THEA 208 (F) Voice, Speech & Song for the Actor
Continuing the vocal technique work in THEA 205, this course provides an intense practice that further deepens the body-voice connection, builds and troubleshoots speech technique, and expands vocal strength, range and endurance through song. Through incorporating the resonator techniques of Roy Hart and Meredith Monk, the speech drills of Edith Skinner and the fundamentals of musical training for the voice, students finish the course able to complete an hour long full voice/speech/song work out. In addition to building a repertoire of voice, speech and singing drills; students will explore how to “act” a song, combining speaking and singing, using songs from the plays of Bertolt Brecht.

Class Format: studio
Requirements/Evaluation: attendance, participation, drills, and tests on technique

THEA 209 (F) Public Speaking: Traditions and Practice
Crosslistings: THEA209 / AFR202
Secondary Crosslisting
Effective oral communication skills are necessary for any student, regardless of major or area of concentration. This course is designed to give students an introduction into the fundamentals of oral communication. We will discuss the critical role of both speakers and listeners within the transactional process of communication. Together we will explore African American oratorical traditions through viewing, listening to, and reading speeches from notable figures such as Frederick Douglass, Fannie Lou Hamer, Barak Obama, and many others. With an emphasis placed on
Aristotelian and African American rhetorical methods of persuasion, evidence-based research, and organization, students will gain a better understanding of what it means to be an ethical and responsible communicator. Students will give three formal speech presentations with a focus on informative and persuasive elements. Through discussions, lectures, activities, readings, and speech presentations, students will develop meaningful skills to effectively communicate in the public setting.

THEA 211 (F) Performing Greece

Crosslistings: CLAS211 / THEA211 / COMP248

Secondary Crosslisting

Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators as written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. From the Homeric epics and the masterpieces of Greek tragedy and comedy to the speeches and dialogues of Demosthenes, Thucydides, and Plato, we will survey the evidence for the musical, visual, and embodied aspects of Greek literature. At the same time, we will reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imagination of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek civilization, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. In addition to a wide selection from Greek poetry, drama, and prose, our readings will include works by ancient and modern theorists of performance and culture. All readings are in translation.

THEA 212 (F) From Stage to Page: Writing about Dance (WI)

Crosslistings: DAN212 / THEA212

Secondary Crosslisting

We commonly understand the word “choreography” to mean the creation of dance movement. The Greek roots of choreography, however, are choreia (the synthesis of dance, music and singing) and graphein (to write). For centuries, people have attempted to pin dance down on the page, translating an ephemeral, embodied performance art into written form. In this writing-intensive tutorial, students will investigate four major modes of dance writing: dance notation or scoring, dance criticism, dance ethnography, and dance history, with a shorter fifth unit on a new avant-garde form, “performative writing.” Students will study important examples of each form, such as Rudolf Laban's famed system of dance notation and Katherine Dunham's ethnographic account of dance in Jamaica, Journey to Accompong. Students will then delve into each form of writing themselves. For example, they
will work with Mellon Artist-in-Residence Emily Johnson as "scribes" for her creative process, attend live dance concerts at the '62 Center and Mass MoCA as the basis for writing pieces of dance criticism, conduct participation-observation research by attending social dance events to write mini-ethnographies of their experiences, and work with librarians to learn about resources at Sawyer for researching dance history.

THEA 214 (S) Playwriting (WI)
Crosslistings: THEA214 / ENGL214

Primary Crosslisting
A studio course designed for those interested in writing and creating works for the theatre. The course will include a study of playwriting in various styles and genres, a series of set exercises involving structure and the use of dialogue, as well as individual projects. We will read and we will write, beginning with small exercises and working toward a longer final project. Students will be expected to share in and respond to each other's work on a weekly basis, and to present their own work regularly. At the end of the term, we will share our collaborative work with the community as part of an open studio experience.

THEA 215 (S) Asian-American Identities in Motion: Global Approaches to Dance
Crosslistings: DANC214 / THEA215 / AMST214 / GBST215

Secondary Crosslisting
The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

THEA 215 (F) Performance Ethnography: Global Approaches to Dance
Crosslistings: ANSO214 / THEA215 / AMST214 / DANC214 / GBST215

Secondary Crosslisting
The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement and performance ethnography. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) will read ethnographic studies of dance and performance practices from different parts of the world, and (iii) will do field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and will include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance experience required.

THEA 222 (S) Solo Performance

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

Class Format: tutorial
Requirements/Evaluation: creating a script, building a character, developing various aspects of design, performing a solo piece, and writing a self-evaluation at the end of the semester

THEA 224 (F) Interdisciplinary Approaches to Performance Art

Crosslistings: THEA224 / ARTS224

Secondary Crosslisting

Mud, meat, lard, time, Instagram, and language. These are the materials of performance art. Students will develop distinct and focused voices as performers/artists by gaining an understanding of the methods and theories that inform the performance art genre. Assigned projects will examine the relationship between performance, video, photography, sculpture and digital platforms. Seminars will focus on the catalogs of contemporary artists whose interdisciplinary practices heavily incorporate performance methodologies. Artists covered will include: Tania Bruguera, Santiago Sierra, Kalip Linzy, and Tameka Norris.

Class Format: studio

Requirements/Evaluation: completion of 3 guided projects, assigned readings, active class engagement, independent final project, attending lectures, museum/gallery trips

THEA 225 (F) Gender and Sexuality in Asian American Theater

Crosslistings: THEA225 / COMP218 / WGSS225

Secondary Crosslisting

This class begins with the premise that intersectional and interdisciplinary studies of gender and sexuality need to be, and in significant ways already are, in conversation with Asian American studies and theater. How might contemporary Western discourses of masculinity and heterosexuality, for example, depend upon theatrical constructions of Eastern sexual alterity? How have Asian American artists managed and critiqued historically gendered and sexualized stereotypes (e.g., hypersexual Dragon Lady, virginal Lotus Blossom, asexual Charlie Chan) through theatrical intervention? This seminar will closely read dramatic literature written by Asian American artists, as well as engage scholarship in Asian American gender and sexuality studies and performance studies. We will read the work of playwrights including Ayad Akhtar, Ping Chong, Frances Ya-Chu Cowhig, Velina Hasu Houston, David Henry Hwang, Young Jean Lee, Diana Son, Lauren Yee, and Chay Yew.

Secondary Crosslisting
This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative values. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course but will also include attendance at live performances, film screenings, and discussions with guest artists. No previous dance experience required.

THEA 227 (S) Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture
Crosslistings: THEA227 / CHIN227 / COMP227
Secondary Crosslisting
This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and Kun Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvinted as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.
Class Format: lecture/discussion
Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

THEA 240 (S) Queer Drama (DPE)
Crosslistings: THEA240 / WGSS237

Primary Crosslisting

This seminar course is a deep dive into the richly dissonant dialogue between queer lives and live performance. How have queer artists shaped and reshaped the field of theatre and performance over time? How has drama, in turn, shaped the landscape of queer life? What inventions and innovations might we attribute to the evolution of "queer"? We will look to the work of artists such as Tennessee Williams, Tarell McCraney, Taylor Mac, Reza Abdoh, Sharon Bridgforth, Virginia Grise, and many others as we seek to map the messy topography of queer performance.

Class Format: seminar, three hours per week

Requirements/Evaluation: two 5-page papers, participation in text-based seminars, and a final performance

THEA 241 (F) Performing Masculinity in Global Popular Culture
Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

THEA 243 (S) Opera Since Einstein (WI)

Crosslistings: MUS244 / THEA243

Secondary Crosslisting

After 400 years, we might assume we know what "opera" is. However, in recent decades the genre has moved far beyond our preconceptions. This course asks us to examine opera of the last forty years with fresh eyes and ears, expanding our understanding of the term to include the interdisciplinary, multimedia, cross-cultural work that has been created by composers, directors (Peter Greenaway, Peter Sellars, Robert Wilson), filmmakers, choreographers, and visual artists in that period. Using the 1976 premiere of Philip Glass's seminal Einstein on the Beach as a starting point, we will examine such diverse works as Adams's Nixon in China and The Death of Klinghoffer, Glass's Satyagraha, Tan Dun's Marco Polo, Neuwirth's Lost Highway, Unsuk Chin's Alice in Wonderland, Andriessen's Writing to Vermeer, Ades's Powder Her Face, Muhly's Two Boys, Monk's Atlas, and Ashley's television opera, Perfect Lives.

THEA 247 (S) Music for Theater Production

Crosslistings: THEA247 / MUS247

Secondary Crosslisting

Music written to accompany or to "point up" the action or mood of a dramatic performance on stage can be traced to Ancient Theater. Are the labels of incidental and background music appropriate or patronizing for this genre? What is the difference between the composition of "incidental music" and sound designing? How does creating music to accompany a play differ from writing concert music or music for film, ballet, opera, or musical theater? What makes for effective incidental music? How does the music interact with the spoken drama? Students will discuss music composed for selected plays and will compose music for a scene of a play drawing upon pre-existing works, or creating their own. Format: tutorial. During the first and last weeks of the semester, students will attend two group classes. In the other weeks, students will meet with the instructor in pairs for a one-hour session. Students will write and present a 5- to 6-page paper every other week and a 1- to 2-page response to their partner's paper in the alternate weeks.

THEA 249 (F) Staging Race and Gender (DPE) (WI)

Crosslistings: ENGL249 / THEA249 / WGSS269

Secondary Crosslisting

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's Black Odyssey, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

THEA 250 (F) Gender, Sexuality and Modern Performance (WI)
Crosslistings: COMP247 / ENGL253 / THEA250 / WGSS250

Primary Crosslisting
This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities of social identities under interrelated systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherríe Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

Class Format: tutorial

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks

THEA 255 (F) Performing Shakespeare
This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (Macbeth, Anthony and Cleopatra, Othello), comedies (The
Merchant of Venice, A Midsummer Night's Dream, Twelfth Night), and histories (Richard II, Richard III); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

**Class Format:** tutorial and lab; in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

**Requirements/Evaluation:** weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

THEA 260 (F) Shakespeare on Page, Stage and Screen: Text to Performance (WI)

Crosslistings: COMP290 / ENGL270 / THEA260

Primary Crosslisting

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: Romeo and Juliet, Henry V, Twelfth Night, Hamlet, Antony and Cleopatra, and A Midsummer Night's Dream. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nōgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary
audience?” Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

THEA 265 (F) Digital Performance Lab

Crosslistings: THEA265 / SCST265

Primary Crosslisting

A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediatized performance practices. Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Class Format: studio and lab

Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills

THEA 267 (F) Performance Studies: An Introduction (DPE)

Crosslistings: COMP267 / WGSS267 / DANC267 / THEA267

Secondary Crosslisting

Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing “performance” as mode, analytic, and object of study have to offer scholarship in the
interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

THEA 275 (S) American Drama: Hidden Knowledge (WI)
Crosslistings: COMP275 / ENGL224 / THEA275 / AMST275

Primary Crosslisting
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli’s The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O’Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

THEA 282 (S)  Writing for Performance  (WI)
Crosslistings: ENGL280 / THEA282

Primary Crosslisting
This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, Maria Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Class Format: seminar
Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

THEA 285 (S)  Scenic and Lighting Design for Performance
Crosslistings: THEA285 / DANC285

Primary Crosslisting
The artistic, intellectual, and practical roles of a designer vary widely, from the spectacle of Broadway to the do-it-yourself ingenuity of downtown theater to the conceptual frame of the art gallery space. This course explores the art and techniques of lighting and scenic design for performance. While grounded in a conceptual methodology for development of a design based in textual analysis and research, this course is equally concerned with providing instruction in the techniques and craft necessary for bringing a design to fruition, including: sketching, technical drafting, and model-making; basic physics and theories of color in both surfaces and light; the use of volume, movement, color, intensity, and texture as compositional and storytelling tools; the variety of stage lighting instruments and theatrical soft goods available, and their uses; writing cues; and the translation of concept into light plots, channel hookups, plans and elevations. We will use a variety of performance texts (plays, musicals, opera, and dance) to discover and explore the creative process from the perspective of scenic and lighting designers. The class format will be a combination of lectures, discussions and studio work.

Class Format: studio
Requirements/Evaluation: evaluation will be based upon committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales,
Extra Info: focusing on scenic and lighting design, considered both individually and when working in tandem
Extra Info 2: may not be taken on a pass/fail basis
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: students who have completed THEA 101, 102, 201 or 244, ARTS 100, or equivalent course or practical experience in the performing or studio arts
Expected Class Size: 6
THEA 286 (S) Sound Design

What is "sound" and how does it work within a design for live performance? Starting from that fundamental question, this course will examine creative, practical, and technical aspects of sound design within a theatrical setting, from the physics of sound and the mechanics of human hearing and perception to sound aesthetics, style, and function. We will learn to effectively analyze a range of scripts and source material, apply research, and make specific choices about world building that serve both the needs of the script and the artist's imaginative impulse. We will experiment with original sound design in a theater space, compare approaches, and learn to listen critically. We will consider how to integrate sound with the other design disciplines, and collaborate effectively to help to create a robust but coherent production.

Class Format: studio, class format will be a combination of lectures, discussions, and studio work

Requirements/Evaluation: committed class participation and thoughtful, timely completion of all assignments and projects

Extra Info: may not be taken on a pass/fail basis

History shapes bodies and is, in turn, shaped by bodies. Whose story is included in the archive? Whose story is left out? What remains over time? What disappears? Why? As theatre and performance historians, our task will be twofold: to study the past but also to question how its been constructed over time. Our obligations will include: handling, analyzing, and contextualizing primary sources; giving equal value to textual and embodied forms of knowledge preservation; taking into account the gender, race, class, status, and ethnicity of the historical participants who occupy the archive; and asking who benefitted from the ideological systems of a given age and who did not. Performance histories to be considered include: West-African Yoruba ritual; pre-Columbian performance in Mesoamerica; ancient Greek civic festivals; labor and guild theatres of Medieval England; print and Kabuki cultures of the Japanese Edo period; eighteenth-century celebrity portraiture across the circum-Atlantic; U.S. Civil War photography and reenactment; and performance histories drawn from (or unseen by) the archives of Williams College. Our readings and approaches will be informed by leading performance and cultural studies critics, such as: Diana Taylor, Joseph Roach, Saidiya Hartman, Rebecca Schneider, Harvey Young, and Tavia Nyong’o. This course is required for Theatre majors and is a prerequisite for THEA 401.

Class Format: seminar
Requirements/Evaluation: weekly "free-writing responses”; two "deep-reads" of archival materials; a 5-page midterm paper; a 10-minute oral report; and a final research project or presentation
Prerequisites: THEA 101, 102, 103, 201, 204 or by permission of instructor with evidence of equivalent 100-level course in Division I or Division II
Enrollment Limit: 18
Enrollment Preferences: Theatre majors
Expected Class Size: 8-10
Distributions:  (D1) (DPE)
Distribution Notes: DPE: This course directly interrogates the power inequities of the historical archive and insists on acknowledging the value of embodied practice as a form of knowledge. Students will learn to question the authorship and ownership of the past by those who controlled its preservation. We will examine primary sources as contextually constructed rather than 'givens,' and we will seek to understand the status of those observers and participants whose stories comprise the archive of performance

THEA 303 (S)  Lighting Design
A study of the art and techniques of stage lighting. This class will provide instruction in the basic physics of light and color; the use of angle, intensity, color, texture and movement of light as compositional tools; various kinds of stage lighting instruments and their uses; conceptual development of a lighting design; translation of concept into light plot and channel hookup; focusing the plot in the theater; and writing cues. The course will use texts and scores of plays, musicals, opera and dance to discover and evaluate the lighting design process. There will be primary source and supplemental technical readings for each class meeting. The class format will be a combination of lectures, discussions and practical labs.

