Williams College
PO Box 687
Williamstown, MA 01267
413-597-3131

Correspondence concerning matters of general interest should be addressed to the President.

Other inquiries should be addressed to the following:

- Academic and Student Affairs: Dean of the College
- Admission of Students: Director of Admission
- Alumni: Director of Alumni Relations
- Business: Controller
- Development: Senior Development Officer
- Faculty Affairs: Dean of the Faculty
- Financial Aid: Director of Financial Aid
- Publications and Websites: Chief Communications Officer
- Sexual Misconduct: Title IX Coordinator
- Transcripts, Records, Catalog: Registrar

The corporate name is The President and Trustees of Williams College.
Williams College is dedicated to building a diverse and inclusive community in which members of all backgrounds can live, learn and thrive. In compliance with state and federal law, Williams does not discriminate in admission, employment, or administration of its programs and activities on the basis of race, color, sex, national origin, religion, age, disability, marital status, sexual orientation, gender identity or expression, ancestry, or military service.

Inquiries should be addressed to:

Assistant Vice President & Title IX Coordinator
Office of Institutional Diversity and Equity
Williams College

In the gentle light of the Berkshire hills, Williams pursues a bold ambition: To provide the finest possible liberal arts education. If the goal is immodest, it is also bracing: Elevating the sights and standards of every member of the community, encouraging them to keep faith with the challenge inscribed on the College’s gates: “climb high, climb far.”

Williams is fortunate to have extraordinary resources, but its strength derives above all else from the quality of its people.

Williams students rank with the best in the country; the rigor and competitiveness of the College’s admission standards place Williams in the company of only a handful of other institutions. Over the past thirty years especially, Williams has both strengthened its academic profile and actively recruited a student body that is markedly more diverse in many dimensions, including race, national origin, and the educational and socio-economic background of its families.

The strength of the student body today is the product of the College’s resolve to search as widely as possible for students of high academic ability and great personal promise. Diversity is not an end in itself, but a principle flowing from the conviction that encountering differences is at the heart of the educational enterprise—differences, certainly, of ideas and beliefs, but also differences of perspectives rooted in the varied histories students bring with them.

As both an educational and social imperative, we are committed to welcoming talented students irrespective of their financial resources, and it is therefore a central institutional priority—unwaveringly supported by all parts of the College community—to maintain our policies of need-blind admission for domestic students and of fully meeting a student’s demonstrated need. And, recognizing that of those to whom much has been given much may properly be required, we ask all our students to understand that an education at Williams should not be regarded as a privilege destined to create further privilege, but rather as a privilege that creates the opportunity and responsibility to serve society at large.

We seek to capitalize on our character as a residential college by placing great emphasis on the learning that takes place not only inside the classroom, but outside as well, where students can strengthen mind, body, and spirit by participating in athletic teams, artistic performances, political debates, religious and volunteer groups, and nearly one-hundred-and-seventy extra-curricular organizations. We also urge students to see their college as a laboratory in citizenship. To an unusual degree, Williams gives students primary responsibility for creating and governing their own community, whether as Junior Advisors (chosen by fellow students to live with and mentor first-year students), or as guardians of academic integrity through the student-led Honor Code.
Recruiting top talent from a wide variety of institutions, Williams asks its faculty to accept a distinctive—and unusually demanding—combination of challenges: to be exemplary teachers, productive scholars or artists, and active partners in running the institution. Well supported by the College through research funding and a generous sabbatical program, Williams faculty are leaders in their fields—recognized nationally, and often internationally, for the high quality and significance of their scholarly and creative work. They also embrace the chance to shape their college, serving in a civic spirit on an array of committees, and as senior officers of an institution that has long prized shared governance and collaborative decision-making.

But it is the teaching gene that especially defines Williams professors. They devote sustained attention every year to assessing the quality and freshness of the curriculum, and to crafting pedagogical approaches that help nurture in their students a passionate pleasure in the life of the mind. Faculty members invite students to become partners in the process of intellectual discovery. That partnership becomes visible in every classroom, where students are expected to contribute rather than consume; in the challenging setting of Williams tutorials, where students take the lead in explaining what is interesting and consequential about that week’s assignment; and in the College’s ambitious programs to engage students directly in faculty research.

But the classroom and curriculum are only the entry points. Professors at Williams want to know not only what their students think, but how they think and who they are. They want to know students in all their dimensions—to learn their histories and hopes, to advise them on matters personal as well as academic, to see them as complex individuals who deserve attention and respect.

Faculty and students together, learning with and from each other in a community whose intimacy of scale fosters close personal and intellectual relationships; where concern for the needs and ideas of other people is not only an educational, but an ethical, imperative; where the values of engagement and decency fundamentally shape the educational process: These are the ideals to which Williams faculty and students aspire.

They have strong partners. Williams is blessed with an enormously talented administrative and support staff; they keenly understand the College’s mission and devote their energies to advancing it. Williams alumni are fiercely and intelligently loyal, contributing generously of their time, experience, and resources. Far from insisting that the College remain as it was in their time, alumni encourage Williams to reinvent itself for each new generation. Williams trustees (all of whom are currently alumni) provide discerning strategic direction and careful stewardship of the College’s assets. While the board is fully engaged, it keeps its focus on large policy issues and long-term decisions.

We are fortunate, too, in our location. Surrounded by communities that enthusiastically support and participate in its educational project, Williams is at home in a town rich with cultural resources. The College strives to be a responsible citizen and employer, and contributes both expertise and resources to numerous local initiatives. The natural beauty of the Berkshires
makes us especially conscious of the urgent need to address—through our teaching and research, and through the daily operations of the College—the environmental problems that threaten an increasingly fragile planet.

That is who we are, and this is what we aim to do: To develop in students both the wisdom and skills they will need to become responsible contributors to whatever communities they join, and the richly textured inner lives that will make them rigorously self-reflective, ethically alert, and imaginatively alive. Public and private purposes, as it were, harmoniously nurturing each other. Toward these ends, certain principles and values shape our sense of mission:

- Our purpose is not to offer specialized or professional training, but to develop in our students strong writing, speaking, and quantitative abilities, as well as analytical and interpretive talents, tested in relation to a wide range of issues and disciplines. We embrace the liberal arts claim that a broadly educated person will be more capable of adapting to the particular needs of the professions and of public life than a person narrowly trained in singular subjects.

- Our curricular requirements aim to negotiate the crucial balance between breadth and depth. We combine an appropriately liberal distribution of each student’s course choices across the curriculum with some measure of control over the methods and subject matter of at least one field. While fully recognizing the important value of disciplinary approaches and the departmental structures that support them, we have welcomed and participated in the academy’s growing emphasis on inter-disciplinary learning as a way of understanding the inter-connectedness of ideas, and as a bulwark against the fragmentation of knowledge.

- Through the increasingly global reach of our curriculum, as well as the diversity of our campus community, we seek to develop in students the capacity to see beyond the limits of their own experience. So many of the world’s problems—from racism, to sectarian and nationalistic violence, to everyday forms of disrespect—stem from a failure to imagine our way into the lives of other people, a failure to understand the beliefs and contingencies that shape their lives, a failure to hear the stories that other people are trying to tell us. A liberal education alone cannot solve the world’s problems, but it can help to open minds and deepen human empathy.

- Our curriculum is as varied, up-to-date, and forward-thinking as the contemporary world requires, but we also want to strengthen our students’ curiosity about, and respect for, the past: for the story of how people before us have responded to challenges different from—but analogous to—our own, for the story of where human beings have been, what we have achieved, and how we have failed. We want to resist the tendency to see our historical moment as so much more complex and dangerous than those experienced by earlier generations that we fail to think of the past as something that calls to us with an urgent, or admonitory, or even sympathetic voice.

- We want, too, to lean against the growing culture of simplification, where intricate issues are boiled down into fiercely held “positions,” where counter-arguments are seen as irritating distractions from clarity, where “points” have more power and visibility than the
thinking that produced them. We want instead to inspire in our students the confidence to be undaunted by complexity, and to embrace it in ways that will prove valuable to them and to society at large.

- We aim to encourage students to develop a personal stance toward learning and knowledge, and to make judgments that put their beliefs and values on the line. We want them to have the courage of their convictions, but at the same time, to seek out criticism of their own ideas, and to appreciate the virtues of personal and intellectual humility.

These values and ambitions will serve as beacons into a future when the college will continue to encounter, and continue to welcome, changes in our demographics, our curriculum, our approaches to what and how we learn. To remain a vibrant institution that both reflects and leads the society of which it is a part, Williams must always adapt and grow, and be prepared—as we tell our students they too must be prepared—to respond in an agile, nuanced way to needs and challenges we cannot yet anticipate.

In summarizing this college’s mission, we can turn to the eloquent words spoken by Williams President John Sawyer ’39 in his induction address in 1961:

The most versatile, the most durable, in an ultimate sense the most practical knowledge and intellectual resources which [students] can now be offered are those impractical arts and sciences around which a liberal education has long centered: the capacity to see and feel, to grasp, respond, and act over a widening arc of experience; the disposition and ability to think, to question, to use knowledge to order an ever-extending range of reality; the elasticity to grow, to perceive more widely and more deeply, and perhaps to create; the understanding to decide where to stand and the will and tenacity to do so; the wit and wisdom, the humanity and humor to try to see oneself, one’s society, and one’s world with open eyes, to live a life usefully, to help things in which one believes on their way. This is not the whole of a liberal arts education, but as I understand it, this range of goals is close to its core.

So it was more than a half-century ago, and so it remains today.

The statement above is the product of discussions during the 2016-17 academic year in the Accreditation Self-Study Steering Committee, whose twenty-eight members include faculty, students, and administrators, and in the Williams College Board of Trustees. The Board approved this statement in June 2017.
Williams uses a holistic admission process that focuses on gaining a deeper understanding of an applicant’s academic achievements and personal character. Applicants to Williams should pursue the strongest program of study offered by their schools. While there are no absolute requirements for admission, competitive first-year candidates typically study English, math, natural science, foreign language and social studies in four-year sequences and present a distinguished record throughout their secondary school career.

While the academic record is the most important factor in the admission process, we seek students who will serve as leaders not only in the classroom but also in the community at large. To that end, we also consider all candidates’ non-academic involvements and achievements at school and in their communities. A strong co-curricular record might reflect a wide range of talents and achievements or distinguished accomplishment in just one or a few areas.

First-Year Applicants

First-year applicants for whom Williams is their first-choice college may apply under the binding Early Decision program. The deadline for submission is November 15, and applicants will receive notice of a decision by December 15. Early Decision applicants may submit an Early Decision application to only one institution and, if admitted under Early Decision, are expected to withdraw all other college applications and to initiate no new applications.

First-year applicants who wish to apply to more than one college should apply under the non-binding Regular Decision plan. The deadline for submission is January 1, and applicants will receive notice of a decision by April 1. The majority of applicants apply under Regular Decision and, if admitted, have until May 1 to accept their place in the class. Acceptances are always contingent upon the applicant finishing the school year in good standing.

Here is additional information about the admission process and required materials.

Transfer Applicants

Williams welcomes transfer applications from students with strong intellectual promise and community engagement. Transfer students may apply for fall enrollment only; we do not accept mid-year transfers. Students will be informed of their class standing at the point of admission. Those who enroll as first-semester juniors will select a major upon matriculation. Students are not eligible for admission if they have already received a bachelor’s degree.

30 semester hours are considered equivalent to a full year at Williams. Students with one year or more of college credit completed or in process should apply as transfers. Students with less than one year of college credit are encouraged to apply as first-years. Regardless of how you
apply, college credit may be considered for course placement.

Williams students must fulfill a two-year residency requirement, so transfer students will be granted a maximum of two years’ worth of credit. Students who have earned more than two years of transferable credit must relinquish credit in order to meet the residency requirement, but they may still use that credit for course placement.

The deadline for transfer application submission is March 1. Applicants will receive notice of a decision by April 15 and have until June 1 to accept their place in the class.

Here is additional information about the transfer admission process and required materials.

Veteran Applicants

Williams encourages applications from individuals who have actively served in the U.S. military. Veterans may apply either as first-year or transfer students, depending on the amount of college coursework completed. Please consult the Transfer Applicants page for more information. The Registrar will determine how much credit will be awarded for work completed at other institutions.

We require transcripts of all secondary and post-secondary academic work, including any coursework completed during service. We take a holistic approach to the admission process, and will evaluate each application—including these transcripts—in context, taking into account any time that may have elapsed since enrollment. If service has caused gaps in academic work for more than two years, we recommend enrolling in challenging college-level courses prior to submitting a formal application. Successful completion of post-secondary coursework will provide us with the most recent picture of academic abilities and the best evidence of potential for academic success.

Our standard applications for admission may not accurately capture all of a veteran’s individual interests and experiences, so we encourage applicants to detail any unique circumstances and achievements in the additional information section or by submitting supplementary materials.

An application fee waiver is available for all veterans and can be requested on the Coalition Application and the Common Application. A fee waiver for the CSS PROFILE is also available by emailing the Admission Office.

We meet 100 percent of each admitted veteran’s demonstrated financial need for four years. In many cases, this may well exceed the aid provided by veterans’ benefit programs.

More detailed information on available financial aid, Post-9/11 GI Bill benefits, and our participation in the Yellow Ribbon Program, is available on the Financial Aid Office site.

International Applicants
Williams is committed to building a community that includes the brightest minds from around the world. Each year, we receive nearly 2,300 international applications—that is, from students who, regardless of country of residence, do not hold U.S. citizenship, permanent residency or a green card—from more than 100 countries. Today, international students make up eight percent of the Williams student body.

Given the number of international applicants to Williams annually, the Admission Committee is familiar with the nuances of school systems and curricula from around the world. Therefore, international applicants follow the same application procedures as U.S. citizens and are not required to submit any additional forms or testing. Those students whose first language or language of academic instruction is not English must document their English proficiency, but there is no one required examination. While we are happy to review TOEFL or IELTS results, such examinations are not requirements for admission to Williams.

Financial Aid

Williams has a substantial financial aid program to promote the greatest possible diversity in the social and economic background of the student population. Students interested in financial aid policies and procedures should refer to the Office of Financial Aid site.

Distinctive Undergraduate Scholarships

The Office of Financial Aid administers over three hundred endowed scholarships, all of which are based on demonstrated need. Students who apply for financial assistance are automatically considered for these endowed scholarships (no separate application required). The following deserve special mention because of their distinctiveness:

BRONFMAN FAMILY FUND: Established in 1990 as part of the Third Century Campaign for international programs. The family’s support provides financial aid both for students coming to Williams from foreign countries and for students spending part of their undergraduate years overseas.

CLASS OF 1936 MEMORIAL SCHOLARSHIP: Established in 1986 by members of the Class of 1936 and their families and friends as its 50th Reunion gift. Preference is given to descendants of members of the Class of 1936.

CLASS OF 1957 SCHOLARSHIP: Established in 1982 by the Class of 1957 as its 25th Reunion gift. This award honors several juniors and seniors each year who have successfully combined campus leadership with academic achievement.

POLLY AND WILLARD D. DICKERSON ’40 SCHOLARSHIP: Established in 1990 by members of the Class of 1940 on the occasion of their 50th Reunion in honor of Willard D. Dickerson ’40, Executive Director of Development Emeritus, and his wife Polly. For 32 years from their home in Williamstown, the Dickersons cared for Williams, the Class, and its members with great concern, affection, and pride. Awarded to students of promise.

MARY AGNES R. AND PETER D. KIERNAN ’44 SCHOLARSHIP: Established in 1989 by Fleet Financial Group in memory of Peter D. Kiernan ’44, former chairman and CEO of Fleet/Norstar Financial Group, Inc. The scholarship was further endowed by Peter D. Kiernan III ’75, and his wife Eaddo, in memory of his father and in honor of his mother, Mary Agnes R. Kiernan. Seven scholarships are awarded annually, with preference given first to Fleet employees and their children or to residents of regions served by Fleet Financial Group (notably New England, New York, and New Jersey). Secondary preference is given to students from Ireland.

JOHN W. LASELL SCHOLARSHIP: Established in 1952 by five members of the Lasell family in memory of John W. Lasell of the Class of 1920. Preference is given first to students of
Whitinsville; then to other Massachusetts residents.

HERBERT H. LEHMAN SCHOLARSHIP: Established in 1964 by Mrs. Lehman as a memorial to her husband, a former New York Governor and U.S. Senator, who graduated from Williams in 1899. Fifteen to twenty upperclass students are selected each year on the basis of service to both the Williams and wider community.

MORRIS AND GLADYS LEWY SCHOLARSHIP: Established in 1983 by Morris and Gladys Lewy, parents and grandparents to two Williams graduates. Preference is given to pre-medical students.

JOHN J. LOUIS, JR. ’47 SCHOLARSHIP: Established in 1976 by the late John J. Louis, Jr., former Trustee of Williams, for general scholarship purposes. Preference is given to students from Illinois.

RALPH PERKINS ’09 SCHOLARSHIP: Established in 1960 by the family of Ralph Perkins, a member of the class of 1909. Preference is given to students from Ohio.

FREDERICK H. ROBINSON ’20 MEMORIAL SCHOLARSHIP: Established in 1988 by the late Mrs. Dorothy S. Robinson in memory of her husband, a member of the Class of 1920. Preference is given to students who demonstrate interest in music.

SPENCER FAMILY SCHOLARSHIP: Established at Williams in 1991 by Mrs. Harriet Spencer, a former Trustee of Williams, in honor of her husband’s (Edson W. Spencer ’48) 65th birthday and her great affection and respect for Williams. Preference is given to students of Native American, African-American, Latina/o, or Asian-American descent.

C. V. STARR SCHOLARSHIP: Established in 1981 by the C. V. Starr Foundation with preference given to international students.

FRANCIS LYNDE STETSON SCHOLARSHIP: Established in 1921-22 by Francis Lynde Stetson, Class of 1867. Preference is given to students from northern New York.

JACOB C. STONE SCHOLARSHIP: Established in 1928 by Jacob C. Stone, a member of the Class of 1914, a Trustee of Williams, and a native of North Adams, Massachusetts. Preference is given to students from Berkshire County.
Williams College, within the limits of available funds, offers educational opportunities to all who qualify for admission. Endowment income and annual contributions from alumni and friends allow Williams to keep tuition at about half the actual cost per student.

The Office of Student Accounts oversees billing and expenses—detailed information can be found on their site.

Comprehensive Fee

Charges for 2018-2019 tuition, room, board, and fees are as follows:

<table>
<thead>
<tr>
<th>Service</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition</td>
<td>$55,140</td>
</tr>
<tr>
<td>Room</td>
<td>$7,350</td>
</tr>
<tr>
<td>Board</td>
<td>$7,150</td>
</tr>
<tr>
<td>Activities &amp; Residential House Fees</td>
<td>$310</td>
</tr>
<tr>
<td>Study Away Fee (if applicable)</td>
<td>$1,500</td>
</tr>
</tbody>
</table>

Health Insurance

The Commonwealth of Massachusetts requires health insurance for all full and three-quarter time students.

Williams offers a qualifying student health insurance plan through Blue Cross Blue Shield of Massachusetts (BCBS). Information about the plan is emailed to every student in May. Students enrolled in the Williams plan for 2018-19 will be charged $1,976 for this coverage.

Participation in this plan may be waived if a student certifies prior to August 1 that the coverage offered by an alternative program is comparable to the plan offered by Williams. Questions about the plan or online waiver/enrollment process should be directed to Gallagher Student Health.

Term Bill Payments

Term bills for one-half of the annual comprehensive fee are issued electronically to students twice a year:

- mid-July due by August 15
- mid-December due by January 15
Additional billing statements are sent on a monthly basis with any miscellaneous charges or credits that are posted to a student’s account during the course of the term.

Students are encouraged to grant access to parents and other parties to the Student Account Center to pay and view bills online. Payments may be made by echeck, ACH or by credit card (2.99% convenience fee). International payments may be made by wire transfer through Flywire. Payments may also be made by check, mailed directly to:

Williams College Office of Student Accounts
PO Box 406
Williamstown, MA 01267

Payment Plans

Williams offers two installment payment plans, administered by Tuition Management Systems (TMS), where charges for each term are paid in equal installments, with no interest charges:

- 5-month plan (July-November for fall and December-April for spring), or
- 4-month plan (August-November for fall and January-April for spring)

Information on payment plan options and TMS can be found at the Student Account Center.

Returned Checks

A $30 charge will be assessed for each returned check paid directly to Williams or any payment through the Student Account Center. A cashier check or money order may be required as payment for a returned check.

Outside Scholarships/Employer Tuition Benefit Plans

Students who receive a scholarship that was not awarded through the Office of Financial Aid, or an employer tuition benefit plan, must complete a Scholarship Information Sheet and submit it to the Office of Financial Aid by May 30. Provisional credit will be posted to the term bill. If actual payment for the provisional credit is not received by the date anticipated, the provisional credit will expire and be removed from a student’s account creating a balance due.

Loans

There are several loan options available to parents through outside sources. Information can be found in the Guide to Financing Your Williams College Education.

Outstanding Balances

Accounts that are not paid in full by the due date may be assessed a $250.00 late fee. This includes accounts which have a balance due to a late loan application or the failure of the student or parent to sign promissory notes on a timely basis.

A student with an outstanding balance may be held from the following activities:
• Returning to campus for new semester
• Pre-registration for following semester
• Drop/add for current semester
• Housing lottery for next semester
• Parking lottery for next semester

Upon graduation, all outstanding balances must be paid to the Office of Student Accounts, and all books and materials must be returned to the Library, before a student is entitled to a degree or a transcript.

Refund Policy

Federal regulations require that all educational institutions disclose their refund policy to all prospective students. Below is the Williams College Refund Policy for the 2018-2019 academic year:

<table>
<thead>
<tr>
<th>Fall Semester</th>
<th>Spring Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>Withdrawal Date</td>
<td>% Refunded</td>
</tr>
<tr>
<td>Prior to the start of classes 9/6</td>
<td>100% tuition, room, board</td>
</tr>
<tr>
<td>9/6-9/12</td>
<td>90% tuition, board only*</td>
</tr>
<tr>
<td>9/13-9/19</td>
<td>80% tuition, board only</td>
</tr>
<tr>
<td>9/20-9/26</td>
<td>70% tuition, board only</td>
</tr>
<tr>
<td>9/27-10/3</td>
<td>60% Tuition, board only</td>
</tr>
<tr>
<td>10/4-10/10</td>
<td>50% Tuition, board only</td>
</tr>
<tr>
<td>10/11-10/17</td>
<td>40% Tuition, board only</td>
</tr>
<tr>
<td>10/18-10/24</td>
<td>30% Tuition, board only</td>
</tr>
<tr>
<td>10/25-10/31</td>
<td>20% Tuition, board only</td>
</tr>
<tr>
<td>After 10/31</td>
<td>No refund</td>
</tr>
</tbody>
</table>

*Housing and miscellaneous fees are not pro-rated after the start of classes. Coverage under the Williams’ student health insurance plan will continue for the duration of the plan (August 15-August 14).

Federal Funds Repayment

For students receiving Title IV federal funds, repayment of federal funds on a pro-rata basis will be determined up to the 60% point of the semester per federal regulation. Please note that withdrawal late in the semester could result in a balance owed to Williams for federal aid that must be returned to the program.

Tuition Insurance
Williams offers a GradGuard™ Tuition Protection Plan which supplements the Williams College Refund Policy in the case of a medical withdrawal.

Tax Forms

Williams will issue a 1098-T form at the end of each calendar year for the American Opportunity and Lifetime Learning tax credits. The 1098-T should not be used to calculate the amount of scholarship and grant aid that is taxable. These forms will be mailed by January 31 to the student at the permanent address on file.
Subscribe to the Williams Academic Calendar and never miss a deadline.

The Winter Study Period covers 22 calendar days.

Approved by the faculty on February, 2016; revised March, 2016; revised May 2017.
Concentrations

In addition to majoring in a field, students may choose to concentrate elective courses in a single topic or area. A concentration is normally declared spring of sophomore year. Concentrations are offered in the following programs:

- Africana Studies
- Biochemistry and Molecular Biology
- Cognitive Science
- Environmental Studies
- Global Studies
- Jewish Studies
- Justice and Law
- Latina/o Studies
- Leadership Studies
- Maritime Studies
- Neuroscience
- Public Health
- Science and Technology Studies

Coordinate Programs

A number of programs do not offer concentrations formally, but do provide students with the opportunity to study interdisciplinary topics:

- Bioinformatics, Genomics, and Proteomics
- Film and Media Studies
- History of Science
- Linguistics
- Materials Science Studies

These programs provide guidance only and do not appear on transcripts.

Honors Program

The Honors Program requires two or three courses (one of which may be a Winter Study course) constituting a clearly interrelated pattern of study in the form of specialization within the major or interdisciplinary study with courses from other programs, and culminates in a thesis or project. At least one of the courses is in addition to the minimum number required for the major or concentration. Students must do the equivalent of two theses or projects to be eligible for honors in two majors or a major and concentration.
Prior to enrolling in the final required course for their program and before senior year, students should contact individual departments or programs for information about special criteria, procedures, and patterns of study for honors.

The degree is awarded with honors or highest honors at the end of senior year if, in the judgment of the department or program, its criteria of excellence have been met.

As the final step, honors theses or projects must be submitted to Special Collections, according to their specific guidelines.

**Foreign Language Certificates**

Certificates are awarded in Arabic, French, German, Russian, and Spanish. The certificate confirms a particular degree of proficiency, cultural literacy, and experience with the language. The number of courses required for a certificate varies, depending on the language. Please see individual programs for details.

**Combined Program in Liberal Arts and Engineering**

Williams offers opportunities for students to combine their liberal arts education at Williams with undergraduate professional training in engineering via two 5-year dual-degree programs: a 3-2 program with the Fu Foundation School of Engineering and Applied Science at Columbia University, and a 2-1-1-1 program with the Thayer School of Engineering at Dartmouth. Upon successful completion of either of these programs, a student receives a Bachelor of Arts degree from Williams as well as either a Bachelor of Science (Columbia) or Bachelor of Engineering (Dartmouth) degree in an engineering discipline.

Students interested in pursuing either dual-degree program must complete the requirements for a Williams degree, including the major and distribution requirements, as well as the prerequisite courses for their engineering program of choice, so it is necessary to plan course selections at Williams carefully. The Physics Department’s Pre-Engineering site includes a list of Williams courses recommended to prospective engineers, as well as links to further resources.

A popular alternative to the dual-degree programs is to complete the Williams B.A. in the usual four years, majoring in one of the sciences, and then go directly to a graduate program in engineering.

The pre-engineering advisor, Katharine Jensen, will be happy to assist students interested in any of the options leading to engineering careers.

**Tutorial Program**

The Tutorial Program offers Williams students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do...
Tutorials place much greater weight on student participation—more so than regular courses or small seminars. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

The ways in which particular tutorials are conducted vary across the disciplines, but this is how most tutorials at Williams are organized:

Tutorials are usually limited to ten students. At the start of term, the instructor divides students into pairs. Each pair meets weekly with the instructor for roughly one hour—this is the main focus of tutorial courses. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate students’ independent work.

At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners’ work.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They appreciate the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

Registration Information

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.
This is a current list of tutorials offered.

Independent Study

When students wish to study a subject not covered by regular course offerings, arrangements can be made to take independent study courses under faculty supervision. Once plans for an independent study have been discussed with a faculty sponsor, the Independent Study Request form should be submitted before the beginning of the semester in which the independent study will be taken, but no later than the last day of drop/add period.

Cross-Enrollment Program

Students may register at Bennington College or Massachusetts College of Liberal Arts for courses not offered at Williams.

Please note, one and two credit courses at Bennington College are not transferable.

Contact the Registrar’s Office to make arrangements.

Study Away

Students are encouraged to think about the option of study away as they begin the process of considering major fields and course requirements sophomore year. All students in good standing with no deficiencies, including financial aid recipients, are encouraged to study away during all or part of their junior year. The Office of International Education and Study Away offers up to 200 approved programs, both domestically and internationally, for students to choose from. Nearly 50% of the junior class chooses to study away for a full semester or academic year.

Credit earned in the Williams-Mystic Maritime Studies Program and the Williams-Exeter Programme at Oxford University are considered Williams credits and the grades will be applied toward the GPA. Students participating in all other approved programs will receive general credit and their GPA will not be impacted, however, the experience will appear on their Williams transcript. Coursework can transfer toward the Williams degree, however approval is required from the chair of a student’s major department; the Director of International Education and Study Away; and the Committee on Academic Standing (CAS).

The one-time petition deadline is March 1st the year before a student chooses to study away. To learn more about the process please contact the Office of International Education and Study Away.

Experiential Education

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research,
sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action site.

Special Academic Programs

The Office of Special Academic Programs (OSAP), part of the Office of Institutional Diversity and Equity, develops and administers programs that address diversity and inclusion in higher education. Beginning with the pre-enrollment programs—Summer Humanities and Social Sciences (SHSS) and Summer Science Program (SSP)—OSAP provides opportunities for students to thrive academically. The Mellon Mays Undergraduate Fellowship (MMUF) and the Allison Davis Research Fellowship (ADRF) give selected students the opportunity to learn advanced research skills and practice them on research projects of their own design with the guidance of a faculty mentor and a cohort of peers. The fellowships offer stipends so students can use their time to pursue research instead of campus and summer jobs. The ultimate goal of these fellowships is to increase the number of students from underrepresented groups in PhD programs and academic careers. OSAP also helps connect eligible students to a variety of other opportunities, from the Creating Connections Consortium (C3) summer fellowships to the Institute for Recruitment of Teachers (IRT) to a wide variety of summer research programs. More information can be found on the OSAP site.
Degree Requirements

Overview

Williams College offers a course of study leading to the Bachelor of Arts degree. The course requirements prescribe both the number of courses to be completed and the minimum grade level to be achieved; the curriculum also requires that each student explore several fields of knowledge and major in one.

To be eligible for the Bachelor of Arts degree students must complete the following requirements within eight semesters, including any semesters for which a student receives credit while not in residence at Williams (semesters spent away on exchange or other approved programs at other colleges are included in the eight semesters):

- Pass 32 semester courses (4 per semester):
  - at least 29 of which must be regularly graded A-E, including 19 with grades of C- or better;
  - a maximum of 3 P/F courses, with a limit of 1 P/F per semester;
  - students may not repeat a course for which degree credit has been awarded.
- Fulfill the four-part distribution requirement with graded courses taken at Williams or at programs under the direction of Williams College faculty:
  1. **Divisional requirement**: three graded semester courses (with two different prefixes) in each division, two of which must be completed by the end of sophomore year.
  2. **Writing-Intensive (WI) requirement**: two writing-intensive courses, one by the end of sophomore year, and one by the end of junior year.
  3. **Difference, Power, and Equity (DPE) requirement**: one before graduation, however, students are urged to complete the course by the end of sophomore year. (Class of 2019, 2020, 2021: students who have successfully completed an EDI course do not need to complete a DPE course; students who have not taken an EDI course can satisfy the requirement by completing a DPE course. Class of 2022: students must satisfy the DPE requirement).
  4. **Quantitative/Formal Reasoning (QFR) requirement**: one by the end of junior year.
- Complete all requirements for the major with an average of C- or higher.
- Pass four Winter Study courses.
- Complete four quarters of physical education by the end of sophomore year in at least two different activities.
- Take the swim test at the start of the first semester at Williams—students who fail to complete the test must pass a basic swim course.
- Be in residence at Williams eight semesters, two of which can be an approved Study Away program. Students must be in residence for both semesters of their final year.
Academic Requirement

To be eligible for the Bachelor of Arts degree students must pass 32 semester courses (at least 29 of which must be regularly graded A-E, including 19 with grades of C- or better), fulfill the four-part distribution requirement, complete all requirements for the major with an average of C- or higher, and pass four Winter Study courses. Students may not repeat a course for which degree credit has been awarded.

Distribution Requirement

The distribution requirement falls into four parts. Courses used to fulfill these requirements must be regularly graded.

1) Divisional requirement: Designed to ensure students take an appropriately diverse distribution of courses across the full range of the curriculum.

Courses are grouped into three divisions:

- Division I: Languages and the Arts
- Division II: Social Studies
- Division III: Science and Mathematics

Students must complete at least three graded semester courses in each division. Two in each division must be completed by the end of sophomore year. No more than two of the courses used to satisfy the requirement may have the same course prefix. The courses must be taken at Williams or at programs under the direction of Williams College faculty.

There may be exceptions to divisional credit, and those exceptions are noted in individual course descriptions.

Division I courses are designed to help students become better able to respond to the arts sensitively and intelligently by learning the language, whether verbal, visual, or musical, of a significant field of artistic expression. Students learn how to develop the capacity for critical discussion, to increase awareness of the esthetic and moral issues raised by works of art, and to grow in self-awareness and creativity.

- Arabic (exceptions, see individual course descriptions)
- Art History
- Art Studio
- Asian Studies (exceptions, see individual course descriptions)
- Chinese (exceptions, see individual course descriptions)
- Classics
- Comparative Literature
- Critical Languages
- Dance
- English
- Environmental Studies (any Environmental Studies course that is also cross-listed with
another subject carries divisional credit of that subject; for other exceptions see individual course descriptions

- French
- German
- Greek
- History of Science (exceptions, see individual course descriptions)
- Interdisciplinary Studies (exceptions, see individual course descriptions)
- Italian
- Japanese (exceptions, see individual course descriptions)
- Latin
- Literary Studies
- Maritime Studies (exceptions, see individual course descriptions)
- Music
- Russian
- Spanish
- Theatre

**Division II** courses consider the institutions and social structures that human beings have created, whether knowingly or unknowingly, and which in turn markedly affect their lives. These courses are intended to help students recognize, analyze, and evaluate these human structures in order that they may better understand themselves and the social world in which they live.

- Africana Studies
- American Studies
- Anthropology
- Arabic (exceptions, see individual course descriptions)
- Asian Studies (exceptions, see individual course descriptions)
- Chinese (exceptions, see individual course descriptions)
- Cognitive Science
- Economics
- Environmental Studies (any Environmental Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)
- Global Studies
- History
- History of Science (exceptions, see individual course descriptions)
- Interdisciplinary Studies (exceptions, see individual course descriptions)
- Japanese (exceptions, see individual course descriptions)
- Jewish Studies
- Justice and Law
- Latina/o Studies
- Leadership Studies
- Maritime Studies (exceptions, see individual course descriptions)
• Philosophy
• Political Economy
• Political Science
• Psychology (some exceptions, see individual course descriptions)
• Public Health (exceptions, see individual course descriptions)
• Religion
• Science and Technology Studies
• Sociology
• Women’s, Gender and Sexuality Studies

**Division III** courses are intended to provide some of the factual and methodological knowledge needed to be an informed citizen in a world deeply influenced by scientific thought and technological accomplishment, and to cultivate skill in exact and quantitative reasoning.

• Astronomy
• Astrophysics
• Biochemistry and Molecular Biology
• Biology
• Chemistry
• Computer Science
• Environmental Studies (any Environmental Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)
• Geosciences
• History of Science (exceptions, see individual course descriptions)
• Interdisciplinary Studies (exceptions, see individual course descriptions)
• Maritime Studies (exceptions, see individual course descriptions)
• Mathematics
• Neuroscience
• Physics
• Psychology (exceptions, see individual course descriptions)
• Statistics

**2) Writing-Intensive (WI) requirement:** The goal of this requirement is to improve student writing proficiency across disciplines. Students in these courses will receive guidance on style, argumentation, and other significant aspects of writing, as well as evaluation and criticism of their writing throughout the semester. This may be achieved through a variety of approaches: brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WI courses may also include multiple drafts, conferences, peer review, or class discussions designed to improve writing skills. A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered writing-intensive. WI courses require a minimum of 20 pages of writing and have a maximum enrollment of 19—this allows the instructor to devote appropriate attention to writing over the course of the semester.
All students are required to take TWO WI courses: one by the end of sophomore year and one by the end of junior year. Students will benefit most from WI courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

Here is a current list of courses offered that meet the WI requirement.

More information for faculty.

3) Difference, Power, and Equity (DPE) requirement: Williams College recognizes that in a diverse and globalized world, the critical examination of difference, power, and equity is an essential part of a liberal arts education. The DPE requirement provides students with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change. Courses satisfying the DPE requirement include content that encourages students to confront and reflect on the operations of difference, power and equity. They also provide students with critical tools they will need to be responsible agents of change. Employing a variety of pedagogical approaches and theoretical perspectives, DPE courses examine themes including but not limited to race, class, ethnicity, gender, sexuality, and religion.

All students are required to complete at least ONE DPE course. Although this course, which may be counted toward the divisional distribution requirement, can be completed any semester before graduation, students are urged to complete the course by the end of sophomore year. The requirement may be fulfilled with a course taken away from campus, but students wishing to use this option must petition the Committee on Educational Affairs (CEA) upon their return by providing a clear and detailed explanation of how the course taken away from Williams fulfills the DPE requirement.

Class of 2019, 2020, 2021

Students who have successfully completed an EDI course do not need to complete a DPE course.

Students who have not taken an EDI course can satisfy the requirement by completing a DPE course.

Class of 2022

The Class of 2022 must satisfy the DPE requirement.

Here is a current list of courses offered that meet the DPE requirement.

More information for faculty.

4) Quantitative/Formal Reasoning (QFR) requirement: This requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools
necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into MATH 100/101/102, which is to be taken before fulfilling the QFR requirement.

Here is a current list of courses offered that meet the QFR requirement.

More information for faculty.

Major Requirement

The major requirement is designed to assure that all Williams students have the experience of disciplined and cumulative study, carried on over an extended period of time, in an important field of intellectual inquiry. Students are required to declare a major spring of sophomore year.

Majors

- American Studies
- Anthropology
- Arabic Studies
- Art
- Asian Studies
- Astronomy
- Astrophysics
- Biology
- Chemistry
- Chinese
- Classics (Greek, Latin)
- Comparative Literature
- Computer Science
- Economics
- English
- Environmental Studies
- French
- Geosciences
- German
- History
- Japanese
- Mathematics
- Music
- Philosophy
• Physics
• Political Economy
• Political Science
• Psychology
• Religion
• Russian
• Sociology
• Spanish
• Statistics
• Theatre
• Women’s, Gender and Sexuality Studies

General Structure of Majors

1) Students must elect at least nine courses in their major field. A major may also require an additional course and/or one Winter Study course during junior or senior year.

Students may also fulfill the minimum requirements for a major by taking eight courses in the major field and two courses, approved by a major advisor, in associated fields. In interdepartmental majors, such as Political Economy, a larger number of courses may be required.

2) A prescribed sequence of courses, supplemented by parallel courses, and including a major seminar, is required in some major fields. Other majors ask students to plan a sequence of elective courses, including advanced work building on elementary courses in the field, and ending in a one- or two- semester faculty-organized course or project senior year. All majors provide a system of counseling to help students plan programs reflecting individual interests as well as disciplined and cumulative patterns of inquiry.

Courses in many major programs require prerequisite courses in related areas. A full description of the detailed structure of each major is found under the heading of that major.

Contract Major

Students who wish to undertake the coherent study of an interdisciplinary subject not covered by a regularly offered major may propose a Contract Major. Those interested in this option should thoroughly review the Contract Major site, and begin consulting with the Contract Major Advisor and potential faculty advisors fall semester of sophomore year. Students completing a Contract Major may not do so in conjunction with a second major.

Three Majors

Students may complete three majors with the permission of all majors and the Committee on Academic Standing (CAS). Although students may be granted permission to use a course from one major to fulfill a particular requirement in another, a student must take the minimum
number of courses in each field without counting any course twice. Students may be a candidate for honors in either or all of the majors, but a course for honors in one major may not be used for an honors course in another.

Winter Study

Winter Study, which began in 1967, is intended to provide students and faculty with a dramatically different educational experience. The differences are in the nature of the courses, the nature of the learning experience, and the change of educational pace and format from fall and spring semesters. These differences apply to the faculty and students in several ways: faculty can try out courses with new subjects and techniques that might, if successful, be used later in the regular terms; they can explore subjects not amenable to inclusion in regular courses; and they can investigate fields outside their usual areas of expertise. In their academic work (which is graded Pass, Perfunctory Pass, or Fail) students can explore new fields at low risk, concentrate on one subject that requires a great deal of time, develop individual research projects, or work in a different milieu (as interns, for example, or on trips outside Williamstown). In addition, Winter Study offers students an opportunity for more independence and initiative in a less formal setting, more opportunity to participate in cultural events, and an occasion to get to know one another better.

Students who fail their Winter Study course will be required to make up the deficiency. Students who fail through gross neglect of work may be put on academic probation or required to resign. A student who receives a second Perfunctory Pass grade in Winter Study will be required to pass a fifth course the following spring or fall semester.

Swim Test

Williams believes it is vitally important that students possess the ability to swim.

A swim test is required of all first-year students at the start of the academic year. Students are required to swim 25 yards front crawl and 25 yards backstroke.

While all first-year students are required to report to the pool for the swim test, non-swimmers are not required to take the test but must register for a beginning swim class through the Department of Physical Education during the first quarter of the year.

The swim test is designed to be a safe and comfortable experience for everyone. If a student would prefer to take the swim test in a private setting, for reasons of religious observance or gender identity/expression, accommodations can be made.

Physical Education Requirement

The Physical Education (PE) requirement provides students the opportunity of establishing and maintaining a general level of fitness and well-being; of developing abilities in carry-over activities; of discovering and extending their own physical capabilities; and of developing skills in activities with survival implications, such as swimming.
Students must complete four PE credits as a requirement for graduation.

Students must complete at least two PE credits during the first year.

All four PE credits must be completed by the end of a student’s sophomore year. Students will not be permitted to study abroad if the Physical Education requirement has not been met.

The requirement may be met through successful participation in the following:

- Successful completion of a physical education or dance department activity course.
- Participation on a varsity, junior varsity, or club team.
- Participation in a regularly scheduled Williams Outing Club activity (requires WOC membership).
- Independent class (must be approved by the Physical Education Coordinator only after three PE credits have been earned).

Additionally, students must enroll in at least two different activities to fulfill the requirement.

- Completion of a physical education activity class earns one PE credit.
- Participation on a varsity, junior varsity or club sport team earns two PE credits per season.
- Students involved in dance ensembles earn two PE credits.
- Students may earn a maximum of three PE credits in one discipline.

Satisfactory attendance is required except for students excused by a Dean and the Director of Medical Services or the Director of Counseling Services.

PE credits are posted only twice per year, at the end of fall semester and at the end of spring semester. As a result, Academic Progress Reports may not accurately reflect PE credits.

- At the beginning of fall semester, PE credits listed should be accurate through the end of the previous spring semester.
- During late October/early November, any physical education activities completed during the first half of fall semester will not yet be posted.
- At the beginning of spring semester, any physical education activities completed during Winter Study will not be posted; they will be posted once Winter Study grading is completed.
- During April preregistration any physical education activities completed during the first half of spring semester will not be posted; they will be posted at the end of spring semester.

If your PE credits still seem incorrect, please check with the Department of Physical Education.

Residence Requirement

Students who begin college at Williams must spend eight semesters in residence, two of which can be an approved Study Away program.
Students transferring to Williams from other institutions as sophomores are expected to spend six semesters in residence and juniors must spend four semesters in residence.

Students must be in residence for both semesters of their final year.
Master of Arts in the History of Art

In cooperation with the Sterling and Francine Clark Art Institute, Williams College offers a two-year course of study leading to the degree of Master of Arts in the History of Art. The objective of the program is to offer to a small number of students a thorough professional preparation for careers in the visual arts, including schools and museums, and to enable them to pursue further research whether independently or at institutions offering higher graduate degrees. The curriculum consists of seminars in a wide range of art historical subjects. Opportunities are provided for practical experience in museum work at The Clark, the Williams College Museum of Art, the Massachusetts Museum of Contemporary Art, and other local collections. The study of primary materials is further extended by field trips to other collections. The degree is normally awarded after two years of resident graduate study. To earn the degree, students must take ten courses, of which at least six must be graduate seminars (including ARTH 504 and ARTH 506). In connection with the preparation of a paper for the Graduate Symposium, students will register for an eleventh course (ARTH 509), to be graded pass/fail, in their fourth semester. A demonstration of proficiency in reading two foreign languages is required. Of these two, German is required, and French is recommended. In January of the first year, students participate in a European study trip with selected faculty; in January of the second year, students must complete a draft of their Qualifying Paper. In addition to all course work, students must, at the end of the second year, present a shortened version of the Qualifying Paper in a graduate symposium to be held on Commencement weekend. To enter the program a successful applicant must have been awarded the degree of Bachelor of Arts or its equivalent from an accredited institution. An undergraduate major in art history is not required for acceptance to the program. More information is available on the Grad Art site.

Master of Arts in Policy Economics

The Center for Development Economics (CDE), which opened at Williams College in 1960, offers an intensive one-year program in economic analysis leading to the degree of Master of Arts in Policy Economics. The program is specifically designed for economists from developing countries who have already embarked on professional careers in the public sector. The curriculum requires courses in development economics, macroeconomics, public finance, and econometrics. CDE fellows choose among other courses in lecture, seminar, and tutorial formats. Recent course electives have included: developing country macroeconomics II; financial development and regulation; tax policy; international trade and development; program evaluation for international development; environmental and natural resource policy; international financial institutions; long-term fiscal challenges; the role of social safety nets; and micro-simulation for policy analysis. Williams undergraduates who satisfy course prerequisites, with the consent of the individual instructor, are encouraged to take courses at the CDE.
Admission to the master’s degree program is highly selective, with several hundred applicants each year for approximately 30 places. Candidates normally have a B.A. or B.Sc. degree with honors in economics or a related field, two or more years of relevant work experience, and an effective command of spoken and written English. CDE fellows are often nominated for the program by public agencies from which they will be on leave. More information is available on the CDE site.
All students are expected to be familiar with the Williams College Honor Code and to reaffirm their commitment to the Statement of Academic Honesty annually.

The Honor Code covers all aspects of academic honesty including, but not limited to:

- written examinations
- tests and quizzes
- problem sets
- lab reports
- papers
- homework assignments

To ensure a thorough understanding of the Honor Code, please refer to The Eph Survival Guide.

**Statement of Academic Honesty**

As an institution fundamentally concerned with the free exchange of ideas, Williams College has always depended on the academic integrity of each of its members. In the spirit of this free exchange, the students and faculty of Williams recognize the necessity and accept the responsibility for academic honesty.

A student who enrolls at the College thereby agrees to respect and acknowledge the research and ideas of others in their work and to abide by those regulations governing work stipulated by the instructor. Any student who breaks these regulations, misrepresents their own work, or collaborates in the misrepresentation of another's work has committed a serious violation of this agreement.

Students and faculty are to report violations and alleged violations of this agreement. Such reports are to be submitted to the Student Honor Committee, consisting of eight student members of the joint Faculty-Student Honor System-Discipline Committee. This committee is responsible for determining the guilt or innocence of the accused person or persons, and for recommending appropriate punishments to the Dean. A committee of faculty members to be designated by the Faculty will sit with the Student Honor Committee in an advisory capacity.

A quorum of three-quarters shall be required for the Committee to meet. A vote of guilty by at least three-quarters of those present is necessary for conviction. A recommendation for dismissal must be made by unanimous vote of those present, and shall be carried out only with the assent of the President of the College.
The Committee is responsible for informing the student body of the meaning and implications of this statement. The aforementioned faculty committee shall be responsible for informing faculty members of the meaning and implications of this statement.

Any amendments to this statement must be made through a student referendum in which two-thirds of the student body votes, and in which two thirds of those voting vote for the amendment. These alterations must be ratified by the Faculty. —Adopted 1971
Academic Policies

Students are required to be thoroughly familiar with the policies stated below.

Any exceptions to academic policies are by petition to the Committee on Academic Standing with the understanding that not all exceptions are approved.

Attendance

Williams College does not administer a general system of required classroom attendance. Students are expected to make full use of their educational opportunities by regular class attendance and assume the academic risks incurred by absences.

Instructors may set such standards of attendance as they deem necessary for the satisfactory conduct of their courses.

Students who fail to meet these standards may be warned by the instructor and notice sent to the Dean that continued absence could result in their being dropped from the course. A failing grade will be assigned to any regularly graded course dropped after the designated course change period. Students who do not attend the first-class meeting in a regular semester or Winter Study course may be required to withdraw by the instructor. Attendance is required at announced tests and final examinations unless the student is specifically excused by the instructor or a Dean.

Course Change Period

Course changes may be made during the Drop/Add period at the beginning of each semester. No changes may be made after that period except with the approval of the Committee on Academic Standing, after consultation with the Dean’s Office. During Winter Study, a second Winter Study course may be added if the instructor approves but the original course may not be dropped. A late fee of $5 per day may be assessed for each course change accepted after the announced deadline.

Year-Long Courses

Year-long courses are designated by an odd number and an even number joined by a hyphen; the work of the two semesters constitutes an integral, indivisible course. Therefore, if a student does not pass the second half of a year-long course, they forfeit credit for the first half and incur a deficiency as a result of the forfeiture. Students who register for a year course are required to do both semesters of that course within the same academic year.

Grading System
Williams uses the following system of grades: A = excellent; B = good; C = fair; D = passing; E = failing. These letters, with plus and minus value, have the following numerical equivalents in calculating grade averages:

- A+ = 4.33
- A = 4.00
- A- = 3.67
- B+ = 3.33
- B = 3.00
- B- = 2.67
- C+ = 2.33
- C = 2.00
- C- = 1.67
- D+ = 1.33
- D = 1.00
- D- = 0.67
- E = 0 results in a course deficiency

A student receives credit for a course by obtaining a grade of at least D-.

First-Year Student Unsatisfactory Grade Notifications

In the middle of each semester, instructors report to the Registrar those first-year students whose grades at that time are unsatisfactory. The students and their academic advisors receive these notices as a matter of routine.

Eligibility for and Completion of Majors

To be eligible for any major, students must have received grades of C-or better in each course in the major taken in the first two years of college and Pass on any Winter Study Project taken in the major department or program. A senior may enter a major only upon the approval of the department chair and the Committee on Academic Standing.

All semester courses in the major must be taken on an A-E graded basis, unless a course is the first in the major; in that case, it can be taken pass-fail. In rare instances, and only with the permission of the relevant chair, students may be allowed to count a second pass-fail course for the major. In addition to passing each major course and, where required, a major Winter Study Project, the student must maintain an average in the major of 1.67 or higher. Seniors who have an average below 1.67 in the major field normally will not be allowed to continue. A senior who receives a grade of E in the first semester of a required major course may be dropped from the College at mid-year. A student who falls below these standards may continue in the major only with the approval of the Committee on Academic Standing.

A senior major exercise is not required by every department but is by some. All departments requiring such an exercise specify it as such in the description of their major programs, and all students in those departments must complete the exercise satisfactorily.
Early Concentration Rule

During the first two years of study, students are limited in the number of courses they may take in one department or subject each semester as follows:

- First-year students may take no more than one course with the same course prefix, nor more than two in one department, in a semester.
- Sophomores may take no more than two courses with the same course prefix, nor more than three in one department, in a semester.
- Sophomores may take no more than three courses with the same course prefix, nor more than four in one department, during the full year.
- A student may take no more than a total of five courses with the same course prefix, nor more than eight in one department, during the first two years.

Any exception to the above early concentration rule may be requested by a petition to the Committee on Academic Standing (CAS) filed at the time of registration.

Course Load

Students are required to complete four courses each semester.

Approved Reduced Course Load

If a student with a disability believes that they are unable to pursue a full course of study, the student may petition the Disabilities and Accommodations Advisory Committee for permission to pursue a reduced course load. Such a petition must be accompanied by a professional evaluation that addresses the student’s inability to maintain a full course of study and discusses the rationale for a reduced course load. Upon consideration of a student’s petition and supporting documentation, the Disabilities and Accommodations Advisory Committee makes a recommendation to the Committee on Academic Standing, which renders decisions. Such cases are considered on an individual basis and may be initiated at any time during the student’s tenure at Williams.

A reduced course load permits students with documented need based on a disability to take three rather than four courses each semester. Students approved for a reduced course load must still complete all academic requirements of the college (including passing 32 courses, completing a major, and completing all of the distribution requirements) in order to graduate.

Academic rules of the college as they apply to students on approved reduced (three) course load:

- Minimum academic standards for an upperclass student on a reduced course load are three grades of C- or better, OR two grades of C- or better and a Pass each semester, and at least Perfunctory Pass on the Winter Study Project. The minimum academic standards for a first-year student on a reduced course load are two grades of C- or better and no failures each semester, and at least Perfunctory Pass on the Winter Study Project. The Committee on Academic Standing may require a student to withdraw from
the college for a period of time for failure to meet these minimum standards.

- Students may take a fourth course as an extra course. This course may be taken pass/fail or for a grade, and will count toward the 32 course requirement.
- Students on a reduced course load should confer with the Associate Registrar and with Dr. Wallace, Director of Accessible Education, at least once each year to make plans for completing the degree. Since the student will complete fewer than 32 Williams courses in eight semesters, the student will need to either take summer courses elsewhere or take additional semesters at Williams in order to complete their graduation requirements. Note, however, that only Williams courses can be used for completing distribution requirements.
- If a student wishes to take summer courses elsewhere, they must be pre-approved by the Associate Registrar and must be taken at an accredited four-year institution and be in a field appropriate to the liberal arts.
- If a student wishes to take courses elsewhere that count towards the requirements of their major, those courses will need to be approved by the chair in their major department or program.
- If a student receives financial aid, that aid can be extended if the reduced course load requires additional semesters to complete 32 courses.
- The college requires all students to take a full course load. This means that students on a reduced course load must be enrolled in a minimum of three courses each semester. Students who come to the end of a semester having completed 30 or 31 courses, and choose to complete those remaining courses by petitioning to take an additional semester at Williams will be expected to be enrolled in three courses that final semester.
- As is the case for all students, students are permitted to withdraw from one course in the first year and one additional course during the remaining semesters at Williams, so long as the requirements for withdrawing from a course are met. If the student withdraws from a course, the deficiency must be made up in either the following summer or the next semester.
- Students on reduced course load who plan to study away should be sure to let both Dr. Wallace and the study away advisor know of their intention to take a reduced course load while away. Many study away programs permit students to take a three course load if they have been approved for that load by their home institution, but some programs are fully integrated such that taking only three courses is not possible without disrupting the academic integrity of the program.
- If a student is approved for a reduced course load without a specific ending date, Dr. Wallace will review the necessity of continuing on reduced load at the beginning of each term. He may contact the student to request updated academic or medical information if needed to determine the appropriateness of continuing the reduced course load accommodation.

**Pass/Fail Option**

Students may take up to 3 courses on a pass/fail basis (but no more than one in any given semester). Students may designate a course pass/fail at any point after drop/add up to the
tenth week of the semester. Once a course has been designated pass/fail, however, this
designation cannot be changed. Students must achieve a minimum grade of D- in a pass/fail
course to receive a “P”. An “F” in a pass/fail course will be recorded as an “E” on students’
records and will count toward the GPA, but a “P” will not.

Courses taken pass/fail cannot subsequently be used to fulfill distributional requirements
(divisional, WI, DPE, QFR). No course counting toward a major, certificate, or concentration
can be taken pass/fail unless this course is the first one taken toward that credential. (In rare
circumstances, chairs of programs or departments may grant exceptions to this rule.)

Students may designate a fifth course as one of their pass/fail options, similarly by the tenth
week of the semester. Courses taken pass/fail as part of a four-course load or as a fifth course
to make up a course deficiency will count toward graduation; courses taken pass/fail as an
extra course will not count toward graduation.

By default, any course is available for students to enroll on a graded or pass/fail basis.
Instructors have the option of designating any of their courses not eligible for the pass/fail
option.

Fifth Course Option

Except in the case of the unbalanced course program described above, a student may, by the
end of drop/add, enroll in a fifth course that must be designated as an extra graded course. An
extra course may be dropped any time up to the sixth week of the semester. If a student
chooses to continue in the course and the course is available for the pass/fail option, they
must decide by the tenth week whether to complete the course on an A-E graded basis or
change the course to pass/fail. An extra course graded “Pass” may not be used to fulfill
distribution or major, concentration, or certificate requirements (under rare circumstances, the
chair of the relevant program or department may grant an exception to this rule) or to
accelerate graduation, but may be used to make up a deficiency from a prior semester as one
of the 32 semester courses required to complete the degree. An extra course completed as a
fifth A-E graded course may be used to fulfill distribution or major, concentration, or certificate
requirements or to make up a deficiency incurred in a prior term, but not to accelerate
graduation. The grade received will be included in the calculation of the student’s cumulative
grade-point average.

By default, any course (except a tutorial) is available for students to enroll as a Fifth Course.
Instructors have the option of designating any of their courses not eligible for the fifth course
option.

Withdrawing from a Course

First-year and first-semester transfer students may be permitted to withdraw from one course
(incurring a deficiency but no grade penalty) as late as the tenth week of the semester.
Upperclass students also may withdraw from a course under the same conditions once in
subsequent years. A withdrawal, recorded on the transcript as a “W,” is granted only with the
approval of the instructor and a dean and only if there is complete agreement between the
instructor and the dean that, despite conscientious effort to do the work, continuation in the
course would be detrimental to the overall educational interest or health of the student. The
deficiency thereby incurred must be removed in the normal manner.

Deadlines for Coursework

Deadlines for coursework are set by the instructor with the following limitations:

- for courses with final exams, the latest that written work may be due is 5:00 pm on the
  last day of reading period.
- for courses without final exams, the latest that written work may be due is 5:00 pm on
  the third-to-last day of the exam period.
- If work is due before these deadlines, the instructor may grant an extension up to these
deadlines solely at their discretion. Short extensions beyond these deadlines may be
  granted by a dean but only with the concurrence of the instructor. No extensions will be
  granted beyond the examination period except in the case of serious illness.
- Instructors may require students who have missed announced quizzes or hour tests to
  present satisfactory explanations to a dean before they are permitted to make up the
  exercises.
- If a student is absent from a final examination, a make-up examination may be given
  only with the permission of a dean and at a time determined by the dean.

Failing a Course and Deficiencies

When a student falls behind in course credits because of a failure or course withdrawal, they
have a deficiency. Deficiencies can be made up only by courses taken after the deficiencies
have been incurred. Thus, for example, Advanced Placement credits may not be used to make
up deficiencies.

A deficiency incurred in the fall term must be made up before the start of the following
academic year. A deficiency incurred in the spring semester must be made up prior to the start
of the following spring semester. A student may, in consultation with the Dean’s Office, petition
the Committee on Academic Standing with an alternate plan.

A student must make up a deficiency in one of these ways:

- obtain a grade of at least C- in a summer school course, approved in advance by the
  Registrar, at a regionally accredited four-year college or university; (the grade will not,
  however, be included in the calculation of the student’s cumulative grade point average)
- pass an extra course, either on a pass/fail or on an A-E graded basis, at Williams in the
  semester following the withdrawal or failure.
- in the case of a first-semester failure of a year-long course, obtain a grade of at least a
  C- in the work of the second semester of that course. The failure for the first semester
  will, however, remain on the student’s record and will be included in the cumulative
  grade point average. If a failure occurs in the second semester of a full-year course,
credit for passing the first semester may be retained only upon the recommendation of
the department concerned and with the approval of the Committee on Academic
Standing.

A senior who incurs a failure in the first semester in a required major course may be dropped
from the College at midyear.

Separation for Low Scholarship

It is the policy of Williams College not to permit a student to remain in residence after it has
become evident that they are either unable or unwilling to maintain reasonable standards of
academic achievement. At the end of each term, the Committee on Academic Standing
reviews all academic records that fail to meet the following minimum academic requirements:

- For first-year students: Three grades of C- or better and no failures each semester, and
  at least Perfunctory Pass on the Winter Study Project
- For upper-class students: Four grades of C- or better, OR three grades of C- or better
  and a Pass each semester, and at least Perfunctory Pass on the Winter Study Project

Students whose records fail to meet these minimum academic requirements or whose records
otherwise fail to show adequate progress may be required to resign.

Students who are required to resign from the College for academic reasons are normally not
permitted to return for at least one year from the date of their resignation. A student who has
been required to resign from the College may petition the Committee on Academic Standing
through the Office of the Dean of the College for reinstatement. That petition must include (1)
evidence that the student has made up all course deficiencies, (2) a letter to the Committee
providing convincing evidence that the student is ready and able to complete work toward a
degree at Williams.

Students who are required to resign due to failure to meet minimum academic requirements
can appeal that decision by making a personal statement to the Committee on Academic
Standing (in person, in writing, or via Skype/conference call). The CAS decision upon appeal
is final.

When required to resign, students must vacate their rooms promptly. Financial aid students
must also see the Director of Financial Aid before leaving to discuss loan repayment and
renewal of aid in the event of readmission.

Students are expected to vacate their rooms, including belongings, upon withdrawal
from the College and follow all housing deadlines for departure.

Withdrawal from the College in Good Standing

Students may request personal leaves of absence from a dean and, if granted, withdraw from
the College. Such time away, often as a period of reassessment and self evaluation, can prove
to be beneficial educationally. A withdrawal in good standing may be granted for not less than
one semester and not more than three years. Students who withdraw in good standing are readmitted with the approval of the Dean’s Office and are expected to complete the degree without further interruption.

Students may request permission from a dean to withdraw at any time. If a student is granted a personal leave of absence after the semester begins, but before the end of the drop/add period, the transcript will list the date of withdrawal as the day before the term began. If a personal leave is granted after the end of the drop/add period, but before the end of the eighth week of the semester, the transcript will list the date of withdrawal, but the semester will not count toward the maximum of eight allowed to complete the degree. If a personal withdrawal is allowed after the eighth week of the semester, the transcript will list the date of withdrawal and the courses in progress, each with a W; the semester will normally count toward the maximum of eight allowed to complete the degree and the student will incur deficiencies that must be made up before returning to the College.

Refunds

Payment refund or credit in the event of withdrawal is described in the Williams College Refund Policy.

Eligibility for Extracurricular Activities

A student is eligible to participate in any athletic, dramatic, literary, or musical event and be in the student government, or other organization as a member, substitute, or officer, unless they are declared ineligible:

1) by the Dean;
2) by vote of the Discipline Committee; or
3) by vote of the Committee on Academic Standing because of a dangerously low record.

The Student Honor Committee may recommend to the Dean loss of eligibility as a penalty for a violation of the Honor Code.

Dean’s List

All students who attain a semester average of 3.50 or higher in a program of four or more courses taken on an A-E graded basis are placed on the Dean’s List for that semester. Students with three courses taken on an A-E graded basis and one pass/fail course are not eligible for the Dean’s List.

Phi Beta Kappa Society

Students of the highest academic standing are eligible for election to membership in the Phi Beta Kappa Society in accordance with the following rules:
1) The requirements for election to membership shall be a grade point average of 3.3 and Honors or Pass in all required Winter Study Projects. There shall be two elections of new members for each class, at the end of the junior and senior years.

2) At the end of the junior year, all students in the highest five percent of the class, ranked by cumulative grade point average, shall be eligible for election provided they have met the requirements and have completed enough courses to be considered candidates for the B.A. degree in the following year. A student who leaves Williams at the end of the junior year to attend graduate school may be elected under the above procedures.

At the end of the senior year, all students not yet elected and in the highest 12.5 per cent of the class, ranked by cumulative grade point average, shall be eligible for election provided they have met the requirements.

3) Students shall be eligible for election only if they have been students at Williams College for at least two years.

4) Honorary members may be elected from distinguished alumni of at least twenty years’ standing. No more than one such member shall be elected each year.

5) Any student who shall have gained their rank by unfair means or who in the judgment of the Dean of the College is not of good moral character is ineligible to election.

6) The name of a member elect shall be entered on the roll only after they have accepted the election and has paid to the Treasurer the regular entrance fee.

7) Any undergraduate member who withdraws from the College before graduation or who falls short of the minimum Phi Beta Kappa scholastic standing may, upon a two-thirds vote of the members present at the annual meeting, be deprived of membership in the society.

8) Any undergraduate member who is expelled from the College shall be deprived of membership in the Society.

9) While connected with Williams College as an officer of instruction or administration, any graduate of Williams College who is a member of another chapter of Phi Beta Kappa shall be considered a regular member of the Williams chapter.

10) While connected with Williams College as professor, associate professor or assistant professor, or an officer of administration, any member of another chapter of Phi Beta Kappa shall have all the privileges of the Williams chapter, including holding office and voting. While connected with Williams College, any other officer of instruction or administration who is a member of another chapter shall have all the privileges of the Williams chapter, except holding office and voting.

Awarding of Degrees
By vote of the Trustees, the degree of Bachelor of Arts is conferred at Commencement upon students who have completed the requirements as to courses and grades to the satisfaction of the Faculty. The right to a degree may, however, be forfeited by misconduct at any time prior to the conferring of the degree. No degree in absentia will be conferred except by special vote of the Trustees on petition presented to the Dean. Diplomas will not be authorized for students who have not paid College charges or have not returned all books belonging to the library.

**Graduation with Distinction (Latin Honors)**

The Faculty will recommend to the Trustees that the degree of Bachelor of Arts with distinction (Latin Honors) be conferred upon those members of the graduating class who have passed all Winter Study Projects and obtained a four-year average in the top:

- 35% of the graduating class – Bachelor of Arts cum laude or higher
- 15% of the graduating class – Bachelor of Arts magna cum laude or higher
- 2% of the graduating class – Bachelor of Arts summa cum laude

**Winter Study**

Students must pass a Winter Study course in each of their four years. Winter Study courses are graded Pass, Perfunctory Pass, or Fail. All work must be submitted by the last day of the Winter Study term; work may be accepted after this date only with the permission of a Dean. Students who fail their Winter Study course or receive a second Perfunctory Pass will be placed on academic probation by the Committee on Academic Standing and will be required to make up the deficiency. Students who fail through gross neglect of work will normally be required to resign.

**Student Records**

Williams College has policies regarding the kinds of information that will be included in the permanent record of students as well as policies regarding the retention, safety and security, and disposal of records. Its information-release policies respect the rights of individual privacy, the confidentiality of records, and the best interests of students and the institution.

Williams values the privacy of its students and complies with the Family Educational Rights and Privacy Act (FERPA), which governs access and release of student education records.

The Student Records Disclosure Policy is emailed annually to ensure students are aware of their rights.

1. **A student has the right to inspect and review their education records within 45 days of their request.**

Even though the law allows 45 days, at Williams, requests are normally honored at the time they are submitted. Students should submit their requests to the persons maintaining the records to which they wish access, e.g. the registrar, dean, department chair, or other appropriate officials.
2. A student has the right to request that corrections be made to their education records if they believe the records are inaccurate or misleading or otherwise in violation their privacy rights under FERPA.

Students should address such requests to the official responsible for the record and must clearly identify the parts of the record which they wish amended and why they believe them to be inaccurate or misleading.

If the official responsible for the record does not agree to amend the record as requested, Williams will notify the student of the decision and advise them of the right to a hearing and the procedures for initiating one.

3. A student has the right to consent to disclosures of personally identifiable information contained in their education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is to school officials with legitimate educational interests. For these purposes, a school official is a person employed by Williams in an administrative, supervisory, academic, research, or support staff position, including security and health personnel; a person or company with whom Williams has a contract such as an attorney, auditor, collection agent, or educational researcher; a person serving on the Board of Trustees; or a student serving on an official committee such as the disciplinary committee, or assisting another school official in performing their tasks.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill their responsibility.

Williams also discloses educational records without prior consent upon request from another educational institution in which the student seeks or intends to enroll.

Williams may also disclose to parents and guardians of a student under the age of 21, without the student’s consent, information regarding the student’s violation of any Federal, State, or local law, or any rule or policy of Williams, governing the use or possession of alcohol or a controlled substance.

The law also allows Williams to make public, without prior consent of the student, the final results of the disciplinary proceedings conducted by Williams concerning an allegation of a crime of violence against a student who is an alleged perpetrator of a crime of violence, if the student is found to have violated Williams’ rules or policies with respect to that crime.

In addition, Williams may make public the following student “directory information” unless the student informs the registrar in writing by September 15 that their prior consent be required during that academic year:

- name
- permanent and College addresses
Williams is very conservative in its use of this directory information and releases it outside the college community only when its release is deemed of benefit to students. Generally this information is not publicly available outside the Williams network, with the exception of the directory. The directory lists name, class year, campus address and campus e-mails.

A student may opt to consider directory information confidential and it will be flagged as such in the student’s record. To elect this option, the student must inform the registrar in writing by September 15 that prior consent is required to release directory information, and should contact the Associate Registrar, Mary.L.Morrison@williams.edu, to discuss this request.

4. A student has the right to file a complaint with the U.S. Department of Education concerning alleged failures by Williams to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202–8520

Record Retention

- Records that document the academic progress of matriculated students: This series may include but is not limited to high school and other college transcripts, admission applications, major and concentration declaration forms, independent study petitions, summer school and study away petitions, petitions for exceptions to College academic policies, applications for withdrawal from the College, and transfer admissions to the College. These types of records are retained for five years from last enrollment.
- Records related to grades: Paper/email submissions of grades and grading changes, reports of unsatisfactory grades, pass/fail designations, fifth course options, withdrawal with W grade forms, and audit validation forms are retained for seven years beyond end of pertinent term.
- Official transcript at the time of graduation is a permanent record.
Academic Resources

Academic Resources is a number of services and programs that reside in various locations on campus designed to support students’ academic and intellectual engagement and to help them take full advantage of the curriculum. Our goal and higher purpose is to help students explore and take full advantage of Williams’ educational/intellectual opportunities of living and learning.

“The mission of Academic Resources is to help students go beyond SUCCEEDING at Williams to THRIVING at Williams.”

- Quantitative Skills Program
- Writing Program
- Peer Tutor Program
- Disability Support Services (DSS)

Graduate Study and Professional Careers

Although Williams’ principal function is to provide a broad and solid liberal education that will be of lasting value no matter what vocation a student may pursue, the College recognizes that no fundamental conflict exists between a liberal education and preparation for a professional career, on the contrary, a foundation of liberal studies increases professional competence in any field. A student should plan their program of study to provide as much educational breadth and enrichment as circumstances permit. A student should also give serious consideration to post-college plans early in their college career.

Each departmental major provides the foundation for graduate study in the corresponding field. Students should consult with individual programs for requirements and for special advice regarding preparation for graduate study. Students should also consult with the appropriate faculty advisors as early as possible to make certain they have taken all the necessary factors into consideration.

Visual Arts

Students interested in graduate studies in art or architecture should meet with faculty with whom they have completed advanced work in the areas they wish to pursue. Their counsel can help narrow the search of programs that would best match a student’s needs. The specific requirements of all art and architecture schools offering Master of Arts and/or Master of Fine Arts is available from their online resources.

The College Art Association (CAA) has written:
“Admission to (graduate) programs should be based on the nature, extent, and quality of undergraduate preparation, including courses in studio, art history, and other academic subjects. Quality of studio preparation can best be judged on the basis of careful evaluation of work done at the undergraduate level; therefore, a portfolio review (usually represented by slides) is regarded as an absolute necessity in the admission process.

While many institutions consider the BFA to be the standard qualifying degree, the fact that the applicant has attended a BA- or BS-granting institution does not necessarily rule out acceptance in most MFA programs. Whatever the undergraduate degree, most entering graduate students tend not to be completely prepared in one or more of the areas cited above and will require remedial make-up work…

Some institutions use the MA degree as a qualifying prerequisite for final acceptance into MFA candidacy, allowing the student to apply the earned credits toward the higher degree.”

Students are advised to take into consideration not only current minimum requirements but also recommended courses.

**Business Administration**

Williams offers no special course in preparation for a business career for graduate study in business administration. The qualities which are important to succeed in business, and which graduate business schools are seeking, are an ability to reason and to express oneself logically and clearly in written and oral exposition; a good understanding of the physical and social environment in which business operates; a solid background in quantitative skills; and an appreciation of human motivations and goals. This means that a broad liberal arts program is preferred over a highly specialized one.

Within this broad prescription, it may be desirable to have at least one year of economics and one year of mathematics (including statistics and calculus). For those interested in production management or operation research, additional work in any quantitative course and/or a course in computer science would be helpful.

But there is no particular major at Williams that is designated as preparation for the business profession. Students interested in futures in business are encouraged to undertake a broad educational program in the arts, humanities, and sciences. It is important that one gets involved in extra-curricular activities, one holds a leadership position, and pursuing relevant summer internships is critical.

Students interested in graduate work in business administration should contact the Pre-MBA Advisor, Robin Meyer, at the Career Center.

**Engineering**

Many Williams graduates enjoy productive careers in engineering, applied science, or technical management. Successful engineers need to communicate effectively, reason logically, and understand both the technical and the social dimensions of a problem. A
prospective engineer should major in one of the sciences (usually physics, chemistry, computer science, or mathematics), while pursuing a broad liberal arts education at Williams. Most often a student will complete a Williams B.A. in the usual four years and then go to an engineering school for professional training leading to a master's degree or doctorate in engineering. While it may be necessary to make up a few undergraduate engineering courses, the opportunities at Williams to participate in scientific research and the breadth of a liberal arts education prepare Williams graduates to succeed in engineering graduate study and in their careers.

The Physics Department’s Pre-Engineering site includes a list of Williams courses recommended to prospective engineers, as well as links to further resources.

**Foreign Language**

Particular attention is called to the foreign language requirements of graduate study. Candidates for the degree of doctor of philosophy at many graduate schools are required to have a reading knowledge of both French and German. Under certain circumstances another language may replace French. Many graduate schools require also a knowledge of Latin for students of English and Romantic Languages. Candidates for the master of arts degree are required to have a reading knowledge of either French or German. Students should consult departmental chairs or the faculty advisors for the requirements in specific fields of study.

**Law**

Williams graduates regularly proceed directly to law schools on the strength of their liberal arts education. As a rule, law schools do not require particular pre-law curriculum for undergraduates. Consequently, application and admission to law school is open to qualified students from all academic disciplines. This does not mean, however, that law schools are indifferent to one’s undergraduate academic experience. In fact, law schools will be very conscious of the quality and rigor of one’s undergraduate education. A serious student, considering law school, will heed this advice and undertake a challenging program.

Students intending to study law should consult with the Pre-Law Advisor, Michelle Shaw, at the Career Center. Also, on a regular basis, law schools from around the country visit Williams to provide information and to answer questions from potential applicants.

**Health Professions**

Many Williams graduates elect to pursue a career in medicine, dentistry, veterinary medicine, public health, or other health-related fields. All are welcome to seek guidance from the Health Professions Advisor within the Career Center.

Students interested in medicine and related fields should pursue a broad liberal arts education, letting enthusiasm for subjects be a guide. In most cases, a student should acquire volunteer service and field-specific internship experience in an effort to confirm interest in the chosen field. With careful planning, any major can be studied.
In order to pursue a career in a health-related field, a student must pay particular attention to the courses required for graduate school admission. In certain fields, upwards of twelve courses are listed as prerequisites. The general requirements for many programs are outlined in "Choosing First Year Courses," but each student considering advanced study in health fields should meet with the Health Professions Advisor early in the college career to ensure that planned coursework will satisfy admissions requirements.

Barbara Fuller, the Health Professions Advisor, will be happy to discuss goals and specific steps that might help a student realize them. Detailed information is available at the Health Professions site.

Pre-College and College Teaching/Research

A central qualification for careers in teaching at any level is proficiency in a major. Students interested in college teaching and research should prepare themselves at Williams for graduate work in the subject of their choice. Those interested in teaching at the elementary or secondary level should plan to attain state certification and/or earn an MAT or M.Ed. There are many opportunities to do teaching internships and study education as an undergraduate while at Williams.

Students interested in college teaching should consult with the chairs of the departments in which they intend to major. Those interested in teaching at the elementary and secondary level should refer to the Williams Program in Teaching site. Additional advice for both of these options is also available at the Career Center.

Teaching After Williams

There are many options for teaching after Williams, including independent and public school teaching. Many states now offer streamlined programs to certify public school teachers, and many states offer a wide range of options for acquiring certification while you teach.

Students interested in teaching may want to consider participating in the Williams Program in Teaching which is designed to enable undergraduates to study the ideas, questions, and practices involved in good teaching at all levels. The program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study. Students should contact Susan Engel, the Director of the Program, to find out how they might participate.

Students who want career advice should contact the Career Center which has a very active on-campus educational recruiting program that includes many private schools as well as Teach for America and similar programs. The program begins in the fall and continues through the spring. Students interested in teaching at independent elementary- or secondary-level schools or participating in the Teach for America or similar programs directly after graduation from Williams (certification is not required) should consult with the Career Center.

Religious Study
There is no particular path through the Williams curriculum designed or recommended for students intending to prepare for a career as a religious professional, enroll in a seminary, or pursue theological education. Undergraduate study in many fields within the liberal arts curriculum can be useful to the prospective minister, priest, rabbi, imam, or teacher of religion.

Students contemplating advanced academic work in religious studies in preparation for an academic career in teaching or scholarship should give serious consideration to concentrated undergraduate study in the field, in consultation with faculty advisors in the Religion Department.

Students with vocational interests that may include ordination or certification as a religious professional in a field such as chaplaincy, religious education, service to a congregation, faith-based humanitarian work or some other form of ministry are urged to make themselves known to one of the chaplains (or, where appropriate, one of the local clergy) as soon as these interests begin to come into focus. Ordination requirements vary widely depending on the particular religious community or tradition; in some cases, it may be possible to make progress on certain credentials in academic study or field experience during the college years. Many divinity schools and theological seminaries expect and welcome students whose understanding of “ministry” or sense of call is very much still in formation. A basic foundation in the study of religion is certainly helpful—sacred texts, scriptural languages, history, philosophy, phenomenology and comparative studies, etc. But undergraduate study in other disciplines—music and the arts, political science and economics, anthropology, psychology and sociology—may also enhance preparations at the graduate level for future service to communities of faith.
Administration

catalog.williams.edu/administration

Senior Staff

Collette Chilton
Chief Investment Officer

Keli Gail
Assistant to the President and Secretary of the College

Leticia S. E. Haynes
Vice President for Institutional Diversity and Equity

Stephen Klass
Vice President for Campus Life

David Love
Provost, Professor of Economics

Maud S. Mandel
President and Professor of History, Program in Jewish Studies

Megan Morey
Vice President for College Relations

Lee Park
Interim Dean of the Faculty, William R. Kenan, Jr. Professor of Chemistry

Frederick W. Puddester
Vice President for Finance and Administration and Treasurer

Jim Reische
Chief Communications Officer

Marlene Sandstrom
Dean of the College, Hales Professor of Psychology
The Williams Directory can provide additional information about faculty.

Leave information is noted.

