Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

WINTER STUDY AND INDEPENDENT STUDY

In addition to courses fulfilling the environmental studies major and concentration requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- MAST 397, 398 Independent Study: Maritime Studies
Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major, distributed according to the requirements detailed below. Because the ENVI curriculum was restructured, students in the class of 2019 have different requirements than those for the class of 2020 and subsequent classes. The requirements for the class of 2020 follow immediately below. Those for the class of 2019 are provided below those for the class of 2020.

For students in the class of 2020 and subsequent classes:

Introductory required courses (2 courses):
- ENVI 101 Nature and Society: An Introduction to Environmental Studies
- ENVI 102 Introduction to Environmental Science

200-level foundational courses required for all ENVI majors (3 courses, 1 from each category):

Culture/Humanities
- ENVI 217 Landscape, Place, and Power (formerly Environmental Humanities: Theory and Practice)
- or ENVI 244 Environmental Ethics
- or ENVI 250 Environmental Justice
- or ENVI 259 New England Environmental History

Social Science/Policy
- ENVI/ECON 213 Introduction to Environmental and Natural Resource Economics (ECON 110 prerequisite)
- or ENVI 270 Environmental Problems: Social Causes, Consequences and Policy Solutions
- or ENVI/PSCI 283 Dirty Politics: Regulating Hazardous Chemicals and Wastes
- or ENVI 307/PSCI 317 Environmental Law

Environmental Science (with lab)
- ENVI 203 Ecology
- or ENVI 205 Geomorphology
- or ENVI 215 Climate Changes

Specialization (4-course) Cluster (including a “methods course” and in some cases one “living systems” course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental economics, environmental justice, environmental literature, environmental chemistry, environmental biology, environmental geosciences, environmental planning and design, urban environmental studies, water and energy, sustainable food and agriculture, environmental justice.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Board, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the...
200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

One “methods course” requirement:
- ENVI 214/GEOS 214 Geographic Information Systems
- or STAT 201 Statistics and Data Analysis
- or STAT 202 Introduction to Statistical Modeling
- or ANSO 205 Ways of Knowing
- or POEC 253 Empirical Methods in Political Economy
- or ECON 255 Econometrics
- or STAT 346 Regression and Forecasting
- or CHEM 364/ENVI 364 Instrumental Methods of Analysis
- or MATH 410/BIOL 214 Mathematical Ecology

This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.

One “living systems course” requirement:
- BIOL 203/ENVI 203 Ecology
- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- BIOL 220/ENVI 220 Field Botany and Plant Natural History
- BIOL 231/MAST 311 Marine Ecology
- GEOS 210/MAST 211 Oceanic Processes
- BIOL 302/ENVI 312 Communities and Ecosystems

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Senior Seminar Requirement:
In the senior year—or, under special circumstances during the junior year—students will take two 400-level seminars, ENVI 411 and ENVI 412, that together serve as a capstone experience for the major and concentrations. These courses are interdisciplinary, issue-based and project-driven. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshires involving urban and rural land use planning and sustainable design. Offered in the spring semester, the Senior Research Seminar engages students in research on a policy-related environmental problem.

Required Courses (2 courses)
- ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving
- ENVI 412 Practicum: Senior Research Seminar

CONCENTRATION IN ENVIRONMENTAL STUDIES
The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College. The concentration in Environmental Studies consists of seven courses: four core courses and one elective course from each of the three categories below: The Natural World; Humanities, Arts and Social Sciences; and Environmental Policy.

Required Courses (4 courses)
ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

ENVI 411 Practicum: Environmental Planning Workshop: Community Based Environmental Problem Solving

ENVI 412 Practicum: Senior Research Seminar

**Distribution Courses (3 courses, 1 from each group)**

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major. (It is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

**The Natural World**

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Note: Students who take MAST 211/GEOS 210 (Oceanographic Processes) at Williams-Mystic can substitute an extra elective in lieu of GEOS 104
Capstone Course

One Practicum course:
ENVI/MAST 412 Practicum: Environmental Science and Policy

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea
MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes
MAST/ENVI 351/ PSCI 319 Marine Policy
MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

Maritime History

HIST 127 The Expansion of Europe
HIST/AFR 248 The Caribbean: From Slavery to Independence
HIST/JAPN/ASST 321 History of U.S.-Japan Relations
HIST/ASST/INST 391 When India was the World: Trade, Travel and History in the Indian Ocean

Maritime Literature

CLAS 101/COMP 107 The Trojan War

Marine Policy

ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
ECON/ENVI 386/ ECON 518 Environmental and Natural Resource Policy
ENVI 307/PSCI 317 Environmental Law
PSCI 223 International Law
PSCI 229 Global Political Economy
PSCI 347 Law of the Sea
ENVI/PSCI 328 Global Environmental Politics

Marine Science

BIOL 414 Life at Extremes: Molecular Mechanisms
GEOS 212 / BIOL 211 Paleobiology
GEOS/ENVI 215 Climate Changes
GEOS/ENVI/MAST 226 The Oceans and Climate
GEOS 302 Sedimentology
GEOS/ENVI/MAST 314 Sediment Records of Climate Change

MAST 25 (W) Material Culture and Craft of 19th Century Coastal New England
Primary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period.

There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvasworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: by application

Materials/Lab Fee: $1,500

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01   TBA   Tom Van Winkle

MAST 31 (W) Sen Thesis: Maritime Studies

Maritime Studies senior thesis.

Class Format: independent study

Winter 2019

HON Section: 01

MAST 99 (W) Independent Study: Maritime Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019

IND Section: 01

MAST 104 (S) Oceanography

Crosslistings: MAST104 / ENVI104 / GEOS104

Secondary Crosslisting

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut.
Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Distributions: (D3)

Attributes: ENVI Natural World Electives; EXPE Experiential Education Courses

Not offered current academic year

MAST 211 (F) Oceanographic Processes

Crosslistings: GEOS210 / MAST211

Primary Crosslisting

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

Fall 2018

LEC Section: 01 TBA Lisa A. Gilbert

Spring 2019

LEC Section: 01 TBA Lisa A. Gilbert

MAST 231 (F) Literature of the Sea (WI)

Crosslistings: MAST231 / ENGL231

Primary Crosslisting

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Extra Info: offered only at Mystic Seaport

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Distributions: (D1) (WI)

Attributes: AMST Arts in Context Electives; ENVI Humanities, Arts + Social Science Electives;
**MAST 311 (F) Marine Ecology**

Crosslistings: BIOL231 / MAST311

**Primary Crosslisting**

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

**MAST 324 (S) Corals and Sea Level**

Crosslistings: GEOS324 / MAST324 / ENVI324

**Secondary Crosslisting**

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**Expected Class Size:** 10

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives; EXPE Experiential Education Courses
MAST 351 (F) Marine Policy
Crosslistings: ENVI351 / PSCI319 / MAST351

Primary Crosslisting
This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore
Requirements/Evaluation: an independent research paper, a presentation, and a final exam
Extra Info: offered only at Mystic Seaport
Department Notes: satisfies the Environmental Policy requirement for the Environmental studies concentration
Distributions: (D2)
Attributes: ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

MAST 352 (F) Americans and the Maritime Environment (WI)
Crosslistings: HIST352 / MAST352

Primary Crosslisting
This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.
Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project
Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style
Extra Info: offered only at Mystic Seaport
Prerequisites: BIOL 101 or GEOG/MAST 104, or permission of instructor
Distributions: (D2) (WI)
Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; EXPE Experiential Education Courses; HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern;

MAST 397 (F) Independent Study: Maritime Studies
Maritime Studies independent study.

**Class Format:** independent study

Fall 2018

**MAST 398 (S) Independent Study: Maritime Studies**

Maritime Studies independent study.

**Class Format:** independent study

Spring 2019
IND Section: 01    TBA     Henry W. Art

**MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies**  (WI)

Crosslistings: ENVI412 / MAST402

**Secondary Crosslisting**

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ENVI 302 or MAST 351 Maritime Policy or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** limited to senior Environmental Studies majors and concentrators and Maritime Studies concentrators

**Expected Class Size:** 20

**Department Notes:** required course for students wishing to complete the Maritime Studies concentration

**Distributions:** (WI)

**Distribution Notes:** does not meet Division 1, 2, or 3 requirements Each student in this course will complete a semester-long research project resulting in a final report of 20-25 pages. The project will proceed in phases, with significant pieces of writing due at regular intervals throughout the semester, and with multiple opportunities for revision and peer review. There will also be several short reading response papers during the first half of the semester.

**Attributes:** EVST Senior Practicum;  SCST Elective Courses;

Crosslistings: ENVI404 / MAST404 / GEOS404

**Secondary Crosslisting**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks
and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: GEOS 104 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives;

Spring 2019
LEC Section: 01 MWF 8:30 am - 9:45 am Alex A. Apotsos

MAST 493 (F) Senior Thesis: Maritime Studies
Maritime Studies senior thesis.
Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Fall 2018
HON Section: 01 TBA Henry W. Art

MAST 494 (S) Senior Thesis: Maritime Studies
Maritime Studies senior thesis.
Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Spring 2019
HON Section: 01 TBA Henry W. Art
On leave Spring only: Professors: S. Goh.

Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

MTSC Courses

CHEM 336 (F) Materials Chemistry
Materials Science focuses on the study of bulk physical properties such as hardness, electrical conductivity, optical behavior, and elasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and organic electronics. We'll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on problem sets, reviews of research articles, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: CHEM 155 or 256 and 251/255
Enrollment Limit: 24
Expected Class Size: 16
Distributions: (D3)
Attributes: MTSC Courses
Not offered current academic year

CHEM 348 (F) Polymer Chemistry
From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture, two meetings per week; laboratory, four hours per week
Requirements/Evaluation: evaluation is based on problem sets, participation, exams, laboratory work, and a final project
Prerequisites: CHEM 251/255
Enrollment Limit: 12
Enrollment Preferences: Chemistry majors
Expected Class Size: 12
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives; MTSC Courses
Not offered current academic year

CHEM 364 (S) Instrumental Methods of Analysis
Crosslistings: ENVI364 / CHEM364

Primary Crosslisting

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, laboratory work, and an independent project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 12

Expected Class Size: 12

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives; ENVI Natural World Electives; EVST Methods Courses; MTSC Courses

LAB Section: 02    M 1:00 pm - 5:00 pm

GEOS 202 (S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Distributions: (D3)

Attributes: EXPE Experiential Education Courses; MTSC Courses

GEOS 234 (S) Introduction to Materials Science  (QFR)
Crosslistings: GEOS234 / PHYS234

Secondary Crosslisting

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week), plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)
Requirements/Evaluation: based on weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component
Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20
Enrollment Preferences: based on students' scientific background and seniority
Expected Class Size: 10
Distributions: (D3) (QFR)
Attributes: MTSC Courses;
Not offered current academic year

PHYS 451 (S) Condensed Matter Physics  (QFR)

Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Class Format: seminar
Requirements/Evaluation: weekly readings and problem sets, and exams
Prerequisites: PHYS 301; PHYS 302 preferred; or permission of instructor

Enrollment Limit: 10
Enrollment Preferences: Physics majors
Expected Class Size: 4-6
Distributions: (D3) (QFR)
Attributes: MTSC Courses;

SEM Section: 01 MR 2:35 pm - 3:50 pm Daniel P. Aalberts

------------------------------------------------------------------
MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

Calculus (2 courses)
- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus

Applied/Discrete Mathematics/Statistics (1 course)
- Mathematics 209 Differential Equations
- or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
- or Mathematics 200 Discrete Mathematics
- or Statistics 201 Statistics and Data Analysis
- or Statistics 231 Statistical Design of Experiments
- or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)
- Mathematics 250 Linear Algebra
- Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis
- Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)
- Two electives from courses numbered 300 and above, or STAT 231
- One Senior Seminar: Any course numbered between 400 and 479, taken in the senior year.
- Participation in the Department Colloquium, in which all senior majors present and attend talks on mathematical or statistical topics of their choice. Majors have to attend at least 20 colloquia in their senior year and present one themselves.

ADVANCED PLACEMENT

Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed
in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT

Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:

BC 1, 2 or AB 2, 3 Math 140
AB 4 or 5 Math 150
BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the “Budapest Semester in Mathematics” are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away.

Double Counting: No course may count towards two different majors.

Early Senior Seminar: The senior seminar is designed and intended to be taken during the senior year. Students who have made significant progress towards the major may request to fulfill this requirement with a senior seminar taken during their junior year. Such requests should be submitted to the department chair, and should include a plan for completing the major and the rationale for taking their senior seminar as a Junior.

Planning Courses: Core courses Mathematics 350, 351, 355, and Statistics 346 are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

THE DEGREE WITH HONORS IN MATHEMATICS

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a "minithesis" and a presentation. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

APPLIED MATHEMATICS TRACK

Students interested in applied mathematics, engineering, or other sciences should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Statistics 201 Statistics and Data Analysis
- Mathematics 250 Linear Algebra
- Mathematics 351 Applied Real Analysis
- Mathematics 355 Abstract Algebra
- Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you’ve had CSCI 134)
- MATH 309 or Post-core Differential Equations/Numerical Methods
- Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Mathematics 250 Linear Algebra
- Mathematics 350 Real Analysis
- Mathematics 355 Abstract Algebra
- Complex Analysis
- Topology
- Some second semester analysis
- Some second semester algebra
Some post-core geometry

Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in continuing their study of statistics in graduate school should take STAT 201, 231, 346, a 400 level statistics course and MATH 350 and 341.

OTHER CAREER PATHS

Other Graduate and Professional Schools: An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

Statistics and Actuarial Science: Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

Teaching: Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

Business and Finance: Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are the “precore” courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.

MATH 12 (W)  The Mathematics of Lego Bricks

This course is a modification of five previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell.

Class Format: afternoons

Requirements/Evaluation: 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: $40

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA    Steven J. Miller

MATH 13 (W)  The Mathematics of SET (and other games)

SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredibly variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we’ll study these mathematical ideas, as well as those coming from other mathematically interesting games (and we’ll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will
be meeting for 6 hours per week in class. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project designing a new game based on mathematical ideas. These final projects will be showcased in a board game night at the end of Winter Study.

**Class Format:** afternoons

**Requirements/Evaluation:** final project; small problem sets

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** preference given to students with less mathematical background

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

---

**MATH 14 (W) Creative Dynamics**

Crosslistings: MATH14 / CSCI14

**Primary Crosslisting**

Broadly defined, a dynamical system is an object whose future state can be calculated from its current state. Examples include ordinary and partial differential equations, discrete dynamics, cellular automata, billiards, spatial games, coupled/synchronized systems, agent models, evolutionary/selective dynamics, graph dynamics, Markov chains, and many more. The instructor will give a survey of such systems, and students will be free to imagine, create, and compute their own systems with an emphasis on graphical presentation of results.

**Class Format:** mornings

**Requirements/Evaluation:** grading will be based on class participation, presentation of results, and a final project

**Prerequisites:** solid computer programming skills in some language with good support for graphics

**Enrollment Limit:** 15

**Enrollment Preferences:** computational skills, math background, and enthusiasm; students will be asked to submit a brief description of their qualifications

**Materials/Lab Fee:** none

---

**MATH 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy**

Crosslistings: MATH15 / SPEC15

**Primary Crosslisting**

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern,
Western, Kiwi and American techniques that is unlike what most have experienced before.

Class Format: mornings

Requirements/Evaluation: 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

Extra Info: the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

Materials/Lab Fee: $20 plus cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

MATH 17 (W) Modern Dance - Muller Technique

This dance class will be based on the modern dance technique developed by Jennifer Muller, with whom the instructor danced professionally for 5 years in New York City and in Europe. Jennifer Muller was a soloist in the dance company of José Limon before she started her own company in 1974. She has added her own style of movement to the Limon technique, creating an expansive, free flowing dance that is wonderful to do and to watch. The class will be multi leveled and open to both men and women alike. Students will have the opportunity to choreograph a short piece either as a soloist or in small groups. Adjunct Instructor Bio: Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

Class Format: mornings

Requirements/Evaluation: a 1/2-page journal entry is required after each class, a 1/2-page commentary on 10-12 dance videos, attendance, and a short performance at the end of winter study

Prerequisites: none; no previous dance experience necessary

Enrollment Limit: 24

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA    Sylvia I. Logan

MATH 18 (W) Introduction to Python Programming

Python has become one of the most commonly used programming languages in recent times, due to its flexibility, readability, and reusability. In this course, we will develop the basic tools within python. These include mathematical and string operators, if-then statements, loops, functions, modules, objects, and file operations.

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniority and major

Materials/Lab Fee: none

Winter 2019
**MATH 19 (W) Screenwriting Challenge: The Tale of an Underappreciated Musical Genius**

Crosslistings: ENGL19 / MATH19

**Primary Crosslisting**

The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

**Class Format:** afternoons

**Requirements/Evaluation:** final project

**Prerequisites:** none, but students with a passion for writing and classical music are encouraged to apply

**Enrollment Limit:** 3

**Enrollment Preferences:** writing sample and brief application

**Materials/Lab Fee:** $55

**Attributes:** EXPE Experiential Education Courses

---

**MATH 99 (W) Independent Study: Mathematics**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Distributions:** (D3)
MATH 102 (F) Foundations in Quantitative Skills
This course is designed to strengthen the student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will cover topics at the college algebra/precalculus level with a particular emphasis on the computational and applied side of mathematics. Access to this course is limited to placement by a quantitative skills counselor.

Class Format: lecture
Requirements/Evaluation: homework assignments, quizzes and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: access to the course is limited to placement by a quantitative skills counselor
Enrollment Limit: 15
Enrollment Preferences: students who need most help with the quantitative reasoning
Expected Class Size: 10
Distributions: (D3)

MATH 110 (F) Logic and Likelihood (QFR)
How best can we reason in the face of uncertainty? We will begin with an examination of rationality and the reasoning process including a survey of formal logic. Starting with uncertainty from a psychological and philosophical viewpoint, we will move to a careful theory of likelihood and how to reason with probabilistic models. The course will conclude with a consideration of observation and information, how to test hypotheses, and how we update our beliefs to incorporate new evidence.

Class Format: lecture
Requirements/Evaluation: homework, essays, presentations, exams, and participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-year students
Expected Class Size: 25
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course will be covering formal logic and probability theory at sufficient depth to place this course on level with other QFR designated courses.

MATH 113 (F) The Beauty of Numbers (QFR)
Have you ever wondered what keeps your credit card information safe everytime you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization.

Class Format: lecture
**Requirements/Evaluation:** evaluation will be based primarily on projects, homework assignments, and exams

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

*Not offered current academic year*

---

**MATH 130 (F) Calculus I (QFR)**

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on exams, homework and quizzes

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

**Enrollment Limit:** 50

**Enrollment Preferences:** Professor's discretion

**Expected Class Size:** 30

**Department Notes:** students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

**Distributions:** (D3) (QFR)

LEC Section: 02    TR 9:55 am - 11:10 am     Pamela E. Harris

**Spring 2019**

LEC Section: 01    TR 9:55 am - 11:10 am     Pamela E. Harris

---

**MATH 140 (F) Calculus II (QFR)**

Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework, quizzes, and/or exams

**Prerequisites:** MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

**Enrollment Limit:** 50

**Expected Class Size:** 30

**Department Notes:** students who have higher advanced placement must enroll in MATH 150 or above

**Distributions:** (D3) (QFR)

**Fall 2018**

LEC Section: 01    MWF 10:00 am - 10:50 am     Cesar E. Silva
LEC Section: 02    MWF 11:00 am - 11:50 am     Cesar E. Silva
MATH 150 (F) Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams
Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit: 50
Expected Class Size: 50
Department Notes: this course is the right starting point for students who have seen differentiation and integration before; students with the equivalent of advanced placement of AB 4, BC 3 or above should enroll in MATH 150
Distributions: (D3) (QFR)

MATH 151 (F) Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams
Prerequisites: AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit: 50
Expected Class Size: 50
Department Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151
Distributions: (D3) (QFR)

LEC Section: 03  MWF 11:00 am - 11:50 am  Colin C. Adams

MATH 200 (F) Discrete Mathematics  (QFR)
Course Description: In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, graphs and trees, and algorithms. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based primarily on homework and exams

Prerequisites: MATH 140 or MATH 130 with CSCI 134 or 135; or one year of high school calculus with permission of instructor; students who have taken a 300-level math course should obtain permission of the instructor before enrolling

Enrollment Limit: 40
Expected Class Size: 25
Distributions: (D3) (QFR)

LEC Section: 02  MWF 11:00 am - 11:50 am  Leo Goldmakher

MATH 209 (S)  Differential Equations  (QFR)
Historically, much beautiful mathematics has arisen from attempts to explain physical, chemical, biological and economic processes. A few ingenious techniques solve a surprisingly large fraction of the associated ordinary and partial differential equations, and geometric methods give insight to many more. The mystical Pythagorean fascination with ratios and harmonics is vindicated and applied in Fourier series and integrals. We will explore the methods, abstract structures, and modeling applications of ordinary and partial differential equations and Fourier analysis.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on problem sets, hour tests, and a final exam

Prerequisites: MATH 150; students may not normally get credit for both MATH 209 and MATH/PHYS 210

Enrollment Limit: 50
Expected Class Size: 25
Distributions: (D3) (QFR)
Not offered current academic year

MATH 210 (S)  Mathematical Methods for Scientists  (QFR)
Crosslistings: PHYS210 / MATH210

Secondary Crosslisting
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: lecture, three hours per week

Requirements/Evaluation: evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50
Expected Class Size: 30
MATH 250 (F) Linear Algebra (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 45
Expected Class Size: 35
Distributions: (D3) (QFR)
Attributes: COGS Related Courses;

MATH 293 (F) Undergraduate Research Topics in Representation Theory (QFR)
Central to the study of the representation theory of Lie algebras is the computation of weight multiplicities by using Kostant's weight multiplicity formula. This formula is an alternating sum over a finite group, and involves a partition function. In this tutorial, we will address questions regarding the number of terms contributing nontrivially to the sum and develop closed formulas for the value of the partition function. Techniques used include generating functions and counting arguments, which are at the heart of combinatorics and are accessible to undergraduate students.

Class Format: tutorial
Requirements/Evaluation: written assignments, oral presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of instructor
Enrollment Limit: 10
Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and abstract algebra
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

MATH 306 (S) Fractals and Chaos (QFR)
Early in the course we introduce the notion of dynamical systems. Then we will develop the mathematics behind iterated function systems and study the notions of fractals and chaos. There will be a lot of computer experimentation with various programs and resources which the students are expected to use to learn and discover properties of fractals. The final topics will include dimension complex dynamics and the Mandelbrot set.

Class Format: lecture
MATH 307 (F) Computational Linear Algebra  (QFR)
Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be considered a course in numerical analysis or computational science.

Class Format: lecture
Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: Math 250, some elementary computer programming experience is strongly recommended
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01    TR 9:55 am - 11:10 am     Chad M. Topaz

MATH 309 (S) Differential Equations  (QFR)
Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODE from an applied standpoint. Topics covered early in the course include numerical solutions, separation of variables, integrating factors, constant coefficient linear equations, and power series solutions. Later, we focus on nonlinear ODE, for which it is usually impossible to find analytical solutions. Tools from dynamical systems allows us to obtain some information about the behavior of the ODE without explicitly knowing the solution.

Class Format: lecture, discussion, interactive activities
Requirements/Evaluation: quizzes/exams, problem sets, activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01    TF 2:35 pm - 3:50 pm     Chad M. Topaz

MATH 310 (S) Mathematical Biology  (QFR)
Crosslistings: MATH310 / BIOL210
Primary Crosslisting

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: tutorial
Requirements/Evaluation: problem sets, weekly meetings, final project and paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 250, MATH 209 or 309, permission of instructor
Enrollment Limit: 10
Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects
Expected Class Size: 10
Distributions: (D3) (QFR)
Distribution Notes: QFR: The course will introduce methods for developing and analyzing mathematical models.
Attributes: PHLH Methods in Public Health;

Spring 2019

MATH 313 (F) Introduction to Number Theory  (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on homework, projects, and examinations
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 40
Expected Class Size: 25
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01    MR 2:35 pm - 3:50 pm    Leo Goldmakher

MATH 316 (S) Protecting Information: Applications of Abstract Algebra and Quantum Physics  (QFR)
Crosslistings: MATH316 / PHYS316
Primary Crosslisting
Living in the information age, we find ourselves depending more and more on codes that protect messages against either noise or eavesdropping. This course examines some of the most important codes currently being used to protect information, including linear codes, which in addition to being mathematically elegant are the most practical codes for error correction, and the RSA public key cryptographic scheme, popular nowadays for internet applications. We also study the standard AES system as well as an increasingly popular cryptographic strategy based on elliptic curves. Looking ahead by a decade or more, we show how a quantum computer could crack the RSA scheme in short order, and how quantum cryptographic devices will achieve security through the inherent unpredictability of quantum events.
Class Format: lecture
MATH 318 (F) Numerical Problem Solving  (QFR)
In the last twenty years computers have profoundly changed the work in numerical mathematics (in areas from linear algebra and calculus to differential equations and probability). The main goal of this tutorial is to learn how to use computers to do quantitative science. We will explore concepts and ideas in mathematics and science using numerical methods and computer programming. We will use specialized software, including Mathematica and Matlab.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on homework, classwork, and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 150/151 and MATH 250 or permission of instructor
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

MATH 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)
Crosslistings: BIOL319 / CHEM319 / MATH319 / PHYS319 / CSCI319
Secondary Crosslisting
What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high throughput approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 12
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: BGNP Core Courses; BIMO Interdepartmental Electives;
Not offered current academic year

**MATH 321 (S)  Knot Theory  (QFR)**

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

**Class Format:** lecture
**Requirements/Evaluation:** evaluation will be based on problem sets, midterms, a paper and a final exam
**Prerequisites:** MATH 250 or permission of instructor
**Enrollment Limit:** 30
**Expected Class Size:** 25
**Distributions:** (D3) (QFR)

Spring 2019
LEC Section: 01    MWF 8:30 am - 9:45 am    Colin C. Adams

**MATH 323 (S)  Applied Topology  (QFR)**

In topology, one studies properties of an object that are preserved under rubber-like deformations, where one is allowed to twist and pull, but one cannot tear or glue. Hence a sphere is considered the same as a cube, but distinct from the surface of a doughnut. In recent years, topology has found applications in chemistry (knotted DNA molecules), economics (stability theory), Geographic Information Systems, cosmology (the shape of the Universe), medicine (heart failure), robotics and electric circuit design, just to name some of the fields that have been impacted. In this course, we will learn the basics of topology, including point-set topology, geometric topology and algebraic topology, but all with the purpose of applying the theory to a broad array of fields.

**Class Format:** lecture
**Requirements/Evaluation:** evaluation will be based primarily on problem sets and exams
**Prerequisites:** MATH 250 or permission of instructor
**Enrollment Limit:** 40
**Enrollment Preferences:** none
**Expected Class Size:** 25
**Distributions:** (D3) (QFR)

Not offered current academic year

**MATH 326 (S)  Differential Geometry  (QFR)**

Differential Geometry is the study of curvature. In turn, curvature is the heart of geometry. The goal of this course is to start the study of curvature, concentrating on the curvature of curves and of surfaces, leading to the deep Gauss-Bonnet Theorem, which links curvature with topology.

**Class Format:** lecture
**Requirements/Evaluation:** evaluation will be based primarily on problem sets, midterms and a final exam
**Prerequisites:** MATH 250
**Enrollment Limit:** none
**Expected Class Size:** 25
**Distributions:** (D3) (QFR)

Not offered current academic year
MATH 328 (F)  Combinatorics  (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, and the principle of inclusion and exclusion.

Class Format: lecture
Requirements/Evaluation: homework assignments, proof portfolio, individual and group projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 200 and MATH 250 or permission of the instructor
Enrollment Limit: 30
Enrollment Preferences: discretion of the instructor
Expected Class Size: 30
Distributions: (D3) (QFR)
Not offered current academic year

MATH 329 (S)  Discrete Geometry  (QFR)
Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

Class Format: tutorial
Requirements/Evaluation: based primarily on participation, problem sets, oral presentations, an oral exam, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-years and sophomores
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

MATH 331 (F)  The little Questions  (QFR)
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and “think deeply of simple things”. The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors
Expected Class Size: 25
Department Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/331/
Distributions: (D3) (QFR)
A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams
Prerequisites: MATH 200 or MATH 250
Enrollment Limit: 35
Enrollment Preferences: Math majors
Expected Class Size: 20
Distributions: (D3) (QFR)

Maxwell's equations are four simple formulas, linking electricity and magnetism, that are among the most profound equations ever discovered. These equations led to the prediction of radio waves, to the realization that a description of light is also contained in these equations and to the discovery of the special theory of relativity. In fact, almost all current descriptions of the fundamental laws of the universe are deep generalizations of Maxwell's equations. Perhaps even more surprising is that these equations and their generalizations have led to some of the most important mathematical discoveries (where there is no obvious physics) of the last 25 years. For example, much of the math world was shocked at how these physics generalizations became one of the main tools in geometry from the 1980s until today. It seems that the mathematics behind Maxwell is endless. This will be an introduction to Maxwell's equations, from the perspective of a mathematician.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on homework and exams
Prerequisites: MATH 250; no physics background required
Enrollment Limit: none
Expected Class Size: 15
Distributions: (D3) (QFR)

While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 250 or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 20
MATH 350 (F)  Real Analysis  (QFR)
Real analysis is the theory behind calculus. It is based on a precise understanding of the real numbers, elementary topology, and limits. Topologically, nice sets are either closed (contain their limit points) or open (complement closed). You also need limits to define continuity, derivatives, integrals, and to understand sequences of functions.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on homework, classwork, and exams
Prerequisites: MATH 150 or MATH 151 and MATH 250, or permission of instructor
Enrollment Limit: 40
Expected Class Size: 30
Distributions: (D3) (QFR)

MATH 351 (F)  Applied Real Analysis  (QFR)
Real analysis or the theory of calculus--derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers, limits, and some topology. Applications of Real Analysis involve questions of existence and uniqueness of solutions, implicit definition of functions, infinite dimensional function spaces, and tools from calculus of variations to construct optimal controls and minimizing curves and surfaces.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams, homework and quizzes
Prerequisites: MATH 150 and MATH 250, or permission of instructor
Enrollment Limit: 50
Expected Class Size: 20
Distributions: (D3) (QFR)

MATH 355 (F)  Abstract Algebra  (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams

**MATH 361 (F) Theory of Computation** (QFR)

Crosslistings: CSCI361 / MATH361

Secondary Crosslisting

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on problem sets, a midterm examination, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 34

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 34

**Distributions:** (D3) (QFR)

**MATH 367 (S) Homological Algebra** (QFR)

Though a relatively young subfield of mathematics, Homological Algebra has earned its place by supplying powerful tools to solve questions in the much older fields of Commutative Algebra, Algebraic Geometry and Representation Theory. This class will introduce theorems and tools of Homological Algebra, grounding its results in applications to polynomial rings and their quotients. We will focus on some early groundbreaking results and learn some of Homological Algebra's most-used constructions. Possible topics include tensor products, chain complexes, homology, Ext, Tor and Hilbert's Syzygy Theorem.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework and exams

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 355

**Enrollment Limit:** 20

**Enrollment Preferences:** junior and senior math majors

**Expected Class Size:** 12

**Distributions:** (D3) (QFR)
Not offered current academic year

MATH 368 (S)  Positive Characteristic Commutative Algebra  (QFR)
In commutative algebra, one of the most basic invariants of a ring is its characteristic. This is the smallest multiple of 1 that equals 0. Working over a ring of characteristic zero, versus a ring of characteristic $p>0$, dramatically changes the proof techniques available to us. This realization has had tremendous consequences in commutative algebra. One of the most useful tools in characteristic $p$ is the Frobenius homomorphism. In this course we will study several standard notions in commutative algebra, such as regularity of a ring, Cohen-Macaulayness, and being normal and we will see how various "splittings" of the Frobenius allow us to easily detect these properties. Many of these methods are not only applicable to commutative algebra, but also to number theory and algebraic geometry.

Class Format: lecture
Requirements/Evaluation: homework and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Math majors primarily, and juniors and seniors secondarily
Expected Class Size: 15
Distributions: (D3) (QFR)
Not offered current academic year

MATH 372 (F)  Complex Analysis  (QFR)
The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis. We will discuss these and other topics as time permits (such as the Riemann Mapping Theorem, Special Functions, and the Central Limit Theorem).

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 350 or MATH 351
Enrollment Limit: 40
Expected Class Size: 30
Distributions: (D3) (QFR)
Not offered current academic year

MATH 374 (F)  Topology  (QFR)
Topology is the study of when one geometric object can be continuously deformed and twisted into another object. Determining when two objects are topologically the same is incredibly difficult and is still the subject of a tremendous amount of research, including recent work on the Poincaré Conjecture, one of the million-dollar millennium-prize problems. The main part of the course on point-set topology establishes a framework based on "open sets" for studying continuity and compactness in very general spaces. The second part on homotopy theory develops refined methods for determining when objects are the same. We will prove for example that you cannot twist a basketball into a doughnut.

Class Format: lecture
Requirements/Evaluation: homework, tutorials, and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323
Enrollment Limit: 30
Expected Class Size: 10
Distributions: (D3) (QFR)
In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved; students will be implementing many of these algorithms on computer systems of their choice. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial implementation computation (respectively, statistics) component approved by the instructor.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, projects, presentations and exams; at least 20 pages of writing
Prerequisites: MATH 350 or 351 and permission of instructor
Enrollment Limit: 40
Enrollment Preferences: Computer Science, Mathematics and Statistics majors
Expected Class Size: 25
Department Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/317/
Distributions: (D3) (WI) (QFR)
Not offered current academic year

MATH 379 (F)  Asymptotic Analysis in Differential Equations
Asymptotic Analysis is a fascinating subfield of differential equations in which interesting and unexpected phenomena can occur. Roughly speaking, the problem is this: Given a differential equation depending on a parameter epsilon, what happens to the solutions to the equation as we let epsilon go to 0? After an extensive survey of examples, we will cover asymptotic evaluation of integrals, such as stationary phase and Laplace's method, multiple scales, WKB approximations, averaging methods, matched asymptotic expansions, and boundary layers. If time permits, we will also discuss bifurcation theory and the Nash-Moser Inverse Function Theorem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 350 or MATH 351
Enrollment Limit: 25
Expected Class Size: 15
Distributions: (D3)
Not offered current academic year

MATH 382 (S)  Harmonic Analysis  (QFR)
Harmonic Analysis is a diverse field which includes Fourier Analysis, one of the major tools of modern mathematics. Applications range from mathematical topics such as partial differential equations and number theory to more applied ones such as signal processing and medical imaging. The course will begin with an introduction to the Fourier Transform and will cover a wide variety of topics including singular integral operators, maximal operators and wavelets as the semester progresses. Along the way applications from partial differential equations and ergodic theory will arise with a highlight being the almost everywhere convergence of Fourier series.
MATH 392 (F)  Undergraduate Research Topics in Graph Theory  (QFR)
Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this tutorial we focus on two topics of mathematical research in graph theory: evasion-pursuit games on graphs and domination theory. Students in this project-based tutorial will select among the presented topics, and will begin original research on an open problem in the field. Student assessment is based on problem sets, drafts of research project manuscript, and a final oral class presentation.

Class Format: tutorial
Requirements/Evaluation: homework assignments, oral presentations, and written project manuscript
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 355 or permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and graph theory
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

MATH 394 (S)  Galois Theory  (QFR)
Some equations—such as $x^5 - 1 = 0$—are easy to solve. Others—such as $x^5 - x - 1 = 0$—are very hard, if not impossible (using standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on written homeworks, oral presentations, and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355
Enrollment Limit: 15
Enrollment Preferences: discretion of the instructor
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

MATH 397 (F)  Independent Study: Mathematics
Directed 300-level independent study in Mathematics.
Class Format: independent study
Prerequisites: permission of department
Distributions: (D3)
MATH 398 (S) Independent Study: Mathematics
Directed 300-level independent study in Mathematics.
Class Format: independent study

MATH 401 (F) Functional Analysis (QFR)
Functional analysis can be viewed as linear algebra on infinite-dimensional spaces. It is a central topic in Mathematics, which brings together and extends ideas from analysis, algebra, and geometry. Functional analysis also provides the rigorous mathematical background for several areas of theoretical physics (especially quantum mechanics). We will introduce infinite-dimensional spaces (Banach and Hilbert spaces) and study their properties. These spaces are often spaces of functions (for example, the space of square-integrable functions). We will consider linear operators on Hilbert spaces and investigate their spectral properties. A special attention will be dedicated to various operators arising from mathematical physics, especially the Schrödinger operator.
Class Format: lecture
Requirements/Evaluation: weekly problem sets, two midterm exams, final exam
Prerequisites: MATH 350 or 351 or permission of instructor
Enrollment Limit: 40
Enrollment Preferences: Mathematics and Physics majors; seniors
Expected Class Size: 30
Distributions: (D3) (QFR)

Not offered current academic year

MATH 402 (S) Measure Theory and Probability (QFR)
The study of measure theory arose from the study of stochastic (probabilistic) systems. Applications of measure theory lie in biology, chemistry, physics as well as in economics. In this course, we develop the abstract concepts of measure theory and ground them in probability spaces. Included will be Lebesgue and Borel measures, measurable functions (random variables). Lebesgue integration, distributions, independence, convergence and limit theorems. This material provides good preparation for graduate studies in mathematics, statistics and economics.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based primarily on performance on homework assignments and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 40
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01      Cancelled

MATH 403 (S) Measure and Ergodic Theory (QFR)
An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesgue and Borel measures, measurable functions, and Lebesgue
integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

**Class Format:** lecture

**MATH 407 (F) Dance of the Primes**  (QFR)

Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

**Class Format:** lecture

**MATH 410 (S) Mathematical Ecology**  (QFR)

Crosslistings: BIOL214 / MATH410

**Primary Crosslisting**

Using mathematics to study natural phenomena has become ubiquitous over the past couple of decades. In this tutorial, we will study mathematical models comprised of both deterministic and stochastic differential equations that are developed to understand ecological dynamics and, in many cases, evaluate the dynamical consequences of policy decisions. We will learn how to understand these models through both standard analytic techniques such as stability and bifurcation analysis as well as through simulation using computer programs such as MATLAB. Possible topics include fisheries management, disease ecology, control of invasive species, and predicting critical transitions in ecological systems.

MATH 411 (S)  Commutative Algebra  (QFR)

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Possible topics include Noetherian rings, primary decomposition, localizations and quotients, height, dimension, basic module theory, and the Krull Altitude Theorem.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework and exams

MATH 419 (F)  Algebraic Number Theory  (QFR)

We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

Class Format: lecture/seminar

Requirements/Evaluation: evaluation will be based primarily on homework assignments and exams

Prerequisites: MATH 355, or permission of instructor

Enrollment Limit: 40

Expected Class Size: 20

Distributions: (D3) (QFR)

Not offered current academic year

MATH 420 (S)  Analytic Number Theory  (QFR)

How many primes are smaller than x? How many divisors does an integer n have? How many different numbers appear in the N x N multiplication table? Over the course of the past 150 years, tremendous progress has been made towards resolving these and similar questions in number theory, relying on tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory--a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered include: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method,
the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and
the circle method, gaps between primes, and other topics as time and interest allow.

Class Format: tutorial

Requirements/Evaluation: tutorial format (problem sets and presentations)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 350 or MATH 351, MATH 372 (may be taken concurrently), familiarity with modular arithmetic

Enrollment Limit: 10

Enrollment Preferences: Mathematics majors

Expected Class Size: 10

Distributions: (D3) (QFR)

Not offered current academic year

MATH 421 (S) Quandles, Knots and Virtual Knots  (QFR)

A quandle is an algebraic object that, like a group, has a "multiplication" of pairs of elements that satisfies certain axioms. But the quandle axioms are
very different from the group axioms, and quandles turn out to be incredibly useful when considering the mathematical theory of knots. In this course,
we will learn about this relatively new area of research (1982) and learn some knot theory and see how quandles apply to both classical knot theory
and the relatively new area of virtual knot theory (1999).

Class Format: lecture

Requirements/Evaluation: problem sets, tests, and a 3-page paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 355

Enrollment Limit: 40

Enrollment Preferences: discretion of the instructor

Expected Class Size: 15

Distributions: (D3) (QFR)

Not offered current academic year

MATH 422 (F) Algebraic Topology  (QFR)

Is a sphere really different from a torus? Can a sphere be continuously deformed to a point? Algebraic Topology concerns itself with the classification
and study of topological spaces via algebraic methods. The key question is this: How do we really know when two spaces are different and in what
senses can we claim they are the same? Our answer will use several algebraic tools such as groups and their normal subgroups. In this course we will
develop several notions of "equality" starting with the existence of homeomorphisms between spaces. We will then explore several weakenings of this
notion, such as homotopy equivalence, having isomorphic homology or fundamental groups, and having homeomorphic universal covers.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 355 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Math majors primarily, and Juniors and Seniors secondarily

LEC Section: 01 TR 11:20 am - 12:35 pm Chad M. Topaz

MATH 434 (S) Applied Dynamics and Optimal Control (QFR)

We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams and homework assignments
Prerequisites: MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 25
Distributions: (D3) (QFR)
Not offered current academic year

MATH 453 (F) Partial Differential Equations (QFR)
Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, fluid dynamics, neuroscience, thermodynamics, and more. We introduce PDE models and develop techniques for studying them. Topics include: derivation, classification, and physical interpretation of canonical PDE; solution techniques, including separation of variables, series solutions, integral transforms, and characteristics; and application to problems in the natural and social sciences.
Class Format: lecture
Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 150-151; MATH 209 or MATH/PHYS 210 or MATH 309
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Distributions: (D3) (QFR)
Not offered current academic year

MATH 456 (F) Representation Theory (QFR)
Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: junior and senior Math majors
Expected Class Size: 15
Distributions: (D3) (QFR)
Not offered current academic year

MATH 458 (S) Algebraic Combinatorics (QFR)
Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. This course will focus on the study of symmetric functions, young tableaux, matroids, graph theory, and other related topics.
Class Format: seminar
Requirements/Evaluation: homework assignments, proof portfolio, individual and group projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 200 and MATH 355

Enrollment Limit: 25

Enrollment Preferences: seniors

Expected Class Size: 20

Distributions: (D3) (QFR)

Spring 2019

SEM Section: 01 TR 8:30 am - 9:45 am Pamela E. Harris

MATH 459 (S) Applied Partial Differential Equations (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today’s cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

Class Format: tutorial

Requirements/Evaluation: participation, problem sets, oral presentations, oral exams, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: students with an interest in applied mathematics, selected to create a diverse set of tutorial participants

Expected Class Size: 10

Department Notes: students who have taken MATH 453 may not enroll in MATH 458T without permission of the instructor

Distributions: (D3) (QFR)

Distribution Notes: QFR: This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

MATH 466 (F) Advanced Applied Analysis (QFR)

This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field, as well as applications in industry. Topics include Benford's law of digit bias, random matrix theory, and Fourier analysis, and as time permits additional areas based on student interest from analytic number theory, generating functions and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will assist in writing both reviews for MathSciNet and referee reports for papers for journals, write programs to investigate and conjecture, and read classic and current research papers, and possibly apply these and related methods to real world problems.

Class Format: lecture

Requirements/Evaluation: homework, exams, possible paper/presentation

Prerequisites: MATH 350 or MATH 351

Enrollment Limit: 40

Enrollment Preferences: discretion of the instructor

Expected Class Size: 30
MATH 474 (S)  Tropical Geometry (QFR)
This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Class Format: lecture
Requirements/Evaluation: based primarily on participation, problem sets, quizzes, exams, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: senior Math majors
Expected Class Size: 15
Distributions: (D3) (QFR)
Not offered current academic year

MATH 475 (S)  Methods in Mathematical Fluid Dynamics (QFR)
Crosslistings: MATH475 / PHYS475
Primary Crosslisting
The mathematical study of fluids is an exciting field with applications in areas such as engineering, physics and biology. The applied nature of the subject has led to important developments in aerodynamics and hydrodynamics. From ocean currents and exploding supernovae to weather prediction and even traffic flow, several partial differential equations (pde) have been proposed as models to study fluid phenomena. This course is designed to both, introduce students to some of the techniques used in mathematical fluid dynamics and lay down a foundation for future research in this and other related areas. Briefly, we start with the method of characteristics, a useful tool in the study of pde. Symmetry and geometrical arguments, special solutions, energy methods, particle trajectories, and techniques from ordinary differential equations (ode) are also discussed. A special focus will be on models from hydrodynamics. These include the KdV and the Camasss Holm equations (and generalizations thereof), and the Euler equations of ideal fluids. Mainly, we will be concerned with models whose solutions depend on time and one spatial variable, although depending on student interest and time, we may also investigate higher-dimensional models.

Class Format: lecture
Requirements/Evaluation: problem sets and final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 151, MATH 250, and MATH 350 or 351; some background in pde/ode would be helpful but not required
Enrollment Limit: 40
Enrollment Preferences: senior Mathematics majors
Expected Class Size: 25
Distributions: (D3) (QFR)
Not offered current academic year

MATH 478 (S)  On Expressing Numbers (QFR)
The real numbers are overall mysterious. Attempts even to describe different real numbers can quickly lead to deep, open questions in mathematics. For example, writing numbers via their decimal expansions leads to the result that a number is rational precisely when the decimal expansion is eventually periodic. There is an entirely different method for describing real numbers: continued fractions, which go back thousands of years. Here every real number can be captured by a sequence of integers (just like for the decimal expansion) but now eventually periodicity corresponds to the number being a square root. The mathematics of continued fractions, and especially their higher dimensional generalizations, lead to a great deal of mathematics. We will be using tools from linear algebra, functional analysis, dynamical systems, ergodic theory and algebraic number theory to
explore the best way to express a real number.

Class Format: lecture
Requirements/Evaluation: exams and homework
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Limit: none
Enrollment Preferences: Seniors
Expected Class Size: 15
Distributions: (D3) (QFR)

Not offered current academic year

MATH 487 (S)  Computational Algebraic Geometry  (QFR)
Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework, exams, and final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: instructor decision
Expected Class Size: 15
Department Notes: This course is not a senior seminar, and so it does not fulfill the senior seminar requirement for the math major

MATHEMATICS AND STATISTICS (Div III)

STATISTICS

Chair: Professor Susan Loepp

On leave Fall/Spring: Professors: B. Klingenberg, M. Stoiciu.
On leave Fall only: Professor A. Pacelli.
On leave Spring only: Associate Professor S. Miller.

MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics.

Mathematics (2 courses)

- MATH 150 or 151 Multivariable Calculus or equivalent high school course
- MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)

- CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)

- STAT 201 Statistics and Data Analysis or STAT 202 Introduction to Statistical Modeling
- STAT 346 Regression and Forecasting
- STAT 341 Probability
- STAT 360 Inferential Statistics

Continuation (2 courses)

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Colloquium Requirement

Participation in the Department Colloquium series, in which all senior majors present and attend talks on statistical topics of their choice. Majors have to attend at least 20 colloquia in their senior year and present one themselves.

PLACEMENT

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department,
appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

Double Counting: No course may count towards two different majors.

Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

THE DEGREE WITH HONORS IN STATISTICS
The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 12 (W) writing sample and brief application
The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country—and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook's music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

Requirements/Evaluation: 10-page paper; final project; musical composition with commentary
Prerequisites: some previous singing or music-reading experience helpful
Enrollment Limit: 30
Enrollment Preferences: seniority
Materials/Lab Fee: $10 plus cost of books
Attributes: EXPE Experiential Education Courses

STAT 99 (W) Indep Study: Statistics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performances on quizzes and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Department Notes: Students with calculus background and social science interest should consider STAT 161. Students with MATH 150 should enroll in STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department.

Spring 2019
STAT 201 (F)  Statistics and Data Analysis  (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams
Prerequisites: MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.
Enrollment Limit: 40
Expected Class Size: 40
Department Notes: Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

STAT 202 (F)  Introduction to Statistical Modeling  (QFR)
Data come from a variety of sources sometimes from planned experiments or designed surveys, but also arise by much less organized means. In this course we’ll explore the kinds of models and predictions that we can make from both kinds of data as well as design aspects of collecting data. We’ll focus on model building, especially multiple regression, and talk about its potential as well as its limits to answer questions about the world. We’ll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework, exams and projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: AP Statistics 5 or STAT 101, 161 or 201 or permission of instructor
Enrollment Limit: 25

STAT 344 (F) Statistical Design of Experiments  (QFR)
What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

Class Format: lecture
Requirements/Evaluation: problem sets, midterm, final exam, project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 201, 202, or equivalent
Enrollment Limit: 20

STAT 356 (S)  Time Series Analysis  (QFR)
Time series--data collected over time--crop up in applications from economics to engineering to transit. But because the observations are generally not
independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including
smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams

Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor

Enrollment Limit: 30

Expected Class Size: 20

Distributions: (D3) (QFR)
Not offered current academic year

STAT 359 (S)  Statistical Computing  (QFR)
This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating,
visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of
other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats,
techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques
along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will
be project-based.

**Class Format:** lecture

**Requirements/Evaluation:** based primarily on projects, homework, and exams

**Prerequisites:** STAT 201 or 202 and CSCI 134, 135, or 136

**Enrollment Limit:** 30

**Enrollment Preferences:** juniors and seniors, Statistics majors

**Expected Class Size:** 15

**Distributions:** (D3) (QFR)

*Not offered current academic year*

**STAT 360 (S)** Statistical Inference (QFR)

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on problem sets and exams

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 250, STAT 201 or 202, STAT 341

**Enrollment Limit:** 30

**Enrollment Preferences:** Statistics majors

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

Spring 2019

LEC Section: 01    TR 9:55 am - 11:10 am    Daniel B. Turek

**STAT 362 (F)** Design of Experiments (QFR)

How do you get informative research results? By doing the right experiment in the first place. We’ll look at the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. Using a framework of optimal design, we’ll examine the theory both of classical designs and of alternatives when those designs aren’t appropriate. On the applied side, we’ll make extensive use of R to work with real-world data.

**Class Format:** lecture

**Requirements/Evaluation:** based primarily on projects, homework, and exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** STAT 346

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors/juniors and Statistics majors

**Expected Class Size:** 20

**Distributions:** (D3) (QFR)

*Not offered current academic year*

**STAT 365 (F)** Bayesian Statistics (QFR)

The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by
recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework and exams

**Prerequisites:** STAT 201 and MATH 150 and 250, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** juniors and seniors, Statistics majors

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

**Fall 2018**

LEC Section: 01  TF 1:10 pm - 2:25 pm  Daniel B. Turek

**STAT 372 (S) Longitudinal Data Analysis: Modeling Change over Time** (QFR)

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on exams, homework, and a project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** STAT 201 and STAT 346

**Enrollment Limit:** 30

**Enrollment Preferences:** junior and senior Statistics majors

**Expected Class Size:** 20

**Distributions:** (D3) (QFR)

**Attributes:** PHLH Statistics Courses;

**STAT 377 (F) Operations Research** (WI) (QFR)

Crosslistings: MATH377 / STAT377

Secondary Crosslisting

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved; students will be implementing many of these algorithms on computer systems of their choice. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial implementation computation (respectively, statistics) component approved by the instructor.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, projects, presentations and exams; at least 20 pages of writing

STAT 440 (F) Categorical Data Analysis (QFR)
This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. All methods can be viewed as extensions of traditional regression models and ANOVA.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Prerequisites: STAT 346 and STAT 360
Enrollment Limit: 14
Enrollment Preferences: seniors and Statistics Majors
Expected Class Size: 12
Distributions: (D3) (QFR)
Attributes: PHLH Statistics Courses;
Not offered current academic year
STAT 442 (S) Statistical Learning and Data Mining (QFR)
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homeworks and projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 346 or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: seniors and Statistics Majors
Expected Class Size: 10
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01  TF 2:35 pm - 3:50 pm  Richard D. De Veaux

STAT 458 (F) Spatio-Temporal Data (QFR)
Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Class Format: lecture
Requirements/Evaluation: project work, homework, exams, and contribution to discussion.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 346, or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Seniors and Statistics majors
Expected Class Size: 10
Distributions: (D3) (QFR)
Distribution Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Fall 2018
LEC Section: 01  TF 2:35 pm - 3:50 pm  Laurie L. Tupper

STAT 493 (F) Senior Thesis: Statistics
Each student carries out an individual research project under the direction of a faculty member that culminates in a thesis. See description under The Degree with Honors in Statistics.

MUSIC (Div I)

Chair: Professor Edward Gollin

On leave Fall/Spring: Professor M. Hirsch. Assistant Professor Z. Wadsworth.

On leave Spring only: Professor W. A. Sheppard.

COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductory music theory and musicianship) to various musical cultures (African, American, Asian, Caribbean, and European) and styles within those cultures (classical, folk, and popular). Most 100-level courses are designed for the general student and have no prerequisites; they assume no prior musical training, and are open to all students interested in increasing their understanding and appreciation of music. The two 100-level courses that can serve to satisfy specific music theory requirements for the music major (MUS 103 and 104a or 104b) require a working knowledge of musical notation; these courses are geared to potential majors and students with strong instrumental or vocal background, and are particularly suitable for first-year students interested in taking more advanced courses in music.

200-level courses offer students the opportunity to explore a range of more specialized musical topics, from performance, technology, and musicianship-based classes to courses focused on specific styles, periods, composers, and examinations of meaning in music. Most regular 200-level courses have no prerequisites but do require the ability to read music, and are usually open to all students who can do so, regardless of class year. Some 200-level tutorials and writing intensive courses have no prerequisites and do not require the ability to read music, but the workload and more advanced approach to the subject matter makes these courses best suited to sophomores, juniors, and seniors. The two 200-level courses that complete the music theory requirements for the music major (MUS 201 and 202) have prerequisites; these courses are geared to potential majors, majors, and students with strong instrumental or vocal background.

300-level courses are designed for sophomores, juniors, and seniors with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. All require at least one semester of music theory or its equivalent. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

400-level courses are intended for advanced juniors and seniors, usually music majors, wishing to pursue thesis, independent study, or small seminar coursework in composition, theory and analysis, musicology, ethnomusicology, or performance, under the guidance of an individual faculty advisor.

MAJOR

A minimum of ten courses are required for the major, as detailed below.

Four courses in Music Theory and Musicianship to be taken in sequence:

Music 103

Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)
Three courses in European and American Music History:

Music 231
Music 232
Music 233

Majors may choose to replace a maximum of one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:

Music 231: 163, 164, or 261
Music 232: 165, 166, 236, or 266T
Music 233: 119, 138, 150, 151, 238, 244, 251, 252 or 254

One course in World Music/Ethnomusicology from the following:

Music 111, 112, 117, 120, 125, 126, 211, 220, 221, 222, 225, 226, 230, 330

Two electives:

One must be taken in the senior year and at the 400-level to serve as a capstone course. (The second semester of a year-long honors thesis, MUS 494, will satisfy the 400-level elective requirement.) The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.

Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.

Majors must enroll in partial credit music lessons for at least two semesters.

THE DEGREE WITH HONORS IN MUSIC

Three routes provide the opportunity for honors or highest honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student’s work or analysis of a major 20th century or contemporary work. The student’s general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student’s general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved, a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors), and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)-W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

LESSONS

Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the lesson commitment. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

STUDY ABROAD

One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and
ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department.

MUS 10 (W) Winter Study Chamber Orchestra (WiSCO)

I will organize a classical chamber orchestra to read and perform music of assorted periods and genres. Two student conductors will lead the orchestra, each one having completed my Fall conducting class. In addition to conducting the orchestra, they will act as personnel managers and librarians. I will coach them on every aspect involved in producing a symphonic performance. Berkshire Symphony members and players in the Chamber Orchestra of Williams will make up the majority of the ensemble. The backbone of the training for the orchestra and the student conductors will involve issues of intonation, articulation, balance, bowing, dynamics, tempo, and interpretation. During rehearsals, members of the orchestra will be encouraged to offer ideas and suggestions in order to take part in the ownership of the final product. There will be a final recorded and videotaped concert at the end of Winter Study. Maximum enrollment: Strings: 12 violins, 5 violas, 4 cellos, 2 basses, and Winds: 2 flutes, 2 oboes, 2 clarinets, 2 bassoons, 2 horns, 2 trumpets, timpani.

Class Format: MWF 7:00pm-9:00pm
Requirements/Evaluation: based on attendance and preparation
Prerequisites: none
Enrollment Limit: 36
Enrollment Preferences: if overenrolled, a short audition on the scheduled repertoire will be held and adjudicated by me and the student conductors
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Ronald L. Feldman

MUS 11 (W) Sound and the City: New York on Film

Countless films take place in New York City, but not all foreground the city as an active character in the plot. In this course we will seek answers to the following questions: how does the urban environment participate in a film's story? How can a movie soundtrack create a particularly urban atmosphere? How can sound represent or subvert the urban communities represented on screen? And more broadly: what does it mean to be a New Yorker? Films such as The Naked City (1948), Thoroughly Modern Millie (1967), Taxi Driver (1976), Manhattan (1979), and Do the Right Thing (1989) are wildly diverse in terms of genre, cinematography, soundtrack, and the subject positions they represent, and yet their soundscapes all forge a distinctly New York "feel." Through close viewing--and listening--we will explore how the directors, mixers, editors, and composers deployed sound to forge distinct perspectives on the urban experience. Students will be expected to attend all screenings, read reviews and secondary literature, maintain a "sound journal," and produce a ten-page final paper.

Requirements/Evaluation: "sound journal" and a 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference given to Music, Theatre, and American Studies majors, and students with prior film studies coursework
Materials/Lab Fee: none

Winter 2019
LEC Section: 01 TBA Jacek H. Blaszkiewicz

MUS 12 (W) writing sample and brief application

Crosslistings: MUS12 / STAT12
Secondary Crosslisting

The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country—and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community,
including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook’s music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

Requirements/Evaluation: 10-page paper; final project; musical composition with commentary
Prerequisites: some previous singing or music-reading experience helpful
Enrollment Limit: 30
Enrollment Preferences: seniority
Materials/Lab Fee: $10 plus cost of books
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01

MUS 13 (W) The Golden Age of Gospel Music

A historical look at American Black Gospel, stressing the vocal tradition of the African American Church. Vocalists and instrumentalists are encouraged to participate, but there is no required prerequisite for the course. Course will consist of historical workshops in Gospel music. Required reading People Get Ready by Robert Darden, course booklet and will require a minimum of 10-page report. Music covered will be from the mid 1800's to contemporary gospel music. Field trip will include a trip to an African American Church service (Sunday morning). Requirements for the course include a 5-page paper with creative project or performance and a field trip to church. Adjunct Instructor Bio: Legendary Bassist Avery Sharpe has performed with Jazz greats from McCoy Tyner to Dizzy Gillespie. Sharpe is a Gospel Historian and has a strong up bringing in "The Church of God in Christ."

Requirements/Evaluation: 5-page paper with creative project or performance and a field trip to church
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: if overenrolled, preference to seniors
Materials/Lab Fee: $138 plus cost of books
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Avery G. Sharpe

MUS 14 (W) Classic and Contemporary Musical Theater

Crosslistings: MUS14 / THEA14
Primary Crosslisting

This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus--now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny"
under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

**Class Format:** afternoons

**Requirements/Evaluation:** a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** the instructor will communicate with those wishing to register either in person or via email

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

---

**MUS 15 (W) Contemporary American Songwriting**

**Crosslistings:** MUS15 / AMST15

**Primary Crosslisting**

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years. She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

**Class Format:** mornings

**Requirements/Evaluation:** final performance and a 2- to 3-page paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** students with a musical background and the ability to play and instrument may be given preference, but anyone interested is encouraged to register

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

---

**MUS 16 (W) Zimbabwean Music Collaboration**

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the participants.

**Class Format:** mornings
**MUS 25 (W) Creative Art Projects inspired by Southern Florida Native American Indian History & Culture**

This travel course will focus on creative work inspired by the history and culture of Native American Indians of Southern Florida. We will discuss the history and culture of Native Americans in the area, focusing mostly on the Calusa, their society, politics, system of government, trading customs, and religion. We will also talk about their construction of canal systems, and their architecture and engineering. Students will arrive to their own conclusion about the impact of Native Americans in our culture. They will also use their experiences during field trips, workshops, lectures, and group discussions as a source of inspiration for their creative work in one or more of the following fields: music composition, visual arts (video, photography), literature, poetry, and theater. They will create their projects individually or could form teams to create interdisciplinary works. If teamwork is selected for the creation of a project there will be a limit of one student per discipline in each team. We will visit archaeological and historical sites, Research Centers, and Museums focused in the History and Culture of Native American Indians of Southwest Florida. We will attend lectures offered by archaeologists, and will participate in the process of screening, cataloging, and analysis of samples extracted from the shell mounds of Useppa Island and Pineland at the Randell Research Center of the University of Florida. Calusa artifacts made with ceramic materials, wood carving, and painting, are recognized worldwide as remarkable examples of Native American artistic achievement. Samples of their art found during excavations in SW FL are part of exhibitions in the Historical Museums that we will visit. Students will learn about music inspired by pre columbian Native American instruments and art. We will discuss information and will visit the estuaries that sustained the world of the Calusas.

**Class Format:** travel

**Requirements/Evaluation:** 10-page paper; creative project, and travel journal

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 7

**Enrollment Preferences:** priority given to students interested in creating original work in response to field trips and visits to Research Centers and Museums (musical, photography and video, literary, poetry, theater)

**Materials/Lab Fee:** cost to student $1,995

**Attributes:** EXPE Experiential Education Courses; TRVL Winter Study Travel Course

---

**MUS 31 (W) Senior Thesis: Music**

To be taken by students registered for Music 493-494.

**Class Format:** thesis

**Distributions:** (D1)

---

**MUS 99 (W) Independent Study: Music**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D1)

Winter 2019

IND Section: 01   TBA   Ed Gollin

MUS 101 (F) Listening to Music: An Introduction to the Western Classical Tradition

When you listen to music -- on the radio, on your phone, at a concert -- how much do you really hear? This course refines students’ listening skills through study of the major composers, styles, and genres of the Western classical tradition. We will explore music from the Baroque, Classical, Romantic, and Modern eras, including works by Bach, Mozart, Beethoven, Chopin, Tchaikovsky, Brahms, Stravinsky, and other composers. Genres to be covered include the symphony, string quartet, sonata, opera, song, and choral music. Attendance at selected concerts on campus is required.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on a short listening journal, two concert reviews, a quiz, a midterm exam and a final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course

Expected Class Size: 25

Department Notes: intended for non-major students with little or no formal training in music

Distributions: (D1)

Not offered current academic year

MUS 102 (F) Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of practical exercises and written projects, students will develop an understanding of the elements of music (e.g. pitch, scales, triads, rhythm, meter, and their notation) and explore their combination and interaction in the larger-scale organization of works of classical, jazz and popular music (i.e. harmony, counterpoint, form, rhetoric). Practical musicianship skills will be developed through in-class and prepared singing, keyboard and rhythmic exercises.

Class Format: two weekly lectures

Requirements/Evaluation: evaluation will be based on written and practical quizzes, projects, participation, and a final exam

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first year students

Expected Class Size: 16

Distributions: (D1)

Fall 2018

LEC Section: 01   TF 1:10 pm - 2:25 pm   Dylan J. Schneider

LEC Section: 02   TR 8:30 am - 9:45 am   Ed Gollin

MUS 103 (F) Music Theory and Musicianship I

MUS 103 and 104 are designed for potential majors and for students with strong instrumental or vocal backgrounds. Students entering MUS 103 should have a solid understanding of musical rudiments (intervals, scales, keys) and reading proficiency in both bass and treble clefs. A short diagnostic exam will be administered at the first class meeting of MUS 103 to determine if a student requires any additional work to complement and
fortify course work during the early weeks of the semester, or whether placement in MUS 102 would be more appropriate. Students with a strong background in music theory may take a placement exam during First Days to see whether they can pass out of one or both semesters. MUS 103 and 104 are required for the music major. MUS 103 presents the materials, structures and procedures of tonal music, with an emphasis on the harmonic and contrapuntal practice of the baroque and classical periods (ca. 1650-1825). The course explores triadic harmony, voice leading, and counterpoint with an emphasis on the chorale style of J.S. Bach and his predecessors. Keyboard harmony and figured bass exercises, sight singing, dictation, analysis of repertoire, written exercises and emulation projects will develop both an intellectual and an aural understanding of music of the period. Projects include the harmonization of chorale melodies, the arrangement of classical period minuets and the composition of vocal canons.

**Class Format:** lecture two days a week; a conference meeting one day a week; ear training/keyboard/ skills lab meeting twice a week

**Requirements/Evaluation:** evaluation will be based on weekly written work, written and keyboard quizzes, and midyear and final projects

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Limit:** 24

**Enrollment Preferences:** first years, potential Music majors, and those with strong musicianship backgrounds

**Expected Class Size:** 24

**Distributions:** (D1)

---

**Fall 2018**

**LEC Section:** 01 TR 11:20 am - 12:35 pm Dylan J. Schneider

**LAB Section:** 02 MWF 9:00 am - 9:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**LAB Section:** 03 MWF 10:00 am - 10:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**LAB Section:** 04 MWF 11:00 am - 11:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**MUS 104 (S)  Music Theory and Musicianship I**

Music 104a continues the practical musicianship work of Music 103, while expanding the scope of harmonic topics to include seventh chords and chromatic harmony. Music 104a further explores the transformation of chorale harmony in contrapuntal works of the eighteenth century. Projects include the composition and performance of preludes, fugues and organ chorale preludes on baroque models.

**Class Format:** lecture two days a week; a conference meeting one day a week; ear training/keyboard skills lab meeting twice a week

**Requirements/Evaluation:** evaluation will be based on weekly written work, written and keyboard quizzes, and midterm and final projects

**Extra Info:** may not be taken on a pass/fail basis

**Extra Info 2:** this course will share aural skills labs with MUS 104b; students considering taking this course should consult the lab times shown below and plan their schedules accordingly

**Prerequisites:** MUS 103

**Enrollment Limit:** 24

**Enrollment Preferences:** first-years, potential or declared Music majors, and those with strong musicianship backgrounds

**Expected Class Size:** 21

**Distributions:** (D1)

---

**Spring 2019**

**LEC Section:** 01 TR 11:20 am - 12:35 pm Dylan J. Schneider

**LAB Section:** 02 MWF 9:00 am - 9:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**LAB Section:** 03 MWF 10:00 am - 10:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**LAB Section:** 04 MWF 11:00 am - 11:50 am Edwin I. Lawrence, Dylan J. Schneider, Daniel E. Prindle

**MUS 104 (S)  Jazz Theory and Improvisation I**

Crosslistings: AFR212 / MUS104

**Primary Crosslisting**

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based
composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

**Class Format:** alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

**Requirements/Evaluation:** evaluation will be based on weekly assignments, e.g., harmonic analysis and exercises in transposition and transcription, a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

**Extra Info:** may not be taken on a pass/fail basis

**Extra Info 2:** this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times shown below and plan their schedules accordingly

**Prerequisites:** MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student’s individual instruction strongly encouraged

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective Music majors, then Jazz Ensemble members, then Music majors

**Expected Class Size:** 12

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

**Attributes:** EXPE Experiential Education Courses

Not offered current academic year

**MUS 111 (F) Music Cultures of the World (DPE)**

This course introduces a variety of musical traditions from around the world, from highlife and hip hop in Ghana to Balinese Gamelan and Indian classical genres. Students will develop a working knowledge of musical terms, influential musicians, and concepts relevant to performance genres hailing from the Americas, Africa, Asia, Europe, and the Middle East. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. Reading and writing assignments are combined with direct engagement with music and musicians. No prior musical training required.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** based on class attendance and participation, regular short writing assignments, and a final paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** current or prospective majors in Music, Anthropology, Sociology, Arabic Studies and Asian Studies, as well as current and prospective concentrators in Africana Studies and Latina/o Studies

**Expected Class Size:** 20

**Department Notes:** MUS World Music/Ethnomusicology

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest

**Attributes:** MUS World Music/Ethnomusicology

**MUS 112 (S) Musics of Asia**
This course offers an introduction to the great diversity of Asian music. Our survey will span from East Asia (China, Korea, and Japan) to Southeast Asia (Thailand and Indonesia) to the Indian subcontinent, Central Asia (Tibet and Afghanistan), to the Middle East (Iran and the Arabian peninsula), and will end with the extension of Asian music across North Africa and into Eastern Europe. Within this broad survey, we will focus on selected and representative musical cultures and genres. In each section of the course, aspects of cultural context (including music's function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical musics of these cultures, we will also briefly consider the current musical scene. Encounters with this music will include attendance at live performances when possible.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on four tests and two papers
Prerequisites: none; no musical experience necessary
Enrollment Limit: 25
Expected Class Size: 20
Department Notes: MUS World Music/Ethnomusicology
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ASST
Attributes: GBST East Asian Studies Electives; MUS World Music/Ethnomusicology
Not offered current academic year

MUS 119 (S) Popular Music: Revolutions in the History of Rock
This course will trace the history of rock music from the 1950s to the present, focusing on those musicians who revolutionized the genre in various periods. Such "revolutions" are discovered in the use of new sounds and musical forms, in the relationship between lyrics and musical setting, and in the conception of rock's role in society. Three objectives will underpin our studies: to develop listening skills with music that one often hears, but perhaps rarely listens to intently; to determine in what ways popular music can be interpreted as reflecting its cultural context; and to encounter the work of several of the more innovative musicians in the history of rock. Finally we will interrogate our own activities by asking why the study of the "merely popular" should be pursued in a liberal arts education, whether new approaches can be developed for this endeavor, and what makes music "popular."

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on two tests, two papers, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: no musical background assumed
Enrollment Limit: 40
Enrollment Preferences: random selection
Expected Class Size: 40
Distributions: (D1)
Not offered current academic year

MUS 120 (S) Musics of Africa
Crosslistings: AFR113 / MUS120
Primary Crosslisting
This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: lecture/discussion
**MUS 138 (S) Introduction to Twentieth-Century Music**

Twentieth-century Euro-American art music involved a persistent exploration of the limits of musical possibility. Encounters with this music often challenge our ears and musical minds and require us to reconsider fundamental conceptions of music itself. Throughout the course, we will investigate in what ways the basic elements of music (e.g., harmonic organization, rhythm, timbre, instrumentation and performance conventions) were extended and revolutionized. Topics and styles to be discussed include: atonality, expressionism, twelve-tone techniques, neoclassicism, electronic and computer music, stochastic music, minimalism, and neoromanticism. We will also consider the music of this century in relation to contemporary developments in the other arts and to popular musical styles. The syllabus will include works by such composers as Debussy, Mahler, Stravinsky, Schoenberg, Webern, Bartók, Weill, Milhaud, Shostakovich, Ives, Copland, Babbitt, Stockhausen, Messiaen, Boulez, Berio, Cage, Górecki, Glass, Gubaidulina, and Tower.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on a series of quizzes, projects, short papers, and performance reports; quizzes will include listening and identifying examples

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** juniors, seniors, Music majors and potential majors

**Expected Class Size:** 12

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

**Attributes:** GBST African Studies Electives; MUS World Music/Ethnomusicology

**MUS 141 (F) Opera**

Crosslistings: MUS141 / THEA141

**Primary Crosslisting**

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on a midterm, a brief paper, an 8-page paper, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30
MUS 143 (S) The Symphony
This course traces the European symphonic tradition from the late eighteenth century through the mid-twentieth century, focusing on works by Mozart, Haydn, Beethoven, Berlioz, Liszt, Mendelssohn, Schumann, Brahms, Dvorak, Mahler, Strauss, and Shostakovich. We will examine developments in musical form and harmony, social contexts for listening, and contemporary aesthetic debates about the nature of genius, the idea of musical tradition, and the narrative capacity of instrumental music.
Class Format: lecture/discussion
Requirements/Evaluation: students will be evaluated on three 3- to 5-page essays, two exams, and short weekly assignments, ability to read music not required
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-years and sophomores
Expected Class Size: 10
Distributions: (D1)
Not offered current academic year

MUS 146 (S) The Concerto: Dialogue and Discord
The concerto is the musical genre most akin to the novel, and like the novel, explores the individual’s relationship to society. A musical protagonist—a solo instrumentalist or a group of individual players—engages the larger orchestral ensemble, and a story unfolds in a dramatic narrative told in sound. This course will trace the history of the concerto from its beginning in the Baroque period to today. We will explore the spirited exchanges of Bach’s Brandenburg Concerti, the urbane conversations of Mozart’s piano concerti, the impassioned struggles of the Brahms violin concerto, the ferocious arguments of the Shostakovich cello concerto, the polyglot discussions of John Adam’s clarinet concerto, and many more. Along the way we will also investigate transformations in patronage and performance contexts, the cult of the virtuoso, and aspects of musical form and style. Students will experience the excitement of hearing concerti performed on campus by the Berkshire Symphony and student winners of the Department of Music's Concerto Competition.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation based on several short papers, a midterm and a final, and on class participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: students with a demonstrated interest in music
Expected Class Size: 20
Distributions: (D1)
Not offered current academic year

MUS 149 (F) The Language of Film Music
Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced YouTube videos. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Bernard Herrmann, John Williams, James Horner, Alexandre Desplat, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and
MUS 150 (S) The Broadway Musical
Crosslistings: MUS150 / THEA150

Primary Crosslisting

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: lecture/discussion
Requirements/Evaluation: based on a midterm, a brief paper, an 8-page paper, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: none
Expected Class Size: 30
Distributions: (D1)
Attributes: FMST Core Courses

Not offered current academic year

MUS 151 (F) History of Jazz

"There are only three things that America will be remembered for 200 years from now when they study the civilization: The Constitution, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."--(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movements that changed the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross instrumental-influence) and cultural connections (jazz as cold war propaganda, jazz as protest music) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane, and Wayne Shorter.

Class Format: lecture
Requirements/Evaluation: class participation including regular reading and listening assignments; concert attendance; mid-term and final exam, one paper, and one final project
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-years and sophomores
Expected Class Size: 30
Distributions: (D1)
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;

Fall 2018
LEC Section: 01    TR 9:55 am - 11:10 am    Kris Allen

MUS 163 (S) Bach
Johann Sebastian Bach now enjoys the status of a cultural icon, transcending time and place. But who was Bach, and why do his musical creations continue to fascinate us? This course offers an introduction to the life and music of this iconic composer. We will explore aspects of cultural context (such as the social milieu in which Bach developed his art and the use and perception of his music by his contemporaries), as well as develop our listening skills by exploring matters of purely musical content (the styles and forms of his prodigious oeuvre). Both instrumental and vocal music will be surveyed, including the Brandenburg Concerti, the Goldberg Variations, the Magnificat, and the B Minor Mass. Along the way we will also consider Bach’s legacy in the 19th and 20th centuries.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, a listening diary, one 8- to 10-page paper, 4 mini-quizzes, a midterm, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with a demonstrated interest in music
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

MUS 164 (F) Bach and Handel: Their Music in High Baroque Culture
This course explores the lives and music of two great composers of the High Baroque, Johann Sebastian Bach and George Frideric Handel. We will examine their dramatically contrasting life experiences and musical pursuits within the larger social and cultural framework of the period: Bach as a provincial composer, servant to minor German aristocrats and the Lutheran Church, virtuoso organist and pedagogue; Handel as a cosmopolitan celebrity and entrepreneur, creator of operatic and instrumental entertainments for both the Italian and English nobility and the paying public. Development of listening skills and understanding of Baroque music styles, genres, and forms will be stressed. Bach’s Brandenburg Concerti and Mass in B-minor, and Handel’s opera Giulio Cesare and Water Music Suite are just a few of the works to be discussed and enjoyed.

Class Format: lecture/discussion, two meetings per week; field trip may be required
Requirements/Evaluation: evaluation will be based on participation, two papers, a midterm, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with a demonstrated interest in music
Expected Class Size: 12
Distributions: (D1)
Not offered current academic year

MUS 166 (F) Beethoven
This course provides an introduction to the life and music of Ludwig van Beethoven. The composer’s difficult childhood, tragic loss of hearing,
clandestine affair with his "Immortal Beloved", and tempestuous relationship with his suicidal nephew Karl, together with the French Revolution and emergence of Romanticism, will form the backdrop for our investigation of his artistic struggles and monumental achievements. Students will listen to a broad cross section of Beethoven's music, including piano sonatas, string quartets, symphonies, overtures, concertos, choral works, and opera. We will explore a range of topics, including the nature of his genius, his relation to composers such as Haydn and Mozart, and his impact on posterity.

Class Format: lecture/discussion

Requirements/Evaluation: listening quizzes, two papers, midterm and final exams, and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

MUS 171 (S) Music and Spirituality: Cross-Cultural Perspectives (WI)

Crosslistings: MUS171 / REL171

Primary Crosslisting

How does the sacred sound? Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music reflect and produce spiritual experience? This team-taught course will take a comparative approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, music and dance in spiritual practice, and the role of music created in the face of death and its aftermath. Working from both musicological and ethnomusicological perspectives, we will explore the possibilities of sensory ethnography for better understanding the role of perception and the body in spiritual experiences with music. Our comparisons will draw from Western and world Christian traditions from medieval to modern times, and on conversations with musicians immersed in the music of other faith traditions (including Jewish, Hindu, and Muslim). We will explore connections between music and spirituality through a wide variety of repertoires, including plainchant and Renaissance sacred choral music; the music and dance of traditional West African religions like vodun and orisa; music from the Western classical tradition by such composers as Bach, Beethoven, and Messiaen; American hymnody and spirituals; gospel music in the U.S. and Africa; and selected artists from the world of jazz and popular music, such as John Coltrane and Leonard Cohen.

Class Format: seminar

Requirements/Evaluation: class participation; class journal; presentation with annotated bibliography; ethnographic field study; final project with presentation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music, religion, and/or anthropology/sociology

Expected Class Size: 15

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under REL

Not offered current academic year

MUS 174 (F) The Singing Voice: Structure, Styles and Meaning

What makes an opera singer sound different than a rock singer? Why can’t one convincingly sing in the style of the other? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, above all, through singing. The class will learn the basics of yodeling, Tuvan throat singing, and belting, among other styles, and will explore the cultural and historical contexts of each.

Class Format: lecture/studio/discussion

Requirements/Evaluation: evaluation will be based on one quiz, two papers, and a final project

Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

Fall 2018
LEC Section: 01    MR 2:35 pm - 3:50 pm     Brad Wells

MUS 175 (F)  Sound Art, Public Music
Crosslistings: ARTS273 / MUS175

Primary Crosslisting
Western music performance traditionally occurs within contained spaces in which "performer" and "audience" adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and scripts of performance and reception have moved into public spaces—from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course studies the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of site-specific works on and around the Williams campus.

Class Format: seminar
Requirements/Evaluation: class participation, three short (2-4 page) essays, a response journal and the creation of four public music works
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Department Notes: ARTS elective
Distributions: (D1)
Not offered current academic year

MUS 177 (F)  Gender and Sexuality in Music  (DPE)
Crosslistings: MUS177 / WGSS177

Primary Crosslisting
This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class further inform these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, short weekly assignments, a final paper/project
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with some musical experience
Expected Class Size: 15
Distributions: (D1) (DPE)
MUS 178 (F) Music and Politics (WI)

Crosslistings: MUS178 / PSCI178

Primary Crosslisting

This course examines how musical sound and musical discourse change, enable, and inhibit citizen formation and the functioning of a well-ordered society. We will take a very wide definition of "politics," as music can have political meaning and effects far beyond national anthems and propaganda. For instance, musical sound is often read as a metaphor for political structures: eighteenth-century commenters pointed out that string quartets mirrored reasoned, democratic discourse, and twentieth-century critics made similar arguments about free jazz. Beliefs about music can serve as a barometer for a society's non-musical anxieties: Viennese fin-de-siècle critics worried that the sounds and stories of Strauss's operas were causing moral decline, an argument that should be familiar to anyone who reads criticism of American popular music. Finally, a pervasive strand of Romantic thought holds that (good) music, by its nature, is apolitical—what might it mean to deny social relevance to an entire field of human expression? We will read classic philosophical texts on art and politics by Schiller, Kant, Schopenhauer, Marx, Adorno, and others, and pair them with contextual studies of works of Western classical music from the last two hundred years and popular music of the last hundred years.

Class Format: tutorial

Requirements/Evaluation: Students will be expected to write a 5-7 page paper every other week, and submit written comments on their tutorial partner's paper in off weeks.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 8

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under PSCI

Not offered current academic year

MUS 179 (S) Paris, Music Capital of the Nineteenth Century

During the nineteenth century, writers and artists represented Parisian city life to an unprecedented degree. While Balzac, Baudelaire, Cassatt, Flaubert, and Manet captured urban activity through word and image, composers such as Berlioz, Offenbach, and Verdi turned to the Parisian soundscape to articulate what it meant to be a modern, urban citizen. This course explores the ways in which social, political, and urban developments impacted musical life in the "City of Light." By examining a diverse array of musical, literary, and visual sources, we will investigate how and why Paris became the epicenter of aesthetic movements such as romanticism, realism, and modernism. We will also pay close attention to how composers and musicians themselves dealt with rapid changes to the French metropolis by studying excerpts from newspaper criticism, memoirs, letters, song texts, and operetta libretti. Course readings will include testimonies of nineteenth-century Parisians as well as more recent work in art history, music, and urban studies. Knowledge of music notation and French is not required, but is a welcome bonus.

Class Format: lecture/discussion

Requirements/Evaluation: based on participation, two 3-5-page response papers, and one 8-page final research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students with a demonstrated interest in music, art history, and/or French literature

Expected Class Size: 15

Department Notes: this course counts as an elective for French and French Studies majors

Distributions: (D1)
MUS 201 (F) Music Theory and Musicianship II
Music 201 continues to greater degrees the study of music techniques from the common practice period by means of analysis, composition, written exercises, sight-singing, and dictation. We will expand our understanding of chromaticism. We will learn how chromaticism is used as a voice-leading tool, and how it participates in music even at deeper levels of the structure. We will learn about innovations that occurred from the early 19th century through the beginning of the 20th century and will trace the origins for these new harmonic tendencies. We will also learn how composers create larger formal structures.

Class Format: lecture meetings twice a week plus aural skills lab meetings

Requirements/Evaluation: final grading will be based on homework, theory quizzes, analysis papers, compositional projects, final project, class attendance, preparation, participation, and on the results of the lab portion of the class (sight singing and ear training)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: MUS 104
Enrollment Limit: 12
Enrollment Preferences: Music majors and potential Music majors
Expected Class Size: 12
Distributions: (D1)

Fall 2018

LAB Section: 02 F 12:00 pm - 12:50 pm Daniel E. Prindle

MUS 204 (S) Jazz Theory and Improvisation II
Crosslistings: MUS204 / AFR214

Primary Crosslisting
A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

**Class Format:** two weekly seminar meetings, alternating between theory and performance sessions

**Requirements/Evaluation:** weekly compositional, analysis, transcription or performance exercises and final transcription project

**Prerequisites:** MUS 104b or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Music majors and Jazz Ensemble members

**Expected Class Size:** 5-8

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

**Attributes:** EXPE Experiential Education Courses

*Not offered current academic year*

---

**MUS 205 (F) Composition I**

Beginning courses in musical composition. Size and number of required projects will vary from 4 to 5. Each assignment will represent 25% of the student's final grade. A group meeting per week will deal with the presentation of the student's work in progress, analysis of models for composition, performance of work in class, and critiquing of work. There will be a weekly individual meeting with the instructor to discuss each student's progress. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on the quality and timeliness of composition projects, attendance, and class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MUS 202 (may be taken concurrently) or permission of instructor

**Enrollment Limit:** 6

**Enrollment Preferences:** Music majors; consideration of non-majors based on qualifications and experience

**Expected Class Size:** 4

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

MUS 208 (F) Arranging for Voices
What is gained--or lost--when music is arranged for voices? How does one create music that has something to say when using something already said? Arranging for Voices addresses these questions through study of arrangements and regular arranging projects. Students will work in multiple styles, making use of numerous compositional strategies and techniques. All student arrangements will be read and discussed in a seminar-type setting.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on weekly assignments, midterm and a final, large-scale project
Prerequisites: MUS 103 and 104
Enrollment Limit: 8
Enrollment Preferences: Music majors
Expected Class Size: 4
Distributions: (D1)

Not offered current academic year

MUS 210 (S) Music Technology I
Designed for students with some music background who wish to learn basic principles of Musical Technology and practical use of current software and hardware. Topics include acoustics, MIDI sequencing, digital recording and editing, sampling, analog and digital synthesis, digital signal processing, and instrument design. Lectures will provide technical explanations on those topics covered in class and an historical overview of electronic music.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on weekly assignments, a midterm exam, a final paper and two composition projects
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MUS 102 or 103, or permission of instructor; knowledge of and proficiency with musical notation is required; some background in acoustics/physics is desirable
Enrollment Limit: 8
Enrollment Preferences: Music majors and those planning to major
Expected Class Size: 8
Distributions: (D1)

Spring 2019
LEC Section: 01 TR 9:55 am - 11:10 am Ileana Perez Velazquez

MUS 211 (S) Music, Nationalism, and Popular Culture (DPE) (WI)
This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel, Joao Gilberto, Youssou N'Dour), international forums for the
expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Ernest Gellner, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

**Class Format:** lecture/discussion

**Requirements/Evaluation:** class participation, two 4- to 6-page papers, Midterm paper, a Final Paper/Project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** upperclass students and Music majors

**Expected Class Size:** 12

**Department Notes:** MUS World Music/Ethnomusicology

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

**Attributes:** AMST Arts in Context Electives; MUS World Music/Ethnomusicology;

Spring 2019

LEC Section: 01  MR 1:10 pm - 2:25 pm  Corinna S. Campbell

**MUS 220 (F)  African Dance and Percussion**

**Crosslistings:** DANC201 / MUS220 / AFR201

**Secondary Crosslisting**

This course focuses on selected dance and music forms from the African continent for example, *Kpanlogo* from Ghana, *Lamban* from Guinea, Senegal and Mali or *Bira* from Zimbabwe. We will examine their origins (people, history and cultures) and influence beyond geographic perimeter to more fully understand the function of these forms in contemporary times. Students will study movement and percussion and are evaluated on the quality of progress with the selected forms throughout the semester. Forms may not be the same every semester. This course can be taken for academic and/or PE credit

**Class Format:** studio/lecture/discussion

**Requirements/Evaluation:** participation in assignments that include research and performance projects and short papers; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects

**Extra Info 2:** this course may be taken for academic and/or PE credit; see description for more details

**Prerequisites:** DANC 100 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** students who have taken Dance 100 or permission of instructors

**Expected Class Size:** 20

**Department Notes:** MUS World Music/Ethnomusicology

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR

**Attributes:** GBST African Studies Electives; MUS World Music/Ethnomusicology

Fall 2018
MUS 221 (S)  African Dance and Percussion

Crosslistings: AFR206 / MUS221 / DANC202

Secondary Crosslisting

Course continues the investigation of selected music and dance from the African continent. Advancing dance and music skills, deepening understanding of history and context of the material are focus of readings, discussions and projects throughout the semester. Questions we will address include the impact of religion, colonialism, travel, immigration, media tradition and the continued emergence of new forms. Material may include Gum Boots (Isicathulo) from Southern Africa, Juju in Nigeria or Hip Hop in several nations. This course can be taken for academic and/or PE credit.

Class Format: studio/lecture/discussion

Requirements/Evaluation: participation in assignments that include research and performance projects and a short paper; students enrolled for PE credit only are not required to do short paper or research assignments; all students must participate in all performance projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who have taken DANC 100, DANC 201 or permission of the instructor

Expected Class Size: 20

MUS 222 (S)  Politics of Performance/Performing Politics in Contemporary Africa  (WI)

Crosslistings: MUS222 / AFR223

Primary Crosslisting

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change. Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQ community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres--among them Afrobeat, kwaiato, soukous, raï, mbalax, Chimurenga music, and a variety of rap and hip-hop styles--are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: lecture/discussion

Requirements/Evaluation: based on in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

Expected Class Size: 10

Department Notes: MUS World Music/Ethnomusicology

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

MUS 225 (S)  Musics of the Caribbean
Crosslistings: MUS225 / AFR225

Primary Crosslisting

From witty and politically charged calypsos to soulful bachatas, from folkloric displays that advertise a country's cultural diversity to ritual performances that facilitate communication with the spirit world, the music of the Caribbean is astonishingly diverse, both sonically and in its social application. This course serves as an introduction to a wide spectrum of Caribbean music in its broader social and historical context. Through engaging with audio and video sources, readings, performance exercises and workshops, students will learn to identify distinguishing features associated with particular countries and regions, while also exploring the sounds and musical structures that are shared between them. Featured genres include reggae, steel pan, calypso, zouk, Maroon music from Suriname and Jamaica, chutney, salsa, merengue and music from Haitian Voudou and Cuban Santería religions. Interlaced with discussion of musical genres and innovative musicians are a number of central questions about the social role of music within the region: How has slavery and colonial enterprise shaped the musical landscape of the Caribbean? How do the realms of sacred and secular performance relate to each other? What role does tourism and global circulation play in influencing musical tastes and practices? Finally, how do music and dance interconnect?

Class Format: lecture
Requirements/Evaluation: class participation, multimedia project, midterm paper, intermittent short assignments, final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Music majors and Africana Studies or Latina/o Studies concentrators
Expected Class Size: 20
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR
Attributes: AFR Core Electives; MUS World Music/Ethnomusicology
Not offered current academic year

MUS 226 (S)  Introduction to the Music of Brazil

A course designed to acquaint students with an overview of the history and development of the music of Brazil, from African and colonial antecedents to the present. Students will examine characteristics of West African music brought to Brazil as a part of the Portuguese colonization, as well as how these musical elements and influences cameled with those of the European immigrant population to create a variety of distinctly national musical styles, including Batucada, Choro, Frevo, Samba, Bossa Nova, and MPB (música popular brasileira), among others. Composers and musicians whose work will be studied will include Alfredo da Rocha Viana Sr., Pixinguinha (Alfredo da Rocha Viana Jr.), Noel Rosa, Luiz Gonzaga(Gonzagão), Heitor Villa Lobos, A.C. Jobim, Gilberto Gil, Milton Nascimento, Hermeto Pascoal, Egberto Gismonti, Mario Adnet, and others. Musical literacy sufficient to engage in score study and formal analysis is required.

Class Format: lecture - weekly lecture format with assigned readings and listening
Requirements/Evaluation: midterm and final exams as well as two 10-page research papers
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MUS 104a or b
Enrollment Limit: 19
Enrollment Preferences: Music majors and Jazz Ensemble members
Expected Class Size: 19
Department Notes: MUS World Music/Ethnomusicology
Distributions: (D1)
Attributes: MUS World Music/Ethnomusicology
Not offered current academic year

MUS 230 (S)  Musical Ethnography
Often, we experience music's impact on us without fully considering why it achieves such strong effects. The discipline of ethnomusicology confronts the question of musical meaning by combining musical study and analysis with an exploration into the contexts of musical production, circulation, and reception. Musical ethnography is both the means by which scholars pursue this line of questioning, and also the (usually) written work that results from such an investigation. This course features a hands-on approach to musical ethnography. Students will each conduct ethnographic fieldwork in a music-making community within Williamstown and the surrounding area. Coursework will survey approaches to methodology (modes and degrees of researcher involvement, practical skills related to documentation), issues of ethics, and social and musical analysis.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** class participation, small assignments (four 1-2 page assignments), interview transcript with commentary, reading response, final project and presentation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** some musical training/experience necessary, see instructor for more information

**Enrollment Limit:** 10

**Enrollment Preferences:** students with some musical experience

**Expected Class Size:** 6

**Department Notes:** MUS World Music/Ethnomusicology

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under ANTH

**Attributes:** EXPE Experiential Education Courses

*Not offered current academic year*

**MUS 231 (F) Music in History I: Bach and Before**

This course explores 1000 years of music-making in Western European culture, beginning with the philosophical and theoretical origins of that music in ancient Greece and extending to the life and music of J.S. Bach. Topics covered will include how the sound of music changed over a millennium; the different functions it served and how genres developed to serve these functions; the lives of the men and women who composed, performed, and wrote about music; and how the changing notation and theory of music related to its practice over the centuries. At the same time, the course provides an introduction to the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day.

**Class Format:** lecture/discussion, two meetings per week; field trip may be required

**Requirements/Evaluation:** evaluation will be based on in-class and online discussion participation, two papers, and midterm and final exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ability to read music; open to qualified non-majors with the permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Music majors and those planning to major

**Expected Class Size:** 10

**Department Notes:** required course for Music majors

**Distributions:** (D1)

**Fall 2018**

**LEC Section: 01** MR 2:35 pm - 3:50 pm  M. Jennifer Bloxam

**MUS 232 (S) Music in History II: Classical and Romantic Music**

This course explores the development of western classical music from 1750-1900 through the study of works by Mozart, Beethoven, Schubert, Schumann, Chopin, Verdi, Wagner, Tchaikovsky, Brahms, Mahler, and others. Composers' styles will be examined in conjunction with Classical and Romantic aesthetics. Topics for discussion include the changing role of music and musicians in society, music and narrative, music and philosophy, operatic traditions, and musical nationalism.

**Class Format:** lecture/discussion, three days per week
**Requirements/Evaluation:** evaluation will be based on class participation, two papers, class presentations, a midterm, and a final exam

**Prerequisites:** ability to read music

**Enrollment Limit:** 15

**Enrollment Preferences:** Music majors, or those planning to major

**Expected Class Size:** 12

**Department Notes:** required course for Music majors; Music majors may not take MUS 232 as pass/fail or 5th course option

**Distributions:** (D1)

**MUS 238 (F) Music in Modernism (WI)**

The synthesis of the arts was a primary pursuit of modernist composers, artists, choreographers, and writers. Seeking either to realize Wagner's "total work of art" in the theater, or to uncover the more general correspondences celebrated by Baudelaire, modernists consistently looked beyond their own media. Collaborations on works of "total theater" were common: Satie, Cocteau, Massine, Picasso; Brecht, Hindemith, Weill; Stravinsky, Nijinsky, Bakst; Claudel, Honegger, Rubinstein. Modernists explored new connections between music and color (Scriabin, Kandinsky), music and literature (Joyce, Mann), and music and dance (Duncan, Graham). Occasionally, modernists attempted to unite the arts on their own: Schoenberg painted, Pound composed, and Kokoschka wrote. Our focus will be on those works of music, art, dance, and literature that explored new relationships between the arts. One goal will be to investigate whether specific equivalents exist between techniques of modernist painting, poetics, choreography, and composition. Aware of the risks and rewards of interdisciplinary study, we will attempt our own theories of artistic synthesis. This course is designed to bring multiple perspectives to the study of music in modernism.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on three papers (6, 8, and 12 pages in length) and on class participation; drafts of two of these papers will be required

**Extra Info:** students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Distributions:** (D1) (WI)
MUS 244 (S) Opera Since Einstein (WI)
Crosslistings: MUS244 / THEA243

Primary Crosslisting
After 400 years, we might assume we know what "opera" is. However, in recent decades the genre has moved far beyond our preconceptions. This course asks us to examine opera of the last forty years with fresh eyes and ears, expanding our understanding of the term to include the interdisciplinary, multimedia, cross-cultural work that has been created by composers, directors (Peter Greenaway, Peter Sellars, Robert Wilson), filmmakers, choreographers, and visual artists in that period. Using the 1976 premiere of Philip Glass's seminal Einstein on the Beach as a starting point, we will examine such diverse works as Adams's Nixon in China and The Death of Klinghoffer, Glass's Satyagraha, Tan Dun's Marco Polo, Neuwirth's Lost Highway, Unsuk Chin's Alice in Wonderland, Andriessen's Writing to Vermeer, Ades's Powder Her Face, Muhly's Two Boys, Monk's Atlas, and Ashley's television opera, Perfect Lives.

Class Format: discussion/lecture
Requirements/Evaluation: evaluation based on 3 papers (6, 8, and 12 pages in length) and on class participation; drafts of two of these papers will be required
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 10
Distributions: (D1) (WI)

Not offered current academic year

MUS 247 (S) Music for Theater Production
Crosslistings: THEA247 / MUS247

Primary Crosslisting
Music written to accompany or to "point up" the action or mood of a dramatic performance on stage can be traced to Ancient Theater. Are the labels of incidental and background music appropriate or patronizing for this genre? What is the difference between the composition of "incidental music" and sound designing? How does creating music to accompany a play differ from writing concert music or music for film, ballet, opera, or musical theater? What makes for effective incidental music? How does the music interact with the spoken drama? Students will discuss music composed for selected plays and will compose music for a scene of a play drawing upon pre-existing works, or creating their own. Format: tutorial. During the first and last weeks of the semester, students will attend two group classes. In the other weeks, students will meet with the instructor in pairs for a one-hour session. Students will write and present a 5- to 6-page paper every other week and a 1- to 2-page response to their partner's paper in the alternate weeks.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five papers/presentations, and five responses
Extra Info: not available for the fifth course option
Prerequisites: ability to read music and permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: Music and Theater Majors
Expected Class Size: 10
Distributions: (D1)

Not offered current academic year

MUS 252 (F) Introduction to the Music of John Coltrane
Crosslistings: AFR242 / MUS252

Primary Crosslisting
This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane's compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane's musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Class Format: lecture

Requirements/Evaluation: evaluation based on in-class participation and preparation, quizzes on assigned readings, midterm, final examinations and a final paper

Extra Info: evaluation partially based on participation in an in-class group analysis presentation, and a final paper involving musical analysis of a Coltrane composition or recorded performance

Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: musically literate students and Music majors

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: AMST Arts in Context Electives;

Not offered current academic year

MUS 254 (F) Bebop: The (R)evolution of Modern Jazz

Crosslistings: MUS254 / AFR254

Primary Crosslisting

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as “frozen faced introverts, dedicated to chaos.” This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop’s most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and it’s evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Class Format: seminar

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Enrollment Limit: 12

Enrollment Preferences: Music majors, Jazz Ensemble members, Africana Studies concentrators

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under AFR

Attributes: AMST Arts in Context Electives;

Not offered current academic year

MUS 261 (S) The Saint and the Countess: Lost Voices of Medieval Women

Primary Crosslisting

Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the
requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

Class Format: seminar
Requirements/Evaluation: evaluation based on several short papers and presentations, and a final project and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: current or prospective Music and Women's Gender & Sexuality Studies majors
Expected Class Size: 6
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under WGSS

Spring 2019
SEM Section: 01 TR 9:55 am - 11:10 am M. Jennifer Bloxam

MUS 275 (F) Shakespeare through Music (WI)
The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies Romeo and Juliet and Othello, and the comedy Midsummer Night's Dream--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

Class Format: tutorial
Requirements/Evaluation: each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: second-year students
Expected Class Size: 8
Distributions: (D1) (WI)
Distribution Notes: WI: Each student will write five 6- to 7-page essays, and provide five written peer reviews

Fall 2018
TUT Section: T1 TBAThursday Org Mtg 8:30 pm - 9:00 pm M. Jennifer Bloxam

MUS 276 (F) Music and the Internet
Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has
affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: lecture/discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 14

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under SCST

Attributes: FMST Core Courses

Not offered current academic year

MUS 278 (F) Carmen, 1845 to Now  (WI)

Crosslistings: MUS278 / WGSS248

Primary Crosslisting

The story of the gypsy femme fatale Carmen has endured for over 150 years. In Western culture she exemplifies the seductive, exotic, independent, and forbidden woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his beloved 1875 opera Carmen. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all-black musical Carmen Jones, to the MTV version A Hip Hopera of 2004. Comic approaches will also be assessed, from Charlie Chaplin's Carmen Burlesque of 1915 through Spike Jones' 1952 Carmen Murdered! and The Naked Carmen of 1970. We will explore remarkable dance interpretations ranging from Carlos Saura's 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called The Car Man.

Class Format: tutorial; after initial group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week

Requirements/Evaluation: each student will write a 5- to 6-page essay every other week (five in all), and provide peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; ability to read music useful but not necessary

Enrollment Limit: 10

Enrollment Preferences: sophomores and juniors

Expected Class Size: 8

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under WGSS

Not offered current academic year

MUS 280 (S) Dancing the Score/Scoring the Dance

Crosslistings: DANC280 / MUS280

Primary Crosslisting

This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in
a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one’s group is central, sharing responsibility for the development of others’ as well as one’s own work.

Class Format: tutorial; each student choreographer will work with a student composer; they will share responsibility choosing, creating, developing, completing, and presenting their projects

Requirements/Evaluation: 10% class participation, 20% written assignments, 70% composition assignments

Extra Info: not available for the fifth course option

Prerequisites: permission of instructor

Enrollment Limit: none

Enrollment Preferences: composition students and student choreographers

Expected Class Size: 10

Distributions: (D1)

Spring 2019

MUS 281 (F) Individual Vocal and Instrumental Instruction

Individual vocal or instrumental lessons offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but pass/fail is also an option. (Note: partial credit music lessons taken pass-fail do not count as one of the three pass-fail options available to students for regular semester courses.) Students are required to prepare for 10 lessons during the semester with a minimum expectation of one hour practice per day and to perform publicly on at least one departmental studio recital during the semester. Lessons are scheduled TBA based upon instructor schedule. Make-up lessons given at the discretion of the instructor. Grading will be based upon lesson preparation, public performance, and progress throughout the semester. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 10 lesson commitment. To register for the course, a student must first contact the appropriate teacher (see Music Dept. for list), and then fill out a registration/billing contract to be signed by both teacher and student. See contract for instructions. There is no online registration. Registration is for course number 281, with the appropriate section number from the following list. Students will be reassigned to course numbers 281-288 based on the number of semesters of instruction already taken in one particular section. Specific instrument or voice sections are as follows: 01 Bassoon, 02 Cello, 03 Clarinet, 04 Bass, 05 Flute, 06 Guitar, 07 Harpsichord, 08 Horn, 09 Jazz Piano, 10 Oboe, 11 Organ, 12 Percussion, 13 Piano, 14 Classical Saxophone, 15 Trumpet, 16 Viola, 17 Violin, 18 Voice, 19 Jazz Bass, 20 Jazz Vocal, 21 Trombone, 22 Harp, 23 Jazz Drum, 24 Jazz Saxophone, 25 Jazz Trumpet, 28 African Drumming, 29 Jazz Guitar, 30 Mbira, 31 Vocal/Songwriting, 32 Jazz Trombone 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liuqin/Pipa, 39 Zhongruan

Prerequisites: permission of the individual instructor; enrollment limits apply to each section based upon studio space and student qualifications

Fall 2018

Spring 2019
LSN Section: 01 TBA Ed Gollin

MUS 291 (F) Chamber Music Workshop

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Music Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade, but as with all fifth courses, pass/fail is also an option. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching sessions during the semester. It is
recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in to the coaches at the end of the semester. In addition students are expected to practice the assigned music individually and are required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. The ensembles will be organized based on skill levels and the instruments represented. For students in continuing departmental small ensembles, students are expected to practice the assigned music individually and keep a log of their practices, attend all rehearsals, and participate in all concerts presented during the semester. To register for the course, a student must contact the Chamber Music Performance Coordinator, and fill out a registration contract to be signed by the Coordinator, the coach, and the student.

Class Format: partial credit fifth course
Requirements/Evaluation: evaluation based on preparation for weekly coachings
Extra Info: registration is through the music department
Prerequisites: permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability
Enrollment Preferences: more advanced students, to be determined by audition as necessary
Department Notes: students should register for 291 for their first semester enrolled in this course and should use the numbers 292-298 for subsequent semesters

Fall 2018

Spring 2019
LSN Section: 01    TBA    Ed Gollin

**MUS 301 (F) Modal Counterpoint**
Counterpoint, the study of the ways independent melodic lines can be joined in music, has been essential to musical and compositional instruction for centuries. Counterpoint was taught by Mozart, studied by Beethoven, and to this day remains an integral part of compositional training. The course will introduce students to species counterpoint in two and three voices--exercises that develop discipline in polyphonic writing, hearing, and thinking. The exercises will focus on the constraints of sixteenth-century vocal polyphony (music of Palestrina and Lassus) but will illustrate how such contrapuntal discipline is also manifest in music of Corelli, Bach, Brahms and Debussy. The species exercises will lead to a final composition project, such as the emulation trio sonata in seventeenth-century style.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on written exercises and emulation projects
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MUS 103 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Music majors and those with previous music theory training
Expected Class Size: 12
Distributions: (D1)

Fall 2018
LEC Section: 01      Cancelled

**MUS 307 (F) Composition III**
Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Class Format: seminar
Prerequisites: MUS 205, 206 and permission of instructor; 2 students per instructor for both courses (MUS 307, 308)
Distributions: (D1)
MUS 308 (F) Composition IV

Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Class Format: seminar

Prerequisites: MUS 205, 206 and permission of instructor; 2 students per instructor for both courses (MUS 307, 308)

Distributions: (D1)

MUS 309 (S) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with the quintet and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion, rehearsal and performance of original arrangements and/or compositions during the semester, to include at least one transcription of a recorded arrangement, one quintet or sextet arrangement, and one arrangement for big band. Performances by the Jazz Ensembles, as rehearsed and prepared by the students of this course, are also expected. Students must attend small ensemble rehearsals when work is being rehearsed, and end of semester small ensemble recital when their work is performed.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104b and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

MUS 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Crosslistings: AFR330 / MUS330 / DANC330

Secondary Crosslisting

"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa
is as authentic as the Africa of old.” --Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Class Format: studio

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects

Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors

Enrollment Limit: 14

Enrollment Preferences: students who have taken DANC 201, 202 or any of the courses listed in the prerequisites

Expected Class Size: 10

Materials/Lab Fee: Occasional fees to attend concerts; fee range free-$35

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under DANC or MUS; meets Division 2 requirement if registration is under AFR

Attributes: MUS World Music/Ethnomusicology

Spring 2019

STU Section: 01 TF 1:10 pm - 3:50 pm Sandra L. Burton, Tendai Muparutsa

MUS 352 (F) Interplay: Collaborative Traditions in Jazz

"Meaningful theorizing about jazz improvisation at the level of the ensemble must take the interactive, collaborative context of musical invention as a point of departure"- Ingrid Monson, Saying Something. Collaboration gives birth to specific musical moments, shapes the dramatic arc of whole pieces and performances, and is the foundation out of which the styles and larger artistic identities of individuals and groups arise. This class is an opportunity for advanced students of jazz music to investigate the uniquely collaborative nature of jazz language assimilation and communication. Participants will transcribe and analyze examples of musical interplay from the recorded works of the Miles Davis Quintet of the 1960's, the John Coltrane Quartet of the 1960's, and other notable jazz ensembles. They will also undertake a thorough profile of a modern-day ensemble, including a performance-based final project. Essays on jazz aesthetics by Berliner, Monson, Hobson and Rinzler among others will serve to broaden our discussions as we examine the ideas of musical collaboration and group identity through social and commercial lenses.

Class Format: tutorial

Requirements/Evaluation: an assortment of weekly writing/listening/transcription/analysis/composition/performance projects

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: advanced jazz theory and performance skills, permission of instructor, MUS 104b, 204 highly suggested

Enrollment Limit: 10

Enrollment Preferences: Music majors, jazz ensemble members

Expected Class Size: 8

Distributions: (D1)

Not offered current academic year

MUS 381 (S) Choral Conducting

Choral conducting techniques will be developed through exercises and projects that encompass the many facets of this activity. Using the class as the primary practice choir, students will focus on conducting patterns applied to elements of interpretation, keyboard and vocal skills, issues of tuning and blend, rehearsal techniques, score study, and style and repertoire. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.
MUS 382 (F) Orchestral Conducting

This course will introduce and develop a broad range of subjects associated with conducting, including: leadership, rehearsal techniques, physical and aural skills, interpretation, performance practices, and programming. Related areas to be discussed include: balance, intonation, rhythm, articulation, bowings, and complex meters. Weekly conducting and score reading assignments will form the core of the workload. Larger projects may include conducting existing instrumental ensembles, and along with score reading, will be the basis of the midterm and final exams. This course includes instrument demos, conducting videos and a trip to audit a private Boston Symphony rehearsal at Symphony Hall in Boston.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on class participation, regular conducting assignments, midterm and final projects
Prerequisites: membership in a Music Department ensemble preferred, permission of instructor
Enrollment Limit: 6
Enrollment Preferences: Music department ensemble members/upperclass students
Expected Class Size: 2-4
Distributions: (D1)

MUS 391 (F) Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment. Class Format: individual instruction

Class Format: individual instruction
Requirements/Evaluation: may not be taken on a pass/fail basis; not available for the fifth course option
Extra Info: MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 may not be taken on a pass/fail basis; not available for the fifth course option
Extra Info 2: should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student
Prerequisites: completed application, registration and instructor recommendation must be submitted by the instructor by the Tuesday before the first Friday of the semester
Enrollment Preferences: intended for music majors; students must obtain the application and registration forms from the Music Department Office
Department Notes: music majors may register for a total of four semesters, non-majors may register for two semesters: the specific name of the project elected is to be specified after the title "Music Performance Studies"
Distributions: (D1)
MUS 392 (F)  Advanced Musical Performance

Individual instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Additional guidelines for full credit lessons can be obtained at the Music Department office. Full credit lessons must be approved by the entire music faculty and an audition may be required. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 12 lesson commitment.

Class Format: individual instruction

Requirements/Evaluation: may not be taken on a pass/fail basis; not available for the fifth course option

Extra Info: Music 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load the numbers 391, 392, 491, 492 may not be taken on a pass/fail basis; not available for the fifth course option

Distributions: (D1)

MUS 471 (S)  Timbre

Timbre is central to the experience of all music and often enables us to identify styles and cultures nearly instantaneously. However, timbre is not commonly discussed in detail since our technical vocabulary for describing this musical element has been comparatively limited. Our work in this seminar will involve readings in music theory and history, ethnomusicology, and cognitive studies as well as in the emerging field of sound studies as we attempt to define timbre, explore its manifestations in a wide variety of music, and develop an analytical approach and descriptive vocabulary tailored specifically to this musical element. We will consider how composers and performers of both art and popular musics have wielded timbre as an expressive device and how technology may allow us to analyze details of timbral performance and perception. We will investigate the relationship between timbre and orchestration, from the rise of Haydn's orchestra to the Klangfarbenmelodie of Schoenberg. We will consider extremes of timbral distortion in both vocal and electric guitar effects in rock music as well as in such traditions as Korean p’ansori and will explore various forms of speech music and the work of composers of spectral music to expand our case studies. Finally, our own experiments with timbral effects will bring our seminar to bear on our musical performance.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on papers, presentations, and class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 are also recommended.

Enrollment Limit: 10

Enrollment Preferences: senior Music majors, junior Music majors

Expected Class Size: 8

Distributions: (D1)
MUS 472 (S)  Bach’s Legacy  (WI)
How have composers after Bach engaged with his legacy? This seminar will trace the course of the Classical and early Romantic period "Bach Revival" through Mozart, Beethoven, Mendelssohn, and Clara and Robert Schumann, and explore how he was venerated in the later Romantic era by Brahms and Busoni. Our main focus, however, will be on how composers of the modern era have viewed him and used his music. We will test critical conceptual frameworks offered by David Lowenthal’s "The Past is a Foreign Country" and Harold Bloom’s "The Anxiety of Influence," using them as lenses through which to view contemporary classical composers’ Bach-inspired creations, ranging from Schoenberg and Webern through Sophia Gubaidulina, George Crumb, and David Lang. Finally, we will consider both the musical techniques and meanings of reworkings and quotations of Bach’s music in film, jazz and popular music.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on several papers totaling at least 20 pages, presentations, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 and MUS 231 and/or 233 highly recommended

Enrollment Limit: 12

Enrollment Preferences: junior and senior Music majors

Expected Class Size: 8

Distributions: (D1) (WI)

Spring 2019
SEM Section: 01  W 1:10 pm - 3:50 pm  M. Jennifer Bloxam

MUS 473 (S)  Process Music
The course explores process music—music organized by the unfolding of various mathematical or mechanistic procedures—as defined by Steve Reich’s "Music as Gradual Process." The seminar centers upon Reich’s process music, placing it in the context of its intellectual and musical precursors, the process and minimalist music of his contemporaries, and the subsequent generations of composers who built on Reich’s foundation. The course will develop analytical tools to both define the processes that composers use in their music and to explore the particular relation between the musical materials (melodic, rhythmic) a composer chooses and the processes to which those material are subject. Reich's process music and its techniques will serve as both a lens and mirror to examine and reflect upon precursor repertoires, including the contrapuntal music of Bach, isorhythmic motets of the middle ages and their cyclic counterparts in the music of Messiaen, serial procedures of the 1950s, and Ghanaian ensemble drumming. Contemporary musicians/composers to be explored as lecture topics and student projects will include Riley, Glass, Tenney, Lang, Tom Johnson, and Radiohead.

Class Format: seminar; weekly 3-hour meeting

Requirements/Evaluation: based on analysis and composition projects, and a final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MUS 202

Enrollment Limit: 12

Enrollment Preferences: Music majors

Expected Class Size: 12

Distributions: (D1)

Spring 2019
IND Section: 01    TBA    Ed Gollin
Neuroscience is a rapidly growing interdisciplinary field concerned with understanding the relationship between brain, mind, and behavior. The interdisciplinary nature of the field is apparent when surveying those who call themselves neuroscientists. Among these are anatomists, physiologists, chemists, psychologists, philosophers, molecular biologists, computer scientists, linguists, and ethologists. The areas that neuroscience addresses are equally diverse and range from physiological and molecular studies of single neurons, to investigations of how systems of neurons produce phenomena such as vision and movement, to the study of the neural basis of complex cognitive phenomena such as memory, language, and consciousness. Applications of neuroscience research are rapidly growing and include the development of drugs to treat neurodegenerative disorders such as Alzheimer’s disease and Parkinson’s disease, the use of noninvasive techniques for imaging the human brain such as PET scans and MRI, and the development of methods for repair of the damaged human brain such as the use of brain explants and implants. Combining this wide range of approaches and research methods to study a single remarkably complex organ—the brain—and the behavioral outcomes of its activity requires a unique interdisciplinary approach. The Neuroscience Program is designed to provide students with the opportunity to explore this approach.

**THE PROGRAM**

The program in neuroscience consists of five courses including an introductory course, three electives, and a senior course. In addition, students are required to take two courses, Biology 101 and Psychology 101, as part of the program.

Neuroscience (Neuroscience 201) is the basic course and provides the background for other neuroscience courses. Ideally, this will be taken in the sophomore year. Either Biology 101 or Psychology 101 serves as the prerequisite. Electives are designed to provide in-depth coverage including laboratory experience in specific areas of neuroscience. At least one elective course is required from Biology (Group A) and one from Psychology (Group B). The third elective course may also come from Group A or Group B, or may be selected from other neuroscience-related courses upon approval of the advisory committee. Topics in Neuroscience (Neuroscience 401) is designed to provide an integrative culminating experience. Students take this course in the senior year.

**Required Courses**

- BIOL 101 The Cell
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- NSCI 401 Topics in Neuroscience
- PSYC 101 Introductory Psychology

Students can ask the Neuroscience Program Chair whether courses not listed here might count as electives.

**Elective Courses**

Three elective courses are required. At least one elective must be from Group A and at least one elective must be from Group B. The third elective may come from either Group A or Group B or the student may wish to petition the advisory committee to substitute a related course.

**Group A**

- BIOL 204/ NSCI 304 Animal Behavior
- BIOL 310/NSCI 310 Neural Development and Plasticity
- BIOL 311/NSCI 311 Neural Systems and Circuits
- BIOL 407/NSCI 347 Neurobiology of Emotion
- BIOL 412/NSCI 342 Neural and Hormonal Basis of Hunger

**Group B**

- PSYC 314/NSCI 314 Drug Addiction and Obesity: Tales of a Disordered Brain
THE DEGREE WITH HONORS IN NEUROSCIENCE

The degree with honors in Neuroscience provides students with the opportunity to undertake an original research project under the supervision of one or more of the Neuroscience faculty. In addition to completing the requirements of the Neuroscience Program, candidates for an honors degree must enroll in Neuroscience 493-W31-494 and write a thesis based on an original research project. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Students interested in pursuing a degree with honors should contact the Neuroscience Advisory Committee at the beginning of the spring semester of their junior year.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. Securing syllabi is often difficult, so a discussion with the program Chair is certainly necessary.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. Exams or other written work will be considered. Written work may be requested if the course description suggests that it is only tangentially related to the field of neuroscience. Written work would, therefore, need to demonstrate that there was sufficient emphasis on neuroscience material.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Generally there is a maximum of 2 credits that can be completed through a study abroad program.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. NSCI 201 and NSCI 401 can not generally be completed abroad. NSCI should be taken during the sophomore year if possible and includes a laboratory component that is rarely comparable in study abroad courses.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Some students (rarely) have failed to discuss the course in advance of their study abroad experiences. They may also have assumed that approval of a course by another department (e.g., Biology or Psychology) would necessarily mean that they would receive Neuroscience credit for the course. This is not necessarily the case.

NSCI 10 (W) The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will
be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in collaborative research projects that will develop their use of the medical model to evaluate primary neuroscience research studies for validity. They will develop their own evaluation systems for identifying how valid research interventions and expanded opportunities for successful learning. Students will lead class discussions based on their reading of primary research. Small groups of 2-3 students will be assigned different articles on the same topic and spend time in class. Adjunct Instructor Bio: Dr. Judy Willis ’71 combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to develop her focus in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles, as well as giving invited presentations internationally, applying neuroscience research to potential interventions to facilitate successful learning. She has been on the adjunct faculty of the University of California Graduate School of Education, Santa Barbara.

NSCI 31 (W) Senior Thesis: Neuroscience
To be taken by students registered for Neuroscience 493-494.
Class Format: thesis
Distributions: (D3)

Winter 2019
HON Section: 01 TBA Noah J. Sandstrom

NSCI 99 (W) Independent Study: Neuroscience
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Distributions: (D3)

Winter 2019
IND Section: 01 TBA Noah J. Sandstrom

NSCI 201 (F) Neuroscience
Crosslistings: PSYC212 / BIOL212 / NSCI201
Primary Crosslisting
A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.
Class Format: lecture, three hours a week; laboratory, every other week
Requirements/Evaluation: evaluation will be based on a lab practical, lab reports, two hour exams and a final exam
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor
Enrollment Limit: 72
Enrollment Preferences: sophomores and Biology and Psychology majors
Expected Class Size: 72
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Attributes: COGS Interdepartmental Electives; NSCI Required Courses; PSYC 200-level Courses

Fall 2018
LEC Section: 01    TR 9:55 am - 11:10 am    Heather Williams, Matthew M. Clasen
LAB Section: 02    M 1:00 pm - 4:00 pm    Martha J. Marvin
LAB Section: 03    T 1:00 pm - 4:00 pm    Martha J. Marvin
LAB Section: 04    W 1:00 pm - 4:00 pm    Martha J. Marvin

NSCI 204 (S) Animal Behavior
Crosslistings: NSCI204 / BIOL204

Secondary Crosslisting
Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on examinations, lab reports, and a research paper
Extra Info: not available for the fifth course option
Prerequisites: BIOL 102, or PSYC 101, or permission of instructor
Enrollment Limit: 32
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 32
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3)
Attributes: COGS Interdepartmental Electives; NSCI Group A Electives

Spring 2019
LEC Section: 01    TR 8:30 am - 9:45 am    Manuel A. Morales
LAB Section: 02    T 1:00 pm - 4:00 pm    Manuel A. Morales
LAB Section: 03    W 1:00 pm - 4:00 pm    Manuel A. Morales

NSCI 310 (F) Neural Development and Plasticity
Development can be seen as a tradeoff between genetically-determined processes and environmental stimuli. The tension between these two inputs is particularly apparent in the developing nervous system, where many events must be predetermined, and where plasticity, or altered outcomes in response to environmental conditions, is also essential. Plasticity is reduced as development and differentiation proceed, and the potential for regeneration after injury or disease in adults is limited; however some exceptions to this rule exist, and recent data suggest that the nervous system is not hard-wired as previously thought. In this course we will discuss the mechanisms governing nervous system development, from relatively simple nervous systems such as that of the fruitfly, to the more complicated nervous systems of humans, examining the roles played by genetically specified programs and non-genetic influences.