Class Format: lecture/lab
Requirements/Evaluation: evaluation will be based on class participation, successful completion of weekly projects, thorough technical understanding of a basic stage lighting system, and performance on a final project

THEA 308 (F) Directing: Bodies in Space and Time
This is a laboratory in which we will investigate the holistic art of directing live performance. The director is both a creator and interpreter. Students will sharpen their visual, spatial, sonic, and kinesthetic sensibilities while developing a clear, cogent directorial voice. We will learn by doing. Assignments will involve hands-on directing projects presented in class for collective critique. Through these weekly assignments, directors will devise and discover strategies for collaboration and vocabularies of action and intention.

Class Format: studio, 3 hours per week

Requirements/Evaluation: weekly directing projects leading up to a longer final project, reviews of live performances, a portfolio compiled over the course of the semester

THEA 311 (S) Theorizing Shakespeare
Crosslistings: WGSS311 / ENGL311 / THEA311 / COMP310

Secondary Crosslisting
For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: *The Merchant of Venice, Hamlet and Antony and Cleopatra*. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied
criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

THEA 317 (F) Black Migrations: African American Performance at Home and Abroad

Crosslistings: DANC317 / AFR317 / COMP319 / AMST317 / THEA317 / ENGL317

Secondary Crosslisting

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: seminar/discussion

Crosslistings: COMP339 / THEA322 / AMST332 / LATS335 / WGSS330

Secondary Crosslisting

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang’s M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of
performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

As Shakespeare wrote memorably in As You Like It, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

Primary Crosslisting

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered “classic” texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

**Secondary Crosslisting**

Like novelists, visual artists create fictional characters to tell stories. Conceptual artist Adrian Piper, sculptor Joseph Beuys, and collective The Yes Men have crafted personas to confront systems of power and societally constructed notions of normalcy. Students will explore the work of such artists through readings, class lecture and assignments. The reading list includes excerpts from Maggie Nelson's The art of Cruelty and Cherise Smith's Enacting Others. The first half of the course will focus on guided assignments developed by the instructor, the second half will be an independent study culminating in the construction of your own fictional persona. Students will use a variety of methods in the development of a persona including writing and photography, and may employ other methods including painting, sculpture, and digital media.

**Class Format:** studio

**Requirements/Evaluation:** completion of 3 assigned projects, independent project, participation, quality of work

THEA 341  Performing Utopia: Dreaming Cultures Forward in the U.S. Imaginary

A seminar examining the performative dimensions of utopia and the utopian aspirations of performance. Using a case-study model, we will consider how different modes of performance—in theatre, film, art, and social media—have helped to produce and sustain utopian and new socialities in and across shifting temporalities in the U.S. cultural imaginary. This course will take deep dives into the archives and embodied repertoires of exemplary utopian movements drawn artistic and social spheres. What can be learned by setting the eighteenth-century spiritual collective of The Shakers beside the egalitarian performance collective of The Wooster Group? What are some key differences between the urban vision of the inclusive, African-American-built enclave of Soul City, established in North Carolina in 1973, and the Afro-futurist conception of Wakanda depicted in the film Black Panther? In what ways might Silicon Valley’s use of performance to promote the utopian promises of social media compare with the performative manipulations of ego-driven utopian cults, like Jim Jones’ The People’s Temple? On the flip side, we will examine how performance has been theorized as a productively utopian realm by critics like Jill Dolan and Jose E. Muñoz, and artists like Miguel Gutierrez, Guillermo Gómez-Peña, Faye Driscoll, Theaster Gates, Nick Cave, and Taylor Mac. What possibilities open up when we approach performance as utopian by design, based on its ability to gather people into a common space and time? Students will be required to attend a day field trip and performances.

THEA 345 (S)  Contemporary Theatre and Performance

Crosslistings: COMP355 / ENGL349 / THEA345

Primary Crosslisting

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in the world of theatre and performance today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgus, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling through performance right now?" Students may be required to attend theatre, dance, and other performances at the '62 Center and beyond.
**THEA 350 (S) Devised Performance: The Art of Embodied Inquiry**

**Crosslistings:** ARTS250 / THEA350

**Primary Crosslisting**

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

**THEA 361 (F) Writing about Bodies**

**Crosslistings:** ARTH361 / WGSS361 / THEA361 / INTR361

**Secondary Crosslisting**

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live
performances.

THEA 365 (F)  Beckett, Pinter and Stoppard
Crosslistings: ENGL365 / COMP365 / THEA365

Primary Crosslisting
Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: *Endgame*, *The Caretaker*, *Rosenkrantz and Guildenstern are Dead*, *Krapp’s Last Tape*, *The Homecoming*, *No Man’s Land*, *Betrayal*, *Waiting for Godot*, *Dogg’s Hamlet*, *The Invention of Love*, *Arcadia*, *Rock ’n’ Roll*, *Not I*, *Rockaby*, *A Kind of Alaska*, *Catastrophe*, *The Real Thing*, *Indian Ink*, *Artist Descending a Staircase* and *One for the Road*. Throughout, we will give consideration to these works as both literary and theatrical texts.

THEA 385 (S)  The Sculptural Costume and It’s Performance Potential
Crosslistings: THEA385 / ARTS385

Secondary Crosslisting
A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio
Humans seek out patterns and weave them into stories. In a collaborative art like theater those pattern pieces can come from anyone: writer or director, designer or performer; the stagehand placing furniture, the stage manager calling cues. The story is made from the totality of everything experienced by the audience. A relationship between storytelling and audience experience is hardly unique to the theatre. Chefs and game designers and performance artists and architects have all thought deeply about how what they make is experienced by their audience; how it is interacted with, used, and recalled after the experience has ended. How do artists and makers from a broad range of ephemeral disciplines approach the creation of an experience? How do they tell stories within and about the work that is created? How successfully do their theories align with their practice, and how might we re-imagine, reuse, or abuse their ideas in our own work for the live theater? As a culmination of performance studies for the Theatre major, this senior seminar will take a hybrid approach to the study of artist-audience interactivity and storytelling by blending theoretical, historical, and critical readings with a studio component that produces artistic responses to the ideas being studied.

Class Format: seminar

Requirements/Evaluation: critical analysis & discussion of readings, and active participation in critiques of made work; assignments consist of response papers alternating with creative projects

**THEA 455 (F) Advanced Practicum**

This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity—directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management—may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.

**Class Format:** studio

**Requirements/Evaluation:** research, attendance at rehearsals, studio work, & final portfolio; research, attending weekly production meetings, rehearsals, studio work, and final portfolio, as well as other tasks determined by the faculty advisor

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students’ independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners’ work.

Registration

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

AFR 208 (F)  Time and Blackness  (WI)

Crosslistings: AFR208 / REL262 / AMST208

Primary Crosslisting

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, “Time and Blackness,” we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing
AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Primary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

AFR 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Primary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery’s advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter’s liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition’s architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Crosslistings: AFR369 / ARTH308

Secondary Crosslisting

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have
occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

AMST 219 (F) Understanding Social Class (DPE)

Politicians and pundits often bill the United States as a classless society, owing to its lack of a feudal past. Since the 1950s, most Americans—including many whom sociologists would deem wealthy or poor—have come to describe themselves as "middle class." But this may be changing. Bernie Sanders’ strident calls to reign in Wall Street greed remain enormously popular. And since the election of President Trump, journalists have rediscovered a group they call "the white working-class" while books such as *Hillbilly Elegy* and *White Trash* have moved to the top of the best seller lists. So, what is class and how does it shape our lives today? This course is designed to introduce students to the study of social class in an interdisciplinary fashion. We will use memoir and works of fiction to better grasp the life experiences and worldviews of people on different rungs of the economic ladder. Then we will delve into the ways that major theorists, such as Karl Marx, Max Weber, and Pierre Bourdieu have defined social class in terms of work life, social standing in a community, and bundles of “tastes” or consumption preferences. We will turn to historians to make sense of the patterns by which class inequality developed in tandem with racial oppression in the United States, and to the competing arguments of sociologists attempting to explain the growing wealth gap. Finally, we will look to activists and social workers to see how individuals and groups work to bridge the class divide in attempts to mitigate poverty and challenge inequalities. Throughout, participants will be encouraged to use assigned materials as prompts to think critically about how class shapes their own lives.

We will analyze different aspects of class power, from employment relations, to political influence, to self-confidence. The last weeks of the course will address ways movements seek to bridge class divides to challenge economic and other forms of inequality. The course will be intersectional throughout—discussing how class, race, and gender inequalities reinforce one another.

AMST 490 (S) The Suburbs  (WI)

Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our
understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the `kindness curriculum' in schools, and other areas of applied research on mindfulness that have generated a `science of personal transformation'. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

**ANTH 328 (F) Emotions and the Self (WI)**  
Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borders between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing- intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

**ARTH 228 (S) Velázquez, Goya, and Picasso (WI)**

Crosslistings: RLSP228 / ARTH228

Secondary Crosslisting

This course will provide an introduction to three major Spanish painters—Velázquez, Goya, and Picasso—who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

**Primary Crosslisting**

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

**Primary Crosslisting**

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings:
Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the ’62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

The two Koreas–North and South–were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women’s speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the “easy Japanese movement,” which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

CHIN 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Primary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship
between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about
animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Crosslistings: COMP119 / WGSS119

Secondary Crosslisting

This tutorial will introduce students to the intersections of feminist studies and Asian American studies by reading Asian and Asian American literature (read in English) that centers female-identified characters. This course will consider the historical and persistent structures of patriarchy, heterosexism, nationalism, imperialism, war, and globalization through the framework of gender and sexuality studies. Students will read short excerpts of feminist theoretical works, selected with the idea of making scholarly texts more approachable to first- and second-year students. No previous experience with feminist theory or Asian American studies is presumed or required.

COMP 134 (S)  Leaving the World Behind: The Literature of Reclusion  (WI)
Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Crosslistings: CLAS241 / COMP241 / WGSS241

Secondary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Secondary Crosslisting
Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

COMP 347 (F)  Silence, Loss, and (Non)Memory in Austria 1900-the Present  (DPE) (WI)
Crosslistings: COMP347 / GERM331

Secondary Crosslisting
One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational
transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

DANC 280 (S) Dancing the Score/Scoring the Dance

Crosslistings: DANC280 / MUS280

Secondary Crosslisting
This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one's group is central, sharing responsibility for the development of others' as well as one's own work.

ECON 240 (F) Colonialism and Underdevelopment in South Asia (DPE) (WI) (QFR)

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

ECON 532 (S) Inclusive Growth: The Role of Social Safety Nets
Designing and implementing effective national strategies to promote inclusive economic growth can require difficult policy reforms, sometimes with adverse short-term impacts for vulnerable groups within society. Social safety nets provide a pro-poor policy instrument that can balance trade and labor market reform, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social safety nets help the poor to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. This tutorial will offer students the opportunity to explore the role of social safety nets in promoting inclusive economic growth, drawing on case studies from Africa, Asia, Latin America and Eastern Europe. The first part of the tutorial will define social safety nets within the broader context of social protection, examining the diversity of instruments and their linkages to economic growth. The second part will delve more deeply into the design and implementation of effective interventions, assessing program choice, affordability, targeting, incentives and other issues. The third part will analyze the role of social safety nets in supporting economic growth strategies, drawing on international lessons of experience.

ENGL 227 (F) Elegies  (WI)

This tutorial--intended primarily for sophomores--explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief;
negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900—including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists—Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

ENGL 343 (S) Whitman and Dickinson in Context (WI)

In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

ENVI 222 (F)  Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WI)

Secondary Crosslisting
Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

What does climate change mean for the future of Earth’s 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Secondary Crosslisting**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE) (WI)

Crosslistings: COMP347 / GERM331

Primary Crosslisting

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that “we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society.” Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English.

For those who do it in German, all literary readings and at least three of the papers will be in German.

Distribution Notes: DPE: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.
The two Koreas—North and South—were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called “the Cold War’s last divide.” This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn’s Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about competing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

HIST 483 (S)  Sport and Diplomacy  (WI)

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Class Format: tutorial
Requirements/Evaluation: students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-page written critique
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history
Expected Class Size: 10

Distribution Notes: WI: Each student will be required to write six papers (5- to 7-pages each). We will discuss writing on a regular basis during tutorial meetings in pairs of two students.

HIST 484 (F) The Hundred Years' War
By the Hundred Years' War, historians understand a series of battles and wider conflicts waged between England and France from 1337 to 1453, over the succession to the French throne. From the near-total English victory after the Battle of Poitiers to the remarkable revival of French fortunes associated with Joan of Arc, the Hundred Years' War encompasses some of the most iconic events of later medieval history. The events of the war, together with a broader history of the entire era, are the subject of a monumental study by Jonathan Sumption, who has now published the fourth of a projected five volumes. The greater part of this tutorial will concentrate on a careful, thorough reading of Sumption's history--a rare opportunity afforded by the tutorial format, given that great historical enterprises are otherwise beyond the scope of college and university classrooms. For additional perspective, we will also read a general survey of the later medieval period and several more specific monographs, and we will consider the reception that Sumption's work has received among historians of the Middle Ages.

HIST 489 (F) Feminist Movements in U.S. History (DPE)
This class studies the historical development of feminist movements in the United States. From the 19th century women's rights movements through 20th century movements for women's liberation, it examines the changing definitions of feminism and the array of strategies and organizations that activists have generated. It also examines the complex dynamic between feminist activism and the production of women's history, examining the role of historical narrative in feminists' struggle for social change.

Fall 2018
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Crosslistings: ASST207 / JAPN407

Primary Crosslisting
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans' relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future.  WI: As a tutorial, this course is writing- intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. LEAD 206 (F) Dangerous Leadership in American Politics (WI)

Crosslistings: PSCI206 / LEAD206

Secondary Crosslisting

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition’s leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

LEAD 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Secondary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics
beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

Partial differential equations (PDE) arise as mathematical models of phenomena in chemistry, ecology, economics, electromagnetics, epidemiology, fluid dynamics, neuroscience, and much more. Furthermore, the study of partial differential equations connects with diverse branches of mathematics including analysis, geometry, algebra, and computation. Adopting an applied viewpoint, we develop techniques for studying PDE. We draw from a body of knowledge spanning classic work from the time of Isaac Newton right up to today's cutting edge applied mathematics research. This tutorial is appropriate as a second course in differential equations. In this tutorial, students will: build and utilize PDE-based models; determine the most appropriate tools to apply to a PDE; apply the aforementioned tools; be comfortable with open-ended scientific work; read applied mathematical literature; communicate applied mathematics clearly, precisely, and appropriately; collaborate effectively.

