation of the Greek "androgynous" and is a derogatory term for a woman who acts in a masculine way. This survey course examines the recurrence of "masculine femininity" in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address. We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose. We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. Conducted in German.

Class Format: seminar
Requirements/Evaluation: oral presentations and three 3- to 5-page papers written in German
Extra Info: may not be taken on a pass/fail basis
Prerequisites: GERM 200-level courses
Enrollment Limit: 19
Enrollment Preferences: German majors and concentrators
Expected Class Size: 12
Distributions: (D1) (WI)
Not offered current academic year

GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall (WI)
Crosslistings: GERM304 / WGSS304
Primary Crosslisting
In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, Die Ermittlung, Heinrich Böll, Und sagte kein einziges Wort, Gisela Elsner, Riesenzwerge, Emine Sevgi Özdamar, Das Leben ist eine Karawanserei, Volker Braun, Unvollendete Geschichte, Alice Schwarzer, Der kleine Unterschied und seine großen Folgen, Christian Kracht, Faserland, Thomas Brussig, Wasserfarben. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader- Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

Class Format: tutorial
Requirements/Evaluation: alternating 4-page tutorial papers, and 2-page critiques
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GERM 202 and permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: German majors
GERM 310 (S)  The Holocaust in the German Imagination

How do we think about an event that unsettles the very notion of representation? An indelible part of German history and culture, the Holocaust continues to challenge the artistic imagination by simultaneously calling for and resisting interpretation. This course examines the various ways in which German-speaking writers, artists, and directors have responded to this call since the 1930s. We will explore questions of memory and postmemory, the entanglements of trauma, guilt, and testimony, as well as the tensions and continuities between Germany's rich cultural heritage and portrayals of the Holocaust. Taking into consideration different forms of artistic expression, such as literature, film, and visual art, including sites of commemoration, this class will trace the relationship between past and present. What might it mean to write and think in the language of the perpetrators? How do texts by Holocaust survivors and first-hand witnesses relate to those created by later generations? What are the differences between West and East German representations of the Shoah, and how do they differ from how immigrants in Germany or Austrian artists engage with the event? Among others, we will read texts by Paul Celan, Nelly Sachs, Anna Seghers, Ruth Klüger, Ingeborg Bachmann, Elfriede Jelinek, Peter Weiss, W. G. Sebald, and Zafer Senocak, as well as watch films by Michael Haneke, Max Färberböck, Frank Beyer, Volker Schlöndorff, Stefan Ruzowitzky, and Caroline Link. Conducted in German.

Class Format: seminar
Requirements/Evaluation: short critical papers, oral presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GERM 202 or the equivalent
Enrollment Limit: none
Enrollment Preferences: prospective German majors
Expected Class Size: 8
Distributions: (D1)
Attributes: GBST Borders, Exiles + Diaspora Studies Electives;

GERM 316 (S)  "Wer ist wir?: Recent Debates over Multiculture in Germany (WI)

German chancellor Angela Merkel controversially claimed in 2010: “Multikulti ist gescheitert.” (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany's integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the "economic miracle." How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidis, Rita Süßmuth and others.

Class Format: seminar
Requirements/Evaluation: four 5-page papers in German
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GERM 202 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: German majors, but open to all with appropriate language skills
Expected Class Size: 8
Distributions: (D1) (WI)
Attributes: GBST Borders, Exiles + Diaspora Studies Electives;
GERM 317 (F)  The New Woman in Weimar Culture  (WI)

Crosslistings: WGSS317 / GERM317

**Primary Crosslisting**

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*

**Class Format:** taught seminar style in German for the German students and as a tutorial in English for non German speaking students

**Requirements/Evaluation:** papers and oral presentations

**Prerequisites:** for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

**Enrollment Limit:** 19

**Expected Class Size:** 8

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under GERM; meets Division 2 requirement if registration is under WGSS

Not offered current academic year

GERM 321 (F)  Lust, Liebe und Gewalt  (WI)

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include—if not provoke—it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. *Conducted in German.*

**Class Format:** seminar

**Requirements/Evaluation:** papers and oral presentations

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** GERM 201 or the equivalent

**Enrollment Limit:** 10

**Enrollment Preferences:** German majors

**Expected Class Size:** 10

**Distributions:** (D1) (WI)

Not offered current academic year

GERM 331 (F)  Silence, Loss, and (Non)Memory in Austria 1900-the Present  (DPE) (WI)

Crosslistings: COMP347 / GERM331

**Primary Crosslisting**

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment
surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English.

For those who do it in German, all literary readings and at least three of the papers will be in German.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

Enrollment Limit: 10

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Fall 2018

TUT Section: T1 TBA Gail M. Newman

GERM 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)

Crosslistings: COMP401 / GERM401 / WGSS401

Secondary Crosslisting

Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: seminar; seminar three hours per week

Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper

Extra Info: not available for the fifth course option

Prerequisites: 300-level course

Enrollment Limit: 25

Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor
Expected Class Size:  20
Materials/Lab Fee:  course books and reader packet
Distributions:  (D1) (DPE)
Distribution Notes:  meets Division 1 requirement if registration is under COMP or GERM; meets Division 2 requirement if registration is under WGSS DPE: This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

GERM 513 (F) Readings in German Art History and Criticism
This is an advanced course in German reading, focused on the literature of art history. Texts are selected from fundamental works of art history and criticism and from the writings related to concurrent seminars in the Graduate Program. The course includes a grammar review.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on written homework, quizzes, tests, and class participation
Prerequisites: GERM 511-512 or equivalent preparation (a score of 500 or higher on SAT II German Reading Test)
Enrollment Limit: 20
Enrollment Preferences: Graduate Program students; others by permission of the instructor
Expected Class Size: 12
Distributions: (D1)
Not offered current academic year

GERM 515 (F) Reading German for Beginners
German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for Art History and Criticism. In the first semester students learn the elements of grammar and acquire a core vocabulary. They begin reading and translating a variety of short texts.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on active class participation, homework, quizzes, tests, and a final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor
Expected Class Size: 12
Distributions: (D1)

Fall 2018
SEM Section: 01 MW 8:30 am - 9:45 am Olesya Ivantsova

GERM 516 (S) Readings in German Art History and Criticism
In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. They also learn how to work with dictionaries, encyclopedias, and other reference works. Texts are selected from fundamental works of art history and criticism and from the writings related to concurrent seminars in the Graduate Program. By the end of the course they will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on active class participation, homework, quizzes, tests, and a final project
Prerequisites: GERM 515 or equivalent preparation (placement test)
Enrollment Limit: 20
Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor
Expected Class Size: 15
Distributions: (D1)
An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements

To complete the concentration, students must take a section of Global Studies 101; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in the track.

Global Studies 101

All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

TRACKS

After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Area Tracks

- African Studies
- East Asian Studies
- Latin American Studies
- Middle Eastern Studies
- Russian and Eurasian Studies
- South and Southeast Asian Studies

Thematic Tracks

- Borders, Exile and Diaspora Studies
- Economic Development Studies
- Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

Senior Exercise

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program Concentrators will present their final senior exercise in class or in the Global Studies Colloquium.
Concentrators must also take a comparative course (i.e. a course that might not cover material directly dealing with the track, but would enrich a student's engagement through comparative inquiry.

Honors

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but, my experience is that students do not get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

Students can check with the program chair to see if other courses not listed here might count as electives.

Urbanizing World
GBST 17 (W) The Third World City
Crosslistings: GBST17 / PSCI17

Secondary Crosslisting

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

Class Format: mornings

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, class participation, and final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Distributions: (D2)

GBST 101 (F) The Modern Middle East (DPE)

Crosslistings: JWST217 / ARAB207 / HIST207 / REL239 / GBST101 / LEAD207

Secondary Crosslisting

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states
and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

**Class Format:** lecture

**Requirements/Evaluation:** participation, two short papers, quizzes, midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

**Expected Class Size:** 30-40

**Distributions:** (D2) (DPE)

**Distribution Notes:** meets Division 2 requirement if registration is under ARAB. DPE: This course introduces students to the incredible diversity of the Middle East and offers a critical assessment of difference, power, and equity in the Middle East. In particular it will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

**GBST 117 (S)  Bombay/Mumbai: Making of a Modern Metropolis  (WI)**

Crosslistings: HIST117 / GBST117 / ASST117

**Secondary Crosslisting**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history
of its most important city.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar; not open to juniors or seniors

GBST 141 (S)  Bandits and Warlords

Crosslistings: LEAD141 / GBST141 / PSCI141

Secondary Crosslisting

A leading scholar once quipped that political communities "qualify as our largest examples of organized crime." He wasn't far off: governments are meant to protect their citizenry, but as the #bringbackoursgirls or the KONY 2012 campaigns reveal, sometimes they fail. Bandits emerge, racketeers flourish, and warlords replace governments. By looking at Boko Haram, Séléka rebels, Al-Shabaab, Somali pirates and the Lords Resistance Army, this course explores the conditions that lead to the collapse of government protection and its replacement by bandits and warlords. We will then use this understanding to examine prominent examples of banditry and warlordism in Latin America, the Middle East and Europe.

Class Format: lecture

Requirements/Evaluation: class participation, five short papers and a final exam

Prerequisites: none; open only to first-years and sophomores

GBST 210 (S)  The Challenge of ISIS

Crosslistings: HIST210 / REL240 / ANTH210 / ARAB210 / GBST210

Secondary Crosslisting

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.
GBST 211 (S) Transitions to Democracy
Crosslistings: GBST211 / PSCI213

Primary Crosslisting

Under what circumstances do authoritarian regimes democratize and what is required to sustain the liberalization of the political system? This comparative course looks at a sample of societies characterized by strong ethnic, religious or racial cleavages.

Class Format: seminar
Requirements/Evaluation: short papers, final exam
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D2)

GBST 212 (F) Foundations of China
Crosslistings: ANTH212 / CHIN214 / REL218 / HIST214 / GBST212

Secondary Crosslisting

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Class Format: lecture
Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors
Expected Class Size: 25
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under CHIN; meets Division 2 requirement if registration is under ANTH, REL, HIST OR GBST
GBST 213 (F) From Putin to Pussy Riot: Discourses of Post-Soviet Gender (DPE)
Crosslistings: GBST213 / WGSS214 / COMP257 / RUSS213

Secondary Crosslisting

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin's regime by performing in day-glo balaclavas in Russia's largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West. All readings will be in English, and all films with have English subtitles.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

Prerequisites: none

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RUSS or COMP; meets Division 2 requirement if registration is under GBST or WGSS This course is part of the Difference, Power, and Equity requirement because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse.

Attributes: GBST Russian + Eurasian Studies Electives

GBST 214 (S) Contemporary Russian Culture and Politics
Crosslistings: GBST214 / RUSS214 / PSCI294 / COMP220

Secondary Crosslisting

This course explores select aspects of contemporary Russian society and politics through literary works and films of post Soviet Russia. We will study the social and political settings of particular plots and opportunities not only in fiction and film but as they emerge in the lived reality of Russians since 1991. In addition to novels and short stories by some of the best contemporary Russian authors, we will read scholarly materials explaining the social and political trends characteristic of Russia's post-socialist transformation under Boris Yeltsin and Vladimir Putin's leadership. Analysis of the political and social processes will be framed in a comparative approach, drawing on parallels and differences with countries of Eastern Europe. All course readings will be in English. Knowledge of Russian is not required.

Class Format: lecture

Requirements/Evaluation: short response essays; final exam; class participation
GBST 215 (S)  Asian-American Identities in Motion: Global Approaches to Dance
Crosslistings: DANC214 / THEA215 / AMST214 / GBST215

Secondary Crosslisting
The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Class Format: seminar
Requirements/Evaluation: evaluation includes reading responses and essays, class participation, and presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GBST 215 (F)  Performance Ethnography: Global Approaches to Dance
Crosslistings: ANSO214 / THEA215 / AMST214 / DANC214 / GBST215

Secondary Crosslisting
The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement and performance ethnography. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) will read ethnographic studies of dance and performance practices from different parts of the world, and (iii) will do field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and will include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance experience required.

Class Format: seminar
Requirements/Evaluation: class participation, reading responses and essays, fieldwork and field notes, and presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Limit: 15
GBST 216 (S)  Urbanism in the Ancient World  (WI)
Crosslistings: ANTH216 / GBST216

Secondary Crosslisting

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Class Format: tutorial

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Not offered current academic year

GBST 220 (S)  World War II in Russian Culture
Crosslistings: RUSS220 / COMP285 / GBST220

Secondary Crosslisting

This course traces the development of state-sponsored collective memory of the Great Patriotic War, as the Eastern front of World War II is called in Russia, and its counter-narratives. The veritable cult of the war, as it was shaped by the late Soviet period, took decades to coalesce and went through multiple stages. The relative disregard in the immediate post-war years under Stalin was followed by the striking re-enactments in literature and film of the period of Khruschev's Thaw. The memory of the war for new generations was further defined in state-sponsored memorials, museums and public events under Brezhnev. While Soviet ideology was discredited in the wake of the USSR's collapse, ordinary Russians and politicians alike continue to this day to see Russia's victory over Nazi Germany with pride and as part of their national identity. This course explores the contradictory elements that make up the images and narratives of the war -- in novels, short stories, feature films, and oral histories -- which bring together state violence and individual freedom, patriotism and oppression, remembrance and forgetting. After an initial acquaintance with the colossal human cost of the war, we will examine the artistic, cultural and political traditions of addressing the national trauma that have evolved in the official and unofficial discourses of the war. The search for a "usable past" of the war continues in contemporary Russia, breaching previously suppressed topics yet also obfuscating public attempts to critically examine people's experiences of the war beyond the inherited Soviet myths.

Class Format: seminar

Requirements/Evaluation: class participation, research paper, final exam
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: RUSS and COMP majors

GBST 221 (F) The Making of Modern South Asia: 1750-1950 CE
Crosslistings: GBST221 / ASST221 / HIST221

Secondary Crosslisting
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; open to all
Enrollment Limit: 40

GBST 230 (F) Who was Muhammad?
Crosslistings: ARAB230 / GBST230 / REL230

Secondary Crosslisting
Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the “facts” of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad’s life, we will think about the many ways in which Muhammad’s life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam
Prerequisites: none
GBST 234 (F) What is Islam? (DPE)

crosslistings: ARAB234 / GBST234 / REL234 / HIST208

secondary crosslisting

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

class format: seminar

requirements/evaluation: reading responses, two essays, final exam

extra info: may not be taken on a pass/fail basis; not available for the fifth course option

prerequisites: none

enrollment limit: 20

enrollment preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

expected class size: 20

distributions: (D2) (DPE)

distribution notes: meets Division 2 requirement if registration is under ARAB. DPE: This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

GBST 236 (S) Reading the Qur'an (WI)

crosslistings: ARAB236 / REL236 / COMP213 / GBST236

secondary crosslisting

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

class format: seminar
GBST 241 (S) History of Sexuality  (WI)
Crosslistings: HIST292 / GBST241 / WGSS239 / REL241

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, and final research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion and Arabic Studies majors
Expected Class Size: 19
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under REL or GBST; meets Division 1 requirement if registration is under ARAB or COMP
Not offered current academic year

GBST 244 (S) Mediterranean Journeys  (DPE)
Crosslistings: COMP244 / GBST244

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of the so-called "migrant intellectuals and artists" who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as a literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Behind the medium of a national language, new cultures and identities are claiming inclusion into the core of the social fabric by speaking out from a marginal position. We read both literary works (Ali Farah, Guene, Lakhous, Scego) and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films and documentaries (Carpignano, Cialese, Godard).

Class Format: seminar
**Requirements/Evaluation:** weekly writing assignments, midterm and final exams, final paper, oral presentation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 19

**Distributions:** (D2) (DPE)

**Distribution Notes:** meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under GBST DPE. Within the theoretical framework of postcolonial studies, this course examines themes such as: race; Europe and its postcolonial legacy; power imbalances in the current European policies of migration; the urban space of Rome as site of conflictual representations of center/periphery.

**GBST 247 (F)**  **Altering States: Post-Soviet Paradoxes of Identity and Difference** (DPE) (WI)

Crosslistings: SOC248 / GBST247 / RUSS248

[Secondary Crosslisting](#)

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Class Format:** tutorial

**Requirements/Evaluation:** 5-page paper every other week, comments on the partner's paper in alternate weeks

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology, Sociology, and Russian majors

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS DPE. This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

**GBST 303 (F) A History of Islam in Africa**

Crosslistings: HIST303 / REL303 / ARAB303 / GBST303 / AFR303

[Secondary Crosslisting](#)

This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between
Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time.

**Class Format:** seminar

GBST 312 (F)  The Mughal Empire: Power, Art, and Religion in India

Crosslistings: ASST312 / HIST312 / GBST312 / REL312

**Secondary Crosslisting**

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**Class Format:** seminar

**Requirements/Evaluation:** participation, response papers/short essays, one final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none, open to first-year students with instructor permission

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: lecture/discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GBST 326 (S) Security in Africa (WI)
Crosslistings: PSCI326 / GBST326

Secondary Crosslisting
Africa is the world's second largest and second most-populous continent. This course will explore this diverse region through the lens of human security which takes a broader understanding of security challenges and how they affect different individuals. We will begin by placing security challenges in Africa in the context of a colonial legacy and the changing nature of warfare. We will then examine specific security challenges including governance issues, gender relationships, and resource challenges, through the use of case studies. We will conclude by examining responses by the
GBST 340 (S) African Diaspora Religions in the Americas and the Caribbean
Crosslistings: AFR340 / GBST340 / REL340

Secondary Crosslisting
Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the synthetic religious cultures of African descended persons in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the Western hemisphere? Firstly, this course will consider a brief historiography of Africana Religious Studies. This background will inform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diasporic religious traditions including Conjure, Dagara, Kumina, New Orleans Voodoo, Spiritual Baptist, Winti, and Yoruba (Candomblé, Ifa, Lucumi, and “Orisha-Vodu”). We will also explore other African diasporic religious sensibilities that transgress regional and institutional boundaries.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page draft)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators

GBST 341 (S) Caste, Race, Hierarchy
Crosslistings: ASST341 / AFR341 / ANTH341 / GBST341

Secondary Crosslisting
Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or “untouchable,” backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of “traditional” forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will
acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE) (WI)

Crosslistings: GBST351 / PSCI351

Secondary Crosslisting

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: lecture/discussion, then seminar

Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

GBST 352 (F) Politics in Mexico (DPE) (WI)

Crosslistings: GBST352 / PSCI352

Secondary Crosslisting

Geographical fate has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, and mixed feelings about the U.S. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, we consider politics and cultural policies around Mexican national identity in the twentieth century; rapid urbanization, especially in the valley of Mexico; the impact of migration and the rapid development of the northern border region; and the conflict between an emerging civil society and political corruption. After a brief review of recent elections and other political events, we turn to a seminar-style discussion of student research projects.

Class Format: lecture, discussion, then seminar
Requirements/Evaluation: map quiz, two short papers, and a 12- to 15-page research proposal
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: some knowledge of Mexican history
Enrollment Limit: 15
Enrollment Preferences: Political Science majors and seniors
Expected Class Size: 14
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: One unit of the course directly engages the tension between diversity and national identity in 20th century Mexico, while another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA. WI: There will be 20 pages of writing and the short papers will be discussed in individual appointments with the professor.

GBST 356 (S) The Myth of Venice and its Modern Aftermath
Crosslistings: GBST356 / ENGL358 / COMP356
Secondary Crosslisting
The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron’s Childe Harold’s Pilgrimage, John Ruskin’s Stones of Venice, as well as full readings of Thomas Mann’s Death in Venice, Marinetti’s Futurist manifestos, Italo Calvino’s Invisible Cities, and more. We will also examine movies, such as Luchino Visconti’s Senso and Death in Venice and Nicholas Roeg’s Don’t Look Now. This course is offered in English; all texts are provided in translation.
Class Format: seminar
Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project
Prerequisites: familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable
Enrollment Limit: 20
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 10
Department Notes: Core course
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under GBST
Not offered current academic year

GBST 358 (S) Religion and Law (DPE)
Crosslistings: REL358 / GBST358
Secondary Crosslisting
This course explores the concept of “law” through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religious and secular law. Topics will include the secular.
legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Class Format: seminar

Requirements/Evaluation: reading response, two essays, final research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: DPE: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power

GBST 369 (S) Indigenous Narratives: From the Fourth World to the Global South (WI)

Crosslistings: GBST369 / HIST306 / ARAB369 / COMP369

Secondary Crosslisting

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktale, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response assignments (2- 3 pages each), final performance project, and final paper (5- to 7-pages)

GBST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean
Secondary Crosslisting

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

GBST 420 (S) Architecture and Sustainability in a Global World (WI)

Crosslistings: ARTH420 / ENVI420 / EXPR420 / GBST420

Secondary Crosslisting

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as “minimizing the negative impact of built form on the surrounding landscape,” and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Materials/Lab Fee: Travel funds will be provided by a Class of 1963 Sustainability Development Grant

GBST 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE) (WI)
Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

GBST 488 (S) Gandhi: Nationalism, Philosophy, and Legacy (WI)

Crosslistings: HIST488 / ASST488 / GBST488 / REL388

Secondary Crosslisting

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India’s freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the ‘father of the Indian nation’, however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of ‘Mahatma’ or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi’s own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi’s engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

Classics: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

Classical Civilization: (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

Senior Colloquium: Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

Classical Civilization Courses: The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a
given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.

**STUDY ABROAD**

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Complete syllabus and course description, including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Senior Colloquium.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

---

**CLGR 99 (W) Independent Study: Greek**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Distributions:** (D1)

Winter 2019

IND Section: 01 TBA Edan Dekel

**CLGR 101 (F) Introduction to Greek**

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second
 semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam

Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken

Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

Enrollment Limit: 15

Expected Class Size: 8-10

Distributions: (D1)

Fall 2018
LEC Section: 01  MWF 11:00 am - 12:15 pm  Sarah E. Olsen

CLGR 102 (S)  Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam

Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Expected Class Size: 8-10

Distributions: (D1)

Spring 2019
LEC Section: 01  MWF 11:00 am - 12:15 pm  Kerry A. Christensen

CLGR 201 (F)  Intermediate Greek

Reading of selections from Hesiod and from Plato, combined with grammar review. The primary goal of this course is to develop fluency in reading Greek. We will also read the texts closely to explore important continuities and changes in Greek culture between the archaic and classical periods. The emphasis will vary from year to year, but possible subjects to be explored include: the education and socialization of the community's children and young adults; religion and cult practices; the performative aspects of epic (and choral) poetry and of prose genres like oratory and the philosophical dialogue; traditional oral poetry and storytelling and the growth of literacy; the construction of woman, of man; the development of the classical polis.

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on classroom participation, quizzes, tests, and a final exam

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Expected Class Size: 5-10

Distributions: (D1)

Fall 2018
LEC Section: 01  MWF 8:30 am - 9:45 am  Kerry A. Christensen

CLGR 401 (S)  Homer: The Iliad

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community,
leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the Iliad in Greek and the entire epic in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures
Expected Class Size: 5-6
Distributions: (D1)
Not offered current academic year

CLGR 402 (S) Homer: The Odyssey
From the early archaic era through the classical and beyond, Homer's Iliad and Odyssey remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the Odyssey in Greek and the entire epic in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures
Expected Class Size: 5-6
Distributions: (D1)
Not offered current academic year

CLGR 404 (S) Tragedy
Tragedy was a hybrid genre invented in sixth-fifth century Athens, where tragic performances in the city's festival of the Greater Dionysia played a vital role in the democratic polis. This course will focus on reading in Greek a complete tragedy of Sophokles or Euripides; we will also read in translation several other tragedies, a satyr-play, and a comedy of Aristophanes. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Class Format: seminar/recitation/discussion
Requirements/Evaluation: evaluation will be based on contributions to class, several 1- to 2-page papers involving close textual analysis, perhaps a midterm exam, a final exam, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 4-5
Distributions: (D1)

Spring 2019
SEM Section: 01 MR 2:35 pm - 3:50 pm Sarah E. Olsen

CLGR 405 (F) Greek Lyric Poetry
This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 5
Distributions: (D1)

Fall 2018
SEM Section: 01    TF 2:35 pm - 3:50 pm     Edan Dekel

CLGR 407 (F) Rhetoric and Democracy: the Greek Orators
The Greek orators of the 4th-century BCE were specialists in rhetoric and persuasive discourse, and in the deployment of the one to produce the other. They wrote forensic oratory intended to sway juries; political speeches with which they argued policy before the Athenian Assembly and aspired to be the city's leaders; attack speeches which they hoped would destroy their rivals; and show pieces intended to dazzle the listener with their rhetorical brilliance. In this course the most influential orators of 4th-century Athens will instruct us in rhetoric, demonstrate the stylistic versatility of the Greek language, teach us about what Athenians in the 4th century cared about, reveal theories of human psychology, and persuade us of a thing or two. We will read selected speeches by Lysias, Isocrates, and Demosthenes, as well as portions of speeches by other orators such as Aeschines, Antiphon, and Dinarchus.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class translation and discussion, several short exercises, a midterm, a final paper, and a final translation exam
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6-8
Distributions: (D1)
Not offered current academic year

CLGR 409 (F) Plato
Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature
Expected Class Size: 5-6
Distributions: (D1)
Not offered current academic year
CLGR 412 (F) Herodotus
This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Class Format: seminar
Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors
Expected Class Size: 8
Distributions: (D1)
Not offered current academic year

CLGR 414 (F) Thucydides
This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

Class Format: seminar
Requirements/Evaluation: class preparation and participation, a midterm exam, a final paper, and a final translation exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors
Expected Class Size: 6
Distributions: (D1)
Not offered current academic year
These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

First 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

Because first-year seminars and tutorials serve as an introduction to the study of history, only one course of each type may count toward the History major; these courses can also be used to meet the department’s group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.
Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

- Africa and the Middle East: 102-111, 202-211, 302-311, 402-411
- Asia: 112-121, 212-221, 312-321, 412-421
- Europe and Russia: 122-141, 222-241, 322-341, 422-441
- Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451
- United States: 152-191, 252-291, 352-387, 452-471
- Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

ADVISING

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

- Required Courses in the Major
  - One Major Seminar (History 301)
  - At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses

- Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:
  - Group A: The History of Africa
  - Group B: The History of Asia
  - Group C: The History of Europe and Russia
  - Group D: The History of Latin America and the Caribbean
  - Group E: The History of the Middle East
  - Group F: The History of the United States and Canada
  - Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.
Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member’s agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department’s assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar by the end of the fall semester. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on “Historiography: Tacitus to Weber” that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. I'm not quite sure that I understand what "type" means here—the courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None recently.