Daniel P. Aalberts, Professor of Physics, 1989, B.S., MA Institution of Technology, 1994, Ph.D., MA Institution of Technology

Tomas F. Adalsteinsson, Assistant Professor of Physical Education and Head Women’s Golf Coach

Colin C. Adams, Thomas T. Read Professor of Mathematics, 1978, B.S., MA Institution of Technology, 1983, Ph.D., University of WI, Madison

Baktygul A. Aliev, Assistant Professor of Russian, 2000, B.A., American University of Central Asia, 2007, M.A., McGill University, 2014, Ph.D., McGill University

Kristopher D. Allen, Lyell B. Clay Artist in Residence in Jazz Activities/Lecturer in Music, Director of the Jazz Ensemble, 1998, B.M., University of Hartford, 2004, M.M., State University of NY, Purchase

Sarah M. Allen, Associate Professor of Comparative Literature, 1992, A.B., Harvard University, 1996, M.A., University of MI, 2003, Ph.D., Harvard University

Alex A. Apotsos, Lecturer in Geosciences, 1999, B.S., Duke University, 2007, Ph.D., MA Institution of Technology

Michelle M. Apotsos, Assistant Professor of Art, 1999, B.A., University of NC, Chapel Hill, 2006, M.A., Tufts University, 2013, Ph.D., Stanford University

Kevin M. App, Assistant Professor of Physical Education and Head Men’s Basketball Coach, 2007, B.S., Cornell University

Zakary D. Arctander, Visiting Assistant Professor of Art, 2010, B.F.A., University of IL, 2015, M.F.A., Yale University
Henry W. Art, Interim Chair of CES and the Environmental Studies Program, Rosenburg Professor of Environmental Studies and Biology, Emeritus, 1966, B.A., Dartmouth College, 1969, M.Phil., Yale University, 1971, Ph.D., Yale University

Sonya K. Auer, Visiting Assistant Professor of Biology, 2001, B.A., Prescott College, 2011, Ph.D., University of CA, Riverside

Duane A. Bailey, Professor of Computer Science, 1982, B.A., Amherst College, 1984, M.S., University of MA, Amherst, 1988, Ph.D., University of MA, Amherst

Jon M. Bakija, Professor of Economics, 1990, B.A., Wesleyan University, 1995, M.A., University of MI, 2000, Ph.D., University of MI

Lois M. Banta, Professor of Biology, 1983, B.A., Johns Hopkins University, 1990, Ph.D., CA Institution of Technology, on leave Fall 2018

Daniel W. Barowy, Assistant Professor of Computer Science, 2010, B.S., Boston University, 2013, M.S., Boston University, 2017, Ph.D., University of MA, Amherst

Alix H. Barrale, Assistant Professor of Physical Education and Head Field Hockey Coach, 1993, B.A., Williams College, 1996, M.S., Smith College

William Barrale, Assistant Professor of Physical Education, Head Baseball Coach, 1994, B.S., Northeastern University, 2004, M.A., Rowan University

Andrea Barrett, Senior Lecturer in English, 1974, B.S., Union College

Ethan M. Barron, Assistant Professor of Physical Education, Head Men's Track & Field Coach, 2001, B.A., Tufts University, 2005, M.Ed., Middlebury College

Melissa J. Barry, Professor of Philosophy, 1988, B.A., Wheaton College, 1998, Ph.D., University of Notre Dame, on leave Fall 2018

Ronald D. Bassar, Assistant Professor of Biology, 2001, B.A., Prescott College, 2011, Ph.D., University of CA, Riverside

Henry H. Benedict III, Lecturer in Art, 1973, B.A., Yale University, 1976, M.Arch., Yale University
Mary K. Bercaw Edwards, Visiting Associate Professor at Williams-Mystic, 1979, B.A., Northeastern University, 1981, M.A., Northeastern University, 1984, Ph.D., Northeastern University

Amanda N. Bergold, Visiting Assistant Professor of Psychology, 2009, B.A., Williams College, 2017, Ph.D., City University of NY

Magnus T. Bernhardsson, Chair of Arabic Studies, Brown Professor of History and Faculty Affiliate in Leadership Studies and Religion, 1990, B.A., University of Iceland, 1992, M.A., Yale University, 1999, Ph.D., Yale University

Maria T. Binnie, Assistant Professor of Art, 2005, B.A., Northwestern University, 2011, M.A., University of TX, Austin, 2017, Ph.D., University of TX, Austin

Julie C. Blackwood, Assistant Professor of Mathematics, 2010, Ph.D., University of CA, Davis

James Abellera Blair, Assistant Professor of Chemistry, 2002, B.A., Carleton College, 2008, Ph.D., University of CA, Berkeley

Roxana A. Blancas Curiel, Mellon Postdoctoral Fellow in Mexican Literature and Cultural Production, 2016, Ph.D., University of CA, Riverside

Jacek H. Blaszkiewicz, Visiting Assistant Professor of Musicology, Spring 2019

Mary Jennifer Bloxam, Herbert H Lehman Professor of Music, 1979, B.M., University of IL, 1982, M.A., Yale University, 1987, Ph.D., Yale University

Christopher A. Bolton, Professor of Comparative and Japanese Literature, 1989, B.A., Harvard University, 1998, Ph.D., Stanford University, on leave Fall 2018

Alice C. Bradley, Assistant Professor of Geosciences, 2011, B.E., Dartmouth College, 2014, M.S., University of CO, 2016, Ph.D., University of CO

Rashida K. Braggs, Associate Professor of Africana Studies and Faculty Affiliate in Comparative Literature and American Studies, 1998, B.A., Yale University, 2000, M.S., Boston College, 2006, Ph.D., Northwestern University, on leave 2018-2019

Janis E. Bravo, Institutionructor in Biology, 1980, B.S., Cornell University, 1990, Ph.D., Rutgers University
Theresa M. Brock, Visiting Assistant Professor of French, 2011, B.A., University of DE, 2013, M.A., PA State University, 2017, Ph.D., PA State University

Victoria J. Brooks, Visiting Lecturer in the Graduate Program in Art History, 2001, B.A., University of Bristol, 2006, M.A., Royal College of Art

Deborah A. Brothers, Costume Director and Lecturer in Theatre, 1976, B.F.A., University of New Orleans, 1979, M.F.A., CA Institution of the Arts

Julia Bryan-Wilson, Robert Sterling Clark Visiting Professor of Art History

Sandra L. Burton, Lipp Family Director of Dance and Senior Lecturer in Dance, 1983, B.A., City College of NY, 1987, M.F.A., Bennington College

Andrew T. Bydlon, Visiting Assistant Professor of Mathematics, 2012, B.S., PA State University, 2017, Ph.D., University of UT

Xizhen Cai, Assistant Professor of Statistics, 2014, Ph.D., PA State University

Corinna S. Campbell, Assistant Professor of Music, 2003, B.M., Northwestern University, 2005, M.M., Bowling Green State University, 2012, Ph.D., Harvard University

Gerard Caprio Jr., Chair of the Executive Committee for the Center of Development Economics and William Brough Professor of Economics, 1972, B.A., Williams College, 1974, M.A., University of MI, 1976, Ph.D., University of MI

Nicholas G. Carr, Richmond Visiting Professor, Spring 2019

Anthony J. Carrasquillo, Assistant Professor of Chemistry, 2007, B.A., Bowdoin College, 2015, Ph.D., MA Institution of Technology

Matthew E. Carter, Assistant Professor of Biology, 2000, B.A., Whitman College, 2010, Ph.D., Stanford University

Gregory P. Casey, Assistant Professor of Economics, 2018, Ph.D., Brown University

Julie A. Cassiday, Willcox B. and Harriet M. Adsit Professor of Russian, 1986, B.A., Grinnell
David N. Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies, 1985, B.A., Wesleyan University, 1994, Ph.D., Indiana University, Fall 2018

Anik A. Cepeda, Assistant Professor of Physical Education and Head Coach of Women’s Tennis, 2013, B.A., College of William and Mary

Maria Elena Cepeda, Professor of Latina/o Studies, 1995, B.A., Kenyon College, 1997, M.A., University of MI, 2003, Ph.D., University of MI

G. Donald Chandler, George R. Goethals Distinguished Visiting Professor of Leadership Studies, 1972, B.A., Williams College, 1978, M.B.A., Harvard University, Fall 2018

Cecilia Chang, Frederick Latimer Wells Professor of Chinese, 1981, B.A., Fu-Jen University, 1987, M.A., University of CA, LA, 2004, Ph.D., University of MA, Amherst

Jinhwa Chang, Visiting Lecturer in Japanese, 1994, B.A., Kyungpook National University

Matthew C. Chao, Assistant Professor of Economics, 2006, B.A., Dartmouth College, 2015, Ph.D., CA Institution of Technology, on leave 2018-2019

Jessica M. Chapman, Associate Professor of History, 1999, B.A., Valparaiso University, 2001, M.A., University of CA, Santa Barbara, 2006, Ph.D., University of CA, Santa Barbara

C. Ondine L. Chavoya, Professor of Art, 1992, B.A., University of CA, Santa Cruz, 1996, M.A., University of Rochester, 2002, Ph.D., University of Rochester, on leave Spring 2019

Melinda Y. Chen, Robert Sterling Clark Visiting Professor of Art History

Pei-Wen Chen, Assistant Professor of Biology, 2001, B.S., National Yang-Ming University, 2003, M.S., Albert Einstein Institute of College Medicine, 2008, Ph.D., Albert Einstein Institute of College Medicine

Jennifer E. Chuks, Assistant Professor of Physical Education and Assistant Athletic Director/Student Athlete Services, 2006, B.A., University of Hartford, 2009, M.B.A., University of New Haven

Jason A. Cieply, Visiting Lecturer in Russian, 2016, Ph.D., Stanford University

Allana M. Clarke, Visiting Lecturer in Art, 2014, M.F.A., Maryland Institution College of Art
Matthew M. Clasen, Visiting Assistant Professor of Psychology, 2014, B.S., James Madison University, 2018, Ph.D., American University

Cassandra J. Cleghorn, Chair and Senior Lecturer in American Studies and English, 1983, B.A., University of CA, Santa Cruz, 1988, M.A., Yale University, 1995, Ph.D., Yale University

Phoebe A. Cohen, Associate Professor of Geosciences, 2002, B.A., Cornell University, 2010, Ph.D., Harvard University

Jeremy D. Cone, Assistant Professor of Psychology, 2012, Ph.D., Cornell University, on leave 2018-2019

José A. Constantine, Assistant Professor of Geosciences, 1999, B.S., College of William and Mary, 2002, M.S., University of CA, Davis, 2008, Ph.D., University of CA, Santa Barbara

Mea S. Cook, Chair and Associate Professor of Geosciences, 1999, B.A., Princeton University, 2006, Ph.D., MA Institution of Technology

Andrew R. Cornell, Visiting Assistant Professor of American Studies, 2000, B.A., University of MI, 2011, Ph.D., NY University

Ronadh Cox, Edward Brust Professor of Geology and Mineralogy, 1985, B.S., University College Dublin, 1993, Ph.D., Stanford University, on leave 2018-2019

George T. Crane, Chair of Asian Studies and W. Van Alan Clark ’41 Third Century Professor in the Social Sciences, 1979, B.A., State University of NY, Purchase, 1981, M.A., University of WI, Madison, 1986, Ph.D., University of WI, Madison

Joseph L. Cruz, Professor of Philosophy, 1991, B.A., Williams College, 1999, Ph.D., University of AZ, on leave Fall 2018

Derek Dean, Lecturer in Biology, 1994, B.A., Oberlin College, 2004, Ph.D., Cornell University

Howard Dean, Bennett Boskey Distinguished Visiting Professor of Leadership Studies, Spring 2019

Marek Demianski, Visiting Professor of Astronomy, 1962, B.A., University of Warsaw, 1966, Ph.D., University of Warsaw

Nicole S. Desrosiers, Lecturer in Romance Languages, 1973, M.A., University of MA, Amherst, 1980, Ph.D., University of MA, Amherst

Phoebe G. Donnelly, Stanley Kaplan Visiting Postdoctoral Fellow in the Department of Political Science and Leadership Studies Program, 2008, B.A., University of WI, Madison, 2013, M.A., Fletcher School of Law and Diplomacy, 2018, Ph.D., Fletcher School of Law and Diplomacy

Georges B. Dreyfus, Jackson Professor of Religion, 1969, B.A., La Chaux-de-Fonds, 1987, M.A., University of VA, 1991, Ph.D., University of VA

Helga Druxes, Chair of German and Russian and Professor of German, 1982, B.A., Westfalische Wilhelms-University, 1985, M.A., Brown University, 1987, Ph.D., Brown University

Susan Dunn, Massachusetts Professor of Humanities, 1966, B.A., Smith College, 1973, Ph.D., Harvard University

Hali J. Edison, Visiting Professor, Center for Development Economics, Fall 2018

David B. Edwards, James N. Lambert '39 Professor of Anthropology, 1975, B.A., Princeton University, 1979, M.A., University of MI, 1986, Ph.D., University of MI

Frances C. Edwards, Senior Lecturer in Art, 1975, B.A., Princeton University, 1981, M.A., University of MI, 1990, Ph.D., NY University Institution of Fine Arts, on leave Spring 2019
Joan Edwards, Samuel Fessenden Clarke Professor of Biology, 1971, B.A., University of MI, 1972, M.S., University of MI, 1978, Ph.D., University of MI, on leave 2018-2019

Radwa M. el Barouni, Visiting Lecturer in Arabic Studies, 1999, B.A., Alexandria University, 2016, M.A., University of TX, Austin

Brahim B. El Guabli, Assistant Professor of Arabic Studies, 2005, B.A., University of Bordeaux, 2016, Ph.D., Princeton University

Susan L. Engel, Senior Lecturer in Psychology, 1980, B.A., Sarah Lawrence College, 1985, Ph.D., City University of NY

Laura D. Ephraim, Associate Professor of Political Science, 2000, B.A., Pomona College, 2010, Ph.D., Northwestern University

Amal Eqeiq, Assistant Professor of Comparative Literature, 1997, B.A., Hebrew University-Jerusalem, 2006, M.A., University of OR, 2013, Ph.D., University of WA

Peter K. Farwell, Assistant Professor of Physical Education, Head Cross Country Coach, and Assistant Coach Men’s and Women’s Track, 1973, B.A., Williams College, 1990, M.A., Central MI University

Steven Fein, Chair and Professor of Psychology, 1986, A.B., Princeton University, 1991, Ph.D., University of MI

Ronald L. Feldman, Artist in Residence in Orchestral and Institutionrumental Activities/Lecturer in Music, Director of the Berkshire Symphony, 1971, B.M., Boston University

Kevin M. Flaherty, Lecturer in Astronomy and Observatory Supervisor, 2005, B.S., University of Rochester, 2011, Ph.D., University of AZ

Antonia E. Foias, Chair and Professor of Anthropology, 1987, B.A., Harvard University, 1996, Ph.D., Vanderbilt University

VaNatta S. Ford, Assistant Professor of Africana Studies, 2000, B.S., IL State University, 2005, M.Div., Howard University, 2011, Ph.D., Howard University, on leave 2018-2019

Michael Fortunato, Visiting Professor of Economics, 1976, A.B., Columbia University, 1982, M.A., Harvard University, 1984, Ph.D., Harvard University, Spring 2019
Soledad Fox, Professor of Spanish and Comparative Literature, 1990, B.A., Sarah Lawrence College, 1997, M.A., City University of NY, 2001, Ph.D., City University of NY

Jennifer L. French, Chair of Romance Languages and Professor of Spanish, 1995, B.A., College of William and Mary, 1997, M.A., Rutgers University, 2001, Ph.D., Rutgers University

Stephen N. Freund, Professor of Computer Science, 1995, B.S., Stanford University, 1998, M.S., Stanford University, 2000, Ph.D., Stanford University

Thomas A. Garrity, Webster Atwell Class of 1921 Professor of Mathematics, 1981, B.S., University of TX, Austin, 1986, Ph.D., Brown University

Prisca Gayles, Gaius Charles Bolin Fellow in Africana Studies, 2010, B.A., University of PA, 2013, M.A., University of South FL

Matthew D. Gibson, Assistant Professor of Economics, 2005, A.B., Harvard University, 2015, Ph.D., University of CA, San Diego, on leave 2018-2019

Lisa A. Gilbert, Associate Professor of Geosciences and Marine Sciences at Williams-Mystic, 1997, A.B., Dartmouth College, 1999, M.S., University of WA, 2004, Ph.D., University of WA

Meghan K. Gillis, Assistant Professor of Physical Education and Head Coach of Women’s Ice Hockey, 2007, B.A., Bowdoin College, 2009, M.S., University of MA, Amherst

Aracelis Girmay, Margaret Bundy Scott Professor of English, Spring 2019

Michael A. Glier, Alexander Falck Class of 1899 Professor of Art, 1976, B.A., Williams College, 1977, M.A., Hunter College, City University of NY

Susan Godlonton, Assistant Professor of Economics, 2003, B.A., University of CapeTown, 2007, M.A., University of CapeTown, 2013, Ph.D., University of MI, on leave Fall 2018

Christopher Goh, Associate Professor of Chemistry, 1989, B.S., University of Durham, 1996, Ph.D., Harvard University, on leave Spring 2019
Sarah L. Goh, Professor of Chemistry, 1996, B.S., University of MI, 1998, M.S., University of MA, Amherst, 2004, Ph.D., University of CA, Berkeley, on leave Spring 2019

Matthew A. Gold, Artist in Residence in Percussion and Contemporary Music Performance, 1994, B.M., Northwestern University, 2016, M.M., Rice University

Leo I. Goldmakher, Assistant Professor of Mathematics, 2004, B.A., Princeton University, 2009, Ph.D., University of MI

Barry Goldstein, Visiting Professor of Humanities, 1973, B.S., Union College, 1976, M.S., University of Rochester, 1982, Ph.D., University of Rochester, Fall 2018

Edward Gollin, Chair and Professor of Music, 1992, B.S., MA Institution of Technology, 1995, M.A., Queens College, 2000, Ph.D., Harvard University

Marc Gotlieb, Director of the Graduate Program in Art History and Class of 1955 Memorial Professor of Art, 1980, B.A., University of Toronto, 1984, M.A., Johns Hopkins University, 1990, Ph.D., Johns Hopkins University

Kai M. Green, Assistant Professor of Women’s, Gender and Sexuality Studies, 2007, B.A., Williams College, 2011, M.A., University of Southern CA, 2014, Ph.D., University of Southern CA

Daniel R. Greenberg, Assistant Professor of Physical Education and Head Coach of Men’s Tennis, 2008, B.A., Williams College, 2013, M.Ed., MA College of Liberal Arts

David E. Gurcay-Morris, Associate Professor of Theatre, 1996, B.A., Williams College, 2001, M.F.A., University of WA

Catherine R. Hall, Associate Professor at Williams-Mystic, 1985, B.A., University of RI, 1989, J.D., Vermont Law School

Amie A. Hane, Professor of Psychology, 1996, B.A., University of MD, 1999, M.A., University of MD, 2002, Ph.D., University of MD

Nicole T. Harrington, Visiting Assistant Professor of Psychology, 1987, B.A., Boston College, 1995, Ph.D., University of VT

Pamela E. Harris, Assistant Professor of Mathematics, 2005, B.S., Marquette University, 2008, M.S., University of WI, Milwaukee, 2012, Ph.D., University of WI, Milwaukee

Ilana Y. Harris-Babou, Visiting Lecturer in Art, 2013, B.A., Yale University, 2016, M.F.A., Columbia University
Kathryn M. Hart, Assistant Professor of Chemistry, 2004, B.S., Haverford College, 2013, Ph.D., University of CA, Berkeley

Man He, Assistant Professor of Chinese, 2000, B.A., Renmin University, 2009, M.A., Ohio State University, 2015, Ph.D., Ohio State University, on leave 2018-2019

Laurie Heatherington, Edward Dorr Griffin Professor of Psychology, 1976, B.A., Miami University, 1981, Ph.D., University of CT

Brent A. Heeringa, Associate Professor of Computer Science, 1999, B.A., University of MN, 2002, M.S., University of MA, Amherst, 2006, Ph.D., University of MA, Amherst, on leave 2018-2019

Peter S. Heller, Visiting Professor of Economics, 1967, B.A., Trinity College, 1972, Ph.D., Harvard University, Spring 2019

Kristin M. Herman, Assistant Professor of Physical Education, Head Softball Coach, 1986, B.A., Tufts University, 1989, M.A., Tufts University

Chad M. Higdon-Topaz, Professor of Mathematics, 1996, A.B., Harvard University, 1997, M.S., Northwestern University, 2002, Ph.D., Northwestern University

Joshua D. Hillman, Lecturer in Physical Education and Head Men’s Golf Coach, 2000, B.A., University of RI

Alan Hirsch, Lecturer in Humanities, 1981, B.A., Amherst College, 1985, J.D., Yale University

Marjorie W. Hirsch, Professor of Music, 1982, B.A., Yale University, 1985, M.Phil., Yale University, 1989, Ph.D., Yale University, on leave 2018-2019

Nathan D. Hoey, Assistant Professor of Physical Education, Head Women’s Track & Field Coach, 2000, B.S., Slippery Rock University

Kiaran Honderich, Lecturer in Women’s, Gender and Sexuality Studies, 1983, B.A., Oxford University, 1984, M.A., Columbia University, 1991, Ph.D., University of MA, Amherst

Scott D. Honecker, Assistant Professor of Physical Education and Head Coach of Wrestling, 2010, B.S., East Carolina University

Catherine N. Howe, Lecturer in Art, 1997, B.A., Barnard College, 2005, M.A., University of CA, Santa Barbara, 2012, Ph.D., University of CA, Santa Barbara

Nicolas C. Howe, Associate Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology, 1998, B.A., Columbia University, 2003, M.A., University of CA, LA, 2009, Ph.D., University of CA, LA

Iris K. Howley, Assistant Professor of Computer Science, 2008, B.S., Drexel University, 2012, Ph.D., Carnegie Mellon University

Vivian L. Huang, Assistant Professor of Women’s, Gender, and Sexuality Studies, 2008, B.A., University of CA, Berkeley, 2009, M.A., NY University, 2016, Ph.D., NY University

Jeffrey I. Israel, Assistant Professor of Religion, 1999, B.A., Oberlin College, 2001, M.A., University of Chicago, 2011, Ph.D., University of Chicago

Vladimir V. Ivantsov, Visiting Assistant Professor of Russian, 2018, Ph.D., McGill University

Olesya Ivantsova, Visiting Lecturer in the Graduate Program in Art History

Charles F. Jackson, Visiting Assistant Professor of Art, 1984, B.F.A., VA Commonwealth University, 1990, M.F.A., University of CA, Davis, Fall 2018

Galen E. Jackson, Assistant Professor of Political Science, 2009, B.A., Williams College, 2010, M.A., University of Chicago, 2016, Ph.D., University of CA, LA

Sarah A. Jacobson, Associate Professor of Economics, 1998, B.S., Harvey Mudd College, 2005, M.A., GA State University, 2010, Ph.D., GA State University

Joy A. James, Francis Christopher Oakley Third Century Professor of Humanities, 1980, B.A., Saint Mary’s University, 1982, M.A., Fordham University, 1987, Ph.D., Fordham University

Ju-Yu Scarlett Jang, Professor of Art, 1969, B.A., National Cheng-Chih University, 1984, M.A., University of CA, Berkeley, 1989, Ph.D., University of CA, Berkeley

William K. Jannen, Assistant Professor of Computer Science, 2009, B.A., Williams College

Katharine E. Jensen, Assistant Professor of Physics, 2004, A.B., Princeton University, 2013, Ph.D., Harvard University

Cathy M. Johnson, James Phinney Baxter III Professor of Political Science, 1979, B.A., Dartmouth College, 1986, Ph.D., University of MI
Shakia F. Johnson, Arthur Levitt, Jr. ’52 Artist-in-Residence, Spring 2019

Stewart D. Johnson, Professor of Mathematics, 1979, B.A., Fort Lewis College, 1985, Ph.D., Stanford University

Kevin M. Jones, William Edward McElfresh Professor of Physics, 1977, B.A., Williams College, 1983, Ph.D., Stanford University

Peter Just, Professor of Anthropology, 1972, B.A., University of Chicago, 1979, M.A., University of PA, 1986, Ph.D., University of PA

Shinko Kagaya, Professor of Japanese, 1989, B.A., Aoyama Gakuin University, 1991, M.A., Ohio State University, 1999, Ph.D., Ohio State University

William R. Kangas, Assistant Professor of Physical Education and Head Men’s Ice Hockey Coach, 1982, B.A., University of VT, 1994, M.Ed., MA College of Liberal Arts

Aparna Kapadia, Assistant Professor of History, 1998, B.A., St Xavier’s College, Mumbai University, 2005, M.Phil., Jawaharlal Nehru University, 2010, Ph.D., University of London

Paul M. Karabinos, Charles L. MacMillan Professor in Natural Sciences, 1975, B.S., University of CT, 1981, Ph.D., Johns Hopkins University, on leave Spring 2019

Catherine M. Kealhofer, Assistant Professor of Physics, 2003, A.B., Princeton University, 2013, Ph.D., Stanford University

Christiann L. Kelsey, Assistant Professor of Physical Education and Head Women’s Volleyball Coach, 2000, B.S., Purdue University, 2012, M.S., Northeastern University

Savan Kharel, Visiting Assistant Professor of Physics

Anthony Kim, Visiting Assistant Professor of American Studies, 2006, B.A., University of CA, San Diego, 2013, M.A., University of CA, San Diego, 2016, Ph.D., University of CA, San Diego

Kris N. Kirby, Professor of Psychology, 1985, B.A., Marshall University, 1991, Ph.D., Harvard University

Eric C. Knibbs, Associate Professor of History and Faculty Affiliate in Religion, 2004, B.A., University of PA, 2009, Ph.D., Yale University

Pia M. Kohler, Assistant Professor of Environmental Studies, 1998, B.S., McGill University, 2001, M.E.S., Yale School of Forestry and Environmental Studies, 2006, Ph.D., MA Institution of Technology

Thomas A. Kohut, Sue and Edgar Wachenheim III Professor of History, 1972, B.A., Oberlin College, 1975, M.A., University of MN, 1983, Ph.D., University of MN, on leave Spring 2019

Anjuli F. Kolb, Assistant Professor of English, 2003, B.A., Columbia University, 2008, M.Phil., Columbia University, 2013, Ph.D., Columbia University

Christophe A. Koné, Assistant Professor of German, 2006, M.A., Université Lumière Lyon 2, 2013, Ph.D., Rutgers University, on leave 2018-2019

Elizaveta A. Koryushkina, Visiting Assistant Professor of Anthropology, 2011, Ph.D., Brown University

Lu Kou, Visiting Assistant Professor of Chinese, 2018, Ph.D., Harvard University

Cornelius C. Kubler, Stanfield Professor of Asian Studies, 1972, B.A., Cornell University, 1978, M.A., National Taiwan University, 1981, Ph.D., Cornell University

Joanna Kurkowicz, Lyell B. Clay Artist in Residence, Violin and Concertmaster, Berkshire Symphony, 1994, M.M., University of MA, Amherst, on leave Fall 2018

Steven J. Kuster, Assistant Professor of Physical Education and Head Swim Coach, 1993, B.A., University of PA, 1999, M.Ed., Harvard University

Kenneth N. Kuttner, Robert F. White Class of 1952 Professor of Economics, 1982, B.A., University of CA, Berkeley, 1989, Ph.D., Harvard University, on leave Fall 2018

Karen B. Kwitter, Ebenezer Fitch Professor of Astronomy, 1972, B.A., Wellesley College, 1974, M.A., University of CA, LA, 1979, Ph.D., University of CA, LA, on leave Fall 2018
Sara LaLumia, Associate Professor of Economics, 2000, B.A., Youngstown State University, 2006, Ph.D., University of MI

Edwin I. Lawrence, Artist Associate in Harpsichord, Piano and Organ and Lecturer in Music, 1969, B.M., State University of NY, Fredonia

Tim J. Lebestky, Associate Professor of Biology, 1995, B.S., University of KS, 2002, Ph.D., University of CA, LA, on leave Spring 2019

Alice Lee, Assistant Professor of Physical Education and Head Women’s Lacrosse Coach, 2009, B.S., Central CT State University, 2015, M.S., University of MA, Amherst

Jason R. Lemieux, Assistant Professor of Physical Education and Head Nordic Ski Coach, 2001, B.A., Williams College

Kelsey Levine, Assistant Professor of Physical Education and Head Alpine Ski Coach, 2010, B.A., Williams College

Zafrir Levy, Assistant Professor of Physical Education and Head Squash Coach, 2001, B.A., Williams College

Michael J. Lewis, Faison-Pierson-Stoddard Professor of Art History, 1980, B.A., Haverford College, 1989, Ph.D., University of PA

Scott A. Lewis, Assistant Professor of Physical Education and Director of Outing Club, 1980, B.S., Stanford, 1985, M.Ed., Stanford

John K. Limon, John J Gibson Professor of English, 1974, B.A., Harvard University, 1981, Ph.D., University of CA, Berkeley

Haydee M. A. Lindo, Assistant Professor of Mathematics, 2008, B.A., Williams College, 2012, M.S., University of NE, Lincoln, 2016, Ph.D., University of UT

David W. Loehlin, Assistant Professor of Biology, 2003, A.B., University of Chicago, 2011, Ph.D., University of Rochester

Susan R. Loepp, Chair and Professor of Mathematics, 1989, B.S., Bethel College, 1994, Ph.D., University of TX, Austin

Kimberly S. Love, Assistant Professor of English, 2010, B.A., Tuskegee University, 2017, Ph.D., University of VA

Peter D. Low, Professor of Art, 1994, B.A., University of Toronto, 1995, M.A., Johns Hopkins University, 2001, Ph.D., Johns Hopkins University, on leave 2018-2019

Natalie E. Lozinski-Veach, Visiting Assistant Professor of German, 2010, B.A., State University of NY, New Paltz, 2016, Ph.D., Brown University

Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology, 1979, B.S., University of MA, Lowell, 1983, Ph.D., University of TX, Austin

Michael D. MacDonald, Frederick L. Schuman Professor of International Relations, 1972, B.A., University of CA, Berkeley, 1974, M.A., University of CA, Berkeley, 1983, Ph.D., University of CA, Berkeley, on leave 2018-2019

Jennifer L. MacIntire, Lecturer in Biology and Chemistry, 1992, B.A., University of VT

Protik K. Majumder, Barclay Jermain Professor of Natural Philosophy, 1982, B.S., Yale University, 1989, Ph.D., Harvard University

Shervin Malekzadeh, Visiting Assistant Professor of Political Science, 1996, A.B., Stanford University, 2006, M.A., Georgetown University, 2011, Ph.D., Georgetown University

Maud S. Mandel, Professor of History

James A. Manigault-Bryant, Associate Professor of Africana Studies, 1995, B.A., Tulane University, 2002, Ph.D., Brown University

LeRhonda S. Manigault-Bryant, Associate Professor of Africana Studies and Faculty Affiliate in Religion, 1999, A.B., Duke University, 2002, M.Div., Emory University, 2007, Ph.D., Emory University
Patricia M. Manning, Assistant Professor of Physical Education and Head Women’s Basketball Coach, 1977, B.S., State University of NY, Cortland, 1988, M.S., Smith College

Luana S. Maroja, Associate Professor of Biology, 1999, B.S., Universidade Federal do Rio de Janeiro, 2001, M.S., Universidade Federal do Rio de Janeiro, 2008, Ph.D., Cornell University, on leave Fall 2018

Brian Martin, Professor of French & Comparative Literature, 1993, A.B., Harvard University, 1999, M.A., Harvard University, 2003, Ph.D., Harvard University

Laura J. Martin, Assistant Professor of Environmental Studies and Faculty Affiliate in History, 2006, S.B., Brown University, 2010, M.S., Cornell University, 2015, Ph.D., Cornell University

Martha J. Marvin, Lecturer in Neuroscience, 1984, B.A., University of CA, Berkeley, 1995, Ph.D., MA Institution of Technology

Aleksandar Matovski, Mellon Postdoctoral Fellow in Political Science, 2015, Ph.D., Cornell University

Mark T. McDonough, Lecturer in Physical Education, Assistant Football Coach, 2002, B.S., Ithaca College

Robert H. McElver, Visiting Lecturer in Theatre, 2005, B.A., San Francisco State University, Spring 2019

Elizabeth P. McGowan, Chair and Professor of Art, 1979, B.A., Princeton University, 1981, M.A., NY University Institution of Fine Arts, 1983, Ph.D., NY University Institution of Fine Arts

Keith E. McPartland, Associate Professor of Philosophy, 1994, B.A., Rutgers University, 1998, M.A., Cornell University, 2007, Ph.D., Cornell University

Lisa M. Melendy, Chair, Director of Athletics and Assistant Professor in Physical Education, 1982, A.B., Smith College, 1985, M.S., University of MA, Amherst

Carolina Melgarejo-Torres, Visiting Assistant Professor of Spanish, 2008, B.A., University Nac Autonoma, 2012, M.A., El Colegio de Mexico, 2018, Ph.D., El Colegio de Mexico
Nicole E. Mellow, Professor of Political Science, 1992, B.A., Vassar College, 2003, Ph.D., University of TX, Austin

Karen R. Merrill, Frederick Rudolph ’42 – Class of 1965 Professor of American Culture, 1986, B.A., Oberlin College, 1988, M.A., University of Denver, 1994, Ph.D., University of MI

Carolyn D. Miles, Assistant Professor of Physical Education and Associate Director/Student Athlete Services, 1998, B.S., University of NH, 2008, M.S., Columbia University

Steven J. Miller, Professor of Mathematics, 1996, B.S., Yale University, 1998, M.A., Princeton University, 2002, Ph.D., Princeton University, on leave Spring 2019

Marion S. Min-Barron, Visiting Lecturer, 2002, B.A., Middlebury College, 2010, M.S., Tufts University, 2016, Ph.D., Tufts University

Gregory C. Mitchell, Associate Professor of Women’s, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, 2000, B.S., IL State University, 2007, M.A., University of Chicago, 2012, Ph.D., Northwestern University

Bojana Mladenovic, Professor of Philosophy, 1984, B.A., University of Belgrade, 1987, M.A., McGill University, 1996, Ph.D., University of CA, Berkeley

Michele Monserrati, Visiting Assistant Professor of Comparative Literature and Romance Languages, 2009, M.A., Rutgers University, 2012, Ph.D., Rutgers University

Peter J. Montiel, Fairleigh S. Dickinson, Jr. ’41 Professor of Economics, 1973, B.A., Yale University, 1973, Ph.D., MA Institution of Technology

Manuel A. Morales, Professor of Biology, 1994, A.B., Kenyon College, 1999, Ph.D., University of CT, on leave Fall 2018

Ralph E. Morrison, Assistant Professor of Mathematics, 2010, B.A., Williams College, 2015, Ph.D., University of CA, Berkeley

Tendai Muparutsa, Artist in Residence in African Music Performance, Lecturer in Music, Director of Zambezi, Co-Director of Kusika, 2012, Ph.D., University of Alberta
Peter T. Murphy, John Hawley Roberts Professor of English, 1981, B.A., Yale University, 1986, Ph.D., Johns Hopkins University, on leave 2018-2019

Thomas P. Murtagh, John B. McCoy and John T. McCoy Professor of Computer Science, 1974, A.B., Princeton University, 1976, M.S., Cornell University, 1983, Ph.D., Cornell University

Steven E. Nafziger, Professor of Economics, 2000, B.A., Northwestern University, 2003, M.Phil., Yale University, 2006, Ph.D., Yale University

Lama Nassif, Assistant Professor of Comparative Literature, 1994, B.A., Damascus University, 2007, M.A., Middlebury Institute of International Studies at Monterey, 2014, Ph.D., University of TX, Austin, on leave 2018-2019

Gail M. Newman, Harold J. Henry Professor of German, 1976, B.A., Northwestern University, 1981, M.A., University of MN, 1984, Ph.D., University of MN

Wairimu R. Njoya, Assistant Professor of Political Science, 2002, B.A., Macalester College, 2004, M.A., University of Amsterdam, 2010, Ph.D., Rutgers University

James L. Nolan Jr., Washington Gladden 1859 Professor of Sociology, 1984, B.A., University of CA, Davis, 1992, M.A., University of VA, 1995, Ph.D., University of VA, on leave Fall 2018

Carol J. Ockman, Robert Sterling Clark Professor of Art, 1972, B.A., Stanford University, 1975, M.A., Yale University, 1982, Ph.D., Yale University

William W. Olney, Associate Professor of Economics, 2002, B.A., Wesleyan University, 2010, Ph.D., University of CO

Brooke Suzanne Olson Blair, Institutionructor in Chemistry, 2003, B.A., University of Saint Thomas, Houston, 2005, M.S., University of CA, Berkeley

Ianna Hawkins Owen, Assistant Professor of English, 2008, B.A., City University of NY, 2010, M.A., University of CA, Berkeley, 2016, Ph.D., University of CA, Berkeley
Allison M. Pacelli, Professor of Mathematics, 1997, B.S., Union College, 2003, Ph.D., Brown University, on leave Fall 2018

Paul C. Park, Senior Lecturer in English, 1975, B.A., Hampshire College

Janine M. Parker, Artist-in-Residence in Dance

Jay M. Pasachoff, Chair and Field Memorial Professor of Astronomy, 1963, A.B., Harvard University, 1965, A.M., Harvard University, 1969, Ph.D., Harvard University, on leave Spring 2019

Darel E. Paul, Professor of Political Science, 1990, B.A., University of MN, 1994, M.A., George Washington University, 2000, Ph.D., University of MN

Enrique Peacock-López, Halford R Clark Professor of Natural Sciences, 1974, B.S., University Nac Autonoma, 1976, M.S., University of CA, Riverside, 1982, Ph.D., University of CA, San Diego

Julia A. Pedroni, Lecturer in Philosophy, 1986, B.A., Wells College, 1999, Ph.D., Georgetown University

Sebastian Perez, Gaius Charles Bolin Fellow in Latina/o Studies, 2010, B.A., Yale University, 2016, M.Phil., Yale University

James L. Pethica, Senior Lecturer in English and Theatre, 1980, B.A., Oxford University, 1987, Ph.D., Oxford University

Melinda Petre, Visiting Assistant Professor of Economics, 2014, Ph.D., University of TX, Austin

Gregory B. Phelan, Assistant Professor of Economics, 2007, B.A., Yale University, 2012, M.Phil., Yale University, 2014, Ph.D., Yale University

Katarzyna M. Pieprzak, Professor of Francophone Literature, French Language, and Comparative Literature, 1995, B.A., Rice University, 1998, M.A., University of MI, 2001, Ph.D., University of MI
Michelyne J. Pinard, Assistant Professor of Physical Education and Head Women’s Soccer Coach, 1998, B.A., Dartmouth College, 2002, M.S., University of PA

Anna M. Plantinga, Assistant Professor of Statistics, 2013, B.S., Calvin College, 2018, Ph.D., University of WA

Amy D. Podmore, J. Kirk T. Varnedoe ’67 Professor of Art, 1982, B.S., State University of NY, Buffalo, 1987, M.F.A., University of CA, Davis

Kailani Polzak, Assistant Professor of Art, 2007, B.A., University of CA, Santa Cruz, 2017, Ph.D., University of CA, Berkeley

Lindsay S. Pope, Visiting Director of Choral/Vocal Activities, Spring 2019

Timothy J. Pusack, Assistant Professor at Williams-Mystic, 2005, B.A., Colgate University, 2013, Ph.D., OR State University

Christopher L. Pye, Class of 1924 Professor of English, 1975, B.A., Oberlin College, 1977, M.A., University College, 1984, Ph.D., Cornell University

Ashok S. Rai, Associate Professor of Economics, 1992, B.A., Stanford University, 1997, Ph.D., University of Chicago, on leave Spring 2019

Robert J. Rawle, Assistant Professor of Chemistry, 2008, B.A., Pomona College, 2014, Ph.D., Stanford University

Mark R. Raymond, Assistant Professor of Physical Education and Head Coach of Football

Eli M. Remolona, Visiting Professor of Economics, Spring 2019

Bernard J. Rhie, Associate Professor of English, 1997, B.A., University of CA, Berkeley, 2001, M.A., University of PA, 2005, Ph.D., University of PA

David P. Richardson, William R. Kenan, Jr. Professor of Chemistry, 1979, B.S., University of MI, 1984, Ph.D., University of CA, Berkeley

Kathryn L. Ringer-Hilfinger, Visiting Assistant Professor of Spanish, 2003, B.A., State University of NY, Geneseo, 2004, M.A., Middlebury College, 2013, Ph.D., State University of NY, Albany, Fall 2018

Tyler J. Rogers, Gaius Charles Bolin Fellow in American Studies, 2012, B.A., Brown University, 2015, M.Phil., Yale University

Shawn J. Rosenheim, Professor of English, 1985, B.A., Oberlin College, 1988, M.A., Yale University, 1993, Ph.D., Yale University, on leave Fall 2018

Leyla Rouhi, Preston S. Parish ’41 Third Century Professor of Romance Languages, 1987, B.A., Oxford University, 1988, M.A., Harvard University, 1995, Ph.D., Harvard University

Marketa Rulikova Edwards, Visiting Assistant Professor of Sociology, 1996, B.A., University of Pardubice, 1997, M.A., Central European University, 2001, Ph.D., Polish Academy of Science

Sophie F. Saint-Just, Assistant Professor of French and Francophone Studies, 1991, B.A., University of Paris VIII, 2004, M.Phil., City University of NY, 2013, Ph.D., City University of NY

Lisa R. Saltzman, Lecturer in the Graduate Program in Art History, 1988, B.A., Princeton University, 1991, M.A., Harvard University, 1994, Ph.D., Harvard University, Fall 2018

Michael Samson, Senior Lecturer in Economics, 1983, B.A., Yale University, 1994, Ph.D., Stanford University

Robert M. Savage, Professor of Biology, 1987, B.A., Bowdoin College, 1993, Ph.D., Wesleyan University
Kenneth K. Savitsky, Professor of Psychology, 1993, B.A., IN University, 1997, Ph.D., Cornell University, on leave Fall 2018

Lucille G. Schmidt, Professor of Economics and Director of the Williams-Exeter Programme at Oxford University, 1993, A.B., Smith College, 1997, M.A., University of MI, 2003, Ph.D., University of MI

Dylan J. Schneider, Visiting Assistant Professor of Music, 2006, B.A., Amherst College, 2013, Ph.D., University of Chicago

Pallavi Sen, Assistant Professor of Art

Justin B. Shaddock, Assistant Professor of Philosophy, 2004, B.A., University of Notre Dame, 2011, Ph.D., University of Chicago

Cheryl L. Shanks, Professor of Political Science, 1983, B.A., University of CA, Santa Cruz, 1988, M.A., University of MI, 1994, Ph.D., University of MI

Stephen C. Sheppard, Class of 2012 Professor of Economics, 1977, B.S., University of UT, 1979, M.A., Washington University, 1984, Ph.D., Washington University, on leave Fall 2018

Olga Shevchenko, Professor of Sociology, 1996, B.A., Moscow State University, 1997, M.A., Central European University, 2002, Ph.D., University of PA

Grant W. Shoffstall, Visiting Assistant Professor of Sociology, 2002, B.A., IL State University, 2006, M.A., IL State University, 2014, Ph.D., University of IL

Cesar E. Silva, Hagey Family Professor of Mathematics, 1977, B.S., Catholic University of Peru, 1979, M.A., University of Rochester, 1984, Ph.D., University of Rochester
Christina E. Simko, Assistant Professor of Sociology, 2005, B.A., Bridgewater College, 2007, M.A., University of VA, 2013, Ph.D., University of VA, on leave 2018-2019

Swati Singh, Assistant Professor of Physics, 2004, B.S., McMaster University, 2007, M.S., University of British Columbia, 2012, Ph.D., University of AZ, on leave 2018-2019

Yana Skorobogatov, Assistant Professor of History, 2009, B.A., University of CA, Berkeley, 2012, M.A., University of TX, Austin, 2018, Ph.D., University of CA, Berkeley

Laura A. Smalarz, Assistant Professor of Psychology, 2008, B.A., San Diego State University, 2011, M.S., IA State University, 2015, Ph.D., IA State University, on leave 2018-2019

Thomas E. Smith, Professor of Chemistry, 1988, B.A., Williams College, 1996, Ph.D., Stanford University, on leave 2018-2019

Benjamin H. Snyder, Assistant Professor of Sociology, 2003, B.A., Haverford College, 2007, M.A., University of VA, 2013, Ph.D., University of VA

Greta F. Snyder, Visiting Assistant Professor of Women’s, Gender, and Sexuality Studies, 2003, B.A., Haverford College, 2007, M.A., University of VA, 2011, Ph.D., University of VA

Anita R. Sokolsky, Professor of English, 1974, B.A., Oberlin College, 1979, M.A., Cornell University, 1983, Ph.D., Cornell University

Steven P. Souza, Senior Lecturer in Astronomy, 1973, B.S., Cooper Union, 1979, Ph.D., State University of NY, Stony Brook

Doris J. Stevenson, Lyell B. Clay Artist in Residence, Piano, 1967, B.M., AZ State University, 1969, M.M., University of Southern CA

Mihai Stoiciu, Professor of Mathematics, 1999, B.S., University of Bucharest, 2005, Ph.D., CA Institution of Technology, on leave 2018-2019
Jason A. Storm, Chair and Associate Professor of Religion, 1999, B.A., Hampshire College, 2001, M.A., Harvard University, 2006, Ph.D., Stanford University

Frederick W. Strauch, Chair and Associate Professor of Physics, 1998, B.S., Loyola College, 2004, Ph.D., University of MD

Laura R. Strauch, Lecturer in Chemistry, 1999, B.S., Loyola College

Catherine B. Stroud, Associate Professor of Psychology, 2002, B.A., University of WI, Madison, 2006, M.A., State University of NY, Stony Broo, 2009, Ph.D., State University of NY, Stony Bro, on leave Spring 2019

Steven J. Swoap, Chair and Professor of Biology, 1990, B.A., Trinity University, 1994, Ph.D., University of CA, Irvine, on leave Spring 2019

Munjulika Tarah, Assistant Professor of Dance, 2006, B.A., Randolph-Macon Woman’s College, 2007, M.A., Northwestern University, 2013, Ph.D., Northwestern University

Owen Thompson-Ferguson, Assistant Professor of Economics, 2005, B.A., Evergreen State College, 2013, Ph.D., University of MA, Amherst

Christian Thorne, Professor of English, 1995, B.A., Wesleyan University, 2001, Ph.D., Duke University, on leave Spring 2019

Stephen J. Tifft, Professor of English, 1975, B.A., Harvard University, 1976, M.A., Cornell University, 1984, Ph.D., Cornell University

Claire S. Ting, Professor of Biology, 1986, B.A., Yale University, 1989, M.S., Cornell University, 1994, Ph.D., Cornell University

Matthew N. Tokeshi, Assistant Professor of Political Science, 2006, B.A., University of CA, Berkeley, 2012, M.A., Princeton University, 2016, Ph.D., Princeton University

David R. Tucker-Smith, Professor of Physics, 1995, B.A., Amherst College, 2001, Ph.D., University of CA, Berkeley, on leave Fall 2018
Laura L. Tupper, Assistant Professor of Statistics, 2008, B.A., Swarthmore College, 2013, M.S., Cornell University, 2016, Ph.D., Cornell University

Damian L. Turner, Assistant Professor of Biology, 2004, B.S., Morgan State University, 2010, Ph.D., University of CT, on leave 2018-2019

Maria K. Udén, STINT – Research Scholar, Fall 2018

Katherine S. Wachala, Assistant Professor of Physical Education and Head Coach of Women’s Crew, 2001, B.A., University of WA

Dorothy J. Wang, Professor of American Studies and Faculty Affiliate in English, 1985, B.A., Duke University, 1993, M.A., Johns Hopkins University, 1998, Ph.D., University of CA, Berkeley, on leave Fall 2018

Guowei Wang, Artist in Residence in Chinese Music Performance and Director of the Williams Collegegege Chinese Ensemble

Christopher M. Waters, Hans W. Gatzke ’38 Professor of Modern European History, 1977, B.A., CA State University, Long Beach, 1979, M.A., Harvard University, 1985, Ph.D., Harvard University

Tara E. Watson, Professor of Economics, 1996, B.A., Wesleyan University, 2003, Ph.D., Harvard University

Phillip J. Webster, Visiting Assistant Professor of Religion

Peter S. Wells, Assistant Professor of Physical Education and Boathouse Manager, 1979, B.A., Williams College

Alan E. White, Mark Hopkins Professor of Philosophy, 1972, B.A., Tulane University, 1976, M.A., PA State University, 1980, Ph.D., PA State University, on leave Spring 2019
Amanda R. Wilcox, Associate Professor of Classics, 1996, B.A., Reed College, 1999, M.A., University of PA, 2002, Ph.D., University of PA

Heather Williams, William Dwight Whitney Professor of Biology, 1977, A.B., Bowdoin College, 1985, Ph.D., Rockefeller University

Lawrence M. Wills, Croghan Bicentennial Professor in Biblical and Early Christian Studies, Spring 2019

Amy Gehring Winters, Professor of Chemistry, 1994, B.A., Williams College, 1998, Ph.D., Harvard University, on leave Spring 2019

Kevin S. Wong, Charles R. Keller Professor of History, 1976, B.A., Rutgers University, 1979, M.A., University of MI, 1992, Ph.D., University of MI

Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese, 1980, B.A., Aoyama Gakuin University, 1994, M.A., Cornell University, 2000, Ph.D., Cornell University

Li Yu, Professor of Chinese, 1994, B.A., East China Normal University, 1997, M.A., Ohio State University, 2003, Ph.D., Ohio State University, on leave Spring 2019

Betty Zimmerberg, Howard B. Schow ’50 and Nan W. Schow Professor of Neuroscience, 1971, B.A., Harvard University, 1976, Ph.D., City University of NY

David J. Zimmerman, Chair and Orrin Sage Professor of Political Economy, 1985, B.A., University of Toronto, 1987, M.A., Princeton University, 1992, Ph.D., Princeton University

Janneke M. van de Stadt, Professor of Russian, 1988, B.A., Amherst College, 1994, M.A., University of WI, Madison, 2000, Ph.D., University of WI, Madison, on leave 2018-2019

Emeriti

Marsha I. Altschuler, Professor of Biology
Henry W. Art, Rosenburg Professor of Environmental Studies and Biology
Donald deB. Beaver, Professor of History of Science
Ilona D. Bell, Samuel Fessenden Clarke Professor of English
Robert H. Bell, Frederick Latimer Wells Professor of English
Roger E. Bolton, William Brough Professor of Economics
James R. Briggs, Assistant Professor of Physical Education
Fielding Brown, Charles L. MacMillan Professor of Physics
Michael F. Brown, James N. Lambert '39 Professor of Anthropology and Latin American Studies
Kim B. Bruce, Frederick Latimer Wells Professor of Computer Science
Jean-Bernard Bucky, William Dwight Whitney Professor of Arts and Theatre
Lynda K. Bundtzen, Herbert H. Lehman Professor of English
James T. Carlton, Professor of Marine Sciences
Phebe Cramer, Professor of Psychology
Stuart J. B. Crampton, Barclay Jermain Professor of Natural Philosophy
Andrew B. Crider, Mary A. & William Wirt Warren Professor of Psychology
Robert F. Dalzell, Fred Rudolph Professor of American Culture
William R. Darrow, Cluett Professor of Religion
David P. Dethier, Edward Brust Professor of Geology and Mineralogy
Samuel Y. Edgerton, Amos Lawrence Professor of Art
David Eppel, Professor of Theatre
Ed Epping, Alexander Falck Class of 1899 Professor of Art
Richard J. Farley, Assistant Professor of Physical Education
Zirka Z. Filipczak, J. Kirk T. Varne doe '67 Professor of Art
Robert L. Fisher, Assistant Professor of Physical Education
William T. Fox, Edward Brust Professor of Geology and Mineralogy
Peter K. Frost, Frederich L. Schuman Professor of International Relations
Charles Fuqua, Garfield Professor of Ancient Languages
Antonio Gimenez, Professor of Romance Languages
George R. Goethals, Dennis A. Meenan ’54 Professor of Leadership Studies
Darra J. Goldstein, Willcox B. and Harriet M. Adsit Professor of Russian
William C. Grant, Samuel Fessenden Clarke Professor of Biology
Suzanne L. Graver, John Hawley Roberts Professor of English
Fred Greene, A. Barton Hepburn Professor of Government
Edward S. Grees, Assistant Professor of Physical Education
Eva U. Grudin, Senior Lecturer in Art
Mark Haxthausen, Robert Sterling Clark Professor of Art History
Meredith C. Hoppin, Frank M. Gagliardi Professor of Classics
John M. Hyde, Brown Professor of History
Robert Jackall, Willmott Family Third Century Professor Sociology & Public Affairs
Andrew W. Jaffe, Lyell B. Clay Artist in Residence in Jazz and Senior Lecturer in Music
Eugene J. Johnson, Amos Lawrence Professor of Art
Markes E. Johnson, Charles L. MacMillan Professor of Natural Science
Lawrence J. Kaplan, Halford R. Clark Professor of Natural Sciences
Saul M. Kassin, Massachusetts Professor of Psychology
Robert D. Kavanaugh, Hales Professor of Psychology
David S. Kechley, Professor of Music
Bruce Kieffer, Professor of German
Sherron E. Knopp, John Hawley Roberts Professor of English
Benjamin W. Labaree, Professor of History and Environmental Studies
Aida Laleian, Professor of Art
Renzie W. Lamb, Assistant Professor of Physical Education
Kai N. Lee, Rosenberg Professor of Environmental Studies
Steven P. Levin, Professor of Art
Charles M. Lovett, Philip and Dorothy Schein Professor of Chemistry
George E. Marcus, Professor of Political Science
Christine L. Mason, Assistant Professor of Physical Education
Douglas B. Moore, Mary A. and William Wirt Warren Professor of Music
Frank Morgan, Chair and Webster Atwell Class of 1921 Professor of Math
Glyn P. Norton, Willcox B. and Harriet M. Adsit Professor of International Studies
Daniel D. O’Connor, Mark Hopkins Professor of Intellectual and Moral Philosophy
Robert R. Peck, Director of Athletics
Norman R. Petersen, Washington Gladden 1859 Professor of Religion
C. Ballard Pierce, Professor of Physics
Lawrence E. Raab, Harry C. Payne Professor of Poetry
Kenneth C. Roberts, A. Barton Hepburn Professor of Music
T. Michael Russo, Assistant Professor of Physical Education
Carl R. Samuelson, Assistant Professor of Physical Education
Harry C. Sheehy, Director of Athletics and Assistant Professor of Physical Education
Anne R. Skinner, Senior Lecturer in Chemistry
David C. Smith, Senior Lecturer in Biology
Paul R. Solomon, Professor of Psychology
Guilford L. Spencer, Frederic Latimer Wells Professor of Mathematics
Richard H. Stamelman, Professor of Comparative Literature
Jefferson Strait, Professor of Physics
Karen E. Swann, Morris Professor of Rhetoric
Barbara E. Takenaga, Mary A. and William Wirt Warren Professor of Art
Kurt P. Tauber, Class of 1924 Professor of Political Science
Mark C. Taylor, Cluett Professor of Humanities
William G. Wagner, Brown Professor of History
Alex W. Willingham, Professor of Political Science
James B. Wood, Charles R. Keller Professor of History
William K. Wootters, Barclay Jermain Professor of Natural Philosophy
Reiko Yamada, Professor of Japanese
Steven J. Zottoli, Howard B. Schow ’50 Professor of Biology

**Graduation**

Of the 545 who entered in the fall of 2011, 86% graduated from Williams within 4 years and 94% within 6 years.

Of the 547 who entered in the fall of 2012, 90% graduated from Williams within 4 years and 95% within 6 years.
GENERAL PROGRAM DESCRIPTION

The Africana Studies Program is an interdisciplinary concentration offering students an in-depth understanding of the history, politics, religion, and culture of peoples of African descent, especially in the Americas. We use music, dance, literature, the arts, and scholarly works to explore the origins of this field of study in the fulcrum of African American and Caribbean movements of resistance. A trans-national program, intellectually influenced by scholars from W. E. B. Du Bois to the present, Africana Studies encourages students to study abroad, and offers travel Winter Study courses designed to expose students to experiential learning settings outside of the classroom.

CONCENTRATION IN AFRICANA STUDIES

Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the sophomore and junior years, but open to all students; and an Africana capstone Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with our core Africana faculty or with faculty and visiting professors affiliated with the program. However, at least one of these three additional courses must be listed as "Core Electives" which are each designated in the descriptions below as a “Primary Crosslisting.” We also encourage students to take at least one course in a program/department other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana core faculty member to plan their concentration.

AFRICANA STUDIES AND OTHER PROGRAMS

Students concentrating in Africana Studies are encouraged to pursue concentrations in American Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women's, Gender and Sexuality Studies. Many of the courses counted for these concentrations may also earn credit toward the Africana Studies concentration.

REQUIREMENTS

Africana Studies courses required for the concentration:

AFR 200 Introduction to Africana Studies

and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):

AFR 440(S) CAPSTONE: Performing Blackness

AFR 476 (S) CAPSTONE: Black Radicalism

One core elective:

AFR 132/PSCI 132/AMST 132 Contemporary Africana Social and Political Philosophy

AFR 140 Black Autobiography

AFR 156/COMP 156/AMST 156/ENGL 223 Thirteen Ways of Looking at Jazz

AFR 193/HIST 193 Black Power Abroad: Decolonization in Africa, the Caribbean and Europe

AFR 200 Introduction to Africana Studies

AFR 205 She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison’s Writings

AFR 207/PSCI 212 Hip Hop and Political Theory

AFR 208/AMST 208/REL 262 Time and Blackness

Two additional electives (a total of three required for the concentration):

Most electives are included below. However, students should check with the program chair to see if other courses not listed here might count as electives toward the concentration.

HONORS PROGRAM IN AFRICANA STUDIES

A student wishing to earn honors must complete an “Honors Dossier” during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with two essays written for Africana Studies courses and, under their
advisor's guidance complete additional research, incorporate instructor feedback, and substantially re-write and expand these two papers. The third essay must be a new work, written specifically for the Honors project. Students must also write a substantive introduction that explains the theme (theoretical, geographic, chronological etc.) that connects the three essays. The introduction should address the significance of the theme to the interdisciplinary study of the peoples and cultures of the African diaspora. It should also explain the logic of the three papers and how they work together. Dossiers will be due in mid-April (after Spring Break). Under some circumstances, a student may want to include a record of a performance or piece of visual art in the Dossier. In this case, a written analysis and explanation should accompany that piece. The total Honors Dossier should consist of no less than 45 pages of written work.

Students should submit a proposal for an Honors Dossier in the fall semester of their Senior year, no later than mid-October. They may draw on papers written in Africana courses during any semester including the fall semester of their Senior Year. Students may petition to include a paper written for a course outside of the Africana curriculum. Africana faculty will meet late in the fall semester to approve or decline Honors Dossier proposals. Students whose proposals are approved will be assigned an advisor and should register for W31-AFR 494 in the winter study/spring of the Senior Year.

At the Honors presentation night in the spring, each Honors student will prepare and give an oral defense of their dossier. During the defense, students will present the key points their overarching project and field questions from select faculty and student critics, all of whom will have read the dossier.

AFR 105 (F) Materials, Meanings, and Messages in the Arts of Africa (DPE)
Crosslistings: AFR105 / ARTH104
Secondary Crosslisting
This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Class Format: lecture
Requirements/Evaluation: three 2-page response papers, class journal on WCMA objects lab, midterm exam and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Art History and African Studies majors
Expected Class Size: 40
Distributions: (D2) (DPE)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE: This course fulfills DPE requirements through its exploration of the differences between concepts of art in African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and assumptions about these objects that position them as 'primitive' or 'exotic' constructs

Fall 2018
LEC Section: 01    WF 11:00 am - 12:15 pm    Michelle M. Apotsos

AFR 113 (S) Musics of Africa
Crosslistings: AFR113 / MUS120
Secondary Crosslisting
This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the
fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: lecture/discussion
Requirements/Evaluation: grade based on a listening journal, bi-weekly short assignments, a final paper, and class participation
Prerequisites: no prerequisites: prior musical background is not essential for this class
Enrollment Limit: 20
Enrollment Preferences: current or prospective Music majors and Africana Studies concentrators
Expected Class Size: 12
Department Notes: MUS World Music/Ethnomusicology
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; MUS World Music/Ethnomusicology

Spring 2019
LEC Section: 01    MW 11:00 am - 12:15 pm     Corinna S. Campbell

AFR 126 (F) Black Literature Matters  (DPE) (WI)
Crosslistings: AFR126 / AMST126 / ENGL126
Secondary Crosslist

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Class Format: seminar
Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors
Expected Class Size: 19
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or AFR
DPE: This course centers the relationship between black literature and black political movements from the 1920s to the present. Through discussions and short essays, students will develop skills for analyzing the essential role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present. WI: This course requires students to write four formal essays that total at least 20 pages. Students will also submit short in-class writing assignments.
AFR 129 (F) Twentieth-Century Black Poets  (WI)
Crosslistings: AFR129 / ENGL129
Secondary Crosslisting
From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Class Format: seminar
Requirements/Evaluation: several short papers, a 15-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Distributions: (D2) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirements if registration is under AFR
Attributes: AMST Arts in Context Electives;

AFR 132 (F) Contemporary Africana Social and Political Philosophy
Crosslistings: AFR132 / AMST132 / PSCI132
Primary Crosslisting
This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Extra Info: not available for the fifth course option
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: first- and second-year students
Expected Class Size: 12
Distributions: (D2)
Attributes: AFR Core Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives; JLST Interdepartmental Electives
AFR 136 (S)  Slavery and the Making of a Literary Tradition  (WI)
Crosslistings: ENGL136 / AFR136

Secondary Crosslisting

How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's Underground, the adaptation of Solomon Northrop's 12 Years a Slave, and Issa Rae's parody "Due North" in Insecure.

Class Format: seminar
Requirements/Evaluation: active class participation, 4 short papers totaling about 20 pp.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: first-year students who have not taken or placed out of a 100-level ENGL course
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 19
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AFR
Not offered current academic year

AFR 140 (S)  Black Autobiography
Crosslistings: AFR140 / COMP141

Primary Crosslisting

Autobiography--whether slave narrative, memoir, or semi-fictional life account-has served as a primary form of writing for people of African descent. Although primarily understood as a textual means for articulating selfhood, Black autobiographies also ask other questions like: How do Black reflections on the self necessitate critiques of society and culture? How have Black autobiographies been utilized for political mobilization? And, what might a collective analysis of Black autobiographies reveal about changes in conceptions of Black selfhood over time? We will explore these concerns by reading autobiographies across time and space by authors like Ottobah Cugoano, W. E. B. Du Bois, and Alice Walker.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on class participation, two to three short papers (5- to 7-pages), and a 15- to 20-page paper or multimedia final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first- and second-year students
Expected Class Size: 20
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AFR; meets Division 1 requirement if registration is under COMP
Attributes: AFR Core Electives;
Not offered current academic year

AFR 156 (F)  Thirteen Ways of Looking at Jazz  (WI)
Crosslistings: AMST156 / COMP156 / AFR156 / ENGL223
Primary Crosslisting

Taking its title from the Wallace Stevens poem, "Thirteen Ways of Looking at a Blackbird," which interprets the blackbird in different ways, this course similarly explores a more complex, multi-layered perspective on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicological method but rather a socio-cultural analysis of the concept, music and its effect--so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weds their increased critical thinking skills.

Class Format: lecture

Requirements/Evaluation: evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/performance with 3-page critical report, totaling approximately 20 pages of written work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under AFR and AMST; meets Division 1 requirement if registration is under COMP or ENGL

Attributes: AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;

Not offered current academic year

AFR 164 (S) Slavery in the United States (WI)
Crosslistings: AFR164 / AMST165 / HIST164

Secondary Crosslisting

Slavery and freedom rose as concomitant ideologies--simultaneously and interrelated--critical to the development of the American colonies and United States. Few areas of American social, political, and economic history have been more active and exciting in recent years than the study of this relationship. This seminar introduces students to the most important aspects of American slavery, beginning with an examination of the international slave trade and traces the development of the "peculiar institution" to its demise with the Civil War.

Class Format: seminar

Requirements/Evaluation: building on several preliminary essays, each student will complete a research project which leads to a final research paper

Extra Info: in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Distributions: (D2) (WI)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada;

Spring 2019

SEM Section: 01    W 1:10 pm - 3:50 pm    Charles B. Dew

AFR 167 (F) Let Freedom Ring? African Americans and Emancipation (WI)
Crosslistings: AFR167 / HIST167 / AMST167
Secondary Crosslisting

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Class Format: seminar

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Distributions: (D2) (WI)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada; JLST Interdepartmental Electives;

Fall 2018
SEM Section: 01 M 7:00 pm - 9:40 pm Gretchen Long

AFR 200 (F) Introduction to Africana Studies

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonialism, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illumining disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of Africana faculty; and 2) the incorporation of aesthetic materials--film, photography, music, dance, performance, and artwork--to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, weekly reading response papers, two short essays, and a final research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 15

Distributions: (D2)

Attributes: AFR Core Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; GBST African Studies Electives; LATS Comparative Race + Ethnic Studies Electives

Fall 2018
LEC Section: 01 TR 11:20 am - 12:35 pm Rhon S. Manigault-Bryant

LEC Section: 01 MW 11:00 am - 12:15 pm Neil Roberts
AFR 201 (F)  African Dance and Percussion
Crosslistings: DANC201 / MUS220 / AFR201

Secondary Crosslisting
This course focuses on selected dance and music forms from the African continent for example, Kpanlogo from Ghana, Lamban from Guinea, Senegal and Mali or Bira from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress with the selected forms throughout the semester. Forms may not be the same every semester. This course can be taken for academic and/or PE credit

Class Format: studio/lecture/discussion

Requirements/Evaluation: participation in assignments that include research and performance projects and short papers; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects

Extra Info 2: this course may be taken for academic and/or PE credit; see description for more details

Prerequisites: DANC 100 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: students who have taken Dance 100 or permission of instructors

Department Notes: MUS World Music/Ethnomusicology

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR

Attributes: GBST African Studies Electives; MUS World Music/Ethnomusicology

Fall 2018

AFR 202 (F)  Public Speaking: Traditions and Practice
Crosslistings: THEA209 / AFR202

Primary Crosslisting
Effective oral communication skills are necessary for any student, regardless of major or area of concentration. This course is designed to give students an introduction into the fundamentals of oral communication. We will discuss the critical role of both speakers and listeners within the transactional process of communication. Together we will explore African American oratorical traditions through viewing, listening to, and reading speeches from notable figures such as Frederick Douglass, Fannie Lou Hamer, Barak Obama, and many others. With an emphasis placed on Aristotelian and African American rhetorical methods of persuasion, evidence-based research, and organization, students will gain a better understanding of what it means to be an ethical and responsible communicator. Students will give three formal speech presentations with a focus on informative and persuasive elements. Through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate in the public setting.

Class Format: seminar

Requirements/Evaluation: students will give three formal speech presentations with a focus on informative and persuasive elements; through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year and sophomore students.

Expected Class Size: 19

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AFR; meets Division 1 requirement if registration is under THEA

Not offered current academic year
AFR 203 (F)  Modern African History
Crosslistings: AFR203 / HIST203

Secondary Crosslisting
This course surveys the history of 19th and 20th century Africa. The first section of the course focuses on the European conquest of Africa and the dynamics of colonial rule–especially its socio-economic and cultural consequences. The second section looks at how the rising tide of African nationalism, in the form of labor strikes and guerrilla wars, ushered out colonialism. The third section examines the postcolonial states, focusing on the politics of development, recent civil wars in countries like Rwanda and Liberia, and the growing AIDS epidemics. The last section surveys the history of Apartheid in South Africa up to 1994. Course materials include fiction, poetry, memoirs, videos, newspaper articles, and outstanding recent scholarship. The course is structured around discussions.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on two 7- to 10-page papers, one exam, and an unspecified number of pop quizzes
Prerequisites: none; no prior knowledge of African history required; open to all
Enrollment Limit: 40
Enrollment Preferences: students interested in History or Africana Studies
Expected Class Size: 15-25
Distributions: (D2)
Attributes: GBST African Studies Electives; HIST Group A Electives - Africa

Not offered current academic year

AFR 204 (F)  Introduction to Francophone Literatures
Crosslistings: AFR204 / COMP282 / RLFR203

Secondary Crosslisting
What is the Francophone world comprised of? Who speaks French today and why? What does the idea of Francophonie really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the littérature-monde manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of Francophonie so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (l'hexagone), and Haiti among others.

Class Format: seminar

Requirements/Evaluation: presentation, journaling, final project, participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above, placement exam or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate, Africana and Comp. Lit
Expected Class Size: 20
Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

AFR 205 (F)  She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings  
(WI)
Crosslistings: WGSS207 / COMP236 / AFR205

Primary Crosslisting
The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and
criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Class Format: tutorial
Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: this course is specifically for first-year students and they will receive preference in this class
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under AFR or WGSS; meets Division 1 requirement if registration is under COMP
Attributes: AFR Core Electives; AMST Arts in Context Electives;
Not offered current academic year

AFR 206 (S) African Dance and Percussion
Crosslistings: AFR206 / MUS221 / DANC202
Secondary Crosslisting
Course continues the investigation of selected music and dance from the African continent. Advancing dance and music skills, deepening understanding of history and context of the material are focus of readings, discussions and projects throughout the semester. Questions we will address include the impact of religion, colonialism, travel, immigration, media tradition and the continued emergence of new forms. Material may include Gum Boots (Isicathulo) from Southern Africa, JuJu in Nigeria or Hip Hop in several nations. This course can be taken for academic and/or PE credit.
Class Format: studio/lecture/discussion
Requirements/Evaluation: participation in assignments that include research and performance projects and a short paper; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: students who have taken DANC 100, DANC 201 or permission of the instructor
Expected Class Size: 20
Department Notes: MUS World Music/Ethnomusicology
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; MUS World Music/Ethnomusicology
Not offered current academic year

AFR 208 (F) Time and Blackness (WI)
Crosslistings: AFR208 / REL262 / AMST208
Primary Crosslisting
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies
and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, “Time and Blackness,” we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

**Class Format:** tutorial

**Requirements/Evaluation:** assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Attributes:** AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;

AFR 211 (F)  Race and the Environment

Crosslistings: AFR211 / SOC211 / AMST211 / ENVI211

**Primary Crosslisting**

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**Distributions:** (D2)

**Attributes:** AFR Core Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; PHLH Nutrition, Food Security + Environmental Health; PHLH Social Determinants of Health

---

AFR 212 (S)  Jazz Theory and Improvisation I

Crosslistings: AFR212 / MUS104
Secondary Crosslisting

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: evaluation will be based on weekly assignments (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Extra Info: may not be taken on a pass/fail basis

Extra Info 2: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: EXPE Experiential Education Courses

Not offered current academic year

AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Primary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Class Format: tutorial

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: AFR Core Electives; WGSS Racial Sexual + Cultural Diversity Courses
AFR 214 (S)  Jazz Theory and Improvisation II
Crosslistings: MUS204 / AFR214

Secondary Crosslisting
A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane’s “Three Tonic” harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions
Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project
Prerequisites: MUS 104b or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Music majors and Jazz Ensemble members
Expected Class Size: 5-8
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR
Attributes: EXPE Experiential Education Courses
Not offered current academic year

AFR 215 (F)  Ways of Knowing: Music, Movement, Memory

Secondary Crosslisting
This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the "civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive. The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic to close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing, remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities. Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to them critically not only through writing and discussion, but also through their own performance practices.

Class Format: seminar
Requirements/Evaluation: in-class participation, creative/critical responses to texts, final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: if overenrolled, theater majors will get preference
Expected Class Size: 14
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under THEA or DANC; meets Division 2 requirement if registration is under AFR or WGSS
Not offered current academic year
AFR 219 (S)  Spiritualities of Dissent
Crosslistings: REL220 / AFR219

Secondary Crosslisting
This course seeks to understand how protest fuels the creation and sustenance of black religious movements and novel spiritual systems in the twentieth and twenty-first centuries. We will examine the dissentive qualities of selected African-descended activists, community workers, scholars, spiritual/religious leaders and creative writers. By the end of this course, students will be able to thoughtfully respond to the questions, "What is spirituality?"; "What is dissent?"; and "Has blackness required resistive spiritual communities?"

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, weekly reading responses, a critical book review, and a final paper or project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion majors; Africana Studies concentrators
Expected Class Size: 15
Distributions: (D2)
Not offered current academic year

AFR 220 (S)  Introduction to African American Literature
Crosslistings: AMST220 / AFR220 / ENGL220

Secondary Crosslisting
What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Class Format: seminar
Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over 3 papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 25
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or AFR
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; ENGL Literary Histories C

Spring 2019
SEM Section: 01    TF 1:10 pm - 2:25 pm    David L. Smith

AFR 221 (S)  Giving God a Backbeat: Rap Music, Religion & Spirituality
Crosslistings: AFR221 / REL263

Primary Crosslisting
On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through
the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Class Format: seminar

Requirements/Evaluation: students will be evaluated on their class participation, response papers, quizzes, and a final class group project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 20

Distributions: (D2)

Attributes: AFR Core Electives; AMST Arts in Context Electives; Not offered current academic year

AFR 223 (S) Politics of Performance/Performing Politics in Contemporary Africa (WI)

Crosslistings: MUS222 / AFR223

Secondary Crosslisting

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQ community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres--among them Afrobeat, kwaito, soukous, raï, mbalax, Chimurenga music, and a variety of rap and hip-hop styles--are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: lecture/discussion

Requirements/Evaluation: based on in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

Expected Class Size: 10

Department Notes: MUS World Music/Ethnomusicology

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: GBST African Studies Electives; MUS World Music/Ethnomusicology; Not offered current academic year

AFR 225 (S) Musics of the Caribbean

Crosslistings: MUS225 / AFR225

Secondary Crosslisting

From witty and politically charged calypsos to soulful bachatas, from folkloric displays that advertise a country's cultural diversity to ritual performances that facilitate communication with the spirit world, the music of the Caribbean is astonishingly diverse, both sonically and in its social application. This course serves as an introduction to a wide spectrum of Caribbean music in its broader social and historical context. Through engaging with audio and video sources, readings, performance exercises and workshops, students will learn to identify distinguishing features associated with particular countries and regions, while also exploring the sounds and musical structures that are shared between them. Featured genres include reggae, steel pan, calypso, zouk, Maroon music from Suriname and Jamaica, chutney, salsa, merengue and music from Haitian Vodu and Cuban Santería religions. Interlaced with discussion of musical genres and innovative musicians are a number of central questions about the social role of music within the region: How has slavery and colonial enterprise shaped the musical landscape of the Caribbean? How do the realms of sacred and secular performance relate to each other? What role does tourism and global circulation play in influencing musical tastes and practices? Finally, how do
music and dance interconnect?

Class Format: lecture

Requirements/Evaluation: class participation, multimedia project, midterm paper, intermittent short assignments, final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Music majors and Africana Studies or Latina/o Studies concentrators

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: AFR Core Electives; MUS World Music/Ethnomusicology

Not offered current academic year

AFR 226 (S) Black France/France Noire

Crosslistings: RLFR226 / AFR226

Secondary Crosslisting

On the eve of the new millennium, the year 1998 saw the emergence in France of “Black studies à la française” (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

Class Format: seminar

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Extra Info: not available for the fifth course option

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French and Africana Studies concentrators

Expected Class Size: 12

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR

Not offered current academic year

AFR 228 (F) Revolt and Revelation in 20th-Century Americas

Crosslistings: AMST228 / AFR228 / LATS228 / REL223

Secondary Crosslisting

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of “God-talk” broadly termed “liberation theologies” that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Class Format: seminar
AFR 229 (F) European Imperialism and Decolonization
Crosslistings: AFR229 / HIST229
Secondary Crosslisting
This course will study European imperialism in the nineteenth and early-twentieth centuries and the formidable opposition it provoked, both on the part of the socialist opposition at home and the movements for national liberation in Asia, Africa, the Middle East, and the New World. The first half of the course will focus on the expansion of Europe in the nineteenth century, particularly the British conquest of India, the Scramble for Africa, and the break-up of the Ottoman Empire following World War I. In the second half of the course, we will examine some of the most dramatic movements for national liberation, including the independence in India, the Algerian Revolution, and the torturous struggle for independence in Lumumba's Congo.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a midterm, a final exam, a 10-page research paper, and class participation
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 15-20
Distributions: (D2)
Attributes: HIST Group A Electives - Africa; HIST Group B Electives - Asia; HIST Group C Electives - Europe and Russia; HIST Group D Electives - Latin America + Caribbean; HIST Group E Electives - Middle East

AFR 230 (F) Gender, Sexuality, and Global HIV/AIDS
Crosslistings: WGSS230 / AFR230
Secondary Crosslisting
The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic’s social, economic and political causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa.

Class Format: seminar
Requirements/Evaluation: two short papers and a research paper; class participation will form part of the grade
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Public Health concentrators
AFR 234 (S) History of the Civil Rights Movement
Crosslistings: AFR234 / HIST282
Secondary Crosslisting
This course examines the American civil rights movement, arguably the most important social movement of the twentieth century, and its far reaching effects. We will set the movement's classic phase from 1954-1965, within a broader history organizing for freedom from the 1930s through the demise of Black Power in the 1970s. We will trace a wide variety of activists in southern struggle, examining familiar figures like Rosa Parks and Martin Luther King, Jr., from new perspectives, together with the often unsung heroes of local movements. We will also highlight freedom struggles in the North and West, whose timing, issues, and politics often differed, including the presence of a diverse cast of racial minorities including Latinx and Asians. Throughout our study, we will interrogate the perspectives of both the participants and the historians who have written their stories about the time, space, issues, and strategy that define our understanding of the struggle for freedom. Class will consist of lecture and discussion.
Class Format: lecture
Requirements/Evaluation: coursework to be evaluated includes informal writing and class participation, two papers, and a take-home final
Prerequisites: none
Enrollment Limit: 40
Expected Class Size: 25
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada
Not offered current academic year

AFR 237 (F) Islam in the United States: From Black Muslims to the War on Terror
Crosslistings: AFR237 / REL237 / AMST237
Secondary Crosslisting
Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.
Class Format: seminar
Requirements/Evaluation: in-class participation and presentations; 3 short essays; final project
Prerequisites: none
Enrollment Preferences: none
Expected Class Size: 12
AFR 241 (S)  The Banlieue in Literature, Music, and Film
Crosslistings: RLFR240 / AFR241 / COMP281

Secondary Crosslisting
In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Class Format: seminar

Requirements/Evaluation: journaling, presentation, in-class discussion, and final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLFR 105 and above

Enrollment Limit: 20

Enrollment Preferences: French majors, certificate, Africana and Comparative literature students

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

Attributes: FMST Core Courses

Not offered current academic year

AFR 242 (F)  Introduction to the Music of John Coltrane
Crosslistings: AFR242 / MUS252

Secondary Crosslisting
This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane's compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane's musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Class Format: lecture

Requirements/Evaluation: evaluation based on in-class participation and preparation, quizzes on assigned readings, midterm, final examinations and a final paper

Extra Info: evaluation partially based on participation in an in-class group analysis presentation, and a final paper involving musical analysis of a Coltrane composition or recorded performance

Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: musically literate students and Music majors

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: AMST Arts in Context Electives;

Not offered current academic year

AFR 246 (F)  African American History, 1619-1865
Crosslistings: HIST281 / AFR246
Secondary Crosslisting

This course provides an introduction to the history of African Americans in the United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery—and the development of racial classifications—that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Class Format: seminar
Requirements/Evaluation: class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first- and second-year students
Expected Class Size: 20
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada

SEM Section: 01  MR 2:35 pm - 3:50 pm  Gretchen Long

AFR 248 (S) The Caribbean: From Slavery to Independence
Crosslistings: AFR248 / HIST248

Primary Crosslisting

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley ‘Revolt’ in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation—expressed in vivid artistic and musical forms—have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a mid-term and final paper, and a 10-12 page research paper
Extra Info: not available for the fifth course option
Prerequisites: none; open to all
Enrollment Limit: 20
Enrollment Preferences: Africana Studies concentrators; History majors

AFR 254 (F) Bebop: The (R)evolution of Modern Jazz
Crosslistings: MUS254 / AFR254

Secondary Crosslisting

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and its evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Class Format: seminar

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Enrollment Limit: 12

Enrollment Preferences: Music majors, Jazz Ensemble members, Africana Studies concentrators

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: AMST Arts in Context Electives;

Not offered current academic year

AFR 256 (S) Politics of Africa
Crosslistings: AFR256 / PSCI243

Secondary Crosslisting

This course provides an introduction to the politics of contemporary Africa, emphasizing the diversity of African politics. It seeks to challenge the widespread image of African politics as universally and inexplicably lawless, violent, and anarchic. We begin by examining the colonization of Africa, nationalist movements, and patterns of rule in the first 30 years of independence. From there, we analyze the causes, achievements and limitations of the recent wave of political liberalization across Africa. We then consider patterns of economic development in Africa. Finally, we examine China's growing expansion into Africa and ask whether this is a new colonialism.

Class Format: lecture/discussion

Requirements/Evaluation: class discussion, four short papers and final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: sophomores, Political Science majors and Africana Studies concentrators

Expected Class Size: 30

Distributions: (D2)

Attributes: GBST African Studies Electives; POEC Comparative POEC/Public Policy Courses; PSCI Comparative Politics Courses

Not offered current academic year

AFR 257 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)
Crosslistings: HIST256 / AMST256 / AFR257

Secondary Crosslisting

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy
Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Limit:** 35

**Enrollment Preferences:** first years, sophomores, and American Studies majors

**Expected Class Size:** 25

**Distributions:** (D2) (DPE)

**Distribution Notes:** DPE: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. Focus on strategies and tactics: e.g. demonstrations, guerrilla theatre, electoral campaigns, strikes. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada

---

**AFR 258 (S) The Rhetoric(s) of Black Religious Traditions**

**Crosslistings:** REL258 / AFR258

**Primary Crosslisting**

This course will introduce students to the rich religious expressions of Black Americans through their rhetorical traditions. We will begin with a survey of rhetorical productions like sermons, music, and other forms of public address in the historical literatures on Black religions. Our review will yield some of the primary themes of Black religious experiences--the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like commodification alter rhetorical practices.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation in this course will be based upon class participation, response papers, one 8-page paper, and a formal group presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Distributions:** (D2)

**Not offered current academic year**

---

**AFR 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World**

**Crosslistings:** ARTH259 / AFR259 / ARAB259

**Secondary Crosslisting**

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as
vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Class Format: lecture

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or Africana Studies

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ARAB; meets Division 2 requirement if registration is under AFR

Attributes: GBST African Studies Electives

Not offered current academic year

AFR 261 (F) Haitian and French Caribbean Literatures and Films

Crosslistings: COMP283 / AFR261 / RLFR261

Secondary Crosslisting

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

Attributes: FMST Core Courses

Not offered current academic year

AFR 276 (S) Black Europeans (WI)

Crosslistings: AFR276 / GERM276 / COMP276

Secondary Crosslisting

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher,
philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants—such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few—and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Class Format: tutorial

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years, sophomores, and juniors

Expected Class Size: 8

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP or GERM; meets Division 2 requirement if registration is under AFR

Not offered current academic year

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286

Secondary Crosslisting

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR or AMST; meets Division 1 requirement if registration is under ENGL

Fall 2018

SEM Section: 01    W 1:10 pm - 3:50 pm     Kai M. Green
AFR 299 (S)  Rastafari: Dread, Politics, Agency
Crosslistings: REL261 / PSCI233 / AFR299

Primary Crosslisting
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15- page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators and majors in Political Science and Religion
Expected Class Size: 12
Distributions: (D2)
Attributes: AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives;
Not offered current academic year

AFR 301 (F)  Experimental African American Poetry
Crosslistings: AMST307 / AFR301 / ENGL327 / COMP311

Secondary Crosslisting
Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Class Format: seminar
Requirements/Evaluation: two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation
Prerequisites: none, though at least one previous literature course preferred
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AMST or AFR; meets Division 1 requirement if registration is under COMP or ENGL
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;
Not offered current academic year

AFR 302 (S)  Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
Crosslistings: COMP309 / AFR302

Primary Crosslisting
Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although
it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color—especially members within the African Diaspora. From skin bleaching creams like “Whitenicious” to rap music’s fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyrics of blues crooner Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.

Class Format: seminar

Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 6- to 8-page paper, and a formal class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AFR; meets Division 1 requirement if registration is under COMP

Attributes: AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AFR 303 (F) A History of Islam in Africa

Crosslistings: HIST303 / REL303 / ARAB303 / GBST303 / AFR303

Secondary Crosslisting

This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time.

Class Format: seminar

Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: lottery

Expected Class Size: 25

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Attributes: GBST African Studies Electives; HIST Group A Electives - Africa

AFR 304 (S) South Africa and Apartheid

Crosslistings: AFR304 / HIST304

Secondary Crosslisting

This course introduces students to the spatial, legal, economic, social and political structures that created Apartheid in South Africa, and to the factors that led to the collapse of the racist order. We will examine the many forms of black oppression and, also, the various forms of resistance to Apartheid. Some of the themes we will explore include industrialization and the formation of the black working classes, the constructions of race, ethnicities and sexualities, land alienation and rural struggles, township poverty and violence, Black education, and the Black Consciousness Movement.

Class Format: lecture/discussion
AFR 307 (F) Contemporary Short Stories from North Africa
Crosslistings: RLFR309 / AFR307

Secondary Crosslisting
Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.

Class Format: seminar/discussion
Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper
Prerequisites: RLFR 201, 202 or 203 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and those with compelling justification for admission
Expected Class Size: 20
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; HIST Group A Electives - Africa
Not offered current academic year

AFR 309 (S) Scriptures and Race
Crosslistings: AFR309 / LATS309 / REL309

Secondary Crosslisting
This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how people imagine themselves, their communities, and their relationship to religious and racial "others"? How did "scripts" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Class Format: tutorial
Requirements/Evaluation: evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Expected Class Size: 10
AFR 310 (F) Womanist/Black Feminist Thought

Crosslistings: AMST309 / AFR310 / WGSS310 / REL310

Primary Crosslisting

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors
Expected Class Size: 20
Distributions: (D2)

AFR 314 (F) Groovin' the Written Word: The Role of Music in African American Literature

Crosslistings: AMST314 / COMP321 / ENGL314 / AFR314

Primary Crosslisting

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites:  none; open to all
Enrollment Limit:  20

AFR 315 (S)  Blackness 2.0: Race, Film and New Technologies
Crosslistings: AMST315 / AFR315 / SCST315

Primary Crosslisting
Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the ‘real’ vs ‘virtual’ world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Class Format:  seminar
Requirements/Evaluation:  evaluation based on participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project.
Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites:  none
Enrollment Preferences:  Africana Studies concentrators
Expected Class Size:  15
Distributions:  (D2)

AFR 317 (F)  Black Migrations: African American Performance at Home and Abroad
Crosslistings: DANC317 / AFR317 / COMP319 / AMST317 / THEA317 / ENGL317

Primary Crosslisting
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format:  seminar/discussion
Requirements/Evaluation:  evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Extra Info:  may not be taken on a pass/fail basis
AFR 321 (F) Trending Black: Race & Social Media in the 21st Century
The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon class participation, response papers, and a final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Expected Class Size: 20
Distributions: (D2)

Fall 2018
SEM Section: 01  W 1:10 pm - 3:50 pm  Joy A. James

AFR 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
Crosslistings: AFR323 / ARTH223 / ENGL356 / AMST323 / COMP322
This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love’s *Bayou* and Ho Che Anderson’s *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

**Extra Info:** may not be taken on a pass/fail basis, not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** none

**Expected Class Size:** 19

**Department Notes:** this course is part of the Gaudino Danger Initiative

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AFR or AMST; meets Division 1 requirement if registration is under ARTH, COMP or ENGL

**AFR 325 (F)  Television, Social Media, and Black Women 'Unscripted'**

**Crosslistings:** AFR325 / WGSS325

**Primary Crosslisting**

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

**Expected Class Size:** 13

**Distributions:** (D2)

**Attributes:** FMST Core Courses

**Not offered current academic year**

---

**AFR 326 (F) Gender, Race, and the Power of Personal Aesthetics**

---

---

---
Secondary Crosslisting

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: seminar

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority

Expected Class Size: 12

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Related Courses; LATS Core Electives; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses

AFR 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Crosslistings: AFR330 / MUS330 / DANC330

Secondary Crosslisting

"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old." --Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Class Format: studio

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects

Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors

Enrollment Limit: 14

Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites

Expected Class Size: 10

Materials/Lab Fee: Occasional fees to attend concerts; fee range free-$35

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR

Attributes: MUS World Music/Ethnomusicology
AFR 331 (S) Senior Seminar: The Drag of Black Masculinity (DPE)

Crosslistings: AMST420 / AFR331 / ENGL420 / WGSS420

Secondary Crosslisting

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 19th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory, and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. By examining representations and presentations of Black masculinities, we will pursue questions such as: How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? Can we/should we be moving beyond heteropatriarchy and gender binaries? What is the future of Black Gender? By reading critical and creative texts, viewing films and engaging other kinds of media, students will hone their critical theorization skills.

Class Format: seminar

Requirements/Evaluation: each student will be asked to facilitate a class discussion; students will write three short creative/critical papers; there will also be a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and others with substantial background in Women's, Gender, and Sexuality Studies or Africana Studies; statements of interest will be solicited

Expected Class Size: 14

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR, OR AMST; meets Division 1 requirement if registration is under ENGL DPE: This course fulfills the DPE requirement in that it centers questions of power and privilege.

AFR 334 (S) Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration

Crosslistings: INTR334 / AFR334 / PSCI346

Secondary Crosslisting

This seminar reviews contemporary theories of "anti-black racism"; their articulation or assimilation within current political movements and mobilizations; and the influence and impact such theories-expressed in and/or as activism-on social justice and civil rights. Critical race theory, Afro-pessimism, feminist/queer theory and the works of the incarcerated are studied. Theorists studied include: Frank Wilderson; Angela Davis; Derrick Bell; Cheryl Harris. Students write weekly mini-reflection papers on assigned readings and collectively make analytical presentations.

Class Format: seminar

Requirements/Evaluation: 1 research paper (50%); 2 presentations with summaries (40%); active engagement in class discussions (10%); Weekly student presentations consist of 15 minutes of analysis with written summaries and Q/A.

Extra Info: 1st quarter of semester: thesis and outline; 2nd and 3rd quarters: 2-page summaries integrating assigned texts into research analysis; 4th quarter: edit final paper.

Prerequisites: familiarity with one of the following: critical race theory; Africana/Black studies; feminist anti-racist political movements

Enrollment Limit: 15

Enrollment Preferences: if over enrolled students will be asked to submit a paragraph on their research interest relevant to the seminar.

Expected Class Size: 15
AFR 336 (S) Blackness, Theater, Theatricality
Crosslistings: AFR336 / ENGL316

Representations of African American life have pervaded the various genres and tiers of American culture, embodying a carnival of competing attitudes and perspectives. Many oddities and ironies result from this curious history. For example, African Americans as theatrical figures enter American consciousness via the minstrel stage, where white entertainers wearing burnt cork lampooned Negroes to amuse white audiences. Eventually, black performers created their own versions of minstrelsy, black playwrights created dramas more sympathetic to black life, and representations of black life proliferated in every noteworthy medium. This course will consider how attitudes about blackness have informed or deformed theatrical representations of African American life. It will examine major texts by African American writers, considering both their social importance and their aesthetic experiments and innovations. It will range from politically oriented works of social realism such as Theodore Ward's Big White Fog and Lorraine Hansberry's A Raisin in the Sun to expressionistic protest works like Amiri Baraka's Dutchman and Slave Ship and Ntozake Shange's For Colored Girls to August Wilson's earnest histories and the post-modern satires of Adrienne Kennedy and Suzan-Lori Parks. Alongside these, we will also consider a variety of comic traditions, ranging from minstrelsy to Spike Lee's film Bamboozled and characters created by comedians such as Jackie "Moms" Mabley and Richard Pryor. And how should we assess Porgy, a play by the white writer Dubose Heyward, which evolved into America's greatest opera, Porgy and Bess? This course will be an ongoing inquiry into the riotous theatricality of American blackness.

Class Format: seminar
Requirements/Evaluation: journal, a 15-page final paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 20
Enrollment Preferences: English majors
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AFR
Attributes: AMST Arts in Context Electives; ENGL Literary Histories C

AFR 340 (S) African Diaspora Religions in the Americas and the Caribbean
Crosslistings: GBST340 / AFR340 / REL340

Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the synthetic religious cultures of African descended persons in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the Western hemisphere? Firstly, this course will consider a brief historiography of Africana Religious Studies. This background will inform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diasporic religious traditions including Conjure, Dagara, Kumina, New Orleans Voodoo, Spiritual Baptist, Winti, and Yoruba (Candomblé, Ifa, Lucumi, and "Orisha-Vodu"). We will also explore other African diasporic religious sensibilities that transgress regional and institutional boundaries.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page draft)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators
Expected Class Size: 15
Distributions: (D2)
Not offered current academic year

AFR 341 (S) Caste, Race, Hierarchy
Crosslistings: ASST341 / AFR341 / ANTH341 / GBST341
Secondary Crosslisting
Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar
Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AFR 342 (S) Racial Capitalism  (DPE)
Crosslistings: AMST440 / AFR342
Secondary Crosslisting
This class will interrogate the ways in which capitalist economies have "always and everywhere" relied upon forms of racist domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of securing resources and "opening markets". Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about "welfare queens" has impacted public assistance programs, and claims about the embodiment of Asian women play into the international division of labor. We will also be attentive to the means - from interracial unionism to national liberation struggles - by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical knowledge with concepts drawn from scholars working in the traditions of Marxist, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Anibal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici

Class Format: seminar
Requirements/Evaluation: attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper
AFR 343 (F)  Representations of Racial-Sexual Violence from Enslavement to Emancipation  (WI)

Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Secondary Crosslisting

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro: At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.

Requirements/Evaluation: weekly primary and response papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference given to juniors and seniors

Expected Class Size: 8

Distributions: (D2) (WI)

AFR 345 (S)  Race and Feeling in Twentieth Century Literature

Crosslistings: AFR345 / ENGL342

Secondary Crosslisting

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings ---
guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Class Format: seminar

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D1)

Not offered current academic year

AFR 347 (S) Negative Affects in African American Literature

Crosslistings: ENGL346 / AFR347

Secondary Crosslisting

"My pessimism was stronger than my longing," wrote Saidiya Hartman in her genre-breaking Lose Your Mother in her search for the afterlife of kinship in the remains of a Ghanaian slave fort. In this course we will discuss a mixture of contradictory "bad" feelings burdening the individual and the collective; for example, how hope and desire compete in Hartman's statement with habituated disappointment and exhaustion. How do black subjects creatively overcome the racial foreclosure to write and recite violence, rage, refusal, anxiety, depression, idleness, grief, silence, etc.? And, further, how do we make sense of the sorts of affects that become negative when practiced by black subjects, such as love, empathy, and desire? Together, we will explore interventions by critical theorists of blackness, gender, and sexuality including Saidiya Hartman, Darieck Scott, Abdul JanMohamed, Christina Sharpe, Frantz Fanon, Ann Cvetkovich, Heather Love, and Lauren Berlant to assist us in confronting the sometimes perilous terrain of negative expression for black subjects. Primary texts will include work by Toni Morrison, James Baldwin, Kara Walker, Jamaica Kincaid, and Richard Wright. This course will be driven by student discussion and collaboration.

Class Format: seminar

Requirements/Evaluation: one 10 pg paper, one 4 pg paper, engaged feedback process, presentations, thoughtful class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AFR 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Primary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics
beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**AFR 350 (S) Organizing Resistance: Black Activism, Then and Now**

This Africana class will be an experiential learning class designed both to study and to do activism as a way of learning how to be effective organizers in the Black world today. Our study component will focus on important past organizations and movements--Fannie Lou Hamer and the organizing of the Mississippi Freedom Summer and "Freedom Democrats" challenge to the Democratic Party, The Student Non-Violent Coordinating Committee, The National Welfare Rights Organization, The Poor People’s Budget, The Free Breakfast Program of the Black Panther Party--with an eye towards understanding how they actually organized and determining their successes and failure. The activism component of the class will include work in Pittsfield and/or Albany--with immigrant rights group, prison rights organizations, educational entities--and we will take a Spring break activism trip (for one of our two weeks off), either to Ferguson, Missouri, or to Florida to continue work on environmental justice already in place via Africana WS 25. We will also be exploring online activism, especially in relationship to the growing activism against police and other racist violence in Ferguson, Missouri, Sanford, Florida, Oakland, California and New York City.

**Class Format:** seminar

**Requirements/Evaluation:** two short 5-page papers; final portfolio and/or final paper; class participation

**Prerequisites:** none

**Enrollment Limit:** 10

**AFR 351 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers**

Crosslistings: ENGL357 / AMST359 / AFR351

**Secondary Crosslisting**

When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash’s *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and...
how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned Lemonade and Barry Jenkins' *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** previous courses in American Studies, critical studies in race and ethnicity or cultural studies, or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** American Studies majors

**AFR 352 (S) Mystic Spirituality in Black Women's Social Justice Activism: Brazil-USA**

Crosslistings: REL352 / AFR352 / WGSS352

**Primary Crosslisting**

This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions--such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred--as resources for creativity, community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages) and a final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** AFR, REL, and WGSS concentrators

**Expected Class Size:** 15

**Distributions:** (D2)

**Not offered current academic year**

---

**AFR 355 (S) The Black Atlantic as Scriptural Formation**

Crosslistings: REL305 / AFR355

**Secondary Crosslisting**

"...I don't read such small stuff as letters, I read men and nations..." The unpacking of this provocative and unsettling statement ascribed to Sojourner Truth can be taken as a springboard for this seminar that explores the politics of the scriptural (or writing) as analytical window onto the complex
formation of the circum-Black Atlantic (and its complex relationships to colonial and post-colonial Atlantic worlds). The isolation of selected Black Atlantic "readings" as cultural sites, rituals, performances, institutions, as different and conflicting types of politics and social orientation---from first contacts through slavery to the contemporary irruptions of protest and fundamentalist movements--will structure the seminar.

**Class Format:** seminar-style discussion

**Requirements/Evaluation:** consistent participation (informed by engagement of selected readings); and submission of mid-term prospectus (1-2pp) and end-of-term research paper (15-20pp)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** religion; African American (and other American ethnic groups); cultural studies; history; literature; social sciences

**Expected Class Size:** 15

**Distributions:** (D2)

*Not offered current academic year*

---

**AFR 356 (F) The Plantation and Its Afterlife**

This course is a meditation on the significance of the plantation in modern life. Rather than treating the plantation as solely a socio-economic formation that utilizes captive labor for the efficient production of goods, we will consider the plantation as a space that has defined, and continues to define, social, economic, and spatial relations. In so doing, we will explore numerous literatures and cultural productions about the plantation in Africa and its diaspora, including historical and sociological studies, fiction, visual art, and music. We will not only interrogate how the plantation form is reproduced over time, but also how it appears in collective memory, and how it enables political mobilization.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation; two to three short papers (6- to 8-pages); and a 15- to 20-page paper or multimedia final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** students in their third and fourth years of study

**Expected Class Size:** 12

**Distributions:** (D2)

*Not offered current academic year*

---

**AFR 360 (F) The Political Thought of Frantz Fanon (WI)**

Crosslistings: PSCI370 / LEAD360 / PHIL360 / AFR360

**Primary Crosslisting**

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon’s political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

**Expected Class Size:** 10
AFR 361 (S) The Carceral State
Crosslistings: HIST369 / AFR361

Secondary Crosslisting
This seminar will examine the rise and character of the "carceral state," a term scholars use to denote "the vast apparatus of punishment and control that exists in the contemporary United States." We will begin with systems of policing, processing, and punishment that came under criticism in the 1960s from civil rights advocates, simultaneous with the rise of "law and order" politics. The middle of the course will trace out how in the aftermath of civil rights reform, conservatives and liberals together paved the way for the expansion of punitive capacities at the local, state, and federal level. We will pay particular attention the uneven development of mass incarceration across states and localities, and the different patterns of racial disparity that this produced. Finally, we will look at the effects of the carceral state on American society and politics, and the movements to dismantle it.

Class Format: seminar
Requirements/Evaluation: coursework to be evaluated includes discussion and informal writing, two papers, and an oral presentation
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Expected Class Size: 20
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada
Not offered current academic year

AFR 364 (F) History of the Old South
Crosslistings: HIST364 / AFR364 / AMST364

Secondary Crosslisting
During the course of the semester, we shall investigate two broad, interrelated topics: slavery in the antebellum South, and the impact of slavery on Southern civilization. Our approach will be primarily topical. In the first half of the course, we shall look at subjects like the foreign and domestic slave trade, patterns of work and treatment, the nature of the master-slave relationship, resistance and rebellion, and slave cultural, social, and family life. The second half of the course will concentrate on the influence of the institution of slavery on the mind, social structure, and economy of the Old South, and slavery's impact on Southern politics and the decision for secession in 1860-61.

Class Format: discussion
Requirements/Evaluation: evaluation based on class participation, two papers of moderate length, and a comprehensive final examination
Prerequisites: none; open to first-year students with instructor's permission
Enrollment Limit: 25
Expected Class Size: 25
Distributions: (D2)
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern

AFR 365 (S) History of the New South
Crosslistings: AFR365 / HIST365 / AMST365

Secondary Crosslisting

A study of the history of the American South from 1877 to the present. Social, political and economic trends will be examined in some detail: the rule of the "Redeemers" following the end of Reconstruction; tenancy, sharecropping, and the rise of agrarian radicalism; Southern Progressivism; the coming of racial segregation and the destruction of the Jim Crow system during the years of the Civil Rights movement; Southern politics during the depression and post-World War II years.

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation, 2 papers of moderate length, and a comprehensive final examination

Prerequisites: none; open to first-year students with instructor's permission

Enrollment Limit: 25

AFR 366 (F)  African American Urban History

Crosslistings: AFR366 / HIST370

Secondary Crosslisting

In the mid twentieth century, "inner city" became synonymous with poor African Americans living in the urban centers of the industrial North and West. However, urban African American history stretches back to before the Declaration of Independence. African Americans built and dwelled in great cities North and South. This course will explore the history of African Americans in places like New York, Savannah, Chicago, Miami, and Oakland. We will explore such themes as slavery and freedom in cities, migrations to cities in the early 20th century, the shape of Jim Crow in the North, and the contention over the definition of "black" as Caribbean and African migrants came to urban centers after 1960. We will pay particular attention the history of black urban culture and style, reading texts on fashion, music, dance, and leisure. Students will write one book review (2-3 pages), do an oral presentation, and write two papers. One brief research paper (7-10 pages) and one historiographic essay (7-10 pages).