Class Format: lecture

Requirements/Evaluation: exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) and BIOL 202 (or permission of instructor)

Enrollment Limit: 24

Enrollment Preferences: Biology majors; Neuroscience concentrators; Psych majors

Expected Class Size: 24

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives; NSCI Group A Electives

Not offered current academic year

**NSCI 311 (F) Neural Systems and Circuits**

Crosslistings: NSCI311 / BIOL311

Secondary Crosslisting

This course will examine the functional organization of the vertebrate brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections analyze sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the brain regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Class Format: lecture/lab, six hours per week

Requirements/Evaluation: class participation, laboratory notebooks and posters, hour exams and a final exam

Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 24

Department Notes: does not satisfy the distribution requirement in Biology

Distributions: (D3)

Attributes: NSCI Group A Electives

Fall 2018

LEC Section: 01    MWF 9:00 am - 9:50 am     Matt E. Carter
LAB Section: 02    M 1:00 pm - 4:00 pm     Matt E. Carter
LAB Section: 03    T 1:00 pm - 4:00 pm     Matt E. Carter
Drug addiction and obesity are two of the biggest health problems facing our world today. Although obesity and drug addiction are two qualitatively different disorders, recent literature suggests that they share similar neural substrates. The first third of this class will discuss the behavioral and neural underpinnings of drug addiction, the second third of this class will discuss the behavioral and neural underpinnings of obesity, and the last third of the class will discuss their interaction in many different facets. In so doing, students will learn about the animal models used to study drug addiction and obesity (i.e., intravenous self-administration, intracranial self-stimulation, conditioned place preference, conditioned taste avoidance, and locomotor sensitization) and the neurobiological techniques used to understand their underlying mechanisms (i.e., DREADDs, optogenetics, and immunohistochemistry). Utilizing these tools, students will design and conduct an empirical laboratory experiment to study these dysregulated behaviors.

Class Format: seminar
Requirements/Evaluation: presentations and participation in discussions; written assignments; weekly lab meetings will be held and empirical projects presented in a final poster session
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 16
Distributions: (D3)
Distribution Notes: meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course

In all animals, hormones are essential for the coordination of basic functions such as development and reproduction. This course studies the dynamic relationship between hormones and behavior. We will review the mechanisms by which hormones act in the nervous system. We will also investigate the complex interactions between hormones and behavior. Specific topics to be examined include: sexual differentiation; reproductive and parental behaviors; stress; aggression; and learning and memory. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

Class Format: empirical lab course
Requirements/Evaluation: presentations and participation in discussions, short papers, midterm, written and oral presentation of the research project
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 16
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course
Fall 2018
LEC Section: 01   MWF 8:30 am - 9:45 am   Noah J. Sandstrom
LAB Section: 02   T 1:00 pm - 4:00 pm   Noah J. Sandstrom

NSCI 317 (S)  Nature via Nurture: Topics in Developmental Psychobiology
Crosslistings: PSYC317 / NSCI317

Secondary Crosslisting

Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

Class Format: tutorial

Requirements/Evaluation: each week, students will either present an oral argument based on a 5-page position paper or respond to their partners' paper; Weekly lab meetings will be held and empirical projects presented in a final poster session

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 10

Enrollment Preferences: Neuroscience concentrators and Psychology majors

Expected Class Size: 10

Distributions: (D3)

Distribution Notes: meets Division 3 requirement if registration is under PSYC

Attributes: NSCI Group B Electives; PHLH Biomedical Determinants of Health; PHLH Reproductive, Maternal and Child Health; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course; SCST Related Courses

Spring 2019
TUT Section: T1   TBA   Betty Zimmerberg
LAB Section: T2   R 1:00 pm - 4:00 pm   Betty Zimmerberg

NSCI 318 (S)  Image, Imaging, and Imagining: The Brain and Visual Arts
Crosslistings: NSCI318 / INTR223 / PSYC318

Secondary Crosslisting

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist's motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how "outsider" artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

Class Format: seminar and empirical lab course

Requirements/Evaluation: evaluation will be based on a midterm, participation in class discussions, and a poster presentation of the empirical project

Extra Info: satisfies one semester of Division III requirement

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 101, an ARTH or ARTS course, or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Studio Art majors; Psychology majors and Neuroscience concentrators

Expected Class Size: 12

Distributions: (D3)

Distribution Notes: meets Division 3 requirement if registration is under PSYC or INTR

Attributes: FMST Related Courses; NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course

Not offered current academic year

NSCI 319 (S) Neuroethics (WI)

Crosslistings: PSYC319 / NSCI319

Secondary Crosslisting

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on five 5-page position papers and five short response papers as well as participation in discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI

Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience;

Not offered current academic year

NSCI 342 (S) Neural and Hormonal Basis of Hunger

Crosslistings: NSCI342 / BIOL412

Secondary Crosslisting

Hunger and satiety are highly regulated behavioral states that maintain energy homeostasis in animals. This course will focus on readings from the primary literature to track numerous recent advances in how the brain and endocrine systems regulate appetite. Topics include how organ systems communicate with the brain to regulate appetite, how different populations of neurons in the brain interact to regulate appetite, how brain systems that regulate appetite affect other behaviors, and how the neural and hormonal basis of hunger compare with brain systems that regulate other homeostatic systems such as thirst. By tracing the advances in appetite regulation within the past decade, we will also trace the advent of cutting-edge molecular, genetic, and optical-based tools that are transforming multiple fields within physiology and neuroscience. Students in this class will have the opportunity to improve skills in written and oral scientific presentation.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on written assignments, oral presentations, and participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 205 or BIOL/PSYC 212, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors who have not taken a 400-level course
Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: NSCI Group A Electives

Not offered current academic year

**NSCI 347 (S) Neurobiology of Emotion**

Crosslistings: NSCI347 / BIOL407

**Secondary Crosslisting**

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by experience, memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, IMRI imaging, knockout mouse studies, as well as new opti-genetic methods for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing and mood disorders.

**Class Format:** discussion, three hours per week

**Requirements/Evaluation:** evaluation will be based on class participation and several short papers

**Prerequisites:** BIOL 202 and 212; open to juniors and seniors

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

Expected Class Size: 12

Department Notes: does not satisfy the distribution requirement in the Biology major

**NSCI 401 (F) Topics in Neuroscience**

Neuroscientists explore issues inherent in the study of brain and behavior. The overall objective of this seminar is to create a culminating senior experience in which previous course work in specific areas in the Neuroscience Program can be brought to bear in a synthetic, interdisciplinary approach to understanding complex problems. The specific goals for students in this seminar are to evaluate original research and critically examine
the experimental evidence for theoretical issues in the discipline. Topics and instructional formats will vary somewhat from year to year, but in all cases the course will emphasize an integrative approach in which students will be asked to consider topics from a range of perspectives including molecular, cellular, systems, behavioral and clinical neuroscience. Previous topics have included autism, depression, stress, neurogenesis, novel neuromodulators, language, retrograde messengers, synaptic plasticity, and learning and memory.

**Class Format:** seminar and tutorial meetings

**Requirements/Evaluation:** evaluation will be based on presentations, short papers, and a term paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** open only to seniors in the Neuroscience program

**Enrollment Limit:** 18

**Expected Class Size:** 14

**Department Notes:** required of all senior students in the Neuroscience program

**Distributions:** (D3)

**Attributes:** NSCI Required Courses

To engage in philosophy is to ask a variety of questions about the world and our place in it. What can we know? What should we do? What may we hope? What makes human beings human? These questions, in various forms, and others like them are not inventions of philosophers; on the contrary, they occur to most people simply as they live their lives. Philosophers, however, seek to keep such questions open, and to address them through reasoned discussion and argument, instead of accepting answers to them based on opinion or prejudice. The program in philosophy is designed to aid students in thinking about these issues, by acquainting them with influential work in the field, past and present, and by training them to grapple with these issues themselves. The program emphasizes training in clear, critical thinking and in effective writing. Philosophy courses center around class discussions and the writing of interpretive and critical essays.

MAJOR

Philosophy is a discipline with a long and intricate history, a history that remains an integral part of the discipline. In this way it differs dramatically from the natural sciences: for example, although no contemporary physicists or biologists embrace Aristotle’s physics or biology, among philosophers there continue to be champions of Aristotle’s metaphysics and of his ethics. Because of the richness and continuing importance of the history of philosophy, the program is designed to give majors a historical background that will acquaint them with a wide variety of approaches to philosophical issues and provide a basis for evaluating and contributing to contemporary debates.

The Philosophy major consists of nine semester courses: three required courses and six electives. The required courses are: any 100-level philosophy course, Philosophy 201 (History of Ancient Greek Philosophy) or Philosophy 202 (History of Modern Philosophy), and Philosophy 401 (Senior Seminar). The six electives are structured by a distribution requirement. Students must take at least one course in each of three areas: Contemporary Metaphysics and Epistemology [M&E], Contemporary Value Theory [V], and History [H]. These requirements apply to majors in the Class of 2018 and after.

Courses taught in other departments at Williams or at other institutions will not count toward the distribution requirement (Williams-Exeter tutorials may count, however, with the approval of the Department Chair). Up to two cross-listed courses taught in other departments may count as electives toward the major. No more than one 100-level course may count toward the major (and one 100-level course is required for the major—no exceptions).

We recommend the following trajectory through the major:

By the end of the first year, take a 100-level philosophy course (this is typically the first step in the major) and one other philosophy course.

By the end of the second year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least one other philosophy course. (If you will be away for the whole of your junior year, you should complete at least five courses by the end of the second year, preferably six.)

By the end of the junior year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least four other philosophy courses.

Other recommendations: take at least one tutorial; distribute your six electives evenly across the three distribution baskets; take a logic course; and take both PHIL 201 and PHIL 202.

The Degree with Honors in Philosophy

The degree with honors in Philosophy is awarded to the student who has demonstrated outstanding achievement in a program of study that extends beyond the requirements of the major. The extension beyond major requirements may take the form either of independent work culminating in a senior essay or thesis (the independent-study route) or of additional course work (the directed-study route). Candidates must have GPAs of 3.6 or higher in their courses in philosophy at the end of the junior and senior years. The independent-study route to honors requires the completion and defense of either a senior essay produced in the fall semester plus winter study period (maximum 40 pages) or a year-long senior thesis (maximum 75 pages). Plans for either essay or thesis (including a brief proposal and bibliography, worked out in consultation with an advisor) must be submitted to the department in mid-March (before spring break) of the junior year. The directed-study route to honors requires the completion of two courses in philosophy in addition to the nine required for the major. Candidates taking this route must also submit to the department revised copies of two term papers (15 pages or longer) written for philosophy courses they have taken. Students should register for a directed study over their senior year winter study and work with an advisor on the paper revisions. A recommendation for graduation with honors will be made on the basis of the thoroughness,
independence, and originality of the student's work.

STUDY AWAY

The Williams-Exeter Programme at Oxford (WEPO): the first full Oxford philosophy tutorial will count as the equivalent of two full-semester philosophy courses at Williams; the second full Oxford philosophy tutorial will count as the equivalent of one full-semester philosophy course at Williams, for a total of three Williams philosophy courses. Courses must be pre-approved by the Chair of the Philosophy Department, who will also determine which, if any, courses will count toward the philosophy major distribution requirements.

Courses taken in other Study Away programs: Students may petition the Philosophy Department for credit for philosophy courses taken at their Study Away institution. They should consult with the department Chair before they commit to a program. Final determinations will be made on the basis of the course syllabus and the quality of the student’s written work for the course. Typically, courses taken while studying away will not fulfill distribution requirements for the philosophy major at Williams.

PHILOSOPHY RELATED COURSES

The following courses offered in other departments, while not cross-listed with Philosophy, may be of interest to philosophy students:

- ENGL 445 World’s End: Literary Ecologies of the Limit (Christopher Pye, Fall 2018)
- ENGL 456 Hegel and the Dialectic (Christian Thorne, Fall 2018)
- HIST 301 Other People’s History (Alexander Bevilacqua Spring 2019)
- PSCI 273, Politics without Humans? (Laura Ephraim, Fall 2018)
- PSCI 203, Intro to Political Theory (Nimu Njoya, Fall 2018)
- PSCI 235, Environmental Political Theory (Laura Ephraim, Spring 2019)
- REL/SCST 301 Social Construction (Jason Josephson Storm, Fall 2018)
- REL 238 Faith and Rationality in Islam (Zaid Adhami, Fall 2018)
- REL 244 Mind and Persons in Indian Thought (Georges Dreyfus, Spring 2019)
- RUS 222/COMP 270 Russian Literature and European Existentialism (Vladimir Ivantsov, Spring 2019)

PHIL 11 (W) Spinoza’s Ethics

Spinoza’s Ethics aims to prove that human happiness consists in our rationally perceiving that God is all there is, and that all there is—including you and I—is God. Yet the Christian Church immediately deemed the Ethics “a book which, perhaps since the beginning of the world until the present day, surpasses all others in godlessness and endeavors to do away with religion and set godlessness on the throne.” Spinoza’s own Jewish community issued a writ of herem, excommunicating him for “monstrous deeds” and “abominable heresies.” In our Winter Study we will closely read Spinoza’s Ethics together, in order to understand how its doctrine that God is everything could be so profoundly godless. Our goal will be to view the universe from the standpoint of eternity. This may involve some monstrous deeds and abominable heresies of our own.

Class Format: afternoons
Requirements/Evaluation: journal
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: preference to Philosophy majors
Materials/Lab Fee: cost of books

Winter 2019
LEC Section: 01    TBA    Justin B. Shaddock

PHIL 12 (W) Bioethics According to The Simpsons

Active Euthanasia? Okely Dokely! Human cloning? Don't have a cow, man! Over the past twenty years The Simpsons has included a healthy dose of
stinging and sometimes surprisingly illuminating critique of numerous bioethical issues. In this winter study course we will use clips and episodes from the classic animated series as a launch pad for investigating the deeper philosophical concepts and ethical questions involved in a variety of bioethical topics. Good comedy has a way of driving straight to the core of contested issues and painful circumstances, providing a point of entry for students in the class to more serious, academic material. Along the way, the course will also investigate what makes The Simpsons's treatment of these bioethical issues "funny"—how its satire plays on common misunderstandings, contradictions and inconsistencies in social policy and individual decisions, and how serious issues drive the comedic effect. During the first portion of the course, the instructor will present selections from The Simpsons that take up several core bioethical issues, paired with related readings from the bioethics literature. In the second portion of the course, the students themselves will identify and present clips pertaining to bioethical issues. The final project for the course will be collaborative in nature: small groups of students will be asked to develop and pitch (to the other class members) a storyline for a Simpsons episode (or portion thereof) that centers on a bioethical topic. Classes will meet two or three afternoons each week, and students will be expected to read a substantial amount of philosophical material in preparation for these meetings. In addition, students will need to spend significant amounts of time outside of class viewing videos and developing their final projects. Evaluation will be based on class participation, one in-class presentation, and the final collaborative project.

Class Format: afternoons

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to students who indicate intellectual seriousness about philosophical bioethics

Winter 2019

LEC Section: 01    TBA     Julie A. Pedroni

PHIL 13 (W) Boxing

Boxing is one of the world's oldest sports, and there are 3000 year old artistic representations of boxing from ancient Egypt. The history of boxing in the United States during the nineteenth and twentieth centuries reflects the history of the nation. Issues of class, ethnicity, race, and gender have played a central role in the sport. Stories about boxing also play a central role in the popular culture. In this course we will look at some treatments of boxing by social historians, examine some depictions of boxing in documentary and dramatic films, and watch some classic fights. We will also learn some of the fundamental skills involved in boxing. Training as a boxer will give men and women a better appreciation of the physical demands involved. Four days a week we will engage in an intensive training regimen working on basic punching technique, footwork, defense and conditioning. The workouts will involve minimal contact, but will be physically demanding. Students will need to purchase boxing gloves, handwraps, and a jump rope.

Requirements/Evaluation: evaluation will be based on attendance, participation, and a 10-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: $150

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Keith E. McPartland

PHIL 14 (W) Yoga and a Grounded Life

"Yoga and a Grounded Life" will examine what the practice of yoga is, and how it can serve as a foundation, guide, and inspiration for living, particularly in the face of personal or societal challenges. Alongside the physical practice of yoga, the class will investigate the philosophical and ethical teachings of yoga's ancient text, the Yoga Sutras of Patañjali. Students will learn a number of basic yoga poses and breathing techniques in 1.75-hour classes that will meet 5 days a week. In addition, students will read and discuss portions of the Yoga Sutras and several different commentaries, such as those of BKS Iyengar and Chip Hartranft. Attendance at all classes is required. Missed classes must be made up before the end of Winter Study, usually by attending a regular class at Tasha Yoga. Students will be expected to practice on their own outside of class, to journal, and to participate in class discussions of the readings. Students will submit weekly written assignments in response to prompts relating to class
material. Adjunct Instructor Bio: Yoga teacher Anne O'Connor is certified in the Iyengar yoga method, which she has been practicing for 20 years. O'Connor, a freelance editor, also serves on the Williamstown Select Board and is a member of the First Congregational Church of Williamstown.

Class Format: mornings

Requirements/Evaluation: four 1- to 2-page papers and class attendance and participation

Prerequisites: no previous yoga experience required

Enrollment Limit: 14

Enrollment Preferences: instructor's discretion; interviews with enrollees

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

PHIL 15 (W) Plato's Symposium and Its Afterlife

Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting

Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

Class Format: mornings

Requirements/Evaluation: 5-page paper and an in-class presentation of independent research

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: preference given to majors or intending majors in Classics, Comparative Literature, WGSS, or Philosophy

Materials/Lab Fee: cost of books

Winter 2019

LEC Section: 01 TBA Amanda R. Wilcox

PHIL 25 (W) Eye Care and Culture in the Atlantic Coast Regions of Nicaragua

We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students-in conjunction with optometrists who volunteer their time for the trip-will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip.

Class Format: travel

Requirements/Evaluation: performance in eye clinics, journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: application essays

Materials/Lab Fee: $3,700

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

PHIL 104 (S) Philosophy and Tragedy (WI)
Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born--but the next best thing is to die soon (Aristotle's Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus)." Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the Oresteia and Prometheus Bound by Aeschylus, Sophocles' Theban Cycle, and the Hippolytus, Bacchae and Philoctetes by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotel's Poetics and will continue with Hume's Of Tragedy, Hegel's various writings on tragedy, and Nietzsche's The Birth of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.
Class Format: tutorial
Requirements/Evaluation: 5 papers, 5 responses and a final paper in multiple drafts; each week one student will write a paper responding to the week's readings and the other student will write a response to that paper
PHIL 109 (F)  Skepticism and Relativism  (WI)

Intellectually, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

Class Format: tutorial
Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; this tutorial is an appropriate first course in PHIL
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 10
Distributions: (D2) (WI)
Not offered current academic year

PHIL 114 (F)  Freedom and Society  (WI)

Freedom is one of our fundamental values as Americans. It is emphasized in our founding documents, and it occupies a central place in our contemporary political discourse. But do we ask: What is freedom? and Why do we value it? In the first unit of this course, we will consider the relationship between freedom and social order. Do society's laws limit our freedom in order to make us safe? Or do laws somehow enhance or enable our freedom? We will read Thomas Hobbes, John Locke, and Jean-Jacques Rousseau in seeking answers to these questions. We will then turn to some specific social forms in the second unit. We will ask whether they promote or preclude our freedom. We will read Adam Smith and Karl Marx on capitalism, and Simone de Beauvoir on gender.

Class Format: seminar
Requirements/Evaluation: weekly reading response papers; take-home midterm and final exams
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores
Expected Class Size: 19
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
PHIL 115 (S) Personal Identity  (WI)
Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy: metaphysics, epistemology, moral and political philosophy, and of course in the philosophy of mind. Conceptions of person are equally important for scientific research programs (especially in psychology), for Law, and for the arts (especially mimetic arts). Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? What makes me the particular person that I am, and how is my identity as this individual person preserved over time? While addressing these questions through lectures and class discussions, the course will place special emphasis on developing students’ intellectual skills in the following domains: close, analytical reading; recognizing, reconstructing and evaluating claims and reasons that support them; producing original ideas and arguments, orally and in writing; responding to the claims and arguments presented in texts and in class; writing clear, polished, well-argued papers.

Class Format: lecture/discussion
Requirements/Evaluation: class attendance, preparedness and participation; small group weekly meetings; weekly short writing assignments
Prerequisites: none; open to first year students
Enrollment Limit: 19
Enrollment Preferences: freshmen, sophomores, and philosophy majors who need a 100 level course to satisfy requirement for the major
Expected Class Size: 19
Department Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WI)
Not offered current academic year

PHIL 116 (S) Perception and Reality  (WI)
This course is an introduction to philosophy through four major themes: The nature of the universe, the existence of gods, thought itself, and the mind/body problem. Throughout, we will appeal to reason and evidence in forming our best beliefs. Our discussions will range over historical and contemporary works in the Western Tradition.

Class Format: seminar
Requirements/Evaluation: active participation; four (5-6 page) essays
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores; there is no need to email the professor in advance to indicate interest in the course
Expected Class Size: 19
Department Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WI)
"Faith is a fine invention," according to Emily Dickinson's poem, "when gentlemen can see; but microscopes are prudent in an emergency." This introduction to philosophy will see how far the microscopes of reason and logic can carry us in traditional arguments about the existence and nature of God. We will closely analyze classical arguments by Augustine, Avicenna, Aquinas, Anselm, Maimonides, Descartes, and others. Pascal's wager is a different approach: it argues that even though proof of the existence of God is unavailable, you will maximize your expected utility by believing. We will examine the wager in its original home of Pascal's Pensees, and look at William James' related article, "The Will to Believe". The millennia old problem of whether human suffering is compatible with God's perfection is called "the problem of evil". We will examine this issue in Hume's Dialogues Concerning Natural Religion, classic sources and contemporary articles. Students should be aware that, in the classic tradition, this class resembles a logic course.

**Class Format:** seminar  
**Requirements/Evaluation:** frequent short papers  
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** first-years and sophomores  
**Expected Class Size:** 19  
**Department Notes:** meets 100-level PHIL major requirement  
**Distributions:** (D2) (WI)  
**Not offered current academic year**

This course addresses a central question in practical philosophy: How should we live? The question has two parts: What is the best life for individuals? And what social and political arrangements make such a life possible? In attempting to answer these questions we also engage related theoretical questions concerning what is real and how we have access to it. We begin with readings from Plato's *Republic*--a seminal work in the history of philosophy that illustrates the inseparability of theoretical and practical questions and has exerted a powerful influence on nearly every subsequent attempt to answer these questions in the context of the Western philosophical tradition. While reading the *Republic*, we also consider some of the best of these attempts in the Western philosophical canon ("footnotes on Plato" by Aristotle, Hobbes, Kant, Mill, Nietzsche, and others) and the challenges they present to Plato's conclusions.

**Class Format:** seminar  
**Requirements/Evaluation:** attendance,frequent short papers totaling about 30 pages, class participation  
**Extra Info:** not available for the fifth course option  
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** first-year students, prospective and actual majors  
**Expected Class Size:** 19  
**Department Notes:** meets 100-level PHIL major requirement  
**Distributions:** (D2) (WI)  
**Distribution Notes:** WI: This writing intensive course involves writing multiple two page papers that involve identifying arguments or explication of text and critical responses. You will be given regular feedback on short papers in preparation for writing two longer 4 page essays that require you to use the same skills in a more expanded argument.  
**Attributes:** LEAD Ethical Issues of Leadership; LGST Interdepartmental Electives;
PHIL 121 (F)  Truth, Goodness, and Beauty  (WI)
In our everyday lives, we routinely assume that our clocks can tell us the truth about what time it is, that committing murder is wrong, and that there are people, landscapes, and works of art that are beautiful. But we are also aware that people can and often do disagree about what is true, what is good or right, and what is beautiful. Should the fact of such disagreement lead us to conclude that truth, goodness, and beauty are in some basic sense relative to human beings, perhaps as individuals, perhaps as members of societies or cultures? Some philosophers defend such conclusions, but others argue that truth, goodness, and beauty are "objective," in some important sense, despite the fact that people disagree about them. This introductory course addresses these and related issues.

Class Format: seminar
Requirements/Evaluation: attendance, frequent short papers totaling about 30 pages, class participation

SEM Section: 01 MWF 12:00 pm - 12:50 pm Alan White

PHIL 122 (F)  Philosophical Approaches to Contemporary Moral Issues  (WI)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, the ethics of protest, and torture and terrorism. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Class Format: tutorial
Requirements/Evaluation: bi-weekly tutorial papers, oral commentaries, and tutorial discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; this course is suitable for first-year students
Enrollment Limit: 10
Enrollment Preferences: prospective Philosophy majors and those committed to the tutorial
Expected Class Size: 10

Fall 2018
TUT Section: T1 TBAThursday Org Mtg 8:30 pm - 9:00 pm Julie A. Pedroni

PHIL 123 (S)  Objectivity in Ethics  (WI)
Is morality simply a matter of opinion? In this course we'll examine several influential attempts to provide a rational foundation for morality, along with Nietzsche's wholesale rejection of these efforts. Readings will include work by Plato, Hobbes, Kant, Mill, Nietzsche, and contemporary authors.

Class Format: seminar
PHIL 126 (S)  Paradoxes  (WI)
There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand--I don't know what she wants with all this sand, but I'm starting to worry about that girl--there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong? What we have here is an example of the sorites paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise exam paradox, paradoxes of material constitution, Newcomb's Problem, and the Prisoner's Dilemma.

Class Format: seminar
Requirements/Evaluation: several short writing assignments and a longer final paper

Department Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WI)

PHIL 128 (S)  Utopias and Dystopias  (WI)
The touchstone of our course will be Plato's Republic: the first and perhaps greatest Utopia as well as perhaps the greatest work in political philosophy. We will prepare for the Republic by reading two Socratic dialogues: the Euthyphro and the Meno. After several weeks on the Republic we will turn to Shakespeare's last play: The Tempest. From there it is a natural transition to Aldous Huxley's Brave New World. We will continue with B. F. Skinner's Walden Two, and finish by comparing the dystopias of the first book and first film of The Hunger Games.

Class Format: seminar
Requirements/Evaluation: several short papers totaling at least twenty pages

PHIL 201 (F) History of Ancient Greek Philosophy

Crosslistings: PHIL201 / CLAS203

Primary Crosslisting

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that some people are natural slaves. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. We will then read some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, possibly supplemented by one or more exams

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 20-40

Department Notes: philosophy majors must take either Phil 201 or Phil 202 (and can take both)

Distributions: (D2)

LEC Section: 01 TF 1:10 pm - 2:25 pm Justin B. Shaddock
PHIL 203 (S) Logic and Language (QFR)

Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** a midterm, a final, frequent homework and problem sets

**Prerequisites:** none

**Enrollment Limit:** none

PHIL 207 (S) Contemporary Philosophy of Mind (WI)

The philosophy of mind has been one of the liveliest and most active areas of philosophical inquiry over the last century, and it has taken a place at the center of the field. Part of the explanation for this is the rise of compelling scientific accounts of who and what we are. The question of whether the mind can be fully understood within a physicalist, materialist framework has taken on an exciting urgency. In this course we will investigate the mind/body problem, mental representation, the conceptual and nonconceptual content of mental states, and the nature of consciousness. Throughout we will attend to the relevant empirical literature.

**Class Format:** seminar

**Requirements/Evaluation:** weekly two page papers on focused topics and two 8- to 10-page papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** at least one prior 100- or 200-level PHIL course

**Enrollment Limit:** 19

**Enrollment Preferences:** prospective Philosophy majors and Cognitive Science concentrators
PHIL 209 (S) Philosophy of Science
Crosslistings: SCST209 / PHIL209

Primary Crosslisting
It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, scientific choice, change, and the idea that scientific knowledge is progressive. The course will begin with the "received view" of science, advanced by logical empiricists, which assumes the objectivity and the rationality of science. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality their works provoked. This discussion will naturally lead us to the relativist and social-constructivist views developed within contemporary science studies. Finally, we will analyze the current debate about cognitive credentials of science and proper approach to the study of science, which came to be known as "the science wars."

Class Format: seminar with a short lecture component in each class

Requirements/Evaluation: class attendance, preparedness and participation; three short assignments; three 5 pages long papers, the last of which will be the final paper, due a week after the end of classes

Extra Info: may not be taken on a pass/fail basis

Prerequisites: one PHIL course, or declared major in a natural science, or permission of instructor

PHIL 212 (S) Ethics and Reproductive Technologies (WI)
Crosslistings: WGSS212 / SCST212 / PHIL212

Primary Crosslisting
In her groundbreaking book, *The Tentative Pregnancy*, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19
Enrollment Preferences: WGSS and PHIL majors or prospective majors
Expected Class Size: 19
Department Notes: meets Contemporary Value Theory requirement only if registration is under PHIL
Distributions: (D2) (WI)

Spring 2019
LEC Section: 01 TF 2:35 pm - 3:50 pm Julie A. Pedroni

PHIL 213 (S) Biomedical Ethics (WI)
Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," therapy vs. research, and enhancement vs. therapy. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Class Format: tutorial; students will meet with the professor in pairs for approximately 75 minutes per week, writing and presenting 5- to 7-page essays every other week, and commenting orally on partners' essays in alternate weeks
Requirements/Evaluation: evaluation will be based on bi-weekly papers, oral commentaries, and tutorial discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Philosophy majors and students committed to taking the tutorial

Not offered current academic year

PHIL 216 (S) Philosophy of Animals (WI)
Crosslistings: ENVI216 / PHIL216
Primary Crosslisting
Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: seminar
Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate
interest in the course

**Expected Class Size**: 19

**Department Notes**: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

**Distributions**: (D2) (WI)

**Attributes**: COGS Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses;

*Not offered current academic year*

---

**PHIL 220 (F) Happiness**  *(WI)*

According to Aristotle the ultimate good is happiness—everything we desire we desire for the sake of happiness. Yet what is it to be happy? Should we value other things (say justice or passionate commitment and curiosity) over happiness? Are happiness and pleasure the same thing? Is happiness an emotional or mental state or is it a social construct? What do the social and psychological sciences have to teach us about happiness? Philosophy? Is the happy life a life of virtue? Does being virtuous guarantee happiness? How important are honor, money, love, work, friendship and our connections to others to our happiness? In this tutorial we will read from Ancient, modern and contemporary philosophical sources as well several relevant studies in the social sciences and positive psychology movement in order to engage questions concerning happiness.

**Class Format**: tutorial

**Requirements/Evaluation**: five 5-page papers and five 2-page papers

**Extra Info**: may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites**: none

**Enrollment Limit**: 10

**Enrollment Preferences**: students interested in philosophy and/or happiness

---

**PHIL 222 (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science**

**Crosslistings**: PHIL222 / COGS222 / PSYC222

**Secondary Crosslisting**

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

**Class Format**: lecture/discussion

**Requirements/Evaluation**: midterm and final exams, and self-paced weekly exercises

**Extra Info**: not available for the fifth course option

**Prerequisites**: PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended

**Enrollment Limit**: 25

**Enrollment Preferences**: first-year and sophomore students

---

**PHIL 222 (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science**

**Distributions**: (D2)
PHIL 223 (S)  Philosophy of Sport

Sports: many of us (at Williams, in the US, throughout most of the world) play them, yet more of us watch them, and we invest not only our time but enormous amounts of money in them (we build sports arenas, not cathedrals; in 2013, in 40 of the 50 United States, the highest-paid public official was a football or basketball coach). Why do sports matter so much to us? Should they? The topics we consider in responding thoughtfully to these questions will include sports and health, sports and education, ethical issues in sports (including issues of class, gender, and race), and sports and beauty.

Class Format: lecture/discussion
Requirements/Evaluation: short writing assignments for most classes
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniors, then juniors, then sophomores
Expected Class Size: 30
Distributions: (D2)

PHIL 225 (S)  Existentialism

We will study the philosophical and literary works of Soren Kierkegaard, Friedrich Nietzsche, Martin Heidegger, Jean-Paul Sartre, and Simone de Beauvoir. What makes these thinkers "Existentialists"? It's not merely that they ask the question, "What gives meaning to a human life?" And, it's not merely that their answers invoke our freedom to determine our own identities. More than this, Existentialists emphasize the subjective relation we bear to our belief systems, moral codes, and personal identities. Existentialists investigate deeply irrational phenomena of human life, including anxiety, boredom, nausea, tragedy, despair, death, faith, love, hate, sadism, masochism, authenticity, guilt, and care. And, Existentialists express their thought in philosophical treatises as often as in literary texts. In this course we will attempt to understand these dimensions in which Existentialism is a distinctive intellectual tradition.

Class Format: seminar
Requirements/Evaluation: four mid-length papers
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: none
Expected Class Size: 20
Distributions: (D2)
Attributes: PHIL History Courses

PHIL 227 (F)  Death and Dying  (WI)

In this course we will examine traditional philosophical approaches to understanding death and related concepts, with a special focus on the ethical concerns surrounding death and care for the dying. We will begin with questions about how to define death, as well as reflections on its meaning and function in human life. We will move on to examine ethical issues of truth-telling with terminally ill patients and their families, decisions to withhold or withdraw life-sustaining treatments, the care of seriously ill newborns, physician-assisted suicide, euthanasia, and posthumous interests. In addition to key concepts of death, dying, and terminal illness, we will develop and refine notions of medical futility, paternalism and autonomy, particularly within the context of advance directives and surrogate decision making.

Class Format: lecture/discussion
Requirements/Evaluation: class attendance and participation, periodic short essays (3 or 4 total, 2-3 pages each), two mid-length papers (5-7 pages and 7-10 pages, respectively); possible experiential learning component
Prerequisites: none
PHIL 228 (F) Feminist Bioethics (WI)
Crosslistings: PHIL228 / WGSS228

Primary Crosslisting
In this course we'll explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we'll explore topics that might traditionally be considered "women's issues" in health care, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: lecture/discussion
Requirements/Evaluation: active participation in class discussions, two mid-length papers (5-7 and 7-10 pages, respectively), one oral presentation, and three or four periodic short writing assignments (2-3 pages each)
Prerequisites: none, although previous coursework in WGSS is desirable
Enrollment Limit: 19
Enrollment Preferences: Women's, Gender and Sexuality Studies and Philosophy majors

PHIL 231 (F) Ancient Political Thought
Crosslistings: PHIL231 / PSCI231

Secondary Crosslisting
The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: lecture/discussion
Requirements/Evaluation: three 7- to 8-page papers
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors
Expected Class Size: 18
Distributions: (D2)
PHIL 232 (F) Modern Political Thought (WI)
Crosslistings: PHIL232 / PSCI232

Secondary Crosslisting
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: lecture/discussion
Requirements/Evaluation: four formal papers of 5-7 pages; brief informal writing tasks inside and outside of class
Prerequisites: none; open to all
Enrollment Limit: 19
Enrollment Preferences: Political Science majors
Expected Class Size: 19
Distributions: (D2) (WI)
Attributes: PSCI Political Theory Courses;

PHIL 235 (S) Morality and Partiality: Loyalty, Friendship, Patriotism (WI)
The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people--such as friendships, familial ties, love, patriotism--seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

Class Format: tutorial; tutorial pairs will meet with the instructor for one hour a week
Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; open to first year students
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors and then sophomores
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: PHIL Contemporary Value Theory Courses;

Spring 2019
PHIL 236 (S)  Contemporary Ethical Theory  (WI)
This course will be an in-depth exploration of central questions in normative ethics, including the following: Which features of actions are morally important and why (e.g., their motive, their intrinsic nature, or their consequences)? When should we give morality priority over our personal commitments and relationships, and why? Are there universal moral principles that apply to all cultures? Are we capable of disinterested altruism, or are we motivated solely by self-interest? By which methods can we answer these questions? We will examine these and related issues by looking closely at two influential moral theories: consequentialism and deontology. While both have important historical roots -- consequentialism in Mill and Sidgwick, deontology in Kant -- we will focus on contemporary developments of these views. In the last few weeks, we'll examine contractualism, which outlines a different approach to these questions.

Class Format: seminar
Requirements/Evaluation: short response papers; an 8- to 10-page midterm paper; a 10- to 12-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: at least one PHIL course or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Philosophy majors
Expected Class Size: 10-15
Distributions: (D2) (WI)
Attributes: PHIL Contemporary Value Theory Courses;
Not offered current academic year

PHIL 240 (F)  The Autobiographical Philosophy of Education
Crosslistings: INTR240 / PHIL240
Primary Crosslisting
Why are you here? What do you expect to learn? How do you expect to learn? The College Mission Statement says that "Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character". How have you already been taught the academic and civic virtues? Where have you been taught them? In school? On the sports field? At home? How did you develop your character? This first-year seminar will examine the philosophy of education through educational autobiographies: works that tell the story of a moral and intellectual education. Each book was chosen by and will be introduced by a professor from a different department, and then Professor of Philosophy Steve Gerrard will continue the discussion. This year's autobiographies are: John Stuart Mill, Autobiography, Charles Dew, The making of a Racist, Michael Chabon,The Recipe for Life, Philip Roth, The Facts: A Novelist¿s Autobiography, bell hooks, Wounds of Passion, Paul Kalanithis, When Breath Becomes Air, Frederick Douglass, My Bondage and My Freedom, Zhuangze, Basic Writings. This course is part of the John Hyde Teaching Fellowship.

Class Format: seminar
Requirements/Evaluation: frequent short responses, including our own educational autobiographies that we will share
Extra Info: not available for the fifth course option
Prerequisites: open only to first-year students
Enrollment Limit: 12
Enrollment Preferences: Interested students should e-mail Professor Gerrard a very brief description of their educational background and interests in order to enroll. I will be seeking a balance of educational backgrounds and interests
Expected Class Size: 12
Distributions: (D2)

Fall 2018

PHIL 241 (F)  Contemporary Metaphysics  (WI)
In this course, we will examine a number of issues in contemporary metaphysics through a discussion of the nature of kinds. The problem of universals has vexed philosophers at least since the time of Plato. Oscar is a dog and Annie is a dog. Oscar and Annie aren't identical but they have something in common; each of them is a dog, each of them belongs to a single kind and they share the property of being a dog. But what is going on here? We, at least most of us, are happy to say that Oscar and Annie exist. But is there a third entity that we need to countenance: the universal caninity? If we do think that there is such a thing as caninity, what sort of thing is it? If we don't, what accounts for the truth of our judgment that Oscar and Annie have something in common? Scientists often give explanations for the behavior of objects in terms of their properties. What role do properties play in causation, explanation and laws of nature? Finally there are different kinds of kind. Some kinds or properties seem to be pretty natural, e.g. being an electron or a dog. Other kinds seem to be less natural and seem somehow to be socially constructed, e.g. being a work of art, an American or a sausage. But are there really natural kinds? Can we, as Plato put it, "carve nature at the joints", or are all kinds constructed rather than discovered? Furthermore what is involved in the social construction of a kind? Finally, the nature and existence of some kinds is a hotly contested political matter. How should we think about racial kinds or about gender kinds? While we will be concerned to place our discussions of these issues in historical context, most of the reading for the class will consist in articles written by contemporary philosophers.

Class Format: lecture and discussion

Requirements/Evaluation: one -10 page midterm paper and one -15 page final paper which will involve draft and revision, possible short response papers, and active participation in class

Prerequisites: one PHIL course; familiarity with formal logic helpful but not required; or permission of instructor

Enrollment Limit: 18

Expected Class Size: 10-15

PHIL 242 (F)  People Power  (WI)

A major lesson, for political philosophers, from the past century or so is that people outside of official political structures and the military often have greater power than do insiders, if only they can figure out how to use it. Evidence of this is that "between 1900 and 2006, nonviolent resistance campaigns were nearly twice as likely to achieve full or partial success as their violent counterparts" (Chenoweth and Stephan 2011, 7). Topics in the tutorial will be empirical--examining successful and unsuccessful cases of uses of people power in nonviolent resistance--theoretical--seeking generalizations, in part from historical and ongoing cases--and practical--considering how techniques and generalizations we encounter or discover might be used on issues of importance to participants in the seminar, on scales ranging from the local to the global.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, participation

PHIL 243 (S)  The Philosophy of Higher Education: College Controversies

What are the purposes of higher education? What are the purposes of liberal arts colleges in America? What should be the goals of Williams College? We will begin examining these questions by studying the history of controversies in American higher education, concentrating especially on debates about the curriculum. We will then turn to contemporary controversies such as campus free speech. This course is part of the John Hyde Teaching Fellowship.
PHIL 244 (S) Environmental Ethics (WI)

Crosslistings: PHIL244 / ENVI244

Secondary Crosslisting

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners’ essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

PHIL 248 (S) Free Speech and Its Enemies

The Williams College Mission statement says that “free inquiry requires open-mindedness, and commitment to community draws on concern for others”. The question of this course is whether these values are in conflict. Does free inquiry clash with concern for others, or do they (or can they) work together? We will begin with John Stuart Mill’s powerful defense of free speech in On Liberty, but will then investigate challenges to Mill’s traditional liberalism from thinkers, such as Catharine MacKinnon, who believe that such rights are never neutral. Our subjects will include hate speech, press censorship, pornography, controversial art, sacrilegious speech and campus controversies. We will, undoubtedly, have to adjust the syllabus to respond to breaking international, national and local news. The course will, I hope, provide the students an opportunity and the tools to intellectually examine deeply emotional and contentious issues. This course is part of the John Hyde Teaching Fellowship.

Class Format: seminar

Requirements/Evaluation: several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or
equivalent work in other media)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 20

Distributions: (D2)

PHIL 274 (S) Messing with People: The Ethics of Human Experimentation (WI)
The Tuskegee Syphilis Study and Stanley Milgram's Obedience experiments are infamous. Yet, other lesser known experiments are equally important landmarks in research ethics, as well, such as the Willowbrook experiment, in which residents of a state home for mentally impaired children were intentionally infected with a virus that causes hepatitis, and the Kennedy-Krieger Lead Abatement study, which tested the efficacy of a new lead paint removal procedure by housing young children in partially decontaminated homes and testing those children for lead exposure. In this tutorial we'll closely examine a series of contemporary and historical cases of human experimentation (roughly, one case per week) with an eye toward elucidating the moral norms that ought to govern human subjects research. A number of conceptual themes will emerge throughout the course of the term, including notions of exploitation and coercion, privacy and confidentiality, and the balance between public interests and individual rights. Specific issues will include the ethics of placebo research, deception in research, studies of illicit/illegal behavior, genetic research, experimentation with children, pregnant women and fetuses, and persons with diminished mental capacity, among other topics.

Class Format: tutorial; students will meet with the professor in pairs for approximately 75 minutes per week, writing and presenting 5- to 7-page essays, and commenting orally on their partners' essays in alternate weeks

Requirements/Evaluation: evaluations will be based on written work, on biweekly papers, oral commentaries, and tutorial discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: prospective Philosophy majors and students committed to taking the tutorial

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: PHIL Contemporary Value Theory Courses; PHLH Bioethics + Interpretations of Health;

Not offered current academic year

PHIL 280 (S) Frege, Russell, and the Early Wittgenstein
The last line of Ludwig Wittgenstein's *Tractatus* famously reads: "Whereof one cannot speak, thereof one must be silent." Are there things that cannot be put into words? What are the limits of language? What is the nature of language? How do logic and language relate? We will examine these (and other questions) in the context of the great philosophical revolution at the beginning of the last century: the linguistic turn and the birth of analytic philosophy. We will see how a focus on language affects our understanding of many traditional philosophical questions, ranging from epistemology and metaphysics to aesthetics and ethics. Our texts will include Gottlob Frege, *The Foundations of Arithmetic*, Bertrand Russell, *Principles of Mathematics*, and Ludwig Wittgenstein, *Tractatus Logico-Philosophicus*. While you're debating whether to take this class, consider the following puzzle. There is a village where the barber shaves (a) all those and (b) only those who do not shave themselves. Now, ask yourself: who shaves the barber? You will see that if the barber does not shave himself, then by condition (a) he does shave himself. And, if the barber does shave himself, then by condition (b) he does not shave himself. Thus, the barber shaves himself if and only if he does not shave himself. See if you can figure out why this is sometimes called a paradox, and then ask yourself what this has to do with our opening questions.

Class Format: seminar

Requirements/Evaluation: two short papers (5 pages) and one longer final paper (12-15 pages)

Prerequisites: at least two PHIL courses; PHIL 202 and 203 recommended

Enrollment Preferences: Philosophy majors, then seniors and juniors of any major

Expected Class Size: 12-15

Distributions: (D2)
PHIL 286 (F) Contemporary Systematic Philosophy

Systematic philosophy, also describable as comprehensive theorization, was central to the philosophical enterprise from at least the time of Aristotle until that of Hegel, but has been out of style, in both analytic and continental philosophy, for more than 100 years. This course examines a current attempt to return systematic philosophy to its long-central position. We begin by assessing Alan White's *Toward a Philosophical Theory of Everything* (2014), which, although not yet receiving widespread attention, was described by one reviewer as “a critically important work for all those deeply interested in philosophical issues and their significance for basic human concerns.” Because of the scope of systematic philosophy, this course provides students with the opportunity to investigate theories currently under development on a much richer variety of issues than is usual in philosophy courses (which are often restricted to specific subdisciplines of philosophy or to works of historical figures). Among those issues are ones involving semantics, ontology, truth, knowledge, moral and other values, human freedom, beauty, being, and God.

Class Format: seminar
Requirements/Evaluation: participation, one or more essays
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Philosophy majors and potential Philosophy majors
Expected Class Size: 6
Distributions: (D2)
Attributes: PHIL Contemp Metaphysics & Epistemology Courses

PHIL 288 (S) Embodiment and Consciousness: A Cross-Cultural Exploration

Crosslistings: PHIL288 / REL288

Secondary Crosslisting

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Class Format: seminar
Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)
Extra Info: not available for the fifth course option
Prerequisites: some background in either PSYC, COGS, PHIL or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Religion and Philosophy majors

PHIL 291 (F) Violence: Its Trajectory and Its Causes  (WI)

This tutorial focuses on two books by Harvard psychologist Steven Pinker: The Better Angels of our Nature. Why Violence Has Declined (2011) and Enlightenment Now: The Case for Reason, Science, Humanism, and Progress (2018). We focus first on the controversial theses that—despite two world wars and the Holocaust—the twentieth century was not the most violent so far, and that, over the entire course of history, human beings have become decreasingly violent. We then turn to the books' explanations of the factors they identify as leading us to be violent—our "inner demons"—and as curbing our violence—our "better angels," among which the books particularly emphasize reason, science, and humanism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers and responses to partner's tutorial papers, in alternating weeks; participation in tutorial discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; the books are written for general readers, not for those with expertise in any academic discipline
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors and potential majors

PHIL 294 (S) Philosophy and Narrative Fiction  (WI)

Crosslistings: PHIL294 / COMP294

Primary Crosslisting

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose—philosophers' preferred form of expression—clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require
PHIL 295 (F) Philosophy of Film and Film Theory  (WI)
Crosslistings: COMP295 / PHIL295

Primary Crosslisting

Philosophy of film is a relatively young, but very rich and rapidly growing field. Its central question--What is film?--has been approached and framed in many different ways: naturally, the answers to that question, and the theoretical assumptions that underlie the answers, differ as well. This course will offer a selective overview of the debates that characterized philosophy of film since the early 20th century. Starting with early film theorists (such as Munsterberg, Arnheim, Bazin, and Soviet formalists), we will examine how their insights and disagreements influenced later developments in continental and analytic philosophy of film, and in film theory. While looking at film as art, as document, as experiment and as entertainment, we will always keep in sight specific theoretical assumptions that underlie different understandings of film, and different critical approaches to the medium.

Some of the questions we will ask are: What is the nature of filmic representation? Does film accurately capture reality, as no other art does? Does it advance our thinking and increase our knowledge of the world? Or is it a supreme illusion, a dream-like escape, the domain in which the viewer’s unconscious wishes are magically fulfilled? How does film generate meaning? Is film a creation of a single artist - the director, the author - or is it a result of a loosely synchronized and not quite coherent collaboration of many different people, each guided by her or his particular vision? Is there a room for the notion of collective intention in filmmaking? What is the nature of audience’s response to film? Why do we seek to experience through film fear and anguish that we avoid in our daily lives? Are there ethical considerations that should govern both film production and spectatorship? Finally, is there a reason for philosophy of film and film theory to exist as a separate field? Is philosophy of film really autonomous, independent from traditional philosophical disciplines which help generate its central questions, such as aesthetics, philosophy of art, epistemology, ontology, semiotics, ethics, social and political philosophy? Is film today really distinct from a number of new, emerging visual media? How should we think about the boundaries and methods of theorizing about film?

Class Format: seminar

Requirements/Evaluation: this is a reading, writing & viewing intensive class; evaluation will be based on class participation, 5 short response papers (about 800 words each), & two 5 pages long papers

Extra Info: the second of which will be due after the end of classes; class attendance and Tuesday evening film screenings are mandatory

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and intended majors; students especially interested in film; and by seniority

PHIL 304 (F) Philosophy of Language  (WI)

This will be a course in the philosophy of language at it has developed over the past century and a half in the analytic tradition. We will narrow our focus even further and will concentrate primarily on meaning, reference and truth. What sorts of things can be true or false? We ordinarily claim that sentences are true or false, but are there other entities whose truth and falsity explains the truth and falsity of sentences? If there are such things--we’ll call them propositions--what are they like? If there aren’t such things, how do we characterize meaningfulness instead? What is it for a sentence or a proposition to be true? We think that there is a difference between a linguistic object’s being meaningful and its having a referent. For example, many people would agree that ‘Keith’s favorite unicorn’ is a meaningful expression. However, few (haters gonna hate) would say that the expression has a referent. It is difficult, however, to get clear on the relation between the meaning of an expression and its reference. We’ll try to make some progress on these issues. Our study will definitely include Frege, Russell, Quine, Searle, and Kripke. There will be a series of short response papers in which...
you provide a careful analysis of particular arguments in our texts. There will also be a midterm paper (roughly 10 pages) and a final paper (roughly 15 pages) which you will develop and revise in consultation with the instructor. It will be very helpful, though not absolutely necessary, for you to have some familiarity with logic and some experience in reading philosophy.

Class Format: seminar

Requirements/Evaluation: short response papers, midterm paper (10pp), final paper (15pp)

Prerequisites: previous philosophy course and familiarity with logic suggested

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: Linguistics; PHIL Contemp Metaphysics & Epistemology Courses;

Not offered current academic year

PHIL 306 (S) The Good Life in Greek and Roman Ethics (WI)

Crosslistings: CLAS306 / PHIL306

Primary Crosslisting

Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to Aristotle’s Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero’s On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Class Format: seminar

Requirements/Evaluation: several short response pieces. A final paper of 10-15 pages

Extra Info: may not be taken on a pass/fail basis

Enrollment Limit: 9

Enrollment Preferences: juniors & seniors & students who can demonstrate an interest in the subject matter of the class; there will not be any preference purely on the basis of major; final selection for the course will be made on the basis of an interview with the instructor

Expected Class Size: 9

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under CLAS; meets Division 2 requirement if registration is under PHIL

Attributes: PHIL History Courses;

Not offered current academic year

PHIL 308 (F) Wittgenstein’s “Philosophical Investigations”

Bertrand Russell claimed that Ludwig Wittgenstein was “perhaps the most perfect example I have ever known of genius as traditionally conceived—passionate, profound, intense, and dominating.” Wittgenstein’s two masterpieces, the Tractatus Logico-Philosophicus and the Philosophical Investigations, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the Tractatus is known as the “earlier Wittgenstein;” the Wittgenstein of the Investigations is known as the “later Wittgenstein.” This course is an intensive, line-by-line study of the Investigations—one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, “If a lion could talk, we could not understand him,” deserves serious attention.

Class Format: seminar
PHIL 312 (S) Philosophical Implications of Modern Physics (QFR)

Crosslistings: PHIL312 / SCST312 / PHYS312

Secondary Crosslisting

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Class Format: lecture

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors and Physics majors

Expected Class Size: 20

Distributions: (D2) (QFR)

Distribution Notes: meets the Division 2 requirement if registration is under PHIL or SCST; Division 3 requirement if registration under PHYS

PHIL 315 (F) Kant's "Critique of Pure Reason"

Kant's *Critique of Pure Reason* is perhaps the most significant text in the history of philosophy. It puts an end to the Early Modern traditions of Rationalism and Empiricism, and it stands at the beginning of both the Analytic and Continental traditions in contemporary philosophy. Love it or hate it, you cannot ignore it. In this course, we will study the most important and influential chapters of the Critique with the help of some secondary literature.

Class Format: seminar

Requirements/Evaluation: students will be required to participate actively in discussion and write a number of papers

Prerequisites: PHIL 202

Enrollment Limit: 15

Enrollment Preferences: Philosophy majors

Expected Class Size: 10

Distributions: (D2)

Attributes: PHIL History Courses

PHIL 321 (S) Introduction to Critical Theory (WI)
"Dare to know! Have courage to use your own reason—that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet in 19th and 20th centuries we find the promise of Enlightenment tempered by the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? In this tutorial we begin with short readings by Kant, Hegel and Marx, key sources for critical social theory in the 20th century. Possible topics may include: alienation, authoritarianism, "pathologies of reason," and reification, as well as recognition, the idea of socialism, and progress. Possible other figures read may include: Max Horkheimer, Theodor Adorno, Herbert Marcuse, Walter Benjamin, Jurgen Habermas, Nancy Fraser, Amy Allen, Noelle McAfee, Judith Butler, Elizabeth Grosz, Michel Foucault, Jean Baudrillard, and Gilles Deleuze, Georgio Agamben, Frantz Fanon, Edward Said and Achille Mbembe, as well as current critiques of neoliberal capitalism. This tutorial will be adapted for WGSS students seeking to meet a theory requirement.

**Class Format:** tutorial, students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** each student will write and present five 5- to 6-page paper every other week and a commentary on their partner's essay on alternate weeks;

**Extra Info:** evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** demonstrated background in modern philosophy, critical theory, political theory, or continental philosophy

**Enrollment Limit:** 10

**Enrollment Preferences:** current and prospective Philosophy majors and students with a sufficient background in political or critical theory

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Attributes:** PHIL History Courses; WGSS Theory Courses

**Not offered current academic year**

---

**PHIL 328 (S) Kant's Ethics**

Although Kant initially planned for his magnum opus to comprise theoretical and practical chapters, his metaphysics and epistemology take up all of his *Critique of Pure Reason* while his ethics is spread out over a series of works—*Groundwork of the Metaphysics of Morals, Critique of Practical Reason,* and *Religion within the Boundaries of Mere Reason*. These latter writings of Kant's had a tremendous influence on the development of subsequent moral philosophy and indeed set the stage for contemporary discussions of the nature of practical reason, motivation, freedom, and morality. Our seminar will have two aims: (1) to reconstruct the single most compelling moral theory from Kant's various ethical writings, and (2) to trace the influence of Kant's ethics in contemporary philosophy.

**Class Format:** seminar

**Requirements/Evaluation:** two 8-page seminar papers and a 12-page final paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructors

**Enrollment Limit:** 20

**Enrollment Preferences:** preference to Philosophy majors

**Expected Class Size:** 15

**PHIL 335 (S) Contemporary Metaethics** (WI)
We speak as if moral judgments can be true or false, warranted or unwarranted. But how should objectivity in this domain be understood? Is moral objectivity like scientific objectivity, assuming we have a clear sense of what that involves? If not, should that concern us? Are there other models for understanding moral objectivity besides science? While answers to such questions are implicit in historically important accounts of morality, these issues became the topic of explicit, sustained debate in the twentieth and twenty-first century. Our focus will be on recent influential work in this area. We will examine several different approaches in depth, including realism, constructivism, expressivism, and skepticism.

Class Format: seminar
Requirements/Evaluation: short response papers, midterm paper, final paper, attendance and participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructor

PHIL 337 (F) Justice in Health Care (WI)
Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice within the health care context. This will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform, which may itself include an analysis of the Affordable Care Act or current legislative proposals; justice in health care rationing, with particular attention to the relationship between rationing criteria and gender, "race," disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in less developed countries.

Class Format: tutorial
Requirements/Evaluation: evaluations will be based on biweekly papers, oral commentaries, and tutorial discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors, Public Health concentrators, and students committed to taking the tutorial

PHIL 340 (S) Locke and Leibniz (WI)
Modern philosophy centers on two debates: Empiricism vs. Rationalism and Realism vs. Idealism. Locke is the first great Empiricist Realist, and Leibniz the greatest Rationalist Idealist. The debate between Empiricism and Rationalism concerns whether all our knowledge derives from experience, or any is innate. The debate between Realism and Idealism concerns whether reality is composed of mind-independent matter, or mind-like substances. Leibniz wrote his New Essays in 1704 as a critical response to Locke's Essay of 1690. He hoped it would occasion a public debate between Locke and himself, and prompt the intellectual community to decide, once and for all, between Empiricism and Rationalism, Realism and Idealism, and on related issues concerning the mind, language, truth, God, natural kinds, causation, and freedom. The debate never transpired - indeed, Leibniz suppressed his New Essays - because of Locke's death in 1705. This tutorial will bring to life the debate between Locke and Leibniz,
and enable students to reach their own conclusions about Empiricism vs. Rationalism, Realism vs. Idealism, and related issues.

**Class Format:** tutorial

**Requirements/Evaluation:** weekly tutorial papers and response essays

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHIL 202 History of Modern Philosophy, or instructor's permission

**PHIL 360 (F) The Political Thought of Frantz Fanon**  (WI)

Crosslistings: PSCI370 / LEAD360 / PHIL360 / AFR360

**Secondary Crosslisting**

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**PHIL 379 (F) American Pragmatism**

Crosslistings: PHIL379 / AMST379

**Primary Crosslisting**

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

**Class Format:** seminar

**Requirements/Evaluation:** final paper, several short assignments
Prerequisites: at least two PHIL courses

Enrollment Limit: 25

Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major

Expected Class Size: 12-15

Distributions: (D2)

Attributes: AMST Critical and Cultural Theory Electives; PHIL History Courses; TEAC Related Courses

Not offered current academic year

PHIL 380 (F) Relativism (WI)
The aim of the course is to survey, analyze and discuss many varieties of relativism--semantic, epistemic, ontological and moral--from Plato's *Theaetetus* to contemporary social constructivism. We will pay special attention to the structure of arguments for and against relativism, as well as to the philosophical motivations and perceived consequences of its endorsement or rejection. We will thus be led to discuss some of the concepts common to epistemology, metaphysics and ethics: reason, justification, objectivity, understanding, reality and truth. Some of the questions we will consider are: Are moral standards relative to cultural frameworks? Are there incompatible but equally true ways of describing the world? Is rationality relative to cultural norms? Is relativism a form of skepticism? Is it forced on people who endorse cultural pluralism as their political ideal as the only tenable philosophical position? Our readings will include the relevant works of Plato, Sextus Empiricus, Carnap, Quine, Davidson, Goodman, Elgin, Hacking, Krausz, Foot, and Williams, among others.

Class Format: seminar

Requirements/Evaluation: class attendance, preparedness and presentation; weekly small group discussions and one or two group presentations in class; three short writing assignments (1-2 pgs. each) and three 5 pages long papers

Prerequisites: two philosophy courses, or consent of the instructor

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and intended majors

Expected Class Size: 7-10

Distributions: (D2) (WI)

Attributes: PHIL Contemp Metaphysics & Epistemology Courses;

Not offered current academic year

PHIL 388 (S) Consciousness (WI)
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience--what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all--resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science’s most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members convene

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any introduction to philosophy and at least one upper level course in PHIL, no exceptions

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors, Neuroscience or Cognitive Science concentrators; open to sophomores; every effort will be made to pair students according to similar or complementary background
PHIL 401 (F) Senior Seminar: Contemporary Moral Psychology and Virtue Ethic (WI)

The seminar will focus on contemporary philosophical work on practical and intellectual virtues considered indispensable for a good, meaningful human life. We will begin by reading selections from seminal ethical writings by Plato, Aristotle and Hume, then move on to the 20th century revival of eudaimonistic and sentimental traditions of virtue ethics. Special stress will be placed on discussing the nature of virtues such as integrity, empathy, self-knowledge, authenticity and emotional maturity, and on articulating realistic psychological and social preconditions for their development.

Class Format: seminar

Requirements/Evaluation: active participation in class discussion; seminar presentations; 10 weekly several short papers; a 12-15-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: required of all senior philosophy majors

Enrollment Limit: 15

Expected Class Size: 8-10

Distributions: (D2) (WI)

Distribution Notes: The course will require weekly short papers and a final paper, totaling about 35 pages

The instructional Physical Education Program at Williams is an integral part of the student’s total educational experience. As a part of the liberal arts concept, the program develops the mind-body relationship, which is dependent upon the proper integration of physical and intellectual capacities. The main objective of the physical education program is to develop in each student an appreciation of physical fitness and wellness, and to expose them to a variety of activities that are suitable for lifetime participation.

Four credits of Physical Education represent one of the requirements for the College degree. There are five physical education units during the year. In the fall academic semester, there are two six-week physical education quarters. Winter Study is another unit, and there are two physical education quarters in the spring academic semester. Two different activities must be completed in the fulfillment of the requirement. Students must complete two physical education credits during the first year, all four physical education credits must be completed by the end of sophomore year if the student wishes to study abroad.

A schedule listing all courses offered is issued to every student before each quarter and Winter Study. Classes may vary according to availability of instructors and interest of students. More information can be found at athletics.williams.edu/physical-education.

The following courses are offered at various times during the year:

- Aqua Fitness
- Badminton
- Basketball
- Bicycling
- Boot Camp
- Bowling
- Canoeing
- Core and Conditioning
- Dance (African, Ballet, Modern)
- Diving
- Erg Fitness
- Figure Skating
- Futsol
- Golf
- Hiking
- Ice Climbing
- Kayaking
- Lifeguarding
- Lifetime Sports
- Mountain Biking
- Muscle Fitness
- Outdoor Living Skills
Pickle Ball
Pilates
Rape Aggression Defense (RAD)
Rock Climbing
Rowing
Running
Skiing (Alpine and Cross Country)
Snowboarding
Snowshoeing
Soccer
Spinning
Squash
Street Hockey
Swim for Fitness
Swimming
Telemarking
Tennis
Trail Crew
Volleyball
Weight Training
Wellness
Wilderness Leadership
Yoga
Zumba
ASTRONOMY (Div III)

ASTROPHYSICS

Chairs: Professor Jay Pasachoff (fall) and Professor Karen Kwitter (spring)

On leave Fall only: Professor K. Kwitter.

On leave Spring only: Professor J. Pasachoff.

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major (administered jointly with the Physics Department) and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

and either

Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics
Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses

or

Two 400-level astronomy courses and one of the following:

Astronomy 211T Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory

Physics 411T Classical Mechanics

Physics 418 Gravity

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysic major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the
lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

ASPH 31 (W) Senior Research: Astrophysics
To be taken by students registered for Astrophysics 493, 494.

Class Format: independent study
Distributions: (D3)

Winter 2019
HON Section: 01 TBA Jay M. Pasachoff

ASPH 99 (W) Independent Study: Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D3)

Winter 2019
IND Section: 01 TBA Jay M. Pasachoff

ASPH 493 (F) Senior Research: Astrophysics
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of department
Distributions: (D3)

Fall 2018
HON Section: 01 TBA Karen B. Kwitter

ASPH 494 (S) Senior Research: Astrophysics
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

What is light? How does a laser work? What is a black hole? What are the fundamental building blocks of the universe? Physics majors and Astrophysics majors study these and related questions to understand the physical world around us, from the very small to the very large. A physics student practices the experimental methods used to learn about this world and explores the mathematical techniques and theories developed to explain these physical phenomena. A Physics major or Astrophysics major serves as preparation for further work in physics, astrophysics, applied physics, other sciences, engineering, medical research, science teaching and writing, and other careers involving critical thinking, problem-solving, and insight into the fundamental principles of nature.

**ASTROPHYSICS MAJOR**

The Physics Department, in cooperation with the Astronomy Department, offers a major in astrophysics consisting of (at least): 6 or 7 courses in Physics, 3 or 4 in Astronomy, and 1 in Mathematics. The core sequence of the Astrophysics major is the same as the Physics major described below (except that Physics 302, although strongly recommended, is not required). Students intending to pursue graduate study in astrophysics will need to take upper-level physics electives beyond the basic requirements for the major. Honors work in Astrophysics may be in either physics or astronomy. Students majoring in Astrophysics are expected to consult early and often with faculty from both departments in determining their course selections. The detailed description of the Astrophysics major is given under “Astronomy,” along with a description of the Astronomy major also offered by that department.

**PHYSICS MAJOR**

**Introductory Courses**

Students considering a major in physics should take both physics and mathematics as first-year students. A student normally begins with either Physics 131 or Physics 141:

- **Physics 131 Introduction to Mechanics.** This is designed as a first course in physics. It is suitable for students who either have not had physics before or have had some physics but are not comfortable solving “word problems” that require calculus.

- **Physics 141 Mechanics and Waves.** Students in this course should have solid backgrounds in science and calculus, either from high school or college, including at least a year of high school physics.

The Department of Mathematics will place students in the appropriate introductory calculus course. The physics major sequence courses all make use of calculus at increasingly sophisticated levels. Therefore, students considering a Physics major should continue their mathematical preparation without interruption through the introductory calculus sequence (Mathematics 130, 140, and 150 or 151). Students are encouraged to take Physics 210 as early as possible. Physics 210 is cross listed as Mathematics 210 for the benefit of those students who wish to have the course listed with a MATH prefix.

**ADVANCED PLACEMENT**

Students with unusually strong backgrounds in calculus and physics may place out of Physics 141 and either: 1) begin with the special seminar course Physics 151 in the fall (typically followed by Physics 210 in the spring), or 2) begin with Physics 142 in the spring (possibly along with Physics 210). Students may take either 151 or 142 but not both. On rare occasions a student with an exceptional background will be offered the option of enrolling in Physics 201.

Placement is based on AP scores, consultation with the department, and results of a placement exam administered during First Days. The exam can also be taken later in the year by arrangement with the department chair. The exam covers classical mechanics, basic wave phenomena, and includes some use of calculus techniques.

**REQUIREMENTS FOR THE MAJOR**

A total of ten courses, nine in physics and one in mathematics, are required to complete the Physics major. Students who place out of both Physics 141 and Physics 142 and begin their studies in Physics 201 are required to take a total of nine courses (eight in physics).

**Required Physics Sequence Courses**
Physics 141 Mechanics and Waves
or Physics 131 Introduction to Mechanics
Physics 142 Foundations of Modern Physics
or Physics 151 Seminar in Modern Physics
Physics 201 Electricity and Magnetism
Physics 202 Waves and Optics
Physics 210 Mathematical Methods for Scientists
Physics 301 Quantum Physics
Physics 302 Statistical Mechanics and Thermodynamics

Required Mathematics Course
Mathematics 150 or 151 (formerly 105 or 106) Multivariable Calculus
Students entering with Advanced Placement in mathematics may obtain credit toward the major for the equivalent Mathematics 150 or 151 taken elsewhere.
At least two more physics courses above the 100 level (or other approved courses as noted below) must be taken, bringing the total number of courses for the major to ten.

Options
Mathematics 140 may be counted if taken at Williams.
Mathematics 209 or 309 may substitute for Physics 210.
Astronomy 111 may count in place of Physics 141 if a student places out of 141 (see “advanced placement” above).
An additional Astronomy or Astrophysics course above the introductory level that is acceptable for the astrophysics major may be counted.
Two approved Division III courses above the introductory level may be substituted for one Physics course. Approval is on an individual basis at the discretion of the department chair.
Honors work is in addition to completion of the basic major so Physics 493 and 494 do not count towards the ten courses in the major.

PREPARATION FOR ADVANCED STUDY
Students who may wish to do graduate work in physics, astrophysics, or engineering should elect courses in both physics and mathematics beyond the minimum major requirements. The first-year graduate school curriculum in physics usually includes courses in quantum mechanics, electromagnetic theory, and classical mechanics that presuppose intermediate level study of these subjects as an undergraduate. Therefore, students planning graduate work in physics should elect all of the following courses:
Physics 402T Applications of Quantum Mechanics
Physics 405T Electromagnetic Theory
Physics 411T Classical Mechanics

ADVISING
Both majors and non-majors are encouraged to consult with the department chair or course instructors about course selections or other matters.

THE DEGREE WITH HONORS IN PHYSICS
The degree with honors in Physics will be awarded on the basis of a senior thesis presenting the results of a substantial experimental or theoretical investigation carried out under the direction of a faculty member in the department. There is no rigid grade point average required for admission to the program or for the awarding of the degree with honors, but it is normally expected that honors students will maintain at least a B average in physics and mathematics. Students will normally apply for admission to the program early in the spring of their junior year and during senior year these students will normally elect Physics 493, W31, and 494 in addition to the usual requirements for the major. At the end of winter study, the department will decide whether the student will be admitted to honors candidacy. Both a written thesis and a colloquium presentation of the results are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill them with unusually high distinction.
Honors candidates will also be required to participate in departmental colloquium talks.

**STUDY ABROAD**

The physics community is international in scope and a career in physics (or a related field) can provide many opportunities for travel and contact with individuals from outside the United States. The physics major at Williams is a carefully structured four-year program designed to prepare students who are so inclined for graduate study at leading research institutions. While it is possible to complete the major requirements in three years, such a major will not usually lead to further study in the field. With careful early planning on the part of a student, and close consultation with the department chair, it is possible to complete a strong major and still study abroad provided the foreign institution can provide courses which reasonably substitute or supplement those in the Williams major program. Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Here are answers to frequently asked questions related to study abroad:

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

No.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. The laboratory component of Physics 301 serves as our “advanced lab course.” Students often cannot get equivalent experience abroad and must take this when they return senior year (non-credit). Unless there has been a recent change, our own Oxford Program is one place students cannot get lab experience.

**OPTIONS FOR NON-MAJORS**

Many students want to take a self-contained and rigorous full-year survey of physics. For such students, the most appropriate sequence will be either Physics 131 or Physics 141 followed by Physics 132, depending on the student’s background in science and mathematics (see Introductory Courses above). Either of these sequences satisfies the physics requirement for medical school.

The department also offers one-semester courses designed for non-majors, including Physics 107, Physics 108, and Physics 109.

**PHYS 12 (W) Drawing as a Learnable Skill**

Representational drawing is not merely a gift of birth, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will develop your ability to accurately see and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and teach creative problem solving abilities. Students need no previous artistic experience, just the willingness and desire to learn. Students will be expected to attend and participate in all sessions. They will also be required to keep a sketchbook recording their progress and complete a final project. Adjunct Instructor Bio: Stella Ehrich is a professional painter whose work includes portraits, landscapes and still life subjects. She studied for seven years at Studio Simi in Florence, she holds an MFA in painting from Bennington College and a BFA from the Memphis Academy of Art.

**Class Format:** mornings

**Requirements/Evaluation:** evaluation will be based on participation, effort, and development; final project required
**PHYS 13 (W) Electronics**

Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits and the Arduino, a microcontroller. Class will meet four afternoons a week for a mixture of lab and lecture, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or will write a 10-page paper. If students have prior experience with electronics, they should contact the instructor prior to enrollment. Adjunct Instructor Bio: Daniel Maser is a postdoctoral research fellow in the Department of Physics, working with Professor Tiku Majumder in his atomic physics research laboratory. Adjunct Co-Instructor Bio: Jason Mativi is the electro-mechanical technician in the Bronfman Science Center. He will teach the digital electronics portion of the course.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; final project

**Prerequisites:** MATH 130, equivalent calculus, or permission from instructor; no prior experience with electronic circuits is assumed

---

**PHYS 15 (W) Cooking for the Real World**

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You’ll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac 'n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: *Kitchen Confidential*, by Anthony Bourdain, *The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs*, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

**Class Format:** MWF 3-5:30pm

**Requirements/Evaluation:** daily journal and a final cooking demonstration

**Prerequisites:** none

---

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** if overenrolled, selection will be based on seniority

**Materials/Lab Fee:** none

**Attributes:** (D3)

**Distributions:** (D3)

PHYS 16 (W) The Way Things Work
How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet three afternoons a week for a mixture of lecture, discussion, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice.

Class Format: afternoons
Requirements/Evaluation: either building a final project with a short writeup or writing a 10-page paper, and a presentation to the class
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: by seniority
Materials/Lab Fee: $40 plus cost of books
Attributes: EXPE Experiential Education Courses

PHYS 22 (W) Research Participation
Several members of the department will have student projects available dealing with their own research or that of current senior thesis students. Approximately 35 hours per week of study and actual research participation will be expected from each student.

Class Format: to be arranged with instructor
Requirements/Evaluation: students will be required to keep a notebook and write a 5-page paper summarizing their work
Prerequisites: permission of instructor
Enrollment Limit: 1-2
Enrollment Preferences: permission of instructor
Materials/Lab Fee: none
Distributions: (D3)

PHYS 31 (W) Senior Research: Physics
To be taken by students registered for Physics 493, 494.

Class Format: thesis
Distributions: (D3)

**Winter 2019**

IND Section: 01  TBA  Frederick W. Strauch

**PHYS 107 (F) Spacetime and Quanta (QFR)**

Quantum mechanics and Einstein's relativity both drastically altered our view of the physical world when they were developed in the early twentieth century. In this course we will learn about the central concepts that define relativity and quantum mechanics, along with some of the diverse phenomena the two theories describe. These investigations will prepare us to discuss developments in condensed matter: explaining what makes materials different along with discussing exotic effects like superconductivity and superfluidity. We will also discuss recent developments in cosmology, where observations have produced a surprising picture for the make-up of our universe. This course is intended for students whose primary interests lie outside of the natural sciences and mathematics. The mathematics used will be algebra and trigonometry.

**Class Format:** lecture twice a week and conference section once a week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, quizzes, two midterms, and a final exam, all with a significant quantitative component

**Prerequisites:** none

**Enrollment Limit:** 40*

**Enrollment Preferences:** by seniority

**Expected Class Size:** 25

**Department Notes:** *20 per conference section

**Distributions:** (D3) (QFR)

**Attributes:** SCST Related Courses

Not offered current academic year

---

**PHYS 108 (F) Energy Science and Technology (QFR)**

Crosslistings: ENVI108 / PHYS108

**Primary Crosslisting**

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

**Class Format:** lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

**Requirements/Evaluation:** evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130

**Enrollment Limit:** 20

**Expected Class Size:** 20

**Distributions:** (D3) (QFR)

**Attributes:** ENVI Natural World Electives; SCST Related Courses

---

Fall 2018

LEC Section: 01  MR 1:10 pm - 2:25 pm  Kevin M. Jones
PHYS 109 (S) Sound, Light, and Perception (QFR)

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications. The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

Class Format: lecture/lab/discussion; each student will attend one lecture plus one conference section weekly

Requirements/Evaluation: evaluation will be based on class participation, problem sets, in-class exams, oral presentations, and a final exam, all with a quantitative component

Extra Info: Note: Students signing up for the Thursday 2:35 PM conference section must also be available on Thursdays from 1:10-2:25 PM

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 40

Distributions: (D3) (QFR)

Not offered current academic year

PHYS 131 (F) Introduction to Mechanics (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week

Requirements/Evaluation: evaluation will be based on exams, labs, and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

Enrollment Limit: 24/lab

Expected Class Size: 60

Department Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

LAB Section: 04 W 1:00 pm - 4:00 pm Savan Kharel

PHYS 132 (S) Electromagnetism and the Physics of Matter (QFR)

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.
Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section 1 hour approximately every other week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Expected Class Size: 60

Distributions: (D3) (QFR)

Spring 2019

LEC Section: 01  MWF 11:00 am - 11:50 am  Savan Kharel
LAB Section: 02  M 1:00 pm - 4:00 pm  Savan Kharel
LAB Section: 03  T 1:00 pm - 4:00 pm  Savan Kharel

PHYS 141 (F) Mechanics and Waves  (QFR)
This is the typical first course for a prospective physics major. It covers the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, one hour approximately every other week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, 2 one-hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: high school physics and MATH 130 or equivalent placement

Enrollment Limit: 22 per lab

Expected Class Size: 50

Department Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

PHYS 142 (S) Foundations of Modern Physics  (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.

This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, alternating between three hours and one hour approximately every other week

Requirements/Evaluation: evaluation will be based on weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130 (formerly 103), or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor.
Students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 22 per lab

Expected Class Size: 30

Distributions: (D3) (QFR)

PHYS 151 (F) Seminar in Modern Physics (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same basic material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: lecture/discussion, three hours per week; laboratory, 3 hours approximately every other week; conference section 1 hour approximately every other week

Requirements/Evaluation: evaluation will be based on class participation, labs, weekly problem sets, an oral presentation, two hour-exams and a final exam, all of which have a substantial quantitative component

Extra Info: this is a small seminar designed for first-year students who have placed out of PHYS 141

Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit: 18

Expected Class Size: 18

Distributions: (D3) (QFR)

Fall 2018

LAB Section: 02  W 1:00 pm - 4:00 pm  Frederick W. Strauch

PHYS 201 (F) Electricity and Magnetism (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostastics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on problem sets, labs, two take-home midterms, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

Enrollment Limit: 20 per lab

Expected Class Size: 25

Distributions: (D3) (QFR)
PHYS 202 (S) Vibrations, Waves and Optics (QFR)
Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: evaluation will be based on problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor
Enrollment Limit: none
Expected Class Size: 20
Distributions: (D3) (QFR)

PHYS 210 (S) Mathematical Methods for Scientists (QFR)
Crosslistings: PHYS210 / MATH210
Primary Crosslisting
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Distributions: (D3) (QFR)
PHYS 234 (S) Introduction to Materials Science  (QFR)
Crosslistings: GEOS234 / PHYS234

Primary Crosslisting

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week), plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: based on weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Distributions: (D3) (QFR)

Attributes: MTSC Courses;

Not offered current academic year

PHYS 301 (F) Quantum Physics  (QFR)

This course serves as a one-semester introduction to the history, formalism, and phenomenology of quantum mechanics. We begin with a discussion of the historical origins of the quantum theory, and the Schroedinger wave equation. The concepts of matter waves and wave-packets are introduced. Solutions to one-dimensional problems will be treated prior to introducing the system which serves as a hallmark of the success of quantum theory, the three-dimensional hydrogen atom. In the second half of the course, we will develop the important connection between the underlying mathematical formalism and the physical predictions of the quantum theory and introduce the Heisenberg formalism. We then go on to apply this knowledge to several important problems within the realm of atomic and nuclear physics concentrating on applications involving angular momentum and spins.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209

Enrollment Limit: none

Expected Class Size: 15

PHYS 302 (S) Stat Mechanics & Thermodynamics  (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways—obeying the Schrödinger equation, Newton’s and Coulomb’s Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.
Class Format: lecture/discussion, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301

Enrollment Limit: 24

PHYS 312 (S) Philosophical Implications of Modern Physics  (QFR)

Crosslistings: PHIL312 / SCST312 / PHYS312

Primary Crosslisting

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Class Format: lecture

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors and Physics majors

Expected Class Size: 20

Distributions: (D3) (QFR)

Distribution Notes: meets the Division 2 requirement if registration is under PHIL or SCST; Division 3 requirement if registration under PHYS

Attributes: PHIL Contemp Metaphysics & Epistemology Courses;

PHYS 315 (S) Computational Biology  (QFR)

Crosslistings: PHYS315 / CSCI315

Primary Crosslisting

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and expectation-maximization.

Class Format: lab three hours per week plus weekly tutorial meeting

Requirements/Evaluation: evaluation will be based on weekly Python programming assignments, problem sets, a few quizzes and a final project

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: programming experience (e.g., CSCI 136), mathematics (PHYS/MATH 210 or MATH 150), and physical science (PHYS 142 or 151, or CHEM 151 or 153 or 155), or permission of instructor

Enrollment Limit: 10
Enrollment Preferences: based on seniority
Expected Class Size: 8
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses;
Not offered current academic year

PHYS 316 (S) Protecting Information: Applications of Abstract Algebra and Quantum Physics  (QFR)
Crosslistings: MATH316 / PHYS316
Secondary Crosslisting
Living in the information age, we find ourselves depending more and more on codes that protect messages against either noise or eavesdropping. This course examines some of the most important codes currently being used to protect information, including linear codes, which in addition to being mathematically elegant are the most practical codes for error correction, and the RSA public key cryptographic scheme, popular nowadays for internet applications. We also study the standard AES system as well as an increasingly popular cryptographic strategy based on elliptic curves. Looking ahead by a decade or more, we show how a quantum computer could crack the RSA scheme in short order, and how quantum cryptographic devices will achieve security through the inherent unpredictability of quantum events.
Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework sets and exams
Prerequisites: PHYS/MATH 210 or MATH 250 (possibly concurrent) or permission of instructors;
Enrollment Limit: 50
Enrollment Preferences: discretion of the instructors
Expected Class Size: 35
Department Notes: students not satisfying the course prerequisites but who have completed MATH 200 or MATH 209 are particularly encouraged to ask to be admitted
Distributions: (D3) (QFR)
Not offered current academic year

PHYS 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)
Crosslistings: BIOL319 / CHEM319 / MATH319 / PHYS319 / CSCI319
Secondary Crosslisting
What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.
Class Format: two afternoons of lab, with one hour of lecture, per week
Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal
Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.
Enrollment Limit: 12
Enrollment Preferences: seniors, then juniors, then sophomores
PHYS 321 (F) Introduction to Particle Physics (QFR)

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

Class Format: independent study, with one 90-minute meeting per week (to be scheduled with the instructor)

Requirements/Evaluation: weekly problem sets and a final exam

Prerequisites: PHYS 301, which may be taken concurrently, plus permission of instructor

Enrollment Limit: 5

Expected Class Size: 2

Distributions: (D3) (QFR)

Not offered current academic year

PHYS 402 (S) Applications of Quantum Mechanics (QFR)

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Class Format: tutorial, 1 and 1/4 hours per week; lecture, one hour per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PHYS 301

Enrollment Limit: 10 per sec

Expected Class Size: 16

Distributions: (D3) (QFR)

Spring 2019

TUT Section: T1  F 1:10 pm - 2:25 pm  Catherine Kealhofer
TUT Section: T2  F 1:10 pm - 2:25 pm  Catherine Kealhofer

PHYS 405 (F) Electromagnetic Theory (QFR)

This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including electric fields and matter, magnetic materials, light, and radiation. As we explore diverse phenomena, we will learn useful approximation techniques and beautiful mathematical tools. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

Class Format: tutorial, one hour per week; lecture, one hour per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209 or MATH 309
Enrollment Limit: 10/section
Expected Class Size: 16
Distributions: (D3) (QFR)

Not offered current academic year

PHYS 411 (F) Classical Mechanics (QFR)
This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class with will meet once a week as a whole to discuss new material.

Class Format: tutorial, 1 and 1/4 hours per week; lecture, one hour per week
Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209
Enrollment Limit: 10/section
Expected Class Size: 25
Distributions: (D3) (QFR)

Fall 2018
TUT Section: T1  F 1:10 pm - 2:25 pm  Daniel P. Aalberts
TUT Section: T2  F 1:10 pm - 2:25 pm  Daniel P. Aalberts

PHYS 418 (S) Gravity (QFR)
This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 301 or PHYS 405 or PHYS 411; students with strong math backgrounds are invited to consult with the instructor about a possible waiving of the prerequisites
Enrollment Limit: none
Expected Class Size: 10
Distributions: (D3) (QFR)
Not offered current academic year

PHYS 451 (S) Condensed Matter Physics (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Class Format: seminar
Requirements/Evaluation: weekly readings and problem sets, and exams
**PHYS 475 (S)  Methods in Mathematical Fluid Dynamics**  (QFR)

Crosslistings: MATH475 / PHYS475

Crosslistings: MATH475 / PHYS475

**Secondary Crosslisting**

The mathematical study of fluids is an exciting field with applications in areas such as engineering, physics and biology. The applied nature of the subject has led to important developments in aerodynamics and hydrodynamics. From ocean currents and exploding supernovae to weather prediction and even traffic flow, several partial differential equations (pde) have been proposed as models to study fluid phenomena. This course is designed to both introduce students to some of the techniques used in mathematical fluid dynamics and lay down a foundation for future research in this and other related areas. Briefly, we start with the method of characteristics, a useful tool in the study of pde. Symmetry and geometrical arguments, special solutions, energy methods, particle trajectories, and techniques from ordinary differential equations (ode) are also discussed. A special focus will be on models from hydrodynamics. These include the KdV and the Camass Holm equations (and generalizations thereof), and the Euler equations of ideal fluids. Mainly, we will be concerned with models whose solutions depend on time and one spatial variable, although depending on student interest and time, we may also investigate higher-dimensional models.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets and final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 151, MATH 250, and MATH 350 or 351; some background in pde/ode would be helpful but not required

**Enrollment Limit:** 40

**Enrollment Preferences:** senior Mathematics majors

**Expected Class Size:** 25

The Political Economy major is designed to give students a grasp of the ways in which political and economic forces interact in shaping public policy. The major includes substantial study of the central analytical approaches in both Political Science and Economics and seeks to surmount the sometimes artificial barriers of specialization that may characterize either discipline taken by itself. Three of the required Political Economy courses undertake a conscious merging of the approaches in the two fields. These courses are designed by, and usually are taught jointly by, political scientists and economists. Political Economy 250 examines major theoretical texts in political economy and analyzes economic liberalism and critiques of economic liberalism in the context of current policy issues. Political Economy 401 examines contemporary issues in political economy in their domestic, comparative and international contexts. Political Economy 402 asks students to research and make proposals in policy areas of current importance. Background for the two senior courses is acquired through introductory courses in Economics and Political Science, a course in empirical methods, and elective courses in international, domestic and comparative economics, politics and policy.

Students in Political Economy 402 visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their Political Economy 402 group projects. This is a course requirement and thus a requirement for the major.

**MAJOR**

The Political Economy major requires students to complete eleven (11) courses: two introductory courses each in Economics and Political Science; one empirical methods course; three core courses specific to the Political Economy Program; and three electives, one from each of three categories. In order to balance students' educations, majors must take at least one elective in Economics and one elective in Political Science; the third elective may come from either Economics or Political Science. In light of the public policy orientation of the program, all majors are also required to complete one course with a substantial experiential education component which is related to the making or effect of public policy. The purpose of the experiential education requirement is for the student to get out into the world and interact with people in cases where the stakes are real, often involving some element of community service or participation in the political process or in the making of or analysis of public policy, in order to learn something about public policy that one cannot get from a purely academic experience. This requirement must be fulfilled prior to taking POEC 402. It can be fulfilled through a regular semester-length course (which might also serve as an elective in the major), a winter study course, a study abroad academic internship, a winter study internship, or a summer internship. The chair distributes a list of approved experiential courses to majors at the beginning of each academic year. For an internship to satisfy the requirement, its focus must be the making or effect of public policy. Approval of the chair is required to use an internship to fulfill this requirement.

**Two Introductory Economics Courses**

- ECON 110 Principles of Microeconomics
- ECON 120 Principles of Macroeconomics

**Two Introductory Political Science Courses**

For students in the class of 2019 and earlier:

- PSCI 201 Power, Politics, and Democracy in America
- or PSCI 203 Introduction to Political Theory
- PSCI 202 World Politics: An Introduction to International Relations
- or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

For students in the class of 2020 and later:

- PSCI 201 Power, Politics, and Democracy in America
- PSCI 202 World Politics: An Introduction to International Relations
- or PSCI 203 Introduction to Political Theory
or PSCI 204 Introduction to Comparative Politics: State, Nation, and Democracy

One Empirical Methods Course

POEC 253 Empirical Methods in Political Economy
or ECON 255 Econometrics

Three Political Economy Program Courses

POEC 250/ECON 299/PSCI 238 Economic Liberalism and Its Critics
POEC 401 Contemporary Problems in Political Economy
POEC 402 Political Economy of Public Policy Issues

Three Elective Courses

NOTE: students must take at least one elective in Economics and at least one elective in Political Science; the third elective may come from either Economics or Political Science.

Please see the online catalog for up-to-date information on which courses are being offered in the current year.

One Comparative Political Economy/General Public Policy Course

ECON 204/ENVI 234 Economics of Developing Countries
or ECON/ENVI 213 Introduction to Environmental and Natural Resources Economics
or ECON 222 Economics of the Arts and Culture

CREDIT FOR COURSEWORK DONE ELSEWHERE

The three Political Economy Program courses (POEC 250, 401, and 402) must be completed at Williams without exception. Students are strongly encouraged to complete the empirical methods course (POEC 253 or ECON 255) and PSCI 201 at Williams, as versions of these courses offered elsewhere are usually highly imperfect substitutes that will not provide adequate preparation for the senior seminars; students may in rare cases be able to complete either of these requirements during study at another college or university (e.g. during study abroad), but only with prior permission from the chair. The three electives and other introductory courses in Political Science may be completed during study at another college or university (e.g. during study abroad) with permission of the chair. The general policy of the Program is to grant credit for one course per semester abroad and in extraordinary circumstances, credit for three courses for an entire year abroad. Students who score a 5 on the AP exam in Microeconomics, Macroeconomics, or Comparative Government and Politics may receive credit towards the major for the cognate introductory economics or political science course(s). Credit for A levels and IB exams in Economics and for introductory microeconomics and macroeconomics classes taken at other colleges and universities (subject to approval by the Economics department study away coordinator) is given consistent with the current policy of the Economics Department. No substitute higher-level coursework is required for majors receiving credit in this way, although it is certainly encouraged. Students in the class of 2019 and earlier who score a 5 on the AP exam in U.S. Government and Politics may receive credit towards the major for the cognate introductory political science course(s). Students in the class of 2020 and later classes cannot substitute AP credit for PSCI 201.

RECOMMENDED PROGRESSION THROUGH THE REQUIRED MAJOR COURSES

Students considering a major in Political Economy are encouraged to begin with ECON 110 and 120 and any one of PSCI 201, 202, 203, or 204 in their first year, as these courses are the prerequisites or co-requisites for POEC 250. All prospective POEC majors are encouraged to take PSCI 201, and indeed are required to do so if they are in the class of 2020 or later, as it provides tools of political analysis that will be essential for the projects all POEC majors will undertake in POEC 402. Students should plan to complete both of their two required introductory PSCI courses during either the first or second year at Williams, as first- and second-year students get enrollment preference in these classes. Students should plan to take POEC 250 and POEC 253 (or ECON 255) during the sophomore and junior years, keeping in mind that both POEC 250 and POEC 253 are offered only in the fall, and that ECON 255 requires STAT 161, STAT 201, or STAT 202 as a prerequisite (STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018). POEC 401, taken fall of senior year, requires POEC 253 or ECON 255 as a prerequisite, so that prerequisite must be completed before the start of senior year. Students should also get started on their electives during sophomore and junior year.

THE DEGREE WITH HONORS IN POLITICAL ECONOMY

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis. Seniors may pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. The third course contributing to such an honors program would normally be an elective in Political Science or Economics taken during the junior year. This course, which may be one of the required electives, must be closely related, indeed must prepare the ground for the honors thesis.

Juniors in the Political Economy major with at least a 3.5 GPA in the program may apply for the honors thesis program by means of a written proposal submitted to the chair by the end of the first week after spring vacation. Written guidelines for such proposals are available in the chair’s office and on the program website. The proposal should have been discussed with at least two faculty members, and at least one faculty advisor from each discipline must be solicited by the student prior to submission of the proposal.

Final decisions about admission to the honors program will be made in late May after spring grades become available.

To achieve the degree with honors in Political Economy, the thesis must be completed by the end of winter study period and be judged of honors quality by a committee consisting of the two advisors and a third reader. A thesis judged to be of particular distinction will qualify its author for the degree with highest honors.

STUDY ABROAD

Despite the fact that Political Economy requires more courses than the typical major, many Political Economy majors go abroad. Since POEC 250 and POEC 253 are offered in the fall, students considering spending only one semester abroad often find spring to be the better choice. Nonetheless, many students study away for the fall or the whole year. Political Economy majors have often been overrepresented in Williams at Oxford. Students planning to be abroad in the fall should take POEC 250 in their sophomore year if at all possible. Similarly, it is necessary to plan ahead to find the best way to satisfy the empirical methods requirement (POEC 253 or ECON 255) before the fall of the senior year. The easiest major credits to obtain

or PSCI 265 The International Politics of East Asia
or PSCI 320 Immigration Politics in the U.S.
or PSCI 323 The Geopolitics of Energy
or PSCI 324 International Legitimation
or WGSS 211/ECON 211 Gender in the Global Economy
abroad are the electives in Political Science and Economics.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, although because so many of the classes in the program are Williams-specific, there is an effective limit of 2-3.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Only Economics or Political Science courses can be awarded credit, and they must satisfy one of the elective categories (or in rarer cases one of the ECON or PSCI intro requirements).

Are there specific major requirements that cannot be fulfilled while on study away?

Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The POEC major requires 3 specific POEC courses (250, 401, and 402), and one empirical methods course (POEC 253 or ECON 255). The POEC courses are only offered in a single semester (fall for 250, 253, and 401 and spring for 402), and 401 and 402 must be taken in the senior year. 253 can be replaced with ECON 255, which is offered in fall or spring, but ECON 255 has an additional prerequisite of STAT 161, STAT 201, or STAT 202 (STAT 101 can also serve as a prerequisite, but only if taken prior to the fall of 2018). Studying abroad in POEC requires careful planning.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

No, but students have discovered upon reaching their destination that the course is different than described so were forced to change or not count the course.

POEC 22 (W)  Volunteer Income Tax Assistance

Crosslistings: ECON22 / POEC22

Secondary Crosslisting

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Materials/Lab Fee: $15
POEC 31 (W) Honors Thesis: Political Economy
To be taken by students registered for Political Economy 493.

Class Format: thesis
Distributions: (D2)

POEC 99 (W) Independent Study: Political Economy
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

POEC 250 (F) Economic Liberalism and Its Critics (WI)
Crosslistings: POEC250 / PSCI238 / ECON299

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: lecture/discussion
Requirements/Evaluation: eight short essays, several short homework assignments, and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors
Enrollment Limit: 35
Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major
Expected Class Size: 35
Department Notes: formerly POEC 301
Distributions: (D2) (WI)
POEC 253 (F) Empirical Methods in Political Economy (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.
Class Format: lecture/discussion
Requirements/Evaluation: problem sets, group projects, and three exams
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 25
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Department Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (QFR)
Attributes: EVST Methods Courses; PHLH Statistics Courses; POEC Required Courses;

POEC 397 (F) Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.
Class Format: independent study
Distributions: (D2)

POEC 398 (S) Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.
Class Format: independent study
Distributions: (D2)

POEC 401 (F) Contemporary Problems in Political Economy
This course examines contemporary problems in political economy in the United States and across the developed world. Using both Economics and Political Science methods of analysis, students study the exercise of power and the accumulation of wealth in the world today as well as central public policy debates around those processes. We begin with a discussion of the philosophical foundations of economic policy-making. We then discuss welfare states in comparative perspective with special attention to the development of the American welfare regime. The remainder of the course is dedicated to particular issue areas of contemporary concern: pensions, health insurance, education, family policy, and immigration. The goal of this course is to build upon theoretical debates encountered in POEC 250 as well as to prepare students for the public policy projects they will do in POEC 402.

**Class Format:** seminar

**Requirements/Evaluation:** one 8- to 10-page paper; one 12- to 15-page paper; in-class group presentations; class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ECON 110 and 120; PSCI 201 or 203, or equivalent; PSCI 202 or 204, or equivalent; POEC 253 or ECON 255, or permission of instructor; open to non-majors

**Enrollment Limit:** 20

**Enrollment Preferences:** Political Economy majors

**Expected Class Size:** 20

**Department Notes:** required in the Political Economy major

**Distributions:** (D2)

**Attributes:** GBST Economic Development Studies Electives; POEC Required Courses

**Fall 2018**

SEM Section: 01  TF 1:10 pm - 2:25 pm  Darel E. Paul, David J. Zimmerman

**POEC 402 (S) Political Economy of Public Policy Issues**

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

**Class Format:** seminar with student presentations

**Requirements/Evaluation:** group policy projects including an 80- to 100-page paper and 2-hour presentation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** POEC 253 or ECON 255, POEC 250, POEC 401; open only to Political Economy majors

**Department Notes:** required in the Political Economy major

**Distributions:** (D2)

**Attributes:** EXPE Experiential Education Courses; POEC Required Courses

**Spring 2019**

SEM Section: 01  TF 2:35 pm - 3:50 pm  William M. Gentry, Cathy M. Johnson

**POEC 493 (F) Honors Thesis: Political Economy**

Political Economy independent study.

**Class Format:** independent study

**Distributions:** (D2)

**Fall 2018**

HON Section: 01  TBA  Sara LaLumia
Politics is most fundamentally about forging and maintaining community, about how we manage to craft a common destiny guided by shared values. Communities need a way to reconcile conflicts of interest among their members and to determine their group interest; they need to allocate power and to determine its just uses. Power may be used wisely or foolishly, rightly or cruelly, but it is always there; it cannot be wished away. Political science attends to the ways that social power is grasped, maintained, challenged, or justified. The contests over power and the values that it should be used to further give politics its drama and pathos. The effort to understand politics aims not only to describe and explain, but also to improve political life.

The Political Science major is structured to allow students either to participate in the established ways of studying politics or to develop their own focus. To this end, the department offers two routes to completing the major, each requiring nine courses. We invite students either to organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, and comparative politics), or to develop individual concentrations reflecting their particular interests, regardless of subfields.

**MAJOR**

**Subfield Concentration Route:** Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 201-204, two electives of the student's choice at the 200 or 300 level and the senior seminar (or an individual project) in the student's subfield. Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield courses, in addition to taking Political Science 203 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth requirement). The faculty advisor must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level courses can count toward the major.

**Individual Concentration Route:** Alternatively, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, four are electives at the 200 or 300 level, including one from 201-204, and one is a senior seminar or individual project. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level courses can count toward the major.

**ADVICEMENT**

When a student chooses to major in Political Science (usually at the end of the sophomore year), they may register with any Political Science faculty member. The registering faculty member will ask for preferences for a permanent faculty advisor and will assist undecided students in finding an advisor. In all cases, students will be paired at the beginning of junior year with an advisor who will continue with them through graduation.

**COURSE NUMBERING**

The course numbering used by the Political Science Department reflects the format and specialization of a course. The 100-level courses are designed to address political topics from multiple subfield perspectives; many are seminars designed for first-year students. The 200-level courses are divided between our core courses and our electives. The core courses, numbered from 201-204, serve as introductions both to the substance of politics and the subfields organizing the study of politics. The introductory subfield course must be completed before the senior year. The 200-level elective courses delve into political processes, problems and philosophies. 100-level and 200-level courses have no prerequisites. 300-level courses are more specialized and have prerequisites. 400-level courses are senior seminars offered for students in the major; senior seminars also are open to juniors and to non-majors if space permits. In general, the main subfield of non-core courses can be read from the middle digit of the course number: 0
WINTER STUDY PROJECT

The department welcomes relevant WSP 99 proposals that can make important contributions to the student’s understanding of public affairs and politics. Majors, seniors, and students without previous WSP 99 experience have preference.

THE JUNIOR YEAR ABROAD

A major in Political Science can be readily and usefully combined with study off-campus. Generally, only one course taken per semester abroad in a program approved by the College may be counted toward the requirements for a degree in Political Science.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. It also depends which institution they are attending. If we have experience with it (Oxford, LSE) it is easier for us to approve.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Typically we allow as many as two courses to count for major credit. In some circumstances, when a student spends a year abroad, we may consider three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No although this depends on the course. If, after considering description and institution we feel it is not rigorous enough, we will not count it.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. We do not allow the senior seminar requirement to be fulfilled by study abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. One such required course (either Ancient or Modern Political Thought for those specializing in political theory within the major) can be fulfilled by an appropriate study abroad course.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Yes, usually because of communications breakdown where the student did not keep department adequately informed of evolving plans.

PREPARATION FOR GRADUATE STUDY

The Department recommends that students contemplating graduate school, especially if they plan to study fields outside political theory, take a course in research and quantitative methods, such as PSCI 300 or, if it is not taught, ECON/POEC 253.

THE DEGREE WITH HONORS IN POLITICAL SCIENCE

To become a candidate for honors the student must (1) apply in the second semester of the junior year, (2) submit a research proposal acceptable to the department’s honors committee and for which an appropriate advisor is available, (3) have a record of academic excellence in Political Science. The last includes not only the student’s cumulative GPA in Political Science, generally 3.5 or above, but also demonstrated research and writing skills, evidenced by one or two examples of graded work submitted along with the thesis proposal. Along with the successful completion of a high-quality thesis, the degree with honors in Political Science requires enrollment in the year-long senior thesis seminar, in addition to the other nine (9) courses of the regular major requirements.

ADVANCED STUDY IN AMERICAN POLITICS

The Department of Political Science provides the opportunity for an unusually gifted student to engage in an entire year’s advanced research in American politics under singularly favorable conditions. Supported by income derived from an endowment fund, the student, designated the Sentinels of the Republic Scholar (after the name of the fund), receives a substantial research stipend to cover costs associated with the proposed project.

This unique research course (Political Science 481-W33-482) is designed to encourage the pursuit of excellence among the most talented Williams students of Political Science. Admission to it is awarded to the most distinguished candidate on the basis of demonstrated capacity for outstanding work and of the project’s promise for creative contributions to the understanding of American politics, political institutions and thought.
PSCI 11 (W)  Editorial Cartooning and the Art of Propaganda
Crosslistings: ARTH11 / PSCI11

Secondary Crosslisting

This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

Class Format: afternoons

Requirements/Evaluation: editorial cartoons to be produced for each class meeting for evaluation by the class; final cartoons to be published in The Williams Record

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to non-art majors

Materials/Lab Fee: $50

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA    Chan Lowe, Eugene J. Johnson

PSCI 12 (W)  First Amendment Law and Policy

The Constitution is a covenant among the people, the states and government of the United States that substantially defines the unique American experiment and experience. First numerically, and in importance to many Americans, is the Constitution's guarantee of free thought and expression, encompassing the First Amendment's freedoms of speech, press, assembly, petition and religion. Over time the Supreme Court of the United States ("SCOTUS") and the "inferior" federal courts and state courts have given the First Amendment special and exalted status, ruling it contains "preferred freedoms" that are the "matrix, the indispensable condition of nearly every other form of freedom," and the mechanisms Americans employ to "form a more perfect union" through democratic processes. The course will provide students an intensive examination of First Amendment law and policy, with substantially more time and attention devoted to these rights than possible in a survey civil liberties or constitutional law course. We will examine the most important First Amendment decisions and influential concurring and dissenting opinions dealing with government action purportedly infringing a First Amendment right. We will also examine how free expression fares in and shapes American society at large. A private employer's, college's or other institution's restriction of expression may not violate the First because it is not government action, but the First and its judicial interpretation affects the discussion and resolution of non-government conflicts involving speech, political activity and religious exercise. The course will explore the rationale and implications of permitting and fostering or limiting certain categories of free expression or in specific contexts (libel--obscenity--"fighting words"--hate speech--depictions of violence and cruelty--child pornography--and others) and in various settings, public and private, involving and outside government. The course will be offered at a time when First Amendment rights are being challenged, especially press freedoms and free speech on college campuses, including Williams'. With the press held in historically low esteem by the public and under attack from the current federal
administration the course will incorporate lessons and discussions involving these matters. Some portion of each class will be devoted to current free expression issues in America, in its local communities and on the Williams" and other college campuses. Students will be assigned to identify, research and lead discussions of such issues. The course requires reading link (https://docs.google.com/document/d/1puCX7gz2Rfh_3Km2tYCIU0EL7JS8RQaWm5KtG84k/edit?usp=sharing), class participation and writing. Class participation will be important because the course will be taught Socratically (as most law school classes are with the teacher asking and students answering questions -- and many in the other direction). There will be an optional SCOTUS simulated oral argument at the end of the winter study. Adjunct Instructor Bio: Lloyd Constantine '69 has argued many constitutional law cases in SCOTUS and "inferior" federal courts. He has taught law school (Fordham) and both civil liberties and first amendment law and policy to undergraduates (SUNY).

Class Format: mornings
Requirements/Evaluation: 10-page paper
Prerequisites: none, but if oversubscribed priority will be given to students who have taken constitutional law
Enrollment Limit: 25
Enrollment Preferences: students who have a background in or have taken constitutional law or civil liberties will be given priority
Materials/Lab Fee: $123 plus cost of books

Winter 2019
LEC Section: 01

PSCI 13 (W) The Art of War
This course will examine the meaning and uses of the classical Chinese text, The Art of War, by Sunzi. Students will consider Sunzi's insights both in the context of ancient Chinese philosophy and in terms of their contemporary relevance. The first half of the course will concentrate on placing Sunzi in historical and philosophical context; the second half will examine how The Art of War has been used in a variety of modern fields.

Class Format: mornings
Requirements/Evaluation: 10-page paper; mandatory class attendance and participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: students with background in Chinese studies will have a preference; after that, seniority
Materials/Lab Fee: $10 plus cost of books
Distributions: (D2)

Winter 2019
LEC Section: 01 TBA George T. Crane

PSCI 14 (W) The CIA and the Politics of Intelligence
Crosslistings: LEAD14 / PSCI14
Primary Crosslisting
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency. Adjunct Instructor Bio: Donald Gregg '51 served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. He is now chairman emeritus of The Korea Society, 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. He is now chairman of the Pacific Century Institute in Los Angeles.

Class Format: afternoons
Requirements/Evaluation: evaluation will include class attendance and participation, and a short, 3- to 4-page retrospective paper on the course and its content
**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference to PSCI and LEAD students

**Materials/Lab Fee:** cost of book ($25)

**PSCI 15 (W)  Barack Obama: A First Draft of Presidential History**

**Crosslistings:** LEAD15 / PSCI15

**Secondary Crosslisting**

Barack Obama's election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement—and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama's leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read (and view) primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama's presidency; the final assignment will be the essay itself.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** one course in American politics, Leadership Studies, and/or 20th century American history

**Enrollment Limit:** 19

**Enrollment Preferences:** preference will be given to LEAD concentrators and PSCI majors

**Materials/Lab Fee:** $12 plus cost of books

**PSCI 16 (W)  The Martial Art of Politics--Aikido, Gandhi, and King**

"The techniques of Aikido are intended as tools for us to use in examining the nature of power, to engage in uncompromising self-scrutiny, and to realize our potential as powerful, compassionate, creative, self-aware human beings."—Mary Heiny Sensei Aikido is a Japanese martial tradition that combines the samurai arts of swordwork and grappling with the philosophical desire to forge a path of harmony in the face of determined opposition. As such, it addresses situations of conflict that manifest themselves physically, but also offers insight into how to redirect the energies--social, psychological, or political--that might otherwise become conflict in one or another aspect of our lives. As a martial art, Aikido teaches us more than simply how to survive; it also teaches us how to physically express our noblest intentions in movements that protect not only ourselves but the attacker as well. Martin Luther King famously observed that "Returning violence for violence multiplies violence, adding deeper darkness to a night already devoid of stars." Aikido, a physical expression of nonviolence, is the alternative approach made manifest—the light that can drive out darkness and the love that can drive out hate. The physical training (10 am-noon each weekday morning in Currier Ballroom) will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. The academic component of the course will engage with how the physical training resonates with selected writings on nonviolence (Mohandas Gandhi, Martin Luther King Jr., and theoretician Gene Sharp) and the tactical practices of successful nonviolent protest campaigns. Each student will research and profile a successful nonviolent campaign, explain why it worked, explain what was "aikido" about it, and in small groups will pick a target and draft a plan for a contemporary protest campaign on a topic of their choosing. Each group will be responsible for crafting speech text, a tactical analysis of their proposed campaign, and a social media plan. Actually implementing the campaign is not a part of the course. By integrating physical and intellectual components, the course seeks to forge in each student a stronger and more coherent perspective on how the pursuit and embodiment of harmony can resolve the conflicts that we so often encounter. Joining us for several sessions will be local scholar Stewart Burns, author of the award-winning MLK biography To the Mountaintop. Additional relevant experiences, such as meditation practice, outdoor misogi, and feature films (Gandhi, Selma, etc.) will be woven into the course as schedules permit. Students do not have to
be especially athletic, and in Aikido women train as equals with men. Students are encouraged to correspond with the instructor (rkent@williams.edu) before registration begins if they have questions. Adjunct Instructor Bio: Robert Kent ’84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan, where he helped run the youth program for 18 years. He is currently President of Aiki Extensions, Inc, a nonprofit that supports programs that bring the strategic insights and practical wisdom of Aikido into non-traditional settings. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity. This will be the twelfth year he’s offered a Winter Study class.

**Class Format:** daily, 10 am-noon for aikido training, + 2 times a week for academic discussions, typically over lunch

**Requirements/Evaluation:** quality of participation in both physical and intellectual course components (historical analysis, class discussions, final project)

**Prerequisites:** same physician's approval on file as the school requires to participate on sports teams

**Enrollment Limit:** 20

**Enrollment Preferences:** if overenrolled, selection will be based on a questionnaire

**Materials/Lab Fee:** $175

**PSCI 17 (W) The Third World City**

Crosslistings: GBST17 / PSCI17

**Primary Crosslisting**

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference to PSCI majors and GBST concentrators

---

**PSCI 18 (W) Girl Meets World: Films from 5 Continents**

Crosslistings: WGSS17 / PSCI18

**Primary Crosslisting**

This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls' own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the
following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

Class Format: afternoons

Requirements/Evaluation: active class participation and either 3 policy memos (3-4 pages each) or one 10-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to Political Science and WGSS majors

Materials/Lab Fee: cost of books

Winter 2019

PSCI 19 (W) Law as a Tool for Social Justice

The law may be deployed to achieve social justice in different ways: through the courts, legislation, and the ballot. While we will see the law work positively, we also will examine its limitations and failures due to societal, economic and human obstacles. We will read 2 books in full and 2 in part, all of which relate compelling stories. We begin with Devil in the Grave (winner, 2013 Pulitzer for non-fiction), which is about a 1949 Florida rape case involving 3 black men who are defended against the charge of raping a white woman by Thurgood Marshall, at risk to his life. While we encounter the brutal obstacles to obtaining justice in the deep South, the book also is in part a mini-biography of Marshall, and we will read about the great victories he achieved nationally in Supreme Ct. cases involving voting, housing and education. Next is Gideon's Trumpet, a classic in the field of constitutional law by Anthony Lewis about winning the right of a pauper to be provided with a lawyer in state felony cases. The book elegantly describes the structure of our Federal system, delineating the tension between the rights reserved to the states in the area of criminal law, and the protection provided to individuals by the Bill of Rights. The third book is Winning Marriage by Marc Solomon. It narrates the incredibly successful effort by the LGBT community to win for same-sex couples the right to marry, focusing on gritty political battles at the state level, moving to landfall Supreme Ct. decisions. We will read the penultimate Obergfell decision. The last book is Jonathan Harr's A Civil Action (winner, 1996 Nat'l Book Critics Circle Award for non-fiction). The issue is environmental justice and the case is a lawsuit between private litigants: Woburn MA residents who suffered leukemia and other illnesses arising out of toxic chemicals dumped by two large corporations. A David, a very small law firm, takes on Goliath, two giant companies and their huge law firms. Adjunct Instructor Bio: Richard Pollet graduated from Williams in 1969 cum laude, with Honors in Poli Sci, and thereafter obtained a law degree from Columbia Law School. He spent 40 years practicing law, the last 26 as General Counsel of J. Walter Thompson Company (JWT), retiring in 2013. Subsequently, he has done some consulting for WPP, JWT's parent company, and last taught this Winter Study course in Jan. 2018.

Class Format: mornings

Requirements/Evaluation: 10 page paper

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: seniors first, then juniors, sophomores and first-years

Materials/Lab Fee: approximately $70 for books

Winter 2019

PSCI 20 (W) The Personal is Political: A Nonfiction Writing Workshop

Since St. Augustine's Confessions, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual...reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project--memoir, personal essay, or a hybrid form--the final draft of which
will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom—roughly twenty hours a week—during which you'll be engaged in the writing process and reading for class. Readings for the course will be selected from: Baldwin, James. "Notes of a Native Son" Biss, Eula. Selections from Notes from No Man's Land Coates, Ta-Nehisi. Selections from Between the World and Me Hurston, Zora Neale. How It Feels to be Colored Me Khan-Cullors, Patrisse and Asha Bandele. Selections from When They Call You a Terrorist: A Black Lives Matter Memoir Nelson, Maggie. Selections from The Argonauts Rankine, Claudia. Selections from Citizen Smash, Sarah. "Poor Teeth" and others Adjunct Instructor Bio: Julia Munemo holds her MFA in creative nonfiction and has completed a memoir about race, love, mental illness, and her father—a writer of racially charged pulp fiction. Her manuscript explores how her legacy conflicts with her present-day life as one half of an interracial marriage and the mother of mixed-race children. She teaches writing workshops in Williamstown and Maine.

Class Format: mornings
Requirements/Evaluation: 10-page paper

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits
This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Class Format: Meeting prior to start of winter study and again after conclusion
Requirements/Evaluation: 10-page paper; 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; daily journal; participation in final meeting
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: selection will be based on a resume and letter of interest; at the time of preregistration interested students should send a resume and letter of interest to Paula Consolini (pconsolini@williams.edu)
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Nicole E. Mellow, Paula M. Consolini

PSCI 22 (W) Learning Intervention for Teens
This course pairs energetic Williams students with adolescents involved in the Juvenile Court System of Berkshire County. Judges assign teenagers (ages 13-17) to this alternative sentencing program—this is certified as an official Commonwealth of Massachusetts probation program—when their
absence from or misbehavior in schools has been a central feature of their delinquency. The goal of this program is to show these teens that learning can be fun, can center on topics that matter to them, and can be empowering. If the teens see school as something other than a form of incarceration, they will be motivated to stay there and to succeed. Each Williams student helps a teen investigate, develop a report on, and present their conclusions about a topic of the teen’s choosing. In the past these have ranged from BMX, to the history of North Adams, to the causes of teen methamphetamine use. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work via PowerPoint to an audience that includes the Berkshire County Juvenile Court judges and probation officers, town and city chiefs of police, County District Attorney and assistant DAs, the teens’ peers and families, Williams faculty and community members. Williams students gain experience serving in an official capacity, learn to mentor teenagers, and gain insight into the causes of and solutions to the incidence of juvenile crime and underachievement. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation, and keep a weekly journal detailing their meetings. {This is a student-led course.) In order to enroll in the course, all students must write a paragraph explaining why they want to take it. Students should email their paragraphs to student coordinator Marissa Levin Shapiro at mls3@williams.edu and cc: cshanks@williams.edu

Class Format: afternoons
Requirements/Evaluation: journal and final reflection totaling 10-15 pages, final project with teenager
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: by paragraph of interest
Materials/Lab Fee: none

PSCI 118 (F)  Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions by actively consulting political theory and empirical research in the social sciences. Our investigation will include class-time collaboration with a similarly structured undergraduate course being taught by a sociologist at the University of North Carolina and may include an optional weekend study trip.

**Class Format:** seminar

PSCI 120 (S)  America and the World

Crosslistings: LEAD120 / GBST101 / PSCI120

**Primary Crosslisting**

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and
Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, class participation, and final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

PSCI 125 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Crosslistings: PSCI125 / LEAD125

Secondary Crosslisting

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. Looking at leaders from ancient Greece to the contemporary United States, we will explore the big questions of leadership studies: What makes a leader successful? Where does legitimacy come from? What (if anything) distinguished a leader from a demagogue? Do good leaders make good followers, or vice versa? What is the relationship between leadership and morality--can the ends justify the means? Why do good leaders sometimes lead badly? How can disempowered people exercise effective leadership? What functions does leadership fill, and what challenges do leaders face, in modern democratic states?

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and cumulative final exam

PSCI 127 (S) America First? The Trump Era and the Future of World Politics

Crosslistings: PSCI127 / LEAD127

Primary Crosslisting

"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindberg in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal international internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free
trade, and conflicts in the Middle East.

**Class Format:** lecture

**Requirements/Evaluation:** two analytical essays, short response papers, and final group project

**PSCI 135 (S) Politics after the Apocalypse**

The zombies are coming! Climate change will destroy us! Bird-flu pandemic! To our horror and delight, reminders are everywhere that the end is near. Some of these projected apocalypses are alarmist, some fanciful...and others all too realistic. What shape will politics take after the apocalypse? What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? And what does it say about politics today that we are so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? In this class, we reconsider what politics is and should be by contemplating accounts of its destruction and rebirth in television, film, literature, activism, social science, and critical theory. We will approach these sources as analogous to political theory's classic thought experiment of the "state of nature" and social contract. And we will consider what it tells us about our time that we are so eager to imagine ourselves at the beginning of the end. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. Two papers, one close-reading assignment, and one post-apocalyptic short story or video are required.
Class Format: seminar
Requirements/Evaluation: formal and informal writing assignments, including a "close reading" assignment of 3-5 pages, two 5- to 7-page papers, one short story (approximately 12-20 pages and including an explanatory cover letter), and class participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first-year students
Expected Class Size: 15
Distributions: (D2)
Attributes: PSCI Political Theory Courses
Not offered current academic year

PSCI 140 (S) Religion and Capitalism  (WI)
Crosslistings: REL282 / SOC283 / PSCI140

Primary Crosslisting
Up through the 1960s it was popular to claim that the world was becoming increasingly and inevitably secular, with the development of modern capitalist social relations as a signature cause. Today the 'secularization thesis' is largely defunct. Instead one sees the vibrant return of religion to social, economic, and political prominence in most parts of the world--at the very same time we are experiencing through globalization and the information revolution the most dramatic economic advances in a century. This course investigates the historical and contemporary relationship between culture and economics, religion and capitalism, in their most encompassing forms. In investigating this theme, our cornerstone will be Max Weber's famous argument from The Protestant Ethic and the Spirit of Capitalism. Along the way we will discuss both the origins of capitalist society as well as its more recent transformations through the rise of the welfare state, consumerism, and globalization. We will also discuss changes in religion under the influence of capitalism including romanticism, Pentecostalism, moralistic therapeutic Deism, and the 'God gap' between largely theist Africa, South and West Asia, and the Americas on the one hand and largely atheist Europe and East Asia on the other. The focus of the course is on Christianity in Western countries both historically and in the present, but we will spend time discussing religion (particularly Pentecostalism) and capitalism in the contemporary Global South as well.

Class Format: seminar
Requirements/Evaluation: regular discussion questions, three 5- to 6-page papers, in-class paper workshops, 20- to 24-page final term paper incorporating earlier papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: open to first-years and sophomores only
Expected Class Size: 14
Distributions: (D2) (WI)
Attributes: PSCI Comparative Politics Courses; PSCI Political Theory Courses;

PSCI 141 (S) Bandits and Warlords
Crosslistings: LEAD141 / GBST141 / PSCI141

Primary Crosslisting
A leading scholar once quipped that political communities "qualify as our largest examples of organized crime." He wasn't far off: governments are meant to protect their citizenry, but as the #bringbackoursgirls or the KONY 2012 campaigns reveal, sometimes they fail. Bandits emerge, racketeers flourish, and warlords replace governments. By looking at Boko Haram, Séléka rebels, Al-Shabaab, Somali pirates and the Lords Resistance Army, this course explores the conditions that lead to the collapse of government protection and its replacement by bandits and warlords. We will then use this understanding to examine prominent examples of banditry and warlordism in Latin America, the Middle East and Europe.

Class Format: lecture
Requirements/Evaluation: class participation, five short papers and a final exam
PSCI 150 (F) Democracy and the State: A Comparative Study
Crosslistings: GBST101 / PSCI150
Secondary Crosslisting
This introductory course examines major western political theories and ideologies, such as Liberalism and Marxism, and then examines their application in selected regional case studies. The social contract theories of Hobbes, Locke and Rousseau form the basis of the course.
Class Format: seminar
Requirements/Evaluation: short papers, final exam
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first year students
Expected Class Size: 15
Distributions: (D2)
Attributes: LEAD Facets or Domains of Leadership
Not offered current academic year

PSCI 160 (S) Refugees in International Politics (DPE) (WI)
Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants, evaluate international organizations' roles in managing population displacement, and consider refugee camps in theory and example. In whose interest is the prevailing system? Who might change it, and how?
Class Format: tutorial
Requirements/Evaluation: eleven graded essays: five primary, five critique, and one statement
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 10
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: Refugees are, by definition, those persecuted because of their political allegiance or membership in an ethnic, racial or religious group; having lost the protection that nationality should give them, they become de facto stateless. This course examines the way in which states oppress people and the question of why we privilege these categories of oppression. WI: Students will write, and will write about writing, every week.