HIST 10 (W) North Adams, Massachusetts: Past, Present, and Future

Crosslistings: AMST11 / HIST10

Primary Crosslisting

This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students’ engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

Class Format: afternoons

Requirements/Evaluation: 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students preferred

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 Cancelled
HIST 12 (W) Cold War Films

The Cold War between the Soviet Union and the United States, a nearly half-century standoff, was as ideological as it was military. For every nuclear test, arms sale, or military operation there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life—capitalism and communism, totalitarianism and democracy—an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. This class will explore these quintessential, overlapping elements of Cold War culture in a series of films produced from the mid-1940s to the mid-1960s. Film screenings will be accompanied by contextual readings to be completed prior to class discussion.

Class Format: mornings

Requirements/Evaluation: students will be evaluated on class participation and four response papers (2-3 pages each)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: based on a questionnaire provided by professor

Materials/Lab Fee: $10

HIST 13 (W) Eyewitnesses to History: American Treasures in the Chapin Library

What did Christopher Columbus write in his 1493 letter to the Spanish court? How did John Smith describe the Virginia colony the early 1600s? What would a pioneer find when following the Oregon Trail west in 1846? How much did a female slave cost in Richmond, Virginia, in 1860? These and many other intriguing questions are answered by rare books, manuscripts, newspapers, maps, and prints in the Chapin Library, primary sources which contain eyewitness accounts of important events in American history. Students in this course will learn, through handling rare materials, how to analyze primary sources and put them in historical context. For the first two weeks, they will investigate items, selected by the instructors, in tutorial-like sessions, with one student presenting conclusions of research and another giving a critique. For the final project, each student will select an item from the Chapin Americana holdings, write a 10-page research paper and present it to the class, and write a brief note about the item for a public display in the Special Collections instruction Gallery.

Class Format: mornings

Requirements/Evaluation: 10-page paper; formal public exhibit

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: none

Winter 2019

HIST 14 (W) Game of Thrones, ca. 850 B.C.: Empire, Religion & Palace Intrigue Neo-Assyrian Reliefs at WCMA

Long before the palace intrigues of Jaime, Cersei and Tyron Lannister, Mesopotamian monarchs established the world's first empires and littered their landscapes with palaces and temples, fortresses and monumental art. The two Assyrian stone reliefs at WCMA are stunning examples of the "calculated frightfulness" with which the kings ruled, employing politics and religion in effective and deliberate combination. In this course, we meet twice—weekly for an interdisciplinary, close-up look at the WCMA reliefs and objects in the WCMA cuneiform collection to ask: What (and how) did the reliefs 'mean?' Why did they merit inclusion in the palace of the one of the most powerful kings in the ancient world? What (and how) do they 'mean' in their present Williamstown setting? Finally, what is the status of Nimrud, the ancient city where the reliefs were excavated, post-ISIS, and why does the study of the ancient world matter in the digital age? In this course, our 'work' includes readings in ancient texts, learning to write cuneiform signs and words in clay, the Epic of Gilgamesh, royal correspondence, ancient conceptions of the past, gender, sexuality, religion, and stories of queens, kings and courtiers in love and war. We finish with a feast of ancient Mesopotamian fare and an overnight field trip to Yale's Babylonian Collection.
Readings from the extensive bibliography will be selected based on student interest, and the course can be further refined for individual students, including those whose senior theses may benefit from consideration of the ancient world. Students with no experience in art history or ancient history are warmly invited to join, as are those with some background in relevant subjects, such as the religions, cultures and history of the modern Middle East. Adjunct Instructor Bio: Alison Gruseke, PhD, studied at Williams and Yale. Her research and teaching focus on the Hebrew Bible, the ancient Near East, and on the ways in which the ancient world can illuminate modern problems of identity, theology and ethics. The negotiation of cultural boundaries, identity formation, and the interrelationship of cultures in conflict form a strong thread that runs through her work.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; the final project will be adjusted to fit the academic backgrounds and interests of individual students

**Prerequisites:** none

**Enrollment Limit:** 10–12

**Enrollment Preferences:** by seniority, auditors are welcome

**Materials/Lab Fee:** $200 plus cost of books

**HIST 15 (W) Homer in Vietnam**

This course will examine the impact of combat trauma on American soldiers during the war in Vietnam, and how that trauma affected their return to the United States. We will read two books that explore these issues through the lens of Homer's *Iliad* and *Odyssey*, Jonathan Shay's *Achilles in Vietnam* and *Odysseus in America*. We will discuss how Homer's classics have come to represent the trauma of war and coming home from the Trojan War to our current wars in the Middle East and beyond. In addition to discussing these two books, we will also view a number of films that address these issues. The class will be primarily discussion based on the readings and films.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** military veterans will be given priority should the class be overenrolled

**Materials/Lab Fee:** approximately $25 for books

**HIST 16 (W) The Life and Death of a Vanished Nation: East Germany, 1949-1990**

Crosslistings: GERM16 / HIST16

**Primary Crosslisting**

In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet twelve times -- three or four times per week (1¼ -3¼ hours each meeting) for the three full weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.
HIST 30 (W) Workshop in Independent Research

This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis and would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians define good research questions; become familiar with the historiography; and identify primary sources. Students will pursue their own research on any topic of their own choosing for a 10-page final paper, and we’ll use a workshop format to discuss the research and writing of that paper.

Class Format: independent research
Requirements/Evaluation: 10-page paper; weekly assignment
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: interest in course subject determined by questionnaire
Materials/Lab Fee: $25

HIST 102 (F) West Africa through Women’s Voices (DPE) (WI)

Crosslistings: HIST102 / WGSS102

Primary Crosslisting

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources—oral tradition, legal records, women’s popular songs, Islamic pedagogical verse, personal correspondence and novels—we will consider how women’s experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

Class Format: lecture

Requirements/Evaluation: discussion participation, map quiz, weekly response papers and a 10-page final academic paper or creative writing project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10-15

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: Texts in this class lay the groundwork for discussions about how different groups of women in West Africa have experienced power and inequality along differences of gender, race, slave/free status, marital and motherhood statuses, religion, and class. Close readings of primary texts equips students to understand how women in West Africa have understood and responded to structures of power and inequality, rather than applying frameworks of our own experiences and backgrounds.

HIST 110 (S) The Veil: History and Interpretations (WI)

Crosslistings: ARAB215 / WGSS110 / HIST110

Primary Crosslisting

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Class Format: tutorial

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: HIST Group E Electives - Middle East;
HIST 111 (F) Movers and Shakers in the Middle East (WI)
Crosslistings: LEAD150 / HIST111 / ARAB111

Primary Crosslisting
This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper

HIST 115 (S) The World of the Mongol Empire (WI)
Crosslistings: ASST115 / HIST115

Primary Crosslisting
By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, disintegration, and legacies for later periods. From a wide range of primary and secondary sources, including travelers' accounts, chronicles, art, and literature, we will investigate the diverse experiences of the Mongol world in different places, such as China, Russia, Persia, and Central Asia.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final research paper
Extra Info: not available for the fifth course option

HIST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WI)
Crosslistings: HIST117 / GBST117 / ASST117

Primary Crosslisting

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

**Class Format:** seminar

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**HIST 121 (F) The Two Koreas (WI)**

**Crosslistings:** HIST121 / ASST121

**Primary Crosslisting**

The two Koreas—North and South—were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

**Class Format:** tutorial

**Requirements/Evaluation:** students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

HIST 135 (F)  The Coffeehouse from Arabia to the Enlightenment  (WI)
Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

HIST 137 (F)  Victorian Britain and the Anglo-Afghan Wars  (WI)
Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of Britain's Afghan wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and a final research paper (10-12 pages)

HIST 140 (S) Crime and Punishment in Russian History  (WI)
Crosslistings: RUSS140 / HIST140

Primary Crosslisting

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial

Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

HIST 143 (F) Soccer and History in Latin America: Making the Beautiful Game  (WI)

This course examines the rise of soccer (fútbol/futebol) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about race, masculinity, and regional and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, a series of short papers, and an 8- to 10-page research paper

Extra Info: not available for the fifth course option

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course

HIST 152 (S) The Fourteenth Amendment and the Meanings of Equality  (DPE) (WI)
For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment’s meaning in the century that followed. Central themes in this course include the contested interpretations of “birthright citizenship,” “due process,” “privileges and immunities,” “equal protection,” and “life, liberty or property”; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Class Format: seminar

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to second years

Expected Class Size: 15-19

Distributions: (D2) (DPE) (WI)

Distribution Notes: WI Distribution Explanation: In the process of writing a substantial research paper, students will develop proposals, bibliographies, and drafts of the paper. Class will include peer review, writing workshops, and individual and group conferences on writing, revision, and editing. DPE Distribution Explanation: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 153 (S) Establishment & Exercise: Religion and the Constitution in the United States  (WI)

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." This 100-level tutorial examines the constitutional history of conflicts over religion in the United States, and asks how the law has weighed religious freedom against other cultural values, legal rights, and social needs. This course will consider the following questions: How has the interpretation of the First Amendment's religious clauses changed over time? What happens when the establishment clause and free exercise clause come into conflict with each other? Is the American state secular? What is the difference between religious beliefs and moral beliefs? How have constitutional arguments about religion intersected with social movements and political culture? Topics will include: the origins and early interpretations of the religion clauses; the changing scope of constitutional protections for the beliefs and practices of religious minorities; controversies over religion in schools, workplaces, and public spaces; debates about tax exemptions for religious organizations; the rights of conscientious objectors; and the emerging conflicts between claims for religious liberty and anti-discrimination laws. This course examines the ways these conflicts illuminate tensions between the competing values of equality and liberty, and interrogates the ways that the very act of legal decision-making defines the boundaries of what counts as religion.

Class Format: tutorial

Requirements/Evaluation: weekly essays

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 154 (S)  History of American Feminisms  (WI)
Crosslistings: HIST154 / WGSS154

Primary Crosslisting
This class takes a historical approach to the development of feminist movements and ideas in the United States. Moving from expressions of women's rights in the 18th century up to the present, the class will examine how diverse groups of women organized for and understood the goal of women's equality. It focuses especially on the breadth of women's mobilization and the ways that race, class and sexuality intersected with political movements over time. Historical case studies and documents—including written analyses, films and popular media—will highlight major areas of agreement and disagreement between activists from a broad range of political perspectives, including conservative feminism, labor feminism, womanism, Third World feminism, transnational feminism, and queer/lesbian feminism.

Class Format: seminar
Requirements/Evaluation: three short essays (3-5 pages); one research paper (10- 12 pages); class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: First-Year Students and Sophomores

HIST 155 (F)  School Wars in U.S. History  (WI)
Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Class Format: tutorial
Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: First-Year and Sophomores
Enrollment Limit: 10
Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: WI: 100-level History courses, particularly 100-level tutorials, are particularly focused on developing the skills and methods of historical writing and research.
Attributes: HIST Group F Electives - U.S. + Canada;
Is there an American style or tradition of writing political manifestos? Given the United States's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will explore that claim. How would we choose to define the very term, "manifesto?" Why have so many American writings been embraced as having the characteristics of a manifesto? We will explore these questions in two ways: first, through close readings and analyses of manifestos at three historical junctures in U.S. history (the Revolutionary era; the 1830s-1850s; and the decades following World War II); and second, through students' original research projects into manifestos of their own choosing.

Class Format: seminar

Requirements/Evaluation: the total number of pages of writing required will be about 35

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10-15

Distributions: (D2) (WI)

Distribution Notes: WI: The first eight weeks of the class will be structured around many short writing assignments with a focus on the revision process. The last four weeks of the class (and including reading period) will focus on a short research paper that teaches students basic research skills of using the library.

Attributes: HIST Group F Electives - U.S. + Canada;
HIST 164 (S) Slavery in the American South (WI)
Crosslistings: AFR164 / AMST165 / HIST164

**Primary Crosslisting**

This writing intensive seminar will focus on slavery in the southern United States—one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects.

**Class Format:** seminar

**Requirements/Evaluation:** class discussion critical part of this course; brief weekly writing assignments based on the reading done for that class; the final piece of written work will be a research paper on a subject of student's choosing due at the end of the semester

**Extra Info:** in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

**Prerequisites:** First-Years and Sophomores

**Enrollment Limit:** 19

**Enrollment Preferences:** First-Years and Sophomores

**Expected Class Size:** 15-19

**Distributions:** (D2) (WI)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada;
HIST 167 (F)  Let Freedom Ring? African Americans and Emancipation  (Wi)

Crosslistings: AFR167 / HIST167 / AMST167

**Primary Crosslisting**

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

**Class Format:** seminar

**Requirements/Evaluation:** research paper, short writing assignments, class participation

**Prerequisites:** First-Years and Sophomores

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Distributions:** (D2) (Wi)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada; JLST Interdepartmental Electives;

Fall 2018

SEM Section: 01  M 7:00 pm - 9:40 pm  Gretchen Long

HIST 202 (F)  From the Atlantic Slave Trade to Black Panther: Africa and the United States  (DPE)

This course introduces the history of Africa since the eighteenth century by exploring the connections between the African continent and United States. By taking a pan-African and international approach, the class will highlight how the histories of both places have been deeply intertwined. The course is organized around four themes. The first explores the impact of African enslavement on both continents and the way African social practices were carried across the ocean and transformed by slavery and abolition. We will then turn to the ¿back to Africa¿ movements of the nineteenth and twentieth centuries and explore why different groups of African-Americans sought to return to the continent of their origin, and what impact this had on those living in Africa. The third part of the class shows how the US government and non-governmental organizations became deeply involved in Africa beginning in the second half of the twentieth century. The final section explores the important links between Black freedom movements in the United States and anti-colonial and anti-apartheid movements in Africa, including recent connections between the Black Lives Matter movement and student activists in South Africa.

**Class Format:** discussion/lecture

**Requirements/Evaluation:** discussion participation, map quiz, short papers, and final group project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History Majors, Africana Studies Concentrators, American Studies Majors

**Expected Class Size:** 15-20

**Distributions:** (D2) (DPE)

**Distribution Notes:** DPE: This course focuses on effects of racism & colonialism on peoples of African descent & key episodes when Black solidarity was forged across great physical distance between the US & Africa. Through readings, discussion, & the final group project, the course will help students assess what foundations allowed for trans-Atlantic collaboration both among people who trace their heritage to Africa & between people with different racial backgrounds.
HIST 203 (F)  Modern African History
Crosslistings: AFR203 / HIST203

This course surveys the history of 19th and 20th century Africa. The first section of the course focuses on the European conquest of Africa and the
dynamics of colonial rule--especially its socio-economic and cultural consequences. The second section looks at how the rising tide of African
nationalism, in the form of labor strikes and guerrilla wars, ushered out colonialism. The third section examines the postcolonial states, focusing on the
politics of development, recent civil wars in countries like Rwanda and Liberia, and the growing AIDS epidemics. The last section surveys the history of
Apartheid in South Africa up to 1994. Course materials include fiction, poetry, memoirs, videos, newspaper articles, and outstanding recent
scholarship. The course is structured around discussions.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on two 7- to 10-page papers, one exam, and an unspecified number of pop quizzes
Prerequisites: none; no prior knowledge of African history required; open to all
Enrollment Limit: 40
Enrollment Preferences: students interested in History or Africana Studies
Expected Class Size: 15-25
Distributions: (D2)
Attributes: GBST African Studies Electives; HIST Group A Electives - Africa

HIST 204 (S)  Anti-Colonialism & Social Movements in Africa Since World War II (DPE)

This discussion-based survey introduces the major struggles for political and social change in sub-Saharan Africa since the end of the Second World
War. We begin by looking at the anti-colonial and nationalist movements that flourished after the war and eventually brought about an end to formal
colonial rule across the continent. Decolonization took place over many decades, and intertwined with this history, we look at artistic and popular
struggles that sought to change the practices of independent governments in Africa, as well as confront intervening forces--from the World Bank to
regional militias. The course examines contemporary movements for democratic rights, access to health and environmental resources, and freedom of
gender expression and sexual practice. We will focus on how the movements were organized, including those led by trade unions, women's
organizations, and student associations, but also those that have not been led by formal organizations.

Class Format: discussion/lecture
Requirements/Evaluation: discussion participation, exams & short papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History Majors, as well as Africana Studies, Global Studies, and Leadership Studies Concentrators
Expected Class Size: 15-20
Distributions: (D2) (DPE)
Distribution Notes: DPE: This class focuses on how people in sub-Saharan Africa sought to address issues of power, difference, & equity in their
societies through activity & organizing. Discussions focus on how inequality was structured by colonialism and differences of power that have existed
within African societies & African social movements. The class will prepare students to understand their own relationship to injustices in Africa and
differences between international intervention & international solidarity.
Attributes: HIST Group A Electives - Africa
HIST 207 (F) The Modern Middle East  (DPE)
Crosslistings: JWST217 / ARAB207 / HIST207 / REL239 / GBST101 / LEAD207

Primary Crosslisting
This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Class Format: lecture
Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled
Expected Class Size: 30-40
Distributions: (D2) (DPE)
Distribution Notes: meets Division 2 requirement if registration is under ARAB  DPE: This course introduces students to the incredible diversity of the Middle East and offers a critical assessment of difference, power, and equity in the Middle East. In particular it will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.
Attributes: GBST Middle Eastern Studies Electives; HIST Group E Electives - Middle East; JWST Elective Courses; LEAD Facets or Domains of Leadership

HIST 208 (F) What is Islam?  (DPE)
Crosslistings: ARAB234 / GBST234 / REL234 / HIST208

Secondary Crosslisting
This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors
Expected Class Size: 20
Distributions: (D2) (DPE)
Distribution Notes: meets Division 2 requirement if registration is under ARAB. DPE: This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

HIST 210 (S) The Challenge of ISIS
Crosslistings: HIST210 / REL240 / ANTH210 / ARAB210 / GBST210

Secondary Crosslisting
What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture
Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 40

HIST 212 (F) Transforming the "Middle Kingdom": China, 2000 BCE-1600
Crosslistings: ASST212 / HIST212

Primary Crosslisting
China expanded from scattered Neolithic settlements to become one of the world's most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the "early modern" seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the reinterpretation of Confucian thought, the transmission of Buddhism, the conquest of China proper by "barbarian" peoples, the composition of elites, and change in daily life, popular culture and China's place in the East Asian and world systems.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, a midterm, and a self-scheduled final exam
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 30-40
Distributions: (D2)
HIST 213 (S)  Modern China, 1600-Present
Crosslistings: ASST213 / HIST213

Primary Crosslisting
Observers may be struck by the apparent contradictions of contemporary China: market reforms undertaken by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course will examine China's historical engagement with the modern world in order to gain perspective on our current views. It will cover the Qing (1644-1911) dynastic order, encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, the "other Chinas" of Taiwan and Hong Kong, economic liberalization, and globalization.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, a midterm, and a self-scheduled final exam
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 35-40
Distributions: (D2)
Attributes: GBST East Asian Studies Electives; HIST Group B Electives - Asia

HIST 214 (F)  Foundations of China
Crosslistings: ANTH212 / CHIN214 / REL218 / HIST214 / GBST212

Secondary Crosslisting
This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Class Format: lecture
Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam
Prerequisites: none
Enrollment Limit: 40
Expected Class Size: 25

HIST 217 (S)  Early Modern Japan

Primary Crosslisting

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

HIST 218 (S)  Modern Japan

Primary Crosslisting

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese from politicians and intellectuals to factory workers and farmers have understood, instigated, and lived the upheavals of the past century and a half. We will ask why a modernizing revolution emerged out of the ashes of the early modern order; how Japan's encounters with "the West" have shaped the country's political and cultural life; what democracy and its failures have wrought; how world war was experienced and what legacies it left in its wake; how national identity has been constructed and reconstructed; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual tracts, fiction, films, and oral histories.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

Extra Info: may not be taken on a pass/fail basis

HIST 219 (S)  Japanese Culture and History from Courtiers to Samurai and Beyond
Crosslistings: ASST219 / HIST219 / JAPN219 / COMP229

Primary Crosslisting
This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 40
Enrollment Preferences: students majoring or considering a major in a related field

HIST 220 (S) History and Society in India and South Asia: c. 2000 to 1700s CE
Crosslistings: HIST220 / ASST222

Primary Crosslisting
This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such the as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers and presentation, 2 essays, a mid-term and a final exam
Prerequisites: none; open to all

HIST 221 (F) The Making of Modern South Asia: 1750-1950 CE
Crosslistings: GBST221 / ASST221 / HIST221

Primary Crosslisting
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

HIST 222 (S) Greek History

Crosslistings: CLAS222 / HIST222

Secondary Crosslisting

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on contributions to class discussions, a midterm, a final exam, and a medium-length paper

Prerequisites: none; open to all

Enrollment Limit: 25

Not offered current academic year

HIST 223 (S) Roman History

Crosslistings: HIST223 / CLAS223

Secondary Crosslisting

The study of Roman history involves questions central to the development of Western institutions, religion, and modes of thought. Scholars have
looked to Rome both for actual antecedents of European cultural development and for paradigmatic scenes illustrating what they felt were cultural universals. Yet Roman history also encompasses the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until perhaps contemporary times. A close analysis of Roman history on its own terms shows the complex and fascinating results of an ambitious, self-confident nation's encounter both with unexpected events and crises at home, and with other peoples. As this course addresses the history of Rome from its mythologized beginnings through the reign of the emperor Constantine, it will place special emphasis on the impressive Roman ability to turn the unexpected into a rich source of cultural development, as well as the complex tendency later to interpret such ad hoc responses as predestined and inevitable. The Romans also provide a vivid portrait of the relationship between power and self-confidence on the one hand, and violence and ultimate disregard for dissent and difference on the other. Readings for this course will concentrate on a wide variety of original sources, and there will be a strong emphasis on the problems of historical interpretation.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, occasional response papers, one 6- to 8-page paper, a midterm, and a final exam

HIST 225 (S) The Medieval World, 300-1500

The European world saw dramatic changes and the creation of new cultures and societies between the ancient and modern periods. This course will survey more than a millennium of history, beginning late in classical antiquity and concluding at the dawn of the modern era. We will concentrate both on developments within Europe, and on European encounters with Islam, the Byzantine East, and pagan cultures. With an approach that is both chronological and thematic, we will place the broader narrative of medieval history alongside special consideration of Europe's neighbors, social organization, medieval women, religion and piety, and education. Lectures and class discussion will receive equal emphasis.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon a series of 12 to 16 unannounced cumulative quizzes

Prerequisites: none

LEC Section: 01 Cancelled

HIST 226 (S) Early Modern Europe

The three hundred years from the late Middle Ages to the eve of the French Revolution were Europe's formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Primary sources from the period will be read alongside
modern secondary literature.

Class Format: lecture

Requirements/Evaluation: attendance and participation; map quiz; two papers; midterm and final exam

Extra Info: may not be taken on a pass/fail basis

HIST 227 (F)  A Century of Revolutions: An Activists' Survey of 19th Century Europe (And Why It Matters Today)

This course offers a survey of the revolutions and revolutionaries of 19th century Europe from the French Revolution to the Russian Revolution. The 19th century is intimately linked to us world citizens of today, both in the perils it bequeathed us - most importantly, widespread environmental destruction - and in the promise it offers us - of radical movements which sought to reconfigure the world into a more equitable, just and genuinely democratic place. Communists, anarchists, feminists, abolitionists, anti-imperialists, pacifists, and environmentalists - we will study all these and compare them with activists today in order to critically assess their continuing relevance.