Class Format: seminar

Requirements/Evaluation: one short book review, one brief research project (7-10 pages), and one historiographic essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Africana Studies concentrators and History majors

Expected Class Size: 20

Distributions: (D2)

Attributes: AMST Space and Place Electives; HIST Group F Electives - U.S. + Canada

Not offered current academic year

AFR 367 (F)  Black Metropolis: Writing About Race and the City  (WI)

Crosslistings: HIST368 / AFR367

Secondary Crosslisting

This course investigates how scholars, writers, and activists have written about the black urban experience in the twentieth century. Today, there exists a complex relationship between black and urban, with much public discourse stereotyping black people as residents of the "inner city." At the beginning of the 20th century this development would have been highly improbable; circa 1900, African-Americans remained the country's most rural demographic group, disproportionately working in agriculture. This class addresses why, how, and when black people migrated to cities, and the structural mechanisms that channeled them into segregated neighborhoods and jobs, even as these changed over time. More importantly, though, we will focus on the way in which African-Americans themselves sought to understand, explore, and contest these experience of ghettoization. How did
black people express themselves and build communities for survival, pleasure, and profit? Throughout the course we will put in dialogue various types of writing: these include social scientific studies of black life, urban history, and the journalism, poetry, and literature produced by black urbanites during the first half of the 20th century. By examining these different modes of writing about race in the city together, we will gain perspective on the specific practices of historical writing and how historians differ from other inquirers in the questions they ask, the sources they use (and how they use them), and the arguments they make.

Class Format: seminar

Requirements/Evaluation: short informal writings (1-2 pages) and two formal papers (6-8 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: WI: This course is intended to focus on the writing process, both in examining different types of writings about race in the city, and through the structure of the course itself. Students will write multiple drafts and workshop their papers; as well, they will experiment with different forms of writing and writing processes.

Attributes: HIST Group F Electives - U.S. + Canada;

AFR 368 (F) The Diasporic Impulse in African American Art

Crosslistings: COMP367 / AFR368

Primary Crosslisting

Since the mid-20th century, growing numbers of African American artists have explored historical, symbolic, and ritual meanings shared by Blacks in the USA and people of African descent in other parts of the diaspora. Using specific visual, musical, literary, and kinetic themes, Black creatives--across genres--develop work that addresses explicit and implicit points of diasporic connection around issues of identity, indigenous/ancestral wisdom, cultural and political critique, and alternative religious orientations. Looking especially at the work of playwright August Wilson, painters John Biggers and Daniel Minter, dancer Katherine Dunham, and sculptor Elizabeth Catlett Mora, this course examines the symbolic and ritual vocabularies of African American art in diasporic perspective.

Class Format: seminar

Requirements/Evaluation: class participation, two to three short papers (5-7 pages), and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Distributions: (D2)

AFR 369 (S) African Art and the Western Museum (DPE) (WI)

Crosslistings: AFR369 / ARTH308

Secondary Crosslisting

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to...
exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Class Format: tutorial

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 104 or special permission from the instructor

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE:

Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

TUT Section: T1    TBA     Michelle M. Apotsos

AFR 379 (S)  Black Women in the United States
Crosslistings: AFR379 / HIST379 / WGSS379

Secondary Crosslisting

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on student participation, three papers, and a brief oral presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors and Africana Studies concentrators

AFR 380 (F)  Freedom Dreams, Afro-Futures & Visionary Fictions
Crosslistings: AFR380 / ENGL381 / AMST380 / WGSS380

Secondary Crosslisting

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the
course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

**AFR 382 (S) Contemporary Afro-Latin American Social Movements**

This seminar course will provide students with an understanding of diverse histories, political beliefs, mobilization strategies of 20th and 21st century Afro-Latin American social movements, as well as their relationship with their respective governments. Primary documents, audiovisual texts and social science research will complement lectures and class discussions to prepare students to discuss the contributions and critiques of the movements within broader discussions of the politics of blackness in the African Diaspora. While the course focuses on contemporary experiences and social movements, each topic is introduced with a historical overview of African-descended peoples in Latin America. By the course's conclusion, students should be able to discuss a wide range of ideas, experiences, and strategies of black politics in the Latin America as well as the similarities in themes and characteristics that have shaped much of the experiences. Furthermore, students should be able to assess the ways in which black movements in Latin America have: challenged hegemonic narratives, approached politics of culture and multiculturalism, contested invisibility, utilized transnational diasporic politics, and (re)defined conceptualizations of citizenship and belonging.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on in-class participation, weekly reading responses, a book review, and a final paper and presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 13

**Enrollment Preferences:** Africana Studies concentrators

**AFR 383 (S) Race and Ethnicity in Latin America**

**Crosslistings:** HIST443 / AFR383

**Secondary Crosslisting**

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that
include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as “racial democracies” and look at the historical roots and political impact of both “positive” and “negative” stereotypes of race relations in the region. To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, one short paper, and a substantial (20-25 page) research paper

Enrollment Limit: 15

Enrollment Preferences: History majors and Latino/a Studies concentrators

Expected Class Size: 10-15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group D Electives - Latin America + Caribbean

Not offered current academic year

AFR 385 (F) Civil War and Reconstruction

Crosslistings: AMST456 / AFR385 / HIST456

Secondary Crosslisting

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

Class Format: seminar

Requirements/Evaluation: evaluation based on class participation and a substantial research paper based at least in part on primary source materials

Enrollment Limit: 15

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; HIST Group F Electives - U.S. + Canada

Fall 2018

SEM Section: 01 W 1:10 pm - 3:50 pm Charles B. Dew

AFR 386 Race in Court (DPE)

This tutorial will examine how African-Americans used the courts in the 19th and 20th centuries in an effort to construct new social orders that would offer them greater freedom and autonomy. We will begin with the presence of enslaved people in 19th century courts, looking at how and when they might have had recourse to law. We will ask: How and when did black people appear in court as witnesses or litigants? What were their aims and aspirations in participating in the legal process? How did such participation constrain or facilitate their autonomy? We will move on to the efforts of African-Americans to fashion a legal architecture of freedom during and after the War of the Rebellion, a process that ultimately resulted in dramatically transformed relationships between citizens and the federal government, but one that produced new racial hierarchies. Our study of litigation will also look at the ordinary practices of black plaintiffs in local court, to see who, how, and when, they tried to leverage law as a resource, particularly to protect their economic standing. Finally, we will look at the era of civil rights, focusing in on the role of black lawyers in “representing the race” in southern courtrooms where black voice and agency was otherwise limited. Over the semester, students will explore multiple sites of interaction between race and the judicial process, gaining understanding of the history of legal ideas (in particular, how controversies over race led to the redefinition of legal concepts), the history of legal practice (how people use courts), the social history of law (how does law sustain, shape, and transform social practices), and the interactions between these various domains of intellectual inquiry.

Class Format: tutorial

Requirements/Evaluation: weekly papers or responses, as per tutorial standards

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
AFR 390 (F) Transforming the New World and the Old: The Haitian and French Revolutions

This course focuses on the radical transformative power of the Haitian and French Revolutions, the ways in which they challenged the hierarchies of the New World—of racism, and slavery—and of the Old World—of monarchy, aristocracy, the Church, and even of the bourgeoisie—with long-lasting effect. It will show how the two revolutions were intricately interrelated—even though historians of the French Revolution have usually neglected the Haitian Revolution and downplayed its centrality—and how they initiated a century of Revolution on both sides of the Atlantic. Given the incomplete and unfinished character of both Revolutions, and the fact that the issues they attempted to address live on today, this class will make a conscious attempt to show the continuing relevance of these Revolutions to 21st century movements for change.

Class Format: seminar

Requirements/Evaluation: short paper (8-10 pages), research paper (15 pages), final exam and class participation

AFR 402 (S) A History of Family in Africa (WI)

The family is the center of private life, but it has also been a topic of constant discussion and contention in Africa. In this class we will examine how political upheavals and economic pressures have changed the concept of the family and the role it plays in various African societies. We will also consider the changing views of gender, race, age, class, and sexuality on the idea of family.

Class Format: seminar

Requirements/Evaluation: seminar, discussion, seminar, discussion, and 20-page research paper (including preparatory writing exercises throughout the semester)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AFR 402 (S) A History of Family in Africa (WI)
AFR 405 (S)  CAPSTONE: Africana Studies and the Disciplines

Of the many things that distinguish Africana Studies from other fields of knowledge, most remarkable are its creative uses and critiques of disciplinary perspectives. In some instances, a scholar in the field might move between disciplines; in others, a scholar might integrate two or more disciplines into one point of view. Disciplinary creativity accommodates the array of information—written texts, music, visual art, film—that contributes to our understanding of the African Diaspora. This seminar will illuminate the disciplinary nuances and challenges of studying people of African descent. After outlining genealogies of Africana Studies and the field’s complicated relationships to social science disciplines, students will closely read classic texts by some of the pioneers in the field and explore their uses of disciplinary perspectives. In the latter half of the course, students will have the opportunity to design and conduct their own research projects with the aforementioned disciplinary concerns in mind.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, a couple of short papers and the completion of a final research paper or project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 10

Distributions: (D2)

AFR 406 (F)  CAPSTONE: Crafting Research: Methods in Africana Studies

Any student of Africana Studies swiftly recognizes there is a limitless breadth to what constitutes “Africana experience” and that there are diverse means through which Africana experience is examined. For example, while some scholars utilize a more historical approach to chronicle Africana experience, others study the black body via performance to unearth nuanced meanings of Africana experience. This capstone seminar will explore a variety of methods and strategies for crafting research within the field of Africana Studies. We will focus on approaches that derive from traditional disciplines as well as techniques that have emerged with the advent of dynamic new media and digital technologies. Some of the methodologies we will engage include: historiography; archival research; digital archiving; quantitative data analysis; ethnographic and qualitative analysis; critical textual analysis; reading the body as art and text; blogging and digital publishing; and evaluating films as text. Serving as a practicum, the course will provide considerable background in a variety of methods as well as hands-on learning. Students will have the opportunity to craft a final research project that is best explored through one or more of the methods we examine.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, response papers, and a final research project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 10

Distributions: (D2)

Not offered current academic year

AFR 410 (F)  Black Literary and Cultural Theories

Crosslistings: COMP410 / AMST410 / ENGL410 / AFR410

Secondary Crosslisting
This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

AFR 419 (F) Going to Ground: Considering Earth in the Arts of Africa (WI)

Crosslistings: ENVI419 / AFR419 / ARTH419

Secondary Crosslisting

Drawing its inspiration from the landmark exhibition Earth Matters: Land as Material and Metaphor in the Arts of Africa (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base.

Class Format: seminar

Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some coursework in ARTH and/or AFR would be useful

Enrollment Limit: 19

Enrollment Preferences: seniors and majors

Expected Class Size: 19

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI; meets Division 2 requirement if registration is under AFR

Attributes: ARTH post-1600 Courses; GBST African Studies Electives;
Not offered current academic year

AFR 427 (S) Racial and Religious Mixture (WI)

Crosslistings: AMST327 / AFR427 / LATS427 / REL314

Secondary Crosslisting
The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; Not offered current academic year

AFR 440 (S) CAPSTONE: Performing Blackness

In modern parlance and scholarship, blackness is understood not as a biological but rather a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static connotation of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e. movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior performance experience.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, performance exercises, response papers, and a final creative research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 10

Distributions: (D2)

Attributes: AFR Core Electives; Not offered current academic year

AFR 476 (F) CAPSTONE: Black Radicalism

Crosslistings: AFR476 / HIST476

Primary Crosslisting

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions,
maroons, Quilombos, Civil War and various other means of resistance—transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study—through the formation of Africana/African-American/Black-Studies—and the ways in which we express ideas—through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation to be based on student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

**Extra Info:** may not be taken on a pass/fail basis

AMERICAN STUDIES (Div II)
Chair: Senior Lecturer Cassandra Cleghorn

On leave Fall/Spring: Professor M. Reinhardt. Associate Professor R. Braggs.
On leave Fall only: Professor D. Wang.

GENERAL PROGRAM DESCRIPTION
The American Studies Program, an eleven-course major, uses interdisciplinary approaches to develop students’ understanding of the complexity of the culture(s) usually labeled “American.” Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES
America: the Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar required of majors, is open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING
American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores broad patterns of power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives are appropriate for students at all levels, including first-years. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though other students (majors and non-majors) with appropriate preparation are typically welcome in these courses as well.

THE MAJOR
Required Courses
- American Studies 101, America: the Nation and Its Discontents
- American Studies 301, Junior Seminar
- One 400-level course designated Senior Seminar

Elective Courses
Eight courses: five should be chosen from one of the specializations listed below, the other three chosen from among any of the electives listed, but students must draw their remaining courses from two of the other specializations. Students are also required to take at least one course covering pre-1900 American history or culture; this need not be an additional course, but can be one of the eight electives.

THE DEGREE WITH HONORS IN AMERICAN STUDIES
Candidates for honors in American Studies will undertake a substantial, year-long, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with a prospective faculty advisor in their junior year. Formal application to pursue honors should be made by the time of spring registration in the junior year. Students must submit a brief preliminary proposal describing the proposed project to the Chair of the American Studies Program at this time. Final admission to the honors thesis program will depend on the AMST advisory committee’s assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisors). If the proposal is approved, the student will be permitted to register for AMST 491, W30, and AMST 492 the following year. The completed project is due in the final week of the spring semester. Each student will present a short oral presentation of their thesis at the end of the semester. Honors Theses count as one of the eleven courses required for the major.

ADVISING
All majors will be assigned a faculty advisor. Majors must meet with their advisor during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. Both majors and non-majors are encouraged to talk at any time with the program chair or other affiliated faculty about the major.

**AMERICAN STUDIES AND OTHER PROGRAMS**

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women’s, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

**STUDY AWAY FROM WILLIAMS**

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major if their subject matter is American culture. Much of the required curriculum of the Williams at Mystic Program also counts toward the major.

Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their advisor about their plans for fulfilling the requirements of the major.

**SPECIALIZATION FIELDS**

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. (This commitment can be revised, in consultation with the chair.) At least five electives will be taken from among those designated to support a specialization field. In extraordinary cases, students who wish to do so may be permitted to design their own specialization field. All such arrangements must be approved by the American Studies Advisory Committee.

**ARTS IN CONTEXT**

This specialization is for students interested in American arts, literature and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—historical, social, political—that determine and situate those forms. Broadly, it asks how history has shaped the arts and media and how the arts and media have shaped how we think and who we are. Students in this specialization take courses across a range of genres and media: poetry, fiction, music, film and video, pop culture, visual culture, performance, experimental and activist art.

**Elective Courses**

Students may check with the program chair to see if other courses not listed here might count as electives.

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA
This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

CRITICAL AND CULTURAL THEORY
Critical and cultural theory is for students who want their American Studies work to combine philosophy, aesthetics, and social thought. Its approach is methodological, conceptual, and problem-driven. Students combine courses in feminist theory, anti-imperial and postcolonial theory, literary theory, critical race theory, queer theory, psychoanalysis, Marxism, and other counter-traditions in political theory and philosophy.

SPACE AND PLACE
This route focuses on the human landscape and the built environment. Courses listed below variously undertake the reading of geographical regions, patterns of habitation, imagined spaces, property relations and/or artifacts.

Elective Courses
AFR 211/ENVI 211/SOC 211/AMST 211 Race and the Environment
AFR 270 Digital Diaspora: Interrogating Race, New Media, and Black Cultural Production Online
AFR 300/AMST 300/SOC 306 Lessons of 'The Game': The Wire and American Culture
America has always named something more than a geographical place; being "American" has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Class Format: seminar

Requirements/Evaluation: total of 20 pages of writing; several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students
Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: NOTE: Prof. Nelson's section Spring 2019 only is NOT Writing Intensive. DPE: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities. WI: This course satisfies the WI requirement in its close attention to the processes of writing, argumentation, and revision; and in the total number of pages of writing produced.

Attributes: EXPE Experiential Education Courses;

AMST 105 (F) American Girlhoods (DPE) (WI)
Crosslistings: AMST105 / WGSS105 / ENGL105

Secondary Crosslisting
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Class Format: seminar
Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19

AMST 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color (DPE) (WI)

This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.
Class Format: tutorial
Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first- and second-years, students considering an American Studies major or Latina/o Studies concentration
Expected Class Size: 10
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: This DPE tutorial foregrounds the significance of age, as it crosscuts with race, class, and gender, in explorations of urban inequality in the United States.

Spring 2019
TUT Section: T1 Cancelled

AMST 113 (F) The Feminist Poetry Movement (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113
Secondary Crosslisting
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major “tool” for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery
Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS
DPE: This course examines difference, power, and equity during Feminism’s Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women’s Liberation Movement.
Attributes: AMST Critical and Cultural Theory Electives; ENGL Criticism Courses; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses
AMST 125 (F) Introduction to Asian American Studies

This course will offer students an introduction to the field of Asian American Studies. First, we will examine how history is shaped not only by laws and institutions but more significantly by people and social movements responding to the challenges of war, capitalism, colonialism, imperialism, immigration, globalization, and white supremacy. Secondly, we will pay an immediate attention to the dynamic, narrative intersections of race, ethnicity, class, gender, sexuality, ability, and nationality/citizenship. We will question how the social, political, and economic differences produced by these categories help to make and remake the multiple dimensions of Asian America from within and without. Finally, our discussions will illuminate the contradictions of power and spaces for possibility that emerge in key moments -- namely, how human actors strive to imagine, if not build visions and practices of the world in difference to the master narratives of American history and American exceptionalism. Our study will be supplemented with documentary screenings, oral histories, and personal memoirs.

Class Format: lecture

Requirements/Evaluation: attendance and participation; in-class group presentation; weekly online journal responses; midterm paper (5-7 pages); final creative project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: First-Years and Sophomores

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora;

---

AMST 126 (F) Black Literature Matters (DPE) (WI)

Crosslistings: AFR126 / AMST126 / ENGL126

Secondary Crosslisting

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Class Format: seminar

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or AFR
DPE: This course centers the relationship between black literature and black political movements from the 1920s to the present. Through discussions and short essays, students will develop skills for analyzing the essential role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present. WI: This course requires students to write four formal essays that total at least 20 pages. Students will also submit short in-class writing assignments.

**AMST 128 (S) Reading Asian American Literature (WI)**
Crosslistings: ENGL128 / COMP128 / AMST128

**Primary Crosslisting**

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetries. This writing-intensive course closely reads a sampling of texts in a variety of genres and styles-produced by writers from various Asian American ethnic groups—from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"—its contradictions, heterogeneous nature, and our assumptions—and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

**Class Format:** seminar

**Requirements/Evaluation:** six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective AMST or ENGL majors

**Expected Class Size:** 15

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under COMP or ENGL

**AMST 132 (F) Contemporary Africana Social and Political Philosophy**
Crosslistings: AFR132 / AMST132 / PSCI132

**Secondary Crosslisting**

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire, Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyeke, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrônke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on attendance and participation, two 5- to 7-page essays, and one 10-page final paper
AMST 146 (F) Introduction to Native American and Indigenous Studies  (DPE)

What does it mean to be a citizen of an Indigenous nation? Why are there laws against selling inauthentic Native American art? Who is two spirit and what obligations and politics does that position and identity entail? Where do we locate tradition and Indigenous peoples in time? In this course, we will address these questions and more, surveying indigeneity as it is constructed and expressed in historical narratives, activism and education, governance and identity, art and literature, science and religion, and gender and sexuality. Knowledge of the Indigenous is a foundational element of the United States. From missionaries documenting Indigenous languages, to sports mascots, DNA testing, and even to New Age spirit quests and sweat lodges, the coherence and legitimacy of this settler colonial empire has demanded expertise in and the appropriation of Indigenous bodies, knowledges, and cultures as a means of continually displacing and erasing them. And yet, that is not the only way to produce knowledge of, by, and with Indigenous people. Indigenous Studies provides a variant way of thinking and learning about indigeneity. The imperative of Indigenous Studies is to understand Indigenous peoples on their own terms and the world on those same terms. In this course we will explore not only questions related to Native America today, but also the various reasons and implications for why we study it.

Class Format: seminar

Requirements/Evaluation: attendance and class participation, three 3- to 5-page essays, and one in-class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: American Studies majors or first- and second-year students

Expected Class Size: 19

Distributions:  (D2) (DPE)

Distribution Notes:  DPE: This course addresses the dynamics of power inherent in studying Indigenous people in the academy, and will provide students the vocabulary and framework necessary to interrogate how settler colonialism and Indigenous survivance intersects with questions of race, gender, sexuality, and the construction of difference.

AMST 149 (F) First-Hand America  (WI)

Crosslistings: AMST149 / ENGL149

Primary Crosslisting

Gonzo journalism, the nonfiction novel, literary journalism, the "new new journalism": the study of American culture has thrived in the able hands of writers, reformers and amateur anthropologists. This course is an introduction to American writing and culture through the eyes of extraordinary witnesses who work as public intellectuals, addressing a readership that reaches beyond the university. Through essays, films and music we will track the documentary impulse from coast to coast: from Ferguson, Baltimore, Miami, Watts, Denver, Harlem, Chicago, Compton and Sing-Sing prison to the wilds of Alaska and rural Georgia; from mass demonstrations to the most intimate, bedside revelations. How have writers and artists given their
audiences tools for understanding power, privilege, and difference in America?

Class Format: seminar
Requirements/Evaluation: multiple short essays and revisions, peer-editing and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

AMST 156 (F)  Thirteen Ways of Looking at Jazz  (WI)
Crosslistings: AMST156 / COMP156 / AFR156 / ENGL223

Secondary Crosslisting
Taking its title from the Wallace Stevens poem, "Thirteen Ways of Looking at a Blackbird," which interprets the blackbird in different ways, this course similarly explores a more complex, multi-layered perspective on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicological method but rather a socio-cultural analysis of the concept, music and its effect--so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weds their increased critical thinking skills.

Class Format: lecture
Requirements/Evaluation: evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/performance with 3-page critical report, totaling approximately 20 pages of written work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 19
Distributions: (D2) (WI)

AMST 165 (S)  Slavery in the United States  (WI)
Crosslistings: AFR164 / AMST165 / HIST164

Secondary Crosslisting
Slavery and freedom rose as concomitant ideologies--simultaneously and interrelated--critical to the development of the American colonies and United States. Few areas of American social, political, and economic history have been more active and exciting in recent years than the study of this relationship. This seminar introduces students to the most important aspects of American slavery, beginning with an examination of the international slave trade and traces the development of the "peculiar institution" to its demise with the Civil War.

Class Format: seminar
Requirements/Evaluation: building on several preliminary essays, each student will complete a research project which leads to a final research paper

**AMST 167 (F)  Let Freedom Ring? African Americans and Emancipation (WI)**

Crosslistings: AFR167 / HIST167 / AMST167

Secondary Crosslisting

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

**Class Format:** seminar

**Requirements/Evaluation:** research paper, short writing assignments, class participation

**Prerequisites:** First-Years and Sophomores

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**AMST 205 (F) Chicana/o Film and Video**

Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203

Secondary Crosslisting

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** film screenings will be scheduled as a lab
**Requirements/Evaluation:** evaluation will be based on one short paper, mid-term exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 30

**Expected Class Size:** 20

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH

**Attributes:** AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; ARTH post-1600 Courses; FMST Core Courses; GBST Borders, Exiles + Diaspora Studies Electives; LATS Core Electives

**AMST 207 (F) Introduction to Latina/o Literatures**

Crosslistings: AMST207 / ENGL251 / LATS208 / COMP211

Secondary Crosslisting

This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. Readings include works by Tómas Rivera, Cristina García, Cristy C. Road, Oscar Zeta Acosta, Junot Díaz, Alisa Valdes-Rodriguez, and more.

**Class Format:** lecture

**Requirements/Evaluation:** students will be evaluated based on weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies and Comparative Literature majors

**Expected Class Size:** 20

**Distributions:** (D2)

**Distribution Notes:** meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST or LATS

**Not offered current academic year**

**AMST 208 (F) Time and Blackness (WI)**

Crosslistings: AFR208 / REL262 / AMST208

Secondary Crosslisting

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable
African-American "timescape"?

Class Format: tutorial

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

AMST 211 (F) Race and the Environment
Crosslistings: AFR211 / SOC211 / AMST211 / ENVI211

Secondary Crosslisting
In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's Dumping in Dixie and David Pellow's Garbage Wars. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

AMST 214 (S) Asian-American Identities in Motion: Global Approaches to Dance
Crosslistings: DANC214 / THEA215 / AMST214 / GBST215

Secondary Crosslisting
The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a
discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: evaluation includes reading responses and essays, class participation, and presentations

AMST 214 (F) Performance Ethnography: Global Approaches to Dance

Crosslistings: ANSO214 / THEA215 / AMST214 / DANC214 / GBST215

Secondary Crosslisting

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement and performance ethnography. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) will read ethnographic studies of dance and performance practices from different parts of the world, and (iii) will do field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and will include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: class participation, reading responses and essays, fieldwork and field notes, and presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 216 (F) Landscape, Place and Power

Crosslistings: AMST216 / ENVI217

Secondary Crosslisting

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental
AMST 218 (S)  Gender and Sexuality in the Neo-slave Narrative  (WI)

Crosslistings: WGSS218 / AMST218 / ENGL218

Secondary Crosslisting

Hortense Spillers has noted that ex-slave Harriet Jacobs, “between the lines of her narrative, demarcates a sexuality that is neuterbound” and we live with the aftermath of her observation. “Ungendering,” one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, gender, and sexuality. Throughout this course we will wrestle with the questions: How does the designation “slave” rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include slave narratives such as those by Mary Prince and Frederick Douglass and neo-slave narratives such as Octavia E. Butler’s *Kindred*, Jewelle Gomez’s *Gilda Stories*, and Jordan Peele’s *Get Out.*

Class Format: seminar

Requirements/Evaluation: weekly keyword responses, one presentation, four papers totaling about 20 pp. including an engaged feedback process, thoughtful class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Spring 2019

SEM Section: 01    MWF 9:00 am - 9:50 am     Ianna Hawkins Owen

AMST 219 (F)  Understanding Social Class  (DPE)

Politicians and pundits often bill the United States as a classless society, owing to its lack of a feudal past. Since the 1950s, most Americans--including many whom sociologists would deem wealthy or poor--have come to describe themselves as "middle class." But this may be changing. Bernie Sanders' strident calls to reign in Wall Street greed remain enormously popular. And since the election of President Trump, journalists have rediscovered a group they call "the white working-class" while books such as *Hillbilly Elegy* and *White Trash* have moved to the top of the best seller lists. So, what is class and how does it shape our lives today?  This course is designed to introduce students to the study of social class in an interdisciplinary fashion. We will use memoir and works of fiction to better grasp the life experiences and worldviews of people on different rungs of the economic ladder. Then we will delve into the ways that major theorists, such as Karl Marx, Max Weber, and Pierre Bourdieu have defined social class
in terms of work life, social standing in a community, and bundles of “tastes” or consumption preferences. We will turn to historians to make sense of the patterns by which class inequality developed in tandem with racial oppression in the United States, and to the competing arguments of sociologists attempting to explain the growing wealth gap. Finally, we will look to activists and social workers to see how individuals and groups work to bridge the class divide in attempts to mitigate poverty and challenge inequalities. Throughout, participants will be encouraged to use assigned materials as prompts to think critically about how class shapes their own lives.

Class Format: tutorial

Requirements/Evaluation: attendance, participation, three papers 5-10 pages each

Extra Info: Not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students, American Studies majors

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: DPE: The course focuses on the ways access to material wealth, and perceived class position shape life experiences. We will analyze different aspects of class power, from employment relations, to political influence, to self-confidence. The last weeks of the course will address ways movements seek to bridge class divides to challenge economic and other forms of inequality. The course will be intersectional throughout—discussing how class, race, and gender inequalities reinforce one another.

AMST 221 (F) Introduction to Urban Studies: Shaping and Living the City

Crosslistings: LATS220 / AMST221 / ENVI221

Secondary Crosslisting
Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

AMST 224 (S) U.S. Latinx Religions

Crosslistings: REL224 / AMST224 / LATS224

Secondary Crosslisting

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latinx communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices --such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería--by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, questions of how one studies Latinx religions.

Class Format: discussion

Requirements/Evaluation: based upon class participation, short writing exercises, a 5-page essay, and an 8-12-page final review essay

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; LATS Core Electives

Not offered current academic year

AMST 226 (S) Gender and the Dancing Body

Crosslistings: THEA226 / AMST226 / DANC226 / WGSS226

Secondary Crosslisting

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative values. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course but will also include attendance at live performances, film screenings, and discussions with guest artists. No previous dance experience required.

Class Format: seminar
AMST 228 (F)  Revolt and Revelation in 20th-Century Americas

Crosslistings: AMST228 / AFR228 / LATS228 / REL223

Secondary Crosslisting

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of “God-talk” broadly termed “liberation theologies” that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Class Format: seminar

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: majors and concentrators

Expected Class Size: 12

Distributions: (D2)

Attributes: LATS Core Electives

Not offered current academic year

AMST 229 (S)  Reel Jesus: Reading the Christian Bible and Film in the U.S.A.  (WI)

Crosslistings: REL229 / AMST229

Secondary Crosslisting

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ(2004), Jesus Christ Superstar(1973), The Shawshank Redemption(1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of “popular culture” affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read...
selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D2) (WI)

AMST 231 (S)  Approaches to Media Studies: Analyzing Mediated Difference

Crosslistings: LATS231 / AMST231 / WGSS232

Secondary Crosslisting

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

Expected Class Size: 12

Distributions: (D2)

Not offered current academic year

AMST 236 (S)  Making Things Visible: Adventures in Documentary Work

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps and resonances between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will try their hand at methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of classical and recent examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving platforms on which such work can be presented, both off- and on-line. Lastly, we will pose and debate ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. In addition to readings, students should be prepared to spend a significant time out of the classroom doing fieldwork. Experience in photography and/or video, although not required, will be helpful.
AMST 237 (F) Islam in the United States: From Black Muslims to the War on Terror

Crosslistings: AFR237 / REL237 / AMST237

Secondary Crosslisting

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

Class Format: seminar
Requirements/Evaluation: in-class participation and presentations; 3 short essays; final project
Prerequisites: none
Enrollment Preferences: none
Expected Class Size: 12
Distributions: (D2)

AMST 239 (S) Asian American and Pacific Islander Sporting Cultures (DPE)

From the NBA to the Olympics, community leagues and tournaments to home watch parties and celebrations, sports play a pivotal part in the lives,
livelihoods, and leisure of Asian Americans and Pacific Islanders. In this course, we will take an interdisciplinary and intersectional approach to examining how AA/PI sporting cultures are intimately tied to processes of citizenship, identity formation, and racialization against the backdrop of nation and empire. We will analyze how the complex network of players/competitors, spectators, investors, marketers, and governing bodies mediate national and transnational narratives of democracy, colorblindness, meritocracy, multiculturalism, and neoliberalism, especially in their (non)equivalence to the Model Minority Myth. We will also reflect meaningfully about our own fandom and/or involvement with sports in relation to our pleasure, passion, entertainment, and "fun."

Class Format: seminar

Requirements/Evaluation: weekly reading responses, a midterm paper (7-8 pages), an ethnography, and a critical PSA/commercial

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: AMST 101/201 Intro to American Studies

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: DPE: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultures of these groups.

AMST 240 (S)  Latina/o Language Politics: Hybrid Voices

Crosslistings: AMST240 / LATS240 / COMP210

Secondary Crosslisting

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar

Requirements/Evaluation: participation, two essays, final take-home examination

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Expected Class Size: 12

Distributions: (D2)

AMST 241 (F) Performing Masculinity in Global Popular Culture
Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar
Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited
Expected Class Size: 20
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA
Attributes: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

AMST 242 (S) Americans Abroad (DPE) (WI)
Crosslistings: AMST242 / COMP242 / ENGL250

Secondary Crosslisting
This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Class Format: seminar
Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any literature course at Williams or permission of instructor
Enrollment Limit: 18
Expected Class Size: 18
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST
DPE: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

**AMST 244 (S) What They Saw in America**

Crosslistings: HIST366 / AMST244 / SOC244

Secondary Crosslisting

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

**Class Format:** seminar; * Please note atypical class hour Monday, 4:45-8:30 pm.

**Requirements/Evaluation:** several short response pieces; a final paper of 10-15 pages

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 9

**Enrollment Preferences:** juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor

**Expected Class Size:** 9

**Department Notes:** * Please note atypical class hour Monday, 4:45-8:30 pm.

**Distributions:** (D2)

**Attributes:** HIST Group F Electives - U.S. + Canada

* Not offered current academic year

**AMST 245 (F) Introduction to Native American and Indigenous Studies**

Crosslistings: AMST245 / ANTH245 / HIST255 / WGSS247

Primary Crosslisting

What does it mean to acknowledge the literal land we stand upon—in Williamstown and beyond—as the occupied territory of indigenous peoples? This course strives to answer that question by offering an introduction to the histories, politics, knowledges, and arts of indigenous peoples across the Americas and Native Pacific. Foregrounding the ways in which indigenous peoples have resisted, refused, and reimagined ongoing histories of settler colonialism, we will survey scholarship in the interdisciplinary field of Native American and Indigenous Studies. By analyzing such scholarship alongside a range of primary sources—including historical documents, literature, film, visual art, music, and social media—we will examine the complex interweavings of indigeneity, race, gender, and sexuality. Throughout the course, we will discuss topics of both past and present importance, such as environmental justice, cultural representation, and self-determination.

**Class Format:** seminar

**Requirements/Evaluation:** one 2- to 3-page response paper, one 5- to 6-page analytical essay, one 8- to 10- page research paper, weekly Glow posts, and regular class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option
AMST 246 (S)  Aesthetics and Place-making in Latina/o New York

Crosslistings: AMST246 / LATS246

Secondary Crosslisting
New York City has long served as a nexus of Latina/o migration and settlement since the late nineteenth century. From the New York sound of Afro-Cuban and Puerto Rican salsa to the poetics of slam poetry forged in the Nuyorican Poets Cafe, New York's Latinas/os have defined and developed numerous forms of Latina/o popular expression. This course examines the aesthetic foundations of Latina/o New York, remaining attentive to the numerous diasporas that have migrated to and made the city their home. Student will engage with a multiplicity of popular cultural genres including memoirs, literature, poetry, sound, visual art, and photography in the context of the history of the city while focusing on key themes of racial formation, the politics of space and place, and the labor of culture.

Class Format: lecture/discussion

Requirements/Evaluation: attendance and class participation, short writing exercises, 4- to 5-page midterm paper close-reading a text, and a 10- to 15-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 247 (S)  Race and Religion in the American West

Crosslistings: LATS247 / ENVI247 / REL247 / AMST247

Secondary Crosslisting
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscrapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)
AMST 248 (F)  Black Women in African American Literature and Culture  (WI)
Crosslistings: ENGL248 / AMST248 / WGSS258
Secondary Crosslisting
This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series Insecure.
Class Format: seminar
Requirements/Evaluation: active class participation, 4 short papers totaling about 20 pp., final project on the hashtag #blackgirlmagic
Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences:  first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Distributions: (D1) (WI)
Distribution Notes:  meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS
Attributes:  ENGL 200-level Gateway Courses;
Not offered current academic year

AMST 250  Social Class: Multidisciplinary Approaches
Despite decades of growing income inequality, many Americans remain reluctant to discuss socio-economic class. Why is that? And how does one define "class" anyway? This course will introduce students to the ways sociologists, historians, novelists, and others make sense of the differences in economic role, social status, and cultural taste that congeal in the notion of class. We will seek greater understanding of the lived experiences of poor, working class, middle class, and upper class Americans, and we'll investigate unique "class fractions" such as bohemians and professionals. Throughout, we will consider the ways that race, gender, and sexuality interact with class to shape identity and power.
Class Format: seminar
Requirements/Evaluation: attendance and participation; personal narrative essay, one additional short essay, brief midterm, and final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors
Expected Class Size: 20
AMST 252 (S) Puerto Rico and its Diaspora
Crosslistings: AMST252 / LATS252

Secondary Crosslisting
On September 20, 2018, Maria—a category four hurricane—made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island’s status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship.

Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico. This course is a unique collaboration between Vassar, Williams, and the UPR. Students will participate in some Skype sessions with their peers. We will also gather in Puerto Rico for an alternative spring break, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and the Institute for Socio-Ecological Research are among the organizations in Puerto Rico that students may work with as a part of the course’s community engage component.

Class Format: seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 10

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

Expected Class Size: 10

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; EXPE Experiential Education Courses; LATS Core Electives

Spring 2019
SEM Section: 01 MWF 8:30 am - 9:45 am Mérida Rúa

AMST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)
Crosslistings: HIST256 / AMST256 / AFR257

Primary Crosslisting
We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the “freedom dreams,” tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of “justice.” Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study
the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Class Format: seminar

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Limit: 35

Enrollment Preferences: first years, sophomores, and American Studies majors

Expected Class Size: 25

Distributions: (D2) (DPE)

Distribution Notes: DPE: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. Focus on strategies and tactics: e.g. demonstrations, guerrilla theatre, electoral campaigns, strikes. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

AMST 264 (S) American Art and Architecture, 1600 to Present
Crosslistings: ARTH264 / AMST264

Secondary Crosslisting

American art is often looked at as a provincial version of the real thing--i.e., European art--and found wanting. This course examines American architecture, painting, and sculpture on its own terms, in the light of the social, ideological and economic forces that shaped it. Special attention will be paid to such themes as the Puritan legacy and attitudes toward art; the making of art in a commercial society; and the tension between the ideal and the real in American works of art.

Class Format: lecture

Requirements/Evaluation: 15-page research paper (divided into an annotated bibliography, first draft and revised draft); weekly study questions on the readings; final 15-minute oral exam

Enrollment Limit: 60

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST

Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; ARTH post-1600 Courses; Not offered current academic year

AMST 272 (F) American Postmodern Fiction
Crosslistings: ENGL272 / AMST272

Secondary Crosslisting

American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's Catch-22. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's The Crying of Lot 49, Morrison's Beloved, Delillo's White Noise, Carver's What We Talk About When We Talk About Love., Diaz's The Brief Wondrous Life Of Oscar Wao, and Whitehead's The Underground Railroad.

Class Format: seminar
AMST 275 (S)  American Drama: Hidden Knowledge  (WI)
Crosslistings: COMP275 / ENGL224 / THEA275 / AMST275
Secondary Crosslisting
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli’s The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial
Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Theatre and English majors
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under THEA, COMP or ENGL; meets Division 2 requirement if registration is under AMST
Attributes: AMST Arts in Context Electives;
Not offered current academic year

AMST 283 (F)  Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film
Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286
Secondary Crosslisting
In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009),
Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR or AMST; meets Division 1 requirement if registration is under ENGL

Attributes: FMST Core Courses; WGSS Racial Sexual + Cultural Diversity Courses

Fall 2018

SEM Section: 01  W 1:10 pm - 3:50 pm  Kai M. Green

AMST 284 (S) Introduction to Asian American History  (DPE)

Crosslistings: HIST284 / AMST284 / ASST284

Secondary Crosslisting

This course covers the immigration of Asian to the U.S. from the 1850s to the present and the lives of both immigrants and their descendants. Possible topics are the Chinese Exclusion Act, the incarceration of Japanese Americans during WWII and the arrival of Vietnamese to the U.S. after the war in Viet Nam.

Class Format: lecture/discussion

Requirements/Evaluation: a series of short essays and a final oral history/family history

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first come, first served

Expected Class Size: 25

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course traces the immigration history of various peoples from Asia to the U.S. from the 1850s to the present. We will focus on the legal barriers to Asian American immigration and citizenship that reveal the racial, class, gender, and religious biases against people from that part of the world. By examining these issues, we will see an unequal balance of power as well as the various ways Asian immigrants resisted American immigration laws and would eventually build communities in many parts of the U.S.

AMST 300 (F) Tell Even Us: Writing Memory, Trauma, Self  (DPE)

Crosslistings: COMP357 / ENGL300 / AMST300

Primary Crosslisting
In this course, we will read a diverse selection of personal memoirs dealing with the traumas, transgressions, and transformations of what we understand to be “modern life.” We will meditate on how categories of identity and experience, memory and history are being constructed and deconstructed, reimagined and remade anew. We will pay special attention to how these writers/artists narrate the overlapping cycles of loss, pain, grief, survival, resilience, and resistance in the face of (structural, institutional, interpersonal, and intimate) violence, and consider the possibilities for (individual and collective) healing that can exist in and beyond the world as we know it. What, after all, does it even mean to have or to not have, to find, to lose, to have stolen, to dissolve, and/or to recover a self in a besieged America? Books we will cover may include: *Borderlands/La Frontera: The New Mestiza* (Gloria Anzaldúa), *Dictee* (Theresa Hak Kyung Cha), *How to Write an Autobiographical Novel* (Alexander Chee), *When They Call You A Terrorist: A Black Lives Matter Memoir* (Patrisse Khan-Cullors and asha bandele), *Bad Indians: A Tribal Memoir* (Deborah Miranda), *This is for the mostless* (Jason Magabo Perez), *Redefining Realness* (Janet Mock), *like a solid to a shadow* (Janice Lobo Sapigao), *Men We Reaped* (Jesmyn Ward), *7 Miles A Second* (David Wojnarowicz).

**Class Format:** seminar

**Requirements/Evaluation:** weekly reading responses, a midterm paper (7-8 pages), and a manuscript for a memoir in a medium of their own choosing

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 15

**Distributions:** (D2) (DPE)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP

**DPE:** Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

**Attributes:** AMST Arts in Context Electives;

**AMST 301 (S) Theories and Methods in American Studies (Junior Seminar)**

This course aims to provide a "how to" of American Studies from an integrative, multiracial, and socio-cultural perspective. Taking American culture as a site for testing classic and contemporary theories about how cultures work, the Junior Seminar in American Studies serves as an introduction to resources and techniques for interdisciplinary research. Students will be exposed to and experiment with a wide range of current theoretical and methodological approaches employed in American Studies and contributing disciplinary fields, and in the process gain a working competence in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity and Diaspora; Arts in Context; and Critical and Cultural Theory). The goal of the course is not only for students to develop knowledge of main currents in the field of American Studies but also to become practitioners through a series of assignments that will permit students to exercise their newfound skills. Students will thus, for instance, develop rhetorical analyses, gather ethnographic data, and "read" assorted spaces and buildings, as the class explores such problems or topics as national narratives, ethnoracial formations, the American prison system, and the circulation of commodities.

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based on class participation and a wide variety of student assignments, ranging from postings to the class Glow site, to short, analytical essays (5 pp.), to field work exercises, to in class presentations

**Prerequisites:** AMST 101/201 Intro to American Studies, junior or senior standing, or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** juniors majoring in American Studies

**Expected Class Size:** 12

**Department Notes:** required of junior majors

**Distributions:** (D2)
AMST 302 (F)  Environmental planning workshop: community-based environmental problem solving
Crosslistings: ENVI411 / AMST302

Secondary Crosslisting
This interdisciplinary, experiential workshop course introduces students to the field of planning through community-based projects. Environmental Planning encompasses many fields pertaining to the natural and built landscape such as city planning, sustainable design, natural resource planning, landscape design, agricultural planning, climate planning, transportation planning, and community development. Students will get out of the classroom and gain direct experience working on the planning process in the greater Berkshire region. The class is organized into two parts. Part 1 focuses on reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework. Part 2 focuses on project work in which students apply the concepts learned to tackle an actual community problem. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including research, interviews, survey research, mapping, and site design. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related workshop sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, hands-on design, and team work. The class culminates in a public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab
Requirements/Evaluation: short written exercises, class discussion, class presentations, final group report
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only
Enrollment Limit: 16
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 16

Department Notes: required course for Environmental Studies major and concentration
Distributions:
Distribution Notes: does not meet Division 1, 2, or 3 requirements

AMST 304 (S)  Asian American Writing and the Visual Arts
Crosslistings: AMST304 / COMP307 / ENGL388

Primary Crosslisting
This course examines the intersection of Asian American writing and the visual arts in a range of works: graphic novels, art criticism, collaborative projects between poets and visual artists, works that combine textual and visual elements, ekphrastic poetry, poetry "inspired by" paintings, video work, digital poetry, among others. Writers and artists to be discussed include Mei-mei Berssenbrugge, Theresa Cha, Patty Chang, Mel Chin, Bhanu Kapil, Janice Lee, Tan Lin, Yoko Ono, Adrian Tomine, and John Yau.
Class Format: seminar
Requirements/Evaluation: two papers, short assignments, presentation, participation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ENGL or COMP
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; FMST Core Courses
Not offered current academic year

AMST 307 (F) Experimental African American Poetry
Crosslistings: AMST307 / AFR301 / ENGL327 / COMP311
Primary Crosslisting
Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.
Class Format: seminar
Requirements/Evaluation: two papers (6-8 pp., 8-10 pp.), short response papers, oral presentation, and class participation
Prerequisites: none, though at least one previous literature course preferred
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AMST or AFR; meets Division 1 requirement if registration is under COMP or ENGL
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;
Not offered current academic year

AMST 308 (F) Thinking Diaspora: The Black Atlantic and Beyond
Crosslistings: AMST308 / ENGL309 / WGSS308 / COMP300
Secondary Crosslisting
Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage---suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature--how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy's The Black Atlantic, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students' theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise'eke Tinsley, and Vanessa Agard-Jones. Primary texts will include The Big Sea by Langston Hughes, Sugar and Slate by Charlotte Williams, Barry Jenkins' Moonlight, and more.
Class Format: seminar
Requirements/Evaluation: weekly reading responses, presentations, one 10-page paper, engaged feedback process, and thoughtful class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: none
Fall 2018
SEM Section: 01    MWF 11:00 am - 12:15 pm     Ianna Hawkins Owen

**AMST 309 (F) Womanist/Black Feminist Thought**

Crosslistings: AMST309 / AFR310 / WGSS310 / REL310

Secondary Crosslisting

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors

**Expected Class Size:** 20

Distributions: (D2)

Attributes: AFR Core Electives;  AMST Comp Studies in Race, Ethnicity, Diaspora;  AMST Critical and Cultural Theory Electives;  WGSS Racial Sexual + Cultural Diversity Courses;  WGSS Theory Courses

**AMST 312 (S) Chicago**

Crosslistings: LATS312 / AMST312 / ENVI313

Secondary Crosslisting

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (
AMST 313 (F) Gender, Race, and the Power of Personal Aesthetics
Crosslistings: AFR326 / AMST313 / WGSS313 / LATS313

Secondary Crosslisting
This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Class Format: seminar
Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority
Expected Class Size: 12
Distributions: (D2)
Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Related Courses; LATS Core Electives; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses

AMST 314 (F) Groovin' the Written Word: The Role of Music in African American Literature
Crosslistings: AMST314 / COMP321 / ENGL314 / AFR314

Secondary Crosslisting
In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to
have technical musical knowledge.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Distributions: (D2)

Attributes: AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;

Not offered current academic year

AMST 315 (S)  Blackness 2.0: Race, Film and New Technologies
Crosslistings: AMST315 / AFR315 / SCST315

Secondary Crosslisting

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of 'new' technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the 'real' vs 'virtual' world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Distributions: (D2)

AMST 317 (F)  Black Migrations: African American Performance at Home and Abroad
Crosslistings: DANC317 / AFR317 / COMP319 / AMST317 / THEA317 / ENGL317

Secondary Crosslisting

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration
of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion

Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

Enrollment Limit: 15

AMST 318 (F) California: Myths, Peoples, Places (WI)

Crosslistings: ENVI318 / LATS318 / REL318 / AMST318 / COMP328

Secondary Crosslisting

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Class Format: seminar

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under LATS, AMST, ENVI or REL

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; LATS Core Electives;

Not offered current academic year

AMST 322 (F) Race, Culture, Incarceration (WI)

Crosslistings: AMST322 / AFR322 / INTR322 / PSCI313

Secondary Crosslisting

This course explores racially-fashioned policing and incarceration from the Reconstruction era convict prison lease system to contemporary mass incarceration and "stop and frisk" policies of urban areas in the United States. Also explored will be political imprisonment in the United States.

Class Format: seminar
AMST 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
Crosslistings: AFR323 / ARTH223 / ENGL356 / AMST323 / COMP322
Secondary Crosslisting
This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love’s *Bayou* and Ho Che Anderson’s *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.
Class Format: seminar
Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 19
Department Notes: this course is part of the Gaudino Danger Initiative
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under AFR or AMST; meets Division 1 requirement if registration is under ARTH, COMP or ENGL

AMST 324 (S) Indigenous Women’s History (DPE) (WI)
Crosslistings: AMST324 / HIST362 / WGSS324
Primary Crosslisting
What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women’s lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.
Class Format: seminar
Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies, History, and Women's Studies, Gender and Sexuality majors

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: In this course, we examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives. WI: With substantial focus on students' development of independent research papers, this course satisfies the WI requirement.

AMST 327 (S)  Racial and Religious Mixture  (WI)

Crosslistings: AMST327 / AFR427 / LATS427 / REL314

Secondary Crosslisting

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora;

Not offered current academic year

AMST 328 (F)  American Social Dramas  (WI)

Crosslistings: SOC328 / THEA328 / AMST328 / COMP325

Secondary Crosslisting

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the
meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under SOC or AMST; meets Division 1 requirement if registration is under COMP or THEA

Not offered current academic year

**AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

Crosslistings: THEA330 / COMP330 / AMST331

**Secondary Crosslisting**

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafrcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Class Format:** seminar

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** none

**AMST 332 (S) Race, Gender, and Performance from Literature to Social Media**

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

**Secondary Crosslisting**

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's *Venus*, David Henry Hwang's *M. Butterfly*, and Young Jean Lee's *The Shipment* to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage
foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

**Class Format:** seminar

**Requirements/Evaluation:** in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

**Extra Info:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**AMST 333 (S) An American Family and "Reality" Television (WI)**

Crosslistings: COMP316 / AMST333 / ARTH310 / WGSS312

**Secondary Crosslisting**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Class Format:** seminar

**Requirements/Evaluation:** class presentations, research assignments, and final 16- to 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** junior majors, followed by senior majors

**Expected Class Size:** 14

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH or COMP; meets Division 2 requirement if registration is under AMST or WGSS

**Attributes:** AMST Arts in Context Electives; ARTH post-1600 Courses; FMST Core Courses;

Not offered current academic year

**AMST 334 (F) Sexual Economies (DPE)**

Crosslistings: WGSS301 / ANTH301 / AMST334

**Secondary Crosslisting**

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American
studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.

Class Format: seminar

Requirements/Evaluation: midterm essay exam, final research paper, research proposal/annotated bibliography

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 20

Enrollment Preferences: based on statement of interest

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: DPE: We will study various questions related to sexual empowerment, agency, vulnerability, and exploitation in myriad global contexts. We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

SEM Section: 01    MR 1:10 pm - 2:25 pm     Gregory C. Mitchell

AMST 335 (S)  Uncovering Williams

Crosslistings: AMST335 / ARTH335

Primary Crosslisting

Sparked by current controversies around visual representations at Williams, this course--a joint effort of the Williams College Museum of Art and the American Studies Program--interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

Class Format: seminar

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) + bibliography

Extra Info: may not be taken on a pass/fail basis

Prerequisites: sophomore standing or permission of the instructor(s)

Enrollment Limit: 19

Enrollment Preferences: AMST majors

Expected Class Size: 19

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under ARTH

Not offered current academic year

AMST 336 (S)  Two American Poets: Wallace Stevens and John Ashbery  (WI)

Crosslistings: ENGL320 / AMST336 / COMP335
This tutorial focuses on the work of two major American poets who are known for their "difficult" poetry. In some respects, Stevens (1879-1955) and Ashbery (b. 1927) book-end twentieth-century poetry: Stevens is a major Modernist poet, perhaps the most philosophically oriented American poet of the twentieth century, and Ashbery is considered by most critics to be the most important American poet alive. Students will do close readings of their poems (and one play, "Three Travelers Watch a Sunrise", by Stevens), as well as read their writing on poetry and art. We will discuss the overlaps between Stevens' and Ashbery's work and lives--their having grown up in the Northeast and attended Harvard, what some see as the abstractness of their writing, their mastery of tone, among others--but also the differences: Ashbery's sexuality, his having lived in France, the supposedly more "avant-garde" nature of Ashbery's work, and so on. Along the way, we will ask questions about the nature of poetic difficulty, of abstraction, of the (lyric) poetic speaker in their works, of poetic tone, of the link between the poem and the world (e.g., in description), of the thinking and philosophizing that poems do. We will also ask about their links to major poetry "movements" (Modernism, the New York School) and pose questions that are rarely asked about their poetry, such as "What are the politics, implicit and explicit, in their poems?" "What are their views about the United States and American society and culture?" "What assumptions about race, gender and class are embedded in their poetry?" And, always, we will be paying close attention to the question of form and language in Stevens' and Ashbery's poetry.

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; papers every other week

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: ENGL majors, COMP majors, AMST majors; preference will be given to students who have already taken at least one literature class

Not offered current academic year

AMST 338 (F) The American Renaissance
Crosslistings: ENGL338 / AMST338

"The American Renaissance" is the name given to US literature from 1830-1860. The explosive cultural energy of this period resulted from a multitude of ideas, practices and formations: the unprecedented spread of empire under the banner of "manifest destiny"; the formation of the white middle class; the consolidation of pro- and anti-slavery political factions; religious and spiritual experimentation; new, contested definitions of self, work, race, class and gender; and the looming Civil War. In short, a historical moment not unlike our own. If you want to understand contemporary American culture, the mid-19th century provides an uncanny key. We will read works by Emerson, Thoreau, Douglass, Jacobs, Whitman, Poe, Hawthorne, Dickinson, Melville, and a host of lesser known writers. We will also make constant reference to contemporary American literature, music, and art.

Class Format: seminar

Requirements/Evaluation: 3 papers totaling about 15 pages, class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on he Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors, American Studies majors

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST

Attributes: ENGL Literary Histories B
AMST 339 (S) Latina/o Musical Cultures: Sounding out Gender, Race, and Sexuality (WI)
Crosslistings: LATS338 / WGSS338 / AMST339

Secondary Crosslisting
In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Class Format: seminar
Requirements/Evaluation: class participation, one semester-long original research project conducted in stages
Extra Info: may not be taken on a pass/fail basis
Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

AMST 340 (S) Elizabeth Bishop in the Americas (DPE)
Crosslistings: COMP342 / WGSS340 / ENGL340 / AMST340

Secondary Crosslisting
Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: seminar; seminar, three hours per week, small group discussion, archival research
Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AMST
This course examines difference, power, and equity in poetry and other writing produced during the Cold War period in the Americas. As the course description indicates, Elizabeth Bishop provides the central focus of our interrogation of questions and constructions of race, class, sexuality, national identity, and power in the U.S. and Brazil during a time of intense exchange between the two nations. This course employs critical tools (case studies, translation theory, archival research, poetics, close reading, comparative approaches, postcolonial theory) to help students question and articulate the way that social injustice, such as racial inequality, poverty, and colonial conquest, shapes national and individual identities. Students will learn how to articulate how our aesthetic and cultural products also serve to shape these identities but also can challenge the dominant power structures.

AMST 341 (S)  American Genders, American Sexualites
Crosslistings: WGSS342 / ENGL341 / AMST341

Secondary Crosslisting

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods—roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and the contemporary context of the "postmodern" 21-century—we will explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freund, Harmond, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and/or students interested in WGSS

AMST 343 (F)  Representations of Racial-Sexual Violence from Enslavement to Emancipation (WI)
Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Secondary Crosslisting

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, LGBTQ and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.

Requirements/Evaluation: weekly primary and response papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

**AMST 346 (F) Latinas/os and the Media: From Production to Consumption (WI)**

**Crosslistings:** LATS346 / AMST346

**Secondary Crosslisting**

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

**Class Format:** seminar  
**Requirements/Evaluation:** evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**AMST 348 (F) Graphic Narratives as Democratic Ideals**

**Crosslistings:** COMP348 / LATS348 / AMST348

**Secondary Crosslisting**

This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. The primary focus will be on texts that explore themes of democracy and Latinidades. We will also discuss the "graphic activism" of artists like Sharon Lee De La Cruz of Digital Citizens Lab, a design collective with a focus on civic technology. Throughout the course, students will have the opportunity to create their own graphic narratives, either digitally or in print. Possible guest speaker: comic book artist Ivan Vélez (Planet Bronx, 2015 Creative Capital Award in Visual Arts).

**Class Format:** seminar/workshop  
**Requirements/Evaluation:** based on attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper
AMST 349 (S)  Sexuality and US Literatures of the 19th Century
Crosslistings: AMST349 / WGSS329 / ENGL329

Secondary Crosslisting
If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what constituted "sexualities" before that? This course will explore how sexualities were expressed, regulated, denied and embraced "before identity" through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

Class Format: seminar
Requirements/Evaluation: engaged and thoughtful discussion, in-class writings, oral presentation, one 5- to 7-page paper and one 8- to 10-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: ENGL, WGSS, and AMST majors
Expected Class Size: 19
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or WGSS
Attributes: ENGL Literary Histories B
Not offered current academic year

AMST 352 (S)  Grassroots Organizing and Civil Resistance  (DPE)
This course examines the ways that ordinary people exercise collective power to influence elites, access resources, and even topple authoritarian governments. We will explore a variety of case studies--from the U.S. labor movement and urban community organizing, to recent direct action campaigns to prevent climate catastrophe--in order to gain insight into the art and science of grassroots mobilization. The class will make use of scholarship from the fields of history, sociology, and peace studies to probe the nature of political consent and the efficacy of forms of nonviolent action, such as boycotts, strikes, and blockades. Most importantly, however, we will draw from the personal expertise, tool kits, and training manuals of on-the-ground organizers to develop practical skill sets that can be applied in a variety of settings. Students will gain hands-on experience with important organizing techniques, such as power-mapping, 1-on-1 conversations, and action scenario planning. We will also consider the importance of expressive cultures and artistic practices to social change efforts, and delve into abiding challenges, such as building coalitions across race and class differences. The course will prove useful for those considering careers in social work, the labor movement, international NGOs, the law, public education, or political journalism.

Class Format: seminar
Requirements/Evaluation: attendance and participation; in-person skills assessments; group project; short essay-style final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: DPE: The class combines knowledge generated by social scientists with the practical know how of grassroots organizers on the most effective ways for people without significant financial resources to change opinions, laws, and regimes. Students practice specific skills such as one-on-one organizing conversations, power-mapping, strategic messaging, and planning of nonviolent direct actions to gain attention or bargaining leverage. We directly discuss different meanings and forms of power, and we address ways movements can build coalitions among diverse constituencies.

AMST 353 (F) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)
Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.
Class Format: seminar
Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: American Studies majors
Expected Class Size: 13
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course will explore how settler sciences have been used as a technology of difference making, dispossession, and genocide in United States history. It will also provide students a theoretical toolkit and historical perspective by which they can grapple with the fact that power structures like settler technoscience can be a source of both colonization and liberation.

AMST 354 (F) Asian American Literature: Fiction and Creative Nonfiction (WI)
Crosslistings: AMST354 / ENGL354

Secondary Crosslisting
This tutorial is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. This course will be perfect both for students who are already familiar with Asian American studies and literature and want to dive deeper into one strand of the rich Asian American literary tradition (its prose: novels, memoirs, and short stories), as well as for students who are new to Asian American literary studies and want an introduction to this exciting and important (but too-little taught) side of American literature. The tutorial format will make it easy to pair students based on their level of familiarity with Asian American history and literature. Likely readings include: Carlos Bulosan’s *America is in the Heart* (1946); John Okada’s *No-No Boy* (1957); Maxine Hong Kingston’s *Woman Warrior* (1976); Chang-rae Lee’s *Native Speaker* (1995); Lê thi diem thuy, *The Gangster We are All Looking For* (2003); Rajesh Parameswaran, *I Am An Executioner: Love Stories* (2012); Celeste Ng, *Everything I Never Told You* (2014); Viet Thanh Nguyen, *The Sympathizer* (2015); and *The Celestials* (2013) by Williams College’s own Karen Shepard (an historical novel about the experience of Chinese laborers in 1870’s North Adams). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective. Students who take this course should be prepared to read one book and two or three supplementary historical/theoretical essays each week.

**Class Format:** tutorial

**Requirements/Evaluation:** quality of tutorial papers and participation during tutorial discussions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

**Enrollment Limit:** 10

**Enrollment Preferences:** none; if the course is over-enrolled, I may ask students to send me an email explaining why they would like to take this course

**Expected Class Size:** 10

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST

**Attributes:** ENGL Post-1900 Courses; ENGL Literary Histories C;

Not offered current academic year

**AMST 355 (F) Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900**

**Crosslistings:** AMST355 / ARTH515

**Secondary Crosslisting**

"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family's images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

**Class Format:** seminar

**Requirements/Evaluation:** research paper, presentations

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** second-year graduate students, then first-year graduate students, then advanced undergraduate students

**Expected Class Size:** 12
When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned *Lemonade* and Barry Jenkins’ *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Class Format: seminar

Requirements/Evaluation: attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: previous courses in American Studies, critical studies in race and ethnicity or cultural studies, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: American Studies majors

Expected Class Size: 19

Distributions: (D2)

AMST 364 (F) History of the Old South
Crosslistings: HIST364 / AFR364 / AMST364

Secondary Crosslisting

During the course of the semester, we shall investigate two broad, interrelated topics: slavery in the antebellum South, and the impact of slavery on Southern civilization. Our approach will be primarily topical. In the first half of the course, we shall look at subjects like the foreign and domestic slave trade, patterns of work and treatment, the nature of the master-slave relationship, resistance and rebellion, and slave cultural, social, and family life. The second half of the course will concentrate on the influence of the institution of slavery on the mind, social structure, and economy of the Old South, and slavery's impact on Southern politics and the decision for secession in 1860-61.

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation, two papers of moderate length, and a comprehensive final examination

Prerequisites: none; open to first-year students with instructor's permission

Enrollment Limit: 25

**AMST 379 (F)  American Pragmatism**

Crosslistings: PHIL379 / AMST379

Secondary Crosslisting

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will
study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel
West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third
philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of
philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic
philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

**Class Format:** seminar

**Requirements/Evaluation:** final paper, several short assignments

**Prerequisites:** at least two PHIL courses

**AMST 380 (F)  Freedom Dreams, Afro-Futures & Visionary Fictions**

Crosslistings: AFR380 / ENGL381 / AMST380 / WGSS380

Secondary Crosslisting

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new
world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the
course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class
and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other
academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative
assignments.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

**Extra Info:** may not be taken on a pass/fail basis

AMST 382 (S) Transnational Asian/American Film and Video

Crosslistings: AMST382 / COMP382 / ENGL385

Primary Crosslisting

In this course, we will examine transnational Asian/American film and video through the frameworks of film and visual studies, cultural studies, and critical media literacy. We will traverse communal, national, and transnational lines with a heterogeneity of forms and genres, including narrative, documentary, experimental, short film, music video, public access television, and YouTube. We will attend to multiple modes of critical analysis: (1) the conditions of power and visibility being mediated by sites of representation, (2) the networks and platforms helping to make these sites possible, and (3) the materials, meanings, and acts being generated by them. We will also interrogate: How are Asian, American, and/or Asian American representation being produced, performed, embodied, circulated, and consumed? What are the social, political, economic, and cultural forces at play in a given historical context? What artistic and political strategies are at play in the complex nexus of producers, directors, actors, distributors, and viewers? And what are the possibilities, limits, and stakes for different strategies of invention and intervention, activism and resistance? We will consider films from the United States as well as the inter-Asian context. Students will produce a creative media project at the end of the semester.

Class Format: seminar

Requirements/Evaluation: attendance and participation; weekly online journal entries (1-2 pages); midterm paper (5-7 pages); final creative project

Intellectual decolonization is not a bounded project. On one hand, it demands a vocabulary of difference and refusal that rejects colonial theories and epistemologies. On the other, it demands that we interrogate our own intellectual and cultural traditions and trauma. Critical Indigenous theory is a tool in those projects, as it offers a corrective and an opening up of both dominant critical theory traditions that violently erase Indigenous bodies and political realities and of Indigenous theory that can essentialize difference and replicate oppressive dynamics in our communities. Critical Indigenous theory seeks to understand the structures and relations of power in settler colonialism, nested sovereignty, and culturally specific Indigenous philosophical traditions, like Indigenous studies more broadly, but also questions the key concepts that define Indigenous studies: tradition, sovereignty, authenticity, identity, race, gender, and sexuality. In this course, we will read major works in critical Indigenous theory that address indigeneity as it relates to race, postcolonial theory, feminist and two-spirit critique, alternative political engagement with the settler colonial state, and questions of "colonial unknowing." We will work on cultivating the reading practices needed to parse dense theoretical texts, and over the course of the semester you will develop a research project on a topic of your choosing that will allow you to take critical Indigenous theories and employ them as analytic tools and lenses.

Class Format: seminar

Requirements/Evaluation: attendance and participation, one discussion prospectus, and a 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: junior or senior status and some background in American Studies, Native American Studies, or Critical Theory or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: Students will be invited to think deeply about the intersections of race, gender, colonialism, sexuality, and epistemology, and develop skills necessary to identify the theoretical basis of decolonial activism. WI: Students will be required to take the theories we read in class and use them as analytics in a 20-page research paper on a topic of their choosing. Over the course of the semester, we will model how to do this in class work, research question development, outlining, and workshopping.

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives; AMST 400-level Senior Seminars;
Requirements/Evaluation: attendance and participation, a written mid-term exam, one in-class presentation, research paper proposal, 12- to 16-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: previous courses in American Studies, critical studies in neoliberalism or political economy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies and History majors

Expected Class Size: 5

Distributions: (D2) (DPE)

Distribution Notes: DPE: Examines growing economic inequality in the United States, and the ways implementation of market fundamentalist policies have had impacted people differently based on existing differences, such as race, gender, and position in the global north or global south. We critically engage with the claims of neoliberal theorists that the market in goods and services is a sphere of voluntary exchange and freedom, while decision-making through government is a form of coercive power, just in only certain instances. Study resistance, including the Mexican Zapatistas' uprising against NAFTA.

AMST 408 (F) Envisioning Urban Life: Objects, Subjects, and Everyday People (WI)
Crosslistings: LATS408 / AMST408

Secondary Crosslisting
What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, a short essay, a series of writing exercises, and a semester-long final project

Prerequisites: prior courses in AMST, LATS, or permission of instructor; not open to first year students

Enrollment Limit: 14

Enrollment Preferences: senior Latina/o Studies concentrators and senior American Studies majors

AMST 410 (F) Black Literary and Cultural Theories
Crosslistings: COMP410 / AMST410 / ENGL410 / AFR410

Primary Crosslisting
This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the
Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

AMST 411 (F) Transnationalism and Difference: Comparative Perspectives  (WI)

Crosslistings: AMST411 / WGSS409 / LATS409

Secondary Crosslisting

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, an original 12-15 page research paper conducted in stages, and peer editing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

Not offered current academic year

AMST 412 (F) An Infinity of Traces: Haunting, Historical Violence, and Alternative Futures

Crosslistings: COMP412 / ENGL412 / AMST412

Primary Crosslisting

In *Prison Notebooks*, Antonio Gramsci writes that history has "deposited in you an infinity of traces, without leaving an inventory." In this senior seminar, we will adopt a comparative, interdisciplinary, and mixed media approach to inventory some of these uncanny traces as they manifest in the form of social hauntings through narratives of repressed or suspended historical violence. Animated by a whole host of names like "ghost," "spirit,"
"specter," "zombie," "things that go bump in the night," "the unborn," or "the undead," we will ask what other stories/other knowledges these halting and haunted figures might seek to tell us. How do they dis-order our experience of a modern world whose space/time is shaped by ongoing processes of chattel slavery, settler colonialism, capitalism, mass incarceration, immigration, imperialism, militarism, and war? How do they unsettle, arrest, disrupt, and even seek vengeance for a "common sense" that is structured in human dispossession, exploitation, repression, and death? Finally, how do they leave us with a radical urgency to unlearn and reorient our ways of knowing, being, living, and imagining toward alternative futures where such systems of power and domination can be dismantled for good? Texts to be considered may include: *All They Will Call You* by Tim Z. Hernandez, *The Lone Ranger and Tonto Fistfight in Heaven* and short stories by Sherman Alexie, *Lose Your Mother* by Saidiya Hartman, *Burning Vision* by Marie Clements, *The Gangster We Are All Looking For* by lê thi diem thúy, *Daughters of the Dust* by Julie Dash, and *The Watermelon Woman* by Cheryl Dunye.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and class participation; weekly journal entries (1-2 pages); in-class group presentation; midterm paper (5-6 pages); final creative project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** previous courses in American Studies, critical studies in race and ethnicity and cultural studies, or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 15

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST; meets Division 1 requirement if registration is under COMP or ENGL

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives; AMST 400-level Senior Seminars; Not offered current academic year

**AMST 420 (S) Senior Seminar: The Drag of Black Masculinity  (DPE)**

**Crosslistings:** AMST420 / AFR331 / ENGL420 / WGSS420

**Secondary Crosslisting**

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 19th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory, and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. By examining representations and presentations of Black masculinities, we will pursue questions such as: How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? Can we/should we be moving beyond heteropatriarchy and gender binaries? What is the future of Black Gender? By reading critical and creative texts, viewing films and engaging other kinds of media, students will hone their critical theorization skills.

**Class Format:** seminar

**Requirements/Evaluation:** each student will be asked to facilitate a class discussion; students will write three short creative/critical papers; there will also be a final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Women's, Gender, and Sexuality Studies majors and others with substantial background in Women's, Gender, and Sexuality Studies or Africana Studies; statements of interest will be solicited

**Expected Class Size:** 14

**Distributions:** (D2) (DPE)

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS, AFR, OR AMST; meets Division 1 requirement if registration is under ENGL DPE: This course fulfills the DPE requirement in that it centers questions of power and privilege.
AMST 440 (S)  Racial Capitalism  (DPE)
Crosslistings: AMST440 / AFR342

Primary Crosslisting
This class will interrogate the ways in which capitalist economies have "always and everywhere" relied upon forms of racist domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of securing resources and "opening markets". Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about "welfare queens" has impacted public assistance programs, and claims about the embodiment of Asian women play into the international division of labor. We will also be attentive to the means - from interracial unionism to national liberation struggles - by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical knowledge with concepts drawn from scholars working in the traditions of Marxist, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Anibal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici

Class Format: seminar

Requirements/Evaluation:  attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites:  previous course work in race and ethnicity, critical studies in neoliberalism or political economy, or permission of the instructor

Enrollment Limit:  15

Enrollment Preferences:  American Studies majors

Expected Class Size:  15

Distributions:  (D2) (DPE)

Distribution Notes:  DPE: Provides analysis of the creation of racial categories as means of legitimizing land theft and forced labor, which created the financial and political basis of the modern market economy. Focuses on the ways individuals have fought for equity, including interracial unionism, slave uprisings, and national liberation movements. Assignments require students to develop new educational materials (courses, museum exhibits) to challenge the knowledge/power complex that insists racial ascription and violence are incidental to capitalism.

Attributes:  AMST Comp Studies in Race, Ethnicity, Diaspora;  AMST 400-level Senior Seminars;  AMST Space and Place Electives;  Not offered current academic year

AMST 456 (F)  Civil War and Reconstruction
Crosslistings: AMST456 / AFR385 / HIST456

Secondary Crosslisting
An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

Class Format: seminar

Requirements/Evaluation:  evaluation based on class participation and a substantial research paper based at least in part on primary source materials

Enrollment Limit:  15

Expected Class Size:  15

Distributions:  (D2)
**AMST 462 (F)  Art of California: Pacific Standard Time**  
(WI)

Crosslistings: LATS462 / AMST462 / ARTH562 / ARTH462

Secondary Crosslisting

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 102

Enrollment Limit: 15

Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

Expected Class Size: 15

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS

Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; ARTH post-1600 Courses; LATS Comparative Race + Ethnic Studies Electives;

Not offered current academic year

**AMST 468 (S)  Race, Empire, and the Birth of the American Century**  
(DPE)

Crosslistings: AMST468 / HIST468

Secondary Crosslisting

This course examines the birth of the “American Century” by studying the extension of Manifest Destiny to the Pacific, especially the American occupation of Hawaii and the Philippines.

Class Format: seminar

Requirements/Evaluation: a series of weekly papers and a final research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: must be a History or American Studies major

Expected Class Size: 15-19

Department Notes: History Department Senior Seminar

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course will examine the racial, class, gender, and international implications of the American push across the continent and into the Pacific (Hawaii and the Philippines) during the late 19th and early 20th centuries. The content will cover the unequal power relations
between Anglo Americans and Native Americans, Hawaiians, and Filipinos, as evidenced in the American occupation of land both within our shores and the colonization of two island nations in the Pacific. We will also study how the American presence in these areas affected how the original inhabitants of these areas were perceived and represented by Americans as witnessed in their presence at the Worlds Fairs of 1893 and 1904. The course will also explore the role that American education played in "civilizing" Native Americans, Hawaiians, and Filipinos.

Spring 2019

SEM Section: 01    W 1:10 pm - 3:50 pm    Scott Wong

AMST 469 (F)  Notions of Race and Ethnicity in American Culture
Crosslistings: AMST469 / HIST469

Secondary Crosslisting
While "race" and "ethnicity" have always played fundamental roles in shaping the course of American culture and the definition of who is or who can be an "American," our understanding of these concepts of race and ethnicity has often been less than clear. The purpose of this seminar is to examine how Americans have defined and articulated the concepts of race and ethnicity at various points in our history and how these ideas have been expressed in art, policy, practice, and theory.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on weekly response papers, an exercise with the Williams College Museum of Art, an annotated bibliography, and a final research paper of 20-25 pages; students will also be required to lead a class discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: previous upper division HIST courses

Enrollment Limit: 15

Enrollment Preferences: senior History majors

Expected Class Size: 10-15

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Related Courses; HIST Group F Electives - U.S. + Canada

Not offered current academic year

AMST 478 (F)  Cold War Landscapes
Crosslistings: ENVI478 / AMST478 / HIST478

Secondary Crosslisting
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 15

Distributions: (D2)
AMST 490 (S) The Suburbs (WI)
Crosslistings: HIST491 / ENVI491 / AMST490
Secondary Crosslisting
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial
Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with previous coursework in History
Expected Class Size: 10
Distributions: (D2) (WI)

ANTHROPOLOGY AND SOCIOLOGY (Div II)
Chair: Professor Antonia Foias

Visiting Assistant Professor: L. Koryushkina, M. Rulikova, G. Shoffstall. Affiliated Faculty: N. Howe, J. Manigault-Bryant, G. Mitchell.

On leave Fall/Spring: Assistant Professors: J. Lee, C. Simko.
On leave Fall only: Professor J. Nolan. Associate Professor N. Howe.

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated.

Archaeology extends this analysis to social formations of the historical and prehistoric past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology

ANTH 101 How to Be Human

Sociology

SOC 101 Invitation to Sociology

Joint Courses

ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

- Can your department or program typically pre-approve courses for major/concentration credit?
  Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
  Yes. We credit two, and in special cases three courses.

- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

- Are there specific major requirements that cannot be fulfilled while on study away?
  Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
  Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
  In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANSO 205 (S) Ways of Knowing
An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation? What is the relationship between empirical data and the generation of social theory? How does the social organization of social research affect one's inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods, in which the students will design and undertake their own pilot field projects.

Class Format: seminar

Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D2)

Attributes: EVST Methods Courses; EXPE Experiential Education Courses; SCST Related Courses

Spring 2019

SEM Section: 01 W 1:10 pm - 3:50 pm David B. Edwards

ANSO 214 (F) Performance Ethnography: Global Approaches to Dance

Crosslistings: ANSO214 / THEA215 / AMST214 / DANC214 / GBST215

Secondary Crosslisting

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement and performance ethnography. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) will read ethnographic studies of dance and performance practices from different parts of the world, and (iii) will do field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and will include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: class participation, reading responses and essays, fieldwork and field notes, and presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under DANC or THEA; meets Division 2 requirement if registration is under GBST, AMST or ANSO

Fall 2018

SEM Section: 01 W 1:10 pm - 3:50 pm Munjulika Tarah

ANSO 305 (F) Social Theory

An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. What is modern about modern social theory? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over
time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and complex units like nation-states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes major differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.

**Class Format:** seminar

**Requirements/Evaluation:** full participation in the seminar, regular reading response memos, and three papers

**Extra Info:** formerly ANSO 206

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Department Notes:** AMST Critical and Cultural Theory Electives

**Distributions:** (D2)

**Attributes:** AMST Critical and Cultural Theory Electives;

---

Fall 2018

SEM Section: 01  MR 2:35 pm - 3:50 pm  Olga Shevchenko

**ANSO 402 (S) Senior Seminar**

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The instructor will consult with the students in late fall to decide on the topics for discussion. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

**Class Format:** seminar

**Requirements/Evaluation:** full participation, major research project and paper (30 pages), class presentation; weekly short responses

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** only senior majors in Anthropology and Sociology, or permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 12

**Distributions:** (D2)

**Attributes:** EXPE Experiential Education Courses

The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.
ANTH 101 (F)  How to Be Human
Is there such a thing as "human nature"? Why have human societies developed such a bewildering range of customs to deal with problems common to people everywhere? This course addresses these questions by introducing students to the comparative study of human social life and culture. Topics surveyed in the course include economics, language and thought, kinship and marriage, law and politics, and the wide variations in human belief systems, including religions. The course also considers the ways that anthropology, a discipline that was until recently practiced almost exclusively by Westerners, approaches other societies in search of insights on our own customs and values. Ethnographic descriptions of both "simple" tribal societies and complex modern ones are a prominent part of the readings. This course explores differences and similarities between cultures and societies and ways in which they have interacted and responded to one another in the past.

Class Format: lecture/discussion of case studies and ethnographic films
Requirements/Evaluation: two short essays, a final examination and class participation
Prerequisites: first-year students and sophomores
Enrollment Limit: 30
Enrollment Preferences: first-year students and sophomores; juniors and seniors admitted only by permission of instructor

ANTH 103 (F)  Pyramids, Bones, and Sherds: What is Archaeology?
Anthropology examines not only living societies, but also prehistoric cultures whose remains are found worldwide. This course will present how archaeology reconstructs the various aspects of human society from the physical record of prehistory. How do we study the subsistence and settlement patterns, the political and social organization, and the economy and ideology of prehistoric societies who have left behind mute material records? The objective of anthropological archaeology is to bring to life these prehistoric cultures through archaeological analysis. The different goals, approaches and methodologies of modern archaeology will be discussed theoretically and then applied to case studies.

Class Format: lecture/discussion/class presentations of case studies
Requirements/Evaluation: class presentations, two papers, midterm and final exams
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
Distributions: (D2)
Not offered current academic year

ANTH 134 (S)  Leaving the World Behind: The Literature of Reclusion  (WI)
Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134
Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in
contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial
Requirements/Evaluation: tutorial papers, responses, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

Spring 2019

ANTH 138 (S) Spectacular Sex
Crosslistings: ANTH138 / WGSS138
Secondary Crosslisting

From Beyoncé's Super Bowl halftime show to Donald Trump's presidential campaign, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

Class Format: tutorial
Requirements/Evaluation: weekly response papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first- and second-year students; a statement of interest will be solicited from pre-registrants
Expected Class Size: 10
Distributions: (D2)

ANTH 210 (S) The Challenge of ISIS
Crosslistings: REL240 / HIST210 / ANTH210 / ARAB210 / GBST210
Primary Crosslisting

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern
incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 40

ANTH 212 (F) Foundations of China

Crosslistings: ANTH212 / CHIN214 / REL218 / HIST214 / GBST212

Secondary Crosslisting

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Class Format: lecture

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

Expected Class Size: 25

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under CHIN; meets Division 2 requirement if registration is under ANTH, REL, HIST OR GBST

LEC Section: 01 MWF 12:00 pm - 12:50 pm Christopher M. B. Nugent

ANTH 214 (F) The Rise and Fall of Civilizations

Crosslistings: ENVI224 / ANTH214

Primary Crosslisting

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the
state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

**Class Format:** lecture/class discussion

Fall 2018

**ANTH 216 (S) Urbanism in the Ancient World** (WI)

**Crosslistings:** ANTH216 / GBST216

**Primary Crosslisting**

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

**Class Format:** tutorial

**Requirements/Evaluation:** 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**ANTH 222 (F) Heroes, Saints and Celebrity** (WI)

**Crosslistings:** ANTH222 / REL273

**Primary Crosslisting**

This course examines the ways in which cultures select, ritually celebrate, institutionally harness, and ultimately devour people designated as 'extraordinary'. We will begin by considering cultural archetypes and theories of the hero and how heroism has been understood in different eras and cultural contexts. Using Weber's theory of charisma as a foundation, we will look at a number of specific case studies to evaluate the relationship between individual creativity and action and the demands of social conformity and control. Finally, we will examine how charisma is commoditized in the form of the celebrity in contemporary American culture.
Class Format: seminar
Requirements/Evaluation: class participation, two short response papers, research paper, final exam

ANTH 224 (S)  Culture and Morality
Crosslistings: ANTH224 / REL225

Primary Crosslisting

Moral judgments differ across cultures, within cultures, and across time. How do we account for this variation, and what does it tell us about human nature and the nature of moral reasoning? This course examines practical and theoretical orientations for the descriptive study of morality. We will read about and analyze moral life in a range of cultural and historical settings, from Africa and Oceania to North America and the Upper Amazon. As an object of academic inquiry, morality has historically been resistant to classification under any one discipline, recognized at various times to be the exclusive province of philosophy, psychology, religion, and so on; so we will draw on works from across a range of fields in order to better understand morality and its relationship with other significant dimensions of human social life (political economy, religion, gender, etc.). Specific topics will include: the relationship between morality and freedom; the apparent intractability of moral disagreements; the role of intuition and emotion in moral reasoning; and the influence of power and hierarchy on moral judgment.

Class Format: seminar
Requirements/Evaluation: a midterm project and a final paper

ANTH 226 (F)  Spiritual But Not Religious  (WI)
Crosslistings: ANTH226 / REL226

Secondary Crosslisting

Today, more than one in five people in the United States identify as "none" when asked about their religious affiliation. Yet that does not mean that religious sentiment or spirituality is on the decline. On the contrary, talk of "spirituality" is more pervasive than ever in popular discourse. Increasingly Americans claim that they are "spiritual but not religious" or that they prefer "individual religion" over "organized religion." This course seeks to understand and investigate this phenomenon. What is the lived experience of being "spiritual but not religious"? What counts as spirituality? Is there a meaningful distinction between spirituality and religion? What does this distinction assume about the nature of organized religion? What is the history that led us to this ideology of individualized spirituality? And what are the social and political implications of this trend? We will explore these questions and study this phenomenon through an engagement with ethnography (the qualitative research method generally described as "participant-observation"). Over the course of the semester, students will be expected to conduct an ethnographic research project within local communities in Williams College and Williamstown. Alongside our central readings on spirituality, we will also be studying some background in the theory and practice of this methodology. Throughout the semester, students will work together on developing the practical skills necessary to conduct an ethnographic project, and will be gradually executing their own individual projects. This will include: designing a feasible project and research
question, selecting research sites and interlocutors, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: seminar
Requirements/Evaluation: regular reading responses; semester-long research project with frequent small assignments building up to the final product (15- to 20-page paper)
Extra Info: may not be taken on a pass/fail basis

Distributions: (D2) (WI)
Not offered current academic year

ANTH 227 (F) Language and Society: What Does Your Speech Say About You?
Crosslistings: ARAB227 / ANTH227
Secondary Crosslisting
Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person’s identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.
Class Format: lecture
Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARAB; meets Division 2 requirement if registration is under ANTH
Attributes: Linguistics
Not offered current academic year

ANTH 228 (F) The Culture of Jihad
Most studies of the global jihad movement focus on ideology, operations, and strategy. Numerous studies have also focused on the individual psychology of those who join jihad groups. Often ignored are the cultural dimensions of Islamic jihad. This course examines both the “global” culture of jihad—those cultural elements of the movement that are common across national and linguistic borders—and the particular ways in which jihadi groups reflect and respond to the local cultures in which they operate. Among the topics to be considered are the ways in which jihadi adherents use ritual, poetry, graphic imagery, dress and grooming codes, music, film, social media, dream interpretation, and mythology to fix their place in the world and advance their political and social agendas. The course will also examine the role of violence in creating a distinctive and exclusionary social milieu within jihad groups and in defining the relationship between these groups and the societies that surround and, in some cases, support them. Of particular interest for the course will be the ways in which cultural elements of jihadi groups and the jihadi “lifestyle” are mobilized to attract new recruits to the jihadi movement.
Class Format: seminar
Requirements/Evaluation: class participation, four short and informal blog posts (1-page each), two longer response papers (2- to 3-pages each), one research paper (12- to 15-pages)
ANTH 230 Musical Ethnography

Often, we experience music's impact on us without fully considering why it achieves such strong effects. The discipline of ethnomusicology confronts the question of musical meaning by combining musical study and analysis with an exploration into the contexts of musical production, circulation, and reception. Musical ethnography is both the means by which scholars pursue this line of questioning, and also the (usually) written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a music-making community within Williamstown and the surrounding area. Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: some musical training/experience necessary, see instructor for more information
Enrollment Limit: 10
Enrollment Preferences: students with some musical experience
Expected Class Size: 6
Department Notes: MUS World Music/Ethnomusicology
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under ANTH
Attributes: EXPE Experiential Education Courses
Not offered current academic year

ANTH 232 (F) Town and Gown: Investigating the Relationship of College and Community

Team-taught by an anthropologist and a journalist, this course investigates the relationship between Williams College and the surrounding communities of Northern Berkshire County via ethnographic/journalistic research conducted by students. The course will look at several case studies centered on "town-gown" relations in different eras and locations in order to contextualize and provide comparative material for understanding the relationship of Williams to its neighboring communities. Among the topics to be considered and possibly investigated will be the social and economic effects of colleges on local communities, the role of alcohol and athletics in town/gown relations, and how the increasing corporatization of academic institutions has changed the nature of town-gown interactions and the place and role of institutions of higher education in their communities. The focus of the course will be on student research, and a large percentage of class time will be devoted to learning the basic techniques of ethnographic and journalistic research, including interviewing, oral historical research, survey research, and participant-observation. Each student will conduct a major research project of their own devising, which will culminate in an investigative report and a public presentation.

Class Format: seminar
Requirements/Evaluation: class participation, research exercises, major ethnographic research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2)

ANTH 233 (S) Spiritual Crossroads: Religious Life in Southeast Asia

Crosslistings: ANTH233 / ASST233 / REL253

Primary Crosslisting

No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Class Format: seminar

Requirements/Evaluation: midterm, short essays, term paper

Prerequisites: none; open to non-majors

Enrollment Limit: 19

Expected Class Size: 15

Distributions: (D2)

ANTH 235 (F) Refugees and Migrants

An overflow of refugees to the EU and alarmist electoral campaign rhetoric in the U.S. have intensified the issue of international migration around the world. Right- and left-wing politicians and their constituents, human rights activists and state officials, journalists and NGOs discuss, argue, and mull over causes and consequences of population change, strategies of migration management, and predicaments of social integration. In this course, we will examine the emerging conditions of international migration. Specifically, we will focus on how contemporary welfare and labor regimes, claims on citizenship rights, immigration rules, public deliberations, and interethnic and racial experience shape the movements of people and affect their lives by controlling their bodies, subjectivities, social networks, health, and labor. We will draw on domestic and international case studies as we examine a controversy surrounding the Arizona immigration law, DACA debates, challenges of a migration crisis in EU, rural-to-urban migration in India, and a complexity of refugee flows in the Caucasus and the Middle East. We will briefly engage with the subtleties of migration estimation, such as the politics of population censuses, and will analyze consequences of immigration on host populations.

Class Format: lecture

Requirements/Evaluation: one midterm, two short policy memos, one research paper

ANTH 242 (S) The Country and the City in the Classical World
Crosslistings: ANTH242 / CLAS242 / ENVI242

Secondary Crosslisting
A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none, although prior knowledge of the ancient world will be useful
Enrollment Limit: 25

Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under CLAS or ENVI; meets Division 2 requirement if registration is under ANTH
Not offered current academic year

ANTH 243 (F) Reimagining Rivers
Crosslistings: ENVI243 / ANTH243

Secondary Crosslisting
Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Class Format: seminar
Requirements/Evaluation: three 5- to 7-page papers and several short response papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators

ANTH 245 (F) Introduction to Native American and Indigenous Studies
Secondary Crosslisting

What does it mean to acknowledge the literal land we stand upon--in Williamstown and beyond--as the occupied territory of indigenous peoples? This course strives to answer that question by offering an introduction to the histories, politics, knowledges, and arts of indigenous peoples across the Americas and Native Pacific. Foregrounding the ways in which indigenous peoples have resisted, refused, and reimagined ongoing histories of settler colonialism, we will survey scholarship in the interdisciplinary field of Native American and Indigenous Studies. By analyzing such scholarship alongside a range of primary sources--including historical documents, literature, film, visual art, music, and social media--we will examine the complex interweavings of indigeneity, race, gender, and sexuality. Throughout the course, we will discuss topics of both past and present importance, such as environmental justice, cultural representation, and self-determination.

Class Format: seminar

Requirements/Evaluation: one 2- to 3-page response paper, one 5- to 6-page analytical essay, one 8- to 10-page research paper, weekly Glow posts, and regular class participation

ANTH 246 (F) India's Identities: Reproducing the Nation, Community and Individual (WI)

Crosslistings: ANTH246 / ASST246 / WGSS246 / REL246

Secondary Crosslisting

This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions -- Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2003, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and caste intersect to produce a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media.

Class Format: tutorial

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

ANTH 255 (S) Buddhism: Ideas and Practices

Crosslistings: REL255 / ANTH255 / ASST255

Secondary Crosslisting
Secondary Crosslisting
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: lecture/discussion
Requirements/Evaluation: full attendance and active participation; two essays
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 25
Distributions: (D2)

Spring 2019
LEC Section: 01    MWF 8:30 am - 9:45 am    Georges B. Dreyfus

Secondary Crosslisting
This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen in Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Class Format: seminar
Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors
Expected Class Size: 15
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce
social inequality. WI: Class is WI because of its reading responses, in-class writing, a final research paper, and required writing chats with the instructor where we identify patterns, strengths, and weaknesses in student writing.

Fall 2018

SEM Section: 01  M 7:00 pm - 9:40 pm  Kim Gutschow

ANTH 262 (F) Language and Power
"A language is a dialect with an army and a navy." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we re-create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to American presidential elections. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in the Williams or Berkshire County community.

Class Format: lecture
Requirements/Evaluation: regular postings of critical response papers and an ethnographic final project
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Expected Class Size: 18
Distributions: (D2)
Attributes: Linguistics
Not offered current academic year

ANTH 269 (S) Mindsight: Mindfulness and Medicine  (DPE) (WI)
Crosslistings: REL269 / ASST269 / ANTH269

Primary Crosslisting
This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the `kindness curriculum¿ in schools, and other areas of applied research on mindfulness that have generated a `science of personal transformation¿. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Class Format: tutorial
Requirements/Evaluation: weekly papers, 4- to 8-pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class fulfills the DPE requirement because it will explore the ways that stress related to poverty, social inequality, and structural violence can and have been alleviated by mindfulness-based practices. Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. WI: This course is a tutorial and there will be weekly writing assignments.