PSCI 178 (F) Music and Politics (WI)
This course examines how musical sound and musical discourse change, enable, and inhibit citizen formation and the functioning of a well-ordered society. We will take a very wide definition of "politics," as music can have political meaning and effects far beyond national anthems and propaganda. For instance, musical sound is often read as a metaphor for political structures: eighteenth-century commenters pointed out that string quartets mirrored reasoned, democratic discourse, and twentieth-century critics made similar arguments about free jazz. Beliefs about music can serve as a barometer for a society's non-musical anxieties: Viennese fin-de-siècle critics worried that the sounds and stories of Strauss's operas were causing moral decline, an argument that should be familiar to anyone who reads criticism of American popular music. Finally, a pervasive strand of Romantic thought holds that (good) music, by its nature, is apolitical—what might it mean to deny social relevance to an entire field of human expression? We will read classic philosophical texts on art and politics by Schiller, Kant, Schopenhauer, Marx, Adorno, and others, and pair them with contextual studies of works of Western classical music from the last two hundred years and popular music of the last hundred years.

**Class Format:** tutorial

**Requirements/Evaluation:** Students will be expected to write a 5-7 page paper every other week, and submit written comments on their tutorial partner's paper in off weeks.

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 8

**Distributions:** (D1) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under MUS; meets Division 2 requirement if registration is under PSCI

Not offered current academic year

**PSCI 201 (F) Power, Politics, and Democracy in America**

Begun as an experiment over 200 years ago, the United States has grown into a polity that is simultaneously praised and condemned, critiqued and mythologized, modeled by others and remodeled itself. This course introduces students to the dynamics and tensions that have animated the American political order and that have nurtured these conflicting assessments. Topics include the founding of the American system and the primary documents (the Declaration of Independence, the Constitution, and the Federalist Papers), the primary institutions of national government then and now (Congress, the Presidency, and the Supreme Court) and the politics of policy-making in the United States. We study structures, processes, key events, and primary actors that have shaped American political development. In investigating these topics, we explore questions such as these: How is power allocated? What produces political change? Is there is a trade-off between democratic accountability and effective governance? How are tensions between liberty and equality resolved? Do the institutions produce good policies, and how do we define what is good?

**Class Format:** lecture/discussion

**Requirements/Evaluation:** depending on the section, some combination of response papers, short-to-medium papers, exams, and class participation

**Prerequisites:** this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances

**Enrollment Limit:** 35

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 35

**Distributions:** (D2)

**Attributes:** POEC Required Courses; PSCI American Politics Courses
PSCI 202 (F) World Politics: An Introduction to International Relations

"World politics is often taken to be an arena of human interaction unto itself, where the concepts which serve us well in understanding domestic politics and our everyday public lives -- democracy, law, morality, authority -- are displaced by their opposites -- rule by the strong, use of force, raison d'état, anarchy. In particular, the discipline of International Relations claims special responsibility for analyzing and explaining this arena. But is world politics really so different? We now live in a world in which resolutions of the United Nations Security Council carry the aura of law and authority; human rights are held up as universal moral standards; international treaties regularly restrain supposedly sovereign states in regulating their domestic economies; and the vast majority of wars are now 'civil' ones. This course is about politics at the world scale and the myriad ways in which scholars and practitioners interpret and explain it."

Class Format: lecture

Requirements/Evaluation: some combination of short papers, midterm exam/paper, final exam, and class participation
Extra Info: may not be taken on a pass/fail basis

PSCI 203 (F) Introduction to Political Theory

Is politics war by other means? Is it merely a practical way to meet our needs? Or is it, rather, the activity through which citizens pursue justice and the good life? And what is justice? How can it be established and secured? Where does it apply? To whom? What are the powers and obligations of citizenship? Who decides? On what basis? Political theory addresses questions such as these as it investigates the fundamental problems of how people can, do, and ought to live together. The questions have sparked controversy since the origins of political thinking; the answers remain controversial now. This course addresses the controversies, drawing examples from struggles over such matters as racism, colonialism, revolution, political founding, economic order, and the politics of sex and gender, while focusing on major works of ancient, modern, and contemporary theory by such authors as Plato, Aristotle, Machiavelli, Hobbes, Rousseau, Mill, Marx, Nietzsche, Beauvoir, Arendt, Fanon, Rawls, Foucault, and Young. Themes may include power, authority, obligation, freedom, justice, equality, democracy, liberalism, capitalism, feminism, and violence, though the emphases will vary from semester to semester.

Class Format: lecture/discussion

Requirements/Evaluation: two or three papers; some sections also have a final exam
Prerequisites: none; this is an introductory course, open to all, including first-year students
Enrollment Limit: 25
Enrollment Preferences: first-years and sophomores
Expected Class Size: 25
Distributions: (D2)

Fall 2018
PSCI 204 (F) Introduction to Comparative Politics: Nationalism, Religion, and State Power

While the field of international relations focuses on the actions of sovereign states towards one another, the comparative study of politics looks mainly at what goes on inside countries, the domestic dynamics of political power and institutions. It asks, for example, where sovereign states come from, why political life differs so much from one country to another, and how political regimes, structures and institutions change, sometimes suddenly. Thus comparative politics is often about what citizens of countries with stable and relatively effective governments take for granted (and why they may take it for granted). In this course, we will examine several broad historical-political themes: the rise of modern state structures; the emergence of capitalism; the articulation of national identities; the spread of liberalism and democracy; the roots of terrorism; and the effects of war and religion on politics. Worthwhile answers will require us to look at them theoretically, historically, comparatively, and through contemporary developments.

Class Format: lecture/discussion
Requirements/Evaluation: four 2-page essays and a final exam

PSCI 205 (S) Political Leadership

Crosslistings: LEAD250 / PSCI205
Secondary Crosslisting

This course will examine the leadership strategies of American political leaders with an emphasis on the importance of communication strategies for public sector leaders. We will study these issues by examining local, state and federal political leaders and by answering key questions specific to the political realm. We will read and watch significant speeches of American political leaders, be visited by guests with deep knowledge and insight into the world of politics and read a variety of writings by academics and practitioners on the subject. We will explore questions such as "What characteristics mark successful communication and how do leaders craft a unique and effective communications style?" and "What strategic considerations are there for female political leaders and do they have different challenges in communicating?" The first series of classes will focus on communication taking a look at some of America's best political orators, the special requirements of crisis communication and the changes that new media has brought to the practice of politics and government. We will then explore the tenets of political strategy--both in campaigns and governing. This segment of the course will take a look at the tools used in crafting a strategy and how to put together a winning coalition. The final classes in the course will explore the unique challenges and opportunities facing select sub-groups of political leaders: women, celebrity candidates and officeholders and high-achieving young political leaders--operatives and elected officials.

Class Format: seminar
Requirements/Evaluation: three short papers and a final research paper

PSCI 206 (F) Dangerous Leadership in American Politics (WI)
Crosslistings: PSCI206 / LEAD206

Primary Crosslisting
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Class Format: tutorial

PSCI 208 (F) Wealth in America (WI)
The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This tutorial focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age, such as Andrew Carnegie's "Gospel of Wealth". Most of the readings, such as Pierson and Hacker's Winner-Take-All Politics, will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Class Format: tutorial
Requirements/Evaluation: five essays (5 pages each), five critiques (2 pages each), and one final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
PSCI 209 (F) Poverty in America
Crosslistings: PSCI209 / WGSS209

Primary Crosslisting
Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Class Format: lecture/discussion
Requirements/Evaluation: class participation, two or three short papers, and a final paper
Prerequisites: none

PSCI 211 (S) Do the People Govern? U.S. Public Opinion and Mass Political Behavior  (QFR)
America's founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public's general wishes. In addition to engaging this debate about what the public thinks about politics, we will also explore how people behave in the political realm. What are the forces that shape whether citizens pay attention to politics, vote, work on campaigns, protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage it?

Class Format: lecture
Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Attributes: POEC U.S. Political Economy + Public Policy Course; PSCI American Politics Courses;
From Tocqueville to Trump: Leadership and the Making of American Democracy  (DPE)
Crosslistings: PSCI212 / LEAD205
Secondary Crosslisting
America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Class Format: lecture
Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Leadership Studies concentrators and Political Science majors
Expected Class Size: 25
Distributions: (D2) (DPE)

Distribution Notes: DPE: This course examines the role of race, gender, and class in structuring the history of American politics and citizenship; efforts by marginalized communities to gain access to full citizenship; and the role of politics in shaping regimes of social difference. Using conceptual tools drawn from political science and history, it offers students a deep understanding of the roots of contemporary issues of difference, power, and equity in American public life as well as a better sense of how and why power relations and modes of inclusion/exclusion are subject to change.

PSCI 214 (F) Racial and Ethnic Politics in America

Arguably, the dominant discourse in the election and presidency of Barack Obama and the battle to succeed him was about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum, including Obama and Donald Trump; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Class Format: lecture

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

PSCI 215 (S) Race and Inequality in the American City

Crosslistings: PSCI215 / LEAD215

Primary Crosslisting

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Class Format: seminar

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

PSCI 216 (F)  American Constitutionalism I: Structures of Power
Crosslistings: PSCI216 / LEAD216

Primary Crosslisting

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendency of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: lecture/discussion

Requirements/Evaluation: three 5- to 7-page essays, a final exam, and class participation

To study the presidency is to study human nature and personality, constitution and institution, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with domestic priorities such as the protection of civil liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? Exploration of these questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive relations, the media, and emergency powers. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.

---

International law embodies the rules that govern the society of states. It spells out who can be a state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also determines the status of other actors, such as international organizations, heads of state, refugees, transnational religious institutions, and multinational corporations. International law is similar to domestic law, with one very crucial
difference: it is not enforced by a centralized, sovereign state. In other respects, it is the same: it protects the status quo, including the distribution of power among its members, it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. And like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice.

PSCI 224 (F) Neo-liberalism: What Is It and Why Does It Matter?

We live in the era of neo-liberalism. But what does this mean? This course will focus on neo-liberalism in comparative perspective, looking mainly at the US and Europe. It will consider how neo-liberalism is defined, the role of states in making and maintaining neo-liberalism, the centrality of markets to neo-liberal conceptions, and the kinds of politics that produced and are produced by neo-liberalism. Economically, the course will look at the institutional configuration of neo-liberalism, changes in economies, growing inequality, the financial crises, and prevalence of debt. Politically, the course will address changes in the role of government, what governments do and do not do, the growing influence of financial interests, the role of identities in mobilizing support for and legitimating governments, and the impact of these developments on the status of citizenship and democracy.

Class Format: seminar

Requirements/Evaluation: three papers—one 3-page, one 5-page, and one 10-page paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Political Science majors

PSCI 225 (F) International Security

Crosslistings: LEAD225 / PSCI225

Primary Crosslisting

This course deals with basic questions about war and peace. What are the major causes of war? Why do leaders choose to use violence in the pursuit of political objectives? How does the threat of war shape international politics and diplomatic outcomes? How are wars fought? What are their consequences? And why do states sometimes seek to cooperate to achieve their objectives and other times settle disputes through force or the threat of force? To address these questions, this course covers a number of specific topics: the causes, conduct, and consequences of the two world wars; the origins, course, and end of the Cold War; the influence of nuclear weapons on international security; regional conflicts and rivalries; regime type and international conflict; alliances and patron-client relationships; diplomacy; crisis decision-making; asymmetric conflicts; and great power politics, grand strategy, and international order.

Class Format: lecture

Requirements/Evaluation: class participation, one 6- to 8-page paper, midterm, final

PSCI 227 (S)  International Relations of the Middle East
This class will introduce students to the international political significance of the modern Middle East. The basic structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. Specific topics will include the role of the great powers in the area's politics; the Arab-Israeli conflict; the geopolitical implications of the Persian Gulf's oil reserves; terrorism; the causes and impact of the Iranian Revolution; the rise of Islamist movements; nuclear proliferation; the causes and consequences of the Iraq War; the Arab Spring and the Syrian crisis; and future prospects for stability in the area. By the end of the course, students will have not only gained insight into these specific issues but, more importantly, will have developed an ability to think critically and analytically about the arguments and ideas relating to the international relations of the Middle East espoused by different scholars and policymakers.

Class Format: lecture
Requirements/Evaluation: class participation, one 6- to 8-page paper, midterm, final

PSCI 228 (F)  International Organization
Tens of thousands of international organizations populate our world. IGOs, whose members are governments of sovereigns, range from the Nordic Association for Reindeer Research to the UN and NATO; NGOs, whose members are private groups and individuals, include the International Seaweed Association as well as the International Committee of the Red Cross. We will examine where they come from, what they do, and to whom they matter, and will examine their agency, efficiency, and accountability. We cover the history, structures and functions of international organizations using case studies.

Class Format: lecture
Requirements/Evaluation: three short papers, a midterm exam, one longer paper on an assigned topic
Prerequisites: none, open to first-year students
Enrollment Limit: 30
Enrollment Preferences: Political Science Majors

Distributions: (D2)
Attributes: PHLH Decision-Making by Institutions + Individuals; POEC International Political Economy Courses; PSCI International Relations
PSCI 229 (F) Global Political Economy

Thirty years ago the production, distribution, consumption and accumulation of goods, services and capital were predominantly national, organized by nation-states and within national territories. Today they all are increasingly global in scope, and nation-states find themselves more and more the subjects than the masters of mobile transnational corporations, international trade tribunals, global currency markets and natural resources cartels. All of these developments have direct and far-reaching effects on the power of states, the wealth of societies, and the life chances of billions of people around the world. This course offers a broad introduction to contemporary global capitalism, emphasizing the inherent and inseparable intertwining of politics and economics, power and wealth, the state and the market. The core of the course is made up of a broad analysis of global trade, global finance, development, and migration, with special attention to subjects such as free trade, foreign aid, industrial policy, currency wars, and refugee crises. We conclude the course with a close look at current global financial instabilities and the implications for the future of global capitalism.

Class Format: lecture/discussion
Requirements/Evaluation: one 5-7page paper, one 7-10page paper, in-class debate, final exam

PSCI 231 (F) Ancient Political Thought

Crosslistings: PHIL231 / PSCI231

Primary Crosslisting

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites--and consequences--of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: lecture/discussion
Requirements/Evaluation: three 7- to 8-page papers
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors
Expected Class Size: 18
Distributions: (D2)
Attributes: PSCI Political Theory Courses

Not offered current academic year

PSCI 232 (F) Modern Political Thought (WI)
Crosslistings: PHIL232 / PSCI232

Primary Crosslisting

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: lecture/discussion

Requirements/Evaluation: four formal papers of 5-7 pages; brief informal writing tasks inside and outside of class

Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: Political Science majors

Expected Class Size: 19

Distributions: (D2) (WI)

PSCI 233 (S) Rastafari: Dread, Politics, Agency

Crosslistings: REL261 / PSCI233 / AFR299

Secondary Crosslisting

The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15-page final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

PSCI 234 (F) Political Romanticism

Crosslistings: PSCI234 / COMP329 / ENGL322

Secondary Crosslisting

What is Romanticism, and how does it relate to the world-changing political upheavals that emerge along with it? Romantic literature emerged around the time of the French and Haitian Revolutions, and many Romantic authors were deeply sympathetic to the democratic principles of freedom and equality that inspired such political uprisings. Yet many also questioned revolutionaries’ attempts to realize such ideas by forcibly seizing control of
governments. These authors became interested in art and literature as alternative means of bringing about social and political change. In so doing, they invented ideas about the political power of art that are still very much with us today. This seminar examines these ideas through readings of works of Romantic literature, philosophy, and art that brought them into the world, while also considering how arguments subsequently developed for and against political Romanticism inform today's heated debates about the relationship between art and politics. May include works by Kant, Wordsworth & Colderige, C. Smith, P.B. Shelley, Géricault, Delacroix, Turner, Hazlitt, Hegel, Marx, C.L.R James, Carl Schmitt, Walter Benjamin, and Jacques Rancière.

Class Format: seminar

Requirements/Evaluation: evaluation based on two papers, 6 and 8-10 pages in length, and general participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

PSCI 235 (S) Survival and Resistance: Environmental Political Theory (WI)

Crosslistings: ENVI235 / PSCI235

Primary Crosslisting

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: seminar

Requirements/Evaluation: formal and informal writing assignments and class participation

Spring 2019
SEM Section: 01 TF 1:10 pm - 2:25 pm Laura D. Ephraim
Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: lecture/discussion
Requirements/Evaluation: eight short essays, several short homework assignments, and a final exam
Prerequisites: ECON 110 and 120 or equivalent; PSCI 201, 202, 203, or 204 (may be taken concurrently with POEC 250); open to non-majors

PSCI 241 (S) Meritocracy
Crosslistings: SOC241 / PSCI241
Primary Crosslisting
Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do eight of the country's nine sitting Supreme Court Justices. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy --- rule by the intellectually talented --- in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Class Format: seminar

PSCI 243 (S) Politics of Africa
Crosslistings: AFR256 / PSCI243
Primary Crosslisting
This course provides an introduction to the politics of contemporary Africa, emphasizing the diversity of African politics. It seeks to challenge the widespread image of African politics as universally and inexplicably lawless, violent, and anarchic. We begin by examining the colonization of Africa, nationalist movements, and patterns of rule in the first 30 years of independence. From there, we analyze the causes, achievements and limitations of the recent wave of political liberalization across Africa. We then consider patterns of economic development in Africa. Finally, we examine China's growing expansion into Africa and ask whether this is a new colonialism.

Class Format: lecture/discussion
Requirements/Evaluation: class discussion, four short papers and final exam
Prerequisites: none

Not offered current academic year

PSCI 247 (S) Political Power in Contemporary China
The People's Republic of China presents us with two grand political narratives: socialism and democracy. In the Maoist era, a distinctive understanding of socialism, which claimed to be a more genuine democracy, brought hope and, ultimately, tragedy to hundreds of millions of people. In the post-Mao era, Chinese politics has been driven by the need to redefine socialism in the wake of the world-historic calamities of the Great Leap Forward and the Cultural Revolution and, more recently, the end of the Cold War. The state cannot simply give up the socialist myth because without it the rationale for Communist Party hegemony evaporates. But China's rulers cannot avoid political reform, both ideological and institutional, because to do so heightens the legitimacy crisis born of Maoist failures. Within this context has emerged the contemporary Chinese democracy movement which, in all of its complexity, looks to both socialist discourse and Western practice to create a new politics that checks tyrannical abuses of state power and engenders a civil society. What is Chinese democracy now? What are its prospects and what is its relationship to the ideas of socialism?
PSCI 248 (F) The USA in Comparative Perspective (WI)
Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; nationalism and national identity; war and state-building; American exceptionalism, religion, and foreign policy; the role of political and economic institutions; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: tutorial; a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 257 (F) Iran, Islam, and the Last Great Revolution (WI)
Crosslistings: ARAB257 / PSCI257

Primary Crosslisting

The title and inspiration for this course comes from Robin Wright's book The Last Great Revolution. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

Class Format: seminar
Requirements/Evaluation: first short essay, 5 pages (15%); second short essay, 5 pages (15%); research paper, 15-20 pages (30%); participation,
**PSCI 261 (S) Gender and Conflict in International Relations**

Crosslistings: PSCI261 / WGSS262

**Primary Crosslisting**

This course explores gender dynamics in modern conflicts from the perspective of civilian societies, state militaries and non-state armed groups. The course will look at gender roles, relations, and symbols, throughout different phases of conflict including the precursors to conflict, during a conflict, and finally in the aftermath of active conflict. We will examine contemporary security debates related to gender including violent extremism, women in the military, and post-conflict reconstruction. We also look at case studies from several regions including Uganda, El Salvador, Sierra Leone, and Northern Ireland. Gender, in this course, will be used as a lens to understand different identities in conflict and expectations for women, men, boys, and girls, as well as examine femininities and masculinities. The course will use literature from scholars in the field of gender and conflict but will also include literature on conflict that does not have a gender perspective, with the aim to encourage students to add their own gendered analysis or questioning of current theories of conflict in international relations.

**Class Format:** seminar

**Requirements/Evaluation:** response papers (2-3 pages), take-home midterm essay exam (8-10 pages), take-home final essay exam (10-12 pages), class participation

---

**PSCI 262 (F) America and the Cold War**

Crosslistings: LEAD262 / HIST261 / PSCI262

**Primary Crosslisting**

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War
continue to influence how policymakers approach contemporary issues in American foreign policy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** one medium length paper, an in-class midterm and final exam, and a series of short assignments

**Prerequisites:** none; PSCI 202 is recommended but not required

---

**PSCI 265 (F) The International Politics of East Asia**

This course examines the political, economic, and cultural determinants of conflict and cooperation in East Asia. Throughout the semester, we will examine three distinct but inter-related aspects of international relations in East Asia: Security, economy, and culture by using some core concepts and theoretical arguments widely accepted in the study of international relations. We will engage some of the central questions and issues in the current debate on East Asia. Do East Asian countries seek security and prosperity in a way fundamentally different from the Western system? Is there a single best way to maintain regional order and cooperation across regions? Will a strong China inevitably claim its traditional place under the sun? Will Japan continue to live as a nation with enormous economic power but limited military means? What is the choice for South Korea between security alliance with the United States and national reconciliation with the North? What should be done to dissuade the authoritarian regime in North Korea from acquiring nuclear capabilities and lead it to different paths toward national survival? By the end of the semester, you will gain both a general perspective and substantive knowledge on East Asian international politics.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** midterm exam, team debate, take-home final exam, class participation and other assignments

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Political Science and Asian Studies majors

**Expected Class Size:** 25

**Distributions:** (D2)

**Attributes:** POEC International Political Economy Courses; PSCI International Relations Courses

Not offered current academic year

---

**PSCI 266 (S) The United States and Latin America (DPE)**

This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of U.S.-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War, with some emphasis on the latter. We consider how this history confirms or undermines influential views about U.S. foreign relations and about international relations generally. We also compare historical U.S. foreign policy toward the hemisphere to current policy globally. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America; the war on drugs; immigration and border security; and competition with China for influence. At the end we briefly reconsider current U.S. policies, in view of the economic and political evolution of Latin America, in historical perspective.

**Class Format:** lecture/discussion, with more lecture in the first half, more discussion and several in-class debates in the second

**Requirements/Evaluation:** a map quiz, two short papers, a longer paper, and either another policy paper and a regular final exam, or a 10-page research paper and a short final exam

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 20

**Distributions:** (D2) (DPE)
Distribution Notes: DPE: In the paper that considers the first part of the course, the students weigh to what extent U.S. policy toward Latin America was affected by the largely derogatory attitudes of U.S. diplomats toward Latin Americans. A unit in the second part of the course critically analyzes current U.S. immigration policy in this context.

PSCI 271 (F)  Religion and the State
Crosslistings: REL214 / PSCI271

Secondary Crosslisting
The First Amendment of the U.S. Constitution begins: “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.” What does “religion” mean in this formulation? Should “religion” be singled-out for exclusion from government? Are “religious” reasons ever legitimate reasons for laws, policies or popular political action? Should “religious” organizations be exempt from otherwise generally applicable laws? Is “religion” good or necessary for democratic societies? In this course we will respond to these and related questions through an investigation of “religion” as a concept in political theory. Particular attention will be given to the modern liberal tradition and its critics. Coverage will range from modern classics to innovative contemporary arguments. Classics may include John Locke's *A Letter Concerning Toleration*, selections from Jean-Jacques Rousseau's *The Social Contract*, James Madison's *Memorial and Remonstrance Against Religious Assessments*, Immanuel Kant's *Religion Within the Boundaries of Mere Reason*, John Stewart Mill's *Three Essays On Religion*, and John Dewey's *A Common Faith*. More recent arguments may come from John Rawls, Alasdair MacIntyre, Nicholas Wolterstorff, Martha Nussbaum, Jeffrey Stout, Winnifred Sullivan, Brian Leiter and Andrew Koppelman.

Class Format: seminar
Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final take-home exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Religion majors, those interested in being Religion majors, and Political Science majors concentrating on Political Theory
Expected Class Size: 25
Distributions: (D2)
Attributes: JLST Interdepartmental Electives
PSCI 273 (F)  Politics without Humans?
Crosslistings: SCST273 / PSCI273 / ENVI273

Primary Crosslisting
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: lecture/seminar
Requirements/Evaluation: class participation, three 6- to 8-page papers
Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students
Prerequisites: none
Enrollment Limit: 35
Expected Class Size: 15
Distributions: (D2)
Attributes: AMST Critical and Cultural Theory Electives; ENVI Environmental Policy; PHIL Related Courses; PSCI Political Theory Courses

PSCI 274 (S)  Revolutions (WI)

Why do revolutions occur, or perhaps more to the point, why do they fail to occur? When do they end and what do they actually achieve? What, in other words, is so revolutionary about revolutions? This course considers whether and how revolutions differ from social movements, coups d'etats, and armed rebellions by looking at a broad range of uprisings, from the "colored revolutions" and liberating "springs" of recent years to the classical examples of the French, American, Mexican, Chinese, Cuban, and Iranian revolutions, as well as the challenging cases of Haiti and South Africa. This class seeks a subversive politics of its own. There is a certain, shiny allure to revolutions, particularly within political science. In a field committed to the dry study and explanation of social phenomena, revolutions are the sexy exception, the example of politics par excellence. Our goal ought to be to call the allure into question, to ask whether this is a merit of undeserved distinction, particularly given recent developments in Egypt and Syria, as well as the ongoing consequences of revolutions in Russia, Iran, China, many years after the fact, after the last triumphant regiment rolled through capital streets.

Class Format: seminar
Requirements/Evaluation: first short essay, 3-5 pages (15%); second short essay, 3-5 pages (15%); final essay, 15-20 pages (20%); participation, (30%)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Political Science majors
Expected Class Size: 15
Distributions: (D2) (WI)
Attributes: PSCI Comparative Politics Courses;
PSCI 283 (F)  Dirty Politics: Regulating Hazardous Chemicals and Wastes
Crosslistings: ENVI283 / PSCI283

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Class Format: seminar
Requirements/Evaluation: participation, several smaller assignments, and a final research project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators, and Political Science majors
Expected Class Size: 15
Distributions: (D2)

PSCI 285 (F)  The Revolutionary Generation: Galaxy of Leaders
Crosslistings: HIST354 / LEAD285 / PSCI285

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: seminar
Requirements/Evaluation: three papers, several class presentations, and active participation in all discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar
Enrollment Limit: 12
Enrollment Preferences: students with a background in Leadership Studies, American History or American Political Science
Expected Class Size: 12
Distributions: (D2)
Attributes: HIST Group F Electives - U.S. + Canada; HIST Group P Electives - Premodern; LEAD American Domestic Leadership; LEAD Facets or Domains of Leadership
PSCI 286 (F)  Russian Politics under Vladimir Putin
Crosslistings: RUSS286 / PSCI286

Primary Crosslisting

In 1939, Winston Churchill has famously characterized Russia as a riddle wrapped in a mystery inside an enigma. In the 75 years that followed, Russian politics has continued to defy expectations and conventional explanations. The collapse of the Soviet Communist dictatorship in 1991 has caught most observers by surprise, and has led Russia on a path of political and economic liberalization of an unprecedented scope. But despite the initial optimism, these processes produced an economic system characterized by crony capitalism and an electoral authoritarian regime—a political system that formally espouses institutions like multipartyism, parliaments and elections, but violates democratic norms in practice. Why did Russia follow this particular trajectory? Why did Russia's political and economic transition fail to produce the intended results? What are the factors that gave rise to and sustain Vladimir Putin's system? And as Russia faces extraordinary challenges again—marked by the protest wave in 2011-12, the country's economic crisis, the wars in Ukraine and Syria, and the renewed confrontation with the West—what lessons can we draw for the future? This course will explore the key perspectives on these issues. The first part of the course will provide a concise overview of Russia's historical background, the roots of the communist collapse, and the country's subsequent trajectory. It will place particular emphasis on the events, processes and legacies that shaped Russia's transition, and its cataclysms and distortions. The second part of the course will look into the rise of the Putin regime, its key pillars, and its contradictions. The third part of the course will survey the impact of Putin's regime on Russia's economy, governance, identity politics and foreign relations. In this segment, we will also examine how protests and civil society activism shaped post-Communist Russian politics, and conclude with a discussion of the scenarios for the future trajectory of Russia. The course will approach many of these topics from a comparative perspective, contrasting how political, economic and social processes in Russia diverged from other countries in post-Communist East Europe and the Former Soviet Union. The course will also take an interdisciplinary approach, integrating perspectives from political science, economics, history, anthropology, social psychology and other disciplines, as it attempts to address the key puzzles of contemporary Russian politics. To provide a more intimate understanding of the social changes and political processes affecting Russia, we will also survey key films, documentaries and other relevant sources and materials in the media and popular culture.

Class Format: lecture
Requirements/Evaluation: mid-term exam, term paper, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none

Enrollment Preferences: Political Science and Russian majors
Expected Class Size: 20
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under RUSS
resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

**Class Format:** tutorial

**Requirements/Evaluation:** five 5-to 7-page essays, five 2- to 3-page critiques, and a final 4-page reflection

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-years and sophomores considering a major in Political Science

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Distribution Notes:** WI: Five required essays, five required critiques, and a final reflection. Lots of writing and attention to writing throughout.

**PSCI 292 (S) Threats to the Republic: Politics in Post-Obama America**

When Barack Obama’s successor assumes office in January 2017, they will be asked to govern an America that is out of sorts. Economic inequality on a level not seen in over a century. Terrorist attacks at home and abroad. Escalating racial violence in cities. Protests against cultural insensitivity on campuses. Social unrest over the definition of American morality and over who counts as an American. Ideological polarization that regularly brings the government to a standstill and periodically threatens financial ruin. Looming environmental catastrophes capable of provoking humanitarian crises. To what extent do these calamities pose new, existential threats to the republic? And is there anything that can be done to stop or slow them? This course interrogates the many perils that pundits and activists tell us we should worry about in 21st century America. In examining these issues, we will seek not only to understand the contours of the potentially dramatic political changes that some say await us but also to put these issues into historical context so that we may draw lessons from the crises of the past. Ultimately, our goal is to determine how worried we should be---and what, precisely, we should be worried about---as a new era of American leadership begins.

**Class Format:** lecture

**PSCI 293 (F) Leadership and Political Change**

Crosslistings: PSCI293 / LEAD293

**Secondary Crosslisting**

This course will examine the foundations of effective political leadership --- both transformational and evolutionary. It will balance theory and practice, case studies and student exploration to better understand how political change and policy reform is enacted in a representative democracy. The course begins with a framework to evaluate leadership, transitions to examining the importance of vision in effecting political change, moves to an in-depth look at effective communicative strategies and mobilization techniques required to realize that change, and concludes with an assessment of the prospects for leadership in the current political landscape. We will cover presidential, congressional, and military leadership and include prominent
guest speakers from the world of American politics.

Class Format: lecture/discussion

Requirements/Evaluation: two 7- to 8-page analytic essays, one 12- to 15-page analytic essay, and class participation

PSCI 294 (S) Contemporary Russian Culture and Politics

Crosslistings: RUSS214 / GBST214 / PSCI294 / COMP220

Secondary Crosslisting

This course explores select aspects of contemporary Russian society and politics through literary works and films of post Soviet Russia. We will study the social and political settings of particular plots and opportunities not only in fiction and film but as they emerge in the lived reality of Russians since 1991. In addition to novels and short stories by some of the best contemporary Russian authors, we will read scholarly materials explaining the social and political trends characteristic of Russia's post-socialist transformation under Boris Yeltsin and Vladimir Putin's leadership. Analysis of the political and social processes will be framed in a comparative approach, drawing on parallels and differences with countries of Eastern Europe. All course readings will be in English. Knowledge of Russian is not required.

Class Format: lecture

Requirements/Evaluation: short response essays; final exam; class participation

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: students majoring in Russian, Global Studies, Political Science, History

PSCI 302 (S) Leadership in a Global World

Crosslistings: LEAD302 / PSCI302

Secondary Crosslisting

To some observers, the events and forces of the 21st century have fundamentally challenged our previous assumptions of how individuals relate to one another and how societal progress occurs. How, in our economically interdependent world, are we to push forward growth that is robust but sustainable? How, in our technologically obsessed world, are we to harness tools whose consequences are difficult to foresee? How, in our politically volatile world, are we to figure out how to persuade without alienating? In wrestling with these dilemmas, we will examine leadership strategies and approaches in three different arenas: presidential policymaking, technological innovation, and social entrepreneurship. Over the course of the semester, we will consider topics ranging from nuclear disarmament to social media to civil society--all with an eye toward how key actors engage in short- and long-term thinking to avoid obstacles, mobilize support, and accomplish their goals.

Class Format: seminar

Requirements/Evaluation: three 2-page memos, 5-page midterm essay, 25-page final paper, class presentation, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
PSCI 303 (S)  Authoritarian Politics

For most of history, human societies have been ruled by dictators of one sort or another. Despite repeated tides of democratization, over 40 percent of the countries in the world today and half its population are still ruled by non-democracies. The aim of this course is to provide a critical understanding of the dynamics of contemporary authoritarianism and the sources of its resilience. First, the course will examine the key differences between democracy and autocracy, and among different types of autocracies. The second part will investigate the means by which contemporary autocracies stay in power. In addition to traditional tactics like repression, clientelism and propaganda, we will explore how autocracies adopted economic, nationalist and populist appeals, and nominally democratic institutions like parties, legislatures and elections, to sustain their rule. The third part will focus on societies ruled by dictatorships, as well as the forces behind the waves of democratization and authoritarian resurgence. It will look at popular opinion and mobilization in autocracies, the sources of resistance, and the dynamics of protests and rebellions that sometimes topple these regimes. Throughout the course, we will explore key case studies to examine how authoritarian systems work in practice. We will also survey key novels, films, journalistic accounts and documentaries to inform class discussions and analysis.

PSCI 308 (F)  In Search of the American State  (WI)

Ronald Reagan's pronouncement in 1981 that "government is not a solution to our problem, government is the problem" has defined American politics for more than three decades. Skepticism of government has deep roots and strong resonance throughout American political history, yet in many ways the American state has grown steadily larger and stronger. This course explores this conundrum by examining the American state, and its growth, in various arenas. We will assess traditional theories about the weak American state in light of arguments about the state as: regulator of family and "private" life, adjudicator of relations between racial and ethnic groups, manager of economic inequalities, insurer of security, and arbiter of the acceptable uses of violence and surveillance.

Class Format: seminar

Requirements/Evaluation: several short papers on class readings and a longer, 15- to 20-page paper with oral presentation

Prerequisites: at least one class in American politics

Enrollment Limit: 14

Enrollment Preferences: Political Science majors

Expected Class Size: 14
PSCI 309 (F) Problems and Progress in American Democracy

Crosslistings: LEAD309 / PSCI309

Primary Crosslisting

"I confess," French aristocrat Alexis de Tocqueville wrote in the introduction to his Democracy in America, "that in America I saw more than America. I sought the image of democracy itself, with its inclinations, its character, its prejudices, and its passions, in order to learn what we have to fear or hope from its progress." What would Tocqueville see if he returned to America today, almost 200 years later? What types of institutions, dynamics, and processes animate American political life in the twenty-first century? With Tocqueville as a guide to thinking about political ethnography, this course investigates four central elements of political life—religion, education, difference, and crime and punishment—that simultaneously pose problems for and represent sites of progress in American democracy. For each subject, we will ask several key questions. How has that particular aspect of political life changed in the recent past? How might it change in the near future? Does it conform to how American politics is designed to work? To how we want American politics to work? Using a diverse set of readings drawn from empirical political science, contemporary democratic theory, American political thought, historical documents, political punditry (from the left and the right), and current events, our focus, like Tocqueville before us, is on teasing out both the lived experience—the character and challenges—of American democracy and examining any disconnect between that experience and the ideals that undergird it. Among the many specific questions we will consider are whether particular religious traditions might be incompatible with democratic values, the extent to which recent changes in higher education have affected the health of democratic politics, the effects of ideological polarization on democratic discourse, and the place of the jury system in securing democratic justice. Throughout the semester, we will not only approach these questions from the joint perspectives of theory and practice but also seek to enrich our understanding by exploring American democracy as it happens all around us with several exercises in the community at large.

Class Format: discussion

Requirements/Evaluation: two experiential projects with accompanying write-ups of at least 5 and 7 pages, six 2- to 3-page ethnographic reflections, and class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: a previous course in American politics or Political Theory or permission of instructor

PSCI 312 (S) American Political Thought (WI)
Crosslistings: PSCI312 / LEAD312

Primary Crosslisting
From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodic, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Class Format: tutorial
Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 315 (S) Parties in American Politics (WI)
Political parties have played a central role in extending democracy and organizing power in the United States, yet their worth is a continuing subject of debate. In one ideal formulation, parties not only link citizens to their government, they also provide the coherency and unity needed to govern in a political system in which power is widely dispersed. But there is also an American tradition of antipathy toward parties. They have been criticized by some for inflaming divisions among the people and for grid-locking the government. For others, political parties fail to offer citizens meaningful choices; the Republican and Democratic parties are likened to a choice between “tweedledee and tweedledum.” This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. How have the parties changed over time? Throughout the course, we will explore such questions as: What constitutes a party? How have the parties changed over time? For whom do they function? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? We will seek answers to these questions both in seminar discussion and through substantial independent research projects.

Class Format: seminar
Requirements/Evaluation: weekly writing assignments, two 5-page papers, one 15- to 20-page paper, class presentation, and class participation
Prerequisites: PSCI course at the 200 or 300 level or permission of instructor

PSCI 316 (S) Policy Making Process (WI)
Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Class Format: seminar
Requirements/Evaluation: several short papers, research paper, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one course in PSCI or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Political Science and Political Economy majors, and students with an interest in public policy

PSCI 317 (F) Environmental Law
Crosslistings: ENVI307 / PSCI317
Secondary Crosslisting
We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern
political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Class Format: seminar

Requirements/Evaluation: based on several short writing assignments, a term research project, and active participation in class.

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

PSCI 318 (S) Race, Public Opinion, and Campaigns

What is the role of race in American public opinion and voting? This question is at the center of American politics today, particularly during the presidency of Barack Obama and the 2016 presidential election. Some commentators argue that racial attitudes were at the center of opposition to Obama's candidacy and legislative agenda and are foremost on voters' minds in 2016. Others suggest that most Americans have moved "beyond race" and that racism explains little of modern-day partisan and electoral politics. We will explore what the empirical literature on race in political science says about this debate and others. Among other issues, we will consider the points of conflict and consensus among different racial groups, how Americans of different racial backgrounds think about other groups, and the implications of demographic change (including the growth of the Latino and Asian-American populations and the shrinking white share of the electorate) for future elections.

Class Format: seminar

Requirements/Evaluation: one 2-3 page paper, two 5-7 page papers, a 15-20 page (non-research) paper, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Political Science majors

Expected Class Size: 12

Distributions: (D2)

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam
PSCI 320 (F) Heroes and Villains: Iconic Leadership and the Politics of Memory  (WI)

Crosslistings: LEAD320 / PSCI320

Secondary Crosslisting

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Class Format: seminar

Requirements/Evaluation: two short (5- to 6-page) essays and a 10- to 12-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Leadership Studies concentrators, Political Science majors

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: WI: Extensive feedback and in-class discussion of writing and argumentation.

PSCI 321 (F) Immigration Politics in the U.S.

The U.S. Census Bureau estimates that non-Hispanic whites will no longer be the majority racial group in the U.S. by 2044. This demographic change is fueled by past and current immigration, and the politics surrounding American immigration policy have intensified as a result. Donald Trump's rise to the presidency was fueled in part by his pledge to build a wall between the U.S. and Mexico. Meanwhile, efforts to reform the nation's immigration laws have been stuck in gridlock for years. How did we get to this point and what does the future hold? Why is immigration policy so contentious? What is at stake, and what do different groups believe to be at stake? To answer these questions, we will examine immigration from a multidisciplinary lens, but with special attention to immigration politics and policy. We will examine the history of immigration to the U.S. and the policies that have shaped it; recent developments in electoral and protest politics; the policy initiatives of the Trump administration, the Republican Congress, and state and local governments; and the incorporation of immigrants into U.S. society and politics, past and present.

Class Format: seminar
PSCI 325 (S) International and Transitional Justice (WI)
Crosslistings: PSCI325 / JLST402
Primary Crosslisting
Before the 1990s, the world saw only occasional, discrete war crimes trials after major-power cataclysms. In the last two decades, trials expanded dramatically in number, scope, and philosophy. Separate Ad Hoc Tribunals for crimes in Yugoslavia and those in Rwanda, in Sierra Leone and in Cambodia are giving way to a permanent International Criminal Court, which has begun to hand down indictments and refine its jurisdiction. The UN Security Council, alongside national governments, decides on legitimacy and punishment. At the same time, worries about residual impunity or the effect that punishment might have on societies' futures has led to the development of national and social courts, as well as national military tribunals, to complement those at the international level. Meanwhile, national activists look to international apologies and reparations for models of what to demand. Examples of internationalized transitional justice abound. This research seminar examines the intent, process, meaning and consequence of these new practices, particularly in terms of national constitutions, international law, and principles of justice.

Class Format: seminar
Requirements/Evaluation: four papers, longer final paper, class participation
Prerequisites: Political Science major or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Political Science majors concentrating in International Relations

PSCI 326 (S) Security in Africa (WI)
Crosslistings: PSCI326 / GBST326
Primary Crosslisting
Africa is the world's second largest and second most-populous continent. This course will explore this diverse region through the lens of human security which takes a broader understanding of security challenges and how they affect different individuals. We will begin by placing security challenges in Africa in the context of a colonial legacy and the changing nature of warfare. We will then examine specific security challenges including governance issues, gender relationships, and resource challenges, through the use of case studies. We will conclude by examining responses by the U.S. and UN to perceived security challenges in Africa.

Class Format: seminar
Requirements/Evaluation: presentations, short response papers (2-3 pages), research paper sections throughout the semester (2-5 pages), research paper (15-20 pages), class participation
Extra Info: may not be taken on a pass/fail basis
**PSCI 327 (S)  Leadership and Strategy**  (WI)
Crosslistings: PSCI327 / LEAD327

Primary Crosslisting
This class is about the role of leaders and statecraft in international relations. In particular, this course examines the relationship between political and military objectives. The aim is to identify and analyze the principal structural and situational constraints—both foreign and domestic—that limit leaders' freedom of action, and which they must manage effectively to achieve their diplomatic and military goals. The course integrates theoretical perspectives related to a range of international security issues—including the causes of war, alliance politics, nuclear strategy, deterrence, coercion, reassurance, misperception, and credibility concerns—with illustrative case studies of decision-makers in action. The basic structure of the class is interdisciplinary; the goal of this approach is to utilize key conceptual arguments to gain greater leverage for the examination of major historical decisions in national security policy. Students will be asked to analyze and evaluate the strategic choices we examine, as well as the process by which they were reached. The primary objective of the course is for students to improve dramatically their understanding of the role of leaders and strategic choice in international relations.

Class Format: seminar
Requirements/Evaluation: active class participation, two 6-8 page papers, and a final exam

**PSCI 328 (F)  Global Environmental Politics**  (WI)
Crosslistings: ENVI328 / PSCI328

Secondary Crosslisting
This seminar draws on the last five decades of international efforts to regulate the environmental commons. The process of negotiating and implementing international environmental treaties will be a core focus of the course, yet emphasis will also be placed on emerging non-state means of addressing global environmental challenges. A variety of challenges faced in global environmental policymaking (compliance, participation by civil society and industry, incorporation of science, efficiency) will be examined through the study of several international regimes, including on climate change, endangered species, biodiversity, biosafety and mercury pollution.

Class Format: seminar
Requirements/Evaluation: participation; several shorter writing assignments; and a research paper to be completed in stages over the course of the semester

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19
PSCI 334 (S) Theorizing Global Justice

While economic exchanges, cultural convergence, and technological innovations have brought people in different parts of the world closer together than ever before, globalization has also amplified differences in material wealth and social inequalities. Ill health, inadequate sanitation, and lack of access to safe drinking water are increasingly common. Yet, more than ever before, the means exist in affluent regions of the world to alleviate the worst forms of suffering and enhance the well-being of the poorest people. How are we to understand this contradiction as a matter of justice? What is the relationship between justice and equality, and what do we owe one another in a deeply divided world? Course readings will engage your thinking on the central debates in moral philosophy, normative approaches to international political economy, and grassroots efforts to secure justice for women and other severely disadvantaged groups. Key theorists include Amartya Sen, Martha Nussbaum, John Rawls, Thomas Pogge, Nancy Fraser, Paul Farmer, Vandana Shiva, Majid Rahnema, and Enrique Dussel.

Class Format: discussion

Requirements/Evaluation: oral presentation, weekly blog posts, and three papers (3 pages, 7 pages and 8-10 pages)

Prerequisites: at least one course in political theory or philosophy or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Political Science majors and concentrators in Political Theory

Expected Class Size: 14

Distributions: (D2)

Attributes: LGST Interdepartmental Electives; PSCI Political Theory Courses

PSCI 335 (F) Racial Equity, Liberal Democracy, and Democratic Theory (DPE)

In Ta-Nehisi Coates' best-selling book *Between the World and Me*, he says that in the wake of the non-indictment of former police officer Darren Wilson in the death of Michael Brown "I did not tell [my son] that it would be okay, because I have never believed it would be okay." With admissions like this, Coates stoked a long-standing debate about the prospects for racial equity in liberal democracies like the United States. In this course, we look at this debate, examining what black thinkers in particular have said about whether racial equity can be achieved in a liberal democracy founded on racial domination and why they come to the conclusions they do. Then, we examine what contemporary democratic theorists have had to say about how racial equity might be achieved and how they have sought to advance this goal through their writing. Can the strategies theorists propose and employ really aid in the advancement of racial equity? Which are more and less promising? We end by asking: Do anti-democratic means have to be employed to fully realize democracy? What anti-democratic means? Authors we will engage include Coates, bell hooks, Charles Mills, Melvin Rogers, Chris Lebron, Lawrie Balfour, and Danielle Allen.

Class Format: seminar

Requirements/Evaluation: class facilitation, group reflections (three 4-page responses), book review (6-8 pages), final essay (12-14 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Political Science majors

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: DPE: This class centers sociological and political theoretical questions about race inequity and equity in a liberal democratic
society. It features black writers’ perspectives on inequity and equity. The course nurtures the skill of speaking across difference by requiring students to write responses as groups and encouraging deep student participation by making students class facilitators.

**PSCI 337 (S) Visual Politics (WI)**

**Crosslistings:** ARTH337 / PSCI337

**Primary Crosslisting**

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to techniques of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, affect theory, and cognitive science. Possible authors include Arendt, Bal, Barthes, Belting, Benjamin, Browne, Buck-Morss, Butler, Clark, Connolly, Deleuze, Didi-Huberman, Fanon, Foucault, Freedberg, Garland-Thompson, Harriman and Lucaites, Hobbes, Machiavelli, Kittler, Mercer, Mitchell, Mulvey, Noë, Plato, Rancière, Warburg, and Zeki.

**Class Format:** seminar

**Requirements/Evaluation:** regular, engaged class participation, several Glow posts, and three 7- to 8-page papers

**Extra Info:** qualified students from all disciplines welcome, space permitting

**Prerequisites:** at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Political Science and Art History majors

**PSCI 339 (F) Politics in Dark Times: Hannah Arendt (WI)**

Hannah Arendt’s writings bear witness to some of the darkest moments in the history of politics. Arendt lived through—and reflected deeply upon—the rise of totalitarianism (she was interred for a time in a Vichy-France refugee camp) and the detonation of the first atomic bombs. She was an incisive critic of capitalist exploitation and a prescient observer of the destructive potential of early developments in genetic engineering. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called “the love of the world.” In this tutorial, we will investigate what Arendt’s vision of politics stands to offer to contemporary struggles to understand and transform the gloomiest aspects of the political present. Through writing and discussion, we will unpack the meaning and debate the relevance of two of her major works—*The Origins of Totalitarianism* and *The Human Condition*—and other essays, articles, and excerpts. We will also consider secondary sources that use Arendt’s ideas to illuminate contemporary problems of environmentalism, human rights, and race.

**Class Format:** tutorial

**Requirements/Evaluation:** five 5-page papers; five 2-page responses; a final revision of a prior paper; participation

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** a prior course in political theory, philosophy, or critical theory, or permission of the instructor

PSCI 340 (S) Why States Fail: Political Violence at the End of the 20th Century
This course considers the origins of political violence and state failure at the end of the 20th century. It seeks to address why there was a resurgence of political violence at the dawn of the 21st century. Toward that end, we begin by considering competing explanations of political violence (ethnicity, democratization, natural-resource endowments, and predatory elites). We then move on to the empirical section of the course in which we cover case studies of state failure in parts of Eastern Europe, Africa and the Middle East.

Class Format: seminar/discussion

Requirements/Evaluation: seminar participation, two oral presentations and a research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 345 (S) Cosmology and Rulership in Ancient Chinese Political Thought (WI)
This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese political thought. The purpose is to gain an understanding of a number of different perspectives on politics and leadership, especially Confucianism, Legalism and Taoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: The Analects, Mencius, the Daodejing, Zhuangzi, and Han Feizi.

Class Format: discussion/lecture

Requirements/Evaluation: two 5-page papers and one 15-page paper

Prerequisites: none

PSCI 346 (S) Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration
Crosslistings: INTR334 / AFR334 / PSCI346

Secondary Crosslisting
This seminar reviews contemporary theories of "anti-black racism"; their articulation or assimilation within current political movements and mobilizations; and the influence and impact such theories-expressed in and/or as activism-on social justice and civil rights. Critical race theory, Afro-pessimism, feminist/queer theory and the works of the incarcerated are studied. Theorists studied include: Frank Wilderson; Angela Davis;
The United Nations Convention on the Law of the Sea gathered into one place what most countries considered in 1982 to be scattered customary international law about piracy, transit through other countries’ territorial waters, jurisdiction over ships, and so forth. It also proposed a system for taxing firms that it licensed to exploit minerals on the high seas. This course explores the politics that arise from UNCLOS, first by engaging with the treaty's content (and exclusions), second by examining the incentives it provides states and criminals, and third by assessing the way that geopolitical and environmental change create new opportunities and constraints for states, firms, international organizations, and activists.

Class Format: seminar
Requirements/Evaluation: three 6-page papers, longer final paper, class participation including weekly posts
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSCI 202 or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Political Science majors, seniors
Expected Class Size: 12
Distributions: (D2)
Attributes: MAST Interdepartmental Electives; PSCI International Relations Courses

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery’s advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter’s liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition’s architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Class Format: tutorial
PSCI 349 (S) Cuba and the United States (WI)

With the passing of the Castro brothers' regime on the horizon, we examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. It begins with the political economy of the colony, then covers the Cuba-US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual orientation; social programs; political institutions; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format: tutorial; a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 351 (S) The New Left and Neoliberalism in Latin America (DPE) (WI)

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

Class Format: lecture/discussion, then seminar
Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal
Prerequisites: a course on Latin America and a course in Economics or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: Political Science majors
PSCI 352 (F) Politics in Mexico  (DPE) (WI)
Crosslistings: GBST352 / PSCI352

Primary Crosslisting

Geographical fate has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, and mixed feelings about the U.S. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, we consider politics and cultural policies around Mexican national identity in the twentieth century; rapid urbanization, especially in the valley of Mexico; the impact of migration and the rapid development of the northern border region; and the conflict between an emerging civil society and political corruption. After a brief review of recent elections and other political events, we turn to a seminar-style discussion of student research projects.

Class Format: lecture, discussion, then seminar

Requirements/Evaluation: map quiz, two short papers, and a 12- to 15-page research proposal

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 355 (S) American Realism: Kennan, Kissinger and the American Style of Foreign Policy  (WI)
Crosslistings: PSCI355 / LEAD355

Primary Crosslisting

George Kennan is widely considered to be the author of the containment strategy that ultimately won the Cold War. Henry Kissinger served as National Security Advisor and Secretary of State. In addition to their distinguished careers in government, both men have published well regarded and popular scholarship on various aspects of American foreign policy, international relations, and nuclear weapons. This tutorial will first examine the nature of their relationship to both Realist and Wilsonian perspectives on American foreign relations. We will then examine their experiences as strategists and policymakers during the most crucial moments of the Cold War. One of the key questions we will seek to answer is why Kennan and Kissinger disagreed on so many important issues, ranging from the Vietnam War to the role of nuclear weapons, despite their shared intellectual commitment to Realism. Finally, we will also examine some of the more recent biographies of both men, including John Lewis Gaddis’s Pulitzer prize-winning George F. Kennan: An American Life and Niall Ferguson’s Kissinger: 1923-1968: The Idealist.

Class Format: tutorial

Requirements/Evaluation: five 6-page papers, five 2-page response papers

PSCI 359 (S) The Body as Property  (DPE) (WI)

From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Class Format: tutorial

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: prior coursework in political theory, cultural theory, philosophy or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors with a concentration in Political Theory, then other Political Science majors

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis. WI: The course is Writing-Intensive because it includes a substantial amount of writing (>30 pages) and opportunities for revision.

PSCI 360 (S) Right-Wing Populism (WI)

After the fall of the Berlin Wall in 1989, the political scientist Francis Fukuyama famously declared "the end of history". From now on only liberal democracy, free market capitalism, and global integration had a future. Everything else—including political ideology, nationalism, conservative religion, and sovereignty was consigned to the ash heap. Thirty years later the future looks seriously derailed. A right-wing populism marked by Brexit, Trump, Le Pen, and a host of "far-right" political movements in the very heartland of democratic globalizing capitalism has shaken liberal certainties. This course is an investigation into contemporary right-wing populism in Europe and North America in its social, economic, and political context. We will discuss Donald Trump and the American alt-right, Britain's UKIP, France's National Front, Hungary's Fidesz and Jobbik, Poland's Law and Justice, and other smaller right-wing populist parties in Europe. We will also research both general (globalization, multiculturalism, neoliberalism, mass immigration, unemployment, political elitism) and specific (the expansion of the European Union, the 2007-09 global financial crisis, the European debt crisis, the Great Recession, the Syrian refugee crisis) causes of right-wing populism's growing appeal over the last decade.

PSCI 362 (F) The Wilsonian Tradition in American Foreign Policy (WI)

Crosslistings: LEAD362 / PSCI362

Primary Crosslisting

During and after the First World War, President Woodrow Wilson developed an approach to international relations that challenged the dominant assumptions of Realism. Instead of a world order marked by alliances, arms races, and wars, Wilson offered a vision of a peaceful world and the rule of international law. While America ultimately rejected the League of Nations, the Wilsonian tradition has continued to exert a powerful influence on scholars and policymakers. This tutorial will intensively examine Wilson's efforts to recast the nature of the international system, the American rejection of his vision after the First World War, and the reshaping of Wilsonianism after the Second World War. We will spend equal time in the tutorial on both the theoretical and historical dimensions of Wilsonianism.

Class Format: tutorial

Requirements/Evaluation: 4 papers of 7-8 pages and response papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 367 (S) The Politics of American National Security
Crosslistings: LEAD367 / PSCI367

Primary Crosslisting

Liberal democracies face the challenge of establishing effective civil-military relations in order to protect and promote their cherished way of life while preserving civilian control of the armed forces. A lot is at stake in getting it right -- everything from national survival to the preservation of liberty. In the process, countries must decide on policies for the armed forces: should they be forced to adopt the values of the society they protect, and should the military be used to drive social change in the country? This course provides an extensive examination of American civil-military relations from the Founding era to the current day. The constitutional, legal, and theoretical frameworks for civil-military relations are explored to set the conditions for students to assess contemporary US grand strategy and the merits and consequences (including moral-ethical) of using military force to achieve political ends. The course concludes with a section on the future of American civil-military relations.

PSCI 369 (S) The Crisis of Leadership
Crosslistings: PSCI369 / LEAD369

Secondary Crosslisting

It is now a commonplace that the liberal democracies of Europe and North America (and beyond) are facing a "crisis of leadership." In country after country, champions of cosmopolitan values and moderate reform are struggling to build sufficient popular support for their programs. These failures have created space for a politics of populism, ethno-nationalism, and resentment--an "anti-leadership insurgency" which, paradoxically, has catapulted charismatic (their critics would say demagogic) leaders to the highest offices of some of the largest nations on earth. In this course, we will seek to understand the challenges liberal, cosmopolitan leadership has encountered in the 21st century and the reasons why populist, nationalist leadership has proven resurgent. We will begin by examining institutional constraints facing political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment. Then we will look at some important factors which shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. Our primary questions will be these: Why is transformative leadership so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world?

Class Format: seminar

Requirements/Evaluation: class participation, regular response papers, research proposal, research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Extra Info 2: this is a research course; the primary written assignment will be a research paper which students will develop over the course of the semester
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Political Science majors, Leadership Studies concentrators
PSCI 370 (F) The Political Thought of Frantz Fanon (WI)
Crosslistings: PSCI370 / LEAD360 / PHIL360 / AFR360
Secondary Crosslisting

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon’s political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors
Expected Class Size: 10

PSCI 374 (F) Shadows of Plato's Cave: Image, Screen, and Spectacle
Crosslistings: COMP374 / ARTH505 / PSCI374

In Book VII of the Republic, Socrates famously asks his interlocutors to picture people living in a cave, bound in chains and able to see only shadows on the wall. Thus begins the presentation of perhaps the most influential metaphor in the history of philosophy. One might even claim that when Plato deployed the metaphor in an extended allegory, he constituted the fields of both philosophy and political theory. In repeatedly examining the allegory over the centuries, later thinkers have elaborated their approaches not only to Plato but also to the nature of politics and the tasks of thinking. This class begins with the Republic's cave and other key Platonic discussions of appearances, visual representation, and (literal and metaphoric) seeing, asking how Plato's approaches to image, politics, and theory/philosophy shape each other. Building on those inquiries, we next take up important twentieth and twenty-first century returns to the cave, engaging such figures as Heidegger, Strauss, Arendt, Derrida, Irigaray, Rancière, and Badiou. Finally, we examine recent theories of screen and spectacle--read both for their resonances with and departures from debates over the Platonic legacy--and case studies in the politics of both military and racial spectacles in the U.S. The question of what is an image and what images do will run from the beginning of course to the end. Beyond the authors mentioned, readings may include such authors as Allen, Bruno, Clark, Debord, Friedberg, Goldsby, Josellit, Mitchell, Nightingale, Rodowick, Rogin, Silverman, and Virilio. Insofar as it fits student interest, we will also explore the cave's considerable presence in visual culture, ranging from Renaissance painting through such recent and contemporary artists as Kelley, Demand, Hirschhorn, Kapoor, Sugimoto, and Walker, to films such as The Matrix.

Class Format: seminar
Requirements/Evaluation: regular glow posts and three 7- to 8-page essays or one 20-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one prior course in political theory, art history, cultural/literary theory, or philosophy or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: majors in political science, comparative literature, and art history, as well as students (up to 4) in the graduate program in art history

Expected Class Size: 12

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under PSCI; meets Division 1 requirement if registration is under COMP or ARTH

PSCI 375 (S) Modern Jewish Political Theory (WI)

Crosslistings: JWST492 / PSCI375 / REL330

Secondary Crosslisting

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Class Format: seminar

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth;

Extra Info: a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

PSCI 410 (S) Senior Seminar in American Politics: Interpretations of American Politics

Current assessments of the state of American politics vary widely. Though recent polls show that as many as 60 percent of Americans think that the country is headed down the wrong-track, it is not clear what that means. Critics on the left worry that the United States is on an imperial quest, extorting resources from the global many for the advantage of an elite few. Critics on the right worry that the U.S. has abandoned the traditions that made it strong and has entered a period of moral decay. What are we to make of these different assessments? What do left and right see when they survey the nation, and why is what they see so different? Any diagnosis of contemporary maladies is premised on a vision of what a healthy functioning republic looks like. Our task in the seminar is to uncover and interrogate those visions. We will do this by exploring different interpretations of American politics, each with its own story of narrative tensions and possible resolutions. We will then use our investigation of how different authors, and different traditions, understand the nation to help us assess contemporary politics and come to our own conclusions about what animates it.

Class Format: seminar

Requirements/Evaluation: brief weekly writing assignments; two short essays; one longer paper; and oral presentation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: at least one course in American politics

Enrollment Limit: 10

PSCI 410 (F) Senior Seminar in American Politics: The Politics of Belonging

Although many people have described America as inclusive, political debates about belonging have often been contentious and hard-fought. This seminar will focus on the politics of belonging in America. What does it mean to be an American? If the U.S. is a nation of immigrants, why is immigration reform so difficult to achieve? Are legal citizenship and formal political rights sufficient for belonging? Or does full inclusion rest on the ability to exercise civil and social rights as well? Does income inequality threaten the political equality necessary for a strong democracy? As we examine the debates over inclusion, we will consider different views about the relationship among political, civil, and social rights as well as different interpretations of American identity, politics, and democracy.

Class Format: seminar

Requirements/Evaluation: class participation, short weekly writing assignments, two short papers, a 20-page research paper and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: at least one course in American politics

Enrollment Limit: 14

Enrollment Preferences: senior Political Science majors with American Politics concentration
### PSCI 411 (F) Advanced Study in American Politics

A year of independent study under the direction of the Political Science faculty, to be awarded to the most distinguished candidate based upon competitive admissions. The candidate, designated the *Sentinels of the Republic Scholar*, receives a research stipend to cover costs associated with the proposed project. The Sentinels Scholar may submit her/his essay for consideration for honors in Political Science. Admission is awarded on the basis of demonstrated capacity for distinguished work and on the proposal's promise for creative contributions to the understanding of topics on the federal system of government. Anyone with a prospective proposal should contact the department chair for guidance.

**Class Format:** independent study

### PSCI 420 (S) Senior Seminar in Human Rights in International Politics and Law (WI)

**Crosslistings:** PSCI420 / JLST403

**Primary Crosslisting**

The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

**Class Format:** seminar

**Requirements/Evaluation:** three lead essays, three critique essays, and one final essay

**Prerequisites:** PSCI 202, senior standing, permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** PSCI majors, senior JLST concentrators ; seniors

**Expected Class Size:** 18

**Distributions:** (D2) (WI)

### PSCI 420 (S) Senior Seminar in International Relations: The Liberal Project in International Relations

The most powerful actors in the international system are liberal ones, and a liberal project around democratic states, international law and organizations, and free trade dominates the global agenda. This course is an investigation into this liberal international relations project, engaging both theory and practice. We will discuss signature liberal theorists both classic and current as well as some of their most notable critics. We will also attend to empirical evaluations of signature liberal efforts around democratization and peace promotion, international law, and economic growth and
development. The course ends with a discussion of the successes and failures of the European Union as the principal embodiment of the liberal project in international relations.

Class Format: seminar

Requirements/Evaluation: 2-4 papers of 5-7 pages, several short oral presentations, daily discussion questions, 12-15 page final paper, class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 420 (F)  Senior Seminar: The Nuclear Revolution  (WI)

This is a course about the "long shadow" nuclear weapons cast over the international system. In its simplest terms, the class focuses on whether international politics still works essentially the same way in the nuclear age as it did prior to 1945 or if the world has truly experienced a nuclear "revolution" in the word's most basic sense. The course begins with an examination of the key events and theories that led ultimately to the development of the world's first nuclear weapons, including some basic technical concepts and the Manhattan Project. From there, the course covers a number of topics, both conceptual and historical, that bear directly on the question of how nuclear weapons shape international politics. Specifically, the course will cover the U.S. decision to drop the atomic bombs on Hiroshima and Nagasaki, as well as the Japanese response; the body of theory and concepts that underpin fundamental debates over nuclear strategy; the U.S.-Soviet nuclear rivalry; the influence of nuclear weapons in crises; how nuclear weapons shape alliance politics; whether nuclear weapons have political utility; nuclear accidents; nuclear technologies; the problem of nuclear proliferation and the nonproliferation regime; the importance of regional nuclear powers; and contemporary issues like the North Korean and Iranian nuclear questions.

Class Format: seminar

Requirements/Evaluation: class participation, two 2- to 3-page response papers, a 20- to 25-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSCI 202

Enrollment Limit: 15

Enrollment Preferences: Political Science major seniors with an International Relations concentration

Expected Class Size: 15

Distributions: (D2) (WI)

Distribution Notes: WI: Students will be required to write a substantial research paper, roughly 25 pages in length, for this course. They will also be asked to evaluate their peers' papers

PSCI 430 (S)  What Should Political Theory Be Now?

How can theorists best engage politics today? What political problems most demand or resist theorization---and is "theory" even the right genre for critical intellectual work on politics now? This course takes up such questions by considering how key recent or contemporary theorists have sketched the defining features of their political worlds. With each reading, our dual aim will be to confront pressing issues or controversies and to ask whether the works in question offer ways of thinking and writing that we should pursue ourselves. Topics may include neoliberalism and democracy;
sovereignty and biopower; pluralism, individuality, and justice; technology and the specter of ecological catastrophe; the problem of evil in politics; white supremacy; and contemporary struggles over gender and sexuality. Readings will be drawn from such authors as Adorno, Allen, Arendt, Berlant, Brown, Butler, Connolly, Dean, Foucault, Galli, Honig, Latour, Moten, Rancière, Rawls, Sen, and Sexton.

Class Format: seminar

Requirements/Evaluation: based on class participation and the writing of 7 glow posts (about 1.5 pages) and one 15-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: juniors or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome

Enrollment Limit: 15

Enrollment Preferences: concentrators in Political Theory, followed by other Political Science majors

Expected Class Size: 11

Distributions: (D2)

Attributes: AMST Critical and Cultural Theory Electives; PSCI Political Theory Courses

Not offered current academic year

PSCI 430 (F) Senior Seminar: Critical Theory

This course explores two major themes emerging from the work of theorists associated with the Frankfurt School: the critique of progress, Enlightenment and modernity, and the recuperation of certain Enlightenment ideals and hopes for progress in new, aesthetic forms. The first part of the course looks at Karl Marx's critique of alienation and reification, asking how Marx's ideas are picked up and modified in the writings of Georg Lukacs, Max Horkheimer and Theodor Adorno. We will also pay attention to the influence of Freud on Herbert Marcuse's critique of civilization. The second part of the course turns to the writings of Walter Benjamin and Ernst Bloch, whose efforts to reconstruct emancipatory ideals in Marxist thought have been described as "maverick" and "utopian". Among our questions: What is the price of progress? What are the prospects for freedom in modern societies, where individuality, down to the very structure of our instincts and drives, is shaped by mass culture and social institutions? Can agency and subjectivity be recovered within a "totally administered society"? What may we hope?

Class Format: seminar

Requirements/Evaluation: regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: junior or senior standing and prior coursework in political theory, cultural theory, philosophy; or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Senior Political Science majors with concentration in Political Theory, then other Political Science majors

Attributes: PSCI Political Theory Courses

Fall 2018

SEM Section: 01 MR 2:35 pm - 3:50 pm Nimu Njoya

PSCI 430 (F) Senior Seminar: Dignity

Over the last few decades, the concept of dignity has become one of the most contentious and emotive terms in democratic politics. Policy battles over embryonic stem cell research, abortion, physician-assisted suicide, life-sustaining treatments such as mechanical ventilation, and the constitutionality of the death penalty have all been fought out on the grounds of human dignity. But what exactly does dignity mean? Is it an existential demand for respect? A moral, intangible quality of a person? A set of legally guaranteed rights of citizens? This course examines some of the strongest attacks on and defenses of human dignity, both in theory and in practice. The emphasis will be on the role of dignity in shaping modern ideas of democracy, citizenship, and human rights. Readings construct a genealogy of dignity that includes Aquinas, Pico della Mirandola and Kant. Contemporary theories of dignity will be explored through the work of Drucilla Cornell, Jürgen Habermas, Martha Nussbaum, Jeremy Waldron, and the dignity jurisprudence of Canada, Germany, Namibia, South Africa, and the United States.

Class Format: seminar
PSCI 440 (F) Senior Seminar in Comparative Politics: Political Development

The role of the United States in the wars in Iraq and Afghanistan, and its adventures and misadventures in reconstituting order in those countries, have directed attention back to the dynamics, approaches, and debates in political development. This senior seminar in comparative politics critically examines the theories and problems of political development by focusing on three major topics in the sub-discipline: state formation, nationalism, and democratization. Drawing on both historical and contemporary cases, we consider the conditions that lead to strong and weak states, inclusive and exclusive nationalist mobilization, and democratic and autocratic government.

Class Format: Seminar
Requirements/Evaluation: class participation; three short papers; ten weekly responses; and an oral exam covering two of the three topics
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSCI 204 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: senior Political Science majors concentrating in Comparative Politics
Expected Class Size: 10
Distributions: (D2)
Attributes: PSCI Comparative Politics Courses
Not offered current academic year

PSCI 440 (F) Senior Seminar in Comparative Politics: The Syrian Maelstrom

This course deals with the civil war in Syria. It begins by investigating the nature of the Syrian society and the evolution of the Assad regime. It then discusses the challenges to the regime, both Islamist and democratic in the Arab Spring. With that as background, the course will examine the domestic, regional, religious, ethno-sectarian, and global dimensions of the civil war. It will consider the place of Syria in the Iranian-Saudi competition, the role played by neighboring states and actors, the position of the American and Russian governments, and the rise of ISIS.

Class Format: Seminar
Requirements/Evaluation: 25-page paper, oral presentation, and class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Distributions: (D2)
Attributes: PSCI Comparative Politics Courses
Not offered current academic year

PSCI 440 (F) Senior Seminar: Power, Identity, and Culture (WI)

This is a course about remembering. This is a class about how we learn to forget. Above all, it is about power—power close to the bone, power made sublime, how power is made and unmade. This course takes as its central thesis the claim that power, external and objective, is also internal and subjective, invisibly working to shape understandings of who we are even as it performs the visible rituals of bureaucratic regulation typically
associated with states and governments. To take this claim one step further, we'll hypothesize that immaterial and invisible forms of domination are power's most effective form even as they are the most difficult to measure and understand. Alternating between case and theory, looking at power both naked and sublime, we will examine the struggle by state and elite actors to shape subjectivities through culture and identity formation in order to secure quiescence and rule. Close attention will be paid to how socializing agents, including schools and educational systems, media and film, families and local communities, shape and reshape efforts to have ordinary citizens internalize what Stuart Hall describes as "the horizon of the taken-for-granted," those ruling ideas and beliefs that consist "of things that go without saying because--- they come without saying." The course is set up as a deliberate conversation between the works of Antonio Gramsci, Michel Foucault, Friedrich Nietzsche, and Stuart Hall, as well as their interlocutors and critics, most notably James C. Scott. The trajectory of this literature carries us from domination "thinly" centered in class and mediated by culture, to power completely de-centered from material forms of rule. Though each author is distinct, if heterodox, in his approach to the question of power, Gramsci, Foucault, Nietzsche, and Hall are bound together by the shared belief that power is relationship, between class and culture, culture and identity, state and society.

Class Format: seminar
Requirements/Evaluation: essays and participation
Prerequisites: PSCI 204 Introduction to Comparative Politics
Enrollment Limit: 15
Enrollment Preferences: upper-class students, especially seniors
Expected Class Size: 15

PSYCHOLOGY
(Div II, with some exceptions as noted in course descriptions)

Chair: Professor Steven Fein

On leave Fall/Spring: Assistant Professor J. Cone. Assistant Professor L. Smalarz.
On leave Fall only: Professor K. Savitsky.
On leave Spring only: Associate Professor C. Stroud.

MAJOR
For the degree in Psychology, students must complete a minimum of nine courses as outlined below:
- PSYC 101 Introductory Psychology
- PSYC 201 Experimentation and Statistics

Three 200-level courses from the list below:
- COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- PSYC 221 Cognitive Psychology
- PSYC 232 Developmental Psychology
- PSYC 242 Social Psychology
- PSYC 252 Psychological Disorders
- PSYC 272 Psychology of Education

Either PSYC 221 or 222, but not both, can count towards the three required 200-level courses.

Three 300-level courses from at least two of the areas listed below:
- Area 1: Behavioral Neuroscience (courses with middle digit 1)
- Area 2: Cognitive Psychology (courses with middle digit 2)
- Area 3: Developmental Psychology (courses with middle digit 3)
- Area 4: Social Psychology (courses with middle digit 4)
- Area 5: Clinical Psychology (courses with middle digit 5)
- Area 6: Other/Interdisciplinary Psychology (courses with middle digit 6)
- Area 7: Educational Psychology (courses with middle digit 7)

At least one of these courses must be from among those carrying the format designation Empirical Lab Course.
- PSYC 401 Perspectives on Psychological Issues

Students who place out of Psychology 101 are still required to take nine courses to complete the major.

The department recommends that students take Psychology 201 in their sophomore year. The department requires that 201 be completed by the end of the junior year.

COURSE NUMBERING RATIONALE
As is the case in all departments, the first digit of a Psychology course number indicates the relative level of the course. Where appropriate, the second digit corresponds to the Areas listed above.
THE DEGREE WITH HONORS IN PSYCHOLOGY

Students who are candidates for honors need take only two 300-level courses from two different areas, but they must enroll in Psychology 493-W31-494 and write a thesis based on original empirical work. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Guidelines for pursuing the degree with honors are available from the department.

STUDY ABROAD

With some advance planning, studying abroad (especially for one semester) can easily be worked into the psychology major. To facilitate this, we recommend that students:

- Meet with the Study Abroad advisor as soon as they decide that they are interested in studying abroad.
- Take PSYC 201 (Experimentation and Statistics) in the sophomore year.
- Think ahead to the 300-level courses they are interested in taking so that they can fulfill the 200-level prerequisites before they go away or, if possible, while they are away. In our experience, study abroad programs in the following places are most likely to offer psychology courses: England, Ireland, Scotland, Spain, Australia, New Zealand, Hawaii, and Scandinavia. Students should procure the descriptions of the psychology courses they are considering taking and bring them to their meeting with the advisor.
- There are some costs to studying away, particularly for the year. This limits students’ opportunity to choose the particular 300-level courses they would like to take and they must sometimes settle for those that are open, those which happen to be offered, or those for which they have the prerequisites, once they return in their senior year. Many students who are keen on psychology begin doing research with professors during their junior year, and for some this leads to honors thesis in the senior year, summer research, etc. If you are going away for the entire year and do not make such connections with a professor ahead of time (i.e., before you go), you may lose out on some of these opportunities to deepen your involvement in the major on campus. On the other hand, studying abroad can be an invaluable learning experience, so you need to think carefully, in consultation with your advisor and/or the Study Abroad advisor, about the costs and benefits of it. Very occasionally, a student who just begins taking psychology courses late in the sophomore year and wishes to go abroad for the year finds that they are not able to do both, or is restricted in the choice of study-abroad programs.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. In addition, the course content cannot overlap substantially with material already taken at Williams.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students are required to take at least one empirical project course (which includes a lab component and data collection). This must be completed at Williams.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. The empirical project course must be completed here (see answer to previous question above). Other major requirements that must be completed here are the Senior Seminar (PSYC 401) and our Statistics and Experimentation course (PSYC 201). On very rare occasions students have been given credit for PSYC 201 taken elsewhere, but this is extremely unlikely. Most institutions break the material up into two different courses, or don't include all of the components that we feel are an important foundation for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students should be sure that they have taken PSYC 201 PRIOR to their senior year at the latest. It is best to take it during sophomore year whenever possible.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
PSYC 11 (W) Designing your Life and Career After Williams
This course takes a psychological approach to helping you figure out what to do with your life. We start by reviewing your life story up until now and determining how it has shaped you. We discuss, for example, whether you feel pressured to go down a certain road, whether you feel torn between your head and your heart, or whether you feel directionless. Then we take stock of who you really are now, including your core interests, tendencies, strengths, and weaknesses. We try to identify life designs that play to your signature strengths, as opposed to situations that are a setup for frustration and failure. The class encourages you to let go of comparing yourself to your peers, as different people need different things. You explore your underlying values and what you find most important in life. You consider the level of meaning you need in your work, as well as how much you care about money, status, fame, independence, connection, and creativity. The class introduces you to the concept of "flow," the feeling you get when engaging in activities that provide ideal levels of challenge and mastery. By designing lives and careers that promote flow states, you will be most likely to thrive and not merely succeed. Indeed, it is important not to design a life that appears successful but feels miserable. Your choice of a romantic partner can also have huge implications for the trajectory of your life. The class helps you to identify typical traps, such as staying with someone who is a bad match, and discusses how to make constructive relationship choices. Ultimately, as there are likely multiple valid life and career paths for you to take, you identify and develop three different plans that feel authentic and inspiring to you.  Adjunct Instructor Bio: Dr. Johnson received his B.A. from Williams College, his Ph.D. in clinical psychology from Yale University, and is a Clinical Associate Professor at Brown University. He has taught this Winter Study for the last two years and deeply enjoys mentoring students around career issues.

Class Format: mornings
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference given to juniors and seniors
Materials/Lab Fee: cost of book(s)

Winter 2019

PSYC 12 (W) Alcohol 101: Examining and Navigating the College Drinking Scene
Seventy-two percent of college students report that they used alcohol at least once within the past 30 days. Where is the line between fun and danger? This course will examine the realities of the role of alcohol in the social lives of college students. Students will engage in active discussions of readings, videos, and myths vs. facts, as well as personal observations and opinions. Class structure will involve 3-hour classes that meet twice weekly. Participants will learn scientific facts about alcohol, including how it gets metabolized in the body differently in men and women, and how to recognize and respond to the signs of alcohol poisoning. Films will include evocative footage and interviews, such as "College Binge Drinking and Sober Reflections." We will hear from an expert in trauma and sexual assault and explore the significant role of alcohol in sexual assault on college campuses. We will discuss alcohol-related medical emergencies and problem-solve strategies to stay safe when choosing to use alcohol. Statistical data from colleges here in the Northeast will be reviewed, including survey results from the Core Institute and the Harvard School of Public Health Alcohol study. The course culminates in a final peer education presentation each student develops over the first 3 weeks through independent study outside of class on a related topic of their own choosing approved by the instructor.

Class Format: afternoons
Requirements/Evaluation: 5-page paper; final project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: permission of instructor
Materials/Lab Fee: cost of books
PSYC 13 (W) Practical Preparation for Work After Williams: Standing Out Instead of Fitting In!
Crosslistings: LEAD13 / PSYC13

Secondary Crosslisting
Students will dramatically enhance and expand their own practical professional competencies and personal attributes by gaining specific skills valuable and relevant for success in the real-world of work! Dynamic sessions are conducted by an exceptionally accomplished instructor focusing on character, interpersonal astuteness, communicating skills, leading effective change, financial statement literacy, decision-making under pressure, and thinking critically about and acting intentionally for personal development. Knowledge is transferred in the classroom through fast-paced, concise student-led discussion, live interaction with seven world-class guest speakers, individual communications exercises, role-playing, and personal one-on-one mentoring by the instructor. Preparing for productive class discussions and participation requires reading three short books (The Headmaster; Killer Angels; Breaking Through) and various articles, watching selected videos, understanding material provided in a subject matter guidebook, completing a private Birkman assessment online, as well understanding wide-ranging human performance though an encapsulated case study of the people at the Battle of Gettysburg. Benefits realized by students from all classes can be applied to any enterprise, including business, entrepreneurial initiatives, education, non-profits, and public sector governmental service. Students prepare a 5-page paper on a topic of their choosing that is work-shopped in a tutorial peer evaluation format prior to submission to the instructor. A one-page personal development action plan is also prepared that remains confidential between the student and the instructor in order to provide private individual mentoring and coaching. Class meetings are conducted with lots of fun starting in mid-morning for 1 hour and 45 minutes Monday through Thursday during Winter Study with an estimated three hours of daily preparation (about 20 hours per week) necessary by each student in order to take ownership for achieving and enjoying the full learning experience. Course Daily Agenda:  http://www.intersolvegroup.com/wp-content/uploads/WilliamsWinterStudyAgenda2019.pdf  Adjunct Instructor Bio:  http://www.intersolvegroup.com/leadership-profile/

Class Format: Monday through Thursday 10-11:50 AM
Requirements/Evaluation: class participation based on materials provided for daily preparation, a 5-page paper reviewed in a tutorial peer format and evaluated by the instructor, and a one-page personal development action plan
Prerequisites: the only prerequisite is a keen and purposeful desire to learn and develop oneself through a practical applied experience
Enrollment Limit: 12
Enrollment Preferences: diversity and inclusion of geographic, economic and social background will be considered in order to assemble a spirited mix of participants
Materials/Lab Fee: none

PSYC 14 (W) JA SelCom: A Case Study in Selection Processes

This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in selection? These are just a few of the questions that we will seek to understand through guest speakers from The Davis Center, Psychology Department, Admissions, and the Career Center. The majority of the time will be dedicated towards applying these ideas in selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality.

Class Format: mornings and afternoons
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference given to sophomores and admission is based on quality of the application
Materials/Lab Fee: none
Attributes:  EXPE Experiential Education Courses
PSYC 15 (W)  Ephquilts! An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: Pieces of the Past by Nancy J. Martin; Stitching Memories: African-American Story Quilts by Eva Ungar Grudin; Sunshine and Shadow: The Amish and Their Quilts by Phyllis Haders; A People and Their Quilts by John Rice Irwin; Treasury of American Quilts by Cyril Nelson and Carter Houck; The Quilt: New Directions for an American Tradition, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

Class Format: afternoons
Requirements/Evaluation: formal public exhibit
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference given to seniors, juniors, first years
Materials/Lab Fee: cost to student $250
Attributes: EXPE Experiential Education Courses

PSYC 16 (W) Self Compassion: The Benefits and Challenges

Ever put yourself down when things aren't going well? Offering yourself compassion is often recommended by therapists and is a skill taught in some modes of therapy. What is the basis for this recommendation? How is self-compassion put into practice? What makes it so challenging? You will learn about the elements of self-compassion, explore and experience different ways of offering yourself compassion, and discuss your experiences. You will look at ways that self-compassion can positively impact your mental health, your work, your play, and your relationships. You will be taught self-compassion skills, including mindfulness practices and recognizing and challenging negative self-talk, among others. You will be asked to practice these skills between classes, do some reading, and reflect on your experiences. Adjunct Instructor Bio: Becky is a licensed clinical social worker. She has worked as a psychotherapist with Integrative Wellbeing Services here at Williams since 2014. She has explored the topics of compassion and self-compassion both professionally and personally.

Class Format: mornings and afternoons
Requirements/Evaluation: one 2- to 3-page reflection paper will be due each week; a weekly log of mindfulness activities will also be kept and submitted
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: random selection if over-enrolled
Materials/Lab Fee: $10

PSYC 17 (W) "Cultural Cliteracy": Introduction to Transformative Sexuality Education
This course will introduce students to transformative sexuality education. Transformative sexuality education assumes students will experience major shifts in their sexual knowledge, attitudes, and behaviors. Undergraduates commonly report inadequate sex education in high school, concern that students are sexually harassed, assaulted, or raped during their four years in residence and that little opportunity exists on campus for students to talk with each other candidly about sexual issues. The course is designed to improve the sexual culture on the Williams College campus by expanding knowledge, fostering skills, and providing opportunities for intergroup dialogue. Students will explore topics such as communication and sexual communication, gender diversity, enthusiastic consent, pleasure in and out of committed relationships, hookup culture, models of sexual functioning, BDSM/kink culture, and sexual identity. Topics will be examined through an intersectional lens. A variety of methods will help engage students with course material. Lectures by the instructors, large and small group discussions, role-plays, practice of empathy, intimacy, interviewing skills, reading literary fiction, DVD screenings, anonymous class surveys, and taking sexual histories promote students’ learning. Sexually explicit material is used in this course, following trauma-informed practices and guidelines specifying best pedagogical practices. Each class session is designed to create activities that will lead students to achieve at least three learning objectives. Evaluation will be based on submission of a journal entry related to each class session and a journal entry related to a reading/movie due each class session. Students will submit a final paper and creative project.

Attendance and participation are crucial to successful completion of this course.

Class Format: afternoons

Requirements/Evaluation: class attendance and participation; 5-page paper; 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores and juniors will be given priority

Materials/Lab Fee: cost of books

Winter 2019

LEC Section: 01 TBA Paul D. Gitterman, Ruby T. Solomon

PSYC 18 (W) Call In Walk In training for Peer Health

Crosslistings: PSYC18 / SPEC18

Secondary Crosslisting

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.

Class Format: mornings

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: current active members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health

Materials/Lab Fee: none

Winter 2019

LEC Section: 01 TBA Laini Sporbert

PSYC 21 (W) Psychology Internships

Would you like to explore applications of psychology in the “real world?” This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or other setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed
Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

**Class Format:** by appointment

**Requirements/Evaluation:** evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

**Prerequisites:** approval by Noah Sandstrom is required

**Enrollment Limit:** 20

**Enrollment Preferences:** random selection

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Noah J. Sandstrom

**PSYC 22 (W) Introduction to Research in Psychology**

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be.

**Class Format:** determined by faculty/research

**Requirements/Evaluation:** evaluation will be based on the quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project

**Prerequisites:** permission of faculty mentor

**Enrollment Limit:** POI

**Enrollment Preferences:** selection will be based on evaluation of departmental application and number of faculty available as mentors

**Materials/Lab Fee:** none

Winter 2019

LEC Section: 01    TBA     Steven Fein

**PSYC 31 (W) Senior Thesis: Psychology**

To be taken by students registered for Psychology 493-494.

**Class Format:** thesis

**Requirements/Evaluation:** determined by faculty

**Prerequisites:** PSYC 493 or NSCI 493

**Materials/Lab Fee:** $0

**Distributions:** (D2)

Winter 2019

HON Section: 01    TBA     Steven Fein

**PSYC 99 (W) Independent Study: Psychology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

Winter 2019

IND Section: 01   TBA   Steven Fein

PSYC 101 (F) Introductory Psychology

An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

Class Format: lecture

Requirements/Evaluation: two lab reports, unit quizzes, and a final exam

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 160

Distributions: (D2)

Attributes: NSCI Required Courses; TEAC Teaching Sequence Courses

Fall 2018

LEC Section: 01   MWF 10:00 am - 10:50 am   Amie A. Hane, Clarence J. Gillig

Spring 2019

LEC Section: 01   MWF 10:00 am - 10:50 am   Noah J. Sandstrom, Clarence J. Gillig

PSYC 127 (F) The Psychology of Success (WI)

This course will examine the psychology of success from a scientific perspective. After considering what success means, we will examine two broad influences on success: personality (e.g., intelligence, grit, and mental illness) and environment (e.g., schooling, parenting, and practice). Other topics will include how discrimination affects success, cross-cultural differences in how children are cared for, and the self-help industry.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on written work and discussion of that work. A five page paper will be due every other week

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: highest priority will be given to incoming first-years followed by rising sophomores

Expected Class Size: 10

Distributions: (D2) (WI)

Not offered current academic year

PSYC 161 (F) Nonviolence and Positive Psychology

In this course we will explore the theory and practice of nonviolence in the context of research in Positive Psychology. Nonviolence means choosing not to threaten or injure others, and its practice requires cultivating personal qualities that enable such a choice. Positive Psychology refers to the scientific study of those qualities that enable people to live happy and fulfilling lives. We will begin by studying the history and moral theories of nonviolence. We will then evaluate the claims of those theories regarding the positive effects of nonviolence by discussing research on psychological benefits to the practitioner, attitude change in the adversary, and effects on the larger community. Topics will include self-control, empathy,
forgiveness, tolerance, aggression, resisting violent assault, civil disobedience, and courage. Along the way we will introduce basic concepts in research design and interpretation of data to help us evaluate the research with a critical eye. This course is a part of a joint program between Williams’ Center for Learning in Action and the Berkshire County Jail, in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Classes will be held at the jail, with transportation provided by the college. * Please note the atypical class hours, Tuesday, 4:45-8:30 pm.

**Class Format:** seminar

**Requirements/Evaluation:** class attendance and participation, short essays, and a final paper

**Extra Info:** not available for the fifth course option

**Prerequisites:** not open to first-year students

**Enrollment Limit:** 9

**Enrollment Preferences:** selection will be based on student interviews

**Expected Class Size:** 9

**Department Notes:** this class will include 9 Williams students and 9 inmates

**Distributions:** (D2)

**Attributes:** PSYC Area 6 - Other/Interdisciplinary Psychology

---

**PSYC 201 (F) Experimentation and Statistics** (QFR)

An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

**Class Format:** lecture/lab

**Requirements/Evaluation:** papers, exams, and problem sets

**Extra Info:** two sections; must register for the lab and lecture with the same instructor

**Extra Info 2:** may not be taken on a pass/fail basis

**Prerequisites:** PSYC 101; not open to first-year students except with permission of instructor

**Enrollment Limit:** 22

**Enrollment Preferences:** Psychology majors

**Distributions:** (D2) (QFR)

**Attributes:** COGS Related Courses; PHLH Statistics Courses;

PSYC 212 (F)  Neuroscience
Crosslistings: PSYC212 / BIOL212 / NSCI201
Secondary Crosslisting
A study of the relationship between brain, mind, and behavior. Topics include a survey of the structure and function of the nervous system, basic neurophysiology, development, learning and memory, sensory and motor systems, consciousness and clinical disorders such as schizophrenia, autism, Parkinson's disease, and addiction. The laboratory focuses on current topics in neuroscience.

Class Format: lecture, three hours a week; laboratory, every other week
Requirements/Evaluation: evaluation will be based on a lab practical, lab reports, two hour exams and a final exam
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor
Enrollment Limit: 72
Enrollment Preferences: sophomores and Biology and Psychology majors
Expected Class Size: 72
Department Notes: does not satisfy the distribution requirement in the Biology major
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC

PSYC 222 (F)  Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Crosslistings: PHIL222 / COGS222 / PSYC222
Secondary Crosslisting
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes
research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, and self-paced weekly exercises
Extra Info: not available for the fifth course option
Prerequisites: PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Department Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL
Distributions: (D2)
Attributes: Linguistics; PHIL Contemp Metaphysics & Epistemology Courses; PSYC 200-level Courses
Not offered current academic year

PSYC 232 (F) Developmental Psychology
An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, and family systems.

Class Format: lecture/discussion
Requirements/Evaluation: attendance and active class participation, 3 exams (2 midterms and final), and regular writing assignments
Prerequisites: PSYC 101
Enrollment Limit: 50
Enrollment Preferences: sophomores and junior Psychology majors
Expected Class Size: 50
Distributions: (D2)
Attributes: PSYC 200-level Courses; TEAC Teaching Sequence Courses

Fall 2018
LEC Section: 01    TR 11:20 am - 12:35 pm     Amie A. Hane

PSYC 242 (F) Social Psychology
A survey of theory and research in social psychology. Topics include the self, social perception, conformity, attitudes and attitude change, prejudice, aggression, altruism, attraction and love, intergroup conflict, and cultural psychology. Applications in the areas of advertising, law, business, and health will also be discussed.

Class Format: lecture
Requirements/Evaluation: two in-class exams, one paper and a final exam
Enrollment Limit: none
Expected Class Size: 50
Distributions: (D2)
Attributes: PSYC 200-level Courses; TEAC Teaching Sequence Courses

Fall 2018
PSYC 252 (F) Psychological Disorders

A study of the phenomenology, etiology, and treatment of the major forms of psychological disorders: the schizophrenias, dissociative disorders, affective disorders, anxiety disorders, personality disorders, eating disorders, addictions, alcoholism, and others. The course emphasizes an integrative approach which incorporates and analyzes theories and research from psychological, biological, interpersonal, and sociocultural perspectives.

Class Format: lecture

Requirements/Evaluation: two in class exams and a final exam

Prerequisites: PSYC 101; open to first-year students

Enrollment Limit: 50

Enrollment Preferences: Psychology majors, then sophomores, then by seniority

Expected Class Size: 50

Distributions: (D2)

Attributes: PSYC 200-level Courses

PSYC 258 (S) Language and Literacy Development

Crosslistings: PSYC258 / JAPN258

Secondary Crosslisting

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How “natural” is it to learn to read?

Class Format: seminar

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Department Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under JAPN; meets Division 2 requirement if registration is under PSYC

Attributes: Linguistics
PSYC 272 (S) Psychology of Education
This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

Class Format: lecture/discussion
Requirements/Evaluation: two exams and a final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 101
Enrollment Limit: 50
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 50
Distributions: (D2)
Attributes: PSYC 200-level Courses; TEAC Teaching Sequence Courses

Spring 2019
LEC Section: 01 TF 1:10 pm - 2:25 pm Susan L. Engel

PSYC 314 (S) Drug Addiction and Obesity: Tales of a Disordered Brain
Crosslistings: NSCI314 / PSYC314

Primary Crosslisting
Drug addiction and obesity are two of the biggest health problems facing our world today. Although obesity and drug addiction are two qualitatively different disorders, recent literature suggests that they share similar neural substrates. The first third of this class will discuss the behavioral and neural underpinnings of drug addiction, the second third of this class will discuss the behavioral and neural underpinnings of obesity, and the last third of the class will discuss their interaction in many different facets. In so doing, students will learn about the animal models used to study drug addiction and obesity (i.e., intravenous self-administration, intracranial self-stimulation, conditioned place preference, conditioned taste avoidance, and locomotor sensitization) and the neurobiological techniques used to understand their underlying mechanisms (i.e., DREADDs, optogenetics, and immunohistochemistry). Utilizing these tools, students will design and conduct an empirical laboratory experiment to study these dysregulated behaviors.

Class Format: seminar
Requirements/Evaluation: presentations and participation in discussions; written assignments; weekly lab meetings will be held and empirical projects presented in a final poster session
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 16
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course
PSYC 315 (F)  Hormones and Behavior
Crosslistings: NSCI315 / PSYC315

Primary Crosslisting
In all animals, hormones are essential for the coordination of basic functions such as development and reproduction. This course studies the dynamic relationship between hormones and behavior. We will review the mechanisms by which hormones act in the nervous system. We will also investigate the complex interactions between hormones and behavior. Specific topics to be examined include: sexual differentiation; reproductive and parental behaviors; stress; aggression; and learning and memory. Students will critically review data from both human and animal studies. All students will design and conduct an empirical research project as part of a small research team.

Class Format: empirical lab course
Requirements/Evaluation: presentations and participation in discussions, short papers, midterm, written and oral presentation of the research project
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 16
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course

Fall 2018
LEC Section: 01    MWF 8:30 am - 9:45 am    Noah J. Sandstrom
LAB Section: 02    T 1:00 pm - 4:00 pm    Noah J. Sandstrom

PSYC 317 (S)  Nature via Nurture: Topics in Developmental Psychobiology
Crosslistings: PSYC317 / NSCI317

Primary Crosslisting
Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

Class Format: tutorial
Requirements/Evaluation: each week, students will either present an oral argument based on a 5-page position paper or respond to their partners' paper; Weekly lab meetings will be held and empirical projects presented in a final poster session
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 10
Enrollment Preferences: Neuroscience concentrators and Psychology majors
Expected Class Size: 10
Distributions: (D3)
Distribution Notes: meets Division 3 requirement if registration is under PSYC
PSYC 318 (S) Image, Imaging, and Imagining: The Brain and Visual Arts

Crosslistings: NSCI318 / INTR223 / PSYC318

Primary Crosslisting

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist's motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how "outsider" artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

Class Format: seminar and empirical lab course

Requirements/Evaluation: evaluation will be based on a midterm, participation in class discussions, and a poster presentation of the empirical project

Extra Info: satisfies one semester of Division III requirement

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 101, an ARTH or ARTS course, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors; Psychology majors and Neuroscience concentrators

Expected Class Size: 12

Distributions: (D3)

Distribution Notes: meets Division 3 requirement if registration is under PSYC or INTR

Attributes: FMST Related Courses; NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience; PSYC Empirical Lab Course

Not offered current academic year

PSYC 319 (S) Neuroethics (WI)

Crosslistings: PSYC319 / NSCI319

Primary Crosslisting

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on five 5-page position papers and five short response papers as well as participation in discussions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience;
Not offered current academic year

PSYC 322 (F) Concepts: Mind, Brain, and Culture
Every time we see something as a kind of thing, every time that we decide that an object is a cup rather than a glass, when we recognize a picture of a familiar face as a picture of ourselves, or even when we understand speech, we are employing categories. Most categorization decisions are automatic and unconscious, and therefore have the illusion of simplicity. The complexity of these decisions, however, becomes apparent when we attempt to build machines to do what humans perform so effortlessly. What are the systems in place that allow us this extraordinary ability to segment the world? Are they universal? How does conceptual knowledge differ across cultural groups? How do concepts affect our perception? How do the categories of experts differ from the categories of novices? Do children have the same kind of conceptual knowledge as adults? How are categories represented in the brain? In this course, we explore various empirical findings from cognitive psychology, cognitive neuroscience, and anthropology that address these questions.
Class Format: empirical lab course
Requirements/Evaluation: short papers, class presentation, and research paper
Prerequisites: PSYC 221 or 222 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and Cognitive Science concentrators
Expected Class Size: 16
Distributions: (D2)
Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course
Not offered current academic year

PSYC 324 (S) Great Debates in Cognition
The field of cognition is filled with controversies about how the mind really works. For example, is there sufficient evidence for a system in vision that can become aware of things without actually "seeing" them? Is it necessary to assume that babies come into the world armed with innate linguistic knowledge? Are humans inherently rational? Can we make inference about the mind using neuroimaging? These debates, and others that we will consider, help fuel scientific discovery in cognition in interesting ways. In this class, we will consider some of these contemporary debates, weigh evidence on both sides, and discuss the implications for what we know about the mind.
Class Format: tutorial; students will meet in pairs with the instructor for an hour each week
Requirements/Evaluation: evaluation will be based on weekly papers and oral arguments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 221 or 222 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Cognitive Science concentrators
Expected Class Size: 10
Distributions: (D2)
Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology
Not offered current academic year

PSYC 326 (F) Choice and Decision Making
One aspect of "being human" is that we often make choices that we know are bad for us. In this course we survey theoretical and experimental approaches to understanding our strengths and weaknesses as decision makers. Topics include normative decision theories, biases in probability
judgments, "fast and frugal" heuristics, impulsiveness and self-control, addictions and bad habits, gambling, and moral decision making.

Class Format: empirical lab course

Requirements/Evaluation: problem sets, essay papers, class and lab participation, and a research report

Prerequisites: PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110

Enrollment Limit: 16

Enrollment Preferences: senior Psychology majors who need the course to fulfill the major

Expected Class Size: 16

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PHLH Decision-Making by Institutions + Individuals; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course

Not offered current academic year

PSYC 327 (F) Cognition and Education

This class will focus on basic research into the cognitive processes underlying learning. How does the mind encode, store, and retrieve knowledge? How do learners (and teachers) manage their own learning? How do educational practices depart from what research recommends? The readings will be scientific articles. Students will do original research.

Class Format: empirical lab

Requirements/Evaluation: class participation, daily quizzes, research papers

Prerequisites: PSYC 201 and PSYC 221 or 222, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 12

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course; TEAC Teaching Sequence

Fall 2018

SEM Section: 01    TF 2:35 pm - 3:50 pm     Nate  Kornell
LAB Section: 02    W 1:00 pm - 4:00 pm     Nate  Kornell

PSYC 335 (S) Early Experience and the Developing Infant  (WI)

The period from conception to age three is marked by impressive rapidity in development and the plasticity of the developing brain affords both fetus and infant an exquisite sensitivity to context. This course delves into the literature that highlights the dynamic interactions between the developing fetus/infant and the environment. The course readings span a range of disciplines and cover a diversity of hot topics in the study of prenatal and infant development, including empirical research drawn from the developmental, neuroscience, psychopathology, and pediatric literatures.

Class Format: seminar

Requirements/Evaluation: active class participation, regular thought papers and class presentations, and a written report and accompanying presentation of an independent project

Prerequisites: PSYC 201, PSYC 212, and PSYC 232 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Distributions: (D2) (WI)

Attributes: PHLH Biomedical Determinants of Health; PHLH Reproductive, Maternal and Child Health; PSYC Area 3 - Developmental Psychology;
PSYC 338 (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Class Format: seminar

Requirements/Evaluation: three 3-5 page essays, two child observations and a 7-10 page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: preference given to Psychology majors

Expected Class Size: 16

Distributions: (D2)

Attributes: PSYC Area 3 - Developmental Psychology; TEAC Teaching Sequence Courses

Not offered current academic year

PSYC 341 (S) Stereotypes, Prejudice, and Discrimination (WI)

Crosslistings: PSYC341 / WGSS339

Primary Crosslisting

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

Requirements/Evaluation: weekly brief papers, oral reports, two longer papers

Prerequisites: PSYC 201 and 242

Enrollment Limit: 16

Enrollment Preferences: senior, then junior Psychology majors

Expected Class Size: 16

Distributions: (D2) (WI)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Related Courses; PSYC Area 4 - Social Psychology; PSYC Empirical Lab Course; TEAC Related Courses;
This course focuses on how people make judgments and decisions in their social lives and why they are sometimes biased and irrational in their choices. We will place a strong emphasis on exploring how ideas from the judgment and decision-making literature can aid in our understanding of social psychological phenomena, including planning for the future, understanding other people, and resolving interpersonal conflicts. We will also place an emphasis on people’s judgments and decisions as they pertain to their happiness and well-being, exploring how concepts in the judgment and decision-making literature can help us to understand why certain types of outcomes are more satisfying than others and why people sometimes choose in ways that fail to maximize their well-being. As we explore these questions, we will survey a variety of methods and perspectives, ranging from classic social psychological experiments to techniques imported from behavioral economics and cognitive psychology.

**Class Format:** empirical lab course

**Requirements/Evaluation:** a series of short papers; two essay exams; written and oral reports of research

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PSYC 242 and PSYC 201, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 12

**Distributions:** (D2)

**Attributes:** PSYC Area 4 - Social Psychology; PSYC Empirical Lab Course

**Not offered current academic year**

**PSYC 346 (F) Environmental Psychology**

**Crosslistings:** ENVI346 / PSYC346

**Primary Crosslisting**

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans’ disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

**Class Format:** seminar

**Requirements/Evaluation:** a series of papers, two essay exams, written and oral reports of research

**Prerequisites:** PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Environmental Studies concentrators

**Expected Class Size:** 16

**Distributions:** (D2)

**Attributes:** AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; PSYC Area 4 - Social Psychology

**Not offered current academic year**

**PSYC 349 (F) Psychology and Law**

This course examines the legal system in light of psychological research findings, Supreme Court rulings, wrongful conviction cases and illustrative crimes. The law's informal theories of human behavior will be compared to what psychologists know on the basis of theories and research regarding such topics as Miranda, lie detection, police interrogation, false confessions, eyewitness identification, repressed and recovered memories, forensic evidence, and juries. The course will also explore the psychological mechanisms underlying legal decisions, and demonstrate how psychological findings can contribute to legal system reform.

**Class Format:** seminar

**Requirements/Evaluation:** exams, a series of papers

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** PSYC 201 and PSYC 242 or permission of instructor
**Enrollment Limit:** 18  
**Enrollment Preferences:** Psychology majors  
**Expected Class Size:** 18  
**Department Notes:** either PSYC 347 or PSYC 349 may be taken for credit, but not both  
**Distributions:** (D2)  
**Attributes:** PSYC Area 4 - Social Psychology

**Fall 2018**  
SEM Section: 01  TF 1:10 pm - 2:25 pm  Amanda N. Bergold

**Spring 2019**  
SEM Section: 01  MR 2:35 pm - 3:50 pm  Amanda N. Bergold

**PSYC 352 (F) Clinical and Community Psychology**  
This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. **Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.**  
**Class Format:** seminar  
**Requirements/Evaluation:** field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** PSYC 252  
**Enrollment Limit:** 15  
**Enrollment Preferences:** senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course  
**Expected Class Size:** 15  
**Distributions:** (D2)  
**Attributes:** EXPE Experiential Education Courses; PHLH Reproductive, Maternal and Child Health; PSYC Area 5 - Clinical Psychology

**Fall 2018**  
SEM Section: 01  MR 2:35 pm - 3:50 pm  Laurie Heatherington

**PSYC 354 (F) Beyond Symptoms: Cognitive and Perceptual Changes in Mental Disorder**  
When we think of mental disorders, the first things that come to mind are often the symptoms that define them, like hallucinations, delusions, mood disturbances, or anxiety. Interestingly, in addition to these cardinal symptoms, many disorders are accompanied by other mental changes that are simpler and therefore more scientifically approachable, like problems in perception or in working memory. This course will delve into how our minds and brains perceive and understand the world in a very basic sense, and then explore how perceptual and cognitive processes are altered in mental disorders like schizophrenia, depression, and anxiety disorders, and whether and why such alterations are important. Readings will explore seminal and current findings in the field, as well as theoretical papers.  
**Class Format:** seminar  
**Requirements/Evaluation:** two short position papers, occasional one-page response, and a written/oral report of research  
**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option  
**Prerequisites:** PSYC 201 and PSYC 252  
**Enrollment Limit:** 18  
**Enrollment Preferences:** Psychology majors  
**Expected Class Size:** 18
Psychotherapy is a young, barely 100-year old psychological endeavor which attempts to promote change and healing through social interaction. How can it be that talking with a psychotherapist can help people change -- emotionally, cognitively, and/or behaviorally -- and how exactly does it help people achieve relief from psychological disorders and problems? In this course, we will study some of the key approaches to psychotherapy by examining the theories and scientific research that surround them, and considering theory and research in juxtaposition. This will be accomplished by a close reading and critical analysis of primary source theoretical papers, the "raw data" (videotapes and transcripts) of therapy sessions, case studies, and contemporary empirical research on the outcomes and change processes of psychotherapy. Students will learn how to evaluate the efficacy claims of both standard and new therapies and how to evaluate claims about the mechanisms by which those therapies work. Current controversies in psychotherapy and psychotherapy research will be addressed and debated as well. All students will design and conduct an empirical research project based on the course material.

Class Format: empirical lab course

Requirements/Evaluation: attendance and active class participation, weekly 2-3 page reading response papers, APA style research report and poster/oral presentation of the research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 201 and PSYC 252

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Distributions: (D2)

Attributes: PSYC Area 5 - Clinical Psychology; PSYC Empirical Lab Course

PSYC 357 (S) Depression

This course will provide students with a comprehensive understanding of depression. Topics will include assessment, models of etiology and course, effective approaches to prevention and intervention, and depression in specific populations. Readings will expose students to seminal works in the field as well as current methods and research findings. All students will design and conduct an empirical research project based on the readings and concepts discussed. Throughout the course, students will evaluate current research based on theory, methodological rigor, and potential impact on prevention and intervention efforts.

Class Format: empirical lab course

Requirements/Evaluation: class participation, in-class short written responses, weekly response papers, midterm exam, an original empirical research project, a written report of the research project, and an oral presentation of the research project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: PSYC 201 and PSYC 252

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Distributions: (D2)
PSYC 359 (S)  Anxiety: Responses to Danger, Both Real and Imagined
This is an advanced course on anxiety that takes an in depth look at the theory and research on the normative psychological processes that influence responses to danger, both real and imagined. Specifically, it examines the empirical research on psychological responses to traumatic experiences, such as combat, rape, and natural disasters. Responses to perceived or imagined threats are also discussed as the underpinnings of such anxiety disorders as Panic Disorder, Generalized Anxiety Disorder, Social Phobia, Specific Phobia and OCD. Discussions focus on commonalities and differences in empirically supported treatments for anxiety disorders as well as controversies in the field.

Class Format: seminar
Requirements/Evaluation: active class participation, frequent response papers, midterm examination and final term paper
Prerequisites: PSYC 252
Enrollment Limit: 18
Enrollment Preferences: Psychology Majors; preference given to those with outstanding major requirements
Expected Class Size: 18
Distributions: (D2)
Attributes: PSYC Area 5 - Clinical Psychology

PSYC 361 (S)  Psychology of Nonviolence
Nonviolence refers to choice behavior in interpersonal interactions in which physical injury to others is rejected as an option. In this course we will study moral and psychological theories of nonviolence, and evaluate the empirical support for their central claims of psychological benefits to the practitioner, attitude change in the adversary, and positive exemplary effects on social interaction. Topics include empathy, tolerance, forgiveness, aggression, courage, resisting violent assault, and civil resistance.

Class Format: discussion/seminar
Requirements/Evaluation: class attendance and participation, discussion leadership, one 5-page essay, and a final paper of approximately 10 page
Prerequisites: any 200-level course in PSYC or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Distributions: (D2)
Attributes: PSYC Area 6 - Other/Interdisciplinary Psychology

PSYC 372 (F)  Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students’ learning? What does it take to be an educated person?

Class Format: seminar
Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 232 or PSYC 272 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 16
Distributions: (D2)
Attributes: EXPE Experiential Education Courses; PSYC Area 7 - Educational Psychology; TEAC Teaching Sequence Courses

Fall 2018
SEM Section: 01    W 1:10 pm - 3:50 pmThursday Org Mtg 7:30 pm - 7:55 pm   Susan L. Engel

PSYC 397 (F) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

PSYC 401 (F) Perspectives on Psychological Issues
This course—the psychology department's senior seminar—considers several important contemporary topics from diverse psychological perspectives. These topics will be introduced via popular books or films, and we will analyze them more deeply with original research articles from across multiple perspectives and subdisciplines of psychology. The course will primarily be discussion based, and the students will lead these discussions.
Class Format: seminar
Requirements/Evaluation: participation in class discussions, choosing relevant research articles, and three position papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Limit: none
Enrollment Preferences: open to seniors Psychology majors only
Expected Class Size: 15
Department Notes: required of all senior Psychology majors
Distributions: (D2)

Fall 2018
PSYC 493 (F) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our website.

Class Format: independent study
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Extra Info 2: this is part of a full-year thesis (493-494); Senior Psychology Majors meeting requirements for Honors
Prerequisites: permission of the thesis advisor
Distributions: (D2)

Fall 2018
HON Section: 01 TBA Steven Fein

PSYC 494 (S) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our website.

Class Format: independent study
Extra Info: this is part of a full-year thesis (493-494)
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: permission of the thesis advisor
Distributions: (D2)

Spring 2019

PUBLIC HEALTH

Chair: Professor Tara Watson

On leave Fall/Spring: Professor B. Klingenberg.
On leave Fall only: Professor L. Banta. Assistant Professor S. Godlonton.
On leave Spring only: Professors: A. Gehring, L. Shore-Sheppard.

Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life’s possibilities. The way a society is organized affects the way that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility: what effective public health policy is and how we can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disease, over time and among cultures; how we think about cause and responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

Requirements

Application to the concentration must be completed in the Spring of sophomore year. Applications are due during pre-registration. Application materials can be obtained on the public health website public-health.williams.edu by early April or by e-mailing the chair of the program. Due to excess demand for the concentration, applicants are not guaranteed admittance to the program. Depending on availability, a few students may be admitted in the Spring of Junior year with a mid-April deadline.

All students wishing to pursue the Area of Concentration should take this course early in their careers, preferably sophomore year. Students may petition the advisory committee to substitute a course taken in a study-abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year, and should recognize that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

Statistics

Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

Elective Courses

Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single “track” within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of their particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

Experiential Component

Because many public health challenges cannot be fully appreciated until one has hands-on experience with real communities and actual populations, each concentrator must have at least one relevant field-based educational experience with a research component. This requirement may be met through participation in an approved study abroad program (see below), one of the Winter study courses marked with an asterisk, a WS99 project, or a not-for-credit summer or academic-year internship. In every case, the advisory committee must approve the project in advance. Please note that experiential component should address both the “public” and “health” in public health. Projects that center on clinical or lab or that do not have a meaningful health component will generally not satisfy the PH experiential requirement.

PHLH 402 (S) Senior Seminar in Public Health
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

**Written Proposal**

To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and if relevant, how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage with socio-cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the end of course registration period in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee. Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. Please note electives will not be offered every year. Students should check the course catalog as they considering possible electives.

**STUDY ABROAD AND INTERNSHIPS**
Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field-based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the Chair. You can find general study away guidelines for Public Health at public-health.williams.edu.

**PHLH 13 (W) Behavioral Health Prevention and Middle School Leadership Development**
In this course, students will learn about behavioral health prevention and promotion, with an emphasis on the prevention of substance use disorders and the Substance Abuse & Mental Health Services Administration’s (SAMHSA) Strategic Prevention Framework. Following this grounding in prevention science, students will learn about middle school leadership development and community action with a behavioral health and wellness focus, and be trained to deliver core components of the New Hampshire Teen Institute’s (TI) Leaders in Prevention program for students in grades 6-8. The classroom portion of this course will prepare students to put this knowledge into practice as staff members at the January session of Leaders in Prevention, serving with other youth & adult staff members of TI to facilitate a weekend of education and networking for 50-60 middle school students from around NH and New England. Students in this course will work with teams of middle school students to help them create a student-led action plan for a school or community wellness event to be implemented in their home communities. During the first 2 weeks of the Winter Study period,
students will meet on campus for approx. 15 hrs per week. The experiential portion of the course--serving as facilitators at the Leaders in Prevention weekend--will be an overnight trip from Thurs. 1/17--Sun 1/20 to a conference center in Greenfield, NH. (Lodging & food will be provided to students free of charge while at the camp.) This trip is mandatory for the course, and involves working with middle school youth for 3 very full days. Students will meet once again during the final week of Winter Study to debrief and process their facilitation experiences. Academic work will be primarily contained to the classroom time of the first two weeks. A culminating 10-page reflection paper to demonstrate a synthesis of students’ classroom and practical learning will be the only sizeable out-of-class work. Adjunct Instructor Bio: Marissa is the Executive Director of the NH Teen Institute and a trainer for multiple workshops developed by SAMHSA’s CAPT and ATTC systems. She is the Secretary of the Prevention Certification Board of NH and the NH Prevention delegate to the IC&RC, and serves on the NH Governor’s Commission Prevention Task Force. Outside of prevention work, she is Assoc. Artistic Dir. of Mill City Productions in North Adams, MA.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page reflection paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** lottery

**Materials/Lab Fee:** $45

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

---

**PHLH 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions**

**Crosslistings:** PHLH14 / ANSO14 / CHEM14

**Secondary Crosslisting**

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course. Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

**Class Format:** at least three times a week for a total of 6 hours

**Requirements/Evaluation:** 10-page paper, final project

**Prerequisites:** course in Biostat helpful, but not required

**Enrollment Limit:** 18

**Department Notes:** all interested students will be interviewed by the instructor

**Materials/Lab Fee:** Cost of books

Winter 2019

LEC Section: 01    TBA     Nicholas  Wright
PHLH 15 (W) The Human Side of Medicine

In today's health care atmosphere of physician accountability, advanced medical technology, and evidence-based diagnosis, the "human side" of medical practice is often minimized or even disregarded. Medical schools debate how or whether to emphasize this more interpersonal aspect of medicine within their curriculums. This concern with the patient/physician relationship becomes particularly relevant with today's reliance upon personal devices and with a culture promoting medicine as a big business model. Increasingly research shows that the combination of both perspectives--patient centered understanding and technical proficiency--lead to better diagnosis and treatment; to improved patient compliance and satisfaction; and to increased physician professional satisfaction. Original thinking, examining personal/family experiences, in-class skill practice, and skype interviews with patients/student/health care professionals will provide much of the learning experience. This seminar works well for those who have shadowed physicians or are planning to shadow, but all majors are welcome. Adjunct Instructor Bio: Sandra Goodbody is a clinical social worker. She has maintained a psychotherapy practice in D.C., has a clinical appointment at The George Washington School of Medicine, and has served as a senior project director at the National Academy of Medicine.

Class Format: TWR, 10 a.m.-noon
Requirements/Evaluation: final project plus three 2-page papers
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: class balance and student interest
Materials/Lab Fee: $10 plus cost of books

Winter 2019
LEC Section: 01 TBA Sandra Goodbody

PHLH 16 (W) Addiction Studies and Diagnostics

This course is designed to assist students while at Williams and after graduation develop an effective understanding of the impact and treatment of addiction. It is designed for students planning to continue on to Med School and graduate work in the Humanities; work in public health; are a part of a family; a friend of an addict or those impacted by addiction; or to be an educated citizen. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Speakers will tell their stories in their journey from addiction to recovery as well as their experience working as therapists. Students will be expected to accurately diagnose the speakers according to the criteria in the DSM-5. Finally, an annotated bibliography and oral presentation will be presented in groups at the end of the course. Adjunct Instructor Bio: Mr. Berger has been teaching this course at Williams since 2010. He has advanced degrees from Springfield College and the Hazelden Graduate School of Addiction Studies, 30 years of recovery from addiction, and a decade of experience in community mental health and clinics.

Class Format: 7-9:30 PM, two evenings each week
Requirements/Evaluation: class participation, field experience of 12-step and other mutual aid recovery groups, experience with initial assessments for substance use disorders, initial experience with formal criteria for SUD diagnosis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: by graduating class and then by instructor permission
Materials/Lab Fee: none

Winter 2019
LEC Section: 01 TBA K. Richard Berger

PHLH 18 (W) "The Transformation of Silence": Exploring Campus Sexual Violence Prevention and Response

Crosslistings: PHLH18 / WGSS18
Secondary Crosslisting

Since 2011, student activism and federal guidance of dramatically changed how campuses address sexual violence. This class will explore response to and prevention of sexual violence on college campuses and more broadly, across topics related to gender and sexuality, race, constructs of
accountability, and public health and social justice approaches to prevention. Class will be heavily comprised of interactive activities, along with reading, films, and reflective writing. Course will meet 3 days per week for 2 hours. Some outside of class work in the form of film viewing and attendance at talks. Adjunct Instructor Bio: Meg Bossong ’05 is the Director of Sexual Assault Prevention and Response. Prior to returning to Williams, she was the Manager of Community Engagement for the Boston Area Rape Crisis Center, where she worked with community stakeholders in education, faith communities, medical and mental health care, law enforcement, and beyond on response and prevention initiatives.

Requirements/Evaluation: a 10-page final paper, along with Glo reflections

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: submission of a few sentence description indicating interest level in the course, preference to first years and sophomores

Materials/Lab Fee: none

Winter 2019

LEC Section: 01    TBA    Meg  Bossong

PHLH 25 (W) Public Health, Education, and Community Action in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable—and most vital—members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in Spring of 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. With the support of a Fulbright-Nehru student researcher fellowship, she is currently conducting community-based participatory research with FPHED on reproductive health programs in rural UP. She has spent a cumulative 11 months to-date studying and researching reproductive health in rural India.

Class Format: travel

Requirements/Evaluation: 5-page paper 2- to 3-page paper Other: Students will be required to keep a private daily journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: none; not open to first-year students

Materials/Lab Fee: $2800, which includes all transportation, lodging, meals, lectures, and research materials

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01    TBA    Elizabeth F. Curtis

PHLH 99 (W) Independent Study: Public Health

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
PHLH 201 (S) Dimensions of Public Health (DPE)

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises, covering infectious disease epidemics and prevention, sexual health, and mental health.

Class Format: lecture

Requirements/Evaluation: two papers on a selected population or country and health issue, two short reaction papers, peer reviews and active contribution to class discussion, including on Glow

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: sophomores, potential Public Health concentrators

Expected Class Size: 30

Distributions: (DPE)

Distribution Notes: does not meet Division 1, 2, or 3 requirements DPE: This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc, in health outcomes.

Attributes: PHLH Core Courses

Spring 2019

LEC Section: 01  TF 1:10 pm - 2:25 pm  Kiaran Honderich

PHLH 220 (F) Nutrition in the Developing World (DPE) (WI)

Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and over-nutrition beginning as early as in utero can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and program proposal writing. Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America.

Class Format: seminar

Requirements/Evaluation: six 1-page essays, one situation analysis paper (5-7 pages), one final term paper (10-15 pages), one oral presentation, and active class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PHLH 201 or equivalent

Enrollment Limit: 19

Enrollment Preferences: Public Health concentrators

Expected Class Size: 19

Distributions: (D2) (DE) (WI)

Distribution Notes: DPE: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of nutrition program design and implementation. WI: As a WI course, students will write six 1-page
essays (each with an optional rewrite) and a 5- to 7-page, country assessment paper which will help build the specific writing skills necessary for the final 10- to 15-page paper.

Attributes: PHLH Nutrition, Food Security + Environmental Health;

SEM Section: 01 M 7:00 pm - 9:40 pm Thursday Org Mtg 7:00 pm - 7:25 pm Marion Min-Barron

PHLH 250 (F) Qualitative Research Methods in Public Health

Qualitative methods provide the opportunity to add in-depth meaning and context regarding research on individuals and the environments of study. This course introduces students to qualitative research theory in Public Health and gives them the opportunity to ‘practice’ three qualitative research methods; (1) in-depth interviewing, (2) focus groups and (3) participant observation. Students will have the opportunity to pilot each of these three qualitative research methods, analyze a subset of the data via qualitative analysis software, and design a qualitative research study (including the research instrument). We will cover best practices in reporting qualitative results (for the purposes of peer-reviewed publication) and learn about the advantages and disadvantages of qualitative research in various domestic and international settings related to public health (such as nutrition, HIV and physical activity).