Class Format: seminar/discussion

Requirements/Evaluation: evaluation will be based on student participation, a take-home mid-term paper, the completion of an original research paper or project, and the study of and/or participation in a contemporary activist movement

Extra Info: may not be taken on a pass/fail basis

HIST 228 (S)  Europe in the Twentieth Century

This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, several quizzes, an exam, and two papers

Prerequisites: none; open to all

Enrollment Limit: 40

Expected Class Size: 25-35
HIST 229 (F)  European Imperialism and Decolonization

Crosslistings: AFR229 / HIST229

Primary Crosslisting
This course will study European imperialism in the nineteenth and early-twentieth centuries and the formidable opposition it provoked, both on the part of the socialist opposition at home and the movements for national liberation in Asia, Africa, the Middle East, and the New World. The first half of the course will focus on the expansion of Europe in the nineteenth century, particularly the British conquest of India, the Scramble for Africa, and the break-up of the Ottoman Empire following World War I. In the second half of the course, we will examine some of the most dramatic movements for national liberation, including the independence in India, the Algerian Revolution, and the torturous struggle for independence in Lumumba's Congo.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a midterm, a final exam, a 10-page research paper, and class participation
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 15-20

Distributions: (D2)
Attributes: HIST Group A Electives - Africa;  HIST Group B Electives - Asia;  HIST Group C Electives - Europe and Russia;  HIST Group D Electives - Latin America + Caribbean;  HIST Group E Electives - Middle East

HIST 230 (F)  Modern European Jewish History, 1789-1948

Crosslistings: HIST230 / JWST230

Primary Crosslisting
What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two papers, and a final exam
Prerequisites: none
Enrollment Limit: 40
Expected Class Size: 10-20

Distributions: (D2)
Attributes: HIST Group C Electives - Europe and Russia;  JWST Core Electives

Not offered current academic year
HIST 231 (S)  Medieval England

Crosslistings: REL217 / HIST231

Primary Crosslisting

Across the entire world of the Middle Ages, no region has captured the modern imagination as much as medieval England. From the Battle of Hastings to Magna Carta, from Braveheart to King Arthur, medieval English history and popular knowledge of the medieval past are closely linked. This course will survey the history of England from the Roman period through the reign of Richard II (AD 43-1399). We will find a great deal to detain us in these thirteen centuries, including the Anglo-Saxon settlement of England and subsequent conversion to Christianity, the Viking raids of the ninth and tenth centuries, the Norman Conquest, the growth of English common law, the murder of Thomas Beckett, Edward I’s campaigns in Wales and Scotland, the Peasants’ Revolt of 1381, and the beginning of the Hundred Years War. We will focus particularly on power and politics, but primary readings will add important social, cultural and religious context. Our meetings will emphasize lectures and discussion equally. No prior knowledge is expected.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon a series of 500-word papers and weekly quizzes

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History majors

Expected Class Size: 35

Distributions: (D2)

Attributes: HIST Group C Electives - Europe and Russia; HIST Group P Electives - Premodern

Not offered current academic year

HIST 240 (F)  The Soviet Experiment

Crosslistings: RUSS240 / HIST240

Primary Crosslisting

In 1917, the former Russian Empire became the site of the world’s first socialist revolutionary government and the twentieth century’s largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history’s most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects’ and leaders’ policies left both at home and abroad, and the impact it had on the people who lived and didn’t live to tell the tale.

Class Format: lecture

Requirements/Evaluation: evaluation based on active class participation, two short essays (3-5 pages), one in-class midterm, and one take-home final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History Majors

Expected Class Size: 15-20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under HIST; meets Division 1 requirement if registration is under RUSS

Attributes: HIST Group C Electives - Europe and Russia

Fall 2018

HIST 242 (F)  Latin America From Conquest to Independence
This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in--and perhaps consisted of--the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, two short papers (4-5 pages), and a take-home final exam

Enrollment Limit: 40

Expected Class Size: 25

Distributions: (D2)

Attributes: GBST Latin American Studies Electives; HIST Group D Electives - Latin America + Caribbean; HIST Group P Electives - Premodern

Not offered current academic year

HIST 243 (F) Modern Latin America, 1822 to the Present

This course will examine salient issues in the history of the independent nations of Latin America. The first two sections of the course will focus on the turbulent formation of nation-states over the course of the "long nineteenth century," from the crises of the Spanish and Portuguese colonial empires in the late eighteenth century to the heyday of liberal political economies at the turn of the twentieth century. In this regard the course will analyze the social and economic changes of the period up to World War I and the possibilities they offered for both political order and disorder. Key topics addressed will include caudillismo, the role of the Church in politics, economic dependency and development, and the place of indigenous and African Latin-American peoples in new nations, and industrialization and urbanization. The latter two sections will examine the trend toward state-led national development in the twentieth century, considering the diverse forms it took and conflicts it generated in different nations and periods. Here we will take up questions the emergence of workers' and women's movements and the rise of mass politics; militarism, democracy, and authoritarian governments; the influence of the U.S. in the region; and the life and possibly death of revolutionary options. Within this chronological framework of national and regional political economy, we will consider the ways that various Latin American social actors shaped their own lives and collective histories, sometimes challenging and sometimes accommodating the ideals of national elites. General regional trends will be illustrated by selected national cases, including Mexico, Brazil, Argentina, Cuba, Chile, Venezuela, Nicaragua, and Guatemala.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, two short papers (3-5 pages), and a take-home final exam

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 35-40

HIST 248 (S) The Caribbean: From Slavery to Independence

Crosslistings: AFR248 / HIST248

Secondary Crosslisting

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley ‘Revolt’ in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in
socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a mid-term and final paper, and a 10-12 page research paper
Extra Info: not available for the fifth course option

HIST 252 (S)  From Contact to Civil War: A History of North America to 1865
This course will provide a survey of North American history from Europe's first expansion into the New World to the American Civil War. Cast as a contest between competing empires and their peoples, the course begins in Europe and Native North America before contact and studies the expansion of European nations into the New World. The course will emphasize the history of British North America and the interactions between and among the many peoples of colonial America. The course will then examine the coming, course, and consequence of the American Revolution (or what many at the time considered America's first civil war). The new nation unleashed massive and far-reaching economic, social and political changes. The last third of the course will explore these changes in the antebellum era and trace how they affected the coming of America's second civil war.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, mid-term, final exam, book review, and weekly writing assignments
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 15-20
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern
Not offered current academic year

HIST 253 (S)  Modern U.S. History
This course surveys themes and issues that inform the historical landscape of the United States after the Civil War and Reconstruction, from the late 1800s to the present. With special attention to freedom and fragmentation, the course examines the dilemmas inherent to American democracy, including: westward expansion and Indian affairs; immigration and nationalism; progressivism and domestic policy; the expanding role of the United States in the world; race, gender, and rights; and the shifting terrains of liberalism and conservatism. The course also tunes into the connections between current affairs and the American past. Course materials include a range of primary sources (letters, political speeches, autobiography, film, oral histories, fiction, and photography) and historical interpretations.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on some combination of quizzes, short papers, and a final exam or final paper
Prerequisites: none; open to all
HIST 254 (F)  Colonial American History to 1760

The course will explore the experience of Indian, English, African, and European peoples in the process we know as the colonization of the North American mainland, during the 16th, 17th, and early 18th centuries. Topics will include the lifeways of native groups and their response to the arrival of newcomers from overseas; the migration of white “settlers” and their founding of new communities; the demographic, social, political, and economic systems that organized their lives; the beginnings and subsequent development of African slavery; gender relations and the life cycle (among the colonizers and their descendants); and, towards the end, the development of a distinctively American cultural style.

Class Format: lecture; field trip to Historic Deerfield, use of objects from instructor's personal collection for illustration purposes

Requirements/Evaluation: midterm exam, term paper, final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

HIST 255 (F)  Introduction to Native American and Indigenous Studies

Crosslistings: AMST245 / ANTH245 / HIST255 / WGSS247

Secondary Crosslisting

What does it mean to acknowledge the literal land we stand upon—in Williamstown and beyond—as the occupied territory of indigenous peoples? This course strives to answer that question by offering an introduction to the histories, politics, knowledges, and arts of indigenous peoples across the Americas and Native Pacific. Foregrounding the ways in which indigenous peoples have resisted, refused, and reimagined ongoing histories of settler colonialism, we will survey scholarship in the interdisciplinary field of Native American and Indigenous Studies. By analyzing such scholarship alongside a range of primary sources—including historical documents, literature, film, visual art, music, and social media—we will examine the complex interweavings of indigeneity, race, gender, and sexuality. Throughout the course, we will discuss topics of both past and present importance, such as environmental justice, cultural representation, and self-determination.

Class Format: seminar

Requirements/Evaluation: one 2- to 3-page response paper, one 5- to 6-page analytical essay, one 8- to 10- page research paper, weekly Glow posts, and regular class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: AMST majors

Expected Class Size: 19

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada; LATS Comparative Race + Ethnic Studies Electives
HIST 256 (F)  Social Justice Traditions: 1960s to #Black Lives Matter  (DPE)
Crosslistings: HIST256 / AMST256 / AFR257

Secondary Crosslisting
We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Class Format: seminar
Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Limit: 35
Enrollment Preferences: first years, sophomores, and American Studies majors
Expected Class Size: 25

Distributions: (D2) (DPE)
Distribution Notes: DPE: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. Focus on strategies and tactics: e.g. demonstrations, guerrilla theatre, electoral campaigns, strikes. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

HIST 259 (S)  New England Environmental History  (WI)
Crosslistings: AMST259 / ENVI259 / HIST259

Secondary Crosslisting
Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Class Format: seminar
Requirements/Evaluation: several short essays, final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 15
HIST 261 (F) America and the Cold War

Crosslistings: LEAD262 / HIST261 / PSCI262

Secondary Crosslisting

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

Enrollment Limit: 19

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 19

Distributions: (D2)

HIST 263 (F) The United States and the World, 1898 to the Present

Crosslistings: LEAD261 / HIST263

Primary Crosslisting

This survey course examines the United States and the World since 1898. Students will be introduced to key diplomatic developments since the Spanish-American War, when the country began its ascendance to hegemonic power from which it is now in retreat. American power reached its apex during the Cold War, but that conflict and its offshoots like the Vietnam War brought about crises over national identity and values that remain unresolved. Readings and discussions will focus on issues of ideology, empire and neo-imperialism, domestic politics and foreign policy, and the relationship between culture and foreign relations.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, pop quizzes, short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first- and second-year students, then History majors

Expected Class Size: 25-30

Distributions: (D2)

Attributes: HIST Group F Electives - U.S. + Canada; LEAD American Foreign Policy Leadership

Fall 2018

LEC Section: 01  MR 2:35 pm - 3:50 pm  Jessica Chapman
HIST 281 (F)  African American History, 1619-1865
Crosslistings: HIST281 / AFR246

Primary Crosslisting

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Class Format:

Requirements/Evaluation:  class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first- and second-year students
Expected Class Size: 20
Distributions: (D2)

SEM Section: 01  MR 2:35 pm - 3:50 pm  Gretchen Long

HIST 282 (S)  History of the Civil Rights Movement
Crosslistings: AFR234 / HIST282

Primary Crosslisting

This course examines the American civil rights movement, arguably the most important social movement of the twentieth century, and its far reaching effects. We will set the movement's classic phase from 1954-1965, within a broader history organizing for freedom from the 1930s through the demise of Black Power in the 1970s. We will trace a wide variety of activists in southern struggle, examining familiar figures like Rosa Parks and Martin Luther King, Jr., from new perspectives, together with the often unsung heroes of local movements. We will also highlight freedom struggles in the North and West, whose timing, issues, and politics often differed, including the presence of a diverse cast of racial minorities including Latinxs and Asians. Throughout our study, we will interrogate the perspectives of both the participants and the historians who have written their stories about the time, space, issues, and strategy that define our understanding of the struggle for freedom. Class will consist of lecture and discussion.

Class Format:

Requirements/Evaluation: coursework to be evaluated includes informal writing and class participation, two papers, and a take-home final
Prerequisites: none
Enrollment Limit: 40
Expected Class Size: 25
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada

Not offered current academic year

HIST 284 (S)  Introduction to Asian American History  (DPE)
Crosslistings: HiST284 / AMST284 / ASST284

Primary Crosslisting
This course covers the immigration of Asian to the U.S. from the 1850s to the present and the lives of both immigrants and their descendants. Possible topics are the Chinese Exclusion Act, the incarceration of Japanese Americans during WWII and the arrival of Vietnamese to the U.S. after the war in Viet Nam.

Class Format: lecture/discussion

Requirements/Evaluation: a series of short essays and a final oral history/family history

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 25

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course traces the immigration history of various peoples from Asia to the U.S. from the 1850s to the present. We will focus on the legal barriers to Asian American immigration and citizenship that reveal the racial, class, gender, and religious biases against people from that part of the world. By examining these issues, we will see an unequal balance of power as well as the various ways Asian immigrants resisted American immigration laws and would eventually build communities in many parts of the U.S.

HIST 286 (F)  Latina/o History, 1848 to the Present

Crosslistings: HIST286 / LATS286

Secondary Crosslisting

From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups come to have sizeable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge?

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation and group presentations, short writing assignments, two short essays, and a final essay

Prerequisites: none

Enrollment Limit: 40

HIST 292 (S)  History of Sexuality  (WI)

Crosslistings: HIST292 / GBST241 / WGSS239 / REL241

Secondary Crosslisting

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why
does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, and final research paper
Extra Info: may not be taken on a pass/fail basis

HIST 301 (F) Approaching the Past: Remembering American History

Much of what we know and understand about American history is rooted in the received narrative of our national history, a history that is constructed of individual, collective, and a national memory of the past and its meanings. This course will examine some forms through which American historical memory is presented and (re)presented, such as monuments, museums, novels, film, photographs, and scholarly historical writing, by considering a number of pivotal events, institutions, or eras in American history. Potential topics are slavery, race, and the Civil War; westward expansion; the Great Depression; World War II; the Sixties; the war in Viet Nam; and the events and aftermath of September 11, 2001.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on weekly response papers, a book review, an exercise with the Williams College Museum of Art, and a final project to be completed in consultation with the professor; students will be required to lead a class discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Limit: 19
Enrollment Preferences: senior, then junior, History majors
Expected Class Size: 15-19
Distributions: (D2)

SEM Section: F1 W 1:10 pm - 3:50 pm Scott Wong

HIST 301 (F) Approaching the Past: History, Theory, Practice

This course will explore how the discipline of "History" has come to assume its present form and how a number of historians since the 1830s have understood their craft. We will begin by discussing the work of three great nineteenth-century historians (Macaulay, Marx, and Ranke) who believed that historical "truth" existed and could, with skill, be deciphered. Next we will explore the philosophy and practice of the cultural and social historians of the 1960s-1980s, comparing and contrasting their work with that of their nineteenth-century predecessors. We will then consider the writing of those recent theorists who have tried to refute historians' claims to be able to capture the "truth" of the past, focusing on the state of the field in the wake of challenges posed to its epistemological foundations by postmodernism. Finally, we will conclude with an assessment of the state of the discipline today. In general, we will be less concerned with "the past" than with what historians do with "the past." Consequently, we will focus primarily on those abstract, philosophical assumptions that have informed the various practices of history from the 1830s to the present.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, a 250-word position statement ("What is History?"), two 9- to 11-page interpretive essays, and a take-home final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: restricted to HIST majors and sophomores planning to major in HIST
Enrollment Limit: 19
Enrollment Preferences: senior, then junior, History majors
Expected Class Size: 15-19
Distributions: (D2)

HIST 301 (S) Approaching the Past: Practices of Modern History
What is history? What is it that historians do? In this course, students will explore how and why we historians practice our craft. The first section of the course will examine how historians come to know, think about, and understand the past. Topics include: the nature of historical truth, objectivity and bias, different types of sources, scale in history, and uses of theory. The second section of the course will explore the purposes and uses of history. We will consider questions raised by public history, history education, historical film, and the construction of memory. The class will meet once a week, and each session will focus on some theoretical material as well as readings on a broad range of topics that concretely illustrate the methodological issues at stake.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: restricted to HIST majors and sophomores planning to major in HIST
Enrollment Limit: 19
Enrollment Preferences: senior, then junior, History majors
Expected Class Size: 15-19
Distributions: (D2)

Not offered current academic year

HIST 301 (F) Approaching the Past: Writing the Past
"History" refers to the aggregate of past events as well as to the branch of knowledge that seeks to understand those past events. Whereas history courses often take as their content the first of these two meanings of history, focusing on the politics, society, and culture of a particular place in a particular historical era, this course will examine history’s often concealed “other” meaning: the practices of historians, their methods and assumptions. In so doing, this course aims to unsettle history majors’ own assumptions about what history “is” and what historians “do”. How do historians reconstruct the past, and how and why have their approaches to sources, theories, and narrative strategies changed over time? And on a deeper level, how have historians’ suppositions changed— if they have changed—about the nature of historical truth, knowledge, and the value of history to the societies in which they wrote? Taking history-writing itself as our object of study, over the course of the semester we will read the work of twelve, quite different historians from the classical to the modern era. Each week in our seminar meetings, we will subject these texts to a careful reading in order to understand and assess these historians’ theories and practices.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, weekly critical response papers to the assigned reading, and a final paper
Prerequisites: restricted to History majors and sophomores planning to major in History
Enrollment Limit: 19
Enrollment Preferences: senior, then junior, History majors
Expected Class Size: 15-19
HIST 301 (S)  Approaching the Past: Varieties of Historical Thinking
This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides' *The Peloponnesian War*, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why--or even if--we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

Class Format: seminar

Requirements/Evaluation: in preparation for class discussion, students are required to produce a one-page critical response to the assigned reading each week, which will form the basis for class discussion

Extra Info: in addition to writing ten critical responses, students are also required to make an oral presentation of approximately twenty minutes on a professor they have had in a history course at Williams College

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Distributions: (D2) Not offered current academic year

HIST 301 (F)  Approaching the Past: Modern National, Transnational, and Postcolonial Histories
This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly seminar meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Distributions: (D2) Not offered current academic year

HIST 301 (S)  Approaching the Past: Writing History
The course explores various modes in the writing of history: analytic, narrative, microhistorical, "public," and so on. Inevitably (and usefully) it raises broad epistemological questions--the purposes of history, its moral dimension, the relationship of the historian to their subject--but the baseline throughout is writing, the creation of prose suited to the task of engaging the past. The readings embrace a variety of exemplary works (models). These do not connect by way of content; their common element is interesting, innovative prose. The first month of the course involves reading and discussion of several such works. The second (middle) month is quite different--what might be called a practicum--with students writing short papers (approximately 1000 words), to be circulated and discussed among the group. The third and final month is like the first: i.e., a return to the exemplary.
HIST 301 (F) Approaching the Past: Chronicles of the First Crusade

Historians collect and study stories, or narratives, about the past; and they are often expected to build their own narrative accounts of historical events. We do not, however, experience the present as a narrative. To tell a story is always to adopt a perspective, to introduce anachronisms, to assume causality, and to misrepresent. This seminar will consider how narrative sources illuminate and deceive, and how historians can approach the contradictions and inconsistencies among many different accounts to arrive at deeper insights, not only about past events but about the aims of their chroniclers. As our case study we will take the First Crusade of the eleventh century, when a great many peasants, soldiers and nobles set out to seize Jerusalem from the Turks. Their efforts were recorded in a wide variety of interrelated chronicles, set down by the participants, victims, and observers of this bizarre military expedition. By studying the interrelationships and contradictions that these sources present, we will learn the basics of source criticism and probe the limits of historical knowledge. Our familiarity with the primary sources will also prepare us to dissect and critique several modern studies of the First Crusade.

HIST 301 (S) Approaching the Past: Other People’s History

From antiquity to the present, most historians have chosen to write about their own community, whether they have defined it by ethnicity, nationhood, language, or creed. Only a minority have chosen instead to record the history of a group of which they are not a member. This seminar asks: what does it mean to write other people’s history? We will consider, first, the motivations that might lead someone to dedicate their lives to studying a foreign culture. What practical challenges are involved? What languages, archives, and forms of knowledge does the historian have to master, and how is this achieved (or not achieved)? Further, we will inquire: what unique problems and opportunities emerge? What mental categories mediate the inevitable comparisons that arise in the study of other people’s history? What kind of histories can be written this way, and what kind cannot? Throughout, we will take seriously the ethical challenges and opportunities of this peculiar historiographic position. Finally, we will determine the lessons that can be drawn for our own practice as historians. Authors to be read will range from antiquity to the present and include Herodotus, al-Biruni, José de Acosta, and Edward Gibbon among others.

HIST 301 (S)  Approaching the Past: The American Civil War

How have historians told the story of the Civil War? Even before Lee's surrender at Appomattox Court house in the spring of 1865, historians and local communities strove to craft a coherent story of a war that left 620,000 soldiers dead and set formally enslaved people on a long road towards freedom. Civil War historiography began in the 19th century and has been reinvented numerous times in the last century. Biographies of Lincoln, of Generals--Union and Confederate still appear regularly. Historians of gender have tried to capture women's experiences on the homefront and on the front lines. Histories of battles, of legislation, of the era's music, literature, and art all fill rows of shelves in Sawyer. We will not attempt to "understand" the Civil War. Rather we will examine a few very different histories of the event. We will read authors who center African Americans and authors who ignore them. We will read a biography and cultural history. We'll look at new attempts to tell local histories of the war through interactive web sites and film. We'll also study historical re-enactors, North and South. We will end with an examination of the recent struggles over Confederate Memorials.

Class Format: seminar

Requirements/Evaluation: one presentation, one formal paper and/or a book review, a final paper

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 12

Enrollment Preferences: senior History majors

HIST 302 (F)  Islamic Law: Past and Present

Crosslistings: REL243 / WGSS243 / ARAB243 / HIST302

Secondary Crosslisting

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Class Format: seminar

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors

Expected Class Size: 10

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under ARAB
**HIST 303 (F)  A History of Islam in Africa**  
Crosslistings: HIST303 / REL303 / ARAB303 / GBST303 / AFR303  

**Primary Crosslisting**  
This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time.  

**Class Format:** seminar  

**Requirements/Evaluation:** two 7-page papers and one 12- to 15-page paper  

**Prerequisites:** none

**HIST 305 (S)  Nationalism and Nation Building in the Middle East**  
Crosslistings: ARAB305 / HIST305  

**Primary Crosslisting**  
This course introduces students to the spatial, legal, economic, social and political structures that created Apartheid in South Africa, and to the factors that led to the collapse of the racist order. We will examine the many forms of black oppression and, also, the various forms of resistance to Apartheid. Some of the themes we will explore include industrialization and the formation of the black working classes, the constructions of race, ethnicities and sexualities, land alienation and rural struggles, township poverty and violence, Black education, and the Black Consciousness Movement.
In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie." This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East and the challenges of statecraft. After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Iraq, Israel, Turkey, Palestine, Iran, and Egypt. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty. Finally, we will evaluate the role of foreign powers in nation building in the Middle East and consider whether the modern concept of the nation has any validity in the Middle Eastern context.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on several short papers and a "Magnus" Opus (a.k.a. final research paper)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors and students with a background in Middle Eastern studies

Expected Class Size: 20-25

Distributions: (D2)

HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South (WI)

Crosslistings: GBST369 / HIST306 / ARAB369 / COMP369

Secondary Crosslisting

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response assignments (2- 3 pages each), final performance project, and final paper (5- to 7-pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

HIST 307 (S) Is Africa Poor? (DPE)

Poverty is widespread across Africa, yet exists alongside the continent's fantastic wealth in natural resources. Despite a decade of excitement about "Africa rising" as a new economic powerhouse, African countries still occupy 36 of the bottom 40 positions in the most recent UN Human Development Report. How can we make sense of this contradiction? In this reading-focused seminar, we will delve deeply into the work of historians, international organizations, and African activists who have debated the causes of poverty and inequality in Africa and arrived at different conclusions about the appropriate solutions. Taking a historical approach, we will explore how the current challenges faced by African societies are rooted in the slave trade, colonial rule, the Cold War, and more recently, the imposition of neoliberal economic policies in Africa.

Class Format: seminar

Requirements/Evaluation: discussion participation, map quiz & multiple papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History Majors, Political Economy Majors, Africana Studies Concentrators, Global Studies Concentrators

Expected Class Size: 10-15

Distributions: (D2) (DPE)

Distribution Notes: DPE: This class is grounded in extensive reading and debate about how economic inequality became structured on a global scale. This will entail studying how interconnected economic, political, and social differences developed both between Africa and the rest of the world and within the African continent. Building on the wide-range of texts we will analyze, the course will equip students to better understand and respond to current issues of global economic justice.

Spring 2019

SEM Section: 01 M 7:00 pm - 9:40 pm Matthew Swagler

HIST 308 (S) The Nile (DPE) (WI)

Crosslistings: ARAB308 / HIST308

Primary Crosslisting

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Class Format: seminar

Requirements/Evaluation: short papers and final project/paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB. DPE: The course fulfills the DPE requirement because it evaluates
the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment. WI:

HIST 309 (S)  Fire and Ice: The History of Modern Iceland

How have a few wretched souls been able to survive on a frozen tundra in the middle of the north Atlantic for over 1100 years? This course will explore the curious history of Iceland, a small and unimportant country, that despite, or because of its geographic isolation and lack of any valuable natural resources, has been able to develop a distinct national and cultural identity. What lessons can be drawn from the historical experiences of Icelanders? The course will start with the paradigmatic sagas (Egil’s and Njal’s Saga) that have played an out-sized role in the development of Icelandic culture. Then we will assess the nation’s independence, the impact of the world wars, the building of the modern welfare state, and how the country has fared through economic peaks and valleys. At the end of the semester, students will be able to understand the significance of the following phrases: “Fögur er hlíðin,” “Deyr fé, deyr frændr,” “Petta reddast,” “dugleg/ur,” and “Áfram Ísland.” This comprehension is, of course, very practical since 320,000 people understand the Icelandic language.