TUT Section: T1 TBA Kim Gutschow

ANTH 281 (S) The Seeds of Divinity: Exploring Precolumbian Art & Civilization in a Museum Exhibit

Crosslistings: REL280 / ANTH281 / ARTH281

Primary Crosslisting

For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Precolumbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be be presented in a museum exhibit.

Class Format: seminar

Requirements/Evaluation: active class participation; three short papers; 15-page research paper and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANTH, SOC and ARTH majors

Spring 2019

SEM Section: 01 TF 1:10 pm - 2:25 pm Antonia E. Foias

ANTH 287 (S) Propaganda

We live in the age of mass persuasion. From commercial ads to political campaigns, from mass media "news"--both fake and real--to large scale movements for social change, we are constantly bombarded by powerful messages that aim to capture, hold, and impact our attention and direct our actions. Drawing on symbolic socio-linguistic analysis, we will examine the institutional and technical apparatus of modern propaganda and will discuss the role of intellectuals, "attention merchants," and receptive audiences in creating the propaganda machine. We will pay special attention to campaigns that aim to overthrow social structures, or to ensure their maintenance and functioning. We will engage with explicit messages received via propagandistic media and implicit directives that aim to silence, obfuscate, and erase. Theoretical discussions will be complemented with intense, in-depth investigations of case studies of persuasive techniques in the Nazi Ministry of Propaganda, Cold war culture wars, Middle Eastern and Post-Soviet regimes, U.S. and Russian electoral and political campaigns. As we explore the overwhelming diversity of persuasive techniques of contemporary propaganda apparatus, we will turn our attention to various ways through which it impacts and molds our individual selves: from organizing dreams and desires to shaping autobiographies.

Class Format: lecture

Requirements/Evaluation: one midterm, one group research project, three short papers
ANTH 297 (F) Theorizing Magic (WI)
Crosslistings: ANTH297 / COMP289 / REL297

This is a course about magic. It is not about stage magic, sleight of hand, or the art of pulling rabbits out of hats. You will learn no card tricks. But instead we will learn about those people who believed in the reality of certain powers; from the ability to summon good or evil spirits, transform base metals into gold, predict the future, or manipulate matter by thought alone. The problem of how to theorize magic has long been a cause of concern for the natural and social sciences. Many a sociologist and anthropologist has imagined that belief in magic should have vanished with modernity (despite much evidence to the contrary). Meanwhile, philosophers of science have been long fascinated with the demarcation problem-figuring out grounds by which to distinguish legitimate sciences (like astronomy) from their magical or pseudoscientific cousins (like astrology). We will trace these discussions and problematize them by looking at the beliefs of self-defined witches and magicians. This should put us in a position to interrogate the construction of concepts of magic, science, and religion and show how the boundaries between these categories emerged historically. Topics to be discussed will include: the rationality of magic, the fine lines separating magic, science and religion, the persecution of witches, and the role notions of magic and superstition played in European modernization and colonization projects. The tutorial sessions will be customized to student interests, but texts will likely include selections from primary works in translation, such as Cornelius Agrippa’s Occult Philosophy, Giordano Bruno’s On Magic, Aleister Crowley’s Magick Liber ABA, as well as selections from secondary literature, perhaps including Marcel Mauss, A General Theory of Magic, Max Weber, “Science as Vocation,” Tanya Luhrmann, Persuasions of the Witches’ Craft, Thomas Kuhn, The Structure of Scientific Revolutions, Larry Laudan, “The Demise of the Demarcation Problem,” E.E. Evans-Pritchard, Witchcraft and Oracles, and Magic among the Azande, and/or Kelly Hayes, Holy Harlots: Femininity, Sexuality and Black Magic in Brazil.

Class Format: tutorial
Requirements/Evaluation: weekly writing assignments and tutorial attendance every week
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

Distribution Notes: meets Division 2 requirement if registration is under REL or ANTH; meets Division 1 requirement if registration is under COMP
Not offered current academic year

ANTH 299 (F) The Body in Power
Crosslistings: ANTH299 / REL274

The thesis of this course is that ritual plays a crucial role not only in legitimizing and mobilizing political power, but also in determining whether people decide to act in defense of or dissent against the status quo. In the first part of the semester, we focus on the ways in which different cultures construct categories of inclusion and exclusion, safe and dangerous, while also creating rituals for ensuring the preservation of the dominant social order against all that is transgressive and undermining to those in power. Of particular importance to our discussion will be consideration of how the body is ritually mobilized as an instrument of persuasion and control. On this foundation, we move to an examination of how political rituals are used to undermine established orthodoxies, mobilize popular dissent, and bring down those on top. Among the topics to be discussed are the role of martyrdom and
beheadings in the rise of the Islamic State, the use of symbols and ritual interventions in framing both sides of the abortion debate, and the expanding importance of social media in protests movements around the world. The final unit of the course will consider a current controversy (e.g., police violence against African-American men) in light of the concepts discussed during the semester.

Class Format: seminar
Requirements/Evaluation: class participation, three short response papers, and one 10- to 12-page research paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: open to first years
Expected Class Size: 19
Distributions: (D2)
Not offered current academic year

ANTH 301 (F) Sexual Economies (DPE)
Crosslistings: WGSS301 / ANTH301 / AMST334
Secondary Crosslisting
This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.
Class Format: seminar
Requirements/Evaluation: midterm essay exam, final research paper, research proposal/annotated bibliography
Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required
Enrollment Limit: 20
Enrollment Preferences: based on statement of interest
Expected Class Size: 20
Distributions: (D2) (DPE)
Distribution Notes: DPE: We will study various questions related to sexual empowerment, agency, vulnerability, and exploitation in myriad global contexts. We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

Fall 2018
SEM Section: 01    MR 1:10 pm - 2:25 pm    Gregory C. Mitchell

ANTH 322 (F) Trash
Crosslistings: GBST322 / ANTH322 / ENVI322
Primary Crosslisting
What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional
ANTH 323 (F)  Democracy and Citizenship in the Age of Multiculturalism  

Democracy (and its particular implementation in the United States) is regularly taken as an unconditional ideal for the rest of the world. In this class, we will analyze democracy as a culturally and historically specific form of social relations and meanings. We will carefully examine a broad range of phenomena that pertain to democracy—for instance, cultural notions of participation in public life in Post-Socialist Germany or categorization of citizens in contemporary India, attachment to homeland among migrant workers in Russia or transnational rhetoric of Chinese bloggers. By so doing, we will study local meanings, circulating discourses, multiple contestations, and changing forms of power in regimes that are heralded as democratic. Our focus on citizenship (broadly defined)—i.e., a recognized right to be different while being accepted as a part of a national community—will bring to light complex issues in the relationship between the state and its subjects. We will discuss how men and women, the abled and the disabled, the migrants and the natives identify with their statuses and define their place in state structures. Anthropological studies of citizenship and diversity of forms of belonging and identification in democratic states will enable us to understand cleavages of power inequality and conceptual predicaments of social fairness in the contemporary world. Ethnographic studies from around the world will be used to provide specific examples of the ability and failure of democratic regimes to govern their varied populations.

Class Format: seminar

Requirements/Evaluation: one long research paper, three book reports, and seminar discussions

Prerequisites: ANTH 101 or SOC 101 or by permission of the instructor

Enrollment Limit: none

Enrollment Preferences: juniors and seniors

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: DPE: Through an in-depth examination of case-studies of citizen exclusion and inclusion around the world, the course will foster students’ critical engagement with a concept of democracy. Special attention will be paid to a differential access to power on a basis of gender, disability, migration status, and ideological constructions of difference.

Fall 2018

SEM Section: 01  Cancelled
assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Class Format: tutorial

Requirements/Evaluation: typical for that of a tutorial

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ANTH 334 (S) Imagining Joseph (WI)
Crosslistings: REL334 / COMP334 / ANTH334 / JWST334

Primary Crosslisting
Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur’an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar’s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Class Format: seminar

Requirements/Evaluation: 3- to 5-page weekly response papers; 15-page final paper; class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: based on responses to a questionnaire

Spring 2019
SEM Section: 01 W 1:10 pm - 3:50 pm Peter Just

ANTH 337 (S) Race, Sex & Gender in Brazil (DPE)
Crosslistings: ANTH337 / WGSS337

Secondary Crosslisting
The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related to women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: The seminar will include a mandatory spring break trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. These form the basis of their final research paper. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

Class Format: seminar

Requirements/Evaluation: research paper and its various components, participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 7

Enrollment Preferences: students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

Expected Class Size: 7

Materials/Lab Fee: the cost of the spring break trip is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student

Distributions: (D2) (DPE)

Distribution Notes: DPE: This is a class about social justice movements and racial/gender/sexual diversity. It includes experiential learning devoted to these issues and engages questions related to the origins of inequality and prejudice in Brazil

Attributes: LATS Countries of Origin + Transnationalism Elect

Spring 2019

ANTH 340 (S) Artisan and Connoisseur (WI)

In recent decades Americans have increasingly taken up the small-scale hand-work production of specialized goods as a livelihood, depending on connoisseurs who appreciate and are willing to pay high prices for their goods. Products ranging from cheeses to wooden boats have secured markets enabling lifestyles that appear to challenge classic capitalist modes of labor and consumption. We'll explore this movement. Students will conduct original research resulting in a major paper and presentation. To elaborate: We will explore the differences among traditional craftsmen, hobbyists, and contemporary artisans, considering the nature of creativity and hand-work. We will use Marx's concepts of the alienation of labor and commodity fetishism as a frame for considering the ways in which both artisans and connoisseurs appear to be resisting modern capitalist modes of production and consumption. But we will also look at the ways in which artisans' articulation with capitalism and industrial production has shifted over time, beginning with the Arts and Crafts movement around the turn of the last century, through the "hippies" of the 1960s and '70s, to more recent entrepreneurial artisans and those engaged in the "Maker Movement." The course entails a commitment to undertaking an original, possibly ethnographic research project in which a student undertakes a detailed investigation of the production and consumption of an "artisanal" product, involving a preparatory paper, a preliminary proposal, and culminating in a research paper of at least 20 pages and a class presentation.

Class Format: seminar

Requirements/Evaluation: 5-page paper, 8-page proposal, 20-page research project, and class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors; seniors

Expected Class Size: 19

Distributions: (D2) (WI)

Not offered current academic year
ANTH 341 (S)  Caste, Race, Hierarchy
Crosslistings: ASST341 / AFR341 / ANTH341 / GBST341

Primary Crosslisting

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar
Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors, juniors, majors in ANSO, AFR, or ASST
Expected Class Size: 15
Distributions: (D2)
Not offered current academic year

ANTH 346 (S)  Islam and Anthropology
Crosslistings: REL346 / ANTH346 / ASST346 / ARAB280

Primary Crosslisting

If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional "object" of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct "ideal-type" models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar
Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB
Not offered current academic year

ANTH 371 (F)  Medicine, Pathology, and Power: An Ethnographic View  (DPE) (WI)
Crosslistings: SCST370 / ANTH371 / WGSS371
How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation—also known as ‘deep hanging out.’ Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering. WI: This class includes; weekly writing exercises and monthly 'writing chats' with instructor.

ANTH 412 (S) Graphic Sex: Queer Ethnographic Writing

Crosslistings: ANTH412 / WGSS412

Secondary Crosslisting

This seminar examines recent and canonical work in queer anthropology, exploring how different cultures construct sexual and gender identities and subjectivities, and what happens when dominant paradigms such as the Euro-American LGBT model become enmeshed in globalization, late capitalism, and consumerism. We begin with a series of case studies highlighting alternative gender and sexual formations in various cultures around the world, emphasizing how these seemingly “authentic” local categories are themselves the products of historical shifts, colonial relations, and political economy. We also examine how these categories overlap, conflict with, subvert, or syncretize with the increasingly global category of “gay.” In addition to reading queer ethnographies, we will also learn the methods required for doing ethnography ourselves, including interviewing techniques, participant observation, writing thick description, data analysis, and editing.

Class Format: seminar

Requirements/Evaluation: ethnographic writing assignments (e.g., interviews, field notes, essays, etc.)

Extra Info: may not be taken on a pass/fail basis

HON Section: 01  TBA  Antonia E. Foias
The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences. Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS
The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**
ANTH 101 How to Be Human

**Sociology**
SOC 101 Invitation to Sociology

**Joint Courses**
ANSO 205 Ways of Knowing  
ANSO 305 Social Theory  
ANSO 402 Senior Seminar

Elective Courses
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.
STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.
An introduction to sociological analysis. The course focuses on the relationship of individual men and women to the social world and introduces students to systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Veblen, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

Class Format: lecture/discussion
Requirements/Evaluation: a take-home midterm exam, a class presentation and a final
Prerequisites: none
Enrollment Limit: 35
Enrollment Preferences: first-year students and sophomores

SOC 201 (S) Science, Technology, and Human Values
Crosslistings: HSCI101 / SOC201 / SCST101

Secondary Crosslisting
This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar
Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams
Prerequisites: none
Enrollment Limit: 20-25
Enrollment Preferences: first-years and sophomores

Distributions: (D2)

Spring 2019
SEM Section: 01    MWF 8:30 am - 9:45 am     Grant Shoffstall

SOC 210 (S) Networks of Power: Technology in Human Affairs
Crosslistings: SCST210 / SOC210

Primary Crosslisting
Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly
the constructivist and determinist theories, by examining major technological innovations that shaped society over the past century, including electrification, automobiles and the highway system, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people's lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Class Format: seminar

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, 15- to 20-page seminar paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

SOC 211 (F) Race and the Environment

Crosslistings: AFR211 / SOC211 / AMST211 / ENVI211

Secondary Crosslisting

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Distributions: (D2)

SOC 216 (F) The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of
urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

Fall 2018

SEM Section: 01    MR 1:10 pm - 2:25 pm    Marketa Rulikova

SOC 218 (F) Law and Modern Society

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

Class Format: lecture/discussion

Requirements/Evaluation: a short paper and midterm and final exams

SOC 219 (S) Images and Society

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.
SOC 221 (S) Money and Intimacy
Can money buy love and care? The course will consider this taboo question from a sociological perspective. We will look into how relevant this question has been over the course of history, what forces have contributed to the shift in thinking about it, and, most importantly, how sociological research helps us understand its current ramifications. We will discuss a wide range of aspects of family life: the relationship between arranged marriage and romantic relationship, the role of inheritance in family and social life, the distribution of resources in the context of modern family forms (most notably remarriages), and the outsourcing of care for dependents. Intimacy bears different value and content in these changing contexts. The course will further look into the changing character of new economy where "people's skills" are ever more required from employees (emotional labor) and where intimacy, care, and/or sex constitute purchasable commodities. A reflection on the growth of new technologies will complicate some of the discussed concepts and notions, but throughout a common denominator of our discussion will be the role of social inequality.

Class Format: seminar
Requirements/Evaluation: active class participation, several response papers, a midterm paper and a take-home final
Prerequisites: none; open to all
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2)
Attributes: FMST Related Courses
Not offered current academic year

SOC 228 (F) The Panopticon: Surveillance, Power, and Inequality (DPE)
Crosslistings: SOC228 / SCST229

Class Format: seminar
Requirements/Evaluation: discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)
Prerequisites: none
SOC 230 (S) Memory and Forgetting

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even “individual” memories take shape through social frameworks, and we also remember “collectively” through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart–forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include self-identity, memoirs, and oral history; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Class Format: seminar
Requirements/Evaluation: active class participation, several short papers, one class presentation, and an 8-10 page final paper
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19

SOC 232 (S) Symbols and Society

Human beings, as Kenneth Burke put it, are "symbol-using, symbol-making, and symbol-misusing" animals. Indeed, among humans, symbols help to substitute for "instincts." Symbols guide our actions, shape our emotions, and enable us to coordinate with others. Symbols may generate solidarity across wide spaces and among people who have never encountered one another face-to-face. They may also inflame conflicts and exaggerate distinctions, even promote violence. This course will examine the role of symbols and symbolism in modern society, exploring how words, gestures, images, and icons give shape and form to social life. The first part of the course will provide a broad introduction to the sociological study of symbols. The second part of the course will pay particular attention to the role that symbols play in politics and nationhood. How do symbols such as flags, anthems, values, ideals, monuments, and memorials promote solidarity and common identity across space and time? When and why do nations struggle over symbols, and what influence do these symbolic struggles have on collective life? What role do symbols play in war, conflict, and violence? Topics will include the Vietnam Veterans Memorial, the 1995 Enola Gay exhibit at the Smithsonian, the Holocaust Museum in D.C., the "Ground Zero cross," and the recent debates over the Confederate flag in South Carolina and beyond. We will focus primarily on the U.S., but will also work to make comparisons.

Class Format: seminar
Requirements/Evaluation: active class participation, several response papers, a short midterm essay, and a final paper with class presentation
Prerequisites: none
Enrollment Limit: 19
**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

Not offered current academic year

**SOC 234 (S) How Emotions Work**

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizational levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem—the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

**Class Format:** seminar

**Requirements/Evaluation:** participation, reflective essay (3-5 pages), emotion map activity, open space meeting, policy memo (1-2 pages), final paper (8-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Distributions:** (D2)

Spring 2019

**SOC 236 (S) Making Things Visible: Adventures in Documentary Work**

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

**Primary Crosslisting**

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps and resonances between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will try their hand at methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of classical and recent examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving platforms on which such work can be presented, both off- and on-line. Lastly, we will pose and debate ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. In addition to readings, students should be prepared to spend a significant time out of the classroom doing fieldwork. Experience in photography and/or video, although not required, will be helpful.

**Class Format:** seminar

**Requirements/Evaluation:** full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 12
**Department Notes:*** In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

**Distributions:**  (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL

---

**SOC 240 (F) Performing Masculinity in Global Popular Culture**

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

**Class Format:** seminar

**Requirements/Evaluation:** masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** in the event of over-enrollment, a short statement of interest will be solicited

**Expected Class Size:** 20

**Distributions:**  (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

**Attributes:** EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

**SOC 241 (S) Meritocracy**

Crosslistings: SOC241 / PSCI241

Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do eight of the country¿s nine sitting Supreme Court Justices. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy --- rule by the intellectually talented --- in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

**Class Format:** seminar

**Requirements/Evaluation:** two papers, take-home final exam, class participation

**Extra Info:** not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19

SOC 244 (S) What They Saw in America
Crosslistings: HIST366 / AMST244 / SOC244

Primary Crosslisting
This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

Class Format: seminar; * Please note atypical class hour Monday, 4:45-8:30 pm.
Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 9
Enrollment Preferences: juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor
Expected Class Size: 9
Department Notes: * Please note atypical class hour Monday, 4:45-8:30 pm.

SOC 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WI)
Crosslistings: SOC248 / GBST247 / RUSS248

Primary Crosslisting
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial
Requirements/Evaluation:  5-page paper every other week, comments on the partner's paper in alternate weeks

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  Anthropology, Sociology, and Russian majors

Expected Class Size:  10

Distributions:  (D2) (DPE) (WI)

Distribution Notes:  meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS

DPE:  This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Fall 2018

TUT Section:  T1    TBA     Olga  Shevchenko

SOC 252 (F)  Moral Life in the Modern World

Crosslistings: REL286 / SOC252

Primary Crosslisting

This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical moralities of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out; that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; “thick” and “thin” moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and moral panics; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality “in,” “through,” and “of” literature, as students will select, read, and critique a work of fiction.

Class Format:  lecture

Requirements/Evaluation:  weekly discussion précis, film screenings, two book review essays, class presentations, and a take-home midterm

Extra Info:  may not be taken on a pass/fail basis

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  Sociology and Anthropology students

Expected Class Size:  19

Distributions:  (D2)

Not offered current academic year

SOC 283 (S)  Religion and Capitalism  (WI)

Crosslistings: REL282 / PSCI140 / SOC283

Secondary Crosslisting

Up through the 1960s it was popular to claim that the world was becoming increasingly and inevitably secular, with the development of modern capitalist social relations as a signature cause. Today the 'secularization thesis' is largely defunct. Instead one sees the vibrant return of religion to social, economic, and political prominence in most parts of the world--at the very same time we are experiencing through globalization and the information revolution the most dramatic economic advances in a century. This course investigates the historical and contemporary relationship between culture and economics, religion and capitalism, in their most encompassing forms. In investigating this theme, our cornerstone will be Max Weber's famous argument from The Protestant Ethic and the Spirit of Capitalism. Along the way we will discuss both the origins of capitalist society as
well as its more recent transformations through the rise of the welfare state, consumerism, and globalization. We will also discuss changes in religion under the influence of capitalism including romanticism, Pentecostalism, moralistic therapeutic Deism, and the 'God gap' between largely theist Africa, South and West Asia, and the Americas on the one hand and largely atheist Europe and East Asia on the other. The focus of the course is on Christianity in Western countries both historically and in the present, but we will spend time discussing religion (particularly Pentecostalism) and capitalism in the contemporary Global South as well.

Class Format: seminar

Requirements/Evaluation: regular discussion questions, three 5- to 6-page papers, in-class paper workshops, 20- to 24-page final term paper incorporating earlier papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: open to first-years and sophomores only

Expected Class Size: 14

Distributions: (D2) (WI)

Attributes: PSCI Comparative Politics Courses; PSCI Political Theory Courses;

Not offered current academic year

SOC 291 (S) Religion and the American Environmental Imagination (WI)

Crosslistings: ENVI291 / REL291 / SOC291

Secondary Crosslisting

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of eco-spirituality and popular nature religion. Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;

Not offered current academic year

SOC 301 (F) Social Construction (DPE)

Crosslistings: WGSS302 / REL301 / COMP315 / SOC301 / SCST301

Secondary Crosslisting

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of
"electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Class Format: seminar
Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion majors, then majors from cross-listed departments
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: meets Division 2 requirement if registration is under REL, SOC, WGSS or SCST; meets Division 1 requirement if registration is under COMP. DPE: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

Fall 2018
SEM Section: 01    W 1:10 pm - 3:50 pm     Jason Josephson Storm

SOC 303 (S) Cultures of Climate Change  (WI)
Crosslistings: ENVI303 / SOC303
Secondary Crosslisting
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.
Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second
Expected Class Size: 19
Distributions: (D2) (WI)
Attributes: ENVI Humanities, Arts + Social Science Electives; SCST Related Courses;

Spring 2019
SEM Section: 01    TR 11:20 am - 12:35 pm     Nicolas C. Howe

SOC 315 (F) Culture, Consumption and Modernity  (WI)
How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities? What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumption choices aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. We will look at fashion, advertising, arts and shopping in places as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the consequences that these patterns have for the larger social order.

Class Format: seminar
Requirements/Evaluation: full participation, ten journal entries and a 15-page term paper that will go through a draft and revision stage
Extra Info: not available for the fifth course option
Prerequisites: none; open to first year students
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Distributions: (D2) (WI)
Attributes: ENVI Humanities, Arts + Social Science Electives; GBST Urbanizing World Electives;
Not offered current academic year

SOC 324 (S)  Memory and Identity (DPE)
Our sense of self is inextricably tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals' sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective forgetting, narratives of trauma and of a "golden age," the invention of tradition, and battles over remembrance and heritage, such as the struggles over the proper way to commemorate the victims of 9/11 in the US or the victims of Stalin’s purges in the post-Soviet space.

Class Format: seminar
Requirements/Evaluation: extensive class participation, several short papers, and a final research project with class presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course fulfills the DPE requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups’ struggles for power and visibility.

Spring 2019
SEM Section: 01    MR 2:35 pm - 3:50 pm    Olga  Shevchenko

SOC 326 (S)  Being Mortal
One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been "sequestered" in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of...
grief, loss, and mourning? How does modern medicine—which is oriented toward cure but must ultimately confront the inescapable realities of aging and death—deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

Class Format: seminar

Requirements/Evaluation: three 6- to 7-page papers; an in-class presentation; thoughtful and consistent participation in class discussion

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: if overenrolled, Sociology and Anthropology majors will receive preference

Expected Class Size: 15

Distributions: (D2)

Not offered current academic year

SOC 328 (F) American Social Dramas (WI)

Crosslistings: SOC328 / THEA328 / AMST328 / COMP325

Primary Crosslisting

As Shakespeare wrote memorably in As You Like It, “All the world’s a stage, and all the men and women merely players.” Sociologists have heeded Shakespeare’s wisdom, arguing that social and political events are “performances” that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to “control the narrative” shape the meanings and outcomes of political events? Are they merely “spectacles,” or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

Class Format: seminar

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under SOC or AMST; meets Division 1 requirement if registration is under COMP or THEA

Not offered current academic year

SOC 329 (F) Work and Future of Capitalism (WI)

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism’s past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as global commodity chains, the death of the career, the rise of the “gig” economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism’s 19th century past. Through a series of essays, culminating in a final paper, the course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about restructuring (or even overturning) capitalism to allow them to flourish?
Class Format: seminar

Requirements/Evaluation: participation, three utopia essays (3-5 pages), paper workshop, final paper (10-12 pages)

Prerequisites: none

Enrollment Preferences: Anthropology and Sociology majors

Distributions: (D2) (WI)

Distribution Notes: WI: This course requires a series of 3- to 5-page essays that work toward a paper workshop and final paper on the topic of the future of work. Students will use the essays to research "real utopias"—currently existing organizations, workplaces, and policy regimes that challenge traditional capitalist labor relations. This research will inform a workshop and final paper, which will ask them to envision their own organization, workplace, or policy regime.

Fall 2018

SEM Section: 01 W 1:10 pm - 3:50 pm Ben Snyder

SOC 330 (S) Technology, Culture and Society

Crosslistings: SCST330 / SOC330

Primary Crosslisting

An introduction to major trajectories of theory and empirical research in the sociology and history of technology: the Social Construction of Technology (SCOT), Large Scale Technological Systems (LTS), Actor-Network Theory (ANT), and cultural studies of technoscience broadly. Students will also become acquainted with a number of philosophical positions on technology: instrumentalist, Marxist, cultural/substantivist, humanist and posthumanist. Topics to be explored include technology, (post)industrial capitalism, and the nature of modern power; the role of technology in giving shape and weight to social institutions and forms of agency; technology, individualism, and everyday life in the modern world; technological determinism; resistance and accommodation to technological change; technology as a point of view and total way of life (culture); language, quantification, computerization, and (tele)visual media; and technology and environment. The course is furthermore designed to allow students to explore and research topics not appearing on the syllabus in the main.

Class Format: seminar

Requirements/Evaluation: weekly discussion precis, class presentations, a midterm essay and final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Distributions: (D2)

Not offered current academic year

SOC 332 (F) Life and Death in Modernity

Death is a biological fact. Death is also one of the few universal parameters in and through which social worlds and individual lives are created. Death, in other words, is a primary source of the material and symbolic activities through which humans work to construct, legitimate, and maintain social realities. To attend to "ways of death", then, is to attend simultaneously, if only indirectly, to "ways of life"—the hopes and fears, the ways and wants of a people. In this course we will ask: How, why, and with what manner of consequence has it come to be that, under late-western modernity, the aged, the sick, the dying, the bereaved, and indeed death itself, are routinely "set aside", hidden from view and thus awareness, institutionally sequestered from those of us among the living? We will attend to the historical emergence of the institutional forms that perpetrate this sequestration, and show how they have become tightly articulated with one another: hospitals, nursing homes, hospice centers, funeral homes, cemeteries. We will furthermore examine the peculiar bodies of expert knowledge that have arisen in tandem with these institutional forms, among them gerontology, thanatology, and bereavement therapy, showing how they have conspired in the (bio)medicalization of aging, death, and grief. Other topics to be explored include the commodification and consumption of health and well-being; the emergence of anti-aging medicine and "popular" rationalities of human life extension; cryonic suspension, zombies, and the paranormal.

Class Format: seminar

**Requirements/Evaluation:** weekly journal entries, film screenings, take-home midterm, class presentations, and a final 12- to 15-page paper to be decided in consultation with the instructor

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Sociology and Anthropology students

**Expected Class Size:** 19

**Distributions:** (D2)

**Attributes:** PHLH Bioethics + Interpretations of Health

Not offered current academic year

**SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence**

Crosslistings: SOC338 / REL338 / HSCI338 / SCST338

**Primary Crosslisting**

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, informal weekly writing, 15- to 20-page seminar paper

**Extra Info:** not available for the fifth course option

Not offered current academic year

**SOC 350 (S) Max Weber & Critical Theory or Rationalization & Its Discontents**

Crosslistings: SOC350 / REL350 / COMP349

**Secondary Crosslisting**

We live in an age characterized by unprecedented technological and scientific progress--we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom--and yet modern life often appears fundamentally meaningless and lacking in ultimate value--we work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber's key innovation was to trace the grand trajectory of Western "rationalization"--the historical attempt to produce a world in which "one can, in principle, master all things by calculation." Further, he demonstrated how this rationalization produced not just
mastery over nature, but also "the disenchantment of the world" - value fragmentation, hyper-specialization, bureaucracy, and ultimately the "iron cage" of modernity. The first part of this course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference will be given to REL, ANSO and COMP majors
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL or SOC; meets Division 1 requirement if registration is under COMP

Not offered current academic year

SOC 362 (F)  Story, Self, and Society  (WI)
Crosslistings: COMP362 / SOC362
Primary Crosslisting
From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"-that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This tutorial will grapple with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? Specific topics will include illness narratives, confessional culture, digital stories, oral history, and memoir. As a capstone exercise, each student will construct a narrative analysis focused on a memoir that we will select collectively. The course will conclude with a final seminar meeting during which each student will tell a story of their own, and we will work together to consider how the theories we have encountered throughout the semester might illuminate our own narratives.

Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week; comments on the partner's paper in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest; priority consideration will be given to ANSO and COMP majors
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under SOC; meets Division 1 requirement if registration is under COMP
Not offered current academic year

SOC 363 (F)  Cold War Technocultures
Crosslistings: SOC363 / SCST401
Primary Crosslisting
In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet "containment." We will trace the historical threads connecting MIT's "Whirlwind" computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of
"thinking the unthinkable"; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race—from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome’s Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-ficton as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

Class Format: seminar

Requirements/Evaluation: two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: SCST 101 or instructor consent; prior coursework in Anthropology and Sociology and/or History

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Science and Technology Studies concentrators

Expected Class Size: 15

SOC 368 (F) Technology and Modern Society

Crosslistings: ENVI368 / SOC368

Primary Crosslisting

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Extra Info: may not be taken on a pass/fail basis

SOC 371 (S) Medicine, Technology, and Modern Power

Crosslistings: SOC371 / HSCI371 / SCST371

Primary Crosslisting
Medicalization: those processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addiction, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture

Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm

SOC 372 (S) Time and Temporality

Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow--time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students will explore the emergence of the so-called "modern western temporal order"--the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Class Format: seminar

Requirements/Evaluation: participation, time diary analysis (3-5 pages), final paper (10-12 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2)

SOC 386 (S) Living with the Bomb: American Culture in the Nuclear Age

Crosslistings: SOC386 / HIST387

Primary Crosslisting

Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from
the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on a midterm, a final exam, and a 10- to 12-page research paper

ARABIC STUDIES
(Div I, with some exceptions as noted in course descriptions)

Chair: Professor Magnus Bernhardsson

On leave Fall/Spring: Assistant Professor L. Nassif.
On leave Spring only: Senior Lecturer H. Edwards.

Middle Eastern and Maghrebi Studies is a vibrant, growing, and important field in the United States and around the world. Students wishing to enter this rich and varied discipline can begin with a major in Arabic Studies at Williams. The major is designed to give students a foundation in the Arabic language and to provide the opportunity for interdisciplinary and multidisciplinary study of Arab, Islamic, North African and Middle Eastern literatures, art, film, history, religion and politics.

THE MAJOR IN ARABIC STUDIES

Students wishing to major in Arabic Studies must complete ten courses, including the following six courses:

ARAB 101-102 Elementary Arabic
ARAB 201 Intermediate Arabic I
ARAB 202 Intermediate Arabic II
ARAB 301 Advanced Arabic I
ARAB 302 Advanced Arabic II

Students must also take at least one 400-level ARAB course, in addition to three other courses in Arabic and Middle Eastern Studies in Arabic Studies or affiliated units. At least one of these courses should be from the arenas of language and the arts (DIV I) and at least one from politics, religion, economics, history, etc. (DIV II). Students should consult with the Department to confirm that electives are authorized.

Students who place into more advanced language courses may substitute additional courses, adding up to a total of at least nine courses.

Up to four courses from approved study abroad programs may be counted toward the major.

THE CERTIFICATE IN ARABIC

The Certificate in Arabic demonstrates that a student has acquired a working foundation in the language. The sequence of eight language and culture courses is designed to supplement a student's major at Williams by enabling the student to expand their knowledge in a related field.

Required Courses

ARAB 101
ARAB 102
ARAB 201
ARAB 202
ARAB 301
ARAB 302

At least one elective course, either in Arabic literature, arts, or culture, or in Arabic history, religion, politics, economics, etc.

Students must earn a cumulative grade average of B or higher in the sequence of seven courses.

Students who enter Williams with previous training in Arabic may be exempted from up to two of the required seven courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE DEGREE WITH HONORS IN ARABIC STUDIES

Prerequisites
Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**Timing**

Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W-ARAB 494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

**Characteristics of the Thesis, Evaluation, and Major Credit**

The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major-including the thesis course (ARAB 493-W-494)-is 10, i.e., one of the thesis courses may substitute for one elective.

**STUDY ABROAD**

**FAQ**

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. We may need specific information (assigned readings) to determine whether the course counts for Div I or II major credit.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes, four.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

No. Students can receive credit toward the major's language requirements from for-credit summer language programs like Middlebury, etc. These count toward the 4-course maximum.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. Make sure you have the needed number of Div I and Div II courses for the major. Know the difference.
Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

It has happened, but we try to be as flexible as possible.

ARAB 101 (F) Elementary Arabic
This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on “formal Arabic” (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

Class Format: lectures, five hours a week

Requirements/Evaluation: evaluation is based on tests, daily homework, active class participation, a skit, a culture portfolio, and engagement in a variety of co-curricular activities

Extra Info: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 15

Distributions: (D1)

Fall 2018
LEC Section: 01 M-F 10:00 am - 10:50 am Radwa M. El Barouni

ARAB 102 (S) Elementary Arabic
This is the second course in the Beginning Arabic sequence. It builds on the foundation of Arabic competence that you established in Arabic 101, and will continue to develop your competence in Modern Standard Arabic and one variety of spoken Arabic. The course will continue to focus on day-to-day situations and familiar topics from the immediate environment while expanding the range of topics and authentic materials, and broadening the scope of linguistically-based and culturally-based tasks and course expectations.

Class Format: lectures, five hours a week

Requirements/Evaluation: evaluation is based on tests, daily homework, active class participation, a presentation, a writing portfolio, and engagement in a variety of co-curricular activities

Extra Info: students registered for Arabic 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARAB 101

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 15

Distributions: (D1)

Spring 2019
LEC Section: 01 M-F 10:00 am - 10:50 am Radwa M. El Barouni
ARAB 111 (F) Movers and Shakers in the Middle East (WI)
Crosslistings: LEAD150 / HIST111 / ARAB111

Secondary Crosslisting
This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 19
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 15-19
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under ARAB
Attributes: GBST Middle Eastern Studies Electives; HIST Group E Electives - Middle East; JWST Elective Courses; LEAD Facets or Domains of Leadership;
Not offered current academic year

ARAB 201 (F) Intermediate Arabic I
In this course we will continue to study the Modern Standard Arabic and one variety of spoken Arabic. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing an increased vocabulary and cultural appreciation of Arabic-speaking countries.

Class Format: lecture; the class meets four hours a week with the fourth hour a conversation section
Requirements/Evaluation: evaluation will be based on quizzes, tests, homework, and active class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARAB 101-102 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10
Distributions: (D1)

Fall 2018
LEC Section: 01 MWF 11:00 am - 11:50 am Radwa M. El Barouni
CON Section: 02 W 2:10 pm - 3:00 pm Radwa M. El Barouni

ARAB 202 (S) Intermediate Arabic II
As a continuation of ARAB 201, this course will expose students to Modern Standard Arabic and one variety of spoken Arabic while increasing their cultural literacy in Arab civilization. Our main textbook will be Al-Kitaab fii Ta'allum al-'Arabiyya Part II but outside materials from diverse media such as television and newspapers will also be included. Class will be conducted in Arabic.

Class Format: lecture; the class meets four hours a week with the fourth hour a conversation section
Requirements/Evaluation: evaluation is based on quizzes, homework, and active class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARAB 201 or permission of instructor
Enrollment Limit: none
ARAB 207 (F) The Modern Middle East (DPE)
Crosslistings: JWST217 / ARAB207 / HIST207 / REL239 / GBST101 / LEAD207
Secondary Crosslisting
This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.
Class Format: lecture
Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled
Expected Class Size: 30-40
Distributions: (D2) (DPE)
Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course introduces students to the incredible diversity of the Middle East and offers a critical assessment of difference, power, and equity in the Middle East. In particular it will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.
Attributes: GBST Middle Eastern Studies Electives; HIST Group E Electives - Middle East; JWST Elective Courses; LEAD Facets or Domains of Leadership

ARAB 209 (S) Saharan Imaginations (DPE) (WI)
Crosslistings: COMP234 / ARAB209 / ENVI208
Primary Crosslisting
Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.
Class Format: seminar
Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper
ARAB 210 (S) The Challenge of ISIS

Crosslistings: REL240 / HIST210 / ANTH210 / ARAB210 / GBST210

Secondary Crosslisting

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

Extra Info: may not be taken on a pass/fail basis

ARAB 215 (S) The Veil: History and Interpretations (WI)

Crosslistings: ARAB215 / WGSS110 / HIST110

Secondary Crosslisting

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Class Format: tutorial

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages
ARAB 222 (F)  Photography in/of the Middle East  (DPE)
Crosslistings: ARAB222 / ARTH222

Secondary Crosslisting
Since its invention, photography has been globally disseminated and locally inflected, serving diverse documentary and expressive purposes around the world. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the hierarchical dynamics operative in individual communities and transcultural contexts. The course will explore photographic practices in different zones of the Middle East--e.g., the Holy Land, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the formative impact of visual representations in particular circumstances--what work do photographs do? Who resists and who benefits? The general goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: lecture/discussion meeting twice a week
Requirements/Evaluation: midterm, final, GLOW Posts and term project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: majors and area studies concentrators
Expected Class Size: 15-20
Distributions:  (D1) (DPE)
Distribution Notes: meets Division 1 requirement if registration is under ARAB

ARAB 224 (S) Second Language Learning: The Learner, the Classroom, and the Social World
Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers' feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Class Format: lecture
Requirements/Evaluation: active class participation, assignments, article presentation and leading a class discussion, language learner interview, a research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
ARAB 227 (F) Language and Society: What Does Your Speech Say About You?

Crosslistings: ARAB227 / ANTH227

Primary Crosslisting

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Class Format: lecture

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARAB; meets Division 2 requirement if registration is under ANTH

Attributes: Linguistics

Not offered current academic year

ARAB 230 (F) Who was Muhammad?

Crosslistings: ARAB230 / GBST230 / REL230

Secondary Crosslisting

Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the "facts" of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad's life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar

Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Religion majors
ARAB 234 (F) What is Islam?  (DPE)
Crosslistings: ARAB234 / GBST234 / REL234 / HIST208

Secondary Crosslisting

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Class Format: seminar

Requirements/Evaluation: reading responses, two essays, final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under ARAB. DPE: This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

Fall 2018

SEM Section: 01    MR 1:10 pm - 2:25 pm     Saadia Yacoob

ARAB 236 (S) Reading the Qur’an  (WI)
Crosslistings: ARAB236 / REL236 / COMP213 / GBST236

Secondary Crosslisting

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Class Format: seminar

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay
ARAB 242 (S)  Women, Gender, and Sexuality in Islam
Crosslistings: WGSS242 / REL242 / ARAB242

Secondary Crosslisting
The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Class Format: seminar
Requirements/Evaluation: active class participation (including a presentation on the reading materials), short weekly reflections, and one final research paper (10-15 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion, Women’s, Gender and Sexuality Studies and Arabic majors
Expected Class Size: 10
Distributions: (D2)

Spring 2019
SEM Section: 01    TR 11:20 am - 12:35 pm    Saadia Yacoob

ARAB 243 (F)  Islamic Law: Past and Present
Crosslistings: REL243 / WGSS243 / ARAB243 / HIST302

Secondary Crosslisting
From fear of the Shari‘a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari‘a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Class Format: seminar
ARAB 249 (F)  Trauma and Memory in Maghrebi and Middle Eastern Literatures  (DPE) (WI)
Crosslistings: ARAB249 / COMP249
Primary Crosslisting
Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs and fictional works, this course aims to raise students’ critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given a short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?
Class Format: seminar
Requirements/Evaluation: active participation, short presentation, short weekly response papers, mid-term exam, and final paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Arabic Studies majors and certificate students
Expected Class Size: 15
Distributions: (D1) (DPE) (WI)
Distribution Notes: DPE: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.

ARAB 252 (F)  Arab Women Memoirs: Writing Feminist History
Crosslistings: WGSS251 / ARAB252 / COMP252 / HIST309
Primary Crosslisting
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to
In this course, we will explore the development of Arab feminist consciousness. We will analyze memoirs, blogs, and films to discuss topics such as visual testimonies, virtual political participation, and feminist resistance in the technosphere. Required texts may include:

- Fadwa Tuqan, *A Mountainous Journey: An Autobiography*
- Fatima Mernissi, *Dreams of Trespass: Tales of a Harem Girlhood*
- Leila Ahmed, *A Border Passage: From Cairo to America--a Woman's Journey*
- Fadia Faqir and Shirley Eber, *In the House of Silence: Autobiographical Essays by Arab Women Writers*
- Jumanah Haddad, *I Killed Scheherazade: Confessions of an Angry Arab Woman*

In addition to the memoirs, we will also examine women's blogs and watch films that focus on first-person narratives to discuss related topics. Critical essays and selections from autobiographical writings will also be included to reflect the diversity of Arab women in the Middle East and the diaspora.

**Class Format:** seminar  
**Requirements/Evaluation:** active class participation, several short response papers, three short papers (3-5 pages), and a final paper (7-10 pages)  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** none  
**Enrollment Limit:** 25  
**Expected Class Size:** 15  
**Distributions:** (D1)  
**Distribution Notes:** meets Division 1 requirement if registration is under ARAB or COMP; meets Division 2 requirement if registration is under HIST or WGSS  
**Attributes:** GBST Middle Eastern Studies Electives  
**Not offered current academic year**

**ARAB 257 (F) Iran, Islam, and the Last Great Revolution (WI)**

Crosslistings: ARAB257 / PSCI257  
**Secondary Crosslisting**

The title and inspiration for this course come from Robin Wright's book *The Last Great Revolution*. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post-revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

**Class Format:** seminar  
**Requirements/Evaluation:** first short essay, 5 pages (15%); second short essay, 5 pages (15%); research paper, 15-20 pages (30%); participation, including blogs, presentation, and precis (40%)  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** none  
**Enrollment Limit:** 15  
**Enrollment Preferences:** Political Science majors  
**Expected Class Size:** 15  
**Distributions:** (D1) (WI)  
**Distribution Notes:** meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under ARAB
ARAB 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World
Crosslistings: ARTH259 / AFR259 / ARAB259

Secondary Crosslisting
From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Class Format: lecture
Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam
Prerequisites: none, although an introductory course in art history or Islamic studies would be useful
Enrollment Limit: 25
Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or Africana Studies
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ARAB; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives

ARAB 261 (S) Comparative Postcolonial Narratives: Novels from the Arab World, Latin-America and the Caribbean (WI)
Crosslistings: ARAB261 / COMP261

Secondary Crosslisting
In this introductory course to the global postcolonial novel, we will examine novels in translation from the Arab world, Latin America and the Caribbean that are in conversation with each other. Through textual and formal analysis of selected novels in translation, we will ask questions concerning the legacy of the different forms of European colonialism in these distinct geographies. This course has two goals: First, to familiarize students with classical, canonical and popular Arabic, Latin American and Caribbean novels that deal with the history of European colonialism and/or its aftermath. Second, to introduce student to some of the critical trends and theoretical debates concerning the potential and limits of reading these novels as resistance and/or postcolonial literature. In addition to selected critical essays, the readings for this course may include novels by the following writers: Assia Djebar (Algeria), Gamal al-Ghitani (Egypt), Sahar Khalifah (Palestine), Tayyib Saleh (Sudan), Alejo Carpentier (Cuba), Rosario Castellanos (Mexico), Jamaica Kincaid (Antigua), and Gabriel Garcia Marquez (Colombia).

Class Format: seminar
Requirements/Evaluation: active class participation, three short papers (3-5 pages) and a final 7- to 10-page expansion and rewrite
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: majors or prospective majors in Comparative Literature or Arabic Studies
Expected Class Size: 15
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARAB

Not offered current academic year

ARAB 278 (F) The Golden Road to Samarqand
Crosslistings: ARAB278 / ARTH278
Secondary Crosslisting
The region stretching from present day Iran to India figures prominently in contemporary global culture but it also has a rich and complex history—an amalgamation of Persian, Turkish and Islamic influences. Home to Genghis Khan and Timur (Tamerlane), Akbar the Great and Shah Jahan, it has generated some of the most renowned monuments (e.g., the Taj Mahal and the blue tiled mosques of Isfahan) and refined manuscript painting ever known. We will cover a broad swath of time—from the 10th to the 20th century—concentrating on important centers of artistic production such as Timurid Central Asia and Mughal India. Students will have the opportunity to study original works of art in the college museum collections.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, a short paper, a midterm and a final
Prerequisites: none
Enrollment Limit: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARAB
Attributes: GBST Middle Eastern Studies Electives

ARAB 280 (S) Islam and Anthropology
Crosslistings: REL346 / ANTH346 / ASST346 / ARAB280
Secondary Crosslisting
If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional “object” of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct “ideal-type” models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar
Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB

Not offered current academic year

ARAB 301 (F) Advanced Arabic I
This course is a continuation of Intermediate Arabic. It focuses on expanding the students’ knowledge of vocabulary and grammar while stressing the development of reading, spoken, and written skills in Modern Standard Arabic. The material covered in class will include lessons from the *Al-Kitaab* series, as well as literary and multi-media works. Emphasis will be placed on increasing cultural literacy. *Class is conducted in Arabic.*

Class Format: meets four hours a week with the fourth hour a conversation section, time to be arranged
Requirements/Evaluation: active class participation, completion of all written assignments, quizzes, a midterm, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: two semesters of Intermediate Arabic or permission of instructor
Enrollment Limit: none
Expected Class Size: 8
Distributions: (D1)
ARAB 302 (S) Advanced Arabic II
This course is a continuation of Intermediate Arabic. It focuses on expanding the students' knowledge of vocabulary and grammar while stressing the development of reading, spoken, and written skills in Modern Standard Arabic.

Class Format: lecture
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARAB 301 or permission of instructor
Enrollment Limit: none
Distributions: (D1)

ARAB 303 (F) A History of Islam in Africa
Crosslistings: HIST303 / REL303 / ARAB303 / GBST303 / AFR303
Secondary Crosslisting
This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time.

Class Format: seminar
Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: lottery
Expected Class Size: 25
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB
Attributes: GBST African Studies Electives; HIST Group A Electives - Africa

ARAB 305 (S) Nationalism and Nation Building in the Middle East
Crosslistings: ARAB305 / HIST305
Secondary Crosslisting
In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie."
This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East and the challenges of statecraft. After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Iraq, Israel, Turkey, Palestine, Iran, and Egypt. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How did traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as
unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty. Finally, we will evaluate the role of foreign powers in nation building in the Middle East and consider whether the modern concept of the nation has any validity in the Middle Eastern context.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on several short papers and a "Magnus" Opus (a.k.a. final research paper)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors and students with a background in Middle Eastern studies

Expected Class Size: 20-25

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

ARAB 308 (S) The Nile (DPE) (WI)

Crosslistings: ARAB308 / HIST308

Secondary Crosslisting

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Class Format: seminar

Requirements/Evaluation: short papers and final project/paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB. DPE: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment. WI:

SEM Section: 01 TF 1:10 pm - 2:25 pm Magnus T. Bernhardsson

ARAB 310 (S) Iraq and Iran in the Twentieth Century

Crosslistings: ARAB310 / HIST310

Secondary Crosslisting

Despite being neighbors, the historical experience of Iran and Iraq has been drastically different. In this course we will begin by exploring the creation of Iraq in 1921 and the Pahlavi government in Iran. We will evaluate the revolutions of 1958 and 1978-9 and compare the lives and careers of Saddam
Hussein and Ayatollah Khomeini. The tragic Iran-Iraq war of 1980-88 will also be discussed. Finally, the political future of these countries will be assessed.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, short essays, and a final paper

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under ARAB

Attributes: GBST Middle Eastern Studies Electives; HIST Group E Electives - Middle East

ARAB 322 (S) Islam in Spain

Crosslistings: ARAB322 / RLSP322

Secondary Crosslisting

The presence of Islam--in all its diverse manifestations--is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods, and study several works--primarily of literature, though we will supplement with other texts--in which Muslims and Islam have been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives that include Christian and Muslim writers as well as converts on both sides. While the bulk of the course is focused on the period prior to 1700 CE, we will devote the final few weeks of class to the study of Islam in contemporary Spain using fiction, legal debates, and issues related to immigration. Conducted in Spanish

Class Format: seminar

Requirements/Evaluation: two short papers, oral presentations, one final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any RLSP 200-level class, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, Arabic Studies majors

Expected Class Size: 15

ARAB 330 (F) Thinking Critically: Major Debates in Modern Arab Thought (WI)

Crosslistings: ARAB330 / COMP363

Primary Crosslisting

The aim of this course is to introduce students to some of the major debates in Arab intellectual history in the 20th century and the ways in which they have shaped Arabic Studies as a discipline. We will read a range of texts from History, Religion, Politics, Anthropology, Cultural Studies, Literature, Gender, Sexualities and Women Studies, in order to gain a deeper insight into critical debates about nationhood, modernity, post-coloniality, democracy, feminism, social, political and religious movements, Orientalism and post-Orientalism, and the making of modern Arab subjectivities. In addition to a course packet with selected texts and essays, students are required to read the following books: 'Ibrahim Abu-Rabi', Contemporary Arab Thought: Studies in Post-1967 Arab Intellectual History (2004), Elizabeth Suzanne Kassab, Contemporary Arab Thought: Cultural Critique in Comparative Perspective (2010) & Tarik Sabry, Arab Cultural Studies: Mapping the Field (2012).

Class Format: seminar

Requirements/Evaluation: active class participation, three short papers (3-5 pages), and a final 7- to 10-page expansion and rewrite

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: majors or prospective majors in Arabic Studies and Comparative Literature

ARAB 331 (F) Popular Culture in the Arab World: Youth, Populism, and Politics (DPE) (WI)

Crosslistings: COMP332 / ARAB331

Primary Crosslisting

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring in or considering a major in Arabic Studies

Expected Class Size: 19

Distributions: (D1) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARAB DPE: As the course description explains, this course engages the concept of the popular through a critical examination of difference, power, and equality in the context of national revolt against colonialism, dictatorship, and socioeconomic injustice in the Arab world since the 1950s. The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women, articulated a political language of popular resistance against the dual hegemony of state and colony.

SEM Section: 01 MR 1:10 pm - 2:25 pm Amal Eqeiq

ARAB 332 (F) Islam and Feminism

Crosslistings: ARAB332 / WGSS334 / REL332

Secondary Crosslisting

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses so such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part
of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Class Format: seminar
Requirements/Evaluation: weekly responses, four 2- to 3-page essays
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors
Expected Class Size: 10
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB

ARAB 346 (S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (DPE) (WI)
Crosslistings: COMP346 / ARAB346
Secondary Crosslisting
This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Throughout we will read novels and watch films that focus on histories of social movements, post-independence revolutions, indigenous autonomies, dictatorship, and counter-revolutions with the aim to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. A comparative and critical reading of these texts will introduce you to the complex histories of national liberation, state terrorism and democratic imagination in two geographies in the Global South that share similar struggles against Euro-American imperialism. These texts will also familiarize you with an alternative, yet foundational, canon of Arabic, Latin American and Caribbean literatures and cinema, particularly from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Although this course is conceptualized as a South-South comparative reading of revolution and counter-revolution, it does not adhere to strict geographical parallels between the Arab World, Latin America and the Caribbean. It is mapped, however, according to major critical questions and thematic tropes that inform this topic. For example, how do contemporary Iraqi and Chilean writers and filmmakers write an aesthetic of evil in narratives that investigate the legacy of prolonged dictatorship? How do national novels in Mexico and Palestine depict parallel movements of indigenous resistance and anti-capitalist struggles? What motifs of dystopia are illustrated in narratives about post-revolution civil wars in Argentina and Syria? What histories of popular nationalism and socialism are revealed in feminist memoirs from Egypt and Cuba from the 1960s and 1970s?

Class Format: seminar
Requirements/Evaluation: active class participation, two short papers (3-4 pages), two film reviews (1-page), two critical reflections (1-page), a performance, and a final paper (7-10 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D1) (DPE) (WI)
Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under ARAB DPE:
This course will explore difference, power, and equality through a comparative reading of narratives of dissent and revolt. The novels examines the effects of class, race, ethnicity, gender and sexuality on social and economic inequalities that ultimately have mobilized revolutions in the Arab world, Latin America, and the Caribbean since the 1960s. Reading narratives of socialist revolutions from the Global South, students will hone skills to address global injustices and neoliberalism

SEM Section: 01    MR 2:35 pm - 3:50 pm     Amal Eeqiq

ARAB 368 (F) Arab Women Writers: Remapping Urban Narratives (WI)
In "The Lover of Blue Writing above the Sea," (1995) a poem written to console a lover after the death of his beloved, Syrian poet, Ghada al-Samman, pens: "If you are sad and burn the edge of my book/I shall come to you/like the genie in my grandmother's Damascene stories..." As these lines imply, the fantastic grandmother's Damascene stories have the power to equally amend broken hearts and restore memories of loss. In this course, we will adopt "the grandmother's Damascene stories" as a conceptual metaphor that guides our line inquiry into the intersection of Arab women's narrative and the city. We will read novels and short stories by Arab women writers about cities and capitals in the Arab world and the diaspora. The goal of this course is not only to familiarize students with prominent Arab women novelists, such as Hoda Barakat, Radwa Ashur, Liana Badr, Raja'a Alem, Alia Mamduh, and Ahlam Mosteghanemi, among others, but also to introduce them to the literary and visual cartography of Beirut, Granada (via Cairo), Ramallah, Mecca, Baghdad, and Constantine, respectively. We will also read short stories about other cities in the world, such as New York, Paris, London, Buenos Aires and Tokyo among other world metropolises. Questions we will address include: How does the city appear as a protagonist? How do Arab women novelists represent nationhood, modernity, memory, love, war, sexuality and religion, among other themes, in their construction of urban narratives? How do these narratives map an Arab feminist metropolis? How do Arab women writers represent cities beyond the Arab world? To answer these questions, we will also look at Arab women's blogs and watch films that focus on the city as a site for spatial articulation of national histories, popular revolutions, and feminist public spheres.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response papers, three short papers (3 - 5 pages), a final performance project, and a final paper (7 - 10 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Not offered current academic year

ARAB 369 (S) Indigenous Narratives: From the Fourth World to the Global South (WI)

Crosslistings: GBST369 / HIST306 / ARAB369 / COMP369

Secondary Crosslisting

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5-7 pages)

ARAB 401 (S) Topics in Advanced Arabic I: Contemporary Arab Cinema
Crosslistings: ARAB401 / COMP403

Primary Crosslisting

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

ARAB 411 (F) Happy Holidays! A Comparative History of Commemorations and Festivals  (WI)
Crosslistings: ARAB411 / HIST411 / REL321

Secondary Crosslisting
What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Class Format: seminar
Requirements/Evaluation: several short response papers and a 20- to 25-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: seniors, especially History and Arabic Studies majors
Expected Class Size: 12
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under ARAB

ARAB 412 Advanced Readings in Contemporary Arabic Literature
This course, taught in Arabic, aims at providing students with a deeper understanding of contemporary Arab literature. By navigating different literary moments, foci and genres, the course will offer a panoramic view of the contemporary literary map of the region. While the course will focus on some mainstream writers such as the Egyptian Naguib Mahfouz and the Sudanese Tayib Salih, it will also feature stateless and non-canonical writers such as Alaa Al-Sarky and young poets using ‘amiyya’ or colloquial Arabic as their main tool of expression. We will read short stories, excerpts from novels, literary critiques, interviews with authors, examples of classical and lyrical poetry, as well as watch a number of movies based on literary adaptations. Through examining representative literary texts from various parts of the Arab region, students will not only broaden their awareness of the socio-political and cultural dynamics emanating from these works, but will also improve their linguistic and stylistic knowledge of Arabic at more sophisticated levels.

Class Format: seminar
Requirements/Evaluation: active participation in class, reading responses, presentations, blogs, quizzes, final paper
Prerequisites: ARAB 302 or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: Arabic Studies majors and certificate students
Expected Class Size: 10
Distributions: (D1)
Not offered current academic year

ARAB 415 (S) Beyond Headlines: Surveying the Arab Landscape through Arabic Media
How does Arabic media represent the Arab landscape? This course will explore Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss Arabic media as a vehicle through which issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Class Format: lecture
ARAB 416 (S)  Arabic Short Stories: Societies, Cultural narratives & Literary aesthetics

In this course we will explore the literary languages of Arabic and as well as various political and socio-economic issues via a selection of short stories that hail from geographically diverse authors. Being attentive to detailed readings of the text, their context, and the environment within which the author composed the text in question, we will weave our way through these short stories, developing the four language skills in addition to cultural competency. Although the course will avoid the monolithic approach of reading these stories as a social document that is a reflection or mirror of their societies, and will be equally concerned with the aesthetics of the Arabic literary narratives, the socio-economic and political issues discussed in the stories will be of relevance to the broader realms of Middle Eastern studies writ large. Tradition vs. modernity, the individual in opposition to the state, and gender issues are just some of the themes that will be discussed. In addition to the short stories provided, the class will engage in complimentary activities and material, like links to open source online videos and articles to expand on our knowledge of specific Arabic cultural and sociological phenomena. In addition to the short stories, there will be a short list of novels from which each member in the class will choose according to their interests. Reading the novel will be a term long project and will entail one-on-one meetings every two weeks with the instructor and will be tailored according to individual needs.

Class Format: seminar

Requirements/Evaluation: preparation and active participation, response questions and vocabulary building homework, short 2-page essays, midterm video, and end of term paper (5-7 pages)

Prerequisites: ARAB 302 or by permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Arabic Studies students

Expected Class Size: 4

Distributions: (D1)

ARAB 420 (F)  Current Events from the Maghreb and the Middle East

Students in this course will engage with authentic materials from Arabic media, covering the Maghreb and the Middle East. Using original content from newspapers, magazines, websites, TV channels, podcasts, and specialized news outlets, the course will take students from intermediate high to advanced high level. Through their active engagement with the course materials, students will acquire a very diverse vocabulary, strengthen their mastery of Arabic grammar, and perform advanced linguistic skills in Modern Standard Arabic (MSA). Moreover, students in this course will be able to produce substantial narratives about complicated and abstract topics, argue for or against an idea, and discuss a variety of topics in MSA. In addition to enhancing students’ listening, speaking, reading and writing skills, close, critical attention will be paid to deepening students’ cultural competence. Students are expected to give three presentations through the course of the semester, write weekly response papers in Arabic, participate in a collective project, and produce a final paper about a topic of their choosing in consultation with the instructor.

Class Format: seminar

Requirements/Evaluation: active participation, three presentations, collaborative project, final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARAB 302 or permission of the Instructor
Enrollment Limit: 15

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 8

Distributions: (D1)

ARAB 480 (F) Interpretations of the Israeli Palestinian Conflict  (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimate their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

ART (Div I)

ART HISTORY

Co-Chairs: Professors Elizabeth McGowan and Amy Podmore

On leave Fall/Spring: Professors: P. Low, S. Solum.

On leave Spring only: Professor C. Chavoya, Senior Lecturer H. Edwards.

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Practice), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Elizabeth McGowan

Art Studio Faculty Advisor: Amy Podmore

History and Practice Faculty Advisor: Ben Benedict

ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and built environments as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and archaeology. Because of its concentration on visual experience, the Art History major increases one’s ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

Any three of the following four courses: ARTH 101, ARTH 102, ARTH 103, and ARTH 104

Any ARTS (studio) course.

Any two courses in Art History concerned with the following: one course in art history concerned with a period prior to 1600 and one course in art history concerned with post 1600.

ARTH 301 Methods of Art History

One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1600 or post-1600 requirement).

One additional course, at any level.

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students’ level of experience, ultimately supporting original, independent work at the 400-level.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students’ skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or
initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

**400-LEVEL COURSES** are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

**HISTORY AND PRACTICE**

This route allows students to study in depth both the history of art and the making of it. It offers considerable flexibility: students may propose courses of study that emphasize particular media, themes, or methodological issues. Students may take more courses in one wing of the department than the other, as long as the minimum requirements in each wing are satisfied. (Note that the Art History and Studio Art Practice routes are strongly recommended for any prospective Art major who is contemplating graduate study in Art History or Art Studio.)

Some students will be attracted to both wings of the department but will not have a field of study that falls between the two. In these cases, it is better for the student to choose between history and studio-taking additional courses from the other wing as desired. In short, the History and Practice route is reserved for students with a strong record of achievement who cannot be accommodated in the two wings of the department.

History and Practice students who are admitted to the Senior Tutorial will participate in the senior studio exhibition at the end of the year. Unlike the history or studio routes, acceptance into the History and Practice route is not automatic. The student must first submit a written application for the major. The application must include a thoughtful statement of the theme of the major that both 1) shows the coherence and integrity of the plan of study and 2) explains why the students’ goals cannot be met in either history or studio. The application must include both the written statement and a list of proposed courses. The application must be submitted in two copies to advisors in both wings of the department. If approved, the application and list of proposed courses must be submitted to the department secretary before registering for the major.

**Major Requirements**

The History and Practice major requires a minimum of nine courses:

- Any two of the following four courses: ARTH 101, 102, 103, and 104
- ARTS 100 Drawing I
- One 200-level ARTS course.
- ARTH 301 Methods OR ARTS 319 Junior Seminar
- One ARTH seminar (400-level) OR one 500-level graduate course (except 508)
- One 300-level ARTS course OR (with permission) ARTS 418 Senior Seminar
- Any two additional Art Studio or Art History courses. At least one elective must be taken in each wing of the department. At least one of the electives must be an Art History course concerned with a period of art prior to 1600.

**THE DEGREE WITH HONORS IN ART**

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

**Art History**

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course, a travel research project, or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department’s Administrative Assistant in Lawrence no later than the end of the reading period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include a thesis project proposal of 500-700 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department’s Administrative Assistant) by the end of the reading period of the Fall semester. This form serves to verify: a) your advisor’s support of your project, and b) your advisor’s approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study with concrete goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the
Major; 4) completion of ARTH 301 by the time of the application (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

Students who have identified a thesis topic and secured an advisor may apply early (in the Spring semester of their junior year) in order to pursue—in relation to their thesis project—summer research opportunities and/or a faculty-sponsored independent study in the following Fall semester. The procedure and criteria for students applying early are the same as those outlined above. (That is, students applying early would likewise take the Winter Study and Spring courses). Materials for early application (the same as outlined above) would be due by 5:00 pm on the Thursday preceding Spring Break.

History and Practice

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Practice makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art History

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year or unless there is only one section of 301 offered; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied abroad only if the student is away for the full academic year. Student may not receive credit for 400-level work while abroad). Art history students should be aware that in many programs course selection is limited and is not known before one commits to the program. It may happen that none of the art history courses offered during the semester abroad satisfy distribution requirements for the major.

History and Practice

History and Practice majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and practice majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and practice majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTH 101 (F) Art Through Time

A single-semester, team-taught introduction to European and North American art and architecture from the beginning to approximately 1600. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, exhibited, bought and sold, held, touched, worn, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course set its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To train students to look carefully at art, and to give them time with original works of art, we use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, the Williams College Museum of Art, and the Chapin Rare Book Library.
Class Format: lecture with discussion section
Requirements/Evaluation: quizzes, midterm, two papers and a final exam
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 80
Distributions: (D1)

Not offered current academic year

ARTH 102 (S)  Art Through Time
A semester-long, team-taught introduction to European and North American art and architecture from approximately 1600 to today. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, exhibited, bought and sold, held, touched, worn, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To train students to look carefully at art, and to give them time with original works of art, we use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, the Williams College Museum of Art, and the Chapin Rare Book Library.

ARTH 103 (F)  By Land and Sea: Art, Culture and Religion Along the Trade Routes of Asia
Crosslistings: ARTH103 / ASST103
Primary Crosslisting
This undergraduate Asian art and architecture survey course will focus on artistic, religious, and cultural exchange along the two major trading networks connecting Asia: the Silk Road and the South East Asian sea routes. Following the spread of religious ideas across these routes, the survey will examine art forms including textiles, manuscripts, paintings, luxury items and sculpture, as well as architectural examples. The three major religions and their artistic expressions that will be explored in class are Buddhism, Hinduism and Islam. An underlying theme in class will be to study the spread and evolution of artistic styles and iconography across Asia, while also highlighting the continuation of local traditions that persisted despite outside influences.

Class Format: lecture
Requirements/Evaluation: three 15-minute quizzes, two 2-5 page papers, a mid-term, a final exam and class attendance
Prerequisites: none
Enrollment Limit: 35
Enrollment Preferences: none
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: ARTH pre-1600 Courses; GBST East Asian Studies Electives

Fall 2018
LEC Section: 01    TR 11:20 am - 12:35 pm     Murad K. Mumtaz

ARTH 104 (F)  Materials, Meanings, and Messages in the Arts of Africa  (DPE)
Crosslistings: AFR105 / ARTH104

Primary Crosslisting
This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Class Format: lecture
Requirements/Evaluation: three 2-page response papers, class journal on WCMA objects lab, midterm exam and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Art History and African Studies majors
Expected Class Size: 40
Distributions: (D1) (DPE)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE: This course fulfills DPE requirements through its exploration of the differences between concepts of art in African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and assumptions about these objects that position them as 'primitive' or 'exotic' constructs

Fall 2018
LEC Section: 01    WF 11:00 am - 12:15 pm     Michelle M. Apotsos

ARTH 203 (F)  Chicana/o Film and Video
Crosslistings: LATS203 / ARTH203 / AMST205 / WGSS203

Secondary Crosslisting
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays
**Prerequisites:** none

**Enrollment Limit:** 30

**Expected Class Size:** 20

**Distributions:** (D1)

**Distribution Notes:** meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH

**ARTH 210 (S) Intro to Latin American and Latina/o Art: Contradictions & Continuities, Postcolonial to the Present** (DPE)

This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latina/o art. The course begins in the late 19th and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latina/o artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latina/o artistic practices and scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres--from painting and sculpture to printmaking, photography, conceptual, installation, and performance art--and will draw from artist statements, manifestos, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.

**Class Format:** lecture

**Requirements/Evaluation:** midterm exam and final exam, two 2- to 3-page writing assignments, attendance, and active participation

**Prerequisites:** none

**Spring 2019**

LEC Section: 01  TR 11:20 am - 12:35 pm  Mari Rodriguez Binnie

**ARTH 210 (F) Art and Experience in Ancient Rome**

Crosslistings: ARTH210 / CLAS210

Secondary Crosslisting

To see and be seen--it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former
slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Class Format: lecture

Requirements/Evaluation: attendance and preparation, a mid-term, a final, and a medium-length paper

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D1)

ARTH 220 (F) Sacred Spaces of Islam

A clean place oriented towards Mecca is enough for daily prayer, but the communal practices of Islam are myriad and they often transpire in more formal architectural settings. These structures range from traditional columned halls of brick and timber to modernist ensembles of reinforced concrete and plate glass; monuments may be open to the elements, flat-roofed or domed; surfaces may be enhanced with carved marble, inlaid wood, glazed tile and other beautifying elements.

Class Format: lecture/discussion

Requirements/Evaluation: midterm, final, term project

Prerequisites: none

Enrollment Limit: 19

Distributions: (D1)

Attributes: INST Middle Eastern Studies Electives

Not offered current academic year

ARTH 221 (F) History of Photography

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium’s emergence and acceptance as a fine art. We will also explore photography’s physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to “the real.” By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Class Format: lecture

Requirements/Evaluation: two short papers, mid-term, and final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D1)

Attributes: ARTH post-1600 Courses; FMST Related Courses

Fall 2018

LEC Section: 01    TR 8:30 am - 9:45 am     Catherine N. Howe
Since its invention, photography has been globally disseminated and locally inflected, serving diverse documentary and expressive purposes around the world. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the hierarchical dynamics operative in individual communities and transcultural contexts. The course will explore photographic practices in different zones of the Middle East--e.g., the Holy Land, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the formative impact of visual representations in particular circumstances--what work do photographs do? Who resists and who benefits? The general goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: lecture/discussion meeting twice a week

Requirements/Evaluation: midterm, final, GLOW Posts and term project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: majors and area studies concentrators

Expected Class Size: 15-20

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under ARAB

Fall 2018

LEC Section: 01    TF 1:10 pm - 2:25 pm     Holly  Edwards
ARTh 228 (S) Velázquez, Goya, and Picasso  (WI)

Crosslistings: RLSP228 / ARTH228

Secondary Crosslisting

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Class Format: tutorial

Requirements/Evaluation: 3- to 5-page weekly assignment

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: WI: The tutorial format offers students an intensive opportunity to improve their writing by demanding regular writing assignments that the student has to read out loud to their partner and professor. Students write biweekly papers throughout the semester. These papers are then analyzed during the tutorial session by the other student's response

Spring 2019

ARTh 230 (F) From Alexander to Cleopatra: Remodeling the Mediterranean World

Crosslistings: ARTH230 / CLAS230

Secondary Crosslisting

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

Class Format: lecture

Requirements/Evaluation: class participation, quizzes, midterm, final exam, and one medium-length paper

Prerequisites: none
Enrollment Limit: 40

Enrollment Preferences: students with an interest in the ancient Mediterranean world and in the history of western art and architecture

Expected Class Size: 35

Distributions: (D1)

Not offered current academic year

ARTH 232 (S) Renaissance Rome: Renovating the Eternal City

George Eliot called Rome "the city of visible history," a place with the power to bring "the past of a whole hemisphere" right before our eyes. The magnetic visual power of Rome did not just occur naturally, however; it is a product of a bold urban project first envisioned by Renaissance popes and brought into being by the artists and architects they hired. During the fifteenth and sixteenth centuries, Rome was transformed from a shrinking and neglected medieval town into a thriving center of artistic energy and invention. Beginning with the papacy's return to the city in 1417, we will focus on the historical, ideological, and artistic forces behind this period of renovation and restoration that reshaped the urban and artistic fabric of the city. We will study the particularly Roman foundations for the period known as the High Renaissance, then, approaching art historical touchstones by Michelangelo, Raphael, and Bramante as works grounded in a uniquely Roman sense of time and historical destiny. We will conclude with a selective look at Baroque works by Caravaggio, Bernini and Borromini, examining their their powerful innovations and effects as a continuation of the Renaissance renovation of the eternal city.

Class Format: lecture/discussion

Requirements/Evaluation: ungraded mapping assignments and short written assignments, 7- to 10-page research paper, midterm and final examinations

Prerequisites: none; open to Art majors as well as non-majors

Enrollment Limit: 30

Distributions: (D1)

Attributes: ARTH pre-1600 Courses;

Not offered current academic year

ARTH 237 (S) Making Things Visible: Adventures in Documentary Work

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Secondary Crosslisting

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps and resonances between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will try their hand at methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of classical and recent examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving platforms on which such work can be presented, both off- and on-line. Lastly, we will pose and debate ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. In addition to readings, students should be prepared to spend a significant time out of the classroom doing fieldwork. Experience in photography and/or video, although not required, will be helpful.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Department Notes: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Distributions: (D1)
Distribution Notes: meets Division 2 requirement if registration is under AMST or SOC; meets Division 1 requirement if registration is under ARTH or ENGL

Attributes: EXPE Experiential Education Courses; FMST Related Courses

Spring 2019

ARTH 238 (S) Greek Art and the Gods
Crosslistings: CLAS248 / REL216 / ARTH238

Primary Crosslisting

In the Iliad, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympus, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity.

Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: lecture and discussion

Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: preference will be given to pre-registered Art-History majors needing to fulfill the pre-1400 requirement; otherwise, the course is open to any interested student

Expected Class Size: 30

Department Notes: satisfies the pre-1400 requirement; satisfies the pre-1600 elective requirement in the art-history major.

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH and CLAS; meets Division 2 requirement if registration is under REL

Attributes: ARTH pre-1600 Courses;

Not offered current academic year

ARTH 240 (F) Histories, Communities, and Collections

What can the College's collections of documents, artifacts, art objects, natural history specimens, and rare books--whether housed in the Special Collections of the Library, Archives, or at the Williams College Museum of Art (WCMA)--teach us about our institutional past? How do we put that past into dialogue with our present? Planned specifically to engage with the WCMA's The Field is the World, an exhibition that investigates two invisible histories contained within collections here on campus, this course will approach the questions of histories, communities, and collections in two ways. First, in lectures we will survey the history of collecting in Europe and the United States from the eighteenth century up to critical reinterpretations by contemporary artists and consider how collecting was often tied to other endeavors like establishing national institutions, researching human variety, representing colonial expansion, or documenting missionary efforts. Second, in interactive sessions we will meet with curators, librarians, and guest speakers to look at objects first hand and to discuss the relationship between collecting and scholarship. Over the course of the semester we will examine the historical models of knowledge production and audience engendered by collections and their display. Moreover, we will work together to formulate new models of interpretation that address overlooked histories and engage with the current interests of our campus community.

Class Format: lecture; two 75-minute meetings per week; one in lecture format, the other in discussion format

Requirements/Evaluation: participation in interactive sessions, weekly written responses, one 3- to 4-page essay, one 8- to 10-page final project (proposal for an exhibition or a recontextualization)
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** none; for interactive sessions at WCMA and the Library space will be limited

**Expected Class Size:** 10

**Distributions:** (D1)

**ARTH 243 (F) Chemical Intimacies** (DPE)

Crosslistings: ENGL243 / WGSS233 / ARTH243 / SCST233

This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geographically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between "actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

**Class Format:** seminar

**Requirements/Evaluation:** individual research project

---

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

**Expected Class Size:** 10

**Distributions:** (D1) (DPE)

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS OR SCST; meets Division 1 requirement if registration is under ARTH or ENGL. DPE: The course gives special attention to forms of human-chemical entanglement that are related to environmental justice (pollution), and gender, racial, sexual, indigenous, and disability politics.

**ARTH 244 (S) City, Anti-City, and Utopia: Town Planning from 1500 to 1800**

The Italian Renaissance gave us our modern conception of the ideal city, whose geometrically regular form was both symbol and instrument of a perfectly ordered society. This alluring notion has preoccupied artists and theorists from Michelangelo and Thomas More to Albrecht Dürer and Christopher Wren; it achieved tangible form in such new capitals as St. Petersbourg and Washington, D.C. But the West has remained characteristically ambivalent about the city, especially in the United States, an ambivalence reflected in persistent attempts to decentralize the city (Frank Lloyd Wright), to beautify it (the City Beautiful Movement), reshape it (Urban Renewal) or abandon it (suburbanization). This course looks at the roots of those movements, and the development of urban and anti-urban thought from the Renaissance to the Industrial Revolution. Topics include Renaissance fortification design, the colonial cities of the New World, the picturesquely landscaped English garden, and the separatist societies that sought to create communal utopias in the wilderness.
**Class Format:** lecture

**Requirements/Evaluation:** one paper (10-20 pages) and a simple design project, weekly study questions and a final exam (weighted respectively at 30, 20, 20, and 30% of the grade)

**Enrollment Limit:** 45

**Enrollment Preferences:** Art majors

**Expected Class Size:** 30

**Distributions:** (D1)

**Attributes:** ARTH post-1600 Courses;

*Not offered current academic year*

**ARTH 246 (F) Do You See What I See?!**

We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on many variables--who we are, where we are and what we choose to look at. It also depends on what tools we bring to bear. This class is an opportunity to assemble a useful tool kit for the challenging visual environments of the 21st century. Image study will be central as we wander freely in space and time, but the goal is not to master a body of canonical examples. Rather, we will consider different ways of seeing, and practice transferable skills of viewing diverse materials. The approach will be comparative and interrogative; case studies will range from coinage to painting, from advertising to monumental sculpture. Along the way, we will consider what “art” is, what a visual culture is, and how different visual cultures might overlap in the global arena. Students will look, sketch and write throughout the semester, thereby exploring the entire spectrum of visuality from production to reception.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** short writing assignments and class presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** none

**Expected Class Size:** 19

**Distributions:** (D1)

*Not offered current academic year*

**ARTH 249 (S) Introduction to Visual Cultures of Contact** (DPE)

This introductory lecture course will survey the visual and material products of European contact with Asia, Oceania, Africa, and the Americas between 1500 and 1900. This period witnessed the establishment and loss of Spanish, English, and French colonies, a proliferation of exploratory voyages, and the abolition of the transatlantic slave trade. Some of our objects of study will be European in origin from well-known artists including Rubens, Velasquez, Reynolds, and Gauguin. In many cases we will be asking questions about circulation–whether we are looking at Tupi featherwork from Brazil brought to Europe, Flemish prints adapted by artists in Central and South America, or tattoos on the bodies of people traveling to and from Tahiti. Against the backdrop of these context-specific case studies, students will be asked to consider contact, colonialism, exchange, and appropriation more conceptually.

**Class Format:** lecture

**Requirements/Evaluation:** midterm exam, final exam, five 1-page assignments, research paper (7- to 9-pages)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Art majors

**Expected Class Size:** 10

**Distributions:** (D1) (DPE)

Spring 2019
ARTh 253 (F)  Art in the Age of the Revolution, 1760-1860
Crosslistings: ARTH253 / WGSS253

Primary Crosslisting
A social history beginning with art of the pre-Revolutionary period and ending with Realism. Major topics include changing definitions of Neoclassicism and Romanticism, the dramatic impact of the revolutions of 1789, 1830, and 1848, the monarichies and republics framing the Napoleonic Empire, the shift from history painting to scenes of everyday life, and landscape painting as an autonomous art form. We will also consider proscriptions and controversies in art-making and representation during this period. The course stresses French artists such as Greuze, Vigée-Lebrun, David, Ingres, Delacroix, Géricault, Corot, and Courbet, but also includes Goya, Constable, Turner, and Friedrich.

Class Format: lecture
Requirements/Evaluation: two-page position paper related to assigned readings, hour test, and final exam or research paper; a conference at the Clark Art Institute and a field trip to New York may also be required
Prerequisites: two semesters of ARTH 101-102, 103 or permission of instructor
Enrollment Limit: 30
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under WGSS
Attributes: ARTH post-1600 Courses;
Not offered current academic year

ARTh 254 (F)  Manet to Matisse
Crosslistings: WGSS254 / ARTH254

Primary Crosslisting
A social history of French painting from 1860 to 1900, beginning with the origins of modernism in the work of Courbet and Manet. Among the topics to be discussed are the rebuilding of Paris under Napoleon III; changing attitudes toward city and country in Impressionist and Symbolist art; the impact of imperialism and international trade; the gendering of public spaces, and the prominent place of women in representations of modern life. The course addresses vanguard movements such as Impressionism and Post-Impressionism and the styles of individual artists associated with them, as well as the work of academic painters.

Class Format: lecture
Requirements/Evaluation: 2-page position paper related to assigned viewing and readings, hour test and final exam or research paper; a conference at the Clark Art Institute; a field trip to New York may also be required

Fall 2018
LEC Section: 01  TR 9:55 am - 11:10 am    Carol Ockman

ARTh 257 (F)  Architecture 1700-1900
In the eighteenth and nineteenth centuries a new conception of architecture arose, based on archaeological discoveries, the development of new building materials, and convulsive social changes. This course looks at the major architectural movements of this period, and the theoretical ideas that shaped them. Topics include Neoclassicism, new building types, Victorian Architecture, the development of the architectural profession, and Art Nouveau. Major architects to be discussed include Piranesi, John Soane, Schinkel, Pugin, and H.H. Richardson. When possible, primary sources will be used. Students will be given experience in reading plans and writing about buildings.

Class Format: lecture
ARTh 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Crosslistings: ARTH259 / AFR259 / ARAB259

Primary Crosslisting

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Class Format: lecture

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: if the course is oversubscribed, preference will be given to students who have declared a major in Art History or Africana Studies

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ARAB; meets Division 2 requirement if registration is under AFR

Attributes: GBST African Studies Electives

Not offered current academic year

ARTh 262 (F) Modern Architecture

A century ago, the Modern Movement promised the most sweeping cultural transformation since the Renaissance. Architecture was only one lobe of a comprehensive movement that embraced literature and painting, music and theater, all aspiring to the same radical emancipation from traditional form and structures of authority. What happened? How and why did modern architecture abandon its utopian vision. Students will explored the major developments in Western architecture from 1900 to the present, and become familiar with its major figures: Wright, Gropius, Mies van der Rohe, Le Corbusier, Aalto, Kahn, Venturi, Gehry, Koolhaas, and Hadid. Students will learn a variety of skills: design a 1000-square foot vacation house; present to the class an analysis of a building; and organize a small exhibition of architectural treatises in the Chapin Library.

Class Format: lecture

Requirements/Evaluation: two hour tests and a design project including drawings and a written statement

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: juniors and sophomores

Expected Class Size: 30

Distributions: (D1)

Attributes: ARTH post-1600 Courses;
ARTH 264 (S)  American Art and Architecture, 1600 to Present
Crosslistings: ARTH264 / AMST264

Primary Crosslisting
American art is often looked at as a provincial version of the real thing--i.e., European art--and found wanting. This course examines American architecture, painting, and sculpture on its own terms, in the light of the social, ideological and economic forces that shaped it. Special attention will be paid to such themes as the Puritan legacy and attitudes toward art; the making of art in a commercial society; and the tension between the ideal and the real in American works of art.

Class Format: lecture
Requirements/Evaluation: 15-page research paper (divided into an annotated bibliography, first draft and revised draft); weekly study questions on the readings; final 15-minute oral exam
Enrollment Limit: 60
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST
Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; ARTH post-1600 Courses;

ARTH 270 (S)  Japanese Art and Culture
Crosslistings: ARTH270 / ASST270

Primary Crosslisting
This course is a survey of traditional Japanese painting, sculpture, architecture, woodblock prints, and decorative arts. Special attention will be paid to the developments in artistic style and subject matter in the contexts of contemporary cultural phenomena. Through visual analysis students learn the aesthetic, religious, and political ideals and cultural meanings conveyed in the works of art. Course highlights include the transmission of Buddhism and its art to Japan; Zen Buddhism and its art (dry gardens; temples; and tea ceremony related art forms) in the context of samurai culture; the sex industry and kabuki theater, their art, and censorship; and the Western influences on Japanese art and culture and vice versa, (Japanese woodblock prints' impact on Impressionist and Post-Impressionist paintings, for example).

Class Format: lecture
Requirements/Evaluation: three 30- to 40-minute quizzes, two short papers, film screening, class attendance
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 35
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: ARTH pre-1600 Courses; GBST East Asian Studies Electives

ARTH 272 (S)  Art of the Noble Path: Buddhist Material Culture Across Asia
Crosslistings: ARTH272 / REL272 / ASST272

Primary Crosslisting
Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet,
and travelogues of Chinese pilgrims, will provide greater context for the artworks.

**Class Format:** lecture

**Requirements/Evaluation:** 3 fifteen-minute quizzes, 1 three to five-page paper, 1 eight to ten-page paper, a midterm, and a final exam

**Extra Info:** meets Division 1 requirement if registration is under ARTH or ASST; meets Division 2 requirement if registration is under REL

**ARTH 274 (S) Chinese Calligraphy: Theory and Practice**

**Crosslistings:** ASST274 / ARTH274 / ARTS274

**Primary Crosslisting**

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as either an Art History or a Studio Art course.

**Class Format:** lecture/studio instruction

**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

**Prerequisites:** none

**Enrollment Limit:** 12

**Department Notes:** this course can count toward the Art History or Studio major

**ARTH 278 (F) The Golden Road to Samarqand**

**Crosslistings:** ARAB278 / ARTH278

**Primary Crosslisting**

The region stretching from present day Iran to India figures prominently in contemporary global culture but it also has a rich and complex history—an amalgamation of Persian, Turkish and Islamic influences. Home to Genghis Khan and Timur (Tamerlane), Akbar the Great and Shah Jahan, it has generated some of the most renowned monuments (e.g. the Taj Mahal and the blue tiled mosques of Isfahan) and refined manuscript painting ever known. We will cover a broad swath of time—from the 10th to the 20th century—concentrating on important centers of artistic production such as Timurid Central Asia and Mughal India. Students will have the opportunity to study original works of art in the college museum collections.

**Class Format:** lecture/discussion

Crosslistings: REL280 / ANTH281 / ARTH281
Secondary Crosslisting
For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Precolombian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be be presented in a museum exhibit.
Class Format: seminar
Requirements/Evaluation: active class participation; three short papers; 15-page research paper and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: ANTH, SOC and ARTH majors
Expected Class Size: 12
Distributions: (D1)
Distribution Notes: meets Division 2 requirement if registration is under ANTH or REL; meets Division 1 requirement if registration is under ARTH

Spring 2019
SEM Section: 01  TF 1:10 pm - 2:25 pm  Antonia E. Foias

ARTH 284 (F)  The Postwar Avant-Gardes
Artistic discourse in the Western hemisphere dramatically changed course in the wake of the Second World War. The mass trauma inflicted by the war prompted artists and critics throughout the region to reassess the role and potential of art in society. But the war's displacement of communities also displaced the centers for artistic activity, and avant-garde practices soon expanded vigorously throughout the Americas. Through comparative studies, this course will analyze the artistic avant-gardes that emerged simultaneously in the United States and Latin America after 1945. We will place these myriad practices in dialogue, to elucidate the complexity, richness, and vitality of artistic practices in the postwar era.
Class Format: lecture
Requirements/Evaluation: midterm exam, final exam, one short 2-page writing assignment, one 6- to 8-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: none
Expected Class Size: 20
Distributions: (D1)

**ARTH 286 (F) Japanese Popular Visual Culture**

Crosslistings: COMP186 / ARTH586 / ARTH286 / ASST186

**Secondary Crosslisting**

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** attendance, participation, two 5-page papers, final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** students majoring or considering a major in a related discipline

**Expected Class Size:** 15

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST

---

**ARTH 301 (F) Methods of Art History**

This course on the methods and historiography of art history offers art-history majors an overview of the discipline since the late 18th century. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; art and the material world; art, gender, and sexuality; and art as a global phenomenon.

**Class Format:** lecture and discussion

**Requirements/Evaluation:** six short papers, one final paper, one short oral presentation, and class participation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** any 100 level ARTH course or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** enrollment restricted to Art-History majors and required of them

**Expected Class Size:** 15-10

**Distributions:** (D1)
Secondary Crosslisting

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that result in the institutions of our time. The seminar will examine museums past, present and future looking at governance and administration practices, architecture and installation, accessioning/deaccessioning policies, and cultural property issues. It will also consider current trends in exhibition, public education and other programming in both "encyclopedic" and contemporary arts institutions. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on oral presentations as well as two research papers

Extra Info: may not be taken on a pass/fail basis

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students then to senior Art History majors

Department Notes: satisfies the seminar requirement for the undergraduate Art History major

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under LEAD

Attributes: AMST Space and Place Electives; LEAD Facets or Domains of Leadership

ARTh 308 (S) African Art and the Western Museum (DPE) (WI)

Crosslistings: AFR369 / ARTH308

Primary Crosslisting

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Class Format: tutorial

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 104 or special permission from the instructor

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE:
Explores issues of ‘authentic’ representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African ‘art’ has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Spring 2019
ARTh 310 (S) An American Family and “Reality” Television (WI)
Crosslistings: COMP316 / AMST333 / ARTH310 / WGSS312

Primary Crosslisting

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called “Reality TV.” In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the “American dream.” Documenting the family’s life over the course of eight months, the series chronicled the dissolution of the Louds’ marriage and broadcast the “coming out” of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program’s historical reception, and analyze its influence on broadcast and film media, particularly on ‘reality’ television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Class Format: seminar

Requirements/Evaluation: class presentations, research assignments, and final 16- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: junior majors, followed by senior majors

Expected Class Size: 14

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or COMP; meets Division 2 requirement if registration is under AMST or WGSS

Attributes: AMST Arts in Context Electives; ARTH post-1600 Courses; FMST Core Courses;

Not offered current academic year

ARTh 327 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA
Crosslistings: ECON227 / ARTH527 / ARTH327

Primary Crosslisting

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Class Format: seminar

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors
ARTh 330 (s) Michelangelo: Biography, Mythology, and the History of Art (WI)

One might argue that Michelangelo's enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in the Italian Renaissance, and specifically in the fascinating biography--and mythology--of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides the foundations for a triangulation of person-persona-artistic production that has a modern ring. But what are the limits of our knowledge, and what are the boundaries of interpretation? And how might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the artist and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the quality and improvement of written work (5 weekly papers and 5 response papers, and a final written exercise addressing major themes of the tutorial), and oral dialogue

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one ARTH course of any level; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 10

Distributions: (D1) (WI)

Not offered current academic year

ARTh 335 (s) Uncovering Williams

Crosslistings: AMST335 / ARTH335

Secondary Crosslisting

Sparked by current controversies around visual representations at Williams, this course--a joint effort of the Williams College Museum of Art and the American Studies Program--interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

Class Format: seminar

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) + bibliography

Extra Info: may not be taken on a pass/fail basis

Prerequisites: sophomore standing or permission of the instructor(s)

Enrollment Limit: 19

Enrollment Preferences: AMST majors

Expected Class Size: 19
**ARTh 337 (S) Visual Politics (WI)**

Crosslistings: ARTH337 / PSCI337

Secondary Crosslisting

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to techniques of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, affect theory, and cognitive science. Possible authors include Arendt, Bal, Barthes, Belting, Benjamin, Browne, Buck-Morss, Butler, Clark, Connolly, Deleuze, Didi-Huberman, Fanon, Foucault, Freedberg, Garland-Thompson, Harriman and Lucaites, Hobbes, Machiavelli, Kittler, Mercer, Mitchell, Mulvey, Noé, Plato, Rancière, Warburg, and Zeki.