Class Format: seminar

Requirements/Evaluation: three 1-page reflection papers, transcription/field notes of one qualitative method (5-7 pages), one research proposal (10-15 pages), and an oral presentation

Prerequisites: PHLH 201 or equivalent

Enrollment Limit: 19

Enrollment Preferences: Public Health concentrators

Expected Class Size: 15

Distributions: (D2)

Attributes: PHLH Methods in Public Health

Not offered current academic year

PHLH 255 (S) Research Methods in Public Health

This course will introduce students to three common research methods utilized within Public Health: qualitative methods, survey methods and epidemiology. We will cover the basic research design process, integrating and comparing the qualitative methods of interviewing and focus groups, survey instrument design and pretesting as well as basic epidemiologic methods and concepts. Readings and discussions will engage with best practices in reporting these types of methods (for the purposes of peer-reviewed publication). Lastly, students will have the opportunity to design research instruments, pilot some of these methods, and analyze a subset of the data via analysis software. Students who have taken PHLH 250 should not enroll in PHLH 255.

Class Format: seminar

Requirements/Evaluation: three 1-page reflection papers, development of two research instruments (3-5 pages), one critique of a journal article (5 pages), an oral presentation and active class participation

Prerequisites: PHLH 201 or equivalent AND at least one Statistics course

Enrollment Limit: 19

Enrollment Preferences: Public Health concentrators

Expected Class Size: 15

Distributions: (D2)

Attributes: PHLH Methods in Public Health

Spring 2019

SEM Section: 01 M 7:00 pm - 9:40 pm Marion Min-Barron
PHLH 402 (S)  Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Class Format: seminar/lab
Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: completion of at least four courses counting towards the PHLH concentration
Enrollment Limit: 14
Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor
Expected Class Size: 14

SEM Section: 01  MR 1:10 pm - 2:25 pm  Amie A. Hane, Marion Min-Barron
LAB Section: 02  W 1:00 pm - 4:00 pm  Amie A. Hane, Marion Min-Barron
The Quantitative/Formal Reasoning (QFR) requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement.

**ASTR 111 (F) Introduction to Astrophysics (QFR)**

*How do stars work?* This course answers that question from start to finish! In this course we undertake a survey of some of the main ideas in modern astrophysics, with an emphasis on the observed properties and evolution of stars; ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics, and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include radiation laws and stellar spectra, astronomical instrumentation, physical characteristics of the Sun and other stars, star formation and evolution, nucleosynthesis, white dwarfs and planetary nebulae, pulsars and neutron stars, supernovae, relativity, and black holes. We will also discuss the detections of long-sought gravitational waves—first detection generated during the merging of two massive stellar black holes more than a billion light-years away, and, another from the merger of two neutron stars in a galaxy over 100 million light-years distant. Observing sessions include use of the 24-inch and other telescopes for observations of stars, nebulae, planets and galaxies, as well as daytime observations of the Sun.

**Class Format:** lecture/discussion, observing sessions, and five labs per semester

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, two hour tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, or concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28

**Expected Class Size:** 15

**Distributions:** (D3) (QFR)

---

**BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)**

*Crosslistings: BIOL321 / CHEM321 / BIMO321*

**Primary Crosslisting**

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports
Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

**BIMO 322 (S) Biochemistry II: Metabolism** (QFR)

Crosslistings: CHEM322 / BIMO322 / BIOL322

**Primary Crosslisting**

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 64

Department Notes: does not satisfy the distribution requirement in the Biology major

LAB Section: 04 R 1:00 pm - 4:00 pm Janis E. Bravo
Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and 102

Enrollment Limit: none

Expected Class Size: 84

Department Notes: does not satisfy the distribution requirement in the Biology major

BIOL 203 (F)  Ecology  (QFR)

Crosslistings: BIOL203 / ENVI203

Primary Crosslisting

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: none

Expected Class Size: 35

Department Notes: satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major

BIOL 210 (S) Mathematical Biology  (QFR)
Crosslistings: MATH310 / BIOL210

Secondary Crosslisting
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: tutorial
Requirements/Evaluation: problem sets, weekly meetings, final project and paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 250, MATH 209 or 309, permission of instructor
Enrollment Limit: 10
Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects
Expected Class Size: 10
Distributions: (D3) (QFR)
Distribution Notes: QFR: The course will introduce methods for developing and analyzing mathematical models.
Attributes: PHLH Methods in Public Health;

Spring 2019

TUT Section: T1  TBA  Julie C. Blackwood

BIOL 222 (S) Essentials of Biochemistry  (QFR)
This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: regular quizzes, final exam, writing assignments (including problem sets), and lab assignments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322
Enrollment Limit: 24
Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school
Expected Class Size: 24
Department Notes: does not satisfy the distribution requirement for the major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration
Distributions: (D3) (QFR)
Distribution Notes: QFR: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

Spring 2019
BIOL 305 (S) Evolution (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement in the Biology major

BIOL 329 (F)  Conservation Biology  (QFR)
Crosslistings: BIOL329 / ENVI339

Primary Crosslisting

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.
**Class Format:** lecture and discussion three hours per week; lab three hours per week

**Requirements/Evaluation:** lab assignments, two exams, and discussion participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** BIOL 203, or BIOL 202, or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** biology majors, seniors, and juniors

**Expected Class Size:** 24

**Department Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures, mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

**CHEM 151 (F) Introductory Chemistry** (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

**Class Format:** lecture, three times per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on frequent electronic and quantitative written weekly problem set assignments, laboratory work and reports, quizzes, two tests, and a final exam

**Extra Info:** information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** all students planning to enroll are required to take the online Chemistry Placement Test prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days);

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** incoming first year students are required to meet with a faculty member during First Days;

**Expected Class Size:** 48

**Department Notes:** CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

**Distributions:** (D3) (QFR)

**Distribution Notes:** students who have studied chemistry for one or more years are directed to CHEM 153 or 155

**Attributes:** BIMO Required Courses;

CHEM 153 (F)  Concepts of Chemistry  (QFR)
This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory work includes synthesis, qualitative and quantitative chemical analysis, and molecular modeling. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam

Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: all students are required to take the online Chemistry Placement Test prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days)

Enrollment Limit: 16/lab

Enrollment Preferences: incoming first year students also must meet with a faculty member during First Days

Expected Class Size: 70

Department Notes: one of CHEM 151 or 153 or 155 required for the BIMO concentration

CHEM 155 (F)  Principles of Modern Chemistry  (QFR)
This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory work includes synthesis, characterization, and reactivity of coordination complexes, electrochemical analysis, materials chemistry, qualitative analysis, and molecular modeling. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on weekly problem sets, laboratory work and reports, an hour test, and a final exam

Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

CHEM 156 (S) Organic Chemistry: Introductory Level (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation will be based on quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor

Enrollment Limit: 16/lab

**CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)**

This course provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in the laboratory session and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

**Class Format:** tutorial, meeting time to be determined

**Requirements/Evaluation:** evaluation is based on tutorial participation, presentations, and submitted papers

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**CSCI 134 (F) Introduction to Computer Science: Diving into the Deluge of Data (QFR)**

We are surrounded by information: weather forecasts, twitter feeds, restaurant reviews, stock market tickers, music recommendations, among others. This course introduces fundamental computational concepts for representing and manipulating data. Using the programming language Python, this course explores effective ways to organize and transform information in order to solve problems. Students will learn to design algorithms to search, sort, and manipulate data in application areas like text and image processing, social networks, scientific computing, databases, and the World Wide Web. Programming topics covered include object-oriented and functional programming, control structures, types, recursion, arrays, lists, streams, and dictionaries. This course is appropriate for all students who want to create software and learn computational techniques for manipulating and analyzing data. More details are available on the department website, http://www.cs.williams.edu

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** evaluation will be based on weekly assignments, programming projects, and examinations

**Prerequisites:** none, except for the standard prerequisites for a (Q) course; previous programming experience is not required

**Enrollment Limit:** 75

**Enrollment Preferences:** If the course is over-enrolled, enrollment will be determined by lottery

**Expected Class Size:** 75

**Department Notes:** students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

**Distributions:** (D3) (QFR)
CSCI 136 (F)  Data Structures and Advanced Programming (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on programming assignments, homework and/or examinations

Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit: 60

Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 60

Distributions: (D3) (QFR)

Attributes: BGNP Recommended Courses;
CSCI 237 (F) Computer Organization  (QFR)
This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based primarily on projects, and one or more exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 134, or both experience in programming and permission of instructor
Enrollment Limit: 30
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 30
Distributions: (D3) (QFR)

LAB Section: 03  R 2:35 pm - 4:00 pm  Duane A. Bailey

CSCI 256 (F) Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets and programming assignments, and midterm and final examinations
Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit: 30
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 30
Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses;

Fall 2018

Spring 2019
CSCI 326 (F) Software Methods (QFR)
Sophisticated software systems play a prominent role in many aspects of our lives, and while programming can be a very creative and exciting process, building a reliable software system of any size is no easy feat. Moreover, the ultimate outcome of any programming endeavor is likely to be incomplete, unreliable, and unmaintainable unless principled methods for software construction are followed. This course explores those methods. Specific topics include: software processes; specifying requirements and verifying correctness; abstractions; design principles; software architectures; concurrent and scalable systems design; testing and debugging; and performance evaluation.

Class Format: lecture/lab
Requirements/Evaluation: homework, programming assignments, group work, presentations, exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 136, and at least one of CSCI 237, 256, or 334
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01 TR 9:55 am - 11:10 am Stephen N. Freund
LAB Section: 02 R 1:10 pm - 3:50 pm Stephen N. Freund

CSCI 333 (S) Storage Systems (QFR)
This course will examine topics in the design, implementation, and evaluation of storage systems. Topics include the memory hierarchy; ways that data is organized (both logically and physically); storage hardware and its influence on storage software designs; data structures; performance models; and system measurement/evaluation. Readings will be taken from recent technical literature, and an emphasis will be placed on identifying and evaluating design trade-offs.

Class Format: lecture/lab
Requirements/Evaluation: problem sets, programming assignments, and midterm and final examinations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 136, CSCI 237
Enrollment Limit: 24
Enrollment Preferences: current Computer Science majors, students with research experience or interest
Expected Class Size: 24
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course will have students develop quantitative/formal reasoning skills through problem sets and programming assignments.

Spring 2019
LEC Section: 01 MR 2:35 pm - 3:50 pm Bill K. Jannen

CSCI 334 (F) Principles of Programming Languages (QFR)
This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Class Format: lecture
**Requirements/Evaluation:** evaluation will be based on weekly problem sets and programming assignments, a midterm examination and a final examination

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CSCI 136 and CSCI 237

**Enrollment Limit:** 30

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

---

**CSCI 336 (F) Computer Networks** (QFR)

This course explores the design and implementation of computer networks. Topics include wired and wireless networks; techniques for efficient and reliable encoding and transmission of data; addressing schemes and routing mechanisms; resource allocation for bandwidth sharing; and security issues. An important unifying themes is the distributed nature of all network problems. We will examine the ways in which these issues are addressed by current protocols such as TCP/IP and 802.11 WIFI.

**Class Format:** This class will follow the meeting structure of a tutorial, with groups of three or four

**Requirements/Evaluation:** evaluation will be based on problem sets, programming assignments, and midterm and final examinations

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CSCI 136 and 237

**Enrollment Limit:** 18

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 18

**Distributions:** (D3) (QFR)

---

**CSCI 361 (F) Theory of Computation** (QFR)

Crosslistings: CSCI361 / MATH361

**Primary Crosslisting**

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on problem sets, a midterm examination, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 34

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 34

**Distributions:** (D3) (QFR)
CSCI 432 (F) Operating Systems (QFR)
This course explores the design and implementation of computer operating systems. Topics include historical aspects of operating systems development, systems programming, process scheduling, synchronization of concurrent processes, virtual machines, memory management and virtual memory, I/O and file systems, system security, os/architecture interaction, and distributed operating systems.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on several implementation projects that will include significant programming, as well as written homework and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 237 and either CSCI 256 or 334
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Distributions: (D3) (QFR)

CSCI 434 (S) Compiler Design (QFR)
This tutorial covers the principles and practices for the design and implementation of compilers and interpreters. Topics include all stages of the compilation and execution process: lexical analysis; parsing; symbol tables; type systems; scope; semantic analysis; intermediate representations; run-time environments and interpreters; code generation; program analysis and optimization; and garbage collection. The course covers both the theoretical and practical implications of these topics. Students will construct a full compiler for a simple object-oriented language.

Class Format: This class will follow the meeting structure of a tutorial, with groups of three or four
Requirements/Evaluation: evaluation will be based on presentations, problem sets, a substantial implementation project, and two exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 237 and 256  CSCI 334 is recommended, but not required
Enrollment Limit: 18
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 18
Distributions: (D3) (QFR)
goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Class Format: lecture/discussion

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms (one for Bradburd's sections), final exam

Extra Info: this course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies

Extra Info 2: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 40

Department Notes: the department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course

Distributions: (D2) (QFR)

Distribution Notes: Prof. Bradburd's section ONLY; intends to use the issue of environmental protection in general, and climate change in particular, as the vehicle for presenting and applying many, though not all, of the economic concepts and tools developed in the course

Attributes: POEC Required Courses;

---

ECON 120 (F) Principles of Macroeconomics (QFR)

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Class Format: lecture/discussion

Requirements/Evaluation: problem sets, short essays, midterm, final exam

Prerequisites: ECON 110

Enrollment Limit: 40

Expected Class Size: 40

Distributions: (D2) (QFR)

Attributes: POEC Required Courses;
ECON 213 (S)  Introduction to Environmental and Natural Resource Economics  (QFR)

Crosslistings: ECON213 / ENVI213

Primary Crosslisting

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Class Format: lecture

Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: sophomores if course is overenrolled

Expected Class Size: 30

Distributions: (D2) (QFR)

Attributes: ENVI Environmental Policy; EVST Social Science/Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

---

ECON 229 (S)  Law and Economics  (QFR)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes. The course will also consider potential reforms of the legal system. In the 2014-15 academic year, the course will place more emphasis on intellectual property law as part of the campus-wide initiative, "The Book Unbound," associated with the opening of the new library.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, problem sets, short papers based on actual court cases and possible legal reforms, a midterm exam, and a final exam

Prerequisites: ECON 110

Enrollment Limit: 35

Enrollment Preferences: Open; prefer a mix of student backgrounds

Expected Class Size: 25
ECON 240 (F) Colonialism and Underdevelopment in South Asia (DPE) (WI) (QFR)
British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Class Format: tutorial
Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one course in ECON
Enrollment Limit: 10
Enrollment Preferences: Economics major, prior course on South Asia
Expected Class Size: 10
Distributions: (D2) (DPE) (WI) (QFR)
Distribution Notes: DPE: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation. QFR and WI: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies both the WI and QFR requirement.
Attributes: GBST South + Southeast Asia Studies Electives; POEC Comparative POEC/Public Policy Courses;

ECON 251 (F) Price and Allocation Theory (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.
Class Format: lecture
Requirements/Evaluation: weekly problem sets, one or more quizzes, one or two midterms, one or two short essays, and a final exam
Prerequisites: ECON 110 and MATH 130 or its equivalent
Enrollment Limit: 30
Expected Class Size: 25
Distributions: (D2) (QFR)
ECON 252 (F)  Macroeconomics  (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Class Format: lecture/discussion

Requirements/Evaluation:  problem sets and/or written assignments, midterm(s), and a final exam

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites:  ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit:  30

Expected Class Size:  25

Distributions:  (D2) (QFR)

LEC Section: 02  TF 2:35 pm - 3:50 pm  Peter L. Pedroni
LEC Section: 03  TR 8:30 am - 9:45 am  Greg Phelan
LEC Section: 04  TR 9:55 am - 11:10 am  Greg Phelan

ECON 255 (F)  Econometrics  (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Class Format: lecture

Requirements/Evaluation:  problem sets, two midterms, group presentations, and possible additional assignments Swamy: problem sets, one midterm, final exam and a group project Gentry: problem sets, one midterm, final exam, a group project, and possible additional assignments

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites:  MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON. STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018.

Enrollment Limit:  30

Expected Class Size:  30

Department Notes:  students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions:  (D2) (QFR)

Attributes:  EVST Methods Courses; PHLH Statistics Courses; POEC Required Courses;
ECON 360 (S) Monetary Economics  (QFR)
This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be discussed include: What causes inflation? What are the channels through which monetary policy affects the economy? Why should central banks commit to policy rules? How do exchange rates respond to monetary policy? How did the gold standard work? And will cryptocurrencies replace the dollar? In addition, we will develop and learn how to simulate the "New Keynesian" macroeconomic model, which has become the standard framework for monetary policy analysis for central banks around the world.

Class Format: lecture

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Extra Info: not available for the fifth course option

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Distributions: (D2) (QFR)

Attributes: GBST Economic Development Studies Electives; POEC International Political Economy Courses;

Spring 2019
LEC Section: 01    MWF 8:30 am - 9:45 am     Kenneth N. Kuttner

ECON 364 (F) Theory of Asset Pricing  (QFR)
What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Class Format: lecture

Requirements/Evaluation: problem sets and exams

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D2) (QFR)

Fall 2018
LEC Section: 01    TR 8:30 am - 9:45 am     Greg Phelan

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro  (QFR)
Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and
inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Class Format: seminar

Requirements/Evaluation: term paper and regular homework assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Distributions: (D2) (QFR)

Distribution Notes: QFR: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2018

SEM Section: 01    TF 1:10 pm - 2:25 pm     Peter L. Pedroni

ECON 378 (F) Long-Run Perspectives on Economic Growth (QFR)

The world today is marred by vast differences in the standard of living, with about a 30-fold difference in per-capita incomes between the poorest country and the most affluent. What explanations do long-run growth economists have to offer for these differences in levels of prosperity across nations? Are the explanations to be found in underlying differences between countries over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have "deep" historically-rooted origins, what scope exists for policies to reduce global inequality today? Can we expect global inequality to be reduced gradually over time, through natural processes of economic development, or are they likely to persist unless action is taken to reduce them? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the long-lasting effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the genetic composition of human populations across the globe.

Class Format: lecture/discussion

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Distributions: (D2) (QFR)

Attributes: POEC Comparative POEC/Public Policy Courses;
ECON 379 (S)  Program Evaluation for International Development  (QFR)
Crosslistings: ECON379 / ECON523
Secondary Crosslisting
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.
Class Format: seminar
Requirements/Evaluation: problem sets, midterm exam and one 7- to 10-page essay
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)
Enrollment Limit: 20
Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome
Expected Class Size: 20
Distributions: (D2) (QFR)
Attributes: PHLH Methods in Public Health; POEC Comparative POEC/Public Policy Courses;

Spring 2019
SEM Section: 01  TR 11:20 am - 12:35 pm  Susan Godlonton

ECON 389 (S)  Tax Policy in Global Perspective  (QFR)
Crosslistings: ECON514 / ECON389
Secondary Crosslisting
Taxes are half of what government does. So if you are interested in what government policy can do to promote efficiency, equity, and economic development, you should be interested in tax policy. Governments must raise tax revenue to finance critical public goods, address other market failures and distributional issues, and to avoid problems with debt and inflation. Taxes typically take up anywhere from ten to fifty percent of a country's income, they profoundly affect the incentives to undertake all varieties of economic activity, and the government expenditures that they finance have potentially large consequences for human welfare. So the stakes involved in improving tax policy are quite large. This class provides an in-depth exploration of tax policy, from a global and comparative perspective. Because most students in this class will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are most pertinent to developing countries, but we will also learn something about tax systems in the U.S. and other industrialized nations. Topics addressed in this class include: how basic economic principles can be applied to help one think about the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental reforms of these taxes; theory and evidence in the debate over progressive taxes versus "flat" taxes; how various elements of tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the design of tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on economic growth, foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.
Class Format: seminar
Requirements/Evaluation: midterm exam, 4 problem sets, two 8-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Limit: 19
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Expected Class Size: 15-19
Distributions: (D2) (QFR)

ECON 453 (S) Research in Labor Economics and Policy (QFR)
The labor market plays a crucial role in people's lives worldwide. In industrialized countries, most households contain at least one wage earner, and income from working represents the largest component of total income. Thus analyses of the labor market are fundamentally relevant to both public policy and private decision-making. This seminar will explore the structure and functioning of the labor market using theoretical and empirical tools. Topics to be covered include labor supply and demand, minimum wages, labor market effects of social insurance and welfare programs, the collective bargaining relationship, discrimination, human capital, immigration, wage distribution, and unemployment. As labor economics is an intensely empirical subfield, students will be expected to analyze data as well as study the empirical work of others.
Class Format: seminar
Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper (written in stages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and ECON 255 or POEC 253
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors
Expected Class Size: 19
Distributions: (D2) (QFR)
Attributes: POEC Comparative POEC/Public Policy Courses;

Spring 2019
SEM Section: 01   TR 9:55 am - 11:10 am   Owen Thompson

ECON 471 (S) Topics in Advanced Econometrics (QFR)
The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.
Class Format: seminar
Requirements/Evaluation: periodic homework assignments, term paper
Extra Info: not available for the fifth course option
Prerequisites: ECON 371
Enrollment Limit: 10
Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis
Expected Class Size: 10
Distributions: (D2) (QFR)
ECON 472 (F) Macroeconomic Instability and Financial Markets (QFR)

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on problem sets, exams, and potentially student presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 251 and ECON 252
Enrollment Limit: 19
Enrollment Preferences: Economics majors
Expected Class Size: 15
Distributions: (D2) (QFR)

Fall 2018
SEM Section: 01 MWF 8:30 am - 9:45 am Greg Phelan

ECON 477 (S) Economics of Environmental Behavior (QFR)

Crosslistings: ENVI376 / ECON477

Primary Crosslisting
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: seminar
Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using an experiment, existing data, or theory
Extra Info: may not be taken on a pass/fail basis
Prerequisites: ECON 251 and (ECON 255 or STAT 346)
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors
Expected Class Size: 15
Distributions: (D2) (QFR)
Attributes: MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

SEM Section: 01 MWF 8:30 am - 9:45 am Sarah A. Jacobson

ECON 514 (S) Tax Policy in Global Perspective (QFR)

Crosslistings: ECON514 / ECON389
Taxes are half of what government does. So if you are interested in what government policy can do to promote efficiency, equity, and economic development, you should be interested in tax policy. Governments must raise tax revenue to finance critical public goods, address other market failures and distributional issues, and to avoid problems with debt and inflation. Taxes typically take up anywhere from ten to fifty percent of a country’s income, they profoundly affect the incentives to undertake all varieties of economic activity, and the government expenditures that they finance have potentially large consequences for human welfare. So the stakes involved in improving tax policy are quite large. This class provides an in-depth exploration of tax policy, from a global and comparative perspective. Because most students in this class will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are most pertinent to developing countries, but we will also learn something about tax systems in the U.S. and other industrialized nations. Topics addressed in this class include: how basic economic principles can be applied to help one think about the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental reforms of these taxes; theory and evidence in the debate over progressive taxes versus “flat” taxes; how various elements of tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the design of tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on economic growth, foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Class Format: seminar
Requirements/Evaluation: midterm exam, 4 problem sets, two 8-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Limit: 19
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Expected Class Size: 15-19
Distributions: (D2) (QFR)
Attributes: POEC Comparative POEC/Public Policy Courses; POEC International Political Economy Courses;

ECON 523 (S) Program Evaluation for International Development (QFR)
Crosslistings: ECON379 / ECON523
Primary Crosslisting
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Class Format: seminar
Requirements/Evaluation: problem sets, midterm exam and one 7- to 10-page essay
Extra Info: may not be taken on a pass/fail basis
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)
Enrollment Limit: 20
Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome
Expected Class Size: 20
Distributions: (D2) (QFR)
ENVI 108 (F)  Energy Science and Technology  (QFR)
Crosslistings: ENVI108 / PHYS108
Secondary Crosslisting
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20
Expected Class Size: 20
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; SCST Related Courses

ENVI 203 (F)  Ecology  (QFR)
Crosslistings: BIOL203 / ENVI203
Secondary Crosslisting
This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: none
Expected Class Size: 35
Department Notes: satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Environmental Science; EVST Living Systems Courses;
ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)
Crosslistings: ECON213 / ENVI213
Secondary Crosslisting
We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Class Format: lecture
Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible
Prerequisites: ECON 110
Enrollment Limit: 30
Enrollment Preferences: sophomores if course is overenrolled
Expected Class Size: 30
Distributions: (D2) (QFR)

ENVI 339 (F) Conservation Biology (QFR)
Crosslistings: BIOL329 / ENVI339
Secondary Crosslisting
Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week; lab three hours per week
Requirements/Evaluation: lab assignments, two exams, and discussion participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 203, or BIOL 202, or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: biology majors, seniors, and juniors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)
Crosslistings: ENVI404 / MAST404 / GEOS404
Secondary Crosslisting
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.
Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: GEOS 104 or permission of instructor
GEOS 301 (F) Structural Geology (QFR)
The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures, stress and strain analysis, deformation mechanisms in rocks, and the large scale forces responsible for crustal deformation. The laboratories cover geologic maps and cross sections, folds and faults, stereonet analysis, field techniques, strain, and stress.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week
Requirements/Evaluation: evaluation will be based on weekly laboratory exercises, problem sets, a midterm exam, and a final exam; many of the labs and problem sets use geometry, algebra, and several projection techniques to solve common problems in structural geology
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 101 or 102, or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Geosciences majors
Expected Class Size: 12
Distributions: (D3) (QFR)

GEOS 404 (S) Coastal Processes and Geomorphology (QFR)

MATH 110 (F)  Logic and Likelihood  (QFR)

How best can we reason in the face of uncertainty? We will begin with an examination of rationality and the reasoning process including a survey of formal logic. Starting with uncertainty from a psychological and philosophical viewpoint, we will move to a careful theory of likelihood and how to reason with probabilistic models. The course will conclude with a consideration of observation and information, how to test hypotheses, and how we update our beliefs to incorporate new evidence.

**Class Format:** lecture

**Requirements/Evaluation:** homework, essays, presentations, exams, and participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year students

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: This course will be covering formal logic and probability theory at sufficient depth to place this course on level with other QFR designated courses.

Fall 2018

**LEC Section: 01**  MWF 11:00 am - 11:50 am  Stewart D. Johnson

MATH 130 (F)  Calculus I  (QFR)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on exams, homework and quizzes

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

**Enrollment Limit:** 50

**Enrollment Preferences:** Professor's discretion

**Expected Class Size:** 30

**Department Notes:** students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

**Distributions:** (D3) (QFR)

Fall 2018
MATH 140 (F) Calculus II (QFR)

Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 50

Expected Class Size: 30

Department Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions: (D3) (QFR)

Fall 2018

Spring 2019
LEC Section: 01 MWF 9:00 am - 9:50 am Stewart D. Johnson
LEC Section: 02 MWF 10:00 am - 10:50 am Stewart D. Johnson
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams

Prerequisites: AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit: 50

Expected Class Size: 50

Department Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

LEC Section: 02 MWF 10:00 am - 10:50 am Colin C. Adams
LEC Section: 03 MWF 11:00 am - 11:50 am Colin C. Adams

Course Description: In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, graphs and trees, and algorithms. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based primarily on homework and exams

Prerequisites: MATH 140 or MATH 130 with CSCI 134 or 135; or one year of high school calculus with permission of instructor; students who have taken a 300-level math course should obtain permission of the instructor before enrolling

Enrollment Limit: 40

Expected Class Size: 25

LEC Section: 02 MWF 11:00 am - 11:50 am Leo Goldmakher

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general
techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01   TR 9:55 am - 11:10 am   Daniel P. Aalberts

MATH 250 (F) Linear Algebra (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 45
Expected Class Size: 35
Distributions: (D3) (QFR)

MATH 307 (F) Computational Linear Algebra (QFR)
Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be considered a course in numerical analysis or computational science.

Class Format: lecture
Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: Math 250, some elementary computer programming experience is strongly recommended
**Fall 2018**

LEC Section: 01    TR 9:55 am - 11:10 am     Chad M. Topaz

**MATH 309 (S)  Differential Equations**  (QFR)

Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODE from an applied standpoint. Topics covered early in the course include numerical solutions, separation of variables, integrating factors, constant coefficient linear equations, and power series solutions. Later, we focus on nonlinear ODE, for which it is usually impossible to find analytical solutions. Tools from dynamical systems allows us to obtain some information about the behavior of the ODE without explicitly knowing the solution.

**Class Format:** lecture, discussion, interactive activities

**Requirements/Evaluation:** quizzes/exams, problem sets, activities

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 30

**Enrollment Preferences:** Professor's discretion

**Expected Class Size:** 25

**MATH 310 (S)  Mathematical Biology**  (QFR)

Crosslistings: MATH310 / BIOL210

**Primary Crosslisting**

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Class Format:** tutorial

**Requirements/Evaluation:** problem sets, weekly meetings, final project and paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 250, MATH 209 or 309, permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: The course will introduce methods for developing and analyzing mathematical models.

**Attributes:** PHLH Methods in Public Health;
MATH 313 (F) Introduction to Number Theory (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on homework, projects, and examinations

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 40

Expected Class Size: 25

Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01 MR 2:35 pm - 3:50 pm Leo Goldmakher

MATH 321 (S) Knot Theory (QFR)
Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on problem sets, midterms, a paper and a final exam

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Expected Class Size: 25

Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01 MWF 8:30 am - 9:45 am Colin C. Adams

MATH 331 (F) The little Questions (QFR)
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors

Expected Class Size: 25
MATH 334 (S)  Graph Theory  (QFR)
A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We’ll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams
Prerequisites: MATH 200 or MATH 250
Enrollment Limit: 35
Enrollment Preferences: Math majors
Expected Class Size: 20
Distributions: (D3) (QFR)

MATH 341 (F)  Probability  (QFR)
Crosslistings: STAT341 / MATH341
Primary Crosslisting
While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 250 or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 20
Distributions: (D3) (QFR)
Requirements/Evaluation: evaluation will be based on homework, classwork, and exams

MATH 351 (F) Applied Real Analysis (QFR)
Real analysis or the theory of calculus--derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers, limits, and some topology. Applications of Real Analysis involve questions of existence and uniqueness of solutions, implicit definition of functions, infinite dimensional function spaces, and tools from calculus of variations to construct optimal controls and minimizing curves and surfaces.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams, homework and quizzes
Prerequisites: MATH 150 and MATH 250, or permission of instructor

Expected Class Size: 20
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01 MWF 9:00 am - 9:50 am Stewart D. Johnson

MATH 355 (F) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams

MATH 361 (F) Theory of Computation (QFR)
Crosslistings: CSCI361 / MATH361

Secondary Crosslisting

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on problem sets, a midterm examination, and a final examination

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 34

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 34

LEC Section: 02 MWF 11:00 am - 11:50 am Thomas P. Murtagh

MATH 374 (F) Topology (QFR)

Topology is the study of when one geometric object can be continuously deformed and twisted into another object. Determining when two objects are topologically the same is incredibly difficult and is still the subject of a tremendous amount of research, including recent work on the Poincaré Conjecture, one of the million-dollar millennium-prize problems. The main part of the course on point-set topology establishes a framework based on "open sets" for studying continuity and compactness in very general spaces. The second part on homotopy theory develops refined methods for determining when objects are the same. We will prove for example that you cannot twist a basketball into a doughnut.

Class Format: lecture

Requirements/Evaluation: homework, tutorials, and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323

Enrollment Limit: 30

MATH 402 (S) Measure Theory and Probability (QFR)

The study of measure theory arose from the study of stochastic (probabilistic) systems. Applications of measure theory lie in biology, chemistry, physics as well as in economics. In this course, we develop the abstract concepts of measure theory and ground them in probability spaces. Included will be Lebesgue and Borel measures, measurable functions (random variables). Lebesgue integration, distributions, independence, convergence and limit theorems. This material provides good preparation for graduate studies in mathematics, statistics and economics.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based primarily on performance on homework assignments and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 40

Expected Class Size: 30
MATH 403 (S) Measure and Ergodic Theory (QFR)
An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesque and Borel measures, measurable functions, and Lebesque integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

Class Format: lecture
Requirements/Evaluation: homework and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics majors

MATH 407 (F) Dance of the Primes (QFR)
Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

Class Format: lecture
Requirements/Evaluation: exams and weekly homework assignments
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Limit: 30
Enrollment Preferences: seniors
Expected Class Size: 10

MATH 411 (S) Commutative Algebra (QFR)
Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic
Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Possible topics include Noetherian rings, primary decomposition, localizations and quotients, height, dimension, basic module theory, and the Krull Altitude Theorem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams

MATH 458 (S) Algebraic Combinatorics (QFR)
Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. This course will focus on the study of symmetric functions, young tableaux, matroids, graph theory, and other related topics.

Class Format: seminar
Requirements/Evaluation: homework assignments, proof portfolio, individual and group projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 200 and MATH 355
Enrollment Limit: 25
Enrollment Preferences: seniors
Expected Class Size: 20
Distributions: (D3) (QFR)
Distribution Notes: QFR: Mathematics course in the area of algebraic combinatorics

Spring 2019
**MATH 459 (S) Applied Partial Differential Equations**  (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

**Class Format:** tutorial

**Requirements/Evaluation:** participation, problem sets, oral presentations, oral exams, and a final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** students with an interest in applied mathematics, selected to create a diverse set of tutorial participants

**Expected Class Size:** 10

**Department Notes:** students who have taken MATH 453 may not enroll in MATH 458T without permission of the instructor

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

---

**MATH 487 (S) Computational Algebraic Geometry**  (QFR)

Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework, exams, and final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 355

**Enrollment Limit:** 40

**Enrollment Preferences:** instructor decision

**Expected Class Size:** 15

**Department Notes:** This course is not a senior seminar, and so it does not fulfill the senior seminar requirement for the math major

**Distributions:** (D3) (QFR)

---

**PHIL 203 (S) Logic and Language**  (QFR)

Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to
improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

**Class Format:** lecture/discussion  
**Requirements/Evaluation:** a midterm, a final, frequent homework and problem sets  
**Prerequisites:** none  
**Enrollment Limit:** none  
**Expected Class Size:** 50-80

**PHYS 108 (F) Energy Science and Technology** (QFR)  
Crosslistings: ENVI108 / PHYS108  

**Primary Crosslisting**  
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

**Class Format:** lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours  
**Requirements/Evaluation:** evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative  
**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130  
**Enrollment Limit:** 20
**PHYS 131 (F) Introduction to Mechanics**  (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week

**Requirements/Evaluation:** evaluation will be based on exams, labs, and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 24/lab

**Expected Class Size:** 60

**Department Notes:** PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributions:** (D3) (QFR)
**PHYS 141 (F) Mechanics and Waves** (QFR)

This is the typical first course for a prospective physics major. It covers the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week; conference section, one hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, labs, 2 one-hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** high school physics and MATH 130 or equivalent placement

**Enrollment Limit:** 22 per lab

**Expected Class Size:** 50

**Department Notes:** PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributions:** (D3) (QFR)

---

**PHYS 142 (S) Foundations of Modern Physics** (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

**Class Format:** lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, alternating between three hours and one hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 141 and MATH 130 (formerly 103), or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor. Students may not take both PHYS 142 and PHYS 151

**Enrollment Limit:** 22 per lab

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

**PHYS 201 (F) Electricity and Magnetism** (QFR)

The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** evaluation will be based on problem sets, labs, two take-home midterms, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

**Enrollment Limit:** 20 per lab

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

---

**PHYS 202 (S) Vibrations, Waves and Optics** (QFR)

Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course...
we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

Enrollment Limit: none

PHYS 210 (S) Mathematical Methods for Scientists (QFR)

Crosslistings: PHYS210 / MATH210

Primary Crosslisting

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: lecture, three hours per week

Requirements/Evaluation: evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Expected Class Size: 30

PHYS 301 (F) Quantum Physics (QFR)

This course serves as a one-semester introduction to the history, formalism, and phenomenology of quantum mechanics. We begin with a discussion of the historical origins of the quantum theory, and the Schroedinger wave equation. The concepts of matter waves and wave-packets are introduced. Solutions to one-dimensional problems will be treated prior to introducing the system which serves as a hallmark of the success of quantum theory, the three-dimensional hydrogen atom. In the second half of the course, we will develop the important connection between the underlying mathematical formalism and the physical predictions of the quantum theory and introduce the Heisenberg formalism. We then go on to apply this knowledge to several important problems within the realm of atomic and nuclear physics concentrating on applications involving angular momentum and spins.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, a midterm exam, and final exam, all of which have a substantial quantitative component
PHYS 302 (S) Stat Mechanics & Thermodynamics (QFR)
Macrosopic objects are made up of huge numbers of fundamental particles interacting in simple ways—obeying the Schrödinger equation, Newton's and Coulomb's Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week.
Requirements/Evaluation: evaluation will be based on weekly problem sets, exams, and labs, all of which have a substantial quantitative component.
Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301
Enrollment Limit: 24
Expected Class Size: 15
Distributions: (D3) (QFR)

PHYS 312 (S) Philosophical Implications of Modern Physics (QFR)
Crosslistings: PHIL312 / SCST312 / PHYS312

Primary Crosslisting
Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Class Format: lecture
Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper.
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors and Physics majors
Expected Class Size: 20
Distributions: (D3) (QFR)
Distribution Notes: meets the Division 2 requirement if registration is under PHIL or SCST; Division 3 requirement if registration under PHYS
Attributes: PHIL Contemp Metaphysics & Epistemology Courses;

Spring 2019
PHYS 402 (S) Applications of Quantum Mechanics (QFR)
This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Class Format: tutorial, 1 and 1/4 hours per week; lecture, one hour per week
Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PHYS 301
Enrollment Limit: 10 per sec
Expected Class Size: 16
Distributions: (D3) (QFR)

TUT Section: T1  F 1:10 pm - 2:25 pm  Catherine Kealhofer
TUT Section: T2  F 1:10 pm - 2:25 pm  Catherine Kealhofer

PHYS 411 (F) Classical Mechanics (QFR)
This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet once a week as a whole to discuss new material.

Class Format: tutorial, 1 and 1/4 hours per week; lecture, one hour per week
Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209
Enrollment Limit: 10/section
Expected Class Size: 25
Distributions: (D3) (QFR)

Fall 2018

PHYS 451 (S) Condensed Matter Physics (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Class Format: seminar
Requirements/Evaluation: weekly readings and problem sets, and exams
Prerequisites: PHYS 301; PHYS 302 preferred; or permission of instructor
Enrollment Limit: 10  
Enrollment Preferences: Physics majors  
Expected Class Size: 4-6

POEC 253 (F) Empirical Methods in Political Economy (QFR)  
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.  
Class Format: lecture/discussion  
Requirements/Evaluation: problem sets, group projects, and three exams  
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255  
Enrollment Limit: 25  
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores  
Expected Class Size: 15  
Department Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major  
Distributions: (D2) (QFR)  
Attributes: EVST Methods Courses; PHLH Statistics Courses; POEC Required Courses;

PSCI 211 (S) Do the People Govern? U.S. Public Opinion and Mass Political Behavior (QFR)  
America’s founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public’s general wishes. In addition to engaging this debate about what the public thinks about politics, we will also explore how people behave in the political realm. What are the forces that shape whether citizens pay attention to politics, vote, work on campaigns, protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage it?  
Class Format: lecture  
Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Limit: 25
Enrollment Preferences: political science majors

Expected Class Size: 20

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors and Physics majors

Expected Class Size: 20
In order to be an informed citizen in the world today, understanding of data and information is crucial. Whether analyzing opinion polls, unemployment rates, or gender pay discrepancies, we need to be able to separate signal from noise. This course will equip you with statistical methods to analyze and interpret data from various sources. Our goal is to help you make informed decisions based on data.

Class Format: Lecture
Requirements/Evaluation: Evaluation based on quizzes and exams.
Extra Info: Not available on a pass/fail basis; not available for the fifth course option.
Prerequisites: MATH 102, or demonstrated proficiency on a diagnostic test.
Enrollment Limit: 50
Expected Class Size: 40

Department Notes: Students with calculus background and social science interest should consider STAT 161. Students with MATH 150 should enroll in STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department.

Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; COGS Related Courses; PHLH Statistics Courses;

This course will cover the basics of modern statistical analysis, including exploratory data analysis, probability elements, basic statistical inference, and statistical modeling. It focuses on applying statistical tools to solve problems, make decisions, and understand the world.

Class Format: Lecture
Extra Info: Not available on a pass/fail basis; not available for the fifth course option.
Prerequisites: MATH 130 (or equivalent). Not open to students who have completed STAT 101 or equivalent.
Enrollment Limit: 40
Enrollment Preferences: Economics majors, sophomores
Expected Class Size: 40

Department Notes: Students with MATH 150 should consider STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students without any calculus background should consider STAT 101.

Distributions: (D3) (QFR)
Distribution Notes: QFR: It is a quantitative course

Fall 2018
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams

Prerequisites: MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.

Enrollment Limit: 40

Expected Class Size: 40

Department Notes: Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

Attributes: BGNP Recommended Courses; COGS Related Courses; EVST Methods Courses; PHLH Statistics Courses;
**STAT 341 (F) Probability (QFR)**
Crosslistings: STAT341 / MATH341

**Secondary Crosslisting**

While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, and exams

**Prerequisites:** MATH 250 or permission of the instructor

**Enrollment Limit:** 40

**Expected Class Size:** 20

**Distributions:** (D3) (QFR)

---

**STAT 344 (F) Statistical Design of Experiments (QFR)**

What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets, midterm, final exam, project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** STAT 201, 202, or equivalent

**Enrollment Limit:** 20

**Enrollment Preferences:** Statistics majors, seniors

**Expected Class Size:** 15

**Distributions:** (D3) (QFR)

**Attributes:** COGS Related Courses;

---

**STAT 346 (F) Regression and Forecasting (QFR)**

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the standard method for analyzing continuous response data and their relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.
### STAT 355 (S) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at a time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework and exams

**Prerequisites:** STAT 201 and MATH 250

**Enrollment Limit:** 25

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

**Spring 2019**
LEC Section: 01    MWF 8:30 am - 9:45 am    Xizhen Cai

### STAT 360 (S) Statistical Inference (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on problem sets and exams

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** MATH 250, STAT 201 or 202, STAT 341

**Enrollment Limit:** 30

**Enrollment Preferences:** Statistics majors

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

**Spring 2019**
STAT 365 (F)  Bayesian Statistics  (QFR)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework and exams
Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 10
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01    TF 1:10 pm - 2:25 pm     Daniel B. Turek

STAT 372 (S)  Longitudinal Data Analysis: Modeling Change over Time  (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 201 and STAT 346
Enrollment Limit: 30
Enrollment Preferences: junior and senior Statistics majors
Expected Class Size: 20
Distributions: (D3) (QFR)
Attributes: PHLH Statistics Courses;

Spring 2019
LEC Section: 01    TF 1:10 pm - 2:25 pm     Anna M. Plantinga

STAT 442 (S)  Statistical Learning and Data Mining  (QFR)
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: lecture
STAT 458 (F) Spatio-Temporal Data (QFR)

Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Class Format: lecture

Requirements/Evaluation: project work, homework, exams, and contribution to discussion.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Distributions: (D3) (QFR)

Distribution Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

ASTR 111 (F) Introduction to Astrophysics (QFR)

How do stars work? This course answers that question from start to finish! In this course we undertake a survey of some of the main ideas in modern astrophysics, with an emphasis on the observed properties and evolution of stars; ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics, and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include radiation laws and stellar spectra, astronomical instrumentation, physical characteristics of the Sun and other stars, star formation and evolution, nucleosynthesis, white dwarfs and planetary nebulae, pulsars and neutron stars, supernovae, relativity, and black holes. We will also discuss the detections of long-sought gravitational waves’ the first detection generated during the merging of two massive stellar black holes more than a billion light-years away, and, another from the merger of two neutron stars in a galaxy over 100 million light-years distant. Observing sessions include use of the 24-inch and other telescopes for observations of stars, nebulae, planets and galaxies, as well as daytime observations of the Sun.

Class Format: lecture/discussion, observing sessions, and five labs per semester

Requirements/Evaluation: evaluation will be based on weekly problem sets, two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, or concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28
BIMO 321 (F)  Biochemistry I: Structure and Function of Biological Molecules (QFR)

Crosslistings: CHEM321 / BIMO321 / BIOL321

Primary Crosslisting

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;

BIMO 322 (S)  Biochemistry II: Metabolism (QFR)

Crosslistings: BIMO322 / BIOL322 / CHEM322

Primary Crosslisting

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and
mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and 102

Enrollment Limit: none

Expected Class Size: 84

Department Notes: does not satisfy the distribution requirement in the Biology major

BIOL 210 (S) Mathematical Biology  (QFR)

Crosslistings: MATH310 / BIOL210

Secondary Crosslisting
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: tutorial

Requirements/Evaluation: problem sets, weekly meetings, final project and paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 250, MATH 209 or 309, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 10

Distributions:  (D3) (QFR)

Distribution Notes: QFR: The course will introduce methods for developing and analyzing mathematical models.

Attributes:  PHLH Methods in Public Health;

Spring 2019

TUT Section: T1 TBA Julie C. Blackwood
BIOL 222 (S) Essentials of Biochemistry  (QFR)
This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: regular quizzes, final exam, writing assignments (including problem sets), and lab assignments
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322
Enrollment Limit: 24
Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school
Expected Class Size: 24
Department Notes: does not satisfy the distribution requirement for the major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration
Distributions: (D3) (QFR)
Distribution Notes: QFR: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

LAB Section: 03    W 1:00 pm - 4:00 pm     Daniel V. Lynch

BIOL 305 (S) Evolution  (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Class Format: lecture/discussion/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 202
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)

BIOL 321 (F)  Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Crosslistings: BIOL321 / CHEM321 / BIMO321

Secondary Crosslisting

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

BIOL 322 (S)  Biochemistry II: Metabolism  (QFR)

Crosslistings: CHEM322 / BIMO322 / BIOL322

Secondary Crosslisting

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: evaluation is based on several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the data generated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor
Enrollment Limit: 64
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size: 64
Department Notes: does not satisfy the distribution requirement in the Biology major

BIOL 329 (F) Conservation Biology  (QFR)
Crosslistings: BIOL329 / ENVI339
Primary Crosslisting

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week; lab three hours per week
Requirements/Evaluation: lab assignments, two exams, and discussion participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 203, or BIOL 202, or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: biology majors, seniors, and juniors
Expected Class Size: 24
Department Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

CHEM 151 (F) Introductory Chemistry  (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and
quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

**Class Format:** lecture, three times per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on frequent electronic and quantitative written weekly problem set assignments, laboratory work and reports, quizzes, two tests, and a final exam

**Extra Info:** information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** all students planning to enroll are required to take the online Chemistry Placement Test prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days);

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** incoming first year students are required to meet with a faculty member during First Days;

**Expected Class Size:** 48

**Department Notes:** CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

**Distributions:** (D3) (QFR)

**Distribution Notes:** students who have studied chemistry for one or more years are directed to CHEM 153 or 155

**Attributes:** BIMO Required Courses;

---

**CHEM 153 (F) Concepts of Chemistry (QFR)**

This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory work includes synthesis, qualitative and quantitative chemical analysis, and molecular modeling. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam

**Extra Info:** information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** all students are required to take the online Chemistry Placement Test prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days);

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** incoming first year students also must meet with a faculty member during First Days

**Expected Class Size:** 70

**Department Notes:** one of CHEM 151 or 153 or 155 required for the BIMO concentration

**Distributions:** (D3) (QFR)
CHEM 155 (F) Principles of Modern Chemistry (QFR)

This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory work includes synthesis, characterization, and reactivity of coordination complexes, electrochemical analysis, materials chemistry, qualitative analysis, and molecular modeling. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on weekly problem sets, laboratory work and reports, an hour test, and a final exam

Extra Info: information about the Chemistry Placement Test can be found at http://chemistry.williams.edu/placement/

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: students planning to enroll are required to take the Chemistry Placement Survey prior to registering; incoming first year students are required to meet with faculty during First Days; for more information go to http://chemistry.williams.edu/placement/

Enrollment Limit: 16/lab

Enrollment Preferences: CHEM 151 is an introductory course for students with no or little chemistry background. Students who have studied chemistry for one or more years are directed to CHEM 153 or 155

Expected Class Size: 36

Department Notes: CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

Distributions: (D3) (QFR)

Attributes: BIMO Required Courses;

CHEM 156 (S) Organic Chemistry: Introductory Level (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.
CHEM 321 (F)  Biochemistry I: Structure and Function of Biological Molecules  (QFR)

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Extra Info: may not be taken on a pass/fail basis

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Department Notes: does not satisfy the distribution requirement in the Biology major

Distributions: (D3) (QFR)

Attributes: BGNP Related Courses; BIMO Required Courses;

CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)

This course provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in the laboratory session and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

Class Format: tutorial, meeting time to be determined

Requirements/Evaluation: evaluation is based on tutorial participation, presentations, and submitted papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CHEM 361 or equivalent background in Physics

Enrollment Limit: 10
CSCI 134 (F) Introduction to Computer Science: Diving into the Deluge of Data (QFR)
We are surrounded by information: weather forecasts, twitter feeds, restaurant reviews, stock market tickers, music recommendations, among others.
This course introduces fundamental computational concepts for representing and manipulating data. Using the programming language Python, this course explores effective ways to organize and transform information in order to solve problems. Students will learn to design algorithms to search, sort, and manipulate data in application areas like text and image processing, social networks, scientific computing, databases, and the World Wide Web. Programming topics covered include object-oriented and functional programming, control structures, types, recursion, arrays, lists, streams, and dictionaries. This course is appropriate for all students who want to create software and learn computational techniques for manipulating and analyzing data. More details are available on the department website, http://www.cs.williams.edu

Class Format: lecture/laboratory
Requirements/Evaluation: evaluation will be based on weekly assignments, programming projects, and examinations
Prerequisites: none, except for the standard prerequisites for a (Q) course; previous programming experience is not required
Enrollment Limit: 75
Enrollment Preferences: If the course is over-enrolled, enrollment will be determined by lottery
Expected Class Size: 75

Department Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

Distributions: (D3) (QFR)
Attributes: BGNP Recommended Courses; COGS Interdepartmental Electives;

CSCI 136 (F) Data Structures and Advanced Programming (QFR)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists,
stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** evaluation will be based on programming assignments, homework and/or examinations

**Prerequisites:** CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

**Enrollment Limit:** 60

**Enrollment Preferences:** If the course is over-enrolled, enrollment will be determined by lottery

**Expected Class Size:** 60

**Distributions:** (D3) (QFR)

**Attributes:** BGNP Recommended Courses;

---

**CSCI 237 (F) Computer Organization (QFR)**

This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** evaluation will be based primarily on projects, and one or more exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CSCI 134, or both experience in programming and permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

**Spring 2019**

LAB Section: 03  R 2:35 pm - 4:00 pm  Duane A. Bailey
CSCI 256 (F) Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its runtime and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets and programming assignments, and midterm and final examinations
Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit: 30
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 30
Distributions: (D3) (QFR)

CSCI 326 (F) Software Methods  (QFR)
Sophisticated software systems play a prominent role in many aspects of our lives, and while programming can be a very creative and exciting process, building a reliable software system of any size is no easy feat. Moreover, the ultimate outcome of any programming endeavor is likely to be incomplete, unreliable, and unmaintainable unless principled methods for software construction are followed. This course explores those methods. Specific topics include: software processes; specifying requirements and verifying correctness; abstractions; design principles; software architectures; concurrent and scalable systems design; testing and debugging; and performance evaluation.

Class Format: lecture/lab
Requirements/Evaluation: homework, programming assignments, group work, presentations, exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 136, and at least one of CSCI 237, 256, or 334
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors

CSCI 333 (S) Storage Systems  (QFR)
This course will examine topics in the design, implementation, and evaluation of storage systems. Topics include the memory hierarchy; ways that data is organized (both logically and physically); storage hardware and its influence on storage software designs; data structures; performance
models; and system measurement/evaluation. Readings will be taken from recent technical literature, and an emphasis will be placed on identifying and evaluating design trade-offs.

Class Format: lecture/lab

Requirements/Evaluation: problem sets, programming assignments, and midterm and final examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136, CSCI 237

Enrollment Limit: 24

Enrollment Preferences: current Computer Science majors, students with research experience or interest

Expected Class Size: 24

Distributions: (D3) (QFR)

Distribution Notes: QFR: This course will have students develop quantitative/formal reasoning skills through problem sets and programming assignments.

Spring 2019

LEC Section: 01  MR 2:35 pm - 3:50 pm  Bill K. Jannen

CSCI 334 (F) Principles of Programming Languages  (QFR)

This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on weekly problem sets and programming assignments, a midterm examination and a final examination

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136 and CSCI 237

Enrollment Limit: 30

Enrollment Preferences: current or expected Computer Science majors

CSCI 336 (F) Computer Networks  (QFR)

This course explores the design and implementation of computer networks. Topics include wired and wireless networks; techniques for efficient and reliable encoding and transmission of data; addressing schemes and routing mechanisms; resource allocation for bandwidth sharing; and security issues. An important unifying themes is the distributed nature of all network problems. We will examine the ways in which these issues are addressed by current protocols such as TCP/IP and 802.11 WIFI.

Class Format: This class will follow the meeting structure of a tutorial, with groups of three or four

Requirements/Evaluation: evaluation will be based on problem sets, programming assignments, and midterm and final examinations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 136 and 237

Crosslistings: CSCI361 / MATH361
Primary Crosslisting
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets, a midterm examination, and a final examination
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 34
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 34
Distributions: (D3) (QFR)
Attributes: COGS Interdepartmental Electives;

CSCI 432 (F) Operating Systems (QFR)
This course explores the design and implementation of computer operating systems. Topics include historical aspects of operating systems development, systems programming, process scheduling, synchronization of concurrent processes, virtual machines, memory management and virtual memory, I/O and file systems, system security, os/architecture interaction, and distributed operating systems.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on several implementation projects that will include significant programming, as well as written homework and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 237 and either CSCI 256 or 334
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Distributions: (D3) (QFR)
CSCI 434 (S)  Compiler Design  (QFR)

This tutorial covers the principles and practices for the design and implementation of compilers and interpreters. Topics include all stages of the compilation and execution process: lexical analysis; parsing; symbol tables; type systems; scope; semantic analysis; intermediate representations; run-time environments and interpreters; code generation; program analysis and optimization; and garbage collection. The course covers both the theoretical and practical implications of these topics. Students will construct a full compiler for a simple object-oriented language.

Class Format: This class will follow the meeting structure of a tutorial, with groups of three or four

Requirements/Evaluation: evaluation will be based on presentations, problem sets, a substantial implementation project, and two exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: CSCI 237 and 256  CSCI 334 is recommended, but not required

Enrollment Limit:  18

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size:  18

Distributions:  (D3) (QFR)

TUT Section: T1    TBA     Stephen N. Freund

ECON 110 (F)  Principles of Microeconomics  (QFR)

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Class Format: lecture/discussion

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms (one for Bradburd's sections), final exam

Extra Info: this course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies

Extra Info 2: not available for the fifth course option

Prerequisites: none

Enrollment Limit:  40

Expected Class Size:  40

Department Notes: the department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course

Distributions:  (D2) (QFR)

Distribution Notes:  Prof. Bradburd's section ONLY; intends to use the issue of environmental protection in general, and climate change in particular, as the vehicle for presenting and applying many, though not all, of the economic concepts and tools developed in the course

Attributes:  POEC Required Courses;

Fall 2018

LEC Section: 05    TF 1:10 pm - 2:25 pm     Owen Thompson

LEC Section: 03    TR 8:30 am - 9:45 am     Don Carlson

LEC Section: 06    TF 2:35 pm - 3:50 pm     Melinda Pete

LEC Section: 04    TR 11:20 am - 12:35 pm     Owen Thompson

LEC Section: 02    MR 2:35 pm - 3:50 pm     Sara LaLumia
ECON 120 (F) Principles of Macroeconomics (QFR)

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, short essays, midterm, final exam
Prerequisites: ECON 110
Enrollment Limit: 40
Expected Class Size: 40
Distributions: (D2) (QFR)
Attributes: POEC Required Courses;

ECON 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Crosslistings: ECON213 / ENVI213
Primary Crosslisting
We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Class Format: lecture
Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible
Prerequisites: ECON 110
Enrollment Limit: 30
Enrollment Preferences: sophomores if course is overenrolled
Expected Class Size: 30
Distributions: (D2) (QFR)
Attributes: ENVI Environmental Policy; EVST Social Science/Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy
ECON 229 (S)  Law and Economics  (QFR)
This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes. The course will also consider potential reforms of the legal system. In the 2014-15 academic year, the course will place more emphasis on intellectual property law as part of the campus-wide initiative, "The Book Unbound," associated with the opening of the new library.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, problem sets, short papers based on actual court cases and possible legal reforms, a midterm exam, and a final exam
Prerequisites: ECON 110
Enrollment Limit: 35
Enrollment Preferences: Open; prefer a mix of student backgrounds
Expected Class Size: 25
Distributions: (D2) (QFR)
Attributes: POEC U.S. Political Economy + Public Policy Course;

ECON 240 (F)  Colonialism and Underdevelopment in South Asia  (DPE) (WI) (QFR)
British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.
Class Format: tutorial
Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: one course in ECON
Enrollment Limit: 10
Enrollment Preferences: Economics major, prior course on South Asia
Expected Class Size: 10
Distributions: (D2) (DPE) (WI) (QFR)
Distribution Notes: DPE: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation. QFR and WI: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies both the WI and QFR requirement.
Attributes: GBST South + Southeast Asia Studies Electives; POEC Comparative POEC/Public Policy Courses;
ECON 251 (F) Price and Allocation Theory (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Class Format: lecture
Requirements/Evaluation: weekly problem sets, one or more quizzes, one or two midterms, one or two short essays, and a final exam
Prerequisites: ECON 110 and MATH 130 or its equivalent
Enrollment Limit: 30
Expected Class Size: 25
Distributions: (D2) (QFR)

ECON 252 (F) Macroeconomics (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets and/or written assignments, midterm(s), and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent
Enrollment Limit: 30
Expected Class Size: 25
Distributions: (D2) (QFR)
ECON 255 (F)  Econometrics  (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Class Format: lecture

Requirements/Evaluation: problem sets, two midterms, group presentations, and possible additional assignments Swamy: problem sets, one midterm, final exam and a group project Gentry: problem sets, one midterm, final exam, a group project, and possible additional assignments

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent), plus one course in ECON. STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018.

Enrollment Limit: 30

Expected Class Size: 30

Department Notes: students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Attributes: EVST Methods Courses; PHLH Statistics Courses; POEC Required Courses;

ECON 360 (S)  Monetary Economics  (QFR)
This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be discussed include: What causes inflation? What are the channels through which monetary policy affects the economy? Why should central banks commit to policy rules? How do exchange rates respond to monetary policy? How did the gold standard work? And will cryptocurrencies replace the dollar? In addition, we will develop and learn how to simulate the "New Keynesian" macroeconomic model, which has become the standard framework for monetary policy analysis for central banks around the world.

Class Format: lecture

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Extra Info: not available for the fifth course option

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Distributions: (D2) (QFR)

Spring 2019
LEC Section: 01  MWF 8:30 am - 9:45 am  Kenneth N. Kuttner
ECON 364 (F) Theory of Asset Pricing (QFR)
What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resources across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Class Format: lecture

Requirements/Evaluation: problem sets and exams

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D2) (QFR)

Fall 2018

LEC Section: 01    TR 8:30 am - 9:45 am     Greg Phelan

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)
Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Class Format: seminar

Requirements/Evaluation: term paper and regular homework assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Distributions: (D2) (QFR)

Distribution Notes: QFR. Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2018

SEM Section: 01    TF 1:10 pm - 2:25 pm     Peter L. Pedroni

ECON 378 (F) Long-Run Perspectives on Economic Growth (QFR)
The world today is marred by vast differences in the standard of living, with about a 30-fold difference in per-capita incomes between the poorest country and the most affluent. What explanations do long-run growth economists have to offer for these differences in levels of prosperity across nations? Are the explanations to be found in underlying differences between countries over the past few decades, the past few centuries, or the past
few millennia? If contemporary differences in living standards have "deep" historically-rooted origins, what scope exists for policies to reduce global inequality today? Can we expect global inequality to be reduced gradually over time, through natural processes of economic development, or are they likely to persist unless action is taken to reduce them? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the long-lasting effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the genetic composition of human populations across the globe.

Class Format: lecture/discussion

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

ECON 379 (S) Program Evaluation for International Development  (QFR)

Crosslistings: ECON379 / ECON523

Secondary Crosslisting

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Class Format: seminar

Requirements/Evaluation: problem sets, midterm exam and one 7- to 10-page essay

Extra Info: may not be taken on a pass/fail basis

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

Enrollment Limit: 20

Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome

Expected Class Size: 20

Distributions: (D2) (QFR)

Attributes: PHLH Methods in Public Health; POEC Comparative POEC/Public Policy Courses;

Spring 2019

SEM Section: 01    TR 11:20 am - 12:35 pm     Susan Godlonton

ECON 389 (S) Tax Policy in Global Perspective  (QFR)
Taxes are half of what government does. So if you are interested in what government policy can do to promote efficiency, equity, and economic development, you should be interested in tax policy. Governments must raise tax revenue to finance critical public goods, address other market failures and distributional issues, and to avoid problems with debt and inflation. Taxes typically take up anywhere from ten to fifty percent of a country’s income, they profoundly affect the incentives to undertake all varieties of economic activity, and the government expenditures that they finance have potentially large consequences for human welfare. So the stakes involved in improving tax policy are quite large. This class provides an in-depth exploration of tax policy, from a global and comparative perspective. Because most students in this class will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are most pertinent to developing countries, but we will also learn something about tax systems in the U.S. and other industrialized nations. Topics addressed in this class include: how basic economic principles can be applied to help one think about the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental reforms of these taxes; theory and evidence in the debate over progressive taxes versus "flat" taxes; how various elements of tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the design of tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on economic growth, foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Class Format: seminar

Requirements/Evaluation: midterm exam, 4 problem sets, two 8-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Distributions: (D2) (QFR)

Attributes: POEC Comparative POEC/Public Policy Courses; POEC International Political Economy Courses;

Spring 2019

SEM Section: 01    TR 8:30 am - 9:45 am    Jon M. Bakija

ECON 453 (S)  Research in Labor Economics and Policy  (QFR)

The labor market plays a crucial role in people’s lives worldwide. In industrialized countries, most households contain at least one wage earner, and income from working represents the largest component of total income. Thus analyses of the labor market are fundamentally relevant to both public policy and private decision-making. This seminar will explore the structure and functioning of the labor market using theoretical and empirical tools. Topics to be covered include labor supply and demand, minimum wages, labor market effects of social insurance and welfare programs, the collective bargaining relationship, discrimination, human capital, immigration, wage distribution, and unemployment. As labor economics is an intensely empirical subfield, students will be expected to analyze data as well as study the empirical work of others.

Class Format: seminar

Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper (written in stages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 251 and ECON 255 or POEC 253

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Distributions: (D2) (QFR)

Attributes: POEC Comparative POEC/Public Policy Courses;
ECON 471 (S) Topics in Advanced Econometrics (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Class Format: seminar

Requirements/Evaluation: periodic homework assignments, term paper

Extra Info: not available for the fifth course option

Prerequisites: ECON 371

Enrollment Limit: 10

Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis

Distributions: (D2) (QFR)

Spring 2019

SEM Section: 01    TR 9:55 am - 11:10 am    Owen Thompson

ECON 472 (F) Macroeconomic Instability and Financial Markets (QFR)

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on problem sets, exams, and potentially student presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ECON 251 and ECON 252

Enrollment Limit: 19

Enrollment Preferences: Economics majors

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)
Enrollment Limit: 20
Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome
Expected Class Size: 20
Distributions: (D2) (QFR)
Attributes: PHLH Methods in Public Health; POEC Comparative POEC/Public Policy Courses;

ENVI 108 (F) Energy Science and Technology  (QFR)
Crosslistings: ENVI108 / PHYS108

Secondary Crosslisting
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours
Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 20
Expected Class Size: 20
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; SCST Related Courses
ENVI 203 (F) Ecology (QFR)
Crosslistings: BIOL203 / ENVI203

Secondary Crosslisting
This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: lecture/laboratory, six hours per week
Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor
Enrollment Limit: none
Expected Class Size: 35
Department Notes: satisfies the living system course requirement for the major in Environmental Studies; satisfies the distribution requirement in the Biology major
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives; EVST Environmental Science; EVST Living Systems Courses;

Fall 2018

LAB Section: 02  T 1:00 pm - 4:00 pm Ron D. Bassar
LEC Section: 01  MWF 10:00 am - 10:50 am Ron D. Bassar

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)
Crosslistings: ECON213 / ENVI213

Secondary Crosslisting
We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Class Format: lecture
Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible
Prerequisites: ECON 110
Enrollment Limit: 30
Enrollment Preferences: sophomores if course is overenrolled
Expected Class Size: 30
Distributions: (D2) (QFR)
Attributes: ENVI Environmental Policy; EVST Social Science/Policy; MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;

Spring 2019
LEC Section: 01  MW 11:00 am - 12:15 pm Sarah A. Jacobson
ENVI 339 (F) Conservation Biology (QFR)
Crosslistings: BIOL329 / ENVI339

Secondary Crosslisting

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week; lab three hours per week

Requirements/Evaluation: lab assignments, two exams, and discussion participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 203, or BIOL 202, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: biology majors, seniors, and juniors

Expected Class Size: 24

Department Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Distribution Notes: QFR: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

ENVI 376 (S) Economics of Environmental Behavior (QFR)
Crosslistings: ENVI376 / ECON477

Secondary Crosslisting

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: seminar

Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using an experiment, existing data, or theory

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Distributions: (D2) (QFR)

Attributes: MAST Interdepartmental Electives; POEC Comparative POEC/Public Policy Courses;
ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Crosslistings: ENVI404 / MAST404 / GEOS404

Secondary Crosslisting

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change.

Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: GEOS 104 or permission of instructor
Enrollment Limit: none
Expected Class Size: 10
Distributions: (D3) (QFR)
Attributes: ENVI Natural World Electives;

GEOS 301 (F) Structural Geology (QFR)

The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures, stress and strain analysis, deformation mechanisms in rocks, and the large scale forces responsible for crustal deformation. The laboratories cover geologic maps and cross sections, folds and faults, stereonet analysis, field techniques, strain, and stress.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week
Requirements/Evaluation: evaluation will be based on weekly laboratory exercises, problem sets, a midterm exam, and a final exam; many of the labs and problem sets use geometry, algebra, and several projection techniques to solve common problems in structural geology
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: GEOS 101 or 102, or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Geosciences majors
Expected Class Size: 12
Distributions: (D3) (QFR)

How best can we reason in the face of uncertainty? We will begin with an examination of rationality and the reasoning process including a survey of formal logic. Starting with uncertainty from a psychological and philosophical viewpoint, we will move to a careful theory of likelihood and how to reason with probabilistic models. The course will conclude with a consideration of observation and information, how to test hypotheses, and how we update our beliefs to incorporate new evidence.

Class Format: lecture
Requirements/Evaluation: homework, essays, presentations, exams, and participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-year students
Expected Class Size: 25
Distributions: (D3) (QFR)
Distribution Notes: QFR: This course will be covering formal logic and probability theory at sufficient depth to place this course on level with other QFR designated courses.

Fall 2018

LEC Section: 01    MWF 11:00 am - 11:50 am    Stewart D. Johnson

MATH 130 (F) Calculus I (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on exams, homework and quizzes

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

Enrollment Limit: 50

Enrollment Preferences: Professor's discretion

Expected Class Size: 30

Department Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

Distributions: (D3) (QFR)

Fall 2018

LEC Section: 02    TR 9:55 am - 11:10 am    Pamela E. Harris
LEC Section: 01    TR 8:30 am - 9:45 am    Pamela E. Harris

Spring 2019

LEC Section: 01    TR 9:55 am - 11:10 am    Pamela E. Harris

MATH 140 (F) Calculus II (QFR)
Mastery of calculus requires understanding how integration computes areas and business profit and acquiring a stock of techniques. Further methods solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 50

Expected Class Size: 30

Department Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions: (D3) (QFR)

Fall 2018

LEC Section: 01    MWF 10:00 am - 10:50 am    Cesar E. Silva

Spring 2019

LEC Section: 01    MWF 9:00 am - 9:50 am    Susan R. Loepp
MATH 150 (F)  Multivariable Calculus  (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams

Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit: 50

Expected Class Size: 50

Department Notes: this course is the right starting point for students who have seen differentiation and integration before; students with the equivalent of advanced placement of AB 4, BC 3 or above should enroll in MATH 150

Distributions: (D3) (QFR)

LEC Section: 01    MWF 9:00 am - 9:50 am    Stewart D. Johnson

MATH 151 (F)  Multivariable Calculus  (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, quizzes, and/or exams

Prerequisites: AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit: 50

Expected Class Size: 50

Department Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions: (D3) (QFR)

LEC Section: 01    MWF 9:00 am - 9:50 am    Colin C. Adams

MATH 200 (F)  Discrete Mathematics  (QFR)

Course Description: In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary
combinatorics and probability, graphs and trees, and algorithms. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based primarily on homework and exams

**Prerequisites:** MATH 140 or MATH 130 with CSCI 134 or 135; or one year of high school calculus with permission of instructor; students who have taken a 300-level math course should obtain permission of the instructor before enrolling

**Enrollment Limit:** 40

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

**MATH 210 (S) Mathematical Methods for Scientists**  (QFR)

**Crosslistings:** PHYS210 / MATH210

**Secondary Crosslisting**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** lecture, three hours per week

**Requirements/Evaluation:** evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

---

**Spring 2019**

LEC Section: 01  TR 9:55 am - 11:10 am  Daniel P. Aalberts

**MATH 250 (F) Linear Algebra**  (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on homework and exams

**Prerequisites:** MATH 150/151 or MATH 200

**Enrollment Limit:** 45
MATH 307 (F)  Computational Linear Algebra  (QFR)

Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; and Monte Carlo techniques. This course could also be considered a course in numerical analysis or computational science.

Class Format: lecture
Requirements/Evaluation: quizzes/exams, problem sets, projects and activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: Math 250, some elementary computer programming experience is strongly recommended
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 25
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01  TR 9:55 am - 11:10 am  Chad M. Topaz

MATH 309 (S)  Differential Equations  (QFR)

Ordinary differential equations (ODE) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODE from an applied standpoint. Topics covered early in the course include numerical solutions, separation of variables, integrating factors, constant coefficient linear equations, and power series solutions. Later, we focus on nonlinear ODE, for which it is usually impossible to find analytical solutions. Tools from dynamical systems allows us to obtain some information about the behavior of the ODE without explicitly knowing the solution.

Class Format: lecture, discussion, interactive activities
Requirements/Evaluation: quizzes/exams, problem sets, activities
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 30
Enrollment Preferences: Professor's discretion
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
MATH 310 (S) Mathematical Biology  (QFR)
Crosslistings: MATH310 / BIOL210

Primary Crosslisting

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Class Format: tutorial

Requirements/Evaluation: problem sets, weekly meetings, final project and paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 250, MATH 209 or 309, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 10

Distributions: (D3) (QFR)

Distribution Notes: QFR: The course will introduce methods for developing and analyzing mathematical models.

Attributes: PHLH Methods in Public Health;

Spring 2019

TUT Section: T1  TBA  Julie C. Blackwood

MATH 313 (F) Introduction to Number Theory  (QFR)

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on homework, projects, and examinations

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 40

Expected Class Size: 25

Distributions: (D3) (QFR)

Fall 2018

LEC Section: 01  MR 2:35 pm - 3:50 pm  Leo Goldmakher

MATH 321 (S) Knot Theory  (QFR)

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, “Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?” Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

MATH 334 (S)  Graph Theory  (QFR)

A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

MATH 341 (F)  Probability  (QFR)       
Crosslistings: STAT341 / MATH341
While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 250 or permission of the instructor
Enrollment Limit: 40

MATH 350 (F) Real Analysis  (QFR)
Real analysis is the theory behind calculus. It is based on a precise understanding of the real numbers, elementary topology, and limits. Topologically, nice sets are either closed (contain their limit points) or open (complement closed). You also need limits to define continuity, derivatives, integrals, and to understand sequences of functions.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on homework, classwork, and exams
Prerequisites: MATH 150 or MATH 151 and MATH 250, or permission of instructor
Enrollment Limit: 40
Expected Class Size: 30
Distributions: (D3) (QFR)

MATH 351 (F) Applied Real Analysis  (QFR)
Real analysis or the theory of calculus--derivatives, integrals, continuity, convergence--starts with a deeper understanding of real numbers, limits, and some topology. Applications of Real Analysis involve questions of existence and uniqueness of solutions, implicit definition of functions, infinite dimensional function spaces, and tools from calculus of variations to construct optimal controls and minimizing curves and surfaces.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on exams, homework and quizzes
Prerequisites: MATH 150 and MATH 250, or permission of instructor
Enrollment Limit: 50
Expected Class Size: 20
Distributions: (D3) (QFR)

Fall 2018
MATH 355 (F) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on problem sets and exams

MATH 361 (F) Theory of Computation (QFR)
Crosslistings: CSCI361 / MATH361
Secondary Crosslisting
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets, a midterm examination, and a final examination
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 34
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 34
Distributions: (D3) (QFR)
Attributes: COGS Interdepartmental Electives;

Fall 2018
LEC Section: 01 MWF 12:00 pm - 12:50 pm Thomas P. Murtagh

MATH 374 (F) Topology (QFR)
Topology is the study of when one geometric object can be continuously deformed and twisted into another object. Determining when two objects are topologically the same is incredibly difficult and is still the subject of a tremendous amount of research, including recent work on the Poincaré Conjecture, one of the million-dollar millennium-prize problems. The main part of the course on point-set topology establishes a framework based on "open sets" for studying continuity and compactness in very general spaces. The second part on homotopy theory develops refined methods for...
determining when objects are the same. We will prove for example that you cannot twist a basketball into a doughnut.

**Class Format:** lecture

**Requirements/Evaluation:** homework, tutorials, and exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 350 or 351; not open to students who have taken MATH 323

**Enrollment Limit:** 30

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

**MATH 402 (S) Measure Theory and Probability (QFR)**

The study of measure theory arose from the study of stochastic (probabilistic) systems. Applications of measure theory lie in biology, chemistry, physics as well as in economics. In this course, we develop the abstract concepts of measure theory and ground them in probability spaces. Included will be Lebesgue and Borel measures, measurable functions (random variables). Lebesgue integration, distributions, independence, convergence and limit theorems. This material provides good preparation for graduate studies in mathematics, statistics and economics.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based primarily on performance on homework assignments and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 40

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

---

### Spring 2019

**LEC Section:** 01 Cancelled

**MATH 403 (S) Measure and Ergodic Theory (QFR)**

An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesque and Borel measures, measurable functions, and Lebesque integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, and Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

**Class Format:** lecture

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Mathematics majors

**Expected Class Size:** 15-20

**Department Notes:** senior major course

**Distributions:** (D3) (QFR)

### Spring 2019

**LEC Section:** 01 MWF 12:00 pm - 12:50 pm  
Cesar E. Silva
Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

Class Format: lecture
Requirements/Evaluation: exams and weekly homework assignments
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Limit: 30
Enrollment Preferences: seniors
Expected Class Size: 10
Distributions: (D3) (QFR)
Distribution Notes: QFR: It is a math course

Fall 2018
LEC Section: 01    TR 8:30 am - 9:45 am     Thomas A. Garrity

MATH 411 (S)  Commutative Algebra  (QFR)
Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Possible topics include Noetherian rings, primary decomposition, localizations and quotients, height, dimension, basic module theory, and the Krull Altitude Theorem.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework and exams
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 30
Expected Class Size: 15
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01    MWF 10:00 am - 10:50 am     Andrew Bydlon

MATH 433 (F)  Mathematical Modeling  (QFR)
Mathematical modeling means (1) translating a real-life problem into a mathematical object, and (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have a strong enthusiasm for applied mathematics.

Class Format: discussion, research
Requirements/Evaluation: writing assignments, modeling activities, presentations, research project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 250, MATH 309 or similar, and some experience with computer programming (equivalent to CSCI 134 or MATH 307)
Enrollment Limit: 24
Enrollment Preferences: Professor's discretion
MATH 458 (S)  Algebraic Combinatorics  (QFR)
Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. This course will focus on the study of symmetric functions, young tableaux, matroids, graph theory, and other related topics.

Class Format: seminar
Requirements/Evaluation: homework assignments, proof portfolio, individual and group projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 200 and MATH 355
Enrollment Limit: 25
Enrollment Preferences: seniors
Expected Class Size: 20
Distributions: (D3) (QFR)
Distribution Notes: QFR: Mathematics course in the area of algebraic combinatorics

Spring 2019
SEM Section: 01    TR 8:30 am - 9:45 am     Pamela E. Harris

MATH 459 (S)  Applied Partial Differential Equations  (QFR)
Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

Class Format: tutorial
Requirements/Evaluation: participation, problem sets, oral presentations, oral exams, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: students with an interest in applied mathematics, selected to create a diverse set of tutorial participants
Expected Class Size: 10
Department Notes: students who have taken MATH 453 may not enroll in MATH 458T without permission of the instructor
Distributions: (D3) (QFR)
Distribution Notes: QFR: This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
MATH 487 (S) Computational Algebraic Geometry (QFR)

Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework, exams, and final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: instructor decision
Expected Class Size: 15
Department Notes: This course is not a senior seminar, and so it does not fulfill the senior seminar requirement for the math major
Distributions: (D3) (QFR)

PHIL 203 (S) Logic and Language (QFR)

Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's Tractatus), and to examine some of the connections between logic and philosophy.

Class Format: lecture/discussion
Requirements/Evaluation: a midterm, a final, frequent homework and problem sets
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 50-80
Distributions: (D2) (QFR)

PHIL 312 (S) Philosophical Implications of Modern Physics (QFR)

Crosslistings: PHIL312 / PHYS312 / SCST312
Secondary Crosslisting

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Class Format: lecture
Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors and Physics majors
PHYS 108 (F) Energy Science and Technology (QFR)

Crosslistings: PHYS108 / ENVI108

Primary Crosslisting

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D3) (QFR)

Attributes: ENVI Natural World Electives; SCST Related Courses

PHYS 131 (F) Introduction to Mechanics (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week

Requirements/Evaluation: evaluation will be based on exams, labs, and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

Enrollment Limit: 24/lab

Expected Class Size: 60

Department Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)
PHYS 132 (S) Electromagnetism and the Physics of Matter  (QFR)

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section 1 hour approximately every other week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Expected Class Size: 60

Distributions: (D3) (QFR)

PHYS 141 (F) Mechanics and Waves  (QFR)

This is the typical first course for a prospective physics major. It covers the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, one hour approximately every other week

Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, 2 one-hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: high school physics and MATH 130 or equivalent placement

Enrollment Limit: 22 per lab

Expected Class Size: 50

Department Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

PHYS 142 (S) Foundations of Modern Physics  (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires us rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

**Class Format:** lecture, two hours weekly; problem-solving conference session, one hour weekly; laboratory, alternating between three hours and one hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 141 and MATH 130 (formerly 103), or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor. Students may not take both PHYS 142 and PHYS 151

**Enrollment Limit:** 22 per lab

**Expected Class Size:** 30

**Distributions:** (D3) (QFR)

---

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same basic material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

**Class Format:** lecture/discussion, three hours per week; laboratory, 3 hours approximately every other week; conference section 1 hour approximately every other week

**Requirements/Evaluation:** evaluation will be based on class participation, labs, weekly problem sets, an oral presentation, two hour-exams and a final exam, all of which have a substantial quantitative component

**Extra Info:** this is a small seminar designed for first-year students who have placed out of PHYS 141

**Prerequisites:** placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

**Enrollment Limit:** 18

**Expected Class Size:** 18

**Distributions:** (D3) (QFR)

---

The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory
of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** evaluation will be based on problem sets, labs, two take-home midterms, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

**Enrollment Limit:** 20 per lab

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

---

**PHYS 202 (S) Vibrations, Waves and Optics (QFR)**

Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** evaluation will be based on problem sets, labs, two one-hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

**Enrollment Limit:** none

**Expected Class Size:** 20

**Distributions:** (D3) (QFR)

---

**PHYS 210 (S) Mathematical Methods for Scientists (QFR)**

Crosslistings: PHYS210 / MATH210

**Primary Crosslisting**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. A series of optional sessions in Mathematica will be offered for students who are not already familiar with this computational tool.
Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation will be based on several exams and on weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01 TR 9:55 am - 11:10 am Daniel P. Aalberts

PHYS 301 (F) Quantum Physics (QFR)
This course serves as a one-semester introduction to the history, formalism, and phenomenology of quantum mechanics. We begin with a discussion of the historical origins of the quantum theory, and the Schroedinger wave equation. The concepts of matter waves and wave-packets are introduced. Solutions to one-dimensional problems will be treated prior to introducing the system which serves as a hallmark of the success of quantum theory, the three-dimensional hydrogen atom. In the second half of the course, we will develop the important connection between the underlying mathematical formalism and the physical predictions of the quantum theory and introduce the Heisenberg formalism. We then go on to apply this knowledge to several important problems within the realm of atomic and nuclear physics concentrating on applications involving angular momentum and spins.
Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: evaluation will be based on weekly problem sets, labs, a midterm exam, and final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209
Enrollment Limit: none
Expected Class Size: 15

PHYS 402 (S) Applications of Quantum Mechanics (QFR)
This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Class Format: tutorial, 1 and 1/4 hours per week; lecture, one hour per week
Requirements/Evaluation: evaluation will be based on weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PHYS 301
Enrollment Limit: 10 per sec
Expected Class Size: 16
Distributions: (D3) (QFR)

PHYS 411 (F) Classical Mechanics (QFR)
This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet once a week as a
whole to discuss new material.

**Class Format:** tutorial, 1 and 1/4 hours per week; lecture, one hour per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**POEC 253 (F) Empirical Methods in Political Economy** (QFR)

This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** problem sets, group projects, and three exams

**Prerequisites:** MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255

**Enrollment Limit:** 25

**Enrollment Preferences:** Political Economy majors, Environmental Policy majors and sophomores

**Expected Class Size:** 15

**Department Notes:** does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or
PSCI 211 (S) Do the People Govern? U.S. Public Opinion and Mass Political Behavior  (QFR)
America's founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public’s general wishes. In addition to engaging this debate about what the public thinks about politics, we will also explore how people behave in the political realm. What are the forces that shape whether citizens pay attention to politics, vote, work on campaigns, protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage it?

Class Format: lecture

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: political science majors

Expected Class Size: 20

Distributions: (D2) (QFR)

Attributes: POEC U.S. Political Economy + Public Policy Course; PSCI American Politics Courses;

Spring 2019

LEC Section: 01  TF 1:10 pm - 2:25 pm  Matthew Tokeshi

PSYC 201 (F) Experimentation and Statistics  (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis.

Class Format: lecture/lab

Requirements/Evaluation: papers, exams, and problem sets

Extra Info: two sections; must register for the lab and lecture with the same instructor

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: PSYC 101; not open to first-year students except with permission of instructor

Enrollment Limit: 22

Enrollment Preferences: Psychology majors

Distributions: (D2) (QFR)

Attributes: COGS Related Courses; PHLH Statistics Courses;

Fall 2018

SCST 312 (S) Philosophical Implications of Modern Physics (QFR)
Crosslistings: PHIL312 / PHYS312 / SCST312

Secondary Crosslisting

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Class Format: lecture
Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors and Physics majors
Expected Class Size: 20
Distributions: (D2) (QFR)
Distribution Notes: meets the Division 2 requirement if registration is under PHIL or SCST; Division 3 requirement if registration under PHYS
Attributes: PHIL Contemp Metaphysics & Epistemology Courses;

Spring 2019
LEC Section: 01 TR 11:20 am - 12:35 pm Frederick W. Strauch, Keith E. McPartland

STAT 101 (F) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performances on quizzes and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit: 50
Expected Class Size: 40
Department Notes: Students with calculus background and social science interest should consider STAT 161. Students with MATH 150 should enroll in STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stat should consult the department.
Distributions: (D3) (QFR)

Fall 2018
STAT 161 (F) Introductory Statistics for Social Science  (QFR)

This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences and sciences. Topics include exploratory data analysis, elements of probability theory, basic statistical inference, and introduction to statistical modeling. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Class Format: lecture

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 130 (or equivalent). Not open to students who have completed STAT 101 or equivalent.

Enrollment Limit: 40

Enrollment Preferences: Economics majors, sophomores

Expected Class Size: 40

Department Notes: Students with MATH 150 should consider STAT 201. Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students without any calculus background should consider STAT 101.

Distributions: (D3) (QFR)

Distribution Notes: QFR: It is a quantitative course

Spring 2019
LEC Section: 01    TF 1:10 pm - 2:25 pm     Richard D. De Veaux

STAT 201 (F) Statistics and Data Analysis  (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams

Prerequisites: MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.

Enrollment Limit: 40

Expected Class Size: 40

Department Notes: Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

Distributions: (D3) (QFR)

Attributes: BGNP Recommended Courses; COGS Related Courses; EVST Methods Courses; PHLH Statistics Courses;
STAT 202 (F) Introduction to Statistical Modeling (QFR)

Data come from a variety of sources sometimes from planned experiments or designed surveys, but also arise by much less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential as well as its limits to answer questions about the world. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework, exams and projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: AP Statistics 5 or STAT 101, 161 or 201 or permission of instructor
Enrollment Limit: 25
Expected Class Size: 20
Department Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement.
Distributions: (D3) (QFR)
Attributes: EVST Methods Courses; PHLH Statistics Courses;

---

STAT 341 (F) Probability (QFR)

Crosslistings: STAT341 / MATH341

Secondary Crosslisting

While probability began with a study of games, it has grown to become a discipline with numerous applications throughout mathematics and the sciences. Drawing on gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables, expectation, independence, laws of large numbers, and the Central Limit Theorem. Many interesting and important applications will also be presented, potentially including some from coding theory, number theory and nuclear physics.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 250 or permission of the instructor
Enrollment Limit: 40
Expected Class Size: 20
Distributions: (D3) (QFR)

---

STAT 344 (F) Statistical Design of Experiments (QFR)

What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the
results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

**Class Format:** lecture

**Requirements/Evaluation:** problem sets, midterm, final exam, project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Fall 2018**

LEC Section: 01    TF 2:35 pm - 3:50 pm     Richard D. De Veaux

**STAT 346 (F) Regression and Forecasting** (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the standard method for analyzing continuous response data and their relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on exams, homework, and a project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** STAT 201 or 202, and MATH 150 and 250; or permission of instructor

**Enrollment Limit:** 22

**Expected Class Size:** 15

**Distributions:** (D3) (QFR)

**Attributes:** EVST Methods Courses;

**Spring 2019**

LEC Section: 01    TF 2:35 pm - 3:50 pm     Laurie L. Tupper

**STAT 355 (S) Multivariate Statistical Analysis** (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework and exams

**Prerequisites:** STAT 201 and MATH 250

**Enrollment Limit:** 25
STAT 360 (S)  Statistical Inference (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on problem sets and exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 30
Enrollment Preferences: Statistics majors
Expected Class Size: 30
Distributions: (D3) (QFR)

Spring 2019
LEC Section: 01    MWF 8:30 am - 9:45 am     Xizhen Cai

STAT 365 (F)  Bayesian Statistics (QFR)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Class Format: lecture
Requirements/Evaluation: evaluation will be based on homework and exams
Prerequisites: STAT 201 and MATH 150 and 250, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 10
Distributions: (D3) (QFR)

Fall 2018
LEC Section: 01    TR 9:55 am - 11:10 am     Daniel B. Turek

STAT 372 (S)  Longitudinal Data Analysis: Modeling Change over Time (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random
effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 201 and STAT 346

Enrollment Limit: 30

Enrollment Preferences: junior and senior Statistics majors

Expected Class Size: 20

Distributions: (D3) (QFR)

Attributes: PHLH Statistics Courses;

Spring 2019

LEC Section: 01    TF 1:10 pm - 2:25 pm     Anna M. Plantinga

STAT 442 (S) Statistical Learning and Data Mining (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homeworks and projects

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 346 or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: seniors and Statistics Majors

Expected Class Size: 10

Distributions: (D3) (QFR)

Spring 2019

LEC Section: 01    TF 2:35 pm - 3:50 pm     Richard D. De Veaux

STAT 458 (F) Spatio-Temporal Data (QFR)

Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Class Format: lecture

Requirements/Evaluation: project work, homework, exams, and contribution to discussion.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10
Distributions:  (D3) (QFR)

Distribution Notes:  This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Fall 2018

LEC Section: 01    TF 2:35 pm - 3:50 pm    Laurie L. Tupper

---------------------------------------------------------------
MAJOR

The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion their own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

Required Sequence Courses

- REL 200 Theories and Methods in the Study of Religion
- One 300-level seminar or tutorial
- REL 401 Senior seminar

Elective Courses

Six electives at the 100-, 200-, or 300-level (with a maximum of one 100-level class to count towards major).

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College’s coordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300-level seminar or tutorial or might include additional coursework from other programs and departments (whether cross-listed or not).

The major will culminate in a year-long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present their individual research projects, begun in the senior seminar, drawing on their specializations and advised by members of the faculty.

For those who wish to go beyond the formally-listed courses into a more intensive study of a particular religious tradition, methodological trend, or religious phenomenon (e.g., ritual, symbol-formation, mysticism, theology, etc.), there is the opportunity to undertake independent study or, with the approval of the department, to pursue a thesis project.

The value of the major in Religion derives from its fostering of a critical appreciation of the complex role religion plays in every society, even those that consider themselves non-religious. The major makes one sensitive to the role religion plays in shaping the terms of cultural discourse, of social attitudes and behavior, and of moral reflection. But it also discloses the ways in which religion and its social effects represent the experience of individual persons and communities. In doing these things, the major further provides one with interdisciplinary analytical tools and cross-cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

The department will work with students in the classes of 2014-2015 to adapt these new guidelines for the major. Beginning in spring 2012, students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.

THE DEGREE WITH HONORS IN RELIGION

The degree with honors in Religion requires the above-mentioned nine courses and the preparation of a thesis of 75+ pages with a grade of B+ or better. A thesis may combine revised work done in other courses with new material prepared while enrolled either in Religion 493-W31 or Religion W31-494. Up to two-thirds of the work in the thesis may be such revised work, but at least one-third must represent new work. The thesis must constitute a coherent whole either by its organizing theme or by a focus on a particular religious tradition. Candidates will also be expected to present the results of their thesis orally in a public presentation. Students who wish to be candidates for honors in Religion will submit proposals and at least
one paper that may be included in the thesis to the department in the spring of their junior year. Students must normally have at least a 3.5 GPA in Religion to be considered for the honors program.

The chair will serve as advisor to non-majors.

**STUDY ABROAD**

The Williams College Religion Department encourages potential majors to study abroad in order to enhance their education and gain international perspectives on religious studies. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. Many of our majors study in the Williams College Oxford Program, but our majors also regularly pursue a semester or year-long study in other programs.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. Sometimes a course title is sufficient, but for many courses we also need to see a description of some sort because the title is unclear.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 3 courses: Religion 200, one 300-level Religion seminar or tutorial, and Religion 401 Senior Seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Make sure that they have or will be able to take REL 200, because it is offered only once a year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

**REL 12 (W) The Mumonkan and Tathagata Zen: An Exploration of Mind**

Zen is the sect of Buddhism that stresses experience over abstract cognitive formulas and principles. Based on the tenet that all beings have what is called Buddha Nature, practice is entered into with the faith than one can have exactly the same experience as the historical Buddha, Shakyamuni, had and can thereby come to know the process that constitutes the nature of all beings and things that comprise the universe. The primary method of practice is the meditative technique known as zazen, and the type of Zen that focuses on the consciousness that develops from diligent zazen practice is known as Tathagata Zen. Through one’s efforts in zazen, one may come to the intuitive experience of the Dharma Activity, the activity that gives birth to all things and into which all things return. Although the Dharma Activity cannot be described fully in words, it is possible to use words that point to it without running afoul of its truth. The Mumonkan (The Gateless Gate) is a classic Zen text containing 48 such pointers or koans. Utilizing this text as a focus of discussion, students will attempt to grasp the teaching contained in these pointers by means of the principles of Tathagata Zen. The practice of zazen will be part of each class, and the course will culminate in a two-day zen retreat. Those taking the course will keep a daily journal of their course-related experiences which will be reviewed by the instructor. They will also write a series of short papers on selected koan from The Mumonkan. The course will meet from 9am–Noon on Monday, Wednesday and Friday. Anyone wishing to take this course must submit a paragraph stating their purpose for doing so. Up to ten students will be accepted for this course and all are eligible, including those who have taken a prior Winter Study Zen course taught by this instructor. Adjunct Instructor Bio: Williams ’62, Retired psychiatrist. Zen practitioner for 48 years, 17 as a monk.

**Class Format:** mornings

**Requirements/Evaluation:** journal review; four 2-page papers
REL 14 (W) Mountain Religion

Sacred mountains play a central role in the founding myths of many religious traditions. Mountains such as Sinai, Olympus, and Kailash are considered divine abodes, entry into which confers spiritual powers. For many religious practitioners, pilgrimage to and practicing in and around the mountains provides a special opportunity to encounter the gods and acquire spiritual benefits. In this comparative course, we will explore the special role and function of mountains in Buddhism, Hinduism, Judaism, and Islam, with a special focus on contemplative practices from Japan's Shugendo tradition and the kaihogyo nighttime hikes of Tendai monks, circumambulation of Himalayan peaks and mantra recitation, and pilgrimage journeys. Class will meet for three 2-hour sessions per week. Readings will consist mostly of journal articles and selections from books, with a 5-page reflective paper due at the end of the course. Depending on the weather, we will take advantage of the surrounding mountains for short contemplative hikes, applying some of the practices we will study.

Class Format: mornings

Requirements/Evaluation: 5-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: lottery

Materials/Lab Fee: $75

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA James H. Gordon

REL 17 (W) How to Write Auto-Fiction

Crosslistings: REL17 / ENGL17

Primary Crosslisting

You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, "Fiction" and "Non-Fiction"-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

Class Format: afternoons

Requirements/Evaluation: two stories (10-20 pages) and two revisions (10-20 pages)

Prerequisites: none

Enrollment Limit: 10
REL 18 (W) Rare Bibles of Chapin Library

What does a Bible from 1462 feel like? Smell like? In this course, students will touch, smell, and examine early and rare Bibles from the world-class collection of Bibles housed in Williams's own Chapin Library. Highlights of the collection include multiple significant 15th and 16th century Bibles, as well as a 1611 King James Bible. Through class readings and discussions, as well as a small research project, students will learn about the history of the book, the history of the Bible as a book, and the specific histories of one or more rare Chapin Bibles of their choosing. The major project for the course will be for students to experiment with and curate a Twitter account and course website as online exhibits of the 'rare and wondrous' Bibles of Chapin Library.

Class Format: afternoons

Requirements/Evaluation: the major project for the course will be for students to experiment with and curate a Twitter account and course website as online exhibits of the 'rare and wondrous' Bibles of Chapin Library

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Religion majors first, then History majors, then seniority (seniors, then juniors, etc.)

Materials/Lab Fee: cost of books

REL 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel

Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in
ethnographic methods; application essays and interviews

Materials/Lab Fee: cost to student: $3362

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

REL 25 (W) Yoga and Meditation in India: Theory and Practice

This course delves into the theory and practice of both Hindu and Buddhist yoga in their land of origin, India. In the first half, we stay in the North Indian town of Rishikesh, one of the main centers of Hindu yoga today, located on the banks of the Ganges River. There we practice yoga and meditation daily, study yoga philosophy, and visit leading yoga centers. In addition, we volunteer daily at Mother Miracle Community Development Program, where a K-12 school is dedicated to teaching exceptionally intelligent poor children. In the second part of the course, we travel to South India and stay at Sera Je Monastic University, the largest center of Tibetan Buddhist monastic learning in India. There we continue our daily practice of yoga and meditation, and study with a Tibetan monastic scholar the theory of Tibetan Buddhism. In the afternoons students volunteer with Tibetan students and visit Tibetan service organizations in the area. In this way we gain a solid overview of the practice of yoga and meditation in India. We come to appreciate and learn from the people upholding the living traditions of yoga, as well as helping these people to strengthen the education that will allow them to interact with the global world. Required Reading: The Path to Enlightenment by The Dalai Lama; Yoga and the Luminous: Patanjali's Spiritual Path to Freedom by Christopher Key Chapple; selected articles about yoga and contemporary yoga exchanges. Adjunct Co-Instructor Bio: Tasha Judson, M.Ed., is a certified alignment oriented Hatha yoga teacher and authorized meditation teacher. She has directed Tasha Yoga studio in Williamstown since 2003.

Class Format: travel

Requirements/Evaluation: 10-page paper; daily journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 10

Enrollment Preferences: interview

Materials/Lab Fee: $3,327

REL 102 (F) The Meaning of Life
As Henry David Thoreau put it, "The mass of men lead lives of quiet desperation," attempting to fill the void of their existence with sex, money, ephemeral amusements, and the steady accumulation of unnecessary possessions - basically killing time until the day they die. For some people this might seem to be enough, but this course is for those of us who lie awake at night wondering things like: "Why are we here?" "What does it mean to live a good life?" "How can I be happy?" "What is our duty to others?" "What really matters?" and the biggest question of them all: "What is the Meaning of Life?" This course will trace the diverse responses to these important questions offered by philosophers and religious thinkers in different cultures and time periods. We will read their texts critically and discuss how they can be directly relevant to our lives. Students will also be introduced to abstract theorizing in Religious Studies about how different cultures and traditions have historically come to live meaningfully. Authors and texts to be read may include Aristotle, Hannah Arendt, Marcus Aurelius, the Bhagavad Gita, H. H. Dalai Lama, the Dhammapada, Søren Kierkegaard, Martin Luther King Jr, Jean-Paul Sartre, Shantideva, Peter Singer, Leo Tolstoy, Max Weber, and Slavoj Zizek.

Class Format: lecture
Requirements/Evaluation: attendance and participation, journal and short writing assignments, midterm and final exams
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 40
Distributions: (D2)

REL 104 (S) Religious Conflict and Cooperation
Violent conflicts throughout the world are animated by religious rhetoric, driven by religious actors, and sanctioned by religious authorities. At the same time, religious and "interfaith" organizations are often prominent participants in peace advocacy and conflict resolution. What are the varieties of religious involvement in war and peace? What can we learn about "religion" from the conflicts and cooperative initiatives that are labeled "religious"? Does the modern nation-state increase the likelihood of religious conflict? Will 21st century globalization support more or less conflict and/or cooperation? We will investigate these and other questions through contemporary case studies. In some cases we will focus on conflicts over territory: the Temple Mount/Noble Sanctuary in Jerusalem, the Babri Mosque/Birthplace of Rama in Ayodhya, India, the Black Hills in South Dakota. But we will also study the rhetoric of Usama Bin Laden and the role of spirit possession in the formation of the Lord's Resistance Army in Uganda. Finally, we will consider efforts to end such conflicts peacefully and delegitimize militant groups. In each case, we will see how competition for control over what counts as "Judaism," "Hinduism," "religion," "religious," and so forth is central to these conflicts and to the goals of those who seek to resolve them. Along with primary and secondary sources related to each case study, we will also read theoretical works by authors that may include Mark Juergensmeyer, Samuel Huntington, Scott Appleby, Bruce Lincoln, Saba Mahmood, Olivier Roy, Ananda Abeysekara, Talal Asad, Tomoko Masuzawa, Elizabeth Shakman Hurd, and others.

Class Format: lecture
Requirements/Evaluation: two short papers, an in-class mid-term exam, and a final paper or project
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: first-year students and potential Religion majors
Expected Class Size: 30

REL 110 (F)  Living Religion: The Study of Religion in Everyday Life
When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: seminar
Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 12-12
Distributions: (D2)
Attributes: EXPE Experiential Education Courses

REL 134 (S)  Leaving the World Behind: The Literature of Reclusion  (WI)
Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134
Secondary Crosslisting
Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial
Requirements/Evaluation: tutorial papers, responses, and a final project
REL 171 (S)  Music and Spirituality: Cross-Cultural Perspectives  (WI)
Crosslistings: MUS171 / REL171

Secondary Crosslisting

How does the sacred sound? Across cultures and across millennia, music has served to enable, inspire, and express the spiritual life experiences of communities and individuals. Why is this so? In what contexts and through what means can making and hearing music reflect and produce spiritual experience? This team-taught course will take a comparative approach to exploring music's spiritual power, considering such areas as the function of music in ritual practices from various cultures and times, the use of music to tell sacred stories, music and dance in spiritual practice, and the role of music created in the face of death and its aftermath. Working from both musicological and ethnomusicological perspectives, we will explore the possibilities of sensory ethnography for better understanding the role of perception and the body in spiritual experiences with music. Our comparisons will draw from Western and world Christian traditions from medieval to modern times, and on conversations with musicians immersed in the music of other faith traditions (including Jewish, Hindu, and Muslim). We will explore connections between music and spirituality through a variety of repertoires, including plainchant and Renaissance sacred choral music; the music and dance of traditional West African religions like vodun and orisa; music from the Western classical tradition by such composers as Bach, Beethoven, and Messiaen; American hymnody and spirituals; gospel music in the U.S. and Africa; and selected artists from the world of jazz and popular music, such as John Coltrane and Leonard Cohen.

Class Format: seminar

Requirements/Evaluation: class participation; class journal; presentation with annotated bibliography; ethnographic field study; final project with presentation

Extra Info:  may not be taken on a pass/fail basis

REL 200 (S)  What is Religion? Theories and Methods in the Study of Religion

As recently as the 1960s, the most influential theorists of modernity were predicting that religion would eventually vanish, while theologians lamented what they called the "Death of God." But one has only to glance at today's headlines to see that accounts of religion's demise were premature. Indeed a basic knowledge of religion is indispensable to understanding the current global moment as well as a range of fields from political science to English literature and history. To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. It will familiarize students with the discipline's most significant theorists (both foundational and contemporary) and trace their multidisciplinary--philosophical, sociological, anthropological, and psychological--modes of inquiry. At stake are questions such as: How does one go about studying religion? Is "religion" even a cultural universal? Or is it merely the byproduct of the European Enlightenment? What is religion's

Class Format: seminar

REL 201 (F) The Hebrew Bible
Crosslistings: COMP201 / JWST201 / REL201

Primary Crosslisting

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers

Prerequisites: none

REL 202 (S) Moses: Stranger in a Strange Land
Crosslistings: COMP214 / JWST202 / REL202

Primary Crosslisting

As chieftain, priest, prophet, and lawmaker all in one, Moses occupies the central place in the history of Isrealite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawmaker and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory relationship to God? to science? to society? to secularism? to colonialism? to ethics? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?

Class Format: seminar

Requirements/Evaluation: class participation, three short (2-3 pages) writing assignments, a 5-page midterm paper, and a 10-page final paper

Extra Info: not available for the fifth course option

Prerequisites: none, although a previous course on religion is recommended

Enrollment Limit: 15

Enrollment Preferences: Religion majors

REL 203 (F)  Judaism: Before The Law
Crosslistings: JWST101 / REL203
Primary Crosslisting
This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka's The Trial with his parable "Before The Law," Woody Allen's film Crimes and Misdemeanors, and ethnographic accounts of contemporary Jewish observance. All readings will be in translation.

Class Format: seminar

REL 204 (F)  Jesus and Judaism
Crosslistings: REL204 / JWST204
Primary Crosslisting
Was Jesus a Christian? Was he Jewish? And if Christianity's ostensible founder was Jewish, what does that mean for his Christianness? This course will explore Christian, Jewish, and secular depictions of Jesus' Jewishness to see what they reveal about the nature and history of the relationship between Christianity and Judaism. Broad in its historical scope, the course will include examinations of ancient Jewish messianic expectations, New Testament depictions of Jesus' Jewishness, covert references to Jesus in the Talmud, medieval debates between Jews and Christians, and modern
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's *Works and Days*, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's *Poor Richard's Almanack.*

All readings are in translation.

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job.* All readings are in translation.
REL 207 (F)  From Adam to Noah: Literary Imagination and the Primeval History in Genesis
Crosslistings: COMP250 / REL207 / JWST207 / CLAS207

Primary Crosslisting
How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

REL 209 (S) Jewish America
Crosslistings: JWST209 / REL209

Primary Crosslisting
Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and
television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall; read John Updike's Bech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Class Format: seminar

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

Expected Class Size: 25

**Primary Crosslisting**

The First Amendment of the U.S. Constitution begins: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." What does "religion" mean in this formulation? Should "religion" be singled-out for exclusion from government? Are "religious" reasons ever legitimate reasons for laws, policies or popular political action? Should "religious" organizations be exempt from otherwise generally applicable laws? Is "religion" good or necessary for democratic societies? In this course we will respond to these and related questions through an investigation of "religion" as a concept in political theory. Particular attention will be given to the modern liberal tradition and its critics. Coverage will range from modern classics to innovative contemporary arguments. Classics may include John Locke's *A Letter Concerning Toleration*, selections from Jean-Jacques Rousseau's *The Social Contract*, James Madison's *Memorial and Remonstrance Against Religious Assessments*, Immanuel Kant's *Religion Within the Boundaries of Mere Reason*, John Stewart Mill's *Three Essays On Religion*, and John Dewey's *A Common Faith*. More recent arguments may come from John Rawls, Alasdair MacIntyre, Nicholas Wolterstorff, Martha Nussbaum, Jeffrey Stout, Winnifred Sullivan, Brian Leiter and Andrew Koppelman.

---

Crosslistings: CLAS215 / REL215

**Primary Crosslisting**

In this course, students will be introduced to the New Testament through an exploration of how the New Testament became--and continues to be produced as--a book. We will start by examining the letters of Paul--its earliest texts--in terms of the habits and traditions of ancient letter-writing. We will similarly place the other texts of the New Testament in the context of Greek, Roman, and Jewish literary traditions and conventions. As the semester moves forward, we will examine how the New Testament itself became a material object--a book--and how its changing material status shaped its meaning and functioning. We will see the New Testament transform from a library of separate scrolls and/or codices (a library which was occasionally bound together into a single codex), to a luxury object in the Middle Ages, to a cheap printed object in the wake of the printing revolution of the 19th century, to its modern life as both a highly marketed object and a searchable digital "thing" in online spaces and mobile apps.

**Class Format:** seminar

**Requirements/Evaluation:** active preparation and participation, two short papers (3-5 pages), midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** none

**REL 216 (S) Greek Art and the Gods**

Crosslistings: CLAS248 / REL216 / ARTH238

**Secondary Crosslisting**
In the *Iliad*, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympos, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

**Class Format:** lecture and discussion

**Requirements/Evaluation:** short writing assignments, midterm exam, final exam, final paper

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** preference will be given to pre-registered Art-History majors needing to fulfill the pre-1400 requirement; otherwise, the course is open to any interested student

**Expected Class Size:** 30

**Department Notes:** satisfies the pre-1400 requirement; satisfies the pre-1600 elective requirement in the art-history major.

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH and CLAS; meets Division 2 requirement if registration is under REL

**Attributes:** ARTH pre-1600 Courses;

*REL 217 (S)  Medieval England*

Crosslistings: REL217 / HIST231

**Secondary Crosslisting**

Across the entire world of the Middle Ages, no region has captured the modern imagination as much as medieval England. From the Battle of Hastings to Magna Carta, from Braveheart to King Arthur, medieval English history and popular knowledge of the medieval past are closely linked. This course will survey the history of England from the Roman period through the reign of Richard II (AD 43-1399). We will find a great deal to detain us in these thirteen centuries, including the Anglo-Saxon settlement of England and subsequent conversion to Christianity, the Viking raids of the ninth and tenth centuries, the Norman Conquest, the growth of English common law, the murder of Thomas Beckett, Edward I's campaigns in Wales and Scotland, the Peasants' Revolt of 1381, and the beginning of the Hundred Years War. We will focus particularly on power and politics, but primary readings will add important social, cultural and religious context. Our meetings will emphasize lectures and discussion equally. No prior knowledge is expected.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based upon a series of 500-word papers and weekly quizzes

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History majors

**Expected Class Size:** 35

**Distributions:** (D2)

**Attributes:** HIST Group C Electives - Europe and Russia; HIST Group P Electives - Premodern

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled “Foundations of China,” we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single “civilization.”

Class Format: lecture
Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors
Expected Class Size: 25
Distributions: (D2)
Distribution Notes: meets Division 1 requirement if registration is under CHIN; meets Division 2 requirement if registration is under ANTH, REL, HIST OR GBST
Attributes: HIST Group B Electives - Asia

Class Format: seminar
Requirements/Evaluation: active preparation and participation, short reading response papers (1-page), midterm, and final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10-12
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement if registration is under CLAS
Not offered current academic year

REL 220 (S) Spiritualities of Dissent
Crosslistings: REL220 / AFR219
Primary Crosslisting
This course seeks to understand how protest fuels the creation and sustenance of black religious movements and novel spiritual systems in the twentieth and twenty-first centuries. We will examine the dissentive qualities of selected African-descended activists, community workers, scholars,
spiritual/religious leaders and creative writers. By the end of this course, students will be able to thoughtfully respond to the questions, "What is spirituality?"; "What is dissent?"; and "Has blackness required resistive spiritual communities?"

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, weekly reading responses, a critical book review, and a final paper or project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Religion majors; Africana Studies concentrators
Expected Class Size: 15
Distributions: (D2)
Not offered current academic year

REL 221 (F) Technologies of Religion in the Early Christian World
Crosslistings: CLAS221 / REL221

Primary Crosslisting
What is the relationship between religion and technology? How do various technologies affect the production and distribution of religious knowledge? Facilitate communication and interaction with the divine? Transform the religious self? In this course, we will look specifically at the uses and effects of technology on religion in the early Christian world. While focused most directly on the influence of technology on the development of early Christianity, the course will also explore the place of technology in coterminous movements: in "pagan" sacrifice, Neoplatonic divination, and Stoic practices of the self. By examining technologies of text production, sacrifice, memory, and the self, the course will shed light on early Christianity and its competing religious and philosophical movements, as well as on the nature of technology's relationship to religion.

Class Format: seminar
Requirements/Evaluation: active preparation and participation, short reading response papers (1 page), and a final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none

REL 223 (F) Revolt and Revelation in 20th-Century Americas
Crosslistings: AMST228 / AFR228 / REL223 / LATS228

Secondary Crosslisting
Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked “Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?” Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of “God-talk” broadly termed “liberation theologies” that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Class Format: seminar
Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: majors and concentrators
Expected Class Size: 12

REL 224 (S) U.S. Latinx Religions
Crosslistings: REL224 / AMST224 / LATS224

Secondary Crosslisting
In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latinx communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices--such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería--by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, questions of how one studies Latinx religions.

Class Format: discussion
Requirements/Evaluation: based upon class participation, short writing exercises, a 5-page essay, and an 8-12-page final review essay
Prerequisites: none
Enrollment Limit: 25
Expected Class Size: 15

REL 225 (S) Culture and Morality
Crosslistings: ANTH224 / REL225

Secondary Crosslisting
Moral judgments differ across cultures, within cultures, and across time. How do we account for this variation, and what does it tell us about human nature and the nature of moral reasoning? This course examines practical and theoretical orientations for the descriptive study of morality. We will read about and analyze moral life in a range of cultural and historical settings, from Africa and Oceania to North America and the Upper Amazon. As an object of academic inquiry, morality has historically been resistant to classification under any one discipline, recognized at various times to be the exclusive province of philosophy, psychology, religion, and so on; so we will draw on works from across a range of fields in order to better understand morality and its relationship with other significant dimensions of human social life (political economy, religion, gender, etc.). Specific topics will include: the relationship between morality and freedom; the apparent intractability of moral disagreements; the role of intuition and emotion in moral reasoning; and the influence of power and hierarchy on moral judgment.

Class Format: seminar
Requirements/Evaluation: a midterm project and a final paper
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: ANSO students
Expected Class Size: 19

Not offered current academic year
Today, more than one in five people in the United States identify as "none" when asked about their religious affiliation. Yet that does not mean that religious sentiment or spirituality is on the decline. On the contrary, talk of "spirituality" is more pervasive than ever in popular discourse. Increasingly Americans claim that they are "spiritual but not religious" or that they prefer "individual religion" over "organized religion." This course seeks to understand and investigate this phenomenon. What is the lived experience of being "spiritual but not religious"? What counts as spirituality? Is there a meaningful distinction between spirituality and religion? What does this distinction assume about the nature of organized religion? What is the history that led us to this ideology of individualized spirituality? And what are the social and political implications of this trend? We will explore these questions and study this phenomenon through an engagement with ethnography (the qualitative research method generally described as "participant-observation"). Over the course of the semester, students will be expected to conduct an ethnographic research project within local communities in Williams College and Williamstown. Alongside our central readings on spirituality, we will also be studying some background in the theory and practice of this methodology. Throughout the semester, students will work together on developing the practical skills necessary to conduct an ethnographic project, and will be gradually executing their own individual projects. This will include: designing a feasible project and research question, selecting research sites and interlocutors, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: seminar

Requirements/Evaluation: regular reading responses; semester-long research project with frequent small assignments building up to the final product (15- to 20-page paper)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: none

Expected Class Size: 10-15

Distributions: (D2) (WI)

Not offered current academic year

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystalize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 12
Distributions: (D2) (WI)

REL 230 (F)  Who was Muhammad?
Crosslistings: ARAB230 / GBST230 / REL230
Primary Crosslisting
Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the "facts" of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad's life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Religion majors
Expected Class Size: 10
Distributions: (D2)

REL 233 (S)  Islam and the West: A Clash of Civilizations?
"This idea that all religions share the same values is bulls**t and we need to call it bulls**t," the popular political commentator and critic Bill Maher has said on multiple occasions. "If you are in this religion [Islam], you probably do have values that are at odds [with American values]. This is what liberals don't want to recognize." Maher has acquired a reputation for making strong statements like this about the need for Americans (and liberals in particular) to stand up for their secular liberal values, which are in conflict with and superior to the values of Islam. Maher's comments are only one recent manifestation of a long line of pundits making such claims. This is best exemplified by Samuel Huntington's "Clash of Civilizations" thesis, which famously predicted that there would inevitably be a violent clash between the Islamic and Western Civilizations. This course investigates such ideas about the inherent conflict between Islam and the West. How should we understand the nature of Islamic and Western civilizations and the relation between them? What is the history of this relationship? What has given rise to these standard representations of Islam and Muslims? What are the political stakes and consequences of these representations? How should we understand the phenomenon of "Islamophobia"? We will explore these questions through an in-depth and critical investigation into the history of Euro-American nationalism and colonialism, the concepts of "civilizations" and "religions", the history of modern Islam, and the nature of Orientalism and secularism.

Class Format: seminar
Requirements/Evaluation: regular reading responses, 5- to 6-page midterm essay, group social-media project (research-based, creating a video essay), final 7- to 8-page essay
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 20
Distributions: (D2)
REL 234 (F)  What is Islam?  (DPE)
Crosslistings: ARAB234 / GBST234 / REL234 / HIST208

Primary Crosslisting
This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, final exam
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors
Expected Class Size: 20
Distributions: (D2) (DPE)
Distribution Notes: meets Division 2 requirement if registration is under ARAB. DPE: This course looks role of power, in particular imperial and colonial power in the construction of religion. To that end, the course will explore how the rise of Muslim empires shaped the construction of pre-modern Islam and subsequently the role of European colonialism in shaping the emergence of modern Islam. This course will teach students critical tools in postcolonial theory about the relationship between power and the production of knowledge and the agency of the colonized.

REL 235 (S)  The Garden in the Ancient World
Crosslistings: ENVI232 / REL235 / CLAS235 / COMP235

Secondary Crosslisting
Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar
Requirements/Evaluation: class participation, short written assignments, and a final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Classics majors
Expected Class Size: 15
Distributions: (D2)
In the nearly 1500 years of Islamic history, the Qur’an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur’an is central to devotional life. This course will explore the Qur’an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur’an, in addition to pre-modern and modern Qur’anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur’an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur’anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur’an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur’an? How have these shifting notions affected the meaning made from Qur’anic verses and passages? What role do interpretive communities play in determining what the Qur’an says? Lastly, through an exploration of the art of Qur’an recitation, calligraphy, and Qur’an manuscripts, we will explore the ways in which the Qur’an is also an object of devotion in Muslim life.

Class Format: seminar

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion and Arabic Studies majors

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under REL or GBST; meets Division 1 requirement if registration is under ARAB or COMP

Not offered current academic year

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality,
culture, gender, language, and age.

### REL 238 (F) Faith and Rationality in Islam: Skepticism and the Quest for Certainty

Religious faith is generally perceived as being diametrically opposed to reason and rationality. Islam in particular is often assumed to be even more dogmatic in its demand for blind unquestioning faith. This course will explore the lively debates among Muslim theologians regarding the complex relationship between faith, rationality, and skepticism. Is faith compatible with reason and rationality? Can the foundations of Islamic belief be proven to be true? Are there limits to what can be known rationally? Are people justified in holding religious beliefs? Does faith require absolute certainty? What room is there for doubt and skepticism in Islam? We will explore these questions through an array of primary and secondary readings in Islamic theology, philosophy, and mysticism from the medieval period.

**Class Format:** seminar

**Requirements/Evaluation:** essays and exams

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 5-10

**Distributions:** (D2)

**Attributes:** PHIL Related Courses

### REL 239 (F) The Modern Middle East (DPE)

**Crosslistings:** JWST217 / ARAB207 / HIST207 / REL239 / GBST101 / LEAD207

**Secondary Crosslisting**

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

**Class Format:** lecture

**Requirements/Evaluation:** participation, two short papers, quizzes, midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

**Expected Class Size:** 30-40

**Distributions:** (D2) (DPE)

**Distribution Notes:** meets Division 2 requirement if registration is under ARAB DPE: This course introduces students to the incredible diversity of the Middle East and offers a critical assessment of difference, power, and equity in the Middle East. In particular it will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a
number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

---

**REL 240 (S) The Challenge of ISIS**

Crosslistings: HIST210 / REL240 / ANTH210 / ARAB210 / GBST210

Secondary Crosslisting

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

**Class Format:** lecture

**Requirements/Evaluation:** blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 40

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under ARAB

**Attributes:** GBST Middle Eastern Studies Electives; HIST Group E Electives - Middle East

---

**REL 241 (S) History of Sexuality** (WI)

Crosslistings: HIST292 / GBST241 / WGSS239 / REL241

Primary Crosslisting

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

**Class Format:** seminar

**Requirements/Evaluation:** reading responses, two essays, and final research paper
REL 242 (S) Women, Gender, and Sexuality in Islam
Crosslistings: WGSS242 / REL242 / ARAB242

Primary Crosslisting
The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women’s own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Class Format: seminar
Requirements/Evaluation: active class participation (including a presentation on the reading materials), short weekly reflections, and one final research paper (10-15 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion, Women’s, Gender and Sexuality Studies and Arabic majors
Expected Class Size: 10
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB

REL 243 (F) Islamic Law: Past and Present
Crosslistings: REL243 / WGSS243 / ARAB243 / HIST302

Primary Crosslisting
From fear of the Shari’a to its implementation in so called “Islamic countries,” Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari’a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Class Format: seminar
Requirements/Evaluation: weekly responses, four 2- to 3-page essays
Prerequisites: none
REL 244 (S)  Mind and Persons in Indian Thought
Crosslistings: ASST244 / REL244

Primary Crosslisting
In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.

Class Format: lecture/discussion
Requirements/Evaluation: full attendance and participation, three short essays (6 pages)
Prerequisites: prior exposure to Buddhism or philosophy, or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: selection based on the basis of relevant background

REL 246 (F)  India's Identities: Reproducing the Nation, Community and Individual  (WI)
Crosslistings: ASST246 / WGSS246 / ANTH246 / REL246

Primary Crosslisting
This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions -- Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2003, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and caste intersect to produce a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media.

Class Format: tutorial
Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

REL 247 (S) Race and Religion in the American West
Crosslistings: ENVI247 / LATS247 / REL247 / AMST247
Primary Crosslisting
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.
Class Format: seminar/discussion
Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

REL 249 (F) Anti-Semitism (DPE)
Crosslistings: JWST249 / REL249
Primary Crosslisting
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews,
Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Class Format: seminar

Requirements/Evaluation: three short papers (4-5 pages), one longer final paper (6-8 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

REL 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia

Crosslistings: REL250 / ASST250

Primary Crosslisting

In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons--stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of “secular saints” as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of “Virtue Ethics.” This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and Maclntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others.