Class Format: seminar
Requirements/Evaluation: short papers and final project

HIST 312 (F)  The Mughal Empire: Power, Art, and Religion in India
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture, and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

HIST 319 (F) Gender and the Family in Chinese History
Crosslistings: ASST319 / HIST319 / WGSS319

Primary Crosslisting
Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final paper

HIST 321 (F) History of U.S.-Japan Relations
Crosslistings: ASST321 / HIST321

Primary Crosslisting
An unabating tension between conflict and cooperation has been an undercurrent of U.S.-Japan relations for over 150 years, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. Topics will include early U.S.-Japan encounters; the rise of both countries as imperial powers; the road to, and
experience of World War II; the politics and social history of the postwar American occupation of Japan; the U.S.-Japan security alliance; trade relations; and popular culture. Contemporary topics will also be discussed.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Distributions:** (D2)

**Attributes:** GBST East Asian Studies Electives; HIST Group B Electives - Asia; HIST Group F Electives - U.S. + Canada; MAST Interdepartmental Electives

**HIST 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece (WI)**

**Crosslistings:** CLAS323 / HIST323 / LEAD323

**Secondary Crosslisting**

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

**Prerequisites:** none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

**Enrollment Limit:** 19

**Expected Class Size:** 12

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under HIST or LEAD; meets Division 1 requirement if registration is under CLAS

Fall 2018

LEC Section: 01 MR 2:35 pm - 3:50 pm Kerry A. Christensen

**HIST 326 (F) The Shadow King and the Emperor: Pippin III, Charlemagne, and the Rise of the Carolingians**

By the later seventh-century, Frankish Gaul had entered an advanced state of political decline. The long-haired kings of the Merovingian dynasty became little more than figureheads as true power devolved to court officials, particularly the mayors of the palace. Ultimately, a new clan, the Pippinids, acquired hereditary control over mayoral positions in the Neustrian and Austrasian kingdoms. In 751, Pippin III (d. 768) packed the last Merovingian king off to a monastery and assumed royal power in his own right. He and his son Charlemagne (d. 814) established a new dynasty, the Carolingians, as they extended their rule throughout Gaul, western Germany, and northern Italy. These years saw a steady progression of military conquests, as well as legal and ecclesiastical reforms and an elaborate program of cultural renewal known as the Carolingian Renaissance. In this seminar we will approach the rise of the Carolingians as a historical problem. How did these kings reverse the political decline of the Frankish
kingdoms so suddenly? How thoroughgoing were the political, legal, and cultural reforms that they implemented? To what degree has our view of Carolingian achievement been distorted by the abundance of official and quasi-official sources for the era? To answer these questions we will turn to a wide array of primary sources, including monastic chronicles, royal biographies, legislation, letters, poems, and saints' lives; we will also consider a selection of classic and recent secondary studies.

**Class Format:** seminar

**Requirements/Evaluation:** three 5- to 7-page papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**HIST 327 (S)  Hollow Empire: Louis the Pious and the Decline of the Carolingian Kingdoms after 814**

After Charlemagne died in 814, his son, Louis the Pious, assumed sole rule of the Carolingian Empire. Almost immediately, he faced profound political problems, among them a threatened rebellion in 817, brutally suppressed; and coups in 830 and 833, which left Louis's prestige and power greatly reduced. Gone were the success and the confidence of Charlemagne's rule. Instead, the Franks found themselves on the defensive as Vikings began to conduct seasonal raids and the political and economic structures of the early ninth-century entered a period of extended devolution. The downward spiral continued after Louis's death in 840, as his heirs opened a civil war among themselves and the Carolingian Empire fragmented into a series of independent kingdoms. This seminar will study the decline of the Carolingians through close study and discussion of the most important primary sources, including royal biographies of Louis the Pious; monastic annals; legislation promulgated by Louis and his successors; contemporary histories; and a host of other documents, including letters, treatises, and saints' lives. We will also consider select secondary studies. We will ask after the nature of Louis the Pious's political problems, seek to find out how it was that Carolingian power came apart almost as suddenly as it emerged, and investigate the newer, smaller political and legal world that emerged in western Gaul in the latter half of the ninth-century.

**HIST 328 (S)  Witchcraft**

Crosslistings: HIST328 / REL328

**Primary Crosslisting**

A wide variety of human cultures have accepted the existence of the supernatural, the reality of magic, and the possibility of magical transgression. Among the most common supernatural crimes is witchcraft, which societies can invoke to explain natural disasters and disease, and to blame these
occurrences on specific individuals, often social outcasts. Witchcraft became a particular focus of fear and fascination in Early Modern Europe, when inquisitors, theologians and many ordinary people came to believe that Western Christendom was threatened by a vast, covert conspiracy of witches in league with the devil. Countless "witches"—most of them women—were accordingly tried, tortured and sometimes even executed. Our course will examine these bizarre events and consider what religious, cultural and intellectual factors might help explain them. We will begin by investigating the medieval legal and theological developments that enabled and encouraged the persecution of witches, and go on to study some of the most important and sensational witch trials of the later medieval and early modern periods. Throughout, we will encounter many strange and intriguing documents produced by the inquisitors who persecuted witches, the scholars who imagined their activities, and the laws that defined their crimes. No prior experience with European history is required for this seminar, which will emphasize thoughtful writing and discussion.

Class Format: seminar
Requirements/Evaluation: weekly 500-word essays and one class presentation

HIST 330 (F) Reformations: Faith, Politics, and the World
Crosslistings: HIST330 / REL331

Primary Crosslisting
The Protestant Reformation was long understood as the first salvo of modernity. By opposing the faith of the individual believer to the authority of the established Church, Martin Luther and his followers, it has been argued, laid the foundations not just of the Reformed Churches but of the modern self and of the modern state. While considering these classic interpretations, this seminar will also examine more recent investigations of the plural Reformations: not just Protestant but also Catholic, and not solely mainstream but radical as well. Moreover, in this same period, Christianity expanded well beyond Europe, becoming a global religion. We will ask: in these sweeping transformations of what it meant to be a Christian, who was included and excluded? And how did Reformations of the faith intersect with such a dramatic expansion of the faithful? Historical developments to be considered include theology, popular culture, women and mysticism, the Wars of Religion, overseas missions, the Council of Trent, and the settlement of Westphalia. Authors to be read include Luther, John Calvin, Teresa of Ávila, Michel de Montaigne, Ignatius of Loyola, and others.

Class Format: seminar
Requirements/Evaluation: two short papers (5-7 pages) and a longer final paper (10-12 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

SEM Section: 01 TR 11:20 am - 12:35 pm Alexander Bevilacqua

HIST 331 (S) European Intellectual History from Aquinas to Kant
The scholars and philosophers of early modern Europe set the agenda for much of modern Western thought concerning epistemology, morality, religion, and politics. Many of their debates still inform our intellectual world: How do we know what we know? Is human nature intrinsically selfish? What is the nature of God, and of His revelation? Is individual freedom or political stability more important? Our class will examine how these ideas emerged in the context of such intellectual movements as scholasticism, humanism, the new philosophy and the Enlightenment. We will also discuss
the effects of the invention of the printing press, the edition and translation of the classics and the Bible, and the foundation of journals and new gathering places for public discussion. Thus we will retrace the long and winding path from the intellectual culture of late medieval Europe to that of the Enlightenment. In the process, we will rediscover the arguments of major thinkers and consider what they can teach us today. Authors to be read include Petrarch, Machiavelli, Montaigne, Hobbes, Spinoza, Voltaire and Rousseau.

Class Format: seminar
Requirements/Evaluation: attendance and participation; two short papers; a longer final paper

HIST 332 (S) Queer Europe: Sexualities and Politics since 1850 (DPE)
Crosslistings: HIST332 / WGSS331
Primary Crosslisting
This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but Italy and Russia will also be the focus of some meetings. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

Class Format: seminar
Requirements/Evaluation: class discussion, the posting of four 500 word response papers, two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: junior and senior History and Women's, Gender and Sexuality Studies majors
Expected Class Size: 12-20
Distributions: (D2) (DPE)
Distribution Notes: DPE: Queer Europe is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

HIST 333 (S) Postwar Britain: Gender, Race, Sexuality, and Social Change, 1945-1990
Crosslistings: WGSS332 / HIST333
A major theme in British historiography is the enormous social change that has taken place in Britain since the end of the Second World War. In the 1950s, sociologists argued about the extent to which postwar affluence was leading to the "embourgeoisement" of the working class; in the 1960s, the advent of the so-called "Permissive Society" witnessed the flourishing of a new culture of sex, drugs, and rock 'n' roll; in the 1970s, the feminist and gay movements challenged gender roles that earlier had seemed so secure; in the 1980s, Thatcherism sought to halt the nation's apparent terminal decline, repudiating much of the progressive legislation of earlier decades by turning the clock back; finally, throughout this period successive waves of immigration appeared to many to challenge the cultural homogeneity of white Britain. This course will explore these themes, addressing the question of what it meant to be "postwar" in Britain, charting the gradual emergence of a new politics of class, gender, race, and sexuality in Britain that made the nation in 1990, at the end of the postwar period, a radically different place from what it had been in 1945. In attempting to make sense of these complex changes, we will consider a variety of documents and works by recent historians, along with a dozen films, which students will be required to view outside of class.

Class Format: discussion

Requirements/Evaluation: class discussion, two 8-10 page interpretive essays, and a self-scheduled final examination

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: junior and senior History and Women's, Gender & Sexuality Studies majors

Expected Class Size: 15-20

Distributions: (D2)

HIST 334 (F) Victorian Psychology from the Phrenologists to Freud

Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents, including: professional literature in psychiatry, from the phrenologists to Freud; manuals on child rearing, education, sexual practice, and living the wholesome life; and cultural documents.

Class Format: seminar

Requirements/Evaluation: participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: junior and senior History majors

Expected Class Size: 25

Department Notes: fulfills the department's seminar requirement for graduation with a degree in history and also the European area requirement.

HIST 335 (F) Weimar Germany
The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany's past or as harbingers of its future.

Class Format: discussion

Requirements/Evaluation: evaluation will be based upon participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: students with background in European history, or History majors

LEC Section: 01 MR 2:35 pm - 3:50 pm Thomas A. Kohut

HIST 336 (S) National-Socialist Germany

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate and assess some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the experiential reality of the Volksgemeinschaft; the popularity of National Socialism; youth and women in the Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime's euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the "Final Solution to the Jewish Problem"; German knowledge of and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

Class Format: lecture/discussion

Requirements/Evaluation: active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay

Extra Info: the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)

Extra Info 2: may not be taken on a pass/fail basis

HIST 337 (F) After Stalin: Soviet History from "Thaw" to Collapse

Crosslistings: HiST337 / RUSS337

Primary Crosslisting

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a
stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule infected on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? In what ways did the spirit of the October and Stalinist Revolutions persist or erode from 1953 until 1991? Most importantly, how did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

HIST 338 (F)  The History of the Holocaust

Crosslistings: HIST338 / REL296 / JWST338

Primary Crosslisting

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion

Requirements/Evaluation: evaluation will be based on class participation, a map quiz, four papers (4 pages) based on class readings, and a final research paper (6-8 pages)

Prerequisites: none; open to first-year students with instructors permission

Growing economic inequality—at home and in the world—is fueling powerful new protest movements reminiscent of the times of revolution in which Karl Marx played such an important role. Not surprisingly, activists, journalists, and academics have revived interest in studying Marx—the man, the activist, the theoretician—to discover his continuing relevance today. In this class, we will study Marx both by reading lively biographies of Marx and his family (Engels included) and by reading some of his most important writings. We will focus on Marx the revolutionary activist, paying special attention to the two revolutions he was actively engaged in (the 1848 revolutions, the Paris Commune of 1871); we will study his role in founding and working in the First International (1864-1876); we will examine Marx’s views about slavery and the Civil War in the United States, as well as the increasing attention he paid to non-European peoples and social formations in his later life; we will focus on Engels and Marx’s ideas about the family, gender, and the woman question; we will read excerpts from his major work, Capital, with an eye towards understanding the pertinence of his critique of capitalism; and we will conclude by examining Marx’s relevance for revolutionary movements today, particularly those demanding environmental justice in Standing Rock and beyond.

Class Format: seminar

Requirements/Evaluation: evaluation to be based on class participation, and 2-3 medium sized papers, and a substantial class presentation

reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most commonly used to describe Russia in the early 1990s is “disappear”: money, jobs, food, and people. The very things that Soviet-style socialism had committed itself to providing for started to vanish as a result of invisible and market forces. This course will explore what emerged in the spaces left empty after Soviet-style socialism’s demise in three parts. The first part of the semester will examine the origins of the Soviet Union’s collapse and its breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the collapse. Finally, the third part of the course will focus on Putin’s ascendance to the presidency and its consequences for Russian citizens at home and Russia’s image abroad. By semester’s end, students will have acquired the content and analytical literacy to place present-day Russia in its specific historical context and identify multiple sources of causation that may help explain Russia’s transition from socialism to capitalism to Putinism during the past quarter century.

HIST 347 (S) Democracy and Dictatorship in Latin America

The inability—or failure—of Latin American countries to establish stable and democratic governments has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies in Brazil, Argentina, Mexico, Peru, and the countries of Central America. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes “democratic” or “dictatorial”—and the implications of our choice of criteria.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers, and a longer (10-12-page) final essay

Prerequisites: none

Enrollment Limit: 25

HIST 352 (F) Americans and the Maritime Environment  (WI)

Crosslistings: HIST352 / MAST352

Secondary Crosslisting

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind’s changing relationship with the world’s oceans.
Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

**Class Format:** lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

**Requirements/Evaluation:** two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D2) (WI)

**HIST 354 (F) The Revolutionary Generation: Galaxy of Leaders**

Crosslistings: HIST354 / LEAD285 / PSCI285

**Secondary Crosslisting**

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

**Class Format:** seminar

**Requirements/Evaluation:** three papers, several class presentations, and active participation in all discussions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**HIST 358 (S) The Roosevelt Style of Leadership**

Crosslistings: LEAD325 / HIST358

**Secondary Crosslisting**

In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor
Roosevelt play? In addition to studying biographies, their writings and speeches, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on participation in class discussions, oral reports, two research papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none; courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

**Enrollment Limit:** 15

**Enrollment Preferences:** Leadership Studies concentrators and students with a background in American history and Political Science

**Expected Class Size:** 15

**Distributions:** (D2)

**Attributes:** HIST Group F Electives - U.S. + Canada

---

**HIST 362 (S) Indigenous Women’s History** (DPE) (WI)

Crosslistings: AMST324 / HIST362 / WGSS324

**Secondary Crosslisting**

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women’s lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures—such as La Malinche, Pocahontas, and Sakakawea—as well as lesser known historical actors, political leaders, writers, and artists.

**Class Format:** seminar

**Requirements/Evaluation:** engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** American Studies, History, and Women's Studies, Gender and Sexuality majors

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: In this course, we examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives. WI: With substantial focus on students’ development of independent research papers, this course satisfies the WI requirement.

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada; HIST Group G Electives - Global History;

**HIST 364 (F) History of the Old South**

Crosslistings: HIST364 / AFR364 / AMST364

**Primary Crosslisting**

---
During the course of the semester, we shall investigate two broad, interrelated topics: slavery in the antebellum South, and the impact of slavery on Southern civilization. Our approach will be primarily topical. In the first half of the course, we shall look at subjects like the foreign and domestic slave trade, patterns of work and treatment, the nature of the master-slave relationship, resistance and rebellion, and slave cultural, social, and family life. The second half of the course will concentrate on the influence of the institution of slavery on the mind, social structure, and economy of the Old South, and slavery's impact on Southern politics and the decision for secession in 1860-61.

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation, two papers of moderate length, and a comprehensive final examination

Prerequisites: none; open to first-year students with instructor's permission

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D2)

HIST 365 (S) History of the New South
Crosslistings: AFR365 / HIST365 / AMST365

Primary Crosslisting

A study of the history of the American South from 1877 to the present. Social, political and economic trends will be examined in some detail: the role of the “Redeemers” following the end of Reconstruction; tenancy, sharecropping, and the rise of agrarian radicalism; Southern Progressivism; the coming of racial segregation and the destruction of the Jim Crow system during the years of the Civil Rights movement; Southern politics during the depression and post-World War II years.

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation, 2 papers of moderate length, and a comprehensive final examination

HIST 366 (S) What They Saw in America
Crosslistings: HiST366 / AMST244 / SOC244

Secondary Crosslisting

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.
Class Format: seminar; * Please note atypical class hour Monday, 4:45-8:30 pm.

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 9

Enrollment Preferences: juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor

Expected Class Size: 9

Department Notes: * Please note atypical class hour Monday, 4:45-8:30 pm.

HIST 368 (F) Black Metropolis: Writing About Race and the City (WI)
Crosslistings: HIST368 / AFR367

Primary Crosslisting
This course investigates how scholars, writers, and activists have written about the black urban experience in the twentieth century. Today, there exists a complex relationship between black and urban, with much public discourse stereotyping black people as residents of the "inner city." At the beginning of the 20th century this development would have been highly improbable; circa 1900, African-Americans remained the country's most rural demographic group, disproportionately working in agriculture. This class addresses why, how, and when black people migrated to cities, and the structural mechanisms that channeled them into segregated neighborhoods and jobs, even as these changed over time. More importantly, though, we will focus on the way in which African-Americans themselves sought to understand, explore, and contest these experience of ghettoization. How did black people express themselves and build communities for survival, pleasure, and profit? Throughout the course we will put in dialogue various types of writing: these include social scientific studies of black life, urban history, and the journalism, poetry, and literature produced by black urbanites during the first half of the 20th century. By examining of these different modes of writing about race in the city together, we will gain perspective on the specific practices of historical writing and how historians differ from other inquirers in the questions they ask, the sources they use (and how they use them), and the arguments they make.

Class Format: seminar
Requirements/Evaluation: short informal writings (1-2 pages) and two formal papers (6-8 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: First-Years and Sophomores
Enrollment Limit: 19
Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar
Expected Class Size: 19
Distributions: (D2) (WI)
Distribution Notes: WI: This course is intended to focus on the writing process, both in examining different types of writings about race in the city, and through the structure of the course itself. Students will write multiple drafts and workshop their papers; as well, they will experiment with different forms of writing and writing processes.

Not offered current academic year

HIST 369 (S) The Carceral State
Crosslistings: HIST369 / AFR361

Primary Crosslisting
This seminar will examine the rise and character of the "carceral state," a term scholars use to denote "the vast apparatus of punishment and control that exists in the contemporary United States." We will begin with systems of policing, processing, and punishment that came under criticism in the 1960s from civil rights advocates, simultaneous with the rise of "law and order" politics. The middle of the course will trace out how in the aftermath of
civil rights reform, conservatives and liberals together paved the way for the expansion of punitive capacities at the local, state, and federal level. We will pay particular attention to the uneven development of mass incarceration across states and localities, and the different patterns of racial disparity that this produced. Finally, we will look at the effects of the carceral state on American society and politics, and the movements to dismantle it.

Class Format: seminar

Requirements/Evaluation: coursework to be evaluated includes discussion and informal writing, two papers, and an oral presentation

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 20

Distributions: (D2)

Attributes: HIST Group F Electives - U.S. + Canada

HIST 370 (F)  African American Urban History

Crosslistings: AFR366 / HIST370

Primary Crosslisting

In the mid twentieth century, "inner city" became synonymous with poor African Americans living in the urban centers of the industrial North and West. However, urban African American history stretches back to before the Declaration of Independence. African Americans built and dwelled in great cities North and South. This course will explore the history of African Americans in places like New York, Savannah, Chicago, Miami, and Oakland. We will explore such themes as slavery and freedom in cities, migrations to cities in the early 20th century, the shape of Jim Crow in the North, and the contention over the definition of "black" as Caribbean and African migrants came to urban centers after 1960. We will pay particular attention the history of black urban culture and style, reading texts on fashion, music, dance, and leisure. Students will write one book review (2-3 pages), do an oral presentation, and write two papers. One brief research paper (7-10 pages) and one historiographic essay (7-10 pages).

Class Format: seminar

Requirements/Evaluation: one short book review, one brief research project (7-10 pages), and one historiographic essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Africana Studies concentrators and History majors

Expected Class Size: 20

Distributions: (D2)

Attributes: AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada

Not offered current academic year

HIST 371 (F)  Oral History: Theory, Methods and Practice

Oral history offers a powerful means to document history "from the bottom up," filling gaps in the historical record and creating ways to make new community connections. Using a variety of texts, including transcripts and recorded interviews, students will consider what oral history offers as a source of information; how oral history is produced and analyzed; legal, ethical, and methodological considerations; the impact of digital technologies on oral history; and the ways that memory, context, and identity shape the interview. The class will include a hands-on component and a group final project, giving students the chance to conduct, archive, use and present interviews. Interviews will be added to the Williams College Archives. The final project will focus on a topic related to local history such as the impact of industry and deindustrialization on northern Berkshire County. All students will be expected to complete several short research and writing assignments; travel off campus to conduct recorded interviews; submit written transcriptions; and participate in the final group project. Additional compulsory class sessions may be added for field trips and methods workshops.

Class Format: seminar

Requirements/Evaluation: 2 transcribed interviews, 2 short papers, participation, final group project; students must travel off campus to conduct two oral history interviews; interviews to be recorded, transcribed, and archived. Also short papers and final group project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
HIST 372 (F) The North American West: Histories and Meanings
This course will explore the various and contested histories of the geographical region in North America that Americans often call "the West". With porous boundaries; changing empires and national borders; an extraordinarily diverse mix of peoples; and most importantly, continuous indigenous presence to the present day, this region both has a remarkably rich history and poses central questions to how we view American history. What if, from the vantage point of the 1780s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? Or what if, instead of understanding "the West" as a place that people migrated "to" from "the East," we think about "the West" as a place diversely inhabited for thousands of years that experienced both very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? And where do Americans' stories of western individualism fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, 5 short-to-moderate writing assignments and one 8-10 page research paper, due at the end of reading period
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors
Expected Class Size: 25
Distributions: (D2)
Attributes: AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern

Fall 2018
SEM Section: 01 MR 1:10 pm - 2:25 pm Karen R. Merrill

HIST 373 (S) Sites of Memory and American Wars
This course will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. We will ask such questions as: How and why have the memorializations of wars in America changed over time? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do sites of memory tell us about history, about society's views of wars and of soldiers, and about America? We will look at these questions both throughout U.S. history and through case studies, including the American Civil War, the wars against indigenous nations, World Wars I and II, and Vietnam.

Class Format: lecture
Requirements/Evaluation: short papers, one longer research paper, and presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors
Expected Class Size: 10-15
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada

Spring 2019
HIST 376 (F)  Sex, Gender, and the Law in U.S. History  (DPE)
Crosslistings: HIST376 / WGSS376

Primary Crosslisting
This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

Class Format: seminar
Requirements/Evaluation: four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors, Women's, Gender and Sexuality Studies majors
Expected Class Size: 20
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course fulfills the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 379 (S)  Black Women in the United States
Crosslistings: AFR379 / HIST379 / WGSS379

Primary Crosslisting
As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on student participation, three papers, and a brief oral presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors and Africana Studies concentrators
Expected Class Size: 15-20
Distributions: (D2)
Attributes: AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada; WGSS Racial Sexual + Cultural Diversity Courses
HIST 380 (F) Comparative American Immigration History (DPE)

This course covers the history of immigration to the U.S. from the 1800s to the present. It compares the experiences of immigrants from Europe, Asia, Latin America, and the Middle East.

Class Format: lecture/discussion

Requirements/Evaluation: a series of papers and a final oral history or family history

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first come, first served

Expected Class Size: 25

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course examines the history of immigration patterns of people coming to the U.S. from all over the world from the late 18th century to the present. By examining American immigration history through immigration law and a variety of texts (novels, census materials, legal cases, oral histories, and secondary sources) this class will reveal a constant tension in American society that vacillates between welcoming and shunning immigrants, depending on their race, religion, class, gender, and sexuality. The power to include and exclude various people wishing to become part of our country and society has been a conflict that has played out for nearly all of our national history.

HIST 384 (F) Selected Topics in Asian American Studies

Crosslistings: ASST384 / HIST384

Primary Crosslisting

Assuming some previous knowledge of Asian American history, this course will examine a number of specific topics in Asian American Studies. Using historical sources, monographs, graphic memoirs, novels, and films, potential topics include Asians of mixed race, Orientalism, adoption, food culture, the "model minority," legal studies, Asian Americans and the environment, and the impact of war on Asian American history.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on a series of writing assignments: four short response papers, two 5- to 7-page essays, and a 10- to 15-page research paper

Prerequisites: none; open to all

Enrollment Limit: 25

Expected Class Size: 10-15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Core Courses; HIST Group F Electives - U.S. + Canada

Not offered current academic year

HIST 385 (S) Politics, Activism, and Everyday Life: Latinas/os in New York City and the Northeast

Crosslistings: HIST385 / LATS385

Primary Crosslisting

This course explores how everyday life has shaped the politics and activism of Latinas/os in New York City and the Northeast from the post-World War II era to the present. Arriving in larger numbers in the 1940s and 1950s, Puerto Ricans sought to define a place for themselves in the region. In
ensuing decades, Cubans, Dominicans, Central and South Americans, and Mexicans increasingly settled in the city and the region. Addressing the issues stemming from their everyday lives, politics and activism took a wide variety of forms from community building to meet immediate needs, to social service approaches and community-based organizing during the War on Poverty in the early 1960s, to the radical political and social movements of the late 1960s and the 1970s, to electoral politics throughout the decades to the present. Activists organized around a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, legal status, and LBGTQ+ visibility and rights. At times, politics and activism were rooted in one national origin group, while other efforts were intentionally and explicitly Latinx. This course will draw on autobiographies and other primary materials, as well as documentaries to help in making the connections between everyday life and politics. For final projects, students will have the option of delving deeper into autobiographies and other narrative sources OR of engaging in community based learning throughout the semester and using these experiences as the foundation for their final projects.