**Class Format:** seminar

**Requirements/Evaluation:** regular, engaged class participation, several Glow posts, and three 7- to 8-page papers

**Extra Info:** qualified students from all disciplines welcome, space permitting

**Prerequisites:** at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Political Science and Art History majors

**Expected Class Size:** 15

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under ARTH

---

**ARTh 348 (S) Women, Men and Other Animals (DPE)**

Crosslistings: SCST348 / WGSS348 / ARTH348 / ENGL348

Secondary Crosslisting

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal—indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

**Class Format:** seminar

**Requirements/Evaluation:** individual research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none
Enrollment Limit: 15

ARTH 358 (S)  Latina/o Installation and Site-Specific Art
Crosslistings: ARTH358 / LATS358

Secondary Crosslisting
This course will explore the various forms of installation and site-specific artworks created by Latina/o artists for both museums and public space. We will examine the ways in which Latina/o artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latina/o culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: lecture/discussion
Requirements/Evaluation: two short papers, periodic research reports, final research paper, and presentation
Prerequisites: LATS 105 or ARTH 102 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Latina/o Studies concentrators and Art majors
Expected Class Size: 12
Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under LATS; meets Division 1 requirement if registration is under ARTH
Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; LATS Core Electives

Not offered current academic year

ARTH 361 (F)  Writing about Bodies  (WI)
Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Primary Crosslisting
The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial
**Requirements/Evaluation:** alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS

**ARTH 376 (S) Zen Buddhist Visual Culture: The Path to Nirvana** *(WI)*

Crosslistings: ARTH376 / REL252 / ASST376

**Primary Crosslisting**

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

**Class Format:** lecture/class discussion

**Requirements/Evaluation:** class discussions and participation; oral presentations, short papers; and a research paper

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores, juniors and seniors

**Expected Class Size:** 8

ARTH 400 (F) Clark Visiting Professor Seminar: Handicraft and Contemporary Art

Crosslistings: ARTH400 / ARTH500

Secondary Crosslisting

This seminar examines the resurgence of craft within contemporary art and theory. In a time when much art is outsourced--or fabricated by large stables of assistants--what does it mean when artists return to traditional, and traditionally laborious, methods of handiwork such as knitting, jewelry making, or woodworking? Though our emphasis will be on recent art (including the feminist reclamation of quilts, an artist who makes pornographic embroidery, a transvestite potter, queer fiber collectives, do-it-yourself environmental interventions, and anti-war craftivism), we will also examine important historical precedents. We will read formative theoretical texts regarding questions of process, materiality, skill, bodily effort, domestic labor, and alternative economies of production. Throughout, we will think through how craft is in dialogue with questions of nation-building, gendered work, and mass manufacturing. The seminar is centered around student-led discussion of our critical readings and culminates with final research projects.

Class Format: seminar

Requirements/Evaluation: research paper, presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured

ARTH 400 (S) Clark Visiting Professor Seminar: Ethics of Abstraction

Crosslistings: ARTH500 / ARTH400

Secondary Crosslisting

The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Class Format: seminar

Requirements/Evaluation: research paper, class presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduates and 8 graduate students assured

ARTH 404 (F)  The Enemies of Impressionism, 1870-1900
This class explores European and international painting and sculpture of the last quarter of the nineteenth-century, particularly the work of artists once famous in their day but whose reputations collapsed with the rise of Impressionism and Modernism. Once dismissed as trivializing, sensationalizing, politically suspect, kitsch, and simply "bad"-- much of this art has attracted new attention and enthusiasm in recent year. Focus on aesthetic theory, narrative, cinema, and -- most of all -- viewer experience. Artists include Gérôme, Bouguereau, Alma-Tadema, and many others.

Class Format: seminar

Requirements/Evaluation: readings and research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ARTH 405 (F)  Seminar in Architectural Criticism  (WI)
How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility--or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

Class Format: seminar

Requirements/Evaluation: students will write and revise six papers (5-7 pages) during the semester

Prerequisites: any 100 level ARTH course or permission of instructor

Enrollment Limit: 11

Enrollment Preferences: junior Art History majors

Distributions: (D1)  (WI)

Attributes: AMST Space and Place Electives;

Not offered current academic year

ARTH 408 (F)  Modernism in Brazil  (DPE)
Crosslistings: COMP408 / ARTH408

Primary Crosslisting
“Modernism” in art: when we think about it, we may not readily think of Brazil. But Brazil was in fact a vibrant battleground of ideas around what it was to be innovative, modern, and avant-garde. Between 1920 and 1945, artists, poets, and critics in the metropolises of São Paulo and Rio de Janeiro actively debated on the creation, and potential, of a uniquely Brazilian modernist aesthetic that would stand on par with the European avant-gardes. But what did “Brazilianess” mean to these intellectuals? What role did gender and race relations–indigeneity in particular–play in the construction of this aesthetic? How did the necessities and demands of the national context shape these modernist practices? This seminar will take a deep dive in this fascinatingly contradictory moment in Brazil, a chapter that would become a fundamental reference to Brazilian artists in the 1960s and even to this day. In addition to detailed analyses of artworks, we will read manifestos, novels, and criticism from this period, and the most up to date secondary interpretive texts.

Class Format: seminar

Requirements/Evaluation: participation, short presentations, four 2-page writing assignments, final 12-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 8

Distributions: (D1) (DPE)

Distribution Notes: DPE: As a DPE course, we will tackle Modernism in Brazil as a rich, comparative case study in the field of “global modernisms,” so as to productively complicate canonical histories of Western art. Moreover, this course fulfills DPE requirements through textual, visual, and historical analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Brazilian modernism in Western art history. The course also centers on contextualizing the artistic practices of Brazilian modernism and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, and revolutionary politics.

ARTH 412 (S) The Politics of Aesthetics: Collaboration and Participation in Contemporary Art

The social turn is a hallmark of contemporary art, as artists since the 1960s turned from the art object toward dynamic exchanges with the public, from sole author to collaborative engagement. This seminar provides a theoretical framework to historicize as well as to critically analyze the promise and pitfalls of collaborative works, of favoring active participants over passive spectators, and of the meteoric rise of what is now commonly known as "social practice" art. A wide range of case studies from around the world will also allow us to delve into the intersections and productive tensions between aesthetics and politics, or between art and life.

Class Format: seminar

Requirements/Evaluation: discussion questions, weekly presentations on either a text or an artist, three response papers, final 12- to 15-page paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: must have previously taken an Art History course

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 7

Distributions: (D1)

ARTH 419 (F) Going to Ground: Considering Earth in the Arts of Africa  (WI)

Crosslistings: ENVI419 / AFR419 / ARTH419
Earth Matters: Land as Material and Metaphor in the Arts of Africa (National Museum of African Art, 2013), this seminar explores how earth has been conceptualized and integrated into African artistic thought as material, metaphor, geography, environment, and intervention, and how this interpretive flexibility has allowed it to become a symbol of power and presence in African art-making from prehistory to the present. The seminar will also focus on the ways in which earth has been used in contemporary art towards addressing the growing problems of pollution, unsustainable development, and the widespread depletion of earth-based natural resources in Africa. Over the course of this seminar, students will develop a knowledge base of earth-related issues that have been addressed in African artistic production, and engage with various cross-disciplinary methodologies to critically analyze the conceptual and aesthetic strategies deployed in these works. Students will also have the opportunity to interact with specialists from diverse disciplines and fields towards fleshing out their knowledge base.

Class Format: seminar

Requirements/Evaluation: 2-page reading response papers, 2-page paper proposal, draft and final paper (15 pages) with presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some coursework in ARTH and/or AFR would be useful

Enrollment Limit: 19

Enrollment Preferences: seniors and majors

Expected Class Size: 19

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI; meets Division 2 requirement if registration is under AFR

Attributes: ARTH post-1600 Courses; GBST African Studies Electives;

Not offered current academic year

ARTH 420 (S) Architecture and Sustainability in a Global World (WI)

Crosslistings: ARTH420 / ENVI420 / EXPR420 / GBST420

Primary Crosslisting

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, although a course in art/architectural history would be advantageous

Enrollment Limit: 8

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 8

Materials/Lab Fee: Travel funds will be provided by a Class of 1963 Sustainability Development Grant

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or ENVI or EXPR; meets Division 2 requirement if registration is under GBST
ARTh 422 (S)  Art, Architecture, and Poetry: Islamic Devotional Culture in South Asia
Crosslistings: ARTH422 / COMP422 / REL422
Primary Crosslisting

How have scholars interpreted and classified terms such as "Islamic art" and "Muslim culture," and how have these classifications affected the interpretation of the arts in South Asia? There are different points of view regarding what constitutes as "Islamic" art and culture. Is an imperial wine cup with "God is Great" inscribed on it an "Islamic" object? How is an erotic epic narrating the romance of a Hindu prince understood as embodying the principles of Muslim devotion? This interdisciplinary seminar, focusing on South Asian Muslim devotional culture as articulated through the material culture, the arts of the book, architecture, and poetry, will navigate these questions from two perspectives. The first is to understand how Muslim devotional cultural expression in South Asia circumscribes and interprets itself. The second viewpoint is that of scholarship and the various interpretive voices that have framed the field over the last century.

Class Format: seminar
Requirements/Evaluation: class participation, 2-page response papers on class readings, leading class discussion, final 15-20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: preference will be given to Art Majors, and then to students of any major interested in art and culture of Islam
Expected Class Size: 12
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or COMP; meets Division 2 requirement if registration is under REL

ARTh 430 (F)  Aesthetics and Human Variety: European Representations of Oceania
Using European representations of the inhabitants of Oceania as the primary materials of our investigation, this seminar will explore the connections to be made among theories of beauty, practices of art making, and the construction of race as a scientific concept in the second half of the eighteenth century and the beginning of the nineteenth century. In Europe, this was a period that gave rise to aesthetics as a branch of philosophy, to several theories of the origins of human difference, to debates over the abolition of slavery, and to no fewer than fifteen expeditions to the Pacific Ocean. This course will investigate the crucial role that pictures played in all of these developments. Though students will not be required to write their research papers on pictures of Oceania, they should consider the central questions of the course: What purposes do the various conceptions of race serve? What are the aesthetic assumptions made by theorists of race? How do models of making art influence European ideas about foreigners? How do the pictures of foreign peoples impact the construction of race?

Class Format: seminar
Requirements/Evaluation: class discussion, weekly reading responses, an oral presentation, and a 15- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: none
Expected Class Size: 10
Distributions: (D1)

**ARTH 433 (S)  Michelangelo: Biography, Mythology, and the History of Art**

Crosslistings: ARTH433 / ARTH533

**Primary Crosslisting**

One might argue that Michelangelo's enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in the Italian Renaissance, and specifically in the fascinating biography--and mythology--of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides the foundations for a triangulation of person-persona-artistic production that has a modern. But what are the limits of our knowledge, or the boundaries of interpretation? How might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the man and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

**Class Format:** seminar

**Requirements/Evaluation:** an oral presentation, a research paper, short response papers, and critical commentary on work of peers

**Prerequisites:** ARTH 301 or permission of instructor (prerequisite for 400-level)

**Enrollment Limit:** 18

**Enrollment Preferences:** equally given to senior Art majors and graduate students in the history of art

**Distributions:** (D1)

**Attributes:** ARTH pre-1600 Courses;

**Not offered current academic year**

---

**ARTH 435 (F)  The Medieval Object**

Crosslistings: ARTH535 / ARTH435

**Primary Crosslisting**

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

**Class Format:** seminar; three hours per week

**Requirements/Evaluation:** class participation, oral presentation, 15- to 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

**Expected Class Size:** 14

**Distributions:** (D1)

**Attributes:** ARTH pre-1600 Courses;

Fall 2018

**SEM Section: 01  W 1:10 pm - 3:50 pm  Herbert L. Kessler**
"A portrait! What could be more simple and more complex, more obvious and more profound?" exclaimed the nineteenth-century poet and critic Charles Baudelaire. With the invention of photography in the first half of the nineteenth century and with the digital revolution of the twentieth, portraiture arguably became more simple and more complex, more obvious and more profound. In this seminar, we will explore this complicated and fascinating history. Photographic portraits are fine art and vernacular culture. They serve private and public functions. They help to fashion the self and construct group identity. They disguise and disclose the truth. In the classroom, galleries, and archives, we will investigate the problems of likeness and semblance, veracity and credibility. We will delve into the conflict between representations of individuals and representations of types, and we will attend to the complicated, sometimes fraught, relationship between photographer and subject, even when they are one and the same.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short essays, individual presentations, and a final research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** art history majors

**Expected Class Size:** 10

**ARTH 440 (F) Contemporary Exhibitions: Los Angeles and Latin America** (DPE) (WI)

Crosslistings: ARTH440 / LATS440

**Primary Crosslisting**

This seminar examines connections between Latina/o and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

**Class Format:** seminar

**Requirements/Evaluation:** several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ARTH 102 (graduate students are exempt from the prerequisite)

**Enrollment Limit:** 15

**Enrollment Preferences:** senior Art majors and senior Latina/o Studies concentrators

**Expected Class Size:** 12

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under LATS. DPE: The key themes explored in the course concerning art and activism, borders and diaspora, globalism and modernism in the visual arts intersect with the critical exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Also, a number of the exhibitions studied in the class explicitly take up issues of difference, power, and equity. Through discussion, presentations, and writing assignments students will develop and refine skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice. WI: This course is a Writing Intensive seminar. This means that there will be considerable focus on writing,
revision, and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus.

ARTH 442 (F) Richardson, Sullivan, Wright: The Roots of American Modernism
Should a building express the facts of its program and materials--directly and without sentimentality? Or should a building be a physical manifestation of the personality and ego of its creator? These demands--one of radical objectivity, and one of radical subjectivity--seem to be mutually exclusive, yet together they form the basis for modern architecture at the start of the 20th century. The architectural lineage of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright is distinguished by the high degree of tension between the competing demands of factuality and selfhood. This seminar explores the theoretical roots of their architecture, its philosophical sources in transcendentalism, Unitarianism, German romanticism; and treating such aspects as decorative arts, architectural education and theory, and architectural autobiography.

Class Format: seminar
Requirements/Evaluation: one hour presentation, 20-page paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any 100 level ARTH course or consent of instructor
Enrollment Limit: 11
Enrollment Preferences: senior Art majors and graduate students
Expected Class Size: 9
Distributions: (D1)

Fall 2018

ARTH 462 (F) Art of California: Pacific Standard Time (WI)
Crosslistings: LATS462 / AMST462 / ARTH562 / ARTH462

Primary Crosslisting
In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102
Enrollment Limit: 15
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators
Expected Class Size: 15
Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS
In the wake of Alexander the Great's extension of the borders of the classical world all the way to the banks of the Indus River in the fourth century BCE, the small city-states of the Greek peninsula were replaced by far flung kingdoms as important centers of power and culture. Vastly increased trade and the movement of individuals between Greece, Egypt, and the Near and Middle East encouraged a new internationalism marked by a cross-cultural hybridization of religion, and innovations in philosophy, medicine, literature and art. This cosmopolitan attitude brought about a revolution in artistic ideas and forms centered on the social and ethnic diversity of human experience. Royal patrons, and wealthy private citizens including an increasing number of women, commissioned artworks for cities, sanctuaries, tombs, palaces, and estates on a scale rarely seen before. With the rise of Rome in the west, plundered artworks of earlier periods soon became the desired objects of wealthy collectors, and commissions in the Hellenistic style continued well into the Roman period. In this course we'll look closely at influential works of art in bronze, marble, fresco, and mosaic, and consider their archaeological, social and political contexts. We'll discuss the changing status of artists as patronage shifts to include the private as well as the public realm, and research the broader philosophical, religious, literary and cultural forces that encouraged artistic innovations of the fourth century BCE through first century CE. Reading material includes ancient literature in translation, recent surveys of Hellenistic art, and recent critical essays.

Class Format: seminar

Requirements/Evaluation: students will lead discussions based on selected readings; a 5- to 7-page midterm paper and 20 minute oral report will form the basis for an 18- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art majors, and then to students of any major interested in art and thought in the ancient Mediterranean world, with permission of instructor

Expected Class Size: 14

Department Notes: ARTH Seminar Requirement

Distributions: (D1)

Attributes: ARTH pre-1600 Courses;
Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles—witness, surrogate, instigator, supplicant—and travel freely across political, religious and cultural boundaries. This course is about three regions—United States, France and the Persian sphere—and the images that mediate and document their interactions. Along the way, we will address important issues like iconoclasm and aniconism, common types like veiled women and pious men, and asymmetrical relationships like Orientalism. The peculiar nature of portraiture will be a prominent theme.

Class Format: seminar
Requirements/Evaluation: class participation, term project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any ARTH class or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: Art majors
Distributions: (D1) (DPE)
Distribution Notes: DPE: This course fulfills the DPE requirement in its emphasis on comparative cultures and its effort to promote understanding of stereotypes, differences, and contextualized meanings in diverse settings. Images operate between and among individuals and communities, reflecting differences of identity, power, and perspective. This course is an opportunity to articulate how such differences are visually manifest in painting and photography across political and cultural boundaries
Attributes: AMST Arts in Context Electives; ARTH post-1600 Courses;

Not offered current academic year

Art is really time-consuming to make, to view, to use, to understand. We enshrine it, exhibit it, excavate it and, particularly since the 19th century, we have concocted increasingly elaborate narratives around revered artifacts. We even think we control these many fabled things, but then they have the temerity to outlive us and outsmart us, meddling in the spaces between self and other, human and divine, now and then. The experience can be traumatizing. This course is an opportunity to explore how images are tangled up with time. We will begin in the 19th century, when commonplace notions of past and present wobbled seriously with the invention of photography and the avid pursuit of archaeology. From that pivot point, we will operate transnationally and anachronistically, with particular reference to the Middle East, the birthplace of monotheism and idol anxiety. There will be no single timeline, but rather a series of case studies, ranging from iconic paintings and sacred spaces to calendar art and photojournalism. Ultimately, we must ask, can art ever be fixed in time or will it always be an unruly presence in our lives?

Class Format: seminar
Requirements/Evaluation: regular presentations and term project

ARTH 474 (S) Brazilian Art in the 20th Century: Aesthetics, Internationalism, Utopia (WI)

In 1924 the modernist poet Oswald de Andrade radically called for Brazilians to engage in cultural “anthropophagy”—to cannibalize from European modernist ideas and synthesize these with local aesthetic and cultural values. Toward the mid-20th century, the narrative of Brazilian art was marked by the desire on part of artists and intellectuals to problematize its place in Latin America, and vis-à-vis the European avant-gardes. They did so with a strong utopian perspective, developing aesthetic strategies to confront and transcend Brazil’s underdevelopment. Yet ideas around nationalism, internationalism, and utopia shifted dramatically when a military dictatorship came to power between 1964 and 1985. How did artists and intellectuals rethink the role of aesthetics in such critical sociopolitical conditions? How did these terms shift again after Brazil returned to democracy, and soon aggressively entered an increasingly globalized economic system? Our seminar will delve into these complex relationships for a comprehensive understanding of the development of modern and contemporary Brazilian art. This is a Writing Intensive course, and there are no prerequisites to enroll.

Class Format: seminar

ARTH 494 (S) Thesis Seminar

To graduate with honors in art history, students are to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honors’ thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

Class Format: seminar
Requirements/Evaluation: once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: for requirements of entry into the course, please see “The Degree with Honors in Art, Art History”
Enrollment Limit: 8
Enrollment Preferences: permission of instructor required
Expected Class Size: 6
Department Notes: does not satisfy the Art History seminar requirement

ARTH 500 (F) Clark Visiting Professor Seminar: Handicraft and Contemporary Art
Crosslistings: ARTH400 / ARTH500
Primary Crosslisting
This seminar examines the resurgence of craft within contemporary art and theory. In a time when much art is outsourced—or fabricated by large stables of assistants—what does it mean when artists return to traditional, and traditionally laborious, methods of handiwork such as knitting, jewelry making, or woodworking? Though our emphasis will be on recent art (including the feminist reclamation of quilts, an artist who makes pornographic embroidery, a transvestite potter, queer fiber collectives, do-it-yourself environmental interventions, and anti-war craftivism), we will also examine important historical precedents. We will read formative theoretical texts regarding questions of process, materiality, skill, bodily effort, domestic labor, and alternative economies of production. Throughout, we will think through how craft is in dialogue with questions of nation-building, gendered work, and mass manufacturing. The seminar is centered around student-led discussion of our critical readings and culminates with final research projects.
Class Format: seminar
Requirements/Evaluation: research paper, presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured
Expected Class Size: 12
Distributions: (D1)

SEM Section: 01 R 1:00 pm - 4:00 pm Julia Bryan-Wilson

ARTH 500 (S) Clark Visiting Professor Seminar: Ethics of Abstraction
Crosslistings: ARTH500 / ARTH400
Primary Crosslisting
The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by
abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Class Format: seminar
Requirements/Evaluation: research paper, class presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduates and 8 graduate students assured
Expected Class Size: 12
Distributions: (D1)

ARTH 501 (S) Museums: History and Practice
Crosslistings: ARTH303 / LEAD301 / ARTH501

Primary Crosslisting
Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that result in the institutions of our time. The seminar will examine museums past, present and future looking at governance and administration practices, architecture and installation, accessioning/deaccessioning policies, and cultural property issues. It will also consider current trends in exhibition, public education and other programming in both "encyclopedic" and contemporary arts institutions. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on oral presentations as well as two research papers
Extra Info: may not be taken on a pass/fail basis
Enrollment Limit: 14
Enrollment Preferences: Graduate Program students then to senior Art History majors
Department Notes: satisfies the seminar requirement for the undergraduate Art History major
Distributions: (D1)

ARTH 502 (S) History, Theory, and Techniques of Printmaking
This course will consider the history of prints in Europe and America from the fifteenth century through the 1920s. Focusing primarily on the holdings of the Clark, classes will be held in the new Manton Study Center for Works on Paper where students will view original works of art. Equal emphasis will be placed on primary literature, theoretical texts, and a careful understanding of printmaking processes. Media to be investigated include, among others, 15th-century woodcuts by Albrecht Dürer, drypoints by Rembrandt van Rijn, engravings by Philibert-Louis Debucourt, aquatints by Francesco Goya, lithographs by Édouard Manet,etchings by James McNeill Whistler, photo-mechanical processes like photogravure by artist Alfred Stieglitz, and
color woodcuts by the German Expressionists. The rise and fall of various processes and practitioners will be explored from a socio-historical perspective, considering market, taste, and changing exhibition strategies. Additionally, consideration will be given to the status of the printmaker over the centuries as their roles shifted from professional to amateur and back again.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on involved class participation, several short presentations, one short paper, and a final paper of approx. 20 pages

Extra Info: may not be taken on a pass/fail basis

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students and then to Art History majors

Expected Class Size: 14

Distributions: (D1)

ARTH 504 (F) Methods of Art History and Criticism

This seminar concentrates on critical approaches to art, culture, and history. Our focus will be on various writings that have engaged theories of representation, vision, objecthood and materiality for more than five centuries.

Class Format: seminar

Requirements/Evaluation: each student will write one short midterm paper and a longer concluding essay, as well as present a couple of the readings to the class

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

Distributions: (D1)

Fall 2018
SEM Section: 01    T 1:00 pm - 4:00 pm     Lisa  Saltzman

ARTH 505 (F) Shadows of Plato's Cave: Image, Screen, and Spectacle

Crosslistings: COMP374 / ARTH505 / PSCI374

Secondary Crosslisting

In Book VII of the Republic, Socrates famously asks his interlocutors to picture people living in a cave, bound in chains and able to see only shadows on the wall. Thus begins the presentation of perhaps the most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the Republic's cave and other key Platonic discussions of appearances, visual representation, and (literal and metaphoric) seeing, asking how Plato's approaches to image, politics, and theory/philosophy shape each other. Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle—read both for their resonances with and departures from debates over the Platonic legacy—and case studies in the politics of both military and racial spectacles in the U.S. The question of what is an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Debord, Friedberg, Goldsby, Josellit, Mitchell, Nightingale, Rodowick, Rogin, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave's considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as The Matrix.

Class Format: seminar

Requirements/Evaluation: regular glow posts and three 7- to 8-page essays or one 20-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history

Expected Class Size: 12

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under COMP or ARTH

Attributes: PSCI Political Theory Courses

**ARTH 506 (S) An Expository Writing Workshop**

A common and depressing consequence of too much education is how our writing tends to devolve, as the task of saying what we mean is complicated by new anxieties: trying to impress our potential employers, intimidate our competition, claim our place in an intellectual community, and generally avoid looking like fools. In many professions, bad prose tends to proliferate like some disgusting disease, as scholars, trying above all to avoid mistakes, become tentative, obscurantist, addicted to jargon, and desperate to imitate other bad writers. In this course we will try to relearn the basic skills of effective communication and adapt them to new and complicated purposes. In class we will go over weekly or bi-weekly writing assignments, but we will also look at the essays you are writing for your other courses, to give them an outward form that will best display their inner braininess. Among other things, I am a fiction writer, and part of my intention is to borrow the techniques of storytelling to dramatize your ideas successfully.

Class Format: seminar

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Limit: 14

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

**ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given.
Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

---

**ARTH 509 (S)  Graduate Symposium**

This course is designed to assist qualified fourth-semester graduate students in preparing a scholarly paper to be presented at the annual Graduate Symposium. Working closely with a student and faculty ad hoc advisory committee, each student will prepare a twenty-minute presentation based on the Qualifying Paper. Special emphasis is placed on the development of effective oral presentation skills.

**Class Format:** symposium

**Requirements/Evaluation:** each student will present three practice runs and a final oral presentation at the symposium

**Prerequisites:** successful completion and acceptance of the Qualifying Paper

**Department Notes:** limited to and required of second-year students in the Graduate Program in the History of Art

**Distributions:** (D1)

---

**ARTH 510 (F)  Approaches to Drawing from Connoisseurship to Conceptualism**

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have the pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on involved class participation, several short presentations, one short paper, and a final paper approx. 20 pages

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** preference given to Graduate Program students and then to senior Art History majors

**Expected Class Size:** 8

**Distributions:** (D1)

**Not offered current academic year**

---

**ARTH 515 (F)  Creating Whiteness: Racial Taxonomies in ‘American’ Art, 1650-1900**

---
"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family’s images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Class Format: seminar
Requirements/Evaluation: research paper, presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students
Expected Class Size: 12
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST

ARTH 524 (F) The Watchful Object

What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects—sometimes known problematically as 'fetishes,' 'idols,' and 'totems'—have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often transformative experiences in viewers.

Class Format: seminar
Requirements/Evaluation: in-class presentations, class discussion, and a final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

ARTH 527 (F)  Acquiring Art: Selecting and Purchasing Objects For WCMA

Crosslistings: ECON227 / ARTH527 / ARTH327

Secondary Crosslisting

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors?

What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Class Format: seminar

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ECON

ARTH 530 (S)  Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Crosslistings: ARTH530 / CLAS236

Primary Crosslisting

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: seminar

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second year graduate students, then first year graduate students, then advanced undergraduate students

ARTH 533 (S)  Michelangelo: Biography, Mythology, and the History of Art
Crosslistings: ARTH433 / ARTH533
Secondary Crosslisting

One might argue that Michelangelo's enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in the Italian Renaissance, and specifically in the fascinating biography--and mythology--of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides the foundations for a triangulation of person-persona-artistic production that has a modern . But what are the limits of our knowledge, or the boundaries of interpretation? How might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the man and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

Class Format: seminar
Requirements/Evaluation: an oral presentation, a research paper, short response papers, and critical commentary on work of peers
Prerequisites: ARTH 301 or permission of instructor (prerequisite for 400-level)

Enrollment Limit: 18
Enrollment Preferences: equally given to senior Art majors and graduate students in the history of art
Distributions: (D1)
Attributes: ARTH pre-1600 Courses;
Not offered current academic year

ARTH 534 (S)  Renaissance Time

"Once upon a time," noted the historian Randolph Starn, "the Renaissance set its clocks and calendars to keep modern time." We think of the changing perception of time during the fifteenth and sixteenth centuries—a mounting awareness of the place of the present moment in the larger arc of history—as a defining feature of the Renaissance. Yet, while this new temporal self-consciousness underpins our own understanding of the Renaissance as the emergence of modernity, this is only a thread of the larger and more complex fabric of Renaissance time. In this course we will explore the multifaceted dynamism of the Renaissance relationship to time. We will study the broad shifts in beliefs about time during the Renaissance, then, but we will also move beyond this in order to examine the ways in which concepts of temporality were theorized and functioned in Renaissance visual representation. We will pay close attention to the temporal as a site of innovation in Renaissance art, while focusing a historiographic lens onto the varied art historical interpretations of temporality and the imagery of time. Finally, we will consider our own temporal position as it relates to our experience of images from the past. Authors studied will include Leonard Barkan, Simona Cohen, Georges Didi-Huberman, Anthony Grafton, Michael Ann Holly, George Kubler, Keith Moxey, Alexander Nagel, Erwin Panofsky, Marvin Trachtenberg, Aby Warburg, and Chris Wood.

Class Format: seminar
Requirements/Evaluation: collaborative class discussion and focused peer critique, short ungraded response essays, oral seminar report, 15- to
ARTH 535 (F) The Medieval Object
Crosslistings: ARTH535 / ARTH435
Secondary Crosslisting

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: seminar; three hours per week
Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)
Expected Class Size: 14
Distributions: (D1)
Attributes: ARTH pre-1600 Courses;

Fall 2018
SEM Section: 01  W 1:10 pm - 3:50 pm  Herbert L. Kessler

ARTH 537 (F) Renaissance Matter
The imagined cleave between "scientific" and "theoretica" art history has never seemed plausible to even the most extreme of art historians. In late medieval and Renaissance North Europe, artworks incorporated materials from all over the human and natural world -- azurite, gold, paper, blood, ivory, ash, bone. This "stuff" -- rather than any forms it might be fashioned into -- held its own auratic charge. How are we to think about these various species of matter, about their various processes of transformation? How did changing philosophies and concepts of matter alter the concept of the artwork, particularly in globally-connected North Europe? What role (if any) was played by rediscovered antique texts about matter (Lucretius, etc.?)

This seminar pivots on two questions: first, how did Renaissance artists and audiences understand the material constituents of their craft? And second, can we imagine an art-history of material today outside a rubric of blunt materialism? Material art history shouldn't mean shucking hermeneutics or criticality. After all, going back to Heraclitus, what could be more "philosophical" than matter itself? At the same time, the "scientific" scrutiny of artworks -- using X-rays, infrared scanning, radiographic photography, chemical analyses, and dendrochronology -- has long been a particular fetish of the study of Northern Renaissance art. The insights onto the artistic process these methods offer are indisputable. Yet aside from verifying (or undermining) claims to age, authorship, or condition of old artworks, it remains extremely unclear to many scholars what motives scientific examination -- in many respects a solution without a clear problem -- are addressing. Worse, such investigations often seem like advocacy for
inferences of artistic intention -- a concept viewed with skepticism by many historians today. Theory's "return to the object" turn in art history (a maneuver, since the 1980s, often rooted in Northern artworks) has showed possibilities, but also limitations. Durability -- the reigning dictate of many early objects -- poses specific challenges to narratives privileging stories of rupture. Topics include: alchemy, the studio, early atomistic theories, restoration, animation, authenticity, faktura, and "science."

**Class Format:** seminar

**ARTH 540 (F) In Vinculus Invictus: Portraits in Prison**

Among all the portraits that European art has produced during the modern period, some have been painted or more recently photographed in prison. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, at worst outrageous and provocative. But there is, indeed, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of prison changed. It became a tragic symbol of the political "debates." Prison became the arena for a new martyr, one that endures for ideas or simply to be born. The portrait in prison was a way to commemorate not a disgrace or an infamy, but a glory and a moment of virtue. Within a few years, a terrifying series of portraits appeared. They would nurture Western political thought and visual culture until now. Portraits in prison are at a crossroad of politics, law, art and identity; they offer a great opportunity to think about art and society. This course will explore the topic throughout the modern period until the contemporary period.

**ARTH 541 (F) Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud**

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory--the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

**Class Format:** seminar

ARTh 542 (F) Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980
The use of the body—be it the artist's or those of willing and unwilling participants—is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

ARTh 543 (S) Global Conceptualism, 1962-Now
Since its emergence in the early 1960s, conceptual art has come to circumscribe a vital, ubiquitous, and widely adaptable category within contemporary art discourse, defining myriad artistic and curatorial practices as well as shaping art-historical inquiry. Naming one's practice as 'conceptual,' (if you are an artist), or doing the work of 'conceptualizing' art's place in the world (if you are a writer/curator/historian) became common parlance more than four decades ago, and is arguably still the most pervasive single term in use today across the many arms of the global contemporary art world. Conceptual art also encompasses an enormous diversity of materials and practices, spanning traditional media, time-based media, installation, performance, and hybrid combinations thereof. What is conceptual art? Is it art that appropriates the tools and systems of the administration of capital, or of kitsch and mass culture? Does it involve the aestheticization of labor? The dematerialization of the art object? Collaborative practice? Must it look a certain way to be conceptual art? Is needing to look a certain way precisely what conceptual art is not? As the category gains popularity and absorbs more and more possibilities into its ranks, the question quickly becomes, not what is conceptual art, but what isn't it? This graduate seminar will study the means, methods, and assumptions of art historical inquiry toward the development and sustainability of the category 'conceptual art,' from 1962 (the agreed-upon birthdate of the movement, by the estimation of many critics) onward. We will explore global and transnational sites, histories, traditions, and geographic networks beyond the Euro-American canon of conceptualism in order to approach global contemporary art and politics with an expanded set of terms and references. Ultimately, we will seek to understand the challenges and possibilities of re- and de-narrating the histories of modern and contemporary culture from the perspective of "the concept," or "the idea," as opposed to the material, formal, and geographic categories that currently construct and demarcate the field.

Class Format: seminar
Requirements/Evaluation: oral presentations, research papers, short writing assignments

**ARTH 544 (S) Women Artists in Paris, 1850-1900 (WI)**

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

Class Format: seminar

Requirements/Evaluation: seminar presentations and research paper

**ARTH 547 (S) The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century & Beyond**

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?—What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

Class Format: seminar

Requirements/Evaluation: presentations, research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students, then advanced Art History major undergrads

Expected Class Size: 12

Distributions: (D1)

Spring 2019

**ARTH 549 (S) Early Modern Transmissions**

Through analyses of networked objects and people in what has come to be seen as an increasingly globalized early modern world, we have become more cognizant of the ways in which compositions and subject matter of paintings circulated through the medium of reproductive print; manuals meant to be followed to the letter were adapted for foreign audiences; and ideas were disseminated in book form, either through the open market or in banned publications. But is it enough to track the movement of people, ideas, and objects? And what did it mean to transmit information—whether it be visual, material, or theoretical—across media, languages, continents, or religions in the early modern period? Our goal will not be to map the physical
movements of (art) objects or individuals, but rather to query what is gained, lost, or altered beyond recognition when things are transmitted over time and space. The scope of this seminar will span roughly the sixteenth to eighteenth centuries—from the systematization of academic and artistic training and the Scientific Revolution, to the Enlightenment and, consequently, accelerated imperial expansion. Our discussions will center on readings and case studies drawn from the visual arts (such as the reproduction of Albrecht Dürer's woodblock prints on Italian maiolica); mechanical arts (the European mechanization of ancient Chinese timekeeping technology); natural philosophy (the continental reception of Isaac Newton's Opticks); and intellectual history more generally (for instance, the project of translating and adapting William Chambers' Cyclopaedia for a French audience) and the terrain covered will include European encounters with the Americas, the Ottoman Empire, and Asia.

Class Format: seminar
Requirements/Evaluation: class presentations, research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced Art History major undergrads
Expected Class Size: 12
Distributions: (D1)

Spring 2019
SEM Section: 01    F 1:00 pm - 4:00 pm

ARTH 551 (S)  Winslow Homer
In this seminar we will explore the life and art of Winslow Homer (1836-1910). Paintings, prints, watercolors, and photographs in the collection of the Clark and the Williams College Museum of Art will focus our discussions and provide the basis for understanding Homer's art-making and his place within the art-culture of his day. A consideration of his subjects will necessarily intersect with many of the nation's most pressing issues during his era: the Civil War and Reconstruction; the rise of middleclass leisure; the relation of man to the environment.

Class Format: seminar
Requirements/Evaluation: class discussion, weekly précis of the readings, two short papers, an oral presentation (and response to someone else's), and a final research paper (20-25 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Limit: 14
Enrollment Preferences: Graduate Program students and then to senior Art History majors
Expected Class Size: 8-12
Department Notes: satisfies the seminar requirement for the undergraduate Art History major
Distributions: (D1)
Not offered current academic year

ARTH 554 (S)  The Matrix and the Market: Printmaking and Photography in the Nineteenth Century
During the last half of the 19th century, technical, commercial, and aesthetic approaches to printmaking and photography experienced dramatic paradigm shifts. Etching, for example, simultaneously functioned as a reproductive medium and one that carried experimental, vanguard associations. Practitioners of lithography strove to distance themselves from denigrating commercialism and raise the medium's status to a respected art form. Photography, in turn, negotiated the boundaries between "documentary" and "artistic." This seminar will address the complex issues that swirled around printmaking and photographic matrices, critical responses to the various processes, artist-driven initiatives, and the formative role of the art market and book trade in shaping popular opinion. We will consider these topics across political and geographic borders from Europe to the United States, reading both primary and secondary sources. The class will be held in the new Manton Study Center for Works on paper with visits to Chapin library and the Williams College Museum of Art likely.

Class Format: seminar
Requirements/Evaluation: students will be responsible for readings and involved class discussion; several short and one long presentation; and a final paper (20-25 pages)
Enrollment Limit: 12
Enrollment Preferences: Graduate Program students and then to senior Art History majors
Distributions: (D1)
Not offered current academic year

ARTH 562 (F) Art of California: Pacific Standard Time (WI)
Crosslistings: LATS462 / AMST462 / ARTH562 / ARTH462
Secondary Crosslisting
In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 102
Enrollment Limit: 15
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators
Expected Class Size: 15
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AMST or LATS
Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; ARTH post-1600 Courses; LATS Comparative Race + Ethnic Studies Electives;
Not offered current academic year

ARTH 563 (F) Contemporary Curatorial Workshop
Bi-weekly workshop for graduate students working on contemporary art and curatorial projects. Under the direction of the chair, students will present on-going curatorial projects, undertake studio and site visits, host local and visiting curators for presentations, and explore key topics in modern and contemporary art and curatorial practice.

Class Format: workshop, meets all year; graded on a pass/fail basis
Prerequisites: graduate art students
Enrollment Limit: 25
Enrollment Preferences: only open to graduate students
Distributions: (D1)

Fall 2018
SEM Section: 01 TBA Victoria Brooks
Spring 2019
SEM Section: 01 TBA Victoria Brooks

ARTH 567 (F) What is Art Criticism? Current Debates, Past Precedents
Taking as its point of departure recent debates concerning a purported "crisis" of art-criticism, this seminar considers traditions of writing about the work of living artists in modernity. We will begin with current literature and then pivot back to the eighteenth century, tracing a sequence of episodes in art criticism's evolution as a genre by looking at key works of art as mediated by their first critics. Emphasis will be placed on close readings of primary historical texts as prompts for thinking through the following broad questions, among others: What is critique, and what is art criticism? Is the art critic a judge, a historian, a partisan, a participant, or an artist in her own right? How do forms of distribution impact the content of art criticism, and how does art criticism impact the form and content of art? What is the relationship, if any, between taste, assessment of value, and interpretation of meaning? Artists considered include, among others, Boucher, Friedrich, Whistler, Seurat, Pollock, Piper.

Class Format: seminar
Requirements/Evaluation: two short writing assignments, twenty page final paper
Extra Info: may not be taken on a pass/fail basis
Distributions: (D1)
Not offered current academic year

ARTH 573 (S) Modern and Contemporary Art from the Middle East and North Africa
This is an exciting time for art from the Middle East and North Africa. Contemporary artists are exhibiting in international shows and biennales, and the global art market has responded to collector interest and crowned its favorites. The visibility and celebration of these artists, however, does not take into account the larger historical arena of cultural production and artistic practice from which they emerge. In terms of the discipline of art history, the field of modern painting and contemporary visual practice in the region is in its first generation of formation and definition. Drawing on very recent scholarship in art history and visual anthropology, we will explore the "history" of modern and contemporary art in the Middle East and North Africa (from the 1920s-the present). We will pay particular attention to how key terms and categories such as: modern, contemporary, Islamic, and Arab, have been constructed, deployed and debated by artists, institutions and scholars in the field. We will explore the role of museums, art schools, archives and biennales in the region, the creation of art publics and communities, and how the international market has responded to contemporary production. And perhaps most importantly, we will study work by artists that identify with the region and engage and complicate constructions of race, gender, religion, environment, autonomy and community.

Class Format: seminar
Requirements/Evaluation: short response essays and a culminating research paper
Enrollment Preferences: graduate program students and then senior Art History and Arabic Studies majors
Distributions: (D1)
Not offered current academic year

ARTH 575 (F) Regression as Modern Fantasy: Archaism, Primitivism, Prehistory
This course analyzes the implications of European modernity’s engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

Class Format: seminar
Requirements/Evaluation: seminar presentations, research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced undergraduate students
Expected Class Size: 12
Distributions: (D1)
ARTH 586 (F)  Japanese Popular Visual Culture
Crosslistings: COMP186 / ARTH586 / ARTH286 / ASST186

**Secondary Crosslisting**
The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** attendance, participation, two 5-page papers, final exam

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** students majoring or considering a major in a related discipline

**Expected Class Size:** 15

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST

---

ARTH 587 (S)  Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture

A year after MoMA elevated machinery to high art in 1934, Grant Wood painted Death on The Ridge Road (Williams College Museum of Art), a depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's Death and Disasters series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

**Class Format:** seminar

**Requirements/Evaluation:** oral presentations and written assignments

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** grad students, then advanced undergrad art history majors

**Expected Class Size:** 12

**Distributions:** (D1)

ART (Div I)

STUDIO ART

Co-Chairs: Professors Elizabeth McGowan and Amy Podmore

On leave Fall/Spring: Professors: P. Low, S. Solum.
On leave Spring only: Professor C. Chavoya.

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Practice), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Elizabeth McGowan
Art Studio Faculty Advisor: Amy Podmore
History and Practice Faculty Advisor: Ben Benedict

ART STUDIO

The Studio division of the art major has been structured to develop students’ perceptions and imaginations as they investigate a variety of visual media and to foster the development of a critical understanding of making art to support creative interests.

Major Requirements

The Studio Art major requires a minimum of nine courses:

- ARTS 100 Drawing I
  - One art history course (preferably taken by the end of the junior year)
  - A combination of at least three 100 and 200-level courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)
- ARTS 319 Junior Seminar
- One 300-level ARTS course
- One elected ARTS course
- ARTS 418 Senior Seminar

The numbered sequence of courses in the Studio Art major is intended to develop knowledge and skills appropriate to students’ levels of experience, ultimately supporting original, independent work at the 400-level. ARTS 100 is an introduction to the principles of drawing and design, which are the foundation of visual expression. An art history course not only increases visual knowledge of other periods and cultures, but also provides exposure to the methods of visual analysis. 100 and 200-level ARTS courses introduce the relation between form and content and serve as introductions to a variety of media including architecture, painting, performance, photography, printmaking, sculpture, and video. 300-level courses place greater emphasis on the application of visual skills to thematic concerns, and to the development of the student's individual vision. The capstone to the major, ARTS 418, provides a comprehensive, professional exhibition experience. Students not only define, research, and create an original body of work, but are also engaged in all aspects of producing an exhibition at the Williams College Museum of Art.

The faculty encourages students to begin exploring studio art in the first year so that they can fully explore a variety of media in preparation for independent work in the junior and senior year. A successful route through the major might look like this:
First year: two classes at the 100 and/or 200 level in different media and an art history class. We encourage students to explore media with which they are unfamiliar, as doing so provides a good base and allows for more flexibility later on. While there is only one art history class required for the major, we encourage students to take advantage of the rich art history offerings throughout their four years of study.

Second year: at least two 100 and/or 200 level courses.

Third year: Junior seminar, a 200- or 300-level course and a second art history class.

Fourth year: one 300-level course, ARTS 418, and other courses chosen to support your individual interests.

HISTORY AND PRACTICE

This route allows students to study in depth both the history of art and the making of it. It offers considerable flexibility: students may propose courses of study that emphasize particular media, themes, or methodological issues. Students may take more courses in one wing of the department than the other, as long as the minimum requirements in each wing are satisfied. (Note that the Art History and Studio Art Practice routes are strongly recommended for any prospective Art major who is contemplating graduate study in Art History or Art Studio.)

Some students will be attracted to both wings of the department but will not have a field of study that falls between the two. In these cases, it is better for the student to choose between history and studio-taking additional courses from the other wing as desired. In short, the History and Practice route is reserved for students with a strong record of achievement who cannot be accommodated in the two wings of the department.

History and Practice students who are admitted to the Senior Tutorial will participate in the senior studio exhibition at the end of the year. Unlike the history or studio routes, acceptance into the History and Practice route is not automatic. The student must first submit a written application for the major. The application must include a thoughtful statement of the theme of the major that both 1) shows the coherence and integrity of the plan of study and 2) explains why the students’ goals cannot be met in either history or studio. The application must include both the written statement and a list of proposed courses. The application must be submitted in two copies to advisors in both wings of the department. If approved, the application and list of proposed courses must be submitted to the department secretary before registering for the major.

Major Requirements

The History and Practice major requires a minimum of nine courses:

- Any two of the following four courses: ARTH 101, 102, 103, and 104
- ARTS 100 Drawing I
- One 200-level ARTS course
- ARTH 301 Methods OR ARTS 319 Junior Seminar
- One ARTH seminar (400-level) OR one 500-level graduate course (except 508)
- One 300-level ARTS course OR (with permission) ARTS 418 Senior Seminar
- Any two additional Art Studio or Art History courses. At least one elective must be taken in each wing of the department. At least one of the electives must be an Art History course concerned with a period of art prior to 1600.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art Studio

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Seminar (ARTS 418). Students must also take the Honors Independent Study course (ARTS 31) during Winter Study of their senior year. Studio faculty will provide feedback on the progress of the honors project at the beginning of the Spring semester.

Honors candidates enrolled in the Senior Seminar must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student’s proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, honors candidates will orally defend their work in the senior exhibition at WCMA. The entire studio faculty will attend each defense. Based on the work and the oral defense, the studio faculty (as a whole) will designate honors, high honors or no honors.

History and Practice

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Practice makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to
supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art Studio

Studio Art Majors must take the required Junior Seminar (ARTS 319) in the fall semester of their junior year, unless they are planning to study abroad for a full year, or unless they have permission of the chair of the department (in these cases, they may take the required class in their sophomore or senior year). The Department does not grant pre-approval or provisional credit for study abroad courses; studio majors must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 1 requirement for the major can be taken per semester abroad (2 if one of the courses is in art history). Courses must be in fine arts fields to qualify for major credit. ARTS 319 and ARTS 418 cannot be fulfilled abroad.

History and Practice

History and Practice majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and practice majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and practice majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTS 100 (F) Drawing I

In childhood everyone draws. Like language drawing is a basic human tool to observe and interpret the world as well as to make comment and find agency within it. As an introduction to art making, this course will provide basic design and conceptual skills to engage feeling, develop content and communicate with others. Divided into sections on line, composition, proportion, value and space, the course is designed for those with no previous experience in drawing, but it is flexible enough to challenge experienced students. New concepts are introduced each week in slide talks and developed in workshops and through homework assignments.

Class Format: studio

Requirements/Evaluation: evaluation is based on the following: successful application of new skills, development of concept, participation in class, effort, timeliness and attendance

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 18

Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributions: (D1)

Fall 2018
STU Section: 02 M 11:00 am - 12:15 pm M 1:10 pm - 3:50 pm Michael A. Glier

Spring 2019
STU Section: 02 M 11:00 am - 12:15 pm M 1:10 pm - 3:50 pm Michael A. Glier
ARTS 100 (S) Drawing I

This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual exchange. Each class session introduces you to a specific drawing technique, concept or media. The homework assignments involve practicing the skills presented in class while encouraging personal expression by incorporating your own ideas into the art work. This course also promotes the understanding of artists and their work. It requires that you attend at least one Visiting Artist presentation to gain a deeper knowledge of artist's aspirations and practices. To allow for more practice with working directly from life, you are also required to attend at least two evening life drawing sessions.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students

Expected Class Size: 18

Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributions: (D1)

Not offered current academic year

ARTS 100 (F) Drawing I

This course is designed to introduce the fundamentals of drawing. A significant portion of class time will be devoted to learning some of the basics of drawing, such as line, gesture, composition, and value. Acquiring technical skill is an important goal of this class, and intensive weekly assignments are a significant part of that process.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality of work produced as well as successful completion of all assignments and attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: none

Expected Class Size: 18

Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributions: (D1)

Spring 2019

STU Section: 01   T 9:00 am - 11:40 am   Laylah Ali

ARTS 100 (S) Drawing I

This course is designed to introduce students to perceptual, experiential and analytical moments associated with the language of drawing, and to do so in ways that offer the opportunity to see the world with greater clarity, and with a broader understanding of art and the visual language. This course provides technical skills associated with observational drawing, experiential moments with a variety of materials, and the opportunity for self expression and the communication of ideas. Each studio class blends drawing practices and exercises designed to further one's understanding of the language of drawing, and more broadly, offers a foundation for further study in the visual arts.

Class Format: studio
ARTS 102 (F) In the Room Together: An Introduction to Dance, Theatre, and Live Performance

Crosslistings: ARTS102 / THEA102 / DANC102

Secondary Crosslisting

This course offers an introduction to the time-based art of performance, focusing on the embodied and social act of collaboration. Students will explore through a rotating studio and seminar-based format methods for creating and approaching art across a range of time-based media (dance, theatre, performance art, social media, spoken-word poetry), providing a foundation for the expression of ideas through performance. Over the term, students will develop, workshop and perform site-specific pieces, culminating in a final public presentation to the community. Through independent research projects, writing and class discussion, students will study makers whose work unsettles the boundaries of dance, theatre, and performance, such as: Anne Bogart, Bill T. Jones, Pina Bausch, Meredith Monk, Lin Manuel-Miranda, E. Patrick Johnson, Young Jean Lee, and Beyoncé. Evaluation will be based on an assessment of the student's work, participation, commitment, practice, curiosity, creativity, and collaboration with peers. Students will be required to attend '62 Center Series programming as may be required to attend other performance events as well. This course is open to students at all levels of experience and is a gateway and requirement to the major in Theatre.

Class Format: combined studio/seminar

Requirements/Evaluation: assignments will include writing reflections, showings of works in progress, oral presentations, a final performance, and a 5- to 7-page curatorial paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering the major or already majoring in Theatre

Expected Class Size: 18

Department Notes: this course serves as the gateway to the major in Theatre and is a prerequisite for several courses in the Theatre major

Distributions: (D1)

Not offered current academic year
balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: evaluation will be based on participation, studio work, and quizzes

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

Expected Class Size: 24

Department Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

Materials/Lab Fee: lab fee of $25 will be added to the student's term bill

Distributions: (D3) (QFR)

Distribution Notes: meets Division 3 requirement if registration is under CSCI; meets Division 1 requirement if registration is under ARTS

Attributes: FMST Core Courses;

Not offered current academic year

ARTS 114 (F) Art into Activism

This introductory studio art class will examine how art has been and can be engaged with activist and political causes. Can art be created from social or political ideas? Is all political art merely propaganda? What makes a work “political”? What does artistic work that is topical, informed, and critical look like? In addition to looking at various works by contemporary artists and used in political movements, we will be working on weekly assignments that will introduce students to 2-D image making, video, and performance. This class is a hands-on studio class which will require hours outside the class working on projects.

Class Format: studio

Requirements/Evaluation: evaluation based on projects, assignments, class participation, attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-years and sophomores

Expected Class Size: 14

Distributions: (D1)

Not offered current academic year

ARTS 116 (F) Monotypes

Spontaneous and delightfully unpredictable, the monotype is a style of printmaking that creates exactly one image by applying ink onto a flat surface, and transferring it to paper using pressure - by hand or a through a printing press. It is neither drawing nor painting, it is both! In this class students will use the monotype to heighten their sensitivity to line, colour, tone, texture, transparency, pressure, ink viscosity, and overall composition. They will also explore techniques like tracing, stencilling, chine-collé, reductive + additive mark making, and hand rubbing, while acquainting themselves with the history of the medium -- its practitioners, and its scope. No prior experience in drawing or painting required, though it is quite welcome.

Class Format: studio

Requirements/Evaluation: evaluation is based on quality of work, investment towards studio time, active presence in discussions and critique, attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Arts majors

Expected Class Size: 15

Distributions: (D1)
ARTS 120 (F) Introduction to Performance Art

Historically, artists have turned to performance art during times of collective trauma to observe, analyze, and deconstruct established systems of power. This course will explore the legacy, theory, and practice of this radical and subversive genre. Equal parts studio and seminar students will engage in open dialogue based on assigned readings, screenings, and museum/gallery visits. Starting with the emergence of Dadaism during World War I, and exploration of works by artists that will include: Adrian Piper, David Hammons, Lynda Montano, Chris Burden, Clifford Owens, and Anna Mendieta, students will gain an understanding of the mechanisms of performance: The body as object, The Gaze (the dynamics of viewing/being viewed), active and inactive participants, and breaking the fourth wall. This class is open to all students that are willing to embrace the awkwardness of their humanity and the vulnerabilities of our collective bodies.

Class Format: combined studio/seminar

Requirements/Evaluation: completion of 4 assigned projects, assigned readings, active class participation, creation of an independent final project, attend scheduled lectures, museum/gallery trips

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art Studio majors, first-years, sophomores

Expected Class Size: 15

Materials/Lab Fee: lab fee of $100 will be charged to term bill

Distributions: (D1)

---

ARTS 124 (F) Introductory Video

In this course we explore how the proliferation of video has transformed the way we relate our own image, and that of others. Video has become a platform for hypervisibility. In an era of selfies, live-streaming, state sanctioned violence (and its digital record), how might we use video as a tool of empathy and accountability? We will pursue answers to these questions through the act of making. In this introductory level course students will gain facility in Adobe Premiere and other post-production tools in the Adobe Creative Suite. Students will explore camera technique, lighting, and how to work with appropriated footage. We will look at early and contemporary video works in order to situate the work being made in class. Video Art will also be contextualized within vernacular applications of video. Through regular technical exercises, readings, and group critiques, students will learn how to use video as critical tool in their practice.

Class Format: studio

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

Expected Class Size: 12

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year
ARTS 126 (F) Introduction to Digital Photography

This course is an introduction to the technical and conceptual elements of digital photography. Students will learn the mechanics of the camera, digital workflow, image editing and inkjet printing, all in the service of making art. A foundation in the technical aspects of digital photography will be paired with art-historical slideshows and group critiques that provide a grounding in the visual language and vocabulary of fine art photography. Throughout the course we will engage with the work of many photographers. This list includes but is not limited to: Henri Cartier-Bresson, Lisette Model, Robert Frank, Helen Levitt, Diane Arbus, Graciela Iturbide, Garry Winogrand, Carrie Mae Weems, Mark Steinmetz and LaToya Ruby Frazier. The course will culminate with each student conceiving and creating a portfolio of photographs that wields technical skill to realize personal vision.

Class Format: studio
Requirements/Evaluation: three assigned projects and a self-directed final
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: in the case of over-enrollment, admission to the class will be determined by application
Expected Class Size: 12
Materials/Lab Fee: $250 (subject to change) charged to term bill
Distributions: (D1)

Spring 2019
STU Section: 01 R 8:30 am - 11:10 am Ilana Y. Harris-Babou

ARTS 129 (S) Institutional Critique

This introductory course will investigate the performance potential of the radical art making methodology known as Institutional Critique. Influenced by Situationalism, and the Fluxus movement, Institutional Critique emerged as a way for artists to respond to the art worlds elitism, monopoly on culture,
and dependency on Capitalism. Through collaborative performance based projects and readings students will explore the possibility of art to critically intervene in the hegemonic order and insight change within power relationships. We will also explore related movements such as Socially Engaged Practice, a term that describes art that is participatory and focuses as people as the medium. Artists covered will include: Thomas Hirshhorn, Tim Rollins, and Andrea Fraser. You do not need any prior experience just a willingness to use the power of voice and body.

Class Format: studio

Requirements/Evaluation: 3 collaborative projects, final independent project, readings, active participation, museum gallery visits, quality of work
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10
Distributions: (D1)

Spring 2019
STU Section: 01   TBA   Allana M. Clarke

ARTS 200 (F) Costume Design
Crosslistings: ARTS200 / THEA305
Secondary Crosslisting
This course is both an introductory and an intensive study of the art of costume design. The course focuses on the designer's process: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills and presentation of designs.

Class Format: studio

Requirements/Evaluation: evaluation will be based on multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance
Extra Info: students are required to attend two to three theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work
Prerequisites: successful completion of any 200-level course in any of the fine or performing arts or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Theater and Art Studio, sophomores and juniors
Expected Class Size: 8
Department Notes: does not satisfy any requirements for the Art major
Materials/Lab Fee: lab fee of $100 will be added to the student's term bill
Distributions: (D1)

Not offered current academic year

ARTS 201 (S) Worldbuilding: Staging and Design For The Theater
Crosslistings: ARTS201 / THEA201
Secondary Crosslisting
This course examines the designer's and director's creative processes as they work together to imagine the fictional worlds of theatrical productions. Over a series of practical projects in staging, mise-en-scene, and various design disciplines, we will develop techniques for eliciting an initial creative response to a text, developing that response into a point-of-view, and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with one another, and with the work of the actors and director, to form the larger intellectual, emotional, and physical context of the work as a whole. Students will adopt various creative roles throughout a series of assigned projects, giving a broad exposure to the work of designers and directors. Basic presentation skills and technique, as well as methodologies for critical feedback, will be taught as crucial elements of staging and design development.

Class Format: studio
**ARTS 215 (F) Sustainabuilding**

Sustainability considerations figure prominently (and always have) in good building design. This architectural design studio will include instruction, research, and reading about current design and energy strategies. These lessons will be applied in two or more design problems. Drawings and models will be critiqued in class reviews with outside critics.

**Class Format:** studio

**Requirements/Evaluation:** based on quality of design and presentation

**Prerequisites:** none but ARTS 220 and/or ENVI 108 are recommended; permission of instructor is required; preregistration does not guarantee admission to the course

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Materials/Lab Fee:** lab fee TBD will be added to the student's term bill

**Distributions:** (D1)

---

**ARTS 220 (S) Architectural Design I**

Instruction in design with an introduction to architectural theory. Five simple design problems will explore form and meaning in architecture. Each problem will require drawings/model and will be critiqued in a class review with outside critics.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on quality of design, with improvement taken into account

**Prerequisites:** ARTS 100; ARTH 101-102 strongly suggested; permission of instructor is required; registration does not guarantee admission to the course

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Materials/Lab Fee:** lab fee TBD will be added to the student's term bill

**Distributions:** (D1)
ARTS 224 (F) Interdisciplinary Approaches to Performance Art

Mud, meat, lard, time, Instagram, and language. These are the materials of performance art. Students will develop distinct and focused voices as performers/artists by gaining an understanding of the methods and theories that inform the performance art genre. Assigned projects will examine the relationship between performance, video, photography, sculpture and digital platforms. Seminars will focus on the catalogs of contemporary artists whose interdisciplinary practices heavily incorporate performance methodologies. Artists covered will include: Tania Bruguera, Santiago Sierra, Kalip Linzy, and Tameka Norris.

Class Format: studio

Requirements/Evaluation: completion of 3 guided projects, assigned readings, active class engagement, independent final project, attending lectures, museum/gallery trips

Extra Info: may not be taken on a pass/fail basis

Prerequisites: students who have previously taken a studio class with performance elements, a dance or theater class, or by permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Art Studio majors

Expected Class Size: 12

Materials/Lab Fee: lab fee of $150 will be added to the student's term bill

Distributions: (D1)

Fall 2018

STU Section: 01  R 9:55 am - 12:35 pm  Aliana M. Clarke

ARTS 227 (S) Moving Photography

In this intermediate photography course, students will explore the rich interplay between photography and movies. Many still photographers invoke the aesthetics of cinema, critique its conventions, and investigate the way films create desire. For example, An-My Lê photographing slightly behind the scenes on the set of “The Free State of Jones” and Gregory Crewdson asking the viewer to linger within cinematic still images unmoored from narrative logic. Students will learn to wield cinematic convention and style within their own photographs. We will discuss narrative sequencing and how visual form (such as the angular light and oblique framing of film noir) can itself be thematic. We will also engage with the recent emergence of slightly-moving photographs by artists such as Dru Donovan and Owen Kydd. In a series of projects and a self-directed final, students will create their own still and moving photographs informed by the relationship between movies and photography.

Class Format: studio

Requirements/Evaluation: students will complete three projects and self-directed final

Prerequisites: a photography course, experience with DSLR, or instructor permission

Enrollment Limit: 15

Enrollment Preferences: Art majors

Expected Class Size: 15

Distributions: (D1)

Spring 2019

STU Section: 01  TBA  Zak Arctander

ARTS 228 (F) The Art of Almost Nothing

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana...
Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

**Class Format:** studio tutorial; studio class, 3 hours per week

**Requirements/Evaluation:** projects, assignments, class participation, attendance

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** one previous studio art class at Williams

**Enrollment Limit:** 14

**Enrollment Preferences:** first and second-year students

**Expected Class Size:** 14

**Materials/Lab Fee:** TBD

**Distributions:** (D1)

Not offered current academic year

**ARTS 230 (S) Drawing II**

This intermediate drawing course focuses on technique, style and content. Class sessions will focus on representing the human figure in representational and abstract styles, including cubism and abstract expressionism. Homework projects will focus on developing individual concepts and personal expression. Exercises will include traditional materials on paper as well as non-traditional methods and exercises. The course culminates with an independent project of work in series.

**Class Format:** studio

**Requirements/Evaluation:** evaluation will be based on the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ARTS 100

**Enrollment Limit:** 15

**Materials/Lab Fee:** lab fee TBD will be added to the student's term bill

**Distributions:** (D1)

Spring 2019

STU Section: 01  T 1:10 pm - 3:50 pm  Michael A. Glier

**ARTS 236 (F) LINOCUT!**

A subset of relief printmaking, linocuts are images made by carving the surface of soft linoleum blocks. Relying almost completely on our hands, we will learn to work with a variety of cutting tools, controlling their speed and pressure to create bold, clear imagery. The course will include introductions to various methods in lino printing including stencilling, collaging, reduction printing, while also familiarising students with the fundamentals of printmaking inks and papers - how to use them, choose them, modify them. We will also look at the history of the block print, its application in the textile industry, and its present day interdisciplinary potential. Students will work towards creating a diverse portfolio that demonstrates fluency across various techniques, using them individually or in combination.

**Class Format:** studio

**Requirements/Evaluation:** evaluation is based on quality of work, investment towards studio time, active presence in discussions and critique, attendance

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** Drawing 100

**Enrollment Limit:** 12

**Enrollment Preferences:** Arts Majors

**Expected Class Size:** 12

**Distributions:** (D1)
ARTS 241 (F) Painting
The variables of oil painting are so numerous that the permutations are endless. As an introduction to basic variables like color, brushwork, surface, form and light, this course is the beginning of what may be a life long, creative adventure through the medium of paint. Most assignments are done from direct observation of the human figure, the landscape and objects. Museum visits and slide presentations are an important part of the class.

Class Format: workshop
Requirements/Evaluation: weekly assignments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTS 100
Enrollment Limit: 15
Enrollment Preferences: majors, sophomores, juniors, seniors
Expected Class Size: 15
Materials/Lab Fee: a lab fee of approximately $375 to be added to the student's term bill
Distributions: (D1)

ARTS 241 (F) Acrylic Painting
In this course, we will explore the options that painting with acrylic can offer. The class will focus on developing necessary technical skills, such as the manipulation of color, value, surface, and texture. We will also consider issues of content in a diverse range of approaches, including painting from observation (still life and portraits), abstraction, and cross-media experimentations (for example, combinations in installations, sculpture, photography). The particular characteristics and benefits of acrylic paint will be explored in contemporary approaches. There will be visits to museums (WCMA, the Clark Art Institute and MASS MoCA), critiques, and slide presentations.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work, investment of time, participation in critiques, and attendance
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ARTS 100
Enrollment Limit: 14
Enrollment Preferences: Art majors
Expected Class Size: 14
Materials/Lab Fee: lab fee TBD will be added to student's term bill
Distributions: (D1)

ARTS 241 (S) Introduction to Oil Painting
This course is designed to introduce the fundamentals of oil painting. A significant portion of class time will be devoted to learning some of the basics of painting, such as the manipulation of color, value, surface, and texture. We will learn how to prepare paper, canvas, and board supports as well as exploring the properties of several mediums (what the paint is mixed with to allow for application and drying). This course is focused on giving students access to a range of introductory techniques that they can explore during the semester. We will also spend time looking at each other's work and giving feedback and suggestions as well as studying the work of established artists. Evaluation will be based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions.
ARTS 250 (S)  Devised Performance: The Art of Embodied Inquiry
Crosslistings: ARTS250 / THEA350
Secondary Crosslisting

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

ARTS 260 (S)  Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.
Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

Expected Class Size: 12

Materials/Lab Fee: $125

Distributions: (D1)

Attributes: FMST Core Courses

Spring 2019

STU Section: 01  W 8:30 am - 10:50 am  Ilana Y. Harris-Babou

ARTS 273 (F)  Sound Art, Public Music
Crosslistings: ARTS273 / MUS175

Secondary Crosslisting

Western music performance traditionally occurs within contained spaces in which “performer” and “audience” adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and scripts of performance and reception have moved into public spaces—from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course studies the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of site-specific works on and around the Williams campus.

Class Format: seminar

Requirements/Evaluation: class participation, three short (2-4 page) essays, a response journal and the creation of four public music works

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Department Notes: ARTS elective

Distributions: (D1)

Not offered current academic year

ARTS 274 (S)  Chinese Calligraphy: Theory and Practice
Crosslistings: ASST274 / ARTH274 / ARTS274

Secondary Crosslisting

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos “beauty” + graphe “writing”). This course can be taken as either an Art History or a Studio Art course.

Class Format: lecture/studio instruction

Requirements/Evaluation: weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

Prerequisites: none

Enrollment Limit: 12

Department Notes: this course can count toward the Art History or Studio major

Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: ARTH pre-1600 Courses; EXPE Experiential Education Courses; GBST East Asian Studies Electives

Spring 2019
LEC Section: 01  TR 9:55 am - 11:10 am  Ju-Yu Scarlett Jang

ARTS 275 (F) Introduction to Sculpture
This course is an introduction to the media and processes of sculpture. The focus will be on the development of technical and analytical skills as they relate to the interplay of form, content, and materials. This section will introduce students to a variety of techniques and processes associated with the making of sculpture, including, but not limited to, woodworking and welding. Sculpture encompasses a broad scope of approaches and materials, therefore a wide variety of media exploration is encouraged and expected. This course is structured on a series of sculpture projects, which investigate formal and conceptual practices, with the ultimate goal being visual fluency and successful expression of ideas. A substantial amount of time outside of class is expected to complete these projects.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work produced, depth and quality of the investigative process, participation in critiques, and attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any ARTS 100 class, or permission of instructor
Enrollment Limit: 12
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)

Fall 2018
STU Section: 01  R 1:10 pm - 3:50 pm  Amy D. Podmore

ARTS 302 (S) Landscape and Language
Crosslistings: ENGL302 / ARTS302
Secondary Crosslisting
Colloquially, the word "landscape" refers to pictures or scenes of the land, from farms to forest to wilderness. But more broadly, landscape evokes the complex, dynamic, and ever-shifting relationship between "nature" and our experience of it. Landscape and Language is a seminar that considers the tools we use to represent and narrate our relationship to the natural world. Together, we will investigate how such cultural conventions as travel, perspective, nature, and ecology influence the ways we see and understand place. Drawing from discourses of literature, architecture, art history, contemporary art, and ecocriticism, our goal is to develop a deeper critical understanding of and engagement with landscape (as a collective of readers and as individual investigators). Texts for this course will include an art historical exploration of the relationship between landscape, power, and imperialism by W.J.T. Mitchell, an ethnographic investigation of nearly obsolete place names by Robert MacFarlane, poems by historical and contemporary poets like Jean Toomer, Terrance Hayes, and Lucille Clifton, and contemporary visual art by Helen Mirra and Xaviera Simmons, among others.

Class Format: seminar
Requirements/Evaluation: weekly discussion in an online forum; two short response papers, and a final research paper or creative project (10-12 pages or equivalent) investigating a specific landscape
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors
Expected Class Size: 20
Distributions: (D1)
ARTS 319 (F)  Junior Seminar
The Junior Seminar is an intensive studio based class designed to provide art majors the opportunity to strengthen their ability to communicate clearly through the visual language by offering an overview of current themes and issues within the art world and beyond. The class is structured around regular studio projects that are designed to help further each student's skill set and broaden their knowledge of contemporary art and its role in society, and, to offer critical and analytic experiences that deepen the students understanding of the role of art in the world.

Class Format: seminar and studio workshop
Requirements/Evaluation: evaluation will be based on the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance
Prerequisites: three studio courses required for the major, or permission of instructor
Enrollment Preferences: enrollment is limited to studio art majors (or permission of instructor)
Department Notes: Studio Art and Art History and Practice majors are required to take this course in the junior year unless studying abroad during the fall semester
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)

Fall 2018
STU Section: 01    W 1:10 pm - 3:50 pm     Amy D. Podmore

ARTS 322 (F)  The Empowered Object
The development of "found object" in the language of art has played a significant role in constructing meaning in the consciousness of the twenty-first century. This tutorial will have students explore that tradition further through their own creative endeavors. They will be asked to add to the lineage of art that uses "found objects" in a creative and meaningful way. They will have the freedom in choose which medium will convey their ideas most effectively. They include, but are not limited to: sculpture, painting, drawing, photography, printmaking and video. For example, within the investigation of the "found object", projects could include: still life painting with a focus on the objects, 2-dimensional work depicting or incorporating real objects, collage, assemblage, etc. The "found object" in art will be examined through: art practice, readings and presentations. As a tutorial, the course is designed to meet individual needs and to stress student participation and responsibility for learning. Students will meet weekly with a peer and the professor to review work.

Class Format: tutorial
Requirements/Evaluation: evaluation is based on the conceptual and technical quality of the work, as well as the level of participation in the tutorial meetings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any 200-level art course in the area that you are planning to work that is housed solely in the studio wing of the art department
Enrollment Limit: 10
Expected Class Size: 10
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)

Not offered current academic year

ARTS 329 (F)  Architectural Design II
A continuation and expansion of ideas and skills learned in Architectural Design I. There will be four to six design projects requiring drawings and models, each of which will emphasize particular aspects of architectural theory and design. One project will be built full-scale by the students in the class.

Class Format: design studio, site visits, lectures, readings
Requirements/Evaluation: evaluation will be based on quality of designs during the term
ARTS 333 (S) Narrative Strategies
Crosslistings: COMP333 / ARTS333

In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, and sound art. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of artists such as Huma Bhabha, Lorna Simpson, Joe Sacco, Lydia Davis, Raymond Pettibon, Todd Solondz, Sophie Calle, Jenny Holzer, and Omer Fast among others. One of the aims of this course is to challenge traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How do different mediums allow for time to unfold in unexpected ways? How does omission play a powerful role in a narrative? How might the role of the narrator (often so powerful and present in novels and short stories) change in a visual arts context? This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings and screenings will be required in addition to tutorial hours.

Class Format: studio tutorial with an emphasis on demanding, weekly projects; students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats; readings and screenings will be required in addition to tutorial hours
Requirements/Evaluation: evaluation based on assignments, studio performance, class participation, and attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: students are required to have taken at least two ARTS 200-level classes in any medium, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Art Studio majors
Expected Class Size: 10
Distributions: (D1)
Not offered current academic year

ARTS 335 (F) Music Videos

This studio-centered seminar will focus on the relationship between music videos, popular culture, and contemporary art. Our discussion will begin with the inception of the music video and trace how the genre has transformed over time. We will look at the work of influential video directors and contemporary artists who have created music videos or been inspired by them. Readings will include work by Krista Thompson, Marshall McLuhan, Ann Kaplan, and others. How does the pairing of music with image change our relationship to narrative? How do music videos play with notions of spectacle, violence, aspiration, or joy? How has the music video transformed in the digital age? Students will respond to these questions by creating 3 new works: 2 assignment based projects, and one independent final. Assignments may be completed in a variety of media, including but not limited to: sculpture, painting, photography, performance, and the moving image. Weekly meetings will include discussions, screenings, and group critique. Students need not create their own music videos, but must incorporate the content of our discussions into their own artistic practice. This class is ideal for students who have previously taken studio art courses and display confidence and proficiency in their media of choice.

Class Format: studio
Requirements/Evaluation: evaluation will be based on discussion participation and the technical and conceptual strength of the projects, with consideration given to individual development
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: students must have previously taken a studio art course
Enrollment Limit: 10
Enrollment Preferences: students majoring in Studio Arts

Expected Class Size: 10

Distributions: (D1)

Fall 2018

STU Section: 01  W 8:30 am - 10:50 am  Ilana Y. Harris-Babou

ARTS 338 (S) Persona

Like novelists, visual artists create fictional characters to tell stories. Conceptual artist Adrian Piper, sculptor Joseph Beuys, and collective The Yes Men have crafted personas to confront systems of power and societally constructed notions of normalcy. Students will explore the work of such artists through readings, class lecture and assignments. The reading list includes excerpts from Maggie Nelson's The art of Cruelty and Cherise Smith's Enacting Others. The first half of the course will focus on guided assignments developed by the instructor, the second half will be an independent study culminating in the construction of your own fictional persona. Students will use a variety of methods in the development of a persona including writing and photography, and may employ other methods including painting, sculpture, and digital media.

Class Format: studio

Requirements/Evaluation: active participation in class discussions, development of a final project with 1 pg project proposal, participation in class workshops

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: majors, juniors, seniors, sophomores

Expected Class Size: 10

Materials/Lab Fee: $100 charged to term bill

Distributions: (D1)

Spring 2019

STU Section: 01  TBA  Allana M. Clarke

ARTS 340 (F) Infinite Scroll

In this studio art course students will seek inspiration in the ways that still images, video, and audio commingle on electronic devices. Some of the ideas we will explore include (but are not limited to): the formal possibilities of screen-space, the visual styles of specific platforms (Instagram, YouTube, Snapchat etc.), and the interplay of attention and distraction common to using devices. We will look at and discuss works by a range of artists working in a variety of media (Pipilotti Rist, Leslie Hewitt, Joseph Cornell, Hito Steyerl) as well as vernacular digital media that isn't necessarily considered art (try not to cry challenges, slime-making tutorials, camera test videos). Students will make their own artworks (in any media) that address the complications and dynamism experienced through screens. Technical proficiency in medium of choice is required.

Class Format: studio

Requirements/Evaluation: 3 assignment projects and a self-directed final

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some experience with studio art courses

Enrollment Limit: 12

Enrollment Preferences: art majors

Expected Class Size: 12

Distributions: (D1)

Fall 2018

STU Section: 01  R 1:10 pm - 3:50 pm  Zak  Arctander
ARTS 376 (S)  Sculpture Expanded
This course is designed to expand the definitions of sculpture by adding interdisciplinary solutions to the artistic ideas at hand. The class will be using a wide array of artistic practices towards developing three-dimensional spaces and emphasizing environmental or performative outcomes. Media such as video, drawing, painting, photography, architecture, as well as other artistic practices may be incorporated to create visual solutions to the projects. This is an upper level course focusing on developing one’s artistic voice while simultaneously strengthening technical and analytical skills. A substantial amount of time outside of class is expected to complete these projects.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work produced, depth and quality of the investigative process, participation in critiques, and attendance
Prerequisites: ARTS 275 or any 200 level course in the media that will be incorporated or permission of instructor
Enrollment Limit: 10
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)
Not offered current academic year

ARTS 385 (S)  The Sculptural Costume and It's Performance Potential
Crosslistings: THEA385 / ARTS385
Primary Crosslisting
A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio
Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor
Enrollment Limit: 14
Enrollment Preferences: Art and Theater majors
Expected Class Size: 12
Materials/Lab Fee: $125
Distributions: (D1)

STU Section: 01  W 1:10 pm - 3:50 pm  Amy D. Podmore, Deborah A. Brothers

ARTS 418 (S)  Senior Seminar
In this capstone class for studio art majors, students define, research, create and present an original body of work which will be exhibited in the Williams College Museum of art. We will focus on strengthening ideas, developing formal skills and practicing critical analysis. Students may work in any medium in which they have developed a high degree of proficiency. The class will meet in large and small groups throughout the semester for critique and discussion and also have assigned readings,flims, and/or lectures.

Class Format: intensive studio art class
Requirements/Evaluation: attendance, class participation, completion of all assignments, the quality of the portfolio at midterm and of the final
portfolio, successful presentation of the project in the museum context

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** you must be a senior Art Studio major with all requirements fulfilled by the end of this term

**Enrollment Limit:** none

**Enrollment Preferences:** Studio Art major; permission of instructor is required for History and Practice majors

**Expected Class Size:** 15

**Materials/Lab Fee:** no lab fee, students are responsible for purchasing supplies

**Distributions:** (D1)

On leave Spring only: Professor C. Chavoya, Senior Lecturer H. Edwards.

MASTER OF ARTS IN ART HISTORY

Requirements
To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (normally in January) (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in two foreign languages, one of them German (for more specific information on the language requirements, see below, after the listing for ARTH 597/598). At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least eight of the twelve courses must be graduate seminars. Included among them are four required of all students: ARTH 504, “Methods of Art History,” to be taken during the first semester; ARTH 506, “Graduate Art History Writing Workshop” and ARTH 507, “Object Workshop,” to be taken in the second; and ARTH 509, “Graduate Student Symposium,” to be taken in the fourth.

Students must also fulfill a distribution requirement by undertaking coursework in three of six areas:

East Asian, Indian, Islamic art
Ancient Near Eastern, Egyptian, Greek, and Roman art
Early Christian, Byzantine, and Western Medieval art to 1400
Western art, 1400 to 1780
Western art, 1780 to present
Arts of Africa, Oceania, and the Americas (Pre-Hispanic or Native American cultures)

Students may petition the Director to apply a thematic or non-period specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Private Tutorials
With permission from the Director and the individual instructors, students may take up to four undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

In addition to regularly offered seminars and classes, students may arrange up to two private tutorials (ARTH 595/596) by submitting petitions to the Director describing the substance of their projects, including bibliography, and the nature of the work they will submit for evaluation. The petitions must be co-signed in advance by both the students and their faculty supervisors.

Of the minimum requirement of twelve courses, the combined number of private tutorials and undergraduate courses applied to the degree may not exceed four.

The Qualifying Paper
The Qualifying Paper is normally a revision of a seminar or private tutorial paper produced in one of the previous three semesters, expanded and refined over the second Winter Study term and a portion of the fourth semester. Students submit the topic of the Qualifying Paper in writing to the Director by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor’s agreement to be engaged in the Qualifying Paper process.

On the first Friday of their fourth semester, students submit drafts of their Qualifying Paper, including illustrations, to three faculty readers.
Early in the fourth semester, students and their readers meet together to discuss the drafts. Within six weeks of these discussions (at a date determined by the Director), students submit their Qualifying Papers. Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

The Graduate Symposium

All second-year students speak in the Symposium, presenting 20-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees comprise, but are not limited to, the Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director.

Grades and Academic Standing

The Program uses the following grading system:

- A+ = truly exceptional (4.33)
- A = outstanding (4.00)
- A- = excellent (3.67)
- B+ = good (3.33)
- B = satisfactory (3.00)
- B- = barely adequate (2.67)
- C = inadequate (0)
- E = failing (0)

Courses in which students receive a grade below B- do not receive graduate credit.

Letter grades are used in all seminars except ARTH 507, 509, and 563. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail. Grades in language courses are converted to Pass/Fail on the Williams transcript and are not calculated in the GPA. The Director reviews students’ records at the end of the first year; those with GPAs of 3.00 or lower may be asked to resign from the Program.

Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades of Incomplete, they must hand in their work by the instructor’s revised deadline, which will be no later than the second Monday of the next semester’s classes. Extensions beyond this date will be solely at the discretion of the Director (in consultation with the instructor).

Students who resign from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.

The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior to matriculation in the Program. The Program is full-time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.

Language Courses

The Graduate Program’s degree requirements include reading competence in two languages (other than English) of scholarly and academic relevance to the history of art. One of the two languages must be German. Many students select French as the second although, with permission of the Director, other languages may serve. The Program offers dedicated courses in reading French and German for art history. Other language classes at Williams are listed in the course catalog, although the coordination of undergraduate and graduate schedules can be challenging.

Incoming students’ language preparation is assessed through exams administered at the outset of the semester. In French and German, scores attained on SAT II reading examinations determine placement within the two-semester language course sequence.

**French**: If students attain a minimum score of 700 on the French placement exam, they are exempted from further coursework in that language. With a score between 500 and 700, they are placed into the graduate course of readings in art history, French 512. With a score below 500, they enroll in the introductory course, French 511. In the case of a second language other than French, arrangements will be made on an individual basis.

**German**: With a score below 450, students enroll in the introductory course, German 515. Students who score between 450 and 500 are placed into German 516. With scores between 500 and 700, students enroll in the advanced reading course, German 513. Students attaining a minimum score of 700 on the German placement exam are exempted from further coursework in that language.
ARTH 500 (F) Clark Visiting Professor Seminar: Handicraft and Contemporary Art

Crosslistings: ARTH400 / ARTH500

Primary Crosslisting

This seminar examines the resurgence of craft within contemporary art and theory. In a time when much art is outsourced—or fabricated by large stables of assistants—what does it mean when artists return to traditional, and traditionally laborious, methods of handiwork such as knitting, jewelry making, or woodworking? Though our emphasis will be on recent art (including the feminist reclamation of quilts, an artist who makes pornographic embroidery, a transvestite potter, queer fiber collectives, do-it-yourself environmental interventions, and anti-war craftivism), we will also examine important historical precedents. We will read formative theoretical texts regarding questions of process, materiality, skill, bodily effort, domestic labor, and alternative economies of production. Throughout, we will think through how craft is in dialogue with questions of nation-building, gendered work, and mass manufacturing. The seminar is centered around student-led discussion of our critical readings and culminates with final research projects.

Class Format: seminar
Requirements/Evaluation: research paper, presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: places for 8 undergraduates and 8 graduate students assured
Expected Class Size: 12
Distributions: (D1)

Fall 2018

ARTH 500 (S) Clark Visiting Professor Seminar: Ethics of Abstraction

Crosslistings: ARTH500 / ARTH400

Primary Crosslisting

The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Class Format: seminar
Requirements/Evaluation: research paper, class presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduates and 8 graduate students assured
Expected Class Size: 12
Distributions: (D1)

Spring 2019
ARTH 501 (S)  Museums: History and Practice
Crosslistings: ARTH303 / LEAD301 / ARTH501

**Primary Crosslisting**

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that result in the institutions of our time. The seminar will examine museums past, present and future looking at governance and administration practices, architecture and installation, accessioning/deaccessioning policies, and cultural property issues. It will also consider current trends in exhibition, public education and other programming in both "encyclopedic" and contemporary arts institutions. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on oral presentations as well as two research papers

**Extra Info:** may not be taken on a pass/fail basis

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students then to senior Art History majors

**Department Notes:** satisfies the seminar requirement for the undergraduate Art History major

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under LEAD

**Attributes:** AMST Space and Place Electives; LEAD Facets or Domains of Leadership

Spring 2019

SEM Section: 01    T 1:00 pm - 4:00 pm     Michael  Conforti

ARTH 502 (S)  History, Theory, and Techniques of Printmaking

This course will consider the history of prints in Europe and America from the fifteenth century through the 1920s. Focusing primarily on the holdings of the Clark, classes will be held in the new Manton Study Center for Works on Paper where students will view original works of art. Equal emphasis will be placed on primary literature, theoretical texts, and a careful understanding of printmaking processes. Media to be investigated include, among others, 15th-century woodcuts by Albrecht Dürer, drypoints by Rembrandt van Rijn, engravings by Philibert-Louis Debucourt, aquatints by Francesco Goya, lithographs by Édouard Manet, etchings by James McNeill Whistler, photo-mechanical processes like photogravure by artist Alfred Stieglitz, and color woodcuts by the German Expressionists. The rise and fall of various processes and practitioners will be explored from a socio-historical perspective, considering market, taste, and changing exhibition strategies. Additionally, consideration will be given to the status of the printmaker over the centuries as their roles shifted from professional to amateur and back again.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on involved class participation, several short presentations, one short paper, and a final paper of approx. 20 pages

**Extra Info:** may not be taken on a pass/fail basis

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students and then to Art History majors

**Expected Class Size:** 14

**Distributions:** (D1)

**Not offered current academic year

ARTH 504 (F)  Methods of Art History and Criticism

This seminar concentrates on critical approaches to art, culture, and history. Our focus will be on various writings that have engaged theories of representation, vision, objecthood and materiality for more than five centuries.
**Class Format:** seminar  
**Requirements/Evaluation:** each student will write one short midterm paper and a longer concluding essay, as well as present a couple of the readings to the class  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** none  
**Enrollment Limit:** 14  
**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art  
**Distributions:** (D1)  

**ARHT 505 (F) Shadows of Plato's Cave: Image, Screen, and Spectacle**  
**Crosslistings:** COMP374 / ARTH505 / PSCI374  
**Secondary Crosslisting**  
In Book VII of the *Republic*, Socrates famously asks his interlocutors to picture people living in a cave, bound in chains and able to see only shadows on the wall. Thus begins the presentation of perhaps the most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the *Republic*’s cave and other key Platonic discussions of appearances, visual representation, and (literal and metaphoric) seeing, asking how Plato’s approaches to image, politics, and theory/philosophy shape each other. Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle—read both for their resonances with and departures from debates over the Platonic legacy—and case studies in the politics of both military and racial spectacles in the U.S. The question of what is an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Debord, Friedberg, Goldsby, Josellit, Mitchell, Nightingale, Rodowick, Rogin, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave’s considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as *The Matrix*.  
**Class Format:** seminar  
**Requirements/Evaluation:** regular glow posts and three 7- to 8-page essays or one 20-page final paper  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor  
**Enrollment Limit:** 19  
**Enrollment Preferences:** majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history  
**Expected Class Size:** 12  
**Distributions:** (D2)  
**Distribution Notes:** meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under COMP or ARTH  
**Attributes:** PSCI Political Theory Courses  
**Not offered current academic year**

**ARHT 506 (S) An Expository Writing Workshop**  
A common and depressing consequence of too much education is how our writing tends to devolve, as the task of saying what we mean is complicated by new anxieties: trying to impress our potential employers, intimidate our competition, claim our place in an intellectual community, and generally avoid looking like fools. In many professions, bad prose tends to proliferate like some disgusting disease, as scholars, trying above all to avoid mistakes, become tentative, obscurantist, addicted to jargon, and desperate to imitate other bad writers. In this course we will try to relearn the basic skills of effective communication and adapt them to new and complicated purposes. In class we will go over weekly or bi-weekly writing
assignments, but we will also look at the essays you are writing for your other courses, to give them an outward form that will best display their inner braininess. Among other things, I am a fiction writer, and part of my intention is to borrow the techniques of storytelling to dramatize your ideas successfully.

**Class Format:** seminar

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Limit:** 14

**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art

**Distributions:** (D1)

Fall 2018

SEM Section: 01  TBA  Marc Gotlieb

**ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects.

Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

**ARTH 509 (S) Graduate Symposium**

This course is designed to assist qualified fourth-semester graduate students in preparing a scholarly paper to be presented at the annual Graduate Symposium. Working closely with a student and faculty ad hoc advisory committee, each student will prepare a twenty-minute presentation based on
the Qualifying Paper. Special emphasis is placed on the development of effective oral presentation skills.

Class Format: symposium

Requirements/Evaluation: each student will present three practice runs and a final oral presentation at the symposium

Prerequisites: successful completion and acceptance of the Qualifying Paper

Department Notes: limited to and required of second-year students in the Graduate Program in the History of Art

Distributions: (D1)

Spring 2019

SEM Section: 01    TBA     Marc Gotlieb

ARTH 510 (F) Approaches to Drawing from Connoisseurship to Conceptualism

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have the pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on involved class participation, several short presentations, one short paper, and a final paper approx. 20 pages

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: preference given to Graduate Program students and then to senior Art History majors

Expected Class Size: 8

Distributions: (D1)

Not offered current academic year

ARTH 515 (F) Creating Whiteness: Racial Taxonomies in ‘American’ Art, 1650-1900

Crosslistings: AMST355 / ARTH515

Primary Crosslisting

"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of ‘American’ art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family’s images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Class Format: seminar

Requirements/Evaluation: research paper, presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Limit: 16

ARTH 524 (F) The Watchful Object
What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects—sometimes known problematically as 'fetishes,' 'idols,' and 'totems'—have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often transformative experiences in viewers.

Class Format: seminar
Requirements/Evaluation: in-class presentations, class discussion, and a final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students
Expected Class Size: 12
Distributions: (D1)

ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA
Crosslistings: ECON227 / ARTH527 / ARTH327
Secondary Crosslisting

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Class Format: seminar
**Requirements/Evaluation:** three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ECON 110 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

**Expected Class Size:** 20

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under ECON

Not offered current academic year

**ARTH 530 (S)** Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

**Crosslistings:** ARTH530 / CLAS236

**Primary Crosslisting**

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry;" Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun;" Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

**Class Format:** seminar

**Requirements/Evaluation:** attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** second year graduate students, then first year graduate students, then advanced undergraduate students

**Expected Class Size:** 12

**Department Notes:** pre-1600 undergraduate requirement

**Distributions:** (D1)

**Attributes:** ARTH pre-1600 Courses;

**ARTH 533 (S)** Michelangelo: Biography, Mythology, and the History of Art

**Crosslistings:** ARTH433 / ARTH533

**Secondary Crosslisting**

One might argue that Michelangelo's enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in
the Italian Renaissance, and specifically in the fascinating biography--and mythology--of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides the foundations for a triangulation of person-persona-artistic production that has a modern. But what are the limits of our knowledge, or the boundaries of interpretation? How might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the man and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

Class Format: seminar

Requirements/Evaluation: an oral presentation, a research paper, short response papers, and critical commentary on work of peers

Prerequisites: ARTH 301 or permission of instructor (prerequisite for 400-level)

Enrollment Limit: 18

Enrollment Preferences: equally given to senior Art majors and graduate students in the history of art

Distributions: (D1)

Attributes: ARTH pre-1600 Courses;

Not offered current academic year

ARTH 534 (S) Renaissance Time

"Once upon a time," noted the historian Randolph Starn, "the Renaissance set its clocks and calendars to keep modern time." We think of the changing perception of time during the fifteenth and sixteenth centuries—a mounting awareness of the place of the present moment in the larger arc of history—as a defining feature of the Renaissance. Yet, while this new temporal self-consciousness underpins our own understanding of the Renaissance as the emergence of modernity, this is only a thread of the larger and more complex fabric of Renaissance time. In this course we will explore the multifaceted dynamism of the Renaissance relationship to time. We will study the broad shifts in beliefs about time during the Renaissance, then, but we will also move beyond this in order to examine the ways in which concepts of temporality were theorized and functioned in Renaissance visual representation. We will pay close attention to the temporal as a site of innovation in Renaissance art, while focusing a historiographic lens onto the varied art historical interpretations of temporality and the imagery of time. Finally, we will consider our own temporal position as it relates to our experience of images from the past. Authors studied will include Leonard Barkan, Simona Cohen, Georges Didi-Huberman, Anthony Grafton, Michael Ann Holly, George Kubler, Keith Moxey, Alexander Nagel, Erwin Panofsky, Marvin Trachtenberg, Aby Warburg, and Chris Wood.