Class Format: lecture/discussion

Requirements/Evaluation: active participation, short writing assignments, midterm, and a self-scheduled final exam

Prerequisites: none

REL 252 (S) Zen Buddhist Visual Culture: The Path to Nirvana  (WI)

Crosslistings: ARTH376 / REL252 / ASST376

Secondary Crosslisting

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: lecture/class discussion
 Requirements/Evaluation: class discussions and participation; oral presentations, short papers; and a research paper
Enrollment Limit: 10
Enrollment Preferences: sophomores, juniors and seniors

REL 253 (S) Spiritual Crossroads: Religious Life in Southeast Asia
Crosslistings: ANTH233 / ASST233 / REL253
Secondary Crosslisting
No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Class Format: seminar
Requirements/Evaluation: midterm, short essays, term paper
Prerequisites: none; open to non-majors
Enrollment Limit: 19

REL 254 (F) The Theory and Practice of Meditation in the Modern World
This course invites students to examine theoretically and experientially meditation. Throughout the course, we examine meditations belonging to various Buddhist traditions through our own practice. We study some of the manuals where these meditations are taught and connect these practices to some of the more important ideas of the tradition. In studying and practicing meditation, we follow a gradual approach, starting from the most basic practices to more advanced ones. We also connect the practices and ideas we consider with modern scientific approaches, examining practices such as mindfulness therapy and the practice of positive emotions from a psychological perspective. In the process, we re-contextualize Buddhist ideas by connecting them with modern approaches, particularly those inspired by biology, psychology and ecology. Throughout the course, students will keep a daily practice of meditation and record their experiences in a journal so as to be able to come to an informed understanding combining a theoretical grasp of the issues raised by meditation and their own personal appreciation.

Class Format: lecture; mixture of lecture, discussion, and practice of meditation
Requirements/Evaluation: full attendance and participation, regular practice of meditation, two middle-length essays, and a meditation journal
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Religion majors, students who have taken REL 288
Expected Class Size: 18
REL 255 (S) Buddhism: Ideas and Practices
Crosslistings: REL255 / ANTH255 / ASST255

Primary Crosslisting
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: lecture/discussion
Requirements/Evaluation: full attendance and active participation; two essays
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 25
Distributions: (D2)
Attributes: GBST South + Southeast Asia Studies Electives; PHIL Related Courses

REL 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE) (WI)
Crosslistings: ANTH256 / REL256 / WGSS256 / ASST256

Primary Crosslisting
This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha’s inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and ‘she devils’ alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha’s life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Class Format: seminar
Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)
Extra Info: may not be taken on a pass/fail basis
**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

**Expected Class Size:** 15

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality. WI: Class is WI because of its reading responses, in-class writing, a final research paper, and required writing chats with the instructor where we identify patterns, strengths, and weaknesses in student writing.

**REL 257 (S) Tibetan Buddhism: Embodying Wisdom and Compassion**

We begin by considering the basic ideas and practices of Tibetan Buddhist traditions and the ways in which the ideals of wisdom and compassion have shaped Tibetan culture. We then proceed to examine particular aspects of the tradition such as the role of the teacher or lama and their various manifestations, from the exotic figure of the tantric guru to that of the Dalai Lama, a charismatic world teacher engaged in both religious and political affairs. We also examine a wide range of lay and monastic practices, from the life of large monasteries and their unique culture to the practices of nuns and lay people. Throughout this course, we consider not just the variety of exoteric practice forms but also the esoteric tantric tradition that pervades Tibetan life. We examine the various meditative practices that revolve around this profound and often misunderstood tradition. In doing so, we do not consider tantra as just a set of strange practices sometimes revolving around sex and violence. Rather we examine how it manifests a philosophy of embodiment that has profound implications for thinking about who we are as human beings.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** full attendance and participation, two essays

**Prerequisites:** none

**Enrollment Limit:** 25

**Distributions:** (D2)

**REL 258 (S) The Rhetoric(s) of Black Religious Traditions**

Crosslistings: REL258 / AFR258

**Secondary Crosslisting**

This course will introduce students to the rich religious expressions of Black Americans through their rhetorical traditions. We will begin with a survey of rhetorical productions like sermons, music, and other forms of public address in the historical literatures on Black religions. Our review will yield some of the primary themes of Black religious experiences--the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like commodification alter rhetorical practices.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation in this course will be based upon class participation, response papers, one 8-page paper, and a formal group presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** none

**Expected Class Size:** 15

REL 259 (F)  Ethics of Jewish American Fiction  (WI)
Crosslistings: JWST259 / ENGL259 / REL259

Primary Crosslisting
After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Class Format: seminar
Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion majors, Jewish Studies concentrators, and English majors
Expected Class Size: 18
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under REL or JWST; meets Division 1 requirement is registration is under ENGL
Attributes: JWST Core Electives;

REL 261 (S)  Rastafari: Dread, Politics, Agency
Crosslistings: REL261 / PSCI233 / AFR299

Secondary Crosslisting
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15- page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators and majors in Political Science and Religion
Expected Class Size: 12
Distributions: (D2)
Attributes: AFR Core Electives;  AMST Arts in Context Electives;  AMST Comp Studies in Race, Ethnicity, Diaspora;  AMST Critical and Cultural Theory Electives;

Not offered current academic year
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

TUT Section: T1 TBAThursday Org Mtg 8:30 pm - 9:00 pm James A. Manigault-Bryant

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Class Format: seminar

Requirements/Evaluation: students will be evaluated on their class participation, response papers, quizzes, and a final class group project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 20

Distributions: (D2)

REL 264 (F) Bodies, Genders, and Sexualities in the Early Christian World (DPE)

Crosslistings: REL264 / WGSS264
What does it mean to be a woman or a man? To have body? A gender? A sexuality? In this course we will explore the ways in which bodies, genders, and sexualities were experienced and described in Mediterranean antiquity. Ancient experiences of and ideas about bodies, genders, and sexualities were often very different than those of the contemporary world. Nevertheless, because Greek and Roman antiquity and Christian beginnings often function as the imagined origins of "Western" (or European and American) "civilization," these ancient ideas about bodies, genders, and sexuality, maintain an out-sized presence in current debates about the "normal" body, gender practices, and the contour of sexuality. With a focus on early Christianity, the course seeks, on the one hand, to introduce students to the early history of Christianity through an inspection of its pluriform discourses on the meaning and regulation of bodies, genders, and sexuality, even as it keeps an eye toward the modern legacy of these ideas. On the other hand, the course gives students the opportunity to be introduced to key questions and theories in Women's, Gender, and Sexuality Studies through the study of early Christianity and its environs.

Class Format: seminar

Requirements/Evaluation: weekly response papers, 5- to 6-page paper, 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors, student seniority by class

Expected Class Size: 19

Distributions: (D2) (DPE)

Distribution Notes: DPE: The course's focus on the production and use of difference in terms of bodies, genders, and sexualities, and how those putative differences were used to authorize the social distribution of power, qualify this course as meeting the DPE distribution requirement.

Religion 266 (S) Being American, Being Muslim: American Muslim Literature in the 21st Century (DPE)

Crosslistings: REL266 / ENGL268 / COMP228

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves. We will address questions such as: How have American Muslims understood their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? What are the competing claims and contestations about authentic expressions of Islam? How are Muslims approaching the tensions between communal belonging and individuality? We will be engaging such questions primarily through an analysis of popular memoirs, autobiographies, novels, and short stories, but will also explore some plays, films, poetry, and comedy.

Class Format: seminar

Requirements/Evaluation: regular reading responses, two short essays (3-4 pages), final presentation, and final paper (7-8 pages)

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS or ENGL.

DPE: This course will explore the many complex intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences internal to Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations of power and difference in the texts that we will read, and how to analyze their workings in nuanced multidimensional ways.
REL 267 (F)  The Art of Friendship

Crosslistings: CLAS212 / COMP267 / REL267

Secondary Crosslisting

The idea of friendship has captivated poets, philosophers, and their audiences for over three millennia. The subtle dynamics of this fundamental relationship between humans have been a source of inspiration, consolation, and consternation for countless writers and readers. What are the different types of friendship? How does one make a friend, and what makes a good friend? How does a friend differ from an acquaintance, an ally, an accomplice, an enemy? Can the beloved also be a friend? Ancient Greek and Latin writers took up these and other questions about friendship in philosophical dialogues and treatises, epic and lyric poems, tragic and comic plays, oratory, and correspondence. This course will explore ancient theories and representations of friendship through readings from many of the most important texts and authors of antiquity, including Gilgamesh, the Hebrew Bible, Homer, Sappho, Euripides, Plato, Aristotle, Cicero, Virgil, Seneca, and the Epistles of Paul. We will also consider the wide-ranging responses to these meditations and depictions in later traditions from the Middle Ages to modernity, in such writers as Heloise and Abelard, Aelred of Rievaulx, Aquinas, Montaigne, Ralph Waldo Emerson, Emily Dickinson, Elizabeth Bishop, Jack Kerouac, and Susan Sontag. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and a final paper/project

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 25

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under REL

REL 269 (S)  Mindsight: Mindfulness and Medicine  (DPE) (WI)

Crosslistings: REL269 / ASST269 / ANTH269

Secondary Crosslisting

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the `kindness curriculum¿ in schools, and other areas of applied research on mindfulness that have generated a `science of personal transformation¿. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Class Format: tutorial

Requirements/Evaluation: weekly papers, 4- to 8-pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10
**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: This class fulfills the DPE requirement because it will explore the ways that stress related to poverty, social inequality, and structural violence can and have been alleviated by mindfulness-based practices. Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. WI: This course is a tutorial and there will be weekly writing assignments.

**Attributes:** GBST South + Southeast Asia Studies Electives; PHLH Social Determinants of Health;

Spring 2019

**REL 270 (S)  Jewish and Christian Identity in the Ancient World**

Crosslistings: JWST270 / REL270

**Primary Crosslisting**

The modern engagement with the many ways that we construct identity has been matched by a similar wave of studies about identity construction in the ancient world. In this course, we will discuss the rise of “Judaism” and “Jewish identity” in the ancient period (looking at roughly 400 BCE-200 CE), and compare it with the movement of the followers of Jesus as a negotiation of a new identity within Judaism (roughly 30 CE-200 CE). We will conclude with the question of the “Parting of the Ways” of these two groups.

**Class Format:** seminar

**Requirements/Evaluation:** three short papers (4-5 pages), one final paper (10-15 pages), close reading of materials, engagement with class discussion

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators

**Expected Class Size:** 15

**Distributions:** (D2)

**REL 271 (F)  Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture**

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

**Primary Crosslisting**

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviances from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

**Class Format:** seminar
REL 272 (S) Art of the Noble Path: Buddhist Material Culture Across Asia
Crosslistings: ARTH272 / REL272 / ASST272

Secondary Crosslisting
Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Class Format: lecture
Requirements/Evaluation: 3 fifteen-minute quizzes, 1 three to five-page paper, 1 eight to ten-page paper, a midterm, and a final exam
Extra Info: meets Division 1 requirement if registration is under ARTH or ASST; meets Division 2 requirement if registration is under REL
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: none
Expected Class Size: 25
Distributions: (D2)

REL 273 (F) Heroes, Saints and Celebrity (WI)
Crosslistings: ANTH222 / REL273

Secondary Crosslisting
This course examines the ways in which cultures select, ritually celebrate, institutionally harness, and ultimately devour people designated as 'extraordinary'. We will begin by considering cultural archetypes and theories of the hero and how heroism has been understood in different eras and cultural contexts. Using Weber’s theory of charisma as a foundation, we will look at a number of specific case studies to evaluate the relationship between individual creativity and action and the demands of social conformity and control. Finally, we will examine how charisma is commoditized in the form of the celebrity in contemporary American culture.

Class Format: seminar
Requirements/Evaluation: class participation, two short response papers, research paper, final exam
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
REL 274 (F)  The Body in Power
Crosslistings: ANTH299 / REL274

Secondary Crosslisting

The thesis of this course is that ritual plays a crucial role not only in legitimizing and mobilizing political power, but also in determining whether people decide to act in defense of or dissent against the status quo. In the first part of the semester, we focus on the ways in which different cultures construct categories of inclusion and exclusion, safe and dangerous, while also creating rituals for ensuring the preservation of the dominant social order against all that is transgressive and undermining to those in power. Of particular importance to our discussion will be consideration of how the body is ritually mobilized as an instrument of persuasion and control. On this foundation, we move to an examination of how political rituals are used to undermine established orthodoxies, mobilize popular dissent, and bring down those on top. Among the topics to be discussed are the role of martyrdom and beheadings in the rise of the Islamic State, the use of symbols and ritual interventions in framing both sides of the abortion debate, and the expanding importance of social media in protests movements around the world. The final unit of the course will consider a current controversy (e.g., police violence against African-American men) in light of the concepts discussed during the semester.

Class Format: seminar

Requirements/Evaluation: class participation, three short response papers, and one 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Distributions: (D2)

REL 275 (S)  Paul the Apostle: Then and Now

The Apostle Paul is the most important thinker in the history of Christianity. He wrote much of the New Testament and was the first to formulate and articulate the basic message of Christianity. In this course, we'll first explore Paul's thought in its original context, probing what his message would have meant for the inhabitants of the Roman Empire. Special attention will be paid to Paul's contribution to ancient debates about Judaism, conversion, and ethnic difference. In addition to examining the first contexts and meanings of his writings, we'll be especially interested in the legacy of Paul's thought on modern political thought in Europe and America in the 20th and 21st centuries. In this portion of the course, we'll see how Paul's influence has shaped current theories of citizenship and sovereignty, with or without the knowledge or consent of modern thinkers and societies. The course thus explores the original significance of Paul's thought as well as his hidden influence upon the political structures of secular modernity.

Distributions: (D2)

Spring 2019
REL 278 (S) Buddhist Material Culture: Objects of Practice and Merit (DPE)
Crosslistings: REL278 / ASST278

Primary Crosslisting

What is material culture? What is considered Buddhist material culture? If Buddhism is a tradition that encourages non-attachment, then what is meant by "Buddhist material culture"? Shouldn't Buddhists be "free" from material things? Is it necessary for a Buddhist to be free from material things or rather that material things should be free from Buddhists? This course will introduce students to a material culture approach to the study of religion, which acknowledges the agency of not only humans but also the agency of objects/things/stuff, and it emphasizes relationships and networks between people and things. The course will begin with basic foundational theories that make up the burgeoning field of "material culture" within Religious Studies. We focus on various relationships: "internal" (our body and senses in relation to things) and "external" (things themselves, and their connections to other things). We will learn about these relationships by looking closely at Buddhist "stuff" and investigating what such relationships can tell us about Buddhism. Things act upon us, and we (re)act upon them. They shape identity, create meaning, and maintain relationships. We will learn that things are never just things. They help us better understand what people do in Buddhism, not just what people believe. In a nutshell, this course is about the "social life of [Buddhist] things". For students without a background in Buddhism, this course will introduce them to Buddhism as lived in China, Korea, Japan, Tibet, and particularly Southeast Asia.

Class Format: seminar
Requirements/Evaluation: Attendance and active participation: 15%; Short Writing Assignments, 8 total (1 page): 25%; Midterm Exam (in-class): 25%; Group Presentation of Object: 35%

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion and Asian Studies majors
Expected Class Size: 10
Distributions: (D2) (DPE)

Distribution Notes: DPE: The material world of contemporary Buddhism is often condemned for "adulterating" "real" Buddhism because it does not fit stereotypical buzzwords like tranquil, austere, non-commercial. Yet, materiality is essential to Asian Buddhist practitioners, who are the 90%. Students will hone skills to seek the unseen by tracing networks of a New Materialism approach, which can reveal relationships that demonstrate power struggle and inequality, even within a "loving-kindness" tradition like Buddhism.

REL 280 (S) The Seeds of Divinity: Exploring Precolumbian Art & Civilization in a Museum Exhibit
Crosslistings: REL280 / ANTH281 / ARTH281

Secondary Crosslisting

For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Precolumbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be be presented in a museum exhibit.

Class Format: seminar
Requirements/Evaluation: active class participation; three short papers; 15-page research paper and presentation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: ANTH, SOC and ARTH majors
Expected Class Size: 12
Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under ANTH or REL; meets Division 1 requirement if registration is under ARTH
REL 281 (F)  Religion and Science  
Crosslistings: REL281 / SCST281  

Primary Crosslisting  
In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

REL 282 (S)  Religion and Capitalism  (WI)  
Crosslistings: REL282 / SOC283 / PSCI140  

Secondary Crosslisting  
Up through the 1960s it was popular to claim that the world was becoming increasingly and inevitably secular, with the development of modern capitalist social relations as a signature cause. Today the 'secularization thesis' is largely defunct. Instead one sees the vibrant return of religion to social, economic, and political prominence in most parts of the world--at the very same time we are experiencing through globalization and the information revolution the most dramatic economic advances in a century. This course investigates the historical and contemporary relationship between culture and economics, religion and capitalism, in their most encompassing forms. In investigating this theme, our cornerstone will be Max Weber's famous argument from The Protestant Ethic and the Spirit of Capitalism. Along the way we will discuss both the origins of capitalist society as well as its more recent transformations through the rise of the welfare state, consumerism, and globalization. We will also discuss changes in religion under the influence of capitalism including romanticism, Pentecostalism, moralistic therapeutic Deism, and the 'God gap' between largely theist Africa, South and West Asia, and the Americas on the one hand and largely atheist Europe and East Asia on the other. The focus of the course is on Christianity in Western countries both historically and in the present, but we will spend time discussing religion (particularly Pentecostalism) and capitalism in the contemporary Global South as well.

Class Format: seminar  
Requirements/Evaluation: regular discussion questions, three 5- to 6-page papers, in-class paper workshops, 20- to 24-page final term paper incorporating earlier papers  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Limit: 16  
Enrollment Preferences: open to first-years and sophomores only
REL 286 (F)  Moral Life in the Modern World
Crosslistings: REL286 / SOC252

Secondary Crosslisting
This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical moralities of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out; that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; "thick" and "thin" moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and moral panics; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality "in," "through," and "of" literature, as students will select, read, and critique a work of fiction.
Class Format: lecture
Requirements/Evaluation: weekly discussion précis, film screenings, two book review essays, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Sociology and Anthropology students
Expected Class Size: 19
Distributions: (D2)
Not offered current academic year

REL 288 (S)  Embodiment and Consciousness: A Cross-Cultural Exploration
Crosslistings: PHIL288 / REL288

Primary Crosslisting
This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.
Class Format: seminar
Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)
Extra Info: not available for the fifth course option

REL 289 (F) The Talmud on What it Means to be Human

Crosslistings: JWST289 / REL289

Primary Crosslisting

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans’ relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

Class Format: tutorial

Requirements/Evaluation: weekly papers, final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

REL 291 (S) Religion and the American Environmental Imagination (WI)

Crosslistings: ENVI291 / REL291 / SOC291

Secondary Crosslisting

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of eco-spirituality and popular nature religion. Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12
REL 293 (S) Religion, Play, and Fantasy

Religion is sometimes described as separate from everyday life, a source of transcendence, offering practices that allow you to lose yourself and be absorbed into another level of consciousness, or a realm of supernatural forces. These could also be descriptions of “play.” In this course we will explore the play element in culture and how it relates to what we usually describe as “religious.” We will investigate video games, fantasy novels and films, Live Action Role-Playing, war reenactment, pop culture fandom, BDSM, festivals like Mardi Gras, and places that are “set apart” for play like Las Vegas. How do the ways that we play involve religious ideas like sin, redemption, supernatural forces of good and evil, canonization, countercultural community, tradition, submission, and purgation? Is play at the core of what we usually deem religious? What, for instance, is the play element in ritual, myth, and the devotional interpretation of texts? How important is play? Should we accept the conventional assumption that religion is more important than play? Is playing, perhaps, what we most want to do? Is playing what we would do if all of our practical needs were already met and we didn't have to do anything at all? In addition to exploring particular kinds of play, we will read theorists of play from a variety of disciplines, including: Johan Huizinga, Roger Caillois, Brian Sutton-Smith, Victor Turner, Donald Winnicott, Bernard Suits, Sam Gill, Robert Bellah, and Wendy Doniger. In a final paper, each student will have an opportunity to investigate in depth and interpret a particular form or instance of play that they choose.

Class Format: lecture

Requirements/Evaluation: three short papers (3-5 pages) and one final research paper or project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 30

REL 296 (F) The History of the Holocaust

Crosslistings: HIST338 / REL296 / JWST338

Secondary Crosslisting

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians’ efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians’ debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion

Requirements/Evaluation: evaluation will be based on class participation, a map quiz, four papers (4 pages) based on class readings, and a final research paper (6-8 pages)

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History majors and Jewish Studies concentrators

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives; HIST Group C Electives - Europe and Russia; JWST Core Electives

Not offered current academic year
Crosslistings: ANTH297 / COMP289 / REL297

Primary Crosslisting

This is a course about magic. It is not about stage magic, sleight of hand, or the art of pulling rabbits out of hats. You will learn no card tricks. But instead we will learn about those people who believed in the reality of certain powers; from the ability to summon good or evil spirits, transform base metals into gold, predict the future, or manipulate matter by thought alone. The problem of how to theorize magic has long been a cause of concern for the natural and social sciences. Many a sociologist and anthropologist has imagined that belief in magic should have vanished with modernity (despite much evidence to the contrary). Meanwhile, philosophers of science have been long fascinated with the demarcation problem—figuring out grounds by which to distinguish legitimate sciences (like astronomy) from their magical or pseudoscientific cousins (like astrology). We will trace these discussions and problematize them by looking at the beliefs of self-defined witches and magicians. This should put us in a position to interrogate the construction of concepts of magic, science, and religion and show how the boundaries between these categories emerged historically. Topics to be discussed will include: the rationality of magic, the fine lines separating magic, science and religion, the persecution of witches, and the role notions of magic and superstition played in European modernization and colonization projects. The tutorial sessions will be customized to student interests, but texts will likely include selections from primary works in translation, such as Cornelius Agrippa’s *Occult Philosophy*, Giordano Bruno's *On Magic*, Aleister Crowley’s *Magick Liber Abar*, as well as selections from secondary literature, perhaps including Marcel Mauss, *A General Theory of Magic*, Max Weber, “Science as Vocation,” Tanya Luhrmann, *Persuasions of the Witches’ Craft*, Thomas Kuhn, *The Structure of Scientific Revolutions*, Larry Laudan, “The Demise of the Demarcation Problem,” E.E. Evans-Pritchard, *Witchcraft and Oracles, and Magic among the Azande*, and/or Kelly Hayes, *Holy Harlots: Femininity, Sexuality and Black Magic in Brazil*.

REL 301 (F) Social Construction (DPE)

Crosslistings: WGSS302 / REL301 / COMP315 / SOC301 / SCST301

Primary Crosslisting

"Social construction" can often seem like the great collegial insight. By now, you’ve all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Class Format: seminar

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15
Enrollment Preferences: Religion majors, then majors from cross-listed departments

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under REL, SOC, WGSS or SCST; meets Division 1 requirement if registration is under COMP. DPE: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

REL 303 (F) A History of Islam in Africa

Crosslistings: HIST303 / REL303 / ARAB303 / GBST303 / AFR303

Secondary Crosslisting

This course examines the history of Islam in Africa from the seventh century to the present. We will start off by looking at the spread of Islam in different parts of Africa. We will then analyze the social, political, economic, and cultural impact of Islam on African societies, the interaction between Islam and indigenous African institutions, the Islamic revolutions in the nineteenth century, the impact of European colonial rule on Muslim societies, and the development of Islam in the post-independence period. We will also examine how African Muslims reconstructed and asserted their religious identities by localizing Islamic intellectual traditions, healing practices, music, arts, cultural norms, and formal and informal religious festivals. By the end of the semester students should be able to appreciate Islam's common framework as well as its diversity and dynamics within that larger framework and over time.

Class Format: seminar

Requirements/Evaluation: two 7-page papers and one 12- to 15-page paper

REL 305 (S) The Black Atlantic as Scriptural Formation

Crosslistings: REL305 / AFR355

Primary Crosslisting

"...I don't read such small stuff as letters, I read men and nations..." The unpacking of this provocative and unsettling statement ascribed to Sojourner Truth can be taken as a springboard for this seminar that explores the politics of the scriptural (or writing) as analytical window onto the complex formation of the circum-Black Atlantic (and its complex relationships to colonial and post-colonial Atlantic worlds). The isolation of selected Black Atlantic "readings" as cultural sites, rituals, performances, institutions, as different and conflicting types of politics and social orientation--from first contacts through slavery to the contemporary irruptions of protest and fundamentalist movements--will structure the seminar.

Class Format: seminar-style discussion

Requirements/Evaluation: consistent participation (informed by engagement of selected readings); and submission of mid-term prospectus (1-2pp) and end-of-term research paper (15-20pp)

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: religion; African American (and other American ethnic groups); cultural studies; history; literature; social sciences

Expected Class Size: 15

Distributions: (D2)

Not offered current academic year

REL 309 (S) Scriptures and Race

Crosslistings: AFR309 / LATS309 / REL309

Primary Crosslisting

This course focuses on the relationships between constructions of race in the post-1492 American world and “Christian scriptures.” The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage “scriptures”? In what ways have “scriptures” informed how people imagine themselves, their communities, and their relationship to religious and racial “others”? How did “scriptures” and “race” inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Class Format: tutorial

Requirements/Evaluation: evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2)

Attributes: LATS Core Electives

REL 310 (F) Womanist/Black Feminist Thought

Crosslistings: AMST309 / AFR310 / WGSS310 / REL310

Secondary Crosslisting

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors

Expected Class Size: 20

Distributions: (D2)

Attributes: AFR Core Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; AMST Critical and Cultural Theory Electives; WGSS Racial Sexual + Cultural Diversity Courses; WGSS Theory Courses
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor’s memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Class Format: seminar
Requirements/Evaluation: participation, response papers/short essays, one final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, open to first-year students with instructor permission
Enrollment Limit: 25
Enrollment Preferences: History majors and potential History majors
Expected Class Size: 20
Distributions: (D2)
Attributes: HIST Group B Electives - Asia; HIST Group G Electives - Global History; HIST Group P Electives - Premodern
REL 314 (S) Racial and Religious Mixture (WI)
Crosslistings: AMST327 / AFR427 / REL314 / LATS427
Secondary Crosslisting

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: seminar
Requirements/Evaluation: evaluation based on participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a 20- to 25-page research paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework

REL 318 (F) California: Myths, Peoples, Places (WI)
Crosslistings: ENVI318 / LATS318 / REL318 / AMST318 / COMP328
Secondary Crosslisting

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Class Format: seminar
Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none

REL 319 (S) Milton
Crosslistings: ENGL315 / REL319

Secondary Crosslisting
John Milton is an odd case. Paradise Lost is more central to the English literary tradition than any other single work in the canon; to be a poet at all, you had to contend with that scarily formidable thing. And yet, Milton is also an outlier in the mainstream—a political radical whose conceptions of categories such as gender, liberty, what it means to have a voice at all placed him athwart received conceptions of what literature should be. Taken together, such contradictions suggest the possibility of something alien and perhaps seismic at the very core of our literary tradition. We'll focus on Paradise Lost, though gathering around that poem a few other of Milton's works ("Lycidas," "Areopagitica"). But we also bring to bear a range of recent critical and theoretical writing both to illuminate the poem and to discern how the poet remains a durable and telltale symptom of the discipline of literary studies today.

Class Format: seminar

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, several shorter writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: seniors, English majors

Expected Class Size: 15

REL 321 (F) Happy Holidays! A Comparative History of Commemorations and Festivals  (WI)
Crosslistings: ARAB411 / HIST411 / REL321

Secondary Crosslisting
What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Class Format: seminar

Requirements/Evaluation: several short response papers and a 20- to 25-page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniors, especially History and Arabic Studies majors

REL 326 (S) Queer Temporalities  (WI)
Crosslistings: REL326 / WGSS326 / COMP326 / LATS426

Primary Crosslisting

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance, analytical essays, responses, and revised essays

Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week's reading. The other student will respond orally with a 2-page response to their partner's paper.

Extra Info 2: Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester. may not be taken pass/fail or fifth course

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors and concentrators in Religion, Latina/o Studies, Comparative Literature, and Women's, Gender, and Sexuality Studies or students who have previous coursework in those programs

REL 328 (S) Witchcraft
Crosslistings: HIST328 / REL328

Secondary Crosslisting

A wide variety of human cultures have accepted the existence of the supernatural, the reality of magic, and the possibility of magical transgression. Among the most common supernatural crimes is witchcraft, which societies can invoke to explain natural disasters and disease, and to blame these occurrences on specific individuals, often social outcasts. Witchcraft became a particular focus of fear and fascination in Early Modern Europe, when inquisitors, theologians and many ordinary people came to believe that Western Christendom was threatened by a vast, covert conspiracy of witches in league with the devil. Countless "witches"--most of them women--were accordingly tried, tortured and sometimes even executed. Our course will examine these bizarre events and consider what religious, cultural and intellectual factors might help explain them. We will begin by investigating the medieval legal and theological developments that enabled and encouraged the persecution of witches, and go on to study some of the most important and sensational witch trials of the later medieval and early modern periods. Throughout, we will encounter many strange and intriguing documents produced by the inquisitors who persecuted witches, the scholars who imagined their activities, and the laws that defined their crimes. No prior experience with European history is required for this seminar, which will emphasize thoughtful writing and discussion.

REL 330 (S) Modern Jewish Political Theory (WI)
Crosslistings: JWST492 / PSCI375 / REL330

Primary Crosslisting

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Class Format: seminar

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth;

Extra Info: a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

Expected Class Size: 18

Distributions: (D2) (WI)

REL 331 (F) Reformations: Faith, Politics, and the World
Crosslistings: HIST330 / REL331

Secondary Crosslisting

The Protestant Reformation was long understood as the first salvo of modernity. By opposing the faith of the individual believer to the authority of the established Church, Martin Luther and his followers, it has been argued, laid the foundations not just of the Reformed Churches but of the modern self and of the modern state. While considering these classic interpretations, this seminar will also examine more recent investigations of the plural Reformations: not just Protestant but also Catholic, and not solely mainstream but radical as well. Moreover, in this same period, Christianity expanded well beyond Europe, becoming a global religion. We will ask: in these sweeping transformations of what it meant to be a Christian, who was included and excluded? And how did Reformations of the faith intersect with such a dramatic expansion of the faithful? Historical developments to be considered include theology, popular culture, women and mysticism, the Wars of Religion, overseas missions, the Council of Trent, and the settlement of Westphalia. Authors to be read include Luther, John Calvin, Teresa of Ávila, Michel de Montaigne, Ignatius of Loyola, and others.

Class Format: seminar
**REL 332 (F) Islam and Feminism**

Crosslistings: ARAB332 / WGS334 / REL332

Primary Crosslisting

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Class Format: seminar

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors

Not offered current academic year

**REL 334 (S) Imagining Joseph** (WI)

Crosslistings: REL334 / COMP334 / ANTH334 / JWST334

Secondary Crosslisting

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur’an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Class Format: seminar
REL 338 (F) Transhumanism: Religion, Technoscience, Obsolescence
Crosslistings: SOC338 / REL338 / HSCI338 / SCST338
Secondary Crosslisting
This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Class Format: seminar
Requirements/Evaluation: attendance and participation, informal weekly writing, 15- to 20-page seminar paper
Extra Info: not available for the fifth course option

REL 340 (S) African Diaspora Religions in the Americas and the Caribbean
Crosslistings: AFR340 / GBST340 / REL340
Secondary Crosslisting
Over the last century, historians, social scientists, and religionists have labored to discover the meaning of African dispersal beyond the African continent and its accompanying spiritual lineages. What did it mean to move from the African continent (as opposed to the Australian continent, for example)? What theories of encounter sufficiently adjudicate the synthetic religious cultures of African descended persons in North America, South America, and the Caribbean? What are the cross-disciplinary methodologies that scholars utilize to understand African religious cultures in the
Western hemisphere? Firstly, this course will consider a brief historiography of Africana Religious Studies. This background will inform the second and primary objective of the course: privileging knowledge, place, and performance as central lenses for thematizing and exploring West and Central African religious traditions housed in the Americas. We will cover diverse African diasporic religious traditions including Conjure, Dagara, Kumina, New Orleans Voodoo, Spiritual Baptist, Winti, and Yoruba (Candomblé, Ifa, Lucumi, and "Orisha-Vodu"). We will also explore other African diasporic religious sensibilities that transgress regional and institutional boundaries.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, discussion leadership, two scholarly journal entries, and a final seminar paper of 18-20 pages (which will require working in stages on a proposal, an 8-page draft, and a 15-page draft)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Africana Studies concentrators
Expected Class Size: 15
Distributions: (D2)
Not offered current academic year

REL 346 (S) Islam and Anthropology
Crosslistings: REL346 / ANTH346 / ASST346 / ARAB280
Secondary Crosslisting
If anthropology has helped to define Islam in global thought, Islam has returned the favor, holding a critical mirror to the anthropological endeavor perhaps more than any other traditional "object" of study. This course examines anthropological studies of Islamic societies for what they teach us both about Islam and about anthropology. We begin with foundational social theorists whose studies of religious phenomena helped give rise to the field of anthropology of religion. We then survey influential efforts to construct "ideal-type" models of Muslim society based on anthropological and historical knowledge, alongside efforts to critique, historicize, and redirect the model-building project (notably by Talal Asad and Edward Said). The second half of the course is devoted to ethnographies that explore, from a variety of perspectives and in several regions (Morocco, India, Egypt, Syria), questions of human agency, hierarchy and resistance, and Islam as discursive resource, ethical project, and embodied community.
Class Format: seminar
Requirements/Evaluation: weekly postings, one 5-page paper, one 10-page paper, discussion leading
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: juniors and seniors, Anthropology, Sociology or Religion majors
Expected Class Size: 19
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under ARAB
Not offered current academic year

REL 348 (S) Religion and Reason
In his most famous and provocative book, The End of Faith, the "New Atheist" author Sam Harris very forcefully brings our attention to the dangerous clash between faith and reason, lamenting humanity's willingness to suspend reason in favor of religious beliefs. This represents a pervasive trend of thought in the modern world that sees religion as being diametrically opposed to reason and rationality. This course is an in-depth investigation of this notion through the lenses of philosophy, theology, anthropology, and history, asking questions such as: What is reason, and what counts as a rational belief? Are there other grounds that might make one justified in holding a belief? What is the nature of religious belief or faith? Is religious belief uniquely irrational? What gave rise to this discourse on religion? We will be reading primary and secondary materials representing a variety academic disciplines, intellectual traditions, and geographic contexts.
Class Format: seminar
Requirements/Evaluation: regular reading responses, 6- to 8-page midterm essay, final 10- to 12-page essay
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: none
Expected Class Size: 10
Distributions: (D2)

REL 350 (S) Max Weber & Critical Theory or Rationalization & Its Discontents
Crosslistings: SOC350 / REL350 / COMP349
Primary Crosslisting
We live in an age characterized by unprecedented technological and scientific progress--we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom--and yet modern life often appears fundamentally meaningless and lacking in ultimate value--we work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber's key innovation was to trace the grand trajectory of Western "rationalization"--the historical attempt to produce a world in which "one can, in principle, master all things by calculation." Further, he demonstrated how this rationalization produced not just mastery over nature, but also "the disenchantment of the world" - value fragmentation, hyper-specialization, bureaucracy, and ultimately the "iron cage" of modernity. The first part of this course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.
Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference will be given to REL, ANSO and COMP majors
Expected Class Size: 15

REL 352 (S) Mystic Spirituality in Black Women's Social Justice Activism: Brazil-USA
Crosslistings: REL352 / AFR352 / WGSS352
Secondary Crosslisting
This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions--such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred--as resources for creativity, community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.
Class Format: seminar
Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages) and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
REL 354 (S) Friedrich Nietzsche: Philosophizing with a Hammer

Crosslistings: REL354 / COMP351

Primary Crosslisting

In one of his last major writings, *Twilight of the Idols* (*Götzten-Dämmerung*, 1889), Friedrich Nietzsche described his project as an attempt to sound out various established philosophical truths or intellectual "idols," saying, "they will be touched here with a hammer as with a tuning fork, these are the oldest, most convinced, puffed-up, and fat-headed idols you will ever find...And also the most hollow." To be sure, Nietzsche directed his often combative prose against everything from traditional religion to philosophy itself. Nietzsche is one of the most frequently cited and most frequently misunderstood philosophers of our current era. By reading Nietzsche’s writings in context, this course will attempt to liberate Nietzsche from his later reputation. We will think with and sometimes against Nietzsche, focusing on his notions of religion, mythology, power, morality, and enlightenment, and we will pay special attention to his reflections on the limits of reason/knowledge. Along the way, students will get a new sense of Nietzsche’s most famous theoretical formulations including "the death of God," the Übermensch, and the split between Dionysian/Apollonian modes of thought.

Class Format: seminar

Requirements/Evaluation: class participation, weekly responses, 10- to 12-page final paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: In-depth seminar on a difficult philosopher who we’ll be reading closely.

Expected Class Size: 15

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under COMP

Attributes: PHIL Related Courses

Not offered current academic year

REL 358 (S) Religion and Law

Crosslistings: REL358 / GBST358

Primary Crosslisting

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Class Format: seminar

Requirements/Evaluation: reading response, two essays, final research paper

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Expected Class Size: 10
REL 361 (F) Zen and the Art of American Literature

Crosslistings: ENGL312 / REL361 / AMST361 / COMP361

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by a young writer named Henry David Thoreau. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend 20-30 minutes each week practicing and reflecting upon those practices during class hours. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: seminar

Requirements/Evaluation: a weekly meditation journal, various informal in-class and take-home writing assignments, a final 12- to 15-page essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under REL or AMST

Attributes: ENGL Literary Histories C; EXPE Experiential Education Courses

REL 388 (S) Gandhi: Nationalism, Philosophy, and Legacy (WI)

Crosslistings: HIST488 / ASST488 / GBST488 / REL388

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his
obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi’s engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs
Requirements/Evaluation: 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: upper level History majors
Expected Class Size: 10

REL 401 (F) Issues in the Study of Religion
To be conducted as a working seminar or colloquium. Major issues in the study of religious thought and behavior will be taken up in a cross-cultural context enabling the student to consolidate and expand perspectives gained in the course of the major sequence. Topics will vary from year to year. In keeping with the seminar framework, opportunity will be afforded the student to pursue independent reading and research.
Class Format: seminar
Requirements/Evaluation: class reports, papers, and substantial research projects
Prerequisites: senior Religion major or permission of instructor
Enrollment Limit: 15
Expected Class Size: 15
Distributions: (D2)
REL 422 (S)  Art, Architecture, and Poetry: Islamic Devotional Culture in South Asia
Crosslistings: ARTH422 / COMP422 / REL422

Secondary Crosslisting
How have scholars interpreted and classified terms such as "Islamic art" and "Muslim culture," and how have these classifications affected the interpretation of the arts in South Asia? There are different points of view regarding what constitutes as "Islamic" art and culture. Is an imperial wine cup with "God is Great" inscribed on it an "Islamic" object? How is an erotic epic narrating the romance of a Hindu prince understood as embodying the principles of Muslim devotion? This interdisciplinary seminar, focusing on South Asian Muslim devotional culture as articulated through the material culture, the arts of the book, architecture, and poetry, will navigate these questions from two perspectives. The first is to understand how Muslim devotional cultural expression in South Asia circumscribes and interprets itself. The second viewpoint is that of scholarship and the various interpretive voices that have framed the field over the last century.

Class Format: seminar
Requirements/Evaluation: class participation, 2-page response papers on class readings, leading class discussion, final 15-20-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: preference will be given to Art Majors, and then to students of any major interested in art and culture of Islam

ROMANCE LANGUAGES (Div I)
FRENCH
Chair: Professor Jennifer French

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

- AFR 360 Political Thought Frantz Fanon
- ARTH 254 Manet to Matisse
- HIST 390 Haitian and French Revolutions
- RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and
if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 13 (W) Creative Portraiture in the Darkroom
Crosslistings: ARTS13 / RLFR13

Primary Crosslisting

In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer; they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

Class Format: mornings

Requirements/Evaluation: 2- to 3-page paper; formal public exhibit

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Materials/Lab Fee: $120

Attributes: EXPE Experiential Education Courses

HON Section: 01 TBA Jennifer L. French

RLFR 99 (W) Independent Study: French
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
RLFR 101 (F) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Class Format:** the class meets five hours a week

**Requirements/Evaluation:** evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Extra Info:** students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

**Extra Info 2:** not available for the fifth course option

**Prerequisites:** none; for students who have never formally studied French; students who have previously studied French must take the French Placement Test during First Days

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)

---

RLFR 102 (S) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Class Format:** the class meets five hours a week

**Requirements/Evaluation:** evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Extra Info:** students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

**Prerequisites:** none; for students who have taken less than two years of high school French

**Enrollment Limit:** 20

**Enrollment Preferences:** first- and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)
RLFR 103 (F)  Intermediate Studies in French Language and Francophone Cultures
As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world. Conducted in French.
Class Format: lecture; the class meets five days per week
Requirements/Evaluation: active class participation, workbook and grammar exercises, short compositions, chapter tests, midterms, and final exam
Prerequisites: RLFR 101-102, or by placement test
Enrollment Limit: 20
Enrollment Preferences: all are welcome, but if overenrolled, preference is given to first-year and second-year students and those with compelling justification for admission
Expected Class Size: 20
Department Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year
Distributions: (D1)

Fall 2018
LEC Section: 01  M-F 9:00 am - 9:50 am  Theresa Brock

RLFR 104 (S)  Intermediate French II:  Advanced Intermediate Studies in French
As a continuation of French 103, this course "Images vivantes dans les arts et la littérature" is primarily conceived to enable students to express themselves with fluency and to easily comprehend the spoken and written language. The course is based on the concept that one can read images in any art form (portraits, landscapes, etc...) and pair them with passages taken from French fiction or poetry, comparing them, exploring their meaning, developing a wide range of vocabulary. Students will read creatively and in depth, express their ideas orally and in writing, and listen to interviews of artists and writers. Conducted in French.
Class Format: class meets two hours a week plus a third conference hour with French teaching associates
Requirements/Evaluation: class participation, short papers, oral class presentations, quizzes and exams
Extra Info: not available for the fifth course option
Prerequisites: RLFR 103; this course is primarily for continuing RLFR 103 students; students who have placed at the advanced intermediate level on the placement exam should register for RLFR 105
Enrollment Limit: 20
Enrollment Preferences: continuing 103 students and potential French majors
Expected Class Size: 20
Department Notes: after successfully completing RLFR 104, students may register for RLFR 201
Distributions: (D1)

Spring 2019
SEM Section: 01  TR 11:20 am - 12:35 pm  Nicole S. Desrosiers

RLFR 105 (F)  Advanced French: Advanced Studies in French Language and Francophone Culture
In this course, we will concentrate on expanding your vocabulary and polishing your written and oral skills while focusing on the analysis of French and
Francophone cultures and the concepts that define them. In particular, we will explore three themes: *aimer*, *avoir peur*, and *le passé colonial* de la France as they relate to national identity in France, North Africa, and the French Caribbean. We will read short literary, theoretical and historical texts, and explore the production of popular culture and how it informs contemporary France. At the same time, we will review and practice advanced grammar concepts. *Conducted in French.*

**Class Format**: lecture/conference

**Requirements/Evaluation**: class participation, short papers, presentations and quizzes, final project

**Extra Info**: may not be taken on a pass/fail basis

**Prerequisites**: RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit**: 20

**Expected Class Size**: 15

**Distributions**: (D1)

---

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction**

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1830 to 2010, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. *Conducted in French.*

**Class Format**: seminar

**Requirements/Evaluation**: active class participation, grammar exercises, two short papers, midterm, and final paper

**Extra Info**: not available for the fifth course option

**Prerequisites**: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit**: 20

**Enrollment Preferences**: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**Expected Class Size**: 20

**Distributions**: (D1)

---

**RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1804-2016)**

**Crosslistings**: RLFR202 / WGSS201

**Primary Crosslisting**

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying “Let us dishonor war!” From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second
World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. Conducted in French.

Class Format: seminar
Requirements/Evaluation: active class participation, midterm exam, and two to three papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106 or 107; or by French placement exam; or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS

Not offered current academic year

RLFR 203 (F) Introduction to Francophone Literatures
Crosslistings: AFR204 / COMP282 / RLFR203
Primary Crosslisting

What is the Francophone world comprised of? Who speaks French today and why? What does the idea of Francophonie really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the littérature-monde manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of Francophonie so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (l'hexagone), and Haiti among others.

Class Format: seminar
Requirements/Evaluation: presentation, journaling, final project, participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLFR 105 and above, placement exam or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate, Africana and Comp. Lit
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Attributes: GBST African Studies Electives; GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

RLFR 204 (F) Intro to French Literature: French Drama from Classicism to the Theatre of the Absurd

What can we learn about French society through its theater? This course proposes to examine the evolution of French plays from the 17th to the 20th century within their political, social and cultural contexts. Readings plays by Molière, Beaumarchais, Musset, Anouilh, Becket and Ionesco will allow students to see how the theater as a genre engages the public through self-reflection and analysis. Readings will be complemented by theoretical texts and film versions of the plays. Questions regarding the nature of the play itself (dramatic structure), the role of space and the role of language, the importance of acting and the public's involvement will be examined and will evolve, into a mini staging of our own.

Class Format: seminar
Requirements/Evaluation: one short response paper weekly; 2 short essays and one final paper
RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE) (WI)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Class Format: seminar

Requirements/Evaluation: three response papers, one short essay on film adaption, one video essay with a student partner

Extra Info: not available for the fifth course option

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity, race, class, gender) between cultural producers, in literary texts and their film adaptations. WI: This course is WI because students write three response, 4-page papers and one 7-page script for the narration in their video essay.

RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age

The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of patrimoine, visual culture, and (trans)national identity. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10
RLFR 220 (S) Fairy Tales: Love and Politics at the Sun King’s Court

This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period—which critics have sometimes called the “Grand Siècle”—develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

 Expected Class Size: 15

Distributions:  (D1)

RLFR 224 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France (DPE)

Crosslistings: WGSS224 / RLFR224

Primary Crosslisting

In 1857, both Flaubert’s Madame Bovary and Baudelaire’s Les Fleurs du mal were put on trial for sexual indecency and “crimes against public morality.” In 1868, Le Figaro attacked Zola’s novel Thérèse Raquin as “putrid literature” for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d’Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Extra Info: not available for the fifth course option

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if overenrolled, preference will be given to French majors and certificate students, Women’s, Gender and Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 18
Department Notes: if the course is overenrolled, students will submit a form online

Distributions:  (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS. DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)
Crosslistings: RLFR225 / COMP224

Secondary Crosslisting

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Class Format: seminar
Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online
Expected Class Size: 18
Distributions:  (D1) (DPE)

Distribution Notes: DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

RLFR 226 (S) Black France/France Noire
Crosslistings: RLFR226 / AFR226

Primary Crosslisting
On the eve of the new millennium, the year 1998 saw the emergence in France of “Black studies à la française” (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority “made itself more visible” (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of “negritude women” (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

RLFR 228 (S) Introduction to French and Francophone Film
Crosslistings: COMP298 / RLFR228
Primary Crosslisting
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Païcy, Peck, and Sissako. Conducted in French.

Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Extra Info: not available for the fifth course option
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

RLFR 229 (S) Coffee, Sugar, Wigs, and Desks: Writing and Material Life in Early Modern France (WI)
Crosslistings: RLFR229 / COMP299
Primary Crosslisting
This tutorial considers the relationship between slavery, colonial commerce, and the burgeoning market in material and cultural goods. We look at France's "consumer revolution" through the lens of four material objects--sugar, coffee, wigs, and desks--to consider how eighteenth-century concepts
of race, gender, and social status related to taste, sociability, appearance, and writerly identity. Readings by Voltaire, Aulnoy, Genlis, Bernardin de Saint-Pierre, and others will be paired with critical texts from literary and material historians as well as objects found in local collections.

Class Format: tutorial

Requirements/Evaluation: five papers and five responses

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLFR 105, a 200-level course, or instructor permission

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

RLFR 250 (S) Women in Print: Gender, Power, and Publishing in Seventeenth- and Eighteenth-Century France

What did it mean to publish—or not—“as a woman” in seventeenth- and eighteenth-century France? Why did writers adopt or reject a feminine pen name at a time of women's legal, economic, and social subordination? Readings from Scudéry, La Fayette, Guilleragues, Graffigny, Gouges, and Duras will be informed by contemporary theoretical and historical work on gender, authorship, and women's participation in political, religious, and public life. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, two short presentations, two short papers, final paper

Prerequisites: RLFR 201, 202, or 203, or by placement test, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French, Comparative Literature, Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 20

Distributions: (D1)

Not offered current academic year

RLFR 260 (F) Reading Comics from the French-Speaking World
Crosslistings: COMP260 / RLFR260

Primary Crosslisting

From political cartoons and satire of the 19th century to contemporary graphic novels, the bande dessinée has a long history in the French-speaking world. We will read classics such as Astérix and Tintin, and contemporary BD from France, Québec, Côte d'Ivoire, Morocco, Rwanda, and Guadeloupe to analyze how they tackle subjects such as nation, empire, sexuality, biography, war and human rights. We will pay attention to the visual form and critical theory of the genre. Conducted in French.

Class Format: seminar

Requirements/Evaluation: weekly response papers, two short papers, presentation and final research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Distributions: (D1)

Not offered current academic year

RLFR 261 (F) Haitian and French Caribbean Literatures and Films

Crosslistings: COMP283 / AFR261 / RLFR261

Primary Crosslisting

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR

Attributes: FMST Core Courses

Not offered current academic year

RLFR 300 (F) Albert Camus and the Philosophy of Living (DPE)

Why is Albert Camus so well known? Why has this XXth century humanist, writer and philosopher, touched so many lives? From exile to kinship, from despair to resistance and rebellion, Camus invites us to reflect on the human condition with lucidity and the knowledge that happiness and serenity can cohabit with incomprehension and injustice. We are like Sisyphus, as he rolls the rock back up the hill over and over again, he has time to think of his condition, realizing that in spite of the struggle and because of it, he can find meaning and happiness in life. What remains to define is what is "happiness"? We will examine in depth Camus' major works of fiction: the novels (L'Etranger, La Peste) and short stories (in L'Exil et le royaume, L'Envers et l'endroit), his philosophical essay (Le Mythe de Sisyphe) one political work (Lettres à un ami allemand) and his last posthumous novel (Le Premier Homme). Students must be prepared to actively discuss these works and their themes as we interpret them. Conducted in French.

Class Format: seminar
Requirements/Evaluation: oral presentations, two papers (5 pages each), one final paper (8-10 pages)
Extra Info: may not be taken on a pass/fail basis
Prerequisites: any RLFR 200 level at Williams or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: French majors or certificate candidates
Expected Class Size: 15
Materials/Lab Fee: packet
Distributions: (D1) (DPE)
Distribution Notes: DPE: In this course we will focus on the themes of exile, religion, social injustice and inequalities through the works of Camus. Many discussions will center on the responsibility individual has to refute injustice, rebel against it, and find a balance in a humanistic approach

Fall 2018
SEM Section: 01   Cancelled

RLFR 305 (F) Where We Are & Where We Go: Spaces & Places of Contemporary France
How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from “here” or “there”? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. Conducted in French.
Class Format: seminar
Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)
Extra Info: not available for the fifth course option
Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad (Francophone countries) particularly welcome
Expected Class Size: 20
Distributions: (D1)

RLFR 309 (F) Contemporary Short Stories from North Africa
Crosslistings: RLFR309 / AFR307
Primary Crosslisting
Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zalzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.
Class Format: seminar/discussion
**Requirements/Evaluation:** active class participation, weekly response papers, two short papers, an oral presentation and a final paper

**Prerequisites:** RLFR 201, 202 or 203 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and those with compelling justification for admission

**Expected Class Size:** 20

**Distributions:** (D1)

**Distribution Notes:** meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR

**Attributes:** GBST African Studies Electives

*Not offered current academic year*

**RLFR 310 (S) Le Moyen Âge en images: Decoding the Middle Ages**

This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to bandes dessinées that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? *Conducted in French*

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, reading journal (with written reflections), quizzes, mid-semester project: une bande dessinée, and final paper

**Prerequisites:** successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**Expected Class Size:** 12

**Distributions:** (D1)

**Spring 2019**

**RLFR 316 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)**

Crosslistings: WGSS315 / RLFR316

**Primary Crosslisting**

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been feted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*
RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity

Crosslistings: COMP318 / RLFR318

Primary Crosslisting

In his futurist novel *Paris in the Twentieth Century* (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Loret, Ducastel, Martineau, Téchiné, Charef. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: a 200-level course; or by placement test; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission; seniors returning from study abroad (in France or other Francophone countries) are particularly welcome

Expected Class Size: 20

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS

Attributes: GBST Urbanizing World Electives

Not offered current academic year

RLFR 326 (S) Molière in Performance

Like Shakespeare, the work of France's greatest playwright is less a timeless monument than a living body perpetually in motion. This course offers a dual approach to the theater of Molière. The first half of the semester will focus on readings and analysis of printed plays in the context of the seventeenth century. The second half of the semester focuses on a collective project that combines student research and performance of a single play. Possible works: *Les Femmes savantes, L'Ecole des femmes, Le Misanthrope, L'Avare, Le Bourgeois gentilhomme*. Throughout the semester, we will explore the dynamic relationships between tradition and innovation, elite and popular culture, actors and audience, past and present. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, one presentation, two short papers, final performance project and accompanying final paper

Prerequisites: RLFR 201, 202, or 203, or by placement test, or by permission of instructor
Enrollment Limit: 20

Enrollment Preferences: French, Comparative Literature, Theater, and Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 20

Distributions: (D1)

Not offered current academic year

**RLFR 410 (S) Senior Seminar: Landscapes of Movement and Migration in French**

How do migration and movement construct and disrupt landscapes of identity--home, city and nation--in the French-speaking world? How do migration and movement contribute to conditions of alienation, nostalgia and violence? This seminar explores such fundamental questions and asks us to think about how in an increasingly mobile and de-territorialized world, place is imagined, experienced and remembered. Over the course of the semester, we will examine theoretical texts on memory, space, identity and movement, and analyze literary and film narratives of migration that focus on: the immigration experience in France, the construction of an Atlantic identity between Africa, the Caribbean, Europe and the Americas, internal migration between the country and the city, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable places of memory. Works by Nora, Benjamin, Deleuze, Barthes, Charef, Chamoiseau, Glissant, Diome, Condé, Mernissi, Poulain, Pineau, Sembene, and Binebine among others. Conducted in French.

Class Format: seminar

Requirements/Evaluation: weekly 1-page response papers, short mid-term paper and a final research paper

Extra Info: qualified students in first, second, or third years of their career at Williams can enroll in the Senior Seminar with the permission of the instructor; however, this will not replace the senior seminar requirement in the senior year of French majors

Prerequisites: any RLFR course above 203, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: seniors French majors or completing the certificate in French, but open to advanced students of French

Expected Class Size: 10

Distributions: (D1)

Not offered current academic year

**RLFR 412 (S) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers**

Crosslistings: RLFR412 / WGSS408

Primary Crosslisting

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present.

Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission
RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film (DPE) (WI)

Crosslistings: RLFR414 / COMP414

Primary Crosslisting

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

Class Format: seminar

Requirements/Evaluation: three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay

Extra Info: not available for the fifth course option

Prerequisites: 200 RLFR level courses

Enrollment Limit: 19

Enrollment Preferences: French and Comparative Literature majors and certificate students

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. WI: This course is writing-intensive because it includes 9 pages of response papers; 1 page with a thesis statement, methodology, and works cited list; plus 10 pages of script for video essay

Spring 2019

SEM Section: 01  MR 1:10 pm - 2:25 pm  Sophie F. Saint-Just

RLFR 415 (S) Senior Seminar: Banned In France: Literature and Censorship in the Eighteenth-Century

This seminar will explore the role of censorship in eighteenth-century France, another complex period transformed in part by unprecedented access to knowledge. Students will critically assess a range of works that were, before or after publication, repressed or altered by various religious and civil authorities, editors, publishers, and, in some cases, audiences. Discussions will focus on the formal and thematic content of each work, as well as its broader place in Enlightenment and French Revolutionary literature and culture. Analysis of such historically-specific concepts as tolerance, obscenity, and public censorship will be supported by critical work and commentary from the eighteenth century and the present day. As a central feature of the course, students will conduct a semester-long research project that will draw on readings which may include Voltaire, Diderot, Rousseau, Sade, Beaumarchais, Chénier, Gouges, Charrière, Staël, and others. Key issues include copyright and the literary market, self-censorship, public opinion and public censure, gender and canon formation, blasphemy, pornography, and the politics of incitement. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, weekly online postings, semester-long research project involving an abstract and annotated bibliography at mid-term, and final research paper

Prerequisites: any 200-level RLFR course

Enrollment Limit: 15

Enrollment Preferences: senior French majors or students completing the Certificate in French, but open to advanced students of French

Expected Class Size: 15

Distributions: (D1)
Not offered current academic year

RLFR 511 (F)  Intensive French Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.
Class Format: classes meet twice weekly and are conducted in English
Requirements/Evaluation: evaluation will be based on class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French
Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

Distributions: (D1)

Fall 2018
LEC Section: 01    TR 8:30 am - 9:45 am     Marc Gotlieb

RLFR 512 (S)  Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read (excerpts from museum catalogues; the Gazette des Beaux-Arts and other publications; Salons by Diderot, Baudelaire, and Thoré; artists on their works; and critics such as Francastel, Ch. Sterling, M. Faré, Valéry, Focillon) will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.

Class Format: seminar

Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination

Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

Distributions: (D1)

ROMANCE LANGUAGES (Div I)
ITALIAN
Chair: Professor Jennifer French

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

RLIT 99 (W) Independent Study: Italian
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D1)

Winter 2019
IND Section: 01    TBA    Jennifer L. French

RLIT 101 (F) Elementary Italian
This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester you will be given training in grammar, pronunciation, aural-oral skills, reading and writing in Italian through the study of a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, to describe your family, your town, your friends and to discuss about your interests. You will also be able to talk in Italian about present and past events and to converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, to watch clips from mainstream Italian films, and to write short compositions. Conducted entirely in Italian.

Class Format: five hours a week with the professor
Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams
Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; not open to those who have had one year or more of high school Italian
Enrollment Limit: 20
Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams
Distributions: (D1)
RLIT 102 (S)  Elementary Italian
This course is designed for beginners who have already some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester you will continue to learn grammar, vocabulary, pronunciation, while improving your aural-oral skills, reading and writing in Italian. To achieve these goals, you will be presented with a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, your life, to describe your town and its history, your dreams and interests, and to express your opinion on complex topics. You will also be able to talk in Italian about present, past, and future events and to express doubts and hopes. You will be able to understand more complex conversations and clips from mainstream Italian films, and to write longer compositions. Conducted entirely in Italian.

Class Format: five hours a week with the professor
Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams
Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLIT 101; not open to those who have had one year or more of high school Italian
Enrollment Limit: 20
Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams
Distributions: (D1)

Spring 2019
LEC Section: 01  M-F 10:00 am - 10:50 am  Michele Monserrati

RLIT 105 (F)  Pathway to Proficiency
The course taught in Italian aims primarily at fine-tuning the student's speaking, reading and writing ability, while providing an introduction to the formal study of Italian culture and society through the analysis of short literary texts, articles, films, and plays. Students will review and expand the grammar structures learned in the previous semesters with the goal of achieving a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll.

Class Format: seminar
Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation
Prerequisites: RLIT 101/102 or by permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 15
Distributions: (D1)

Fall 2018

THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student’s final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as
Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department’s placement exam when it is offered during First Days. The only students who don’t need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar’s Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should feel free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

This hardly ever happens but could happen if a student doesn't seek out pre-approval from a faculty member.

RLSP 16 (W)  The Ayn Rand Cult

Crosslistings: COMP16 / ANSO16 / RLSP16

Primary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

Prerequisites: some previous acquaintance with Rand's novels

Enrollment Limit: 30

Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)

Materials/Lab Fee: approximately $90 for books

Distributions: (D1)

Winter 2019

LEC Section: 01    TBA     Gene H. Bell-Villada

**RLSP 102 (S) Elementary Spanish**

This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

**Class Format:** the class meets five hours a week; students will complete workbook and lab exercises weekly

**Requirements/Evaluation:** evaluation will be based on daily preparation and participation, regular homework assignments, and frequent tests

**Extra Info:** students registered for RLSP 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLSP 101 and 102) are taken

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school

**Enrollment Limit:** 20

**Distributions:** (D1)

---

**RLSP 103 (F) Intensive Intermediate Spanish**
This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. Conducted in Spanish.

Class Format: class meets four hours a week

Requirements/Evaluation: regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLSP 101-102 or by Spanish placement exam

Enrollment Limit: 20

Expected Class Size: 20

Distributions: (D1)

RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with relevant cultural, literary, and political materials centered for the most part on Spain. Students will produce regular grammar and composition exercises as well as oral reports.

Class Format: seminar; students are required to participate in the TA sessions once a week in addition to two class sessions
**Requirements/Evaluation:** regular grammar and composition assignments, a mid-term, a final exam, occasional quizzes, oral reports; active participation and regular attendance required

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** RLSP 104, or results of the Williams College Placement Test, or permission of instructor

**Enrollment Limit:** 22

**Enrollment Preferences:** first-year students, potential majors

**Expected Class Size:** 22

**Distributions:** (D1)

---

**RLSP 107 (F) Advanced Grammar and Conversation**

This course focuses on the development of Spanish linguistic accuracy and oral communication skills. Emphasis is on increasing oral fluency through exposure to media, interaction with native speakers, and participation in a variety of communicative activities. In addition, students will perform regular exercises to improve writing and syntax skills. Throughout the course, they will read journalistic and literary texts in order to stimulate oral and written response and to analyze complex grammatical structures within authentic target language contexts.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on homework, class participation, quizzes, a midterm and final exam and a series of communicative projects

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** RLSP 104, placement exam results, permission of instructor or Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors and certificate students, current and potential

**Expected Class Size:** 19

**Department Notes:** if you have taken RLSP 105 you can not take RLSP 107

**Distributions:** (D1)

---

**RLSP 200 (S) Advanced Grammar and Composition through Literature (WI)**

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 105, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** a weekly essay based on the stories read in class, written lab exercises, participation in the grammatical and literary discussions, quizzes, a mid-term and a final

**Prerequisites:** RLSP 105, any course 201+, placement exam or permission of instructor

**Enrollment Limit:** 19

**Expected Class Size:** 10-19

**Distributions:** (D1) (WI)
RLSP 201 (F) The Spanish Labyrinth
Do Spaniards really dance flamenco and have dinner at 10:00 pm? Does everyone in Barcelona speak Catalan? How can you learn to separate the stereotypical images of Spain from reality? How can we talk about one “Spain”, when the country a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship and repression. Some topics of focus will be the Inquisition, the Civil War, and contemporary Spain's obsession with its own recent past. Secondary texts will also be provided for historical and socio-political background and reference. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Spanish majors and certificate candidates
Expected Class Size: 18
Distributions: (D1)

Fall 2018

RLSP 202 (S) Spain’s Fin de Siglo and the Crisis of Ideas
In this class we will read the works of some of modern Spain's influential writers from the late part of the nineteenth century and the first three decades of the twentieth. Our aim is to understand how fiction and philosophy represented this significant time in Spain's history. The loss of the war with the U.S. in 1898, the turbulent shifts of power within the country, Spanish regional identities, and the cultural and intellectual movements that shaped Spain on the eve of the Civil War are among the key issues we will address. Our primary sources--largely fiction and poetry by artists such as Miguel de Unamuno, Azorín, Antonio Machado, Pío Baroja--will be complemented with a rigorous study of the cultural landscape of Spain at that time. Our principal engagement with philosophy will be through José Ortega y Gasset, in particular his output from the 1920s.

Class Format: seminar
Requirements/Evaluation: 2 short papers, one long research paper, and oral presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 25
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

RLSP 203 (F) From Modernismo to El Boom de la Novela (WI)
A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Class Format: seminar
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 19
Distributions: (D1) (WI)
Attributes: GBST Latin American Studies Electives;
Not offered current academic year

RLSP 205 (F) The Latin-American Novel in Translation (DPE)
Crosslistings: COMP205 / RLSP205

Primary Crosslisting
A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English
Class Format: lecture
Requirements/Evaluation: class participation, two brief papers, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 22
Enrollment Preferences: Spanish majors, Latina/o Studies concentrators
Expected Class Size: 22
Department Notes: does not carry credit for the Spanish major or the certificate
Distributions: (D1) (DPE)
Attributes: GBST Latin American Studies Electives

RLSP 206 (S) Latin-American Civilizations
An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.
Class Format: seminar
Requirements/Evaluation: two essays on assigned topics, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 20
Expected Class Size: 20
Distributions: (D1)
Not offered current academic year

RLSP 208 (S) The Spanish Civil War in Literature and Film
The Spanish Civil War (1936-1939) has generated a vast bibliography and filmography that to this day reflect widely antagonistic interpretations of the conflict itself, its roots, and its impact. From the Spanish perspective, the war is the most important single event in understanding modern Spain. The ideals, passions, and consequences of the Spanish Civil War still divide Spaniards and have been recreated and relived by writers, artists, and filmmakers, and debated by historians. The course will begin with a historical introduction to the origins, development, and outcome of the war. Was the Spanish war a national struggle or an international struggle played out on Spanish soil? Along with studying internal Spanish political divisions, we will also consider the impact of the foreign policy positions of other countries-including Germany, Italy, the United States, and Russia—vis-a-vis Spain,
as well as the role of the thousands of foreign volunteers who formed the International Brigades and came from all over the world to fight against Franco. With this historical basis, we will see how the themes and issues of the war are reflected in Spanish poetry, short fiction, novels, and films from the time of the war up through the present day. Readings will include works by Ayala, Cernuda, Neruda, Goytisolo, Sender, Fernan-Gomez, and Matute. Films will include documentaries as well as classic and contemporary features. Conducted in Spanish.

Class Format: seminar

Requirements/Evaluation: evaluations will be based on lively class participation, an oral report, short written assignments, and two papers

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

RLSP 209 (F) Spanish for Heritage Speakers

This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students' existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on homework, class participation, and a series of communicative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: potential Spanish majors/certificate students and LATS concentrators

Expected Class Size: 19

Distributions: (D1)

This course fulfills the pre-1800 requirement for the Spanish major

RLSP 211 (F) A Survey of Spanish Literature from the 11th to the 17th Centuries

This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misguided idea of dividing this literature into the categories of 'medieval' and 'Renaissance'. Conducted in Spanish. This course fulfills the pre-1800 requirement for the Spanish major

Requirements/Evaluation: evaluation will be based on class participation, short paper assignments, and a final paper

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Distributions: (D1)

Not offered current academic year

RLSP 214 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Crosslistings: ENVI218 / RLSP214

Primary Crosslisting

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider
short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Class Format: seminar
Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts
Extra Info: may not be taken on a pass/fail basis
Prerequisites: RLSP 105, placement exam results, or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Spanish and Environmental Studies majors
Expected Class Size: 12
Distributions: (D1) (DPE)
Distribution Notes: DPE: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Spring 2019
SEM Section: 01 MWF 12:00 pm - 12:50 pm Jennifer L. French

RLSP 220 (S) Women on the Verge
Crosslistings: RLSP220 / WGSS222

Primary Crosslisting
From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

Class Format: seminar
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Spanish and Comparative Literature majors
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLSP; meets Division 2 requirement if registration is under WGSS

Not offered current academic year

RLSP 225 (F) Subalternity, Dictatorship, and the Dream of Emancipation: Paraguay, 1811-Present (WI)

Paraguay is at once the most "typical" of Latin American countries and the most enigmatic. With a predominantly Guaraní-speaking population, enormous disparities of wealth and poverty, and a political tradition that favors authoritarian dictatorship, Paraguay is also celebrated, in certain circles, as the only Latin American nation that actually achieved economic and political independence when the other republics were fast becoming economic dependencies of Britain and the US in the 19th century. This course explores the subjects of subalternity, dictatorship, and the "dream of emancipation" in Paraguay's cultural production of the 19th, 20th, and 21st centuries. We will examine together the writings of the brilliant novelist Augusto Roa Bastos, especially Son of Man and I the Supreme; stories and poems by Teresa Lamas, Josefina Pla, and others; Paraguay's rich and vibrant tradition of visual art; and works of classic and contemporary film. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: three essays of 5-7 pages, shorter writing assignments, discussion-leading, active and engaged class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Spanish majors
Expected Class Size: 10
Distributions: (D1) (WI)

Not offered current academic year

RLSP 228 (S) Velázquez, Goya, and Picasso

Crosslistings: RLSP228 / ARTH228

Primary Crosslisting

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Class Format: tutorial
Requirements/Evaluation: 3- to 5-page weekly assignment
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: WI: The tutorial format offers students an intensive opportunity to improve their writing by demanding regular writing assignments that the student has to read out loud to their partner and professor. Students write biweekly papers throughout the semester. These papers are then analyzed during the tutorial session by the other student's response

Spring 2019
TUT Section: T1 TBA Soledad Fox

RLSP 230 (F) Mexican Literature and Film

This course will offer a survey of the rich and varied cultural production of Mexico, from the colonial period to the present. Students will explore a variety of literary genres (novels and shorter works of prose fiction, poetry and essays) as well as film, journalism and other kinds of cultural production within a framework of historical contextualization and formal analysis. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: essays, oral presentations, active and engaged class participation
Prerequisites: Spanish 105, placement exam results, permission of instructor or Department Chair
Enrollment Limit: 19
Enrollment Preferences: Spanish majors and certificate students, current and potential; LATS concentrators

Distributions: (D1)

Fall 2018

SEM Section: 01    TF 2:35 pm - 3:50 pm     Roxana A. Blancas Curiel

RLSP 301 (S) Cervantes’ “Don Quijote”  (WI)

We will devote the entire semester to the study of one novel: Miguel de Cervantes’ Don Quijote, published in the early part of the 17th century. We will try to understand the reasons for the novel’s immense and ongoing influence on Western literature and thought. To do so, we will study Cervantes’ masterful handling of issues that continue to have an uncanny relevance to our lives today: relationships between men and women, the perception of Muslims by Christians and vice versa, the role of fiction in life, the shapes of mental illness, how we decide who we are, how our governments and families and friends decide who we are, the fun and annoyance of going on a totally disorganized road trip with someone else, the meaning of justice, and the meaning of storytelling, to name a few things. In the process, we will continually set things in context and make sure that we understand what was going on in Cervantes’ world that might better explain what goes on in his novel. Finally, we will find that even an entire semester is not enough to engage fully with this extraordinary work, but we will be very glad that we made some headway. Conducted in Spanish

Class Format: lecture/discussion

Requirements/Evaluation: active class participation; two to three short projects and one final research project

Prerequisites: any 200-level RLSP course at Williams that is conducted in Spanish, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors and Comp Lit majors with the appropriate command of Spanish

Expected Class Size: 15

Distributions: (D1) (WI)

Not offered current academic year

RLSP 303 (S) Cervantes’ “Don Quixote” in English Translation

Crosslistings: COMP350 / RLSP303 / ENGL303

Secondary Crosslisting

A close study of one of the most influential and early European novels. Don Quixote by Miguel de Cervantes (1547-1616 C.E) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the Quixote: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co-existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine modern English-language translation, and set it in several relevant contexts to better understand its original intellectual horizon--seventeenth-century Spain--as well as the reasons for its continuing relevance.

Class Format: seminar

Requirements/Evaluation: active participation, at least two short papers, and a final project designed in consultation with the instructor

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 200-level literature course in foreign languages, COMP, or ENGL, or permission of the instructor.

Enrollment Limit: 30

Enrollment Preferences: Spanish and Comparative Literature majors and upper-class students

Expected Class Size: 30

Department Notes: can count toward the major in Spanish, but consult Dept for details

Distributions: (D1)

Attributes: ENGL Literary Histories A

Spring 2019
RLSP 306 (S) Latino Writing: Literature by U.S. Hispanics  (WI)

Crosslistings: RLSP306 / COMP302

Primary Crosslisting

Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarreal, Tomas Rivera, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Díaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.

Class Format: tutorial

Requirements/Evaluation: five short oral presentations/papers (about 20-25 minutes) and a final longer one (about 40-45 minutes)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200-level RLSP course or seek permission of the tutor

Enrollment Limit: 10

Distributions: (D1) (WI)

Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; LATS Countries of Origin + Transnationalism Elect;

Not offered current academic year

RLSP 308 (S) The Subject of Empire: Race, Gender and Power in the Colonial Era

This class studies Latin American literature of the colonial era (1492-1898) from the perspective of the constitution of the subject: the autobiographical 'yo' that is both the subject of discourse and the object of sovereign power. Our readings will include the most outstanding texts of the group collectively known as the Chronicles of the Conquest--the letters of Christopher Columbus and Hernán Cortés and Bernal Díaz del Castillo's True History of the Conquest of New Spain, among others--whose authors endeavor to establish their historical authority and legitimate their actions before the Spanish king. We will also read later works in which racially and sexually marginalized subjects struggle to contest the identities and the conditions imposed on them by a distant sovereign through far-reaching institutional networks: the mestizo historian known as El Inca Garcilaso de la Vega, the cross-dressed soldier Catalina de Erauso, the poet Sor Juana Inés de la Cruz, and the slave Juan Francisco Manzano.

Class Format: seminar

Requirements/Evaluation: one short (7-page) paper, one longer (15-20 page) paper, proposal, bibliography, discussion-leading

Prerequisites: one RLSP course at the 200-level or above or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 12

Distributions: (D1)

Attributes: GBST Latin American Studies Electives

Not offered current academic year

RLSP 319 (S) Dictatorship and the Latin-American Novel  (DPE)

Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martinez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive
and profound.

Class Format: seminar

Requirements/Evaluation: three 8-page papers, an oral report, a final 3-page paper, and class participation

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Spanish majors, Latina/o Studies concentrators

Expected Class Size: 5-10

Distributions: (D1) (DPE)

Distribution Notes: DPE: This course focuses on the ultimate sort of power—namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence—Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

Spring 2019

SEM Section: 01    MR 2:35 pm - 3:50 pm     Gene H. Bell-Villada

RLSP 322 (S) Islam in Spain

Crosslistings: ARAB322 / RLSP322

Primary Crosslisting

The presence of Islam—in all its diverse manifestations—is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods, and study several works—primarily of literature, though we will supplement with other texts—in which Muslims and Islam have been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives that include Christian and Muslim writers as well as converts on both sides. While the bulk of the course is focused on the period prior to 1700 CE, we will devote the final few weeks of class to the study of Islam in contemporary Spain using fiction, legal debates, and issues related to immigration. Conducted in Spanish

Class Format: seminar

Requirements/Evaluation: two short papers, oral presentations, one final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any RLSP 200-level class, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

RLSP 402 (S) Senior Seminar Madrid: 1939-2004

In this course we will examine life in Madrid during two key periods: the Franco Dictatorship (1939-1975), and the first four decades of democracy (1975-2016). We will consider how representations of urban landscapes (churches, convents, prisons, museums, slums, bars and schools) have shaped and reflected the lives of madrileñas and madrileños past and present. We will study works by 20th century and contemporary Spanish authors, filmmakers, photographers, and journalists, as well as period advertisements and examples of popular culture. How was Madrid's image as international capital of art, sun, soccer and bullfighting forged? What remnants of the past lurk behind this appealing façade? How do the Atocha train Station bombings of 2004 relate to unresolved political tensions from 1939?

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 300 level RLSP course or permission of instructor

Enrollment Limit: 10

RLSP 403 (F) Senior Seminar: Early Modern Love and Marriage
We might think that love is a natural human feeling and marriage its happiest consequence, but in fact these two conditions are among the most carefully constructed phenomena in any society, highly dependent on time period and place. In this senior seminar we will focus on pre-modern Iberia to study the many manifestations and constructions of love (and marriage), several of which continue to influence definitions of both to this day. We will look at sacred, profane, family, and married love through treatises, medical writings, plays, short stories, poems. Our theoretical underpinnings will come from reflections on love from the time period under consideration as well as contemporary critiques of love and marriage. Primary sources will include early lyrical traditions, the poetry of King Alfonso X, the works of Santa Teresa, Lope de Vega, Calderón de la Barca, Cervantes, among others. Conducted in Spanish.
Class Format: seminar
Requirements/Evaluation: regular presentations, two to three short papers, one research paper preceded by class presentation, active participation and regular attendance required
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: any 300-level RLSP course or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: senior Spanish majors and Comparative Literature seniors with Spanish focus

On leave Fall/Spring: Professor Janneke van de Stadt. Assistant Professor C. Koné.

LANGUAGE STUDY
The department provides language instruction to enable students to acquire all five linguistic skills: understanding, speaking, reading, writing, and culture. Russian 101-W88-102 covers the basics of Russian grammar. Russian 151 through 252 offer additional instruction in grammar and vocabulary acquisition, and provide extensive practice in reading and conversation.

STUDY ABROAD
The department strongly encourages students who want fluency in Russian to spend a semester or year studying in Russia or one of the former Soviet republics. Students generally apply to one of several approved foreign study programs. Russian 152 or the equivalent and junior standing are normally prerequisite for study abroad.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
No, generally not until after a student returns and can provide course material for review (e.g. completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
In Addition to course title and description, we always have a conversation with our students about the actual work they completed since sometimes syllabi are vague, or not followed with complete thoroughness.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes, four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No, the only candidate for this would be the Senior Seminar, and it has never been an issue.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LITERATURE AND CULTURE IN TRANSLATION
The department regularly offers courses on Russian literature, culture, and politics in English for those students who have little or no knowledge of Russian, but who wish to become acquainted with Russian literary, cultural, and social history.

THE CERTIFICATE IN RUSSIAN
To enhance a student’s educational and professional profiles, the Certificate in Russian offers a useful tool for using the language in a wide variety of disciplines. The sequence of language and culture courses is designed to supplement a student’s major at Williams by enabling the student to expand their knowledge in a related field.

Students who enter Williams with previous training in Russian may substitute more advanced courses for all the 100-level courses; they can also be exempted from up to two of the required courses. Thus, in order to earn a certificate a student must take no fewer than five courses (including three
courses in Russian) after enrolling at Williams. The student must achieve proficiency at the level of a B in RUSS 251 or the equivalent.

**Required Courses**

- 101
- 102
- 103 or 151
- 104 or 152
- one additional course conducted in Russian

**Elective Courses**

- at least one course on Russian cultural history
- at least one course on Russian intellectual, political, or social history, or post-Soviet economics

**THE MAJOR**

The Russian major offers students an interdisciplinary approach to the intellectual and cultural history of Russia and the former Soviet republics. Students complete the major by combining courses in Russian language and literature with courses in history, political science, music, economics, and art. The major requires a minimum of ten courses of which at least six must be conducted in Russian, at least two must be at the 300-level, and one at the 400-level. In addition, students may take up to four related courses offered by other departments and taught in English.

**Examples of appropriate courses in other departments are:**

- HIST 140 Fin-de Siècle Russia: Cultural Splendor, Imperial Decay
- HIST 240 Muscovy and the Russian Empire
- HIST 241 The Rise of the Soviet Union
- HIST 438 Religion and Secularism in Modern Europe and Russia

Students selecting the major must typically complete Russian 104 or 152 (or the equivalent) by the end of the junior year. Majors will normally be expected to take the 400-level seminar offered in their senior year, even if they have previously taken another version of it. Russian majors may receive major credit for summer language study (in consultation with the department) and for as many as four courses taken during study abroad.

**THE DEGREE WITH HONORS IN RUSSIAN**

At the beginning of the second semester of the senior year, students may nominate themselves to candidacy for the degree with honors. By the end of the junior year at the latest, however, they will have established in consultation with the department their qualifications for embarking on the project, the pattern of study to be followed, and the standards of performance.

Students earn a degree with honors by submitting a senior thesis (493-W31-494) of honors quality.

**RUSS 11 (W)  Queer Russia**

Crosslistings: RUSS11 / WGSS11 / COMP11

**Primary Crosslisting**

A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country's queer citizens have become the despised Other under Putin. Knowledge of Russian is not required.

All readings will be in English, and all films will include English subtitles.

**Class Format:** afternoons

**Requirements/Evaluation:** completion of reading and viewing assignments, attendance in class, active participation in discussions, and completion
of a collaborative project with other members of the class

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** preference to Comparative Literature, Russian, and Women's, Gender, and Sexuality Studies majors

**Materials/Lab Fee:** $10 plus cost of books

**RUSS 16 (W) Russian Spies in DC: FX's "The Americans"**

From the beginning of the Cold War to the present, the presence of Russian intelligence operatives in the nation's capital has been the subject of fascination and speculation. In this course, we will examine the FX channel's series *The Americans*, in light of both the popular imaginary about Russian spies in the United States and the actual history of intelligence wars in Washington. How does the series represent the lives of Russian political and intelligence operatives during the Reagan presidency, and how does it interpret the larger events of the Cold War in its final decade? Readings will draw from accounts on both side of the Cold War, focusing on signature developments such as Jewish immigration from the Soviet Union, the covert biological weapons programs, and Soviet attempts to build relations with progressive movements in the United States. Adjunct Instructor Bio: Alexandar Mihailovic has taught at Bennington College, Williams College, and Brown and Columbia Universities. His books include *Corporeal Words: Mikhail Bakhtin's Theology of Discourse*, *Mitki: The Art of Postmodern Protest in Russia*, and the edited volume *Tchaikovsky and His Contemporaries: A Centenary Symposium.* He has also published articles about cultural relations during the Cold War, African-American studies, art history, and cinema studies.

**Class Format:** mornings

**Requirements/Evaluation:** class participation and presentations, and a final 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** none

**RUSS 25 (W) Williams in Georgia**

Crosslistings: RUSS25 / SPEC25

**Primary Crosslisting**

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-Tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

**Class Format:** travel

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none; knowledge of Russian or Georgian is not required; not open to first-year students
Enrollment Limit: 8

Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course

Materials/Lab Fee: $2785

RUSS 101 (F) Elementary Russian I

An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in the second semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 252.

Class Format: seminar, the class meets five times a week

Requirements/Evaluation: active class participation, completion of all assignments, quizzes, tests, and a final exam

Prerequisites: none

Enrollment Limit: 15
Enrollment Preferences: students expressing an interest in the Russian major or certificate

Expected Class Size: 10

Department Notes: students registered for RUSS 101-102 are required to attend and to pass the sustaining program during the winter study period; credit granted only if both semesters (RUSS 101 and 102) are taken.

RUSS 140 (S) Crime and Punishment in Russian History
Crosslistings: RUSS140 / HIST140

Secondary Crosslisting
For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial

Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Distributions: (D1)
**RUSS 151 (F) Continuing Russian I**

This course develops all five skills—listening comprehension, speaking, reading, writing, and culture—for students who have completed at least one year of college-level Russian. Coursework includes a systematic review of Russian grammar, as well as an examination of a variety of authentic materials from Russian and Soviet culture, current events, and daily life. Intermediate students will concentrate on expanding their vocabulary, while more advanced students will focus on reading and writing about unabridged texts in Russian. Students who complete the yearlong sequence of RUSS 151 and RUSS 152 should be well prepared to undertake study abroad in Russia and are encouraged to do so. Each year this course is custom-designed to meet the needs of those students who enroll, so that both intermediate and advanced students can benefit from taking RUSS 151 and/or RUSS 152 more than once, which may be done with the permission of the instructor.

**Class Format:** seminar; the class meets four hours a week, three with the professor and the fourth with the Russian Teaching Associate (time to be arranged)

**Requirements/Evaluation:** active class participation, completion of all assignments, quizzes, and a final exam

**Prerequisites:** completion of at least one year of college-level Russian (RUSS 101-102) or permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 4-6

RUSS 203 (F) Nineteenth-Century Russian Literature: Rebels and Rebellion
Crosslistings: RUSS203 / COMP203

Primary Crosslisting
"God save us from seeing a Russian revolt, senseless and merciless," famously proclaimed Alexander Pushkin. But is revolt always senseless? And if it's not, what is the meaning behind it? Throughout the nineteenth century, Russian literature gave different answers to these questions. In this course, students will familiarize themselves with the masterpieces of the Golden Age of Russian literature with a particular focus on rebellion understood in its broadest sense: philosophical, psychological, social, sexual, and aesthetic. We will examine the confrontation of the archetypal figure of Russian literature, the "superfluous man," with his milieu in Pushkin, Lermontov, Turgenev, and Goncharov. The social and psychological revolt of another key figure—the "little man"—will be addressed in the works of Pushkin and Gogol. We will then discuss woman's sexual rebellion in Nikolai Leskov and the forms of spiritual rebellion in Leo Tolstoy and Dostoevsky. Finally, we will examine the aesthetic revolution of Chekhov's plays, which challenged the principles of the old theater and marked the turn to new modernist drama. All readings are in English.

Class Format: lecture
Requirements/Evaluation: participation, writing assignments, written exam
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: students majoring or considering a major in Russian or Comparative literature

RUSS 204 (S) Russia's Long Revolution: a Survey of Twentieth- and Twenty-First-Century Russian Culture
Crosslistings: RUSS204 / COMP204

Primary Crosslisting
With the one-hundredth anniversary of Russia's October Revolution just behind us and the uncertain future of post-Soviet Russia unfolding before us, we can now take stock of the long century of revolutions in art, politics, and society that has brought Russia to Putin. This course takes a comprehensive look at twentieth- and twenty-first-century Russian culture, focusing on the literature, film, theater, and visual art that defined this transformative period in Russia's modern history. Students will explore the radical aesthetic and political ideas that motivated this change, especially the utopian visions of the Russian avant-garde and early-Soviet Marxists, as well as key works that examine the tragic consequences of the failures of these revolutionary experiments for those who, willing or not, became their active participants. As we move on to the late-Soviet years, we will consider the emergence of a new, "conceptualist" avant-garde, which attempted to dismantle Soviet ideology and the totalitarian logic they attributed to the historical avant-garde using postmodern aesthetics. We will conclude the course by surveying literature, film, and performance that capture the traumatic experience of Russia's transition to market capitalism in the 1990s and its slide into authoritarian "stability" under Putin. Readings include works by Babel, Bulgakov, Platonov, Pasternak, Nabokov, Solzhenitsyn, Prigov, Pelevin, Sorokin, and recent Nobel laureate Svetlana Alexievich. Films screenings include the cinema of avant-garde masters Eisenstein and Vertov. All readings are in English.

Class Format: mixed lecture/discussion

RUSS 213 (F) From Putin to Pussy Riot: Discourses of Post-Soviet Gender  (DPE)
Crosslistings: GBST213 / WGSS214 / COMP257 / RUSS213

Primary Crosslisting

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin's regime by performing in day-glo balaclavas in Russia's largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West. All readings will be in English, and all films with have English subtitles.

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RUSS or COMP; meets Division 2 requirement if registration is under GBST or WGSS This course is part of the Difference, Power, and Equity requirement because it engages in cultural comparison, explores how power and privilege are allocated differently in post-Soviet societies than in Western liberal democracies, and engages in the critical theorization of post-Soviet culture and discourse.

RUSS 214 (S) Contemporary Russian Culture and Politics
Crosslistings: RUSS214 / GBST214 / PSCI294 / COMP220

Primary Crosslisting

This course explores select aspects of contemporary Russian society and politics through literary works and films of post Soviet Russia. We will study the social and political settings of particular plots and opportunities not only in fiction and film but as they emerge in the lived reality of Russians since 1991. In addition to novels and short stories by some of the best contemporary Russian authors, we will read scholarly materials explaining the social and political trends characteristic of Russia's post-socialist transformation under Boris Yeltsin and Vladimir Putin's leadership. Analysis of the political and social processes will be framed in a comparative approach, drawing on parallels and differences with countries of Eastern Europe. All course readings will be in English. Knowledge of Russian is not required.

Not offered current academic year
RUSS 220 (S) World War II in Russian Culture

Crosslistings: RUSS220 / COMP285 / GBST220

Primary Crosslisting

This course traces the development of state-sponsored collective memory of the Great Patriotic War, as the Eastern front of World War II is called in Russia, and its counter-narratives. The veritable cult of the war, as it was shaped by the late Soviet period, took decades to coalesce and went through multiple stages. The relative disregard in the immediate post-war years under Stalin was followed by the striking re-enactments in literature and film of the period of Khruschev’s Thaw. The memory of the war for new generations was further defined in state-sponsored memorials, museums and public events under Brezhnev. While Soviet ideology was discredited in the wake of the USSR's collapse, ordinary Russians and politicians alike continue to this day to see Russia's victory over Nazi Germany with pride and as part of their national identity. This course explores the contradictory elements that make up the images and narratives of the war -- in novels, short stories, feature films, and oral histories -- which bring together state violence and individual freedom, patriotism and oppression, remembrance and forgetting. After an initial acquaintance with the colossal human cost of the war, we will examine the artistic, cultural and political traditions of addressing the national trauma that have evolved in the official and unofficial discourses of the war. The search for a "usable past" of the war continues in contemporary Russia, breaching previously suppressed topics yet also obfuscating public attempts to critically examine people's experiences of the war beyond the inherited Soviet myths.

RUSS 222 (S) Russian Literature and European Existentialism

Crosslistings: COMP270 / RUSS222

Primary Crosslisting

Existentialism was a highly influential movement in twentieth-century European literature and thought. Nowadays the terms existentialism and existentialist are broadly used to describe the worldview and literary style of writers and thinkers as different as Fyodor Dostoevsky, Leonid Andreyev, Martin Heidegger, Franz Kafka, and Jean-Paul Sartre. Reflecting the shift to irrationalism in early twentieth-century philosophy and psychology, as well as the global cataclysms of the twentieth century, existentialism focuses on the problem of human alienation in the modern world, suggesting ways of overcoming it. In this course addressing the key concepts of existentialist philosophy (angst, borderline situation, the absurd, freedom), we will examine the origins of the existentialist worldview in nineteenth and early twentieth-century Russian literature (Dostoevsky, Chekhov, Leonid Andreyev); read and discuss existentialist texts by Kafka, Albert Camus, and Sartre; and look at the existentialist legacy in contemporary Russian and Western culture, including rock music. All readings are in English.

Class Format: lecture

Requirements/Evaluation: participation, 3 writing assignments, oral presentation, final paper

Spring 2019
RUSS 233 (S)  Time, Memory, and Narrative: Twentieth-Century Literature and Film
Crosslistings: COMP233 / RUSS233

Primary Crosslisting
Time and space belong to the most fundamental categories that define our conceptualization of the world we live in. Overcoming the restrictions that these dimensions impose on our existence has always been humanity’s major preoccupation. Is there a way to break with time's linearity and irreversibility? One magic tool of overcoming time that we all possess is our memory. Another is art; specifically, such spatial-temporal forms of art as literature and film. Memory, literature, and film are similar in their use of narrative. In order to recast the past we pull out memories and "narrate" them to ourselves or others. A literary character's recollections and reminiscences often constitute the plot of a literary work or film. The sequence of cinematic images in film creates the visual narrative, while one of its main techniques "montage" replicates the seemingly random association of memories in our mind. Apart from its structural significance, time constitutes an important subject of artists' philosophical reflection in both literature and film. In this course, we will explore the themes of time and memory in their relation to different narrative strategies by way of a few masterpieces of 20th-century Russian/Soviet literature and film. How can trains on the Railroad around Moscow annihilate time? What happens if Tsar Ivan the Terrible finds himself in Soviet Moscow? Where does the Russian Ark float and whom does it carry? To answer these and other questions we will read the novels of Vladimir Nabokov and his most congenial successor Sasha Sokolov; a play by Mikhail Bulgakov, and a novella by Vladimir Makanin, among others. We will also watch and discuss the famous films by Leonid Gaidai, Andrey Tarkovsky, and Aleksander Sokurov. In addition, we will read a few scholarly essays on time, memory, and narrative, relating them to our primary material. Readings, films, and discussions are in English.

RUSS 240 (F)  The Soviet Experiment
Crosslistings: RUSS240 / HIST240

Secondary Crosslisting
In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

Class Format: lecture
Requirements/Evaluation: evaluation based on active class participation, two short essays (3-5 pages), one in-class midterm, and one take-home final exam

RUSS 248 (F)  Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WI)
Crosslistings: SOC248 / GBST247 / RUSS248
Secondary Crosslisting
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial
Requirements/Evaluation:  5-page paper every other week, comments on the partner's paper in alternate weeks
Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Preferences:  Anthropology, Sociology, and Russian majors
Expected Class Size:  10
Distributions:  (D1) (DPE) (WI)
Distribution Notes:  meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS DPE: This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

RUSS 251 (F)  Continuing Russian I
The same course as RUSS 151 but for students at the advanced level. See RUSS 151/152 for full course description.
Class Format: seminar, the class meets four hours a week, three with the professor and the fourth with the Russian Teaching Associate (time to be arranged)
Requirements/Evaluation:  active class participation, completion of all assignments, quizzes, and a final exam
Prerequisites:  RUSS 152 or permission of instructor
Enrollment Limit:  none
Enrollment Preferences:  none
Expected Class Size:  4-6
Distributions:  (D1)
RUSS 252 (S)  Continuing Russian II
The same course as RUSS 152 but for students at the advanced level. See RUSS 151/152 for full course description.

RUSS 275 (S)  Russian and Soviet Cinema
Crosslistings: COMP287 / RUSS275

Primary Crosslisting

In this course, we will survey over a hundred years of Russian and Soviet film to explore how cinema has reflected and, at times, created the country's most important historical events and cultural myths. We will pay close attention to Russian filmmakers' varied reactions to Hollywood cinema, as well as to the lively body of cinema theory that these reactions generated. Our survey will begin in the pre-Revolutionary era and include representative films from the time of the Bolshevik Revolution, Stalinism and World War II, the Thaw and Stagnation, Glasnost, and the Putin era. In addition to studying films by auteur filmmakers, such as Sergei Eisenstein, Andrei Tarkovsky, and Aleksandr Sokurov, we will watch movies made for the masses, which have helped to form Russians' understanding of their country and themselves. All readings will be in English and all films will be viewed with English subtitles

Class Format: seminar

Requirements/Evaluation: completion of all viewing and reading assignments, active participation in class discussions, two short papers, and a final research project

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 15

Distributions: (D1)

Attributes: INST Russian + Eurasian Studies Electives

SEM Section: 01    TF 2:35 pm - 3:50 pm     Julie A. Cassiday

RUSS 277 (F)  The Self Under Stalin: a Genealogy of Soviet Subjectivity  (DPE)
Crosslistings: COMP269 / RUSS277

Primary Crosslisting

In this course, students will explore a variety of cultural artifacts (literature, film, song, visual art, and architecture), personal documents (diaries and letters), and secondary literature, which speaks to the real, subjective experience of life in the Soviet Union under Stalin. Throughout his reign, Stalin spurned basic human values like freedom and democracy in favor of class hatred, discipline, and conformity. He unleashed unthinkable violence on the Soviet population, provoking mass famine and instigating campaigns of political terror, all in the name of transforming impoverished, agricultural Russia into the world's first industrially advanced, socialist society. The underlying logic of this social experiment has been diagnosed as totalitarian, a distinction designating systems of governance in which the state uses a combination of coercion and propaganda to achieve total control over the
thoughts and actions of its subjects. The opening of borders and archives since the fall of the Soviet Union, however, has shown the image of the passive, brainwashed automaton to be inadequate in relation to the everyday cares, aspirations, fears, joys and sorrows, ethical dilemmas, personal narratives, and forms of covert resistance that shaped the identities of ordinary Soviet people. Scholars of Soviet subjectivity have worked to bring these stories to light in an attempt to achieve a more nuanced understanding of the Soviet experience. Students will apply insight from this field to their own investigations of Soviet selfhood in discussions, short response papers, and a final research paper. All readings are in English.

Class Format: seminar
Requirements/Evaluation: class participation, short response papers, final paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Russian majors, History majors, Comparative Literature majors
Expected Class Size: 10
Distributions: (D1) (DPE)

Distribution Notes: DPE: This course is part of the Difference, Power, and Equity initiative not only because it explores the formation of identity in situations in which the state wields extreme power over the actions and speech of its subjects, but also because it confronts the limitations of the concept of totalitarianism in representing the experience of such subjects. Special attention will be devoted to issues of class, gender, ethnicity, and non-human actors as they relate to the problem of Soviet subjectivity.

Fall 2018
SEM Section: 01   TR 11:20 am - 12:35 pm   Jason A. Cieply

RUSS 286 (F)  Russian Politics under Vladimir Putin
Crosslistings: RUSS286 / PSCI286
Secondary Crosslisting

In 1939, Winston Churchill has famously characterized Russia as a riddle wrapped in a mystery inside an enigma. In the 75 years that followed, Russian politics has continued to defy expectations and conventional explanations. The collapse of the Soviet Communist dictatorship in 1991 has caught most observers by surprise, and has led Russia on a path of political and economic liberalization of an unprecedented scope. But despite the initial optimism, these processes produced an economic system characterized by crony capitalism and an electoral authoritarian regime--a political system that formally espouses institutions like multipartyism, parliaments and elections, but violates democratic norms in practice. Why did Russia follow this particular trajectory? Why did Russia's political and economic transition fail to produce the intended results? What are the factors that gave rise to and sustain Vladimir Putin's system? And as Russia faces extraordinary challenges again--marked by the protest wave in 2011-12, the country's economic crisis, the wars in Ukraine and Syria, and the renewed confrontation with the West--what lessons can we draw for the future? This course will explore the key perspectives on these issues. The first part of the course will provide a concise overview of Russia's historical background, the roots of the communist collapse, and the country's subsequent trajectory. It will place particular emphasis on the events, processes and legacies that shaped Russia's transition, and its cataclysms and distortions. The second part of the course will look into the rise of the Putin regime, its key pillars, and its contradictions. The third part of the course will survey the impact of Putin's regime on Russia's economy, governance, identity politics and foreign relations. In this segment, we will also examine how protests and civil society activism shaped post-Communist Russian politics, and conclude with a discussion of the scenarios for the future trajectory of Russia. The course will approach many of these topics from a comparative perspective, contrasting how political, economic and social processes in Russia diverged from other countries in post-Communist East Europe and the Former Soviet Union. The course will also take an interdisciplinary approach, integrating perspectives from political science, economics, history, anthropology, social psychology and other disciplines, as it attempts to address the key puzzles of contemporary Russian politics. To provide a more intimate understanding of the social changes and political processes affecting Russia, we will also survey key films, documentaries and other relevant sources and materials in the media and popular culture.

Class Format: lecture
Requirements/Evaluation: mid-term exam, term paper, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science and Russian majors
RUSS 305 (F)  Dostoevsky: Navigating Through the Underground
Crosslistings: COMP305 / RUSS305

Primary Crosslisting
In this course, students will acquaint themselves with Dostoevsky's oeuvre--from his early masterpieces to his artistic testament, *The Brothers Karamazov*. The key concept through which we will approach Dostoevsky's various writings will be the underground--a powerful metaphor of spiritual decay, angst, resentment, and rebellion against the whole of creation shared by many Dostoevsky characters, from the anonymous protagonist of *Notes from Underground*, to Raskolnikov (*Crime and Punishment*), to all the brothers Karamazov. Inheriting Dostoevsky's own existential doubts, his major characters strive to find an exit from their various "undergrounds," some with and some without success. What are the philosophical, psychological, and artistic foundations of the underground? How does one end up there in Dostoevsky's view? And what is the way out? These are just a few of the questions to be answered as we explore the primary genius of Russian literature. All readings are in English.

Class Format: seminar
Requirements/Evaluation: attendance and participation in discussion, one 1-page writing assignment, two research papers, digital project, final project (paper)
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: RUSS and COMP majors
Expected Class Size: 15
Distributions: (D1)

RUSS 306 (S)  Rise and Shine with Tolstoy
Crosslistings: COMP306 / RUSS306

Primary Crosslisting
Prepare to alternately fall in love and lock horns with this illustrious nineteenth-century Russian author. He is worth it! This course will examine the life and major works of Leo Tolstoy in the context of Western intellectual history. Readings will include his two great novels, *War and Peace* and *Anna Karenina*, as well as a number of shorter works, such as *The Cossacks* and *Hadji Murad*. We will also consider some of Tolstoy's aesthetic and didactic works as we examine his broad, rich, and sometimes unexpected development as an artist and thinker.

Class Format: seminar
Requirements/Evaluation: active and substantive class participation; short papers; leading class discussion
Extra Info: not available for the fifth course option
Prerequisites: none

Enrollment Preferences: RUSS and COMP majors
Expected Class Size: 7
Distributions: (D1)
Attributes: GBST Russian + Eurasian Studies Electives

Not offered current academic year
RUSS 331 (S)  The Brothers Karamazov  (WI)  
Crosslistings: COMP331 / ENGL371 / RUSS331  

Primary Crosslisting

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: at least one 200-level literature class  
Enrollment Limit: 10

RUSS 337 (F)  After Stalin: Soviet History from "Thaw" to Collapse  
Crosslistings: HIST337 / RUSS337  

Secondary Crosslisting

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule infected on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? In what ways did the spirit of the October and Stalinist Revolutions persist or erode from 1953 until 1991? Most importantly, how did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

Class Format: seminar

Requirements/Evaluation: evaluation based on active class participation, three short essays (2-3 pages), and one long essay (8-10 pages)  
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option  
Prerequisites: none  
Enrollment Limit: 25
RUSS 341 (S)  Collapse: The Fall and Afterlife of the Soviet Union
Crosslistings: RUSS341 / HIST341
Secondary Crosslisting
On Christmas Day 1991, Mikhail Gorbachev ended two things: his tenure as President of the Soviet Union, and the Soviet Union itself. The following day, Boris Yeltsin entered office as the first president of the Russian Federation, and without delay, began to institute radical economic and social reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most commonly used to describe Russia in the early 1990s is "disappear": money, jobs, food, and people. The very things that Soviet-style socialism had committed itself to providing for started to vanish as a result of invisible and market forces. This course will explore what emerged in the spaces left empty after Soviet-style socialism's demise in three parts. The first part of the semester will examine the origins of the Soviet Union's collapse and its breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the collapse. Finally, the third part of the course will focus on Putin's ascendency to the presidency and its consequences for Russian citizens at home and Russia's image abroad. By semester's end, students will have acquired the content and analytical literacy to place present-day Russia in its specific historical context and identify multiple sources of causation that may help explain Russia's transition from socialism to capitalism to Putinism during the past quarter century.
Class Format: seminar
Requirements/Evaluation: evaluation based on active class participation, three short essays (3-5 pages), and one long essay (10-12 pages)

RUSS 401 (F) Senior Seminar: The Myth of Lenin
Lenin lived, Lenin lives, Lenin will live Forever! So proclaimed the Soviet slogan, pointing out the mythological status of the Communist leader. This course, conducted in Russian, aims to demonstrate that the Lenin myth was so powerful that it survived the collapse of the state and ideology he created. We will explore the development of the myth and cult of Lenin by way of a variety of texts and media, from classical poems by Mayakovsky, to children's stories, folklore, conceptualist art, and Soviet and post-Soviet film.
Class Format: seminar
Requirements/Evaluation: attendance and participation in class discussions, three written essays, oral presentation, final creative project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RUSS 202, or equivalent, or permission of the instructor
RUSS 402 (S)  Senior Seminar: Russia under Putin
This course is conducted in Russian and explores cultural and political trends of Russian society since 2000. We will work with authentic print and audiovisual media reports, feature and documentary films, analytical and research materials to develop a wide-ranging understanding of ordinary Russians' lives, their outlook and political views. In 2018, the course includes a trip to Russia, paid for by the College, during which students will interact with Russians, visit key sites of interest, and conduct a study project within the parameters of the course.

Class Format: seminar
Requirements/Evaluation: attendance and participation in class discussions; preparation of video questions; three 3-page written essays; two 10-minute oral presentations; final 5-page research paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RUSS 202 or equivalent

Science and Technology Studies (SCST) is an interdisciplinary program concerned with science and technology and their relationship to society. In addition to the historical development and a philosophical understanding of the ideas and institutions of science and technology; Science and Technology Studies also examines their ethical, economic, social, and political implications.

The role that science and technology have played in shaping modern industrial societies is generally acknowledged, but few members of those societies, including scientists and engineers, possess any understanding of how that process has occurred or much knowledge of the complex technical and social interactions that direct change in either science or society. The Science and Technology Studies Program is intended to help create a coherent course of study for students interested in these questions by providing a broad range of perspectives. At present, courses are offered which examine the history or philosophy of science and technology, the sociology and psychology of science, the economics of research and development and technological change, science and public policy, technology assessment, technology and the environment, scientometrics, and ethical-value issues.

To complete the requirements of the program, students must complete six courses. The introductory course and senior seminar are required and three elective courses are chosen from the list of designated electives. Students may choose to concentrate their electives in a single area such as technology, American studies, philosophy, history of science, economics, environment, sociology, current science, or current technology, but are encouraged to take at least one elective in history, history of science, or philosophy. The sixth course necessary to complete the program is one semester of laboratory or field science in addition to the College’s three-course science requirement. Other science courses of particular interest include Chemistry 110 and Biology 134.

The program is administered by a chair and an advisory committee of faculty who teach in the program. Students who wish to enroll normally register with the chair by the fall of their junior year.

Elective Courses
Students can check with the program chair to see if other courses not listed here might count as electives.

- ASTR 336/HSCI 336 Science, Pseudoscience, and the Two Cultures
- BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
- CHEM 113 Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science
- ENVI 101F Nature and Society: an Introduction to Environmental Studies
- ENVI 307/PSCI 317 Environmental Law
- ENVI 402/MAST 402 Senior Seminar: Perspectives on Environmental Studies
- HIST 374 American Medical History
- PHIL 209 Philosophy of Science
- PHIL 213T(F) Biomedical Ethics
- PHIL 244T(S) Environmental Ethics
- SOC 368 Technology and Modern Society

Courses of Related Interest
- AMST 216(S) Environmental Humanities: Theory and Practice
- ANSO 205 Ways of Knowing
- ANTH 271 (F) Medicine, Technology, and Power
- ARTH 257 Architecture 17001900
- ASTR 340 Great Astronomers and Their Publications
- BIOL 218T DNA, Life, and Everything
STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. Be sure to check record of enrollment in Div 3 (sciences with labs) to satisfy program.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:
SCST 99 (W) Independent Study: Science and Technology Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

SCST 101 (S) Science, Technology, and Human Values

Crosslistings: HSCI101 / SOC201 / SCST101

Primary Crosslisting

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar
Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams
Prerequisites: none
Enrollment Limit: 20-25
Enrollment Preferences: first-years and sophomores
Expected Class Size: 20
Distributions: (D2)

Spring 2019

SCST 135 Politics after the Apocalypse

The zombies are coming! Climate change will destroy us! Bird-flu pandemic! To our horror and delight, reminders are everywhere that the end is near. Some of these projected apocalypses are alarmist, some fanciful...and others all too realistic. What shape will politics take after the apocalypse? What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? And what does it say about politics today that we are so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? In this class, we reconsider what politics is and should be by contemplating accounts of its destruction and rebirth in television, film, literature, activism, social science, and critical theory. We will approach these sources as analogous to political theory's classic thought experiment of the "state of nature" and social contract. And we will consider what it tells us about our time that we are so eager to imagine ourselves at the beginning of the end. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. Two papers, one close-reading assignment, and one post-apocalyptic short story or video are required.
SCST 153 (S) Androids, Cyborgs, Selves (WI)
Crosslistings: ENGL153 / SCST153

Secondary Crosslisting
In this expository writing course, we will analyze and argue about how near-human or partly human bodies and intelligences are imagined in fiction and film. When do these bodies, these intelligences, improve the worlds in which they appear, and when do they threaten them? How are they gendered, how are they raced, and why? And what do they want? As we will see, authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in radically different ways. This course focuses on articulating these differences and developing significant claims about them in clear, argumentative prose. We will spend half or more of our class time discussing and practicing writing skills. Texts may include *R.U.R.*, "The Bicentennial Man," *Blade Runner, Metropolis (Suite 1: The Chase)*, and *Her*.

Class Format: seminar
Requirements/Evaluation: writing (four 5-page essays in multiple drafts) and discussion/participation
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under SCST WI: This writing-intensive course is geared towards improving students’ analytical and argumentative prose in the context of studying literary and filmic fictions.

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

SCST 209 (S) Philosophy of Science
Crosslistings: SCST209 / PHIL209

Secondary Crosslisting
It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, scientific choice, change, and the idea that scientific knowledge is progressive. The course will begin with the "received view" of science, advanced by logical empiricists, which assumes the objectivity and the rationality of science. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality their works provoked. This discussion will naturally lead us to the relativist and social-constructivist views developed within contemporary science studies. Finally, we will analyze the current debate about cognitive credentials of science and proper approach to the study of science, which came to be known as "the science wars."

Class Format: seminar with a short lecture component in each class
Requirements/Evaluation: class attendance, preparedness and participation; three short assignments; three 5 pages long papers, the last of which will be the final paper, due a week after the end of classes
Extra Info: may not be taken on a pass/fail basis

SCST 210 (S) Networks of Power: Technology in Human Affairs

Crosslistings: SCST210 / SOC210

Secondary Crosslisting

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological innovations that shaped society over the past century, including electrification, automobiles and the highway system, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people’s lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Class Format: seminar

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, 15- to 20-page seminar paper

SCST 212 (S) Ethics and Reproductive Technologies (WI)

Crosslistings: WGSS212 / SCST212 / PHIL212

Secondary Crosslisting

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace—or to let us think we can replace—chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society’s interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete
procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

**Class Format:** discussion

**Requirements/Evaluation:** active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

**Prerequisites:** none, but introductory-level course in PHIL and/or WGSS recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS and PHIL majors or prospective majors

**Expected Class Size:** 19

**SCST 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (WI)**

Crosslistings: SCST213 / AFR213 / WGSS213

**Secondary Crosslisting**

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Spring 2019**

**LEC Section:** 01  TF 2:35 pm - 3:50 pm  Julie A. Pedroni

**SCST 228 Feminist Bioethics (WI)**

In this course we'll explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist
theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we'll explore topics that might traditionally be considered "women's issues" in health care, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active participation in class discussions, two mid-length papers (5-7 and 7-10 pages, respectively), one oral presentation, and three or four periodic short writing assignments (2-3 pages each)

**Prerequisites:** none, although previous coursework in WGSS is desirable

**Enrollment Limit:** 19

**Enrollment Preferences:** Women's, Gender and Sexuality Studies and Philosophy majors

**Expected Class Size:** 10-15

**Department Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL

**SCST 229 (F) The Panopticon: Surveillance, Power, and Inequality** (DPE)

Crosslistings: SOC228 / SCST229

**Secondary Crosslisting**

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing if they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Are these technologies always bad? Can they be used for good? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, the U.S. military drone program, surveillance in the workplace, and whether social media is turning us all into self-surveillance addicts.

**Class Format:** seminar

**Requirements/Evaluation:** discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 10

**Distributions:** (D2) (DPE)

**Distribution Notes:** DPE: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there given the city's current crisis of gun murders. Students will discuss whether and how to conduct surveillance in a context shaped by deep racial segregation and class inequality.

Fall 2018

SEM Section: 01    MR 2:35 pm - 3:50 pm     Ben  Snyder
SCST 233 (F) Chemical Intimacies (DPE)
Crosslistings: ENGL243 / WGSS233 / ARTH243 / SCST233

Secondary Crosslisting
This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geopolitically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between "actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

Class Format: seminar

Requirements/Evaluation: individual research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under WGSS OR SCST; meets Division 1 requirement if registration is under ARTH or ENGL. DPE: The course gives special attention to forms of human-chemical entanglement that are related to environmental justice (pollution), and gender, racial, sexual, indigenous, and disability politics.

SCST 235 (F) Innovation, Gender, and Sustainable Development (DPE)
Crosslistings: SCST235 / WGSS235

Secondary Crosslisting
Technological innovation is vital for communities, businesses and nations seeking to adapt to a globalized, competitive world. But any innovation also has impacts on all three dimensions of sustainability: the ecological, the economic, and the social. For example, such impacts may either exacerbate or mitigate gender inequalities. This course uses a gender studies lens to study innovation in the development of sustainable practices in the present and for the future. We will look at the impact of gender stereotypes on innovation, including the co-construction of gender and technology. Since the course is taught by a visiting scholar from Sweden, a particular focus will be the EU's policy of "Gender Mainstreaming" which requires all proposed policies to be assessed for their impact on gender inequality. The course looks at technical development as necessary and valuable, while investigating power relations and taken-for-granted views embedded in the particular forms it takes. The course will rely largely on analysis of case studies, and students will be encouraged to apply the analytic tools of the course to develop US-based case studies of their own.

Class Format: seminar, combination of lecture and discussion

Requirements/Evaluation: reading journal, mid-term exam, and a final research project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Environmental Studies majors, students who have taken WGSS 101

Expected Class Size: 10
SCST 236 (F)  Automatic Culture: From the Mechanical Turk to A.I.

Crosslistings: HSCI236 / SCST236

Primary Crosslisting

Using literary writing and visual representation as our primary points of entry, we will study the history of automation, exploring its effects as idea and as material implementation upon public and private spheres, craftsmen and courts, wage-laborers, artists, and inventors. Readings from such authors as E.T.A. Hoffman, Kurt Vonnegut, Roald Dahl, and Sydney Padua will be supplemented with studies in the history and historiography of technology. The objects we examine will be as different from one another as the dulcimer-playing android presented as a gift to Marie Antoinette, IBM's Deep Blue, and contemporary devices like Amazon's Echo.

Class Format: seminar

Requirements/Evaluation: students will be evaluated based on mid-term and final essays, discussion participation, and brief in-class writing exercises.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: SCST concentrators

Expected Class Size: none

SCST 240 (F)  Great Astronomers and Their Original Publications  (WI)

Crosslistings: ASTR240 / LEAD240 / SCST240 / HSCI240

Secondary Crosslisting

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo , 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th-century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer L ibrary and the expansion of the Chapin Library of Rare Books.

Class Format: seminar

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper

Enrollment Limit: 12
SCST 250 (S) Environmental Justice (DPE)
Crosslistings: ENVI250 / SCST250

Secondary Crosslisting
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar

Requirements/Evaluation: several short essays, final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

Spring 2019

SEM Section: 01  W 1:10 pm - 3:50 pm Laura J. Martin

SCST 265 (F) Digital Performance Lab
Crosslistings: THEA265 / SCST265

Secondary Crosslisting
A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediatized performance practices. Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Class Format: studio and lab

Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills
### SCST 273 (F) Politics without Humans?

**Crosslistings:** SCST273 / PSCI273 / ENVI273

**Secondary Crosslisting**

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

**Class Format:** lecture/seminar

**Requirements/Evaluation:** class participation, three 6- to 8-page papers

**Extra Info:** please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students

**Prerequisites:** none

**Enrollment Limit:** 35

**Expected Class Size:** 15

### SCST 276 Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 20

**Expected Class Size:** 6

**Materials/Lab Fee:** $100

**Distributions:** (D2)

**Distribution Notes:** meets Division 1 requirement if registration is under THEA; meets Division 2 requirement if registration is under SCST

SCST 281 (F) Religion and Science

Crosslistings: REL281 / SCST281

Secondary Crosslisting

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

Class Format: seminar

Requirements/Evaluation: full attendance and participation, two essays

SCST 301 (F) Social Construction (DPE)

Crosslistings: WGSS302 / REL301 / COMP315 / SOC301 / SCST301

Secondary Crosslisting

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of
the course, we will change gears and explore looking at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Class Format: seminar

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors, then majors from cross-listed departments

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under REL, SOC, WGSS or SCST; meets Division 1 requirement if registration is under COMP. DPE: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

SCST 315 (S) Blackness 2.0: Race, Film and New Technologies

Crosslistings: AMST315 / AFR315 / SCST315

Secondary Crosslisting

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the ‘real’ vs ‘virtual’ world; emoji wars; blogsphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.
SCST 319  Neuroethics  (WI)
Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.
Class Format: tutorial
Requirements/Evaluation: evaluation will be based on five 5-page position papers and five short response papers as well as participation in discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 2 requirement if registration is under PSYC; meets Division 3 requirement if registration is under NSCI
Attributes: NSCI Group B Electives; PSYC Area 1 - Behavioral Neuroscience;
Not offered current academic year
SCST 338 (F)  Transhumanism: Religion, Technoscience, Obsolescence
Crosslistings: SOC338 / REL338 / HSCI338 / SCST338
Secondary Crosslisting
This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryogenic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Class Format: seminar
Requirements/Evaluation:  attendance and participation, informal weekly writing, 15- to 20-page seminar paper
Extra Info:  not available for the fifth course option
Prerequisites:  none
Enrollment Limit:  20
Enrollment Preferences:  Anthropology and Sociology majors and Science and Technology Studies concentrators
Expected Class Size:  20
Distributions:  (D2)
Not offered current academic year

SCST 348 (S)  Women, Men and Other Animals  (DPE)
Crosslistings: SCST348 / WGSS348 / ARTH348 / ENGL348
Secondary Crosslisting
In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal--indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.
SCST 370 (F)  Medicine, Pathology, and Power: An Ethnographic View  (DPE) (WI)

Crosslistings: SCST370 / ANTH371 / WGSS371

Secondary Crosslisting

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar
Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators
Expected Class Size: 19
Distributions: (D2) (DPE) (WI)
Distribution Notes: DPE: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering. WI: This class includes; weekly writing exercises and monthly 'writing chats' with instructor.
Attributes: EXPE Experiential Education Courses; PHLH Methods in Public Health; SCST Related Courses;
SCST 371 (S) Medicine, Technology, and Modern Power
Crosslistings: HSCI371 / SOC371 / SCST371

Secondary Crosslisting

Medicalization: those processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture
Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference will be given to Anthropology and Sociology students
Expected Class Size: 20-25
Distributions: (D2)
Attributes: PHLH Bioethics + Interpretations of Health
Not offered current academic year

SCST 376 (F) Human-Computer Interaction
Crosslistings: SCST376 / CSCI376

Secondary Crosslisting

Human-Computer Interaction (HCI) principles are practiced in the design and evaluation of most software, greatly impacting the lives of anyone who uses interactive technology and other products. There are many ways to design and build applications for people, so what methods can increase the likelihood that our design is the most useful, intuitive, and enjoyable? This course provides an introduction to the field of human-computer interaction, through a user-centered approach to designing and evaluating interactive systems. HCI draws on methods from computer science, the social and cognitive sciences, and interaction design. In this course we will use these methods to: ideate and propose design problems, study existing systems and challenges, explore design opportunities and tradeoffs, evaluate and improve designs, and communicate design problems and solutions to varying audiences.

Class Format: lecture
Requirements/Evaluation: course projects, in-class group work/participation, and exams
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: CSCI 136
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Distributions: (D2)
Distribution Notes: meets Division 3 requirement if registration is under CSCI; meets Division 2 requirement if registration is under SCST

Fall 2018

SCST 380 (F)  Freedom Dreams, Afro-Futures & Visionary Fictions
Crosslistings: AFR380 / ENGL381 / AMST380 / WGSS380 / SCST380

Secondary Crosslisting

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Class Format: seminar
Requirements/Evaluation: active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators
Expected Class Size: 20
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under WGSS, AFR, SCST or AMST; meets Division 1 requirement if registration is under ENGL
Attributes: WGSS Racial Sexual + Cultural Diversity Courses

SCST 401 (F)  Senior Seminar: Critical Perspectives on Science and Technology

A research-oriented course designed to give students direct experience in evaluating and assessing scientific and technological issues. Students initially study particular techniques and methodologies by employing a case study approach. They then apply these methods to a major research project. Students may choose topics from fields such as biotechnology, computers, biomedical engineering, energy, and other resource development. Students will apply their background of historical, philosophical, and technological perspectives in carrying out their study.

Class Format: studio
Requirements/Evaluation: research paper or project
Enrollment Limit: 5
Distributions: (D2)
Not offered current academic year

SCST 401 (F)  Cold War Technocultures

Crosslistings: SOC363 / SCST401

Secondary Crosslisting

In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet "containment." We will trace the historical threads connecting MIT's "Whirlwind" computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of "thinking the unthinkable"; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race--from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome's Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-fiction as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific
developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

Class Format: seminar

Requirements/Evaluation: two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: SCST 101 or instructor consent; prior coursework in Anthropology and Sociology and/or History

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Science and Technology Studies concentrators

Expected Class Size: 15

ANTHROPOLOGY AND SOCIOLOGY (Div II)
SOCIOLOGY
Chair: Professor Antonia Foias

On leave Fall/Spring: Assistant Professors: J. Lee, C. Simko.
On leave Fall only: Professor J. Nolan.