Class Format: lecture

Requirements/Evaluation: class participation, two essays of 3- to 5-pages each, final project of 7- to 10-pages, and final presentation, option of community based learning

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors and Latina/o Studies concentrators

HIST 386 (S)  Latinas in the Global Economy: Work, Migration, and Households

Crosslistings: LATS386 / HIST386 / WGSS386

Secondary Crosslisting

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

Prerequisites: open to first-year students with instructor's permission

Enrollment Limit: 25

Expected Class Size: 15

Distributions: (D2)

HIST 387 (S)  Living with the Bomb: American Culture in the Nuclear Age
Crosslistings: SOC386 / HIST387

Secondary Crosslisting

Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on a midterm, a final exam, and a 10- to 12-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 35

Expected Class Size: 35

Distributions: (D2)

Attributes: HIST Group F Electives - U.S. + Canada

HIST 389 (S) The Vietnam Wars

Crosslistings: HIST389 / LEAD389 / ASST389

Primary Crosslisting

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: seminar

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

HIST 390 (F) Transforming the New World and the Old: The Haitian and French Revolutions

This course focuses on the radical transformative power of the Haitian and French Revolutions, the ways in which they challenged the hierarchies of the New World--of racism, and slavery--and of the Old World--of monarchy, aristocracy, the Church, and even of the bourgeoisie--with long-lasting effect. It will show how the two revolutions were intricately interrelated--even though historians of the French Revolution have usually neglected the Haitian Revolution and downplayed its centrality--and how they initiated a century of Revolution on both sides of the Atlantic. Given the incomplete and
unfinished character of both Revolutions, and the fact that the issues they attempted to address live on today, this class will make a conscious attempt
to show the continuing relevance of these Revolutions to 21st century movements for change.

Class Format: seminar

Requirements/Evaluation: short paper (8-10 pages), research paper (15 pages), final exam and class participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors and Africana Studies concentrators

HIST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean

Crosslistings: GBST391 / HIST391 / ASST391

Primary Crosslisting

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of
the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in
the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through
oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers,
nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus
we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various
European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a
strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society;
pilgrimage; piracy; the culture of port cities; and food across time.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation
and final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to all

HIST 393 (S) Sister Revolutions in France and America

Crosslistings: HIST393 / LEAD212

Crosslistings: HIST393 / LEAD212
In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on three papers, several class presentations, and active participation in class discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with backgrounds in American history, French history or Political Science

Expected Class Size: 15

Distributions: (D2)

Attributes: HIST Group C Electives - Europe and Russia; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern; LEAD Facets or Domains of Leadership

Spring 2019

SEM Section: 01  T 1:10 pm - 3:50 pm  Susan Dunn

HIST 394 (S) The History of Panics

What is a panic? This course takes up questions of what has defined, caused, and shaped panics of various kinds-political, societal, moral, medical, and financial. We will consider what has fueled panics, what has prevented them, what their effects have been, how they have ended, who has panicked, who has been the victim of panics, and what has distinguished premodern from modern incarnations of the phenomenon. Central themes will include the relationship between panics and emotions (anxiety, fear, insecurity, irrationality, hysteria), communication (rumor, gossip, mass media), technology (electricity, vaccines, the computer), and violence (persecution, revolution, psychological torment). With a multidisciplinary approach informed by sociology, economics, psychology, and history, our examination will span different times and different places and will encompass witch hunts of many sorts, infectious diseases, financial crises, cultural scares, and more.

Class Format: seminar

Requirements/Evaluation: class participation, response papers, one short 5-page paper, and a research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors, potential History majors

Expected Class Size: 15

Distributions: (D2)

Not offered current academic year

HIST 395 (F) Signs of History

Crosslistings: COMP395 / HIST395 / ENGL395

Secondary Crosslisting

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always “written by the victors,” as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and
writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Class Format: seminar

Requirements/Evaluation: evaluation based on two papers, one 6 and one 10-12 pages in length, and general participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, History and German majors

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under HIST

Attributes: ENGL Criticism Courses;  ENGL Literary Histories B

Not offered current academic year

HIST 402 (S)  A History of Family in Africa  (WI)
Crosslistings: GBST402 / HIST402 / AFR402 / WGSS400

Primary Crosslisting

The family is the center of private life, but it has also been a topic of constant discussion and contention in Africa. In this class we will examine how political upheavals and economic pressures have changed the concept of the family and the role it plays in various African societies. We will also consider the changing views of gender, race, age, class, and sexuality on the idea of family.

Class Format: seminar

Requirements/Evaluation: seminar, discussion, seminar, discussion, and 20-page research paper (including preparatory writing exercises throughout the semester)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: GBST African Studies Electives;  HIST Group A Electives - Africa;

Not offered current academic year

HIST 411 (F)  Happy Holidays! A Comparative History of Commemorations and Festivals  (WI)
Crosslistings: ARAB411 / HIST411 / REL321

Primary Crosslisting

What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Class Format: seminar

Requirements/Evaluation: several short response papers and a 20- to 25-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12
Enrollment Preferences: seniors, especially History and Arabic Studies majors

Expected Class Size: 12

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Attributes: HIST Group E Electives - Middle East;

Not offered current academic year

HIST 415 (S) Gods and Kings: Historical Narratives from India  (WI)

Crosslistings: COMP415 / ASST415 / HIST415

Primary Crosslisting

India’s long history with earliest written records going back to 2000 B.C presents multiple challenges that are unique among the ancient civilizations. The critical challenge is conceptual: how do we recognize the historical sense of societies whose past is recorded in ways that are different from European conventions? British rulers claimed that India had no sense of history before the colonial period. And this view has persisted despite recent scholarship that has undermined the factual and conceptual basis of this theory. The purpose of this course is twofold: first, to discuss the analytical methods one could apply to understand the ‘history’ contained in the diverse body of classical Indian literature; second, to study a representative set of primary sources that belong to the distinct historical traditions of India. Students will learn to apply these methods to gain new insights and debate the limitations of the approach. The course will begin with an exploration of the epic tradition and continue with in-depth readings of narratives from other important genres including popular bardic accounts, royal biographies and court dramas ranging from c. 1000 BCE to 1500 CE.

Class Format: seminar

Requirements/Evaluation: class participation, several short papers and a substantial final paper based on primary sources

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some experience with HIST courses preferred

Enrollment Limit: 15

Enrollment Preferences: History majors; Comp lit majors; Asian Studies Majors

Expected Class Size: 10-15

Distributions: (D2) (WI)

Distribution Notes: meets division 1 requirement if registration is under COMP; meets division 2 requirement if registration is under HIST or ASST

Attributes: GBST South + Southeast Asia Studies Electives; HIST Group B Electives - Asia; HIST Group P Electives - Premodern;

HIST 424 (S) The Dark Ages: Gaul after the Fall of Rome

What made Antiquity different from the Middle Ages? What changed after the Roman Empire ceased to exist in the West? This seminar will approach these classic problems through an intense focus on Gaul during the so-called “Dark Ages,” from the fifth to the eighth centuries. During these years, Frankish kings of the Merovingian dynasty dominated Western Europe. Our sources for these transitional centuries are some of the most colorful and fascinating texts to emerge from the ancient world. We will begin with a look at life and politics under the later Roman empire, and then make ourselves experts in Merovingian history by studying nearly all the surviving written evidence. Narrative histories, chronicles and law codes will claim the bulk of our time and attention, but we will also sample documents, literature, and archeological finds. This comprehensive exposure will prepare us to confront the many scholarly debates that have surrounded the Merovingian age.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on two class presentations, a shorter mid-term paper, and a substantial final research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: senior, then junior History majors

Expected Class Size: 10-15

Distributions: (D2)
HIST 434 (S)  The Meaning of Diaspora and the Jews of Europe
Crosslistings: JWST434 / HIST434

**Primary Crosslisting**

Dispersion, exile, migration, statelessness are all aspects of diaspora. And in the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, this seminar examines various interpretations of Jews’ diasporic existence from the nineteenth century to the present, both as a cultural practice and a form of group identity from which political claims have been made. We will test the proposition that "The Modern Age is the Jewish Age," that is, that the meaning of diaspora in modern Jewish history has direct relevance to students of human identity not just of Jewishness. Throughout the second half of the semester, students will conduct independent archival research on some aspect of the history of the Jewish diaspora that will culminate in a 20-page paper. The seminar will continue to meet weekly as a research colloquium, to provide a forum for students to present their research and drafts in progress and provide feedback on fellow students' work.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

Enrollment Limit: 15

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 15

Distributions: (D2)

Attributes: HIST Group C Electives - Europe and Russia; JWST Capstone Course; JWST Core Electives

HIST 443 (S)  Race and Ethnicity in Latin America
Crosslistings: HIST443 / AFR383

**Primary Crosslisting**

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as “racial democracies” and look at the historical roots and political impact of both “positive” and “negative” stereotypes of race relations in the region. To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, one short paper, and a substantial (20-25 page) research paper

Enrollment Limit: 15

Enrollment Preferences: History majors and Latino/a Studies concentrators

Expected Class Size: 10-15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group D Electives - Latin America + Caribbean

Not offered current academic year

HIST 453 (S)  Women, Gender, and Social Movements in U.S. History  (WI)
Crosslistings: HIST453 / WGSS453

**Primary Crosslisting**
This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

**Class Format:** seminar

**Requirements/Evaluation:** 20- to 25-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** senior History majors

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Distribution Notes:** WI: This course will focus explicitly on the process of writing a substantial research paper, including writing a proposal, and workshopping and revising drafts in class.

Spring 2019

SEM Section: 01 Cancelled

**HIST 456 (F) Civil War and Reconstruction**

Crosslistings: AMST456 / AFR385 / HIST456

**Primary Crosslisting**

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on class participation and a substantial research paper based at least in part on primary source materials

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Distributions:** (D2)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada

Fall 2018

SEM Section: 01 W 1:10 pm - 3:50 pm Charles B. Dew

**HIST 458 (S) Sr.Sem:Sexual Rights,Gender Equality, and Religious Liberty: Conflicts in Law, Culture, and Politics (WI)**

Crosslistings: WGSS405 / HIST458

**Secondary Crosslisting**
Legal systems, political leaders, religious groups, and social movements, have generated and responded to conflicts and perceived conflicts between religious freedom, gender equality, and sexual rights in a variety of ways over the past twenty-five years. This course will consider these conflicts in a comparative context, and will examine when, why, and how appeals to religion, tradition and/or culture have been used to carve out exceptions to otherwise generally applicable laws.

**Class Format:** seminar

**Requirements/Evaluation:** 20-page research paper, which students will write after developing research proposal, composing annotated bibliography, and writing several drafts in close consultation with professor and in in-class workshops

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors and History majors

**Expected Class Size:** 15

**Distributions:** (D2) (WI)

**Attributes:** HIST Group C Electives - Europe and Russia; HIST Group F Electives - U.S. + Canada; JLST Interdepartmental Electives; Not offered current academic year

**HIST 459 (S) The Culture and Politics of Neoliberalism (DPE)**

**Crosslistings:** AMST407 / HIST459

**Secondary Crosslisting**

Neoliberalism is, in essence, the belief that unencumbered market mechanisms will maximize prosperity and happiness. Over the past forty years this idea has come to shape the global economy, the ways governments function, and how individuals conduct themselves and view their relations with other people. However, political movements around the world have challenged these principles—pointing to growing wealth gaps, environmental destruction, and highly individualistic cultures that have developed in the wake of neoliberal thinking. This interdisciplinary course will provide students with a detailed understanding of the ways neoliberal ideology interacts with preexisting racial, gender, and global inequalities. We will begin by tracing the rise of "market fundamentalist" thinking in the fields of economics and public policy. We will rely on anthropological studies to assess neoliberalism's effects on the Global South, and turn to sociological and media studies texts to explore its imprint on aspects of U.S. culture ranging from welfare provision, to education, and even reality television. The course will conclude by examining movements resisting neoliberalism and asking whether the rise of the Trump administration's brand of right-wing populism signals the decline of this mode of governance and way of life.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, a written mid-term exam, one in-class presentation, research paper proposal, 12- to 16-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** previous courses in American Studies, critical studies in neoliberalism or political economy, or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies and History majors

**Expected Class Size:** 5

**Distributions:** (D2) (DPE)

**Distribution Notes:** DPE: Examines growing economic inequality in the United States, and the ways implementation of market fundamentalist policies have had impacted people differently based on existing differences, such as race, gender, and position in the global north or global south. We critically engage with the claims of neoliberal theorists that the market in goods and services is a sphere of voluntary exchange and freedom, while decision-making through government is a form of coercive power, just in only certain instances. Study resistance, including the Mexican Zapatistas' uprising against NAFTA.

**HIST 464 (S) The United States and the Vietnam War**
primary_crosslisting

U.S. involvement in Vietnam affected nearly every aspect of American life, including the country's overall foreign policy, its military strategy, the relationship between various branches of government, the nation's political trajectory, the role of media in society, youth culture, race relations, and more. This seminar explores America's war in Vietnam and its dramatic ramifications at home and abroad. We will evaluate the Vietnam War era as a turning point in U.S. history--and in the role of the U.S. in the world--by reading and discussing a number of scholarly works on domestic and international aspects of the conflict. Students will develop an original research topic and research and write a 20- to 25- page paper, based in primary sources, on one aspect of America's Vietnam War.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper
Enrollment Limit: 15
Enrollment Preferences: advanced History majors
Expected Class Size: 10-15
Distributions: (D2)

Not offered current academic year

HIST 468 (S) Race, Empire, and the Birth of the American Century (DPE)

Crosslistings: AMST468 / HIST468

Primary Crosslisting

This course examines the birth of the "American Century" by studying the extension of Manifest Destiny to the Pacific, especially the American occupation of Hawaii and the Philippines.

Class Format: seminar
Requirements/Evaluation: a series of weekly papers and a final research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: must be a History or American Studies major
Expected Class Size: 15-19
Department Notes: History Department Senior Seminar
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course will examine the racial, class, gender, and international implications of the American push across the continent and into the Pacific (Hawaii and the Philippines) during the late 19th and early 20th centuries. The content will cover the unequal power relations between Anglo Americans and Native Americans, Hawaiians, and Filipinos, as evidenced in the American occupation of land both within our shores and the colonization of two island nations in the Pacific. We will also study how the American presence in these areas affected how the original inhabitants of these areas were perceived and represented by Americans as witnessed in their presence at the Worlds Fairs of 1893 and 1904. The course will also explore the role that American education played in "civilizing" Native Americans, Hawaiians, and Filipinos.

SEM Section: 01 W 1:10 pm - 3:50 pm Scott Wong

HIST 469 (F) Notions of Race and Ethnicity in American Culture

Crosslistings: AMST469 / HIST469

Primary Crosslisting

While "race" and "ethnicity" have always played fundamental roles in shaping the course of American culture and the definition of who is or who can
be an "American," our understanding of these concepts of race and ethnicity has often been less than clear. The purpose of this seminar is to examine how Americans have defined and articulated the concepts of race and ethnicity at various points in our history and how these ideas have been expressed in art, policy, practice, and theory.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on weekly response papers, an exercise with the Williams College Museum of Art, an annotated bibliography, and a final research paper of 20-25 pages; students will also be required to lead a class discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: previous upper division HIST courses

Enrollment Limit: 15

Enrollment Preferences: senior History majors

Not offered current academic year

HIST 471 (S) Comparative Latina/o Migrations  (WI)
Crosslistings: LATS471 / HIST471

Secondary Crosslisting

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

Class Format: discussion/seminar

Requirements/Evaluation: evaluation will be based on class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Latina/o Studies concentrators

Expected Class Size: 8-15

HIST 476 (F) CAPSTONE: Black Radicalism
Crosslistings: AFR476 / HIST476

Secondary Crosslisting

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance--transatlantic people of African descent have demanded radical change in the
organization of modern societies. Their struggles and ideas have changed the ways we think and study--through the formation of Africana/African-American/Black-Studies--and the ways in which we express ideas--through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

Extra Info: may not be taken on a pass/fail basis

HIST 478 (F) Cold War Landscapes

Crosslistings: ENVI478 / AMST478 / HIST478

Primary Crosslisting

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Space and Place Electives; HIST Group C Electives - Europe and Russia; HIST Group F Electives - U.S. + Canada

HIST 479 (F) Recent U.S. History: The 1970s and 1980s (WI)

The 1970s and 1980s are decades that mark the beginning of many of the phenomenon shaping the United States today: the rise of economic inequality; the origins of globalization; the first awareness of an "energy crisis;" the birth of social movements like feminism, gay rights, and black power; the deepening of urban poverty and the expansion of the criminal justice system; the ascendance of stock market and financial deregulation;
the transition to a service economy; the growth of new forms of art and music like hip-hop and punk; the rise of evangelical Christianity as a political force; the emergence of a conservative movement; the end of Soviet Communism. This course will look at the political, economic, cultural and intellectual history of the 1970s and 1980s in the United States, with a special eye to the question of how and why conservative politics and a neoliberal economic order developed alongside liberal social and cultural values. We will consider the connection between the right and the left over this period, asking how we should think about the rise of the gay rights movement, the legacy of the civil rights movement, and the evolution of feminism in the broader context of American political and economic history. The course will also address some of the transnational aspects of recent American history, both the ways that ideas from other parts of the world have shaped American politics and society and the impact that the United States has had on the rest of the world. We will make use mostly of primary documents-political speeches, manifestos, music and lyrics, film, journalism and fiction-but we will also consider the ways that scholars have tried to conceptualize such recent history. While we will look at political leaders, intellectuals and the evolution of national politics, we will also consider the role of social movements, popular culture and the actions and ideas of people with no special access to power in shaping the history of the period. Throughout, we will ask: what are the connections between this history and the present? What lessons can we draw to think about our contemporary political and economic situation? Students will develop their own research questions and will produce a 20-page paper based on original research.

Class Format: seminar

Requirements/Evaluation: 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: senior History majors

HIST 480 (F)  Interpretations of the Israeli Palestinian Conflict  (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Primary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

HIST 481 (S)  History of Taiwan  (WI)
Crosslistings: ASST413 / HIST481

Primary Crosslisting
Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

HIST 482 (F)  The Great War, 1914-1918  (WI)
Crosslistings: LEAD382 / HIST482

Primary Crosslisting
During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

Class Format: tutorial
Requirements/Evaluation: paper or critique every week
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: senior History Majors
Expected Class Size: 10
Distributions: (D2) (WI)
HIST 483 (S) Sport and Diplomacy (WI)

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Class Format: tutorial
Requirements/Evaluation: students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-page written critique
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: WI: Each student will be required to write six papers (5- to 7-pages each). We will discuss writing on a regular basis during tutorial meetings in pairs of two students.

HIST 484 (F) The Hundred Years’ War

By the Hundred Years’ War, historians understand a series of battles and wider conflicts waged between England and France from 1337 to 1453, over the succession to the French throne. From the near-total English victory after the Battle of Poitiers to the remarkable revival of French fortunes associated with Joan of Arc, the Hundred Years’ War encompasses some of the most iconic events of later medieval history. The events of the war, together with a broader history of the entire era, are the subject of a monumental study by Jonathan Sumption, who has now published the fourth of a projected five volumes. The greater part of this tutorial will concentrate on a careful, thorough reading of Sumption’s history—a rare opportunity afforded by the tutorial format, given that great historical enterprises are otherwise beyond the scope of college and university classrooms. For additional perspective, we will also read a general survey of the later medieval period and several more specific monographs, and we will consider the reception that Sumption’s work has received among historians of the Middle Ages.

Class Format: tutorial
Requirements/Evaluation: six tutorial papers and six critiques, to be submitted on alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 486  Race in Court  (DPE)
This tutorial will examine how African-Americans used the courts in the 19th and 20th centuries in an effort to construct new social orders that would offer them greater freedom and autonomy. We will begin with the presence of enslaved people in 19th century courts, looking at how and when they might have had recourse to law. We will ask: How and when did black people appear in court as witnesses or litigants? What were their aims and aspirations in participating in the legal process? How did such participation constrain or facilitate their autonomy? We will move on to the efforts of African-Americans to fashion a legal architecture of freedom during and after the War of the Rebellion, a process that ultimately resulted in dramatically transformed relationships between citizens and the federal government, but one that produced new racial hierarchies. Our study of litigation will also look at the ordinary practices of black plaintiffs in local court, to see who, how, and when, they tried to leverage law as a resource, particularly to protect their economic standing. Finally, we will look at the era of civil rights, focusing in on the role of black lawyers in "representing the race" in southern courtrooms where black voice and agency was otherwise limited. Over the semester, students will explore multiple sites of interaction between race and the judicial process, gaining understanding of the history of legal ideas (in particular, how controversies over race led to the redefinition of legal concepts), the history of legal practice (how people use courts), the social history of law (how does law sustain, shape, and transform social practices), and the interactions between these various domains of intellectual inquiry.

Class Format: tutorial

HIST 487 (S)  Lives Across Cultures in the Early Modern World  (WI)
The early modern era, 1500-1800, was the first truly global era in human history. While the period can be studied in terms of transregional trade and flows of capital, macrohistory cannot reveal the human texture of global interaction--the many ways in which people from different continents, religions and languages responded to each other as they increasingly came into contact. In order to explain what early modern globalization looked like on the ground, historians of our time have attempted to recover individual lives that played out across cultures and religions. They have debated whether intercultural experiences caused people to question their own assumptions or to harden in their beliefs, and whether the transition between religious and cultural environments empowered or entrapped these men and women. Through a series of case studies, we will investigate how people made lives across the early modern world, how historians have written about them, and what these historical experiences tell us about how the modern world was made. Readings will combine primary sources with global biographies by major historians of our time.

Class Format: tutorial

Requirements/Evaluation: each student will write and defend six essays and prepare as many critiques of their tutorial partner’s essays

HIST 488 (S)  Gandhi: Nationalism, Philosophy, and Legacy  (WI)
Crosslistings: HIST488 / ASST488 / GBST488 / REL388

Primary Crosslisting

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

HIST 489 (F)  Feminist Movements in U.S. History  (DPE)

This class studies the historical development of feminist movements in the United States. From the 19th century women's rights movements through 20th century movements for women's liberation, it examines the changing definitions of feminism and the array of strategies and organizations that activists have generated. It also examines the complex dynamic between feminist activism and the production of women's history, examining the role of historical narrative in feminists' struggle for social change.

Class Format: tutorial

Requirements/Evaluation: bi-weekly five page papers, bi-weekly analytic papers, and class participation

HIST 490 (S)  Memory, History, and the Extermination of the Jews of Europe  (WI)
Crosslistings: HIST490 / JWST490

Primary Crosslisting
The atrocities committed by Nazi Germany during the Second World War continue to trouble historians in their attempts to understand and represent them in all their magnitude and horror. Beyond historians, the complicity of segments of European societies in perpetrating those atrocities continues to raise thorny questions for postwar European nations about what their responsibilities are toward that past. This tutorial will focus on a series of questions relating to the historicization and memorialization of the extermination of European Jews. They include: Is the Holocaust unique? Is it a Jewish story or universal story? Does the Holocaust raise different issues for the historian than other historical events? How should the Holocaust be represented and what are the implications of different means of representing it? What role, if any, did European Jews play in their own destruction? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the “bystanders” as compared to the “perpetrators”? Were the postwar trials of perpetrators a travesty of justice? How appropriate are the different uses that Israel and the United States have made of the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, governments, and lay people about the meaning (and meaninglessness) of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and more and more nations’ pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated should prove relevant for future consideration of other societies’ efforts to confront their own traumatic pasts.

Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

Requirements/Evaluation: every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week

Extra Info: additional requirements on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise, a thought piece on the issues raised in the tutorial, will cap off the semester's work

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 491 (S) The Suburbs (WI)

Crosslistings: HIST491 / ENVI491 / AMST490

Primary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

HIST 492 (S) Revolutionary Thought in Latin America (WI)

For much of Latin America’s postcolonial history, political and business elites in the United States have viewed the region as a source of revolutionary threats. Too often histories of actual revolutionary movements and the ideas they promulgated have followed either the self-serving narratives that the revolutionaries have laid out or the similarly limited stories composed by their opponents. This tutorial, by contrast, will delve into the complex, contingent, and at times counterintuitive history of revolutionary thought in modern Latin America. Our readings and discussions will carry us from the nineteenth century to the rise of the “New Left” in the last few years. Throughout the course our principle goal will be to examine the internal logic of the most influential programs of revolutionary thought as well as their relationship to circumstances external to them, both in their home regions and globally. At the same time, we will consider the human or moral promise and price of revolutionary options: did the proposed or alleged aims of revolutionary ideals justify the costs they would impose?

Class Format: tutorial; students will meet with the instructor in pairs for an hour each week

Requirements/Evaluation: each student will write and present a 5- to 7-page essay on the readings or offer an oral critique of the work of their partner each week; evaluation will be based on written work and analysis of their partner’s work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to all

HIST 493 (F) Senior Thesis: Research Seminar

This seminar is intended solely for writers of senior theses. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 31 and HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation and completed written work, and will determine if a student will continue in the thesis program

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: limited to seniors accepted into the History Department's Thesis Program

A major in the History of Science is not offered, but the occasional Contract Major or a related interdisciplinary field is possible. Courses in the History of Science are designed primarily to complement and strengthen work in other major fields. Although any of the courses may be taken separately, studying related courses in other departments will enhance their value, because by nature, History of Science is interdisciplinary.

The following will serve as examples: HSCI 101 is an introduction to science and technology studies, and concentrates on key aspects of contemporary science and technology relevant to many issues of living in a technological society. HSCI 224 Scientific Revolutions deals with the emergence of modern science in the 1600s and 1700s, and with subsequent revolutions in scientific thought; as such it complements courses related to modern European history. HSCI 240 traces the influential role of science and invention in the shaping of American culture, and complements offerings in American Studies and American History. HSCI 320, an historical overview of the ideas, practice, and organization of medicine, provides context for related coursework in History, Philosophy, and the Premed Program.