Class Format: seminar

Requirements/Evaluation: collaborative class discussion and focused peer critique, short ungraded response essays, oral seminar report, 15- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Not offered current academic year

ARTH 535 (F) The Medieval Object

Crosslistings: ARTH535 / ARTH435

Secondary Crosslisting

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured,
medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: seminar; three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

ARTH 537 (F) Renaissance Matter
The imagined cleave between "scientific" and "theoretica" art history has never seemed plausible to even the most extreme of art historians. In late medieval and Renaissance North Europe, artworks incorporated materials from all over the human and natural world -- azurite, gold, paper, blood, ivory, ash, bone. This "stuff"-- rather than any forms it might be fashioned into -- held its own auratic charge. How are we to think about these various species of matter, about their various processes of transformation? How did changing philosophies and concepts of matter alter the concept of the artwork, particularly in globally-connected North Europe? What role (if any) was played by rediscovered antique texts about matter (Lucretius, etc.?)

This seminar pivots on two questions: first, how did Renaissance artists and audiences understand the material constituents of their craft? And second, can we imagine an art-history of material today outside a rubric of blunt materialism? Material art history shouldn't mean shucking hermeneutics or criticality. After all, going back to Heraclitus, what could be more "philosophical" than matter itself? At the same time, the "scientific" scrutiny of artworks -- using X-rays, infrared scanning, radiographic photography, chemical analyses, and dendrochronology -- has long been a particular fetish of the study of Northern Renaissance art. The insights onto the artistic process these methods offer are indisputable. Yet aside from verifying (or undermining) claims to age, authorship, or condition of old artworks, it remains extremely unclear to many scholars what motives scientific examination -- in many respects a solution without a clear problem -- are addressing. Worse, such investigations often seem like advocacy for inferences of artistic intention -- a concept viewed with skepticism by many historians today. Theory's "return to the object" turn in art history (a maneuver, since the 1980s, often rooted in Northern artworks) has showed possibilities, but also limitations. Durability -- the reigning dictate of many early objects -- poses specific challenges to narratives privileging stories of rupture. Topics include: alchemy, the studio, early atomistic theories, restoration, animation, authenticity, faktura, and "science."

Class Format: seminar

Requirements/Evaluation: active participation, short presentations; final paper

ARTH 540 (F) In Vinculus Invictus: Portraits in Prison
Among all the portraits that European art has produced during the modern period, some have been painted or more recently photographed in prison. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, at worst outrageous and provocative. But there is, indeed, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of prison changed. It became a tragic symbol of the political "debates." Prison became the arena for a new martyr, one that endures for ideas or simply to be
born. The portrait in prison was a way to commemorate not a disgrace or an infamy, but a glory and a moment of virtue. Within a few years, a terrifying series of portraits appeared. They would nurture Western political thought and visual culture until now. Portraits in prison are at a crossroad of politics, law, art and identity; they offer a great opportunity to think about art and society. This course will explore the topic throughout the modern period until the contemporary period.

ARTH 541 (F) Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory—the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

ARTH 542 (F) Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980

The use of the body—be it the artist's or those of willing and unwilling participants—is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

Class Format: seminar

Requirements/Evaluation: active participation and weekly assignments, leading class discussion, three short responses, and final research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
ARTH 543 (S)  Global Conceptualism, 1962-Now

Since its emergence in the early 1960s, conceptual art has come to circumscribe a vital, ubiquitous, and widely adaptable category within contemporary art discourse, defining myriad artistic and curatorial practices as well as shaping art-historical inquiry. Naming one’s practice as ‘conceptual,’ (if you are an artist), or doing the work of ‘conceptualizing’ art’s place in the world (if you are a writer/curator/historian) became common parlance more than four decades ago, and is arguably still the most pervasive single term in use today across the many arms of the global contemporary art world. Conceptual art also encompasses an enormous diversity of materials and practices, spanning traditional media, time-based media, installation, performance, and hybrid combinations thereof. What is conceptual art? Is it art that appropriates the tools and systems of the administration of capital, or of kitsch and mass culture? Does it involve the aestheticization of labor? The dematerialization of the art object? Collaborative practice? Must it look a certain way to be conceptual art? Is needing to look a certain way precisely what conceptual art is not? As the category gains popularity and absorbs more and more possibilities into its ranks, the question quickly becomes, not what is conceptual art, but what isn’t it? This graduate seminar will study the means, methods, and assumptions of art historical inquiry toward the development and sustainability of the category ‘conceptual art,’ from 1962 (the agreed-upon birthdate of the movement, by the estimation of many critics) onward. We will explore global and transnational sites, histories, traditions, and geographic networks beyond the Euro-American canon of conceptualism in order to approach global contemporary art and politics with an expanded set of terms and references. Ultimately, we will seek to understand the challenges and possibilities of re- and de-narrating the histories of modern and contemporary culture from the perspective of “the concept,” or “the idea,” as opposed to the material, formal, and geographic categories that currently construct and demarcate the field.

Class Format: seminar
Requirements/Evaluation: oral presentations, research papers, short writing assignments

ARTH 544 (S)  Women Artists in Paris, 1850-1900  (WI)

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

Class Format: seminar
Requirements/Evaluation: seminar presentations and research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: preference given to graduate students and then to senior Art History majors
**ARTH 547 (S)  The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century & Beyond**

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?—What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such questions across three historically, psychologically, and topologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

Class Format: seminar

Requirements/Evaluation: presentations, research paper

**ARTH 549 (S) Early Modern Transmissions**

Through analyses of networked objects and people in what has come to be seen as an increasingly globalized early modern world, we have become more cognizant of the ways in which compositions and subject matter of paintings circulated through the medium of reproductive print; manuals meant to be followed to the letter were adapted for foreign audiences; and ideas were disseminated in book form, either through the open market or in banned publications. But is it enough to track the movement of people, ideas, and objects? And what did it mean to transmit information—whether it be visual, material, or theoretical—across media, languages, continents, or religions in the early modern period? Our goal will not be to map the physical movements of (art) objects or individuals, but rather to query what is gained, lost, or altered beyond recognition when things are transmitted over time and space. The scope of this seminar will span roughly the sixteenth to eighteenth centuries—thus the systematization of academic and artistic training and the Scientific Revolution, to the Enlightenment and, consequently, accelerated imperial expansion. Our discussions will center on readings and case studies drawn from the visual arts (such as the reproduction of Albrecht Dürer's woodblock prints on Italian maiolica); mechanical arts (the European mechanization of ancient Chinese timekeeping technology); natural philosophy (the continental reception of Isaac Newton's Opticks); and intellectual history more generally (for instance, the project of translating and adapting William Chambers' Cyclopaedia for a French audience) and the terrain covered will include European encounters with the Americas, the Ottoman Empire, and Asia.

Class Format: seminar

ARTH 554 (S)  The Matrix and the Market: Printmaking and Photography in the Nineteenth Century
During the last half of the 19th century, technical, commercial, and aesthetic approaches to printmaking and photography experienced dramatic paradigm shifts. Etching, for example, simultaneously functioned as a reproductive medium and one that carried experimental, vanguard associations. Practitioners of lithography strove to distance themselves from denigrating commercialism and raise the medium's status to a respected art form. Photography, in turn, negotiated the boundaries between "documentary" and "artistic." This seminar will address the complex issues that swirled around printmaking and photographic matrices, critical responses to the various processes, artist-driven initiatives, and the formative role of the art market and book trade in shaping popular opinion. We will consider these topics across political and geographic borders from Europe to the United States, reading both primary and secondary sources. The class will be held in the new Manton Study Center for Works on paper with visits to Chapin library and the Williams College Museum of Art likely.

Class Format: seminar

Requirements/Evaluation: students will be responsible for readings and involved class discussion; several short and one long presentation; and a final paper (20-25 pages)

Enrollment Limit: 12

Enrollment Preferences: Graduate Program students and then to senior Art History majors

ARTH 562 (F)  Art of California: Pacific Standard Time (WI)
Crosslistings: LATS462 / AMST462 / ARTH562 / ARTH462

Secondary Crosslisting
In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a

ARTh 567 (F) What is Art Criticism? Current Debates, Past Precedents
Taking as its point of departure recent debates concerning a purported "crisis" of art-criticism, this seminar considers traditions of writing about the work of living artists in modernity. We will begin with current literature and then pivot back to the eighteenth century, tracing a sequence of episodes in art criticism's evolution as a genre by looking at key works of art as mediated by their first critics. Emphasis will be placed on close readings of primary historical texts as prompts for thinking through the following broad questions, among others: What is critique, and what is art criticism? Is the art critic a judge, a historian, a partisan, a participant, or an artist in her own right? How do forms of distribution impact the content of art criticism, and how does art criticism impact the form and content of art? What is the relationship, if any, between taste, assessment of value, and interpretation of meaning? Artists considered include, among others, Boucher, Friedrich, Whistler, Seurat, Pollock, Piper.

Class Format: seminar

Requirements/Evaluation: two short writing assignments, twenty page final paper

ARTh 573 (S) Modern and Contemporary Art from the Middle East and North Africa
This is an exciting time for art from the Middle East and North Africa. Contemporary artists are exhibiting in international shows and biennales, and the global art market has responded to collector interest and crowned its favorites. The visibility and celebration of these artists, however, does not take into account the larger historical arena of cultural production and artistic practice from which they emerge. In terms of the discipline of art history, the field of modern painting and contemporary visual practice in the region is in its first generation of formation and definition. Drawing on very recent
scholarship in art history and visual anthropology, we will explore the "history" of modern and contemporary art in the Middle East and North Africa (from the 1920s-the present). We will pay particular attention to how key terms and categories such as: modern, contemporary, Islamic, and Arab, have been constructed, deployed and debated by artists, institutions and scholars in the field. We will explore the role of museums, art schools, archives and biennales in the region, the creation of art publics and communities, and how the international market has responded to contemporary production. And perhaps most importantly, we will study work by artists that identify with the region and engage and complicate constructions of race, gender, religion, environment, autonomy and community.

Class Format: seminar
Requirements/Evaluation: short response essays and a culminating research paper
Enrollment Preferences: graduate program students and then senior Art History and Arabic Studies majors
Distributions: (D1)

ARTH 575 (F) Regression as Modern Fantasy: Archaism, Primitivism, Prehistory
This course analyzes the implications of European modernity's engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

Class Format: seminar
Requirements/Evaluation: seminar presentations, research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced undergraduate students

ARTH 586 (F) Japanese Popular Visual Culture
Crosslistings: COMP186 / ARTH586 / ARTH286 / ASST186
Secondary Crosslisting
The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

Class Format: lecture/discussion
Requirements/Evaluation: attendance, participation, two 5-page papers, final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 35
Enrollment Preferences: students majoring or considering a major in a related discipline
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST

ARTH 587 (S)  Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture
A year after MoMA elevated machinery to high art in 1934, Grant Wood painted Death on The Ridge Road (Williams College Museum of Art), a depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's Death and Disasters series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

Class Format: seminar
Requirements/Evaluation: oral presentations and written assignments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: grad students, then advanced undergrad art history majors

Asian American Studies is an interdisciplinary field of study that examines the histories, literatures, cultures and lived experiences of people of Asian descent living in the Americas. This field of study holds an important role in exploring not only the Asian American experience as framed within the larger intellectual inquiries of race and ethnicity in national and global contexts but also issues of transnationality and diaspora.

Williams College is yet to build an Asian American Studies concentration or program. Before that happens, students interested in Asian American Studies can take the following courses related to Asian American Studies located in several different academic units. Students are strongly encouraged to take courses on Race, Ethnicity, and Diaspora in American Studies. Students interested in various disciplines about Asia (e.g. anthropology, art, history, literature, linguistics, music, religion, political science, sociology etc.) can take courses in Asian Studies.

In Fall 2018, the Curricular Planning Committee (CPC) is going to form an Asian American Studies Working Group to discuss the possibility of establishing an Asian American Studies concentration or program at Williams. Students interested in pursuing a concentration or major in Asian American Studies should consult with the faculty members of the CPC Asian American Studies Working Group.

**Offered 2018-19**

AMST 125 (F) Introduction to Asian American Studies
AMST 239 (S) Asian American and Pacific Islander Sporting Cultures
DANC 214 (S) Asian-American Identities in Motion: Global Approaches to Dance
HIST 284 (S) Introduction to Asian American History
HIST 380 (F) Comparative American Immigration History
HIST 468 (S) Race, Empire, and the Birth of the American Century
WGSS 119 (S) Asian American Femininities
Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Asian Studies Major

Asian Studies is a multi-disciplinary and interdisciplinary major track that combines the humanities and social sciences with language study. It aims to help students develop practical proficiency in an Asian language and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of Asia through a particular disciplinary lens. Beyond training in the discipline they choose for their three-course disciplinary qualification, students have the opportunity to explore a range of other disciplinary approaches and perspectives.

Majors in Asian Studies will:

- Attain a practical proficiency in an Asian language (either Chinese or Japanese currently offered by the department, or Hindi or Korean, offered by the Critical Language Program of the Center for Foreign Languages, Literatures, and Cultures)
- Gain awareness and understanding of a particular country or region in Asia through training in one of the disciplines represented in the Department of Asian Studies (anthropology, art history, economics, history, linguistics, literature, music, political science, religion, or sociology).
- Have an opportunity to explore a range of disciplinary approaches and perspectives in addition to their primary disciplinary focus and apply a range of research methodologies with a focus on interdisciplinarity.
- Develop close reading, analytical writing, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Gain a comparative perspective on issues affecting Asia as a region.
- Develop global awareness and engagement through identification of the values, perspectives, and practices of Asian societies, both past and present.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as
follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Asian Studies are indicated below:

**Asian Studies Major**

- Three-course qualification in one of the disciplines represented within Asian Studies (anthropology/sociology, art history, economics, history, linguistics, literature, music, political science, religion). The qualification, to be determined through consultation between students and their advisor, normally includes an introductory course and more advanced courses. At least two of these three courses must be on Asia.

- Three approved electives, which may include further language work.

**STUDY ABROAD**

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

**FAQ**

- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

- Can your department or program typically pre-approve courses for major/concentration credit?
  
  Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  
  Course title and description, complete syllabus including readings/assignments, and exams or other written work.

- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
  
  Yes, maximum of four courses.

- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  
  Approved courses only.

- Are there specific major requirements that cannot be fulfilled while on study away?
  
  No.

- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
  
  Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
  
  There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

**THE DEGREE WITH HONORS**

Students interested in writing an honors thesis in Asian Studies should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.
Students admitted to the program should register for ASST 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT
The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

ASST 103 (F) By Land and Sea: Art, Culture and Religion Along the Trade Routes of Asia
Crosslistings: ARTH103 / ASST103
Secondary Crosslisting
This undergraduate Asian art and architecture survey course will focus on artistic, religious, and cultural exchange along the two major trading networks connecting Asia: the Silk Road and the South East Asian sea routes. Following the spread of religious ideas across these routes, the survey will examine art forms including textiles, manuscripts, paintings, luxury items and sculpture, as well as architectural examples. The three major religions and their artistic expressions that will be explored in class are Buddhism, Hinduism and Islam. An underlying theme in class will be to study the spread and evolution of artistic styles and iconography across Asia, while also highlighting the continuation of local traditions that persisted despite outside influences.

Class Format: lecture
Requirements/Evaluation: three 15-minute quizzes, two 2-5 page papers, a mid-term, a final exam and class attendance

ASST 115 (S) The World of the Mongol Empire  (WI)
Crosslistings: ASST115 / HIST115
Secondary Crosslisting
By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, disintegration, and legacies for later periods. From a wide range of primary and secondary sources, including travelers' accounts, chronicles, art, and literature, we will investigate the diverse experiences of the Mongol world in different places, such as China, Russia, Persia, and Central Asia.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, several short papers, and a final research paper
Extra Info: not available for the fifth course option

ASST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis  (WI)

Crosslistings: HIST117 / GBST117 / ASST117

Secondary Crosslisting

Bombay or Mumbai is India’s foremost urban center and is well known today as a truly global city. It is the heart of India’s commercial life comparable in vibrancy and multiculturalism with the world’s emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India’s most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Class Format: seminar

Requirements/Evaluation:  assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

ASST 121 (F) The Two Koreas  (WI)

Crosslistings: HIST121 / ASST121

Secondary Crosslisting

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Class Format: tutorial

Requirements/Evaluation:  students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites:  first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

ASST 122 (S) Old Shanghai, New Shanghai (WI)
Crosslistings: ASST122 / CHIN422

Secondary Crosslisting

Once nicknamed as "Paris of the East," Shanghai, now a megalopolis with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China's modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghais: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). The course is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Class Format: tutorial

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none for students taking ASST 122T; CHIN 402 or permission of the instructor for students taking CHIN 422T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors

ASST 126 (S) Musics of Asia
Crosslistings: ASST126 / MUS112

Secondary Crosslisting

This course offers an introduction to the great diversity of Asian music. Our survey will span from East Asia (China, Korea, and Japan) to Southeast Asia (Thailand and Indonesia) to the Indian subcontinent, Central Asia (Tibet and Afghanistan), to the Middle East (Iran and the Arabian peninsula),...
and will end with the extension of Asian music across North Africa and into Eastern Europe. Within this broad survey, we will focus on selected and representative musical cultures and genres. In each section of the course, aspects of cultural context (including music's function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical musics of these cultures, we will also briefly consider the current musical scene. Encounters with this music will include attendance at live performances when possible.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on four tests and two papers

**ASST 207 (F)  An Exploration of Japanese Language and Culture**  (WI)
Crosslistings: ASST207 / JAPN407

Secondary Crosslisting

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective Japanese, Chinese, and Asian Studies majors

**Expected Class Size:** 10

**Department Notes:** students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST or JAPN

China expanded from scattered Neolithic settlements to become one of the world's most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the "early modern" seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the
reinterpretation of Confucian thought, the transmission of Buddhism, the conquest of China proper by "barbarian" peoples, the composition of elites, and change in daily life, popular culture and China's place in the East Asian and world systems.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, a midterm, and a self-scheduled final exam

ASST 213 (S) Modern China, 1600-Present
Crosslistings: ASST213 / HIST213

Secondary Crosslisting
Observers may be struck by the apparent contradictions of contemporary China: market reforms undertaken by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course will examine China's historical engagement with the modern world in order to gain perspective on our current views. It will cover the Qing (1644-1911) dynastic order, encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, the "other Chinas" of Taiwan and Hong Kong, economic liberalization, and globalization.

Class Format: lecture/discussion

ASST 217 (S) Early Modern Japan
Crosslistings: HIST217 / ASST217

Secondary Crosslisting
Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 40
ASST 218 (S) Modern Japan
Crosslistings: ASST218 / HIST218
Secondary Crosslisting
Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese from politicians and intellectuals to factory workers and farmers have understood, instigated, and lived the upheavals of the past century and a half. We will ask why a modernizing revolution emerged out of the ashes of the early modern order; how Japan's encounters with "the West" have shaped the country's political and cultural life; what democracy and its failures have wrought; how world war was experienced and what legacies it left in its wake; how national identity has been constructed and reconstructed; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual tracts, fiction, films, and oral histories.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper
Extra Info: may not be taken on a pass/fail basis

ASST 219 (S) Japanese Culture and History from Courtiers to Samurai and Beyond
Crosslistings: HIST219 / ASST219 / JAPN219 / COMP229
Secondary Crosslisting
This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 40
Enrollment Preferences: students majoring or considering a major in a related field

ASST 221 (F) The Making of Modern South Asia: 1750-1950 CE
Crosslistings: GBST221 / ASST221 / HIST221

Secondary Crosslisting
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; open to all

ASST 222 (S) History and Society in India and South Asia: c. 2000 to 1700s CE
Crosslistings: HIST220 / ASST222

Secondary Crosslisting
This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers and presentation, 2 essays, a mid-term and a final exam

ASST 233 (S) Spiritual Crossroads: Religious Life in Southeast Asia
Crosslistings: ANTH233 / ASST233 / REL253

Secondary Crosslisting
No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Class Format: seminar
Requirements/Evaluation: midterm, short essays, term paper

ASST 243 (F) Red Chamber Dreams: China's Greatest Novel as Literature and Legacy
Crosslistings: ASST243 / COMP245

Secondary Crosslisting
The eighteenth-century novel Dream of the Red Chamber, also known as Story of the Stone, is widely regarded as China's greatest novel due to the intricacy of its narrative and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. We will read the novel through a variety of critical approaches, addressing it both as a work of literature
and as a cultural phenomenon.

**ASST 244 (S) Mind and Persons in Indian Thought**

Crosslistings: ASST244 / REL244

**Secondary Crosslisting**

In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** full attendance and participation, three short essays (6 pages)

**Prerequisites:** prior exposure to Buddhism or philosophy, or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** selection based on the basis of relevant background

ASST 246 (F) India’s Identities: Reproducing the Nation, Community and Individual (WI)
Crosslistings: ANTH246 / ASST246 / WGSS246 / REL246
Secondary Crosslisting
This course considers India’s contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India’s growing population so often described in terms of multiple identities or fragmenting oppositions -- Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2003, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and caste intersect to produce a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media.

Class Format: tutorial

ASST 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia
Crosslistings: REL250 / ASST250
Secondary Crosslisting
In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons--stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others.

Class Format: lecture/discussion
Requirements/Evaluation: active participation, short writing assignments, midterm, and a self-scheduled final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Religious Studies and Asian Studies majors
Expected Class Size: 20
Distributions: (D2)
ASST 253 (S) Love and Death in Modern Japanese Literature
Crosslistings: ASST253 / COMP255

Secondary Crosslisting

One thing that surprises many first-time readers of modern Japanese fiction is its striking similarity to Western fiction. But equally surprising are the intriguing differences that lie concealed within that sameness. This course investigates Japanese culture and compares it with our own by reading Japanese fiction about two universal human experiences--love and death--and asking what inflections Japanese writers give these ideas in their work. The course begins with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and that still feature prominently in Japanese popular culture, from comics to TV dramas. From there we move on to novels and films that examine a range of other relationships between love and death, including parental love and sacrifice, martyrdom and love of country, sex and the occult, and romance at an advanced age. We will read novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima as well as more contemporary fiction by writers like Murakami Haruki; we will also look at some visual literature, including puppet theater, comics, animation, and Japanese New Wave film. The class and the readings are in English.

Class Format: seminar/lecture/discussion
Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; no familiarity with Japanese language or culture is required
Enrollment Limit: none
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST

ASST 254 (S) The End of the World in Japanese Literature and Visual Culture
Crosslistings: COMP264 / ASST254

Secondary Crosslisting

From the endemic warfare of the medieval era to the atomic bombing and the violent explosion of technology in the last century, the end of the world is an idea which has occupied a central place in almost every generation of Japanese literature. Paradoxically, the spectacle of destruction has given birth to some of the most beautiful, most moving, and most powerfully thrilling literature in the Japanese tradition. Texts may be drawn from medieval war narratives like The Tale of the Heike; World War II fiction and films by Ibuse Masuji, Imamura Shôhei, and Ichikawa Kon; fantasy and science fiction novels by Abe Kôbô, Murakami Haruki and Murakami Ryû; and apocalyptic comics and animation by Oshii Mamoru, Ôtomo Katsuhiro, and others. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Class Format: lecture/discussion
Requirements/Evaluation: in-class exam, ungraded creative project, and a few short response assignments, plus two 5- to 7-page papers emphasizing original, creative readings of the literary texts
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 25
Enrollment Preferences: students majoring or considering a major in a related field
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: GBST East Asian Studies Electives
ASST 255 (S)  Buddhism: Ideas and Practices
Crosslistings: REL255 / ANTH255 / ASST255

Secondary Crosslisting
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: lecture/discussion
Requirements/Evaluation: full attendance and active participation; two essays
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none

ASST 256 (F)  Buddhism, Sex, & Gender: #MeToo Then and Now  (DPE) (WI)
Crosslistings: ANTH256 / REL256 / WGSS256 / ASST256

Secondary Crosslisting
This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Class Format: seminar
Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors
Expected Class Size: 15
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality. WI: Class is WI because of its reading responses, in-class writing, a final research paper, and required writing chats with the instructor where we identify patterns, strengths, and weaknesses in student writing.

ASST 266 (F)  Confession and Deception in Japanese Literature
Crosslistings: ASST266 / COMP266
Secondary Crosslisting
Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth-and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.
Class Format: seminar
Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; no familiarity with Japanese language or culture is required

Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: GBST East Asian Studies Electives
Not offered current academic year

ASST 269 (S)  Mindsight: Mindfulness and Medicine  (DPE) (WI)
Crosslistings: REL269 / ASST269 / ANTH269
Secondary Crosslisting
This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our
understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the ‘kindness curriculum’ in schools, and other areas of applied research on mindfulness that have generated a ‘science of personal transformation’. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Class Format: tutorial

Requirements/Evaluation: weekly papers, 4- to 8-pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class fulfills the DPE requirement because it will explore the ways that stress related to poverty, social inequality, and structural violence can and have been alleviated by mindfulness-based practices. Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. WI: This course is a tutorial and there will be weekly writing assignments.

ASST 270 (S) Japanese Art and Culture

Crosslistings: ARTH270 / ASST270

Secondary Crosslisting

This course is a survey of traditional Japanese painting, sculpture, architecture, woodblock prints, and decorative arts. Special attention will be paid to the developments in artistic style and subject matter in the contexts of contemporary cultural phenomena. Through visual analysis students learn the aesthetic, religious, and political ideals and cultural meanings conveyed in the works of art. Course highlights include the transmission of Buddhism and its art to Japan; Zen Buddhism and its art (dry gardens; temples; and tea ceremony related art forms) in the context of samurai culture; the sex industry and kabuki theater, their art, and censorship; and the Western influences on Japanese art and culture and vice versa, (Japanese woodblock prints’ impact on Impressionist and Post-Impressionist paintings, for example).

ASST 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

Secondary Crosslisting

“Ghosts and monsters” (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval
East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference
Expected Class Size: 15
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL, ASST or WGSS; meets Division 1 requirement if registration is under COMP

ASST 272 (S) Art of the Noble Path: Buddhist Material Culture Across Asia
Crosslistings: ARTH272 / REL272 / ASST272
Secondary Crosslisting

Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion¿s social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Class Format: lecture
Requirements/Evaluation: 3 fifteen-minute quizzes, 1 three to five-page paper, 1 eight to ten-page paper, a midterm, and a final exam
Extra Info: meets Division 1 requirement if registration is under ARTH or ASST; meets Division 2 requirement if registration is under REL
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 25

ASST 274 (S)  Chinese Calligraphy: Theory and Practice
Crosslistings: ASST274 / ARTH274 / ARTS274

Secondary Crosslisting

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos “beauty” + graphe “writing”). This course can be taken as either an Art History or a Studio Art course.

Class Format: lecture/studio instruction
Requirements/Evaluation: weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening
Prerequisites: none
Enrollment Limit: 12
Department Notes: this course can count toward the Art History or Studio major
Materials/Lab Fee: lab fee TBD will be added to the student's term bill
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: ARTH pre-1600 Courses;  EXPE Experiential Education Courses;  GBST East Asian Studies Electives

ASST 278 (S)  Buddhist Material Culture: Objects of Practice and Merit (DPE)
Crosslistings: REL278 / ASST278
Secondary Crosslisting

What is material culture? What is considered Buddhist material culture? If Buddhism is a tradition that encourages non-attachment, then what is meant by "Buddhist material culture"? Shouldn't Buddhists be "free" from material things? Is it necessary for a Buddhist to be free from material things or rather that material things should be free from Buddhists? This course will introduce students to a material culture approach to the study of religion, which acknowledges the agency of not only humans but also the agency of objects/things/stuff, and it emphasizes relationships and networks between people and things. The course will begin with basic foundational theories that make up the burgeoning field of "material culture" within Religious Studies. We focus on various relationships: “internal” (our body and senses in relation to things) and “external” (things themselves, and their connections to other things). We will learn about these relationships by looking closely at Buddhist "stuff" and investigating what such relationships can tell us about Buddhism. Things act upon us, and we (re)act upon them. They shape identity, create meaning, and maintain relationships. We will learn that things are never just things. They help us better understand what people do in Buddhism, not just what people believe. In a nutshell, this course is about the "social life of [Buddhist] things". For students without a background in Buddhism, this course will introduce them to Buddhism as lived in China, Korea, Japan, Tibet, and particularly Southeast Asia.

Class Format: seminar
Requirements/Evaluation: Attendance and active participation: 15%; Short Writing Assignments, 8 total (1 page): 25%; Midterm Exam (in-class): 25%; Group Presentation of Object: 35%
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion and Asian Studies majors
Expected Class Size: 10
Distributions: (D2) (DPE)
Distribution Notes: DPE: The material world of contemporary Buddhism is often condemned for "adulterating" “real” Buddhism because it does not
fit stereotypical buzzwords like tranquil, austere, non-commercial. Yet, materiality is essential to Asian Buddhist practitioners, who are the 90%. Students will hone skills to seek the unseen by tracing networks of a New Materialism approach, which can reveal relationships that demonstrate power struggle and inequality, even within a "loving-kindness" tradition like Buddhism.

**ASST 284 (S) Introduction to Asian American History**  (DPE)
Crosslistings: HiST284 / AMST284 / ASST284

**Secondary Crosslisting**
This course covers the immigration of Asian to the U.S. from the 1850s to the present and the lives of both immigrants and their descendants. Possible topics are the Chinese Exclusion Act, the incarceration of Japanese Americans during WWII and the arrival of Vietnamese to the U.S. after the war in Viet Nam.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** a series of short essays and a final oral history/family history

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first come, first served

**Expected Class Size:** 25

**Distributions:** (D2) (DPE)

**Distribution Notes:** DPE: This course traces the immigration history of various peoples from Asia to the U.S. from the 1850s to the present. We will focus on the legal barriers to Asian American immigration and citizenship that reveal the racial, class, gender, and religious biases against people from that part of the world. By examining these issues, we will see an unequal balance of power as well as the various ways Asian immigrants resisted American immigration laws and would eventually build communities in many parts of the U.S.

ASST 312 (F) The Mughal Empire: Power, Art, and Religion in India
Crosslistings: ASST312 / HIST312 / GBST312 / REL312

Secondary Crosslisting
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Class Format: seminar

ASST 316 (S)  Feeling Queer and Asian

Crosslistings: ASST316 / WGSS316 / COMP313

Secondary Crosslisting

This advanced undergraduate seminar focuses on concepts, queries, and methodologies at the intersections of Asian Americanist critique, queer theory, and affect theory. How might we come to understand Asian gender, sexuality, and racialization less through a language of being or meaning, as through feeling? How do Asian/American discourses rely upon languages of gender and sexuality, and how might queerness depend upon Asianness? How might these theories identify, complicate, and call forth more expansive or alternative practices of belonging? The class will read theories including national abjection, racial melancholia, disaffection, queer diaspora, and homonationalism, as well as engage Asian American literatures.

Class Format: seminar

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 12

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under WGSS or ASST; meets Division 1 requirement if registration is under COMP

ASST 319 (F)  Gender and the Family in Chinese History

Crosslistings: ASST319 / HIST319 / WGSS319

Secondary Crosslisting

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China.

Class Format: lecture/discussion
ASST 321 (F)  History of U.S.-Japan Relations
Crosslistings: ASST321 / HIST321

Secondary Crosslisting
An unabating tension between conflict and cooperation has been an undercurrent of U.S.-Japan relations for over 150 years, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. Topics will include early U.S.-Japan encounters; the rise of both countries as imperial powers; the road to, and experience of, World War II; the politics and social history of the postwar American occupation of Japan; the U.S.-Japan security alliance; trade relations; and popular culture. Contemporary topics will also be discussed.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper
Prerequisites: none; open to first-year students with instructors permission
Enrollment Limit: 25

ASST 341 (S)  Caste, Race, Hierarchy
Crosslistings: ASST341 / AFR341 / ANTH341 / GBST341

Secondary Crosslisting
Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or “untouchable,” backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar
Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
ASST 346 (S) Islam and Anthropology
Crosslistings: REL346 / ANTH346 / ASST346 / ARAB280

Secondary Crosslisting
If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional "object" of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct "ideal-type" models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.

Class Format: seminar
Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB
Not offered current academic year

ASST 376 (S) Zen Buddhist Visual Culture: The Path to Nirvana (WI)
Crosslistings: ARTH376 / REL252 / ASST376

Secondary Crosslisting
This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: lecture/class discussion
Requirements/Evaluation: class discussions and participation; oral presentations, short papers; and a research paper
Enrollment Limit: 10
Enrollment Preferences: sophomores, juniors and seniors
Expected Class Size: 8
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or ASST; meets Division 2 requirement if registration is under REL
Attributes: ARTH pre-1600 Courses;

Spring 2019
ASST 384 (F)  Selected Topics in Asian American Studies
Crosslistings: ASST384 / HIST384

Secondary Crosslisting
Assuming some previous knowledge of Asian American history, this course will examine a number of specific topics in Asian American Studies. Using historical sources, monographs, graphic memoirs, novels, and films, potential topics include Asians of mixed race, Orientalism, adoption, food culture, the "model minority," legal studies, Asian Americans and the environment, and the impact of war on Asian American history.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on a series of writing assignments: four short response papers, two 5- to 7-page essays, and a 10- to 15-page research paper
Prerequisites: none; open to all
Enrollment Limit: 25
Expected Class Size: 10-15

Not offered current academic year

ASST 389 (S)  The Vietnam Wars
Crosslistings: HIST389 / LEAD389 / ASST389

Secondary Crosslisting
This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Class Format: seminar
Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper
Prerequisites: none; open to all
Enrollment Limit: 25
Expected Class Preferences: History and Asian Studies majors
Expected Class Size: 15-20

ASST 391 (S)  When India was the World: Trade, Travel and History in the Indian Ocean
Crosslistings: GBST391 / HIST391 / ASST391

Secondary Crosslisting
What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of
the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Class Format:** seminar

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

**ASST 413 (S) History of Taiwan (WI)**

Crosslistings: ASST413 / HIST481

**Secondary Crosslisting**

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

**ASST 415 (S) Gods and Kings: Historical Narratives from India (WI)**

Crosslistings: COMP415 / ASST415 / HIST415
India’s long history with earliest written records going back to 2000 B.C presents multiple challenges that are unique among the ancient civilizations. The critical challenge is conceptual: how do we recognize the historical sense of societies whose past is recorded in ways that are different from European conventions? British rulers claimed that India had no sense of history before the colonial period. And this view has persisted despite recent scholarship that has undermined the factual and conceptual basis of this theory. The purpose of this course is two fold: first, to discuss the analytical methods one could apply to understand the 'history' contained in the diverse body of classical Indian literature; second, to study a representative set of primary sources that belong to the distinct historical traditions of India. Students will learn to apply these methods to gain new insights and debate the limitations of the approach. The course will begin with an exploration of the epic tradition and continue with in-depth readings of narratives from other important genres including popular bardic accounts, royal biographies and court dramas ranging from c. 1000 BCE to 1500 CE.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, several short papers and a substantial final paper based on primary sources

ASST 460 (S) Economic Development of China

Crosslistings: ASST460 / ECON460

Secondary Crosslisting

This course is an introduction to the economic development of China in the post-1978 period. It seeks to provide an overview of the process by which China grew from an economic backwater to the second largest economy in the world, with a particular focus on rural development and the growing gap between rural and urban incomes; human capital and education; and health and gender in the Chinese context. In addition, the course has the goal of familiarizing students with current economics research on Chinese topics and enabling them to be informed consumers of this research.

**Class Format:** seminar

ASST 488 (S) Gandhi: Nationalism, Philosophy, and Legacy (WI)

Crosslistings: HIST488 / ASST488 / GBST488 / REL388

Secondary Crosslisting

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or
Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Class Format:** tutorial; students will meet with the instructor each week for one hour sessions in pairs

**Requirements/Evaluation:** 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Chinese Major

Consisting of a core language curriculum and a variety of courses in the various disciplines represented in the department, the Chinese major track enables students to achieve proficiency in aural comprehension, speaking, reading, and writing in Mandarin Chinese, as well as to understand the cultural traditions and diversity of the Chinese-speaking regions in the world. Majors in Chinese are expected to function as responsible global citizens, able to use the Chinese language to interact and collaborate in their community and the globalized world, while remaining keenly aware and respectful of varying cultural beliefs, norms, and sensitivities.

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate-High level in writing based on the ACTFL proficiency guidelines.
- Understand the basic grammar and vocabulary of Classical Chinese.
- Master intercultural skills to competently navigate a wide range of social and cultural contexts.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Acquire research, problem-solving, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as
One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Chinese are indicated below:

**Chinese Major**

- Four additional semesters of Chinese language (300-level or higher).
- One semester of Classical Chinese.
- One approved course in Chinese literature, linguistics, or culture.

**STUDY ABROAD**

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

**FAQ**

- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.
- Can your department or program typically pre-approve courses for major/concentration credit?
  - Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.
- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  - Course title and description, complete syllabus including readings/assignments, and exams or other written work.
- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
  - Yes, maximum of four courses.
- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  - Approved courses only.
- Are there specific major requirements that cannot be fulfilled while on study away?
  - No.
- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
  - Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.
- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
  - There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

**THE DEGREE WITH HONORS**

Students interested in writing an honors thesis in Chinese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.
Students admitted to the program should register for CHIN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.

**THE ASIAN STUDIES ENDOWMENT**

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

**CHIN 101 (F) Basic Chinese**

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

**Requirements/Evaluation:** evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Extra Info:** students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** none

**Expected Class Size:** 12

**Distributions:** (D1)

CON Section: 02  MWF 9:00 am - 9:50 am  Cornelius C. Kubler
CON Section: 03  MWF 10:00 am - 10:50 am  Cornelius C. Kubler

**CHIN 102 (S) Basic Chinese**

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

**Requirements/Evaluation:** evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Extra Info:** students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** CHIN 101 or equivalent

**Enrollment Limit:** none

**Expected Class Size:** 12

**Distributions:** (D1)
CHIN 131 (S)  Basic Cantonese

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within China has been rising steadily over the past few decades. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese and which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions and discussion

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and Asian Studies majors who have no prior background in Cantonese

Expected Class Size: 12

Distributions: (D1)

Not offered current academic year

CHIN 134 (S)  Leaving the World Behind: The Literature of Reclusion  (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Primary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, responses, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI. Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

Spring 2019
TUT Section: T1    TBA    Christopher M. B. Nugent

CHIN 140 (F)  Introduction to Traditional Chinese Literature
Crosslistings: CHIN140 / COMP140

Primary Crosslisting
With a written record stretching over 3000 years, China’s literary cultures are some of the richest and most varied in human history. Their influence continues to be felt not only in modern China, but also throughout much of the world. This course examines the origins and development of the different literatures of China from their earliest stages up until the end of the imperial system in 1911. We will read texts ranging from the Analects of Confucius to the medieval poetry of the Tang dynasty, from Buddhist sutras to plays about prostitutes and singing girls. An invulnerable monkey god may make an appearance to sow chaos as well. He’s difficult to pin down. Some important themes will include: the role of the individual versus that of the community, responses to catastrophe and disorder, the fantastic, the articulation of the self through literature, and ways of dealing with historical and literary legacies. All readings are in English translation.

Class Format: lecture
Requirements/Evaluation: five short writing assignments (2 pages each), one paper (6-7-pages), and a final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

CHIN 152 (S)  Introduction to Taiwanese/Southern Min Language and Culture
This course, which includes a required, fully-funded two-week field trip to Taipei, Quemoy (Jinmen), and Xiamen over Spring Break, constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukieneese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the major Chinese “dialects,” this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese. Required Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund.

Class Format: seminar
Requirements/Evaluation: classroom performance, homework, quizzes, tests, a journal and term paper based on the field trip, and an oral and written final exam; Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHIN 301 or permission of the instructor
Enrollment Limit: 8
Enrollment Preferences: if course is over-enrolled, students will be selected based on a statement of rationale and goals for wishing to participate, with CHIN and ASST majors receiving priority
Expected Class Size: 8
CHIN 201 (F) Intermediate Chinese
These two courses are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, and writing. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Class Format: drill/discussion/reading
Requirements/Evaluation: evaluation will be based on classroom performance, homework, daily quizzes, regular written and oral unit tests, and a final exam
Extra Info: not available for the fifth course option
Prerequisites: CHIN 102 or permission of instructor
Enrollment Limit: none
Expected Class Size: 12

CHIN 202 (S) Intermediate Chinese
These two courses are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, and writing. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Enrollment Limit: none
Expected Class Size: 12

CHIN 214 (F) Foundations of China
Crosslistings: ANTH212 / CHIN214 / REL218 / HIST214 / GBST212
Primary Crosslisting
This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script
(a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Class Format:** lecture

**Requirements/Evaluation:** short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** Chinese majors, History majors, Religion majors, and Anthropology majors

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under CHIN; meets Division 2 requirement if registration is under ANTH, REL, HIST OR GBST

**Attributes:** HIST Group B Electives - Asia

---

**CHIN 225 (F) The Fantastic in Chinese Literature**

**Crosslistings:** CHIN225 / COMP225

**Primary Crosslisting**

From the famous human/butterfly metamorphosis in the Daoist text Zhuangzi to contemporary writer Liu Cixin's award-winning "Three Bodies Problem," the "fantastic" has always been part of Chinese literature that pushes the boundary of human imagination. Readers and writers create fantastic beasts (though not always know where to find them), pass down incredible tales, assign meanings to unexplainable phenomena, and reject--sometimes embrace--stories that could potentially subvert their established framework of knowledge. Meanwhile, the "fantastic" is also historically and culturally contingent. What one considers "fantastic" reveals as much about the things gazed upon as about the perceiving subject--his or her values, judgment, anxiety, identity, and cultural burden. Using "fantastic" literature as a critical lens, this course takes a thematic approach to the masterpieces of Chinese literature from the first millennium BCE up until twenty-first century China. We will read texts ranging from Buddhist miracle tales to the avant-garde novel about cannibalism, from medieval ghost stories to the creation of communist superheroes during the Cultural Revolution. The topics that we will explore include shifting human/non-human boundaries, representations of the foreign land (also the "underworld"), the aestheticization of female ghosts, utopia and dystopia, and the fantastic as social criticism and national allegory. All materials and discussions are in English.

**Class Format:** seminar

**Requirements/Evaluation:** participation, weekly posting, 3 writing assignments, final paper, oral presentation

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Distributions:** (D1)

---

**CHIN 226 (S) Chinese Film and Its Significant Others**

**Crosslistings:** CHIN226 / COMP296
Primary Crosslisting

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film’s social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors’ notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: lecture

Requirements/Evaluation: attendance and participation, short response papers (1-2 pages each), one final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

Expected Class Size: 15

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

CHIN 227 (S) Made in China or Making “China”?: Twentieth-Century Chinese Performative Culture

Crosslistings: THEA227 / CHIN227 / COMP227

Primary Crosslisting

This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

CHIN 237 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films (WI)

Crosslistings: CHIN237 / COMP297

Primary Crosslisting
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors

Expected Class Size: 10

Distributions: (D1) (WI)

Attributes: FMST Core Courses;

Not offered current academic year

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.

All readings in English with some examples in Chinese.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D1)

Attributes: EXPE Experiential Education Courses; Linguistics

Not offered current academic year

CHIN 253 (F) "Disease" in Modern Chinese Literature and Culture

Crosslistings: WGSS255 / CHIN253 / COMP254

Primary Crosslisting

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how
metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class presentation, three short papers (3-5 pages) and one final project

CHIN 272 (S) The History and Mythology of Chinese Scripts

Crosslistings: COMP272 / CHIN272

Primary Crosslisting

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: lecture/discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

CHIN 301 (F) Upper-Intermediate Chinese

The goal of this course is to continue developing students' overall language proficiency. However, special emphasis will be on strengthening students' reading and writing proficiency in standard written Chinese, the grammar and vocabulary of which differ considerably from colloquial Chinese introduced during the first two years of instruction. Conducted in Mandarin.

Class Format: drill/discussion/reading

Requirements/Evaluation: evaluation will be based on classroom performance, short essays, homework, quizzes, tests, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D1)
CHIN 302 (S) Upper-Intermediate Chinese

The goal of this course is to continue developing students' overall language proficiency. However, special emphasis will be on strengthening students' reading and writing proficiency in standard written Chinese, the grammar and vocabulary of which differ considerably from colloquial Chinese introduced during the first two years of instruction. Conducted in Mandarin.

Class Format: drill/discussion/reading

Requirements/Evaluation: evaluation will be based on classroom performance, short essays, homework, quizzes, tests, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 301 or permission of instructor

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D1)

CHIN 312 (S) Introduction to Classical Chinese

This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D1)

CHIN 401 (F) Advanced Chinese

This course is designed to enhance the Chinese language proficiency of students who are already at relatively advanced levels. A wide assortment of materials is used including (for speaking/comprehension) audiotapes, videotapes, and films featuring Chinese speakers from various segments of society; and (for reading) newspaper and magazine articles dealing with Chinese politics and economics as well as selections from modern Chinese literature. Conducted in Mandarin.

Class Format: two 75-minute classes plus a conversation session
Requirements/Evaluation: evaluation will be based on classroom performance, short essays every other week, homework, quizzes, tests, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 302 or permission of instructor

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D1)

CHIN 413 (S) Intermediate Classical Chinese: Ideas of Authority in Classical Chinese Literature
This course builds on the foundation established in Introduction to Classical Chinese (CHIN 412) by examining longer and more complicated texts from the Warring States (403-221 BCE) and Han (206 BCE-220 CE) periods. While our focus will be on careful linguistic analysis and translation, we will also discuss these texts in terms of their philosophical ideas, rhetorical methods, and cultural and historical contexts. The works we will read include some of the foundational texts of Chinese philosophical and political thought, including the Confucian Analects, the Mencius, and the Zhuangzi. While this course is a continuation of Chinese 312, students with prior work in Classical Chinese (through study abroad, attending high school in a Chinese speaking region, etc.) are welcome as well.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 312 or prior coursework in Classical Chinese

Enrollment Limit: none

Expected Class Size: 10

Distributions: (D1)

Not offered current academic year
CHIN 420 (S)  Masterpieces in Modern Chinese Literature

"To modernize the Chinese people, it has to start from the modernization of the genre 'novel.'” Liang Qichao, the famous Chinese intellectual in the early twentieth century, envisioned a collapsing China to be salvaged by, first, its modernized literature. Indeed, throughout China’s long century of struggle, exploration, and transformation, literature has been playing a crucial role in negotiating (the consequence of) modernity, fueling revolution, investigating human interiority, constructing national identity, and coping with trauma and diaspora. This course introduces students to the masterpieces in modern Chinese literature and their representations of critical events in twentieth-century Chinese history. We will read novels, poems, prose pieces, and plays, and pay close attention to the language and literary devices that the authors use for storytelling, characterization, and self-representation. The class is organized by themes, such as, for example, modernity, revolution, diaspora, root-seeking, trauma, science fiction and so on. Through class discussions, writing assignments, and oral presentation on the final project, this course will further develop students’ language proficiency, especially reading ability and effective communication in a formal setting. This course also trains students to be a critical reader who will be able to not only analyze the key moments and literary masterworks of modern China but also reflect on the complexity of Chinese culture vis-à-vis its tradition and the global context. The class will meet in one large group meeting once a week and the second meeting will be in smaller groups. The course is conducted in Mandarin.

Class Format: lecture/discussion, the class will meet in one large group meeting once a week and the second meeting will be in smaller groups

Requirements/Evaluation: participation, presentations, quizzes, discussion questions posting, 3 writing assignments, final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

CHIN 422 (S)  Old Shanghai, New Shanghai  (WI)

Crosslistings: ASST122 / CHIN422

Primary Crosslisting

Once nicknamed as "Paris of the East," Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China’s modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). The course is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students’ schedules.

Class Format: tutorial

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none for students taking ASST 122T; CHIN 402 or permission of the instructor for students taking CHIN 422T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors

Expected Class Size: 10

Department Notes: students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T

Materials/Lab Fee: $100

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ASST or CHIN

Not offered current academic year

CHIN 425 (F) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format and collaborating with a graduate program in Chinese pedagogy in Taiwan, this course is designed to provide opportunities for Williams students to engage in direct conversation with a language partner on course assignments and for the MA students in Taiwan to gain practical training in helping non-native speakers of Mandarin Chinese develop linguistic proficiency at the levels of Advanced Low to the Advanced Mid based on the ACTFL proficiency guidelines.

Class Format: seminar; semi-tutorial format; students will meet as a large group periodically for linguistic development and two to three people groups regularly for discussions

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3-5 pages) and one final paper (5-7 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors and Chinese majors; email the instructor

Expected Class Size: 8

Distributions: (D1)

CHIN 431 (S) Introduction to Chinese Linguistics

Is Chinese—whose nouns "lack" number and whose verbs have no tense—a monosyllabic, "primitive" language? Are the Chinese characters a system of logical symbols or "ideographs," which indicate meaning directly without regard to sound? Could (and should) the characters be done away with and alphabetized? Are Cantonese, Hakka, and Taiwanese dialects or languages? And what is the relationship between Chinese, Japanese, Korean, and Vietnamese? These are some of the questions we will be taking up in this one-semester introduction to the scientific study of the Chinese language. Topics to be covered include: the phonological, syntactical, and lexical structure of Modern Standard Chinese; the Chinese writing system; the modern Chinese dialects; the history of the Chinese language; sociolinguistic aspects of Chinese; and language and politics in various Chinese-speaking societies. Readings in English and Chinese, with class discussion in Mandarin

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on classroom performance, homework, two short papers, and one longer paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 302 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: current or prospective Chinese or Asian Studies majors
Expected Class Size: 12
Distributions: (D1)

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Japanese Major

The Japanese major consists of a core language curriculum and a variety of interdisciplinary courses offered in the Asian Studies Department. In the Japanese language courses, students attain linguistic and cultural proficiency from the elementary through the advanced level. The interdisciplinary courses are designed to deepen students’ understanding of and familiarity with diversity and dynamicity in Japanese culture.

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL intermediate-high to advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Conduct research by engaging in cross-linguistic, cross-cultural, and comparative historical analysis with problem-solving and critical thinking skills.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

- One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different
from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Japanese are indicated below:

Japanese Major

- Four additional semesters of Japanese language (300-level or higher).
- One approved course in Japanese language (400-level), literature or culture.
- One approved elective on Japan.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

- Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for JAPN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.
THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

JAPN 101 (F) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer-assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, a midterm, and a final exam
Extra Info: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 15
Distributions: (D1)

CON Section: 03 MWF 10:00 am - 10:50 am Shinko Kagaya
JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Class Format: lecture

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Distributions: (D1)

Attributes: Linguistics

Fall 2018
LEC Section: 01    TF 1:10 pm - 2:25 pm     Mamoru Hatakeyama

JAPN 153 (F) Japanese Film

Crosslistings: JAPN153 / COMP153

Secondary Crosslisting

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Class Format: lecture

Requirements/Evaluation: attendance, participation, some responses, two papers (5-7 pages), test

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students majoring in a related field

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Attributes: FMST Core Courses

Not offered current academic year

JAPN 201 (F) Intermediate Japanese

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10

JAPN 223 (S) Japanese Food Culture in a Global Context
Crosslistings: COMP223 / JAPN223
Primary Crosslisting
The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.
Class Format: seminar
Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions & class presentations), and one research paper & presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 12
Distributions: (D1)
Not offered current academic year

JAPN 258 (S) Language and Literacy Development
Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Class Format: seminar
Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors
Expected Class Size: 25
Department Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under JAPN; meets Division 2 requirement if registration is under PSYC
Attributes: Linguistics

SEM Section: 01 MR 2:35 pm - 3:50 pm Kasumi Yamamoto, Mamoru Hatakeyama

JAPN 260 (F) Japanese Theatre and its Contemporary Context
Crosslistings: THEA262 / COMP262 / JAPN260

Primary Crosslisting
Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Distributions: (D1)
Attributes: GBST East Asian Studies Electives

Fall 2018
LEC Section: 01 MR 2:35 pm - 3:50 pm Shinko Kagaya

JAPN 274 (F) Confronting Japan (WI)
Crosslistings: COMP274 / JAPN274

Primary Crosslisting
This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Class Format: tutorial
Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Japanese majors
Expected Class Size: 10
Distributions: (D1) (WI)

Not offered current academic year

JAPN 276 (S) Premodern Japanese Literature and Performance
Crosslistings: COMP278 / JAPN276

Primary Crosslisting
Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts. All readings and discussions will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Distributions: (D1)
Attributes: GBST East Asian Studies Electives; PERF Interdepartmental Electives

Not offered current academic year

JAPN 301 (F) Upper-Intermediate Japanese
This course is a continuation of Japanese 201 and 202. Students will, further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes
Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 202 or permission of instructor
Enrollment Limit: none
**JAPN 302 (S) Upper-Intermediate Japanese**

This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

- **Class Format:** three 75-minute classes
- **Requirements/Evaluation:** evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
- **Prerequisites:** JAPN 301 or permission of instructor
- **Enrollment Limit:** none
- **Expected Class Size:** 10
- **Distributions:** (D1)

**Spring 2019**

LEC Section: 01   MWF 8:30 am - 9:45 am   Jinhwa Chang

**JAPN 401 (F) Advanced Japanese**

A continuation of Japanese 301 and 302, developing speaking, listening, reading, and writing skills in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

- **Class Format:** three 75-minute classes
- **Requirements/Evaluation:** evaluation will be based on daily performance, homework, quizzes and projects (presentations)
- **Prerequisites:** JAPN 302 or permission of instructor
- **Enrollment Limit:** none
- **Expected Class Size:** 8
- **Distributions:** (D1)

**Fall 2018**

LEC Section: 01    Cancelled

**JAPN 402 (S) Advanced Japanese**

A continuation of Japanese 401, developing speaking, listening, reading, and writing skills in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

- **Class Format:** three 75-minute classes
- **Requirements/Evaluation:** evaluation will be based on daily performance, homework, quizzes and projects (presentations)
- **Prerequisites:** JAPN 401 or permission of instructor
- **Enrollment Limit:** none
- **Expected Class Size:** 8
- **Distributions:** (D1)

**Spring 2019**
JAPN 403 (F) Advanced Seminar in Japanese I
This course provides advanced training in listening, speaking, reading and writing Japanese, focusing on current issues in Japan.

Class Format: three hours per week
Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes and projects.
Prerequisites: JAPN 402 or permission of instructor
Enrollment Limit: none
Expected Class Size: 5
Distributions: (D1)
Not offered current academic year

JAPN 404 (S) Advanced Seminar in Japanese II
This course is designed for advanced Japanese language students. The goal is for students to be able to carry on extended discourse--such as a discussion, a speech, or an interview--in a culturally appropriate manner; to read authentic materials with ease; and to make presentations and write research papers on issues of interest. The course will focus on current social, cultural, educational, and political issues in Japan.

Class Format: three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, and projects
Prerequisites: JAPN 403 or permission of instructor
Enrollment Limit: none
Expected Class Size: 5
Distributions: (D1)
Not offered current academic year

JAPN 407 (F) An Exploration of Japanese Language and Culture (WI)
Crosslistings: ASST207 / JAPN407
Primary Crosslisting
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T
Enrollment Limit: 10
Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors
Expected Class Size: 10

Department Notes: students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ASST or JAPN

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major (administered jointly with the Physics Department) and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students' undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

and either

Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Three 400-level astronomy courses

or

Two 400-level astronomy courses and one of the following:

Astronomy 211T Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory

Physics 411T Classical Mechanics
Physics 418 Gravity
Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
Physics 201 Electricity and Magnetism
Physics 202 Waves and Optics
Physics/Mathematics 210 Mathematical Methods for Scientists
Physics 301 Introductory Quantum Physics
Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

and either

Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. Students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples may include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysic major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
ASTR 101 (F) Stars: From Suns to Black Holes
For the new era of "multimessenger astronomy": What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently discovered "chirps" from gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and how they end their existence, will provide answers to these questions and more. The course gives special attention to the exciting discoveries of the past few years. Topics include modern astronomical instruments such as the Hubble Space Telescope, the Chandra X-ray Observatory, the Kepler, K2 and TESS missions to discover planets around other stars, the latest huge telescopes and some results from them; how astronomers interpret the light received from distant celestial objects; the Sun as a typical star (and how its future will affect ours); and our modern understanding of how stars work and how they change with time. We will also discuss how pulsars and black holes result from the evolution of normal, massive stars and how supermassive black holes lurk at the center of galaxies and quasars. We will discuss the discovery of thousands of "exoplanets" around stars other than the Sun. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 102 (solar system) and 104 (galaxies and cosmology), and students who have taken those courses are welcome. Observing sessions will include use of the 24-inch telescope and other telescopes for nighttime observations of stars, star clusters, planets and their moons, nebulae, and galaxies, as well as use of other telescopes for daytime observations of the Sun.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: evaluation will be based on two hour tests, a final exam, an observing portfolio, and lab reports

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 15

Department Notes: non-major course

Distributions: (D3)

ASTR 102 (S) Our Solar System and Others
What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same
level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

**Class Format:** lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

**Requirements/Evaluation:** evaluation will be based on two hour tests, a final exam, an observing portfolio, and lab reports

**Extra Info:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 48

**Expected Class Size:** 15

**Department Notes:** non-major course

**Distributions:** (D3)

ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger of astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey and the Dark Energy Survey are giving clues into how the Universe's currently observed structure arose. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way?; Why are quasars so luminous?; Is the Universe made largely of "dark matter" and "dark energy"?; What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

**Class Format:** lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

**Requirements/Evaluation:** evaluation will be based on two hour tests, a final exam, lab reports, and an observing portfolio

**Extra Info:** not available for the fifth course option

**Prerequisites:** none; not open to students who have taken or are taking ASTR 330

**Enrollment Limit:** 48

**Expected Class Size:** 15

**Department Notes:** non-major course

**Distributions:** (D3)

**LAB Section:** 05    W 2:30 pm - 4:00 pm     Steven P. Souza, Kevin Flaherty
ASTR 111 (F) Introduction to Astrophysics  (QFR)

How do stars work? This course answers that question from start to finish! In this course we undertake a survey of some of the main ideas in modern astrophysics, with an emphasis on the observed properties and evolution of stars; ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics, and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include radiation laws and stellar spectra, astronomical instrumentation, physical characteristics of the Sun and other stars, star formation and evolution, nucleosynthesis, white dwarfs and planetary nebulae, pulsars and neutron stars, supernovae, relativity, and black holes. We will also discuss the detections of long-sought gravitational waves: the first detection generated during the merging of two massive stellar black holes more than a billion light-years away, and, another from the merger of two neutron stars in a galaxy over 100 million light-years distant. Observing sessions include use of the 24-inch and other telescopes for observations of stars, nebulae, planets and galaxies, as well as daytime observations of the Sun.

Class Format: lecture/discussion, observing sessions, and five labs per semester

Requirements/Evaluation: evaluation will be based on weekly problem sets, two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, or concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Expected Class Size: 15

Distributions: (D3) (QFR)

ASTR 207 (F) Extraterrestrial Life in the Galaxy: A Sure Thing, or a Snowball's Chance?  (WI)

A focused investigation of the possibility of life arising elsewhere in our Galaxy, and the chances of our detecting it. In this course, pairs of students will explore the astronomical and biochemical requirements for the development of Earth-like life. We will consider the conditions on other planets within our solar system as well as on newly-discovered planets circling other stars. We will also analyze the famous "Drake Equation," which calculates the expected number of extraterrestrial civilizations, and attempt to evaluate its components. Finally, we will examine current efforts to detect signals from intelligent alien civilizations and contemplate humanity's reactions to a positive detection.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the student's papers, responses to the partner's papers, and evidence of growth in understanding over the semester; as well as improvement in speaking and writing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ASTR 111 or BIOL 101-102, CHEM 101-102, or GEOS 101 or equivalent science preparation; instructor's permission required

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, preference given to students who have had ASTR 111

Expected Class Size: 10

Distributions: (D3) (WI)

Not offered current academic year

ASTR 211 (F) Astronomical Observing and Data Analysis  (QFR)

This course will introduce techniques for obtaining and analyzing astronomical data. We begin by learning about practical observation planning and move on to discussion of CCD detectors, signal statistics, digital data reduction, and image processing. We will make use of data we obtain with our 24-inch telescope, as well as data from other optical ground-based observatories and archives. We then go on to learn about non-optical observatories, both space-based (e.g., Chandra X-Ray Observatory, Spitzer Space Telescope) and ground-based (e.g., Atacama Large Millimeter Array), and work with some of their data.

Class Format: tutorial, plus a 1-hour weekly lecture, computer lab work and observing
Requirements/Evaluation: evaluation will be based on tutorial presentations and weekly problem sets, an hour exam and observing projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 150 or 151; prior experience with Unix is helpful, but not required
Enrollment Limit: 10
Expected Class Size: 8
Distributions: (D3) (QFR)
Not offered current academic year

ASTR 240 (F) Great Astronomers and Their Original Publications (WI)
Crosslistings: ASTR240 / LEAD240 / SCST240 / HSCI240

Primary Crosslisting

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Class Format: seminar
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper
Enrollment Limit: 12
Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Distributions: (D3) (WI)
Distribution Notes: meets Division 3 requirement if registration is under ASTR; meets Division 2 requirement if registration is under HSCI, LEAD or SCST
Attributes: LEAD Facets or Domains of Leadership; SCST Related Courses;

Fall 2018
SEM Section: 01    W 1:10 pm - 3:50 pm    Jay M. Pasachoff

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves from the merging of two massive stellar black holes more than a billion light-years away, galaxies and quasars, and formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: evaluation will be based on two hour tests, a small observing portfolio, occasional quizzes, and a final exam
Extra Info: not available for the fifth course option
**Prerequisites:** none; open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors

**Enrollment Limit:** 48

**Expected Class Size:** 25

**Department Notes:** non-major course; course in the 33X sequence are meant as general education courses for students in all majors

**Distributions:** (D3)

---

**ASTR 336 (S) Science, Pseudoscience, and the Two Cultures (WI)**

Crosslistings: LEAD336 / ASTR336 / HSCI336

**Primary Crosslisting**

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in *Fads and Fallacies in the Name of Science*, and using such recent journals as *The Skeptical Inquirer* and *The Scientific Review of Alternative Medicine*, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's *Arcadia* and Michael Frayn's *Copenhagen*.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper

**Prerequisites:** none

---

**ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)**

The matter between the stars--the interstellar medium--manifests itself in many interesting and unexpected ways, and, as the detritus of stars, its properties and behavior hold clues to the history and future evolution of both stars and the galaxies that contain them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject with varying ferocity as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. The existence of life on Earth is eloquent evidence of this chemical enrichment. In
this course we will study the interstellar medium in its various forms. We will learn about many of the physical mechanisms that produce the radiation we observe from diffuse matter, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using the equipment on our observing deck.

Class Format: tutorial, plus a 1-hour weekly lecture; computer lab work and observing projects

Requirements/Evaluation: evaluation will be based on tutorial presentations and weekly problem sets, an hour exam and observing projects

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Distributions: (D3) (QFR)

Not offered current academic year

ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: lecture/discussion, three hours per week

Requirements/Evaluation: evaluation will be based on classroom participation, homework assignments, a midterm exam and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D3)

Spring 2019

LEC Section: 01 MR 1:10 pm - 2:25 pm Marek Demianski

ASTR 412 (S) Solar Physics (WI)

We study all aspects of the Sun, our nearest star. We evaluate scientific results from the total solar eclipse of August 21, 2017, the first eclipse whose totality crosses the U.S. from coast to coast since 1918 and the first to be entirely within the US since the nation's founding. In addition to discussing what has been learned about the solar atmosphere from eclipse and related space research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES16/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. As a special timely treat, we will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919 and 1922 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported in 2016 from LIGO. We also discuss our data analysis of recent transits of Mercury across the face of the Sun (most recently in May 2016) and the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble Space Telescope and from Saturn with NASA's Cassini spacecraft.
Class Format: tutorial; students will meet weekly with the professor in groups of two or three to discuss readings and make presentations, often in PowerPoint or Keynote format

Requirements/Evaluation: evaluation will be based on four 5-page papers, discussions, and presentations; students will be expected to improve their writing throughout the course, with the aid of careful editing by and comments from the professor

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ASTR 111 or a 200-level PHYS course

Enrollment Limit: 12
Expected Class Size: 6
Distributions: (D3) (WI)

ASTRONOMY (Div III)

ASTROPHYSICS

Chairs: Professor Jay Pasachoff (fall) and Professor Karen Kwitter (spring)

On leave Fall only: Professor K. Kwitter.

On leave Spring only: Professor J. Pasachoff.

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major (administered jointly with the Physics Department) and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

and either

Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Three 400-level astronomy courses

or

Two 400-level astronomy courses and one of the following:

Astronomy 211T Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory
Physics 411T Classical Mechanics

Physics 418 Gravity

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

and either

Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. Students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysic major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.
Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

ASPH 493 (F) Senior Research: Astrophysics
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

BIOCHEMISTRY AND MOLECULAR BIOLOGY (Div III)

Chair: Professor Luana Maroja

On leave Fall/Spring: Assistant Professor D. Turner.
On leave Fall only: Professor L. Banta. Associate Professors: L. Maroja.
On leave Spring only: Professors: A. Gehring, S. Swoap, T. Lebestky.

Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines have provided important insights and advances in the fields of molecular engineering (recombinant DNA technology, "intelligent" drug design, "in vitro evolution"), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationship between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the modern areas of the biochemical sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for those courses in both chemistry and biology during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to complete the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

**Required Courses**

- BIMO 321/BIOL 321/CHEM 321 Biochemistry I: Structure and Function of Biological Molecules
- BIMO 322/BIOL 322/CHEM 322 Biochemistry II: Metabolism
- BIMO 401 Topics in Biochemistry and Molecular Biology
- BIOL 101 The Cell
- BIOL 102 The Organism
- BIOL 202 Genetics
- CHEM 151 Introductory Chemistry or
- CHEM 153 Concepts of Chemistry or
- CHEM 155 Principles of Modern Chemistry
CHEM 156 Organic Chemistry: Introductory Level
CHEM 251 Organic Chemistry: Intermediate Level
CHEM 256 Advanced Chemical Concepts (not required if CHEM 155 was taken)

**Elective Courses**

Students can check with the program chair to see if other courses not listed here might count as electives.

- BIOL 301 Developmental Biology
- BIOL 305 Evolution
- BIOL 306 Cellular Regulatory Mechanisms
- BIOL 308 Integrative Plant Biology: Fundamentals and New Frontiers
- BIOL 310/NSCI 310 Neural Development and Plasticity
- BIOL 313 Immunology
- BIOL 315 Microbiology: Diversity, Cellular Physiology, and Interactions
- BIOL 319/MATH 319/PHYS 319/CSCI 319 Integrative Bioinformatics, Genomics, and Proteomics Lab
- BIOL 326 Cellular Assembly and Movement
- BIOL 406 Dynamics of Membrane Systems
- BIOL 407 NSCI 347 Neurobiology of Emotion
- BIOL 408 RNA Worlds
- BIOL 410 Nanomachines in Living Systems
- BIOL 414 Life at Extremes: Molecular Mechanisms
- BIOL 416 Epigenetics
- BIOL 418 Signal Transduction to Cancer
- BIOL 426 Frontiers in Muscle Physiology: Controversies
- BIOL 430 Genome Sciences: At the Cutting Edge
- CHEM 324 Enzyme Kinetics and Reaction Mechanisms
- CHEM 326 Chemical Biology: Discoveries at the Interface
- CHEM 338 Bioinorganic Chemistry
- CHEM 341/ENVI 341 Toxicology and Cancer
- CHEM 342 Synthetic Organic Chemistry
- CHEM 343 Medicinal Chemistry
- CHEM 344 Physical Organic Chemistry
- CHEM 348 Polymer Chemistry
- CHEM 364/ENVI 364 Instrumental Methods of Analysis
- CHEM 366 Thermodynamics and Statistical Mechanics
- CHEM 367 Biophysical Chemistry

**Colloquium Requirement**

Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. There are approximately a dozen colloquia offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement.
BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)
Crosslistings: BIOL321 / CHEM321 / BIMO321

Primary Crosslisting
This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports
Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256
Enrollment Limit: 16/lab
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size: 16/lab
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BGNP Related Courses; BIMO Required Courses;

Fall 2018

LAB Section: 02 M 1:00 pm - 4:00 pm Bob Rawle
LAB Section: 03 T 8:00 am - 12:00 pm Bob Rawle

BIMO 322 (S) Biochemistry II: Metabolism (QFR)
Crosslistings: CHEM322 / BIMO322 / BIOL322

Primary Crosslisting
This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 64

Department Notes: does not satisfy the distribution requirement in the Biology major

LAB Section: 04 R 1:00 pm - 4:00 pm Janis E. Bravo

BIMO 401 (S) Topics in Biochemistry and Molecular Biology (WI)

This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

Class Format: seminar, three hours per week

Requirements/Evaluation: evaluation will be based on class presentations and discussions, frequent short papers, and a final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 202 and BIMO 321

Enrollment Limit: 12

Enrollment Preferences: those completing the BIMO program; open to others with permission of instructor

Expected Class Size: 10

Distributions: (D3) (WI)

Attributes: BIMO Required Courses;

Spring 2019

SEM Section: 01 TR 8:30 am - 9:45 am Robert M. Savage
Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the Biology, Chemistry, Computer Science, Mathematics/Statistics, and Physics departments and was designed to provide students with an understanding of these revolutionary new areas of investigation. The introductory level courses, Computation and Biology and Statistics for Biologists are accessible to all students interested in gaining familiarity with the power of genomic analysis. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the core courses and five of the recommended courses. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.

BGNP Core Courses

**BIOL 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab** (QFR)
Crosslistings: BIOL319 / CHEM319 / MATH319 / PHYS319 / CSCI319

**Primary Crosslisting**

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** two afternoons of lab, with one hour of lecture, per week

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3) (QFR)
BGNP Recommended Courses

BIOL 202 (F) Genetics (QFR)
Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102
Enrollment Limit: none
Expected Class Size: 84
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; BIMO Required Courses;

BIOL 305 (S) Evolution (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; BIMO Interdepartmental Electives; COGS Related Courses;
BIOL 430 (F) Genome Sciences: At the Cutting Edge  (WI)
Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 202
Enrollment Limit: 10
Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course
Expected Class Size: 10
Department Notes: BIMO, BIGP; does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (WI)
Attributes: BGNP Recommended Courses; BIMO Interdepartmental Electives;
Not offered current academic year

CSCI 134 (F) Introduction to Computer Science: Objects, Events, and Graphics  (QFR)
Computing is central to many aspects of our lives and the world. This course introduces fundamental ideas in computer science and builds the skills necessary to create computer programs in the Java programming language, with an emphasis on graphics and user interfaces. Students learn to design programs in a wide range of application areas, from games to spam filters and image editing to scientific simulations. Programming topics include object-oriented programming, control structures, arrays, recursion, and event-driven programming, as well as how to construct correct, understandable, and efficient programs. This course is appropriate for all students who want to create software and have little or no prior computing experience.

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, final programming projects, and examinations
Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required
Enrollment Limit: 90
Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 90
Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; COGS Interdepartmental Electives;
Not offered current academic year
CSCI 134 (S) Introduction to Computer Science: Digital Communication and Computation (QFR)

A digital revolution has transformed the way we communicate and process information. Digital cameras have replaced film, MP3s have replaced LPs, communications through email, chat systems, and the Web have become part of daily life. This course explores the principles that underlie such digital information processing and communication systems. All digital information processing and communication systems are driven by precise rules or algorithms expressed as computer programs. We will develop an appreciation for the nature and limitations of such algorithms by exploring abstract algorithms for complex processes and by learning the basics of computer programming in Java. Programming topics covered will include object-oriented programming, control structures, arrays, recursion, and event-driven programming. Programming projects will include network applications like chat clients, tools to process and compress digital images, and simple network servers.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on weekly assignments, final programming projects, and examinations

Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required

Enrollment Limit: 90

Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 90

Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

Distributions: (D3) (QFR)

Attributes: BGNP Recommended Courses; COGS Interdepartmental Electives;

Not offered current academic year

CSCI 134 (F) Introduction to Computer Science: Diving into the Deluge of Data (QFR)

We are surrounded by information: weather forecasts, twitter feeds, restaurant reviews, stock market tickers, music recommendations, among others. This course introduces fundamental computational concepts for representing and manipulating data. Using the programming language Python, this course explores effective ways to organize and transform information in order to solve problems. Students will learn to design algorithms to search, sort, and manipulate data in application areas like text and image processing, social networks, scientific computing, databases, and the World Wide Web. Programming topics covered include object-oriented and functional programming, control structures, types, recursion, arrays, lists, streams, and dictionaries. This course is appropriate for all students who want to create software and learn computational techniques for manipulating and analyzing data. More details are available on the department website, http://www.cs.williams.edu

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on weekly assignments, programming projects, and examinations

Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required

Enrollment Limit: 75

Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 75

Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

Distributions: (D3) (QFR)

Attributes: BGNP Recommended Courses; COGS Interdepartmental Electives;

Fall 2018

LAB Section: C5  T 2:30 pm - 4:00 pm  Iris Howley
LAB Section: C4  M 2:30 pm - 4:00 pm  Iris Howley
LAB Section: C6  T 8:30 am - 10:00 am  Duane A. Bailey
LAB Section: C3  Cancelled

LEC Section: C1  MWF 9:00 am - 9:50 am  Duane A. Bailey
CSCI 136 (F)  Data Structures and Advanced Programming  (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on programming assignments, homework and/or examinations
Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required
Enrollment Limit: 60
Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 60
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses;

LAB Section: 05 W 2:00 pm - 4:00 pm Bill K. Jannen

CSCI 256 (F)  Algorithm Design and Analysis  (QFR)

This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.
Class Format: lecture  

Requirements/Evaluation: evaluation will be based on problem sets and programming assignments, and midterm and final examinations  

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement  

Enrollment Limit: 30  

Enrollment Preferences: current or expected Computer Science majors  

Expected Class Size: 30  

Distributions: (D3) (QFR)

CSCI 315 (S) Computational Biology (QFR)  
Crosslistings: PHYS315 / CSCI315  

Secondary Crosslisting  
This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and expectation-maximization.  

Class Format: lab three hours per week plus weekly tutorial meeting  

Requirements/Evaluation: evaluation will be based on weekly Python programming assignments, problem sets, a few quizzes and a final project  

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option  

Prerequisites: programming experience (e.g., CSCI 136), mathematics (PHYS/MATH 210 or MATH 150), and physical science (PHYS 142 or 151, or CHEM 151 or 153 or 155), or permission of instructor  

Enrollment Limit: 10  

Enrollment Preferences: based on seniority  

Expected Class Size: 8  

Distributions: (D3) (QFR)  

Attributes: BGNP Recommended Courses;

STAT 101 (F) Elementary Statistics and Data Analysis (QFR)  
It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.  

Class Format: lecture  

Requirements/Evaluation: evaluation will be based primarily on performances on quizzes and exams  

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)  

Enrollment Limit: 50  

Expected Class Size: 40  

Department Notes: Students with calculus background and social science interest should consider STAT 161. Students with MATH 150 should enroll
in STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department.

**STAT 201 (F) Statistics and Data Analysis (QFR)**

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on quizzes and exams

**Prerequisites:** MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.

**Enrollment Limit:** 40

**Expected Class Size:** 40

**Department Notes:** Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;
**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 101 and CHEM 251/255 or permission of instructor

**Enrollment Limit:** 64

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 64

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**CHEM 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)**

Crosslistings: BIOL321 / CHEM321 / BIMO321

**Secondary Crosslisting**

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

CHEM 322 (S) Biochemistry II: Metabolism (QFR)

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 64

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;

PHYS 302 (S) Stat Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton’s and Coulomb’s Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301

Enrollment Limit: 24

Expected Class Size: 15

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses;
The Biology curriculum has been designed to provide students with a broad base for understanding principles governing life processes at all levels, from biochemistry and cell biology to physiology to ecology and behavior. Courses emphasize fundamentals common to all sub-disciplines including the coupling of structure to function, the transfer of energy in living systems, communication, and the molding of diversity by the evolutionary process. In upper-level courses and in independent and honors research, students have the opportunity to investigate areas at the frontiers of modern biology.

Although the Biology major is specifically designed to provide a balanced curriculum in the broader context of the liberal arts, it is also excellent preparation for graduate studies in the life sciences and in the health professions.

MAJOR REQUIREMENTS

In order to make the major accessible to students with diverse interests, required courses are kept to a minimum. The Biology major is satisfied by nine courses, as follows:

- Biology 101 The Cell
- Biology 102 The Organism
- Biology 202 Genetics
- Any two 300-level courses, each of which must have a laboratory associated with it
- Any one 400-level course other than 493-494
- Any other three courses or any other two courses and two semesters of Organic Chemistry

Note: Independent study courses and AMS 311 (Same as Biology 231) do not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology: Evolution, in the Williams Oxford Program qualifies for major credit at the 200-level.

Distribution Requirement

In order to ensure that majors broaden their knowledge of biology, one of the elective courses for the major must include an upper-level course covering biological processes at levels of organization above the cell. Courses that satisfy this distribution requirement are indicated in the individual course description.

COURSE SELECTION AND PLACEMENT

It is preferable for students who plan to major in biology, or think they may be interested in doing so, to take Biology 101, 102 during their first year at Williams. It is also possible to begin the Biology major during the sophomore year, although students should understand that it may require taking two or more biology courses during several semesters.

Students interested in biology, whether or not they intend to major in it, are encouraged to take Biology 101, 102. It is also possible, with permission of the instructor, to take Biology 203 Ecology, Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite. Other 100-level biology courses are designed specifically for students who do not intend to take additional upper-level courses in biology. All of these courses satisfy the Division III distribution requirement.

Beginning students should normally enroll in Biology 101 and 102. Students with unusually strong backgrounds in biology, such as those with outstanding performance on the College Board Biology Advanced Placement Test, may be permitted to elect a sophomore-level course in lieu of Biology 101 and/or Biology 102 upon successful completion of a departmental qualifying exam, administered during First Days.

COURSES RELATED TO THE BIOLOGY MAJOR
Students planning to pursue their interest in biology and related fields after completing their undergraduate degrees are strongly encouraged to take one year of chemistry, at least one semester of mathematics (a course in statistics is recommended), and one semester of physics. Students may wish to check the requirements for graduate admission at relevant universities, and are also encouraged to consult with the Biology Department’s graduate school advisor about prerequisites for admission to graduate programs.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Students interested in Biochemistry and Molecular Biology (BIMO) should consult the general statement under Biochemistry and Molecular Biology.

BIOINFORMATICS, GENOMICS AND PROTEOMICS

Students interested in Bioinformatics, Genomics and Proteomics (BiGP) should consult the general statement under Bioinformatics, Genomics and Proteomics. Biology majors interested in this field are strongly encouraged to enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).

NEUROSCIENCE

Students interested in Neuroscience (NSCI) should consult the general statement under Neuroscience.

PUBLIC HEALTH

Students interested in Public Health (PH) should consult the general statement under Public Health.

ENVIRONMENTAL STUDIES

Students interested in Environmental Studies (ENVI) should consult with Biology faculty members associated with the program and the general statement under Environmental Studies.

THE DEGREE WITH HONORS IN BIOLOGY

In order to be recommended for the degree with honors, a Biology major is normally expected to have completed the equivalent of two semesters and a winter study (031) of independent research culminating in a thesis which demonstrates outstanding achievement of an original and innovative nature. Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should consult with the department early in the spring semester of the junior year; approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

The minimum course requirements for a degree with honors in Biology are Biology 101, Biology 102, Biology 202, two 300-level biology courses (each of which must have a laboratory associated with it), one 400-level biology course, Biology 493, Biology 494, WSP 031, and any other two courses in biology (or any other one course and two semesters of Organic Chemistry). Note: A student who has a double major cannot count any course twice. For example, if a student is a Biology and Chemistry major, Organic Chemistry can only be counted in one of the two majors.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during the second semester of junior year would take Biology 494 that semester, followed by Biology 493 in the fall of senior year and winter study research in the winter of the senior year.

STUDY ABROAD

Students planning on majoring in Biology are strongly advised to take Biology 202 before going abroad, since Biology 202 is required for the major and is a prerequisite for many upper-level courses; a Genetics course taken while studying away cannot substitute for Biology 202. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives; the departmental distribution requirement can be satisfied through an appropriate course taken during study abroad. Students should meet with the Department’s study abroad advisor to discuss study abroad options.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be...
sure to contact the department. We usually want to see a syllabus.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, ideally complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Only two of the nine major course credits can be taken somewhere other than Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Courses taken for major credit anywhere other than Williams will only count as 200-level credit, regardless of the level or format of the course.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. BIOL 202 Genetics, 300-level lab courses, and 400-level senior seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Genetics is only offered in the fall. Those late to the major need to be aware of this as Genetics is a prerequisite for most upper division courses.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Courses that are focused on clinical areas of study, and courses in environmental studies that focus on policy or sociology rather than biology, would not be granted credit in biology.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives towards the biology major. Courses must be pre-approved by the Biology Department Study Away Advisor.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in person, with a member of the Biology Department, prior to registering for the course that requires a prerequisite. Such consultations will include a review of the course syllabi and the transcripts of the relevant previous college work, and students should bring these materials with them.

RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.

Note: Senior thesis and independent study courses do not count as 300-level or 400-level course requirements for the major. Only one research course (i.e., BIOL 297, BIOL 298, BIOL 493, or BIOL 494) may be counted towards the major requirements.

BIOL 101 (F) The Cell

This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, cell signaling, cell trafficking, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: Lecture, 3 hours per week; laboratory and discussion, 3 hours per week

Requirements/Evaluation: evaluation will be based on hour tests, a final exam, lab reports, discussion assignments, and discussion participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 96/Lecture

Enrollment Preferences: first year students

Expected Class Size: 192

Distributions: (D3)

Attributes: BIMO Required Courses; NSCI Required Courses
BIOL 102 (S) The Organism

This course focuses upon the developmental and evolutionary processes that have given rise to a wide diversity of multicellular organisms. We consider many levels of biological organization, from molecular and cellular to individuals and populations in our examination of evolutionary concepts. Topics include meiosis and sexual reproduction, developmental and evolutionary mechanisms, and speciation with representative examples from a diversity of plants and animals. Readings are drawn from a variety of sources, including the recent primary literature.

Class Format: lecture/discussion/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on hour tests, a final exam and laboratory reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 or permission of instructor

Enrollment Limit: none

Expected Class Size: 152

Distributions: (D3)

Attributes: BIMO Required Courses;

BIOL 133 (F) Biology of Exercise and Nutrition

This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; the inherent limits of the body to perform aerobic and anaerobic tasks; and the long-term health consequences of a lifetime of activity of inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of "fad" diets as a means to lose weight.
Class Format: lecture 3 hours per week

Requirements/Evaluation: evaluation will be based on exams and bi-weekly laboratory exercises and laboratory report

Prerequisites: none

Enrollment Limit: 90

Enrollment Preferences: seniors, juniors, sophomores, then first-year students

Expected Class Size: 90

Department Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: PHLH Biomedical Determinants of Health

BIOL 134 (S) The Tropics: Biology and Social Issues

Crosslistings: BIOL134 / ENVI134

Primary Crosslisting

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses on specifically on the peoples and cultures of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment.

Class Format: lecture/debate, three hours per week

Requirements/Evaluation: evaluation will be based on two hour exams, a short paper, panel preparation, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students--in that order

Expected Class Size: 60

Department Notes: does not count for major credit in Biology; does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; GBST African Studies Electives; PHLH Biomedical Determinants of Health; SCST Elective Courses

Not offered current academic year

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and 102
**Enrollment Limit:** none

**Expected Class Size:** 84

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3) (QFR)

**Attributes:** BGNP Recommended Courses; BIMO Required Courses;

### BIOL 203 (F) Ecology (QFR)

**Crosslistings:** BIOL203 / ENVI203

**Primary Crosslisting**

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

**Class Format:** lecture/laboratory, six hours per week

**Requirements/Evaluation:** evaluation will be based on problem sets, lab reports, hour exams, and a final exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor

**Enrollment Limit:** none

**Expected Class Size:** 35

**Department Notes:** satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major

**Distributions:** (D3) (QFR)

**Attributes:** ENVI Natural World Electives; EVST Environmental Science; EVST Living Systems Courses;

### BIOL 204 (S) Animal Behavior

**Crosslistings:** NSCI204 / BIOL204

**Primary Crosslisting**

Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the
course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on examinations, lab reports, and a research paper

Extra Info: not available for the fifth course option

Prerequisites: BIOL 102, or PSYC 101, or permission of instructor

Enrollment Limit: 32

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 32

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3)

Attributes: COGS Interdepartmental Electives; NSCI Group A Electives

LAB Section: 03    W 1:00 pm - 4:00 pm    Manuel A. Morales

BIOL 205 (S)  Physiology

This lecture-based course examines principles, patterns, and mechanisms of biological function from the level of cells and tissues to the whole organism. The themes of the course include structure and function, mechanisms of regulation, control and integration, and adaptation to the environment. Examples of these themes are taken from a wide variety of organisms with a focus on vertebrates. Laboratories provide practical experience in measurement and experimental elucidation of physiological phenomena and functional analysis of gross structure.

Requirements/Evaluation: evaluation will be based on hour exams, laboratory reports, and a final exam

Prerequisites: BIOL 101 and 102; open to first-year students with permission of the Biology department

Enrollment Limit: 72

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 72

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3)

BIOL 210 (S)  Mathematical Biology  (QFR)

Crosslistings: MATH310 / BIOL210

Secondary Crosslisting

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models.
Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: tutorial

Requirements/Evaluation: problem sets, weekly meetings, final project and paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 250, MATH 209 or 309, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 10

Distributions: (D3) (QFR)

Distribution Notes: QFR: The course will introduce methods for developing and analyzing mathematical models.

Attributes: PHLH Methods in Public Health;

TUT Section: T1  TBA  Julie C. Blackwood

BIOL 211 (S) Paleobiology

Crosslistings: BIOL211 / GEOS212

Secondary Crosslisting

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams’ superb fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth. We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York.

Class Format: lecture/laboratory; field trip to the the Paleozoic of New York State

Requirements/Evaluation: evaluation will be based on lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomores and juniors

Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: EXPE Experiential Education Courses; MAST Interdepartmental Electives

Spring 2019

LEC Section: 01  TR 9:55 am - 11:10 am  Phoebe A. Cohen

BIOL 212 (F) Neuroscience

Crosslistings: PSYC212 / BIOL212 / NSCI201

Secondary Crosslisting
A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.

Class Format: lecture, three hours a week; laboratory, every other week

Requirements/Evaluation: evaluation will be based on a lab practical, lab reports, two hour exams and a final exam

Extra Info: not available for the fifth course option

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: sophomores and Biology and Psychology majors

Expected Class Size: 72

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Distribution Notes: meets Division 3 requirement if registration is under PSYC

BIOL 214 (S) Mathematical Ecology (QFR)

Crosslistings: BIOL214 / MATH410

Secondary Crosslisting

Using mathematics to study natural phenomena has become ubiquitous over the past couple of decades. In this tutorial, we will study mathematical models comprised of both deterministic and stochastic differential equations that are developed to understand ecological dynamics and, in many cases, evaluate the dynamical consequences of policy decisions. We will learn how to understand these models through both standard analytic techniques such as stability and bifurcation analysis as well as through simulation using computer programs such as MATLAB. Possible topics include fisheries management, disease ecology, control of invasive species, and predicting critical transitions in ecological systems.

Class Format: tutorial

Requirements/Evaluation: written and programming assignments, oral presentations, and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 250 or permission of instructor; Math 209 preferred

Enrollment Limit: 10

Enrollment Preferences: programming experience, students with interests in the intersection of math and biology

Expected Class Size: 10

Department Notes: Does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; EVST Methods Courses; PHLH Methods in Public Health;

Not offered current academic year

BIOL 219 (S) Dangerous Exposures: Environment, Immunity, and Infectious Disease (WI)

Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic
fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

Class Format: tutorial
Requirements/Evaluation: six 4- to 5-page papers; tutorial presentations, and the student's progress towards intellectual independence and creativity as a presenter and a respondent
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102
Enrollment Limit: 10
Enrollment Preferences: sophomores who have taken BIOL 202, students interested in public health
Expected Class Size: 10
Distributions: (D3) (WI)
Attributes: PHLH Biomedical Determinants of Health;

Spring 2019
TUT Section: T1 R 11:20 am - 2:00 pm Lois M. Banta

BIOL 220 (S) Field Botany and Plant Natural History
Crosslistings: BIOL220 / ENVI220
Primary Crosslisting
This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent developments in plant systematics, characteristics of plant families, and cultural -economic uses of plants, especially native species. The labs cover field identification, natural history, and ecology of local species.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on exams, field quizzes, field notebook and a class project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniors, Biology majors, and Environmental Studies majors & concentrators
Expected Class Size: 25
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3)

BIOL 222 (S) Essentials of Biochemistry (QFR)
This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

**Class Format:** lecture/discussion/laboratory, six hours per week

**Requirements/Evaluation:** regular quizzes, final exam, writing assignments (including problem sets), and lab assignments

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322

**Enrollment Limit:** 24

**Enrollment Preferences:** seniors who need to fulfill the biochemistry requirement for premedical school

**Expected Class Size:** 24

**Department Notes:** does not satisfy the distribution requirement for the major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

**BIOL 231 (F)  Marine Ecology**

Crosslistings: BIOL231 / MAST311

**Secondary Crosslisting**

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

**BIOL 234 (S)  Biology of our Sexes: The Genetic and Epigenetic Regulation of Sex Determination** (WI)

Many physical and behavioral characteristics that are associated with male and female anatomy, physiology, and behavior are initially the products of molecular choices arising from the action of our chromosomes in early development. The embryonic assignment of sex can also lead to intersex or hermaphroditic outcomes in many different organisms with extraordinary and illuminating biological effects. We will explore the molecular mechanisms and evolutionary basis of sex determination in both plants and animals, as well as the physical and behavioral expression of sex by the organism.
discussed, and experiments that create and characterize traits and behavior of mosaic/intersex organisms. Additionally, the epigenetic regulation of the X chromosome in mammals has a canonical role in our understanding of sex determination, but whole genome studies and investigations of autosomes and the Y chromosome have raised new layers of complexity for understanding the molecular basis of human sex and sexuality.