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

**Anthropology** critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistorical past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

**MAJORS**

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

**Requirements**

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

**Core Courses**

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**
ANTH 101 How to Be Human

**Sociology**
SOC 101 Invitation to Sociology

**Joint Courses**
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

**Elective Courses**

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.
STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.
SOC 15 (W)  Photographic Literacy and Practice
Crosslistings: ANTH15 / SOC15

Primary Crosslisting

When you look at a photograph, what is it really saying? How can you make a photograph that says what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week--Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

Requirements/Evaluation: final project; formal public exhibit

Prerequisites: none, but students must own or borrow a digital camera (a DSLR with a 35mm lens is ideal, but compact cameras will also work)

Enrollment Limit: 12

Enrollment Preferences: students can email me

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

Winter 2019

SOC 31 (W) Senior Thesis: Sociology
To be taken by students registered for Sociology 493-494.

Class Format: independent study

Distributions: (D2)

Winter 2019
HON Section: 01  TBA  Antonia E. Foias

SOC 99 (W) Independent Study: Sociology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

Winter 2019
IND Section: 01  TBA  Antonia E. Foias

SOC 101 (F) Invitation to Sociology
An introduction to sociological analysis. The course focuses on the relationship of individual men and women to the social world and introduces students to systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Veblen, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

Class Format: lecture/discussion
Secondary Crosslisting

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar

Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams

Prerequisites: none

Enrollment Limit: 20-25

Enrollment Preferences: first-years and sophomores

SOC 210 (S) Networks of Power: Technology in Human Affairs

Crosslistings: SCST210 / SOC210

Primary Crosslisting

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological innovations that shaped society over the past century, including electrification, automobiles and the highway system, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people’s lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that
continue to shape society today.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, two 5-page writing assignments, 15- to 20-page seminar paper

**Extra Info:** may not be taken on a pass/fail basis

**SOC 211 (F) Race and the Environment**

**Crosslistings:** AFR211 / SOC211 / AMST211 / ENVI211

**Secondary Crosslisting**

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address “environmental racism,” like Robert Bullard’s *Dumping in Dixie* and David Pellow’s *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 20

**Distributions:** (D2)

**SOC 216 (F) The City**

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

**Class Format:** seminar

**Requirements/Evaluation:** response papers, mid term exam and final research paper
SOC 218 (F) Law and Modern Society
This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

Class Format: lecture/discussion
Requirements/Evaluation: a short paper and midterm and final exams
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 35
Enrollment Preferences: none
Expected Class Size: 35
Distributions: (D2)
Attributes: AMST Space and Place Electives; GBST Urbanizing World Electives

SOC 219 (S) Images and Society
"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

Class Format: seminar
Requirements/Evaluation: active class participation, several response papers, a midterm paper and a take-home final
Prerequisites: none; open to all
Enrollment Limit: 19
Expected Class Size: 19
Distributions: (D2)
Attributes: FMST Related Courses
Not offered current academic year
SOC 221 (S) Money and Intimacy
Can money buy love and care? The course will consider this taboo question from a sociological perspective. We will look into how relevant this question has been over the course of history, what forces have contributed to the shift in thinking about it, and, most importantly, how sociological research helps us understand its current ramifications. We will discuss a wide range of aspects of family life: the relationship between arranged marriage and romantic relationship, the role of inheritance in family and social life, the distribution of resources in the context of modern family forms (most notably remarriages), and the outsourcing of care for dependents. Intimacy bears different value and content in these changing contexts. The course will further look into the changing character of new economy where "people's skills" are ever more required from employees (emotional labor) and where intimacy, care, and/or sex constitute purchasable commodities. A reflection on the growth of new technologies will complicate some of the discussed concepts and notions, but throughout a common denominator of our discussion will be the role of social inequality.

Class Format: seminar
Requirements/Evaluation: classroom participation and a final research paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Distributions: (D2)

SOC 228 (F) The Panopticon: Surveillance, Power, and Inequality (DPE)
Crosslistings: SOC228 / SCST229
Primary Crosslisting

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing if they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Are these technologies always bad? Can they be used for good? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, the U.S. military drone program, surveillance in the workplace, and whether social media is turning us all into self-surveillance addicts.

Class Format: seminar
Requirements/Evaluation: discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 10
Distributions: (D2) (DPE)

Distribution Notes: DPE: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there given the city's current crisis of gun murders. Students will discuss whether and how to conduct surveillance in a context shaped by deep racial segregation and class inequality.
SOC 230 (S)  Memory and Forgetting

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include self-identity, memoirs, and oral history; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Class Format: seminar

Requirements/Evaluation: active class participation, several short papers, one class presentation, and an 8-10 page final paper

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 19

Distributions: (D2)

SOC 232 (S)  Symbols and Society

Human beings, as Kenneth Burke put it, are "symbol-using, symbol-making, and symbol-misusing" animals. Indeed, among humans, symbols help to substitute for "instincts." Symbols guide our actions, shape our emotions, and enable us to coordinate with others. Symbols may generate solidarity across wide spaces and among people who have never encountered one another face-to-face. They may also inflame conflicts and exaggerate distinctions, even promote violence. This course will examine the role of symbols and symbolism in modern society, exploring how words, gestures, images, and icons give shape and form to social life. The first part of the course will provide a broad introduction to the sociological study of symbols. The second part of the course will pay particular attention to the role that symbols play in politics and nationhood. How do symbols such as flags, anthems, values, ideals, monuments, and memorials promote solidarity and common identity across space and time? When and why do nations struggle over symbols, and what influence do these symbolic struggles have on collective life? What role do symbols play in war, conflict, and violence? Topics will include the Vietnam Veterans Memorial, the 1995 Enola Gay exhibit at the Smithsonian, the Holocaust Museum in D.C., the "Ground Zero cross," and the recent debates over the Confederate flag in South Carolina and beyond. We will focus primarily on the U.S., but will also work to make comparisons.

Class Format: seminar

Requirements/Evaluation: active class participation, several response papers, a short midterm essay, and a final paper with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2)

SOC 234 (S)  How Emotions Work

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this
deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizational levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem—the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

Class Format: seminar

Requirements/Evaluation: participation, reflective essay (3-5 pages), emotion map activity, open space meeting, policy memo (1-2 pages), final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2)

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Crosslistings: AMST236 / ENGL237 / ARTH237 / SOC236

Primary Crosslisting

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps and resonances between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will try their hand at methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of classical and recent examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving platforms on which such work can be presented, both off- and on-line. Lastly, we will pose and debate ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. In addition to readings, students should be prepared to spend a significant time out of the classroom doing fieldwork. Experience in photography and/or video, although not required, will be helpful.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Department Notes: In addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work.

Distributions: (D2)

SOC 240 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

SOC 241 (S) Meritocracy

Crosslistings: SOC241 / PSCI241

Secondary Crosslisting

Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do eight of the country’s nine sitting Supreme Court Justices. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy --- rule by the intellectually talented --- in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Class Format: seminar

Requirements/Evaluation: two papers, take-home final exam, class participation

SOC 244 (S)  What They Saw in America

Crosslistings: HIST366 / AMST244 / SOC244

Primary Crosslisting

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America— one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

Class Format: seminar; * Please note atypical class hour Monday, 4:45-8:30 pm.

SOC 248 (F)  Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WI)

Crosslistings: SOC248 / GBST247 / RUSS248

Primary Crosslisting

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Anthropology, Sociology, and Russian majors
Expected Class Size: 10
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS
DPE: This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

TUT Section: T1 TBA Thursday Org Mtg 8:30 pm - 9:00 pm Olga Shevchenko

SOC 252 (F) Moral Life in the Modern World
Crosslistings: REL286 / SOC252

Primary Crosslisting
This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical moralities of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out; that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; "thick" and "thin" moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and moral panics; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality "in," "through," and "of" literature, as students will select, read, and critique a work of fiction.

Class Format: lecture
Requirements/Evaluation: weekly discussion précis, film screenings, two book review essays, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Sociology and Anthropology students
Expected Class Size: 19
Distributions: (D2)
Not offered current academic year

SOC 264 (F) Transnational Activism: Practice, Problems, Ethics (DPE)
Crosslistings: WGSS263 / SOC264

Secondary Crosslisting
As more and more people, goods, ideas, and health hazards circulate across borders, transnational institutions and organizations proliferate, and problems recognized as regional or global intensity, there is both increasing need and opportunity for transnational activism. In such a context, it is vital to understand how activists have engaged peoples around the world and/or have influenced transnational institutions, as well as to attune oneself to the ethical and practical difficulties associated with this kind of activism. This course examines the different forms that transnational activism takes and how transnational activists have advanced their goals. We also look into why and how transnational activists' efforts have failed, focusing in particular on the issue of neo-imperialism and the problems created by the "white savior." Orienting our exploration is the following question: what is the relationship between ethics and efficacy in activism that crosses borders? What does "ethical" transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

Class Format: seminar
Requirements/Evaluation: class facilitation, assessment construction, essay proposal (3- to 4-pages), group portfolio (6- to 8-pages), group presentation, final essay (10- to 12-pages)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors
Expected Class Size: 20
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course centers activism organized around various axes of difference, enabling students to learn about how various groups are defining and pursuing equity. It requires students to explicitly engage the question of ethical intervention in political movements, stressing attentiveness to the dynamics of privilege and marginalization internal to movements. It builds the skill to engage across difference by requiring students to work together to develop a transnational activist action plan.

SOC 283 (S) Religion and Capitalism  (WI)
Crosslistings: REL282 / SOC283 / PSCI140
Secondary Crosslisting
Up through the 1960s it was popular to claim that the world was becoming increasingly and inevitably secular, with the development of modern capitalist social relations as a signature cause. Today the 'secularization thesis' is largely defunct. Instead one sees the vibrant return of religion to social, economic, and political prominence in most parts of the world—at the very same time we are experiencing through globalization and the information revolution the most dramatic economic advances in a century. This course investigates the historical and contemporary relationship between culture and economics, religion and capitalism, in their most encompassing forms. In investigating this theme, our cornerstone will be Max Weber's famous argument from The Protestant Ethic and the Spirit of Capitalism. Along the way we will discuss both the origins of capitalist society as well as its more recent transformations through the rise of the welfare state, consumerism, and globalization. We will also discuss changes in religion under the influence of capitalism including romanticism, Pentecostalism, moralistic therapeutic Deism, and the 'God gap' between largely theist Africa, South and West Asia, and the Americas on the one hand and largely atheist Europe and East Asia on the other. The focus of the course is on Christianity in Western countries both historically and in the present, but we will spend time discussing religion (particularly Pentecostalism) and capitalism in the contemporary Global South as well.
Class Format: seminar
Requirements/Evaluation: regular discussion questions, three 5- to 6-page papers, in-class paper workshops, 20- to 24-page final term paper incorporating earlier papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: open to first-years and sophomores only
Expected Class Size: 14
Distributions: (D2) (WI)

Not offered current academic year

SOC 291 (S) Religion and the American Environmental Imagination  (WI)
Crosslistings: ENVI291 / REL291 / SOC291
Secondary Crosslisting
This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of eco-spirituality and popular nature religion. Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present,
taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Extra Info: may not be taken on a pass/fail basis

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 12

Distributions: (D2) (WI)

Attributes: AMST Space and Place Electives; ENVI Humanities, Arts + Social Science Electives;

Not offered current academic year

SOC 301 (F) Social Construction (DPE)

Crosslistings: WGSS302 / REL301 / COMP315 / SOC301 / SCST301

Secondary Crosslisting

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore what it means to critically analyze race, gender, and sexuality as well as social construction as such. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

Class Format: seminar

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors, then majors from cross-listed departments

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: meets Division 2 requirement if registration is under REL, SOC, WGSS or SCST; meets Division 1 requirement if registration is under COMP. DPE: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

Attributes: PHIL Related Courses
SOC 303 (S) Cultures of Climate Change (WI)
Crosslistings: ENVI303 / SOC303

Secondary Crosslisting
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second
Expected Class Size: 19
Distributions: (D2) (WI)

Spring 2019
SEM Section: 01  TR 11:20 am - 12:35 pm  Nicolas C. Howe

SOC 315 (F) Culture, Consumption and Modernity (WI)

How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities? What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumption choices aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. We will look at fashion, advertising, arts and shopping in places as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the consequences that these patterns have for the larger social order.

Class Format: seminar
Requirements/Evaluation: full participation, ten journal entries and a 15-page term paper that will go through a draft and revision stage
Extra Info: not available for the fifth course option
Prerequisites: none; open to first year students
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Distributions: (D2) (WI)
Attributes: ENVI Humanities, Arts + Social Science Electives; GBST Urbanizing World Electives;
Not offered current academic year

SOC 324 (S) Memory and Identity (DPE)

Our sense of self is inextricably tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals’ sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective forgetting, narratives of trauma and of a "golden age," the
invention of tradition, and battles over remembrance and heritage, such as the struggles over the proper way to commemorate the victims of 9/11 in the US or the victims of Stalin's purges in the post-Soviet space.

Class Format: seminar

Requirements/Evaluation: extensive class participation, several short papers, and a final research project with class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course fulfills the DPE requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups' struggles for power and visibility.

Spring 2019

SEM Section: 01 MR 2:35 pm - 3:50 pm Olga Shevchenko

SOC 326 (S) Being Mortal

One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been "sequestered" in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of grief, loss, and mourning? How does modern medicine--which is oriented toward cure but must ultimately confront the inescapable realities of aging and death--deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

Class Format: seminar

Requirements/Evaluation: three 6- to 7-page papers; an in-class presentation; thoughtful and consistent participation in class discussion

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: if overenrolled, Sociology and Anthropology majors will receive preference

Expected Class Size: 15

Distributions: (D2)

Not offered current academic year

SOC 328 (F) American Social Dramas (WI)

Crosslistings: SOC328 / THEA328 / AMST328 / COMP325

Primary Crosslisting

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.
SOC 329 (F) Work and Future of Capitalism (WI)
What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as global commodity chains, the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. Through a series of essays, culminating in a final paper, the course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about restructuring (or even overturning) capitalism to allow them to flourish?

Class Format: seminar
Requirements/Evaluation: active participation, three utopia essays (3-5 pages), paper workshop, final paper (10-12 pages)
Prerequisites: none
Enrollment Preferences: Anthropology and Sociology majors
Distributions: (D2) (WI)
Distribution Notes: WI: This course requires a series of 3- to 5-page essays that work toward a paper workshop and final paper on the topic of the future of work. Students will use the essays to research "real utopias"—currently existing organizations, workplaces, and policy regimes that challenge traditional capitalist labor relations. This research will inform a workshop and final paper, which will ask them to envision their own organization, workplace, or policy regime.

Fall 2018

SOC 330 (S) Technology, Culture and Society
Crosslistings: SCST330 / SOC330
Primary Crosslisting
An introduction to major trajectories of theory and empirical research in the sociology and history of technology: the Social Construction of Technology (SCOT), Large Scale Technological Systems (LTS), Actor-Network Theory (ANT), and cultural studies of technoscience broadly. Students will also become acquainted with a number of philosophical positions on technology: instrumentalist, Marxist, cultural/ substantivist, humanist and posthumanist. Topics to be explored include technology, (post)industrial capitalism, and the nature of modern power; the role of technology in giving shape and weight to social institutions and forms of agency; technology, individualism, and everyday life in the modern world; technological determinism; resistance and accommodation to technological change; technology as a point of view and total way of life (culture); language, quantification, computerization, and (tele)visual media; and technology and environment. The course is furthermore designed to allow students to explore and research topics not appearing on the syllabus in the main.

Class Format: seminar
SOC 332 (F) Life and Death in Modernity

Death is a biological fact. Death is also one of the few universal parameters in and through which social worlds and individual lives are created. Death, in other words, is a primary source of the material and symbolic activities through which humans work to construct, legitimate, and maintain social realities. To attend to "ways of death", then, is to attend simultaneously, if only indirectly, to "ways of life"--the hopes and fears, the ways and wants of a people. In this course we will ask: How, why, and with what manner of consequence has it come to be that, under late-western modernity, the aged, the sick, the dying, the bereaved, and indeed death itself, are routinely "set aside", hidden from view and thus awareness, institutionally sequestered from those of us among the living? We will attend to the historical emergence of the institutional forms that perpetrate this sequestration, and show how they have become tightly articulated with one another: hospitals, nursing homes, hospice centers, funeral homes, cemeteries. We will furthermore examine the peculiar bodies of expert knowledge that have arisen in tandem with these institutional forms, among them gerontology, thanatology, and bereavement therapy, showing how they have conspired in the (bio)medicalization of aging, death, and grief. Other topics to be explored include the commodification and consumption of health and well-being; the emergence of anti-aging medicine and "popular" rationalities of human life extension; cryonic suspension, zombies, and the paranormal.

Class Format: seminar

Requirements/Evaluation: weekly journal entries, film screenings, take-home midterm, class presentations, and a final 12- to 15-page paper to be decided in consultation with the instructor

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Sociology and Anthropology students

Expected Class Size: 19

Not offered current academic year

SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Crosslistings: SOC338 / REL338 / HSCI338 / SCST338

Primary Crosslisting

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryogenic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about
We live in an age characterized by unprecedented technological and scientific progress--we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom--and yet modern life often appears fundamentally meaningless and lacking in ultimate value--we work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber's key innovation was to trace the grand trajectory of Western "rationalization"--the historical attempt to produce a world in which "one can, in principle, master all things by calculation." Further, he demonstrated how this rationalization produced not just mastery over nature, but also "the disenchantment of the world" - value fragmentation, hyper-specialization, bureaucracy, and ultimately the "iron cage" of modernity. The first part of this course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.

Class Format: seminar
Requirements/Evaluation:  attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay

SOC 362 (F) Story, Self, and Society  (WI)
Crosslistings: COMP362 / SOC362
Primary Crosslisting
From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"-that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This tutorial will grapple with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? Specific topics will include illness narratives, confessional culture, digital stories, oral history, and memoir. As a capstone exercise, each
student will construct a narrative analysis focused on a memoir that we will select collectively. The course will conclude with a final seminar meeting during which each student will tell a story of their own, and we will work together to consider how the theories we have encountered throughout the semester might illuminate our own narratives.

**Class Format:** tutorial

**Requirements/Evaluation:** 5-page paper every other week; comments on the partner's paper in alternate weeks

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** if overenrolled, students will be asked to submit a short statement of interest; priority consideration will be given to ANSO and COMP majors

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under SOC; meets Division 1 requirement if registration is under COMP

**Not offered current academic year**

**SOC 363 (F) Cold War Technocultures**

**Crosslistings:** SOC363 / SCST401

**Primary Crosslisting**

In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet "containment." We will trace the historical threads connecting MIT's "Whirlwind" computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of "thinking the unthinkable"; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race--from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome's Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-fiction as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

**Class Format:** seminar

**Requirements/Evaluation:** two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** SCST 101 or instructor consent; prior coursework in Anthropology and Sociology and/or History

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors, Science and Technology Studies concentrators

**Expected Class Size:** 15

**Department Notes:** SCST Senior Seminar

**Distributions:** (D2)

**SOC 368 (F) Technology and Modern Society**

**Crosslistings:** ENVI368 / SOC368

**Primary Crosslisting**

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in
various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar
Requirements/Evaluation: two short papers, a midterm exam, and a final exam
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none

SOC 371 (S) Medicine, Technology, and Modern Power
Crosslistings: HSCI371 / SOC371 / SCST371

Primary Crosslisting
Medicalization: those processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture
Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm
Extra Info: may not be taken on a pass/fail basis

Not offered current academic year

SOC 372 (S) Time and Temporality
Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow--time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students...
will explore the emergence of the so-called "modern western temporal order"—the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Class Format: seminar
Requirements/Evaluation: participation, time diary analysis (3-5 pages), final paper (10-12 pages)
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15

SOC 386 (S) Living with the Bomb: American Culture in the Nuclear Age
Crosslistings: SOC386 / HIST387

Primary Crosslisting
Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a midterm, a final exam, and a 10- to 12-page research paper

MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics.

Mathematics (2 courses)

MATH 150 or 151 Multivariable Calculus or equivalent high school course
MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)

CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)

STAT 201 Statistics and Data Analysis or STAT 202 Introduction to Statistical Modeling
STAT 346 Regression and Forecasting
STAT 341 Probability
STAT 360 Inferential Statistics

Continuation (2 courses)

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Colloquium Requirement

Participation in the Department Colloquium series, in which all senior majors present and attend talks on statistical topics of their choice. Majors have to attend at least 20 colloquia in their senior year and present one themselves.

PLACEMENT

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department,
appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be
taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special
arrangements.

Double Counting: No course may count towards two different majors.

Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy
the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before
enrolling in the capstone course.

Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis.
Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions
about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken
while on study away?
Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study
away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study
away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
learned they wouldn’t:
None to date.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study
which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be:
Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of
statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating
in a thesis and a presentation. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior
capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will
have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 12 (W)  writing sample and brief application
Crosslistings: MUS12 / STAT12

Primary Crosslisting

The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country-and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook's music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

Requirements/Evaluation: 10-page paper; final project; musical composition with commentary

Prerequisites: some previous singing or music-reading experience helpful

Enrollment Limit: 30

Enrollment Preferences: seniority

Materials/Lab Fee: $10 plus cost of books

Fall 2018
LEC Section: 01 TF 1:10 pm - 2:25 pm Richard D. De Veaux

Spring 2019
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on quizzes and exams

Prerequisites: MATH 150 or equivalent. Not open to students who have completed STAT 101 or STAT 161 or equivalent.

Enrollment Limit: 40

Expected Class Size: 40

Department Notes: Students with a 5 on AP Stats should enroll in STAT 202. Students with a 4 on AP Stats should consult the department. Students with MATH 130/140 background should consider STAT 161. Students with no calc. should consider STAT 101.

LEC Section: 02 TF 1:10 pm - 2:25 pm Laurie L. Tupper

Data come from a variety of sources sometimes from planned experiments or designed surveys, but also arise by much less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential as well as its limits to answer questions about the world. We'll emphasize applications over theory and analyze real data sets throughout the course.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on homework, exams and projects

STAT 344 (F) Statistical Design of Experiments (QFR)

What does statistics have to do with designing and carrying out experiments? The answer is, surprisingly perhaps, a great deal. In this course, we will study how to design experiments with the fewest number of observations possible that are still capable of understanding which factors influence the results. After reviewing basic statistical theory and two sample comparisons, we cover one and two-way ANOVA and (fractional) factorial designs extensively. The culmination of the course will be a project where each student designs, carries out, analyzes, and presents an experiment of interest to him or her. Throughout the course, we will use both the statistics program R and the package JMP to carry out the statistical analyses.

Class Format: lecture
Requirements/Evaluation: problem sets, midterm, final exam, project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: STAT 201, 202, or equivalent
Enrollment Limit: 20
Enrollment Preferences: Statistics majors, seniors
Expected Class Size: 15
Distributions: (D3) (QFR)
Attributes: COGS Related Courses;

Fall 2018
LEC Section: 01 TF 2:35 pm - 3:50 pm Richard D. De Veaux

STAT 346 (F) Regression and Forecasting (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the standard method for analyzing continuous response data and their relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 201 or 202, and MATH 150 and 250; or permission of instructor

Enrollment Limit: 22

Expected Class Size: 15

Spring 2019
LEC Section: 01   TF 2:35 pm - 3:50 pm   Laurie L. Tupper

STAT 355 (S) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at a time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on homework and exams

Prerequisites: STAT 201 and MATH 250

Enrollment Limit: 25

Expected Class Size: 10

Distributions: (D3) (QFR)

Spring 2019

STAT 356 (S) Time Series Analysis (QFR)
Time series--data collected over time--crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including smoothing, ARIMA and state space models, and a foray into the frequency domain. We will emphasize applications to a variety of real data.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on projects, homework, and exams

Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor

Enrollment Limit: 30

Expected Class Size: 20

Distributions: (D3) (QFR)

Not offered current academic year

STAT 359 (S) Statistical Computing (QFR)
This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will
be project-based.

Class Format: lecture

Requirements/Evaluation: based primarily on projects, homework, and exams

Prerequisites: STAT 201 or 202 and CSCI 134, 135, or 136

Enrollment Limit: 30

Enrollment Preferences: juniors and seniors, Statistics majors

Expected Class Size: 15

Distributions: (D3) (QFR)

Not offered current academic year

STAT 360 (S)  Statistical Inference  (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Class Format: lecture

Requirements/Evaluation: evaluation will be based on problem sets and exams

Extra Info: may not be taken on a pass/fail basis

Prerequisites: MATH 250, STAT 201 or 202, STAT 341

Enrollment Limit: 30

Enrollment Preferences: Statistics majors

Expected Class Size: 30

Distributions: (D3) (QFR)

Spring 2019

LEC Section: 01  TR 9:55 am - 11:10 am  Daniel B. Turek

STAT 362 (F)  Design of Experiments  (QFR)
How do you get informative research results? By doing the right experiment in the first place. We'll look at the techniques used to plan experiments that are both efficient and statistically sound, the analysis of the resulting data, and the conclusions we can draw from that analysis. Using a framework of optimal design, we'll examine the theory both of classical designs and of alternatives when those designs aren't appropriate. On the applied side, we'll make extensive use of R to work with real-world data.

Class Format: lecture

Requirements/Evaluation: based primarily on projects, homework, and exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 346

Enrollment Limit: 30

Enrollment Preferences: seniors/juniors and Statistics majors

Expected Class Size: 20

Distributions: (D3) (QFR)

Not offered current academic year

STAT 365 (F)  Bayesian Statistics  (QFR)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by
recent advances in computational power. We begin with an introduction to Bayes’ Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based on homework and exams

**Prerequisites:** STAT 201 and MATH 150 and 250, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** juniors and seniors, Statistics majors

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

---

**STAT 372 (S) Longitudinal Data Analysis: Modeling Change over Time (QFR)**

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. We will consider many applications in the social and biological sciences.

**Class Format:** lecture

**Requirements/Evaluation:** evaluation will be based primarily on performance on exams, homework, and a project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** STAT 201 and STAT 346

**Enrollment Limit:** 30

**Enrollment Preferences:** junior and senior Statistics majors

**STAT 377 (F) Operations Research (WI) (QFR)**

Crosslistings: MATH377 / STAT377

Secondary Crosslisting

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You’re given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved; students will be implementing many of these algorithms on computer systems of their choice. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial implementation computation (respectively, statistics) component approved by the instructor.
Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, classwork, projects, presentations and exams; at least 20 pages of writing

Prerequisites: MATH 350 or 351 and permission of instructor

Enrollment Limit: 40

STAT 440 (F) Categorical Data Analysis (QFR)

This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. All methods can be viewed as extensions of traditional regression models and ANOVA.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on performance on exams, homework, and a project

Prerequisites: STAT 346 and STAT 360

Enrollment Limit: 14

Enrollment Preferences: seniors and Statistics Majors

Expected Class Size: 12

Distributions: (D3) (QFR)

Attributes: PHLH Statistics Courses;

Not offered current academic year
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homeworks and projects

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Everything happens somewhere and sometime. But the study of data collected over multiple times and locations requires special methods, due to the dependence structure that relates different observations. In this course, we'll look at exploring, analyzing, and modeling this kind of information--introducing standard methods for purely time-series and purely spatial data, and moving on to methods that incorporate space and time together. Topics will include autocovariance structures, empirical orthogonal functions, and an introduction to Bayesian hierarchical modeling. We'll use R to apply these techniques to real-world datasets.

Class Format: lecture

Requirements/Evaluation: project work, homework, exams, and contribution to discussion.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Distributions: (D3) (QFR)

Distribution Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student’s final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as
History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department’s recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those who are interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department’s placement exam when it is offered during First Days. The only students who do not need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar’s Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.
Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This hardly ever happens but could happen if a student doesn’t seek out pre-approval from a faculty member.

RLSP 16 (W)  The Ayn Rand Cult
Crosslistings: COMP16 / ANSO16 / RLSP16
Primary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

Prerequisites: some previous acquaintance with Rand's novels

Enrollment Limit: 30

Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)

Materials/Lab Fee: approximately $90 for books

Distributions: (D1)

Winter 2019
LEC Section: 01    TBA     Gene H. Bell-Villada

RLSP 30 (W)  Honors Essay: Spanish
To be taken by candidates for honors other than by thesis route.

Class Format: honors essay

Distributions: (D1)

Winter 2019
HON Section: 01    TBA     Jennifer L. French

RLSP 31 (W)  Senior Thesis: Spanish
To be taken by students registered for Spanish 493-494.

Class Format: thesis

Distributions: (D1)
Winter 2019

RLSP 99 (W) Independent Study: Spanish
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D1)

Winter 2019

RLSP 101 (F) Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

Class Format: the class meets five hours a week; students will complete workbook and lab exercises weekly
Requirements/Evaluation: evaluation will be based on participation, regular homework exercises, quizzes, a midterm, and a final exam
Extra Info: students registered for RLSP 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLSP 101 and 102) are taken
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: This course is for students who have no previous background in Spanish.
Enrollment Limit: 20
Distributions: (D1)

Fall 2018

RLSP 102 (S) Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.

Class Format: the class meets five hours a week; students will complete workbook and lab exercises weekly
Requirements/Evaluation: evaluation will be based on daily preparation and participation, regular homework assignments, and frequent tests
Extra Info: students registered for RLSP 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLSP 101 and 102) are taken
Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school
Enrollment Limit: 20
Distributions: (D1)

Spring 2019

RLSP 103 (F) Intensive Intermediate Spanish
This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education.  

Conducted in Spanish.

Class Format: class meets four hours a week

Requirements/Evaluation: regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLSP 101-102 or by Spanish placement exam

Enrollment Limit: 20

Expected Class Size: 20

RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with relevant cultural, literary, and political materials centered for the most part on Spain. Students will produce regular grammar and composition exercises as well as oral reports.

Class Format: seminar; students are required to participate in the TA sessions once a week in addition to two class sessions
Requirements/Evaluation: regular grammar and composition assignments, a mid-term, a final exam, occasional quizzes, oral reports; active participation and regular attendance required

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLSP 104, or results of the Williams College Placement Test, or permission of instructor

Enrollment Limit: 22

Enrollment Preferences: first-year students, potential majors

Expected Class Size: 22

Distributions: (D1)

---

RLSP 107 (F) Advanced Grammar and Conversation

This course focuses on the development of Spanish linguistic accuracy and oral communication skills. Emphasis is on increasing oral fluency through exposure to media, interaction with native speakers, and participation in a variety of communicative activities. In addition, students will perform regular exercises to improve writing and syntax skills. Throughout the course, they will read journalistic and literary texts in order to stimulate oral and written response and to analyze complex grammatical structures within authentic target language contexts.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on homework, class participation, quizzes, a midterm and final exam and a series of communicative projects

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: RLSP 104, placement exam results, permission of instructor or Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish majors and certificate students, current and potential

Expected Class Size: 19

Department Notes: if you have taken RLSP 105 you can not take RLSP 107

RLSP 200 (S) Advanced Grammar and Composition through Literature (WI)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 105, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

Class Format: lecture/discussion

Requirements/Evaluation: a weekly essay based on the stories read in class, written lab exercises, participation in the grammatical and literary discussions, quizzes, a midterm and a final

Prerequisites: RLSP 105, any course 201+, placement exam or permission of instructor

Enrollment Limit: 19

Expected Class Size: 10-19

Distributions: (D1) (WI)
RLSP 201 (F) The Spanish Labyrinth

Do Spaniards really dance flamenco and have dinner at 10:00 pm? Does everyone in Barcelona speak Catalan? How can you learn to separate the stereotypical images of Spain from reality? How can we talk about one “Spain”, when the country a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship and repression. Some topics of focus will be the Inquisition, the Civil War, and contemporary Spain's obsession with its own recent past. Secondary texts will also be provided for historical and socio-political background and reference. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: Spanish majors and certificate candidates
Expected Class Size: 18
Distributions: (D1)

Fall 2018

RLSP 202 (S) Spain's Fin de Siglo and the Crisis of Ideas

In this class we will read the works of some of modern Spain's influential writers from the late part of the nineteenth century and the first three decades of the twentieth. Our aim is to understand how fiction and philosophy represented this significant time in Spain's history. The loss of the war with the U.S. in 1898, the turbulent shifts of power within the country, Spanish regional identities, and the cultural and intellectual movements that shaped Spain on the eve of the Civil War are among the key issues we will address. Our primary sources--largely fiction and poetry by artists such as Miguel de Unamuno, Azorín, Antonio Machado, Pío Baroja--will be complemented with a rigorous study of the cultural landscape of Spain at that time. Our principal engagement with philosophy will be through José Ortega y Gasset, in particular his output from the 1920s.

Class Format: seminar
Requirements/Evaluation: 2 short papers, one long research paper, and oral presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 25
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

RLSP 203 (F) From Modernismo to El Boom de la Novela (WI)

A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Class Format: seminar
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 19
Distributions: (D1) (WI)
Attributes: GBST Latin American Studies Electives;
Not offered current academic year

RLSP 205 (F)  The Latin-American Novel in Translation  (DPE)
Crosslistings: COMP205 / RLSP205

Primary Crosslisting
A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English
Class Format: lecture
Requirements/Evaluation: class participation, two brief papers, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 22
Enrollment Preferences: Spanish majors, Latina/o Studies concentrators
Expected Class Size: 22
Department Notes: does not carry credit for the Spanish major or the certificate
Distributions: (D1) (DPE)
Attributes: GBST Latin American Studies Electives

Fall 2018
LEC Section: 01    MR 2:35 pm - 3:50 pm     Gene H. Bell-Villada

RLSP 206 (S)  Latin-American Civilizations
An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.
Class Format: seminar
Requirements/Evaluation: two essays on assigned topics, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 20
Expected Class Size: 20
Distributions: (D1)
Not offered current academic year

RLSP 208 (S)  The Spanish Civil War in Literature and Film
The Spanish Civil War (1936-1939) has generated a vast bibliography and filmography that to this day reflect widely antagonistic interpretations of the conflict itself, its roots, and its impact. From the Spanish perspective, the war is the most important single event in understanding modern Spain. The ideals, passions, and consequences of the Spanish Civil War still divide Spaniards and have been recreated and relived by writers, artists, and filmmakers, and debated by historians. The course will begin with a historical introduction to the origins, development, and outcome of the war. Was the Spanish war a national struggle or an international struggle played out on Spanish soil? Along with studying internal Spanish political divisions, we will also consider the impact of the foreign policy positions of other countries-including Germany, Italy, the United States, and Russia—vis-a-vis Spain,
as well as the role of the thousands of foreign volunteers who formed the International Brigades and came from all over the world to fight against Franco. With this historical basis, we will see how the themes and issues of the war are reflected in Spanish poetry, short fiction, novels, and films from the time of the war up through the present day. Readings will include works by Ayala, Cernuda, Neruda, Goytisolo, Sender, Fernan-Gomez, and Matute. Films will include documentaries as well as classic and contemporary features. Conducted in Spanish.

Class Format: seminar

Requirements/Evaluation: evaluations will be based on lively class participation, an oral report, short written assignments, and two papers

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

RLSP 209 (F) Spanish for Heritage Speakers

This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students' existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on homework, class participation, and a series of communicative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: potential Spanish majors/certificate students and LATS concentrators

Expected Class Size: 19

Distributions: (D1)

Fall 2018

SEM Section: 01 MWF 12:00 pm - 12:50 pm Carolina Melgarejo-Torres

RLSP 211 (F) A Survey of Spanish Literature from the 11th to the 17th Centuries

This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misguided idea of dividing this literature into the categories of 'medieval' and 'Renaissance'. Conducted in Spanish. This course fulfills the pre-1800 requirement for the Spanish major

Requirements/Evaluation: evaluation will be based on class participation, short paper assignments, and a final paper

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Distributions: (D1)

Not offered current academic year

RLSP 214 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Crosslistings: ENVI218 / RLSP214

Primary Crosslisting

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies—including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism—inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider
short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Class Format: seminar
Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts
Extra Info: may not be taken on a pass/fail basis
Prerequisites: RLSP 105, placement exam results, or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Spanish and Environmental Studies majors
Expected Class Size: 12
Distributions: (D1) (DPE)
Distribution Notes: DPE: This course is inspired by and organized around Arturo Escobar’s notion of “the political ecology of difference:” our work throughout the semester aims to understand the myriad ways in which “difference”—economic, ecological, and cultural—forms Latin American responses to environmental degradation.

Spring 2019
SEM Section: 01   MWF 12:00 pm - 12:50 pm   Jennifer L. French

RLSP 220 (S) Women on the Verge
Crosslistings: RLSP220 / WGSS222
Primary Crosslisting

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

Class Format: seminar
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Spanish and Comparative Literature majors
Expected Class Size: 20
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under RLSP; meets Division 2 requirement if registration is under WGSS
Not offered current academic year

RLSP 225 (F) Subalternity, Dictatorship, and the Dream of Emancipation: Paraguay, 1811-Present  (WI)

Paraguay is at once the most "typical" of Latin American countries and the most enigmatic. With a predominantly Guarani-speaking population, enormous disparities of wealth and poverty, and a political tradition that favors authoritarian dictatorship, Paraguay is also celebrated, in certain circles, as the only Latin American nation that actually achieved economic and political independence when the other republics were fast becoming economic dependencies of Britain and the US in the 19th century. This course explores the subjects of subalternity, dictatorship, and the "dream of emancipation" in Paraguay's cultural production of the 19th, 20th, and 21st centuries. We will examine together the writings of the brilliant novelist Augusto Roa Bastos, especially Son of Man and I the Supreme; stories and poems by Teresa Lamas, Josefina Pla, and others; Paraguay's rich and vibrant tradition of visual art; and works of classic and contemporary film. Conducted in Spanish.

Class Format: seminar
Requirements/Evaluation: three essays of 5-7 pages, shorter writing assignments, discussion-leading, active and engaged class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Spanish majors
Expected Class Size: 10
Distributions: (D1) (WI)
Not offered current academic year

RLSP 228 (S) Velázquez, Goya, and Picasso (WI)
Crosslistings: RLSP228 / ARTH228

Primary Crosslisting
This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.
Class Format: tutorial
Requirements/Evaluation: 3- to 5-page weekly assignment
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: WI: The tutorial format offers students an intensive opportunity to improve their writing by demanding regular writing assignments that the student has to read out loud to their partner and professor. Students write biweekly papers throughout the semester. These papers are then analyzed during the tutorial session by the other student's response

Spring 2019
TUT Section: T1 TBA Soledad Fox

RLSP 230 (F) Mexican Literature and Film
This course will offer a survey of the rich and varied cultural production of Mexico, from the colonial period to the present. Students will explore a variety of literary genres (novels and shorter works of prose fiction, poetry and essays) as well as film, journalism and other kinds of cultural production within a framework of historical contextualization and formal analysis. Conducted in Spanish.
Class Format: seminar
Requirements/Evaluation: essays, oral presentations, active and engaged class participation
Prerequisites: Spanish 105, placement exam results, permission of instructor or Department Chair
Enrollment Limit: 19
Enrollment Preferences: Spanish majors and certificate students, current and potential; LATS concentrators

Expected Class Size: 15

Distributions: (D1)

Fall 2018

SEM Section: 01    TF 2:35 pm - 3:50 pm     Roxana A. Blancas Curiel

RLSP 301 (S) Cervantes' “Don Quijote”  (WI)

We will devote the entire semester to the study of one novel: Miguel de Cervantes' Don Quijote, published in the early part of the 17th century. We will try to understand the reasons for the novel's immense and ongoing influence on Western literature and thought. To do so, we will study Cervantes' masterful handling of issues that continue to have an uncanny relevance to our lives today: relationships between men and women, the perception of Muslims by Christians and vice versa, the role of fiction in life, the shapes of mental illness, how we decide who we are, how our governments and families and friends decide who we are, the fun and annoyance of going on a totally disorganized road trip with someone else, the meaning of justice, and the meaning of storytelling, to name a few things. In the process, we will continually set things in context and make sure that we understand what was going on in Cervantes' world that might better explain what goes on in his novel. Finally, we will find that even an entire semester is not enough to engage fully with this extraordinary work, but we will be very glad that we made some headway. Conducted in Spanish

Class Format: lecture/discussion

Requirements/Evaluation: active class participation; two to three short projects and one final research project

Prerequisites: any 200-level RLSP course at Williams that is conducted in Spanish, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors and Comp Lit majors with the appropriate command of Spanish

Expected Class Size: 15

Distributions: (D1) (WI)

Not offered current academic year

RLSP 303 (S) Cervantes' "Don Quixote" in English Translation

Crosslistings: COMP350 / RLSP303 / ENGL303

Secondary Crosslisting

A close study of one of the most influential and early European novels. Don Quixote by Miguel de Cervantes (1547-1616 C.E) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the Quixote: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co-existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine modern English-language translation, and set it in several relevant contexts to better understand its original intellectual horizon—seventeenth-century Spain—as well as the reasons for its continuing relevance.

Class Format: seminar

Requirements/Evaluation: active participation, at least two short papers, and a final project designed in consultation with the instructor

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 200-level literature course in foreign languages, COMP, or ENGL, or permission of the instructor.

Enrollment Limit: 30

Enrollment Preferences: Spanish and Comparative Literature majors and upper-class students

Expected Class Size: 30

Department Notes: can count toward the major in Spanish, but consult Dept for details

Distributions: (D1)

Attributes: ENGL Literary Histories A

Spring 2019
RLSP 306 (S) Latino Writing: Literature by U.S. Hispanics (WI)
Crosslistings: RLSP306 / COMP302

Primary Crosslisting
Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarreal, Tomas Rivera, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Díaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.

Class Format: tutorial
Requirements/Evaluation: five short oral presentations/papers (about 20-25 minutes) and a final longer one (about 40-45 minutes)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200-level RLSP course or seek permission of the tutor
Enrollment Limit: 10
Distributions: (D1) (WI)
Attributes: AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora; LATS Countries of Origin + Transnationalism Elect; Not offered current academic year

RLSP 308 (S) The Subject of Empire: Race, Gender and Power in the Colonial Era
This class studies Latin American literature of the colonial era (1492-1898) from the perspective of the constitution of the subject: the autobiographical 'yo' that is both the subject of discourse and the object of sovereign power. Our readings will include the most outstanding texts of the group collectively known as the Chronicles of the Conquest--the letters of Christopher Columbus and Hernán Cortés and Bernal Díaz del Castillo's True History of the Conquest of New Spain, among others--whose authors endeavor to establish their historical authority and legitimate their actions before the Spanish king. We will also read later works in which racially and sexually marginalized subjects struggle to contest the identities and the conditions imposed on them by a distant sovereign through far-reaching institutional networks: the mestizo historian known as El Inca Garcilaso de la Vega, the cross-dressed soldier Catalina de Erauso, the poet Sor Juana Inés de la Cruz, and the slave Juan Francisco Manzano.

Class Format: seminar
Requirements/Evaluation: one short (7-page) paper, one longer (15-20 page) paper, proposal, bibliography, discussion-leading
Prerequisites: one RLSP course at the 200-level or above or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Spanish majors
Expected Class Size: 12
Distributions: (D1)
Attributes: GBST Latin American Studies Electives
Not offered current academic year

RLSP 319 (S) Dictatorship and the Latin-American Novel (DPE)
Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive
and profound.

Class Format: seminar

Requirements/Evaluation: three 8-page papers, an oral report, a final 3-page paper, and class participation

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Spanish majors, Latina/o Studies concentrators

Expected Class Size: 5-10

Distributions: (D1) (DPE)

Distribution Notes: DPE: This course focuses on the ultimate sort of power—namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence—Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

Spring 2019

SEM Section: 01    MR 2:35 pm - 3:50 pm     Gene H. Bell-Villada

RLSP 322 (S) Islam in Spain

Crosslistings: ARAB322 / RLSP322

Primary Crosslisting

The presence of Islam—in all its diverse manifestations—is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods, and study several works—primarily of literature, though we will supplement with other texts—in which Muslims and Islam have been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives that include Christian and Muslim writers as well as converts on both sides. While the bulk of the course is focused on the period prior to 1700 CE, we will devote the final few weeks of class to the study of Islam in contemporary Spain using fiction, legal debates, and issues related to immigration. Conducted in Spanish

Class Format: seminar

Requirements/Evaluation: two short papers, oral presentations, one final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any RLSP 200-level class, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, Arabic Studies majors

Expected Class Size: 15

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under ARAB

Not offered current academic year

RLSP 402 (S) Senior Seminar Madrid: 1939-2004

In this course we will examine life in Madrid during two key periods: the Franco Dictatorship (1939-1975), and the first four decades of democracy (1975-2016). We will consider how representations of urban landscapes (churches, convents, prisons, museums, slums, bars and schools) have shaped and reflected the lives of madrileñas and madrileños past and present. We will study works by 20th century and contemporary Spanish authors, filmmakers, photographers, and journalists, as well as period advertisements and examples of popular culture. How was Madrid's image as international capital of art, sun, soccer and bullfighting forged? What remnants of the past lurk behind this appealing façade? How do the Atocha train Station bombings of 2004 relate to unresolved political tensions from 1939?

Class Format: seminar

Requirements/Evaluation: active participation in class discussions, oral presentations, short writing assignments, and a final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any 300 level RLSP course or permission of instructor

Enrollment Limit: 10
**Enrollment Preferences:** Spanish majors and certificate candidates

**Expected Class Size:** 10

**Distributions:** (D1)

**RLSP 403 (F) Senior Seminar: Early Modern Love and Marriage**

We might think that love is a natural human feeling and marriage its happiest consequence, but in fact these two conditions are among the most carefully constructed phenomena in any society, highly dependent on time period and place. In this senior seminar we will focus on pre-modern Iberia to study the many manifestations and constructions of love (and marriage), several of which continue to influence definitions of both to this day. We will look at sacred, profane, family, and married love through treatises, medical writings, plays, short stories, poems. Our theoretical underpinnings will come from reflections on love from the time period under consideration as well as contemporary critiques of love and marriage. Primary sources will include early lyrical traditions, the poetry of King Alfonso X, the works of Santa Teresa, Lope de Vega, Calderón de la Barca, Cervantes, among others. Conducted in Spanish.

**Class Format:** seminar

**Requirements/Evaluation:** regular presentations, two to three short papers, one research paper preceded by class presentation, active participation and regular attendance required

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** any 300-level RLSP course or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** senior Spanish majors and Comparative Literature seniors with Spanish focus

**Expected Class Size:** 15

**Distributions:** (D1)

The Department of Theatre is committed to the merging of embodied practice and scholarship in the fields of theatre and performance studies. The curriculum is dedicated to the study, practice, appreciation, and interpretation of theatre, performance, and other time-based arts. The major in Theatre emphasizes the collaborative nature of the theatre and performance making by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying theatre and performance as artisticphenomanon and as interpretive tools. Because a deep understanding of theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the '62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

MAJOR

The Major in Theatre consists of nine courses, including the following:

- Theatre 101 The Art of Playing: An Introduction to Theatre and Performance
- Theatre 201 Worldbuilding: Staging and Design For The Theater
- Theatre 301 Embodied Archives: Global Theatre & Performance Histories
- Theatre 406 Practicing Theory: Senior Seminar

Five additional elective courses must be taken from the department's other offerings (including courses cross-listed with Theatre). Two of the five electives must be taken at the 200-level or higher by the end of the student's junior year, and an additional two of the five must be taken at the 300-level or higher by the time of graduation. Substitutions of other Williams' courses, or of Study Abroad courses, may be made only with the consent of the department Chair. Students should consult with the department Chair regularly in planning a balance of practice and scholarship in their elective choices and in mapping a route through the major.

Production Requirement for the Theatre Major:

All majors in Theatre are required to participate in a minimum of four department productions. Participation in at least one of these four must be in stage management. Assignment to productions in stage management must be made in consultation with the department Chair. Students participating in a production will be enrolled in THEA 290-299: Theatre Department Production as a partial-credit, fifth course, admitted by permission of the department Chair and evaluated on a Pass/Fail basis only. Students remaining in the course beyond the sixth week of the start of a term will be graded by the instructor. Participation in production work is open to all members of the Williams College community. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors will apply for admission through the submission of a portfolio to the Department Chair by February of their junior year, as well as a description of their proposed project. The project description is a written essay of approximately 750-1000 words that describes in detail the nature, goals, methodology and approximate budget, if applicable, of the proposed course of study to be undertaken in the pursuit of Honors. When developing their project proposal, candidates are encouraged to familiarize themselves with successful past Honors projects from materials provided by the Department. The portfolio will be comprised of four parts:

The first part will include a list of the courses students have taken relevant to their work towards the major. This list will include courses offered by...
the Theatre Department, but may also include classes taken in other Departments. Students should also list and describe relevant independent studies and production credits.

The second part of the portfolio will include a selection of materials developed for these courses and productions listed in Part 1. The selection should include at least three papers or samples of other written work, and might also include design projects, director’s notebooks, studio art projects, actor’s journals or other forms of documentation of the candidate’s work. For students who have taken a semester away, it is particularly important that they provide the Department with a detailed picture of their activities while studying off-campus. Course descriptions and syllabi should be submitted in addition to a list of courses taken and activities performed.

The third part of the portfolio is an annotated bibliography of approximately twelve dramatic or critical texts the student has read, and that the student feels have had particular relevance in their Theatre education to date. Annotations should be based upon a particular angle of engagement with the text, that reflects the area or areas that the student has chosen to emphasize in their theatrical training. For instance, one might choose to write from the point of view of an actor, a designer, a director, a playwright, or a dramaturg. Generally, annotations should be one or two paragraphs long.

The portfolio should conclude with a retrospective essay that reflects on the materials that are being submitted. Students should look for connections between the various aspects of their work, state any theoretical positions that they have come to embrace, assess their strengths and weaknesses, and discuss their educational goals for their work with the Department during their Senior year.

The portfolio will be examined alongside the student’s record and their project description; a determination will then be made as to admission into the Honors program. Students intending to apply for Honors should meet with the Department Chair or designated Honors Coordinator by the end of the fall semester of their junior year. Once a student is admitted to the Honors program, the department Chair will assign an Honors Project Advisor, who will work with the student to specify a timeline and work program for the completion of the Honors Project. At a minimum, this will entail enrollment in Theatre 493 or 494, plus W32, plus one other course offered either within the department or elsewhere that the candidate and thesis advisor designate as contributing specifically to the overall goals of the honors work. This honors elective may not fulfill any other portion of the Theatre Major, or any other major the student may be pursuing. All honors candidates will present their completed projects to the Department Honors Committee for evaluation.

STUDY ABROAD

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
THE NATIONAL THEATRE INSTITUTE

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve-College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O’Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

THEA 14 (W) Classic and Contemporary Musical Theater
Crosslistings: MUS14 / THEA14
Secondary Crosslisting

This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus--now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

Class Format: afternoons
Requirements/Evaluation: a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: the instructor will communicate with those wishing to register either in person or via email
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019

THEA 15 (W) Shadow Puppetry
Crosslistings: ARTS15 / THEA15
Primary Crosslisting

The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, "It is in the very limitations of shadows that we learn...It is in the gap between the object and its representation that the image emerges, the gap we fill in." In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and
South Africa, including a Fulbright with the Handspring Puppet Company.

**Requirements/Evaluation:** short presentations and works in progress

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** students will be asked to submit a letter of interest

**Materials/Lab Fee:** $215

**Attributes:** EXPE Experiential Education Courses

**THEA 20 (W) Performing Self-Portraiture in the Age of Instagram**

Crosslistings: AFR20 / THEA20 / WGSS20 / ARTS20

**Primary Crosslisting**

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacolby Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

THEA 99 (W) Independent Study: Theatre

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

THEA 101 (F) The Art of Playing: An Introduction to Theatre and Performance

Crosslistings: COMP151 / THEA101

Primary Crosslisting

An introduction to the global art and practice of making theatre. Students will learn basic methods of acting alongside fundamentals of dramatic and live performance analysis. Emphasis will be on the comparative study of global embodied practices and literature in the fields of theatre and performance studies. Through workshops with guest artists and faculty, we will explore cutting-edge approaches to the field, deepening our engagement with theatre as a constantly evolving art form. Students are required to attend and write about live performances and art throughout the term. As a capstone project, students will perform selected scenes before a public audience, using practical and interpretive skills gained from the course. This course is open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Class Format: seminar; course will include both a seminar (1 hour and 15 minutes/week) and studio (2 hours and fifteen minutes/week); the total class meeting time will be 3 hours and 30 minutes per week

Requirements/Evaluation: two 5-page critical papers, weekly in-class writing, script analyses, studio presentations, active participation in class, and a final public performance

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 18

Distributions: (D1)

THEA 102 (F) In the Room Together: An Introduction to Dance, Theatre, and Live Performance
Primary Crosslisting

This course offers an introduction to the time-based art of performance, focusing on the embodied and social act of collaboration. Students will explore through a rotating studio and seminar-based format methods for creating and approaching art across a range of time-based media (dance, theatre, performance art, social media, spoken-word poetry), providing a foundation for the expression of ideas through performance. Over the term, students will develop, workshop and perform site-specific pieces, culminating in a final public presentation to the community. Through independent research projects, writing and class discussion, students will study makers whose work unsettles the boundaries of dance, theatre, and performance, such as: Anne Bogart, Bill T. Jones, Pina Bausch, Meredith Monk, Lin Manuel-Miranda, E. Patrick Johnson, Young Jean Lee, and Beyoncé. Evaluation will be based on an assessment of the student's work, participation, commitment, practice, curiosity, creativity, and collaboration with peers. Students will be required to attend '62 Center Series programming as may be required to attend other performance events as well. This course is open to students at all levels of experience and is a gateway and requirement to the major in Theatre.

Class Format: combined studio/seminar

Requirements/Evaluation: assignments will include writing reflections, showings of works in progress, oral presentations, a final performance, and a 5- to 7-page curatorial paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering the major or already majoring in Theatre

Expected Class Size: 18

Department Notes: this course serves as the gateway to the major in Theatre and is a prerequisite for several courses in the Theatre major

Distributions: (D1)

Not offered current academic year

THEA 103 (F) Acting: Fundamentals

In this course students will examine the power of public presence through theory and practice while expanding their talents, sensitivity, and imagination, and will increase their self-awareness, confidence, creativity, and other skills that are useful in social situations, public speaking, and theatre performances.

Class Format: studio

Requirements/Evaluation: evaluation will be based on committed participation in class, preparation and performance of assigned material, and some modest written assignments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: none

Expected Class Size: 14

Distributions: (D1)

THEA 120 (S) Introduction to Performance Art

Crosslistings: ARTS120 / THEA120

Secondary Crosslisting

Historically, artists have turned to performance art during times of collective trauma to observe, analyze, and deconstruct established systems of power. This course will explore the legacy, theory, and practice of this radical and subversive genre. Equal parts studio and seminar students will engage in open dialogue based on assigned readings, screenings, and museum/gallery visits. Starting with the emergence of Dadaism during World War I, and exploration of works by artists that will include: Adrian Piper, David Hammons, Lynda Montano, Chris Burden, Clifford Owens, and Anna Mendieta, students will gain an understanding of the mechanisms of performance: The body as object, The Gaze (the dynamics of viewing/being
viewed), active and inactive participants, and breaking the fourth wall. This class is open to all students that are willing to embrace the awkwardness of their humanity and the vulnerabilities of our collective bodies.

**Class Format:** combined studio/seminar

**Requirements/Evaluation:** completion of 4 assigned projects, assigned readings, active class participation, creation of an independent final project, attend scheduled lectures, museum/gallery trips

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Art Studio majors, first-years, sophomores

**Expected Class Size:** 15

**Materials/Lab Fee:** lab fee of $100 will be charged to term bill

**Distributions:** (D1)

Not offered current academic year

**THEA 125 (F) Theater and Politics (WI)**

**Crosslistings:** ENGL125 / THEA125

**Secondary Crosslisting**

This seminar traces the surprisingly close and controversial relationship between theater and politics from ancient Greek tragedy to modern literature, contemporary film and philosophy. When Plato kicked off political philosophy by outlining his ideal city-state, one of his first moves was to ban theatrical performance on the grounds that play-acting would make men poor governors of themselves. In more recent times, however, the work of artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud have provocatively suggested that theater itself could remedy the ills that Plato thought it caused. In today’s age of global spectatorship, writers, artists, and activists continue to ask: who are the real actors and spectators of today's digital world-stage, when governments and other powerful institutions have increasingly sophisticated tools for gathering information about and controlling the on-looking masses, but revolutions are nevertheless organized via social media or triggered by cell phone images? May include works by Plato, Euripides, Melville, Woolf, Rancière, and Claire Denis.

**Class Format:** seminar

**Requirements/Evaluation:** three papers and a portfolio of interpretive questions, totaling 20 pages of written work

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 19

**THEA 129 (S) Institutional Critique**

**Crosslistings:** THEA129 / ARTS129

**Secondary Crosslisting**

This introductory course will investigate the performance potential of the radical art making methodology known as Institutional Critique. Influenced by Situationalism, and the Fluxus movement, Institutional Critique emerged as a way for artists to respond to the art worlds elitism, monopoly on culture, and dependency on Capitalism. Through collaborative performance based projects and readings students will explore the possibility of art to critically intervene in the hegemonic order and insight change within power relationships. We will also explore related movements such as Socially Engaged Practice, a term that describes art that is participatory and focuses as people as the medium. Artists covered will include: Thomas Hirshhorn, Tim Rollins, and Andrea Fraser. You do not need any prior experience just a willingness to use the power of voice and body.
Class Format: studio
Requirements/Evaluation: 3 collaborative projects, final independent project, readings, active participation, museum gallery visits, quality of work
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10
Distributions: (D1)

Spring 2019
STU Section: 01    TBA     Allana M. Clarke

THEA 141 (F) Opera
Crosslistings: MUS141 / THEA141
Secondary Crosslisting
An introduction to the history of opera, from the genre’s birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass and Adams. This course may involve a trip to the Metropolitan Opera.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on a midterm, a brief paper, an 8-page paper, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: none
Expected Class Size: 20
Distributions: (D1)

THEA 150 (S) The Broadway Musical
Crosslistings: MUS150 / THEA150
Secondary Crosslisting
Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: lecture/discussion
Requirements/Evaluation: based on a midterm, a brief paper, an 8-page paper, and a final exam
Theatre 201 (S) Worldbuilding: Staging and Design For The Theater

Crosslistings: ARTS201 / THEA201

Primary Crosslisting

This course examines the designer's and director's creative processes as they work together to imagine the fictional worlds of theatrical productions. Over a series of practical projects in staging, mise-en-scene, and various design disciplines, we will develop techniques for eliciting an initial creative response to a text, developing that response into a point-of-view, and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with one another, and with the work of the actors and director, to form the larger intellectual, emotional, and physical context of the work as a whole. Students will adopt various creative roles throughout a series of assigned projects, giving a broad exposure to the work of designers and directors. Basic presentation skills and technique, as well as methodologies for critical feedback, will be taught as crucial elements of staging and design development.

Class Format: studio

Requirements/Evaluation: evaluation will be based upon committed participation in class discussion and feedback; and the thoughtful, timely completion of 4 design/staging projects plus a month-long final project taken through multiple iterations

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 30

Distributions: (D1)

Spring 2019

LAB Section: 02  W 1:10 pm - 3:50 pm  David Gurcay-Morris

Theatre 202 (F) Ways of Knowing: Music, Movement, Memory

Primary Crosslisting

This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the "civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive. The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic to close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing, remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities. Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to them critically not only through writing and discussion, but also through their own performance practices.

Class Format: seminar
THEA 204 (S) Acting: Scene Work
Students will continue to develop technical skills, and the emotional and intellectual resources, required for the actor. The focus will be on the issues of characterization, textual understanding and emotional depth. The means of study and experimentation will be intense scene work requiring thorough preparation and creative collaboration. Improvisation and other exercises will be used to complement the textual work. The dramatic texts providing scenes for class will be from the early realist works onward. Students will be expected to have had previous acting or performance experience, either through completion of Theatre 101, 102, or 103 or through other relevant production experience.

Class Format: studio
Requirements/Evaluation: although there will be some modest written assignments, evaluation in the course will principally reflect the degree of committed participation in the preparation and performance of acting exercises
Extra Info: may not be taken on a pass/fail basis
Prerequisites: THEA 101, 102, or 103 or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Theatre majors or prospective Theatre majors
Expected Class Size: 14
Department Notes: this course is intended for students coming out of THEA 101 who are interested in continuing with acting
Distributions: (D1)
Attributes: PERF Interdepartmental Electives

Spring 2019
STU Section: 01  M 1:10 pm - 3:50 pm  Robert E. Baker-White

THEA 206 (S) Directing for the Stage
An introduction to the resources available to the Stage Director for translating interpretive concepts into stageworthy physical realization. Kinetic and visual directorial controls, as well as textual implications and elements of dramatic structure, and strategies of working with actors and other collaborators will be studied in detail. Most assignments will involve hands-on directing projects presented in class for collective critique.

Class Format: studio
Requirements/Evaluation: evaluation will be based principally on committed participation in the preparation and performance of production exercises; there will be some written assignments, including the assembly of directing production books and critiques of several productions
Extra Info: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Theatre majors and prospective Theatre majors
Expected Class Size: 8
Distributions: (D1)
THEA 207 (S) Acting: Physical Theatre and Body Language
This semester Theatre 207 will focus on processes of Physical Theatre. The class is open to students interested in developing their ability in communication through the art of body language. Assigned research, analysis, discussions, and improvised exercises on stage will give us the opportunity to expand our understanding of physical vocabulary and will help us to express our intentions by evocative behavior. Based on various theatre techniques, this course will hone artistic skills for performance and improve students' confidence in their interactions with other people.

Class Format: studio
Requirements/Evaluation: evaluation will be based on committed participation in class, and preparation and performance of assigned material
Prerequisites: none
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D1)

THEA 208 (F) Voice, Speech & Song for the Actor
Continuing the vocal technique work in THEA 205, this course provides an intense practice that further deepens the body-voice connection, builds and troubleshoots speech technique, and expands vocal strength, range and endurance through song. Through incorporating the resonator techniques of Roy Hart and Meredith Monk, the speech drills of Edith Skinner and the fundamentals of musical training for the voice, students finish the course able to complete an hour long full voice/speech/song work out. In addition to building a repertoire of voice, speech and singing drills; students will explore how to "act" a song, combining speaking and singing, using songs from the plays of Bertolt Brecht.

Class Format: studio
Requirements/Evaluation: attendance, participation, drills, and tests on technique
Extra Info: may not be taken on a pass/fail basis
Prerequisites: Intro to Acting (100-level course) or permission of the instructor
Enrollment Limit: 14
Enrollment Preferences: Theatre majors, then Music majors
Expected Class Size: 10
Distributions: (D1)
Not offered current academic year

THEA 209 (F) Public Speaking: Traditions and Practice
Crosslistings: THEA209 / AFR202
Secondary Crosslisting
Effective oral communication skills are necessary for any student, regardless of major or area of concentration. This course is designed to give students an introduction into the fundamentals of oral communication. We will discuss the critical role of both speakers and listeners within the transactional process of communication. Together we will explore African American oratorical traditions through viewing, listening to, and reading speeches from notable figures such as Frederick Douglass, Fannie Lou Hamer, Barak Obama, and many others. With an emphasis placed on Aristotelian and African American rhetorical methods of persuasion, evidence-based research, and organization, students will gain a better understanding of what it means to be an ethical and responsible communicator. Students will give three formal speech presentations with a focus on informative and persuasive elements. Through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate in the public setting.

Class Format: seminar
**Requirements/Evaluation:** students will give three formal speech presentations with a focus on informative and persuasive elements; through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year and sophomore students.

**Expected Class Size:** 19

**Distributions:** (D2)

**Distribution Notes:** meets Division 2 requirement if registration is under AFR; meets Division 1 requirement if registration is under THEA

Not offered current academic year

THEA 211 (F) Performing Greece

Crosslistings: CLAS211 / THEA211 / COMP248

**Secondary Crosslisting**

Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators as written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. From the Homeric epics and the masterpieces of Greek tragedy and comedy to the speeches and dialogues of Demosthenes, Thucydides, and Plato, we will survey the evidence for the musical, visual, and embodied aspects of Greek literature. At the same time, we will reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imagining of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek civilization, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. In addition to a wide selection from Greek poetry, drama, and prose, our readings will include works by ancient and modern theorists of performance and culture. *All readings are in translation.*

**Class Format:** lecture

**Requirements/Evaluation:** class participation, two essays (5 pages), midterm, final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-year students and sophomores and majors in Classics, Comparative Literature, and Theatre

**Expected Class Size:** 35

**Distributions:** (D1)

THEA 212 (F) From Stage to Page: Writing about Dance (WI)

Crosslistings: DANC212 / THEA212

**Secondary Crosslisting**

We commonly understand the word “choreography” to mean the creation of dance movement. The Greek roots of choreography, however, are *choreia* (the synthesis of dance, music and singing) and *graphein* (to write). For centuries, people have attempted to pin dance down on the page, translating an ephemeral, embodied performance art into written form. In this writing-intensive tutorial, students will investigate four major modes of dance writing: dance notation or scoring, dance criticism, dance ethnography, and dance history, with a shorter fifth unit on a new avant-garde form, “performative writing.” Students will study important examples of each form, such as Rudolf Laban’s famed system of dance notation and Katherine Dunham’s ethnographic account of dance in Jamaica, *Journey to Accompong*. Students will then delve into each form of writing themselves. For example, they will work with Mellon Artist-in-Residence Emily Johnson as “scribes” for her creative process, attend live dance concerts at the ’62 Center and Mass MoCA as the basis for writing pieces of dance criticism, conduct participation-observation research by attending social dance events to write mini-ethnographies of their experiences, and work with librarians to learn about resources at Sawyer for researching dance history.

**Class Format:** tutorial

**Requirements/Evaluation:** short analytical papers every other week, preparedness for being a respondent and discussant
THEA 214 (S) Playwriting (WI)
Crosslistings: THEA214 / ENGL214

Primary Crosslisting
A studio course designed for those interested in writing and creating works for the theatre. The course will include a study of playwriting in various styles and genres, a series of set exercises involving structure and the use of dialogue, as well as individual projects. We will read and we will write, beginning with small exercises and working toward a longer final project. Students will be expected to share in and respond to each other’s work on a weekly basis, and to present their own work regularly. At the end of the term, we will share our collaborative work with the community as part of an open studio experience.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on attendance, completion of all class assignments, and class participation
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Theatre and English majors
Expected Class Size: 14
Distributions: (D1) (WI)
Attributes: FMST Related Courses;
Not offered current academic year

THEA 215 (S) Asian-American Identities in Motion: Global Approaches to Dance
Crosslistings: DANC214 / THEA215 / AMST214 / GBST215

Secondary Crosslisting
The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Class Format: seminar
Requirements/Evaluation: evaluation includes reading responses and essays, class participation, and presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under DANC or THEA; meets Division 2 requirement if registration is under GBST or AMST
THEA 215 (F) Performance Ethnography: Global Approaches to Dance

Crosslistings: ANSO214 / THEA215 / AMST214 / DANC214 / GBST215

Secondary Crosslisting

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement and performance ethnography. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) will read ethnographic studies of dance and performance practices from different parts of the world, and (iii) will do field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and will include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: class participation, reading responses and essays, fieldwork and field notes, and presentations

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

THEA 222 (S) Solo Performance

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

Class Format: tutorial

Requirements/Evaluation: creating a script, building a character, developing various aspects of design, performing a solo piece, and writing a self-evaluation at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: to be determined by instructor

Expected Class Size: 4

Distributions: (D1)

Spring 2019

TUT Section: T1 TBA Omar A. Sangare
THEA 225 (F) Gender and Sexuality in Asian American Theater
Crosslistings: THEA225 / COMP218 / WGSS225

Secondary Crosslisting
This class begins with the premise that intersectional and interdisciplinary studies of gender and sexuality need to be, and in significant ways already are, in conversation with Asian American studies and theater. How might contemporary Western discourses of masculinity and heterosexuality, for example, depend upon theatrical constructions of Eastern sexual alterity? How have Asian American artists managed and critiqued historically gendered and sexualized stereotypes (e.g., hypersexual Dragon Lady, virginal Lotus Blossom, asexual Charlie Chan) through theatrical intervention? This seminar will closely read dramatic literature written by Asian American artists, as well as engage scholarship in Asian American gender and sexuality studies and performance studies. We will read the work of playwrights including Ayad Akhtar, Ping Chong, Frances Ya-Chu Cowhig, Velina Hasu Houston, David Henry Hwang, Young Jean Lee, Diana Son, Lauren Yee, and Chay Yew.

Class Format: seminar
Requirements/Evaluation: in-class participation, weekly reading responses, midterm reflection, in-class reading, short essay, final essay
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: declared WGSS majors
Expected Class Size: 16
Distributions: (D2)
Distribution Notes: meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under THEA or COMP
Not offered current academic year

THEA 226 (S) Gender and the Dancing Body
Crosslistings: THEA226 / AMST226 / DANC226 / WGSS226

Secondary Crosslisting
This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative values. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course but will also include attendance at live performances, film screenings, and discussions with guest artists. No previous dance experience required.

Class Format: seminar
Requirements/Evaluation: class participation, reading responses and essays, and presentations
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: WGSS majors
Expected Class Size: 10-15
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under DANC or THEA; meets Division 2 requirement if registration is under WGSS or AMST

THEA 227 (S) Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture
Crosslistings: THEA227 / CHIN227 / COMP227

Secondary Crosslisting
This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion
Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: students who major or plan to major in Chinese and/or Asian Studies
Expected Class Size: 15
Distributions: (D1)
Not offered current academic year

THEA 229 (S) Modern Drama
Crosslistings: COMP202 / THEA229 / ENGL202

Primary Crosslisting
An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Hedda Gabler; Wilde, The Importance of Being Earnest; Chekhov, The Cherry Orchard; Pirandello, Six Characters in Search of an Author; Brecht, Mother Courage; Miller, Death of a Salesman; Beckett, Waiting for Godot; Hansberry, A Raisin in the Sun; Pinter, Betrayal; Churchill, Cloud Nine; Stoppard, Arcadia.

Class Format: lecture
Requirements/Evaluation: two 5-page papers; regular journal responses; a final exam; and active participation in class discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Theatre, English, and Comparative Literature majors
Expected Class Size: 18
Department Notes: this course is strongly recommended for any students majoring in Theatre
Distributions: (D1)

THEA 240 (S) Queer Drama (DPE)
Crosslistings: THEA240 / WGSS237

Primary Crosslisting
This seminar course is a deep dive into the richly dissonant dialogue between queer lives and live performance. How have queer artists shaped and reshaped the field of theatre and performance over time? How has drama, in turn, shaped the landscape of queer life? What inventions and innovations might we attribute to the evolution of "queer"? We will look to the work of artists such as Tennessee Williams, Tarell McCraney, Taylor
Mac, Reza Abdoh, Sharon Bridgforth, Virginia Grise, and many others as we seek to map the messy topography of queer performance.

Class Format: seminar, three hours per week

Requirements/Evaluation: two 5-page papers, participation in text-based seminars, and a final performance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if the class is overenrolled, students will submit a letter of interest in the class

Expected Class Size: 14

Distributions: (D1) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under THEA; meets Division 2 requirement if registration is under WGSS DPE:

This course takes "queer" as an analytical and methodological lens for approaching questions of power, performance, and self-making.

Spring 2019

SEM Section: 01 W 1:10 pm - 3:50 pm Shayok Misha Chowdhury

THEA 241 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Secondary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

Attributes: EXPE Experiential Education Courses; FMST Related Courses; LATS Comparative Race + Ethnic Studies Electives

Not offered current academic year

THEA 243 (S) Opera Since Einstein (W)

Crosslistings: MUS244 / THEA243

Secondary Crosslisting

After 400 years, we might assume we know what "opera" is. However, in recent decades the genre has moved far beyond our preconceptions. This course asks us to examine opera of the last forty years with fresh eyes and ears, expanding our understanding of the term to include the interdisciplinary, multimedia, cross-cultural work that has been created by composers, directors (Peter Greenaway, Peter Sellars, Robert Wilson), filmmakers, choreographers, and visual artists in that period. Using the 1976 premiere of Philip Glass's seminal Einstein on the Beach as a starting
point, we will examine such diverse works as Adams's *Nixon in China* and *The Death of Klinghoffer*, Glass's *Satyagraha*, Tan Dun's *Marco Polo*, Neuwirth's *Lost Highway*, Unsuk Chin's *Alice in Wonderland*, Andriessen's *Writing to Vermeer*, Ades's *Powder Her Face*, Muhly's *Two Boys*, Monk's *Atlas*, and Ashley's television opera, *Perfect Lives*.

**Class Format:** discussion/lecture

**Requirements/Evaluation:** evaluation based on 3 papers (6, 8, and 12 pages in length) and on class participation; drafts of two of these papers will be required

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Distributions:** (D1) (WI)

*Not offered current academic year*

---

**THEA 244 (F) Introduction to Theatre Technology**

As an overview of performance spaces, theatrical design technologies, technical production methods and management practices, this course will give students a practical working knowledge of theatre technology and organization. The course will cover standard industry tools and working methods for design disciplines including: scenery, lighting, costumes, sound, multimedia. Students will attend lectures, participate in labs in design and technical production, and will be required to participate on the production crew of one or more departmental productions.

**Class Format:** lecture/lab

**Requirements/Evaluation:** weekly practical projects, participation in department productions, and committed, focused participation make up the majority of the evaluation elements for this course

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Materials/Lab Fee:** $50 fee

**Distributions:** (D1)

*Not offered current academic year*

---

**THEA 247 (S) Music for Theater Production**

Crosslistings: THEA247 / MUS247

Secondary Crosslisting

Music written to accompany or to "point up" the action or mood of a dramatic performance on stage can be traced to Ancient Theater. Are the labels of incidental and background music appropriate or patronizing for this genre? What is the difference between the composition of "incidental music" and sound designing? How does creating music to accompany a play differ from writing concert music or music for film, ballet, opera, or musical theater?

What makes for effective incidental music? How does the music interact with the spoken drama? Students will discuss music composed for selected plays and will compose music for a scene of a play drawing upon pre-existing works, or creating their own. Format: tutorial. During the first and last weeks of the semester, students will attend two group classes. In the other weeks, students will meet with the instructor in pairs for a one-hour session. Students will write and present a 5- to 6-page paper every other week and a 1- to 2-page response to their partner's paper in the alternate weeks.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on five papers/presentations, and five responses

**Extra Info:** not available for the fifth course option

**Prerequisites:** ability to read music and permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Music and Theater Majors
THEA 249 (F)  Staging Race and Gender  (DPE) (WI)

Crosslistings: ENGL249 / THEA249 / WGSS269

Secondary Crosslisting

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's Black Odyssey, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

Class Format: seminar

Requirements/Evaluation: four papers totaling at least 20 pages and in-class group performances

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

The course will explore how race and gender have been constructed in the American theatre from the 19th century to the present. Students will develop skills for interrogating the performativity of race and gender, and achieve proficiency with these skills through critical response papers and short, in-class dramatizations that integrate theoretical perspectives on visual culture, performance, and gender and feminist studies. Students will submit four papers totaling at least 20 pages

Attributes: ENGL 200-level Gateway Courses;

Fall 2018

SEM Section: 01  Cancelled

THEA 250 (F)  Gender, Sexuality and Modern Performance  (WI)

Crosslistings: COMP247 / ENGL253 / THEA250 / WGSS250

Primary Crosslisting

This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities of social identities under interrelated systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherrie Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

Class Format: tutorial

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks

Extra Info: emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response
THEA 255 (F) Performing Shakespeare

This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (Macbeth, Anthony and Cleopatra, Othello), comedies (The Merchant of Venice, A Midsummer Night's Dream, Twelfth Night), and histories (Richard II, Richard III); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

Class Format: tutorial and lab; in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work.

Requirements/Evaluation: weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one college level acting class or significant comparable experience (permission of instructor)

Enrollment Limit: 10

Enrollment Preferences: Theatre majors, or those expressing possible interest in Theatre major

Expected Class Size: 10

Distributions: (D1)

Extra Info 2: may not be taken on a pass/fail basis; not available for the fifth course option

THEA 260 (F) Shakespeare on Page, Stage and Screen: Text to Performance (WI)

Crosslistings: COMP290 / ENGL270 / THEA260

Primary Crosslisting

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance-against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.
THEA 262 (F) Japanese Theatre and its Contemporary Context
Crosslistings: THEA262 / COMP262 / JAPN260

Secondary Crosslisting
Japan’s rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nogaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Distributions: (D1)
Attributes: GBST East Asian Studies Electives

Fall 2018
LEC Section: 01 Cancelled

THEA 265 (F) Digital Performance Lab
Crosslistings: THEA265 / SCST265

Primary Crosslisting
A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediatized performance practices. Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Class Format: studio and lab
Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills
Extra Info: may not be taken on a pass/fail basis
THEA 267 (F) Performance Studies: An Introduction  (DPE)
Crosslistings: COMP267 / WGSS267 / DANC267 / THEA267

Secondary Crosslisting
Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing “performance” as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theartics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

Class Format: seminar
Requirements/Evaluation: reflection papers, performance analysis, final paper or performance
Extra Info: not available for the fifth course option
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 15
Distributions: (D1) (DPE)
Distribution Notes: meets Division 1 requirement if registration is under COMP, DANC or THEA; meets Division 2 requirement if registration is under WGSS DPE: This course tracks performance studies' engagement with feminist, queer, post-colonial, and critical ethnic studies scholarship, equipping students with tools and concepts with which to analyze power, difference, and equity.

THEA 275 (S) American Drama: Hidden Knowledge  (WI)
Crosslistings: COMP275 / ENGL224 / THEA275 / AMST275

Primary Crosslisting
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is
breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Class Format: tutorial

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and English majors

Expected Class Size: 10

Distributions: (D1) (WI)

THEA 282 (S) Writing for Performance (WI)

Crosslistings: ENGL280 / THEA282

Primary Crosslisting

This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, María Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Class Format: seminar

Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: students with some experience in creative writing and/or performance

Enrollment Limit: 14

Enrollment Preferences: students who have taken THEA 214/ENGL 214 or another creative writing course

Expected Class Size: 14

Distributions: (D1) (WI)

Not offered current academic year

THEA 285 (S) Scenic and Lighting Design for Performance

Crosslistings: THEA285 / DANC285

Primary Crosslisting
The artistic, intellectual, and practical roles of a designer vary widely, from the spectacle of Broadway to the do-it-yourself ingenuity of downtown theater to the conceptual frame of the art gallery space. This course explores the art and techniques of lighting and scenic design for performance. While grounded in a conceptual methodology for development of a design based in textual analysis and research, this course is equally concerned with providing instruction in the techniques and craft necessary for bringing a design to fruition, including: sketching, technical drafting, and model-making; basic physics and theories of color in both surfaces and light; the use of volume, movement, color, intensity, and texture as compositional and storytelling tools; the variety of stage lighting instruments and theatrical soft goods available, and their uses; writing cues; and the translation of concept into light plots, channel hookups, plans and elevations. We will use a variety of performance texts (plays, musicals, opera, and dance) to discover and explore the creative process from the perspective of scenic and lighting designers. The class format will be a combination of lectures, discussions and studio work.

Class Format: studio

Requirements/Evaluation: evaluation will be based upon committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales,

Extra Info: focusing on scenic and lighting design, considered both individually and when working in tandem

Extra Info 2: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have completed THEA 101, 102, 201 or 244, ARTS 100, or equivalent course or practical experience in the performing or studio arts

Expected Class Size: 6

Materials/Lab Fee: fee of up to $125 for materials and copying to be added to student term bill

Distributions: (D1)

Not offered current academic year

THEA 286 (S) Sound Design

What is "sound" and how does it work within a design for live performance? Starting from that fundamental question, this course will examine creative, practical, and technical aspects of sound design within a theatrical setting, from the physics of sound and the mechanics of human hearing and perception to sound aesthetics, style, and function. We will learn to effectively analyze a range of scripts and source material (plays, musicals, opera, and dance), apply research, and make specific choices about world building that serve both the needs of the script and the artist's imaginative impulse. We will consider how to integrate sound with the other design disciplines, and collaborate effectively to help to create a robust but coherent production.

Class Format: studio, class format will be a combination of lectures, discussions, and studio work

Requirements/Evaluation: committed class participation and thoughtful, timely completion of all assignments and projects

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have completed THEA 101, 102, 201 or 244, ARTS 100, or equivalent course or practical experience in the performing or studio arts

Expected Class Size: 6

Materials/Lab Fee: $50

Distributions: (D1)

Spring 2019

STU Section: 01 M 7:00 pm - 9:40 pm

THEA 290 (F) Theatre Department Production

Participation in the production program is offered as a partial credit fifth course, is open to all students, and can only be taken on a Pass/Fail basis. Theatre Majors are required to participate in four department productions, and must serve as stage manager for one of them. Depending on their role
in the production process, students will be admitted to Theatre Production courses by permission of the department Chair, following casting and the assembly of the artistic and production team. Students may participate in a production in one of three major roles: stage management, performing (actor or actress, musician, dancer, etc.), or non-performing (director, designer, dramaturge, choreographer, music director, production manager, etc.). Stage managers or performers should expect to be in rehearsals, generally scheduled during the evening hours from 6-10PM, for up to twenty hours per week during a five to ten-week long production process, as well as up to ten hours per day during tech weekend and up to six hours per day during the performance run of the show. Non-performing roles may be expected to be involved in the production process before the start of rehearsals, participating in meetings, auditions, as well as a post-mortem process for each show. Entrance into a production for actors and major artistic roles are based on competitive auditions or prior experience. There is no online registration. Repeatable course numbers are designated as follows: 291 (Stage Management Production I); 292 (Stage Management Production II); 293 (Stage Management Production III); 294 (Performing Role Production I); 295 (Performing Role Production II); 296 (Performing Role Production III); 297 (Non-Performing Role Production I); 298 (Non-Performing Role Production II); 299 (Non-Performing Role Production III). Evening courses and exams will take precedence over half credit courses. Students may still participate in department productions even if they choose not to enroll for credit.

**Class Format:** studio

**Requirements/Evaluation:** participation in the collaboration, commitment to being a team player, dedication to the artistic process, and participation in the final public performance event

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 40

---

**THEA 301 (S) Embodied Archives: Global Theatre and Performance Histories (DPE)**

**Crosslistings:** COMP303 / THEA301

**Primary Crosslisting**

History shapes bodies and is, in turn, shaped by bodies. Whose story is included in the archive? Whose story is left out? What remains over time? What disappears? Why? As theatre and performance historians, our task will be twofold: to study the past but also to question how its been constructed over time. Our obligations will include: handling, analyzing, and contextualizing primary sources; giving equal value to textual and embodied forms of knowledge preservation; taking into account the gender, race, class, status, and ethnicity of the historical participants who occupy the archive; and asking who benefitted from the ideological systems of a given age and who did not. Performance histories to be considered include: West-African Yoruba ritual; pre-Columbian performance in Mesoamerica; ancient Greek civic festivals; labor and guild theatres of Medieval England; print and Kabuki cultures of the Japanese Edo period; eighteenth-century celebrity portraiture across the circum-Atlantic; U.S. Civil War photography and reenactment; and performance histories drawn from (or unseen by) the archives of Williams College. Our readings and approaches will be informed by leading performance and cultural studies critics, such as: Diana Taylor, Joseph Roach, Saidiya Hartman, Rebecca Schneider, Harvey Young, and Tavia Nyong'o. This course is required for Theatre majors and is a prerequisite for THEA 401.

**Class Format:** seminar

**Requirements/Evaluation:** weekly "free-writing responses"; two "deep-reads" of archival materials; a 5-page midterm paper; a 10-minute oral report; and a final research project or presentation

**Prerequisites:** THEA 101, 102, 103, 201, 204 or by permission of instructor with evidence of equivalent 100-level course in Division I or Division II

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre majors

**Expected Class Size:** 8-10

**Distributions:** (D1) (DPE)

**Distribution Notes:** DPE: This course directly interrogates the power inequities of the historical archive and insists on acknowledging the value of embodied practice as a form of knowledge. Students will learn to question the authorship and ownership of the past by those who controlled its
preservation. We will examine primary sources as contextually constructed rather than 'givens,' and we will seek to understand the status of those observers and participants whose stories comprise the archive of performance.

Spring 2019

SEM Section: 01    TR 9:55 am - 11:10 am    Amy S. Holzapfel

THEA 303 (S)  Lighting Design

A study of the art and techniques of stage lighting. This class will provide instruction in the basic physics of light and color; the use of angle, intensity, color, texture and movement of light as compositional tools; various kinds of stage lighting instruments and their uses; conceptual development of a lighting design; translation of concept into light plot and channel hookup; focusing the plot in the theater; and writing cues. The course will use texts and scores of plays, musicals, opera and dance to discover and evaluate the lighting design process. There will be primary source and supplemental technical readings for each class meeting. The class format will be a combination of lectures, discussions and practical labs.

Class Format: lecture/lab

Requirements/Evaluation: evaluation will be based on class participation, successful completion of weekly projects, thorough technical understanding of a basic stage lighting system, and performance on a final project

Prerequisites: THEA 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 8

Distributions: (D1)

Not offered current academic year

THEA 305 (F)  Costume Design

Crosslistings: ARTS200 / THEA305

Primary Crosslisting

This course is both an introductory and an intensive study of the art of costume design. The course focuses on the designer's process: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills and presentation of designs.

Class Format: studio

Requirements/Evaluation: evaluation will be based on multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance

Extra Info: students are required to attend two to three theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work

Prerequisites: successful completion of any 200-level course in any of the fine or performing arts or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theater and Art Studio, sophomores and juniors

Expected Class Size: 8

Department Notes: does not satisfy any requirements for the Art major

Materials/Lab Fee: lab fee of $100 will be added to the student’s term bill

Distributions: (D1)

Not offered current academic year

THEA 308 (F)  Directing: Bodies in Space and Time

This is a laboratory in which we will investigate the holistic art of directing live performance. The director is both a creator and interpreter. Students will sharpen their visual, spatial, sonic, and kinesthetic sensibilities while developing a clear, cogent directorial voice. We will learn by doing. Assignments will involve hands-on directing projects presented in class for collective critique. Through these weekly assignments, directors will devise and discover strategies for collaboration and vocabularies of action and intention.

Class Format: studio, 3 hours per week
STU Section: 01    W 1:10 pm - 3:50 pmThursday Org Mtg 7:30 pm - 7:55 pm   Shayok Misha Chowdhury

THEA 311 (S)  Theorizing Shakespeare
Crosslistings: WGSS311 / ENGL311 / THEA311 / COMP310
Secondary Crosslisting
For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: The Merchant of Venice, Hamlet and Antony and Cleopatra. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

Class Format: seminar
Requirements/Evaluation: 20 pages of writing in the form of two short and one longer paper
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors
Expected Class Size: 19
Distributions: (D1)
Distribution Notes: meets Division 1 requirement if registration is under ENGL, COMP or THEA; meets Division 2 requirement if registration is under WGSS
Attributes: ENGL Criticism Courses;  ENGL Literary Histories A
Not offered current academic year

THEA 317 (F)  Black Migrations: African American Performance at Home and Abroad
Crosslistings: DANC317 / COMP319 / AFR317 / AMST317 / THEA317 / ENGL317
Secondary Crosslisting
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion
Requirements/Evaluation: evaluation will be based upon class participation, in-class student performances, several 2-page performance response
papers, one 10- to 12-page research paper, a final performance with a 3-page report

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none; open to all

Enrollment Limit: 15

Expected Class Size: 10

Distributions: (D2)

Distribution Notes: meets Division 2 requirement if registration is under AFR or AMST; meets Division 1 requirement if registration is under COMP, DANC, ENGL or THEA

THEA 322 (S) Race, Gender, and Performance from Literature to Social Media

Crosslistings: COMP339 / THEA322 / WGSS330 / AMST332 / LATS335

Secondary Crosslisting

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality?
This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

Class Format: seminar

Requirements/Evaluation: in-class participation, partnered presentation, weekly reading responses, performance analysis, final paper

Extra Info: not available for the fifth course option

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 15

THEA 328 (F) American Social Dramas (WI)

Crosslistings: SOC328 / THEA328 / AMST328 / COMP325

Secondary Crosslisting

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin,
Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

Class Format: seminar

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Distributions: (D2) (WI)

Distribution Notes: meets Division 2 requirement if registration is under SOC or AMST; meets Division 1 requirement if registration is under COMP or THEA

Not offered current academic year

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Crosslistings: THEA330 / COMP330 / AMST331

Primary Crosslisting

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafrcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none

Expected Class Size: 10

Distributions: (D1)

Distribution Notes: meets Division 1 requirement if registration is under THEA or COMP; meets Division 2 requirement if registration is under AMST

Attributes: AMST Arts in Context Electives; AMST Space and Place Electives; EXPE Experiential Education Courses; FMST Related Courses

Not offered current academic year

THEA 332 (F) Writing in the Margins: Race, Performance, Playgiriasm

Crosslistings: COMP358 / ENGL332 / THEA332

Primary Crosslisting

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered "classic" texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.
THEA 335 (F)  The Culture of Carnival
Crosslistings: COMP338 / THEA335

Primary Crosslisting
Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Class Format: studio
Requirements/Evaluation: students will be evaluated on regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade.
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: sophomores and first-year students
Expected Class Size: 18
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

THEA 336 (F)  Boucicault to McDonagh: Irish Theatre, 1870 to the present
Crosslistings: COMP360 / ENGL364 / THEA336

Primary Crosslisting
A survey of Irish drama since 1870, to include plays by Dion Boucicault, Oscar Wilde, W.B. Yeats, J.M. Synge, Lady Gregory, George Bernard Shaw, Douglas Hyde, Sean O'Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Conor McPherson, and Martin McDonagh.

Class Format: seminar
Requirements/Evaluation: 18-plus pages of writing, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 18

Enrollment Preferences: Theatre majors, English and Comparative Literature majors

Expected Class Size: 18

Distributions: (D1)

Fall 2018

THEA 338 (S) Persona

Crosslistings: THEA338 / ARTS338

Secondary Crosslisting

Like novelists, visual artists create fictional characters to tell stories. Conceptual artist Adrian Piper, sculptor Joseph Beuys, and collective The Yes Men have crafted personas to confront systems of power and societally constructed notions of normalcy. Students will explore the work of such artists through readings, class lecture and assignments. The reading list includes excerpts from Maggie Nelson's The art of Cruelty and Cherise Smith's Enacting Others. The first half of the course will focus on guided assignments developed by the instructor, the second half will be an independent study culminating in the construction of your own fictional persona. Students will use a variety of methods in the development of a persona including writing and photography, and may employ other methods including painting, sculpture, and digital media.

Class Format: studio

Requirements/Evaluation: active participation in class discussions, development of a final project with 1 pg project proposal, participation in class workshops

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: majors, juniors, seniors, sophomores

Expected Class Size: 10

Materials/Lab Fee: $100 charged to term bill

Distributions: (D1)

Spring 2019

THEA 341 Performing Utopia: Dreaming Cultures Forward in the U.S. Imaginary

A seminar examining the performative dimensions of utopia and the utopian aspirations of performance. Using a case-study model, we will consider how different modes of performance—in theatre, film, art, and social media—have helped to produce and sustain utopian and new socialities in and across shifting temporalities in the U.S. cultural imaginary. This course will take deep dives into the archives and embodied repertoires of exemplary utopian movements drawn artistic and social spheres. What can be learned by setting the eighteenth-century spiritual collective of The Shakers beside the egalitarian performance collective of The Wooster Group? What are some key differences between the urban vision of the inclusive, African-American-built enclave of Soul City, established in North Carolina in 1973, and the Afro-futurist conception of Wakanda depicted in the film Black Panther? In what ways might Silicon Valley’s use of performance to promote the utopian promises of social media compare with the performative manipulations of ego-driven utopian cults, like Jim Jones’ The People’s Temple? On the flip side, we will examine how performance has been theorized as a productively utopian realm by critics like Jill Dolan and Jose E. Muñoz, and artists like Miguel Gutierrez, Guillermo Gómez-Peña, Faye Driscoll, Theaster Gates, Nick Cave, and Taylor Mac. What possibilities open up when we approach performance as utopian by design, based on its ability to gather people into a common space and time? Students will be required to attend a day field trip and performances.

Class Format: seminar

Requirements/Evaluation: weekly writing and "deep reads," a 6- to 8-page essay based on independent archival research, and a final 15-minute performance or other creative public presentation

Prerequisites: none
THEA 345 (S) Contemporary Theatre and Performance

Crosslistings: COMP355 / ENGL349 / THEA345

Primary Crosslisting

As Gertrude Stein once remarked, “The hardest thing is to know one’s present moment.” What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgis, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: “What is the most important story to be telling through performance right now?” Students may be required to attend theatre, dance, and other performances at the ’62 Center and beyond.

Class Format: seminar

Requirements/Evaluation: written and dramaturgical-based assignments, an oral presentation, a mid-term paper, in-class discussions, and a final paper or performance

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre majors; Comparative Literature or English majors

Expected Class Size: 8-10

Distributions: (D1)

THEA 350 (S) Devised Performance: The Art of Embodied Inquiry

Crosslistings: ARTS250 / THEA350

Primary Crosslisting

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

Class Format: studio

Requirements/Evaluation: participation, indiv. presentations, contribution to group work, self-evaluation

Extra Info: students will contribute to the creation and presentation, by the group as a whole, of a newly devised performance piece

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Theatre majors and Art majors
THEA 361 (F) Writing about Bodies (WI)
Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Secondary Crosslisting
The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial
Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing
Enrollment Limit: 10
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS
Attributes: AMST Critical and Cultural Theory Electives; PERF Interdepartmental Electives;

THEA 365 (F) Beckett, Pinter and Stoppard
Crosslistings: ENGL365 / COMP365 / THEA365

Primary Crosslisting
Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: Endgame, The Caretaker, Rosenkrantz and Guildenstern are Dead, Krapp's Last Tape, The Homecoming, No Man's Land, Betrayal, Waiting for Godot, Dogg's Hamlet, The Invention of Love, Arcadia, Rock 'n' Roll, Not I, Rockaby, A Kind of Alaska, Catastrophe, The Real Thing, Indian Ink, Artist Descending a Staircase and One for the Road. Throughout, we will give consideration to these works as both literary and theatrical texts.

Class Format: seminar
Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Enrollment Limit: 18
THEA 385 (S) The Sculptural Costume and It's Performance Potential

Crosslistings: THEA385 / ARTS385

Secondary Crosslisting
A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

THEA 401 (F) Senior Seminar: Practicing Theory
Humans seek out patterns and weave them into stories. In a collaborative art like theater those pattern pieces can come from anyone: writer or director, designer or performer; the stagehand placing furniture, the stage manager calling cues. The story is made from the totality of everything experienced by the audience. A relationship between storytelling and audience experience is hardly unique to the theatre. Chefs and game designers and performance artists and architects have all thought deeply about how what they make is experienced by their audience; how it is interacted with, used, and recalled after the experience has ended. How do artists and makers from a broad range of ephemeral disciplines approach the creation of an experience? How do they tell stories within and about the work that is created? How successfully do their theories align with their practice, and how might we re-imagine, reuse, or abuse their ideas in our own work for the live theater? As a culmination of performance studies for the Theatre major, this senior seminar will take a hybrid approach to the study of artist-audience interactivity and storytelling by blending theoretical, historical, and critical readings with a studio component that produces artistic responses to the ideas being studied.

Class Format: seminar
Requirements/Evaluation: critical analysis & discussion of readings, and active participation in critiques of made work; assignments consist of response papers alternating with creative projects
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: limited to senior Theatre majors
Enrollment Limit: 5
Enrollment Preferences: Senior Theatre majors only
Expected Class Size: 5
Department Notes: this course is required for the Theatre major
Materials/Lab Fee: up to $100 for materials and copying to be added to student term bill

THEA 455 (F) Advanced Practicum
This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity--directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management--may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.

Class Format: studio
Requirements/Evaluation: research, attendance at rehearsals, studio work, & final portfolio; research, attending weekly production meetings, rehearsals, studio work, and final portfolio, as well as other tasks determined by the faculty advisor
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: THEA 101 or THEA 102, and THEA 201
Enrollment Limit: 4
Enrollment Preferences: Theatre majors
Expected Class Size: 2
Materials/Lab Fee: $75.00 may be added to the student's term bill
Distributions: (D1)

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program's inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students' independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners' work.

Registration

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

AFR 208 (F)  Time and Blackness  (WI)
Crosslistings: AFR208 / REL262 / AMST208

Primary Crosslisting

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, “Time and Blackness,” we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing
AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction  (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Primary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Class Format: tutorial

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

AFR 348 (S) The Black Radical Tradition  (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Primary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery’s advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter’s liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition’s architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Class Format: tutorial

Requirements/Evaluation:  attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to all

Enrollment Limit: 10

Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

Spring 2019
TUT Section: T1  TBA  Neil Roberts

AFR 369 (S) African Art and the Western Museum  (DPE) (WI)

Crosslistings: AFR369 / ARTH308

Secondary Crosslisting

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have
occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Class Format:** tutorial

**Requirements/Evaluation:** field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** ARTH 104 or special permission from the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History and African Studies Majors

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE: Explores issues of ‘authentic’ representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African ‘art’ has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

Spring 2019

TUT Section: T1  TBA  Michelle M. Apotsos

**AMST 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color**  (DPE) (WI)

This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

**Class Format:** tutorial

**Requirements/Evaluation:** five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-years, students considering an American Studies major or Latina/o Studies concentration

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: This DPE tutorial foregrounds the significance of age, as it crosscuts with race, class, and gender, in explorations of urban inequality in the United States.

AMST 219 (F) Understanding Social Class (DPE)

Politicians and pundits often bill the United States as a classless society, owing to its lack of a feudal past. Since the 1950s, most Americans—including many whom sociologists would deem wealthy or poor—have come to describe themselves as "middle class." But this may be changing. Bernie Sanders’ strident calls to reign in Wall Street greed remain enormously popular. And since the election of President Trump, journalists have rediscovered a group they call "the white working-class" while books such as *Hillbilly Elegy* and *White Trash* have moved to the top of the best seller lists. So, what is class and how does it shape our lives today? This course is designed to introduce students to the study of social class in an interdisciplinary fashion. We will use memoir and works of fiction to better grasp the life experiences and worldviews of people on different rungs of the economic ladder. Then we will delve into the ways that major theorists, such as Karl Marx, Max Weber, and Pierre Bourdieu have defined social class in terms of work life, social standing in a community, and bundles of “tastes” or consumption preferences. We will turn to historians to make sense of the patterns by which class inequality developed in tandem with racial oppression in the United States, and to the competing arguments of sociologists attempting to explain the growing wealth gap. Finally, we will look to activists and social workers to see how individuals and groups work to bridge the class divide in attempts to mitigate poverty and challenge inequalities. Throughout, participants will be encouraged to use assigned materials as prompts to think critically about how class shapes their own lives.

Class Format: tutorial

Requirements/Evaluation: attendance, participation, three papers 5-10 pages each

Extra Info: Not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students, American Studies majors

Expected Class Size: 10

Distributions: (D2) (DPE)

Distribution Notes: DPE: The course focuses on the ways access to material wealth, and perceived class position shape life experiences. We will analyze different aspects of class power, from employment relations, to political influence, to self-confidence. The last weeks of the course will address ways movements seek to bridge class divides to challenge economic and other forms of inequality. The course will be intersectional throughout—discussing how class, race, and gender inequalities reinforce one another.

AMST 490 (S) The Suburbs (WI)

Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

**ANTH 134 (S) Leaving the World Behind: The Literature of Reclusion** (WI)

**Crosslistings:** ANTH134 / REL134 / COMP134 / CHIN134

**Secondary Crosslisting**

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

**Class Format:** tutorial

**Requirements/Evaluation:** tutorial papers, responses, and a final project

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students, Chinese majors, Religion majors, Anthropology majors

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**Distribution Notes:** meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI; Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

**ANTH 269 (S) Mindsight: Mindfulness and Medicine** (DPE) (WI)

**Crosslistings:** REL269 / ASST269 / ANTH269

**Primary Crosslisting**

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our
understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the `kindness curriculum¿ in schools, and other areas of applied research on mindfulness that have generated a `science of personal transformation¿. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Class Format: tutorial

Requirements/Evaluation: weekly papers, 4- to 8-pages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This class fulfills the DPE requirement because it will explore the ways that stress related to poverty, social inequality, and structural violence can and have been alleviated by mindfulness-based practices. Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. WI: This course is a tutorial and there will be weekly writing assignments.

ANTH 328 (F) Emotions and the Self (WI)

Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Class Format: tutorial

Requirements/Evaluation: typical for that of a tutorial

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to first-year students with instructor's consent

Enrollment Limit: 10

Expected Class Size: 10

ARAB 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480
This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

ARTH 228 (S) Velázquez, Goya, and Picasso (WI)

Crosslistings: RLSP228 / ARTH228

Secondary Crosslisting

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Class Format: tutorial

Requirements/Evaluation: 3- to 5-page weekly assignment

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none
Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: WI: The tutorial format offers students an intensive opportunity to improve their writing by demanding regular writing assignments that the student has to read out loud to their partner and professor. Students write biweekly papers throughout the semester. These papers are then analyzed during the tutorial session by the other student’s response

Spring 2019

TUT Section: T1 TBA Soledad Fox

ARTH 308 (S) African Art and the Western Museum (DPE) (WI)

Crosslistings: AFR369 / ARTH308

Primary Crosslisting

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Class Format: tutorial

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 104 or special permission from the instructor

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under AFR DPE:

Explores issues of ‘authentic’ representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African ‘art’ has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

ARTH 361 (F) Writing about Bodies (WI)

Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Primary Crosslisting

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as
memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS

ASST 121 (F) The Two Koreas  (WI)
Crosslistings: HIST121 / ASST121

Secondary Crosslisting
The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Class Format: tutorial

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

ASST 207 (F) An Exploration of Japanese Language and Culture  (WI)       
Crosslistings: ASST207 / JAPN407
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Department Notes: students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T

ASST 413 (S) History of Taiwan (WI)
Crosslistings: ASST413 / HIST481

Secondary Crosslisting
Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Class Format: tutorial

BIOL 210 (S) Mathematical Biology (QFR)
Crosslistings: MATH310 / BIOL210

Secondary Crosslisting
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.
BIOL 219 (S) Dangerous Exposures: Environment, Immunity, and Infectious Disease  (WI)
Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

Class Format: tutorial
Requirements/Evaluation: six 4- to 5-page papers; tutorial presentations, and the student's progress towards intellectual independence and creativity as a presenter and a respondent
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 101 and 102
Enrollment Limit: 10
Enrollment Preferences: sophomores who have taken BIOL 202, students interested in public health

BIOL 225 (F) Sustainable Food & Agriculture  (WI)
A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field
experience will take place on a local farm.

Class Format: tutorial

Requirements/Evaluation: Evaluation will be based on writing assignments, tutorial presentation, performance in the role of paper critic, and course participation.

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors.

Expected Class Size: 8

Department Notes: satisfies the distribution requirement in the Biology major, the Natural World distributional requirement of the Environmental Studies program

Distributions: (D3) (WI)

Distribution Notes: WI: Each student will write five papers that deal with questions requiring extensive reading of primary resources. Paper presentations will alternate with serving as a critic of other student papers. Students will be given the opportunity to revise and rewrite two of the five papers in the week following their tutorial presentation thereby being able to respond to the criticism and discussion of the tutorial group.

CHIN 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Primary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely
separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, responses, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL. Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

CLAS 241 (S) Sex and Gender in Ancient Greece and Rome (WI)

Crosslistings: CLAS241 / COMP241 / WGSS241

Primary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students’ capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

Expected Class Size: 10

Distributions: (D1) (WI)

TUT Section: T1 TBA Amanda R. Wilcox

COMP 118 (F) Animal Subjects (DPE) (WI)

Crosslistings: GERM118 / COMP118
Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Class Format: tutorial
Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 8
Distributions: (D1) (DPE) (WI)
Distribution Notes: DPE: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight. WI: Multiple writing and rewriting assignments that build on one another, totaling 20 pages or more, plus careful attention to writing practice in class.

Fall 2018
TUT Section: T1 TBA Natalie E. Lozinski-Veach

COMP 119 (S) Asian American Femininities (DPE) (WI)
Crosslistings: COMP119 / WGSS119

Secondary Crosslisting
This tutorial will introduce students to the intersections of feminist studies and Asian American studies by reading Asian and Asian American literature (read in English) that centers female-identified characters. This course will consider the historical and persistent structures of patriarchy, heterosexism, nationalism, imperialism, war, and globalization through the framework of gender and sexuality studies. Students will read short excerpts of feminist theoretical works, selected with the idea of making scholarly texts more approachable to first- and second-year students. No previous experience with feminist theory or Asian American studies is presumed or required.

Class Format: tutorial
Requirements/Evaluation: weekly papers or peer responses
Extra Info: not available for the fifth course option

Leaving the World Behind: The Literature of Reclusion

Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial

Requirements/Evaluation: tutorial papers, responses, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI; Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

Sex and Gender in Ancient Greece and Rome

Secondary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature
Expected Class Size: 10
Distributions: (D1) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under WGSS

COMP 331 (S) The Brothers Karamazov  (WI)
Crosslistings: COMP331 / ENGL371 / RUSS331

Secondary Crosslisting
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: at least one 200-level literature class
Enrollment Limit: 10

COMP 347 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present  (DPE) (WI)
Crosslistings: COMP347 / GERM331

Secondary Crosslisting
One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of *The Sound of Music*, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series *The Archives of Silence*, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the
blind and deaf are to the usual communications of our society.” Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

**Class Format:** tutorial

**Requirements/Evaluation:** five 5-page papers, one revision, discussion

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

**Enrollment Limit:** 10

**Enrollment Preferences:** German or Comparative Literature majors

**Expected Class Size:** 10

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Fall 2018

TUT Section: T1    TBAThursday Org Mtg 8:30 pm - 9:00 pm   Gail M. Newman

**CSCI 336 (F) Computer Networks** (QFR)

This course explores the design and implementation of computer networks. Topics include wired and wireless networks; techniques for efficient and reliable encoding and transmission of data; addressing schemes and routing mechanisms; resource allocation for bandwidth sharing; and security issues. An important unifying themes is the distributed nature of all network problems. We will examine the ways in which these issues are addressed by current protocols such as TCP/IP and 802.11 WIFI.

**Class Format:** This class will follow the meeting structure of a tutorial, with groups of three or four

**Requirements/Evaluation:** evaluation will be based on problem sets, programming assignments, and midterm and final examinations

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CSCI 136 and 237

**Enrollment Limit:** 18

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 18

**Distributions:** (D3) (QFR)

Fall 2018

TUT Section: T1    Cancelled

**CSCI 434 (S) Compiler Design** (QFR)

This tutorial covers the principles and practices for the design and implementation of compilers and interpreters. Topics include all stages of the compilation and execution process: lexical analysis; parsing; symbol tables; type systems; scope; semantic analysis; intermediate representations; run-time environments and interpreters; code generation; program analysis and optimization; and garbage collection. The course covers both the theoretical and practical implications of these topics. Students will construct a full compiler for a simple object-oriented language.

**Class Format:** This class will follow the meeting structure of a tutorial, with groups of three or four

**Requirements/Evaluation:** evaluation will be based on presentations, problem sets, a substantial implementation project, and two exams

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** CSCI 237 and 256  CSCI 334 is recommended, but not required
Enrollment Limit: 18
Enrollment Preferences: current or expected Computer Science majors

DANC 280 (S) Dancing the Score/Scoring the Dance
Crosslistings: DANC280 / MUS280

Secondary Crosslisting
This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one’s group is central, sharing responsibility for the development of others’ as well as one’s own work.

Class Format: tutorial; each student choreographer will work with a student composer; they will share responsibility choosing, creating, developing, completing, and presenting their projects

Requirements/Evaluation: 10% class participation, 20% written assignments, 70% composition assignments

Extra Info: not available for the fifth course option

Prerequisites: permission of instructor

Enrollment Limit: none
Enrollment Preferences: composition students and student choreographers
Expected Class Size: 10
Distributions: (D1)

ECON 240 (F) Colonialism and Underdevelopment in South Asia (DPE) (WI) (QFR)

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Class Format: tutorial

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: one course in ECON
Enrollment Limit: 10
Enrollment Preferences: Economics major, prior course on South Asia
Expected Class Size: 10
Distributions: (D2) (DPE) (WI) (QFR)
Distribution Notes: DPE: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation. QFR and WI: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies both the WI and QFR requirement.

ECON 390 (S)  Financial Crises: Causes and Cures  (WI)
Crosslistings: ECON536 / ECON390
Primary Crosslisting
Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.
Class Format: tutorial
Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ECON 252 and 255
Enrollment Limit: 10
Enrollment Preferences: Economics majors
ECON 532 (S) Inclusive Growth: The Role of Social Safety Nets

Designing and implementing effective national strategies to promote inclusive economic growth can require difficult policy reforms, sometimes with adverse short-term impacts for vulnerable groups within society. Social safety nets provide a pro-poor policy instrument that can balance trade and labor market reform, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social safety nets help the poor to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. This tutorial will offer students the opportunity to explore the role of social safety nets in promoting inclusive economic growth, drawing on case studies from Africa, Asia, Latin America and Eastern Europe. The first part of the tutorial will define social safety nets within the broader context of social protection, examining the diversity of instruments and their linkages to economic growth. The second part will delve more deeply into the design and implementation of effective interventions, assessing program choice, affordability, targeting, incentives and other issues. The third part will analyze the role of social safety nets in supporting economic growth strategies, drawing on international lessons of experience.

Class Format: tutorial
Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

ENGL 227 (F) Elegies (WI)
This tutorial—intended primarily for sophomores—explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the
dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900--including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists--Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

Class Format: tutorial; weekly meetings with instructor, 60-75 minutes

Requirements/Evaluation: active participation in tutorial meetings, students will write a 5- to 6-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 254 (S) 'As If Her Mouth Were a Weapon': Jamaica Kincaid  (DPE) (WI)

Crosslistings: ENGL254 / WGSS274

Primary Crosslisting

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include Annie John (1985), Lucy (1990), The Autobiography of My Mother (1996), My Brother (1997), Mr. Potter (2002), and See Now Then (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

Class Format: tutorial; meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

Requirements/Evaluation: five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Attributes: ENGL Post-1900 Courses; ENGL 200-level Gateway Courses;
ENGL 343 (S) Whitman and Dickinson in Context (WI)

In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings—in Whitman's case, his essays, in Dickinson's, her letters—we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Class Format: tutorial

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WI)
Crosslistings: GEOS221 / ENVI222
Secondary Crosslisting
Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Class Format: tutorial
Requirements/Evaluation: Evaluation will be based on writing assignments, tutorial presentation, performance in the role of paper critic, and course participation.
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors.

Expected Class Size: 8

Department Notes: satisfies the distribution requirement in the Biology major, the Natural World distributional requirement of the Environmental Studies program

Distributions: (D3) (WI)

Distribution Notes: WI: Each student will write five papers that deal with questions requiring extensive reading of primary resources. Paper presentations will alternate with serving as a critic of other student papers. Students will be given the opportunity to revise and rewrite two of the five papers in the week following their tutorial presentation thereby being able to respond to the criticism and discussion of the tutorial group.

ENVI 240 (F) Conservation and Climate Change (WI)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: WI: Tutorial format

ENVI 244 (S) Environmental Ethics (WI)

Crosslistings: PHIL244 / ENVI244

Primary Crosslisting

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial
ENVI 248 (S)  "Our Response Will Define Our Future": Climate Change Policy Analysis  (WI)
In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Class Format: tutorial

Requirements/Evaluation: students alternate in preparing 5-7 page papers and 2 page responses (5 papers and 5 responses in total), final paper building on one of the 5-7 page papers

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

ENVI 491 (S) The Suburbs  (WI)
Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?
GBST 247 (F)  Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WI)

Crosslistings: SOC248 / GBST247 / RUSS248

Secondary Crosslisting

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial

Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Distributions:  (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS

DPE: This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

TUT Section: T1    TBA Thursday Org Mtg 8:30 pm - 9:00 pm   Olga Shevchenko

GBST 480 (F)  Interpretations of the Israeli Palestinian Conflict  (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting
This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict through the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WI)

Crosslistings: GEOS221 / ENVI222

Primary Crosslisting

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

GERM 118 (F) Animal Subjects (DPE) (WI)
Crosslistings: GERM118 / COMP118

Secondary Crosslisting
Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means reimagining our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Class Format: tutorial

Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 8

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight. WI: Multiple writing and rewriting assignments that build on one another, totaling 20 pages or more, plus careful attention to writing practice in class.

Fall 2018

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE) (WI)
Crosslistings: COMP347 / GERM331

Primary Crosslisting
One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary
authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English.

For those who do it in German, all literary readings and at least three of the papers will be in German.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

Enrollment Limit: 10

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Fall 2018

TUT Section: T1  TBAThursday Org Mtg 8:30 pm - 9:00 pm  Gail M. Newman

HIST 121 (F) The Two Koreas  (WI)

Crosslistings: HIST121 / ASST121

Primary Crosslisting

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Class Format: tutorial

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 140 (S) Crime and Punishment in Russian History

Crosslistings: RUSS140 / HIST140

Primary Crosslisting

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial

Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

HIST 155 (F) School Wars in U.S. History (WI)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of “school wars” in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day “school wars”? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Class Format: tutorial

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: First-Year and Sophomores

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

HIST 162 (S) Unfamous Women, USA  (DPE) (WI)
How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Tutorial pairs will spend at least one week investigating sources in the Chapin Library and perhaps looking at visual art at Williams College Museum of Art.

Class Format: tutorial

Requirements/Evaluation: students will write papers (4-6 pages) roughly every other week, students will also write one page critiques, students will make a formal oral presentation one week

Extra Info: not available for the fifth course option

Prerequisites: First-Years and Sophomores

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This course investigates women whose lack of political, economic and cultural power has persisted into the historical record. We will consciously think and write about the role of historians in recovering lives and stories. How much of someone's story can we really tell? How far should historians go in deploying peoples scanty records to make an intellectual argument?

HIST 481 (S) History of Taiwan (WI)

Crosslistings: ASST413 / HIST481
Primary Crosslisting

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an “inalienable part” of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

HIST 482 (F) The Great War, 1914-1918 (WI)

Crosslistings: LEAD382 / HIST482
Primary Crosslisting

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?
**HIST 483 (S)  Sport and Diplomacy (WI)**

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

**Class Format:** tutorial

**Requirements/Evaluation:** students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-page written critique

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with some prior course work in foreign relations and/or international history

**Expected Class Size:** 10

**HIST 484 (F)  The Hundred Years’ War**

By the Hundred Years’ War, historians understand a series of battles and wider conflicts waged between England and France from 1337 to 1453, over the succession to the French throne. From the near-total English victory after the Battle of Poitiers to the remarkable revival of French fortunes associated with Joan of Arc, the Hundred Years’ War encompasses some of the most iconic events of later medieval history. The events of the war, together with a broader history of the entire era, are the subject of a monumental study by Jonathan Sumption, who has now published the fourth of a projected five volumes. The greater part of this tutorial will concentrate on a careful, thorough reading of Sumption’s history—a rare opportunity afforded by the tutorial format, given that great historical enterprises are otherwise beyond the scope of college and university classrooms. For additional perspective, we will also read a general survey of the later medieval period and several more specific monographs, and we will consider the reception that Sumption’s work has received among historians of the Middle Ages.

**Class Format:** tutorial
Requirements/Evaluation: six tutorial papers and six critiques, to be submitted on alternate weeks

HIST 489 (F)  Feminist Movements in U.S. History  (DPE)
This class studies the historical development of feminist movements in the United States. From the 19th century women's rights movements through 20th century movements for women's liberation, it examines the changing definitions of feminism and the array of strategies and organizations that activists have generated. It also examines the complex dynamic between feminist activism and the production of women's history, examining the role of historical narrative in feminists' struggle for social change.

Class Format: tutorial

Requirements/Evaluation: bi-weekly five page papers, bi-weekly analytic papers, and class participation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: instructor's permission required

Enrollment Limit: 10

Enrollment Preferences: History and Women's, Gender, and Sexuality Studies majors

Expected Class Size: 10

Distributions: (D2) (DPE)

HIST 491 (S) The Suburbs  (WI)
Crosslistings: HIST491 / ENVI491 / AMST490

Primary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

INTR 343 (F) Representations of Racial-Sexual Violence from Enslavement to Emancipation (WI)
Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Primary Crosslisting
This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include "Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.
Requirements/Evaluation: weekly primary and response papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference given to juniors and seniors
Expected Class Size: 8
Distributions: (D2) (WI)
Attributes: AMST Critical and Cultural Theory Electives; JLST Interdepartmental Electives; WGSS Racial Sexual + Cultural Diversity Courses
INTR 361 (F)  Writing about Bodies  (WI)
Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Secondary Crosslisting
The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir-autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the ’62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing

Enrollment Limit: 10

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ARTH or THEA; meets Division 2 requirement if registration is under INTR or WGSS

JAPN 407 (F)  An Exploration of Japanese Language and Culture  (WI)
Crosslistings: ASST207 / JAPN407

Primary Crosslisting
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN
407T will meet twice a week

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Department Notes: students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T

Distributions: (D1) (WI)

Distribution Notes: meets Division 1 requirement if registration is under ASST or JAPN

JWST 289 (F) The Talmud on What it Means to be Human

Crosslistings: JWST289 / REL289

Secondary Crosslisting

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans’ relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

Class Format: tutorial

Requirements/Evaluation: weekly papers, final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

LATS 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color  (DPE)  (WI)
This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

Class Format: tutorial

Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion

Extra Info:  may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences:  first- and second-years, students considering an American Studies major or Latina/o Studies concentration

Expected Class Size: 10

Distributions:  (D2)  (DPE)  (WI)

Distribution Notes:  DPE: This DPE tutorial foregrounds the significance of age, as it crosscuts with race, class, and gender, in explorations of urban inequality in the United States.

LEAD 206 (F) Dangerous Leadership in American Politics  (WI)

Crosslistings:  PSCI206 / LEAD206

Secondary Crosslisting

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would
invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition’s leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

**Class Format:** tutorial

**LEAD 348 (S) The Black Radical Tradition (WI)**

**Crosslistings:** LEAD348 / PSCI348 / AFR348

**Secondary Crosslisting**

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery’s advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter’s liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition’s architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

**LEAD 382 (F) The Great War, 1914-1918 (WI)**
During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

**MATH 310 (S) Mathematical Biology** (QFR)

**Crosslistings:** MATH310 / BIOL210

**Primary Crosslisting**

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Class Format:** tutorial

**Requirements/Evaluation:** problem sets, weekly meetings, final project and paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** MATH 250, MATH 209 or 309, permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

**Expected Class Size:** 10

**Distributions:** (D3) (QFR)

**Distribution Notes:** QFR: The course will introduce methods for developing and analyzing mathematical models.

**Attributes:** PHLH Methods in Public Health;

Spring 2019

MATH 459 (S) Applied Partial Differential Equations (QFR)

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

Class Format: tutorial

Requirements/Evaluation: participation, problem sets, oral presentations, oral exams, and a final project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: MATH 209 or MATH/PHYS 210 or MATH 309 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: students with an interest in applied mathematics, selected to create a diverse set of tutorial participants

Expected Class Size: 10

Department Notes: students who have taken MATH 453 may not enroll in MATH 458T without permission of the instructor

Distributions: (D3) (QFR)

Distribution Notes: QFR. This tutorial involves regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

MUS 275 (F) Shakespeare through Music (WI)

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies Romeo and Juliet and Othello, and the comedy Midsummer Night's Dream--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

Class Format: tutorial

Requirements/Evaluation: each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students

Expected Class Size: 8

Distributions: (D1) (WI)

Distribution Notes: WI. Each student will write five 6- to 7-page essays, and provide five written peer reviews

MUS 280 (S) Dancing the Score/Scoring the Dance
Crosslistings: DANC280 / MUS280
Primary Crosslisting
This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one’s group is central, sharing responsibility for the development of others’ as well as one’s own work.