Courses of Related Interest

PHIL 209 Philosophy of Science
SOC 368 Technology and Modern Society

HSCI 99 (W) Indep Study: History of Science
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

HSCI 101 (S) Science, Technology, and Human Values
Crosslistings: HSCI101 / SOC201 / SCST101

Secondary Crosslisting
This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar
Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams
Prerequisites: none

**HSCI 240 (F) Great Astronomers and Their Original Publications (WI)**

**Crosslistings:** ASTR240 / LEAD240 / SCST240 / HSCI240

**Secondary Crosslisting**

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper

HSCI 336 (S) Science, Pseudoscience, and the Two Cultures (WI)
Crosslistings: LEAD336 / ASTR336 / HSCI336

Secondary Crosslisting
A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy.
Expected Class Size: 12

HSCI 338 (F) Transhumanism: Religion, Technoscience, Obsolescence
Crosslistings: SOC338 / REL338 / HSCI338 / SCST338

Secondary Crosslisting
This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through
close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Class Format: seminar
Requirements/Evaluation: attendance and participation, informal weekly writing, 15- to 20-page seminar paper
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors and Science and Technology Studies concentrators
Expected Class Size: 20
Distributions: (D2)

Spring 2019
IND Section: 01    TBA     Jason Josephson Storm
This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

**INTR 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making**
Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

**Secondary Crosslisting**
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums—from art museums to scientific, historical, and specialty collections—and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

**Requirements/Evaluation:** final formal public exhibit

**Prerequisites:** keen interest in museums and culture

**Enrollment Limit:** 12

**Enrollment Preferences:** random selection

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

**INTR 99 (W) Indep Study: Interdisciplinary**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

Winter 2019

IND Section: 01

**INTR 219 (F) Women in National Politics (WI)**
Crosslistings: PSCI219 / INTR219 / WGSS219

**Primary Crosslisting**
This tutorial focuses on the writings and memoirs of black women who have shaped national politics through civil rights and human rights movements in the 21st century. Women studied include: Fannie Lou Hamer, Barbara Jordan, Shirley Chisholm, Angela Davis, Ella Baker, Kathleen Cleaver.

**Class Format:** tutorial

**Requirements/Evaluation:** brief analytical papers and response papers for each week’s readings

**Extra Info:** may not be taken on a pass/fail basis, not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors, sophomores with permission of instructor

**Distributions:** (D2) (WI)

---

**INTR 223 (S) Image, Imaging, and Imagining: The Brain and Visual Arts**

**Crosslistings:** NSCI318 / INTR223 / PSYC318

**Secondary Crosslisting**

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist’s motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how “outsider” artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

**Class Format:** seminar and empirical lab course

**Requirements/Evaluation:** evaluation will be based on a midterm, participation in class discussions, and a poster presentation of the empirical project

**Extra Info:** satisfies one semester of Division III requirement

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PSYC 101, an ARTH or ARTS course, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Studio Art majors; Psychology majors and Neuroscience concentrators

**Expected Class Size:** 12

**Distributions:** (D3)

**Distribution Notes:** meets Division 3 requirement if registration is under PSYC or INTR

**Attributes:** FMST Related Courses; NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course

---

**INTR 240 (F) The Autobiographical Philosophy of Education**

**Crosslistings:** INTR240 / PHIL240

**Secondary Crosslisting**

Why are you here? What do you expect to learn? How do you expect to learn? The College Mission Statement says that "Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character". How have you already been taught the academic and civic virtues? Where have you been taught them? In school? On the sports field? At home? How did you develop your character? This first-year seminar will examine the philosophy of education through educational autobiographies: works that tell the story of a moral and intellectual education. Each book was chosen by and will be introduced by a professor from a different department, and then Professor

**Class Format:** seminar

**Requirements/Evaluation:** frequent short responses, including our own educational autobiographies that we will share

**Extra Info:** not available for the fifth course option

**Prerequisites:** open only to first-year students

**Enrollment Limit:** 12

**Enrollment Preferences:** Interested students should e-mail Professor Gerrard a very brief description of their educational background and interests in order to enroll. I will be seeking a balance of educational backgrounds and interests

**Expected Class Size:** 12

**Distributions:** (D2)

**INTR 330 (S) Femininity, Captivity, and Cultural Politics**

This tutorial examines female, pro-feminist leadership for human rights that shapes cultural norms and perceptions of social justice. The tutorial will examine contributions to: activism, literature, art, film, music, theory focused on advocacy democracy.

**Class Format:** tutorial

**Requirements/Evaluation:** students write primary papers and review papers each week

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 4

**Distributions:** (D2)

**Not offered current academic year**
INTR 334 (S)  Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration
Crosslistings: INTR334 / AFR334 / PSCI346

Primary Crosslisting
This seminar reviews contemporary theories of “anti-black racism”; their articulation or assimilation within current political movements and mobilizations; and the influence and impact such theories-expressed in and/or as activism-on social justice and civil rights. Critical race theory, Afro-pessimism, feminist/queer theory and the works of the incarcerated are studied. Theorists studied include: Frank Wilderson; Angela Davis; Derrick Bell; Cheryl Harris. Students write weekly mini-reflection papers on assigned readings and collectively make analytical presentations.

Class Format: seminar
Requirements/Evaluation: 1 research paper (50%); 2 presentations with summaries (40%); active engagement in class discussions (10%). Weekly student presentations consist of 15 minutes of analysis with written summaries and Q/A.

Extra Info: 1st quarter of semester: thesis and outline; 2nd and 3rd quarters: 2-page summaries integrating assigned texts into research analysis; 4th quarter: edit final paper.
Prerequisites: familiarity with one of the following: critical race theory; Africana/Black studies; feminist anti-racist political movements
Enrollment Limit: 15
Enrollment Preferences: if over enrolled students will be submitted a paragraph on their research interest relevant to the seminar.
Expected Class Size: 15
Distributions: (D2)

INTR 343 (F)  Representations of Racial-Sexual Violence from Enslavement to Emancipation (WI)
Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Primary Crosslisting
This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.
Requirements/Evaluation: weekly primary and response papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference given to juniors and seniors
Expected Class Size: 8
Distributions: (D2) (WI)

INTR 361 (F)  Writing about Bodies (WI)
Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361
Secondary Crosslisting

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the ’62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS

INTERDISCIPLINARY STUDIES (No Div)
EXPERIMENTAL STUDIES

This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

EXPR 99 (W) Independent Study: Experimental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019
IND Section: 01

EXPR 420 (S) Architecture and Sustainability in a Global World (WI)
Crosslistings: ARTH420 / ENVI420 / EXPR420 / GBST420

Secondary Crosslisting

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Materials/Lab Fee: Travel funds will be provided by a Class of 1963 Sustainability Development Grant

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI or EXPR; meets Division 2 requirement if registration is

Class Format: independent study
The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

RLIT 99 (W)  Independent Study: Italian
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Winter 2019
IND Section: 01    TBA     Jennifer L. French

RLIT 101 (F)  Elementary Italian
This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester you will be given training in grammar, pronunciation, aural-oral skills, reading and writing in Italian through the study of a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, to describe your family, your town, your friends and to discuss about your interests. You will also be able to talk in Italian about present and past events and to converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, to watch clips from mainstream Italian films, and to write short compositions. Conducted entirely in Italian.
Class Format: five hours a week with the professor
Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams
Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; not open to those who have had one year or more of high school Italian
Enrollment Limit: 20
Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams
Distributions: (D1)
RLIT 102 (S) Elementary Italian
This course is designed for beginners who have already some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester you will continue to learn grammar, vocabulary, pronunciation, while improving your aural-oral skills, reading and writing in Italian. To achieve these goals, you will be presented with a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, your life, to describe your town and its history, your dreams and interests, and to express your opinion on complex topics. You will also be able to talk in Italian about present, past, and future events and to express doubts and hopes. You will be able to understand more complex conversations and clips from mainstream Italian films, and to write longer compositions. Conducted entirely in Italian.

Class Format: five hours a week with the professor

Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLIT 101; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Distributions: (D1)

Spring 2019

LEC Section: 01    M-F 10:00 am - 10:50 am     Michele Monserrati

RLIT 105 (F) Pathway to Proficiency
The course taught in Italian aims primarily at fine-tuning the student's speaking, reading and writing ability, while providing an introduction to the formal study of Italian culture and society through the analysis of short literary texts, articles, films, and plays. Students will review and expand the grammar structures learned in the previous semesters with the goal of achieving a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll.

Class Format: seminar

Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation

Prerequisites: RLIT 101/102 or by permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D1)

SEM Section: 01    MWF 11:00 am - 11:50 am     Michele Monserrati
Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Japanese Major

The Japanese major consists of a core language curriculum and a variety of interdisciplinary courses offered in the Asian Studies Department. In the Japanese language courses, students attain linguistic and cultural proficiency from the elementary through the advanced level. The interdisciplinary courses are designed to deepen students’ understanding of and familiarity with diversity and dynamicity in Japanese culture.

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL intermediate-high to advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Conduct research by engaging in cross-linguistic, cross-cultural, and comparative historical analysis with problem-solving and critical thinking skills.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different...
from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Japanese are indicated below:

**Japanese Major**

- Four additional semesters of Japanese language (300-level or higher).
- One approved course in Japanese language (400-level), literature or culture.
- One approved elective on Japan.

**STUDY ABROAD**

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

**THE DEGREE WITH HONORS**

Students interested in writing an honors thesis in Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for JAPN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.
The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

JAPN 25 (W) Kyoto Artisans: Exploring 1200 Years of Cultural History of Kyoto through Modern Craftsmanship

Kyoto, the former imperial capital of Japan has 1200 years of history. It is called Japan's cultural treasure house. The purpose of this travel course is to explore the cultural history of Kyoto and how traditional craftsmanship is perpetuated and transformed in a modern era as the city of Kyoto developed. Students will visit Kyoto artisans at their studio and through a discourse with thriving artists, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course is conducted on campus. Students will intensively study the cultural history of Kyoto with readings, films and discussion. Also in pairs, they will conduct research on one selected area of Kyoto craftsmanship to acquire in-depth knowledge. Each pair will be responsible to educate the entire group for the onsite visit in Kyoto. Then, for the second and third week, the class will travel to Kyoto. We will first visit historic sites to learn the context of how craftsmanship developed from courtly culture in the Heian period, samurai tradition in the Kamakura and Muromachi periods, religious ceremonies and Noh Theater and tea ceremonies. After and during these excursions, we will visit four artisan studios. They are a sacred mirror maker who could be the last of his kind, a textile weaver, a Noh mask maker, a sculptor of Buddhist statues. Some of these artisans are perpetuating hundreds of years of family tradition. Some started out as an apprentice and established his/her own studio. Students will also have hands on experiences at some studios. Students are expected to participate in all the scheduled activities, post a daily journal on the course website and share daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern craftsmanship to the local community and the Kyoto artisans at a public forum.

Class Format: travel

Requirements/Evaluation: final project; post daily blog to the course website and a public PowerPoint presentation in Kyoto

Prerequisites: at least one course in ASST or JAPN; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: personal statement

Materials/Lab Fee: $3,635

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01 TBA Kasumi Yamamoto

JAPN 31 (W) Senior Thesis: Japanese

To be taken by all students who are candidates for honors in Japanese.

Class Format: independent study

Distributions: (D1)

Winter 2019

HON Section: 01 TBA George T. Crane

JAPN 99 (W) Independent Study: Japanese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
JAPN 101 (F)  Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, a midterm, and a final exam

Extra Info: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 15

Distributions: (D1)

JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Class Format: lecture

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Distributions: (D1)

Attributes: Linguistics

Fall 2018
LEC Section: 01    TF 1:10 pm - 2:25 pm    Mamoru Hatakeyama

JAPN 153 (F) Japanese Film

Crosslistings: JAPN153 / COMP153

Secondary Crosslisting

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Class Format: lecture

Requirements/Evaluation: attendance, participation, some responses, two papers (5-7 pages), test

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students majoring in a related field

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Attributes: FMST Core Courses

Not offered current academic year

JAPN 201 (F) Intermediate Japanese

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10
Distributions: (D1)

JAPN 223 (S) Japanese Food Culture in a Global Context
Crosslistings: COMP223 / JAPN223
Primary Crosslisting
The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.
Class Format: seminar
Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions & class presentations), and one research paper & presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 12
Distributions: (D1)
Not offered current academic year

JAPN 258 (S) Language and Literacy Development
Crosslistings: PSYC258 / JAPN258
**Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?**

**Class Format:** seminar

**Requirements/Evaluation:** active participation in the class discussion, weekly reaction paper, quiz, final paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Japanese, Chinese, Asian Studies, and Psychology majors

**Expected Class Size:** 25

**Department Notes:** Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under JAPN; meets Division 2 requirement if registration is under PSYC

**JAPN 260 (F) Japanese Theatre and its Contemporary Context**

Crosslistings: THEA262 / COMP262 / JAPN260

**Primary Crosslisting**

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active class participation, presentations, written journals, two short papers, and one longer paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 20

**Expected Class Size:** 15

**Distributions:** (D1)

**Attributes:** GBST East Asian Studies Electives

Fall 2018

**JAPN 274 (F) Confronting Japan (WI)**

Crosslistings: COMP274 / JAPN274
This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Class Format: tutorial

Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Japanese majors

Expected Class Size: 10

Distributions: (D1) (WI)

Not offered current academic year

JAPN 276 (S) Premodern Japanese Literature and Performance

Crosslistings: COMP278 / JAPN276

Primary Crosslisting

Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts. All readings and discussions will be in English.

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Distributions: (D1)

Attributes: GBST East Asian Studies Electives; PERF Interdepartmental Electives

Not offered current academic year

JAPN 301 (F) Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will, further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 202 or permission of instructor

Enrollment Limit: none

Expected Class Size: 10
**JAPN 302 (S) Upper-Intermediate Japanese**

This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

JAPN 403 (F)  Advanced Seminar in Japanese I
This course provides advanced training in listening, speaking, reading and writing Japanese, focusing on current issues in Japan.

Class Format: three hours per week
Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes and projects.
Prerequisites: JAPN 402 or permission of instructor
Enrollment Limit: none
Expected Class Size: 5
Distributions: (D1)
Not offered current academic year

JAPN 404 (S)  Advanced Seminar in Japanese II
This course is designed for advanced Japanese language students. The goal is for students to be able to carry on extended discourse--such as a discussion, a speech, or an interview--in a culturally appropriate manner; to read authentic materials with ease; and to make presentations and write research papers on issues of interest. The course will focus on current social, cultural, educational, and political issues in Japan.

Class Format: three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, and projects
Prerequisites: JAPN 403 or permission of instructor
Enrollment Limit: none
Expected Class Size: 5
Distributions: (D1)
Not offered current academic year

JAPN 406 (F)  Advanced Japanese: JLPT 1, 2 or 3
This course is for advanced students, especially for those who would aim to pass Level 1, 2, or 3 of the Japanese Language Proficiency Test (JLPT) offered by the Japan Foundation and Japan Educational Exchanges and Services. JLPT not only measures examinees’ skill level, but has been used as a form of qualification, and also often for employment screening and evaluation. Students will work on all five areas of chôkai (listening comprehension), dokkai (reading comprehension), bunpô (grammar), goi (vocabulary) and kanji, based on their skill level.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on daily preparation and in-class performance, a weekly journal, and taking the JLPT exam suited to your level in December
Prerequisites: any one of Japanese 300¿s or 400¿s courses or permission of instructor
Enrollment Limit: 5
Enrollment Preferences: none
Expected Class Size: 4
Distributions: (D1)

SEM Section: 01 MR 2:35 pm - 3:50 pm Shinko Kagaya

JAPN 407 (F) An Exploration of Japanese Language and Culture (WI)
Crosslistings: ASST207 / JAPN407

Primary Crosslisting
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring
how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Department Notes: students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ASST or JAPN

THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):
  - REL 201/COMP 201/JWST 201 The Hebrew Bible
  - REL 203/JWST 101 Judaism: Before the Law

Core Courses
  - ANTH 334/COMP 334/JWST 334/REL 334 Imagining Joseph
  - COMP 352/JWST 352/RLSP 352 Writing after the Disaster: The Literature of Exile
  - HIST 230/JWST 230 Modern European Jewish History, 1789-1948
  - HIST 338/JWST 338/REL 296 The History of the Holocaust
  - HIST 433/JWST 433 The Justice of Violence? Histories of Terrorism in Europe
  - HIST 434/JWST 434 The Meaning of Diaspora and the Jews of Europe
  - HIST 480T/ARAB 480T/JWST 480T Interpretations of the Israeli Palestinian Conflict
  - HIST 490T/JWST 490T Memory, History, and the Extermination of the Jews of Europe:
    - REL 202/JWST 202/COMP 214 Moses: Stranger in a Strange Land
    - REL 205/CLAS 205/COMP 217/JWST 205 Ancient Wisdom Literature
    - REL 206/COMP 206/JWST 206 The Book of Job and Joban Literature
    - REL 207/COMP 250/JWST 207/CLAS 207 From Adam to Noah: Literary Imagination and the Primeval History in Genesis
    - REL 209/JWST 209 Jewish America
    - REL 259/ENGL 259/JWST 259 Ethics of Jewish American Fiction
    - REL 330/PSCI 375/JWST 492 Modern Jewish Political Theory

Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a
course not listed here, subject to the approval of the Chair of Jewish Studies.

CRHE 101-102 Critical Languages: Hebrew

HIST 111/LEAD 150/ARAB 111 Movers and Shakers in the Middle East

HIST 129/WGSS 129 Blacks, Jews, and Women in the Age of the French Revolution

HIST 207/JWST 217/REL 239/ARAB 207/GBST 101/LEAD 207 The Modern Middle East

HIST 226/REL 222 Europe from Reformation to Revolution: 1500 1815

HIST 239 Germany in the Twentieth Century

HIST 311/ARAB 311 The United States and the Middle East

HIST 409/ARAB 409/GBST 409 Crescent, Cross, and Star. Religion and Politics in the Middle East

HIST 410/ARAB 410/JWST 410/REL 405 Kings, Heroes, Gods, & Monsters: Historical Texts and Modern Identities in the Middle East

REL 212/HIST 324 The Development of Christianity: 30 600 C.E.

Capstone Course

REL 330/PSCI 375/JWST 492 Modern Jewish Political Theory

THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

Croghan Professorship

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Gateway course and Capstone course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

FUNDING

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman ’50, Samuel Bronfman II ’75, and Matthew Bronfman ’80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College’s formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener ’56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener ’56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.

IND Section: 01    TBA     Edan  Dekel

JWST 101 (F) Judaism: Before The Law

Crosslistings: JWST101 / REL203

Secondary Crosslisting

This course introduces the academic study of Judaism through a humanistic exploration of “the Law” as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between “Oral Law” and “Written Law,” medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka’s The Trial with his parable “Before The Law,” Woody Allen’s film Crimes and Misdemeanors, and ethnographic accounts of contemporary Jewish observance. All readings will be in translation.

Class Format: seminar

Requirements/Evaluation: class participation, three short papers, and a final longer paper

Extra Info: not available for the fifth course option
JWST 201 (F) The Hebrew Bible
Crosslistings: COMP201 / JWST201 / REL201

Secondary Crosslisting

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers

Not offered current academic year

JWST 202 (S) Moses: Stranger in a Strange Land
Crosslistings: COMP214 / JWST202 / REL202

Secondary Crosslisting

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God’s chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described “stranger in a strange land.” We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

Class Format: seminar

JWST 204 (F) Jesus and Judaism
Crosslistings: REL204 / JWST204
Secondary Crosslisting
Was Jesus a Christian? Was he Jewish? And if Christianity's ostensible founder was Jewish, what does that mean for his Christianness? This course will explore Christian, Jewish, and secular depictions of Jesus' Jewishness to see what they reveal about the nature and history of the relationship between Christianity and Judaism. Broad in its historical scope, the course will include examinations of ancient Jewish messianic expectations, New Testament depictions of Jesus' Jewishness, covert references to Jesus in the Talmud, medieval debates between Jews and Christians, and modern scholarly "quests" for the historical Jesus. Was Jesus Jewish? How so and for whom?
Class Format: seminar
Requirements/Evaluation: active preparation and participation, short papers (3-5 pages), and final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10-12
Distributions: (D2)
Not offered current academic year

JWST 205 (S) Ancient Wisdom Literature
Crosslistings: JWST205 / REL205 / COMP217 / CLAS205
Secondary Crosslisting
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack.
All readings are in translation.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two longer papers

JWST 206 (S) The Book of Job and Joban Literature  (WI)
Crosslistings: COMP206 / JWST206 / REL206

Secondary Crosslisting

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. All readings are in translation.

JWST 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis
Crosslistings: COMP250 / REL207 / JWST207 / CLAS207

Secondary Crosslisting

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. *All readings are in translation.*

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation and several writing assignments

Extra Info: core course for COMP

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19
JWST 209 (S) Jewish America
Crosslistings: JWST209 / REL209

Secondary Crosslisting

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall; read John Updike's Bech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Class Format: seminar

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

Expected Class Size: 25

Distributions: (D2) Not offered current academic year

JWST 217 (F) The Modern Middle East (DPE)
Crosslistings: JWST217 / ARAB207 / HIST207 / REL239 / GBST101 / LEAD207

Secondary Crosslisting

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Class Format: lecture

Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40
Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under ARAB  DPE: This course introduces students to the incredible diversity of the Middle East and offers a critical assessment of difference, power, and equity in the Middle East. In particular it will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

JWST 219 (S) Judaism Under Ancient Greek and Roman Imperialisms
Crosslistings: JWST219 / CLAS219 / REL219

Secondary Crosslisting
How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judeans responded to these imperial pressures, especially as those responses articulated "hybrid" versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

Class Format: seminar
Requirements/Evaluation: active preparation and participation, short reading response papers (1-page), midterm, and final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10-12
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under CLAS

JWST 230 (F) Modern European Jewish History, 1789-1948
Crosslistings: HIST230 / JWST230

Secondary Crosslisting
What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two papers, and a final exam
Prerequisites: none
JWST 249 (F) Anti-Semitism (DPE)
Crosslistings: JWST249 / REL249

Secondary Crosslisting
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Class Format: seminar
Requirements/Evaluation: three short papers (4-5 pages), one longer final paper (6-8 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203

JWST 259 (F) Ethics of Jewish American Fiction (WI)
Crosslistings: JWST259 / ENGL259 / REL259

Secondary Crosslisting
After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Class Format: seminar
Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and English majors

### JWST 270 (S) Jewish and Christian Identity in the Ancient World

**Crosslistings:** JWST270 / REL270

**Secondary Crosslisting**

The modern engagement with the many ways that we construct identity has been matched by a similar wave of studies about identity construction in the ancient world. In this course, we will discuss the rise of "Judaism" and "Jewish identity" in the ancient period (looking at roughly 400 BCE-200 CE), and compare it with the movement of the followers of Jesus as a negotiation of a new identity within Judaism (roughly 30 CE-200 CE). We will conclude with the question of the "Parting of the Ways" of these two groups.

**Class Format:** seminar

**Requirements/Evaluation:** three short papers (4-5 pages), one final paper (10-15 pages), close reading of materials, engagement with class discussion

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators

**Expected Class Size:** 15

**Distributions:** (D2)

*Spring 2019*

SEM Section: 01  W 1:10 pm - 3:50 pm  Lawrence M. Wills

### JWST 289 (F) The Talmud on What it Means to be Human

**Crosslistings:** JWST289 / REL289

**Secondary Crosslisting**

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans' relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

**Class Format:** tutorial

**Requirements/Evaluation:** weekly papers, final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Religion majors, Jewish Studies students

**Expected Class Size:** 10

**Distributions:** (D2)

JWST 334 (S) Imagining Joseph  (WI)  
Crosslistings: REL334 / COMP334 / ANTH334 / JWST334  
Secondary Crosslisting  
Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.  
Class Format: seminar  
Requirements/Evaluation: 3- to 5-page weekly response papers; 15-page final paper; class participation  
Prerequisites: none  
Enrollment Limit: 12  
Enrollment Preferences: based on responses to a questionnaire  
Expected Class Size: 10  
Distributions: (D2) (WI)

JWST 338 (F) The History of the Holocaust  
Crosslistings: HIST338 / REL296 / JWST338  
Secondary Crosslisting  
In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.  
Class Format: mostly discussion  
Requirements/Evaluation: evaluation will be based on class participation, a map quiz, four papers (4 pages) based on class readings, and a final research paper (6-8 pages)  
Prerequisites: none; open to first-year students with instructors permission  
Enrollment Limit: 25  
Enrollment Preferences: History majors and Jewish Studies concentrators  
Expected Class Size: 20-25  
Distributions: (D2)

Not offered current academic year
JWST 434 (S) The Meaning of Diaspora and the Jews of Europe
Crosslistings: JWST434 / HIST434

Secondary Crosslisting

Dispersal, exile, migration, statelessness are all aspects of diaspora. And in the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, this seminar examines various interpretations of Jews' diasporic existence from the nineteenth century to the present, both as a cultural practice and a form of group identity from which political claims have been made. We will test the proposition that "The Modern Age is the Jewish Age," that is, that the meaning of diaspora in modern Jewish history has direct relevance to students of human identity not just of Jewishness. Throughout the second half of the semester, students will conduct independent archival research on some aspect of the history of the Jewish diaspora that will culminate in a 20-page paper. The seminar will continue to meet weekly as a research colloquium, to provide a forum for students to present their research and drafts in progress and provide feedback on fellow students' work.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History majors and Jewish Studies concentrators
Expected Class Size: 15
Distributions: (D2)

Not offered current academic year

JWST 480 (F) Interpretations of the Israeli Palestinian Conflict  (DPE) (WI)
Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, though some academic experience with Middle East materials is preferred
Enrollment Limit: 10
Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators
Expected Class Size: 10
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.
The atrocities committed by Nazi Germany during the Second World War continue to trouble historians in their attempts to understand and represent them in all their magnitude and horror. Beyond historians, the complicity of segments of European societies in perpetrating those atrocities continues to raise thorny questions for postwar European nations about what their responsibilities are toward that past. This tutorial will focus on a series of questions relating to the historicization and memorialization of the extermination of European Jews. They include: Is the Holocaust unique? Is it a Jewish story or universal story? Does the Holocaust raise different issues for the historian than other historical events? How should the Holocaust be represented and what are the implications of different means of representing it? What role, if any, did European Jews play in their own destruction? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the “bystanders” as compared to the “perpetrators”? Were the postwar trials of perpetrators a travesty of justice? How appropriate are the different uses that Israel and the United States have made of the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, governments, and lay people about the meaning (and meaninglessness) of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and more and more nations’ pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated should prove relevant for future consideration of other societies’ efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week

**Extra Info:** additional requirements on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written exercise, a thought piece on the issues raised in the tutorial, will cap off the semester's work

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Attributes:** HIST Group C Electives - Europe and Russia; JWST Capstone Course; JWST Core Electives; Not offered current academic year

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.
Class Format: seminar

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth;

Extra Info: a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

Expected Class Size: 18

Distributions: (D2) (WI)

On leave Fall only: Associate Professor M. Barry. Professor James Nolan.