**Class Format:** tutorial

**Requirements/Evaluation:** six 5-page papers; six 1-page response papers; tutorial presentations; discussion skills/investment

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 202 (Genetics), or permission of instructor

**BIOL 302 (F) Communities and Ecosystems (QFR)**

Crosslistings: BIOL302 / ENVI312

**Primary Crosslisting**

An advanced ecology course that examines how species interact with each other and their environment with a focus on conservation implications. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments but will also include some laboratory microcosm experiments. The laboratory component of the course will culminate with a self-designed independent or group project.

**Class Format:** lecture/laboratory, six hours a week

**Requirements/Evaluation:** evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

**Prerequisites:** BIOL/ENVI 203 or 220

**Enrollment Limit:** 28

**Enrollment Preferences:** Biology majors and Environmental Studies majors and concentrators
BIOL 305 (S)  Evolution  (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors

BIOL 308 (F)  Integrative Plant Biology: Fundamentals and New Frontiers
Plants are one of the most successful groups of organisms on Earth and have a profound impact on all life. Successful use of plants in addressing global problems and understanding their role in natural ecosystems depends on fundamental knowledge of the molecular mechanisms by which they grow, develop, and respond to their environment. This course will examine the molecular physiology of plants using an integrative approach that considers plants as dynamic, functional units in their environment. Major emphasis will be on understanding fundamental plant processes, such as photosynthesis, growth and development, water transport, hormone physiology, and flowering, from the molecular to the organismal level. Environmental effects on these processes will be addressed in topics including photomorphogenesis, stress physiology, mineral nutrition, and plant-microbe interactions. Discussions of original research papers will examine the mechanisms plants use to perform these processes and explore advances in the genetic engineering of plants for agricultural, environmental, and medical purposes. Laboratory activities stress modern approaches and techniques used in investigating plant physiological processes.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on lab reports, a term paper, and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Biology majors

Expected Class Size:
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BIMO Interdepartmental Electives; PHLH Nutrition, Food Security + Environmental Health
BIOL 310 (F) Neural Development and Plasticity
Crosslistings: NSCI310 / BIOL310

Primary Crosslisting
Development can be seen as a tradeoff between genetically-determined processes and environmental stimuli. The tension between these two inputs is particularly apparent in the developing nervous system, where many events must be predetermined, and where plasticity, or altered outcomes in response to environmental conditions, is also essential. Plasticity is reduced as development and differentiation proceed, and the potential for regeneration after injury or disease in adults is limited; however some exceptions to this rule exist, and recent data suggest that the nervous system is not hard-wired as previously thought. In this course we will discuss the mechanisms governing nervous system development, from relatively simple nervous systems such as that of the fruitfly, to the more complicated nervous systems of humans, examining the roles played by genetically specified programs and non-genetic influences.

Class Format: lecture
Requirements/Evaluation: exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) and BIOL 202 (or permission of instructor)
Enrollment Limit: 24
Enrollment Preferences: Biology majors; Neuroscience concentrators; Psych majors
Expected Class Size: 24
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives; NSCI Group A Electives
Not offered current academic year

BIOL 311 (F) Neural Systems and Circuits
Crosslistings: NSCI311 / BIOL311

Primary Crosslisting
This course will examine the functional organization of the vertebrate brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections analyze sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the brain regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Class Format: lecture/lab, six hours per week
Requirements/Evaluation: class participation, laboratory notebooks and posters, hour exams and a final exam
Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205
Enrollment Limit: 24
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 24
Department Notes: does not satisfy the distribution requirement in Biology
Distributions: (D3)
Attributes: NSCI Group A Electives
BIOL 313 (S) Immunology

The rapidly evolving field of immunology examines the complex network of interacting molecules and cells that function to recognize and respond to agents foreign to the individual. In this course, we will focus on the biochemical mechanisms that act to regulate the development and function of the immune system and how alterations in different system components can cause disease. Textbook readings will be supplemented with current literature.

Class Format: lectures, three hours a week; laboratory, three hours a week

Requirements/Evaluation: evaluation will be based on exams, laboratory reports, and a research paper

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: senior and then junior Biology majors

Expected Class Size: 24

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives; PHLH Biomedical Determinants of Health

Not offered current academic year

BIOL 315 (F) Microbiology: Diversity, Cellular Physiology, and Interactions

Bioterrorism and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the adaptation of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbe:host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, metagenomics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. In the lab, major projects will focus on horizontal gene transfer, metagenomics, and the isolation and characterization of bacteria from natural environments. The lab experience will culminate in multi-week independent investigations. Readings will be supplemented by articles from the primary literature.

Class Format: lectures, three hours a week; laboratory, three hours a week

Requirements/Evaluation: evaluation will be based on three exams/writing assignments, responses to thought questions on readings, a lab report/notebook, and a poster presentation

Extra Info: not available for the fifth course option

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: senior and then junior Biology majors

Expected Class Size: 24

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives; PHLH Biomedical Determinants of Health

BIOL 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Crosslistings: BIOL319 / CHEM319 / MATH319 / PHYS319 / CSCI319

Primary Crosslisting

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program,
computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 12
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BGNP Core Courses; BIMO Interdepartmental Electives;
Not offered current academic year

BIOL 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)
Crosslistings: BIOL321 / CHEM321 / BIMO321
Secondary Crosslisting
This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.
Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports
Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256
Enrollment Limit: 16/lab
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size: 16/lab
Department Notes: does not satisfy the distribution requirement in the Biology major

BIOL 322 (S) Biochemistry II: Metabolism (QFR)

Crosslistings: CHEM322 / BIMO322 / BIOL322

Secondary Crosslisting

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 64

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;

BIOL 326 (F) Cellular Assembly and Movement

This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of the membrane transport and cytoskeleton. The course will highlight involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

Class Format: lectures, three hours a week; laboratory, three hours a week, the laboratory projects will require additional time outside of class hours

Requirements/Evaluation: three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

Extra Info: may not be taken on a pass/fail basis
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: senior and junior Biology majors

BIOL 329 (F) Conservation Biology (QFR)
Crosslistings: BIOL329 / ENVI339
Primary Crosslisting
Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.
Class Format: lecture and discussion three hours per week; lab three hours per week
Requirements/Evaluation: lab assignments, two exams, and discussion participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 203, or BIOL 202, or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: biology majors, seniors, and juniors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

BIOL 330 (S) Genome Architecture
Biologists have only recently learned to read the complete genome sequence of organisms, and figuring out how to interpret these "texts" is now the focus of much of contemporary research in molecular biology and genetics. This course will concentrate on the origin, function, and evolution of central features of eukaryotic genomes, including gene structure, genome size, repeated sequences, and the complexity of gene regulation. Students will develop the ability to evaluate the contribution of neutral and adaptive processes in shaping genome complexity through: (1) critical evaluation of the
primary research literature, (2) investigation of genome structural variation using wet-lab approaches and publically available genomic data, and (3) an original research project.

Class Format: lectures, three hours a week; laboratory, three hours a week; the laboratory projects will require additional time outside of class hours

Requirements/Evaluation: four exams, written responses and in-class discussion of papers, laboratory reports, and oral presentation of an independent laboratory project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

BIOL 402 (S)  Rapid Evolution in Ecology

Darwin believed that evolution was a slow process. Until recently, the impact of evolutionary changes on short-term ecological studies was considered to be minimal. However, empirical documentation of rapid, directly observed evolution has changed this view and has led to an increased focus on the joint dynamics of evolution and ecology including community genetics, niche construction, and evolutionary rescue. In this course, we first focus on the literature presenting the evidence for rapid evolutionary change in natural and experimental populations. Then, we explore the consequences of rapid evolutionary change for our understanding of population, community, and ecosystem ecology including the impacts that evolutionary changes have for conservation efforts and predicting the response of organisms to global environmental and climate change.

Class Format: seminar

Requirements/Evaluation: Evaluation will be based on participation in discussions, several short papers and presentations.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 202

Enrollment Limit: 12

Enrollment Preferences: Biology seniors who have not yet taken a 400-level course

Expected Class Size: 12

Department Notes: satisfies the distribution requirement in the biology major

Distributions: (D3)

Not offered current academic year

BIOL 405 (F)  Sociobiology  (WI)

Sociobiology, or the study of social behavior, has challenged the limits of evolutionary theory since Darwin described the non-reproducing castes among social insects (i.e., eusociality) as "one special difficulty." Inclusive fitness theory and Hamilton’s rule—that an altruistic act can evolve where the benefit to related individuals exceeds the cost to the actor—potentially resolves Darwin’s paradox. Nevertheless, explanations including delayed fitness benefits and ecological constraints have been suggested as alternatives to inclusive fitness theory. Moreover, the theoretical justification for inclusive fitness theory has recently been vigorously challenged. This course will use readings from the primary literature to examine the evidence for inclusive fitness as a potential explanation for topics including the evolution of helping behavior, eusociality and its relationship to extraordinary sex ratios, and spiteful behavior. Other topics that we will cover include the evolution of deceit and self deception.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on five (4-5-page) papers; tutorial presentations, & the student's effectiveness as a critic

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
BIOL 407 (S)  Neurobiology of Emotion
Crosslistings: NSCI347 / BIOL407

Primary Crosslisting

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by experience, memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout mouse studies, as well as new opti-genetic methods for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing and mood disorders.

Class Format: discussion, three hours per week
Requirements/Evaluation: evaluation will be based on class participation and several short papers

Prerequisites: BIOL 202 and 212; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators
Expected Class Size: 12
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives; NSCI Group A Electives

Not offered current academic year

BIOL 408 (S)  RNA Worlds

Ribonucleic acids (RNAs) serve as genomes, catalysts, messengers, adaptors, regulators, structural components, and evolutionary substrates. Non-coding RNAs such as microRNAs, ribozymes, and small interfering RNAs control a diverse range of biological processes including plant and animal development, translation, epigenetic chromosome silencing, and cancer. This course explores recently discovered non-coding RNAs and considers evidence for their mechanisms of action. Through extensive reading of primary literature, we will analyze experimental investigations that reveal our current understanding of the functions and evolution of non-coding RNAs in all three domains of life.

Class Format: discussion, three hours per week
Requirements/Evaluation: evaluation will be based on class participation and several short papers

Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level course & BIMO concentrators
Expected Class Size: 12
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives;

Not offered current academic year

BIOL 409 (F)  Cultural Evolution in Biological Systems  (WI)
The evolution of genetically transmitted traits has been the subject of extensive study since the "modern synthesis" combined Darwin's and Mendel's ideas--later enriched by molecular approaches to developmental biology. More recently, the study of evolution has been extended to traits that are transmitted via social learning. The cultural evolution that occurs in such behavioral traits has many parallels with evolution based on genes: errors and innovation correspond to genetic mutations, immigration may bring in new forms of the behavior, and population bottlenecks can result in loss of behavioral traits. However, there is also a crucial difference between genetic and social transmission of traits: social learners can potentially acquire traits from many members of their population, including unrelated individuals. This difference has many implications, including the acceleration of the evolutionary time scale. We will explore the ways socially learned behaviors evolve, using systems such as tool use (primates, crows), vocal learning (songbirds, orcas), and social organization (baboons). Among the topics we will consider are the role of neutral models and random processes, how neural constraints guide social learning, how social status influences the choice of tutors, and how competition and sexual selection drive changes in learned behavior. We will also consider how these processes interact and how they generate differences as well as parallels between cultural and genetic evolution.

Class Format: tutorial

Requirements/Evaluation: five 4- to 5-page papers; five 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 305 or BIOL 204

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors

Expected Class Size: 10

Department Notes: satisfies the distributional requirement for the Biology major

Distributions: (D3) (WI)

Attributes: Linguistics;

Not offered current academic year

BIOL 410 (S) Nanomachines in Living Systems

Through reading and discussing the primary literature, this course will explore how nanometer-sized biological molecules like proteins perform functions that require integration of information and transmission of force at much larger scales, microns and above. These nanoscale proteins will be considered as nanomachines that can transform a chemical energy into a mechanical one. We will focus on the cytoskeleton, which gives cells their shape, organizes the internal parts of cells and provides mechanical support for essential cellular processes like cell division and movement. An emphasis will be placed on how the biochemical properties of actin, actin-binding proteins and motors are used to generate mechanical force necessary for the respective biological function. Topics will include some controversial and emerging hypotheses in the field: sliding versus depolymerizing hypotheses for constriction of the contractile ring in cytokinesis, roles of cytoskeleton in pathogen entry and propagation, organelle dynamics, polarity establishment in cell migration, immunological synapse and neuronal function.

Class Format: discussion, three hours per week

Requirements/Evaluation: class participation and several short papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Limit: 24

Enrollment Preferences: senior Biology majors who have not taken a 400-level course, then juniors

Expected Class Size: 24

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives;

Not offered current academic year

BIOL 412 (S) Neural and Hormonal Basis of Hunger

Crosslistings: NSCI342 / BIOL412

Primary Crosslisting
Hunger and satiety are highly regulated behavioral states that maintain energy homeostasis in animals. This course will focus on readings from the primary literature to track numerous recent advances in how the brain and endocrine systems regulate appetite. Topics include how organ systems communicate with the brain to regulate appetite, how different populations of neurons in the brain interact to regulate appetite, how brain systems that regulate appetite affect other behaviors, and how the neural and hormonal basis of hunger compare with brain systems that regulate other homeostatic systems such as thirst. By tracing the advances in appetite regulation within the past decade, we will also trace the advent of cutting-edge molecular, genetic, and optical-based tools that are transforming multiple fields within physiology and neuroscience. Students in this class will have the opportunity to improve skills in written and oral scientific presentation.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on written assignments, oral presentations, and participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 205 or BIOL/PSYC 212, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors who have not taken a 400-level course

Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: NSCI Group A Electives

Not offered current academic year

BIOL 413 (S) Global Change Ecology (WI)

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioral mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: seminar

Requirements/Evaluation: class participation and several short papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 203 or MAST 311 or BIOL 305 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

Expected Class Size: 12

Department Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (WI)

SEM Section: 02 TR 11:20 am - 12:35 pm Sonya K. Auer

BIOL 414 (S) Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and
proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

**Class Format:** discussion, three hours per week

**Requirements/Evaluation:** evaluation will be based on class participation and several short papers

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** BIOL 202; open to juniors and seniors

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Biology majors who have not taken a 400-level course; then juniors

**Expected Class Size:** 12

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**BIOL 417 (F) Translational Immunology: From Bench to Bedside**

Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Drugs that modulate the body's natural immune response have become powerful tools in treating the world's major diseases— infection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, transplantation immunology, autoimmunity and cancer immunotherapy.

**Class Format:** seminar/conference

**Requirements/Evaluation:** evaluation will be based on class participation and several short papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 202; open to juniors and seniors

**Enrollment Limit:** 12

**Enrollment Preferences:** senior biology majors who have not taken a 400-level course; then juniors

**Expected Class Size:** 12

**Department Notes:** does not satisfy the distribution requirement in Biology

**Distributions:** (D3)

**Attributes:** PHLH Biomedical Determinants of Health

Not offered current academic year

**BIOL 418 (F) Signal Transduction to Cancer**

Division of normal cells is a highly regulated process based on input from both intrinsic and extrinsic signals. The cell's response to its environment affects all aspects of cell behavior: proliferation, death, differentiation and migration. The goal of the course is to understand the molecular mechanisms of signal transduction that guide normal cell behavior and how disruptions in this process can lead to cancer. We will focus on the Hedgehog-Gli signaling pathway that is activated in 30% of all known cancers. Genetic studies will serve as an introduction to the components of the pathway, followed by an examination of the molecular mechanisms of signal reception, transduction of intracellular information, scaffolding and transcriptional targets. The final section of the course will investigate how high throughput screens, medicinal chemistry studies and mouse models are used to identify small molecular inhibitors of pathway components. We will consider the effectiveness of these inhibitors in pharmacological studies, clinical trials and potential cancer treatments.
**BIOL 422 (F) Ecology of Sustainable Agriculture**

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

**Class Format:** seminar; two 75 minute sessions per week

**Requirements/Evaluation:** evaluation will be based on writing assignments, seminar presentation, and course participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL/ENVI 203 or BIOL 302 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors

**Expected Class Size:** 12

**Department Notes:** Satisfies the distribution requirement in Biology; the ENVS biology track; the Natural World distributional requirement of the Environmental Studies program

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; PHLH Nutrition, Food Security + Environmental Health

---

**BIOL 430 (F) Genome Sciences: At the Cutting Edge (WI)**

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of...
different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 202
Enrollment Limit: 10
Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course
Expected Class Size: 10
Department Notes: BIMO, BIGP; does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (WI)
Attributes: BGNP Recommended Courses; BIMO Interdepartmental Electives;

BIOL 432 (F)  Evolutionary Genetics
The synthesis of evolutionary processes with the mechanistic understanding of genetics has lent insight into many mysteries of life. The goal of this course is to explore the interface between evolution and genetics to make sense of fundamental biological processes. For example, why do we expect that male and female offspring occur in 50:50 ratios? How and why do unusual sex-ratios occur? Other topics include: conflict among genes, evolution of allelic dominance, adaptation at the molecular level, and genetics of speciation. Class discussion and written assignments will emphasize critical evaluation and synthesis of the scientific literature.

Class Format: seminar
Requirements/Evaluation: class participation and several short papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: seniors who have not taken a 400 level course, then juniors and Biology majors
Expected Class Size: 12
Department Notes: meets distribution requirements of the Biology major
Distributions: (D3)
Not offered current academic year

BIOL 493 (F)  Senior Thesis Research: Biology
Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

Class Format: independent study
Extra Info: this is part of a full-year thesis (493-494)
Department Notes: Senior majors and concentrators are required to participate in Biology Colloquium, which are scheduled for most Fridays at 1:10pm
Distributions: (D3)
**BIOL 494 (S)  Senior Thesis Research: Biology**
Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

_Not offered current academic year_
MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

A major in chemistry can be achieved in several ways, preferably beginning in the student’s first year at Williams, but also beginning in the sophomore year. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with their background in other sciences, interests, and goals. A student’s program might emphasize biochemistry, organic chemistry, physical chemistry, or inorganic chemistry, with additional courses available in analytical chemistry, environmental science, and materials science. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

All students begin their study in the department with either Chemistry 151, 153, or 155. Placement at the introductory level is based upon performance on the departmental placement test results and consultation with the chair; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account. The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 (or 255) and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from among the following: Biology 101; Computer Science 134; Mathematics 130, 140, 150, 151; Physics 131, 141; or any courses in these departments for which the approved courses are prerequisites. CHEM 155 counts for two courses toward the major, but a single course toward graduation credit. Starting at the 300 level, at least three of the courses taken must have a laboratory component, and at least one must be selected from Chemistry 361, 366, 364, or 367. (The specific course elected, in consultation with the chair or major advisor, will depend on the student’s future plans.) In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

Foundational Courses

First Year

Fall: 151,153 or 155 Gateway courses

Spring: 156 Organic Chemistry: Introductory Level

Second Year

Fall: 251 (or 255) Organic Chemistry: Intermediate Level

Spring: 256 Advanced Chemical Concepts (or 300-level if completed 155)

Elective Courses

319 Integrative Bioinformatics, Genomics, and Proteomics Lab

321 Biochemistry I-Structure and Function of Biological Molecules

322 Biochemistry II-Metabolism

324 Enzyme Kinetics and Reaction Mechanisms
For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

**Biochemistry:** Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367. Students interested in biochemistry should consult with Professors Blair, Gehring, Hart, or Rawle.

**Organic Chemistry:** Chemistry 341, Chemistry 342, Chemistry 343, Chemistry 344T, Chemistry 348, Chemistry 364, Chemistry 361, Chemistry 366. Students interested in organic chemistry should consult with Professors Blair, S. Goh, Richardson, or Smith.

**Physical and Inorganic Chemistry:** Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Carrasquillo, Peacock-López, or Thoman. Students interested in inorganic chemistry should consult with Professors C. Goh or Park. Students interested in materials science should consult with Professors C. Goh or Park. Students interested in environmental chemistry should consult with Professor Carrasquillo.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum, and at least a semester of research is strongly recommended.

The department’s curriculum is approved by the American Chemical Society (A.C.S.), a professional body of academic, industrial, and research chemists. The A.C.S. suggests the following courses for someone considering graduate study or work in chemistry or a related area: 151 (153 or 155), 156, 251 (255), 256, 321, 335, 364, 361 (366 or 367) and at least 4 courses (two of which must have a laboratory component) from our remaining upper level electives: 319, 322, 324, 326, 336, 338, 341, 342, 343, 344T, 348, 361, 366, 367, 368T, 493, 494, 497, 498, BIMO 401. In addition, students are strongly encouraged (though not required) to pursue independent research in some form. Students completing these requirements can be designated Certified A.C.S. Majors.

**BIOCHEMISTRY AND MOLECULAR BIOLOGY (BIMO)**

Students interested in Biochemistry and Molecular Biology should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, and 367 in addition to the first and second year required courses.
BIOINFORMATICS, GENOMICS, AND PROTEOMICS (BiGP)

Students interested in Bioinformatics, Genomics, and Proteomics should consult the general statement under Bioinformatics, Genomics, and Proteomics in the Courses of Instruction. Students interested in these areas are also encouraged to complete the biochemistry courses within the chemistry major by taking 319, 321, 322, 324 and 367 in addition to the first and second year required courses.

MATERIALS SCIENCE

Students interested in Materials Science are encouraged to elect courses from the Materials Science program offered jointly with the Physics Department, and should consult that listing.

THE DEGREE WITH HONORS IN CHEMISTRY

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Chemistry majors who are candidates for the degree with honors take the following in addition to a major outlined above:

Chemistry 493-W31-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are mastery of fundamental materials and skills, ability to pursue independent study successfully, and demonstrated student interest and motivation. In addition, to enroll in these courses leading to a degree with honors, a student must have at least a B- average in all chemistry courses or the permission of the chair. At the end of the first semester of the senior year, the department reviews the student’s progress and determines whether the student is a candidate for a degree with honors. The designation of a degree with honors in Chemistry or a degree with highest honors in Chemistry is based primarily on a departmental evaluation of the accomplishments in these courses and on the quality of the thesis. Completion of the research project in a satisfactory manner and preparation of a well-written thesis usually results in a degree with honors. In cases where a student has demonstrated unusual commitment and initiative resulting in an outstanding thesis based on original results, combined with a strong record in all of their chemistry courses, the department may elect to award a degree with highest honors in Chemistry.

EXCHANGE AND TRANSFER STUDENTS

Students from other institutions wishing to register for courses in chemistry involving college-level prerequisites should do so in person with a member of the Chemistry Department. Registration should take place by appointment during the spring semester prior to the academic year in which courses are to be taken. Students are requested to have with them transcripts of the relevant previous college work.

COURSES FOR NON-MAJORS WITH NO PREREQUISITES

Students with principal interests outside of the sciences may extend a secondary school foundation in chemistry by electing a basic two-semester introductory course of a general nature or they may elect semester courses designed for non-majors. All courses in chemistry satisfy the divisional distribution requirement.

STUDY ABROAD

Students who wish to complete a chemistry major (or chemistry requirements for pre-medical study) as well as to study abroad during their junior year are encouraged to begin taking chemistry in their first semester at Williams, and should consult with members of the department as early as possible.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We can give provisional approval in some cases if enough detail is available, but we always ask to see the details after the course is completed before signing off on the major credit.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and complete description of laboratory program. The biggest question is whether or not there is a lab component of the course and whether it is sufficient to fulfill the equivalent lab experience of Williams courses.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No official restrictions, but we advise our students to take the majority of their chemistry courses at Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. We have several special requirements. Only one non-lab class can be used toward the upper-level major requirements. This is usually the
restriction that causes difficulty with study abroad—where appropriate lab courses may not be available. One of the lab courses must also meet our departmental “quantitative requirement.” In principle, this could be met by a course taken abroad, but we would likely be more conservative in authorizing this equivalency.

Are there specific major requirements that cannot be fulfilled while on study away?

No. In principle, all major requirements could be filled abroad, but laboratory programs abroad are not always sufficiently rigorous to meet our standards. We look for at least 40 hours of wet-lab time for the lab component. Importantly, this cannot be work in a professor's research lab, but must be “exercises” giving our students practice with standard techniques and methods of analysis.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The lab requirements that I've mentioned above are the main complicating factors. Also our first two years of (“introductory”) chemistry courses are taught in an unconventional way. If a student had not yet completed all four of those courses before studying abroad, they would need to be aware of special timing that might complicate things. For our first two years of instruction, we teach one semester of introductory chemistry followed by two semesters of organic chemistry, and top things off with a final semester of a course that is somewhat specific to Williams. There are ways to take “equivalent” courses elsewhere, but we would need to work very closely with the student to ensure that all of the pieces fit together appropriately.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date, but there may have been times when the lab component of a course was not sufficient and we were only able to assign major credit for a non-lab course instead of a course-with-a-lab.

CHEM 113 (F) Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science
In this course, designed for students who do not plan to major in the natural sciences, we use a case-oriented approach to explore selected topics of forensic science. These include: (1) the scientific and technological foundation for the examination of physical, chemical, and biological items of evidence, and (2) the scope of expert qualifications and testimony, the legal status of scientific techniques, and the admissibility of the results in evidence. The analysis of trace evidence, including glass, soil, gunpowder residues and bullet fragments, and inorganic and heavy metal poisons are discussed through an understanding of the basic concepts of chemistry and analytical chemistry. Forensic toxicology and pharmacology are applied to the analysis of alcohol, poisons, and drugs based upon the principles of organic chemistry and biochemistry. The characterization of blood and other body fluids necessitate an understanding of serology and molecular genetics. The cases which stimulate the exploration of these areas include: the John and Robert Kennedy assassinations, the Jeffrey MacDonald case (Fatal Vision), the Wayne Williams case, the deaths of celebrities Marilyn Monroe, John Belushi, and Janis Joplin, the authenticity of the Shroud of Turin, the Casey Anthony case, the Tylenol poisonings, and the identity of Anastasia. Interactive demonstration sessions provide an appreciation of scientific experimentation in general and the work of a crime lab in particular. It includes an analysis of evidence and provides an opportunity to learn forensic techniques such as chromatography (for ink, drug, and fire accelerator analysis), spectroscopy (for alcohol and drug analysis), and electrophoresis (for DNA fingerprinting).

Class Format: lecture, three times per week
Requirements/Evaluation: evaluation is based on problem sets and/or quizzes, hour tests, a final exam, and papers
Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences; not open to students who have taken CHEM 151, 153, 155, 156/251, or 256
Enrollment Limit: 30
Enrollment Preferences: seniors and juniors
Expected Class Size: 30
Distributions: (D3)
Attributes: SCST Elective Courses
Not offered current academic year

CHEM 115 (F) AIDS: The Disease and Search for a Cure
Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus
than any other known pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has now waned and HIV strains that are resistant to drug therapies are common. We are now three decades into the AIDS pandemic and the World Health Organization estimates that there are more than 34 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss prospects for developing an effective HIV vaccine.

Class Format: lecture, three hours per week

Requirements/Evaluation: evaluation is based on problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences

Enrollment Limit: 45

Expected Class Size: 45

Distributions: (D3)

Attributes: PHLH Biomedical Determinants of Health; SCST Related Courses

Fall 2018

CHEM 116 (S)  Chemistry and Physics of Cooking  (QFR)

Cooking is a creative and artistic process, but it is based on fundamental chemical and physical principles. In this course, which is intended for students who do not plan to major in the natural sciences, we explore these scientific principles and their application to the kitchen. We draw on edible examples such as chemical bonding and intermolecular forces (salting, emulsification, and spherification), acid-base chemistry (leavening, making jam, and macaroni and cheese), kinetics and thermodynamics (cooking styles and times), states of matter (carbonation, ices, foams, and gels), types of chemical reactions (baking bread, grilling vegetables, tenderizing meat), and energy transfer (kitchen equipment and gadgets). The kitchen is a laboratory—in the classroom, we carry out experiments to demonstrate and to test these scientific concepts. This course also considers the science behind contemporary ideas in cooking known as “modernist cuisine” and/or “molecular gastronomy”. Bon appetit!

Class Format: lecture

Requirements/Evaluation: weekly quizzes and problem sets, two exams, and a paper

Prerequisites: none, but students who have not taken high school chemistry should consult the instructor

Enrollment Limit: 45

Enrollment Preferences: seniors and juniors; not appropriate for CHEM, BIOL, or PHYS majors, or for those for have taken CHEM 151, 153, or 155

Expected Class Size: 45

Distributions: (D3) (QFR)

Not offered current academic year

CHEM 151 (F)  Introductory Chemistry  (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three times per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on frequent electronic and quantitative written weekly problem set assignments, laboratory work and reports, quizzes, two tests, and a final exam

Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: all students planning to enroll are required to take the online Chemistry Placement Test prior to registering for the course (and
CHEM 153 (F) Concepts of Chemistry (QFR)
This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory work includes synthesis, qualitative and quantitative chemical analysis, and molecular modeling. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam
Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: all students are required to take the online Chemistry Placement Test prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days)
Enrollment Limit: 16/lab
Enrollment Preferences: incoming first year students also must meet with a faculty member during First Days
Expected Class Size: 70
Department Notes: one of CHEM 151 or 153 or 155 required for the BIMO concentration
Distributions: (D3) (QFR)
Attributes: BIMO Required Courses;
This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory work includes synthesis, characterization, and reactivity of coordination complexes, electrochemical analysis, materials chemistry, qualitative analysis, and molecular modeling. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on weekly problem sets, laboratory work and reports, an hour test, and a final exam
Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: students planning to enroll are required to take the Chemistry Placement Survey prior to registering; incoming first year students are required to meet with faculty during First Days; for more information go to http://chemistry.williams.edu/placement/
Enrollment Limit: 16/lab
Enrollment Preferences: CHEM 151 is an introductory course for students with no or little chemistry background. Students who have studied chemistry for one or more years are directed to CHEM 153 or 155
Expected Class Size: 36
Department Notes: CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration
Distributions: (D3) (QFR)
Attributes: BIMO Required Courses;

Fall 2018
LEC Section: 01  MWF 8:00 am - 8:50 am  Anthony J. Carrasquillo
LAB Section: 02  M 1:00 pm - 5:00 pm  Anthony J. Carrasquillo
LAB Section: 03  T 1:00 pm - 5:00 pm  Anthony J. Carrasquillo
LAB Section: 04  W 1:00 pm - 5:00 pm  Enrique Peacock-López

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation will be based on quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor
Enrollment Limit: 16/lab
Expected Class Size: 120
Distributions: (D3) (QFR)
 Attributes: BIMO Required Courses;

LAB Section: 08  W 1:00 pm - 5:00 pm

CHEM 251 (F)  Organic Chemistry: Intermediate Level
This course is a continuation of Chemistry 156 and it concludes the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include radical chemistry, an introduction to mass spectrometry and ultraviolet spectroscopy, the theory and chemical reactivity of conjugated and aromatic systems, the concepts of kinetic and thermodynamic control, an extensive treatment of the chemistry of the carbonyl group, alcohols, ethers, polyfunctional compounds, the concept of selectivity, the fundamentals of organic synthesis, an introduction to carbohydrates, carboxylic acids and derivatives, acyl substitution reactions, amines, and an introduction to amino acids, peptides, and proteins. The coordinated laboratory work includes application of the techniques learned in the introductory level laboratory, along with new functional group analyses, to the separation and identification of several unknown samples. Skills in analyzing NMR, IR, and MS data are practiced and further refined.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on midterm exams, problem sets, laboratory performance, including written lab reports, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 156 or permission of instructor
Enrollment Limit: 16/lab
Expected Class Size: 100
Distributions: (D3)
Attributes: BIMO Required Courses;

CHEM 255 (F)  Organic Chemistry: Intermediate Level--Special Laboratory Section
This course is a continuation of CHEM 156 and contains the same material as CHEM 251 except for the laboratory program described below: The aim of this advanced laboratory section is to enrich and enhance the laboratory experiences of motivated students of recognized ability by providing a laboratory program that more closely resembles the unpredictable nature and immediacy of true chemical research. Students synthesize, isolate, and characterize (using a range of modern physical and spectroscopic techniques) a family of unknown materials in a series of experiments constituting an integrated, semester-long investigation. A flexible format is employed in which the students are responsible for helping to plan the course of their
laboratory work based upon discussions with the instructor about the previous week's experimental results. Students are drawn from CHEM 156 with placement based upon student selection and nomination by the CHEM 156 instructor. Participants attend their regular CHEM 251 lecture but attend the special laboratory section instead of a CHEM 251 laboratory section.

**Class Format:** lecture, three hours per week; laboratory, four hours per week; weekly one-hour discussion

**Requirements/Evaluation:** evaluation is based on the requirements for the CHEM 251 lecture and performance in this special laboratory section including written laboratory reports and participation in discussions

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores

**Expected Class Size:** 12

**Department Notes:** course was developed under a grant from the Ford Foundation

**Distributions:** (D3)

---

**CHEM 256 (S) Advanced Chemical Concepts**

This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, kinetics, and nuclear chemistry. Laboratory work includes experiments involving synthesis, characterization, and reactivity studies of coordination and organic complexes, spectroscopic analyses, thermodynamics, electrochemistry, kinetics, and nuclear chemistry.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on homework assignments, laboratory work, quizzes, midterm exam and a final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** CHEM 251/255, or permission of instructor

**Enrollment Limit:** 16 lab

**Expected Class Size:** 100

**Department Notes:** for the BIMO concentration, CHEM 256 not required if CHEM 155 was taken

**Distributions:** (D3)

**Attributes:** BIMO Required Courses;

---

**CHEM 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)**

Crosslistings: BIOL319 / CHEM319 / MATH319 / PHYS319 / CSCI319
Secondary Crosslisting

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Core Courses; BIMO Interdepartmental Electives;

Not offered current academic year

CHEM 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Crosslistings: BIOL321 / CHEM321 / BIMO321

Secondary Crosslisting

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;
CHEM 322 (S)  Biochemistry II: Metabolism  (QFR)

Secondary Crosslisting

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 64

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;

CHEM 324 (S)  Enzyme Kinetics and Reaction Mechanisms

Enzymes are complex biological molecules capable of catalyzing chemical reactions with very high efficiency, stereo-selectivity and specificity. The study of enzymatically-catalyzed reactions gives insight into the study of organic reaction mechanisms in general, and into the topic of catalysis especially. This course explores the methods and frameworks for determining enzymatic reaction mechanisms. These methods are based on a firm foundation of organic reaction mechanisms and chemical kinetics. We will investigate the major types of biochemical reactions, focusing on their catalytic mechanisms and how those mechanisms can be elucidated. We will lay the foundation for this mechanistic consideration with discussion of transition state theory, structure-reactivity relationships, steady state and pre-steady kinetics, use of isotopes, genetic modification, and other tools for probing enzymatic reactions. We will also examine the catalytic roles of a variety of vitamins and cofactors.

Class Format: lecture, three hours per week
CHEM 326 (F)  Chemical Biology: Discoveries at the Interface

Complex biological behavior is driven by the chemistry of biological molecules including secondary messengers, lipids, proteins, and nucleic acids. Chemists and biologists have recognized that manipulating the chemistry of these systems affords a powerful method to regulate and study cellular activity. The burgeoning field of chemical biology encompasses these efforts. This course introduces the tools of chemical biology, focusing on how small chemical molecules directed at biological systems facilitate answering important questions in biology. Building upon this foundation of chemical and biological techniques, this course will study current applications of these techniques through case studies of recent discoveries. Example topics that may be covered include bioconjugation, chemical genetics, extending the genetic code, activity-based probes and fragment-based drug discovery.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on class participation, short papers, examinations, and a final research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM/BIOL/BIMO 321
Enrollment Limit: 19
Expected Class Size: 16
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives;

CHEM 335 (F)  Inorganic/Organometallic Chemistry

This course covers fundamental aspects of the chemistry of transition metals and main group elements and highlights how these properties are key to understanding the roles of these elements in a range of applications, from the catalysis of synthetic organic transformations, the functions of enzymatic processes, the production of commodity chemicals such as plastics, to the actions of metal-based drugs such as cis-platin. The course introduces concepts of symmetry and group theory, and applies them in a systematic approach to the study of the structure, bonding, and spectroscopy of coordination and inorganic compounds. The course also covers the kinetics and mechanism of selected inorganic and organometallic reactions. Through exploration of primary literature and review articles we will discuss recent developments and applications in inorganic chemistry, such as finding molecular solutions to the capture of solar energy, to cancer treatments and to optimizing industrial-scale reactions.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on problem sets, exams, presentations, and group-based literature reviews
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 155 or 256 and 251/255
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D3)
CHEM 336 (F) Materials Chemistry

Materials Science focuses on the study of bulk physical properties such as hardness, electrical conductivity, optical behavior, and elasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and organic electronics. We'll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on problem sets, reviews of research articles, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 155 or 256 and 251/255
Enrollment Limit: 24
Expected Class Size: 16
Distributions: (D3)
Attributes: MTSC Courses
Not offered current academic year

CHEM 338 (S) Bioinorganic Chemistry: Metals in Living Systems

Bioinorganic chemistry is an interdisciplinary field that examines the role of metals in living systems. Metals are key components of a wide range of processes, including oxygen transport and activation, catalytic reactions such as photosynthesis and nitrogen-fixation, and electron-transfer processes. Metals perform regulatory roles and stabilize the structures of proteins. In medical applications, the metals are central to many diagnostic and therapeutic tools. To understand the role metals in these biological processes, we will cover principles of coordination chemistry: topics such as structure and bonding, spectroscopic methods, electrochemistry, kinetics and reaction mechanisms. Building on this fundamental understanding of the nature of metals, students explore topics of current interest in the field.

Class Format: lecture and tutorial-style meetings, 3 hours per week
Requirements/Evaluation: evaluation based on problem sets, two exams, tutorial participation, a class presentation, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 155 or CHEM 256 and 251/255
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives;
Not offered current academic year

CHEM 341 (S) Toxicology and Cancer

Crosslistings: CHEM341 / ENVI341

Primary Crosslisting

What is a poison and what makes it poisonous? Paracelcus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of
cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

**Class Format:** lecture, three times per week

**Requirements/Evaluation:** evaluation is based on two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

**Enrollment Limit:** 30

**Expected Class Size:** 24

**Department Notes:** satisfies the Natural World requirement for the Environmental studies concentration

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives; ENVI Natural World Electives; PHLH Biomedical Determinants of Health

Not offered current academic year

**CHEM 342 (S) Synthetic Organic Chemistry (WI)**

The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester's final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. Laboratory sessions introduce students to techniques for synthesis and purification of natural products and their synthetic precursors.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on problem sets, midterm exams, laboratory work, a final project, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CHEM 256 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Distributions:** (D3) (WI)

**Attributes:** BIMO Interdepartmental Electives;

Spring 2019

LEC Section: 01  TR 9:55 am - 11:10 am  David P. Richardson
LAB Section: 02  W 1:00 pm - 5:00 pm

**CHEM 344 (S) Physical Organic Chemistry**

This course extends the background derived from previous chemistry courses to the understanding of organic reaction mechanisms. Correlations between structure and reactivity are examined in terms of kinetic and thermodynamic parameters including: solvent effects, isotope effects, stereochemical specificity, linear free energy relationships, acid/base theory, delocalized bonding, and aromaticity. For the first 6 weeks, the class meets once a week for an introductory lecture. A second tutorial meeting between the instructor and 2 other students occurs early the following week, for example during the laboratory time period. During this time, students work through and present solutions to an assigned problem set. For the remaining 6 weeks, students execute a self-designed set of laboratory experiments that revolve around physical organic methods. Students present and critique results each week (in the hour time slot). The experiments culminate in a final paper.

**Class Format:** tutorial, 90 minutes per week; lecture, one hour per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on problem sets, participation, laboratory work, and a final laboratory paper
CHEM 348 (F) Polymer Chemistry

From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture, two meetings per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on problem sets, participation, exams, laboratory work, and a final project
Prerequisites: CHEM 251/255
Enrollment Limit: 10
Enrollment Preferences: Chemistry majors
Expected Class Size: 10
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives;
Not offered current academic year

CHEM 361 (F) Quantum Chemistry and Chemical Dynamics

This course provides an introduction to quantum mechanics which serves as the basis for understanding atomic and molecular structure as well as spectroscopic methods. This leads to a discussion of chemical kinetics and molecular reaction dynamics in the gas phase and in solution. Computational chemistry methods are used to illustrate chemical concepts, to interpret experimental data, and to extend hypotheses. Applications of these principles are chosen from contemporary research fields, including polymer chemistry, photochemistry, atmospheric chemistry, and solid and liquid state chemistry. Quantitative laboratory experiments and consultation with the scientific literature provide the background necessary for carrying out an independent theoretical or experimental project.

Class Format: lecture, three hours per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on class participation, problem sets, exams, laboratory work, and an independent project.
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 155 or 256
Enrollment Limit: none
Expected Class Size: 12
Distributions: (D3)

Crosslistings: ENVI364 / CHEM364
This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, laboratory work, and an independent project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

LAB Section: 02 M 1:00 pm - 5:00 pm

CHEM 366 (S) Thermodynamics and Statistical Mechanics

The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

Class Format: lecture, three hours per week; laboratory, four hours per week; discussion, one hour per week

Requirements/Evaluation: evaluation is based on class participation, oral presentations, problem sets, laboratory work, and an independent project.

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHEM 155 or 256, and basic knowledge of applied integral and differential calculus

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D3)

CHEM 367 (S) Biophysical Chemistry

This course is designed to provide a working knowledge of basic physical chemistry to students primarily interested in the biochemical, biological, or medical professions. Topics of physical chemistry are presented from the viewpoint of their application to biochemical problems. Three major areas of biophysical chemistry are discussed: 1) the conformation of biological macromolecules and the forces that stabilize them; 2) techniques for the study of biological structure and function including spectroscopic, hydrodynamic, electrophoretic, and chromatographic; 3) the behavior of biological macromolecules including ligand interaction and conformational transitions.
CHEM 368 (S)  Computational Chemistry and Molecular Spectroscopy  (QFR)
This course provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in the laboratory session and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

Class Format: tutorial, meeting time to be determined
Requirements/Evaluation: evaluation is based on tutorial participation, presentations, and submitted papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHEM 361 or equivalent background in Physics
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D3) (QFR)

Spring 2019
TUT Section: T1  TBA  Enrique Peacock-López

CHEM 393 (F)  Junior Research and Thesis: Chemistry
Chemistry junior research and thesis.
Class Format: independent study
Extra Info: may not be taken on a pass/fail basis
Distributions: (D3)

Fall 2018

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Chinese Major

Consisting of a core language curriculum and a variety of courses in the various disciplines represented in the department, the Chinese major track enables students to achieve proficiency in aural comprehension, speaking, reading, and writing in Mandarin Chinese, as well as to understand the cultural traditions and diversity of the Chinese-speaking regions in the world. Majors in Chinese are expected to function as responsible global citizens, able to use the Chinese language to interact and collaborate in their community and the globalized world, while remaining keenly aware and respectful of varying cultural beliefs, norms, and sensitivities.

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate-High level in writing based on the ACTFL proficiency guidelines.
- Understand the basic grammar and vocabulary of Classical Chinese.
- Master intercultural skills to competently navigate a wide range of social and cultural contexts.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Acquire research, problem-solving, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as
follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Chinese are indicated below:

**Chinese Major**

- Four additional semesters of Chinese language (300-level or higher).
- One semester of Classical Chinese.
- One approved course in Chinese literature, linguistics, or culture.

**STUDY ABROAD**

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

- Course title and description, complete syllabus including readings/assignments, and exams or other written work.
- **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**
  - Yes, maximum of four courses.
- **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**
  - Approved courses only.
- **Are there specific major requirements that cannot be fulfilled while on study away?**
  - No.
- **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**
  - Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.
  - **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**
    - There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

**THE DEGREE WITH HONORS**

Students interested in writing an honors thesis in Chinese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.
Students admitted to the program should register for CHIN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

CHIN 101 (F)  Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

**Requirements/Evaluation:** evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Extra Info:** students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** none

**Expected Class Size:** 12

**Distributions:** (D1)

Fall 2018

CON Section: 02  MWF 9:00 am - 9:50 am  Cornelius C. Kubler

CON Section: 03  MWF 10:00 am - 10:50 am  Cornelius C. Kubler

CHIN 102 (S)  Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

**Requirements/Evaluation:** evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Extra Info:** students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** CHIN 101 or equivalent

**Enrollment Limit:** none

**Expected Class Size:** 12

**Distributions:** (D1)
CHIN 131 (S) Basic Cantonese

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within China has been rising steadily over the past few decades. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese and which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions and discussion

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and Asian Studies majors who have no prior background in Cantonese

Expected Class Size: 12

Distributions: (D1)

Not offered current academic year

CHIN 134 (S) Leaving the World Behind: The Literature of Reclusion  (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Primary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, responses, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI. Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

Spring 2019
TUT Section: T1    TBA     Christopher M. B. Nugent

CHIN 140 (F) Introduction to Traditional Chinese Literature
Crosslistings: CHIN140 / COMP140

Primary Crosslisting
With a written record stretching over 3000 years, China's literary cultures are some of the richest and most varied in human history. Their influence continues to be felt not only in modern China, but also throughout much of the world. This course examines the origins and development of the different literatures of China from their earliest stages up until the end of the imperial system in 1911. We will read texts ranging from the Analects of Confucius to the medieval poetry of the Tang dynasty, from Buddhist sutras to plays about prostitutes and singing girls. An invulnerable monkey god may make an appearance to sow chaos as well. He's difficult to pin down. Some important themes will include: the role of the individual versus that of the community, responses to catastrophe and disorder, the fantastic, the articulation of the self through literature, and ways of dealing with historical and literary legacies. All readings are in English translation.

Class Format: lecture
Requirements/Evaluation: five short writing assignments (2 pages each), one paper (6-7-pages), and a final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D1)

Not offered current academic year

CHIN 152 (S) Introduction to Taiwanese/Southern Min Language and Culture
This course, which includes a required, fully-funded two-week field trip to Taipei, Quemoy (Jinmen), and Xiamen over Spring Break, constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the major Chinese "dialects," this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese. Required Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund.

Class Format: seminar
Requirements/Evaluation: classroom performance, homework, quizzes, tests, a journal and term paper based on the field trip, and an oral and written final exam; Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CHIN 301 or permission of the instructor
Enrollment Limit: 8
Enrollment Preferences: if course is over-enrolled, students will be selected based on a statement of rationale and goals for wishing to participate, with CHIN and ASST majors receiving priority
Expected Class Size: 8
CHIN 201 (F) Intermediate Chinese
These two courses are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, and writing. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Class Format: drill/discussion/reading
Requirements/Evaluation: evaluation will be based on classroom performance, homework, daily quizzes, regular written and oral unit tests, and a final exam

Extra Info: not available for the fifth course option
Prerequisites: CHIN 102 or permission of instructor
Enrollment Limit: none
Expected Class Size: 12
Distributions: (D1)

CHIN 202 (S) Intermediate Chinese
These two courses are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, and writing. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Class Format: drill/discussion/reading

Expected Class Size: 12
Distributions: (D1)

CHIN 214 (F) Foundations of China
Crosslistings: ANTH212 / CHIN214 / REL218 / HIST214 / GBST212
Primary Crosslisting
This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script
(a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Class Format:** lecture

**Requirements/Evaluation:** short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** Chinese majors, History majors, Religion majors, and Anthropology majors

**Expected Class Size:** 25

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under CHIN; meets Division 2 requirement if registration is under ANTH, REL, HIST OR GBST

**Attributes:** HIST Group B Electives - Asia

---

**CHIN 225 (F) The Fantastic in Chinese Literature**

**Crosslistings:** CHIN225 / COMP225

**Primary Crosslisting**

From the famous human/butterfly metamorphosis in the Daoist text Zhuangzi to contemporary writer Liu Cixin's award-winning "Three Bodies Problem," the "fantastic" has always been part of Chinese literature that pushes the boundary of human imagination. Readers and writers create fantastic beasts (though not always know where to find them), pass down incredible tales, assign meanings to unexplainable phenomena, and reject--sometimes embrace--stories that could potentially subvert their established framework of knowledge. Meanwhile, the "fantastic" is also historically and culturally contingent. What one considers "fantastic" reveals as much about the things gazed upon as about the perceiving subject--his or her values, judgment, anxiety, identity, and cultural burden. Using "fantastic" literature as a critical lens, this course takes a thematic approach to the masterpieces of Chinese literature from the first millennium BCE up until twenty-first century China. We will read texts ranging from Buddhist miracle tales to the avant-garde novel about cannibalism, from medieval ghost stories to the creation of communist superheroes during the Cultural Revolution. The topics that we will explore include shifting human/non-human boundaries, representations of the foreign land (also the "underworld"), the aestheticization of female ghosts, utopia and dystopia, and the fantastic as social criticism and national allegory. All materials and discussions are in English.

**Class Format:** seminar

**Requirements/Evaluation:** participation, weekly posting, 3 writing assignments, final paper, oral presentation

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Distributions:** (D1)

**CHIN 226 (S) Chinese Film and Its Significant Others**

**Crosslistings:** CHIN226 / COMP296
Primary Crosslisting

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film’s social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors’ notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: lecture

Requirements/Evaluation: attendance and participation, short response papers (1-2 pages each), one final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

Expected Class Size: 15

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

CHIN 227 (S) Made in China or Making “China”?: Twentieth-Century Chinese Performative Culture

Crosslistings: THEA 227 / CHIN 227 / COMP 227

Primary Crosslisting

This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of ‘China.” Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed “China” on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as “traditional culture” and a “national essence” in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of “Inventing Tradition on the World Stage,” “Acting the Right Part,” and “Performing the Nation.” Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

CHIN 237 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films (WI)

Crosslistings: CHIN 237 / COMP 297

Primary Crosslisting
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant-readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors

Expected Class Size: 10

Distributions: (D1) (WI)

Not offered current academic year

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.

All readings in English with some examples in Chinese.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D1)

Attributes: EXPE Experiential Education Courses; Linguistics

Not offered current academic year

CHIN 253 (F) "Disease" in Modern Chinese Literature and Culture

Crosslistings: WGSS255 / CHIN253 / COMP254

Primary Crosslisting

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how
metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** regular in-class presentation, three short papers (3-5 pages) and one final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Distributions:** (D1)

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under COMP or CHIN

**Attributes:** PHLH Bioethics + Interpretations of Health

**CHIN 272 (S) The History and Mythology of Chinese Scripts**

Crosslistings: COMP272 / CHIN272

**Primary Crosslisting**

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** quizzes, short writing assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 15

CHIN 312 (S) Introduction to Classical Chinese

This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages

Enrollment Limit: none

Expected Class Size: 12

Distributions: (D1)

CHIN 401 (F) Advanced Chinese

This course is designed to enhance the Chinese language proficiency of students who are already at relatively advanced levels. A wide assortment of materials is used including (for speaking/comprehension) audiotapes, videotapes, and films featuring Chinese speakers from various segments of society; and (for reading) newspaper and magazine articles dealing with Chinese politics and economics as well as selections from modern Chinese literature. Conducted in Mandarin.

Class Format: two 75-minute classes plus a conversation session
CHIN 402 (S) Advanced Chinese
This course is designed to enhance the Chinese language proficiency of students who are already at relatively advanced levels. A wide assortment of materials is used including (for speaking/comprehension) audiotapes, videotapes, and films featuring Chinese speakers from various segments of society; and (for reading) newspaper and magazine articles dealing with Chinese politics and economics as well as selections from modern Chinese literature. Conducted in Mandarin.

Class Format: two 75-minute classes plus a conversation session

Requirements/Evaluation: evaluation will be based on classroom performance, short essays every other week, homework, quizzes, tests, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

CON Section: 03 W 2:10 pm - 3:00 pm Cecilia Chang

CHIN 413 (S) Intermediate Classical Chinese: Ideas of Authority in Classical Chinese Literature
This course builds on the foundation established in Introduction to Classical Chinese (CHIN 412) by examining longer and more complicated texts from the Warring States (403-221 BCE) and Han (206 BCE-220 CE) periods. While our focus will be on careful linguistic analysis and translation, we will also discuss these texts in terms of their philosophical ideas, rhetorical methods, and cultural and historical contexts. The works we will read include some of the foundational texts of Chinese philosophical and political thought, including the Confucian Analects, the Mencius, and the Zhuangzi. While this course is a continuation of Chinese 312, students with prior work in Classical Chinese (through study abroad, attending high school in a Chinese speaking region, etc.) are welcome as well.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 312 or prior coursework in Classical Chinese

Enrollment Limit: none

Expected Class Size: 10

Distributions: (D1)

Not offered current academic year
CHIN 420 (S) Masterpieces in Modern Chinese Literature

"To modernize the Chinese people, it has to start from the modernization of the genre 'novel.'" Liang Qichao, the famous Chinese intellectual in the early twentieth century, envisioned a collapsing China to be salvaged by, first, its modernized literature. Indeed, throughout China's long century of struggle, exploration, and transformation, literature has been playing a crucial role in negotiating (the consequence of) modernity, fueling revolution, investigating human interiority, constructing national identity, and coping with trauma and diaspora. This course introduces students to the masterpieces in modern Chinese literature and their representations of critical events in twentieth-century Chinese history. We will read novels, poems, prose pieces, and plays, and pay close attention to the language and literary devices that the authors use for storytelling, characterization, and self-representation. The class is organized by themes, such as, for example, modernity, revolution, diaspora, root-seeking, trauma, science fiction and so on. Through class discussions, writing assignments, and oral presentation on the final project, this course will further develop students' language proficiency, especially reading ability and effective communication in a formal setting. This course also trains students to be a critical reader who will be able to not only analyze the key moments and literary masterworks of modern China but also reflect on the complexity of Chinese culture vis-à-vis its tradition and the global context. The class will meet in one large group meeting once a week and the second meeting will be in smaller groups. The course is conducted in Mandarin.

Class Format: lecture/discussion, the class will meet in one large group meeting once a week and the second meeting will be in smaller groups

Requirements/Evaluation: participation, presentations, quizzes, discussion questions posting, 3 writing assignments, final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

LEC Section: 01 TF 1:10 pm - 2:25 pm Lu Kou

CHIN 422 (S) Old Shanghai, New Shanghai (WI)

Crosslistings: ASST122 / CHIN422

Primary Crosslisting

Once nicknamed as "Paris of the East," Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China's modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). The course is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Class Format: tutorial

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
CHIN 425 (F) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format and collaborating with a graduate program in Chinese pedagogy in Taiwan, this course is designed to provide opportunities for Williams students to engage in direct conversation with a language partner on course assignments and for the MA students in Taiwan to gain practical training in helping non-native speakers of Mandarin Chinese develop linguistic proficiency at the levels of Advanced Low to the Advanced Mid based on the ACTFL proficiency guidelines.

Class Format: seminar; semi-tutorial format; students will meet as a large group periodically for linguistic development and two to three people groups regularly for discussions

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3-5 pages) and one final paper (5-7 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHIN 402 or permission of instructor
**Enrollment Limit:** 20  
**Enrollment Preferences:** current or prospective Chinese or Asian Studies majors  
**Expected Class Size:** 12  
**Distributions:** (D1)

CLASSICS (Div I)
Chair: Professor Edan Dekel

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization.

Classics: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

Classical Civilization: (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Two additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

Senior Colloquium: Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

Classical Civilization Courses: The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.
STUDY ABROAD

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

CLAS 101 (S) The Trojan War (WI)
Crosslistings: COMP107 / CLAS101

Primary Crosslisting

The Trojan War may or may not have taken place near the end of the Bronze Age (c. 1100), but it certainly provided poets, visual artists, historians, philosophers, and many others in archaic and classical Greece (750-320) with a rich discourse for engaging questions about gender, exchange, desire, loss, and remembrance, and about friendship, marriage, family, army, city-state and religious cult. This discourse of "The Trojan War" attained a remarkable coherence yet also thrived on substantial variations and changes over the 300-400 years of Greek literature we will explore, a dynamic of change and continuity that has persisted through the more than two millenia of subsequent Greek, Roman, Western, and non-Western participation in this discourse. More than half of the course will be devoted to the Homeric Iliad and Odyssey; we will also read brief selections from lyric poetry (e.g. Archilochus, Sappho of Lesbos), some selections from the historians Herodotus and Thucydides, and several tragedies (e.g. Aeschylus' Oresteia, Sophocles' Ajax, Euripides' Trojan Women). We may briefly consider a few short selections from other ancient Greek and Roman authors and/or one or two modern poets. We will also watch several films, e.g. Troy, Oh Brother, Where Art Thou? Gods and Monsters, Fight Club, In the Bedroom, Grand Illusion.

Class Format: lecture and discussion

Requirements/Evaluation: evaluation will be based on a series of short papers involving close textual analysis, two 5-page papers, and contributions
to class discussion

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors in Classics and Comparative Literature, with attention also given to assuring a balance of class years and majors

Expected Class Size: 19

Distributions: (D1) (WI)

Attributes: MAST Interdepartmental Electives;

Not offered current academic year

CLAS 102 (F) Roman Literature: Foundations and Empire

Crosslistings: CLAS102 / COMP108

Primary Crosslisting

In the first book of Vergil's Aeneid, the god Jupiter prophesies the foundation and the greatness of Rome: "I place no limits on their fortunes and no time; I grant them empire without end." Yet elsewhere in this epic account of Rome's origins, this promise of unlimited power for the descendants of Romulus seems to be seriously abridged. Some readers have seen, not only in the Aeneid but throughout classical Roman literature, a persistent tendency to inscribe the decay and disintegration of Roman power into the very works that proclaim and celebrate Roman preeminence. This course explores the ancient Romans' own interpretations of their past, their present, and their destiny: the humble beginnings of their city, its rise to supreme world power, and premonitions of its decline. Related topics for our consideration will include Roman constructions of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonwealth, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. All readings will be in translation.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on short written assignments, midterm and final exams with essays, and contributions to class discussion

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-year students and sophomores and majors in Classics and Comparative Literature

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

CLAS 203 (F) History of Ancient Greek Philosophy

Crosslistings: PHIL201 / CLAS203

Secondary Crosslisting

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that some people are natural slaves. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. We will then read some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, possibly supplemented by one or more exams
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 20-40
Department Notes: philosophy majors must take either Phil 201 or Phil 202 (and can take both)

CLAS 205 (S)  Ancient Wisdom Literature
Crosslistings: JWST205 / REL205 / COMP217 / CLAS205

Secondary Crosslisting
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible’s canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two longer papers
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under CLAS or COMP
Attributes: JWST Core Electives
Not offered current academic year

CLAS 207 (F)  From Adam to Noah: Literary Imagination and the Primeval History in Genesis
Crosslistings: COMP250 / REL207 / JWST207 / CLAS207

Secondary Crosslisting
How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation and several writing assignments
Extra Info: core course for COMP
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students who have already taken a course in Biblical literature
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under COMP or CLAS
Attributes: JWST Core Electives

CLAS 210 (F) Art and Experience in Ancient Rome
Crosslistings: ARTH210 / CLAS210
Primary Crosslisting
To see and be seen—it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Class Format: lecture
Requirements/Evaluation: attendance and preparation, a mid-term, a final, and a medium-length paper
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D1)

CLAS 211 (F) Performing Greece
Crosslistings: CLAS211 / THEA211 / COMP248
Primary Crosslisting
Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators as written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. From the Homeric epics and the masterpieces of Greek tragedy and comedy to the speeches and dialogues of Demosthenes, Thucydides, and Plato, we will survey the evidence for the musical, visual, and embodied aspects of Greek literature. At the same time, we will reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imagination of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek civilization, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. In addition to a wide selection from Greek poetry, drama, and prose, our readings will include works by ancient and modern theorists of performance and culture. All readings are in translation.
CLAS 121 (F) The Art of Friendship

Crosslistings: CLAS212 / COMP267 / REL267

Primary Crosslisting

The idea of friendship has captivated poets, philosophers, and their audiences for over three millennia. The subtle dynamics of this fundamental relationship between humans have been a source of inspiration, consolation, and consternation for countless writers and readers. What are the different types of friendship? How does one make a friend, and what makes a good friend? How does a friend differ from an acquaintance, an ally, an accomplice, an enemy? Can the beloved also be a friend? Ancient Greek and Latin writers took up these and other questions about friendship in philosophical dialogues and treatises, epic and lyric poems, tragic and comic plays, oratory, and correspondence. This course will explore ancient theories and representations of friendship through readings from many of the most important texts and authors of antiquity, including Gilgamesh, the Hebrew Bible, Homer, Sappho, Euripides, Plato, Aristotle, Cicero, Virgil, Seneca, and the Epistles of Paul. We will also consider the wide-ranging responses to these meditations and depictions in later traditions from the Middle Ages to modernity, in such writers as Heloise and Abelard, Aelred of Rievaulx, Aquinas, Montaigne, Ralph Waldo Emerson, Emily Dickinson, Elizabeth Bishop, Jack Kerouac, and Susan Sontag. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written assignments, and a final paper/project
Prerequisites: none
Enrollment Limit: 25
Expected Class Size: 25
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under REL
Not offered current academic year

Crosslistings: CLAS215 / REL215

Secondary Crosslisting

In this course, students will be introduced to the New Testament through an exploration of how the New Testament became--and continues to be produced as--a book. We will start by examining the letters of Paul--its earliest texts--in terms of the habits and traditions of ancient letter-writing. We will similarly place the other texts of the New Testament in the context of Greek, Roman, and Jewish literary traditions and conventions. As the semester moves forward, we will examine how the New Testament itself became a material object--a book--and how its changing material status shaped its meaning and functioning. We will see the New Testament transform from a library of separate scrolls and/or codices (a library which was occasionally bound together into a single codex), to a luxury object in the Middle Ages, to a cheap printed object in the wake of the printing revolution of the 19th century, to its modern life as both a highly marketed object and a searchable digital "thing" in online spaces and mobile apps.

Class Format: seminar
Requirements/Evaluation: active preparation and participation, two short papers (3-5 pages), midterm, and final exam
Prerequisites: none
**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 10-12

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS

**CLAS 219 (S) Judaism Under Ancient Greek and Roman Imperialisms**

**Crosslistings:** JWST219 / CLAS219 / REL219

**Secondary Crosslisting**

How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judeans responded to these imperial pressures, especially as those responses articulated "hybrid" versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

**Class Format:** seminar

**Requirements/Evaluation:** active preparation and participation, short reading response papers (1-page), midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 10-12

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under CLAS

*Not offered current academic year*

**CLAS 221 (F) Technologies of Religion in the Early Christian World**

**Crosslistings:** CLAS221 / REL221

**Secondary Crosslisting**

What is the relationship between religion and technology? How do various technologies affect the production and distribution of religious knowledge? Facilitate communication and interaction with the divine? Transform the religious self? In this course, we will look specifically at the uses and effects of technology on religion in the early Christian world. While focused most directly on the influence of technology on the development of early Christianity, the course will also explore the place of technology in coterminous movements: in "pagan" sacrifice, Neoplatonic divination, and Stoic practices of the self. By examining technologies of text production, sacrifice, memory, and the self, the course will shed light on early Christianity and its competing religious and philosophical movements, as well as on the nature of technology's relationship to religion.

**Class Format:** seminar

**Requirements/Evaluation:** active preparation and participation, short reading response papers (1 page), and a final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 10-12

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS

*Not offered current academic year*
Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, a midterm, a final exam, and a medium-length paper

Attributes: HIST Group C Electives - Europe and Russia; HIST Group P Electives - Premodern

Not offered current academic year
CLAS 226 (S)  The Ancient Novel

Pirates, prostitutes, witches, and donkeys: the novels of ancient Greece and Rome often surprise their modern readers with a striking blend of humor, violence, and eroticism. From damsels in distress and daring rescues to impossible journeys and magical transformations, this course will consider these remarkable and varied texts within their own literary and cultural contexts. By reading the works of such authors as Longus, Lucian, Apuleius, and Heliodorus, we will survey the different forms of extended prose fiction that have traditionally been called the ancient "novel." We will confront the challenges of defining the genre itself, and consider both its ancient literary heritage and its later reception and afterlife. We will also explore the ways in which these texts engage with the complex and diverse world of the ancient Mediterranean, paying close attention to the representation of gender, sexuality, ethnicity, and cultural identity. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: class participation, in-class presentations, brief reading responses (1-page), and a final paper (8-10 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none, although some prior knowledge of the ancient Mediterranean will be useful
Enrollment Limit: 19
Enrollment Preferences: Classics and Comparative Literature majors
Expected Class Size: 19
Distributions: (D1)

CLAS 230 (F)  From Alexander to Cleopatra: Remodeling the Mediterranean World

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

Class Format: lecture
Requirements/Evaluation: class participation, quizzes, midterm, final exam, and one medium-length paper
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: students with an interest in the ancient Mediterranean world and in the history of western art and architecture
Expected Class Size: 35
Distributions: (D1)

CLAS 235 (S)  The Garden in the Ancient World

Crosslistings: ENVI232 / REL235 / CLAS235 / COMP235
Primary Crosslisting

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and a final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under CLAS, COMP or ENVI; meets Division 2 requirement if registration is under REL

Spring 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Nicole G. Brown

CLAS 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Crosslistings: ARTH530 / CLAS236

Secondary Crosslisting

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallermé, "L'Apres midi d'une faun,"Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: seminar

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second year graduate students, then first year graduate students, then advanced undergraduate students

Expected Class Size: 12

Department Notes: pre-1600 undergraduate requirement

Distributions: (D1)

Attributes: ARTH pre-1600 Courses;
CLAS 241 (S)  Sex and Gender in Ancient Greece and Rome  (WI)
Crosslistings: CLAS241 / COMP241 / WGSS241

Primary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

Expected Class Size: 10

Distributions: (D1) (WI)

Spring 2019

TUT Section: T1  TBA  Amanda R. Wilcox

CLAS 242 (S)  The Country and the City in the Classical World
Crosslistings: ANTH242 / CLAS242 / ENVI242

Primary Crosslisting

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitrivius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 25

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Distributions: (D1)
CLAS 248 (S) Greek Art and the Gods
Crosslistings: CLAS248 / REL216 / ARTH238

Secondary Crosslisting
In the Iliad, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympus, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: lecture and discussion
Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: preference will be given to pre-registered Art-History majors needing to fulfill the pre-1400 requirement; otherwise, the course is open to any interested student
Expected Class Size: 30

CLAS 306 (S) The Good Life in Greek and Roman Ethics (WI)
Crosslistings: CLAS306 / PHIL306

Secondary Crosslisting
Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to Aristotle’s Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero’s On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Class Format: seminar
Requirements/Evaluation: several short response pieces. A final paper of 10-15 pages
Extra Info: may not be taken on a pass/fail basis
Enrollment Limit: 9
Enrollment Preferences: juniors & seniors & students who can demonstrate an interest in the subject matter of the class; there will not be any
preference purely on the basis of major; final selection for the course will be made on the basis of an interview with the instructor

Expected Class Size: 9

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under CLAS; meets Division 2 requirement if registration is under PHIL

Attributes: PHIL History Courses;

Not offered current academic year

CLAS 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece (WI)

Crosslistings: CLAS323 / HIST323 / LEAD323

Primary Crosslisting

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

Enrollment Limit: 19

Expected Class Size: 12

Distributions: (D1) (WI)

Distribution Notes: meets Division 2 requirement if registration is under HIST or LEAD; meets Division 1 requirement if registration is under CLAS

Attributes: HIST Group C Electives - Europe and Russia; HIST Group P Electives - Premodern; LEAD Facets or Domains of Leadership;

CLAS 466 (S) Hellenistic Art and the Beginning of Art History

Crosslistings: ARTH466 / CLAS466

Secondary Crosslisting

In the wake of Alexander the Great's extension of the borders of the classical world all the way to the banks of the Indus River in the fourth century BCE, the small city-states of the Greek peninsula were replaced by far flung kingdoms as important centers of power and culture. Vastly increased trade and the movement of individuals between Greece, Egypt, and the Near and Middle East encouraged a new internationalism marked by a cross-cultural hybridization of religion, and innovations in philosophy, medicine, literature and art. This cosmopolitan attitude brought about a revolution in artistic ideas and forms centered on the social and ethnic diversity of human experience. Royal patrons, and wealthy private citizens including an increasing number of women, commissioned artworks for cities, sanctuaries, tombs, palaces, and estates on a scale rarely seen before. With the rise of Rome in the west, plundered artworks of earlier periods soon became the desired objects of wealthy collectors, and commissions in the Hellenistic style continued well into the Roman period. In this course we'll look closely at influential works of art in bronze, marble, fresco, and mosaic, and consider their archaeological, social and political contexts. We'll discuss the changing status of artists as patronage shifts to include the private as well as the public realm, and research the broader philosophical, religious, literary and cultural forces that encouraged artistic innovations of the fourth century BCE through first century CE. Reading material includes ancient literature in translation, recent surveys of Hellenistic art, and recent critical essays.
Class Format: seminar
Requirements/Evaluation: students will lead discussions based on selected readings; a 5- to 7-page midterm paper and 20 minute oral report will form the basis for an 18- to 20-page research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Art majors, and then to students of any major interested in art and thought in the ancient Mediterranean world, with permission of instructor
Expected Class Size: 14
Department Notes: ARTH Seminar Requirement
Distributions: (D1)

Spring 2019
LEC Section: 01  TBA  Edan Dekel
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

**MAJOR**

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

**Classics:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

**Classical Civilization:** (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

**Senior Colloquium:** Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

**Classical Civilization Courses:** The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a
given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.

**STUDY ABROAD**

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

**CLGR 101 (F) Introduction to Greek**

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

**Class Format:** recitation/discussion

**Requirements/Evaluation:** evaluation will be based on frequent quizzes, tests, and a final exam

**Extra Info:** credit granted only if both semesters (CLGR 101 and 102) are taken

**Prerequisites:** none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

**Enrollment Limit:** 15

**Expected Class Size:** 8-10

**Distributions:** (D1)
CLGR 102 (S) Introduction to Greek
This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam
Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken
Prerequisites: CLGR 101 or permission of department
Enrollment Limit: 15
Expected Class Size: 8-10
Distributions: (D1)

Spring 2019
LEC Section: 01    MWF 11:00 am - 12:15 pm     Kerry A. Christensen

CLGR 201 (F) Intermediate Greek
Reading of selections from Hesiod and from Plato, combined with grammar review. The primary goal of this course is to develop fluency in reading Greek. We will also read the texts closely to explore important continuities and changes in Greek culture between the archaic and classical periods. The emphasis will vary from year to year, but possible subjects to be explored include: the education and socialization of the community's children and young adults; religion and cult practices; the performative aspects of epic (and choral) poetry and of prose genres like oratory and the philosophical dialogue; traditional oral poetry and storytelling and the growth of literacy; the construction of woman, of man; the development of the classical polis.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on classroom participation, quizzes, tests, and a final exam
Prerequisites: CLGR 101-102 or two years of Greek in secondary school
Enrollment Limit: 12
Expected Class Size: 5-10
Distributions: (D1)

Fall 2018
LEC Section: 01    MWF 8:30 am - 9:45 am     Kerry A. Christensen

CLGR 401 (S) Homer: The Iliad
From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Iliad* in Greek and the entire epic in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures
Expected Class Size: 5-6
Distributions: (D1)

Not offered current academic year
CLGR 402 (S)  Homer: The Odyssey

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** majors in Classics, Comparative Literature, English and other literatures

**Expected Class Size:** 5-6

**Distributions:** (D1)

Not offered current academic year

---

CLGR 404 (S)  Tragedy

Tragedy was a hybrid genre invented in sixth-fifth century Athens, where tragic performances in the city's festival of the Greater Dionysia played a vital role in the democratic polis. This course will focus on reading in Greek a complete tragedy of Sophokles or Euripides; we will also read in translation several other tragedies, a satyr-play, and a comedy of Aristophanes. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

**Class Format:** seminar/recitation/discussion

**Requirements/Evaluation:** evaluation will be based on contributions to class, several 1- to 2-page papers involving close textual analysis, perhaps a midterm exam, a final exam, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 4-5

**Distributions:** (D1)

Spring 2019

SEM Section: 01    MR 2:35 pm - 3:50 pm     Sarah E. Olsen

---

CLGR 405 (F)  Greek Lyric Poetry

This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 5

**Distributions:** (D1)
CLGR 407 (F) Rhetoric and Democracy: the Greek Orators

The Greek orators of the 4th-century BCE were specialists in rhetoric and persuasive discourse, and in the deployment of the one to produce the other. They wrote forensic oratory intended to sway juries; political speeches with which they argued policy before the Athenian Assembly and aspired to be the city’s leaders; attack speeches which they hoped would destroy their rivals; and show pieces intended to dazzle the listener with their rhetorical brilliance. In this course the most influential orators of 4th-century Athens will instruct us in rhetoric, demonstrate the stylistic versatility of the Greek language, teach us about what Athenians in the 4th century cared about, reveal theories of human psychology, and persuade us of a thing or two. We will read selected speeches by Lysias, Isocrates, and Demosthenes, as well as portions of speeches by other orators such as Aeschines, Antiphon, and Dinarchus.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class translation and discussion, several short exercises, a midterm, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 6-8

Distributions: (D1)

Not offered current academic year

CLGR 409 (F) Plato

Plato’s writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus’ Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Class Format: seminar

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors
CLGR 414 (F) Thucydidides

This course will focus on Thucydidides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

**Class Format:** seminar

**Requirements/Evaluation:** class preparation and participation, a midterm exam, a final paper, and a final translation exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 6

**Distributions:** (D1)

Not offered current academic year

On leave Fall/Spring:
On leave Fall only:
On leave Spring only:

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

**Classics:**
1. Six courses in Greek and/or Latin, with at least two 400-level courses in one language;
2. Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments;
3. Participation in the Senior Colloquium.

**Classical Civilization:**
1. Either Classics 101 or 102 and one of Classics 222, 223, or 224;
2. Three additional courses from the offerings in Classical Civilization or from approved courses in other departments;
3. Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level;
4. A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy;
5. Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

**Senior Colloquium:** Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level
course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

**Classical Civilization Courses:** The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.

**STUDY ABROAD**

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

**CLLA 101 (F) Introduction to Latin**

This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

**Class Format:** recitation/discussion

**Requirements/Evaluation:** evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam

**Extra Info:** credit granted only if both semesters (CLLA 101 and 102) are taken

**Prerequisites:** none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

**Enrollment Limit:** 15
**CLLA 102 (S) Introduction to Latin**

This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

**Class Format:** recitation/discussion

**Requirements/Evaluation:** evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam

**Extra Info:** credit granted only if both semesters (CLLA 101 and 102) are taken

**Prerequisites:** CLLA 101 or permission of department

**Enrollment Limit:** 18

**Expected Class Size:** 10-12

**Distributions:** (D1)

---

**Spring 2019**

**LEC Section: 01   MWF 11:00 am - 12:15 pm   Nicole G. Brown**

**CLLA 201 (F) Intermediate Latin: The Late Republic**

Reading of selections from Latin prose and poetry, normally from a speech or letters by Cicero and from the poetry of Catullus. This course includes a comprehensive review of Latin grammar and aims primarily at developing fluency in reading Latin. At the same time it acquaints students with one of the most turbulent and important periods in Roman history and attends to the development of their interpretative and analytic skills.

**Class Format:** recitation/discussion

**Requirements/Evaluation:** evaluation will be based on classroom performance, quizzes, a midterm, and a final exam; occasional oral presentations or short essays may be required as well

**Prerequisites:** CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

**Enrollment Limit:** 12

**Expected Class Size:** 6-10

**Distributions:** (D1)

---

**Fall 2018**

**LEC Section: 01   MWF 12:00 pm - 12:50 pm   Amanda R. Wilcox**

**CLLA 302 (S) Vergil's “Aeneid”**

This course is a comprehensive introduction to Vergil’s *Aeneid*. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem’s literary, social, and political dimensions with special attention to Vergil’s consummate poetic craftsmanship.

**Class Format:** discussion/recitation

**Requirements/Evaluation:** evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 201 or permission of instructor

**Enrollment Limit:** 12
CLLA 405 (F) Livy and Tacitus: Myth, Scandal, and Morality in Ancient Rome

Mythical stories of Rome's founding, which were formulated by many generations of Roman authors and public figures, served as a framework for these very thinkers to analyze and articulate Roman self-image in rich and creative ways; one who stands out among these figures is the Augustan historian Livy. The "second founding" of the Republic by Augustus, and the careers of his successors, in turn gave later Roman writers like Tacitus fresh inspiration for Roman self-imagining and self-analysis. We will begin the semester in mythical Rome, reading selections from Book 1 of Livy's history which present figures like Aeneas, the Trojan refugee whose arrival in Italy was conceptually crucial to Rome's development and position in Italy and the Mediterranean; Romulus, by whom Rome was founded in an act of fratricide; the Sabine women, whose nobility prevented a deadly war between their fathers and their Roman kidnappers; and Lucretia, whose virtue and self-sacrifice led to the liberation of Rome from a decadent and violent monarchy and to the founding of the Roman Republic. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation, and sympathy; we will examine as well how Livy often filters his account of mythical Rome through the lens of his own time, thereby constructing Rome's past through the Augustan present. Writing more than a century after Livy, Tacitus offers a different view of Augustus, and his account of the rude and dissolute Tiberius, the unscrupulous Livia, Rome's craven and dispirited senators, and the many scandals attached to the imperial family, figures a Rome once again suffering under a decadent monarchy. Tacitus's compressed, fastidious, inimitable prose is the vehicle for his stern yet often sardonic psychological insights, which subtly manage to combine moral judgment with prurient pleasure in the scandals of others.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6
Distributions: (D1)
Not offered current academic year

CLLA 407 (F) Caesar and Cicero

The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6-9
Distributions: (D1)

CLLA 408 (S) Roman Comedy

Roman comedy flourished only briefly, between the second and third Punic Wars, but its cultural-historical importance is undeniable. In these fabulae
palliatae, Latin comedies staged in Greek costume and featuring ostensibly Greek characters, Roman attitudes are questioned and mocked but ultimately reasserted. We will read the *Menaechmi* of Plautus and the *Adelphoe* of Terence, two plays that burlesque the stereotypical relationships between fathers, brothers, sons, and slaves. We may also consider selections from Cato the Elder, Cicero's letters, and other primary and secondary texts that shed additional light on Roman familial relationships and their place in republican society.

**Class Format:** discussion/recitation

**Requirements/Evaluation:** evaluation will be based on class participation, several papers of varying length, a midterm and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** if the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature

**Expected Class Size:** 8-10

**Distributions:** (D1)

Not offered current academic year

**CLLA 409 (S) Seneca and the Self**

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's *De Officiis*. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, several short written and oral assignments, midterm and final exams, and a final paper

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 5-10

**Distributions:** (D1)

Spring 2019

SEM Section: 01   TF 2:35 pm - 3:50 pm   Amanda R. Wilcox

**CLLA 414 (F) Vergil's Eclogues and Georgics**

This course will explore the two major works of Vergil that precede the *Aeneid: the Eclogues*, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the *Georgics*, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

**Class Format:** seminar

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Distributions:** (D1)

Not offered current academic year
In this course, we will consider how authors of imperial Rome represent the spectacle of their urban surroundings. Poets such as Martial and Statius describe the lavish entertainments that Domitian put on in the newly constructed Colosseum: Saturnalia festivities, beast hunts, gladiatorial combats. But their interest in these imperial displays is just one aspect of a greater preoccupation with social performance and self-fashioning during this time. Statius invites readers to marvel at imperial statues, aristocratic villas, and even an impressive new road built by Domitian. Martial, on the other hand, dispenses not praise but blame: in his epigrams, he encourages readers to laugh at the ridiculous displays of upstarts, flatterers, and deviants, casting vice as entertainment. As we read selections from Statius’ Silvae, Martial’s De Spectaculis and epigrams, Pliny’s letters about public and literary life, and his speech of praise for the emperor Trajan, we will pay particular attention to questions such as the following: What do these authors’ representations of spectacle tell us about the values of Flavian and Trajanic Rome? How do their works constitute performances in their own right? What do these texts reveal about the social functions of literature under autocratic rule?

Class Format: seminar

Requirements/Evaluation: class participation, short writing assignments, two translation exams, and a final paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors and potential majors in Classics and Comparative Literature

Expected Class Size: 5-10

Distributions: (D1)

Not offered current academic year
Cognitive science is concerned with how humans, non-human animals, and computers acquire, represent, manipulate, and use information. As an interdisciplinary field, it combines research and theory from computer science (e.g., artificial intelligence), cognitive psychology, philosophy, linguistics, and neuroscience, and to some extent evolutionary biology, math, and anthropology. Complex issues of cognition are not easily addressed using traditional intra-disciplinary tools. Cognitive researchers in any discipline typically employ a collection of analytic and modeling tools from across traditional disciplinary boundaries. Thus, the methods and research agenda of cognitive science are broader than those of any of the fields that have traditionally contributed to cognitive science. The Cognitive Science Program is designed to provide students with the broad interdisciplinary foundation needed to approach issues of cognition.

THE CONCENTRATION

The concentration in Cognitive Science consists of six courses, including an introductory course, four electives, and a senior seminar.

Minds, Brains, and Intelligent Behavior (COGS 222) is the entry point into the concentration, and provides an interdisciplinary perspective on issues of cognition. Ideally, it should be taken before the end of the sophomore year. Emphasizing the highly interdisciplinary nature of the field, the four electives must be distributed over at least three course prefixes. In the fall of the senior year, concentrators will participate in a senior seminar (COGS 493) or a senior tutorial, depending on enrollments.

Required Courses

- COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
- COGS 493 Senior Seminar or Senior Tutorial (In years where 493 is not offered, students should contact the Program Chair for details).

Elective Courses

Four electives are required, chosen from at least three prefixes, at most two of which can be at the 100 level.

- ASST 258 Language and Literacy Development
- BIOL 204/NSCI 204 Animal Behavior
- CHIN 431 Introduction to Chinese Linguistics
- CSCI 134 Introduction to Computer Science
- CSCI 136 Data Structures and Advanced Programming
- CSCI 361/MATH 361 Theory of Computation
- CSCI 373 Artificial Intelligence
- CSCI 374 Machine Learning
- JAPN 130 Intro. to Linguistic Analysis
- JAPN 258/PSYC 258 Language and Literacy Development
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- PHIL 207 Contemporary Philosophy of Mind
- PHIL 216/ENVI 216 Philosophy of Animals
- PHIL 388 Consciousness
- PSYC 221 Cognitive Psychology
- PSYC 322 Concepts: Mind, Brain, and Culture
Recommended Courses
The following courses are recommended for students seeking a richer background in cognitive science. These will not count as electives for the cognitive science concentration.

- BIOL 209/NSCI 209 Animal Communication
- BIOL 305 Evolution
- MATH 250 Linear Algebra
- MATH 433 Mathematical Modeling
- PHIL 209 Philosophy of Science
- PSYC 201 Experimentation and Statistics
- STAT 101 Elementary Statistics and Data Analysis
- STAT 201 Statistics and Data Analysis
- STAT 231 Statistical Design of Experiments

THE DEGREE WITH HONORS IN COGNITIVE SCIENCE

Formal admission to candidacy for honors will occur at the end of the fall semester of the senior year and will be based on promising performance in COGS 493. This program will consist of COGS W31-494(S), and will be supervised by members of the advisory committee from at least two departments. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors.

STUDY ABROAD
Students who wish to discuss plans for study abroad are invited to meet with any member of the Cognitive Science advisory committee.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No. As long as the study abroad courses conform to the interdisciplinary distribution requirements of the concentration.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.
COGS 222 (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Crosslistings: PHIL222 / COGS222 / PSYC222

Primary Crosslisting
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Department Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL
Distributions: (D2)
Attributes: Linguistics; PHIL Contemp Metaphysics & Epistemology Courses; PSYC 200-level Courses
Not offered current academic year

COGS 493 (F) Advanced Topics in Mind and Cognition
Crosslistings: COGS493

Primary Crosslisting
In the last decade the science of the mind has continued to draw on its 20th century history as well as expand its methodological repertoire. In this seminar we will investigate current trends in mind and cognition by considering research in cognitive neuroscience, embodied cognition, dynamic systems theory, and empirical approaches to consciousness. Throughout, we will attend both to the specific empirical details as well as the conceptual foundations of this work. We will discuss how it elaborates, expands, and sharpens early views of the domain and methodology of philosophy of mind and cognitive science.

Class Format: seminar
Requirements/Evaluation: weekly short essays 1000 words, seminar presentation, final paper/project 7,000 words
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: COGS 222 or PSYC 221 or PHIL 207 or permission of program chair
Enrollment Limit: 12
Expected Class Size: 7
Distributions: (D2)

Fall 2018
SEM Section: 01 Cancelled

Spring 2019
SEM Section: 01 W 1:00 pm - 4:00 pm Joseph L. Cruz

COGS 494 (S) Senior Thesis: Cognitive Science
The senior concentrator, having completed the senior seminar and with approval from the advisory committee, may devote winter study and the spring semester to a senior thesis based on the fall research project.
COGS 497 (F) Independent Study: Cognitive Science
Cognitive Science independent study.
Class Format: independent study
Prerequisites: permission of program chair
Distributions: (D2)

Spring 2019
HON Section: 01    TBA     Joseph L. Cruz

COGS 498 (S) Independent Study: Cognitive Science
Cognitive Science independent study.
Class Format: independent study
Prerequisites: permission of program chair
Distributions: (D2)

Fall 2018
IND Section: 01    TBA     Joseph L. Cruz

COGS Interdepartmental Electives

BIOL 204 (S) Animal Behavior
Primary Crosslisting
Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.
Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on examinations, lab reports, and a research paper
Extra Info: not available for the fifth course option
Prerequisites: BIOL 102, or PSYC 101, or permission of instructor
Enrollment Limit: 32
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 32
**BIOL 212 (F) Neuroscience**

**Crosslistings:** PSYC212 / BIOL212 / NSCI201

**Secondary Crosslisting**

A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.

**Class Format:** lecture, three hours a week; laboratory, every other week

**Requirements/Evaluation:** evaluation will be based on a lab practical, lab reports, two hour exams and a final exam

**Extra Info:** not available for the fifth course option

**Prerequisites:** PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

**Enrollment Limit:** 72

**Enrollment Preferences:** sophomores and Biology and Psychology majors

**Expected Class Size:** 72

**Department Notes:** does not satisfy the distribution requirement in the Biology major

**Distributions:** (D3)

**Distribution Notes:** meets Division 3 requirement if registration is under PSYC

**Attributes:** COGS Interdepartmental Electives; NSCI Required Courses; PSYC 200-level Courses

**Fall 2018**

**CSCI 134 (F) Introduction to Computer Science: Objects, Events, and Graphics (QFR)**

Computing is central to many aspects of our lives and the world. This course introduces fundamental ideas in computer science and builds the skills necessary to create computer programs in the Java programming language, with an emphasis on graphics and user interfaces. Students learn to design programs in a wide range of application areas, from games to spam filters and image editing to scientific simulations. Programming topics include object-oriented programming, control structures, arrays, recursion, and event-driven programming, as well as how to construct correct, understandable, and efficient programs. This course is appropriate for all students who want to create software and have little or no prior computing experience.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** evaluation will be based on weekly assignments, final programming projects, and examinations

**Prerequisites:** none, except for the standard prerequisites for a (Q) course; previous programming experience is not required

**Enrollment Limit:** 90

**Enrollment Preferences:** If the course is over-enrolled, enrollment will be determined by lottery
CSCI 134 (S) Introduction to Computer Science: Digital Communication and Computation (QFR)
A digital revolution has transformed the way we communicate and process information. Digital cameras have replaced film, MP3s have replaced LPs, communications through email, chat systems, and the Web have become part of daily life. This course explores the principles that underlie such digital information processing and communication systems. All digital information processing and communication systems are driven by precise rules or algorithms expressed as computer programs. We will develop an appreciation for the nature and limitations of such algorithms by exploring abstract algorithms for complex processes and by learning the basics of computer programming in Java. Programming topics covered will include object-oriented programming, control structures, arrays, recursion, and event-driven programming. Programming projects will include network applications like chat clients, tools to process and compress digital images, and simple network servers.

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, final programming projects, and examinations
Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required
Enrollment Limit: 90
Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 90

Expected Class Size: 90
Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; COGS Interdepartmental Electives;

Not offered current academic year

CSCI 134 (F) Introduction to Computer Science: Diving into the Deluge of Data (QFR)
We are surrounded by information: weather forecasts, twitter feeds, restaurant reviews, stock market tickers, music recommendations, among others. This course introduces fundamental computational concepts for representing and manipulating data. Using the programming language Python, this course explores effective ways to organize and transform information in order to solve problems. Students will learn to design algorithms to search, sort, and manipulate data in application areas like text and image processing, social networks, scientific computing, databases, and the World Wide Web. Programming topics covered include object-oriented and functional programming, control structures, types, recursion, arrays, lists, streams, and dictionaries. This course is appropriate for all students who want to create software and learn computational techniques for manipulating and analyzing data. More details are available on the department website, http://www.cs.williams.edu

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, programming projects, and examinations
Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required
Enrollment Limit: 75
Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 75

Expected Class Size: 75
Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

Fall 2018
CSCI 361 (F)  Theory of Computation  (QFR)
Crosslistings: CSCI361 / MATH361

Primary Crosslisting

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets, a midterm examination, and a final examination
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 34
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 34
Distributions: (D3) (QFR)
Attributes: COGS Interdepartmental Electives;

Fall 2018
LEC Section: 02  MWF 11:00 am - 11:50 am  Thomas P. Murtagh
LEC Section: 01  MWF 12:00 pm - 12:50 pm  Thomas P. Murtagh

CSCI 373 (S)  Artificial Intelligence  (QFR)
Artificial Intelligence (AI) has become part of everyday life, but what is it, and how does it work? This course introduces theories and computational techniques that serve as a foundation for the study of artificial intelligence. Potential topics include the following: Problem solving by search, Logic, Planning, Constraint satisfaction problems, Uncertainty and probabilistic reasoning, Bayesian networks, and Automated Learning.

Class Format: lecture/laboratory
Requirements/Evaluation: several programming projects in the first half of the semester and a larger project spanning most of the second half of the semester; reading responses and discussion; midterm examination
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
CSCI 374 (S) Machine Learning (QFR)

This tutorial examines the design, implementation, and analysis of machine learning algorithms. Machine Learning is a branch of Artificial Intelligence that aims to develop algorithms that will improve a system's performance. Improvement might involve acquiring new factual knowledge from data, learning to perform a new task, or learning to perform an old task more efficiently or effectively. This tutorial will cover examples of supervised learning algorithms (including decision tree learning, support vector machines, and neural networks), unsupervised learning algorithms (including k-means and expectation maximization), and possibly reinforcement learning algorithms (such as Q learning and temporal difference learning). It will also introduce methods for the evaluation of learning algorithms, as well as topics in computational learning theory.