Class Format: tutorial; each student choreographer will work with a student composer; they will share responsibility choosing, creating, developing, completing, and presenting their projects
Requirements/Evaluation: 10% class participation, 20% written assignments, 70% composition assignments
Extra Info: not available for the fifth course option
Prerequisites: permission of instructor
Enrollment Limit: none
Enrollment Preferences: composition students and student choreographers
Expected Class Size: 10
Distributions: (D1)

NSCI 317 (S) Nature via Nurture: Topics in Developmental Psychobiology
Crosslistings: PSYC317 / NSCI317
Secondary Crosslisting
Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

Class Format: tutorial
Requirements/Evaluation: each week, students will either present an oral argument based on a 5-page position paper or respond to their partners’ paper; Weekly lab meetings will be held and empirical projects presented in a final poster session
Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)
Enrollment Limit: 10
Enrollment Preferences: Neuroscience concentrators and Psychology majors
Expected Class Size: 10
PHIL 122 (F) Philosophical Approaches to Contemporary Moral Issues  (WI)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, the ethics of protest, and torture and terrorism. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.
Class Format: tutorial
Requirements/Evaluation: bi-weekly tutorial papers, oral commentaries, and tutorial discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; this course is suitable for first-year students
Enrollment Limit: 10
Enrollment Preferences: prospective Philosophy majors and those committed to the tutorial
Expected Class Size: 10
Distributions: (D2) (WI)

PHIL 220 (F) Happiness  (WI)
According to Aristotle the ultimate good is happiness—everything we desire we desire for the sake of happiness. Yet what is it to be happy? Should we value other things (say justice or passionate commitment and curiosity) over happiness? Are happiness and pleasure the same thing? Is happiness an emotional or mental state or is it a social construct? What do the social and psychological sciences have to teach us about happiness? Philosophy? Is the happy life a life of virtue? Does being virtuous guarantee happiness? How important are honor, money, love, work, friendship and our connections to others to our happiness? In this tutorial we will read from Ancient, modern and contemporary philosophical sources as well several relevant studies in the social sciences and positive psychology movement in order to engage questions concerning happiness.
Class Format: tutorial
Requirements/Evaluation: five 5-page papers and five 2-page papers
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students interested in philosophy and/or happiness
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: WI: This course is writing intensive insofar as it requires over 35 pages of writing, regular feedback from me and your partner on writing and critical analysis, and successive efforts to improve your ability to write a variety of types of critical essays. Guidelines for different methods of engaging in critical analysis will be provided.
PHIL 235 (S)  Morality and Partiality: Loyalty, Friendship, Patriotism  (WI)
The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people--such as friendships, familial ties, love, patriotism--seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

Class Format: tutorial; tutorial pairs will meet with the instructor for one hour a week
Requirements/Evaluation: tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; open to first year students
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors and then sophomores
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: PHIL Contemporary Value Theory Courses;

PHIL 244 (S)  Environmental Ethics  (WI)
Crosslistings: PHIL244 / ENVI244
Secondary Crosslisting
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial
Requirements/Evaluation: one 5- to 7-page essay every other week (6 in all) and carefully prepared oral responses to partners' essays in alternate weeks; evaluation will be based on essays, oral critiques, and quality of discussion
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ENVI 101 or one course in PHIL
Enrollment Limit: 10
Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators
Expected Class Size: 10
PHIL 291 (F)  Violence: Its Trajectory and Its Causes  (WI)
This tutorial focuses on two books by Harvard psychologist Steven Pinker: *The Better Angels of our Nature. Why Violence Has Declined* (2011) and *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress* (2018). We focus first on the controversial theses that—despite two world wars and the Holocaust—the twentieth century was not the most violent so far, and that, over the entire course of history, human beings have become decreasingly violent. We then turn to the books' explanations of the factors they identify as leading us to be violent—our "inner demons"—and as curbing our violence—our "better angels," among which the books particularly emphasize reason, science, and humanism.

Class Format: tutorial
Requirements/Evaluation: tutorial papers and responses to partner’s tutorial papers, in alternating weeks; participation in tutorial discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none; the books are written for general readers, not for those with expertise in any academic discipline
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors and potential majors
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: JLST Interdepartmental Electives; PHIL Contemporary Value Theory Courses;

PHIL 337 (F)  Justice in Health Care  (WI)
Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we’ll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice within the health care context. This will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform, which may itself include an analysis of the Affordable Care Act or current legislative proposals; justice in health care rationing, with particular attention to the relationship between rationing criteria and gender, "race," disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in less developed countries.

Class Format: tutorial
Requirements/Evaluation: evaluations will be based on biweekly papers, oral commentaries, and tutorial discussions
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors, Public Health concentrators, and students committed to taking the tutorial
Expected Class Size: 10
Distributions: (D2) (WI)
Attributes: JLST Interdepartmental Electives; PHIL Contemporary Value Theory Courses; PHLH Bioethics + Interpretations of Health;
PHIL 388 (S) Consciousness (WI)
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience—what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all—resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science’s most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members convene

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work on off weeks

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: any introduction to philosophy and at least one upper level course in PHIL, no exceptions

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors, Neuroscience or Cognitive Science concentrators; open to sophomores; every effort will be made to pair students according to similar or complementary background

Expected Class Size: 10

Distributions: (D2) (WI)

Attributes: COGS Interdepartmental Electives; PHIL Contemp Metaphysics & Epistemology Courses;

Spring 2019
This course will explore advanced topics in classical mechanics including the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, non-linear dynamics and chaos, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), and rigid-body rotations. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet once a week as a whole to discuss new material.

**Class Format:** tutorial, 1 and 1/4 hours per week; lecture, one hour per week

**Requirements/Evaluation:** evaluation will be based on weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 209

**Enrollment Limit:** 10/section

**Expected Class Size:** 25

**Distributions:** (D3) (QFR)

---

**PSCI 160 (S) Refugees in International Politics** (DPE) (WI)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants, evaluate international organizations' roles in managing population displacement, and consider refugee camps in theory and example. In whose interest is the prevailing system? Who might change it, and how?

**Class Format:** tutorial

**Requirements/Evaluation:** eleven graded essays: five primary, five critique, and one statement

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: Refugees are, by definition, those persecuted because of their political allegiance or membership in an ethnic, racial or religious group; having lost the protection that nationality should give them, they become de facto stateless. This course examines the way in which states oppress people and the question of why we privilege these categories of oppression. WI: Students will write, and will write about writing, every week.

**PSCI 206 (F) Dangerous Leadership in American Politics** (WI)

Primary Crosslisting

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too
simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition’s leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

**Class Format:** tutorial

**Requirements/Evaluation:** six 5-page essays; six 2-page response papers; and one final 5-page rewritten essay

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

PSCI 291 (S) American Political Events (WI)

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events—concrete, discrete things that happen in and around the political world—are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses
on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did—with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

Class Format: tutorial

Requirements/Evaluation: five 5-to 7-page essays, five 2- to 3-page critiques, and a final 4-page reflection

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSCI 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Secondary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery’s advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter’s liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition’s architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Class Format: tutorial

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none; open to all

TUT Section: T1 TBA Neil Roberts

PSCI 359 (S) The Body as Property (DPE) (WI)

From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes
us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan “my body, my choice”; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Class Format: tutorial

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: prior coursework in political theory, cultural theory, philosophy or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors with a concentration in Political Theory, then other Political Science majors

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis. WI: The course is Writing-Intensive because it includes a substantial amount of writing (>30 pages) and opportunities for revision

PSYC 317 (S) Nature via Nurture: Topics in Developmental Psychobiology

Crosslistings: PSYC317 / NSCI317

Primary Crosslisting

Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

Class Format: tutorial

Requirements/Evaluation: each week, students will either present an oral argument based on a 5-page position paper or respond to their partners’ paper; Weekly lab meetings will be held and empirical projects presented in a final poster session

Extra Info: may not be taken on a pass/fail basis, not available for the fifth course option

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 10

Enrollment Preferences: Neuroscience concentrators and Psychology majors

Expected Class Size: 10

Distributions: (D3)

REL 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: tutorial
Requirements/Evaluation: tutorial papers, responses, and a final project
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors
Expected Class Size: 10
Distributions: (D2) (WI)
Distribution Notes: meets Division 1 requirement if registration is under CHIN or COMP; meets Division 2 requirement if registration is under ANTH or REL WI: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. The final project will be a self-designed experiment in reclusion.

REL 262 (F) Time and Blackness (WI)

Crosslistings: AFR208 / REL262 / AMST208

Secondary Crosslisting

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial
Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
**Prerequisites:** none  
**Enrollment Limit:** 10  
**Enrollment Preferences:** concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies  
**Expected Class Size:** 10  
**Distributions:** (D2) (WI)  
**Attributes:** AFR Core Electives; AMST Arts in Context Electives; AMST Comp Studies in Race, Ethnicity, Diaspora;
students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans’ relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

Class Format: tutorial

Requirements/Evaluation: weekly papers, final paper

TUT Section: T1 TBA Thursday Org Mtg 8:30 pm - 9:00 pm Phillip J. Webster

RLSP 228 (S) Velázquez, Goya, and Picasso (WI)

Crosslistings: RLSP228 / ARTH228

Primary Crosslisting

This course will provide an introduction to three major Spanish painters—Velázquez, Goya, and Picasso—who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Class Format: tutorial

Requirements/Evaluation: 3- to 5-page weekly assignment

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 10

Distributions: (D1) (WI)

Distribution Notes: WI: The tutorial format offers students an intensive opportunity to improve their writing by demanding regular writing assignments that the student has to read out loud to their partner and professor. Students write biweekly papers throughout the semester. These papers are then analyzed during the tutorial session by the other student's response

Spring 2019
RUSS 140 (S) Crime and Punishment in Russian History
Crosslistings: RUSS140 / HIST140
Secondary Crosslisting
For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial
Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar
Expected Class Size: 10

RUSS 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WI)
Crosslistings: SOC248 / GBST247 / RUSS248
Secondary Crosslisting
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Anthropology, Sociology, and Russian majors
Expected Class Size: 10
Distributions: (D1) (DPE) (WI)
Distribution Notes:  meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS

DPE: This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

RUSS 331 (S) The Brothers Karamazov  (WI)

Crosslistings: COMP331 / ENGL371 / RUSS331

Primary Crosslisting

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

SCST 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction  (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Secondary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Class Format: tutorial
**Requirements/Evaluation:** attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

**Expected Class Size:** 10

**Distributions:** (D2) (WI)

**SOC 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference** (DPE) (WI)

Crosslistings: SOC248 / GBST247 / RUSS248

**Primary Crosslisting**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Class Format:** tutorial

**Requirements/Evaluation:** 5-page paper every other week, comments on the partner's paper in alternate weeks

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology, Sociology, and Russian majors

**Expected Class Size:** 10

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** meets Division 2 requirement if registration is under SOC or GBST; meets Division 1 requirement if registration is under RUSS

**DPE:** This course fulfills the requirement by teaching the students to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. Apart from exploring comparatively the ways in which people in the region made sense of the social, cultural, and political heterogeneity of the postsocialist condition, we will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Fall 2018

TUT Section: T1   TBAThursday Org Mtg 8:30 pm - 9:00 pm    Olga Shevchenko

**THEA 222 (S) Solo Performance**

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion
and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

**Class Format:** tutorial

**Requirements/Evaluation:** creating a script, building a character, developing various aspects of design, performing a solo piece, and writing a self-evaluation at the end of the semester

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** to be determined by instructor

**Expected Class Size:** 4

**Distributions:** (D1)

---

**THEA 255 (F) Performing Shakespeare**

This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (*Macbeth, Anthony and Cleopatra, Othello*), comedies (*The Merchant of Venice, A Midsummer Night's Dream, Twelfth Night*), and histories (*Richard II, Richard III*); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

**Class Format:** tutorial and lab; in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

**Requirements/Evaluation:** weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** one college level acting class or significant comparable experience (permission of instructor)

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre majors, or those expressing possible interest in Theatre major

**Expected Class Size:** 10

**Distributions:** (D1)

**THEA 361 (F) Writing about Bodies (WI)**

**Crosslistings:** ARTH361 / WGSS361 / THEA361 / INTR361

**Secondary Crosslisting**

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as
memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Class Format: tutorial
Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2-4 pages) as well as discussion; one to two group meetings
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: ARTH 101-102, or permission of instructor; a writing sample that conveys the kind of subject you might be interested in pursuing
Enrollment Limit: 10

WGSS 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction  (WI)
Crosslistings: SCST213 / AFR213 / WGSS213
Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler’s uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does ‘gender’ play in Butler’s fiction? How does Butler’s treatment of the ‘alien’ cause us to reconsider what it means to be human? How does Butler incorporate ‘race’ and the concept of ‘other’ into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler’s visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler’s work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler’s work broadly, and with particular attention to how the concepts ‘race,’ ‘gender’, ‘alien’ and ‘body’ are interrogated in her writings.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors, sophomores with permission of instructor

**Distributions:** (D2) (WI)

---

**Secondary Crosslisting**

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions...
in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Class Format: tutorial

Requirements/Evaluation: five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature

Expected Class Size: 10

Distributions: (D2) (WI)

Distribution Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under WGSS

Spring 2019

TUT Section: T1    TBA     Amanda R. Wilcox

WGSS 244 (F) Actually Existing Alternative Economies  (DPE) (WI)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

Class Format: tutorial

Requirements/Evaluation: six papers of 5-7 pages, six written responses to partner's papers, participation in tutorial discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Crosslistings: ENGL254 / WGSS274

Secondary Crosslisting

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include *Annie John* (1985), *Lucy* (1990), *The Autobiography of My Mother* (1996), *My Brother* (1997), *Mr. Potter* (2002), and *See Now Then* (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

Class Format: tutorial; meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

Requirements/Evaluation: five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

WILLIAMS-EXETER PROGRAMME AT OXFORD UNIVERSITY

Director: Professor Gretchen Long

THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in co-operation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world’s great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams-Exeter Programme are required to be in residence in Oxford from Tuesday, 25 September 2018, until all academic work for Trinity term is complete (potentially as late as at least 28 June 2019) with two breaks for vacations between the three terms. Students enroll for the full academic year, which consists of three eight-week terms of instruction: MICHAELMAS TERM (7 October to 1 December 2018), HILARY TERM (13 January to 9 March 2019), and TRINITY TERM (28 April to 22 June 2019). Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 25 September 2018 for the ten-day orientation.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In their capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter’s subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student’s tutors, supervise the examinations that students sit at the end of each academic term, and report on each student’s academic progress to the Senior Tutor at Exeter College. There are no “add/drop” periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded, although in exceptional circumstances a tutorial may be converted to pass/fail before the end of the fourth week of term with the permission of the Programme director.

Students are required to enroll in two tutorials during Michaelmas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

GRADERS AND CREDIT

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination.

Upon satisfactory completion of the requirements for the Williams-Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight-session tutorial plus final examination counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of their Grade Point Average.

Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College “Writing Intensive” designation, except for those in the studio arts, mathematics, and the sciences.
Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

THE COURSE OF STUDY

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Mathematics, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows in English Language and Literature (with interests ranging from the Renaissance-including Shakespeare-to the early nineteenth century), and in History (with an interest in the Ottoman empire) committed to teaching Williams students, and students are thus encouraged to consider undertaking at least one tutorial course in these fields as part of their course of study.

What follows is a PARTIAL list of tutorial courses normally available to students studying on the Williams-Exeter Programme at Oxford. The tutorials listed below represent a selection of some of the standard “papers” (courses) that comprise the Oxford degrees in various subjects and that are taught in tutorial format, although most are not offered every Oxford term. It needs to be emphasized that this is only a partial list, that the tutorial offerings at Oxford University are incredibly rich, and that one of the attractions of the Programme is that it enables students to define, develop, and pursue their academic interests. Students are therefore encouraged to explore all the courses offered at Oxford even if they are not listed in this Catalog.

Tutorial courses are not offered every term and are often accompanied by scheduled lectures. It is therefore imperative that students consult the relevant “faculty” webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed. It must be noted that study in the sciences is not normally accompanied by laboratory work; science majors seeking major credit for tutorials in the sciences should discuss this situation with their major advisors. Students interested in learning more about the possible courses of study available at Oxford should contact the Director of International Education and Study Away.

A full summary of the list of courses offered by subject can be found at: http://www.ox.ac.uk/admissions/undergraduate_courses/courses/index.html. Detailed descriptions of all the courses listed in this catalog can be found on the websites of respective departments or faculties the links of which can be found at: http://www.ox.ac.uk/divisions/department_az.html.

NON-CREDIT FOREIGN LANGUAGE STUDY

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non-credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. Students may put funds from their Programme Cultural Subsidy towards such study.

STUDENT LIFE

By virtue of the fact that, while in Oxford, they are officially Visiting Students at the University—and full members of Exeter College—Williams students are offered every opportunity to become fully integrated into student life in Oxford. Both Exeter College and Oxford University are home to an exceptional variety of sports clubs, debating societies, interest groups, cultural organizations, and social activities, virtually all of which are available to Visiting Student members of the University. Students are encouraged to participate fully in the social life of Exeter College—to dine in Hall as often as they wish, to frequent the College bar, to use the College’s athletic facilities, and to become members of the various College clubs and organizations. Furthermore, Williams students also have access to the University’s athletic events, concerts, theatrical productions, museums, and libraries. All Williams students in Oxford are encouraged to join the Oxford Union, which, in addition to its debating activities and club rooms, possesses dining facilities and the largest lending library in the University.

At the Ephraim Williams House, all Williams students are housed in large double rooms and enjoy full access to the House’s library, common rooms, laundry facilities, computer lab, and a large dining room, in which a weekly catered meal is served during the eight weeks of term. There are also a number of small kitchens in the House that students may use. The entire facility has high-speed wireless internet access. Bedrooms are hard wired for high-speed internet access and are fully equipped with furnishings, bed linens, and a telephone. The grounds include a courtyard, sheltered bike racks, and gardens. A number of student jobs are available during the academic year for students who wish to earn a little spending money by helping to maintain the facilities and organize Programme activities. Ephraim Williams House is a short bike or bus ride (or a twenty-minute walk) from Exeter College and the center of town, and is within easy walking distance of the University parks and the local shops, restaurants and banks of Summertown. The Programme will partially subsidize student bus passes to facilitate travel around Oxford. The Programme also has a large fleet of bikes for student use.

Before the academic year begins—ten days of orientation activities are scheduled. Students are expected to be in residence for all of these many activities, some of which take place in Ephraim Williams House, others at Exeter College. At this time students will become acquainted with the
workings of the Programme, of Exeter College, and of the University, and will be familiarized with the rules and regulations they are expected to abide by during their residence in Oxford.

Throughout the academic year, provision will be made for trips to a few of sites of historical, cultural, or political interest. In the past these have included the Cotswolds, Stratford, Stonehenge, Bath, Wimbledon, Warwick Castle, Blenheim Palace, and various sites of interest in London. Students will also be given the opportunity to attend a number of theatrical productions and other cultural events. Oxford’s proximity to London gives students ready access to that city’s multiple attractions and many resources. The Oxford-London train service is frequent and the journey takes just over an hour. The buses to London run even more regularly (and are generally cheaper), and the one-way journey takes about ninety minutes.

During the summer before students arrive in Oxford, they will receive a copy of the latest edition of “The WEPO Handbook,” which will further explain the perks, policies, and procedures of the Programme, the rules and regulations they are expected to follow, and tips for how best to enjoy a fulfilling year in and around Oxford.

ILLNESS AND INSURANCE

Students must ensure they are covered either by the Williams College health insurance policy or by some other comprehensive health insurance plan (generally a family health insurance policy). While in Britain, students will be covered by the National Health Service (NHS) for routine visits at the Group Medical Practice used by Exeter College and for emergency hospital treatment. The Programme also works with a physician in private practice attached to a local private hospital. Prescription drugs are available through the NHS for a nominal fee. There are limited outpatient psychological counseling services available through the NHS and the Programme, although, as Visiting Students at the University, Williams students are entitled to make use of the University Counseling Centre. Any extensive or long-term counseling, however, would need to be covered by the student’s personal health insurance policy. Finally, students are not likely to be covered under the NHS for medical services received in foreign countries.

FEES

The tuition and room fees paid by students on the Williams-Exeter Programme at Oxford are the same as those for a year spent in residence at Williams. Students are responsible for some of their own meals and for all of their personal expenses. They are also responsible for arranging and funding the cost of their air travel to and from Britain, although many students opt to take the same flight from JFK. They are provided with three meals a day for the first four or five days in Oxford and with a weekly catered meal in Ephraim Williams House during the eight weeks of term. They may also eat breakfast, lunch, and/or dinner on any day of the week at Exeter. Students will not be charged the full Williams board fee during their year in Oxford, but they will pay a proportion of the board fee to help cover these costs. For planning purposes, students and their parents should expect the cost of a year on the Programme to be roughly the same as a year at Williams. Financial aid eligibility will be figured on the usual basis of tuition, fees, room, board, and personal and book expenses, as if the student were at Williams for the year. Similarly, the normal self-help contribution would be expected. Since the academic year ends later at Oxford than at Williams, the summer earning expectations for students for the following year will be reduced by one half and the difference will be made up by additional Williams aid.

APPLICATION

Admission to the Programme is competitive. Students must apply to the Dean’s Office by the prescribed deadline (normally early in February) and, prior to applying, should consult with the chair of their major department. Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford. In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College’s distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams-Exeter Programme at Oxford University takes student GPA into account, with a general expectation of a minimum GPA of 3.0. More importantly, we expect all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and looks favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant’s writing ability.

WIOX Economics

http://www.economics.ox.ac.uk

http://www.economics.ox.ac.uk/Undergraduate/undergraduate-matrix

All of the Economics teaching is arranged by Oxford’s Economics Department and not by the Director of the Williams-Exeter Programme. Students will be expected to attend the lectures in all terms designated and undertake their tutorial work in the appropriate term. Not all of the choices listed below may be offered in a given year. Students interested in studying Economics should carefully review the course descriptions to insure that they have the necessary background. In addition, students should consult with their major advisors to confirm that they will receive major credit and discuss how the course will fit into their Williams economics curriculum.

WIOX Quantitative Economics

WIOX Macroeconomics (Similar to Econ 252; Lectures and Tutorials HT only)

WIOX Microeconomics (Similar to Econ 251; Lectures and Tutorials MT only)

WIOX Microeconomic Theory (Lectures and Tutorials MT)

WIOX Money and Banking (Prerequisites: Econ 110, 120, and 252; Lectures and Tutorials MT)

WIOX Economics of Industry (Prerequisites: Econ 110, 120, and 251; Lectures MT, Tutorials MT, HT)

WIOX Labour Economics and Industrial Relations (Prerequisites: Econ 110 and 120; Econ 251 or 252; Lectures MT, Tutorials MT, HT)

WIOX International Economics (Prerequisites: Economics 110 and 120; Economics 251 or 252; Lectures and Tutorials, MT, HT)

WIOX Command and Transitional Economies (Prerequisites: Economics 110 and 120; Economics 251 or 252. Lectures and Tutorials: MT, HT)

WIOX Public Economics (Prerequisites: Economics 110, 120, and 251. Lectures and Tutorials: MT)
WIOX Economics of Developing Countries (Prerequisites: Economics 110 and 120; Economics 251 or 252. Lectures and Tutorials: MT, HT).

WIOX British Economic History Since 1870 (Prerequisites: Economics 110 and 120; Economics 251 or 252. Lectures and Tutorials: MT, HT, TT).

English Literature (surveys)

The following courses offer general introductions to the literature of specific periods of English history. There are no prerequisites for these courses, but usually they are available only in the terms indicated below.

WIOX English Literature from 650 to 1350 MT, HT

WIOX English Literature from 1066 to 1550 MT, HT

WIOX English Literature from 1550 to 1660 MT, TT

WIOX English Literature from 1660 to 1760 HT, TT

WIOX English Literature from 1760 to 1830 TT

WIOX English Literature from 1830 to 1910 MT

WIOX English Literature from 1910 to present HT

WIOX Shakespeare

WIOX The History, Theory, and Use of the English Language

WIOX Old English

WIOX Old English Literature

WIOX Old English Philology

WIOX Middle English Dialectology

WIOX Modern English Philology

WIOX Linguistic Theory

Special Authors

WIOX The Beowulf poet, or Alfred, or the Exeter Book (600-1100) MT

WIOX Chaucer, or Langland, or the York Cycle, or the N-Town Cycle (1100-1509) MT

WIOX Spenser, or Milton, or Jonson (1509-1642) MT

WIOX Marvell, or Dryden, or Eliza Haywood (1642-1740) MT

WIOX Wordsworth, or Austen, or Byron (1740-1832) MT,

WIOX Tennyson, or Dickens, or Wilde (1832-1900) MT

WIOX Joyce, or Conrad, or Yeats , or Woolf (1900-present) MT

WIOX Walcott, or Roth, or Friel MT

WIOX Emerson, or Dickinson, or Faulker, MT

Special Topics

Prerequisite: some background in the close reading of literary texts and a general familiarity with the literature of the period.

WIOX Transport and Mobilities
General History (Prelims), periods I to IV

The following courses offer general introduction to western history during specific time periods. There are no prerequisites for these courses and tutorials can generally be arranged for any of them in Hilary terms.

- WIOX General History I. 370-900: The Transformation of the Ancient World
- WIOX General History II. 1000-1300: Medieval Christendom and its Neighbors
- WIOX General History III. 1400-1650: Renaissance, Recovery, and Reform
- WIOX General History IV. 1815-1914: Society, Nation, and Empire

British History (Prelims or FHS)

The following courses offer general introductions to the History of the British Isles, paying particular attention to the evolution and development of Britain as a nation and to the major political, social, and economic trends that have shaped the course of the nation’s development.

There are no prerequisites for these courses and while lectures are normally delivered in Michaelmas Term, tutorials can generally be arranged for any of them in Michaelmas term. Tutorials for FHS British History are held in Trinity term.

- WIOX History of the British Isles I. c.300-1087
- WIOX History of the British Isles II. 1042-1330
- WIOX History of the British Isles III. 1330-1550
- WIOX History of the British Isles IV. 1500-1700
- WIOX History of the British Isles V. 1685-1830
- WIOX History of the British Isles VI. 1815-1924
- WIOX History of the British Isles VII. 1900 to the present

Historical Methods (Prelims)

All of the papers in this group offer a choice of introductions to the ways in which history has been and is being written. They are designed to encourage reflection on the variety of methods used by historians, and on the many forms of historical writing.

- WIOX Approaches to History
- WIOX Historiography: Tacitus to Weber

Optional Subjects (Prelims)

The Optional Subjects are based on close study of selected primary texts or documents, and offer an opportunity for more specialized study than is possible in the outline papers. They provide a first indication of the range of the interests of members of the Faculty, and are often taught by experts in the particular field of the subject. Over twenty options are available, but there may be some variation in the papers available from year to year. Prelim Options are available during Trinity term.

- WIOX Theories of the State (Aristotle, Hobbes, Rousseau, Marx)
- WIOX The Age of Bede c.660-c.740
- WIOX Early Gothic France c.1100-c.1150
- WIOX Conquest and Frontiers: England and the Celtic Peoples 1150-1220
- WIOX English Chivalry and the French Wars c.1330-c.1400
- WIOX Crime and Punishment in England, c.1280-c.1450
- WIOX Nature and Art in the Renaissance
- WIOX Witch-craft and Witch-hunting in Early Modern Europe
- WIOX Making England Protestant, 1558-1642
- WIOX Conquest and Colonization: Spain and America in the Sixteenth Century
- WIOX Revolution and Empire in France 1789-1815
- WIOX Women, Gender and the Nation: Britain, 1789-1825
- WIOX The Romance of the People: The Folk Revival from 1760 to 1914
General History (Finals), i-xix

The following courses offer general introductions to western history during specific time periods. There are no prerequisites for these courses and tutorials can generally be arranged for any of them in Michaelmas or Trinity term.

- General History i, 285-476
- General History ii, 476-750
- General History iii, 700-900
- General History iv, 900-1150
- General History v, 1100-1273
- General History vi, 1273-1409
- General History vii, 1409-1525
- General History viii, 1500-1618
- General History ix, 1618-1715
- General History x, 1618-1715
- General History xi, 1789-1871
- General History xii, 1856-1914
- General History xiii, 1914-1945
- General History xiv, 1941-1973
- General History xv, Britain’s North American Colonies: from settlement to independence, 1600-1812
- General History xvi, From Colonies to Nation: the history of the United States, 1776-1877
- General History xvii, The History of the United States sine 1863
- General History xviii, Eurasian Empires, 1450-1800
- General History xix, Imperial and Global History 1750-1914

FHS Further Subjects

Offered in Hilary Term, these require attendance in classes as well as tutorials. Each is based on a large number of primary sources which must be read in advance over the Christmas holiday. In order to gain admission to these courses, students must register well in advance, by the end of the first week of Michaelmas Term and admission is not guaranteed.

WIOX Historiography and Methodologies of Art History

An overview of the development of the History of Art as a discipline. The course surveys influential projects of the field and the methods it has adopted for executing them. Topics include: style and periodization; iconography, semiotics; narratology, spectatorship; the social functions of images and the social history of art; art and the market; gender and sexuality; and art-historical narrative as representation. With permission of the Art Department, counts as ARTH 301.
Prerequisites: ARTH 101-102. Lectures: MT and HT, with permission. Tutorials: depending on availability, any term.

WIOX Internet Studies

http://www.oii.ox.ac.uk/graduatestudy/msc/course

The Oxford Internet Institute is a graduate level programme and the courses offered are typically taught as seminars. Williams-Exeter students can participate in the seminar with the permission of the convener and will supplement the seminar with additional writing assignments or tutorial meetings. Note that Williams-Exeter students may only enroll in one seminar for course credit during their year in Oxford.

WIOX Statistical Lifetime Models

WIOX Modern Languages and Linguistics

http://www.mod-langs.ox.ac.uk

Note that general language instruction is not available for course credit. Students can study languages on a non-credit basis through the Language Institute for a nominal fee. Students with strong language skills (fluency in speaking, reading, and writing) may pursue literature and linguistics within those languages.

WIOX Language Papers
WIOX Linguistic Studies
WIOX Period of Literature or Period Topics
Courses offered by the Faculty of Oriental Studies include language, literature, history and culture, and there are a wide range of options in such fields as art and archaeology, history, literature, philosophy, religion and modern social studies. Some of these courses may require knowledge of the primary sources. It is imperative that students possess the requisite language skills before requesting any of these courses.

**WIOX Arabic and Islamic Studies**

http://www.orinst.ox.ac.uk/undergraduate/handbook/arabic.html

WIOX: Arabic Literature
WIOX: Islamic History, 570-1500
WIOX: Islamic Religion
WIOX: Hadith
WIOX: Muslims and Others in Abbasid Story-Telling
WIOX: Early Islamic Historiography
WIOX: The Ethos of the jahiliya in the Muallaqat of Imrul-Qays
WIOX: Aspects of Islamic Art, Architecture and Archaeology
WIOX: The rise of the Sufi orders in the Islamic world, 1200-1500
WIOX: Sufism
WIOX: al-Ghazali
WIOX: Religion and politics during the Mongol period
WIOX: The Middle East in the Age of Empire, 1830-1970
WIOX: A modern Islamic thinker (e.g., Sayyid Qutb, Mohamed Talbi, Rashid Rida)
WIOX: Modern Arabic literature
WIOX: Society and Culture in the Middle East
WIOX: The Biography of Mohammad
WIOX: Modern Islamic Thought in the Middle East
WIOX: Harems, Homes and Streets: Space and Gender in the Middle East
WIOX: History of Jewish-Muslim Relations
WIOX: Later Islamic art and architecture, 1250-1700

WIOX Chinese
http://www.orinst.ox.ac.uk/undergraduate/handbook/chinese.html#_Special_Option
WIOX: China and the World
WIOX: Painters on Painting
WIOX: Modern Literature and Film
WIOX: Myth of the Confucian Classic in the Warring States Period

WIOX Egyptology and Ancient Near Eastern Studies
http://www.orinst.ox.ac.uk/undergraduate/handbook/eanes.html

WIOX: Psychology of Religion
WIOX: English Church and Mission 597-754
The Williams College-Mystic Seaport Maritime Studies Program offers students a unique opportunity to explore the ocean, travel the Atlantic, Pacific, and Gulf coasts, and conduct original primary research of their own design in the humanities and sciences. Williams-Mystic is considered the coastal and ocean studies campus of Williams College. Sophomores, juniors, and seniors of all majors welcome to apply. A term at Williams-Mystic includes credit for one semester plus one Winter Study requirement, as well writing-intensive course credit. Four Williams courses are offered as an interdisciplinary curriculum in the semester-long program based at Mystic Seaport, in Mystic, Connecticut: Americans and the Maritime Environment, Literature of the Oceans, Marine Policy, and either Marine Ecology or Oceanographic Processes. Travel includes an offshore voyage on the open ocean sailing aboard a tall ship, a seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross-disciplinary and interdisciplinary exercises. The Spring 2019 semester will include a field seminar to Sitka, Alaska. Students live in historic, cooperative, co-ed houses at Mystic Seaport, the world’s largest maritime museum, and have full access to world-class maritime collections, a maritime library, a state-of-the-art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tide pools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as ship carving, music of the sea, boat building, or small boat handling and sailing. Williams-Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Admission is competitive, and interested students should email wmadmissions@williams.edu, call 860-572-5359, or visit the Williams-Mystic website.

**BIOL 231 (F) Marine Ecology**

Crosslistings: BIOL231 / MAST311

Secondary Crosslisting

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Distributions: (D3)

Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

Fall 2018

LEC Section: 01 TBA Tim J. Pusack

Spring 2019

LEC Section: 01 TBA Tim J. Pusack

**ENGL 231 (F) Literature of the Sea (WI)**

Crosslistings: ENGL231 / MAST231

Secondary Crosslisting

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story
writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville’s masterpiece *Moby-Dick* aboard Mystic Seaport’s historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

**Class Format:** small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final paper

**Extra Info:** offered only at Mystic Seaport

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**Distributions:** (D1) (WI)

**Attributes:** AMST Arts in Context Electives; ENVI Humanities, Arts + Social Science Electives;

---

**ENVI 351 (F) Marine Policy**

Crosslistings: ENVI351 / PSCI319 / MAST351

**Secondary Crosslisting**

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

**Class Format:** lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

**Requirements/Evaluation:** an independent research paper, a presentation, and a final exam

**Extra Info:** offered only at Mystic Seaport

**Department Notes:** satisfies the Environmental Policy requirement for the Environmental studies concentration

**Distributions:** (D2)

**Attributes:** ENVI Environmental Policy; EXPE Experiential Education Courses; POEC International Political Economy Courses

---

### Fall 2018

**GEOS 210 (F) Oceanographic Processes**

Crosslistings: GEOS210 / MAST211

**Secondary Crosslisting**

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean’s role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project
**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Distributions:** (D3)

**HIST 352 (F) Americans and the Maritime Environment (WI)**

Crosslistings: HIST352 / MAST352

**Secondary Crosslisting**

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

**Class Format:** lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

**Requirements/Evaluation:** two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Distributions:** (D2) (WI)

The Program in Teaching offers a coordinated cluster of courses, advising and field work that give students the opportunity to study the ideas, questions, and practices involved in good teaching at all levels. The Program seeks to promote and facilitate an exchange of ideas about teachers, learners, and schools, within and beyond the Williams campus. The Program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach.

Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology, for example) and the process of teaching those topics to elementary and high school students. The Program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

No specific major is required to participate—although some lend themselves easily to certification, such as Mathematics, English, Biology, American History, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work. More information can be found at program-in-teaching.williams.edu.

### TEAC Related Courses

**AMST 379 (F) American Pragmatism**

Crosslistings: PHIL379 / AMST379

**Secondary Crosslisting**

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

**Class Format:** seminar

**Requirements/Evaluation:** final paper, several short assignments

**Prerequisites:** at least two PHIL courses

**Enrollment Limit:** 25

**Enrollment Preferences:** Philosophy and American Studies majors, then seniors and juniors of any major

**Expected Class Size:** 12-15

**Distributions:** (D2)

**Attributes:** AMST Critical and Cultural Theory Electives; PHIL History Courses; TEAC Related Courses

Not offered current academic year

Crosslistings: PSYC341 / WGSS339

**Primary Crosslisting**

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will
examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

**Class Format:** empirical lab course

**Requirements/Evaluation:** weekly brief papers, oral reports, two longer papers

**Prerequisites:** PSYC 201 and 242

**Enrollment Limit:** 16

**Enrollment Preferences:** senior, then junior Psychology majors

**Expected Class Size:** 16

**Distributions:** (D2) (WI)

**Attributes:** AMST Comp Studies in Race, Ethnicity, Diaspora; ASAM Related Courses; PSYC Area 4 - Social Psychology; PSYC Empirical Lab Course; TEAC Related Courses;

Spring 2019

LAB Section: 02  M 1:00 pm - 4:00 pm  Steven Fein
LEC Section: 01  W 1:10 pm - 3:50 pm  Steven Fein

LEC Section: 01  W 1:10 pm - 3:50 pm  Steven Fein

---------------------------------------------------------------

**TEAC Teaching Sequence Courses**

**PSYC 101 (F) Introductory Psychology**

An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

**Class Format:** lecture

**Requirements/Evaluation:** two lab reports, unit quizzes, and a final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Expected Class Size:** 160

**Distributions:** (D2)

**Attributes:** NSCI Required Courses; TEAC Teaching Sequence Courses

Fall 2018

LEC Section: 01  MWF 10:00 am - 10:50 am  Amie A. Hane, Clarence J. Gillig

Spring 2019

LEC Section: 01  MWF 10:00 am - 10:50 am  Noah J. Sandstrom, Clarence J. Gillig

**PSYC 232 (F) Developmental Psychology**

An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, and family systems.

**Class Format:** lecture/discussion
**Requirements/Evaluation:** attendance and active class participation, 3 exams (2 midterms and final), and regular writing assignments

**Prerequisites:** PSYC 101

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and junior Psychology majors

**Expected Class Size:** 50

**Distributions:** (D2)

**Attributes:** PSYC 200-level Courses; TEAC Teaching Sequence Courses

**Fall 2018**

LEC Section: 01 TR 11:20 am - 12:35 pm Amie A. Hane

---

**PSYC 242 (F) Social Psychology**

A survey of theory and research in social psychology. Topics include the self, social perception, conformity, attitudes and attitude change, prejudice, aggression, altruism, attraction and love, intergroup conflict, and cultural psychology. Applications in the areas of advertising, law, business, and health will also be discussed.

**Class Format:** lecture

**Requirements/Evaluation:** two in-class exams, one paper and a final exam

**Enrollment Limit:** none

**Expected Class Size:** 50

**Distributions:** (D2)

**Attributes:** PSYC 200-level Courses; TEAC Teaching Sequence Courses

**Fall 2018**

**Spring 2019**

LEC Section: 01 TR 11:20 am - 12:35 pm Amanda N. Bergold

---

**PSYC 272 (S) Psychology of Education**

This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first-hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** two exams and a final project

**Extra Info:** may not be taken on a pass/fail basis

**Prerequisites:** PSYC 101

**Enrollment Limit:** 50

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 50

**Distributions:** (D2)

**Attributes:** PSYC 200-level Courses; TEAC Teaching Sequence Courses
PSYC 327 (F) Cognition and Education

This class will focus on basic research into the cognitive processes underlying learning. How does the mind encode, store, and retrieve knowledge? How do learners (and teachers) manage their own learning? How do educational practices depart from what research recommends? The readings will be scientific articles. Students will do original research.

Class Format: empirical lab

Requirements/Evaluation: class participation, daily quizzes, research papers

Prerequisites: PSYC 201 and PSYC 221 or 222, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 12

Distributions: (D2)

Attributes: COGS Interdepartmental Electives; PSYC Area 2 - Cognitive Psychology; PSYC Empirical Lab Course; TEAC Teaching Sequence Courses

PSYC 338 (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Class Format: seminar

Requirements/Evaluation: three 3-5 page essays, two child observations and a 7-10 page final paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: preference given to Psychology majors

Expected Class Size: 16

Distributions: (D2)

Attributes: PSYC Area 3 - Developmental Psychology; TEAC Teaching Sequence Courses

Not offered current academic year

PSYC 372 (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students’ learning? What does it take to be an educated person?
Class Format: seminar

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 16

Distributions: (D2)

---------------------------------------------------------------
WINTER STUDY
Coordinator: Barbara Casey

Winter Study, which began in January of 1968, is intended to provide students and faculty with a dramatically different educational experience. The differences are in the nature of the courses, the nature of the learning experience, and the change of educational pace and format from fall and spring semesters. These differences apply to the faculty and students in several ways: faculty can try out courses with new subjects and techniques that might, if successful, be used later in the regular terms; they can explore subjects not amenable to inclusion in regular courses; and they can investigate fields outside their usual areas of expertise. In their academic work (which is graded Pass, Perfunctory Pass, or Fail) students can explore new fields at low risk, concentrate on one subject that requires a great deal of time, develop individual research projects, or work in a different milieu (as interns, for example, or on trips outside Williamstown). In addition, Winter Study offers students an opportunity for more independence and initiative in a less formal setting, more opportunity to participate in cultural events, and an occasion to get to know one another better. More information can be found on the Winter Study website.

Registration
All students who will be on campus during the academic year must register for a Winter Study course. Registration will take place in early November. If you are registered for a senior thesis in the fall which must be continued through Winter Study by departmental rules, you will be registered for your WSP automatically. In every other case, you must complete registration. First-year students are required to participate in a WSP that will take place on campus; they are not allowed to do 99’s.

If you think your time may be restricted in any way (ski meets, interviews, etc.), clear these restrictions with the instructor before signing up for their project. Remember, for cross-listed projects, you should sign up for the subject you want to appear on your record. For many beginning language courses, you are required to take the Winter Study Sustaining Program in addition to your regular course. You will be automatically enrolled in this Sustaining Program once the Winter Study registration process is complete. Winter Study courses are graded Pass/Perfunctory Pass/Fail. A grade of pass means the student has performed satisfactorily. A grade of perfunctory pass signifies that a student's work has been significantly lacking but is just adequate to deserve a pass. Students who fail their Winter Study Projects or receive a second Perfunctory Pass will be placed on academic probation by the Committee on Academic Standing and will be required to make up the deficiency. Students who fail through gross neglect of work will normally be required to resign.

99s
Sophomores, juniors, and seniors are eligible to propose “99’s,” independent projects arranged with faculty sponsors, conducted in lieu of regular Winter Study courses. Perhaps you have encountered an interesting idea in one of your courses which you would like to study in more depth, or you may have an interest not covered in the regular curriculum. In recent years students have undertaken in-depth studies of particular literary works, interned in government offices, assisted in international and domestic medical clinics, conducted field work in economics in developing countries, and given performances illustrating the history of American dance. Although some 99’s involve travel away from campus, there are many opportunities to pursue intellectual or artistic goals here in Williamstown. More information about Winter Study 99s can be found online.

AFR 20 (W) Performing Self-Portraiture in the Age of Instagram
Crosslistings: AFR20 / THEA20 / WGSS20 / ARTS20

Secondary Crosslisting
What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacoby Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale’s Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe’s Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

Class Format: afternoons
Requirements/Evaluation: final performance
Prerequisites: none
In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the "New South" including a small mainstream denominational church in Tallieveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

**Class Format:** travel

**Requirements/Evaluation:** based on an electronic field journal, participation in weekly colloquies, and an oral presentation

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 8

**Enrollment Preferences:** majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

**Materials/Lab Fee:** cost to student: $3362

**Attributes:** EXPE Experiential Education Courses; TRVL Winter Study Travel Course
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

Winter 2019

IND Section: 01    TBA     James A. Manigault-Bryant

AMST 10 (W) New(ish) and Rare: Special Collections in the 20th century

What makes relatively recent books and manuscripts worth preserving? Whose voices are missing from the library's collections? Students in this course will explore the market for 20th-century rare books and manuscripts and recommend items for Special Collections to purchase. We will spend our first two weeks exploring the library's existing collections of 20th-century Americana, focusing on what makes these books and manuscripts valuable—not just in terms of their cost but their usefulness in supporting teaching and student research. We'll explore the market for antiquarian books, and we'll consider how social movements and historical events including second-wave feminism, workers' strikes, and the civil rights era are documented in primary sources. Outside of class, students will spend additional hands-on time with rare materials in the Special Collections reading room. Students will also search printed and online catalogs from booksellers who specialize in 20th-century material to look for potential additions to our collections. Given a theoretical budget of $1000, each student will assemble a proposal to acquire a new collection of books and manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting these proposals to the Chapin Librarian, who will approve a selection of items to purchase for our collections. Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography.

Class Format: afternoons

Requirements/Evaluation: final collection development proposal/report justifying rationale for acquisition of rare books and manuscripts

Prerequisites: none

Enrollment Limit: 12

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Anne Peale

AMST 11 (W) North Adams, Massachusetts: Past, Present, and Future

Crosslistings: AMST11 / HIST10

Secondary Crosslisting

This class gives students a chance to learn about resources and assets of Massachusetts’s smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students' engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

Class Format: afternoons

Requirements/Evaluation: 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 15
Enrollment Preferences: first-year students preferred
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Annie Valk

AMST 14 (W) The Davis Center Histories
This course will explore the history of the Williams College Davis Center (DC), formerly the Multicultural Center. In exploring this history, the course readings and discussions will contextualize the local specificities of the Center's establishment within broader U.S. academic, political, and cultural discourses on student-led protest, the evolution of multiculturalism, the centrality of Black resistance, and the import of cultural specificity in creating an equitable and just world. The course will thus rely on resources in the College archives, and students will be encouraged to hone their research skills, but will also rely on communal construction of a theoretical framework to analyze the archived history of the Center while attending to the DC's current mission to facilitate conversations about race, gender identity, sexual orientation, class, religion, and ability. Readings will include work by Kimberlé Crenshaw, Patricia Hill Collins, Roderick Ferguson, Houston Baker, E. Patrick Johnson, Jeff Chang, Sami Schalk, and more. Students will be encouraged to engage in critical and constructive discussion about the historical place and work of the Davis Center, and contribute to that work with assignments that include weekly personal reflections and program proposals to enhance the curriculum and programmatic itinerary of the Center.

Class Format: mornings
Requirements/Evaluation: 2 program proposals, weekly reflections, and class participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference given to first-year students
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Tatiana D. McInnis

AMST 15 (W) Contemporary American Songwriting
Crosslistings: MUS15 / AMST15
Secondary Crosslisting
This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

Class Format: mornings
Requirements/Evaluation: final performance and a 2- to 3-page paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: students with a musical background and the ability to play an instrument may be given preference, but anyone interested is encouraged to register
AMST 30 (W) Senior Honors: American Studies
To be taken by students registered for American Studies 491 or 492.
Class Format: independent study
Distributions: (D2)

AMST 99 (W) Independent Study: American Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Distributions: (D2)

ANSO 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions
Crosslistings: PHLH14 / ANSO14 / CHEM14
Primary Crosslisting
More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course. Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.
Class Format: at least three times a week for a total of 6 hours
Requirements/Evaluation: 10-page paper, final project
Prerequisites: course in Biostat helpful, but not required
ANSO 16 (W) The Ayn Rand Cult
Crosslistings: COMP16 / ANSO16 / RLSP16

Secondary Crosslisting
The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper
Prerequisites: some previous acquaintance with Rand's novels
Enrollment Limit: 30
Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)
Materials/Lab Fee: approximately $90 for books
Distributions: (D1)

Winter 2019
LEC Section: 01    TBA    Gene H. Bell-Villada

ANSO 99 (W) Independent Study: Anthropology & Sociology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

Winter 2019
IND Section: 01    TBA    Antonia E. Folas

ANTH 12 (W) Coastal Navigation
Students will learn basic skills for piloting a small vessel in coastal waters using a compass and paper charts. Areas to be covered include: basic rules of navigation; reading nautical charts; recognizing and interpreting aids to navigation (buoys, lighthouses, etc.); reading a magnetic compass; plotting a position on a chart; plotting a course by dead reckoning; planning and charting a voyage; the use of standard navigation references; the use of open source chartplotting software. Work outside class meetings will consist of assigned readings and practice plotting.

Class Format: mornings
Requirements/Evaluation: periodic quizzes and a final exercise; punctual attendance and all class meetings is required; absences for the purpose of extra-curricular activities will not be excused

Prerequisites: none

Enrollment Limit: 10

Materials/Lab Fee: $77 plus cost of books

Winter 2019
LEC Section: 01    TBA    Peter Just

**ANTH 15 (W)  Photographic Literacy and Practice**

Crosslistings: ANTH15 / SOC15

Secondary Crosslisting

When you look at a photograph, what is it really saying? How can you make photograph that says what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week--Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

Requirements/Evaluation: final project; formal public exhibit

Prerequisites: none, but students must own or borrow a digital camera (a DSLR with a 35mm lens is ideal, but compact cameras will also work)

Enrollment Limit: 12

Enrollment Preferences: students can email me

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA    Ben Brody

**ANTH 31 (W)  Senior Thesis: Anthropology**

To be taken by students registered for Anthropology 493-494.

Class Format: thesis

Distributions:  (D2)

Winter 2019
HON Section: 01    TBA    Antonia E. Foias

**ANTH 99 (W)  Independent Study: Anthropology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions:  (D2)

Winter 2019

IND Section: 01 TBA Magnús T. Bernhardsson

IND Section: 03 Cancelled

ARTH 10 (W) From Metal to Money: Ancient Numismatics

Crosslistings: ARTH10 / CLAS10

Secondary Crosslisting

How were coins made and circulated in the ancient world? Why did a city or individual choose to mint coins? What role did coins play in people’s lived experience, as well as in Greek and Roman visual culture? In this course, we will explore the Western coinage tradition from its origins through Late Antiquity, using the college’s own numismatic collection as a basis for methodological discussions and for individual research. In consultation with the professor, each student will select coins from the collection and relate it to each of the different methodological issues under investigation. These topics will include mint and die studies; analysis of coin hoards; approaches to coin finds in archaeological excavation; the use of coins as historical "documents"; and the iconography of Greco-Roman coinage as it relates to classical art history. For most class meetings, students will present a short report on how the methodological issue under discussion relates to specific coins they have selected from the college’s collection, before choosing a final research project. In addition to the hands-on experience of working with these coins, we will also survey the different historical coinages from antiquity (e.g., Classical Greek, Hellenistic Greek, Roman Republican) through a series of illustrated lectures.

Class Format: afternoons

Requirements/Evaluation: 10-page paper and a presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference will be given to students majoring in Classics, Art History, and History

Materials/Lab Fee: cost of books

Winter 2019

LEC Section: 01 TBA Nicole G. Brown

ARTH 11 (W) Editorial Cartooning and the Art of Propaganda

Crosslistings: ARTH11 / PSCI11
This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

**Class Format:** afternoons

**Requirements/Evaluation:** editorial cartoons to be produced for each class meeting for evaluation by the class; final cartoons to be published in The Williams Record

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference will be given to non-art majors

**Materials/Lab Fee:** $50

**Attributes:** EXPE Experiential Education Courses

**ARTH 16 (W) True and Wild Tales: Argentine Cinema after 1985**

Crosslistings: ARTH16 / LATS16

The Argentine film industry is one of the most developed in the Spanish-speaking world. It is rich in genres and production scales, and in the issues raised by the films themselves. This immersive course encourages dynamic engagement with these issues, as we watch films that grapple with the country’s painful legacy of dictatorial rule, coming-of-age road movies, familial dramas, and riotous comedies that feature that distinctive, biting Argentine humor. Our meetings consist of three mandatory screenings per week, two of which are followed by class discussion. In addition to learning about the Argentine context, we will learn vocabulary and tools for discussing and writing about film. No previous coursework in film, or fluency in Spanish required (the films are subtitled)—only an interest in contemporary Argentine cinema and culture.

**Class Format:** afternoons

**Requirements/Evaluation:** 2- to 3-page paper; 3 mandatory screenings each week

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference will be given to Art Studio and Art History majors, as well as students concentrating in Latino/a Studies

**Materials/Lab Fee:** cost of books

**LEC Section: 01 TBA Mari Rodriguez Binnie**
ARTH 17 (W)  Architectural Models

Architectural history is generally taught by photographs, which compress three-dimensional things into two-dimensional projections. But describing the dynamic nature of architectural space with a flat image is like describing an ice cream flavor with a flow chart. In this course groups of four or five students will receive measured drawings of major American buildings and construct models at quarter-inch scale. Possible subjects include works by Venturi, Wright, Eisenman, and Jefferson. No previous architectural experience is necessary. After the initial two sessions, there will be two three-hour studio sessions each week where the instructor will critique the projects. At a final meeting, a jury will review the models.

Class Format: mornings
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Art majors will have preference
Materials/Lab Fee: $25
Distributions: (D1)

ARTH 19 (W)  21st Century Museums--From the Inner Workings to the Future Vision of Culture Making

Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Secondary Crosslisting
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums--from art museums to scientific, historical, and specialty collections--and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for four hours session at WCMA; plus 1 trip to area museums per week.

Requirements/Evaluation: final formal public exhibit
Prerequisites: keen interest in museums and culture
Enrollment Limit: 12
Enrollment Preferences: random selection
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

ARTH 99 (W) Independent Study: Art History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: Independent study

Distributions: (D1)

Winter 2019

IND Section: 01   TBA   Elizabeth P. McGowan

ARTS 12 (W) Portrait Painting: from Fayum mummies to the Obamas
This course will be a hybrid of studio practice and a visual survey of the painted portrait, tracing various approaches to portraiture and mark-making, from the Fayum mummies to the recently unveiled portraits of Barack and Michelle Obama, in order to inform the ways by which we will, throughout the course, paint portraits (of oneself or another). The course will culminate in a final exhibition of each participant's painting, which will be worked on throughout the duration of the winter study, in- and outside of class. We will begin the course by looking to a range approaches to portraiture and engaging in various drawing and painting exercises, before spending the bulk of the remaining time working towards a single, polished painting, in oil or acrylic on canvas or panel. We will analyze many of the touchstone examples of portraiture over the centuries to survey a range of styles and how their respective techniques and painted marks reflected the zeitgeist, or collective psychology of a time and place, in order to inform our own painted works. The course will meet three times per week to engage in dedicated studio work, and group analysis of historic examples of painted portraits. Outside of class, students will be expected to continue their studio work, as well as additional drawing or painting exercises, readings, and possible film screening(s). The final project, a single portrait painting, will be displayed in a group exhibition in the Spencer Art Building at the culmination of the Winter Study period, at which time each artist will present their finished work. No experience necessary, but some background in painting and drawing is a plus. Adjunct Instructor Bio: William Binnie (born Dallas, TX, 1985) is a visual artist living and working in Williamstown, MA and Brooklyn, NY. His work has been exhibited nationally and internationally and is held in a number of public and private collections across the United States, Europe, and Asia. Binnie's work is currently on view at MassMoCA's "The Lure of the Dark: Contemporary Painters Conjure the Night," through 2019. For more information and images of work, please visit: www.william-binnie.com.

Class Format: afternoons

Requirements/Evaluation: final formal public exhibit; completion of one (or more) portrait painting(s), to be worked on over the duration of the course

Prerequisites: no experience necessary, but some background in painting and drawing is a plus

Enrollment Limit: 15

Enrollment Preferences: preference will be given to studio and art history students, and will be given to seniors thereafter

Materials/Lab Fee: $125
ARTS 13 (W) Creative Portraiture in the Darkroom
Crosslistings: ARTS13 / RLFR13
Secondary Crosslisting

In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

Class Format: mornings
Requirements/Evaluation: 2- to 3-page paper; formal public exhibit
Prerequisites: knowledge of black and white analog photography is preferred, but not required
Enrollment Limit: 10
Enrollment Preferences: Art major and minors then random
Materials/Lab Fee: $120
Attributes: EXPE Experiential Education Courses

ARTS 14 (W) Results May Vary

An exploration of cross-disciplinary sampling: digital and visual art, sculpture, sound, music, moving image, text, theater. Paul de Jong presents the vast media archive the Mall of Found as a point of departure for discussion and as the resource for creative exploration, touching upon issues specific to the inception, production and presentation of art using sampled sources. De Jong will address topics related to the creative process and issues specific to the field of sampling: integrity in appropriation, conflict in collaboration, developing method and technique, making your own rules and having changes of heart, documenting and archiving, commercial considerations, presentation and audience subjectivity. Participants will receive a detailed introduction to the archive and its makeup. Throughout, access will be given to the digital collection. The physical archive (housed in North Adams, MA) will be accessible by appointment and through weekly group excursions. After determination of individual and collective goals, emphasis shall be given to a hands-on creative approach, outside-of-class. In-class time will be set aside for weekly individual presentations and critiques, as well as daily group meetings for topical discussions. The course may result in individual or group works presented in a gallery show, as a theatrical/musical performance, a movie showing, a web production, printed matter, publications, or readings. Paul de Jong's Mall of Found is home to a wealth of assorted fringe media and ephemera. This includes some 5,000+ VHS, 1,500 LP's, 5,000 cassette tapes, as well as photography, printed matter and film, numbering over 100,000. The subject matter is sprawling, favoring independent and amateur production and analog forms. Categories include: televangelism, self-help, hunting, meditation, technical, instructional, medical and much more. Paul de Jong (formerly of the Books) recently released his second solo album You F**ken Sucker.

Requirements/Evaluation: final formal public exhibit
Prerequisites: active engagement in the creation of art, photography, film and video, poetry and prose, dance, theater and music
Enrollment Limit: 15
**ARTS 15 (W)  Shadow Puppetry**

Crosslistings: ARTS15 / THEA15

**Secondary Crosslisting**

The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, "It is in the very limitations of shadows that we learn...It is in the gap between the object and its representation that the image emerges, the gap we fill in." In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials.  

**Adjunct Instructor Bio:** Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

**Requirements/Evaluation:** short presentations and works in progress

**Prerequisites:** none

**Enrollment Limit:** 15

**Materials/Lab Fee:** $215

**Attributes:** EXPE Experiential Education Courses

---

**ARTS 16 (W)  Glass and Glassblowing**

Crosslistings: ARTS16 / CHEM16

**Secondary Crosslisting**

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.  

Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

**Class Format:** 9:00 a.m. to noon, M-F

**Requirements/Evaluation:** evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

**Materials/Lab Fee:** $75

**Distributions:** (D3)
ARTS 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making

The role of museums in American culture has evolved dramatically over recent decades. Enrollment Preferences: random selection
Materials/Lab Fee: none

ARTS 20 (W) Performing Self-Portraiture in the Age of Instagram

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacoby Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

ASTR 16 (W) An Infinity of Worlds: Planets and the Search for Life
Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using remotely-operated telescopes in Australia to gather data on new planets. This course, meant for non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Adjunct Instructor Bio: Rob Wittenmyer '98 is Associate Professor of astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with nearly 20 published planet discoveries.

Class Format: mornings
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: if overenrolled, preference will be given to first-years and sophomores
Materials/Lab Fee: cost of books

**BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES**

BioEYES brings tropical fish to 3rd grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish in the classroom, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week students will learn to set up fish matings, and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, an elementary school teacher, currently coordinates Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. Adjunct Co-Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

*Class Format:* meeting time varies depending on needs of schools and laboratory requirements  
*Requirements/Evaluation:* final project; review of pre and post survey assessments  
*Prerequisites:* none  
*Enrollment Limit:* 14  
*Enrollment Preferences:* preference to seniors  
*Materials/Lab Fee:* $0  
*Attributes:* EXPE Experiential Education Courses

---

**BIOL 12 (W) : New Orleans-Style Jazz and Street Performance**

This course has a focus on making music based on the principles of improvisation and street performance embodied by New Orleans-Style jazz. Typically composed of brass instruments, this course welcomes musicians and performers of all types, from the classically trained to those with no experience who are willing to play washboards, kazoos, and experiment with other forms of sound-making. For when you travel the world after Williams, this course will prepare you to "busk," or make money playing music on the street, where some of the most dynamic forms of jazz and improvisation have been created. The course will include various street performances and culminate with a "gig" in a local music venue. We will meet twice a week for three-hour sessions, with extra band practices, five hours per week, and performances to be scheduled in accordance to our
needs—attendance mandatory. Adjunct Instructor Bio: Andy Kelly, a local Jazz musician and former busker, Williams College Class of '80, now travels the world bridging cultures with music, using American jazz to make peace in the world.

**Class Format:** afternoons

**Requirements/Evaluation:** original musical composition with in-class performance; 2-page short research paper and oral presentation; final performance for 'all college' audience

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference given in order to: seniors, juniors, sophomores, first-years

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01  TBA  Andrew Kelly

**BIOL 13 (W)  Introduction to Animal Tracking**

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slideshow. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Adjunct Instructor Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent programs for private groups and associations.

**Class Format:** 10:00am to 3:00pm two days a week

**Requirements/Evaluation:** attendance, participation, a final presentation of their maps and journals, with attention to detail and content, a field test and 3-page research paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** preference given to seniors

**Materials/Lab Fee:** $90 plus cost of book(s)

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01  TBA  Dan Yacobellis

**BIOL 22 (W)  Introduction to Biological Research**

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

**Class Format:** Independent study

**Extra Info:** meeting time: mornings

**Prerequisites:** none

**Enrollment Limit:** POI

**Materials/Lab Fee:** none

**Distributions:** (D3)
**BIOL 25 (W)  Sustainable Agriculture in California**

Crosslistings: BIOL25 / ENVI25

**Secondary Crosslisting**

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

**Class Format:** travel

**Requirements/Evaluation:** 10-page paper; synthetic journal of field experiences to be produced by the group

**Prerequisites:** none, but see preferences for over-enrollment; not open to first-year students

**Enrollment Limit:** 8

**Enrollment Preferences:** preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay

**Attributes:** EXPE Experiential Education Courses; TRVL Winter Study Travel Course

**BIOL 99 (W)  Independent Study: Biology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Distributions:** (D3)
CHEM 10 (W) Persuasive Presentation--Maximize your Impact

The objective of this course is to introduce a process for preparing and delivering oral presentations with accompanying visuals to enable anyone to maximize their impact. In many fields the ability to transform detailed personal knowledge of a subject into a more broadly accessible message is critical to both personal and organizational success. Often individuals are well prepared as subject matter experts, however, the ability to leverage that expertise into setting a direction or advocating for policy change is learned through trial and error. The instructor of this course has over 25 years of experience presenting scientific and product information in a corporate environment to internal and external customers. This course will focus on a deliberate method for developing persuasive communication that is both engaging and effective. The in-class portion of this course will focus on instruction with a heavy emphasis of "hands on" practice including iterative brainstorming, group sharing and feedback around presentation design, content optimization and oral delivery. The topics for these in class exercises will primarily be provided practice subjects and data sets related to everyday sales pitches and issue advocacy. Student provided topics will also be encouraged. Assigned work outside of class will focus on selected readings, viewing presentations by relevant thought leaders and developing a final presentation on a topic of interest to the student. Students should be prepared to develop ideas they wish to communicate about and preference will be given to students who can articulate concepts they wish to communicate about. This course will utilize Microsoft PowerPoint and Microsoft Excel; students do not need to have expertise in these platforms, however, basic familiarity will be helpful. Adjunct Instructor Bio: Jamie Gardner holds a Ph.D. in Inorganic Chemistry from MIT and leads 3M's Global Fall Protection Laboratory. Over the last 25 years he has focused on the commercialization of Photosensitive, Pest Elimination, Electronic Adhesive, Lithium Ion Battery, Cleaning and Fall Protection products. In pursuit of these efforts he has developed and taught a process utilized to update and influence co-workers, executive stakeholders, customers, external investors and sponsoring government agencies.

Class Format: afternoons

Requirements/Evaluation: final project: students to identify topic of personal interest, develop presentation and present presentation to class

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference given to students who articulate a subject they would like to present on; majors or concentrations in political science/economy, public health, environmental studies and physical sciences

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, cleansing, preventative medicine, yoga and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, healthy skin care with oils, finding your happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper or equivalent creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of oversubscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions--in initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques. There will be several books and a DVD required for this class. Adjunct Instructor Bio: Nicole Anagnos is Health Coach and Director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klo Organic Beauty. She also holds a master's degree in education.

Class Format: mornings

Requirements/Evaluation: 5-page paper, creative project, and final presentation

Prerequisites: none

Enrollment Limit: 15
Winter 2019
LEC Section: 01    TBA    Nicole Anagnos

CHEM 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions

Crosslistings: PHLH14 / ANSO14 / CHEM14

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course. Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

Class Format: at least three times a week for a total of 6 hours
Requirements/Evaluation: 10-page paper, final project
Prerequisites: course in Biostat helpful, but not required
Enrollment Limit: 18
Department Notes: all interested students will be interviewed by the instructor
Materials/Lab Fee: Cost of books

Winter 2019
LEC Section: 01    TBA    Nicholas Wright

CHEM 16 (W) Glass and Glassblowing

Crosslistings: ARTS16 / CHEM16

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Class Format: 9:00 a.m. to noon, M-F
Requirements/Evaluation: evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class
Prerequisites: none
Enrollment Limit: 10
**CHEM 18 (W) Introduction to Research in Biochemistry**

An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, and the molecular basis of bacterial gene regulation.

**Class Format:** daily

**Requirements/Evaluation:** a 10-page written report

**Prerequisites:** variable, depending on the project (at least CHEM 151) and permission of the Dept. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors and the Department Chair

**Enrollment Limit:** POI

**Department Notes:** enrollment limited to space in faculty research lab; since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the department chair before electing this course

**Materials/Lab Fee:** $0

**Distributions:** (D3)

LEC Section: 01    TBA    John W. Thoman

---

**CHEM 19 (W) Methods in Environmental Chemistry**

This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

**Requirements/Evaluation:** evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments

**Prerequisites:** CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to CHEM and/or ENVI majors/concentrators

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA    Anthony J. Carrasquillo
CHEM 22 (W)  Introduction to Research in Environmental Analytical Chemistry

Representative projects include: Analysis of sediment and fish samples collected from the Hoosic River drainage basin for contamination with polychlorinated biphenyls (PCBs) and soil, plant and aquatic animal samples from southern Vermont for perfluorooctanoic acid (PFOA) and its chemical relatives. This project focuses on techniques used in environmental analysis including trace-level determination of persistent organic pollutants by GC-MS and/or LC-MS.

Class Format: mornings
Requirements/Evaluation: a 10-page written report
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the Dept. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors and with the Department Chair
Enrollment Limit: POI
Enrollment Preferences: expression of student interest
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01  TBA  John W. Thoman

CHEM 24 (W)  Introduction to Research in Physical Chemistry

An independent experimental project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, molecular modeling of water clusters, laser spectroscopy of chlorofluorocarbon substitutes, and observing the dynamics in glasses using single molecule spectroscopy and molecular dynamics simulations.

Class Format: mornings
Requirements/Evaluation: a 10-page written report
Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the Dept. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors and with the Department Chair
Enrollment Limit: POI
Enrollment Preferences: expression of student interest
Materials/Lab Fee: $0

CHEM 99 (W) Independent Study: Chemistry

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is
CHIN 11 (W) Shanghai Cuisine

Food plays a quintessential role in Chinese culture. Approaching the foot ways in various regions in China provides a unique path to a better understanding of the richness and diversity of China's regional cultures. Shanghai cuisine (benbang cai), originated in Shanghai and developed its cooking style under the profound influence of those surrounding regions, is a very popular branch of Chinese food. This hands-on course introduces the culinary tradition of many famous Shanghai dishes. The instructor will demonstrate how to turn those fresh raw ingredients and special seasonings into "color-aroma-tasty" Shanghai style dishes. (e.g. soup dumplings, wantons, eight-treasure rice puddings, red braised pork, sweet and sour spare ribs, crystal shrimp etc.) Through discussions of reading and videos, hands-on practices, as well as independently cooking of certain dishes, students will gain insight into the Shanghainese way of life. Students will be expected to complete assigned readings and videos outside class, participate discussions and cook with the instructor in class, make a few recipes of what they cook, and write a 10-12-page final essay. The final essay should include 5 to 6 finalized recipes of the dishes students cook and a conclusion. There is a mandatory field trip to a traditional Shanghai restaurant. Important reminder: for students who have food allergies and/or who are vegetarians please inform the instructor and consult your healthcare professional before the course starts on January 3rd, 2019. Adjunct Instructor Bio: Wendy Wan has extensive experience teaching Chinese language and culture at K-12 levels in the United States. She is a Shanghai native and a food enthusiast.

Class Format: two three-hour sessions per week from 10:00 AM to 1:00 PM

Requirements/Evaluation: attendance of all cooking classes and mandatory field trip (50%); in-class efforts (20%); assignments including readings, videos, recipe and reflection paper writing (15%); 10-12-page final essay, which includes student made recipes and conclusion (15%)

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: preference is given to Chinese language students and based on class years

Materials/Lab Fee: $165

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA    Wendy Wan

CHIN 25 (W) Taiwan Study Tour

Interested in learning first-hand about Taiwanese culture and becoming acquainted with what has been called the "Taiwan (economic and political) miracle"? Want to improve your knowledge of Mandarin, the language with the largest number of native speakers in the world? Then join us on this 23-day study tour to Taiwan, Republic of China. We'll spend the first two weeks in Taipei, the capital city, where 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Mandarin Center of National Taiwan Normal University. After class we'll meet as a group for lunch and discussion. Activities with Taiwanese university students and visits to cultural and economic sites of interest will be scheduled for some afternoons and Saturdays, with other afternoons, evenings, and Sundays free for self-study and individual exploration. During the last week, we'll travel to central and southern Taiwan, staying at small hotels and youth hostels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience.

Class Format: travel

Requirements/Evaluation: evaluation will be based on satisfactory completion of the language course, a 10-page paper on a topic related to Taiwan, and active participation in all scheduled activities

Prerequisites: none; not open to first-year students

Enrollment Limit: 10

Enrollment Preferences: statement of rationale and goals for wishing to participate; CHIN and ASST majors and intended majors who have no previous experience in Taiwan may receive preference
Materials/Lab Fee: $3,800
Distributions: (D1)

CLAS 10 (W) From Metal to Money: Ancient Numismatics
Crosslistings: ARTH10 / CLAS10
Primary Crosslisting
How were coins made and circulated in the ancient world? Why did a city or individual choose to mint coins? What role did coins play in people's lived experience, as well as in Greek and Roman visual culture? In this course, we will explore the Western coinage tradition from its origins through Late Antiquity, using the college's own numismatic collection as a basis for methodological discussions and for individual research. In consultation with the professor, each student will select coins from the collection and relate it to each of the different methodological issues under investigation. These topics will include mint and die studies; analysis of coin hoards; approaches to coin finds in archaeological excavation; the use of coins as historical "documents"; and the iconography of Greco-Roman coinage as it relates to classical art history. For most class meetings, students will present a short report on how the methodological issue under discussion relates to specific coins they have selected from the college's collection, before choosing a final research project. In addition to the hands-on experience of working with these coins, we will also survey the different historical coinages from antiquity (e.g., Classical Greek, Hellenistic Greek, Roman Republican) through a series of illustrated lectures.
Class Format: afternoons
Requirements/Evaluation: 10-page paper and a presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference will be given to students majoring in Classics, Art History, and History
Materials/Lab Fee: cost of books

Winter 2019
CLAS 15 (W)  Plato’s Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Primary Crosslisting
Plato’s Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon’s drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato’s most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical “afterlife.”

Class Format: mornings
Requirements/Evaluation: 5-page paper and an in-class presentation of independent research
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: preference given to majors or intending majors in Classics, Comparative Literature, WGSS, or Philosophy
Materials/Lab Fee: cost of books

COMP 10 (W) Constructing Gender and Body in the Gym

While it may not be written on the campus map, it's common Williams knowledge that the gym on upper Lasell is called "the EstroGym." Have you ever wondered why cardio spaces, like the EstroGym, seem to be occupied predominantly by women while weight rooms (think Lower Level Lasell) are filled with men? We will explore the answers to this and many more questions in this hybrid physical and academic course. Half of this course will be a critical exploration of phenomena that are often taken for granted within the fitness industry. We will discuss the ways in which cultural understandings of gender and bodies are created and reinforced in physical activity spaces. Topics will include the cultural reinforcement of the gender binary, the policing of nonconforming identities in physical spaces, hegemonic masculinity in the gym, and the social construction of ideal femininity and masculinity. Much of our reading will be grounded in feminist and sociological theory (L. Heywood, Bodymakers: A Cultural Anatomy of Women's Body Building; Markula & Pringle, Foucault, sport, and exercise: Power, knowledge, and transforming the self) but will also include text and visual sources from CrossFit gyms, international weightlifting competitions, bodybuilding shows, and more. The other half of this course will be taught in the weight room, where students will learn proper strength training form and technique. It is a suitable introduction for novice lifters as well as an opportunity for experienced lifters to improve and refine their technique. Students will explore the differences between powerlifting, Olympic weightlifting, and bodybuilding and will have the opportunity to practice these different forms. This includes, but is not limited to, the following exercises: squat, deadlift, overhead press, bench press, clean, jerk, push-up, and pull-up. Outside of class meeting times, students will be expected to complete readings, brief writing assignments (1-2 pages max), gym observations, short film viewings, and gym selfies (seriously). Depending on class size and logistics, we may take 1-2 field trips to other local gyms for observation purposes. Details TBA. **IMPORTANT NOTE: This course is open to students with any type of lifting experience (from zero physical activity background to Olympic athlete). This also includes students with any form of disability, so long as they are cleared by a licensed medical provider.

Requirements/Evaluation: 2- to 3-page paper and final project

Prerequisites: none--open to those with any type of lifting experience (no experience to Olympic athlete), including students with any form of disability as long as they are cleared by a licensed medical provider

Enrollment Limit: 14

Enrollment Preferences: students will write a paragraph explaining why they want to take the course

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

COMP 11 (W) Queer Russia

Crosslistings: RUSS11 / WGSS11 / COMP11

Secondary Crosslisting

A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country's queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

Class Format: afternoons
**Requirements/Evaluation:** completion of reading and viewing assignments, attendance in class, active participation in discussions, and completion of a collaborative project with other members of the class

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** preference to Comparative Literature, Russian, and Women's, Gender, and Sexuality Studies majors

**Materials/Lab Fee:** $10 plus cost of books

Winter 2019

LEC Section: 01    TBA    Julie A. Cassiday

**COMP 12 (W) The Grand Hotel in Modern Fiction and Film**

Crosslistings: COMP12 / GERM12

Secondary Crosslisting

The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and possible class confusion, of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Grand Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality. In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a riotous echo chamber, mirroring precarious lives of illegal migrants and displaced workers.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** $10 plus cost of books

Winter 2019

LEC Section: 01    TBA    Helga Druxes

**COMP 13 (W) Fanon: Anticolonialism and Revolution**

Crosslistings: COMP13 / ENGL13

Secondary Crosslisting

This course will serve as an intensive introduction to Fanon's philosophical and political writings, which continue to stand as some of the most influential and rousing works of the twentieth century. Born in Martinique and trained in France as a psychiatrist, Fanon spent the last decade of his life in Algeria, where he joined the struggle for national liberation. Marked by a layered history of anti-colonial struggle in the Caribbean, Europe, and North Africa, as much as by a commitment to the world-wide projects of decolonization and revolution, Fanon's writing was has been taken up by protest movements around the world, from South Africa to Sri Lanka, from the Black Panthers to queer theory.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; 5-page paper; 2- to 3-page paper

**Extra Info:** tutorial-style pairing

**Prerequisites:** none

**Enrollment Limit:** 10
COMP 15 (W)  Plato’s Symposium and Its Afterlife

Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting

Plato’s Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical “afterlife.”

Winter 2019

LEC Section: 01  TBA  Anjuli F. Raza Kolb

COMP 16 (W)  The Ayn Rand Cult

Crosslistings: COMP16 / ANSO16 / RLSP16

Secondary Crosslisting

The broad, “underground” influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

Prerequisites: some previous acquaintance with Rand's novels

Enrollment Limit: 30

Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)

Materials/Lab Fee: approximately $90 for books

Distributions: (D1)

Winter 2019

Class Format: independent study

CSCI 11 (W) Hour of Code
Knowledge of computing fundamentals empowers people with a unique set of problem-solving skills. These skills are currently in high demand and are expected to remain so in the foreseeable future. Yet computer science isn't just a useful skill—it's also a limitless canvas for expressing one's own creativity. Computer science is interesting and fun! Hour of Code is a one-hour, hands-on workshop that introduces young students to computer science. Not surprisingly, mastery of computer science takes a bit longer than one hour. Therefore, the goal of Hour of Code is simply to demystify computer programming. A typical workshop blends self-paced activities with in-class tutorials. The best Hour of Code experience inspires participants to pursue further study in computer science on their own time. The first half of this winter study course exposes you to elementary programming, the nuts and bolts of pedagogy, and prepares you to run an Hour of Code workshop. The second half puts your training into practice: you will organize and run an Hour of Code workshop in a Berkshire-area middle school. No prior computer science knowledge is required. The only prerequisite is a love of technology and an enthusiasm for working with young learners.

Class Format: afternoons

Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: 1/2 CS students; 1/2 non-CS students, with preference to first- or second-year students
Materials/Lab Fee: $35
Attributes: EXPE Experiential Education Courses
CSCI 12 (W)  Stained Glass Tiling: Quasicrystals and Geometric Solids, Building an Invisibility Cloak

In this course students learn geometric drawing, design, and the traditional craft skills needed to build a stained glass window. Each student will make a single panel of stained glass from a mosaic of transparent colored glass tiles. Students will learn how to cut glass; to paint and print on glass with kiln-fired enamels; to assemble, solder, patinate and frame a stained glass window. Instructional sessions on the use of tools and safe handling of materials are included where necessary. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up a group exhibition of work, and tiding the lab at the end of Winter Study. This course is time-consuming. More information may be found at https://coombscriddle.wordpress.com/2016/03/28/stained-glass-tiling-the-process/  Adjunct Instructor Bio: Debora Coombs' stained glass windows are exhibited and commissioned internationally. She is a Fellow of the British Society of Master Glass Painters with a Masters degree from London's Royal College of Art and 35 years of experience in the design, fabrication and teaching of stained glass. Contact: (802) 423-5640, debora@coombscriddle.com Photos: http://www.coombscriddle.com and http://coombscriddle.wordpress.com

Class Format: mornings, 15 hours per week. Students must be willing and able to put in an additional 5-10 hours per week outside of class
Requirements/Evaluation: creativity and effort demonstrated throughout; quality of finished panel and final presentation; teamwork whilst mounting exhibition; attendance; formal public exhibit
Prerequisites: no previous experience in art or geometry is necessary, however, ideal applicants will have an interest in art or mathematics, patience, good hand skills and want to spend at least 20-25 hours per week working on their project
Enrollment Limit: 10
Enrollment Preferences: preference to seniors and those who express an early or specific interest
Materials/Lab Fee: $260
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01  TBA  Debora  Coombs

CSCI 14 (W)  Creative Dynamics

Crosslistings: MATH14 / CSCI14

Secondary Crosslisting

Broadly defined, a dynamical system is an object whose future state can be calculated from its current state. Examples include ordinary and partial differential equations, discrete dynamics, cellular automata, billiards, spatial games, coupled/synchronized systems, agent models, evolutionary/selective dynamics, graph dynamics, Markov chains, and many more. The instructor will give a survey of such systems, and students will be free to imagine, create, and compute their own systems with an emphasis on graphical presentation of results.

Class Format: mornings
Requirements/Evaluation: grading will be based on class participation, presentation of results, and a final project
Prerequisites: solid computer programming skills in some language with good support for graphics
Enrollment Limit: 15
Enrollment Preferences: computational skills, math background, and enthusiasm; students will be asked to submit a brief description of their qualifications
Materials/Lab Fee: none

Winter 2019
LEC Section: 01  TBA  Stewart D. Johnson

CSCI 16 (W)  Introduction to Tech Entrepreneurship

This course provides an introduction to the fundamental aspects of building a technology startup. It's one thing to make software--and it's another to build a successful software company. You will learn how to develop product/market fit, how to build an MVP (minimum viable product), how to market products on a budget, organizing and running a team, shipping software, and the different types of corporate structures. You'll learn from a range of
successful entrepreneurs and industry experts, through their writings as well as short guest appearances (via video calls) during classroom sessions. Students will create a demo and 5-minute pitch (pitch deck optional) by the end of the course. For the product demo, students can choose to produce either working code, a technical white paper, or design mockups/wireframes. Students will be graded on the quality of the product demo and pitch. Attendance and participation will also be taken into account for final grades. Students will have the opportunity to show off their final products, and their pitches, in an optional Demo Day. Adjunct Instructor Bio: Elissa Shevinsky '01 helped launch Geekcorps (acquired), Everyday Health (IPO), Daily Steals, Glimpse, and Brave ($35M ICO.) Shevinsky was featured on the cover of the New York Times Sunday Business, for her startup Glimpse. Shevinsky is Editor of the book "Lean Out: The Struggle for Gender Equality in Tech and Startup Culture."

Class Format: afternoons

Requirements/Evaluation: attendance and participation in class; final project

Prerequisites: CSCI 134 or CSCI 135 or permission from the instructor

Enrollment Limit: 22

Enrollment Preferences: preference given to Computer Science students, and to students who demonstrate evidence of entrepreneurial initiative

Materials/Lab Fee: $135 plus cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Elissa B. Shevinsky

CSCI 23 (W) Introduction to Research and Development in Computing

An independent project is completed in collaboration with a member of the Computer Science Department. The projects undertaken will either involve the exploration of a research topic related to the faculty member's work or the implementation of a software system that will extend the students design and implementation skills. It is expected that the student will spend 20 hours per week working on the project. At the completion of the project, each student will submit a 10-page written report or the software developed together with appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Prior to the beginning of the Winter Study registration period, any student interested in enrolling must have arranged with a faculty member in the department to serve as their supervisor for the course.

Class Format: TBA individually arranged

Requirements/Evaluation: final paper and presentation/demonstration

Prerequisites: project must be preapproved by the faculty supervisor

Enrollment Limit: POI

Enrollment Preferences: preference given to sophomores and juniors

Materials/Lab Fee: none

Winter 2019
LEC Section: 01 TBA William J. Lenhart

CSCI 28 (W) Solution Design: from Ideas to Implementation

Crosslistings: ECON28 / CSCI28

Secondary Crosslisting

Designing a pair of computerized glasses is not enough. Who will use them, and what problems will they solve? How can you be certain someone will adopt your new technology before you spend millions of dollars building it? Google Glass and other wearable technologies have struggled to answer these questions. In fact, somewhere between 40 and 60 percent of large IT projects fail and all too often, the cause has little to do with the quality of technical engineering. Innovators often solve the wrong problem, misidentify the users of the software, or fail to adapt to evolving requirements. The challenge is that engineers--and Williams students--like to be told what problem they are to solve, but the average consumer is terrible at knowing what they want until they see how the new product will work. Solution design offers a powerful framework for resolving this paradox efficiently. We will examine how to visualize interactions between market forces, corporate directives, and engineering requirements, and how to apply design thinking to generate novel ideas within these constraints. Then, we will interrogate the strength of our ideas by asking author Marty Kagan's questions: is it feasible? is it valuable? will someone use it? and does it have business viability? Readings by Steve Blank and Eric Reis emphasize the importance of
low-cost, rapid prototyping/experimentation and statistical analysis thereof that results in actionable development goals. Finally, we will introduce

topics in human computer interaction, and organization tools for complex technical collaborations like Git and the Getting Things Done methodology for task management. Throughout the course, small teams will deploy this toolkit against problems of the students’ choosing. One team may wish to
design a new app for the WSO website. Another team may choose to interview a local organization and design a technology powered tool that can improve its operations. You are the innovator. Small teams of students will each execute one iteration of design and prepare a plan for developing a
technological solution to a problem of their choosing. The contents of the plans may include: careful descriptions of the product’s goals, stakeholders,
target users, assumptions, and constraints; a business plan; sketches of a user interface; first steps in programming an application; write ups of experiments intended to test underlying assumptions; and a direction for future development efforts. Adjunct Instructor Bio: Allan Wellenstein is a

senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years

of experience helping some of the world largest companies design and implement massive technology transformations. Though technically

headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

DANC 10 (W) Funk Styles/Hip-Hop Dance

This course will focus on the foundations of Hip-Hop as dance and as culture. The techniques of lockin’, poppin’, breakin’, 90’s and house dance as

well as terminology and history. Technique class will include across the floor and center combinations allowing dancers to find their relationship to

athleticism, dynamics and articulation of the body. We will also view and discuss media and literature that contextualizes Hip-Hop, deepens

understanding of the form as dance and embodied history. Students will journal to reflect and record information. Technique class will meet three times

a week followed by a required rehearsal of choreography that will be created. The expected contact hours will meet the required average of 20 weekly.
**DANC 11 (W)  BFF (Ballet Film Festival)**

This course is for ANYONE interested in learning more about ballet, through a variety of experiences. First, of course, will be physical practice, 2-3 times per week. For those who have no (or little) prior ballet training, you’ll learn the fundamentals of ballet technique in a safe but challenging class; separate classes will be held for intermediate/advanced dancers. All course participants will gather together twice a week for movie/documentary viewings--a wide range of films (primarily) about ballet and ballet dancers from around the world--and once a week for lectures and group discussions, either in a seminar format or during a meal, about the films as well as the history and/or current context related to them. Reading material will also be assigned so that all students have a grasp of the overarching history of ballet. At the end of Winter Study, students will participate in an informal physical presentation.

**Class Format:** afternoons  
**Requirements/Evaluation:** evaluation will be based on individual progress in the physical components, as well as on the quality of participation in all activities--physical work as well as discussions  
**Prerequisites:** none for beginner-level students; none; sufficient prior ballet training (with permission and/or placement class from instructor) for intermediate/advanced level students  
**Enrollment Limit:** 30  
**Enrollment Preferences:** students who are planning on taking DANC 203 in the Spring will get preference  
**Materials/Lab Fee:** $100

**ECON 10 (W) A Practitioner's Overview of Securities Markets and Investment Banking**

A broad overview of various aspects of the Fixed Income and Equities Markets and the role of Investment Banks. Topics, amongst others, will include: The effect of Fiscal and Monetary policy on Markets, Securities Sales and Trading, Bonds and Bond Math, Public Equities and Asset Management, Credit Analysis, Private Equity and Leveraged Buy-outs, Mergers and Acquisitions and Risk Management. Course will focus on real life practices and will include guest speakers and case studies. Course Goal: (1) to provide you with an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help you think critically about issues effecting the stock and bond markets, and (3) to have fun and instill a passion
in some of you for future study and/or work in the Securities Industry. Required Readings: (1) *Understanding Wall Street* (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies (3) Students will be asked to read the Wall Street Journal on the day that each class meets. Class will meet 3 days per week for 2-3 hours per meeting. Outside of class, students will spend time on readings, preparation for case studies, and writing term paper. Adjunct Instructor Bio: Tim Bock ’88 worked at Credit Suisse for 28 years where he ran Global Capital Markets, leading a unit of 250 Investment Bankers responsible for Credit Suisse’s global financing businesses, including equity capital markets, debt capital markets, leveraged finance origination and corporate derivatives. Tim held several other leadership roles at CS, including Global Co-head of the Product platform in the Private Bank and Head of Derivatives Origination in the Equity and Fixed Income Departments.

**Class Format:** mornings

**Requirements/Evaluation:** evaluation will be based on Group Case Study (oral presentation), 5-page term paper (topic TBD); class participation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If overenrolled, priority will be based on written statement of interest

**Materials/Lab Fee:** cost of books

**ECON 11 (W) Financial Accounting & Financial Modeling for Private Equity & Investment Banking**

ECON 11 is an intensive winter study designed for students intending to pursue or explore professional opportunities in finance and investing, with a focus on the private equity industry. Incorporating instruction by a dynamic mix of industry professionals and faculty, the course aims to equip students with the fundamental skills required in many entry-level finance positions, preparing them for interviews, internships, and jobs in the field. The course is structured as four-section progression over the four-week term. The first section is an introduction to the basic concepts of corporate finance, and an overview of the private equity and investment banking industries. The second section covers financial accounting, during which students will learn accounting fundamentals, and how to construct, interpret and analyze financial statements. In the third section, students will receive rigorous training in financial modeling and valuation methods, provided by Training the Street, a professional financial training firm. In the fourth week, students will put to test the skills they’ve acquired and build financial models to evaluate an investment in a case company. This is a unique opportunity to receive professional-level training in core competencies of finance and investing, and students are expected to approach it as such. Given the nature and depth of material to be covered, students should plan on committing 20+ hours and 4-5 days per week between in-class sessions and assignments.

Adjunct Instructor Bio: Alex Reeves ’11 currently works in Corporate Strategy and Development at Penumbra, a medical technology company based in the San Francisco area. Prior to Penumbra, Alex was an Associate at private investment firm Graham Partners, where he evaluated investments in industrial and manufacturing-related businesses, and supported portfolio companies and their management teams across a range of strategic and financial initiatives. Alex plans to attend the Tuck School of Business in the fall of 2018. Adjunct Co-Instructor Bio: A.J. Rossi graduated from the University of Pennsylvania in 2014, with a double major in Economics and Political Science. A.J. has since joined Graham Partners as an Associate, where he sources and evaluates new investment opportunities and also provides support and oversight for a number of Graham Partners’ portfolio companies. A.J. also currently manages the firm’s intern and analyst training programs. Steven C. Graham ’82 founded private investment firm Graham Partners in 1988 and serves as Senior Managing Principal. He oversees all of the activities of the firm, including investment sourcing, evaluating, monitoring and divesting.

**Class Format:** mornings and afternoons

**Requirements/Evaluation:** final project, short assignments

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** preference in order of: sophomore; junior; first-year; senior; if over-enrolled, students will submit written statements of interest

**Materials/Lab Fee:** none

Winter 2019

LEC Section: 01  TBA  Alexander J. Reeves,  AJ Rossi
**ECON 12 (W) Public Speaking**

This course will help students become effective and organized public speakers, whether public speaking means giving a class presentation, participating in a debate, or giving a formal speech before a large audience. We will primarily use extemporaneous and prepared class presentations as a means of learning this skill, but we will also study great American speeches, presidential debates, and other examples for further insights into persuasive public speaking techniques. The class will provide a supportive environment to help each student create his or her own public speaking style that is comfortable, confident, and conversational. We will also focus on organizational techniques, handling visual aids effectively, eye contact and body language. Finally, receiving feedback and providing constructive criticism to other students in the class will be an important part of the course.

**Class Format:** mornings

**Requirements/Evaluation:** evaluation will be based on in-class presentations, class participation, and a 10-page written critique of the student's own videotaped presentations

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be based on written statement of interest

**Materials/Lab Fee:** none

**Distributions:** (D2)

**ECON 13 (W) Essential Tools for Startups to Change Good Ideas to Successful Businesses and Organizations**

This course provides a road map for turning business ideas into successful businesses. Students generate business ideas and then work in teams to develop a business model to take the ideas to startup and beyond. The course also provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research projects. The course is appropriate for students in any field of study who want to know how to build a startup that succeeds. The class will meet for two and a half hours three days a week for short lectures, discussions, group work, and presentations. Outside of class, students will be required to watch online lectures and videos, read handouts, and to work in teams to develop and research their business models. Teams will be required to develop a team plan, to interview customers, to analyze the results, to revise their plans, to meet with the instructor, and to develop presentations of their work. Each team will make weekly presentations along with a final presentation of their work. They will also develop a team video of the lessons the team learned during the course. Students will also be required to provide a 2-3 page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has thirty years of experience working with startups. He has helped over 1,000 people start businesses and works with hundreds of entrepreneurs each year. He has used the Lean Launchpad methodology for the past six years and received training at Stanford University.

**Class Format:** mornings

**Requirements/Evaluation:** 2- to 3-page paper; weekly group presentations of the results of investigations done outside of class

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** seniors first

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Steven P. Fogel

---

**ECON 14 (W) Sports Economics**

This course is an introduction to the use of economic concepts and empirical tools in addressing puzzles and policy issues in the world of sports.
Through independent study and in-class discussions of academic and non-academic readings, films, and other materials (including one or more talks by outside speakers), students will explore topics such as competitive performance and strategic incentives of athletes, the organizational structure of professional sports, the use of statistical methods for evaluating athletic performance, betting and gambling markets, professional athlete labor markets, the local economic impact of sporting events, and more. Students are expected to complete small research assignments outside of normal class hours, to present their findings, and to help lead discussions of readings and other materials assigned for each class. The course will culminate in a group research paper and presentation on a topic in the economics of sports.

**Class Format:** mornings

**Requirements/Evaluation:** class participation, mini research projects, and a group-based 10-page paper and final presentation

**Prerequisites:** one Economics AND one Math or Stats course

**Enrollment Limit:** 20

**Enrollment Preferences:** if over-enrolled, preference will be given to senior and junior Economics majors

**Materials/Lab Fee:** $50

**Winter 2019**

**LEC Section:** 01    TBA     Will Olney

---

**ECON 15 (W)  Value Investing and Other Hedge Fund Strategies**

The intent of the class is to introduce students to the principles of fundamentals based equity investing. The primary focus will be on value investing, but we will broadly explore different equity investment strategies, understand the process behind successful equity selection, and study great investors. While oriented towards students interested in careers in investment management, students contemplating careers in consulting and investment banking will also benefit.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper; final project

**Prerequisites:** quantitative background (math, econ, sciences) and ideally sophomores and juniors (students applying for internships)

**Enrollment Limit:** 15

**Enrollment Preferences:** instructor discretion

**Materials/Lab Fee:** approximately $200 for books

**Winter 2019**

**LEC Section:** 01    TBA     Rahul Bahl

---

**ECON 16 (W)  Venture Capital--A Legal, Financial and Business Perspective**

The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs, venture capitalists and early employees. Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice for entrepreneurs or key employees in three scenarios--an early stage company negotiating with a key executive the company is seeking to hire, a company considering two competing term sheets for venture financing and a company faced with the need for additional financing in a distressed situation. An alternative to one of these scenarios would involve splitting the class into small groups designated as either founders or investors and requiring the groups to negotiate investment terms. As a capstone to the class, students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as founders, investors or key employees. In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class. Adjunct Instructor Info: Mr. Schwed retired from the law firm of WilmerHale in December 2015 after a 40-year career focused on private equity and venture capital. For nine years, he was an adjunct professor at George Washington University Law School teaching a course on venture capital law. He taught this course during Winter Study in 2017 and 2018. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.
Class Format: mornings; occasional afternoon sessions will be held to meet with industry guests on an informal basis

Requirements/Evaluation: participation in class, preparation of discussion outlines (each equivalent to a 3-4 page paper) in connection with the small group assignments, and participation in the business simulation game

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: by lot with preference for seniors

Materials/Lab Fee: $100

Winter 2019
LEC Section: 01    TBA     Robert A. Schwed

ECON 17 (W)  Watching Wall Street from Washington: Financial Market Analysis for the Public Sector

This course investigates the strategies for, as well as the relevance of, financial market analysis directed toward the public good. Students will develop a deeper understanding of global financial markets, and learn how that understanding can be leveraged to help shape and achieve policy goals. Specifically, the course will cover five major topics: 1) Basic techniques for financial market analysis across a variety of major asset classes; 2) The characteristics of financial market analysis—its forms, theoretical underpinnings, positive attributes, and deficiencies; 3) The hierarchy of policy relevance of financial market analysis; 4) Costs, risks, and difficulties of financial market analysis for the public sector; and 5) Future challenges and formulations of public sector market analysis given the technological developments in finance, money management, and trading. Readings will primarily be publicly available articles and papers, as well as one basic reference book: Gliner, Greg; Global Macro Trading: Profiting in a New World Economy; Bloomberg Press, 2014. We will meet three times a week for two-hour sessions, with extra discussion and presentation times scheduled in accordance to our needs. Adjunct Instructor Bio: John Fagan ’95, Director of the Treasury Markets Room and former senior strategist at Discovery Capital, holds a JD and an MPA from Harvard and a BA from Williams.

Class Format: mornings

Requirements/Evaluation: evaluation will be based on a 5- to 10-page presentation including charts and succinct text to be presented in a 10 minute briefing format; attendance and participation will also be taken into account

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 12

Enrollment Preferences: preference to seniors

Materials/Lab Fee: approximately $40 for the required book

Winter 2019
LEC Section: 01    TBA     John Fagan

ECON 18 (W)  Games!

Crosslistings: ENVI18 / ECON18

Primary Crosslisting

We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

Class Format: Tuesday, Wednesday & Thursday 1-4pm

Requirements/Evaluation: final project; game journal
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: expressed interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Sarah A. Jacobson, Pia M. Kohler

ECON 19 (W) Wall Street to Main Street: A Liberal Arts Approach to Wealth and Financial Management
The term "Wealth Management" may already have STEM majors, history majors, performing artists and for that fact most liberal art students skipping to another course title. But why is this relatively new field being populated by the very people most likely to skip this offering? The challenges and issues involved in the field of Wealth Management touch everyone, not just the perceived elite on Wall Street. Early life decisions about such matters such as paying back student debt, getting married, buying a house are just the beginning of a life entangled with the issues of allocating and managing one's resources. At its root, wealth management is a multidisciplinary field, so whether as a consumer (which everyone will be) or a potential practitioner, this course will hopefully provide and introduction to the major issues, terminology, and theories that make up the field. This includes gaining an understanding of basic tenets including: Risk/Reward, Time Value of Money, Borrowing principles, gifting, gifting to Williams College, and other areas of market theory. Through simulations, group projects and an individual paper, students will gain a solid overview of the field, demystifying its language and becoming better lifetime consumers with the potential result of creating one or two eventual practitioners. Adjunct Instructor Bio: Kate Kennedy ’88 is an Attorney and CPA who is a co-leader of the Executive Financial Planning practice at a growing Registered Investment Advisor. She has practiced law, done taxes, survived the 2008 financial crisis. She has worked as an attorney in a law firm as well as at Arthur Andersen LLP, The Ayco Company (A Goldman Sachs Company); Lehman Brothers; Barclays and now is a Partner at HPM Partners (which is to be renamed by 7/1/18).

Class Format: mornings
Requirements/Evaluation: one short paper and class participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: random selection; preference to non-economics majors
Materials/Lab Fee: none

Winter 2019
LEC Section: 01

ECON 20 (W) Ethical Issues of Hedge Fund Compliance and Regulation
Through lecture and case-study, this course is designed to introduce students to the structure and goals of hedge funds, the relevant laws and regulations that govern them, and the ethical issues which arise as an employee and in-house counsel. Having established a working foundation of what a hedge fund is and how it operates, students will focus on the various conflicts of interest endemic to a hedge fund structure. Conflicts between the hedge fund manager and the hedge funds (employees and their investors) as well as conflicts among the multiple funds themselves. Students will learn to recognize these conflicts not just in finance but throughout their daily lives. The course will detail the structure of the compliance departments that monitor hedge funds and the ethical obligations of in-house compliance and legal departments. The class will work through real life examples of issues that have arisen at hedge funds in recent years. Cases will involve some of the significant issues monitored by compliance such as insider trading, failure to disclose information to investors, conflicts of interest, bribery issues, Anti-money laundering issues, and presentation of the fund's performance. The class will examine the responsibilities of young analysts at a hedge fund and what is expected of them as well as the pressure they face to play close to the edge of what is legal. The course will discuss creating a culture of compliance and what that entails from the compliance department as well as from employees themselves. What are the obligations of the individual to speak out when violations are observed? The students will be presented with articles about hedge funds from both the media, the SEC and hedge funds themselves. These readings will present the students with a window into the goals of hedge funds and the ethical issues which must be managed when working at a hedge fund. Adjunct Instructor Bio: Mark Schein ’88: Econ/American Studies; Vanderbilt Law School 1991; Assistant District Attorney Bronx DA's Office (prosecuted organized crime and

Requirements/Evaluation: 5-page paper; the assessments are based on presenting the students with real-life compliance issues and asking them to prepare a policy and procedure to help manage this issue for the firm

Prerequisites: interest in finance or ethics

Enrollment Limit: 30

Enrollment Preferences: preference to juniors and seniors; other prospective students based on a paragraph describing their interest in the course

Materials/Lab Fee: none

Winter 2019

LEC Section: 01    TBA     Mark D. Schein

ECON 22 (W) Volunteer Income Tax Assistance

Crosslistings: ECON22 / POEC22

Primary Crosslisting

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS “Link and Learn” online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Materials/Lab Fee: $15

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     William M. Gentry, Paula M. Consolini

ECON 23 (W) Investing

This class is designed to provide students with an overview of endowment and investment management and is taught by members of the Williams College Investment Office. The Investment Office is responsible for overseeing Williams’ $2.7 billion endowment. Through presentations, discussion, readings, and project work, Winter Study students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, real estate, and fixed income. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors.

Adjunct Instructor Bio: Abigail Wattley ’05, Managing Director--Abigail rejoined Williams College in September 2010 after business school. From 2007 to 2008 Abigail worked in the Williams Investment Office in the role of Investment Analyst. Prior to working for Williams, Abigail was a Senior Consulting Associate at Cambridge Associates. Abigail received a B.A. in Economics from Williams College in 2005 and a Masters of Business Administration from Harvard Business School in 2010.
ECON 24 (W)  Economics, Geography and Appreciation of Wine
This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

Class Format: Tuesday and Thursday evenings
Requirements/Evaluation: in addition to the final project presentation, a blind tasting exam
Prerequisites: none, but students must be 21 years old on or before the first day of class
Enrollment Limit: 10
Enrollment Preferences: mix of academic record and diversity of backgrounds and interests
Materials/Lab Fee: $300
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Peter L. Pedroni

ECON 27 (W)  Quilting Inspired by Gee's Bend
Quilting as an art form is present in many communities, but residents of Gee's Bend, Alabama are recognized for their very distinctive quilting style. In this hands-on class students will learn the basics of quilt-making, inspired by the designs and techniques used in Gee's Bend. Students will also learn about the history of this group of African American quilt-makers and the economic forces that influenced their work. The course will involve field trips to a local quilt store and museum, instruction in techniques such as improvisational piecing, and creation of an original art quilt. The course will culminate with a public exhibition of students' quilts. No previous sewing experience required. Adjunct Co-Instructor Bio: Chris LaLumia is a life-long quilter and retired teacher. She taught one of her daughters to be an award-winning art quilter. Her other daughter is an economics professor at Williams College.

Class Format: mornings
Requirements/Evaluation: final formal public exhibit
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: statement of interest
Materials/Lab Fee: $355
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Sara LaLumia
ECON 28 (W) Solution Design: from Ideas to Implementation
Crosslistings: ECON28 / CSCI28

Primary Crosslisting

Designing a pair of computerized glasses is not enough. Who will use them, and what problems will they solve? How can you be certain someone will adopt your new technology before you spend millions of dollars building it? Google Glass and other wearable technologies have struggled to answer these questions. In fact, somewhere between 40 and 60 percent of large IT projects fail and all too often, the cause has little to do with the quality of technical engineering. Innovators often solve the wrong problem, misidentify the users of the software, or fail to adapt to evolving requirements. The challenge is that engineers—and Williams students—like to be told what problem they are to solve, but the average consumer is terrible at knowing what they want until they see how the new product will work. Solution design offers a powerful framework for resolving this paradox efficiently. We will examine how to visualize interactions between market forces, corporate directives, and engineering requirements, and how to apply design thinking to generate novel ideas within these constraints. Then, we will interrogate the strength of our ideas by asking author Marty Kagan’s questions: is it feasible? is it valuable? will someone use it? and does it have business viability? Readings by Steve Blank and Eric Reis emphasize the importance of low-cost, rapid prototyping/experimentation and statistical analysis thereof that results in actionable development goals. Finally, we will introduce topics in human computer interaction, and organization tools for complex technical collaborations like Git and the Getting Things Done methodology for task management. Throughout the course, small teams will deploy this toolkit against problems of the students’ choosing. One team may wish to design a new app for the WSO website. Another team may choose to interview a local organization and design a technology powered tool that can improve its operations. You are the innovator. Small teams of students will each execute one iteration of design and prepare a plan for developing a technological solution to a problem of their choosing. The contents of the plans may include: careful descriptions of the product's goals, stakeholders, target users, assumptions, and constraints; a business plan; sketches of a user interface; first steps in programming an application; write ups of experiments intended to test underlying assumptions; and a direction for future development efforts. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it
Materials/Lab Fee: cost of books
Attributes: EXPE Experiential Education Courses

Winter 2019

ECON 30 (W) Honors Project: Economics

The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.

Class Format: honors project
Distributions: (D2)

Winter 2019
HON Section: 01 TBA David J. Zimmerman

ECON 31 (W) Honors Thesis: Economics
ECON 58 (W) Growth Diagnostics

Evidence suggests that the "binding constraints" to economic growth have been remarkably heterogeneous across countries and over time--i.e., the potential for economic growth can be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by poor governance, and so forth. How can developing-country policymakers arrive at conclusions such as these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies, as opposed to a "laundry list" of reforms that are simply based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to growth in a given country at a specific point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the country's prevailing economic, political, and social context. The course will employ a range of country-specific case studies to not only elucidate how the framework can be operationalized for policymaking but also demonstrate its scope and limitations. Students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a mini growth diagnostic for their group's assigned country by the end of the course.

Class Format: mornings

Requirements/Evaluation: evaluation will be based on extensive class participation, one 20-page group paper comprising a mini growth diagnostic for a country, and a group presentation on the mini growth diagnostic

Prerequisites: ECON 501, ECON 502/503, ECON 504, and ECON 505/506

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, priority will be based on written statement of interest

Materials/Lab Fee: none

ECON 99 (W) Independent Study: Economics

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Distributions: (D2)

ENGL 11 (W) The Brontes and the Visual Art Journal

Academic courses from all disciplines at Williams often require the use of a journal to help students focus on their work. This course will push that concept to its limit as we explore some of the classic writings of Charlotte, Emily and Anne Bronte. Our goal will be to find real and tangible ways that visual art journaling can enhance our learning of literature. We will create and record visual insights as we read, and we will explore how this practice can help us conceive what we are reading. In addition to reading the entirety of Charlotte Bronte's *Jane Eyre* we will read Emily Bronte's *Wuthering*...
Heights as well as selections from Anne Bronte's *The Tenant of Wildfell Hall*. There will also be readings from various authors and artists on the subject of journaling as a tool for learning. Adjunct Instructor Bio: Patricia Malanga received her BA in English Literature from the University of Massachusetts in 1990. While working as the Academic Assistant in the English Department here at Williams for the last 20 years, she has explored her love of literature and her love of the visual arts. This course will be the culmination of those interests.

Class Format: afternoons

Requirements/Evaluation: at least 10 pages of free style journal writing, a finished visual journal and participation in class discussion, projects and assignments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference to English and Art majors

Materials/Lab Fee: $30 plus cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Patricia S. Malanga

ENGL 12 (W) The Art of Telling a Good Story

How do you offer an audience, out loud, a compelling and memorable story? This course will aim to develop both a sense of the structure behind a good story and the improvisational skills that bring a told story to life. In class we'll tell stories. We'll explore basic approaches to shaping stories (and elaborations on these approaches), as well as what makes a story a "story" instead of something else, using the models of folktales and narrative nonfiction. We'll engage in improvisational exercises, and explore the expressive capacities of voice, body, tempo and silence, considering how the improvisation of told tales might intersect with or resemble improvisational performance in other arts. We'll also discuss issues facing tellers of traditional tales, personal stories, and other story types. When do you or do you not have the right to tell a particular story? How do you claim "authority" to tell a story? What are the implications of choosing the stories we do tell? What stories need to be told that are not? What stories need amendment? What does storytelling mean for other academic or social realms? Outside class, students will analyze and critique videos of other storytellers with the goal of enhancing their own storytelling strategies. Students will prepare for presentation in class three different kinds of stories and will offer stories to two different public audiences, one on campus and another in a local school. Students will also be asked to write a brief reflective essay. The class will meet for two hours a day, Monday through Thursday. Adjunct Instructor Bio: Kelly Terwilliger has been telling stories professionally for 17 years in schools, libraries, festivals, parks, museums, community centers, and pubs.

Class Format: mornings

Requirements/Evaluation: 2- to 3-page paper; performances, one of which will be offered to the wider public

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: statement of student interest

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Kelly Terwilliger

ENGL 13 (W) Fanon: Anticolonialism and Revolution

Crosslistings: COMP13 / ENGL13

Primary Crosslisting

This course will serve as an intensive introduction to Fanon's philosophical and political writings, which continue to stand as some of the most influential and rousing works of the twentieth century. Born in Martinique and trained in France as a psychiatrist, Fanon spent the last decade of his life in Algeria, where he joined the struggle for national liberation. Marked by a layered history of anti-colonial struggle in the Caribbean, Europe, and North Africa, as much as by a commitment to the world-wide projects of decolonization and revolution, Fanon's writing has been taken up by protest
movements around the world, from South Africa to Sri Lanka, from the Black Panthers to queer theory.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; 5-page paper; 2- to 3-page paper

**Extra Info:** tutorial-style pairing

**Prerequisites:** none

**Enrollment Limit:** 10

**Materials/Lab Fee:** cost of books

---

**ENGL 14 (W) Humor Writing and Analysis**

In this class we'll hijack the tools of fiction writers, dishonor the genre of memoir, perpetuate the problem of fake news and push the bounds of taste in memes. You'll something for every class, and most of your writing will be discussed in a workshop format. You'll also submit written reflections on the required text, *Just the Funny Parts* by Nell Scovell and make an oral presentation analyzing a specific work that you consider an example of comic excellence. We'll discuss what kind of relationship thinking people should have with sexist, ethnic and religious humor. And we'll talk quite a bit about postmodernism. Hey, it's an English class. Adjunct Instructor Bio: Eric Randall is a journalist whose work has been published in USA Today, Time, Newsweek and The Washington Post, as well as some reputable publications. He has no particular qualifications for teaching this class but is a firm believer in doing what you can get away with.

**Class Format:** MR 1:30-4:30pm

**Requirements/Evaluation:** 2- to 3-page paper; class participation; one group project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** random selection by registrar with roughly equal distribution of class years

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

---

**ENGL 15 (W) Tolkien: The Hobbit, The Lord of the Rings, and Oxford**

In this class we'll read and discuss in depth the literary and imaginative richness of J. R. R. Tolkien's beloved fantasy novels *The Hobbit and The Lord of the Rings*, as well as the aspects of his biography and the scholarly works he wrote while an Oxford professor that most illuminate his fantastical writings: "On Fairy-Stories," "Beowulf: The Monsters and the Critics," and "On Translating Beowulf." By combining the fantastical and the academic in Tolkien, we'll get a better view of his imagined fortresses, castles, strongholds, of his elves, dragons and shires, as well as a better view of "the city of dreaming spires," his beloved Oxford nestled in the green hills of its own Oxfordshire. Students are asked to participate in all class discussions, and, at the end of the class, students will be asked to submit a 10-page research paper. Class will meet three times a week for two hours each session, and your work outside the class will average around twenty hours a week and involve reading and film viewing. Adjunct Instructor Bio: Ryan Riley earned a master's degrees in literature from both Oxford and Yale, and a bachelor's in literature from Harvard, where he was a humor writer for The Harvard Lampoon and started a literary discussion and writing group inspired by Tolkien's Inklings.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none--if student has already read some or all of Tolkien's writings, no need to worry, as there will still be much to learn about his imaginative world

**Enrollment Limit:** 30

**Enrollment Preferences:** if over-enrolled, preference will be given to students who write the instructor a short email explaining their interest in the class

**Materials/Lab Fee:** $10 plus cost of books
ENGL 16 (W) Henry James’ The Golden Bowl

In this course we will read Henry James’ late novel, *The Golden Bowl*, which dramatizes many of James’ crucial preoccupations. Centered on a wealthy American collector living in England at the turn of the twentieth century, the novel examines the personal and cultural costs of an American obsession with amassing relics of a collapsing European empire, as well as the potentially ruinous effects of wealth and refined sensibility on tangled love relations. The novel’s ethical and perceptual intricacies are conveyed in an ingeniously demanding style that presses syntax to its limits. We will read critical essays on the novel, and draw on Walter Benjamin’s work on collecting and on the Arcades of 19th-century Paris.

Class Format: afternoons

Requirements/Evaluation: 10-page paper

Prerequisites: a 100-level English course or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: English majors will have priority

Materials/Lab Fee: $15 plus cost of books

Distributions: (D1)

Winter 2019

LEC Section: 01 TBA Anita R. Sokolsky

ENGL 17 (W) How to Write Auto-Fiction

You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, “Fiction” and “Non-Fiction”-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, “How to Write Auto-Fiction,” and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

Class Format: afternoons

Requirements/Evaluation: two stories (10-20 pages) and two revisions (10-20 pages)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: email explaining reasons for interest in the course to Dalena.Storm@gmail.com

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Dalena Storm
ENGL 19 (W) Screenwriting Challenge: The Tale of an Underappreciated Musical Genius
Crosslistings: ENGL19 / MATH19

Secondary Crosslisting

The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

Class Format: afternoons

Requirements/Evaluation: final project

Prerequisites: none, but students with a passion for writing and classical music are encouraged to apply

Enrollment Limit: 3

Enrollment Preferences: writing sample and brief application

Materials/Lab Fee: $55

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Leo Goldmakher

ENGL 20 (W) Winter Naturalist's Journal
Crosslistings: ENVI20 / ENGL20

Secondary Crosslisting

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.

Class Format: mornings

Requirements/Evaluation: daily journal and 2- to 3-page papers

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random selection

Materials/Lab Fee: $80 plus cost of books

Distributions: (D2)

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Christian McEwen

ENGL 25 (W) Journalism Today

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own
experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. Christopher graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to students with a demonstrated interest in journalism or media (as explained in a statement of interest), with a priority given to upperclassmen
Materials/Lab Fee: $923
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

ENVI 12 (W) Geology of the National Parks

Crosslistings: ENVI12 / GEOS12

Secondary Crosslisting

A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well-illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and bibliography will be distributed by the presenter at the time of the report.

Class Format: mornings

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students

Materials/Lab Fee: approximately $125 for books

Winter 2019

LEC Section: 01    TBA     Bud Wobus

ENVI 15 (W) From Basalt to Balsam to Beavers: The Natural History of New England

In this course we will explore, far and wide, the New England Landscape and try to make some sense of the amazing physiographic and biological diversity that it offers in a relatively small area. From the spruce clad Berkshires to the broad Connecticut River Valley to the glacially forged coastal plain, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna. We'll learn the predominant trees and shrubs and search for patterns to their occupation of the landscape. We will observe the behavior and evidence of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. How do they manage to cope in their often rigorous and fickle environments and how might they be affected by climate change and other human influences? Through field trips, museum visits, individual investigations, readings, discussions and guest presentations, you'll become a little more aware and appreciative of the natural heritage of the region that you have made your recent home. Students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions; some trips will require students to be away from campus beyond normal class hours. Adjunct Instructor Bio: Drew Jones is Manager of Hopkins Memorial Forest where he oversees the management of the facilities, coordinates research and teaching activities and outreach programs for the public and local schools. He also operates an owl banding station in the fall and intermittently engages in other field research. In the past, he has worked as a wildlife biologist and educator from the Southern Appalachians to the North Woods.

Class Format: mornings; several class sessions off campus will likely last the entire day

Requirements/Evaluation: 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who demonstrate a special enthusiasm for this subject will be favored; all else being equal, seniors will receive special consideration

Materials/Lab Fee: $260 plus cost of books

Distributions: (D3)

ENVI 18 (W) Games!
Crosslistings: ENVI18 / ECON18

Secondary Crosslisting
We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

Class Format: Tuesday, Wednesday & Thursday 1-4pm
Requirements/Evaluation: final project; game journal
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: expressed interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Sarah A. Jacobson, Pia M. Kohler

ENVI 19 (W) Methods in Environmental Chemistry
Crosslistings: CHEM19 / ENVI19

Secondary Crosslisting
This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

Requirements/Evaluation: evaluation will be based on overall performance in the laboratory, three 2- to 3-page assignments
Prerequisites: CHEM 151 or CHEM 153 or CHEM 155 or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: preference will be given to CHEM and/or ENVI majors/concentrators
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Anthony J. Carrasquillo

ENVI 20 (W) Winter Naturalist's Journal
Crosslistings: ENVI20 / ENGL20

Primary Crosslisting
This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.

**Class Format:** mornings

**Requirements/Evaluation:** daily journal and 2- to 3-page papers

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** random selection

**Materials/Lab Fee:** $80 plus cost of books

**Distributions:** (D2)

**Attributes:** EXPE Experiential Education Courses

---

**ENVI 24 (W) Touring Black Religion in the ‘New’ South**

**Crosslistings:** ENVI24 / AFR24 / REL24

**Secondary Crosslisting**

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Tallaveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

**Class Format:** travel

**Requirements/Evaluation:** based on an electronic field journal, participation in weekly colloquies, and an oral presentation

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 8

**Enrollment Preferences:** majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews

**Materials/Lab Fee:** cost to student: $3362

ENVI 25 (W)  Sustainable Agriculture in California
Crosslistings: BIOL25 / ENVI25

Primary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

Class Format: travel

Requirements/Evaluation: 10-page paper; synthetic journal of field experiences to be produced by the group
Prerequisites: none, but see preferences for over-enrollment; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: preference to senior Biology and Environmental Studies majors/concentrators who have taken The Ecology of Sustainable Agriculture and/or other food and agriculture courses; then by essay
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

ENVI 26 (W)  Material Culture and Craft of 19th Century Coastal New England
Crosslistings: ENVI26 / MAST25

Secondary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvassworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: by application
Materials/Lab Fee: $1,500

**GBST 17 (W) The Third World City**

Crosslistings: GBST17 / PSCI17

**Secondary Crosslisting**

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 20
Enrollment Preferences: preference to PSCI majors and GBST concentrators

Materials/Lab Fee: $10 plus cost of books

GEOS 11 (W) River Restoration in Practice
River restoration is a growing billion-dollar international industry. Since the environmental movement began in the 1960s and 1970s, renewed interest in the beauty and benefits of healthy streams has resulted in increased research, funding, and applied restoration of rivers, streams, wetlands, and riparian corridors. The restoration of rivers and streams comes in many different forms including dam removal and in-channel habitat restoration. In this course, we'll learn about the history of restoration and the basics of fluvial geomorphology and hydrology. We will gain applied knowledge and experience with the practice of restoration through a combination of lectures, classroom exercises, conversations with restoration advocates and practitioners, field trips and field data collection. A final practicum will involve the design of a restoration project. The course will generally be structured around three sections: Science: Week 1 will primarily involve lectures and classroom exercises and discussion of the literature, learning about the history and evolution of river restoration as well as the basics of the science that drives restoration. Data Collection and Analysis: Week 2 will focus on data collection and analysis typically required for river restoration projects. This will include topographic surveying, geomorphic and habitat mapping, pebble counts, stream discharge measurements, GIS mapping, and hydraulic modeling. Intensive Practicum: Small groups of students will be given a real restoration project example to research, analyze, and design. This practicum will include data collection, GIS analysis, flow modeling, and design plan sheets describing the restoration plan. The class will meet on average 8 hours per week and will include up to 3 day-long field trips. Students should expect to be outside for portions of the day collecting field data in/near rivers in winter conditions. Adjunct Instructor Bio: Nick Nelson is a
fluvial geomorphologist and regional director for Inter-Fluve, a river and wetland restoration company. He has assessed hundreds of miles of river and designed/managed the removal of more than a dozen dams in New England. He has lectured at the University of MN, Tufts University, University of TN, and currently teaches courses at Northeastern University and the Harvard Graduate School of Design.

Class Format: afternoons
Requirements/Evaluation: students will be evaluated based on their final group design submittal
Prerequisites: none, though some background in GIS and a scientific field (geology, biology, ecology, etc.) will be useful
Enrollment Limit: 15
Enrollment Preferences: background in scientific fields of study
Materials/Lab Fee: $16

GEOS 12 (W) Geology of the National Parks
Crosslistings: ENVI12 / GEOS12
Primary Crosslisting
A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well-illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and bibliography will be distributed by the presenter at the time of the report.
Class Format: mornings
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference to first-year students
Materials/Lab Fee: approximately $125 for books

Winter 2019

**GERM 12 (W) The Grand Hotel in Modern Fiction and Film**

Crosslistings: COMP12 / GERM12

**Primary Crosslisting**

The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and possible class confusion, of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Grand Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality. In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a riotous echo chamber, mirroring precarious lives of illegal migrants and displaced workers.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** $10 plus cost of books

**GERM 16 (W) The Life and Death of a Vanished Nation: East Germany, 1949-1990**

Crosslistings: GERM16 / HIST16

**Secondary Crosslisting**

In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet three times per week (2-3 hours each meeting) for the four weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.

**HIST 10 (W) North Adams, Massachusetts: Past, Present, and Future**

Crosslistings: AMST11 / HIST10

**Primary Crosslisting**

This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students' engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in...
the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

**Class Format:** afternoons

**Requirements/Evaluation:** 2- to 3-page paper; final project

**Prerequisites:** none

**Enrollment Preferences:** first-year students preferred

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01    TBA     Annie  Valk

**HIST 12 (W) Cold War Films**

The Cold War between the Soviet Union and the United States, a nearly half-century standoff, was as ideological as it was military. For every nuclear test, arms sale, or military operation there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life-capitalism and communism, totalitarianism and democracy—an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. This class will explore these quintessential, overlapping elements of Cold War culture in a series of films produced from the mid-1940s to the mid-1960s. Film screenings will be accompanied by contextual readings to be completed prior to class discussion.