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Students may declare a program concentration at any point during their academic career.

Four Electives

Four elective courses are required to complete the concentration. These courses must be taken from at least two departments. Other courses, not listed below, may be approved by the Chair.

Senior Seminar

In 2018-19, the senior seminar will be The Unwritten Constitution taught by Professor Hirsch.

AFR 132 Contemporary Africana Social and Political Philosophy
AFR 164 Slavery in the United States
AFR 167 Let Freedom Ring? African Americans and Emancipation

STUDY ABROAD

Students who study abroad should consult with the program chair to ensure that they can complete the requirements. Courses abroad may qualify as JLST electives if appropriate.

JLST 14 (W)  Mock Trial

In the Mock Trial course, students are divided into two teams in which they play the roles of attorneys and witnesses during their preparation for and participation in a simulated civil trial. They are given a series of witness statements and pleadings together with various documents and other data that they must evaluate for potential use as evidence as they plan to present their case as either the plaintiff or the defendant. Team members must prepare and deliver Opening Statements and Closing Arguments as well as handle direct and cross-examinations of the witnesses who testify for both sides. The "final exam" consists of two trials with the two teams switching sides on the second day such that they must evaluate the case from both sides. At the two trials, an experienced attorney plays the role of judge, and volunteer jurors from the community listen to the evidence and render their "verdict" based on the presentations. Adjunct Instructor Bio: David Olson '71 has practiced as a civil trial attorney for 40 years with a firm currently with over 500 attorneys handling cases in state and federal courts. He has taught Mock Trial on 6 previous occasions, receiving strong reviews for the course. Adjunct Co-Instructor Bio: After graduating from Villanova Law School where he was Editor in Chief of the Law Review, Steve Brown has been a litigator and trial lawyer for 40 years concentrating his practice in white-collar criminal defense and civil rights. He was a partner at Dechert LLP from 1991 to 2016, when he retired and became Civil Rights Counsel to the firm. He has spent much of his career doing pro bono work including representing Guantanamo Bay detainees and people and prisoners whose constitutional rights have been violated, and supervising Dechert associates in 40 trials in federal courts.

Class Format: Monday and Tuesday 10-1:30

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to upperclass students

Materials/Lab Fee: $16
JLST 99 (W) Independent Study: Legal Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

Winter 2019
IND Section: 01 TBA Alan Hirsch

JLST 101 (F) Introduction to Justice and Law
This course will examine various aspects of America's legal system, including its historical and constitutional underpinnings; the processes of resolving disputes, e.g., trials, plea-bargaining, and civil settlement; and the roles of diverse participants in the system, e.g., judges, jurors, litigants, lawyers, and legislators. The course will emphasize the deeply interdisciplinary nature of law, exploring the law's intersections with politics, history, economics, anthropology, statistics, psychology, philosophy, art, sports, science, religion, and cyberspace.

Class Format: lecture/discussion
Requirements/Evaluation: three papers, a final exam, and class participation; attendance is mandatory; Williams' honor code applies to all assignments
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Distributions: (D2)

Fall 2018
LEC Section: 01 MWF 11:00 am - 12:15 pm Alan Hirsch

JLST 397 (F) Independent Study: Legal Studies

IND Section: 01 TBA Alan Hirsch

JLST 398 (S) Independent Study: Legal Studies
Legal Studies independent study. Open under the supervision of a member of the Legal Studies Advisory Committee.
Class Format: independent study
Distributions: (D2)
JLST 401 (S) The Unwritten Constitution

"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book America's Unwritten Constitution. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists (including Antonin Scalia, Robert Bork, Laurence Tribe, Ronald Dworkin, and Richard Posner), we will probe different ways of thinking about the Supreme Law of the Land.

Class Format: seminar

Requirements/Evaluation: two papers, a final exam, and class participation

Prerequisites: PSCI 216 or PSCI 217 (or consent of the instructor)

Enrollment Limit: 19

Enrollment Preferences: Justice and Law Studies concentrators

Expected Class Size: 19

Distributions: (D2)

JLST 402 (S) International and Transitional Justice (WI)

Crosslistings: PSCI325 / JLST402

Secondary Crosslisting

Before the 1990s, the world saw only occasional, discrete war crimes trials after major-power cataclysms. In the last two decades, trials expanded dramatically in number, scope, and philosophy. Separate Ad Hoc Tribunals for crimes in Yugoslavia and those in Rwanda, in Sierra Leone and in Cambodia are giving way to a permanent International Criminal Court, which has begun to hand down indictments and refine its jurisdiction. The UN Security Council, alongside national governments, decides on legitimacy and punishment. At the same time, worries about residual impunity or the effect that punishment might have on societies' futures has led to the development of national and social courts, as well as national military tribunals, to complement those at the international level. Meanwhile, national activists look to international apologies and reparations for models of what to demand. Examples of internationalized transitional justice abound. This research seminar examines the intent, process, meaning and consequence of these new practices, particularly in terms of national constitutions, international law, and principles of justice.

Class Format: seminar

Requirements/Evaluation: four papers, longer final paper, class participation

Prerequisites: Political Science major or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Political Science majors concentrating in International Relations

Expected Class Size: 14

Distributions: (D2) (WI)

Attributes: PSCI International Relations Courses; PSCI Research Courses;

Not offered current academic year

JLST 403 (S) Senior Seminar in Human Rights in International Politics and Law (WI)

Crosslistings: PSCI420 / JLST403
Secondary Crosslisting

The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

Class Format: seminar

Requirements/Evaluation: three lead essays, three critique essays, and one final essay

Prerequisites: PSCI 202, senior standing, permission of instructor

Enrollment Limit: 18

Enrollment Preferences: PSCI majors, senior JLST concentrators ; seniors

Expected Class Size: 18

Distributions: (D2) (WI)

Attributes: PSCI International Relations Courses;

Not offered current academic year
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

**MAJOR**

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

**Classics:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

**Classical Civilization:** (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

**Senior Colloquium:** Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Senior majors are also encouraged to participate.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level
course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

Classical Civilization Courses: The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.

STUDY ABROAD

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

CLLA 99 (W) Independent Study: Latin

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D1)

Winter 2019

IND Section: 01   TBA   Edan Dekel
CLLA 101 (F)  Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam
Extra Info: credit granted only if both semesters (CLLA 101 and 102) are taken
Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)
Enrollment Limit: 15
Expected Class Size: 8-10
Distributions: (D1)

Fall 2018
LEC Section: 01    MWF 11:00 am - 12:15 pm     Nicole G. Brown

CLLA 102 (S)  Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam
Extra Info: credit granted only if both semesters (CLLA 101 and 102) are taken
Prerequisites: CLLA 101 or permission of department
Enrollment Limit: 18
Expected Class Size: 10-12
Distributions: (D1)

Spring 2019
LEC Section: 01    MWF 11:00 am - 12:15 pm     Nicole G. Brown

CLLA 201 (F)  Intermediate Latin: The Late Republic
Reading of selections from Latin prose and poetry, normally from a speech or letters by Cicero and from the poetry of Catullus. This course includes a comprehensive review of Latin grammar and aims primarily at developing fluency in reading Latin. At the same time it acquaints students with one of the most turbulent and important periods in Roman history and attends to the development of their interpretative and analytic skills.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on classroom performance, quizzes, a midterm, and a final exam; occasional oral presentations or short essays may be required as well
Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department
Enrollment Limit: 12
Expected Class Size: 6-10
Distributions: (D1)

Fall 2018
CLLA 302 (S)  Vergil’s “Aeneid”
This course is a comprehensive introduction to Vergil’s Aeneid. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem’s literary, social, and political dimensions with special attention to Vergil’s consummate poetic craftsmanship.

Class Format: discussion/recitation
Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 201 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 10
Distributions: (D1)

Spring 2019

CLLA 405 (F)  Livy and Tacitus: Myth, Scandal, and Morality in Ancient Rome
Mythical stories of Rome’s founding, which were formulated by many generations of Roman authors and public figures, served as a framework for these very thinkers to analyze and articulate Roman self-image in rich and creative ways; one who stands out among these figures is the Augustan historian Livy. The “second founding” of the Republic by Augustus, and the careers of his successors, in turn gave later Roman writers like Tacitus fresh inspiration for Roman self-imagining and self-analysis. We will begin the semester in mythical Rome, reading selections from Book 1 of Livy’s history which present figures like Aeneas, the Trojan refugee whose arrival in Italy was conceptually crucial to Rome’s development and position in Italy and the Mediterranean; Romulus, by whom Rome was founded in an act of fratricide; the Sabine women, whose nobility prevented a deadly war between their fathers and their Roman kidnappers; and Lucretia, whose virtue and self-sacrifice led to the liberation of Rome from a decadent and violent monarchy and to the founding of the Roman Republic. We will examine how Livy deploys the storyteller’s art to excite his readers’ pathos, indignation, and sympathy; we will examine as well how Livy often filters his account of mythical Rome through the lens of his own time, thereby constructing Rome’s past through the Augustan present. Writing more than a century after Livy, Tacitus offers a different view of Augustus, and his account of the rude and dissolute Tiberius, the unscrupulous Livia, Rome’s craven and dispirited senators, and the many scandals attached to the imperial family, figures a Rome once again suffering under a decadent monarchy. Tacitus’s compressed, fastidious, inimitable prose is the vehicle for his stern yet often sardonic psychological insights, which subtly manage to combine moral judgment with prurient pleasure in the scandals of others.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6
Distributions: (D1)
Not offered current academic year

CLLA 407 (F)  Caesar and Cicero
The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar’s commentaries and Cicero’s speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short written assignments (such as article reviews), a midterm
Roman comedy flourished only briefly, between the second and third Punic Wars, but its cultural-historical importance is undeniable. In these *fabulae palliatae*, Latin comedies staged in Greek costume and featuring ostensibly Greek characters, Roman attitudes are questioned and mocked but ultimately reasserted. We will read the *Menaechmi* of Plautus and the *Adelphoe* of Terence, two plays that burlesque the stereotypical relationships between fathers, brothers, sons, and slaves. We may also consider selections from Cato the Elder, Cicero's letters, and other primary and secondary texts that shed additional light on Roman familial relationships and their place in republican society.

### Class Format: discussion/recitation

### Requirements/Evaluation: evaluation will be based on class participation, several papers of varying length, a midterm and a final exam

### Prerequisites: CLLA 302 or permission of instructor

### Enrollment Limit: 12

### Enrollment Preferences: if the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature

### Expected Class Size: 8-10

### Distributions: (D1)

---

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's *De Officiis*. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

### Class Format: seminar

### Requirements/Evaluation: evaluation will be based on class participation, several short written and oral assignments, midterm and final exams, and a final paper

### Prerequisites: CLLA 302 or permission of instructor

### Enrollment Limit: 12

### Expected Class Size: 5-10

### Distributions: (D1)

---

This course will explore the two major works of Vergil that precede the *Aeneid*: the *Eclogues*, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the *Georgics*, a longer didactic poem in four books that uses an agricultural framework to examine
issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship.

Class Format: seminar

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Distributions: (D1)

Not offered current academic year

CLLA 416 (S) Praise, Blame, and Performance in Flavian and Trajanic Rome

In this course, we will consider how authors of imperial Rome represent the spectacle of their urban surroundings. Poets such as Martial and Statius describe the lavish entertainments that Domitian put on in the newly constructed Colosseum: Saturnalia festivities, beast hunts, gladiatorial combats. But their interest in these imperial displays is just one aspect of a greater preoccupation with social performance and self-fashioning during this time. Statius invites readers to marvel at imperial statues, aristocratic villas, and even an impressive new road built by Domitian. Martial, on the other hand, dispenses not praise but blame: in his epigrams, he encourages readers to laugh at the ridiculous displays of upstarts, flatterers, and deviants, casting vice as entertainment. As we read selections from Statius' Silvae, Martial's De Spectaculis and epigrams, Pliny's letters about public and literary life, and his speech of praise for the emperor Trajan, we will pay particular attention to questions such as the following: What do these authors' representations of spectacle tell us about the values of Flavian and Trajanic Rome? How do their works constitute performances in their own right? What do these texts reveal about the social functions of literature under autocratic rule?

Class Format: seminar

Requirements/Evaluation: class participation, short writing assignments, two translation exams, and a final paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors and potential majors in Classics and Comparative Literature

Expected Class Size: 5-10

Distributions: (D1)

LATINA/O STUDIES (Div II)
Chair: Professor Mérida M. Rúa

Professors: M. E. Cepeda, O. Chavoya, M. Rúa, C. Whalen. Associate Professor: J. Hidalgo. Affiliated Faculty: Assistant Professor G. Mitchell.

On leave Fall/Spring: Associate Professor J. Hidalgo.
On leave Spring only: Professor O. Chavoya.

Latina/o Studies is an interdisciplinary and comparative field of study that explores the histories, representations, and experiences of Latinas and Latinos in the United States. Latinas and Latinos include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as more recent migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest growing populations in the contemporary era, provides an opportunity to explore complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:
LATS 105 Latina/o Identities: Constructions, Contestations, and Expressions

One of the following 400-level seminars:
ARTH 464/LATS 464 Latina/o Visual Culture: Histories, Identities, and Representation
LATS 408/AMST 408 Envisioning Urban Life: Objects, Subjects, and Everyday People
LATS 409/AMST 411/ WGSS 409 Transnationalism and Difference: Comparative Perspectives
LATS 420/ENVI 421 Latinx Ecologies
LATS 427/AMST 327/ REL 314/AFR 427 Racial and Religious Mixture
LATS 471/HIST 471 Comparative Latina/o Migrations

Two of the following core electives:
LATS 106 /AMST 106 Coming of Age in the City: Growing Up and Growing Older in Communities of Color
LATS 112 Caribbean Diasporic Aesthetic
LATS 203/ARTH 203/WGSS 203/AMST 205 Chicana/o Film and Video
LATS 208/AMST 207/COMP 211/ENGL 251 Introduction to Latina/o Literatures
LATS 209/RLSP 209 Spanish for Heritage Speakers: Introduction to Latina/o Cultural Production
LATS 220/AMST 221/ENVI 221 Introduction to Urban Studies: Shaping and Living the City
LATS 222 Ficciones
LATS 224/AMST 224/REL 224 U.S. Latina/o Religions
LATS 228 AFR 328/AMST 329/REL 223 Revolt and Revelation in 20th Century Americas
LATS 231 /AMST231/WGSS232 Approaches to Media Studies: Analyzing Mediated Difference
LATS 240/AMST 240/COMP 210 Latina/o Language Politics: Hybrid Voices
LATS 246/AMST 246 Aesthetics and Place-making in Latina/o New York
LATS 252 Puerto Rico and its Diaspora
LATS 358/ARTH 358 Latina/o Installation and Site Specific Art
LATS 286/HIST 286 Latina/o History, 1848 to the Present
LATS 312/AMST 312/ENVI 313 Chicago
LATS 313/AMST 313/WGSS 313/AFR 326 Gender, Race, and the Power of Personal Aesthetics (D)
LATS 316 The Graphic Narrative
LATS 318/AMST 318/REL 318/COMP 328/ENVI 318 California: Myths, Peoples, Places
LATS 330 DNA + Latinx
LATS 338/AMST 339/WGSS 338 Latina/o Musical Cultures: Sounding Out Gender, Race, and Sexuality
LATS 340 U.S. Afro-Latinidades
LATS 346/AMST 346 Latinas/os and the Media: From Production to Consumption
LATS 385 Politics, Activism, and Everyday Life
LATS 382/HIST 382/WGSS 382 Latina/o Politics
LATS 386/HIST 386/WGSS 386 Latinas in the Global Economy: Work, Migration, and Households
LATS 397 Independent Study
LATS 398 Independent Study
REL 227/LATS 227/AMST 227/ENVI 227 Utopias and Americas
REL 309/AFR 309/LATS 309 Scriptures and Race
REL 326/LATS 426/WGSS 326/COMP 326 Queer Temporalities

One additional related course from either of the following subcategories OR from the core electives above:

Countries of Origin and Transnationalism
AFR 248/HIST 248 The Caribbean: From Slavery to Independence
ARTH 110 Introduction to Latin American and Latina/o Art
ARTH 271/COMP 272 The Brazilian Avant-garde of the 1960s
ARTH 440/LATS 440 Contemporary Exhibitions: Los Angeles and Latin America
ENVI 239/COMP 238 Introduction to Ecocriticism: North South Dialogues on Nature and Culture
HIST 143 Soccer and History in Latin America: Making the Beautiful Game
HIST 243 Modern Latin America, 1822 to the Present
HIST 245/AFR 346 History of Modern Brazil
HIST 343/LATS 343 Conquistadors in the New World
HIST 347 Democracy and Dictatorship in Latin America
HIST 492 Revolutionary Thought in Latin America
MUS 126 Cuban Popular Music and Culture
PSCI 266 The United States and Latin America
PSCI 349 Cuba and the United States
RLSP 212 Afro-Caribbean Literature: Race, Gender and Identity
RLSP 215 The Other Caribbean: Identity, Subalternity, and Resistance (19th, 20th, and 21st Centuries)
RLSP 306/COMP 302 Latino Writing: Literature by U.S. Hispanics
RLSP 402 Senior Seminar: Writing Latin America’s Environmental Crisis
RLSP 403/WGSS 403, Senior Seminar: Image, Violence, and the Feminine
WGSS 337 Race, Gender and Sexuality in Brazil

Comparative Race and Ethnic Studies
AFR 200 Introduction to Africana Studies
AMST 245/ANTH 245/LATS 245/WGSS 247 Introduction to Native American and Indigenous Studies
AMST 403/COMP 375/ENGL 375/AFR 403/LATS 403 New Asian American, African American, Native American, and Latina/o Writing
ARTH 462/AMST 462/LATS 462/ARTH 562 Art of California: Pacific Standard Time
HIST 380 Comparative American Immigration History
WGSS 240/AMST 241/LATS 241/THEA 241 Performing Masculinity in Global Popular Culture
WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304 Queer of Color Critique: Race, Sex and Urban Life

Students can check with the program chair to see if other courses not listed here might count as electives.

THE DEGREE WITH HONORS
Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by her/his advisor and two other faculty readers. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The honors project will be completed over one semester plus winter study. It may consist of a conventional research thesis of 40-70 pages or of other forms of presentation (e.g., video, art, theater). It may also combine a shorter research thesis with another medium.

To be accepted as a candidate for honors in Latina/o Studies, a student must meet these criteria:
Submit and earn approval of a project proposal in April of the junior year. The proposal should be no longer than 5 pages and should lay out the project’s aim and methodology, identify the student’s advisor for the work, and include evidence of competence in the necessary media for projects that include non-thesis forms.
Achieve a grade point average generally of at least 3.33 in LATS courses at the time of application.
Students admitted to the honors program must submit a 5-to 8-page revised proposal, with an annotated bibliography, by the second week of classes in the fall semester of her/his senior year. They should register either for LATS 493 in the fall semester and LATS 031 in Winter Study, or for LATS 031 in Winter Study and LATS 494 in the spring semester. These courses will be in addition to the 5 courses that make up the regular concentration.

STUDY ABROAD
Study abroad and other off-campus programs offer excellent opportunities for students to build on, and expand, the intellectual interests they develop as part of the Latina/o Studies concentration. Through their connections to various institutions in the U.S. and other nations, Latina/o Studies faculty can help place students in U.S. borderlands programs as well as programs in Mexico, Cuba, and other “countries of origin.”

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description. Although syllabus and description, including readings and assignments, would be preferable.
Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away? 
Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major? 
No.

Are there specific major requirements that cannot be fulfilled while on study away? 
Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

---

LATS 16 (W)  True and Wild Tales: Argentine Cinema after 1985

Crosslistings: ARTH16 / LATS16

Secondary Crosslisting

The Argentine film industry is one of the most developed in the Spanish-speaking world. It is rich in genres and production scales, and in the issues raised by the films themselves. This immersive course encourages dynamic engagement with these issues, as we watch films that grapple with the country’s painful legacy of dictatorial rule, coming-of-age road movies, familial dramas, and riotous comedies that feature that distinctive, biting Argentine humor. Our meetings consist of three mandatory screenings per week, two of which are followed by class discussion. In addition to learning about the Argentine context, we will learn vocabulary and tools for discussing and writing about film. No previous coursework in film, or fluency in Spanish required (the films are subtitled)--only an interest in contemporary Argentine cinema and culture.

Class Format: afternoons

Requirements/Evaluation: 2- to 3-page paper; 3 mandatory screenings each week

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference will be given to Art Studio and Art History majors, as well as students concentrating in Latino/a Studies

Materials/Lab Fee: cost of books

Winter 2019

LEC Section: 01    MTR 1:00 pm - 3:50 pm PORG 1:00 pm - 3:50 pm   Mari Rodriguez Binnie

LATS 31 (W)  Senior Thesis: Latina/o Studies

Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.

Class Format: thesis

Prerequisites: approval of program chair

Enrollment Preferences: limited to senior honors candidates

Distributions: (D2)

Winter 2019

HON Section: 01    TBA    Mérida Rúa
LATS 99 (W) Independent Study: Latina/o Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019
IND Section: 01 TBA Mérida Rúa

LATS 105 (F) Latina/o Identities: Constructions, Contestations, and Expressions
What, or who, is a Hispanic or Latina/o? At present, individuals living in the United States who are classified as such number approximately 57 million, constituting the country's largest "minority" group. In this course, we will study the interdisciplinary field that has emerged in response to this growing population, as we focus on the complex nature of "identity." Viewing identities as historically and socially constructed, we begin with a brief assessment of how racial, ethnic, class, and gendered identities take shape in the Hispanic Caribbean and Latin America. We then examine the impact of (im)migration and the rearticulation of identities in the United States, as we compare each group's unique history, settlement patterns, and transnational activity. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. In this light, we conclude the course with an exploration of these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: discussion

Requirements/Evaluation: evaluation to be based on student participation and several short papers (1-5 pages) throughout the semester

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators

Expected Class Size: 20

Department Notes: required course for concentration in Latina/o Studies

LATS 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color (DPE) (WI)
This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

Class Format: tutorial

Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-years, students considering an American Studies major or Latina/o Studies concentration

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)
LATS 112 (F) Caribbean Diasporic Aesthetics: An Introduction

This course explores how aesthetics can serve as an organizing principle for the critique, analysis, and theorizing of racial and diasporic formations across the 20th century, with a specific focus on Caribbean diasporic populations and their cultural production. We will think about aesthetics as literary, visual, and sonic representations authored by and about communities of color in response to the uneven processes of racialization, migration, colonization, and nation-state formation that inflect how identity is shaped and experienced across time and space. Engaging the work of artists like Hew Locke, María Magdalena Campos-Pons, Kara Walker, and Miguel Luciano in conversation with Stuart Hall, José Quiroga, Krista Thompson, and Michelle Ann Stephens among others will illuminate these inquiries. The circuits of culture, goods, ideas, labor, and peoples that flow between the archipelagos of the Caribbean and the metropoles such as Miami, New York, and London will serve as critical sites to map our interventions.

Class Format: seminar

Requirements/Evaluation: attendance and class participation, short writing assignments, a 4- to 5-page midterm paper, and a 10-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-year students and Latina/o Studies concentrators

Expected Class Size: 18

Distributions: (D2)

Attributes: LATS Core Electives

Fall 2018

SEM Section: 01 MR 2:35 pm - 3:50 pm Sebastian Perez

LATS 203 (F) Chicana/o Film and Video

Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203

Primary Crosslisting

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH
LATS 208 (F) Introduction to Latina/o Literatures

Crosslistings: AMST207 / ENGL251 / LATS208 / COMP211

Primary Crosslisting

This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. Readings include works by Tómas Rivera, Cristina García, Cristy C. Road, Oscar Zeta Acosta, Junot Díaz, Alisa Valdes-Rodriguez, and more.

Class Format: lecture

Requirements/Evaluation: students will be evaluated based on weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Comparative Literature majors

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST or LATS

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; LATS Core Electives

Not offered current academic year

LATS 220 (F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS220 / AMST221 / ENVI221

Primary Crosslisting

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20
LATS 222 (F) Ficciones: A Writing Workshop (DPE) (WI)
Crosslistings: ENGL252 / LATS222

Primary Crosslisting

This course is focused on the art and practice of writing fiction. Sessions are divided into workshop and seminar. Workshop: Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Seminar: We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students further strengthen their narrative skills.

Class Format: studio/workshop

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under LATS; meets Division 1 requirement if registration is under ENGL DPE: Student work will encourage personal and cultural expression, with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change WI: Requires minimum 30 pages of writing, close reading by peers and instructor, and final portfolio of revisions

Attributes: LATS Core Electives;

Fall 2018

LATS 224 (S) U.S. Latinx Religions
Crosslistings: REL224 / AMST224 / LATS224

Primary Crosslisting

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latinx communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices --such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería--by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, questions of how one studies Latinx religions.