MUS 275 (F) Shakespeare through Music (WI)

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays—the tragedies Romeo and Juliet and Othello, and the comedy Midsummer Night's Dream—in order to compare and contrast a broad range of ways in which music
works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

MUS 280 (S) Dancing the Score/Scoring the Dance

Crosslistings: DANC280 / MUS280

Primary Crosslisting

This course is designed for students interested in intensive collaborative composition work in dance and music. Students in dance will be paired with students in music; both students will be supported in creating in collaboration by practicing composition in their respective disciplines while working closely with each other in a structured, intimate setting. Any genre or style of music or dance may be explored. Projects will allow students to practice methodologies of collaboration and creation. Groups will evolve, and document procedures unique to their group. Students are expected to rigorously build upon and revise their work(s) by making active use of feedback sessions. Studying historic and contemporary dance and music collaborations in a variety of genres will give further context to our work. Weekly presentation of assignments, active participation in feedback sessions, identifying to the group what the next steps are, written reflection on sessions, and final showing will be required. Creating in collaboration trains students to articulate vision and intention while enabling the instructors to differentiate their aesthetic values from those of the students. It also trains students to collaborate with other disciplines during the creative process. The format allows class members to receive undivided focus on their processes, while also challenging them to assess their own abilities, create their own next steps, and discover how movement can inspire music as well as music inspiring dance. This tutorial provides a crucial central aspect of the creative arts: a space for ongoing feedback driven by the questions arising for the students, rather than specific aesthetic preferences or working practices. Investment in the work of one's group is central, sharing responsibility for the development of others' as well as one's own work.

**PHIL 122 (F) Philosophical Approaches to Contemporary Moral Issues (WI)**

In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, the ethics of protest, and torture and terrorism. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

PHIL 235 (S) Morality and Partiality: Loyalty, Friendship, Patriotism (WI)
The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people—such as friendships, familial ties, love, patriotism—seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

PHIL 244 (S) Environmental Ethics (WI)
Crosslistings: PHIL244 / ENVI244

Secondary Crosslisting

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

PHIL 291 (F) Violence: Its Trajectory and Its Causes (WI)

This tutorial focuses on two books by Harvard psychologist Steven Pinker: The Better Angels of our Nature. Why Violence Has Declined (2011) and Enlightenment Now: The Case for Reason, Science, Humanism, and Progress (2018). We focus first on the controversial theses that—despite two world wars and the Holocaust—the twentieth century was not the most violent so far, and that, over the entire course of history, human beings have become decreasingly violent. We then turn to the books’ explanations of the factors they identify as leading us to be violent—our "inner demons"—and as curbing our violence—our "better angels," among which the books particularly emphasize reason, science, and humanism.

PHIL 337 (F) Justice in Health Care (WI)
Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice within the health care context. This will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform, which may itself include an analysis of the Affordable Care Act or current legislative proposals; justice in health care rationing, with particular attention to the relationship between rationing criteria and gender, "race," disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in less developed countries.

PHIL 388 (S) Consciousness (WI)
The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience--what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all--resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science's most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

Class Format: tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members convene

PSCI 160 (S) Refugees in International Politics (DPE) (WI)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants, evaluate international organizations’ roles in managing population displacement, and consider refugee camps in theory and example. In whose interest is the prevailing system? Who might change it, and how?

**PSCI 206 (F) Dangerous Leadership in American Politics (WI)**  
Crosslistings: PSCI206 / LEAD206  

**Primary Crosslisting**  
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

PSCI 291 (S) American Political Events (WI)

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events—concrete, discrete things that happen in and around the political world—are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did—with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

PSCI 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

**Secondary Crosslisting**

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics.
beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

### PSCI 359 (S) The Body as Property (DPE) (WI)

From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Crosslistings: PSYC317 / NSCI317

Primary Crosslisting

Do your genes determine who you are? This course examines the relative contributions of nature (genetics) and nurture (the environment) that lead to individual differences in behavior. Modern neuroscience techniques have discovered new relationships between genes and behavior. Conversely, recent studies on the effects of social factors suggest critical environmental influences on the expression of these genetic determinants. This tutorial will explore the theoretical and empirical issues in animal models of behavioral epigenetics. Topics include child neglect, antisocial behavior, addiction, anxiety, risk-taking, empathy, and depression. Each tutorial pair will design and conduct an empirical laboratory project that will explore their own experimental question about the interaction of genes and environment in determining behavioral phenotypes.

REL 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary “intentional communities”)? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

REL 262 (F) Time and Blackness (WI)
Crosslistings: AFR208 / REL262 / AMST208

Secondary Crosslisting
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, “Time and Blackness,” we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Crosslistings: REL269 / ASST269 / ANTH269

Secondary Crosslisting
This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the ‘kindness curriculum’ in schools, and other areas of applied research on mindfulness that have generated a ‘science of personal transformation’. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.
REL 289 (F) The Talmud on What it Means to be Human
Crosslistings: JWST289 / REL289

The Talmud, a central text in Judaism, is one of the richest and most sophisticated works of literature and thought ever produced. In this course, students will be introduced to the challenges and thrills of reading the Talmud as they consider how the Talmud asks and answers the question of what it means to be human. We will be particularly interested in exploring how the Talmud envisions human difference and similarity in terms of humans’ relationships with animals and material things. In addition to learning how to read the Talmud, therefore, students will also be introduced to burgeoning interdisciplinary theories and methods (Posthumanism and New Materialism) for considering what it means to be human in a world of animals and things.

RLSP 228 (S) Velázquez, Goya, and Picasso (WI)
Crosslistings: RLSP228 / ARTH228

Primary Crosslisting

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists’ relationship to their patrons and subjects,
from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

RUSS 140 (S)  Crime and Punishment in Russian History  (WI)

Crosslistings: RUSS140 / HIST140

Secondary Crosslisting

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial

Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Secondary Crosslisting

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

RUSS 331 (S) The Brothers Karamazov (WI)
Crosslistings: COMP331 / ENGL371 / RUSS331

Primary Crosslisting

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

SCST 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Secondary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

**THEA 222 (S) Solo Performance**

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

**THEA 255 (F) Performing Shakespeare**

This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (*Macbeth*, *Anthony and Cleopatra*, *Othello*), comedies (*The
Merchant of Venice, A Midsummer Night's Dream, Twelfth Night), and histories (Richard II, Richard III); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

Class Format: tutorial and lab; in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

WGSS 244 (F) Actually Existing Alternative Economies (DPE) (WI)
Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are
demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, ‘a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.’ Feminist geographers Julie Graham and Katherine Gibson developed practices of ‘mapping’ local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a ‘script’ of local helplessness to resist the ‘rape’ of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in co-operation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world’s great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams-Exeter Programme are required to be in residence in Oxford from Tuesday, 25 September 2018, until all academic work for Trinity term is complete (potentially as late as at least 28 June 2019) with two breaks for vacations between the three terms. Students enroll for the full academic year, which consists of three eight-week terms of instruction: MICHAELMAS TERM (7 October to 1 December 2018), HILARY TERM (13 January to 9 March 2019), and TRINITY TERM (28 April to 22 June 2019). Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 25 September 2018 for the ten-day orientation.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In their capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter’s subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student’s tutors, supervise the examinations that students sit at the end of each academic term, and report on each student’s academic progress to the Senior Tutor at Exeter College. There are no “add/drop” periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded, although in exceptional circumstances a tutorial may be converted to pass/fail before the end of the fourth week of term with the permission of the Programme director.

Students are required to enroll in two tutorial courses during Michaelmas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

GRADES AND CREDIT

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination.

Upon satisfactory completion of the requirements for the Williams-Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight-session tutorial plus final examination counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of their Grade Point Average.

Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College “Writing Intensive” designation, except for those in the studio arts, mathematics, and the sciences.
Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

THE COURSE OF STUDY

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Mathematics, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows in English Language and Literature (with interests ranging from the Renaissance—including Shakespeare—to the early nineteenth century), and in History (with an interest in the Ottoman empire) committed to teaching Williams students, and students are thus encouraged to consider undertaking at least one tutorial course in these fields as part of their course of study.

What follows is a PARTIAL list of tutorial courses normally available to students studying on the Williams-Exeter Programme at Oxford. The tutorials listed below represent a selection of some of the standard “papers” (courses) that comprise the Oxford degrees in various subjects and that are taught in tutorial format, although most are not offered every Oxford term. It needs to be emphasized that this is only a partial list, that the tutorial offerings at Oxford University are incredibly rich, and that one of the attractions of the Programme is that it enables students to define, develop, and pursue their academic interests. Students are therefore encouraged to explore all the courses offered at Oxford even if they are not listed in this Catalog.

Tutorial courses are not offered every term and are often accompanied by scheduled lectures. It is therefore imperative that students consult the relevant “faculty” webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed. It must be noted that study in the sciences is not normally accompanied by laboratory work; science majors seeking major credit for tutorials in the sciences should discuss this situation with their major advisors. Students interested in learning more about the possible courses of study available at Oxford should contact the Director of International Education and Study Away.

A full summary of the list of courses offered by subject can be found at: http://www.ox.ac.uk/admissions/undergraduate_courses/courses/index.html. Detailed descriptions of all the courses listed in this catalog can be found on the websites of respective departments or faculties of which can be found at: http://www.ox.ac.uk/divisions/department_az.html.

NON-CREDIT FOREIGN LANGUAGE STUDY

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non-credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. Students may put funds from their Programme Cultural Subsidy towards such study.

STUDENT LIFE

By virtue of the fact that, while in Oxford, they are officially Visiting Students at the University—and full members of Exeter College—Williams students are offered every opportunity to become fully integrated into student life in Oxford. Both Exeter College and Oxford University are home to an exceptional variety of sports clubs, debating societies, interest groups, cultural organizations, and social activities, virtually all of which are available to Visiting Student members of the University. Students are encouraged to participate fully in the social life of Exeter College—to dine in Hall as often as they wish, to frequent the College bar, to use the College’s athletic facilities, and to become members of the various College clubs and organizations. Furthermore, Williams students also have access to the University’s athletic events, concerts, theatrical productions, museums, and libraries. All Williams students in Oxford are encouraged to join the Oxford Union, which, in addition to its debating activities and club rooms, possesses dining facilities and the largest lending library in the University.

At the Ephraim Williams House, all Williams students are housed in large double rooms and enjoy full access to the House’s library, common rooms, laundry facilities, computer lab, and a large dining room, in which a weekly catered meal is served during the eight weeks of term. There are also a number of small kitchens in the House that students may use. The entire facility has high-speed wireless internet access. Bedrooms are hard wired for high-speed internet access and are fully equipped with furnishings, bed linens, and a telephone. The grounds include a courtyard, sheltered bike racks, and gardens. A number of student jobs are available during the academic year for students who wish to earn a little spending money by helping to maintain the facilities and organize Programme activities. Ephraim Williams House is a short bike or bus ride (or a twenty-minute walk) from Exeter College and the center of town, and is within easy walking distance of the University parks and the local shops, restaurants and banks of Summertown. The Programme will partially subsidize student bus passes to facilitate travel around Oxford. The Programme also has a large fleet of bikes for student use.

Before the academic year begins—ten days of orientation activities are scheduled. Students are expected to be in residence for all of these many activities, some of which take place in Ephraim Williams House, others at Exeter College. At this time students will become acquainted with the
Throughout the academic year, provision will be made for trips to a few of sites of historical, cultural, or political interest. In the past these have included the Cotswolds, Stratford, Stonehenge, Bath, Wimbledon, Warwick Castle, Blenheim Palace, and various sites of interest in London. Students will also be given the opportunity to attend a number of theatrical productions and other cultural events. Oxford’s proximity to London gives students ready access to that city’s multiple attractions and many resources. The Oxford-London train service is frequent and the journey takes just over an hour. The buses to London run even more regularly (and are generally cheaper), and the one-way journey takes about ninety minutes.

During the summer before students arrive in Oxford, they will receive a copy of the latest edition of “The WEPO Handbook,” which will further explain the perks, policies, and procedures of the Programme, the rules and regulations they are expected to follow, and tips for how best to enjoy a fulfilling year in and around Oxford.

ILLNESS AND INSURANCE

Students must ensure they are covered either by the Williams College health insurance policy or by some other comprehensive health insurance plan (generally a family health insurance policy). While in Britain, students will be covered by the National Health Service (NHS) for routine visits at the Group Medical Practice used by Exeter College and for emergency hospital treatment. The Programme also works with a physician in private practice attached to a local private hospital. Prescription drugs are available through the NHS for a nominal fee. There are limited outpatient psychological counseling services available through the NHS and the Programme, although, as Visiting Students at the University, Williams students are entitled to make use of the University Counseling Centre. Any extensive or long-term counseling, however, would need to be covered by the student’s personal health insurance policy. Finally, students are not likely to be covered under the NHS for medical services received in foreign countries.

FEES

The tuition and room fees paid by students on the Williams-Exeter Programme at Oxford are the same as those for a year spent in residence at Williams. Students are responsible for some of their own meals and for all of their personal expenses. They are also responsible for arranging and funding the cost of their air travel to and from Britain, although many students opt to take the same flight from JFK. They are provided with three meals a day for the first four or five days in Oxford and with a weekly catered meal in Ephraim Williams House during the eight weeks of term. They may also eat breakfast, lunch, and/or dinner on any day of the week at Exeter. Students will not be charged the full Williams board fee during their year in Oxford, but they will pay a proportion of the board fee to help cover these costs. For planning purposes, students and their parents should expect the cost of a year on the Programme to be roughly the same as a year at Williams. Financial aid eligibility will be figured on the usual basis of tuition, fees, room, board, and personal and book expenses, as if the student were at Williams for the year. Similarly, the normal self-help contribution would be expected. Since the academic year ends later at Oxford than at Williams, the summer earning expectations for students for the following year will be reduced by one half and the difference will be made up by additional Williams aid.

APPLICATION

Admission to the Programme is competitive. Students must apply to the Dean’s Office by the prescribed deadline (normally early in February) and, prior to applying, should consult with the chair of their major department. Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford. In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College’s distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams-Exeter Programme at Oxford University takes student GPA into account, with a general expectation of a minimum GPA of 3.0. More importantly, we expect all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and looks favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant’s writing ability.

WIOX Historiography and Methodologies of Art History

An overview of the development of the History of Art as a discipline. The course surveys influential projects of the field and the methods it has adopted for executing them. Topics include: style and periodization; iconography, semiotics; narratology, spectatorship; the social functions of images and the social history of art; art and the market; gender and sexuality; and art-historical narrative as representation. With permission of the Art Department, counts as ARTH 301.

Prerequisites: ARTH 101-102. Lectures: MT and HT, with permission. Tutorials: depending on availability, any term.

WIOX Period of Literature or Period Topics
Courses offered by the Faculty of Oriental Studies include language, literature, history and culture, and there are a wide range of options in such fields as art and archaeology, history, literature, philosophy, religion and modern social studies. Some of these courses may require knowledge of the primary sources. It is imperative that students possess the requisite language skills before requesting any of these courses.

WILLIAMS-MYSTIC MARITIME STUDIES PROGRAM
Executive Director: Thomas Van Winkle

Associate Professors: C. Hall (Williams College), L. Gilbert (Williams College), M. Bercaw-Edwards (University of Connecticut). Assistant Professor: T. Pusack (Williams College).