**Class Format:** mornings

**Requirements/Evaluation:** students will be evaluated on class participation and four response papers (2-3 pages each)

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** based on a questionnaire provided by professor

**Materials/Lab Fee:** $10

Winter 2019

LEC Section: 01    TBA     Jessica  Chapman

**HIST 13 (W) Eyewitnesses to History: American Treasures in the Chapin Library**

What did Christopher Columbus write in his 1493 letter to the Spanish court? How did John Smith describe the Virginia colony early 1600s? What would a pioneer find when following the Oregon Trail west in 1846? How much did a female slave cost in Richmond, Virginia, in 1860? These and many other intriguing questions are answered by rare books, manuscripts, newspapers, maps, and prints in the Chapin Library, primary sources which contain eyewitness accounts of important events in American history. Students in this course will learn, through handling rare materials, how to analyze primary sources and put them in historical context. For the first two weeks, they will investigate items, selected by the instructors, in tutorial-like sessions, with one student presenting conclusions of research and another giving a critique. For the final project, each student will select an item from the Chapin Americana holdings, write a 10-page research paper and present it to the class, and write a brief note about the item for a public display in the Special Collections instruction Gallery.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper; formal public exhibit

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** none

Winter 2019
HIST 14 (W) Game of Thrones, ca. 850 B.C.: Empire, Religion & Palace Intrigue Neo-Assyrian Reliefs at WCMA

Long before the palace intrigues of Jaime, Cersei and Tyrion Lannister, Mesopotamian monarchs established the world's first empires and littered their landscapes with palaces and temples, fortresses and monumental art. The two Assyrian stone reliefs at WCMA are stunning examples of the "calculated frightfulness" with which the kings ruled, employing politics and religion in effective and deliberate combination. In this course, we meet twice–weekly for an interdisciplinary, close-up look at the WCMA reliefs and objects in the WCMA cuneiform collection to ask: What (and how) did the reliefs 'mean?' Why did they merit inclusion in the palace of one of the most powerful kings in the ancient world? What (and how) do they 'mean' in their present Williamstown setting? Finally, what is the status of Nimrud, the ancient city where the reliefs were excavated, post-ISIS, and why does the study of the ancient world matter in the digital age? In this course, our 'work' includes readings in ancient texts, learning to write cuneiform signs and words in clay, the Epic of Gilgamesh, royal correspondence, ancient conceptions of the past, gender, sexuality, religion, and stories of queens, kings and courtiers in love and war. We finish with a feast of ancient Mesopotamian fare and an overnight field trip to Yale's Babylonian Collection. Readings from the extensive bibliography will be selected based on student interest, and the course can be further refined for individual students, including those whose senior theses may benefit from consideration of the ancient world. Students with no experience in art history or ancient history are warmly invited to join, as are those with some background in relevant subjects, such as the religions, cultures and history of the modern Middle East. Adjunct Instructor Bio: Alison Gruseke, PhD, studied at Williams and Yale. Her research and teaching focus on the Hebrew Bible, the ancient Near East, and on the ways in which the ancient world can illuminate modern problems of identity, theology and ethics. The negotiation of cultural boundaries, identity formation, and the interrelationship of cultures in conflict form a strong thread that runs through her work.

Class Format: afternoons
Requirements/Evaluation: 10-page paper; the final project will be adjusted to fit the academic backgrounds and interests of individual students
Prerequisites: none
Enrollment Limit: 10–12
Enrollment Preferences: by seniority, auditors are welcome
Materials/Lab Fee: $200 plus cost of books

Winter 2019
LEC Section: 01 TBA Alison A. Gruseke

HIST 15 (W) Homer in Vietnam

This course will examine the impact of combat trauma on American soldiers during the war in Vietnam, and how that trauma affected their return to the United States. We will read two books that explore these issues through the lens of Homer's iliad and Odyssey, Jonathan Shay's Achilles in Vietnam and Odysseus in America. We will discuss how Homer's classics have come to represent the trauma of war and coming home from the Trojan War to our current wars in the Middle East and beyond. In addition to discussing these two books, we will also view a number of films that address these issues. The class will be primarily discussion based on the readings and films.

Class Format: afternoons
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: military veterans will be given priority should the class be overenrolled
Materials/Lab Fee: approximately $25 for books

Winter 2019
LEC Section: 01 TBA Scott Wong

The course will meet three times per week (2-3 hours each meeting) for the four weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to History and German majors

Materials/Lab Fee: $20 plus cost of books

HIST 30 (W) Workshop in Independent Research

This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis and would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians define good research questions; become familiar with the historiography; and identify primary sources. Students will pursue their own research on any topic of their own choosing for a 10-page final paper, and we'll use a workshop format to discuss the research and writing of that paper.

Class Format: independent research

Requirements/Evaluation: 10-page paper; weekly assignment

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: interest in course subject determined by questionnaire

Materials/Lab Fee: $25

HIST 31 (W) Senior Thesis: History

To be taken by all senior honors students who are registered for HIST 493 (Fall) and HIST 494 (Spring), HIST 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.

Class Format: thesis

Distributions: (D2)
HIST 99 (W) Independent Study: History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

Winter 2019

INTR 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making
Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Secondary Crosslisting
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums--from art museums to scientific, historical, and specialty collections--and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for four hours session at WCMA, plus 1 trip to area museums per week.

Requirements/Evaluation: final formal public exhibit
Prerequisites: keen interest in museums and culture
Enrollment Limit: 12
Enrollment Preferences: random selection
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

JAPN 25 (W) Kyoto Artisans: Exploring 1200 Years of Cultural History of Kyoto through Modern Craftsmanship

Kyoto, the former imperial capital of Japan has 1200 years of history. It is called Japan's cultural treasure house. The purpose of this travel course is to explore the cultural history of Kyoto and how traditional craftsmanship is perpetuated and transformed in a modern era as the city of Kyoto developed. Students will visit Kyoto artisans at their studio and through a discourse with thriving artists, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course is conducted on campus. Students will intensively study the cultural history of Kyoto with readings, films and discussion. Also in pairs, they will conduct research on one selected area of Kyoto craftsmanship to acquire in-depth knowledge. Each pair will be responsible to educate the entire group for the onsite visit in Kyoto. Then, for the second and third week, the class will travel to Kyoto. We will first visit historic sites to learn the context of how craftsmanship developed from courtly culture in the Heian period, samurai tradition in the Kamakura and Muromachi periods, religious ceremonies and Noh Theater and tea ceremonies. After and during these excursions, we will visit four artisan studios. They are a sacred mirror maker who could be the last of his kind, a textile weaver, a Noh mask maker, a sculptor of Buddhist statues. Some of these artisans are perpetuating hundreds of years of family tradition. Some started out as an apprentice and established his/her own studio. Students will also have hands on experiences at some studios. Students are expected to participate in all the scheduled activities, post a daily journal on the course website and share daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern craftsmanship to the local community and the Kyoto artisans at a public forum.

Class Format: travel
Requirements/Evaluation: final project; post daily blog to the course website and a public PowerPoint presentation in Kyoto
Prerequisites: at least one course in ASST or JAPN; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: personal statement
Materials/Lab Fee: $3,635
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

JAPN 31 (W) Senior Thesis: Japanese
To be taken by all students who are candidates for honors in Japanese.
Class Format: independent study
Distributions: (D1)

JAPN 99 (W) Independent Study: Japanese
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
JLST 14 (W)  Mock Trial

In the Mock Trial course, students are divided into two teams in which they play the roles of attorneys and witnesses during their preparation for and participation in a simulated civil trial. They are given a series of witness statements and pleadings together with various documents and other data that they must evaluate for potential use as evidence as they plan to present their case as either the plaintiff or the defendant. Team members must prepare and deliver Opening Statements and Closing Arguments as well as handle direct and cross-examinations of the witnesses who testify for both sides. The "final exam" consists of two trials with the two teams switching sides on the second day such that they must evaluate the case from both sides. At the two trials, an experienced attorney plays the role of judge, and volunteer jurors from the community listen to the evidence and render their "verdict" based on the presentations. Adjunct Instructor Bio: David Olson '71 has practiced as a civil trial attorney for 40 years with a firm currently with over 500 attorneys handling cases in state and federal courts. He has taught Mock Trial on 6 previous occasions, receiving strong reviews for the course. Adjunct Co-Instructor Bio: After graduating from Villanova Law School where he was Editor in Chief of the Law Review, Steve Brown has been a litigator and trial lawyer for 40 years concentrating his practice in white-collar criminal defense and civil rights. He was a partner at Dechert LLP from 1991 to 2016, when he retired and became Civil Rights Counsel to the firm. He has spent much of his career doing pro bono work including representing Guantanamo Bay detainees and people and prisoners whose constitutional rights have been violated, and supervising Dechert associates in 40 trials in federal courts.

Class Format: Monday and Tuesday 10-1:30
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference to upperclass students
Materials/Lab Fee: $16
Distributions: (D2)
JWST 99 (W)  Independent Study: Jewish Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

LATS 16 (W)  True and Wild Tales: Argentine Cinema after 1985
Crosslistings: ARTH16 / LATS16
Secondary Crosslisting
The Argentine film industry is one of the most developed in the Spanish-speaking world. It is rich in genres and production scales, and in the issues raised by the films themselves. This immersive course encourages dynamic engagement with these issues, as we watch films that grapple with the country’s painful legacy of dictatorial rule, coming-of-age road movies, familial dramas, and riotous comedies that feature that distinctive, biting Argentine humor. Our meetings consist of three mandatory screenings per week, two of which are followed by class discussion. In addition to learning about the Argentine context, we will learn vocabulary and tools for discussing and writing about film. No previous coursework in film, or fluency in Spanish required (the films are subtitled)--only an interest in contemporary Argentine cinema and culture.

Class Format: afternoons
Requirements/Evaluation: 2- to 3-page paper; 3 mandatory screenings each week
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference will be given to Art Studio and Art History majors, as well as students concentrating in Latino/a Studies
Materials/Lab Fee: cost of books

LATS 31 (W)  Senior Thesis: Latina/o Studies
Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.

Class Format: thesis
Prerequisites: approval of program chair
Enrollment Preferences: limited to senior honors candidates
Distributions: (D2)

LATS 99 (W)  Independent Study: Latina/o Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is
This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals. Adjunct Instructor Bio: William E. Simon, Jr., ’73. Businessman, lawyer, and philanthropist, Mr. Simon is Co-Chairman of William E. Simon & Sons, a private equity firm, and the William E. Simon Foundation. Early in his career he was Assistant U.S. Attorney in the Southern District of New York and later was the 2002 Republican gubernatorial nominee in California. Mr. Simon is a Trustee Emeritus of Williams College.

Class Format: independent study
Requirements/Evaluation: 10-page paper and an in-class presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Leadership Studies concentrators, preference to seniors and juniors
Materials/Lab Fee: none

Students will dramatically enhance and expand their own practical professional competencies and personal attributes by gaining specific skills valuable and relevant for success in the real-world of work! Dynamic sessions are conducted by an exceptionally accomplished instructor focusing on character, interpersonal astuteness, communicating skills, leading effective change, financial statement literacy, decision-making under pressure, and thinking critically about and acting intentionally for personal development. Knowledge is transferred in the classroom through fast-paced, concise student-led discussion, live interaction with seven world-class guest speakers, individual communications exercises, role-playing, and personal one-on-one mentoring by the instructor. Preparing for productive class discussions and participation requires reading three short books (The Headmaster; Killer Angels; Breaking Through) and various articles, watching selected videos, understanding material provided in a subject matter guidebook, completing a private Birkman assessment online, as well understanding wide-ranging human performance though an encapsulated case study of the people at the Battle of Gettysburg. Benefits realized by students from all classes can be applied to any enterprise, including business, entrepreneurial initiatives, education, non-profits, and public sector governmental service. Students prepare a 5-page paper on a topic of their choosing that is work-shopped in a tutorial peer evaluation format prior to submission to the instructor. A one-page personal development action plan is also prepared that remains confidential between the student and the instructor in order to provide private individual mentoring and coaching. Class meetings are conducted with lots of fun starting in mid-morning for 1 hour and 45 minutes Monday through Thursday during Winter Study with an estimated three hours of daily preparation (about 20 hours per week) necessary by each student in order to take ownership for achieving and enjoying the full learning experience. Course Daily Agenda: http://www.intersolvegroup.com/wp-content/uploads/WilliamsWinterStudyAgenda2019.pdf Adjunct Instructor Bio: http://www.intersolvegroup.com/leadership-profile/
Class Format: Monday through Thursday 10-11:50 AM

Requirements/Evaluation: class participation based on materials provided for daily preparation, a 5-page paper reviewed in a tutorial peer format and evaluated by the instructor, and a one-page personal development action plan

Prerequisites: the only prerequisite is a keen and purposeful desire to learn and develop oneself through a practical applied experience

Enrollment Limit: 12

Enrollment Preferences: diversity and inclusion of geographic, economic and social background will be considered in order to assemble a spirited mix of participants

Materials/Lab Fee: none

Winter 2019
LEC Section: 01  TBA  Edward R McPherson

LEAD 14 (W)  The CIA and the Politics of Intelligence
Crosslistings: LEAD14 / PSCI14

Secondary Crosslisting
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency. Adjunct Instructor Bio: Donald Gregg ’51 served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. He is now chairman emeritus of The Korea Society. 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. He is now chairman of the Pacific Century Institute in Los Angeles.

Class Format: afternoons

Requirements/Evaluation: evaluation will include class attendance and participation, and a short, 3- to 4-page retrospective paper on the course and its content

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to PSCI and LEAD students

Materials/Lab Fee: cost of book ($25)

Winter 2019
LEC Section: 01  TBA  Donald P. Gregg

LEAD 15 (W)  Barack Obama: A First Draft of Presidential History
Crosslistings: LEAD15 / PSCI15

Primary Crosslisting
Barack Obama's election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement-and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama's leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read (and view) primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama's presidency; the final assignment will be the essay itself.

Class Format: afternoons

Requirements/Evaluation: 10-page paper

Prerequisites: one course in American politics, Leadership Studies, and/or 20th century American history
LEAD 18 (W) Wilderness Leadership in Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification.

Class Format: the course runs nine consecutive days straight from 9AM-5PM, with a possible one nighttime rescue exercise

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the instructor explaining why they want to take the course and hope to gain from the experience

Materials/Lab Fee: $465

Attributes: EXPE Experiential Education Courses

MAST 25 (W) Material Culture and Craft of 19th Century Coastal New England
Crosslistings: ENVI26 / MAST25

Primary Crosslisting
The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvassworks, and boatbuilding.

Class Format: Williams-Mystic

Requirements/Evaluation: performance-based evaluation using exemplars, experts and authentic audience; final paper or project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: by application
Materials/Lab Fee: $1,500
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019

Maritime Studies senior thesis.

Class Format: independent study

Winter 2019
HON Section: 01

MAST 99 (W) Independent Study: Maritime Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
MATH 12 (W) The Mathematics of Lego Bricks
This course is a modification of five previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell.

Class Format: afternoons
Requirements/Evaluation: 2- to 3-page paper; final project
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $40
Attributes: EXPE Experiential Education Courses

MATH 13 (W) The Mathematics of SET (and other games)
SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredibly variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we'll study these mathematical ideas, as well as those coming from other mathematically interesting games (and we'll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will be meeting for 6 hours per week in class. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project designing a new game based on mathematical ideas. These final projects will be showcased in a board game night at the end of Winter Study.

Class Format: afternoons
Requirements/Evaluation: final project; small problem sets
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: preference given to students with less mathematical background
Materials/Lab Fee: cost of books
Attributes: EXPE Experiential Education Courses

MATH 14 (W) Creative Dynamics
Crosslistings: MATH14 / CSCI14
Primary Crosslisting
Broadly defined, a dynamical system is an object whose future state can be calculated from its current state. Examples include ordinary and partial differential equations, discrete dynamics, cellular automata, billiards, spatial games, coupled/synchronized systems, agent models, evolutionary/selective dynamics, graph dynamics, Markov chains, and many more. The instructor will give a survey of such systems, and students will be free to imagine, create, and compute their own systems with an emphasis on graphical presentation of results.
**MATH 15 (W)  Self Care: Exploring Acupressure, Reflexology and Aromatherapy**

Crosslistings: MATH15 / SPEC15

**Primary Crosslisting**

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Jennifer Turek has a background in zoology and attended the Lotus College of Natural Therapies. She has opened a business, Koru Therapies, in New Zealand, California, and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

**Class Format:** mornings

**Requirements/Evaluation:** 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

**Extra Info:** the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

**Materials/Lab Fee:** $20 plus cost of books

**Attributes:** EXPE Experiential Education Courses

---

**MATH 17 (W)  Modern Dance - Muller Technique**

This dance class will be based on the modern dance technique developed by Jennifer Muller, with whom the instructor danced professionally for 5 years in New York City and in Europe. Jennifer Muller was a soloist in the dance company of José Limon before she started her own company in 1974. She has added her own style of movement to the Limon technique, creating an expansive, free flowing dance that is wonderful to do and to watch. The class will be multi leveled and open to both men and women alike. Students will have the opportunity to choreograph a short piece either as a soloist or in small groups. Adjunct Instructor Bio: Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced...
professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

Class Format: mornings

Requirements/Evaluation: a 1/2-page journal entry is required after each class, a 1/2-page commentary on 10-12 dance videos, attendance, and a short performance at the end of winter study

Prerequisites: none; no previous dance experience necessary

Enrollment Limit: 24

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA    Sylvia I. Logan

MATH 18 (W)  Introduction to Python Programming

Python has become one of the most commonly used programming languages in recent times, due to its flexibility, readability, and reusability. In this course, we will develop the basic tools within python. These include mathematical and string operators, if-then statements, loops, functions, modules, objects, and file operations.

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniority and major

Materials/Lab Fee: none

Winter 2019

MATH 19 (W)  Screenwriting Challenge: The Tale of an Underappreciated Musical Genius

Crosslistings: ENGL19 / MATH19

Primary Crosslisting

The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

Class Format: afternoons

Requirements/Evaluation: final project

Prerequisites: none, but students with a passion for writing and classical music are encouraged to apply

Enrollment Limit: 3

Enrollment Preferences: writing sample and brief application

Materials/Lab Fee: $55

Attributes: EXPE Experiential Education Courses

MUS 10 (W) Winter Study Chamber Orchestra (WiSCO)
I will organize a classical chamber orchestra to read and perform music of assorted periods and genres. Two student conductors will lead the orchestra, each one having completed my Fall conducting class. In addition to conducting the orchestra, they will act as personnel managers and librarians. I will coach them on every aspect involved in producing a symphonic performance. Berkshire Symphony members and players in the Chamber Orchestra of Williams will make up the majority of the ensemble. The backbone of the training for the orchestra and the student conductors will involve issues of intonation, articulation, balance, bowing, dynamics, tempo, and interpretation. During rehearsals, members of the orchestra will be encouraged to offer ideas and suggestions in order to take part in the ownership of the final product. There will be a final recorded and videotaped concert at the end of Winter Study. Maximum enrollment: Strings: 12 violins, 5 violas, 4 cellos, 2 basses, and Winds: 2 flutes, 2 oboes, 2 clarinets, 2 bassoons, 2 horns, 2 trumpets, timpani.

Class Format: MWF 7:00pm-9:00pm
Requirements/Evaluation: based on attendance and preparation
Prerequisites: none
Enrollment Limit: 36
Enrollment Preferences: if overenrolled, a short audition on the scheduled repertoire will be held and adjudicated by me and the student conductors
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Ronald L. Feldman
Countless films take place in New York City, but not all foreground the city as an active character in the plot. In this course we will seek answers to the following questions: how does the urban environment participate in a film's story? How can a movie soundtrack create a particularly urban atmosphere? How can sound represent or subvert the urban communities represented on screen? And more broadly: what does it mean to be a New Yorker? Films such as The Naked City (1948), Thoroughly Modern Millie (1967), Taxi Driver (1976), Manhattan (1979), and Do the Right Thing (1989) are wildly diverse in terms of genre, cinematography, soundtrack, and the subject positions they represent, and yet their soundscapes all forge a distinctly New York "feel." Through close viewing--and listening--we will explore how the directors, mixers, editors, and composers deployed sound to forge distinct perspectives on the urban experience. Students will be expected to attend all screenings, read reviews and secondary literature, maintain a "sound journal," and produce a ten-page final paper.

Requirements/Evaluation:  "sound journal" and a 10-page paper
Prerequisites:  none
Enrollment Limit:  20
Enrollment Preferences:  preference given to Music, Theatre, and American Studies majors, and students with prior film studies coursework
Materials/Lab Fee:  none

MUS 12 (W)  writing sample and brief application
Crosslistings: MUS12 / STAT12
Secondary Crosslisting

The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country-and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook's music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

Requirements/Evaluation:  10-page paper; final project; musical composition with commentary
Prerequisites:  some previous singing or music-reading experience helpful
Enrollment Limit:  30
Enrollment Preferences:  seniority
Materials/Lab Fee:  $10 plus cost of books

MUS 13 (W)  The Golden Age of Gospel Music

A historical look at American Black Gospel, stressing the vocal tradition of the African American Church. Vocalists and instrumentalists are encouraged to participate, but there is no required prerequisite for the course. Course will consist of historical workshops in Gospel music. Required
reading People Get Ready by Robert Darden, course booklet and will require a minimum of 10-page report. Music covered will be from the mid 1800's to contemporary gospel music. Field trip will include a trip to an African American Church service (Sunday morning). Requirements for the course include a 5-page paper with creative project or performance and a field trip to church. Adjunct Instructor Bio: Legendary Bassist Avery Sharpe has performed with Jazz greats from McCoy Tyner to Dizzy Gillespie. Sharpe is a Gospel Historian and has a strong up bringing in "The Church of God in Christ."

Requirements/Evaluation:  S-page paper with creative project or performance and a field trip to church
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: if overenrolled, preference to seniors
Materials/Lab Fee: $138 plus cost of books

MUS 14 (W) Classic and Contemporary Musical Theater
Crosslistings: MUS14 / THEA14
Primary Crosslisting
This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus--now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

Class Format: afternoons
Requirements/Evaluation: a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: the instructor will communicate with those wishing to register either in person or via email
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

MUS 15 (W) Contemporary American Songwriting
Crosslistings: MUS15 / AMST15
Primary Crosslisting
This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will
be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years. She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

Class Format: mornings

Requirements/Evaluation: final performance and a 2- to 3-page paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students with a musical background and the ability to play an instrument may be given preference, but anyone interested is encouraged to register.

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

MUS 16 (W) Zimbabwean Music Collaboration

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the participants.

Class Format: mornings

Requirements/Evaluation: final performance

Prerequisites: none, but students who play other instruments are encouraged to bring them

Enrollment Limit: 12

Enrollment Preferences: students with musical background; those who play other instruments may have an advantage

Materials/Lab Fee: none

MUS 25 (W) Creative Art Projects inspired by Southern Florida Native American Indian History & Culture

This travel course will focus on creative work inspired by the history and culture of Native American Indians of Southern Florida. We will discuss the history and culture of Native Americans in the area, focusing mostly on the Calusa, their society, politics, system of government, trading customs, and religion. We will also talk about their construction of canal systems, and their architecture and engineering. Students will arrive to their own conclusion about the impact of Native Americans in our culture. They will also use their experiences during field trips, workshops, lectures, and group discussions as a source of inspiration for their creative work in one or more of the following fields: music composition, visual arts (video, photography), literature, poetry, and theater. They will create their projects individually or could form teams to create interdisciplinary works. If teamwork is selected for the creation of a project there will be a limit of one student per discipline in each team. We will visit archaeological and historical sites, Research Centers, and Museums focused in the History and Culture of Native American Indians of Southwest Florida. We will attend lectures offered by archaeologists, and will participate in the process of screening, cataloging, and analysis of samples extracted from the shell mounds of Useppa Island and Pineland at the Randell Research Center of the University of Florida. Calusa artifacts made with ceramic materials, wood carving, and painting, are recognized worldwide as remarkable examples of Native American artistic achievement. Samples of their art found during excavations in SW FL are part of exhibitions in the Historical Museums that we will visit. Students will learn about music inspired by pre columbian Native American instruments and art. We will discuss information and will visit the estuaries that sustained the world of the Calusas.
Class Format: travel
Requirements/Evaluation: 10-page paper; creative project, and travel journal
Prerequisites: none; not open to first-year students
Enrollment Limit: 7
Enrollment Preferences: priority given to students interested in creating original work in response to field trips and visits to Research Centers and Museums (musical, photography and/ or video, literary, poetry, theater)
Materials/Lab Fee: cost to student $1,995

NSCI 10 (W) The Neuroscience of Learning
An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in collaborative research projects that will develop their use of the medical model to evaluate primary neuroscience research studies for validity. They will develop their own evaluation systems for identifying how valid research interventions and expanded opportunities for successful learning. Students will lead class discussions based on their reading of primary research. Small groups of 2-3 students will be assigned different articles on the same topic and spend time in class.  Adjunct Instructor Bio: Dr. Judy Willis ’71 combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to develop her focus in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles, as well as giving invited presentations internationally, applying neuroscience research to potential interventions to facilitate successful learning. She has been on the adjunct faculty of the University of California Graduate School of Education, Santa Barbara.

**PHIL 11 (W) Spinoza’s Ethics**

Spinoza’s *Ethics* aims to prove that human happiness consists in our rationally perceiving that God is all there is, and that all there is—including you and I—is God. Yet the Christian Church immediately deemed the *Ethics* “a book which, perhaps since the beginning of the world until the present day, surpasses all others in godlessness and endeavors to do away with religion and set godlessness on the throne.” Spinoza’s own Jewish community issued a writ of herem, excommunicating him for “monstrous deeds” and “abominable heresies.” In our Winter Study we will closely read Spinoza’s *Ethics* together, in order to understand how its doctrine that God is everything could be so profoundly godless. Our goal will be to view the universe from the standpoint of eternity. This may involve some monstrous deeds and abominable heresies of our own.

**Class Format:** afternoons

**Requirements/Evaluation:** journal

**PHIL 12 (W) Bioethics According to The Simpsons**

Active Euthanasia? Okely Dokely! Human cloning? Don’t have a cow, man! Over the past twenty years *The Simpsons* has included a healthy dose of stinging and sometimes surprisingly illuminating critique of numerous bioethical issues. In this winter study course we will use clips and episodes from
the classic animated series as a launch pad for investigating the deeper philosophical concepts and ethical questions involved in a variety of bioethical topics. Good comedy has a way of driving straight to the core of contested issues and painful circumstances, providing a point of entry for students in the class to more serious, academic material. Along the way, the course will also investigate what makes The Simpsons's treatment of these bioethical issues "funny"—how its satire plays on common misunderstandings, contradictions and inconsistencies in social policy and individual decisions, and how serious issues drive the comedic effect. During the first portion of the course, the instructor will present selections from The Simpsons that take up several core bioethical issues, paired with related readings from the bioethics literature. In the second portion of the course, the students themselves will identify and present clips pertaining to bioethical issues. The final project for the course will be collaborative in nature: small groups of students will be asked to develop and pitch (to the other class members) a storyline for a Simpsons episode (or portion thereof) that centers on a bioethical topic. Classes will meet two or three afternoons each week, and students will be expected to read a substantial amount of philosophical material in preparation for these meetings. In addition, students will need to spend significant amounts of time outside of class viewing videos and developing their final projects. Evaluation will be based on class participation, one in-class presentation, and the final collaborative project.

Class Format: afternoons
Requirements/Evaluation: final project
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference will be given to students who indicate intellectual seriousness about philosophical bioethics

Winter 2019
LEC Section: 01    TBA     Julie A. Pedroni

PHIL 13 (W) Boxing
Boxing is one of the world's oldest sports, and there are 3000 year old artistic representations of boxing from ancient Egypt. The history of boxing in the United States during the nineteenth and twentieth centuries reflects the history of the nation. Issues of class, ethnicity, race, and gender have played a central role in the sport. Stories about boxing also play a central role in the popular culture. In this course we will look at some treatments of boxing by social historians, examine some depictions of boxing in documentary and dramatic films, and watch some classic fights. The workouts will involve minimal contact, but will be physically demanding. Students will need to purchase boxing gloves, handwraps, and a jump rope.

Requirements/Evaluation: evaluation will be based on attendance, participation, and a 10-page final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $150
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Keith E. McPartland

PHIL 14 (W) Yoga and a Grounded Life
"Yoga and a Grounded Life" will examine what the practice of yoga is, and how it can serve as a foundation, guide, and inspiration for living, particularly in the face of personal or societal challenges. Alongside the physical practice of yoga, the class will investigate the philosophical and ethical teachings of yoga's ancient text, the Yoga Sutras of Patanjali. Students will learn a number of basic yoga poses and breathing techniques in 1.75-hour classes that will meet 5 days a week. In addition, students will read and discuss portions of the Yoga Sutras and several different commentaries, such as those of BKS Iyengar and Chip Hartranft. Attendance at all classes is required. Missed classes must be made up before the end of Winter Study, usually by attending a regular class at Tasha Yoga. Students will be expected to practice on their own outside of class, to journal, and to participate in class discussions of the readings. Students will submit weekly written assignments in response to prompts relating to class material. Adjunct Instructor Bio: Yoga teacher Anne O'Connor is certified in the Iyengar yoga method, which she has been practicing for 20 years.
O'Connor, a freelance editor, also serves on the Williamstown Select Board and is a member of the First Congregational Church of Williamstown.

Class Format: mornings
Requirements/Evaluation: four 1- to 2-page papers and class attendance and participation
Prerequisites: no previous yoga experience required
Enrollment Limit: 14
Enrollment Preferences: instructor's discretion; interviews with enrollees
Materials/Lab Fee: cost of books
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Anne C. O'Connor

PHIL 15 (W) Plato's Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting
Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

Class Format: mornings
Requirements/Evaluation: 5-page paper and an in-class presentation of independent research
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: preference given to majors or intending majors in Classics, Comparative Literature, WGSS, or Philosophy
Materials/Lab Fee: cost of books

Winter 2019
LEC Section: 01    TBA     Amanda R. Wilcox

PHIL 25 (W) Eye Care and Culture in the Atlantic Coast Regions of Nicaragua
We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students-in conjunction with optometrists who volunteer their time for the trip-will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip.

Class Format: travel
Requirements/Evaluation: performance in eye clinics, journal
Prerequisites: none; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: application essays
Materials/Lab Fee: $3,700

PHLH 13 (W) Behavioral Health Prevention and Middle School Leadership Development

In this course, students will learn about behavioral health prevention and promotion, with an emphasis on the prevention of substance use disorders and the Substance Abuse & Mental Health Services Administration's (SAMHSA) Strategic Prevention Framework. Following this grounding in prevention science, students will learn about middle school leadership development and community action with a behavioral health and wellness focus, and be trained to deliver core components of the New Hampshire Teen Institute's (TI) Leaders in Prevention program for students in grades 6-8. The classroom portion of this course will prepare students to put this knowledge into practice as staff members at the January session of Leaders in Prevention, serving with other youth & adult staff members of TI to facilitate a weekend of education and networking for 50-60 middle school students from around NH and New England. Students in this course will work with teams of middle school students to help them create a student-led action plan for a school or community wellness event to be implemented in their home communities. During the first 2 weeks of the Winter Study period, students will meet on campus for approx. 15 hrs per week. The experiential portion of the course--serving as facilitators at the Leaders in Prevention weekend--will be an overnight trip from Thurs. 1/17--Sun 1/20 to a conference center in Greenfield, NH. (Lodging & food will be provided to students free of charge while at the camp.) This trip is mandatory for the course, and involves working with middle school youth for 3 very full days. Students will meet once again during the final week of Winter Study to debrief and process their facilitation experiences. Academic work will be primarily contained to the classroom time of the first two weeks. A culminating 10-page reflection paper to demonstrate a synthesis of students’ classroom and practical learning will be the only sizeable out-of-class work. Adjunct Instructor Bio: Marissa is the Executive Director of the NH Teen Institute and a trainer for multiple workshops developed by SAMHSA’s CAPT and ATTC systems. She is the Secretary of the Prevention Certification Board of NH and the NH Prevention delegate to the IC&RC, and serves on the NH Governor’s Commission Prevention Task Force. Outside of prevention work, she is Assoc. Artistic Dir. of Mill City Productions in North Adams, MA.

Class Format: afternoons

Requirements/Evaluation: 10-page reflection paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: lottery
Materials/Lab Fee: $45
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01

PHLH 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions

Crosslistings: PHLH14 / ANSO14 / CHEM14

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course.

Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

Class Format: at least three times a week for a total of 6 hours
Requirements/Evaluation: 10-page paper, final project
Prerequisites: course in Biostat helpful, but not required
Enrollment Limit: 18
Department Notes: all interested students will be interviewed by the instructor
Materials/Lab Fee: Cost of books

Winter 2019
LEC Section: 01 TBA Nicholas Wright

PHLH 15 (W) The Human Side of Medicine

In today's health care atmosphere of physician accountability, advanced medical technology, and evidence-based diagnosis, the "human side" of medical practice is often minimized or even disregarded. Medical schools debate how or whether to emphasize this more interpersonal aspect of medicine within their curriculums. This concern with the patient/physician relationship becomes particularly relevant with today's reliance upon personal devices and with a culture promoting medicine as a big business model. Increasingly research shows that the combination of both perspectives--patient centered understanding and technical proficiency--lead to better diagnosis and treatment; to improved patient compliance and satisfaction; and to increased physician professional satisfaction. Original thinking, examining personal/family experiences, in-class skill practice, and skype interviews with patients/student/health care professionals will provide much of the learning experience. This seminar works well for those who have shadowed physicians or are planning to shadow, but all majors are welcome. Adjunct Instructor Bio: Sandra Goodbody is a clinical social worker. She has maintained a psychotherapy practice in D.C., has a clinical appointment at The George Washington School of Medicine, and has served as a
senior project director at the National Academy of Medicine.

Class Format: TWR, 10 a.m.-noon
Requirements/Evaluation: final project plus three 2-page papers
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: class balance and student interest
Materials/Lab Fee: $10 plus cost of books

Winter 2019
LEC Section: 01    TBA     Sandra Goodbody

PHLH 16 (W)  Addiction Studies and Diagnostics
This course is designed to assist students while at Williams and after graduation develop an effective understanding of the impact and treatment of addiction. It is designed for students planning to continue on to Med School and graduate work in the Humanities; work in public health; are a part of a family; a friend of an addict or those impacted by addiction; or to be an educated citizen. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Speakers will tell their stories in their journey from addiction to recovery as well as their experience working as therapists. Students will be expected to accurately diagnose the speakers according to the criteria in the DSM-5. Finally, an annotated bibliography and oral presentation will be presented in groups at the end of the course.  Adjunct Instructor Bio: Mr. Berger has been teaching this course at Williams since 2010. He has advanced degrees from Springfield College and the Hazelden Graduate School of Addiction Studies, 30 years of recovery from addiction, and a decade of experience in community mental health and clinics.

Class Format: 7-9:30 PM, two evenings each week
Requirements/Evaluation: class participation, field experience of 12-step and other mutual aid recovery groups, experience with initial assessments for substance use disorders, initial experience with formal criteria for SUD diagnosis
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: by graduating class and then by instructor permission
Materials/Lab Fee: none

LEC Section: 01    TBA     K. Richard Berger

PHLH 18 (W)  "The Transformation of Silence": Exploring Campus Sexual Violence Prevention and Response
Crosslistings: PHLH18 / WGSS18
Secondary Crosslisting
Since 2011, student activism and federal guidance of dramatically changed how campuses address sexual violence. This class will explore response to and prevention of sexual violence on college campuses and more broadly, across topics related to gender and sexuality, race, constructs of accountability, and public health and social justice approaches to prevention. Class will be heavily comprised of interactive activities, along with reading, films, and reflective writing. Course will meet 3 days per week for 2 hours. Some outside of class work in the form of film viewing and attendance at talks.  Adjunct Instructor Bio: Meg Bossong ’05 is the Director of Sexual Assault Prevention and Response. Prior to returning to Williams, she was the Manager of Community Engagement for the Boston Area Rape Crisis Center, where she worked with community stakeholders in education, faith communities, medical and mental health care, law enforcement, and beyond on response and prevention initiatives.

Requirements/Evaluation: a 10-page final paper, along with Glo reflections
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: submission of a few sentence description indicating interest level in the course, preference to first years and sophomores
Materials/Lab Fee: none
PHLH 25 (W) Public Health, Education, and Community Action in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable—and most vital—members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in Spring of 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. With the support of a Fulbright-Nehru student researcher fellowship, she is currently conducting community-based participatory research with FPHED on reproductive health programs in rural UP. She has spent a cumulative 11 months to-date studying and researching reproductive health in rural India.

Class Format: travel

Requirements/Evaluation: 5-page paper 2- to 3-page paper Other: Students will be required to keep a private daily journal

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: none; not open to first-year students

Materials/Lab Fee: $2800, which includes all transportation, lodging, meals, lectures, and research materials

Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

PHLH 99 (W) Independent Study: Public Health

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

PHYS 12 (W) Drawing as a Learnable Skill

Representational drawing is not merely a gift of birth, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will develop your ability to accurately see and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and teach creative problem solving abilities. Students need no previous artistic experience, just the willingness and desire to learn. Students will be expected to attend and participate in all sessions. They will also be required to keep a sketchbook recording their progress and complete a final project. Adjunct Instructor Bio: Stella Ehrich is a professional painter whose work includes portraits, landscapes and still life subjects.
She studied for seven years at Studio Simi in Florence, she holds an MFA in painting from Bennington College and a BFA from the Memphis Academy of Art.

**Class Format:** mornings

**Requirements/Evaluation:** evaluation will be based on participation, effort, and development; final project required

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** if overenrolled, selection will be based on seniority

**Materials/Lab Fee:** none

**Distributions:** (D3)

Winter 2019

LEC Section: 01  TBA  Stella Ehrich

**PHYS 13 (W) Electronics**

Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits and the Arduino, a microcontroller. Class will meet four afternoons a week for a mixture of lab and lecture, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or will write a 10-page paper. If students have prior experience with electronics, they should contact the instructor prior to enrollment. Adjunct Instructor Bio: Daniel Maser is a postdoctoral research fellow in the Department of Physics, working with Professor Tiku Majumder in his atomic physics research laboratory. Adjunct Co-Instructor Bio: Jason Mativi is the electro-mechanical technician in the Bronfman Science Center. He will teach the digital electronics portion of the course.

**Class Format:** afternoons

**Requirements/Evaluation:** 10-page paper; final project

**Prerequisites:** MATH 130, equivalent calculus, or permission from instructor; no prior experience with electronic circuits is assumed

**Enrollment Limit:** 14

**Enrollment Preferences:** priority given to seniors first, first-years last

**Materials/Lab Fee:** $100

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01  TBA  Jason W. Mativi,  Daniel Maser

**PHYS 15 (W) Cooking for the Real World**

Crosslistings: PHYS15 / SPEC13

**Primary Crosslisting**

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You'll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac 'n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: *Kitchen Confidential*, by Anthony Bourdain, *The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs*, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

**Class Format:** MWF 3:5-3:30pm

**Requirements/Evaluation:** daily journal and a final cooking demonstration

**Prerequisites:** none

**Enrollment Limit:** 12
Enrollment Preferences: limited to juniors and seniors but would like an email from the students applying on what food means to them

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

PHYS 16 (W)  The Way Things Work
How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet three afternoons a week for a mixture of lecture, discussion, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice.

Class Format: afternoons

Requirements/Evaluation: either building a final project with a short writeup or writing a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: by seniority

Materials/Lab Fee: $40 plus cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019

POEC 22 (W) Volunteer Income Tax Assistance
Crosslistings: ECON22 / POEC22
Secondary Crosslisting
This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons
Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: written statement of interest
Materials/Lab Fee: $15
Attributes: EXPE Experiential Education Courses

Winter 2019

PSCI 11 (W)  Editorial Cartooning and the Art of Propaganda
Crosslistings: ARTH11 / PSCI11

Secondary Crosslisting

This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

Class Format: afternoons

Requirements/Evaluation: editorial cartoons to be produced for each class meeting for evaluation by the class; final cartoons to be published in The Williams Record

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to non-art majors

Materials/Lab Fee: $50

Attributes: EXPE Experiential Education Courses

PSCI 12 (W)  First Amendment Law and Policy

The Constitution is a covenant among the people, the states and government of the United States that substantially defines the unique American experiment and experience. First numerically, and in importance to many Americans, is the Constitution's guarantee of free thought and expression, encompassing the First Amendment's freedoms of speech, press, assembly, petition and religion. Over time the Supreme Court of the United States ("SCOTUS") and the "inferior" federal courts and state courts have given the First Amendment special and exalted status, ruling it contains "preferred freedoms" that are the "matrix, the indispensable condition of nearly every other form of freedom," and the mechanisms Americans employ to "form a more perfect union" through democratic processes. The course will provide students an intensive examination of First Amendment law and policy, with substantially more time and attention devoted to these rights than possible in a survey civil liberties or constitutional law course. We will examine the most important First Amendment decisions and influential concurring and dissenting opinions dealing with government action purportedly infringing a
First Amendment right. We will also examine how free expression fares in and shapes American society at large. A private employer's, college's or other institution's restriction of expression may not violate the First because it is not government action, but the First and its judicial interpretation affects the discussion and resolution of non-government conflicts involving speech, political activity and religious exercise. The course will explore the rationale and implications of permitting and fostering or limiting certain categories of free expression or in specific contexts (libel--obscenity--"fighting words"--hate speech--deictions of violence and cruelty--child pornography--and others) and in various settings, public and private, involving and outside government. The course will be offered at a time when First Amendment rights are being challenged, especially press freedoms and free speech on college campuses, including Williams'. With the press held in historically low esteem by the public and under attack from the current federal administration the course will incorporate lessons and discussions involving these matters. Some portion of each class will be devoted to current free expression issues in America, in its local communities and on the Williams' and other college campuses. Students will be assigned to identify, research and lead discussions of such issues. The course requires reading (https://docs.google.com/document/d/1puCX7gqzBRH73Km2tVCIZU0ELE7JS8RQaWmd5KTg84k/edit?usp=sharing), class participation and writing. Class participation will be important because the course will be taught Socratically (as most law school classes are with the teacher asking and students answering questions -- and many in the other direction). There will be an optional SCOTUS simulated oral argument at the end of the winter study. Adjunct Instructor Bio: Lloyd Constantine '69 has argued many constitutional law cases in SCOTUS and "inferior" federal courts. He has taught law school (Fordham) and both civil liberties and first amendment law and policy to undergraduates (SUNY).

Class Format: mornings
Requirements/Evaluation: 10-page paper
Prerequisites: none, but if oversubscribed priority will be given to students who have taken constitutional law
Enrollment Limit: 25
Enrollment Preferences: students who have a background in or have taken constitutional law or civil liberties will be given priority
Materials/Lab Fee: $123 plus cost of books

Winter 2019
LEC Section: 01

PSCI 13 (W) The Art of War
This course will examine the meaning and uses of the classical Chinese text, The Art of War, by Sunzi. Students will consider Sunzi's insights both in the context of ancient Chinese philosophy and in terms of their contemporary relevance. The first half of the course will concentrate on placing Sunzi in historical and philosophical context; the second half will examine how The Art of War has been used in a variety of modern fields.

Class Format: mornings
Requirements/Evaluation: 10-page paper; mandatory class attendance and participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: students with background in Chinese studies will have a preference; after that, seniority
Materials/Lab Fee: $10 plus cost of books
Distributions: (D2)

Winter 2019
LEC Section: 01    TBA     George T. Crane

PSCI 14 (W) The CIA and the Politics of Intelligence
Crosslistings: LEAD14 / PSCI14

Primary Crosslisting
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those
Barack Obama’s election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement—and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama’s leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read (and view) primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama’s presidency; the final assignment will be the essay itself.

Class Format: afternoons
Requirements/Evaluation: 10-page paper
Prerequisites: one course in American politics, Leadership Studies, and/or 20th century American history
Enrollment Limit: 19
Enrollment Preferences: preference will be given to LEAD concentrators and PSCI majors
Materials/Lab Fee: $12 plus cost of books

Winter 2019
LEC Section: 01    TBA    Mason B. Williams

PSCI 16 (W) The Martial Art of Politics--Aikido, Gandhi, and King

"The techniques of Aikido are intended as tools for us to use in examining the nature of power, to engage in uncompromising self-scrutiny, and to realize our potential as powerful, compassionate, creative, self-aware human beings."--Mary Heiny Sensei Aikido is a Japanese martial tradition that combines the samurai arts of swordwork and grappling with the philosophical desire to forge a path of harmony in the face of determined opposition. As such, it addresses situations of conflict that manifest themselves physically, but also offers insight into how to redirect the energies—social, psychological, or political—that might otherwise become conflict in one or another aspect of our lives. As a martial art, Aikido teaches us more than simply how to survive; it also teaches us how to physically express our noblest intentions in movements that protect not only ourselves but the attacker as well. Martin Luther King famously observed that “Returning violence for violence multiplies violence, adding deeper darkness to a night already devoid of stars.” Aikido, a physical expression of nonviolence, is the alternative approach made manifest—the light that can drive out darkness and the love that can drive out hate. The physical training (10 am-noon each weekday morning in Currier Ballroom) will improve each student’s strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. The academic component of the course will engage with how the physical training resonates with selected writings on nonviolence (Mohandas Gandhi, Martin Luther King Jr., and theoretician Gene Sharp) and the tactical practices of successful
nonviolent protest campaigns. Each student will research and profile a successful nonviolent campaign, explain why it worked, explain what was "aikido" about it, and in small groups will pick a target and draft a plan for a contemporary protest campaign on a topic of their choosing. Each group will be responsible for crafting speech text, a tactical analysis of their proposed campaign, and a social media plan. Actually implementing the campaign is not a part of the course. By integrating physical and intellectual components, the course seeks to forge in each student a stronger and more coherent perspective on how the pursuit and embodiment of harmony can resolve the conflicts that we so often encounter. Joining us for several sessions will be local scholar Stewart Burns, author of the award-winning MLK biography *To the Mountaintop*. Additional relevant experiences, such as meditation practice, outdoor misogi, and feature films (Gandhi, Selma, etc.) will be woven into the course as schedules permit. Students do not have to be especially athletic, and in Aikido women train as equals with men. Students are encouraged to correspond with the instructor (rkent-at-williams.edu) before registration begins if they have questions. Adjunct Instructor Bio: Robert Kent '84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan, where he helped run the youth program for 18 years. He is currently President of Aiki Extensions, Inc, a nonprofit that supports programs that bring the strategic insights and practical wisdom of Aikido into non-traditional settings. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity. This will be the twelfth year he's offered a Winter Study class.

**Class Format:** daily, 10 am-noon for aikido training, + 2 times a week for academic discussions, typically over lunch

**Requirements/Evaluation:** quality of participation in both physical and intellectual course components (historical analysis, class discussions, final project)

**Prerequisites:** same physician's approval on file as the school requires to participate on sports teams

**Enrollment Limit:** 20

**Enrollment Preferences:** if overenrolled, selection will be based on a questionnaire

**Materials/Lab Fee:** $175

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Robert H. Kent

**PSCI 17 (W) The Third World City**

Crosslistings: GBST17 / PSCI17

**Primary Crosslisting**

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference to PSCI majors and GBST concentrators

**Materials/Lab Fee:** $10 plus cost of books

Winter 2019

LEC Section: 01 TBA James E. Mahon

**PSCI 18 (W) Girl Meets World: Films from 5 Continents**

Crosslistings: WGSS17 / PSCI18

**Primary Crosslisting**
This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls’ own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls’ rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children’s books, young adult fiction, and international human rights documents.

**Class Format:** afternoons

**Requirements/Evaluation:** active class participation and either 3 policy memos (3-4 pages each) or one 10-page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference to Political Science and WGSS majors

**Materials/Lab Fee:** cost of books

Winter 2019

LEC Section: 01    TBA    Nimu Njoya

---

**PSCI 19 (W)  Law as a Tool for Social Justice**

The law may be deployed to achieve social justice in different ways: through the courts, legislation, and the ballot. While we will see the law work positively, we also will examine its limitations and failures due to societal, economic and human obstacles. We will read 2 books in full and 2 in part, all of which relate compelling stories. We begin with *Devil in the Grove* (winner, 2013 Pulitzer for non-fiction), which is about a 1949 Florida rape case involving 3 black men who are defended against the charge of raping a white woman by Thurgood Marshall, at risk to his life. While we encounter the brutal obstacles to obtaining justice in the deep South, the book also is in part a mini-biography of Marshall, and we will read about the great victories he achieved nationally in Supreme Ct. cases involving voting, housing and education. Next is *Gideon's Trumpet*, a classic in the field of constitutional law by Anthony Lewis about winning the right of a pauper to be provided with a lawyer in state felony cases. The book elegantly describes the structure of our Federal system, delineating the tension between the rights reserved to the states in the area of criminal law, and the protection provided to individuals by the Bill of Rights. The third book is *Winning Marriage* by Marc Solomon. It narrates the incredibly successful effort by the LGBT community to win for same-sex couples the right to marry, focusing on gritty political battles at the state level, moving to landfall Supreme Ct. decisions. We will read the penultimate Obergefell decision. The last book is Jonathan Harr's *A Civil Action* (winner, 1996 Nat'l Book Critics Circle Award for non-fiction). The issue is environmental justice and the case is a lawsuit between private litigants: Woburn MA residents who suffered leukemia and other illnesses arising out of toxic chemicals dumped by two large corporations. A David, a very small law firm, takes on Goliath, two giant companies and their huge law firms. Adjunct Instructor Bio: Richard Pollet graduated from Williams in 1969 cum laude, with Honors in Poli Sci, and thereafter obtained a law degree from Columbia Law School. He spent 40 years practicing law, the last 26 as General Counsel of J. Walter Thompson Company (JWT), retiring in 2013. Subsequently, he has done some consulting for WPP, JWT's parent company, and last taught this Winter Study course in Jan. 2018.

**Class Format:** mornings

**Requirements/Evaluation:** 10 page paper

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** seniors first, then juniors, sophomores and first-years

**Materials/Lab Fee:** approximately $70 for books

Winter 2019

LEC Section: 01    TBA    Richard Pollet

---

**PSCI 20 (W)  The Personal is Political: A Nonfiction Writing Workshop**
Since St. Augustine's *Confessions*, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual...reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project--memoir, personal essay, or a hybrid form--the final draft of which will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom--roughly twenty hours a week--during which you'll be engaged in the writing process and reading for class. Readings for the course will be selected from: Baldwin, James. "Notes of a Native Son" Biss, Eula. Selections from *Notes from No Man's Land* Coates, Ta-Nehisi. Selections from *Between the World and Me* Hurston, Zora Neale. *How It Feels to be Colored Me* Khan-Cullors, Patrisse and Asha Bandele. Selections from *When They Call You a Terrorist: A Black Lives Matter Memoir* Nelson, Maggie. Selections from *The Argonauts* Rankine, Claudia. Selections from *Citizen* Smarch, Sarah. "Poor Teeth" and others.

Adjunct Instructor Bio: Julia Munemo holds her MFA in creative nonfiction and has completed a memoir about race, love, mental illness, and her father--a writer of racially charged pulp fiction. Her manuscript explores how her legacy conflicts with her present-day life as one half of an interracial marriage and the mother of mixed-race children. She teaches writing workshops in Williamstown and Maine.

**Class Format:** mornings

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

---

**PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits**

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

**Class Format:** Meeting prior to start of winter study and again after conclusion

**Requirements/Evaluation:** 10-page paper; 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; daily journal; participation in final meeting

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** selection will be based on a resume and letter of interest; at the time of preregistration interested students should send a resume and letter of interest to Paula Consolini (pconsolini@williams.edu)

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses
PSCI 22 (W) Learning Intervention for Teens
This course pairs energetic Williams students with adolescents involved in the Juvenile Court System of Berkshire County. Judges assign teenagers (ages 13-17) to this alternative sentencing program--this is certified as an official Commonwealth of Massachusetts probation program--when their absence from or misbehavior in schools has been a central feature of their delinquency. The goal of this program is to show these teens that learning can be fun, can center on topics that matter to them, and can be empowering. If the teens see school as something other than a form of incarceration, they will be motivated to stay there and to succeed. Each Williams student helps a teen investigate, develop a report on, and present their conclusions about a topic of the teen's choosing. In the past these have ranged from BMX, to the history of North Adams, to the causes of teen methamphetamine use. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work via PowerPoint to an audience that includes the Berkshire County Juvenile Court judges and probation officers, town and city chiefs of police, County District Attorney and assistant DAs, the teens' peers and families, Williams faculty and community members. Williams students gain experience serving in an official capacity, learn to mentor teenagers, and gain insight into the causes of and solutions to the incidence of juvenile crime and underachievement. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation, and keep a weekly journal detailing their meetings.

Class Format: afternoons
Requirements/Evaluation: journal and final reflection totaling 10-15 pages, final project with teenager
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: by paragraph of interest
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

IND Section: 01    TBA     James  McAllister

PSCI 99 (W) Independent Study: Political Science

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to juniors and seniors

Materials/Lab Fee: cost of book(s)

Winter 2019

PSYC 11 (W) Designing your Life and Career After Williams

This course takes a psychological approach to helping you figure out what to do with your life. We start by reviewing your life story up until now and determining how it has shaped you. We discuss, for example, whether you feel pressured to go down a certain road, whether you feel torn between your head and your heart, or whether you feel directionless. Then we take stock of who you really are now, including your core interests, tendencies, strengths, and weaknesses. We try to identify life designs that play to your signature strengths, as opposed to situations that are a setup for frustration and failure. The class encourages you to let go of comparing yourself to your peers, as different people need different things. You explore your underlying values and what you find most important in life. You consider the level of meaning you need in your work, as well as how much you care about money, status, fame, independence, connection, and creativity. The class introduces you to the concept of "flow," the feeling you get when engaging in activities that provide ideal levels of challenge and mastery. By designing lives and careers that promote flow states, you will be most likely to thrive and not merely succeed. Indeed, it is important not to design a life that appears successful but feels miserable. Your choice of a romantic partner can also have huge implications for the trajectory of your life. The class helps you to identify typical traps, such as staying with someone who is a bad match, and discusses how to make constructive relationship choices. Ultimately, as there are likely multiple valid life and career paths for you to take, you identify and develop three different plans that feel authentic and inspiring to you. Adjunct Instructor Bio: Dr. Johnson received his B.A. from Williams College, his Ph.D. in clinical psychology from Yale University, and is a Clinical Associate Professor at Brown University. He has taught this Winter Study for the last two years and deeply enjoys mentoring students around career issues.

Class Format: mornings

Class Format: independent study

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to juniors and seniors

Materials/Lab Fee: cost of book(s)

Winter 2019
PSYC 12 (W) Alcohol 101: Examining and Navigating the College Drinking Scene

Seventy-two percent of college students report that they used alcohol at least once within the past 30 days. Where is the line between fun and danger? This course will examine the realities of the role of alcohol in the social lives of college students. Students will engage in active discussions of readings, videos, and myths vs. facts, as well as personal observations and opinions. Class structure will involve 3-hour classes that meet twice weekly. Participants will learn scientific facts about alcohol, including how it gets metabolized in the body differently in men and women, and how to recognize and respond to the signs of alcohol poisoning. Films will include evocative footage and interviews, such as "College Binge Drinking and Sober Reflections." We will hear from an expert in trauma and sexual assault and explore the significant role of alcohol in sexual assault on college campuses. We will discuss alcohol-related medical emergencies and problem-solve strategies to stay safe when choosing to use alcohol. Statistical data from colleges here in the Northeast will be reviewed, including survey results from the Core Institute and the Harvard School of Public Health Alcohol study. The course culminates in a final peer education presentation each student develops over the first 3 weeks through independent study outside of class on a related topic of their own choosing approved by the instructor.

Class Format: afternoons

Requirements/Evaluation: 5-page paper; final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: permission of instructor

Materials/Lab Fee: cost of books

PSYC 13 (W) Practical Preparation for Work After Williams: Standing Out Instead of Fitting In!

Crosslistings: LEAD13 / PSYC13

Secondary Crosslisting

Students will dramatically enhance and expand their own practical professional competencies and personal attributes by gaining specific skills valuable and relevant for success in the real-world of work! Dynamic sessions are conducted by an exceptionally accomplished instructor focusing on character, interpersonal astuteness, communicating skills, leading effective change, financial statement literacy, decision-making under pressure, and thinking critically about and acting intentionally for personal development. Knowledge is transferred in the classroom through fast-paced, concise student-led discussion, live interaction with seven world-class guest speakers, individual communications exercises, role-playing, and personal one-on-one mentoring by the instructor. Preparing for productive class discussions and participation requires reading three short books (The Headmaster; Killer Angels; Breaking Through) and various articles, watching selected videos, understanding material provided in a subject matter guidebook, completing a private Birkman assessment online, as well understanding wide-ranging human performance though an encapsulated case study of the people at the Battle of Gettysburg. Benefits realized by students from all classes can be applied to any enterprise, including business, entrepreneurial initiatives, education, non-profits, and public sector governmental service. Students prepare a 5-page paper on a topic of their choosing that is work-shopped in a tutorial peer evaluation format prior to submission to the instructor. A one-page personal development action plan is also prepared that remains confidential between the student and the instructor in order to provide private individual mentoring and coaching. Class meetings are conducted with lots of fun starting in mid-morning for 1 hour and 45 minutes Monday through Thursday during Winter Study with an estimated three hours of daily preparation (about 20 hours per week) necessary by each student in order to take ownership for achieving and enjoying the full learning experience. Course Daily Agenda: http://www.intersolvegroup.com/wp-content/uploads/WilliamsWinterStudyAgenda2019.pdf Adjunct Instructor Bio: http://www.intersolvegroup.com/leadership-profile/

Class Format: Monday through Thursday 10-11:50 AM

Requirements/Evaluation: class participation based on materials provided for daily preparation, a 5-page paper reviewed in a tutorial peer format and evaluated by the instructor, and a one-page personal development action plan

Prerequisites: the only prerequisite is a keen and purposeful desire to learn and develop oneself through a practical applied experience

Enrollment Limit: 12

Enrollment Preferences: diversity and inclusion of geographic, economic and social background will be considered in order to assemble a spirited
PSYC 14 (W) JA SelCom: A Case Study in Selection Processes
This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in selection? These are just a few of the questions that we will seek to understand through guest speakers from The Davis Center, Psychology Department, Admissions, and the Career Center. The majority of the time will be dedicated towards applying these ideas in selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality.

Class Format: mornings and afternoons
Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: preference given to sophomores and admission is based on quality of the application
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01  TBA  Edward R McPherson

PSYC 15 (W) Ephquilts! An Introduction to Traditional Quilting
This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student’s choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: *Pieces of the Past* by Nancy J. Martin; *Stitching Memories: African-American Story Quilts* by Eva Ungar Grudin; *Sunshine and Shadow: The Amish and Their Quilts* by Phyllis Haders; *A People and Their Quilts* by John Rice Irwin; *Treasury of American Quilts* by Cyril Nelson and Carter Houck; *The Quilt: New Directions for an American Tradition*, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

Class Format: afternoons
Requirements/Evaluation: formal public exhibit
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: preference given to seniors, juniors, first years
Materials/Lab Fee: cost to student $250
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01  TBA  David C. Johnson
PSYC 16 (W) Self Compassion: The Benefits and Challenges

Ever put yourself down when things aren't going well? Offering yourself compassion is often recommended by therapists and is a skill taught in some modes of therapy. What is the basis for this recommendation? How is self-compassion put into practice? What makes it so challenging? You will learn about the elements of self-compassion, explore and experience different ways of offering yourself compassion, and discuss your experiences. You will look at ways that self-compassion can positively impact your mental health, your work, your play, and your relationships. You will be taught self-compassion skills, including mindfulness practices and recognizing and challenging negative self-talk, among others. You will be asked to practice these skills between classes, do some reading, and reflect on your experiences. Adjunct Instructor Bio: Becky is a licensed clinical social worker. She has worked as a psychotherapist with Integrative Wellbeing Services here at Williams since 2014. She has explored the topics of compassion and self-compassion both professionally and personally.

Class Format: mornings and afternoons

Requirements/Evaluation: one 2- to 3-page reflection paper will be due each week; a weekly log of mindfulness activities will also be kept and submitted

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: random selection if over-enrolled

Materials/Lab Fee: $10

Winter 2019
LEC Section: 01 TBA Becky Crane

PSYC 17 (W) "Cultural Cliteracy": Introduction to Transformative Sexuality Education

This course will introduce students to transformative sexuality education. Transformative sexuality education assumes students will experience major shifts in their sexual knowledge, attitudes, and behaviors. Undergraduates commonly report inadequate sex education in high school, concern that students are sexually harassed, assaulted, or raped during their four years in residence and that little opportunity exists on campus for students to talk with each other candidly about sexual issues. The course is designed to improve the sexual culture on the Williams College campus by expanding knowledge, fostering skills, and providing opportunities for intergroup dialogue. Students will explore topics such as communication and sexual communication, gender diversity, enthusiastic consent, pleasure in and out of committed relationships, hookup culture, models of sexual functioning, BDSM/kink culture, and sexual identity. Topics will be examined through an intersectional lens. A variety of methods will help engage students with course material. Lectures by the instructors, large and small group discussions, role-plays, practice of empathy, intimacy, interviewing skills, reading literary fiction, DVD screenings, anonymous class surveys, and taking sexual histories promote students' learning. Sexually explicit material is used in this course, following trauma-informed practices and guidelines specifying best pedagogical practices. Each class session is designed to create activities that will lead students to achieve at least three learning objectives. Evaluation will be based on submission of a journal entry related to each class session and a journal entry related to a reading/movie due each class session. Students will submit a final paper and creative project. Attendance and participation are crucial to successful completion of this course.

Class Format: afternoons

Requirements/Evaluation: class attendance and participation; 5-page paper; 2- to 3-page paper; final project

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores and juniors will be given priority

Materials/Lab Fee: cost of books

Winter 2019
LEC Section: 01 TBA Paul D. Gitterman, Ruby T. Solomon

PSYC 18 (W) Call In Walk In training for Peer Health

Crosslistings: PSYC18 / SPEC18

Secondary Crosslisting
This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.

**Class Format:** mornings

**Requirements/Evaluation:** final project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** current active members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health

**Materials/Lab Fee:** none

Winter 2019

LEC Section: 01  TBA  Laini Sporbert

**PSYC 21 (W) Psychology Internships**

Would you like to explore applications of psychology in the “real world?” This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or other setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

**Class Format:** by appointment

**Requirements/Evaluation:** evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

**Prerequisites:** approval by Noah Sandstrom is required

**Enrollment Limit:** 20

**Enrollment Preferences:** random selection

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01  TBA  Noah J. Sandstrom

**PSYC 22 (W) Introduction to Research in Psychology**

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be.

**Class Format:** determined by faculty/research

**Requirements/Evaluation:** evaluation will be based on the quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project
Prerequisites: permission of faculty mentor
Enrollment Limit: POI
Enrollment Preferences: selection will be based on evaluation of departmental application and number of faculty available as mentors
Materials/Lab Fee: none

Winter 2019

REL 12 (W) The Mumonkan and Tathagata Zen: An Exploration of Mind
Zen is the sect of Buddhism that stresses experience overall cognitive formulas and principles. Based on the tenet that all beings have what is called Buddha Nature, practice is entered into with the faith than one can have exactly the same experience that the historical Buddha, Shakyamuni, had and can thereby come to know the process that constitutes the nature of all beings and things that comprise the universe. The primary method of practice is the meditative technique known as zazen, and the type of Zen that focuses on the consciousness that develops from diligent zazen practice is known as Tathagata Zen. Through one's efforts in zazen, one may come to the intuitive experience of the Dharma Activity, the activity that gives birth to all things and into which all things return. Although the Dharma Activity cannot be described fully in words, it is possible to use words that point to it without running afoul of its truth. The Mumonkan (The Gateless Gate) is a classic Zen text containing 48 such pointers or koans. Utilizing this text as a focus of discussion, students will attempt to grasp the teaching contained in these pointers by means of the principles of Tathagata Zen. The practice of zazen will be part of each class, and the course will culminate in a two-day zen retreat. Those taking the course will keep a daily journal of their course-related experiences which will be reviewed by the instructor. They will also write a series of short papers on selected koan from The Mumonkan. The course will meet from 9am--Noon on Monday, Wednesday and Friday. Anyone wishing to take this course must submit a paragraph stating their purpose for doing so. Up to ten students will be accepted for this course and all are eligible, including those who have taken a prior Winter Study Zen course taught by this instructor. Adjunct Instructor Bio: Williams ’62. Retired psychiatrist. Zen practitioner for 48 years,17 as a monk.
Class Format: mornings
Requirements/Evaluation: journal review; four 2-page papers
Prerequisites: submission of a paragraph stating purpose in taking this course
REL 14 (W) Mountain Religion

Sacred mountains play a central role in the founding myths of many religious traditions. Mountains such as Sinai, Olympus, and Kailash are considered divine abodes, entry into which confers spiritual powers. For many religious practitioners, pilgrimage to and practicing in and around the mountains provides a special opportunity to encounter the gods and acquire spiritual benefits. In this comparative course, we will explore the special role and function of mountains in Buddhism, Hinduism, Judaism, and Islam, with a special focus on contemplative practices from Japan's Shugendo tradition and the kaiho-gyo nighttime hikes of Tendai monks, circumambulation of Himalayan peaks and mantra recitation, and pilgrimage journeys. Class will meet for three 2-hour sessions per week. Readings will consist mostly of journal articles and selections from books, with a 5-page reflective paper due at the end of the course. Depending on the weather, we will take advantage of the surrounding mountains for short contemplative hikes, applying some of the practices we will study.

Class Format: mornings
Requirements/Evaluation: 5-page paper
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: lottery
Materials/Lab Fee: $75
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA James H. Gordon

REL 17 (W) How to Write Auto-Fiction

Crosslistings: REL17 / ENGL17

You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, "Fiction" and "Non-Fiction"-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

Class Format: afternoons
Requirements/Evaluation: two stories (10-20 pages) and two revisions (10-20 pages)
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: email explaining reasons for interest in the course to Dalena.Storm@gmail.com
REL 18 (W) Rare Bibles of Chapin Library
What does a Bible from 1462 feel like? Smell like? In this course, students will touch, smell, and examine early and rare Bibles from the world-class collection of Bibles housed in Williams's own Chapin Library. Highlights of the collection include multiple significant 15th and 16th century Bibles, as well as a 1611 King James Bible. Through class readings and discussions, as well as a small research project, students will learn about the history of the book, the history of the Bible as a book, and the specific histories of one or more rare Chapin Bibles of their choosing. The major project for the course will be for students to experiment with and curate a Twitter account and course website as online exhibits of the 'rare and wondrous' Bibles of Chapin Library.

Class Format: afternoons

Requirements/Evaluation: the major project for the course will be for students to experiment with and curate a Twitter account and course website as online exhibits of the 'rare and wondrous' Bibles of Chapin Library

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Religion majors first, then History majors, then seniority (seniors, then juniors, etc.)

Materials/Lab Fee: cost of books

REL 24 (W) Touring Black Religion in the 'New' South
Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting
In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Tallieveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

Class Format: travel

Requirements/Evaluation: based on an electronic field journal, participation in weekly colloquies, and an oral presentation

Prerequisites: none; not open to first-year students

Enrollment Limit: 8

Enrollment Preferences: majors and concentrators in Africana Studies, Religion, and Environmental Studies; students with a background in ethnographic methods; application essays and interviews
REL 25 (W) Yoga and Meditation in India: Theory and Practice
This course delves into the theory and practice of both Hindu and Buddhist yoga in their land of origin, India. In the first half, we stay in the North Indian town of Rishikesh, one of the main centers of Hindu yoga today, located on the banks of the Ganges River. There we practice yoga and meditation daily, study yoga philosophy, and visit leading yoga centers. In addition, we volunteer daily at Mother Miracle Community Development Program, where a K-12 school is dedicated to teaching exceptionally intelligent poor children. In the second part of the course, we travel to South India and stay at Sera Je Monastic University, the largest center of Tibetan Buddhist monastic learning in India. There we continue our daily practice of yoga and meditation, and study with a Tibetan monastic scholar the theory of Tibetan Buddhism. In the afternoons students volunteer with Tibetan students and visit Tibetan service organizations in the area. In this way we gain a solid overview of the practice of yoga and meditation in India. We come to appreciate and learn from the people upholding the living traditions of yoga, as well as helping these people to strengthen the education that will allow them to interact with the global world. Required Reading: The Path to Enlightenment by The Dalai Lama; Yoga and the Luminous: Patanjali's Spiritual Path to Freedom by Christopher Key Chapple; selected articles about yoga and contemporary yoga exchanges. Adjunct Co-Instructor Bio: Tasha Judson, M.Ed., is a certified alignment oriented Hatha yoga teacher and authorized meditation teacher. She has directed Tasha Yoga studio in Williamstown since 2003.

Class Format: travel
Requirements/Evaluation: 10-page paper; daily journal
Prerequisites: none; not open to first-year students
Enrollment Limit: 10
Enrollment Preferences: interview
Materials/Lab Fee: $3,327
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

REL 30 (W) Senior Project: Religion
An advanced course for senior Religion majors (who are not writing theses) to further develop their senior seminar paper into a polished 25 page research paper (which will also be the focus of a brown-bag presentation during the spring semester). The course will help the students with general research methods, workshopping, paper writing, and presentation practice.

Class Format: senior project

REL 31 (W) Senior Thesis: Religion
Religion senior thesis.

Class Format: thesis
Distributions: (D2)
REL 99 (W) Independent Study: Religion
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Distributions: (D2)

Winter 2019

RLFR 13 (W) Creative Portraiture in the Darkroom
Crosslistings: ARTS13 / RLFR13
Primary Crosslisting
In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

Class Format: mornings
Requirements/Evaluation: 2- to 3-page paper; formal public exhibit
Prerequisites: knowledge of black and white analog photography is preferred, but not required
Enrollment Limit: 10
Enrollment Preferences: Art major and minors then random
Materials/Lab Fee: $120
Attributes: EXPE Experiential Education Courses

RLSP 16 (W) The Ayn Rand Cult

Crosslistings: COMP16 / ANSO16 / RLSP16

Primary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

Prerequisites: some previous acquaintance with Rand's novels

Enrollment Limit: 30

Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)

Materials/Lab Fee: approximately $90 for books
Distributions: (D1)

**RUSS 11 (W) Queer Russia**
Crosslistings: RUSS11 / WGSS11 / COMP11
**Primary Crosslisting**
A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country’s queer citizens have become the despised Other under Putin. Knowledge of Russian is not required.
All readings will be in English, and all films will include English subtitles.
**Class Format:** afternoons
**Requirements/Evaluation:** completion of reading and viewing assignments, attendance in class, active participation in discussions, and completion of a collaborative project with other members of the class
RUSS 16 (W) Russian Spies in DC: FX's "The Americans"
From the beginning of the Cold War to the present, the presence of Russian intelligence operatives in the nation's capital has been the subject of fascination and speculation. In this course, we will examine the FX channel's series The Americans, in light of both the popular imaginary about Russian spies in the United States and the actual history of intelligence wars in Washington. How does the series represent the lives of Russian political and intelligence operatives during the Reagan presidency, and how does it interpret the larger events of the Cold War in its final decade? Readings will draw from accounts on both side of the Cold War, focusing on signature developments such as Jewish immigration from the Soviet Union, the covert biological weapons programs, and Soviet attempts to build relations with progressive movements in the United States. Adjunct Instructor Bio: Alexandar Mihailovic has taught at Bennington College, Williams College, and Brown and Columbia Universities. His books include "Corporeal Words: Mikhail Bakhtin's Theology of Discourse," "Mitki: The Art of Postmodern Protest in Russia", and the edited volume "Tchaikovsky and His Contemporaries: A Centenary Symposium." He has also published articles about cultural relations during the Cold War, African-American studies, art history, and cinema studies.

Class Format: mornings
Requirements/Evaluation: class participation and presentations, and a final 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: none

RUSS 25 (W) Williams in Georgia
Crosslistings: RUSS25 / SPEC25
Primary Crosslisting
Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course.

Materials/Lab Fee: $2785

When you look at a photograph, what is it really saying? How can you make photographs that say what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week—Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

Requirements/Evaluation: final project; formal public exhibit

Prerequisites: none, but students must own or borrow a digital camera (a DSLR with a 35mm lens is ideal, but compact cameras will also work)

Enrollment Limit: 12

Enrollment Preferences: students can email me

Materials/Lab Fee: $0

SPEC 10 (W) Counseling Skills Intensive
Are you the person your friends turn to for support? Good listening and communication skills are of benefit to everyone, but particularly for students with support responsibilities and those interested in helping professions. This course will prepare you to be a better listener and more effective, confident communicator. Develop a deeper sense of presence to help others feel more at ease with sharing, facilitate decision-making and problem-solving using validation and active listening skills, and learn effective strategies and boundaries appropriate to more urgent situations. We will practice fundamental counseling skills, learn about factors influencing our own communication styles and the roles we gravitate toward in our
relationships with others. You will learn how to communicate about sensitive issues and find your own style in helping roles. Emphasis will be given to understanding one's limits within a given situation, knowing when to refer to other resources, and what resources are available to students. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings, journaling, and out of class exercises designed to deepen your understanding and practice. Adjunct Instructor Bio: Karen Theiling is a psychotherapist at Williams College where she has provided counseling to students since 2000. She is a licensed mental health counselor whose particular interests include trauma, gender and sexuality, Dialectical Behavior Therapy and outreach of all kinds. Adjunct Co-Instructor Bio: Laini Sporbert is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and has been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

Class Format: afternoons

Requirements/Evaluation: evaluation is based on participation, attendance, and the 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: reverse seniority on campus

SPEC 11 (W) Audio Stories about Food Sovereignty, Farmworker Justice, Climate Change & Farm Viability

How do New England food producers approach issues of justice and climate change while maintaining viable businesses? In this course students will interview farmers and food entrepreneurs and weave those interviews into compelling audio stories for a wide variety of audiences. Students will study interviewing, storytelling, and podcasting best practices and will use what they learn to create interesting podcasts that are both rich in content and in sound. Guiding questions will include: How do farmers view their role on issues of justice and climate change? What are they currently doing to make an impact on these issues? What opportunities and challenges lay ahead for them related to these issues? How does one tell a story in a way that is universal or at least relevant to one's intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? In partnership with the Massachusetts chapter of the Northeast Organic Farming Association (NOFA Mass), the class as a whole will attend the NOFA Mass Winter Conference at Worcester State University on Saturday January 12 and will conduct initial interviews there with presenters and attendees. Informative and impressive podcast creations will be used as resources on the NOFA website, the Williams sustainability website, and will be posted to Stitcher, iTunes, and Soundcloud. A number of assignments will involve listening to and critically analyzing podcasts. Our time together will be a combination of learning about various farming issues in Massachusetts, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College. Prior to working at Williams, he was the associate director of Utahns Against Hunger and founded and directed Real Food Rising, a youth-empowerment sustainable farming program.

Class Format: mornings

Requirements/Evaluation: evaluation will be based on participation, two short essays, and a final project
Prerequisites: none
Enrollment Limit: 11
Enrollment Preferences: preference will be given to sophomores and juniors and the need to create a group that is diverse in terms of majors and interests
Materials/Lab Fee: $85 plus cost of books

Winter 2019
LEC Section: 01    TBA    Mike A. Evans

SPEC 12 (W) What's Advertising and Why Should We Care About It?

Admittedly, only a handful of Williams students will enter the advertising business, especially the classic Madison Avenue version of it. On the other hand, an appreciable percentage of graduates will join fields where some form of advertising and promotion is a critical but complicated success factor, whether in NGOs, business, non-profit organizations or startup ventures. The proposed course is a high level view of one of the most important
levers in society today. In one form or another, advertising influences not just our purchase decisions but also (and increasingly) politics, public policy, use of social media and a host of cultural issues, including perceptions about diversity, gender and the role of women in society. This course teaches how insights, strategy and positioning come to creative life, are assessed and how they percolate through brand experience and within the organization. We will consider why and how marketers align themselves with different demographic and age groups creatively and how they build positive perception. It will also help students understand why--after all the metrics and analysis and research--a brilliant creative idea is worth its weight in gold. The course is intended as an overview and will necessarily proceed at a rapid pace. Course content will be a mix of case studies, examples drawn from the current marketing world and original research by students. Where appropriate and possible, guest speakers will be invited in order to provide particular insight or participate in debate. The final project presentation will ask student teams to ‘reverse engineer’ the observed advertising and communications strategies of a marketer (broadly defined) using publicly available data and course materials. The course would meet twice per week in three hour sessions. Out-of-class expectations are approximately 10 hours/class in research, writing and group work projects.

Adjunct Instructor Bio: Steve Harty worked in advertising for 30 years, spanning developments such as the launch of cable networks, interactive and digital platforms and into today’s highly diversified communications environment. He was CEO or Chairman for four firms and served clients such as American Express, Johnnie Walker, Axe deodorant, Cadillac, Verizon, IBM and Miller Lite. He helped launch jetBlue Airlines, Ally Bank and the Voom HDTV service. He is a 1973 graduate of Williams and a trustee emeritus.

Class Format: mornings
Requirements/Evaluation: short written assignments weekly; final presentation prepared in teams and presented to class
Prerequisites: none
Enrollment Limit: 16-20
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $10 plus cost of books

Winter 2019
LEC Section: 01 TBA Steve Harty

SPEC 13 (W) Cooking for the Real World
Crosslistings: PHYS15 / SPEC13
Secondary Crosslisting
The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You’ll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac ‘n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: Kitchen Confidential, by Anthony Bourdain, The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America’s Most Imaginative Chefs, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

Class Format: MWF 3-5:30pm
Requirements/Evaluation: daily journal and a final cooking demonstration
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: limited to juniors and seniors but would like an email from the students applying on what food means to them
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01

SPEC 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy
Crosslistings: MATH15 / SPEC15
Secondary Crosslisting
Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

Class Format: mornings

Requirements/Evaluation: 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

Extra Info: the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

Materials/Lab Fee: $20 plus cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01

SPEC 18 (W) Call In Walk In training for Peer Health

Crosslistings: PSYC18 / SPEC18

Primary Crosslisting

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.

Class Format: mornings

Requirements/Evaluation: final project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: current active members of Peer Health will be chosen first; other students will be enrolled based on stated commitment to Peer Health

Materials/Lab Fee: none

Winter 2019
LEC Section: 01   TBA   Laini Sporbert

SPEC 19 (W) Healthcare Internships
Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which healthcare is delivered. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus—first from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions (3) will focus on "substance abuse" as a thematic construct for the discussion of related chronic and acute conditions frequently encountered in clinical and social/behavioral contexts. The thematic focus on substance abuse will allow students to reflect on their clinical experiences across a wide range of clinical specialties and also to engage in discussion of a public health crisis affecting quality of life across the lifespans of Berkshires residents. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions. Students will also demonstrate an enhanced awareness of the systems through which medical care is delivered and the challenges of health care delivery within a rural community. Students will also be expected to reflect on their clinical experiences through didactic sessions and case presentations, as well as in a final paper.   

Adjunct Instructor Bio: Barbara Fuller is the Director of Science and Health Professions Advising.

Class Format: Students are shadowing healthcare providers for 20-25 hours per week.

Requirements/Evaluation: 10-page paper

Prerequisites: must be at least a sophomore, on the "premedical" track, and in good standing

Enrollment Limit: 30-35

Enrollment Preferences: seniors have preference

Materials/Lab Fee: none

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Barbara K. Fuller

SPEC 21 (W) Experience the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parents acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Students will be required to read one of two books selected for this course. There will also be reading selected from such works as What Should I do with My Life? by Po Bronson, 2003 and Working by Studs Terkel, 2004. Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific internships listed in the SPEC 21 syllabus. Application are submitted via Handshake.

Class Format: At least 30 hours per week, 5 days per week, 6 hours per day

Requirements/Evaluation: completion of readings, daily journal, and a 5- to 7-page expository review and evaluation that will become public record as a resource for other students

Prerequisites: qualifications for internships

Enrollment Preferences: placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

Winter 2019
SPEC 22 (W) Outdoor Emergency Care

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development. 2. CPR for the Professional Rescuer. 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques. Specifically, the course teaches how to recognize and provide emergency medical care for: Wounds and Burns; Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion); Musculoskeletal Trauma (e.g., breaks, sprains, etc.); Shock, Respiratory, Poisoning, Substance abuse emergencies; Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 16 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Thomas Feist ('85) is a 35-year ski patroller, certified OEC Instructor and Instructor Trainer. He has taught chemistry at Williams College and served as acting director of the Williams Outing Club in 1990-91.

Class Format: mornings

Requirements/Evaluation: final written and practical exam

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: ski/snowboard interest and ability as well as prior first aid experience

Materials/Lab Fee: $175 plus cost of textbook (~$100)

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Thomas P. Feist

SPEC 23 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change

Liberal Arts for Epic Challenges is an introduction to the techniques of design thinking to help liberal arts students gain the necessary skills and confidence to tackle complex social and economic problems: attention to the human dimensions of problems and solutions, creative confidence, risk taking, learning from failure, effective collaboration, and story-telling. Design thinking has become an increasingly prevalent approach in encouraging innovative solutions among start-ups, corporations repositioning themselves, government agencies seeking to improve their citizen services, and NGOs addressing major social problems like rural health care. This winter study course will expose students to the tools of design thinking and then will take on several challenges selected by the students. Students will undertake the research phase in Williamstown, then go to the IBM Design Studio in Austin, Texas (or a similar consulting firm design lab) for the ideation phase in collaboration with designers at IBM and Watson, using the same facilities that IBM design thinkers use. Solving truly difficult problems facing society in the 21st century requires a purposeful approach that draws on a full range of the experiences and perspectives of those who have studied the liberal arts. Only with the advantage of those with an understanding of the social sciences, physical sciences, arts, and humanities provide a sensitivity to both the dimensions of difficult problems and how to address them for human-centered solutions. There will be two 3 hours workshops in the afternoons when in Williamstown. All day in the Design Studio in Austin for 3 days. Light reading, but necessary team meetings between classes.

Class Format: travel

Requirements/Evaluation: based on observation of active constructive participation in team efforts and evaluating a final team presentation for relevance,

Extra Info: sensitivity to human-centered concerns, completeness, effective communication, and realistic probability of success, all of which will be documented in an electronic field journal

Prerequisites: interested students must attend an informational meeting and submit a short essay about their interest in the course
SPEC 24 (W) Transformative Moments in the Education of a Preschool Child

This course will provide an opportunity for immersion in the life of a preschool community in the Bronx. Future of America Learning Center (FALC) is a nationally-accredited program that is recognized for its quality and standard of excellence in the field of Early Childhood Education. Students from varied educational institutions, teachers and instructional coaches are recommended by the Department of Education to visit FALC's classrooms to observe, experience and learn about the Plant-a-Dream curriculum. Winter Study students will actively participate in the daily classroom activities with the children in order to develop a sense of best practices in Early Childhood Education. Students will live with families whose children are in the program, in the model of Gaudino's experiential learning, to access a deeper sense of context and a better understanding of the issues facing children and families from this community. Opportunities for dialogue between families, staff, and students, will also be central to the learning experience. Furthermore, our mentors will guide students in robust self-reflection, as well as inquiry into the environment in which they are immersed, and the personal meaning derived from these experiences. More information about FALC and the course mentors can be found at https://goo.gl/PEJsoq.

Requirements/Evaluation: 5-page summary paper, daily journal
Prerequisites: none
Enrollment Limit: 4
Enrollment Preferences: by interview
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

LEC Section: 01

SPEC 25 (W) Williams in Georgia

Crosslistings: RUSS25 / SPEC25

Secondary Crosslisting

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course
SPEC 26 (W) Field Work in a Bay Area Start-Up
This course is designed to give students insight into how technology start-ups work and well as a chance to practice their problem-solving skills and gain deeper insight into the customer discovery process. The course will start in Williamstown with a review of idea development tools used in today's start-up environment, particularly those pioneered by Stanford d.School such as the Lean Start-up method, Business Model Canvas and Design Thinking. Reading will include The Lean Start-up by Eric Ries, Zero to One by Peter Thiel and Edward deBono's Thinking Course as well as articles and podcasts. The class will be split into three teams of four students and paired with a Bay Area start-up looking to enter a new market, a new customer segment or are considering certain product modifications. The student teams will work on identifying customer needs, qualifying customer feedback and making recommendations to management. The class will tap into the strong Bay Area alumni network which will allow for visits to several different start-ups and fast-growing tech companies and compare how they approach their markets. The final project will be a ten-minute presentation to management. Student should submit a short statement of why they would like to participate and what they expect to learn. Adjunct Instructor Bio: Entrepreneur-in-Residence at Williams.

Class Format: travel
Requirements/Evaluation: 5-page paper; final project; short summaries of customer interactions
Prerequisites: none; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: preference will be given to students with a demonstrated interest in entrepreneurship
Materials/Lab Fee: $2,800
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

SPEC 27 (W) Social Justice, Activism, and Advocacy in New York City
This 2019 Winter Study course examines social justice advocacy and activism in New York City's nonprofit organizations, churches, and private and public universities. The focus is on antiviolence and human rights initiatives based in New York City's institutions that shape the perspectives not only of the city but influence debates about democratic values and political perspectives throughout the nation and the world. Students would work with non-profit and advocacy organizations such as the Social Justice Committee of Trinity Luther Church (TLC) Immigrants Rights Coalition; and ConnectNYC , a Harlem-based non-profit that works city-wide to end domestic, social, and religious violence. For three weeks in the city students would attend forums on social justice, anti-racism/feminist/lgbtq rights at Barnard; Columbia University; City College, and CUNY Graduate Center. The three weeks in NYC focus on three overlapping themes central to social justice advocacy: domestic/family safety; community values in policing and citizen's and prisoners' rights; immigration and human rights.

Class Format: travel
Requirements/Evaluation: daily journal; volunteer with one of the participating non-profits to assist in digital or community outreach and organizing for 3-4 hours daily;
Extra Info: attend a weekly educational event(s) at city universities or nonprofits; attend a mini-seminar to discuss readings and experiential learning;
Extra Info 2: write a 10-page analytical paper at the conclusion of the winter study evaluating political trends in each of the three areas; attend a community council meeting at the 24th Precinct in Manhattan (West 100th St.).
Prerequisites: not open to first-year students
Enrollment Limit: 4
Enrollment Preferences: interview with the instructor
SPEC 28 (W)  Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship
Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper
Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: statement of interest
Materials/Lab Fee: $400
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01    TBA     Tracy Finnegan

SPEC 29 (W) The "Television" Industry: Legal, Business and Policy Issues in the Distribution of Video Content

This course will explore how video content is distributed in the United States and examine how a business deal to do so may actually take shape. Topics may include the history of television, various business models used to distribute video content to consumers, governmental policy and regulatory impacts on the television business, contract law and its application to video content distribution, and negotiation theory and practice. Students will explore the various ways video content is distributed, how content owners and distributors make money, the relationship between content ownership and distribution, and how the industry is changing. The course will provide students with a basic introduction to contract law and explore a video content distribution agreement in detail. Students will be expected to read articles from the trade press on a daily basis, lead and participate in class discussions, debates and negotiation case studies, analyze legal opinions, read and dissect a video distribution agreement, and, yes, watch "television." The class will culminate in students working in teams to negotiate and draft a video distribution agreement. Class is expected to meet for 6-8 hours per week. Adjunct Instructor Bio: Robert Goldstein has practiced law for over twenty years, the most recent fifteen of which have been in the television industry. He has been the General Counsel for a privately-held telecommunications venture, worked in-house at a Fortune 500 media company, and represented a wide range of communications companies in various stages of development.

Class Format: two consecutive midweek class days
Requirements/Evaluation: final project; class participation
Prerequisites: students will be asked to write 1-2 sentences about why they want to take the class
Enrollment Limit: 10
Materials/Lab Fee: none

Winter 2019
LEC Section: 01    TBA     Bobby Goldstein
SPEC 35 (W) Making Pottery on the Potter's Wheel

Learning to form pottery shapes with your hands on the potter's wheel is challenging but accessible to any student who invests time and effort. This is a very old-fashioned skill--archaeologists tell us pottery wheel skills were widespread in world culture by 3000 BCE. YouTube videos will not help you learn the subtle hand positions and pressures needed to succeed in shaping symmetrical pleasing forms. A teacher/coach will help you understand and learn these skills, but it is up to you to apply yourself with repeated practice, patience and persistence. Each class will begin with an explanatory demonstration followed by student practice on the potter's wheel. Woven into pottery making demonstrations will be presentations, in response to student interest, on various topics relating to the science and history of pottery making. Every student will have exclusive use of a potter's wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, lids, spouts, and knobs. We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The eleventh meeting will be devoted to glazing your biscuit pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project positive-orientation critique" in the studio of your finished work. Adjunct Instructor Bio: Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

Class Format: mornings, 9am-12pm; plus 1 afternoon powerpoint slide presentation, and 1 final 1-hour critique session early in the spring semester at times to be arranged

Requirements/Evaluation: attendance at all class sessions and enthusiasm for learning the craft of pottery making

Prerequisites: none

Enrollment Limit: 9

Enrollment Preferences: discretion of the instructor

Materials/Lab Fee: $385

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

SPEC 39 (W) Composing A Life: Finding Success and Balance in Life After Williams

"Composing a Life:" Finding Success and Balance in Life After Williams Description: To be at Williams you have experience as a successful student, but how do you learn to be successful in life? How will you define success in both your personal life and in your career? How will you achieve balance between the two? In short, what will constitute the "good life" for you? We borrow the concept of "composing a life" from Mary Catherine Bateson, as an apt metaphor for the ongoing process of defining success and balance in life. This course is designed: (1) To offer students an opportunity for self-reflection, as well as to examine and define their beliefs, values, and assumptions about their future personal and professional lives; (2) To encourage students to gain a better understanding of how culture, ideology, and opportunity affect their life choices; (3) To provide an opportunity for students to consider different models of success and balance through "living cases" (in the form of guests from various professions and lifestyles); and (4) To aid students in contemplating their own life/career options through individual advising and introducing various career and life planning resources. Using selected readings, cases, and guest speakers, we will explore both the public context of the workplace as well as the private context of individuals and their personal relationships in determining life choices. Weekly assignments include cases and readings from a variety of related fields, and some self-reflection exercises. Adjunct Instructor Bio: Geraldine Shen ’01 is a former management consultant, development officer, curriculum coordinator, and admissions officer who currently leads a community non-profit organization in Williamstown. Adjunct Co-Instructor Bio: Joe Bergeron ’01 is a technology consultant, entrepreneur, and software developer.

Class Format: mornings

Requirements/Evaluation: regular attendance, class participation, field interview, and a 10-page final paper

Prerequisites: none

Enrollment Limit: 15
**Enrollment Preferences:** preference to juniors and seniors

**SPEC 99 (W)  Independent Study: Special**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Winter 2019**

**IND Section:** 01

**STAT 12 (W)  writing sample and brief application**

Crosslistings: MUS12 / STAT12

**Primary Crosslisting**

*The Sacred Harp* is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country-and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in *The Sacred Harp*; or to undertake a quantitative analysis of the tunebook’s music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

**Requirements/Evaluation:** 10-page paper; final project; musical composition with commentary

**Prerequisites:** some previous singing or music-reading experience helpful

**Enrollment Limit:** 30

**Enrollment Preferences:** seniority

THEA 14 (W) Classic and Contemporary Musical Theater
Crosslistings: MUS14 / THEA14

Secondary Crosslisting
This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus--now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

Class Format: afternoons
Requirements/Evaluation: a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: the instructor will communicate with those wishing to register either in person or via email
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

THEA 15 (W) Shadow Puppetry
Crosslistings: ARTS15 / THEA15

Primary Crosslisting

The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, "It is in the very limitations of shadows that we learn...It is in the gap between the object and its representation that the image emerges, the gap we fill in." In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

Requirements/Evaluation: short presentations and works in progress

THEA 20 (W) Performing Self-Portraiture in the Age of Instagram

Crosslistings: AFR20 / THEA20 / WGSS20 / ARTS20

Primary Crosslisting

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacobly Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

WGSS 11 (W) Queer Russia
Crosslistings: RUSS11 / WGSS11 / COMP11

Secondary Crosslisting
A 2013 law banning “homosexual propaganda” represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia’s suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country’s evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country’s queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.
Class Format: afternoons
WGSS 15 (W) Plato’s Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting

Plato’s Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

Class Format: mornings

Requirements/Evaluation: 5-page paper and an in-class presentation of independent research
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: preference to Comparative Literature, Russian, and Women's, Gender, and Sexuality Studies majors
Materials/Lab Fee: $10 plus cost of books

Winter 2019
LEC Section: 01 TBA Julie A. Cassiday

WGSS 17 (W) Girl Meets World: Films from 5 Continents
Crosslistings: WGSS17 / PSCI18

Secondary Crosslisting

This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls' own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

Class Format: afternoons

Requirements/Evaluation: active class participation and either 3 policy memos (3-4 pages each) or one 10-page final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference to Political Science and WGSS majors
Materials/Lab Fee: cost of books
WGSS 18 (W) "The Transformation of Silence": Exploring Campus Sexual Violence Prevention and Response

Crosslistings: PHLH18 / WGSS18

Primary Crosslisting

Since 2011, student activism and federal guidance of dramatically changed how campuses address sexual violence. This class will explore response to and prevention of sexual violence on college campuses and more broadly, across topics related to gender and sexuality, race, constructs of accountability, and public health and social justice approaches to prevention. Class will be heavily comprised of interactive activities, along with reading, films, and reflective writing. Course will meet 3 days per week for 2 hours. Some outside of class work in the form of film viewing and attendance at talks. Adjunct Instructor Bio: Meg Bossong '05 is the Director of Sexual Assault Prevention and Response. Prior to returning to Williams, she was the Manager of Community Engagement for the Boston Area Rape Crisis Center, where she worked with community stakeholders in education, faith communities, medical and mental health care, law enforcement, and beyond on response and prevention initiatives.

Requirements/Evaluation: a 10-page final paper, along with Glo reflections

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: submission of a few sentence description indicating interest level in the course, preference to first years and sophomores

Materials/Lab Fee: none

WGSS 25 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated
areas of public health--especially HIV and AIDS--women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture with a female Prime Minister where women have created and continue to build cooperatively owned enterprises, a West African country that has consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even celebration of ethnic difference. Our hosts, ACI’s Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater. Requirements: Before we leave campus, each student will choose a particular focus for the trip, and do preliminary research to inform their visit--including comparative material about the US. Upon our return to campus we will meet to discuss our findings, and students will write 10-page papers drawing upon existing research as well as our conversations and experiences in Senegal.

Class Format: travel

Requirements/Evaluation: 10-page paper

Prerequisites: none; not open to first-year students

Enrollment Limit: 6

Enrollment Preferences: preference will be given to students with skills in French and a demonstrated interest in public health and/or women's economic empowerment

Materials/Lab Fee: $3,892

SPEC 10 (W) Counseling Skills Intensive
Are you the person your friends turn to for support? Good listening and communication skills are of benefit to everyone, but particularly for students with support responsibilities and those interested in helping professions. This course will prepare you to be a better listener and more effective, confident communicator. Develop a deeper sense of presence to help others feel more at ease with sharing, facilitate decision-making and problem-solving using validation and active listening skills, and learn effective strategies and boundaries appropriate to more urgent situations. We will practice fundamental counseling skills, learn about factors influencing our own communication styles and the roles we gravitate toward in our relationships with others. You will learn how to communicate about sensitive issues and find your own style in helping roles. Emphasis will be given to understanding one's limits within a given situation, knowing when to refer to other resources, and what resources are available to students. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings, journaling, and out of class exercises designed to deepen your understanding and practice. Adjunct Instructor Bio: Karen Theiling is psychotherapist at Williams College where she has provided counseling to students since 2000. She is a licensed mental health counselor whose particular interests include trauma, gender and sexuality, Dialectical Behavior Therapy and outreach of all kinds. Adjunct Co-Instructor Bio: Laini Sporbert is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and has been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

Class Format: afternoons
Requirements/Evaluation: evaluation is based on participation, attendance, and the 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: reverse seniority on campus
Materials/Lab Fee: none

SPEC 11 (W) Audio Stories about Food Sovereignty, Farmworker Justice, Climate Change & Farm Viability
How do New England food producers approach issues of justice and climate change while maintaining viable businesses? In this course students will interview farmers and food entrepreneurs and weave those interviews into compelling audio stories for a wide variety of audiences. Students will study interviewing, storytelling, and podcasting best practices and will use what they learn to create interesting podcasts that are both rich in content and in sound. Guiding questions will include: How do farmers view their role on issues of justice and climate change? What are they currently doing to make an impact on these issues? What opportunities and challenges lay ahead for them related to these issues? How does one tell a story in a way that is universal or at least relevant to one's intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? In partnership with the Massachusetts chapter of the Northeast Organic Farming Association (NOFA Mass), the class as a whole will attend the NOFA Mass Winter Conference at Worcester State University on Saturday January 12 and will conduct initial interviews there with presenters and attendees. Informative and impressive podcast creations will be used as resources on the NOFA website, the Williams sustainability website, and will be posted to Stitcher, iTunes, and Soundcloud. A number of assignments will involve listening to and critically analyzing podcasts. Our time together will be a combination of learning about various farming issues in Massachusetts, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College. Prior to working at Williams, he was the associate director of Utahns Against Hunger and founded and directed Real Food Rising, a youth-empowerment sustainable farming program.

Class Format: mornings
Requirements/Evaluation: evaluation will be based on participation, two short essays, and a final project
**Prerequisites:** none

**Enrollment Limit:** 11

**Enrollment Preferences:** preference will be given to sophomores and juniors and the need to create a group that is diverse in terms of majors and interests

**Materials/Lab Fee:** $85 plus cost of books

Winter 2019

LEC Section: 01 TBA Mike A. Evans

**SPEC 12 (W) What's Advertising and Why Should We Care About It?**

Admittedly, only a handful of Williams students will enter the advertising business, especially the classic Madison Avenue version of it. On the other hand, an appreciable percentage of graduates will join fields where some form of advertising and promotion is a critical but complicated success factor, whether in NGOs, business, non-profit organizations or startup ventures. The proposed course is a high level view of one of the most important levers in society today. In one form or another, advertising influences not just our purchase decisions but also (and increasingly) politics, public policy, use of social media and a host of cultural issues, including perceptions about diversity, gender and the role of women in society. This course teaches how insights, strategy and positioning come to creative life, are assessed and how they percolate through brand experience and within the organization. We will consider why and how marketers align themselves with different demographic and age groups creatively and how they build positive perception. It will also help students understand why--after all the metrics and analysis and research--a brilliant creative idea is worth its weight in gold. The course is intended as an overview and will necessarily proceed at a rapid pace. Course content will be a mix of case studies, examples drawn from the current marketing world and original research by students. Where appropriate and possible, guest speakers will be invited in order to provide particular insight or participate in debate. The final project presentation will ask student teams to ‘reverse engineer’ the observed advertising and communications strategies of a marketer (broadly defined) using publicly available data and course materials. The course would meet twice per week in three hour sessions. Out-of-class expectations are approximately 10 hours/class in research, writing and group work projects.

Adjunct Instructor Bio: Steve Harty worked in advertising for 30 years, spanning developments such as the launch of cable networks, interactive and digital platforms and into today’s highly diversified communications environment. He was CEO or Chairman for four firms and served clients such as American Express, Johnnie Walker, Axe deodorant, Cadillac, Verizon, IBM and Miller Lite. He helped launch jetBlue Airlines, Ally Bank and the Voom HDTV service. He is a 1973 graduate of Williams and a trustee emeritus.

**Class Format:** mornings

**Requirements/Evaluation:** short written assignments weekly; final presentation prepared in teams and presented to class

**Prerequisites:** none

**Enrollment Limit:** 16-20

**Enrollment Preferences:** discretion of the instructor

**Materials/Lab Fee:** $10 plus cost of books

Winter 2019

LEC Section: 01 TBA Steve Harty

**SPEC 13 (W) Cooking for the Real World**

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You’ll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac ‘n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: *Kitchen Confidential*, by Anthony Bourdain, *The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs*, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

**Class Format:** MWF 3-5:30pm

**Requirements/Evaluation:** daily journal and a final cooking demonstration
**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** limited to juniors and seniors but would like an email from the students applying on what food means to them

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

**SPEC 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy**

Crosslistings: MATH15 / SPEC15

Secondary Crosslisting

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

**Class Format:** mornings

**Requirements/Evaluation:** 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

**Extra Info:** the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

**Materials/Lab Fee:** $20 plus cost of books

**Attributes:** EXPE Experiential Education Courses

Winter 2019

LEC Section: 01

**SPEC 18 (W) Call In Walk In training for Peer Health**

Crosslistings: PSYC18 / SPEC18

**Primary Crosslisting**

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.
SPEC 19 (W) Healthcare Internships

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which healthcare is delivered. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions (3) will focus on "substance abuse" as a thematic construct for the discussion of related chronic and acute conditions frequently encountered in clinical and social/behavioral contexts. The thematic focus on substance abuse will allow students to reflect on their clinical experiences across a wide range of clinical specialties and also to engage in discussion of a public health crisis affecting quality of life across the lifespans of Berkshires residents. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions. Students will also demonstrate an enhanced awareness of the systems through which medical care is delivered and the challenges of health care delivery within a rural community. Students will also be expected to reflect on their clinical experiences through didactic sessions and case presentations, as well as in a final paper. Adjunct Instructor Bio: Barbara Fuller is the Director of Science and Health Professions Advising.

Class Format: Students are shadowing healthcare providers for 20-25 hours per week.

Requirements/Evaluation: 10-page paper
Prerequisites: must be at least a sophomore, on the "premedical" track, and in good standing
Enrollment Limit: 30-35
Enrollment Preferences: seniors have preference
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Winter 2019
LEC Section: 01 TBA Barbara K. Fuller

SPEC 21 (W) Experience the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parents acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Students will be required to read one of two books selected for this course. There will also be reading selected from such
works as *What Should I do with My Life?* by Po Bronson, 2003 and *Working* by Studs Terkel, 2004. Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific internships listed in the SPEC 21 syllabus. Application are submitted via Handshake.

**Class Format:** At least 30 hours per week, 5 days per week, 6 hours per day

**Requirements/Evaluation:** completion of readings, daily journal, and a 5- to 7-page expository review and evaluation that will become public record as a resource for other students

**Prerequisites:** qualifications for internships

**Enrollment Preferences:** placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

**Materials/Lab Fee:** cost of books

**Attributes:** EXPE Experiential Education Courses

---

**SPEC 22 (W) Outdoor Emergency Care**

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care for: Wounds and Burns; Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion); Musculoskeletal Trauma (e.g., breaks, sprains, etc.); Shock, Respiratory, Poisoning, Substance abuse emergencies; Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 16 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience.  Adjunct Instructor Bio: Thomas Feist ('85) is a 35-year ski patroller, certified OEC Instructor and Instructor Trainer. He has taught chemistry at Williams College and served as acting director of the Williams Outing Club in 1990-91.

**Class Format:** mornings

**Requirements/Evaluation:** final written and practical exam

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** ski/snowboard interest and ability as well as prior first aid experience

**Materials/Lab Fee:** $175 plus cost of textbook (~$100)

**Attributes:** EXPE Experiential Education Courses

---

**SPEC 23 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change**

Liberal Arts for Epic Challenges is an introduction to the techniques of design thinking to help liberal arts students gain the necessary skills and confidence to tackle complex social and economic problems: attention to the human dimensions of problems and solutions, creative confidence, risk taking, learning from failure, effective collaboration, and story-telling. Design thinking has become an increasingly prevalent approach in encouraging innovative solutions among start-ups, corporations repositioning themselves, government agencies seeking to improve their citizen services, and NGOs addressing major social problems like rural health care. This winter study course will expose students to the tools of design thinking and then
will take on several challenges selected by the students. Students will undertake the research phase in Williamstown, then go to the IBM Design Studio in Austin, Texas (or a similar consulting firm design lab) for the ideation phase in collaboration with designers at IBM and Watson, using the same facilities that IBM design thinkers use. Solving truly difficult problems facing society in the 21st century requires a purposeful approach that draws on a full range of the experiences and perspectives of those who have studied the liberal arts. Only with the advantage of those with an understanding of the social sciences, physical sciences, arts, and humanities provide a sensitivity to both the dimensions of difficult problems and how to address them for human-centered solutions. There will be two 3 hours workshops in the afternoons when in Williamstown, All day in the Design Studio in Austin for 3 days. Light reading, but necessary team meetings between classes.

**Class Format:** travel

**Requirements/Evaluation:** based on observation of active constructive participation in team efforts and evaluating a final team presentation for relevance,

**Extra Info:** sensitivity to human-centered concerns, completeness, effective communication, and realistic probability of success, all of which will be documented in an electronic field journal

**Prerequisites:** interested students must attend an informational meeting and submit a short essay about their interest in the course

**Enrollment Limit:** 10

**Enrollment Preferences:** none; not open to first-year students

**Materials/Lab Fee:** $2600

**Attributes:** TRVL Winter Study Travel Course

---

**SPEC 24 (W) Transformative Moments in the Education of a Preschool Child**

This course will provide an opportunity for immersion in the life of a preschool community in the Bronx. Future of America Learning Center (FALC) is a nationally-accredited program that is recognized for its quality and standard of excellence in the field of Early Childhood Education. Students from varied educational institutions, teachers and instructional coaches are recommended by the Department of Education to visit FALC's classrooms to observe, experience and learn about the Plant-a-Dream curriculum. Winter Study students will actively participate in the daily classroom activities with the children in order to develop a sense of best practices in Early Childhood Education. Students will live with families whose children are in the program, in the model of Gaudino's experiential learning, to access a deeper sense of context and a better understanding of the issues facing children and families from this community. Opportunities for dialogue between families, staff, and students, will also be central to the learning experience. Furthermore, our mentors will guide students in robust self-reflection, as well as inquiry into the environment in which they are immersed, and the personal meaning derived from these experiences. More information about FALC and the course mentors can be found at https://goo.gl/PEJsoq.

**Requirements/Evaluation:** 5-page summary paper, daily journal

**Prerequisites:** none

**Enrollment Limit:** 4

**Enrollment Preferences:** by interview

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses; TRVL Winter Study Travel Course

---

**SPEC 25 (W) Williams in Georgia**

Crosslistings: RUSS25 / SPEC25

**Secondary Crosslisting**

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the
Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivan'tsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Class Format: travel
Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required; not open to first-year students
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course
Materials/Lab Fee: $2785
Distributions: (D1)

Winter 2019
TVL Section: 01 TBA Vladimir Ivan’tsov

SPEC 26 (W) Field Work in a Bay Area Start-Up
This course is designed to give students insight into how technology start-ups work and well as a chance to practice their problem-solving skills and gain deeper insight into the customer discovery process. The course will start in Williamstown with a review of idea development tools used in today's start-up environment, particularly those pioneered by Stanford d.School such as the Lean Start-up method, Business Model Canvas and Design Thinking. Reading will include *The Lean Start-up* by Eric Ries, *Zero to One* by Peter Thiel and Edward deBono's *Thinking Course* as well as articles and podcasts. The class will be split into three teams of four students and paired with a Bay Area start-up looking to enter a new market, a new customer segment or are considering certain product modifications. The student teams will work on identifying customer needs, qualifying customer feedback and making recommendations to management. The class will tap into the strong Bay Area alumni network which will allow for visits to several different start-ups and fast-growing tech companies and compare how they approach their markets. The final project will be a ten-minute presentation to management. Student should submit a short statement of why they would like to participate and what they expect to learn. Adjunct Instructor Bio: Entrepreneur-in-Residence at Williams.

Class Format: travel
Requirements/Evaluation: 5-page paper; final project; short summaries of customer interactions
Prerequisites: none; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: preference will be given to students with a demonstrated interest in entrepreneurship
Materials/Lab Fee: $2,800
Attributes: EXPE Experiential Education Courses; TRVL Winter Study Travel Course

Winter 2019
TVL Section: 01 TBA Tonio Palmer

SPEC 27 (W) Social Justice, Activism, and Advocacy in New York City
This 2019 Winter Study course examines social justice advocacy and activism in New York City's nonprofit organizations, churches, and private and public universities. The focus is on antiviolence and human rights initiatives based in New York City's institutions that shape the perspectives not only of the city but influence debates about democratic values and political perspectives throughout the nation and the world. Students would work with non-profit and advocacy organizations such as the Social Justice Committee of Trinity Luther Church (TLC) Immigrants Rights Coalition; and
ConnectNYC, a Harlem-based non-profit that works city-wide to end domestic, social, and religious violence. For three weeks in the city students would attend forums on social justice, anti-racism/feminist/lgbtq rights at Barnard; Columbia University; City College, and CUNY Graduate Center. The three weeks in NYC focus on three overlapping themes central to social justice advocacy: domestic/family safety; community values in policing and citizen’s and prisoners’ rights; immigration and human rights.

Class Format: travel

Requirements/Evaluation: daily journal; volunteer with one of the participating non-profits to assist in digital or community outreach and organizing for 3-4 hours daily;

Extra Info: attend a weekly educational event(s) at city universities or nonprofits; attend a mini-seminar to discuss readings and experiential learning;

Extra Info 2: write a 10-page analytical paper at the conclusion of the winter study evaluating political trends in each of the three areas; attend a community council meeting at the 24th Precinct in Manhattan (West 100th St.).

Prerequisites: not open to first-year students

Enrollment Limit: 4

Enrollment Preferences: interview with the instructor

Materials/Lab Fee: $2750

Attributes: TRVL Winter Study Travel Course

Winter 2019

TVL Section: 01 TBA Joy A. James

SPEC 28 (W) Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City’s public schools. Participants will be expected to pursue a full day’s program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student’s interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master’s level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship

Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper

Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: statement of interest

Materials/Lab Fee: $400

Attributes: EXPE Experiential Education Courses

Winter 2019

LEC Section: 01 TBA Tracy Finnegan

SPEC 29 (W) The "Television" Industry: Legal, Business and Policy Issues in the Distribution of Video Content

This course will explore how video content is distributed in the United States and examine how a business deal to do so may actually take shape. Topics may include the history of television, various business models used to distribute video content to consumers, governmental policy and regulatory impacts on the television business, contract law and its application to video content distribution, and negotiation theory and practice. Students will explore the various ways video content is distributed, how content owners and distributors make money, the relationship between content ownership and distribution, and how the industry is changing. The course will provide students with a basic introduction to contract law and explore a video content distribution agreement in detail. Students will be expected to read articles from the trade press on a daily basis, lead and participate in
class discussions, debates and negotiation case studies, analyze legal opinions, read and dissect a video distribution agreement, and, yes, watch “television.” The class will culminate in students working in teams to negotiate and draft a video distribution agreement. Class is expected to meet for 6-8 hours per week. Adjunct Instructor Bio: Robert Goldstein has practiced law for over twenty years, the most recent fifteen of which have been in the television industry. He has been the General Counsel for a privately-held telecommunications venture, worked in-house at a Fortune 500 media company, and represented a wide range of communications companies in various stages of development.

Class Format: two consecutive midweek class days
Requirements/Evaluation: final project; class participation
Prerequisites: students will be asked to write 1-2 sentences about why they want to take the class
Enrollment Limit: 10
Materials/Lab Fee: none

Winter 2019
LEC Section: 01 TBA Bobby Goldstein

SPEC 35 (W) Making Pottery on the Potter's Wheel

Learning to form pottery shapes with your hands on the potter's wheel is challenging but accessible to any student who invests time and effort. This is a very old-fashioned skill--archaeologists tell us potter's wheel skills were widespread in world culture by 3000 BCE. YouTube videos will not help you to learn the subtle hand positions and pressures needed to succeed in shaping symmetrical pleasing forms. A teacher/coach will help you understand and learn these skills, but it is up to you to apply yourself with repeated practice, patience and persistence. Every class will begin with an explanatory demonstration followed by student practice on the potter's wheel. Woven into pottery making demonstrations will be presentations, in response to student interest, on various topics relating to the science and history of pottery making. Every student will have exclusive use of a potter's wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, lids, spouts, and knobs. We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The eleventh meeting will be devoted to glazing your biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project positive-orientation critique" in the studio of your finished work. Adjunct Instructor Bio: Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

Class Format: mornings, 9am-12pm; plus 1 afternoon powerpoint slide presentation, and 1 final 1-hour critique session early in the spring semester at times to be arranged
Requirements/Evaluation: attendance at all class sessions and enthusiasm for learning the craft of pottery making
Prerequisites: none
Enrollment Limit: 9
Enrollment Preferences: discretion of the instructor
Materials/Lab Fee: $385
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

SPEC 39 (W) Composing A Life: Finding Success and Balance in Life After Williams

"Composing a Life:” Finding Success and Balance in Life After Williams Description: To be at Williams you have experience as a successful student, but how do you learn to be successful in life? How will you define success in both your personal life and in your career? How will you achieve balance between the two? In short, what will constitute the "good life" for you? We borrow the concept of "composing a life" from Mary Catherine Bateson, as
an apt metaphor for the ongoing process of defining success and balance in life. This course is designed: (1) To offer students an opportunity for self-reflection, as well as to examine and define their beliefs, values, and assumptions about their future personal and professional lives; (2) To encourage students to gain a better understanding of how culture, ideology, and opportunity affect their life choices; (3) To provide an opportunity for students to consider different models of success and balance through "living cases" (in the form of guests from various professions and lifestyles); and (4) To aid students in contemplating their own life/career options through individual advising and introducing various career and life planning resources. Using selected readings, cases, and guest speakers, we will explore both the public context of the workplace as well as the private context of individuals and their personal relationships in determining life choices. Weekly assignments include cases and readings from a variety of related fields, and some self-reflection exercises. Adjunct Instructor Bio: Geraldine Shen ’01 is a former management consultant, development officer, curriculum coordinator, and admissions officer who currently leads a community non-profit organization in Williamstown. Adjunct Co-Instructor Bio: Joe Bergeron ’01 is a technology consultant, entrepreneur, and software developer.

Class Format: mornings

Requirements/Evaluation: regular attendance, class participation, field interview, and a 10-page final paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference to juniors and seniors

Materials/Lab Fee: none

SPEC 99 (W) Independent Study: Special

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019

IND Section: 01
Women's, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women's, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women's, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

THE MAJOR

The Women's, Gender and Sexuality Studies major encourages students' exposure to the interdisciplinary character of feminist and sexuality-focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300-level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the Chair of the Program.

Required Courses

The major consists of at least 9 courses. The following are required:

- WGSS 101 Introduction to Women's, Gender and Sexuality Studies
- WGSS 202 Foundations in Sexuality Studies
- WGSS 400-level Junior/Senior Seminar in Women's, Gender and Sexuality Studies. The seminar explores topics in Women's, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.

In addition to these three required courses, students are required to take six electives. In consultation with their major advisor and with approval from the chair, these six elective courses should include:

- Courses from at least 3 different disciplinary traditions.
- At least 3 courses at the 300-level.
- At least 1 course that emphasizes feminist/queer theories and/or methodologies.
- At least 1 course that emphasizes a diversity of racial, sexual, religious, and/or cultural identities and practices.

In the final semester of their senior year, all majors will be required to write a reflective intellectual autobiography of their WGSS major, in which they explain how their courses meet the goals of the major, and analyze the relationship among the courses they have taken, the papers they have written, and the research projects undertaken.

THE DEGREE WITH HONORS

Honors in Women's, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women's, Gender and Sexuality Studies Committee. The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women's, Gender and Sexuality Studies after the following criteria are
In April of the junior year, submission and Women’s, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;

In the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5- to 10-page “Plan of Action” (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women’s, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

STUDY ABROAD

The Williams College Women’s, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women’s issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

- Antioch College: Comparative Women’s Studies in Europe fall semester
- Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester
- School for International Training: The Balkans: Women and Democratization, fall or spring semester
- Jamaica: Gender and Development, fall or spring semester
- Mali: Gender and Development, fall or spring semester
- The Netherlands: Identity, Gender and Sexuality, fall or spring semester

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. Depends on the level for which the student is seeking major credit (200- vs 300-).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 101 and 402 cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

WGSS 11 (W) Queer Russia
Crosslistings: RUSS11 / WGSS11 / COMP11

Secondary Crosslisting
A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country's queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

Class Format: afternoons
Requirements/Evaluation: completion of reading and viewing assignments, attendance in class, active participation in discussions, and completion of a collaborative project with other members of the class
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: preference to Comparative Literature, Russian, and Women's, Gender, and Sexuality Studies majors
Materials/Lab Fee: $10 plus cost of books

Winter 2019
LEC Section: 01 TBA Julie A. Cassiday

WGSS 15 (W) Plato's Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting
Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

Class Format: mornings
Requirements/Evaluation: 5-page paper and an in-class presentation of independent research
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: preference given to majors or intending majors in Classics, Comparative Literature, WGSS, or Philosophy
Materials/Lab Fee: cost of books

Winter 2019
LEC Section: 01 TBA Amanda R. Wilcox

WGSS 17 (W) Girl Meets World: Films from 5 Continents
Crosslistings: WGSS17 / PSCI18

Secondary Crosslisting
This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls' own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

Class Format: afternoons

Requirements/Evaluation: active class participation and either 3 policy memos (3-4 pages each) or one 10-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to Political Science and WGSS majors

Materials/Lab Fee: cost of books

Winter 2019

LEC Section: 01    TBA    Nimu Njoya

WGSS 18 (W) "The Transformation of Silence": Exploring Campus Sexual Violence Prevention and Response

Crosslistings: PHLH18 / WGSS18

Primary Crosslisting

Since 2011, student activism and federal guidance of dramatically changed how campuses address sexual violence. This class will explore response to and prevention of sexual violence on college campuses and more broadly, across topics related to gender and sexuality, race, constructs of accountability, and public health and social justice approaches to prevention. Class will be heavily comprised of interactive activities, along with reading, films, and reflective writing. Course will meet 3 days per week for 2 hours. Some outside of class work in the form of film viewing and attendance at talks. Adjunct Instructor Bio: Meg Bossong '05 is the Director of Sexual Assault Prevention and Response. Prior to returning to Williams, she was the Manager of Community Engagement for the Boston Area Rape Crisis Center, where she worked with community stakeholders in education, faith communities, medical and mental health care, law enforcement, and beyond on response and prevention initiatives.

Requirements/Evaluation: a 10-page final paper, along with Glo reflections

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: submission of a few sentence description indicating interest level in the course, preference to first years and sophomores

Materials/Lab Fee: none

Winter 2019

LEC Section: 01    TBA    Meg Bossong

WGSS 20 (W) Performing Self-Portraiture in the Age of Instagram

Crosslistings: AFR20 / THEA20 / WGSS20 / ARTS20

Secondary Crosslisting

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacobly Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop,
Soho Rep., Digital Graffiti Festival, Vox Populi and Yale's Center for Contemporary Arts and Media. Kameron has also designed campaigns for The Public Theater, Joe's Pub, Under the Radar Festival, and Shakespeare in the Park, with the creative direction of Pentagram partner, Paula Scher.

**WGSS 25 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment**

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health--especially HIV and AIDS--women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture with a female Prime Minister where women have created and continue to build cooperatively owned enterprises, a West African country that has consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.

Requirements: Before we leave campus, each student will choose a particular focus for the trip, and do preliminary research to inform their visit—including comparative material about the US. Upon our return to campus we will meet to discuss our findings, and students will write 10-page papers drawing upon existing research as well as our conversations and experiences in Senegal.

**Class Format:** travel

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none; not open to first-year students

**Enrollment Limit:** 6

**Enrollment Preferences:** preference will be given to students with skills in French and a demonstrated interest in public health and/or women's economic empowerment

**Materials/Lab Fee:** $3,892

IND Section: 01   TBA   Alison A. Case
The Writing-Intensive (WI) requirement is intended to improve student writing proficiency across disciplines. Students in these courses will receive guidance on style, argumentation, and other significant aspects of writing, as well as evaluation and criticism of their writing throughout the semester. This may be achieved through a variety of approaches: brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WI courses may also include multiple drafts, conferences, peer review, or class discussions designed to improve writing skills. A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered writing-intensive. WI courses require a minimum of 20 pages of writing and have a maximum enrollment of 19—this allows the instructor to devote appropriate attention to writing over the course of the semester.

All students are required to take TWO WI courses: one by the end of sophomore year and one by the end of the junior year. Students will benefit most from WI courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.