Class Format: discussion

Requirements/Evaluation: based upon class participation, short writing exercises, a 5-page essay, and an 8-12-page final review essay

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 15

Distributions: (D2)
LATS 228 (F) Revolt and Revelation in 20th-Century Americas
Crosslistings: AMST228 / AFR228 / LATS228 / REL223

Primary Crosslisting
Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of “God-talk” broadly termed “liberation theologies” that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings—such as those of Gutierrez—and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Class Format: seminar

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: majors and concentrators

Expected Class Size: 12

Distributions: (D2)

Attributes: LATS Core Electives

Not offered current academic year

LATS 231 (S) Approaches to Media Studies: Analyzing Mediated Difference
Crosslistings: AMST231 / LATS231 / WGSS232

Primary Crosslisting
Media’s influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this course will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women’s Gender & Sexuality Studies majors by seniority

Expected Class Size: 10

Distributions: (D2)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses; LATS Core Electives; WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year
LATS 232 (S)  We the People in the Stacks: Democracy and Literatures of Archives
Crosslistings: ENGL232 / LATS232

Primary Crosslisting
"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on attendance and class participation, short writing exercises, midterm project, final creative project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators

Expected Class Size: 12-15

Distributions: (D2)

LATS 240 (S)  Latina/o Language Politics: Hybrid Voices
Crosslistings: AMST240 / LATS240 / COMP210

Primary Crosslisting
In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar

Requirements/Evaluation: participation, two essays, final take-home examination

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Expected Class Size: 12

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under LATS or AMST; meets Division 1 requirement if registration is under COMP

LATS 241 (F)  Performing Masculinity in Global Popular Culture  
Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar  
Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper  
Prerequisites: none  
Enrollment Limit: 20  
Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited  
Expected Class Size: 20  
Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

LATS 246 (S)  Aesthetics and Place-making in Latina/o New York  
Crosslistings: AMST246 / LATS246

Primary Crosslisting

New York City has long served as a nexus of Latina/o migration and settlement since the late nineteenth century. From the New York sound of Afro-Cuban and Puerto Rican salsa to the poetics of slam poetry forged in the Nuyorican Poets Cafe, New York’s Latinas/os have defined and developed numerous forms of Latina/o popular expression. This course examines the aesthetic foundations of Latina/o New York, remaining attentive to the numerous diasporas that have migrated to and made the city their home. Student will engage with a multiplicity of popular cultural genres including memoirs, literature, poetry, sound, visual art, and photography in the context of the history of the city while focusing on key themes of racial formation, the politics of space and place, and the labor of culture.

Class Format: lecture/discussion  
Requirements/Evaluation: attendance and class participation, short writing exercises, 4- to 5-page midterm paper close-reading a text, and a 10- to 15-page final paper  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Limit: 20  
Enrollment Preferences: LATS concentrators and AMST majors

Not offered current academic year

LATS 247 (S)  Race and Religion in the American West  
Crosslistings: ENVI247 / LATS247 / REL247 / AMST247
Secondary Crosslisting

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

LATS 252 (S) Puerto Rico and its Diaspora

Crosslistings: AMST252 / LATS252

Primary Crosslisting

On September 20, 2018, Maria—a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course’s community engagement component.

Class Format: seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
**Prerequisites:** students should have some fluency with the Spanish language

**LATS 286 (F) Latina/o History, 1848 to the Present**

Crosslistings: HIST286 / LATS286

**Primary Crosslisting**

From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups come to have sizeable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge?

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation and group presentations, short writing assignments, two short essays, and a final essay

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 20

**Distributions:** (D2)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada; LATS Core Electives

**LATS 309 (S) Scriptures and Race**

Crosslistings: AFR309 / LATS309 / REL309

**Secondary Crosslisting**

This course focuses on the relationships between constructions of race in the post-1492 American world and “Christian scriptures.” The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage “scriptures”? In what ways have “scriptures” informed how people imagine themselves, their communities, and their relationship to religious and racial “others”? How did “scriptures” and “race” inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to
LATS 312 (S) Chicago
Crosslistings: LATS312 / AMST312 / ENVI313
Primary Crosslisting
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221
Expected Class Size: 15
Distributions: (D2)
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; GBST Urbanizing World Electives; LATS Core Electives
Not offered current academic year

LATS 313 (F) Gender, Race, and the Power of Personal Aesthetics
Crosslistings: AFR326 / AMST313 / WGSS313 / LATS313
Primary Crosslisting
This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority
Expected Class Size: 12
Distributions: (D2)

Fall 2018
SEM Section: 01 TF 1:10 pm - 2:25 pm Maria Elena Cepeda

LATS 316 (F) The Graphic Narrative: A "Global South" Perspective (DPE)
"[I]n a media-saturated world in which a huge preponderance of the world's news images are controlled and diffused by a handful of men' a stream of comic book images and words, assertively etched' can provide a remarkable antidote." --Edward Said, Introduction to Palestine by Joe Sacco. This course examines graphic narratives (and related texts and film) rooted in the "Global South," with particular emphasis on Latina/o and Latin American experiences. We will focus on how each author/artist deploys visual and narrative elements to express social, political, economic, and cultural realities. Regular assignments will offer students opportunities to create their own graphic narratives.

Class Format: seminar
Requirements/Evaluation: attendance and class participation, short writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Latina/o Studies concentrators
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: DPE: Readings in the course offer students the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change
Attributes: LATS Core Electives

Fall 2018

LATS 318 (F) California: Myths, Peoples, Places (WI)
Crosslistings: ENVI318 / LATS318 / REL318 / AMST318 / COMP328
Primary Crosslisting
Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Class Format: seminar
Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D2) (WI)
Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under LATS, AMST, ENVI or REL
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; LATS Core Electives;
Not offered current academic year

LATS 330 (S) DNA + Latinx: Decoding the “Cosmic Race” (DPE)
Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. In this interdisciplinary course, we will explore Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Readings will include The Cosmic Race by José Vasconcelos, The Cosmic Serpent by Jeremy Narby, Bird of Paradise: How I Became Latina by Raquel Cepeda, and The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome by Alondra Nelson.

Class Format: seminar
Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Latina/o Studies concentrators
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: DPE: Readings and class discussion offer students the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change
Attributes: LATS Core Electives

Spring 2019
SEM Section: 01 MR 1:10 pm - 2:25 pm Nelly A. Rosario

LATS 335 (S) Race, Gender, and Performance from Literature to Social Media
Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslisting
How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

Class Format: seminar
Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper
Extra Info: not available for the fifth course option
Prerequisites: none
LATS 338 (S) Latina/o Musical Cultures: Sounding out Gender, Race, and Sexuality (WI)

Crosslistings: LATS338 / WGSS338 / AMST339

Primary Crosslisting

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Class Format: seminar

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Extra Info: may not be taken on a pass/fail basis

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives; GBST Borders, Exiles + Diaspora Studies Electives; LATS Core Electives; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses

Spring 2019

SEM Section: 01 TR 11:20 am - 12:35 pm Maria Elena Cepeda

LATS 340 (S) U.S. Afro-Latinidades

This course takes an interdisciplinary approach to examine the history, lived experiences, and cultural productions of Afro-Latinx in the United States. Discussions in the course will center on three related questions: What is Afro-Latinidad? How does Blackness in Latin America differ from its articulation among Afro-Latinx in the United States? And, how have migration and sociopolitical processes impacted the lives of U.S. Afro-Latinx and our collective understanding of Afro-Latinidad? Throughout the course, we will draw on literature in the social sciences and humanities to examine the transnational nature of race and Blackness across the Americas, as well as the intersection between these identities and gender, sexuality, and class. We will also examine several media and cultural productions of U.S. Afro-Latinx (poems, novels, documentary films, blogs, and social media sites) and critically analyze their articulation of the Afro-Latinx experience.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation, reading reflections, leading discussion, a 5- to 8-page midterm essay, and a 12- to 15-page final essay or a final collaborative project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators
LATS 346 (F) Latinas/os and the Media: From Production to Consumption (WI)
Crosslistings: LATS346 / AMST346

Primary Crosslisting
This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority
Expected Class Size: 12

LATS 348 (F) Graphic Narratives as Democratic Ideals
Crosslistings: COMP348 / LATS348 / AMST348

Primary Crosslisting
This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. The primary focus will be on texts that explore themes of democracy and Latinidades. We will also discuss the "graphic activism" of artists like Sharon Lee De La Cruz of Digital Citizens Lab, a design collective with a focus on civic technology. Throughout the course, students will have the opportunity to create their own graphic narratives, either digitally or in print. Possible guest speaker: comic book artist Ivan Vélez (Planet Bronx, 2015 Creative Capital Award in Visual Arts).

Class Format: seminar/workshop
Requirements/Evaluation: based on attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: LATS concentrators
Expected Class Size: 15
LATS 358 (S) Latina/o Installation and Site-Specific Art
Crosslistings: ARTH358 / LATS358
Primary Crosslisting
This course will explore the various forms of installation and site-specific artworks created by Latina/o artists for both museums and public space. We will examine the ways in which Latina/o artists have used space as a material in the production of artworks and how this impacts the works’ meanings and the viewer’s experience. Within the context of U.S. Latina/o culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.
Class Format: lecture/discussion
Requirements/Evaluation: two short papers, periodic research reports, final research paper, and presentation
Prerequisites: LATS 105 or ARTH 102 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Latina/o Studies concentrators and Art majors
Expected Class Size: 12
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under LATS; meets Division 1 requirement if registration is under ARTH
Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; LATS Core Electives
Not offered current academic year

LATS 385 (S) Politics, Activism, and Everyday Life: Latinas/os in New York City and the Northeast
Crosslistings: HIST385 / LATS385
Secondary Crosslisting
This course explores how everyday life has shaped the politics and activism of Latinas/os in New York City and the Northeast from the post-World War II era to the present. Arriving in larger numbers in the 1940s and 1950s, Puerto Ricans sought to define a place for themselves in the region. In ensuing decades, Cubans, Dominicans, Central and South Americans, and Mexicans increasingly settled in the city and the region. Addressing the issues stemming from their everyday lives, politics and activism took a wide variety of forms from community building to meet immediate needs, to social service approaches and community-based organizing during the War on Poverty in the early 1960s, to the radical political and social movements of the late 1960s and the 1970s, to electoral politics throughout the decades to the present. Activists organized around a wide variety of often intersecting issues including education, workers’ rights, women’s rights and feminism, legal status, and LGBTQ+ visibility and rights. At times, politics and activism were rooted in one national origin group, while other efforts were intentionally and explicitly Latinx. This course will draw on autobiographies and other primary materials, as well as documentaries to help in making the connections between everyday life and politics. For final projects, students will have the option of delving deeper into autobiographies and other narrative sources OR of engaging in community based learning throughout the semester and using these experiences as the foundation for their final projects.
Class Format: lecture
Requirements/Evaluation: class participation, two essays of 3- to 5-pages each, final project of 7- to 10-pages, and final presentation, option of community based learning
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25
LATS 386 (S)  Latinas in the Global Economy: Work, Migration, and Households
Crosslistings: LATS386 / HIST386 / WGSS386

Primary Crosslisting
An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latinas workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion
Requirements/Evaluation: evaluation based on class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class
Prerequisites: open to first-year students with instructor's permission

Spring 2019

Attributes: LATS Core Electives
LATS 408 (F)  Envisioning Urban Life: Objects, Subjects, and Everyday People  (WI)
Crosslistings: LATS408 / AMST408

Primary Crosslisting
What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a short essay, a series of writing exercises, and a semester-long final project
Prerequisites: prior courses in AMST, LATS, or permission of instructor; not open to first year students
Enrollment Limit: 14
Enrollment Preferences: senior Latina/o Studies concentrators and senior American Studies majors

LATS 409 (F)  Transnationalism and Difference: Comparative Perspectives  (WI)
Crosslistings: AMST411 / WGSS409 / LATS409

Primary Crosslisting
In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, an original 12-15 page research paper conducted in stages, and peer editing
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority
Expected Class Size: 10
Distributions: (D2) (WI)
LATS 420 (F) Latinx Ecologies
Crosslistings: LATS420 / ENVI421

Primary Crosslisting

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords’ garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes’ *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez’s theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Class Format: seminar

Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latinx Studies concentrators; Environmental Studies majors and concentrators

Expected Class Size: 10

Distributions: (D2)

Attributes: LATS 400-level Seminars

Not offered current academic year

LATS 426 (S) Queer Temporalities (WI)
Crosslistings: REL326 / WGSS326 / COMP326 / LATS426

Secondary Crosslisting

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance, analytical essays, responses, and revised essays

Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week’s reading. The other student will respond orally with a 2-page response to their partner's paper.

Extra Info 2: Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester. may not be taken pass/fail or fifth course

Prerequisites: none

Enrollment Limit: 10
LATS 427 (S) Racial and Religious Mixture (WI)
Crosslistings: AMST327 / AFR427 / LATS427 / REL314

Primary Crosslisting
The very term “mixture” implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: seminar
Requirements/Evaluation: evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora;
Not offered current academic year

LATS 440 (F) Contemporary Exhibitions: Los Angeles and Latin America (DPE) (WI)
Crosslistings: ARTH440 / LATS440

Secondary Crosslisting
This seminar examines connections between Latina/o and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Class Format: seminar
Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)
Enrollment Limit: 15
Enrollment Preferences: senior Art majors and senior Latina/o Studies concentrators
Expected Class Size: 12
Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under LATS. DPE: The key themes explored in the course concerning art and activism, borders and diaspora, globalism and modernism in the visual arts intersect with the critical exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Also, a number of the exhibitions studied in the class explicitly take up issues of difference, power, and equity. Through discussion, presentations, and writing assignments students will develop and refine skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice. WI: This course is a Writing Intensive seminar. This means that there will be considerable focus on writing, revision, and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus.

Attributes: ARTH post-1600 Courses; LATS Countries of Origin + Transnationalism Elect;

Fall 2018

LATS 462 (F) Art of California: Pacific Standard Time (WI)
Crosslistings: LATS462 / AMST462 / ARTH562 / ARTH462

Secondary Crosslisting

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 102

Enrollment Limit: 15
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators
Expected Class Size: 15
Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS

Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; ARTH post-1600 Courses; LATS Comparative Race + Ethnic Studies Electives;

Not offered current academic year

LATS 471 (S) Comparative Latina/o Migrations (WI)
Crosslistings: LATS471 / HIST471

Primary Crosslisting

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we
develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

**Class Format:** discussion/seminar

LEADERSHIP STUDIES focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, a number of questions are addressed through the curriculum. How have men and women defined leadership and what are the bases of leaders’ legitimacy in different historical contexts? How do leaders in different contexts emerge? Through tradition, charisma, or legal sanction? How do different types of leaders exercise and maintain their domination? What are the distinctive habits of mind of leaders in different historical contexts? What are the moral dilemmas that leaders in different contexts face? What are the typical challenges to established leadership in different historical contexts? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year.

LEADERSHIP STUDIES—TRADITIONAL TRACK

The introductory course:
LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on ethical issues related to leadership, typically:
LEAD 330 Ethics, Scandals & Leadership
PHIL 119 Plato with Footnotes: Ethics and Politics
PSCI 203 Introduction to Political Theory

Two core courses dealing with specific facets or domains of leadership, such as:
ARTH 501/LEAD 301 Museums: History and Practice
ASTR/LEAD 340 Great Astronomers and Their Original Publications
CLAS/LEAD 323 Leadership, Government, and the Governed in Ancient Greece
HIST 111/LEAD 150 Movers and Shakers in the Middle East
HIST/LEAD 207 The Modern Middle East
HIST/LEAD 241 The Rise and Fall of the Soviet Union
LEAD 212/HIST 393 Sister Revolutions in France and America
LEAD 250/PSCI 205 Political Leadership
LEAD/PSCI 285/HIST 354 The Revolutionary Generation: Galaxy of Leaders
LEAD/PSCI 293 Leadership and Political Change
LEAD 295 Leadership and Management
LEAD/PSCI 369 The Crisis of Leadership
PSCI/LEAD 141 Bandits and Warlords
PSCI/LEAD 206 Dangerous Leadership in American Politics
PSCI/LEAD 215 Race and Inequality in the American City
PSCI/LEAD 216 American Constitutionalism I: Structures of Power
PSCI/LEAD 217 American Constitutionalism II: Rights and Liberties
PSCI/LEAD 218 The American Presidency
PSCI/LEAD 309 Problems and Progress in American Democracy
PSCI/LEAD 311 Congress
PSCI/LEAD 312 American Political Thought
PSCI/LEAD 314 Leadership in American Political Development
PSCI/LEAD 327 Leadership and Strategy
PSCI 345 Cosmology and Rulership in Ancient Chinese Political Thought
PSCI/LEAD 355 American Realism: Kennan, Kissinger and the American Style of Foreign Policy
PSCI/LEAD 367 The Politics of American National Security
SOC 387 Propaganda

One Leadership Studies Winter Study course (listed separately in the catalog)

Capstone course:
LEAD 402 The Art of Presidential Leadership

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course:
HIST 262 The United States and the World, 1776 to 1914
HIST 263 The United States and the World, 1914 to the Present
PSCI/LEAD 120 America and the World
LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:
LEAD 250/PSCI 205 Political Leadership
LEAD/PSCI 285/HIST 354 The Revolutionary Generation: Galaxy of Leaders
LEAD/PSCI 369 The Crisis of Leadership
PSCI/LEAD 206 Dangerous Leadership in American Politics
PSCI/LEAD 218 The American Presidency
PSCI/LEAD 309 Problems and Progress in American Democracy
PSCI/LEAD 311 Congress

Three required courses dealing with specific facets of American foreign policy leadership, such as:
HIST 262 The United States and the World, 1776 to 1914
HIST 263 The United States and the World, 1914 to the Present
HIST 388 Decolonization and the Cold War
HIST/ASST/LEAD 389 The Vietnam Wars
HIST/LEAD 464 The United States and the Vietnam War
PSCI 225 International Security
PSCI/LEAD 262 America and the Cold War
PSCI/LEAD 242 America and the Vietnam War
PSCI 266 The United States and Latin America
PSCI/LEAD 355 American Realism: Kennan, Kissinger and the American Style of Foreign Policy
PSCI/LEAD 362 The Wilsonian Tradition in American Foreign Policy
PSCI/LEAD 367 The Politics of American National Security
SOC 202 Terrorism and National Security

One capstone course:
LEAD 402 The Art of Presidential Leadership
PSCI/LEAD 327 Leadership and Strategy
PSCI/LEAD 365 U.S. Grand Strategy (W)
PSCI/LEAD 367 The Politics of American National Security

(There is no winter study component to the American Foreign Policy Leadership track.)

Students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No, not formally, but it is not been an issue yet. To the best of my knowledge, students have requested one course be counted toward the concentration at most.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Introductory course, Winter Study course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The Introductory course has historically been taught only in the fall.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.
LEAD 12 (W) Principles of Effective Leadership

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals. Adjunct Instructor Bio: William E. Simon, Jr., ’73. Businessman, lawyer, and philanthropist, Mr. Simon is Co-Chairman of William E. Simon & Sons, a private equity firm, and the William E. Simon Foundation. Early in his career he was Assistant U.S. Attorney in the Southern District of New York and later was the 2002 Republican gubernatorial nominee in California. Mr. Simon is a Trustee Emeritus of Williams College.

Class Format: mornings

Requirements/Evaluation: 10-page paper and an in-class presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Leadership Studies concentrators, preference to seniors and juniors

Materials/Lab Fee: none

Winter 2019

LEAD 13 (W) Practical Preparation for Work After Williams: Standing Out Instead of Fitting In!

Crosslistings: LEAD13 / PSYC13

Primary Crosslisting

Students will dramatically enhance and expand their own practical professional competencies and personal attributes by gaining specific skills valuable and relevant for success in the real-world of work! Dynamic sessions are conducted by an exceptionally accomplished instructor focusing on character, interpersonal astuteness, communicating skills, leading effective change, financial statement literacy, decision-making under pressure, and thinking critically about and acting intentionally for personal development. Knowledge is transferred in the classroom through fast-paced, concise student-led discussion, live interaction with seven world-class guest speakers, individual communications exercises, role-playing, and personal one-on-one mentoring by the instructor. Preparing for productive class discussions and participation requires reading three short books (The Headmaster; Killer Angels; Breaking Through) and various articles, watching selected videos, understanding material provided in a subject matter guidebook, completing a private Birkman assessment online, as well understanding wide-ranging human performance though an encapsulated case study of the people at the Battle of Gettysburg. Benefits realized by students from all classes can be applied to any enterprise, including business, entrepreneurial initiatives, education, non-profits, and public sector governmental service. Students prepare a 5-page paper on a topic of their choosing that is work-shopped in a tutorial peer evaluation format prior to submission to the instructor. A one-page personal development action plan is also prepared that remains confidential between the student and the instructor in order to provide private individual mentoring and coaching. Class meetings are conducted with lots of fun starting in mid-morning for 1 hour and 45 minutes Monday through Thursday during Winter Study with an estimated three hours of daily preparation (about 20 hours per week) necessary by each student in order to take ownership for achieving and enjoying the full learning experience. Course Daily Agenda: http://www.intersolvegroup.com/wp-content/uploads/WilliamsWinterStudyAgenda2019.pdf Adjunct Instructor Bio: http://www.intersolvegroup.com/leadership-profile/

Class Format: Monday through Thursday 10-11:50 AM

Requirements/Evaluation: class participation based on materials provided for daily preparation, a 5-page paper reviewed in a tutorial peer format and evaluated by the instructor, and a one-page personal development action plan
LEAD 14 (W) The CIA and the Politics of Intelligence
Crosslistings: LEAD14 / PSCI14
Secondary Crosslisting
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency. Adjunct Instructor Bio: Donald Gregg '51 served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. He is now chairman emeritus of The Korea Society. 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. He is now chairman of the Pacific Century Institute in Los Angeles.
Class Format: afternoons
Requirements/Evaluation: evaluation will include class attendance and participation, and a short, 3- to 4-page retrospective paper on the course and its content
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference to PSCI and LEAD students
Materials/Lab Fee: cost of book ($25)

LEAD 15 (W) Barack Obama: A First Draft of Presidential History
Crosslistings: LEAD15 / PSCI15
Primary Crosslisting
Barack Obama's election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement—and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama's leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read (and view) primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama's presidency; the final assignment will be the essay itself.
Class Format: afternoons
Requirements/Evaluation: 10-page paper
Prerequisites: one course in American politics, Leadership Studies, and/or 20th century American history
Enrollment Limit: 19
Enrollment Preferences: preference will be given to LEAD concentrators and PSCI majors
Materials/Lab Fee: $12 plus cost of books
LEAD 18 (W)  Wilderness Leadership in Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification.

Class Format: the course runs nine consecutive days straight from 9AM-5PM, with a possible one nighttime rescue exercise

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the instructor explaining why they want to take the course and hope to gain from the experience

Materials/Lab Fee: $465

Attributes: EXPE Experiential Education Courses

LEAD 19 (W)  21st Century Museums--From the Inner Workings to the Future Vision of Culture Making

Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Secondary Crosslisting

The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums--from art museums to scientific, historical, and specialty collections--and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

Requirements/Evaluation: final formal public exhibit

Prerequisites: keen interest in museums and culture

Enrollment Limit: 12

Enrollment Preferences: random selection

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

LEAD 99 (W)  Independent Study: Leadership Studies

Winter 2019

LEC Section: 01    WRF 10:00 am - 3:00 pm PORG 10:00 am - 3:00 pm   Lisa B. Dorin
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019

IND Section: 01    TBA    Justin Crowe

LEAD 120 (S)  America and the World
Crosslistings: LEAD120 / GBST101 / PSCI120

Secondary Crosslisting

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, class participation, and final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Distributions: (D2)

Attributes: PSCI International Relations Courses

Not offered current academic year

LEAD 125 (F)  Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
Crosslistings: PSCI125 / LEAD125

Primary Crosslisting

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. Looking at leaders from ancient Greece to the contemporary United States, we will explore the big questions of leadership studies: What makes a leader successful? Where does legitimacy come from? What (if anything) distinguished a leader from a demagogue? Do good leaders make good followers, or vice versa? What is the relationship between leadership and morality--can the ends justify the means? Why do good leaders sometimes lead badly? How can disempowered people exercise effective leadership? What functions does leadership fill, and what challenges do leaders face, in modern democratic states?

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and cumulative final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-year students and sophomores
**Expected Class Size:** 25

**LEAD 127 (S) America First? The Trump Era and the Future of World Politics**

**Crosslistings:** PSCI127 / LEAD127

**Secondary Crosslisting**

"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindberg in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal international internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.

**Class Format:** lecture

**Requirements/Evaluation:** two analytical essays, short response papers, and final group project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** potential political science majors and leadership studies concentrators (foreign policy track)

**Expected Class Size:** 20

**LEAD 141 (S) Bandits and Warlords**

**Crosslistings:** LEAD141 / GBST141 / PSCI141

**Secondary Crosslisting**

A leading scholar once quipped that political communities "qualify as our largest examples of organized crime." He wasn't far off: governments are meant to protect their citizenry, but as the #bringbackoursgirls or the KONY 2012 campaigns reveal, sometimes they fail. Bandits emerge, racketeers flourish, and warlords replace governments. By looking at Boko Haram, Séleka rebels, Al-Shabaab, Somali pirates and the Lords Resistance Army, this course explores the conditions that lead to the collapse of government protection and its replacement by bandits and warlords. We will then use this understanding to examine prominent examples of banditry and warlordism in Latin America, the Middle East and Europe.

**Class Format:** lecture

**Requirements/Evaluation:** class participation, five short papers and a final exam

**Prerequisites:** none; open only to first-years and sophomores

**Enrollment Limit:** 50

**Enrollment Preferences:** first-years

**Expected Class Size:** 40

**Distributions:** (D2)