Class Format: This class will follow the meeting structure of a tutorial, with groups of three or four
Requirements/Evaluation: evaluation will be based on presentations, problem sets, programming exercises, empirical analyses of algorithms, critical analysis of current literature
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 136 and CSCI 256 or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Computer Science majors
Expected Class Size: 18
Distributions: (D3) (QFR)
Attributes: COGS Interdepartmental Electives;
Not offered current academic year

ENVI 216 (S) Philosophy of Animals (WI)

Crosslistings: ENVI216 / PHIL216

Secondary Crosslisting

Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: seminar
Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course
Expected Class Size: 19
Department Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

PHIL 207 (S) Contemporary Philosophy of Mind (WI)
The philosophy of mind has been one of the liveliest and most active areas of philosophical inquiry over the last century, and it has taken a place at the center of the field. Part of the explanation for this is the rise of compelling scientific accounts of who and what we are. The question of whether the mind can be fully understood within a physicalist, materialist framework has taken on an exciting urgency. In this course we will investigate the mind/body problem, mental representation, the conceptual and nonconceptual content of mental states, and the nature of consciousness. Throughout we will attend to the relevant empirical literature.

Class Format: seminar
Requirements/Evaluation: weekly two page papers on focused topics and two 8- to 10-page papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one prior 100- or 200-level PHIL course
Enrollment Limit: 19
Enrollment Preferences: prospective Philosophy majors and Cognitive Science concentrators

PHIL 288 (S)  Embodiment and Consciousness: A Cross-Cultural Exploration
Crosslistings: PHIL288 / REL288

Secondary Crosslisting

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Class Format: seminar
Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)
Extra Info: not available for the fifth course option
Prerequisites: some background in either PSYC, COGS, PHIL or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Religion and Philosophy majors
Expected Class Size: 18
Not offered current academic year
PHIL 388 (S)  Consciousness  (WI)
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience--what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all--resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science's most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members convene
Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any introduction to philosophy and at least one upper level course in PHIL, no exceptions
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors, Neuroscience or Cognitive Science concentrators; open to sophomores; every effort will be made to pair students according to similar or complementary background
Expected Class Size: 10
Distributions: (D2)  (WI)
Attributes: COGS Interdepartmental Electives;  PHIL Contemp Metaphysics & Epistemology Courses;

TUT Section: T1    TBA    Joseph L. Cruz

PSYC 212 (F)  Neuroscience
Crosslistings: PSYC212 / BIOL212 / NSCI201
Secondary Crosslisting
A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.
Class Format: lecture, three hours a week; laboratory, every other week
Requirements/Evaluation: evaluation will be based on a lab practical, lab reports, two hour exams and a final exam
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor
Enrollment Limit: 72
Enrollment Preferences: sophomores and Biology and Psychology majors
Expected Class Size: 72
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC
PSYC 221 (F) Cognitive Psychology

This course will survey the experimental study of the structures and processes that make up normal human cognition. Topics include perception, attention, learning, memory, categorization, language, judgment, decision making, reasoning, and problem solving.

Class Format: lecture
Requirements/Evaluation: two midterms and a final exam (Fall); two midterms, a final exam, short essays and weekly quizzes (Spring)
Prerequisites: PSYC 101 or permission of instructor
Enrollment Limit: 50
Enrollment Preferences: Psychology majors
Expected Class Size: 50
Distributions: (D2)
Attributes: COGS Interdepartmental Electives; PSYC 200-level Courses

Fall 2018

LAB Section: 04 W 1:00 pm - 4:00 pm Martha J. Marvin
LAB Section: 03 T 1:00 pm - 4:00 pm Martha J. Marvin
LEC Section: 01 TR 9:55 am - 11:10 am Heather Williams, Matthew M. Clasen
LAB Section: 02 M 1:00 pm - 4:00 pm Martha J. Marvin

PSYC 322 (F) Concepts: Mind, Brain, and Culture

Every time we see something as a kind of thing, every time that we decide that an object is a cup rather than a glass, when we recognize a picture of a familiar face as a picture of ourselves, or even when we understand speech, we are employing categories. Most categorization decisions are automatic and unconscious, and therefore have the illusion of simplicity. The complexity of these decisions, however, becomes apparent when we attempt to build machines to do what humans perform so effortlessly. What are the systems in place that allow us this extraordinary ability to segment the world? Are they universal? How does conceptual knowledge differ across cultural groups? How do concepts affect our perception? How do the categories of experts differ from the categories of novices? Do children have the same kind of conceptual knowledge as adults? How are categories represented in the brain? In this course, we explore various empirical findings from cognitive psychology, cognitive neuroscience, and anthropology that address these questions.

Class Format: empirical lab course
Requirements/Evaluation: short papers, class presentation, and research paper
Prerequisites: PSYC 221 or 222 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Cognitive Science concentrators
Expected Class Size: 16
Distributions: (D2)
Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course

Not offered current academic year

PSYC 324 (S) Great Debates in Cognition
The field of cognition is filled with controversies about how the mind really works. For example, is there sufficient evidence for a system in vision that can become aware of things without actually "seeing" them? Is it necessary to assume that babies come into the world armed with innate linguistic knowledge? Are humans inherently rational? Can we make inference about the mind using neuroimaging? These debates, and others that we will consider, help fuel scientific discovery in cognition in interesting ways. In this class, we will consider some of these contemporary debates, weigh evidence on both sides, and discuss the implications for what we know about the mind.

Class Format: tutorial; students will meet in pairs with the instructor for an hour each week

Requirements/Evaluation: evaluation will be based on weekly papers and oral arguments

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 221 or 222 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Cognitive Science concentrators

Expected Class Size: 10

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology

Not offered current academic year

PSYC 326 (F) Choice and Decision Making

One aspect of "being human" is that we often make choices that we know are bad for us. In this course we survey theoretical and experimental approaches to understanding our strengths and weaknesses as decision makers. Topics include normative decision theories, biases in probability judgments, "fast and frugal" heuristics, impulsiveness and self-control, addictions and bad habits, gambling, and moral decision making.

Class Format: empirical lab course

Requirements/Evaluation: problem sets, essay papers, class and lab participation, and a research report

Prerequisites: PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110

Enrollment Limit: 16

Enrollment Preferences: senior Psychology majors who need the course to fulfill the major

Expected Class Size: 16

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PHLH Decision-Making by Institutions + Individuals; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course

Not offered current academic year

PSYC 327 (F) Cognition and Education

This class will focus on basic research into the cognitive processes underlying learning. How does the mind encode, store, and retrieve knowledge? How do learners (and teachers) manage their own learning? How do educational practices depart from what research recommends? The readings will be scientific articles. Students will do original research.

Class Format: empirical lab

Requirements/Evaluation: class participation, daily quizzes, research papers

Prerequisites: PSYC 201 and PSYC 221 or 222, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 12

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course; TEAC Teaching Sequence Courses

Fall 2018
REL 288 (S) Embodyment and Consciousness: A Cross-Cultural Exploration
Crosslistings: PHIL288 / REL288

Primary Crosslisting

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Class Format: seminar

Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)

Extra Info: not available for the fifth course option

Prerequisites: some background in either PSYC, COGS, PHIL or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Religion and Philosophy majors

Expected Class Size: 18

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses

Not offered current academic year

COGS Related Courses

BIOL 305 (S) Evolution (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Department Notes: satisfies the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Recommended Courses; BIMO Interdepartmental Electives; COGS Related Courses;
MATH 250 (F)  Linear Algebra  (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework and exams

Prerequisites: MATH 150/151 or MATH 200

Enrollment Limit: 45

Expected Class Size: 35

Distributions: (D3) (QFR)

Attributes: COGS Related Courses;

PHIL 209 (S)  Philosophy of Science

Crosslistings: SCST209 / PHIL209

Primary Crosslisting

It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, scientific choice, change, and the idea that scientific knowledge is progressive. The course will begin with the "received view" of science, advanced by logical empiricists, which assumes the objectivity and the rationality of science. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality their works provoked. This discussion will naturally lead us to the relativist and social-constructivist views developed within contemporary science studies. Finally, we will analyze the current debate about cognitive credentials of science and proper approach to the study of science, which came to be known as "the science wars."

Class Format: seminar with a short lecture component in each class

Requirements/Evaluation: class attendance, preparedness and participation; three short assignments; three 5 pages long papers, the last of which will be the final paper, due a week after the end of classes

Extra Info: may not be taken on a pass/fail basis

Prerequisites: one PHIL course, or declared major in a natural science, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and prospective majors
Expected Class Size: 10-15

Distributions: (D2)

Attributes: COGS Related Courses; HSCI Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses; SCST Elective Courses

Spring 2019

SEM Section: 01   MR 1:10 pm - 2:25 pm   Bojana Mladenovic

**PSYC 201 (F) Experimentation and Statistics**  (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

Class Format: lecture/lab

Requirements/Evaluation: papers, exams, and problem sets

Extra Info: two sections; must register for the lab and lecture with the same instructor

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: PSYC 101; not open to first-year students except with permission of instructor

Enrollment Limit: 22

Enrollment Preferences: Psychology majors

Distributions: (D2) (QFR)

Attributes: COGS Related Courses; PHLH Statistics Courses;

STAT 101 (F) Elementary Statistics and Data Analysis  (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performances on quizzes and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Expected Class Size: 40

Department Notes: Students with calculus background and social science interest should consider STAT 161. Students with MATH 150 should enroll in STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department.

Distributions: (D3) (QFR)

STAT 201 (F) Statistics and Data Analysis  (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams

Prerequisites: MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.

Enrollment Limit: 40
Expected Class Size: 40

Department Notes: Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

STAT 344 (F) Statistical Design of Experiments (QFR)

What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

Class Format: lecture

Requirements/Evaluation: problem sets, midterm, final exam, project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 201, 202, or equivalent

Enrollment Limit: 20

Enrollment Preferences: Statistics majors, seniors

Expected Class Size: 15

Fall 2018
LEC Section: 01 TF 2:35 pm - 3:50 pm Richard D. De Veaux

----------------------------------------------------------------------------------
Students motivated by a desire to study literary art in the broadest sense of the term will find an intellectual home in the Program in Comparative Literature. The Program in Comparative Literature gives students the opportunity to develop their critical faculties through the analysis of literature across cultures, and through the exploration of literary and critical theory. By crossing national, linguistic, historical, and disciplinary boundaries, students of Comparative Literature learn to read texts for the ways they make meaning, the assumptions that underlie that meaning, and the aesthetic elements evinced in the making. Students of Comparative Literature are encouraged to examine the widest possible range of literary communication, including the metamorphosis of media, genres, forms, and themes.

Whereas specific literature programs allow the student to trace the development of one literature in a particular culture over a period of time, Comparative Literature juxtaposes the writings of different cultures and epochs in a variety of ways. Because interpretive methods from other disciplines play a crucial role in investigating literature’s larger context, the Program offers courses intended for students in all divisions of the college and of all interests. These include courses that introduce students to the comparative study of world literature and courses designed to enhance any foreign language major in the Williams curriculum. In addition, the Program offers courses in literary theory that illuminate the study of texts of all sorts. Note: the English Department allows students to count one course with a COMP prefix as an elective within the English major.

Students majoring in comparative literature choose one of two tracks. Both tracks prepare students for a range of options after graduation, by developing analytical, interpretive, and evaluative skills and by allowing the student, within a framework of general requirements, to create a program of study primarily shaped by the student’s own interests.

MAJOR

Track 1

This track within the Comparative Literature major combines the focused study of a single foreign-language literature with a wide-ranging exploration of literary forms across national, linguistic, and historical boundaries. Each student on this track must select a single foreign language as their specialty, although the serious study of literature in foreign languages other than the student’s specialty is strongly encouraged. The languages currently available are French, German, Ancient Greek, Latin, Russian, and Spanish. Each student should choose a faculty advisor with whom the student will meet each semester to discuss how best to fulfill the requirements for the major.

Eleven courses are required for Track 1 of the major—students should aim to complete core requirements by the end of junior year:

- Comparative Literature 110 Introduction to Comparative Literature,
- or Comparative Literature 111 The Nature of Narrative

Any three comparative literature core courses. A core course is any course that meets at least one of the following criteria: a) it must be genuinely comparative across cultures and/or b) it must primarily treat literary theory. The three core courses may be chosen from the offerings of the Program in Comparative Literature or from the offerings of other departments and programs, including, but not limited to, the foreign language programs and English, Religion, Africana Studies, Latino/Latina Studies, and Women’s, Gender, and Sexuality Studies. Examples of core courses include the following (please be aware that this is not an exhaustive list; consult with a major advisor about which courses may count as cores):

- COMP 117 Introduction to Cultural Theory
- COMP 200 European Modernism—and its Discontents
- COMP 205 The Book of Job and Joban Literature
- COMP 223 Comparative Middle Eastern and Latin American Cultural Studies
- COMP 242 Americans Abroad
Three literature courses in the student’s specialty language, in which texts are read in the original. At least one of the three must be at the 300-level or above. Students should aim to acquire intermediate-level proficiency in their specialty language by the end of the sophomore year. Three courses in which most of the course work concerns literature other than that of the student’s specialty language or literary theory. These courses may be selected from Comparative Literature offerings or from other departments and must be approved by the student’s major advisor. Only one may be in English or American literature.

Comparative Literature 401 Senior Seminar (variable topics). Students are expected to take the version of 401 offered in their senior year.

With the permission of their advisor or the chair, students may also count appropriate courses in music or art toward major requirements. Students pursuing the Comparative Literature major are strongly encouraged to study abroad during their junior year and may receive major credit for up to 4 courses taken during study abroad. At least three courses towards the major must be at the 300 level or above. At least one of the courses counted toward the major must be Writing Intensive.

**Track 2**

This track within the Comparative Literature major allows for a wide-ranging exploration of literary forms across national, linguistic, and historical boundaries. Students in this track are not required to choose a specialty language, although the serious study of literature in one or more foreign languages is strongly encouraged. Each student should choose a faculty advisor, with whom the student will meet each semester to discuss how best to fulfill the requirements for the major.

Eleven courses are required for Track 2 of the major—students should aim to complete core requirements by the end of junior year:

- Comparative Literature 111 The Nature of Narrative,
- or Comparative Literature 110 Introduction to Comparative Literature

Any four comparative literature core courses. A core course is any course that meets at least one of the following criteria: a) it must treat primarily literature and b) it must be genuinely comparative across cultures and/or primarily theoretical. The four core courses may be chosen from the offerings of the Program in Comparative Literature or from the offerings of other departments and programs, including, but not limited to, the foreign language programs and English, Religion, Africana Studies, Latino/Latina Studies, and Women’s, Gender, and Sexuality Studies. See above under “Track 1” for some examples of core courses. (Please be aware that this is not an exhaustive list; consult with a major advisor about which courses may count as cores.)

Five courses devoted to literature or literary theory that cover at least three different national/cultural traditions. The courses may be selected from Comparative Literature offerings or from other departments and must be approved by the student’s major advisor. Of the courses taken outside of the Program in Comparative Literature, no more than two may have the same course prefix. Students are strongly encouraged to include courses in a foreign language among these five.

Comparative Literature 401 Senior Seminar (variable topics). Students are expected to take the version of 401 offered in their senior year.

With the permission of their advisor or the chair, students may also count appropriate courses in music or art toward major requirements. Students who choose to study abroad during their junior year may receive major credit for up to 4 courses taken during study abroad. At least three courses towards the major must be at the 300 level or above. At least one of the courses counted toward the major must be Writing Intensive.

**THE DEGREE WITH HONORS IN COMPARATIVE LITERATURE**

**Prerequisites**

Honors candidates in Comparative Literature are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**Timing**

Students wishing to pursue a thesis in Comparative Literature are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a
preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (493-W31-494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (COMP 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

Characteristics of the Thesis, Evaluation, and Major Credit

The topic of the thesis must be comparative and/or theoretical. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (COMP 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major—including the thesis course (COMP 493-W-494)—is 12, i.e., one of the thesis courses may substitute for one elective.

STUDY ABROAD

The Program in Comparative Literature strongly urges its students to study abroad. Students in track 1 should seriously consider study abroad in a country where their specialty language is spoken; they will likely be able to complete some of the specialty language courses required for the major during study abroad. But all students can benefit from study abroad; literature courses from abroad are often candidates for credit as major electives.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department. Some courses can be approved definitively, others provisionally. Approval for core credit may require more information.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. Sometimes we can tell from the title, sometimes a description is needed. We often need to know the readings assigned.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 1 of 2 gateway courses (COMP 110 or 111) and senior seminar (COMP 401). No substitutions are allowed for these classes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. No study abroad fall semester senior year because of senior seminar. Students should take the gateway before studying abroad, but it's not required.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Not a common problem, but it has happened. The department typically doesn’t count Div II-type culture courses.
COMP 106 (F)  Temptation  (WI)
Crosslistings: COMP106 / ENGL107

Secondary Crosslisting

We want most those things we can't--or shouldn't--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

Class Format: seminar
Requirements/Evaluation: four five-page papers, in-class presentation, thoughtful participation in discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Distributions: (D1) (WI)
Not offered current academic year

COMP 107 (S)  The Trojan War  (WI)
Crosslistings: COMP107 / CLAS101

Secondary Crosslisting

The Trojan War may or may not have taken place near the end of the Bronze Age (c. 1100), but it certainly provided poets, visual artists, historians, philosophers, and many others in archaic and classical Greece (750-320) with a rich discourse for engaging questions about gender, exchange, desire, loss, and remembrance, and about friendship, marriage, family, army, city-state and religious cult. This discourse of "The Trojan War" attained a remarkable coherence yet also thrived on substantial variations and changes over the 300-400 years of Greek literature we will explore, a dynamic of change and continuity that has persisted through the more than two millenia of subsequent Greek, Roman, Western, and non-Western participation in this discourse. More than half of the course will be devoted to the Homeric Iliad and Odyssey; we will also read brief selections from lyric poetry (e.g. Archilochus, Sappho of Lesbos), some selections from the historians Herodotus and Thucydides, and several tragedies (e.g. Aeschylus’ Oresteia, Sophocles’ Ajax, Euripides’ Trojan Women). We may briefly consider a few short selections from other ancient Greek and Roman authors and/or one or two modern poets. We will also watch several films, e.g. Troy, Oh Brother, Where Art Thou? Gods and Monsters, Fight Club, In the Bedroom, Grand Illusion.

Class Format: lecture and discussion
Requirements/Evaluation: evaluation will be based on a series of short papers involving close textual analysis, two 5-page papers, and contributions to class discussion
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: majors in Classics and Comparative Literature, with attention also given to assuring a balance of class years and majors
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: MAST Interdepartmental Electives;
Not offered current academic year

COMP 108 (F)  Roman Literature: Foundations and Empire
In the first book of Vergil's Aeneid, the god Jupiter prophesies the foundation and the greatness of Rome: "I place no limits on their fortunes and no time; I grant them empire without end." Yet elsewhere in this epic account of Rome's origins, this promise of unlimited power for the descendants of Romulus seems to be seriously abridged. Some readers have seen, not only in the Aeneid but throughout classical Roman literature, a persistent tendency to inscribe the decay and disintegration of Roman power into the very works that proclaim and celebrate Roman preeminence. This course explores the ancient Romans' own interpretations of their past, their present, and their destiny: the humble beginnings of their city, its rise to supreme world power, and premonitions of its decline. Related topics for our consideration will include Roman constructions of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonwealth, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. All readings will be in translation.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on short written assignments, midterm and final exams with essays, and contributions to class discussion

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year students and sophomores and majors in Classics and Comparative Literature

**Expected Class Size:** 15

**Distributions:** (D1)

Not offered current academic year

**COMP 110 (F) Introduction to Comparative Literature**

**Crosslistings:** ENGL241 / COMP110

**Primary Crosslisting**

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. All readings will be in English.

**Class Format:** lecture

**Requirements/Evaluation:** attendance, participation, two 5-page papers, a few short responses, midterm exam

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** students considering a major in Comparative Literature

**Expected Class Size:** 35

**Distributions:** (D1)

Not offered current academic year

**COMP 111 (S) The Nature of Narrative**

**Crosslistings:** COMP111 / ENGL120

**Primary Crosslisting**

This course examines the nature and workings of narrative using texts drawn from a wide range of literary traditions, media, and genres. Readings will include Western and Asian classics (Homer, Sei Sho'nagon), 19th century French, German, and Russian fiction (Zola, Kleist, Lermontov), Latin
American magic realism (Marquez), and visual literature from stage drama to film and graphic memoir (Oscar Wilde, Sam Mendes, Tezuka Osamu, Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

**Class Format:** seminar

**Requirements/Evaluation:** regular attendance and participation, several short response assignments, two 4- to 5-page papers, and one paper rewrite

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students considering a major in a related field

**Expected Class Size:** 19

**Distributions:** (D1) (WI)

---

**COMP 111 (F) The Nature of Narrative (WI)**

Crosslistings: COMP111 / ENGL120

**Primary Crosslisting**

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

**Class Format:** seminar

**Requirements/Evaluation:** meaningful class participation, two short papers, and a final paper of 10 pages, which will consist of a draft and a final version

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students considering a major in Comparative Literature and/or who have studied a foreign language

**Expected Class Size:** 19

**Distributions:** (D1) (WI)

**Attributes:** FMST Related Courses;

Not offered current academic year

---

**COMP 111 (F) Nature of Narrative (WI)**

Crosslistings: ENGL120 / COMP111

**Primary Crosslisting**

This course examines the nature and workings of narrative through a wide range of texts from different traditions, genres, and periods. We will explore the ways in which stories are told, how they convey meaning, and how they are shaped by generic conventions. Readings may include the Odyssey, the Chinese Classic of Poetry (Shijing), the Tale of Genji, the lais of Marie de France, Flaubert, Feng Menglong, and others (all readings will be in English). We will also read a few short theoretical works.

**Class Format:** seminar

**Requirements/Evaluation:** consistent and engaged class participation, several short written assignments over the course of the semester, and a longer final paper, with the opportunity to revise the final paper
**COMP 115 (F)  Rumble in the Jungle: Major Postcolonial Writers and Movements**  (DPE) (WI)

*Crosslistings: COMP115 / ENGL115*

**Secondary Crosslisting**

The antagonism between the West and the rest has been a defining feature of contemporary thought, especially during the struggles of the colonies to establish themselves as independent nations at the turn of the twentieth century. While armies and politicians stayed busy using blunt tools of violence, class and caste warfare, and fanning the flames of religious and ethnic tension, many artists, writers, and theorists challenged simple binaries that made cultures out to be at odds with one another by giving voice to complex identities and histories. Our works will take us around the world, and stretch us across multiple histories of colonialism and its aftermaths. In addition to encountering a postcolonial serial killer, a pterodactyl in present-day India, and a famed boxing match sponsored by an African dictator, we will watch narrative and documentary cinema, look at visual art, and read poetry, fiction, essays, and philosophy, and consider how these media and genres work as forms of thoughtful resistance as well as creative expression. Key authors will include Frantz Fanon, Aimé Césaire, V.S. Naipaul, Albert Memmi, Edward Said, Salman Rushdie, and Mahasweta Devi.

**Class Format:** seminar

**Requirements/Evaluation:** three short papers, one researched term paper, presentation, class participation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Preferences:** students who have not yet taken a 100-level course

**Expected Class Size:** 19

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: In asking students to think broadly and comparatively in film, novel, poetry, and theory about counter-hegemonic discourses of gender, race, nation, anti-colonialism, ontology, third worldism and non-Western philosophy, this course will contribute to the college's course offerings in Difference, Power, and Equity.  WI: Intensive writing instruction will culminate in 20 total pages of analytic and researched writing.

**Attributes:** ASAM Related Courses;  ENGL Literary Histories C;
Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (Ferris Bueller's Day Off, Silence of the Lambs, The Lord of the Rings) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

**Class Format:** discussion/seminar

**Requirements/Evaluation:** five short papers totaling about 20 pages, class attendance and participation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Distributions:** (D1) (WI)

**Attributes:** AMST Critical and Cultural Theory Electives;

---

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

**Class Format:** tutorial

**Requirements/Evaluation:** regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 8

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight. WI: Multiple writing and rewriting assignments that build on one another, totaling 20 pages or more, plus careful attention to writing practice in class.

---

This tutorial will introduce students to the intersections of feminist studies and Asian American studies by reading Asian and Asian American literature (read in English) that centers female-identified characters. This course will consider the historical and persistent structures of patriarchy, heterosexism,
nationalism, imperialism, war, and globalization through the framework of gender and sexuality studies. Students will read short excerpts of feminist theoretical works, selected with the idea of making scholarly texts more approachable to first- and second-year students. No previous experience with feminist theory or Asian American studies is presumed or required.

**Class Format:** tutorial

**Requirements/Evaluation:** weekly papers or peer responses

**Extra Info:** not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 8

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under COMP DPE.

The course studies and historicizes the social, cultural, and political forces that shape gender, race, sexuality, and migration for Asian/American womxn. WI: A primary goal of this tutorial is for students to develop a regular writing practice of literary analysis.

**COMP 128 (S) Reading Asian American Literature**  (WI)

Crosslistings: ENGL128 / COMP128 / AMST128

**Secondary Crosslisting**

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetries. This writing-intensive course closely reads a sampling of texts in a variety of genres and styles produced by writers from various Asian American ethnic groups from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"--its contradictions, heterogeneous nature, and our assumptions--and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

**Class Format:** seminar

**Requirements/Evaluation:** six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective AMST or ENGL majors

**Expected Class Size:** 15

**COMP 134 (S) Leaving the World Behind: The Literature of Reclusion**  (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134
Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, responses, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI. Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

COMP 140 (F) Introduction to Traditional Chinese Literature

Crosslistings: CHIN140 / COMP140

Secondary Crosslisting

With a written record stretching over 3000 years, China's literary cultures are some of the richest and most varied in human history. Their influence continues to be felt not only in modern China, but also throughout much of the world. This course examines the origins and development of the different literatures of China from their earliest stages up until the end of the imperial system in 1911. We will read texts ranging from the Analects of Confucius to the medieval poetry of the Tang dynasty, from Buddhist sutras to plays about prostitutes and singing girls. An invulnerable monkey god may make an appearance to sow chaos as well. He's difficult to pin down. Some important themes will include: the role of the individual versus that of the community, responses to catastrophe and disorder, the fantastic, the articulation of the self through literature, and ways of dealing with historical and literary legacies. All readings are in English translation.

Class Format: lecture

Requirements/Evaluation: five short writing assignments (2 pages each), one paper (6-7-pages), and a final exam

Prerequisites: none

COMP 141 (S) Black Autobiography
Crosslistings: AFR140 / COMP141

Secondary Crosslisting

Autobiography—whether slave narrative, memoir, or semi-fictional life account—has served as a primary form of writing for people of African descent. Although primarily understood as a textual means for articulating selfhood, Black autobiographies also ask other questions like: How do Black reflections on the self necessitate critiques of society and culture? How have Black autobiographies been utilized for political mobilization? And, what might a collective analysis of Black autobiographies reveal about changes in conceptions of Black selfhood over time? We will explore these concerns by reading autobiographies across time and space by authors like Ottobah Cugoano, W. E. B. Du Bois, and Alice Walker.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on class participation, two to three short papers (5- to 7-pages), and a 15- to 20-page paper or multimedia final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

COMP 151 (F) The Art of Playing: An Introduction to Theatre and Performance

Crosslistings: COMP151 / THEA101

Secondary Crosslisting

An introduction to the global art and practice of making theatre. Students will learn basic methods of acting alongside fundamentals of dramatic and live performance analysis. Emphasis will be on the comparative study of global embodied practices and literature in the fields of theatre and performance studies. Through workshops with guest artists and faculty, we will explore cutting-edge approaches to the field, deepening our engagement with theatre as a constantly evolving art form. Students are required to attend and write about live performances and art throughout the term. As a capstone project, students will perform selected scenes before a public audience, using practical and interpretive skills gained from the course. This course is open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Class Format: seminar; course will include both a seminar (1 hour and 15 minutes/week) and studio (2 hours and fifteen minutes/week); the total class meeting time will be 3 hours and 30 minutes per week

Requirements/Evaluation: two 5-page critical papers, weekly in-class writing, script analyses, studio presentations, active participation in class, and a final public performance

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 18

COMP 153 (F) Japanese Film

Crosslistings: JAPN153 / COMP153
From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene “works.” Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

**Class Format:** lecture

**Requirements/Evaluation:** attendance, participation, some responses, two papers (5-7 pages), test

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** students majoring in a related field

**Expected Class Size:** 20

**Distributions:** (D1)

**Attributes:** FMST Core Courses

Not offered current academic year

**COMP 156 (F) Thirteen Ways of Looking at Jazz**  (WI)

Crosslistings: AMST156 / COMP156 / AFR156 / ENGL223

Taking its title from the Wallace Stevens poem, “Thirteen Ways of Looking at a Blackbird,” which interprets the blackbird in different ways, this course similarly explores a more complex, multi-layered perspective on jazz, from jazz and American democracy to jazz in visual art. Accordingly, the course introduces students to several genres, including historical documents, cultural criticism, music, literature, film, photography and art. The course does not draw on a musicological method but rather a socio-cultural analysis of the concept, music and its effect—so students are not required to have any prior musical knowledge or ability. In this writing intensive course, students will write and revise short close analyses of multiple types of media, ultimately honing their writing skills on one form of media for a polished, original analysis that weds their increased critical thinking skills.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based upon class participation, 1 quiz, several 2-page response essays, one 3-page essay, one 5-page essay, one oral presentation/performance with 3-page critical report, totaling approximately 20 pages of written work

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** none

**Expected Class Size:** 19

**Distributions:** (D2) (WI)

COMP 200 (S) European Modernism--and Its Discontents
What is/was Modernism? An artistic movement? A new dynamic and sensibility? A transformative response to changed conditions? All these and more? This course will attempt to deal with such issues via examination of certain key works spanning the years 1850-1930. Topics to be considered: the rise of industrial capitalism and the literary market, advances in science and technology, urban alienation and social conflict, anti-"bourgeois" stances, the displacement of religion, the fragmented self, the proliferation of multiple perspectives, the breaks with the past and privileging of the present, and the horrors of war. To be studied: poetry by Baudelaire, Yeats, and Neruda; prose fiction by Dostoevsky, Kafka, Proust, Joyce, and Woolf; drama by Beckett; Futurist and Surrealist manifestoes; German Expressionist films; and theoretical writings by Marx, Freud, Nietzsche, Ortega y Gasset, and Benjamin. In addition, select portions of Bell-Villada's Art for Art's Sake and Literary Life and Peter Gay's Modernism will serve as general background to the course. All readings in English.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, brief weekly journals, one class presentation, three 6-page papers, a mid-term, and a final
Prerequisites: none; first-year students must consult with the instructor before registering for this course
Enrollment Limit: 20
Enrollment Preferences: students considering a major in Comparative Literature

Distributions: (D1)
Not offered current academic year

COMP 201 (F) The Hebrew Bible
Crosslistings: COMP201 / JWST201 / REL201

Secondary Crosslisting
The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers
Prerequisites: none
Enrollment Limit: 40

Enrollment Preferences: Jewish Studies concentrators, Religion and Comparative Literature majors

COMP 203 (F) Nineteenth-Century Russian Literature: Rebels and Rebellion

Crosslistings: RUSS203 / COMP203

Secondary Crosslisting

"God save us from seeing a Russian revolt, senseless and merciless," famously proclaimed Alexander Pushkin. But is revolt always senseless? And if it's not, what is the meaning behind it? Throughout the nineteenth century, Russian literature gave different answers to these questions. In this course, students will familiarize themselves with the masterpieces of the Golden Age of Russian literature with a particular focus on revolution understood in its broadest sense: philosophical, psychological, social, sexual, and aesthetic. We will examine the confrontation of the archetypal figure of Russian literature, the "superfluous man," with his milieu in Pushkin, Lermontov, Turgenev, and Goncharov. The social and psychological revolt of another key figure--the "little man"--will be addressed in the works of Pushkin and Gogol. We will then discuss woman's sexual rebellion in Nikolai Leskov and the forms of spiritual rebellion in Leo Tolstoy and Dostoevsky. Finally, we will examine the aesthetic revolution of Chekhov's plays, which challenged the principles of the old theater and marked the turn to new modernist drama. All readings are in English.

Class Format: lecture

Requirements/Evaluation: participation, writing assignments, written exam

Crosslistings: RUSS204 / COMP204

Secondary Crosslisting

With the one-hundredth anniversary of Russia's October Revolution just behind us and the uncertain future of post-Soviet Russia unfolding before us, we can now take stock of the long century of revolutions in art, politics, and society that has brought Russia to Putin. This course takes a comprehensive look at twentieth- and twenty-first-century Russian culture, focusing on the literature, film, theater, and visual art that defined this transformative period in Russia's modern history. Students will explore the radical aesthetic and political ideas that motivated this change, especially the utopian visions of the Russian avant-garde and early-Soviet Marxists, as well as key works that examine the tragic consequences of the failures of these revolutionary experiments for those who, willing or not, became their active participants. As we move on to the late-Soviet years, we will consider the emergence of a new, "conceptualist" avant-garde, which attempted to dismantle Soviet ideology and the totalitarian logic they attributed to the historical avant-garde using postmodern aesthetics. We will conclude the course by surveying literature, film, and performance that capture the traumatic experience of Russia's transition to market capitalism in the 1990s and its slide into authoritarian "stability" under Putin. Readings include works by Babel, Bulgakov, Platonov, Pasternak, Nabokov, Solzhenitsyn, Prigov, Pelevin, Sorokin, and recent Nobel laureate Svetlana Alexievich. Films screenings include the cinema of avant-garde masters Eisenstein and Vertov. All readings are in English.

**Class Format:** mixed lecture/discussion

**Requirements/Evaluation:** class participation, discussion leading, papers

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** declared or prospective Russian or Comparative Literature majors

**Expected Class Size:** 10

**Distributions:** (D1)

**COMP 205 (F) The Latin-American Novel in Translation**  (DPE)

Crosslistings: COMP205 / RLSP205

Secondary Crosslisting

A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English

**Class Format:** lecture

**Requirements/Evaluation:** class participation, two brief papers, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 22

**Enrollment Preferences:** Spanish majors, Latina/o Studies concentrators

**Expected Class Size:** 22

**Department Notes:** does not carry credit for the Spanish major or the certificate

COMP 206 (S) The Book of Job and Joban Literature 
Crosslistings: COMP206 / JWST206 / REL206

Secondary Crosslisting
The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. All readings are in translation.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, weekly short written assignments, and two longer papers
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under COMP
Attributes: JWST Core Electives;
Not offered current academic year

COMP 208 (F) Through the Looking Glass: Comparative Children's Literature

Oh, the reads we will read, if you follow my lead!
We will amble at first and then soon pick up speed,
And we'll bury our noses in books thick and thin.
This I vow by the hair on my chinny-chin-chin.
There'll be picture books, fairy tales, primers, and verse,
Tales of joy, fun, and laughter; and, alas, the reverse.
Some were written in English, but most of them not.
Though we'll read in translation: Sign on up, polyglot!
For example, there's Lindgren, Collodi, and Grimm,
Machado, and Sendak. Surely, you've heard of him?
We'll critique illustrations, we'll wonder, we'll ponder,
And by turns we'll divine what defines this grand genre.
Is it mere fun and games, pixie dust, sweet as pie?
Does it ask to be read with a serious eye?
Books appeal to our puzzler, our minds, after all,
And a child is a thinker, no matter how small.
You'll reflect, cogitate, then you'll write, write, WRITE! 
And your thoughts will become this instructor's delight.

**Class Format:** seminar

**Requirements/Evaluation:** regular reading and/or viewing, class discussion, frequent writing assignments, and one final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**COMP 209 (F) Dolls, Puppets and Automatons (WI)**

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer, watch a ballet by Kurt Joos and films by Fritz Lang and Ridley Scott, and watch fashion shows by Alexander McQueen, Jean-Paul Gaultier, and Viktor & Rolf. Conducted in English.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, one oral presentation, three 5- to 8-page papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors, or those considering a major in Comparative Literature

**COMP 210 (S) Latina/o Language Politics: Hybrid Voices**

Crosslistings: AMST240 / LATS240 / COMP210

**Secondary Crosslisting**

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o communities. As such, how are cultural values and material conditions expressed through Latina/o language and literature? How does Latina/o identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic phenomena such as code-switching (popularly known as "Spanglish") and Latina/o English, we will examine bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including theatre, autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

**Class Format:** seminar

**Requirements/Evaluation:** participation, two essays, final take-home examination

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

COMP 211 (F) Introduction to Latina/o Literatures

Crosslistings: AMST207 / ENGL251 / LATS208 / COMP211

Secondary Crosslisting

This discussion course serves as an introduction; the reading list is not meant to be exhaustive or comprehensive, but will rather provide a sampling or range of texts for students to engage. We will explore a number of readings across different genres (the novel, play, poem, short story, graphic novel). Students will endeavor to understand how each author defines Latinidad. What characterizes Latina/os for each of these writers and how do their works articulate the historical conditions out of which they emerge? How is Latina/o literature marked by notions of language, nationality, gender, sexuality, class, race, politics, form, and genre? The readings will provide both a survey of general ideas in the study of Latina/o literatures as well as specific case studies and historical examples from which we will extrapolate about the larger field. Readings include works by Tómas Rivera, Cristina García, Cristy C. Road, Oscar Zeta Acosta, Junot Díaz, Alisa Valdes-Rodriguez, and more.

Class Format: lecture

Requirements/Evaluation: students will be evaluated based on weekly online discussion forum posts, two short papers, a midterm exam, a final comprehensive project, as well as classroom participation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Comparative Literature majors

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST or LATS

Not offered current academic year

COMP 213 (S) Reading the Qur'an (WI)

Crosslistings: ARAB236 / REL236 / COMP213 / GBST236

Secondary Crosslisting

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Class Format: seminar

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay
COMP 214 (S)  Moses: Stranger in a Strange Land

Crosslistings: COMP214 / JWST202 / REL202

**Secondary Crosslisting**

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Elliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short written assignments, and two or three longer papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students who have already taken a course in biblical literature

**Expected Class Size:** 19

**Distributions:** (D1)

**Distribution Notes:** meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under COMP

**Attributes:** JWST Core Electives

SEM Section: 01   TR 9:55 am - 11:10 am   Edan Dekel

COMP 216 (F)  Folk and Fairy Tales in Literature and Beyond  (WI)

From cannibalistic crones in sugary cottages to frogs who can be transformed with a kiss, the English term "folktale" covers a broad range of stories that have been beloved and belittled, transmitted and transformed for hundreds of years in many cultures. This course will look broadly at folktales from different traditions, ranging from early China to medieval Europe and contemporary America. We will approach the folktale from a number of perspectives, including typological approaches; moral notions embedded in such tales; and the often porous borders between the natural and the supernatural, the animal and the human, and living and dead. We will consider the way normative gender and ethnic roles are portrayed and sometimes undermined. We will also consider the complex literary histories of folktales, looking at sources, the interplay of oral and written traditions, folktales as alternative histories, notions of authorship, and the ways stories transform in the course of transmission.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, two or three short written assignments during the semester, and a 9-10-page final paper (with opportunity for revision of the final paper)
COMP 217 (S)  Ancient Wisdom Literature
Crosslistings: JWST205 / REL205 / COMP217 / CLAS205

Secondary Crosslisting
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two longer papers
Prerequisites: none

COMP 218 (F)  Gender and Sexuality in Asian American Theater
Crosslistings: THEA225 / COMP218 / WGSS225

Secondary Crosslisting
This class begins with the premise that intersectional and interdisciplinary studies of gender and sexuality need to be, and in significant ways already are, in conversation with Asian American studies and theater. How might contemporary Western discourses of masculinity and heterosexuality, for example, depend upon theatrical constructions of Eastern sexual alterity? How have Asian American artists managed and critiqued historically gendered and sexualized stereotypes (e.g., hypersexual Dragon Lady, virginal Lotus Blossom, asexual Charlie Chan) through theatrical intervention? This seminar will closely read dramatic literature written by Asian American artists, as well as engage scholarship in Asian American gender and sexuality studies and performance studies. We will read the work of playwrights including Ayad Akhtar, Ping Chong, Frances Ya-Chu Cowhig, Velina Hasu Houston, David Henry Hwang, Young Jean Lee, Diana Son, Lauren Yee, and Chay Yew.

Class Format: seminar
Requirements/Evaluation: in-class participation, weekly reading responses, midterm reflection, in-class reading, short essay, final essay
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: declared WGSS majors
Expected Class Size: 16
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under THEA or COMP
Not offered current academic year

COMP 219 (S) The Monkey King: Transformation of a Legend
Crosslistings: ASST220 / COMP219
Primary Crosslisting
The devious and irascible Monkey King, born of stone, defying all authority yet compelled to behave by a dubious Buddhist magic, is one of the most beloved figures in Chinese culture. This course will trace the transformation of the Monkey King legend from its origins in early representations of monkeys in folklore and a seventh-century Chinese monk’s arduous journey to India in search of Buddhist learning, through its maturation in the sixteenth century, and into works of the Asian diaspora in the U.S. We will examine textual and visual representations of the Monkey King in popular culture, folklore, and literature, to explore topics including ideas about conformity and individual autonomy, morality and law, and the cultural negotiations necessitated by travel and contact with people (or monkeys) of other civilizations.
Class Format: seminar
Requirements/Evaluation: 5 short (1-2 page) papers, a mid-term paper (4-5 pages), and a take-home final
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: comparative literature and asian studies majors
Expected Class Size: 12
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Not offered current academic year

COMP 220 (S) Contemporary Russian Culture and Politics
Crosslistings: GBST214 / RUSS214 / PSCI294 / COMP220
Secondary Crosslisting
This course explores select aspects of contemporary Russian society and politics through literary works and films of post Soviet Russia. We will study the social and political settings of particular plots and opportunities not only in fiction and film but as they emerge in the lived reality of Russians since 1991. In addition to novels and short stories by some of the best contemporary Russian authors, we will read scholarly materials explaining the social and political trends characteristic of Russia's post-socialist transformation under Boris Yeltsin and Vladimir Putin's leadership. Analysis of the political and social processes will be framed in a comparative approach, drawing on parallels and differences with countries of Eastern Europe. All course readings will be in English. Knowledge of Russian is not required.
Class Format: lecture
Requirements/Evaluation: short response essays; final exam; class participation
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: students majoring in Russian, Global Studies, Political Science, History
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RUSS; meets Division 2 requirement if registration is under GBST or PSCI
Not offered current academic year

COMP 221 (F) Hollywood Film
Crosslistings: ENGL204 / COMP221

Secondary Crosslisting

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho; Casablanca; The Godfather; Schindler's List; Bridesmaids; Groundhog Day; and 12 Years a Slave. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Class Format: lecture

Requirements/Evaluation: mandatory attendance at free Sunday 8:00 pm film screenings at Images, two 2-page essays analyzing a short film sequence, two editing exercises (produce a clip and an ~2-page essay), one midterm, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

Distributions: (D1)

Attributes: AMST Arts in Context Electives; ENGL Literary Histories C; FMST Core Courses

COMP 223 (S) Japanese Food Culture in a Global Context

Crosslistings: COMP223 / JAPN223

Secondary Crosslisting

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Class Format: seminar

Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions & class presentations), and one research paper & presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: none

Expected Class Size: 12

Distributions: (D1)

Not offered current academic year

COMP 224 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Crosslistings: RLF225 / COMP224

Primary Crosslisting

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the
groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

Expected Class Size: 18

Distributions: (D1) (DPE)

Distribution Notes: DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Fall 2018

SEM Section: 01    MW 11:00 am - 12:15 pm     Brian  Martin

COMP 225 (F) The Fantastic in Chinese Literature

Crosslistings: CHIN225 / COMP225

Secondary Crosslisting

From the famous human/butterfly metamorphosis in the Daoist text Zhuangzi to contemporary writer Liu Cixin's award-winning "Three Bodies Problem," the "fantastic" has always been part of Chinese literature that pushes the boundary of human imagination. Readers and writers create fantastic beasts (though not always know where to find them), pass down incredible tales, assign meanings to unexplainable phenomena, and reject--sometimes embrace--stories that could potentially subvert their established framework of knowledge. Meanwhile, the "fantastic" is also historically and culturally contingent. What one considers "fantastic" reveals as much about the things gazed upon as about the perceiving subject--his or her values, judgment, anxiety, identity, and cultural burden. Using "fantastic" literature as a critical lens, this course takes a thematic approach to the masterpieces of Chinese literature from the first millennium BCE up until twenty-first century China. We will read texts ranging from Buddhist miracle tales to the avant-garde novel about cannibalism, from medieval ghost stories to the creation of communist superheroes during the Cultural Revolution. The topics that we will explore include shifting human/non-human boundaries, representations of the foreign land (also the "underworld"), the aestheticization of female ghosts, utopia and dystopia, and the fantastic as social criticism and national allegory. All materials and discussions are in English.

Class Format: seminar

Requirements/Evaluation: participation, weekly posting, 3 writing assignments, final paper, oral presentation

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Distributions: (D1)

Fall 2018
COMP 226 (S)  The Ancient Novel  
Crosslistings: CLAS226 / COMP226  

Secondary Crosslisting  
Pirates, prostitutes, witches, and donkeys: the novels of ancient Greece and Rome often surprise their modern readers with a striking blend of humor, violence, and eroticism. From damsels in distress and daring rescues to impossible journeys and magical transformations, this course will consider these remarkable and varied texts within their own literary and cultural contexts. By reading the works of such authors as Longus, Lucian, Apuleius, and Heliodorus, we will survey the different forms of extended prose fiction that have traditionally been called the ancient "novel." We will confront the challenges of defining the genre itself, and consider both its ancient literary heritage and its later reception and afterlife. We will also explore the ways in which these texts engage with the complex and diverse world of the ancient Mediterranean, paying close attention to the representation of gender, sexuality, ethnicity, and cultural identity. All readings are in translation.  

Class Format: seminar  
Requirements/Evaluation: class participation, in-class presentations, brief reading responses (1-page), and a final paper (8-10 pages)  
Extra Info: may not be taken on a pass/fail basis  
Prerequisites: none, although some prior knowledge of the ancient Mediterranean will be useful  
Enrollment Limit: 19  
Enrollment Preferences: Classics and Comparative Literature majors  
Expected Class Size: 19  
Distributions: (D1)  

Spring 2019  
SEM Section: 01  TF 1:10 pm - 2:25 pm  Sarah E. Olsen  

COMP 227 (S)  Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture  
Crosslistings: THEA227 / CHIN227 / COMP227  

Secondary Crosslisting  
This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.  

Class Format: lecture/discussion  
Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project  
Prerequisites: none  
Enrollment Limit: 20  
Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies  
Expected Class Size: 15  
Distributions: (D1)  
Not offered current academic year
Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves. We will address questions such as: How have American Muslims understood their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? What are the competing claims and contestations about authentic expressions of Islam? How are Muslims approaching the tensions between communal belonging and individuality? We will be engaging such questions primarily through an analysis of popular memoirs, autobiographies, novels, and short stories, but will also explore some plays, films, poetry, and comedy.

Class Format: seminar

Requirements/Evaluation: regular reading responses, two short essays (3-4 pages), final presentation, and final paper (7-8 pages)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Distributions: (D1) (DPE)

DPE: This course will explore the many complex intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences internal to Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations and power and difference in the texts that we will read, and how to analyze their workings in nuanced multidimensional ways

Crosslistings: REL266 / ENGL268 / COMP228

Secondary Crosslisting

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: students majoring or considering a major in a related field

Expected Class Size: 30

COMP 230 (S) The Renaissance in England and the European Continent: Self and World  (WI)
Crosslistings: COMP230 / ENGL228
Secondary Crosslisting
At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.
Class Format: seminar
Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Attributes: ENGL 200-level Gateway Courses; ENGL Literary Histories A; Not offered current academic year

COMP 231 (F) Postmodernism  (WI)
Crosslistings: COMP231 / ENGL266
Primary Crosslisting
In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.
Class Format: tutorial; after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week
Requirements/Evaluation: 5 papers (4-5 pages each) and 5 responses (1 page each) in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor
Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D1) (WI)

Attributes: ENGL Criticism Courses;
Not offered current academic year

COMP 232 (S) Reading and Writing the Body (WI)

Am I a body, or do I have one? The western tradition of favoring our intellectual and spiritual experience over the physical has long informed, and indeed limited, our sense of self as human beings. While some writers maintain that the creative impulse is a gift of the muse and that it is rooted entirely in the mind or spirit, there are those for whom the human body, frequently their own, plays a central role, both in the process of creation and as a subject of artistic inquiry and contemplation. In their writing, these authors tell a very different tale with regard to the human experience, and it is focused on the primacy of the body. This course will consider the work of, among others, Maupassant, Kafka, Tanizaki, Tolstoy, Dinesen, Collodi, Babel, and Atwood in order to examine how writers from different cultural and aesthetic perspectives either present or use the body as a vehicle of expression. We will also consider other areas of study that are intimately related to the life of the body, such as asceticism, pathology, prostitution, and disability.

Class Format: tutorial; weekly sessions with the instructor and a fellow student

Requirements/Evaluation: on alternate weeks students will either write and present a 5-page paper on the assigned readings or write and present a 2-page critique of a pre-circulated paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year and sophomore students considering a major in Comparative Literature

Not offered current academic year

COMP 233 (S) Time, Memory, and Narrative: Twentieth-Century Literature and Film

Crosslistings: COMP233 / RUSS233

Secondary Crosslisting

Time and space belong to the most fundamental categories that define our conceptualization of the world we live in. Overcoming the restrictions that these dimensions impose on our existence has always been humanity's major preoccupation. Is there a way to break with time's linearity and irreversibility? One magic tool of overcoming time that we all possess is our memory. Another is art; specifically, such spatial-temporal forms of art as literature and film. Memory, literature, and film are similar in their use of narrative. In order to recast the past we pull out memories and "narrate" them to ourselves or others. A literary character's recollections and reminiscences often constitute the plot of a literary work or film. The sequence of cinematic images in film creates the visual narrative, while one of its main techniques "montage" replicates the seemingly random association of memories in our mind. Apart from its structural significance, time constitutes an important subject of artists' philosophical reflection in both literature and film. In this course, we will explore the themes of time and memory in their relation to different narrative strategies by way of a few masterpieces of 20th-century Russian/Soviet literature and film. How can trains on the Railroad around Moscow annihilate time? What happens if Tsar Ivan the Terrible finds himself in Soviet Moscow? Where does the Russian Ark float and whom does it carry? To answer these and other questions we will read the novels of Vladimir Nabokov and his most congenial successor Sasha Sokolov; a play by Mikhail Bulgakov, and a novella by Vladimir Makanin, among others. We will also watch and discuss the famous films by Leonid Gaidai, Andrey Tarkovsky, and Aleksander Sokurov. In addition, we will read a few scholarly essays on time, memory, and narrative, relating them to our primary material. Readings, films, and discussions are in English.

Class Format: seminar

Requirements/Evaluation: participation, writing assignments, discussion prompts, a final project

Prerequisites: none
Enrollment Limit: none

Enrollment Preferences: students majoring or considering a major in Russian or Comparative Literature

Expected Class Size: 10

Distributions: (D1)

COMP 234 (S) Saharan Imaginations  (DPE) (WI)
Crosslistings: COMP234 / ARAB209 / ENVI208

Secondary Crosslisting

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara’s biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Class Format: seminar

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

COMP 235 (S) The Garden in the Ancient World
Crosslistings: ENVI232 / REL235 / CLAS235 / COMP235

Secondary Crosslisting

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and a final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: Classics majors

COMP 236 (F) She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison’s Writings (WI)
Crosslistings: WGSS207 / COMP236 / AFR205
Secondary Crosslisting
The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison’s writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.
Class Format: tutorial
Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

Attributes: AFR Core Electives; AMST Arts in Context Electives;
Not offered current academic year

COMP 237 (S) Medieval Worlds
While the word “medieval” was first used to designate the period in European history between the fall of Rome and the Renaissance, historians and literary scholars frequently use the term to label periods in other regions and cultures that not only overlap chronologically with the European Middle Ages, but also appear to share similarities in terms of technology, social structures, and religious orientation. This course examines the notion of the "medieval" primarily through the lens of literature. We will read "medieval" works ranging from the Anglo-Saxon poem Beowulf to the landscape poems and folktales of eighth-century China, from a Persian epic to a Sanskrit story-cycle, and the diary of a Japanese court lady. Topics will include the following: How did people create, experience, and transmit literary texts in different medieval cultures? What where the material conditions of literature in these cultures, and how did they impact the development of literature? What roles did religion play in texts that are not explicitly religious? What does it mean to think of the medieval as a category across different cultures?
Class Format: seminar
**COMP 239 (F) What is a Novel?** (WI)

- Crosslistings: COMP239 / ENGL240
- Secondary Crosslisting

What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory—too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick, Edward Said, Leo Bersani, and Franco Moretti.

**Class Format:** seminar

**Requirements/Evaluation:** preparation and active participation in class, several short (1- to 2-page) reflection papers, two mid-length (4- to 5-page) papers or projects

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Comparative Literature majors and prospective majors

**Expected Class Size:** 10

**COMP 240 (F) Introduction to Literary Theory** (WI)

- Crosslistings: COMP240 / ENGL230
- Secondary Crosslisting

This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can Othello be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.
Class Format: seminar

Requirements/Evaluation: frequent short papers totaling 20 pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

COMP 241 (S) Sex and Gender in Ancient Greece and Rome (WI)

Crosslistings: CLAS241 / COMP241 / WGSS241

Secondary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students’ capacity to evaluate claims and dismantle false assumptions about the continuity of the “classical” past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

COMP 242 (S) Americans Abroad (DPE) (WI)

Crosslistings: AMST242 / COMP242 / ENGL250

Primary Crosslisting

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest
Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of “home” into something that reflected their individual identity, and not one imposed by any national culture—American or foreign.

Class Format: seminar

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Distributions: (D1) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under AMST

DPE: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home

Attributes: AMST Arts in Context Electives; GBST Borders, Exiles + Diaspora Studies Electives;

Spring 2019

SEM Section: 01    MW 11:00 am - 12:15 pm     Soledad Fox

COMP 243 (F) Modern Women Writers and the City (WI)

Crosslistings: WGSS252 / COMP243

Primary Crosslisting

Ambivalence has always been a vital part of literary responses to city life. Whether they praise the city or blame it, women writers react to the urban environment in a significantly different way from men. While male writers have often emphasized alienation and strangeness, women writers have celebrated the mobility and public life of the city as liberating. We will look at issues of women's work, class politics, sexual freedom or restriction, rituals of consumption, the conservation of memory by architecture, and community-building in cities like London, New York, Berlin, Paris. We will examine novels and short stories about the modern city by writers as diverse as Virginia Woolf, Gertrude Stein, Anzia Yezierska, Ann Petry, Jean Rhys, Marguerite Duras, Margaret Drabble, Ntozake Shange, Verena Stefan and Jhumpa Lahiri and Edwidge Danticat. We will consider theoretical approaches to urban spaces by feminists (Beatriz Colomina, Elizabeth Wilson), architectural historians (Christine Boyer) and anthropologists and sociologists (Janet Abu-Lughod, David Sibley, Michael Sorkin). Several contemporary films will be discussed. All readings in English.

Class Format: seminar/discussion

Requirements/Evaluation: two short papers of 3-5 pages, one of 5-7 pages, and one final paper of 8-10 pages

Prerequisites: COMP 111 or a 100-level ENGL course

Enrollment Limit: 19

Expected Class Size: 19

Department Notes: formerly COMP 252

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under WGSS

Attributes: AMST Space and Place Electives; GBST Urbanizing World Electives;

Not offered current academic year

COMP 244 (S) Mediterranean Journeys (DPE)
Crosslistings: COMP244 / GBST244

Primary Crosslisting

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of the so-called "migrant intellectuals and artists" who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as a literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Behind the medium of a national language, new cultures and identities are claiming inclusion into the core of the social fabric by speaking out from a marginal position. We read both literary works (Ali Farah, Guene, Lakhous, Scego) and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films and documentaries (Carpignano, Crialese, Godard).

Class Format: seminar

Requirements/Evaluation: weekly writing assignments, midterm and final exams, final paper, oral presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 19

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under GBST DPE:
Within the theoretical framework of postcolonial studies, this course examines themes such as: race; Europe and its postcolonial legacy; power imbalances in the current European policies of migration; the urban space of Rome as site of conflictual representations of center/periphery.

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Not offered current academic year

COMP 246 (S)  Bloody Vampires: From Fiction to Film and Fashion  (WI)

Crosslistings: COMP246 / ENGL287

Primary Crosslisting

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two
centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What
does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and
19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper
understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by
Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films Nosferatu by
Murnau and Herzog, Dracula by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by
Hardwicke, and Daybreakers by Spierig, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will
also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar
Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students majoring or considering a major in language or literature
Expected Class Size: 19
Distributions: (D1) (WI)

COMP 247 (F) Gender, Sexuality and Modern Performance (WI)
Crosslistings: COMP247 / ENGL253 / THEA250 / WGSS250
Secondary Crosslisting
This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and
performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities
of social identities under interrelated systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill,
Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina
Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson,
and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as:
Class Format: tutorial
Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week
(five in all), and comment on their partner's papers in alternate weeks
Extra Info: emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: sophomores and above; majors in Theatre, English or Women's, Gender and Sexuality Studies
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under THEA, COMP or ENGL; meets Division 2 requirement if registration is under
WGSS
Attributes: AMST Arts in Context Electives; PERF Interdepartmental Electives;
Not offered current academic year

COMP 248 (F) Performing Greece
Crosslistings: CLAS211 / THEA211 / COMP248
Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators as written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. From the Homeric epics and the masterpieces of Greek tragedy and comedy to the speeches and dialogues of Demosthenes, Thucydides, and Plato, we will survey the evidence for the musical, visual, and embodied aspects of Greek literature. At the same time, we will reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imaginaition of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek civilization, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. In addition to a wide selection from Greek poetry, drama, and prose, our readings will include works by ancient and modern theorists of performance and culture. All readings are in translation.

**Class Format:** lecture

**Requirements/Evaluation:** class participation, two essays (5 pages), midterm, final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-year students and sophomores and majors in Classics, Comparative Literature, and Theatre

**Expected Class Size:** 35

**Distributions:** (D1)

---

**COMP 249 (F) Trauma and Memory in Maghrebi and Middle Eastern Literatures** (DPE) (WI)

Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given a short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

**Class Format:** seminar

**Requirements/Evaluation:** active participation, short presentation, short weekly response papers, mid-term exam, and final paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies majors and certificate students

**Expected Class Size:** 15

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.

COMP 250 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis
Crosslistings: COMP250 / REL207 / JWST207 / CLAS207

Secondary Crosslisting
How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation and several writing assignments
Extra Info: core course for COMP
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students who have already taken a course in Biblical literature
Expected Class Size: 19
Distributions: (D2)

Attributes: JWST Core Electives
Not offered current academic year

COMP 252 (F) Arab Women Memoirs: Writing Feminist History
Crosslistings: WGSS251 / ARAB252 / COMP252 / HIST309

Secondary Crosslisting
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlhood), Leila Ahmed (A Border Passage: From Cairo to America--a Woman's Journey), Fadia Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Women Writers), and Jumanah Haddad (I Killed Scheherazade: Confessions of an Angry Arab Woman), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Class Format: seminar
Requirements/Evaluation: active class participation, several short response papers, three short papers (3-5 pages), and a final paper (7-10 pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 15
COMP 254 (F) "Disease" in Modern Chinese Literature and Culture
Crosslistings: WGSS255 / CHIN253 / COMP254

Secondary Crosslisting
From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Class Format: lecture/discussion
Requirements/Evaluation: regular in-class presentation, three short papers (3-5 pages) and one final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under COMP or CHIN

COMP 255 (S) Love and Death in Modern Japanese Literature
Crosslistings: ASST253 / COMP255

Primary Crosslisting
One thing that surprises many first-time readers of modern Japanese fiction is its striking similarity to Western fiction. But equally surprising are the intriguing differences that lie concealed within that sameness. This course investigates Japanese culture and compares it with our own by reading Japanese fiction about two universal human experiences--love and death--and asking what inflections Japanese writers give these ideas in their work. The course begins with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and that still feature prominently in Japanese popular culture, from comics to TV dramas. From there we move on to novels and films that examine a range of other relationships between love and death, including parental love and sacrifice, martyrdom and love of country, sex and the occult, and romance at an advanced age. We will read novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima as well as more contemporary fiction by writers like Murakami Haruki; we will also look at some visual literature, including puppet theater, comics, animation, and Japanese New Wave film. The class and the readings are in English.

Class Format: seminar/lecture/discussion
Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project
Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; no familiarity with Japanese language or culture is required

Enrollment Limit: none

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ASST

Attributes: GBST East Asian Studies Electives

Not offered current academic year

COMP 257 (F) From Putin to Pussy Riot: Discourses of Post-Soviet Gender  (DPE)

Crosslistings: GBST213 / WGSS214 / COMP257 / RUSS213

Secondary Crosslisting

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin's regime by performing in day-glo balaclavas in Russia's largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West. All readings will be in English, and all films with have English subtitles.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RUSS or COMP; meets Division 2 requirement if registration is under GBST or WGSS. This course is part of the Difference, Power, and Equity requirement because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse.

COMP 258 (F) Film and Media Studies: An Introduction

Crosslistings: COMP258 / ENGL274

Secondary Crosslisting

This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and
exercises.

Class Format: lecture/discussion/studio

Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: no prior production experience is required

Enrollment Limit: 30

Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

Expected Class Size: 30

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

COMP 259 (S) Adultery in the Nineteenth-Century Novel (WI)

Crosslistings: COMP259 / ENGL261 / WGSS259

Primary Crosslisting

In this tutorial, we will read four novels written between 1850 and 1900, all of which focus on the figure of the adulteress: Gustave Flaubert's Madame Bovary (1856), Lev Tolstoy's Anna Karenina (1873-77), Leopoldo Alas y Ureña's La Regenta (1884-85), and Theodor Fontane's Effi Briest (1894). For each week of class, students will read one of these primary texts, as well as a selection of secondary literature that will allow us to understand, over the course of the semester, how and why the adulteress played a key role in the cultural imagination of Europe during this time. All works will be read in English translation.

Class Format: tutorial; students will meet with the professor in pairs, with one student from each pair writing a 5-page paper for each class session

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have already taken at least one course devoted to literature at Williams

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under COMP or ENGL; meets Division 2 requirement if registration is under WGSS

Attributes: ENGL Literary Histories B;

COMP 260 (F) Reading Comics from the French-Speaking World

Crosslistings: COMP260 / RLFR260

Secondary Crosslisting

From political cartoons and satire of the 19th century to contemporary graphic novels, the bande dessinée has a long history in the French-speaking world. We will read classics such as Astérix and Tintin, and contemporary BD from France, Québec, Côte d’Ivoire, Morocco, Rwanda, and Guadeloupe to analyze how they tackle subjects such as nation, empire, sexuality, biography, war and human rights. We will pay attention to the visual form and critical theory of the genre. Conducted in French.

Class Format: seminar

Requirements/Evaluation: weekly response papers, two short papers, presentation and final research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students, Comparative Literature majors
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

COMP 261 (S) Comparative Postcolonial Narratives: Novels from the Arab World, Latin-America and the Caribbean  (WI)
Crosslistings: ARAB261 / COMP261
Primary Crosslisting
In this introductory course to the global postcolonial novel, we will examine novels in translation from the Arab world, Latin America and the Caribbean that are in conversation with each other. Through textual and formal analysis of selected novels in translation, we will ask questions concerning the legacy of the different forms of European colonialism in these distinct geographies. This course has two goals: First, to familiarize students with classical, canonical and popular Arabic, Latin American and Caribbean novels that deal with the history of European colonialism and/or its aftermath. Second, to introduce student to some of the critical trends and theoretical debates concerning the potential and limits of reading these novels as resistance and/or postcolonial literature. In addition to selected critical essays, the readings for this course may include novels by the following writers: Assia Djebar (Algeria), Gamal al-Ghitani (Egypt), Sahar Khalifah (Palestine), Tayyib Saleh (Sudan), Alejo Carpentier (Cuba), Rosario Castellanos (Mexico), Jamaica Kincaid (Antigua), and Gabriel García Marquez (Colombia).
Class Format: seminar
Requirements/Evaluation: active class participation, three short papers (3-5 pages) and a final 7- to 10-page expansion and rewrite
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: majors or prospective majors in Comparative Literature or Arabic Studies
Expected Class Size: 15
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARAB
Not offered current academic year

COMP 262 (F) Japanese Theatre and its Contemporary Context
Crosslistings: THEA262 / COMP262 / JAPN260
Secondary Crosslisting
Japan’s rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, “of what relevance is each to a contemporary audience?” Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.
Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Distributions: (D1)
Attributes: GBST East Asian Studies Electives

Fall 2018
COMP 264 (S) The End of the World in Japanese Literature and Visual Culture
Crosslistings: COMP264 / ASST254

Primary Crosslisting
From the endemic warfare of the medieval era to the atomic bombing and the violent explosion of technology in the last century, the end of the world is an idea which has occupied a central place in almost every generation of Japanese literature. Paradoxically, the spectacle of destruction has given birth to some of the most beautiful, most moving, and most powerfully thrilling literature in the Japanese tradition. Texts may be drawn from medieval war narratives like The Tale of the Heike; World War II fiction and films by Ibuse Masuji, Imamura Shôhei, and Ichikawa Kon; fantasy and science fiction novels by Abe Kôbô, Murakami Haruki and Murakami Ryû; and apocalyptic comics and animation by Oshii Mamoru, Ôtomo Katsuhiro, and others. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Class Format: lecture/discussion
Requirements/Evaluation: in-class exam, ungraded creative project, and a few short response assignments, plus two 5- to 7-page papers emphasizing original, creative readings of the literary texts
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 25
Enrollment Preferences: students majoring or considering a major in a related field
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: GBST East Asian Studies Electives

Spring 2019

COMP 265 (S) Theories of Language and Literature (WI)
Crosslistings: COMP265 / ENGL209

Secondary Crosslisting
This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Class Format: seminar
Requirements/Evaluation: four short papers totaling 20 pages, informal weekly writing, class attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: ENGL Criticism Courses; ENGL 200-level Gateway Courses;
Not offered current academic year

COMP 266 (F) Confession and Deception in Japanese Literature
Crosslistings: ASST266 / COMP266
Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth- and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none; no familiarity with Japanese language or culture is required

**Enrollment Limit:** 25

**Enrollment Preferences:** students majoring or considering a major in Comparative Literature

**Expected Class Size:** 15

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ASST

**Attributes:** GBST East Asian Studies Electives

**Not offered current academic year**

**COMP 267 (F) The Art of Friendship**

Crosslistings: CLAS212 / COMP267 / REL267

**Secondary Crosslisting**

The idea of friendship has captivated poets, philosophers, and their audiences for over three millennia. The subtle dynamics of this fundamental relationship between humans have been a source of inspiration, consolation, and consternation for countless writers and readers. What are the different types of friendship? How does one make a friend, and what makes a good friend? How does a friend differ from an acquaintance, an ally, an accomplice, an enemy? Can the beloved also be a friend? Ancient Greek and Latin writers took up these and other questions about friendship in philosophical dialogues and treatises, epic and lyric poems, tragic and comic plays, oratory, and correspondence. This course will explore ancient theories and representations of friendship through readings from many of the most important texts and authors of antiquity, including Gilgamesh, the Hebrew Bible, Homer, Sappho, Euripides, Plato, Aristotle, Cicero, Virgil, Seneca, and the Epistles of Paul. We will also consider the wide-ranging responses to these meditations and depictions in later traditions from the Middle Ages to modernity, in such writers as Heloise and Abelard, Aelred of Rievaulx, Aquinas, Montaigne, Ralph Waldo Emerson, Emily Dickinson, Elizabeth Bishop, Jack Kerouac, and Susan Sontag. All readings are in translation.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short written assignments, and a final paper/project

**Prerequisites:** none

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under REL

**Not offered current academic year**

**COMP 267 (F) Performance Studies: An Introduction** (DPE)

Crosslistings: COMP267 / WGSS267 / DANC267 / THEA267
Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

Class Format: seminar

Requirements/Evaluation: reflection papers, performance analysis, final paper or performance

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under COMP, DANC or THEA; meets Division 2 requirement if registration is under WGSS DPE: This course tracks performance studies' engagement with feminist, queer, post-colonial, and critical ethnic studies scholarship, equipping students with tools and concepts with which to analyze power, difference, and equity.

COMP 268 (S) Novel Worlds  (WI)

Crosslistings: ENGL263 / COMP268

Secondary Crosslisting

Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail--each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world. We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's Emma, Charles Dickens's Bleak House, Carroll's Alice in Wonderland, Italo Calvino's Invisible Cities, and Roberto Bolano's Savage Detectives.

Class Format: seminar

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 19

Distributions: (D1) (WI)
**COMP 269 (F) The Self Under Stalin: a Genealogy of Soviet Subjectivity** (DPE)

Crosslistings: COMP269 / RUSS277

**Secondary Crosslisting**

In this course, students will explore a variety of cultural artifacts (literature, film, song, visual art, and architecture), personal documents (diaries and letters), and secondary literature, which speaks to the real, subjective experience of life in the Soviet Union under Stalin. Throughout his reign, Stalin spurned basic human values like freedom and democracy in favor of class hatred, discipline, and conformity. He unleashed unthinkable violence on the Soviet population, provoking mass famine and instigating campaigns of political terror, all in the name of transforming impoverished, agricultural Russia into the world's first industrially advanced, socialist society. The underlying logic of this social experiment has been diagnosed as totalitarian, a distinction designating systems of governance in which the state uses a combination of coercion and propaganda to achieve total control over the thoughts and actions of its subjects. The opening of borders and archives since the fall of the Soviet Union, however, has shown the image of the passive, brainwashed automaton to be inadequate in relation to the everyday cares, aspirations, fears, joys and sorrows, ethical dilemmas, personal narratives, and forms of covert resistance that shaped the identities of ordinary Soviet people. Scholars of Soviet subjectivity have worked to bring these stories to light in an attempt to achieve a more nuanced understanding of the Soviet experience. Students will apply insight from this field to their own investigations of Soviet selfhood in discussions, short response papers, and a final research paper. All readings are in English.

**Class Format:** seminar

**Requirements/Evaluation:** class participation, short response papers, final paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Russian majors, History majors, Comparative Literature majors

**Expected Class Size:** 10

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: This course is part of the Difference, Power, and Equity initiative not only because it explores the formation of identity in situations in which the state wields extreme power over the actions and speech of its subjects, but also because it confronts the limitations of the concept of totalitarianism in representing the experience of such subjects. Special attention will be devoted to issues of class, gender, ethnicity, and non-human actors as they relate to the problem of Soviet subjectivity.

---

**COMP 270 (S) Russian Literature and European Existentialism**

Crosslistings: COMP270 / RUSS222

**Secondary Crosslisting**

Existentialism was a highly influential movement in twentieth-century European literature and thought. Nowadays the terms existentialism and existentialist are broadly used to describe the worldview and literary style of writers and thinkers as different as Fyodor Dostoevsky, Leonid Andreyev, Martin Heidegger, Franz Kafka, and Jean-Paul Sartre. Reflecting the shift to irrationalism in early twentieth-century philosophy and psychology, as well as the global cataclysms of the twentieth century, existentialism focuses on the problem of human alienation in the modern world, suggesting ways of overcoming it. In this course addressing the key concepts of existentialist philosophy (angst, borderline situation, the absurd, freedom), we will examine the origins of the existentialist worldview in nineteenth and early twentieth-century Russian literature (Dostoevsky, Chekhov, Leonid Andreyev); read and discuss existentialist texts by Kafka, Albert Camus, and Sartre; and look at the existentialist legacy in contemporary Russian and Western culture, including rock music. All readings are in English.

**Class Format:** lecture
COMP 271 (S) From Kleist to Kafka

Crosslistings: COMP271 / GERM271

Secondary Crosslisting

Heinrich von Kleist (1777-1811) and Franz Kafka (1883-1924) wrote some of the most puzzling and intriguing work in European literary history. From Kleist's drama Penthesilea, which culminates in the consumption of the hero by the heroine (literally!), to Kafka's "A Hunger Artist," profiling a man who starves for a living, the texts in the course attempt to access the most profound--and at times bizarre--regions of the human mind. Works we will read include Kleist's dramas Prince Friedrich of Homburg, Amphitryon, and Penthesilea, and his short stories "The Marquise of O...," "The Earthquake in Chile," "The Foundling," "St Cecilia and the Power of Music," and "The Betrothal in Santo Domingo." By Kafka we will study "The Judgment," "The Metamorphosis," "A Hunger Artist," "In the Penal Colony," "The Burrow," "A Country Doctor," and others. Literary readings will be supplemented by selected letters and essays by Kleist, and by excerpts from Kafka's diaries. Readings and discussion in English.

Class Format: seminar

COMP 272 (S) The History and Mythology of Chinese Scripts

Crosslistings: COMP272 / CHIN272

Secondary Crosslisting

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatical studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: lecture/discussion
COMP 273 (F) Murder 101
Crosslistings: ENGL273 / COMP273

Primary Crosslisting
Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories from around the world. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. At the same time the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows and films noir will also be included in the course material. All readings will be in English.

Class Format: seminar
Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Comparative Literature and English majors
Expected Class Size: 15
Department Notes: COMP core course
Distributions: (D1)

Not offered current academic year

COMP 274 (F) Confronting Japan (WI)
Crosslistings: COMP274 / JAPN274

Secondary Crosslisting
This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan’s shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Class Format: tutorial
Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Japanese majors
Expected Class Size: 10
Distributions: (D1) (WI)

Not offered current academic year

COMP 275 (S) American Drama: Hidden Knowledge (WI)
Crosslistings: COMP275 / ENGL224 / THEA275 / AMST275

Secondary Crosslisting
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli’s The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Theatre and English majors
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under THEA, COMP or ENGL; meets Division 2 requirement if registration is under AMST
Attributes: AMST Arts in Context Electives; Not offered current academic year

COMP 276 (S) Black Europeans (WI)
Crosslistings: AFR276 / GERM276 / COMP276

Primary Crosslisting
This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Class Format: tutorial
Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-years, sophomores, and juniors
Expected Class Size: 8
Distributions: (D1) (WI)
COMP 278 (S) Premodern Japanese Literature and Performance
Crosslistings: COMP278 / JAPN276

Secondary Crosslisting

Some of Japan’s performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan’s history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts. All readings and discussions will be in English.

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Distributions: (D1)

Attributes: GBST East Asian Studies Electives; PERF Interdepartmental Electives

Not offered current academic year

COMP 279 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture
Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

Secondary Crosslisting

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviances from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktale, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quineau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference

Expected Class Size: 15
COMP 281 (S) The Banlieue in Literature, Music, and Film
Crosslistings: RLFR240 / AFR241 / COMP281

Secondary Crosslisting
In this course we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Class Format: seminar
Requirements/Evaluation: journaling, presentation, in-class discussion, and final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above
Enrollment Limit: 20
Enrollment Preferences: French majors, certificate, Africana and Comparative literature students
Expected Class Size: 15
Distributions: (D1)

Not offered current academic year

COMP 282 (F) Introduction to Francophone Literatures
Crosslistings: AFR204 / COMP282 / RLFR203

Secondary Crosslisting
What is the Francophone world comprised of? Who speaks French today and why? What does the idea of Francophonie really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the littérature-monde manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of Francophonie so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (l'hexagone), and Haiti among others.

Class Format: seminar
Requirements/Evaluation: presentation, journaling, final project, participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above, placement exam or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate, Africana and Comp. Lit
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; GBST Borders, Exiles + Diaspora Studies Electives
Not offered current academic year

COMP 283 (F) Haitian and French Caribbean Literatures and Films
Crosslistings: COMP283 / AFR261 / RLFR261
Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the “French” Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling “intimist” stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

Attributes: FMST Core Courses

Not offered current academic year

COMP 285 (S) World War II in Russian Culture

Crosslistings: RUSS220 / COMP285 / GBST220

Secondary Crosslisting

This course traces the development of state-sponsored collective memory of the Great Patriotic War, as the Eastern front of World War II is called in Russia, and its counter-narratives. The veritable cult of the war, as it was shaped by the late Soviet period, took decades to coalesce and went through multiple stages. The relative disregard in the immediate post-war years under Stalin was followed by the striking re-enactments in literature and film of the period of Khruschev’s Thaw. The memory of the war for new generations was further defined in state-sponsored memorials, museums and public events under Brezhnev. While Soviet ideology was discredited in the wake of the USSR’s collapse, ordinary Russians and politicians alike continue to this day to see Russia’s victory over Nazi Germany with pride and as part of their national identity. This course explores the contradictory elements that make up the images and narratives of the war -- in novels, short stories, feature films, and oral histories -- which bring together state violence and individual freedom, patriotism and oppression, remembrance and forgetting. After an initial acquaintance with the colossal human cost of the war, we will examine the artistic, cultural and political traditions of addressing the national trauma that have evolved in the official and unofficial discourses of the war. The search for a “usable past” of the war continues in contemporary Russia, breaching previously suppressed topics yet also obfuscating public attempts to critically examine people’s experiences of the war beyond the inherited Soviet myths.

Class Format: seminar

Requirements/Evaluation: class participation, research paper, final exam

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: RUSS and COMP majors

Expected Class Size: 10-15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RUSS or COMP; meets Division 2 requirement if registration is under GBST

Attributes: GBST Russian + Eurasian Studies Electives

Not offered current academic year

COMP 287 (S) Russian and Soviet Cinema

Crosslistings: COMP287 / RUSS275

Secondary Crosslisting
In this course, we will survey over a hundred years of Russian and Soviet film to explore how cinema has reflected and, at times, created the country's most important historical events and cultural myths. We will pay close attention to Russian filmmakers' varied reactions to Hollywood cinema, as well as to the lively body of cinema theory that these reactions generated. Our survey will begin in the pre-Revolutionary era and include representative films from the time of the Bolshevik Revolution, Stalinism and World War II, the Thaw and Stagnation, Glasnost, and the Putin era. In addition to studying films by auteur filmmakers, such as Sergei Eisenstein, Andrei Tarkovsky, and Aleksandr Sokurov, we will watch movies made for the masses, which have helped to form Russians' understanding of their country and themselves. All readings will be in English and all films will be viewed with English subtitles.

Class Format: seminar

Requirements/Evaluation: completion of all viewing and reading assignments, active participation in class discussions, two short papers, and a final research project

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 15

Distributions: (D1)

COMP 289 (F) Theorizing Magic (WI)

Crosslistings: ANTH297 / COMP289 / REL297

Secondary Crosslisting

This is a course about magic. It is not about stage magic, sleight of hand, or the art of pulling rabbits out of hats. You will learn no card tricks. But instead we will learn about those people who believed in the reality of certain powers; from the ability to summon good or evil spirits, transform base metals into gold, predict the future, or manipulate matter by thought alone. The problem of how to theorize magic has long been a cause of concern for the natural and social sciences. Many a sociologist and anthropologist has imagined that belief in magic should have vanished with modernity (despite much evidence to the contrary). Meanwhile, philosophers of science have been long fascinated with the demarcation problem-figuring out grounds by which to distinguish legitimate sciences (like astronomy) from their magical or pseudoscientific cousins (like astrology). We will trace these discussions and problematize them by looking at the beliefs of self-defined witches and magicians. This should put us in a position to interrogate the construction of concepts of magic, science, and religion and show how the boundaries between these categories emerged historically. Topics to be discussed will include: the rationality of magic, the fine lines separating magic, science and religion, the persecution of witches, and the role notions of magic and superstition played in European modernization and colonization projects. The tutorial sessions will be customized to student interests, but texts will likely include selections from primary works in translation, such as Cornelius Agrippa's Occult Philosophy, Giordano Bruno's On Magic, Aleister Crowley's Magick Liber Aba, as well as selections from secondary literature, perhaps including Marcel Mauss, A General Theory of Magic, Max Weber, "Science as Vocation," Tanya Luhrmann, Persuasions of the Witches' Craft, Thomas Kuhn, The Structure of Scientific Revolutions, Larry Laudan, "The Demise of the Demarcation Problem," E.E. Evans-Pritchard, Witchcraft and Oracles, and Magic among the Azande, and/or Kelly Hayes, Holy Harlots: Femininity, Sexuality and Black Magic in Brazil.

Class Format: tutorial

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under REL or ANTH; meets Division 1 requirement if registration is under COMP

Not offered current academic year
COMP 290 (F) Shakespeare on Page, Stage and Screen: Text to Performance  (WI)
Crosslistings: COMP290 / ENGL270 / THEA260

Secondary Crosslisting

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Class Format: seminar
Requirements/Evaluation: based on class participation, several short reading responses, and two longer papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Theatre and English majors, and prospective majors
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: ENGL Literary Histories A;
Not offered current academic year

COMP 293 (F) Great Big Books  (WI)
Crosslistings: COMP293 / ENGL233

Secondary Crosslisting

Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: War and Peace (1869), Leo Tolstoy's epic of the Napoleonic Wars, and Parade's End (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Class Format: seminar
Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Distributions: (D1) (WI)
Attributes: ENGL 200-level Gateway Courses; ENGL Literary Histories B;
Not offered current academic year

COMP 294 (S)  Philosophy and Narrative Fiction  (WI)
Crosslistings: PHIL294 / COMP294

Secondary Crosslisting
What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose--philosophers' preferred form of expression--clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial
Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP
Attributes: FMST Core Courses;
Not offered current academic year

COMP 295 (F)  Philosophy of Film and Film Theory  (WI)
Crosslistings: COMP295 / PHIL295

Secondary Crosslisting
Philosophy of film is a relatively young, but very rich and rapidly growing field. Its central question--What is film?--has been approached and framed in many different ways; naturally, the answers to that question, and the theoretical assumptions that underlie the answers, differ as well. This course will offer a selective overview of the debates that characterized philosophy of film since the early 20th century. Starting with early film theorists (such as Munsterberg, Arnheim, Bazin, and Soviet formalists), we will examine how their insights and disagreements influenced later developments in continental and analytic philosophy of film, and in film theory. While looking at film as art, as document, as experiment and as entertainment, we will always keep in sight specific theoretical assumptions that underlie different understandings of film, and different critical approaches to the medium. Some of the questions we will ask are: What is the nature of filmic representation? Does film accurately capture reality, as no other art does? Does it advance our thinking and increase our knowledge of the world? Or is it a supreme illusion, a dream-like escape, the domain in which the viewer's unconscious wishes are magically fulfilled? How does film generate meaning? Is film a creation of a single artist - the director, the author - or is it a result of a loosely synchronized and not quite coherent collaboration of many different people, each guided by her or his particular vision? Is there a room for the notion of collective intention in filmmaking? What is the nature of audience's response to film? Why do we seek to experience through film
fear and anguish that we avoid in our daily lives? Are there ethical considerations that should govern both film production and spectatorship? Finally, is there a reason for philosophy of film and film theory to exist as a separate field? Is philosophy of film really autonomous, independent from traditional philosophical disciplines which help generate its central questions, such as aesthetics, philosophy of art, epistemology, ontology, semiotics, ethics, social and political philosophy? Is film today really distinct from a number of new, emerging visual media? How should we think about the boundaries and methods of theorizing about film?

Class Format: seminar

Requirements/Evaluation: this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & two 5 pages long papers

Extra Info: the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and intended majors; students especially interested in film; and by seniority

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PHIL; meets Division 1 requirement if registration is under COMP

Attributes: FMST Core Courses; PHIL Contemporary Value Theory Courses;

Not offered current academic year

COMP 296 (S) Chinese Film and Its Significant Others

Crosslistings: CHIN226 / COMP296

Secondary Crosslisting

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Class Format: lecture

Requirements/Evaluation: attendance and participation, short response papers (1-2 pages each), one final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

Expected Class Size: 15

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

COMP 297 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films

Crosslistings: CHIN237 / COMP297

Secondary Crosslisting

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from
the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors
Expected Class Size: 10
Distributions: (D1) (WI)
Attributes: FMST Core Courses;
Not offered current academic year

COMP 298 (S) Introduction to French and Francophone Film
Crosslistings: COMP298 / RLFR228
Secondary Crosslisting
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.
Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: RLFR 201, 202, or 203, or by permission of instructor
Expected Class Size: 12
Distributions: (D1)
Attributes: FMST Core Courses
Not offered current academic year

COMP 299 (S) Coffee, Sugar, Wigs, and Desks: Writing and Material Life in Early Modern France (WI)
Crosslistings: RLFR229 / COMP299
Secondary Crosslisting
This tutorial considers the relationship between slavery, colonial commerce, and the burgeoning market in material and cultural goods. We look at France's "consumer revolution" through the lens of four material objects--sugar, coffee, wigs, and desks--to consider how eighteenth-century concepts of race, gender, and social status related to taste, sociability, appearance, and writerly identity. Readings by Voltaire, Aulnoy, Genlis, Bernardin de Saint-Pierre, and others will be paired with critical texts from literary and material historians as well as objects found in local collections.
Class Format: tutorial
**COMP 300 (F) Thinking Diaspora: The Black Atlantic and Beyond**

**Crosslistings:** AMST308 / ENGL309 / WGSS308 / COMP300

**Secondary Crosslisting**

Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage—suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature—how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy’s *The Black Atlantic*, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students’ theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise’eke Tinsley, and Vanessa Agard-Jones. Primary texts will include *The Big Sea* by Langston Hughes, *Sugar and Slate* by Charlotte Williams, Barry Jenkins’ *Moonlight*, and more.

**Class Format:** seminar

**Requirements/Evaluation:** weekly reading responses, presentations, one 10-page paper, engaged feedback process, and thoughtful class participation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** none

**Expected Class Size:** 20

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AMST or WGSS

**Attributes:** ENGL Criticism Courses

---

**COMP 301 (S) Sublime Confusion: A Survey of Literary and Critical Theory**

**Crosslistings:** COMP301 / ENGL301

**Primary Crosslisting**

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining “beauty.” But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as “the sublime.” The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature’s exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully.
and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** students majoring or considering a major in a related field

**Expected Class Size:** 9

**Distributions:** (D1)

**Attributes:** ENGL Criticism Courses

Not offered current academic year

**COMP 302 (S) Latino Writing: Literature by U.S. Hispanics (WI)**

Crosslistings: RLSP306 / COMP302

**Secondary Crosslisting**

Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarreal, Tomas Rivera, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Diaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.

**Class Format:** tutorial

**Requirements/Evaluation:** five short oral presentations/papers (about 20-25 minutes) and a final longer one (about 40-45 minutes)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200-level RLSP course or seek permission of the tutor

**Enrollment Limit:** 10

**Distributions:** (D1) (WI)

**Attributes:** AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; LATS Countries of Origin + Transnationalism Elect;

Not offered current academic year

**COMP 303 (S) Embodied Archives: Global Theatre and Performance Histories (DPE)**

Crosslistings: COMP303 / THEA301

**Secondary Crosslisting**

History shapes bodies and is, in turn, shaped by bodies. Whose story is included in the archive? Whose story is left out? What remains over time? What disappears? Why? As theatre and performance historians, our task will be twofold: to study the past but also to question how its been constructed over time. Our obligations will include: handling, analyzing, and contextualizing primary sources; giving equal value to textual and embodied forms of knowledge preservation; taking into account the gender, race, class, status, and ethnicity of the historical participants who occupy the archive; and asking who benefitted from the ideological systems of a given age and who did not. Performance histories to be considered include: West-African Yoruba ritual; pre-Columbian performance in Mesoamerica; ancient Greek civic festivals; labor and guild theatres of Medieval England; print and Kabuki cultures of the Japanese Edo period; eighteenth-century celebrity portraiture across the circum-Atlantic; U.S. Civil War photography and reenactment; and performance histories drawn from (or unseen by) the archives of Williams College. Our readings and approaches will be
informed by leading performance and cultural studies critics, such as: Diana Taylor, Joseph Roach, Saidiya Hartman, Rebecca Schneider, Harvey Young, and Tavia Nyong’o. This course is required for Theatre majors and is a prerequisite for THEA 401.

**Class Format:** seminar

**Requirements/Evaluation:** weekly "free-writing responses"; two "deep-reads" of archival materials; a 5-page midterm paper; a 10-minute oral report; and a final research project or presentation

**Prerequisites:** THEA 101, 102, 103, 201, 204 or by permission of instructor with evidence of equivalent 100-level course in Division I or Division II

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre majors

**Expected Class Size:** 8-10

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: This course directly interrogates the power inequities of the historical archive and insists on acknowledging the value of embodied practice as a form of knowledge. Students will learn to question the authorship and ownership of the past by those who controlled its preservation. We will examine primary sources as contextually constructed rather than 'givens,' and we will seek to understand the status of those observers and participants whose stories comprise the archive of performance.

**Spring 2019**

**SEM Section:** 01  TR 9:55 am - 11:10 am  Amy S. Holzapfel

**COMP 305 (F) Dostoevsky: Navigating Through the Underground**

Crosslistings: COMP305 / RUSS305

**Secondary Crosslisting**

In this course, students will acquaint themselves with Dostoevsky's oeuvre--from his early masterpieces to his artistic testament, The Brothers Karamazov. The key concept through which we will approach Dostoevsky's various writings will be the underground--a powerful metaphor of spiritual decay, angst, resentment, and rebellion against the whole of creation shared by many Dostoevsky characters, from the anonymous protagonist of Notes from Underground, to Raskolnikov (Crime and Punishment), to all the brothers Karamazov. Inheriting Dostoevsky's own existential doubts, his major characters strive to find an exit from their various "undergrounds," some with and some without success. What are the philosophical, psychological, and artistic foundations of the underground? How does one end up there in Dostoevsky's view? And what is the way out? These are just a few of the questions to be answered as we explore the primary genius of Russian literature. All readings are in English.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation in discussion, one 1-page writing assignment, two research papers, digital project, final project (paper)

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** RUSS and COMP majors

**Expected Class Size:** 15

**Distributions:** (D1)

**Fall 2018**

**SEM Section:** 01  TF 1:10 pm - 2:25 pm  Vladimir Ivantsov

**COMP 306 (S) Rise and Shine with Tolstoy**

Crosslistings: COMP306 / RUSS306

**Secondary Crosslisting**

Prepare to alternately fall in love and lock horns with this illustrious nineteenth-century Russian author. He is worth it! This course will examine the life and major works of Leo Tolstoy in the context of Western intellectual history. Readings will include his two great novels, War and Peace and Anna Karenina, as well as a number of shorter works, such as The Cossacks and Hadji Murad. We will also consider some of Tolstoy's aesthetic and didactic works as we examine his broad, rich, and sometimes unexpected development as an artist and thinker.
Class Format: seminar
Requirements/Evaluation: active and substantive class participation; short papers; leading class discussion
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: RUSS and COMP majors