The Williams College-Mystic Seaport Maritime Studies Program offers students a unique opportunity to explore the ocean, travel the Atlantic, Pacific, and Gulf coasts, and conduct original primary research of their own design in the humanities and sciences. Williams-Mystic is considered the coastal and ocean studies campus of Williams College. Sophomores, juniors, and seniors of all majors welcome to apply. A term at Williams-Mystic includes credit for one semester plus one Winter Study requirement, as well writing-intensive course credit. Four Williams courses are offered as an interdisciplinary curriculum in the semester-long program based at Mystic Seaport, in Mystic, Connecticut: Americans and the Maritime Environment, Literature of the Oceans, Marine Policy, and either Marine Ecology or Oceanographic Processes. Travel includes an offshore voyage on the open ocean sailing aboard a tall ship, a seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross-disciplinary and interdisciplinary exercises. The Spring 2019 semester will include a field seminar to Sitka, Alaska. Students live in historic, cooperative, co-ed houses at Mystic Seaport, the world’s largest maritime museum, and have full access to world-class maritime collections, a maritime library, a state-of-the-art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tide pools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as ship carving, music of the sea, boat building, or small boat handling and sailing. Williams-Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Admission is competitive, and interested students should email wmadmissions@williams.edu, call 860-572-5359, or visit the Williams-Mystic website.

BIOL 231 (F) Marine Ecology
Crosslistings: BIOL231 / MAST311
Secondary Crosslisting
Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project
Requirements/Evaluation: two tests, a research project, and a presentation
Extra Info: offered only at Mystic Seaport
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Distributions: (D3)
Attributes: ENVI Natural World Electives; EVST Living Systems Courses; EXPE Experiential Education Courses

ENGL 231 (F) Literature of the Sea (WI)
Crosslistings: MAST231 / ENGL231
Secondary Crosslisting
Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story
writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

**Class Format:** small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final paper

**Extra Info:** offered only at Mystic Seaport

**Extra Info 2:** may not be taken on a pass/fail basis; not available for the fifth course option

**ENVI 26 (W) Material Culture and Craft of 19th Century Coastal New England**

Crosslistings: ENVI26 / MAST25

**Secondary Crosslisting**

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvasworks, and boatbuilding.

**Class Format:** Williams-Mystic

**Requirements/Evaluation:** performance-based evaluation using exemplars, experts and authentic audience; final paper or project

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** by application

**Materials/Lab Fee:** $1,500

**Attributes:** EXPE Experiential Education Courses

**ENVI 351 (F) Marine Policy**

Crosslistings: ENVI351 / PSCI319 / MAST351

**Secondary Crosslisting**

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy,
examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

**Class Format:** lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

**Requirements/Evaluation:** an independent research paper, a presentation, and a final exam

**Extra Info:** offered only at Mystic Seaport

**Secondary Crosslisting**

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Crosslistings: HIST352 / MAST352

**Secondary Crosslisting**

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

**Class Format:** lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

**Requirements/Evaluation:** two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

PSCI 319 (F) Marine Policy
Crosslistings: ENVI351 / PSCI319 / MAST351

Secondary Crosslisting
This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean
governance.

**Class Format:** lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

WILLIAMS PROGRAM IN TEACHING
Director: Susan Engel

The Program in Teaching offers a coordinated cluster of courses, advising and field work that give students the opportunity to study the ideas, questions, and practices involved in good teaching at all levels. The Program seeks to promote and facilitate an exchange of ideas about teachers, learners, and schools, within and beyond the Williams campus. The Program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach.

Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology, for example) and the process of teaching those topics to elementary and high school students. The Program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

No specific major is required to participate—although some lend themselves easily to certification, such as Mathematics, English, Biology, American History, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work. More information can be found at program-in-teaching.williams.edu.

AMST 379 (F) American Pragmatism
Crosslistings: PHIL379 / AMST379

Secondary Crosslisting
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

PSYC 341 (S) Stereotypes, Prejudice, and Discrimination (WI)
Crosslistings: PSYC341 / WGSS339

Primary Crosslisting
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will
examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

TEAC Teaching Sequence Courses

PSYC 101 (F) Introductory Psychology
An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

PSYC 232 (F) Developmental Psychology
An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, and family systems.

Class Format: lecture/discussion
PSYC 242 (F) Social Psychology
A survey of theory and research in social psychology. Topics include the self, social perception, conformity, attitudes and attitude change, prejudice, aggression, altruism, attraction and love, intergroup conflict, and cultural psychology. Applications in the areas of advertising, law, business, and health will also be discussed.

PSYC 272 (S) Psychology of Education
This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.
Class Format: lecture/discussion
Requirements/Evaluation: two exams and a final project
Extra Info: may not be taken on a pass/fail basis
Prerequisites: PSYC 101
Enrollment Limit: 50
Enrollment Preferences: Psychology majors and those who plan to become teachers
Expected Class Size: 50

PSYC 327 (F) Cognition and Education
This class will focus on basic research into the cognitive processes underlying learning. How does the mind encode, store, and retrieve knowledge? How do learners (and teachers) manage their own learning? How do educational practices depart from what research recommends? The readings will be scientific articles. Students will do original research.

Class Format: empirical lab
Requirements/Evaluation: class participation, daily quizzes, research papers

PSYC 338 (S) Inquiry, Invention and Ideas
Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Class Format: seminar
Requirements/Evaluation: three 3-5 page essays, two child observations and a 7-10 page final paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

PSYC 372 (F) Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students’ learning? What does it take to be an educated person?
Class Format: seminar

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

--------------------------------------------------------------------------------
Winter Study, which began in January of 1968, is intended to provide students and faculty with a dramatically different educational experience. The differences are in the nature of the courses, the nature of the learning experience, and the change of educational pace and format from fall and spring semesters. These differences apply to the faculty and students in several ways: faculty can try out courses with new subjects and techniques that might, if successful, be used later in the regular terms; they can explore subjects not amenable to inclusion in regular courses; and they can investigate fields outside their usual areas of expertise. In their academic work (which is graded Pass, Perfunctory Pass, or Fail) students can explore new fields at low risk, concentrate on one subject that requires a great deal of time, develop individual research projects, or work in a different milieu (as interns, for example, or on trips outside Williamstown). In addition, Winter Study offers students an opportunity for more independence and initiative in a less formal setting, more opportunity to participate in cultural events, and an occasion to get to know one another better. More information can be found on the Winter Study website.

Registration

All students who will be on campus during the academic year must register for a Winter Study course. Registration will take place in early November. If you are registered for a senior thesis in the fall which must be continued through Winter Study by departmental rules, you will be registered for your WSP automatically. In every other case, you must complete registration. First-year students are required to participate in a WSP that will take place on campus; they are not allowed to do 99’s.

If you think your time may be restricted in any way (ski meets, interviews, etc.), clear these restrictions with the instructor before signing up for their project. Remember, for cross-listed projects, you should sign up for the subject you want to appear on your record. For many beginning language courses, you are required to take the Winter Study Sustaining Program in addition to your regular course. You will be automatically enrolled in this Sustaining Program once the Winter Study registration process is complete. Winter Study courses are graded Pass/Perfunctory Pass/Fail. A grade of pass means the student has performed satisfactorily. A grade of perfunctory pass signifies that a student's work has been significantly lacking but is just adequate to deserve a pass. Students who fail their Winter Study Projects or receive a second Perfunctory Pass will be placed on academic probation by the Committee on Academic Standing and will be required to make up the deficiency. Students who fail through gross neglect of work will normally be required to resign.

99s

Sophomores, juniors, and seniors are eligible to propose “99s,” independent projects arranged with faculty sponsors, conducted in lieu of regular Winter Study courses. Perhaps you have encountered an interesting idea in one of your courses which you would like to study in more depth, or you may have an interest not covered in the regular curriculum. In recent years students have undertaken in-depth studies of particular literary works, interned in government offices, assisted in international and domestic medical clinics, conducted field work in economics in developing countries, and given performances illustrating the history of American dance. Although some 99’s involve travel away from campus, there are many opportunities to pursue intellectual or artistic goals here in Williamstown. More information about Winter Study 99s can be found online.

AFR 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Primary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about “Negro culture in the South.” Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Tallevast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local
historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

**AMST 10 (W) New(ish) and Rare: Special Collections in the 20th century**

What makes relatively recent books and manuscripts worth preserving? Whose voices are missing from the library’s collections? Students in this course will explore the market for 20th-century rare books and manuscripts and recommend items for Special Collections to purchase. We will spend our first two weeks exploring the library’s existing collections of 20th-century Americana, focusing on what makes these books and manuscripts valuable—not just in terms of their cost but their usefulness in supporting teaching and student research. We’ll explore the market for antiquarian books, and we’ll consider how social movements and historical events including second-wave feminism, workers’ strikes, and the civil rights era are documented in primary sources. Outside of class, students will spend additional hands-on time with rare materials in the Special Collections reading room. Students will also search printed and online catalogs from booksellers who specialize in 20th-century material to look for potential additions to our collections. Given a theoretical budget of $1000, each student will assemble a proposal to acquire a new collection of books and manuscripts for the Chapin Library or the College Archives. We’ll spend the final week of class presenting these proposals to the Chapin Librarian, who will approve a selection of items to purchase for our collections. Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography.

Crosslistings: AMST11 / HIST10

Secondary Crosslisting

This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students' engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.

**AMST 14 (W) The Davis Center Histories**

This course will explore the history of the Williams College Davis Center (DC), formerly the Multicultural Center. In exploring this history, the course readings and discussions will contextualize the local specificities of the Center’s establishment within broader U.S. academic, political, and cultural discourses on student-led protest, the evolution of multiculturalism, the centrality of Black resistance, and the import of cultural specificity in creating an equitable and just world. The course will thus rely on resources in the College archives, and students will be encouraged to hone their research skills, but will also rely on communal construction of a theoretical framework to analyze the archived history of the Center while attending to the DC’s current mission to facilitate conversations about race, gender identity, sexual orientation, class, religion, and ability. Readings will include work by Kimberlé Crenshaw, Patricia Hill Collins, Roderick Ferguson, Houston Baker, E. Patrick Johnson, Jeff Chang, Sami Schalk, and more. Students will be encouraged to engage in critical and constructive discussion about the historical place and work of the Davis Center, and contribute to that work with assignments that include weekly personal reflections and program proposals to enhance the curriculum and programmatic itinerary of the Center.

AMST 15 (W)  Contemporary American Songwriting
Crosslistings: MUS15 / AMST15

Secondary Crosslisting
This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years. She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C. In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

Class Format: mornings

**ANSO 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions**

Crosslistings: PHLH14 / ANSO14 / CHEM14

Primary Crosslisting

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course.

Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

Class Format: at least three times a week for a total of 6 hours

**ANSO 16 (W) The Ayn Rand Cult**

Crosslistings: COMP16 / ANSO16 / RLSP16

Secondary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of *Atlas Shrugged* in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, *The Ayn Rand Cult*; Mary Gaitskill, *Two Girls: Fat and Thin*; Gene H. Bell-Villada, *The Pianist Who Liked Ayn Rand* (selections) and *On Nabokov, Ayn Rand and the Libertarian Mind*; and John Locke, *Second Treatise of Government*. We will also view two films: the movie version of *The Fountainhead* (1949) and the 1996 documentary *Ayn Rand: A Sense of Life*. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

Prerequisites: some previous acquaintance with Rand's novels

Enrollment Limit: 30
Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)

ANTH 12 (W) Coastal Navigation
Students will learn basic skills for piloting a small vessel in coastal waters using a compass and paper charts. Areas to be covered include: basic rules of navigation; reading nautical charts; recognizing and interpreting aids to navigation (buoys, lighthouses, etc.); reading a magnetic compass; plotting a position on a chart; plotting a course by dead reckoning; planning and charting a voyage; the use of standard navigation references; the use of open source chartplotting software. Work outside class meetings will consist of assigned readings and practice plotting.

ANTH 15 (W) Photographic Literacy and Practice
Crosslistings: ANTH15 / SOC15

Secondary Crosslisting
When you look at a photograph, what is it really saying? How can you make photographs that say what you mean? This course will educate students on the concepts of photographic seeing and visual literacy, while also training students to apply these concepts to their own photography. In class we will review historical and contemporary photography, photobooks, and other sources of visual inspiration. Students will conceptualize and photograph a project of their own choosing. Students will learn to defend their work during in-class critiques, and at the end of the course the class will design and produce an exhibition of their photography. Outside of class, students will be expected to photograph on their own in the Williamstown area and access to a car may be helpful.

Class Format: three times per week--Mondays and Fridays from 10am-12pm and Wednesdays from 1pm-5pm

**ARTH 10 (W) From Metal to Money: Ancient Numismatics**
How were coins made and circulated in the ancient world? Why did a city or individual choose to mint coins? What role did coins play in people's lived experience, as well as in Greek and Roman visual culture? In this course, we will explore the Western coinage tradition from its origins through Late Antiquity, using the college's own numismatic collection as a basis for methodological discussions and for individual research. In consultation with the professor, each student will select coins from the collection and relate it to each of the different methodological issues under investigation. These topics will include mint and die studies; analysis of coin hoards; approaches to coin finds in archaeological excavation; the use of coins as historical "documents"; and the iconography of Greco-Roman coinage as it relates to classical art history. For most class meetings, students will present a short report on how the methodological issue under discussion relates to specific coins they have selected from the college's collection, before choosing a final research project. In addition to the hands-on experience of working with these coins, we will also survey the different historical coinages from antiquity (e.g., Classical Greek, Hellenistic Greek, Roman Republican) through a series of illustrated lectures.

ARTH 11 (W) Editorial Cartooning and the Art of Propaganda
Crosslistings: ARTH11 / PSCI11

This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of The Berkshire Eagle. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

Class Format: afternoons

ARTH 16 (W)  True and Wild Tales: Argentine Cinema after 1985
Crosslistings: ARTH16 / LATS16

**Primary Crosslisting**

The Argentine film industry is one of the most developed in the Spanish-speaking world. It is rich in genres and production scales, and in the issues raised by the films themselves. This immersive course encourages dynamic engagement with these issues, as we watch films that grapple with the country's painful legacy of dictatorial rule, coming-of-age road movies, familial dramas, and riotous comedies that feature that distinctive, biting Argentine humor. Our meetings consist of three mandatory screenings per week, two of which are followed by class discussion. In addition to learning about the Argentine context, we will learn vocabulary and tools for discussing and writing about film. No previous coursework in film, or fluency in Spanish required (the films are subtitled)--only an interest in contemporary Argentine cinema and culture.

ARTH 17 (W)  Architectural Models

Architectural history is generally taught by photographs, which compress three-dimensional things into two-dimensional projections. But describing the dynamic nature of architectural space with a flat image is like describing an ice cream flavor with a flow chart. In this course groups of four or five students will receive measured drawings of major American buildings and construct models at quarter-inch scale. Possible subjects include works by Venturi, Wright, Eisenman, and Jefferson. No previous architectural experience is necessary. After the initial two sessions, there will be two three-hour studio sessions each week where the instructor will critique the projects. At a final meeting, a jury will review the models.

Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

**Secondary Crosslisting**

The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st
century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums--from art museums to scientific, historical, and specialty collections--and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

ARTS 12 (W) Portrait Painting: from Fayum mummies to the Obamas

This course will be a hybrid of studio practice and a visual survey of the painted portrait, tracing various approaches to portraiture and mark-making, from the Fayum mummies to the recently unveiled portraits of Barack and Michelle Obama, in order to inform the ways by which we will, throughout the course, paint portraits (of oneself or another). The course will culminate in a final exhibition of each participant's painting, which will be worked on throughout the duration of the winter study, in- and outside of class. We will begin the course by looking to a range approaches to portraiture and engaging in various drawing and painting exercises, before spending the bulk of the remaining time working towards a single, polished painting, in oil or acrylic on canvas or panel. We will analyze many of the touchstone examples of portraiture over the centuries to survey a range of styles and how their respective techniques and painted marks reflected the zeitgeist, or collective psychology of a time and place, in order to inform our own painted works. The course will meet three times per week to engage in dedicated studio work, and group analysis of historic examples of painted portraits.

Outside of class, students will be expected to continue their studio work, as well as additional drawing or painting exercises, readings, and possible film screening(s). The final project, a single portrait painting, will be displayed in a group exhibition in the Spencer Art Building at the culmination of the Winter Study period, at which time each artist will present their finished work. No experience necessary, but some background in painting and drawing is a plus. Adjunct Instructor Bio: William Binnie (born Dallas, TX, 1985) is a visual artist living and working in Williamstown, MA and Brooklyn, NY. His work has been exhibited nationally and internationally and is held in a number of public and private collections across the United States, Europe, and Asia. Binnie's work is currently on view at MassMoCA's "The Lure of the Dark: Contemporary Painters Conjure the Night," through 2019. ARTS 13 (W) Creative Portraiture in the Darkroom

Crosslistings: ARTS13 / RLFR13

Secondary Crosslisting

In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudouffée, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

ARTS 14 (W) Results May Vary
An exploration of cross-disciplinary sampling: digital and visual art, sculpture, sound, music, moving image, text, theater. Paul de Jong presents the vast media archive the Mall of Found as a point of departure for discussion and as the resource for creative exploration, touching upon issues specific to the inception, production and presentation of art using sampled sources. De Jong will address topics related to the creative process and issues specific to the field of sampling: integrity in appropriation, conflict in collaboration, developing method and technique, making your own rules and having changes of heart, documenting and archiving, commercial considerations, presentation and audience subjectivity. Participants will receive a detailed introduction to the archive and its makeup. Throughout, access will be given to the digital collection. The physical archive (housed in North Adams, MA) will be accessible by appointment and through weekly group excursions. After determination of individual and collective goals, emphasis shall be given to a hands-on creative approach, outside-of-class. In-class time will be set aside for weekly individual presentations and critiques, as well as daily group meetings for topical discussions. The course may result in individual or group works presented in a gallery show, as a theatrical musical performance, a movie showing, a web production, printed matter, publications, or readings. Paul de Jong's Mall of Found is home to a wealth of assorted fringe media and ephemera. This includes some 5,000+ VHS, 1,500 LP's, 5,000 cassette tapes, as well as photography, printed matter and film, numbering over 100,000. The subject matter is sprawling, favoring independent and amateur production and analog forms. Categories include: televangelism, self-help, hunting, meditation, technical, instructional, medical and much more. Paul de Jong (formerly of the Books) recently released his second solo album You Fucken Sucker.

ARTS 15 (W) Shadow Puppetry
Crosslistings: ARTS15 / THEA15
Secondary Crosslisting
The ancient art of shadow puppetry has seen a resurgence in contemporary art and theater. William Kentridge writes, "It is in the very limitations of shadows that we learn...It is in the gap between the object and its representation that the image emerges, the gap we fill in." In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g. William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

ARTS 20 (W) Performing Self-Portraiture in the Age of Instagram
Crosslistings: THEA20 / WGSS20 / ARTS20

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacolby Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Adjunct Instructor Bio: Kameron Neal is a queer Black video artist and performance-maker based in NYC. His work has been seen and developed at Ars Nova, BAM, La MaMa, New York Theatre Workshop, Soho Rep., Digital Graffiti Festival, Vox Populi and Yale’s Center for Contemporary Arts and Media. ASTR 16 (W) An Infinity of Worlds: Planets and the Search for Life
Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using remotely-operated telescopes in Australia to gather data on new planets. This course, meant for non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Adjunct Instructor Bio: Rob Wittenmyer '98 is Associate

**BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES**  
BioEYES brings tropical fish to 3rd grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish in the classroom, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in
genetics and development, help the 3rd grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week students will learn to set up fish matings, and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, an elementary school teacher, currently coordinates Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. Adjunct Co-Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

**BIOL 12 (W) : New Orleans-Style Jazz and Street Performance**

This course has a focus on making music based on the principles of improvisation and street performance embodied by New Orleans-Style jazz. Typically composed of brass instruments, this course welcomes musicians and performers of all types, from the classically trained to those with no experience who are willing to play washboards, kazoois, and experiment with other forms of sound-making. For when you travel the world after Williams, this course will prepare you to "busk," or make money playing music on the street, where some of the most dynamic forms of jazz and improvisation have been created. The course will include various street performances and culminate with a "gig" in a local music venue. We will meet twice a week for three-hour sessions, with extra band practices, five hours per week, and performances to be scheduled in accordance to our needs--attendance mandatory. Adjunct Instructor Bio: Andy Kelly, a local Jazz musician and former busker, Williams College Class of '80, now travels the world bridging cultures with music, using American jazz to make peace in the world.

**Class Format:** afternoons

**Requirements/Evaluation:** original musical composition with in-class performance; 2-page short research paper and oral presentation; final performance for 'all college' audience

**BIOL 13 (W) Introduction to Animal Tracking**

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slideshow. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Adjunct Instructor Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent
programs for private groups and associations.

**Class Format:** 10:00am to 3:00pm two days a week

**BIOL 25 (W) Sustainable Agriculture in California**

Crosslistings: BIOL25 / ENVI25

**Secondary Crosslisting**

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

**Class Format:** travel

**Requirements/Evaluation:** 10-page paper; synthetic journal of field experiences to be produced by the group

**Prerequisites:** none, but see preferences for over-enrollment; not open to first-year students

CHEM 10 (W)  Persuasive Presentation--Maximize your Impact
The objective of this course is to introduce a process for preparing and delivering oral presentations with accompanying visuals to enable anyone to maximize their impact. In many fields the ability to transform detailed personal knowledge of a subject into a more broadly accessible message is critical to both personal and organizational success. Often individuals are well prepared as subject matter experts, however, the ability to leverage that expertise into setting a direction or advocating for policy change is learned through trial and error. The instructor of this course has over 25 years of experience presenting scientific and product information in a corporate environment to internal and external customers. This course will focus on a deliberate method for developing persuasive communication that is both engaging and effective. The in-class portion of this course will focus on instruction with a heavy emphasis of “hands on” practice including iterative brainstorming, group sharing and feedback around presentation design, content optimization and oral delivery. The topics for these in class exercises will primarily be provided practice subjects and data sets related to everyday sales pitches and issue advocacy. Student provided topics will also be encouraged. Assigned work outside of class will focus on selected readings, viewing presentations by relevant thought leaders and developing a final presentation on a topic of interest to the student. Students should be prepared to develop ideas they wish to communicate about and preference will be given to students who can articulate concepts they wish to communicate about. This course will utilize Microsoft PowerPoint and Microsoft Excel; students do no need to have expertise in these platforms, however, basic familiarity will be helpful. Adjunct Instructor Bio: Jamie Gardner holds a Ph.D. in Inorganic Chemistry from MIT and leads 3M's Global Fall Protection Laboratory. Over the last 25 years he has focused on the commercialization of Photosensitive, Pest Elimination, Electronic Adhesive, Lithium Ion Battery, Cleaning and Fall Protection products. In pursuit of these efforts he has developed and taught a process utilized to update and influence co-workers, executive stakeholders, customers, external investors and sponsoring government agencies.

CHEM 13 (W)  Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, cleansing, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, healthy skin care, and finding your happiness. Adjunct Instructor Bio: Nicole Anagnos is Health Coach and Director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klo Organic Beauty. She also holds a master's degree in education.

Class Format: twice a week for three-hour sessions as a group

Requirements/Evaluation: completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth

CHEM 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions

Crosslistings: PHLH14 / ANSO14 / CHEM14

Secondary Crosslisting

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course. Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning
programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

CHEM 19 (W)  Methods in Environmental Chemistry

Crosslistings: CHEM19 / ENVI19

Primary Crosslisting

This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

**CHIN 11 (W) Shanghai Cuisine**

Food plays a quintessential role in Chinese culture. Approaching the foot ways in various regions in China provides a unique path to a better understanding of the richness and diversity of China's regional cultures. Shanghai cuisine (benbang cai), originated in Shanghai and developed its cooking style under the profound influence of those surrounding regions, is a very popular branch of Chinese food. This hands-on course introduces the culinary tradition of many famous Shanghai dishes. The instructor will demonstrate how to turn those fresh raw ingredients and special seasonings into "color-aroma-tasty" Shanghai style dishes. (e.g. soup dumplings, wantons, eight-treasure rice puddings, red braised pork, sweet and sour spare ribs, crystal shrimp etc.) Through discussions of reading and videos, hands-on practices, as well as independently cooking of certain dishes, students will gain insight into the Shanghainese way of life. Students will be expected to complete assigned readings and videos outside class, participate discussions and cook with the instructor in class, make a few recipes of what they cook, and write a 10-12-page final essay. The final essay should include 5 to 6 finalized recipes of the dishes students cook and a conclusion. There is a mandatory field trip to a traditional Shanghai restaurant.

Important reminder: for students who have food allergies and/or who are vegetarians please inform the instructor and consult your healthcare professional before the course starts on January 3rd, 2019. Adjunct Instructor Bio: Wendy Wan has extensive experience teaching Chinese language and culture at K-12 levels in the United States. She is a Shanghai native and a food enthusiast.

**Class Format:** two three-hour sessions per week from 10:00 AM to 1:00 PM

**Requirements/Evaluation:** attendance of all cooking classes and mandatory field trip (50%); in-class efforts (20%); assignments including readings, videos, recipe and reflection paper writing (15%); 10-12-page final essay, which includes student made recipes and conclusion (15%)

Interested in learning first-hand about Taiwanese culture and becoming acquainted with what has been called the “Taiwan (economic and political) miracle”? Want to improve your knowledge of Mandarin, the language with the largest number of native speakers in the world? Then join us on this 23-day study tour to Taiwan, Republic of China. We'll spend the first two weeks in Taipei, the capital city, where 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Mandarin Center of National Taiwan Normal University. After class we'll meet as a group for lunch and discussion. Activities with Taiwanese university students and visits to cultural and economic sites of interest will be scheduled for some afternoons and Saturdays, with other afternoons, evenings, and Sundays free for self-study and individual exploration. During the last week, we'll travel to central and southern Taiwan, staying at small hotels and youth hostels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience.

How were coins made and circulated in the ancient world? Why did a city or individual choose to mint coins? What role did coins play in people's lived experience, as well as in Greek and Roman visual culture? In this course, we will explore the Western coinage tradition from its origins through Late Antiquity, using the college's own numismatic collection as a basis for methodological discussions and for individual research. In consultation with the professor, each student will select coins from the collection and relate it to each of the different methodological issues under investigation. These topics will include mint and die studies; analysis of coin hoards; approaches to coin finds in archaeological excavation; the use of coins as historical "documents"; and the iconography of Greco-Roman coinage as it relates to classical art history. For most class meetings, students will present a short report on how the methodological issue under discussion relates to specific coins they have selected from the college's collection, before choosing a final research project. In addition to the hands-on experience of working with these coins, we will also survey the different historical coinages from antiquity (e.g., Classical Greek, Hellenistic Greek, Roman Republican) through a series of illustrated lectures.

CLAS 15 (W)  Plato's Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15
Primary Crosslisting
Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

COMP 10 (W)  Constructing Gender and Body in the Gym  
While it may not be written on the campus map, it's common Williams knowledge that the gym on upper Lasell is called "the EstroGym." Have you ever wondered why cardio spaces, like the EstroGym, seem to be occupied predominantly by women while weight rooms (think Lower Level Lasell) are filled with men? We will explore the answers to this and many more questions in this hybrid physical and academic course. Half of this course will be a critical exploration of phenomena that are often taken for granted within the fitness industry. We will discuss the ways in which cultural understandings of gender and bodies are created and reinforced in physical activity spaces. Topics will include the cultural reinforcement of the gender binary, the policing of nonconforming identities in physical spaces, hegemonic masculinity in the gym, and the social construction of ideal femininity and masculinity. Much of our reading will be grounded in feminist and sociological theory (L. Heywood, *Bodymakers: A Cultural Anatomy of Women's Body Building;* Markula & Pringle, *Foucault, sport, and exercise: Power, knowledge, and transforming the self*) but will also include text and visual sources from CrossFit gyms, international weightlifting competitions, bodybuilding shows, and more. The other half of this course will be taught in the weight room, where students will learn proper strength training form and technique. It is a suitable introduction for novice lifters as well as an opportunity for experienced lifters to improve and refine their technique. Students will explore the differences between powerlifting, Olympic weightlifting, and bodybuilding and will have the opportunity to practice these different forms. This includes, but is not limited to, the following exercises: squat, deadlift, overhead press, bench press, clean, jerk, push-up, and pull-up. Outside of class meeting times, students will be expected to complete readings, brief writing assignments (1-2 pages max), gym observations, short film viewings, and gym selfies (seriously). Depending on class size and logistics, we may take 1-2 field trips to other local gyms for observation purposes. Details TBA. **IMPORTANT NOTE:** This course is open to students with any type of lifting experience (from zero physical activity background to Olympic athlete). This also includes students with any form of disability, so long as they are cleared by a licensed medical provider.

**Requirements/Evaluation:** 2- to 3-page paper and final project  
**Prerequisites:** none -- open to those with any type of lifting experience (no experience to Olympic athlete), including students with any form of

A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country's queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

COMP 12 (W)  The Grand Hotel in Modern Fiction and Film

Crosslistings: COMP12 / GERM12

Secondary Crosslisting

The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and possible class confusion, of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Grand Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality. In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a riotous echo chamber, mirroring precarious lives of illegal migrants and displaced workers.

This course will serve as an intensive introduction to Fanon's philosophical and political writings, which continue to stand as some of the most influential and rousing works of the twentieth century. Born in Martinique and trained in France as a psychiatrist, Fanon spent the last decade of his life in Algeria, where he joined the struggle for national liberation. Marked by a layered history of anti-colonial struggle in the Caribbean, Europe, and North Africa, as much as by a commitment to the world-wide projects of decolonization and revolution, Fanon's writing has been taken up by protest movements around the world, from South Africa to Sri Lanka, from the Black Panthers to queer theory.

COMP 15 (W)  Plato's Symposium and Its Afterlife
Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15
Secondary Crosslisting
Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

COMP 16 (W)  The Ayn Rand Cult
Crosslistings: COMP16 / ANSO16 / RLSP16
Secondary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of *Atlas Shrugged* in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, *The Ayn Rand Cult*; Mary Gaitskill, *Two Girls: Fat and Thin*; Gene H. Bell-Villada, *The Pianist Who Liked Ayn Rand* (selections) and *On Nabokov, Ayn Rand and the Libertarian Mind*; and John Locke, *Second Treatise of Government*. We will also view two films: the movie version of *The Fountainhead* (1949) and the 1996 documentary *Ayn Rand: A Sense of Life*. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

CSCI 11 (W)  Hour of Code
Knowledge of computing fundamentals empowers people with a unique set of problem-solving skills. These skills are currently in high demand and are expected to remain so in the foreseeable future. Yet computer science isn't just a useful skill—it's also a limitless canvas for expressing one's own creativity. Computer science is interesting and fun! Hour of Code is a one-hour, hands-on workshop that introduces young students to computer science. Not surprisingly, mastery of computer science takes a bit longer than one hour. Therefore, the goal of Hour of Code is simply to demystify computer programming. A typical workshop blends self-paced activities with in-class tutorials. The best Hour of Code experience inspires participants to pursue further study in computer science on their own time. The first half of this winter study course exposes you to elementary programming, the nuts and bolts of pedagogy, and prepares you to run an Hour of Code workshop. The second half puts your training into practice: you will organize and run an Hour of Code workshop in a Berkshire-area middle school. No prior computer science knowledge is required. The only prerequisite is a love of technology and an enthusiasm for working with young learners.

CSCI 12 (W)  Stained Glass Tiling: Quasicrystals and Geometric Solids, Building an Invisbility Cloak
In this course students learn geometric drawing, design, and the traditional craft skills needed to build a stained glass window. Each student will make a single panel of stained glass from a mosaic of transparent colored glass tiles. Students will learn how to cut glass; to paint and print on glass with kiln-fired enamels; to assemble, solder, patinate and frame a stained glass window. Instructional sessions on the use of tools and safe handling of materials are included where necessary. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up a group exhibition of work, and tidying the lab at the end of Winter Study. This course is time-consuming. More information may be found at https://coombscriddle.wordpress.com/2016/03/28/stained-glass-tiling-the-process/ Adjunct Instructor Bio: Debora Coombs' stained glass windows are exhibited and commissioned internationally. She is a Fellow of the British Society of Master Glass Painters with a Masters degree from London's Royal College of Art and 35 years of experience in the design, fabrication and teaching of stained glass. CSCI 16 (W)  Introduction to Tech Entrepreneurship

This course provides an introduction to the fundamental aspects of building a technology startup. It's one thing to make software—and it's another to build a successful software company. You will learn how to develop product/market fit, how to build an MVP (minimum viable product), how to market products on a budget, organizing and running a team, shipping software, and the different types of corporate structures. You'll learn from a range of successful entrepreneurs and industry experts, through their writings as well as short guest appearances (via video calls) during classroom sessions. Students will create a demo and 5-minute pitch (pitch deck optional) by the end of the course. For the product demo, students can choose to produce either working code, a technical white paper, or design mockups/wireframes. Students will be graded on the quality of the product demo and pitch. Attendance and participation will also be taken into account for final grades. Students will have the opportunity to show off their final products, and their pitches, in an optional Demo Day.

Adjunct Instructor Bio: Elissa Shevinsky '01 helped launch Geekcorps (acquired), Everyday Health (IPO), Daily Steals, Glimpse, and Brave ($35M ICO.) CSCI 23 (W)  Introduction to Research and Development in Computing

An independent project is completed in collaboration with a member of the Computer Science Department. The projects undertaken will either involve the exploration of a research topic related to the faculty member's work or the implementation of a software system that will extend the students design and implementation skills. It is expected that the student will spend 20 hours per week working on the project. At the completion of the project, each student will submit a 10-page written report or the software developed together with appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Prior to the beginning of the Winter Study registration period, any student interested in enrolling must have arranged with a faculty member in the department to serve as their supervisor for the course.
**CSCI 28 (W)  Solution Design: from Ideas to Implementation**

Crosslistings: ECON28 / CSCI28

Secondary Crosslisting

Designing a pair of computerized glasses is not enough. Who will use them, and what problems will they solve? How can you be certain someone will adopt your new technology before you spend millions of dollars building it? Google Glass and other wearable technologies have struggled to answer these questions. In fact, somewhere between 40 and 60 percent of large IT projects fail and all too often, the cause has little to do with the quality of technical engineering. Innovators often solve the wrong problem, misidentify the users of the software, or fail to adapt to evolving requirements. The challenge is that engineers—and Williams students—like to be told what problem they are to solve, but the average consumer is terrible at knowing what they want until they see how the new product will work. Solution design offers a powerful framework for resolving this paradox efficiently. We will examine how to visualize interactions between market forces, corporate directives, and engineering requirements, and how to apply design thinking to generate novel ideas within these constraints. Then, we will interrogate the strength of our ideas by asking author Marty Kagan's questions: is it feasible? is it valuable? will someone use it? and does it have business viability? Readings by Steve Blank and Eric Reis emphasize the importance of low-cost, rapid prototyping/experimentation and statistical analysis thereof that results in actionable development goals. Finally, we will introduce topics in human computer interaction, and organization tools for complex technical collaborations like Git and the Getting Things Done methodology for task management. Throughout the course, small teams will deploy this toolkit against problems of the students' choosing. One team may wish to design a new app for the WSO website. Another team may choose to interview a local organization and design a technology powered tool that can improve its operations. You are the innovator. Small teams of students will each execute one iteration of design and prepare a plan for developing a technological solution to a problem of their choosing. The contents of the plans may include: careful descriptions of the product's goals, stakeholders, target users, assumptions, and constraints; a business plan; sketches of a user interface; first steps in programming an application; write ups of experiments intended to test underlying assumptions; and a direction for future development efforts. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

DANC 11 (W) BFF Beginner (Ballet Film Festival!)
This course is for ANYONE interested in learning more about ballet, through a variety of experiences. First will be physical practice, 2 times per week. For those who have no (or little) prior ballet training, you’ll learn the fundamentals of ballet technique in a safe but challenging class; separate classes will be held for intermediate/advanced dancers. All course participants will gather together twice a week for movie/documentary viewings of a wide range of films (primarily) about ballet and ballet dancers from around the world, and/or group discussions about the films as well as the history and/or current context related to them. Reading and additional viewing material will be assigned. At the end of Winter Study, students will participate in an informal physical presentation. Students must contact the instructor at jmp2@williams.edu for proper level placement.

Class Format: afternoons
Requirements/Evaluation: evaluation will be based on individual progress in the physical components, as well as on the quality of participation in all activities–physical work as well as discussions

ECON 10 (W) A Practitioner's Overview of Securities Markets and Investment Banking

A broad overview of various aspects of the Fixed Income and Equities Markets and the role of Investment Banks. Topics, amongst others, will include: The effect of Fiscal and Monetary policy on Markets, Securities Sales and Trading, Bonds and Bond Math, Public Equities and Asset Management, Credit Analysis, Private Equity and Leveraged Buy-outs, Mergers and Acquisitions and Risk Management. Course will focus on real life practices and will include guest speakers and case studies. Course Goal: (1) to provide you with an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help you think critically about issues effecting the stock and bond markets, and (3) to have fun and instill a passion in some of you for future study and/or work in the Securities Industry. Required Readings: (1) Understanding Wall Street (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies (3) Students will be asked to read the Wall Street Journal on the day that each class meets. Class will meet 3 days per week for 2-3 hours per meeting. Outside of class, students will spend time on readings, preparation for case studies, and writing term paper. Adjunct Instructor Bio: Tim Bock ’88 worked at Credit Suisse for 28 years where he ran Global Capital Markets, leading a unit of 250 Investment Bankers responsible for Credit Suisse's global financing businesses, including equity capital markets, debt capital markets, leveraged finance origination and corporate derivatives. Tim held several other leadership roles at CS, including Global Co-head of the Product platform in the Private Bank and Head of Derivatives Origination in the Equity and Fixed Income Departments.

ECON 11 (W) Financial Accounting & Financial Modeling for Private Equity & Investment Banking

ECON 11 is an intensive winter study designed for students intending to pursue or explore professional opportunities in finance and investing, with a focus on the private equity industry. Incorporating instruction by a dynamic mix of industry professionals and faculty, the course aims to equip students with the fundamental skills required in many entry-level finance positions, preparing them for interviews, internships, and jobs in the field. The course is structured as four-section progression over the four-week term. The first section is an introduction to the basic concepts of corporate finance, and an overview of the private equity and investment banking industries. The second section covers financial accounting, during which students will learn accounting fundamentals, and how to construct, interpret and analyze financial statements. In the third section, students will receive rigorous training in financial modeling and valuation methods, provided by Training the Street, a professional financial training firm. In the fourth week, students will put to test the skills they've acquired and build financial models to evaluate an investment in a case company. This is a unique opportunity to receive professional-level training in core competencies of finance and investing, and students are expected to approach it as such. Given the nature and
depth of material to be covered, students should plan on committing 20+ hours and 4-5 days per week between in-class sessions and assignments. Adjunct Instructor Bio: Alex Reeves '11 currently works in Corporate Strategy and Development at Penumbra, a medical technology company based in the San Francisco area. Prior to Penumbra, Alex was an Associate at private investment firm Graham Partners, where he evaluated investments in industrial and manufacturing-related businesses, and supported portfolio companies and their management teams across a range of strategic and financial initiatives. Alex plans to attend the Tuck School of Business in the fall of 2018. Adjunct Co-Instructor Bio: A.J. Rossi graduated from the University of Pennsylvania in 2014, with a double major in Economics and Political Science. A.J. has since joined Graham Partners as an Associate, where he sources and evaluates new investment opportunities and also provides support and oversight for a number of Graham Partners' portfolio companies. A.J. also currently manages the firm's intern and analyst training programs. Steven C. Graham '82 founded private investment firm Graham Partners in 1988 and serves as Senior Managing Principal. ECON 12 (W) Public Speaking

This course will help students become effective and organized public speakers, whether public speaking means giving a class presentation, participating in a debate, or giving a formal speech before a large audience. We will primarily use extemporaneous and prepared class presentations as a means of learning this skill, but we will also study great American speeches, presidential debates, and other examples for further insights into persuasive public speaking techniques. The class will provide a supportive environment to help each student create his or her own public speaking style that is comfortable, confident, and conversational. We will also focus on organizational techniques, handling visual aids effectively, eye contact and body language. Finally, receiving feedback and providing constructive criticism to other students in the class will be an important part of the course.

ECON 13 (W) Essential Tools for Startups to Change Good Ideas to Successful Businesses and Organizations

This course provides a road map for turning business ideas into successful businesses. Students generate business ideas and then work in teams to develop a business model to take the ideas to startup and beyond. The course also provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research projects. The course is appropriate for students in any field of study who want to know how to build a startup that succeeds. The class will meet for two and a half hours three days a week for short lectures,
discussions, group work, and presentations. Outside of class, students will be required to watch online lectures and videos, read handouts, and to
work in teams to develop and research their business models. Teams will be required to develop a team plan, to interview customers, to analyze the
results, to revise their plans, to meet with the instructor, and to develop presentations of their work. Each team will make weekly presentations along
with a final presentation of their work. They will also develop a team video of the lessons the team learned during the course. Students will also be
required to provide a 2-3 page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has thirty years of experience
working with startups. He has helped over 1,000 people start businesses and works with hundreds of entrepreneurs each year. He has used the Lean
Launchpad methodology for the past six years and received training at Stanford University.

Class Format: mornings
Requirements/Evaluation: 2- to 3-page paper; weekly group presentations of the results of investigations done outside of class
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors first
Materials/Lab Fee: cost of books

ECON 14 (W) Sports Economics
Students will identify an empirical question relevant to a sport. This may be done in consultation with faculty from the Athletics Department. They will
then work in a group to review the existing literature, assemble appropriate data and construct an econometric model aimed at addressing the
question of interest. The statistical software package STATA will be used for the analyses. The resulting research will be presented at the end of the
January term.
Class Format: mornings
Requirements/Evaluation: group-based 10-page paper and final presentation
Prerequisites: Econometrics or suitable substitute
Enrollment Limit: 20
Enrollment Preferences: if over-enrolled, preference will be given to senior and junior Economics majors
Materials/Lab Fee: none

ECON 15 (W) Value Investing and Other Hedge Fund Strategies
The intent of the class is to introduce students to the principles of fundamentals based equity investing. The primary focus will be on value investing,
but we will broadly explore different equity investment strategies, understand the process behind successful equity selection, and study great
investors. While oriented towards students interested in careers in investment management, students contemplating careers in consulting and
investment banking will also benefit. Adjunct Instructor Bio: Rahul Bahl ’09 is an investment analyst at Hidden Hills Partners Fund, a value oriented
hedge fund in San Francisco. Prior to HHPF, Rahul was an Associate in GE Capital’s Private Equity Group assisting in the management of their $2Bn
portfolio of public and private investments.
Class Format: mornings
Requirements/Evaluation: 10-page paper; final project
Prerequisites: quantitative background (math, econ, sciences) and ideally sophomores and juniors (students applying for internships)
Enrollment Limit: 15
Enrollment Preferences: instructor discretion
Materials/Lab Fee: approximately $200 for books
ECON 16 (W) Venture Capital--A Legal, Financial and Business Perspective

The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs, venture capitalists and early employees. Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice for entrepreneurs or key employees in three scenarios--an early stage company negotiating with a key executive the company is seeking to hire, a company considering two competing term sheets for venture financing and a company faced with the need for additional financing in a distressed situation. An alternative to one of these scenarios would involve splitting the class into small groups designated as either founders or investors and requiring the groups to negotiate investment terms. As a capstone to the class, students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as founders, investors or key employees. In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class. Adjunct Instructor Bio: Mr. Schwed retired from the law firm of WilmerHale in December 2015 after a 40-year career focused on private equity and venture capital. For nine years, he was an adjunct professor at George Washington University Law School teaching a course on venture capital law. He taught this course during Winter Study in 2017 and 2018. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.

Class Format: mornings; occasional afternoon sessions will be held to meet with industry guests on an informal basis

Requirements/Evaluation: participation in class, preparation of discussion outlines (each equivalent to a 3-4 page paper) in connection with the small group assignments, and participation in the business simulation game

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: by lot with preference for seniors

Materials/Lab Fee: $100

ECON 17 (W) Watching Wall Street from Washington: Financial Market Analysis for the Public Sector

This course investigates the strategies for, as well as the relevance of, financial market analysis directed toward the public good. Students will develop a deeper understanding of global financial markets, and learn how that understanding can be leveraged to help shape and achieve policy goals. Specifically, the course will cover five major topics: 1) Basic techniques for financial market analysis across a variety of major asset classes; 2) The characteristics of financial market analysis--its forms, theoretical underpinnings, positive attributes, and deficiencies; 3) The hierarchy of policy relevance of financial market analysis; 4) Costs, risks, and difficulties of financial market analysis for the public sector; and 5) Future challenges and formulations of public sector market analysis given the technological developments in finance, money management, and trading. Readings will primarily be publicly available articles and papers, as well as one basic reference book: Gliner, Greg; Global Macro Trading: Profiting in a New World Economy; Bloomberg Press, 2014. We will meet three times a week for two-hour sessions, with extra discussion and presentation times scheduled in accordance to our needs. Adjunct Instructor Bio: John Fagan '95, Director of the Treasury Markets Room and former senior strategist at Discovery Capital, holds a JD and an MPA from Harvard and a BA from Williams.

Class Format: mornings

Requirements/Evaluation: evaluation will be based on a 5- to 10-page presentation including charts and succinct text to be presented in a 10 minute briefing format; attendance and participation will also be taken into account

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 12

Enrollment Preferences: preference to seniors
ECON 18 (W) Games!
Crosslistings: ENVI18 / ECON18

Primary Crosslisting
We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to “win-win” outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own--negotiation games, economic games, mathematical games, or board games--and presenting them and playing them with the group.

Class Format: Tuesday, Wednesday & Thursday 1-4pm
Requirements/Evaluation: final project; game journal

ECON 19 (W) Wall Street to Main Street: A Liberal Arts Approach to Wealth and Financial Management

The term "Wealth Management" may already have STEM majors, history majors, performing artists and for that fact most liberal art students skipping to another course title. But why is this relatively new field being populated by the very people most likely to skip this offering? The challenges and issues involved in the field of Wealth Management touch everyone, not just the perceived elite on Wall Street. Early life decisions about such matters such as paying back student debt, getting married, buying a house are just the beginning of a life entangled with the issues of allocating and managing one's resources. At its root, wealth management is a multidisciplinary field, so whether as a consumer (which everyone will be) or a potential practitioner, this course will hopefully provide and introduction to the major issues, terminology, and theories that make up the field. This includes gaining an understanding of basic tenets including: Risk/Reward, Time Value of Money, Borrowing principles, gifting, gifting to Williams College, and other areas of market theory. Through simulations, group projects and an individual paper, students will gain a solid overview of the field, demystifying its language and becoming better lifetime consumers with the potential result of creating one or two eventual practitioners. Adjunct Instructor Bio: Kate Kennedy '88 is an Attorney and CPA who is a co-leader of the Executive Financial Planning practice at a growing Registered Investment Advisor. She has practiced law, done taxes, survived the 2008 financial crisis. She has worked as an attorney in a law firm as well as at Arthur Andersen LLP, The Ayco Company (A Goldman Sachs Company); Lehman Brothers; Barclays and now is a Partner at HPM Partners (which is to be renamed by 7/1/18).

Class Format: mornings
Requirements/Evaluation: one short paper and class participation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: random selection; preference to non-economics majors
ECON 20 (W) Ethical Issues of Hedge Fund Compliance and Regulation

Through lecture and case-study, this course is designed to introduce students to the structure and goals of hedge funds, the relevant laws and regulations that govern them, and the ethical issues which arise as an employee and in-house counsel. Having established a working foundation of what a hedge fund is and how it operates, students will focus on the various conflicts of interest endemic to a hedge fund structure. Conflicts between the hedge fund manager and the hedge funds (employees and their investors) as well as conflicts among the multiple funds themselves. Students will learn to recognize these conflicts not just in finance but throughout their daily lives. The course will detail the structure of the compliance departments that monitor hedge funds and the ethical obligations of in-house compliance and legal departments. The class will work through real life examples of issues that have arisen at hedge funds in recent years. Cases will involve some of the significant issues monitored by compliance such as insider trading, failure to disclose information to investors, conflicts of interest, bribery issues, Anti-money laundering issues, and presentation of the fund's performance. The class will examine the responsibilities of young analysts at a hedge fund and what is expected of them as well as the pressure they face to play close to the edge of what is legal. The course will discuss creating a culture of compliance and what that entails from the compliance department as well as from employees themselves. What are the obligations of the individual to speak out when violations are observed? The students will be presented with articles about hedge funds from both the media, the SEC and hedge funds themselves. These readings will present the students with a window into the goals of hedge funds and the ethical issues which must be managed when working at a hedge fund. Adjunct Instructor Bio: Mark Schein ’88: Econ/American Studies; Vanderbilt Law School 1991; Assistant District Attorney Bronx DA’s Office (prosecuted organized crime and police corruption) (1991-1997); Trial Counsel NYSE Enforcement Division (1997-2001); Director of Broker Dealer Compliance US Trust Company (2001-2004); Director of Anti-Money Laundering Schwab Capital Markets (2004-2005); Chief Compliance Officer York Capital Management (2005 to present).

Requirements/Evaluation: 5-page paper; the assessments are based on presenting the students with real-life compliance issues and asking them to prepare a policy and procedure to help manage this issue for the firm
Prerequisites: interest in finance or ethics
Enrollment Limit: 30
Enrollment Preferences: preference to juniors and seniors; other prospective students based on a paragraph describing their interest in the course
Materials/Lab Fee: none

ECON 22 (W) Volunteer Income Tax Assistance

Crosslistings: ECON22 / POEC22

Primary Crosslisting

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

ECON 23 (W)  Investing
This class is designed to provide students with an overview of endowment and investment management and is taught by members of the Williams College Investment Office. The Investment Office is responsible for overseeing Williams’ $2.7 billion endowment. Through presentations, discussion, readings, and project work, Winter Study students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, real estate, and fixed income. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors.
Adjunct Instructor Bio: Abigail Wattley ’05, Managing Director—Abigail rejoined Williams College in September 2010 after business school. From 2007 to 2008 Abigail worked in the Williams Investment Office in the role of Investment Analyst. Prior to working for Williams, Abigail was a Senior Consulting Associate at Cambridge Associates. Abigail received a B.A. in Economics from Williams College in 2005 and a Masters of Business Administration from Harvard Business School in 2010.

ECON 24 (W) Economics, Geography and Appreciation of Wine
This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.
Class Format: Tuesday and Thursday evenings
Requirements/Evaluation: in addition to the final project presentation, a blind tasting exam

Quilting as an art form is present in many communities, but residents of Gee’s Bend, Alabama are recognized for their very distinctive quilting style. In this hands-on class students will learn the basics of quilt-making, inspired by the designs and techniques used in Gee’s Bend. Students will also learn about the history of this group of African American quilt-makers and the economic forces that influenced their work. The course will involve field trips to a local quilt store and museum, instruction in techniques such as improvisational piecing, and creation of an original art quilt. The course will culminate with a public exhibition of students’ quilts. No previous sewing experience required. Adjunct Co-Instructor Bio: Chris LaLumia is a life-long quilter and retired teacher. She taught one of her daughters to be an award-winning art quilter. Her other daughter is an economics professor at Williams College.

ECON 28 (W) Solution Design: from Ideas to Implementation
Crosslistings: ECON28 / CSCI28
Primary Crosslisting
Designing a pair of computerized glasses is not enough. Who will use them, and what problems will they solve? How can you be certain someone will adopt your new technology before you spend millions of dollars building it? Google Glass and other wearable technologies have struggled to answer these questions. In fact, somewhere between 40 and 60 percent of large IT projects fail and all too often, the cause has little to do with the quality of technical engineering. Innovators often solve the wrong problem, misidentify the users of the software, or fail to adapt to evolving requirements. The challenge is that engineers—and Williams students—like to be told what problem they are to solve, but the average consumer is terrible at knowing what they want until they see how the new product will work. Solution design offers a powerful framework for resolving this paradox efficiently. We will examine how to visualize interactions between market forces, corporate directives, and engineering requirements, and how to apply design thinking to generate novel ideas within these constraints. Then, we will interrogate the strength of our ideas by asking author Marty Kagan's questions: is it feasible? is it valuable? will someone use it? and does it have business viability? Readings by Steve Blank and Eric Reis emphasize the importance of low-cost, rapid prototyping/experimentation and statistical analysis thereof that results in actionable development goals. Finally, we will introduce topics in human computer interaction, and organization tools for complex technical collaborations like Git and the Getting Things Done methodology for task management. Throughout the course, small teams will deploy this toolkit against problems of the students' choosing. One team may wish to design a new app for the WSO website. Another team may choose to interview a local organization and design a technology powered tool that can improve its operations. You are the innovator. Small teams of students will each execute one iteration of design and prepare a plan for developing a technological solution to a problem of their choosing. The contents of the plans may include: careful descriptions of the product's goals, stakeholders, target users, assumptions, and constraints; a business plan; sketches of a user interface; first steps in programming an application; write ups of experiments intended to test underlying assumptions; and a direction for future development efforts. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

ECON 30 (W) Honors Project: Economics
The “Specialization Route” to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. ENGL 11 (W) The Brontes and the Visual Art Journal
Academic courses from all disciplines at Williams often require the use of a journal to help students focus on their work. This course will push that concept to its limit as we explore some of the classic writings of Charlotte, Emily and Anne Bronte. Our goal will be to find real and tangible ways that visual art journaling can enhance our learning of literature. We will create and record visual insights as we read, and we will explore how this practice can help us conceive what we are reading. In addition to reading the entirety of Charlotte Bronte's Jane Eyre we will read Emily Bronte's Wuthering Heights as well as selections from Anne Bronte's The Tenant of Wildfell Hall. There will also be readings from various authors and artists on the subject of journaling as a tool for learning. Adjunct Instructor Bio: Patricia Malanga received her BA in English Literature from the University of Massachusetts in 1990. While working as the Academic Assistant in the English Department here at Williams for the last 20 years, she has explored her love of literature and her love of the visual arts. This course will be the culmination of those interests.

Class Format: afternoons
Requirements/Evaluation: at least 10 pages of free style journal writing, a finished visual journal and participation in class discussion, projects and assignments
ENGL 12 (W)  The Art of Telling a Good Story

How do you offer an audience, out loud, a compelling and memorable story? This course will aim to develop both a sense of the structure behind a good story and the improvisational skills that bring a told story to life. In class we'll tell stories. We'll explore basic approaches to shaping stories (and elaborations on these approaches), as well as what makes a story a "story" instead of something else, using the models of folktales and narrative nonfiction. We'll engage in improvisational exercises, and explore the expressive capacities of voice, body, tempo and silence, considering how the improvisation of told tales might intersect with or resemble improvisational performance in other arts. We'll also discuss issues facing tellers of traditional tales, personal stories, and other story types. When do you or do you not have the right to tell a particular story? How do you claim "authority" to tell a story? What are the implications of choosing the stories we do tell? What stories need to be told that are not? What stories need amendment? What does storytelling mean for other academic or social realms? Outside class, students will analyze and critique videos of other storytellers with the goal of enhancing their own storytelling strategies. Students will prepare for presentation in class three different kinds of stories and will offer stories to two different public audiences, one on campus and another in a local school. Students will also be asked to write a brief reflective essay. The class will meet for two hours a day, Monday through Thursday.  Adjunct Instructor Bio: Kelly Terwilliger has been telling stories professionally for 17 years in schools, libraries, festivals, parks, museums, community centers, and pubs.

This course will serve as an intensive introduction to Fanon's philosophical and political writings, which continue to stand as some of the most influential and rousing works of the twentieth century. Born in Martinique and trained in France as a psychiatrist, Fanon spent the last decade of his life in Algeria, where he joined the struggle for national liberation. Marked by a layered history of anti-colonial struggle in the Caribbean, Europe, and North Africa, as much as by a commitment to the world-wide projects of decolonization and revolution, Fanon's writing was has been taken up by protest movements around the world, from South Africa to Sri Lanka, from the Black Panthers to queer theory.

ENGL 14 (W) Humor Writing and Analysis
In this class we'll hijack the tools of fiction writers, dishonor the genre of memoir, perpetuate the problem of fake news and push the bounds of taste in memes. You'll write something for every class, and most of your writing will be discussed in a workshop format. You'll also submit written reflections on the required text, Just the Funny Parts by Nell Scovell and make an oral presentation analyzing a specific work that you consider an example of comic excellence. We'll discuss what kind of relationship thinking people should have with sexist, ethnic and religious humor. And we'll talk quite a bit about postmodernism. Hey, it's an English class. Adjunct Instructor Bio: Eric Randall is a journalist whose work has been published in USA Today, Time, Newsweek and The Washington Post, as well as some reputable publications. He has no particular qualifications for teaching this class but is a firm believer in doing what you can get away with.
Class Format: MR 1:30-4:30pm

ENGL 15 (W) Tolkien: The Hobbit, The Lord of the Rings, and Oxford
In this class we'll read and discuss in depth the literary and imaginative richness of J. R. R. Tolkien's beloved fantasy novels The Hobbit and The Lord of the Rings, as well as the aspects of his biography and the scholarly works he wrote while an Oxford professor that most illuminate his fantastical writings: "On Fairy-Stories," "Beowulf: The Monsters and the Critics," and "On Translating Beowulf." By combining the fantastical and the academic in Tolkien, we'll get a better view of his imagined fortresses, castles, strongholds, of his elves, dragons and shires, as well as a better view of "the city of dreaming spires," his beloved Oxford nestled in the green hills of its own Oxfordshire. Students are asked to participate in all class discussions, and, at the end of the class, students will be asked to submit a 10-page research paper. Class will meet three times a week for two hours each session, and your work outside the class will average around twenty hours a week and involve reading and film viewing. Adjunct Instructor Bio: Ryan Riley earned a master's degrees in literature from both Oxford and Yale, and a bachelor's in literature from Harvard, where he was a humor writer for The Harvard Lampoon and started a literary discussion and writing group inspired by Tolkien's Inklings.
Requirements/Evaluation: 10-page paper
Prerequisites: none--if student has already read some or all of Tolkien's writings, no need to worry, as there will still be much to learn about his imaginative world
Enrollment Limit: 30
Enrollment Preferences: if over-enrolled, preference will be given to students who write the instructor a short email explaining their interest in the class

ENGL 16 (W) Henry James' The Golden Bowl
In this course we will read Henry James' late novel, The Golden Bowl, which dramatizes many of James' crucial preoccupations. Centered on a
wealthy American collector living in England at the turn of the twentieth century, the novel examines the personal and cultural costs of an American obsession with amassing relics of a collapsing European empire, as well as the potentially ruinous effects of wealth and refined sensibility on tangled love relations. The novel's ethical and perceptual intricacies are conveyed in an ingeniously demanding style that presses syntax to its limits. We will read critical essays on the novel, and draw on Walter Benjamin's work on collecting and on the Arcades of 19th-century Paris.

ENGL 17 (W) How to Write Auto-Fiction

Crosslistings: REL17 / ENGL17

Secondary Crosslisting

You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, "Fiction" and "Non-Fiction"-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

ENGL 19 (W) Screenwriting Challenge: The Tale of an Underappreciated Musical Genius

Crosslistings: ENGL19 / MATH19

Secondary Crosslisting

The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and

This course will engage with the natural world through writing, drawing, and personal observation. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. This course is designed for students who are interested in environmental studies, creative writing, and drawing. Instructor will meet with students for 6 hours of in-class time, and will provide assignments totaling at least 15 hours a week, including daily visits to a chosen spot on campus for writing and observation. Students will be provided with a binder of articles and poems, which they will be expected to read and comment on. There will be at least one field trip. The class will conclude with a celebratory reading/showing of student work. Students will be required to keep a daily journal, and also to write in class. They will be asked to perfect and edit several of these pieces in place of a ten page paper, and to read from one or more of them at the final celebration.

ENGL 25 (W) Journalism Today
This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. Christopher graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Secondary Crosslisting
A vicarious trip through a variety of national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Areas will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by
out-of-class study of rock samples. Reading will be from a paperbound text (PARKS AND PLATES) and from short publications by the U.S. Geological Survey and by natural history associations linked to the parks. The second part of the month will involve independent meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. ENVI 15 (W) From Basalt to Balsam to Beavers: The Natural History of New England
In this course we will explore, far and wide, the New England Landscape and try to make some sense of the amazing physiographic and biological diversity that it offers in a relatively small area. From the spruce clad Berkshires to the broad Connecticut River Valley to the glacially forged coastal plain, we will delve into various landscapes and decipher the primary forces and features that make them distinct--their bedrock and climate, glacial history, flora and fauna. We'll learn the predominant trees and shrubs and search for patterns to their occupation of the landscape. We will observe the behavior and evidence of winter-hardy wildlife--including chickadees, waterfowl, rabbits, weasels, beavers and coyotes. How do they manage to cope in their often rigorous and fickle environments and how might they be affected by climate change and other human influences? Through field trips, museum visits, individual investigations, readings, discussions and guest presentations, you'll become a little more aware and appreciative of the natural heritage of the region that you have made your recent home. Students should be prepared to spend significant time outdoors, sometimes hiking several miles, in winter conditions; some trips will require students to be away from campus beyond normal class hours. Adjunct Instructor Bio: Drew Jones is Manager of Hopkins Memorial Forest where he oversees the management of the facilities, coordinates research and teaching activities and outreach programs for the public and local schools. He also operates an owl banding station in the fall and intermittently engages in other field research. In the past, he has worked as a wildlife biologist and educator from the Southern Appalachians to the North Woods.

ENVI 18 (W) Games!
Crosslistings: ENVI18 / ECON18
Secondary Crosslisting
We will explore interactive games and how they can be used for scholarly research, teaching or training, negotiation, and, oh, yes, having fun. In math and economics, games are the fundamental way we model situations in which people (or firms or governments) interact with each other, and we use these games to predict responses to new policies, to teach policymakers how policies might work in practice, and to test theories of behavior. In
negotiation and policy making, games can be used to demonstrate key concepts about stakeholders, their positions, and their strategies, as well as pitfalls and paths to "win-win" outcomes to resolve public disputes. A number of popular board games and video games also can have similar applications. In our class, we will learn about different types of games and how they can be used. Short readings will be complemented with in-class game play and discussions of the games, and we will watch some relevant movies. Students will keep a journal of reflections on their experiences with the games. The semester will culminate in students designing games of their own–negotiation games, economic games, mathematical games, or board games–and presenting them and playing them with the group.

This course introduces students to the advanced techniques used to study the fate of contaminants in the environment. Students will collect samples, learn a variety of extraction protocols, and become comfortable using chemical instrumentation (GC-MS, LC-MS, AA, etc.) to identify and quantify target inorganic and organic contaminants from various environmental media (soil, air, water, and biota). Studies may include: determination of heavy metals from water and sediment sources, measurement of chemical partition coefficients (octanol-water, soil-water, air-water, etc.), rates of contaminant degradation, microscopic and chemical analysis of airborne particular matter, etc. This course will meet for approximately 10-12 hours each week for lectures, discussion of reading assignments, laboratory work, and field sampling.

ENVI 24 (W) Touring Black Religion in the 'New' South
Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting

In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

ENVI 25 (W) Sustainable Agriculture in California
Crosslistings: BIOL25 / ENVI25

Primary Crosslisting

This Winter Study Period course engages students with the diversity of agricultural practices in California on farms ranging from winter fruit and vegetable production, to orchards and vineyards, to livestock and dairy, to eggs along the Central Coast through hands-on experiences on a variety of farms. This is a Winter Study 2019 field course on Sustainable Agriculture in California, a field experience conducted primarily on-site for the month of
January. For some participants, the WSP field course will segue from the seminar BIOL/ENVI 422--The Ecology of Sustainable Agriculture to be taught in Fall 2018 by H.W. Art. Preference for the WSP will be given to students who have previously taken BIOL 422. The WSP course will be limited to 8 students. This project is a replication of a WSP course HW Art taught in 2013 and again 2016, a travel WSP experiential course in which 7-8 students gained hands-on knowledge about agricultural systems by working on 8 farms and vineyards on the Central Coast of California. We concluded the month by participating in the Ecological Farming (EcoFarm) Conference. Sarah Gardner will be co-teaching the course with Prof. Art for pedagogical and practical reasons, including her experience in agriculture and her continuing this WSP periodically in the future. The learning-through-working experience is designed to both de-mystify and de-romanticize agriculture by having the students gain a fuller sense of the realities of producing food by working shoulder-to-shoulder with farmers and laborers. Art's previous experience is that the investments of time, labor, thought, and sweat by engaging in actual farming practice creates a depth of understanding not possible in the classroom. In addition to assigned texts, we also will be reading books individually and take turns reporting back to the group in the evenings, a bit like story-telling in the oral tradition. The final product will be a collaborative journal written by the class.

ENVI 26 (W) Material Culture and Craft of 19th Century Coastal New England
Crosslistings: ENVI26 / MAST25
Secondary Crosslisting
The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvassworks, and boatbuilding.

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

GEOS 11 (W) River Restoration in Practice
River restoration is a growing billion-dollar international industry. Since the environmental movement began in the 1960s and 1970s, renewed interest in the beauty and benefits of healthy streams has resulted in increased research, funding, and applied restoration of rivers, streams, wetlands, and riparian corridors. The restoration of rivers and streams comes in many different forms including dam removal and in-channel habitat restoration. In this course, we’ll learn about the history of restoration and the basics of fluvial geomorphology and hydrology. We will gain applied knowledge and experience with the practice of restoration through a combination of lectures, classroom exercises, conversations with restoration advocates and practitioners, field trips and field data collection. A final practicum will involve the design of a restoration project. The course will generally be structured around three sections: Science: Week 1 will primarily involve lectures and classroom exercises and discussion of the literature, learning about the history and evolution of river restoration as well as the basics of the science that drives restoration. Data Collection and Analysis: Week 2 will focus on data collection and analysis typically required for river restoration projects. This will include topographic surveying, geomorphic and habitat mapping, pebble counts, stream discharge measurements, GIS mapping, and hydraulic modeling. Intensive Practicum: Small groups of students will be given a real restoration project example to research, analyze, and design. This practicum will include data collection, GIS analysis, flow modeling, and design plan sheets describing the restoration plan. The class will meet on average 8 hours per week and will include up to 3 day-long field trips. Students should expect to be outside for portions of the day collecting field data in/near rivers in winter conditions. Adjunct Instructor Bio: Nick Nelson is a fluvial geomorphologist and regional director for Inter-Fluve, a river and wetland restoration company. He has assessed hundreds of miles of river and designed/managed the removal of more than a dozen dams in New England. He has lectured at the University of MN, Tufts University, University of TN, and currently teaches courses at Northeastern University and the Harvard Graduate School of Design.

GERM 12 (W)  The Grand Hotel in Modern Fiction and Film
Crosslistings: COMP12 / GERM12

Primary Crosslisting
The grand hotel with its dual promise of luxury and estrangement was considered a theater of social transformations in the age of travel. We will discuss novels, short stories and films that feature the hotel as a space of both class distinction and possible class confusion, of sexual taboo breaking, and gendered performance, and a transnational extension of colonialist oppression. Authors will include Edith Wharton, Thomas Mann, Vicki Baum, Ali Smith, Rick Moody. Films may include: The Last Laugh, Grand Hotel, Grand Hotel Budapest, Anomalisa, Screaming Man, Hotel Sahara, Hotel Rwanda, A Single Girl, Maid in Manhattan. We will also consider short theoretical readings on conspicuous consumption, branding, modernity and metropolitan spaces, and postcoloniality. In the present, hotel dramas focus on issues of the invisible worker, neoliberalism (Anomalisa, Single Girl), or the trauma of civil war and the raced body (Hotel Rwanda, Screaming Man), or cultural alienation and the inability to feel joy (Lost in Translation, Hotels of North America). Comedies explore the fantasy of a dramatic social climb through identity confusion in a hotel setting (Maid in Manhattan), satires highlight the confidence man/trickster who profits from social pretensions (Felix Krull, Grand Hotel). Class lines are straddled and the boundaries between death and life blurred (Hotel World, Hotel Sahara) as the hotel space becomes a riotous echo chamber, mirroring precarious lives of illegal migrants and displaced workers.

GERM 16 (W)  The Life and Death of a Vanished Nation: East Germany, 1949-1990
Crosslistings: GERM16 / HIST16

Secondary Crosslisting
In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet twelve times -- three or four times per week (1¼ -3¼ hours each meeting) for the three full weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.

This class gives students a chance to learn about resources and assets of Massachusetts's smallest city, North Adams. Readings, tours, films, field trips, and meetings with people who work with or lead nonprofits and civic organizations will introduce students to local history, current conditions in the city, and plans for future cultural and economic development. Students will be expected to complete assigned readings (assorted articles) and to attend all class meetings. Final assessment will be based on students’ engagement in thoughtful discussions of class materials and in-person encounters and experiences. In addition, students will complete a final research project (written or multimedia) that they present to the class and two reflection papers. Most class sessions will take place off campus; students must be available to travel off campus and attend occasional sessions that occur outside of the regular class hours. Adjunct Instructor Bio: Anne Valk is Associate Director for Public Humanities at Williams, with affiliations in the Center for Learning in Action; the Office of Institutional Diversity; and the department of history.
Class Format: afternoons

HIST 12 (W)  Cold War Films
The Cold War between the Soviet Union and the United States, a nearly half-century standoff, was as ideological as it was military. For every nuclear test, arms sale, or military operation there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life--capitalism and communism, totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. This class will explore these quintessential, overlapping elements of Cold War culture in a series of films produced from the mid-1940s to the mid-1960s. Film screenings will be accompanied by contextual readings to be completed prior to class discussion.

Class Format: mornings
Requirements/Evaluation: students will be evaluated on class participation and four response papers (2-3 pages each)
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: based on a questionnaire provided by professor

HIST 13 (W)  Eyewitnesses to History: American Treasures in the Chapin Library
What did Christopher Columbus write in his 1493 letter to the Spanish court? How did John Smith describe the Virginia colony the early 1600s? What would a pioneer find when following the Oregon Trail west in 1846? How much did a female slave cost in Richmond, Virginia, in 1860? These and many other intriguing questions are answered by rare books, manuscripts, newspapers, maps, and prints in the Chapin Library, primary sources which contain eyewitness accounts of important events in American history. Students in this course will learn, through handling rare materials, how to analyze primary sources and put them in historical context. For the first two weeks, they will investigate items, selected by the instructors, in tutorial-like sessions, with one student presenting conclusions of research and another giving a critique. For the final project, each student will select an item from the Chapin Americana holdings, write a 10-page research paper and present it to the class, and write a brief note about the item for a public display in the Special Collections instruction Gallery.

Class Format: mornings
Requirements/Evaluation: 10-page paper; formal public exhibit

reliefs ‘mean?’ Why did they merit inclusion in the palace of one of the most powerful kings in the ancient world? What (and how) do they ‘mean’ in their present Williamstown setting? Finally, what is the status of Nimrud, the ancient city where the reliefs were excavated, post-ISIS, and why does the study of the ancient world matter in the digital age? In this course, our ‘work’ includes readings in ancient texts, learning to write cuneiform signs and words in clay, the Epic of Gilgamesh, royal correspondence, ancient conceptions of the past, gender, sexuality, religion, and stories of queens, kings and courtiers in love and war. We finish with a feast of ancient Mesopotamian fare and an overnight field trip to Yale’s Babylonian Collection. Readings from the extensive bibliography will be selected based on student interest, and the course can be further refined for individual students, including those whose senior theses may benefit from consideration of the ancient world. Students with no experience in art history or ancient history are warmly invited to join, as are those with some background in relevant subjects, such as the religions, cultures and history of the modern Middle East. Adjunct Instructor Bio: Alison Gruseke, PhD, studied at Williams and Yale. Her research and teaching focus on the Hebrew Bible, the ancient Near East, and on the ways in which the ancient world can illuminate modern problems of identity, theology and ethics. The negotiation of cultural boundaries, identity formation, and the interrelationship of cultures in conflict form a strong thread that runs through her work.

HIST 15 (W) Homer in Vietnam
This course will examine the impact of combat trauma on American soldiers during the war in Vietnam, and how that trauma affected their return to the United States. We will read two books that explore these issues through the lens of Homer's *Iliad* and *Odyssey*, Jonathan Shay's *Achilles in Vietnam* and *Odysseus in America*. We will discuss how Homer's classics have come to represent the trauma of war and coming home from the Trojan War to our current wars in the Middle East and beyond. In addition to discussing these two books, we will also view a number of films that address these issues. The class will be primarily discussion based on the readings and films.

HIST 16 (W) The Life and Death of a Vanished Nation: East Germany, 1949-1990
Crosslistings: GERM16 / HIST16

Primary Crosslisting
In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the
uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the
nature of everyday life under the Communist regime. The course will meet twelve times -- three or four times per week (1½ -3¼ hours each meeting)
for the three full weeks of Winter Study. Part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of
which were made in the DDR during its short existence and are essential viewing for the course. A textual history of the DDR will also be accompanied
by a packet of additional reading materials that will be discussed in class.

HIST 30 (W)  Workshop in Independent Research
This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis
and would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are
especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians
define good research questions; become familiar with the historiography; and identify primary sources. Students will pursue their own research on any
topic of their own choosing for a 10-page final paper, and we'll use a workshop format to discuss the research and writing of that paper.

INTR 19 (W) 21st Century Museums--From the Inner Workings to the Future Vision of Culture Making
Crosslistings: ARTS19 / ARTH19 / INTR19 / LEAD19

Secondary Crosslisting
The role of museums in American culture has evolved dramatically over recent decades. No longer simply a repository of art and artifacts, the 21st century museum is a fully dynamic center of programming, cultural exchange, community building, and active inquiry. This is true across all types of museums—from art museums to scientific, historical, and specialty collections—and has affected every aspect of museum administration, from curatorial and collection priorities to methods of communication, fundraising, and engagement. With participation of WCMA staff, we will examine in-depth the role and behind-the-scenes work of contemporary museums. The class will include site visits to several area museums and discussions with specially skilled museum professionals, from directors, curators, and educators to collection managers, conservators, exhibition designers and development and communications managers. Students will research models of museum practice and brainstorm and develop proposals for the museum of the future. For the culminating project, the class will work as a group with WCMA staff to develop a gallery presentation and/or program that will connect with Claiming Williams Day. We will meet twice a week for five hour sessions at WCMA, plus 1 trip to area museums per week. The course will include an overnight trip to New York between January 17-18th.

Kyoto Artisans: Exploring 1200 Years of Cultural History of Kyoto through Modern Craftsmanship

Kyoto, the former imperial capital of Japan has 1200 years of history. It is called Japan's cultural treasure house. The purpose of this travel course is to explore the cultural history of Kyoto and how traditional craftsmanship is perpetuated and transformed in a modern era as the city of Kyoto developed. Students will visit Kyoto artisans at their studio and through a discourse with thriving artists, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course is conducted on campus. Students will intensively study the cultural history of Kyoto with readings, films and discussion. Also in pairs, they will conduct research on one selected area of Kyoto craftsmanship to acquire in-depth knowledge. Each pair will be responsible to educate the entire group for the onsite visit in Kyoto. Then, for the second and third week, the class will travel to Kyoto. We will first visit historic sites to learn the context of how craftsmanship developed from courtly culture in the Heian period, samurai tradition in the Kamakura and Muromachi periods, religious ceremonies and Noh Theater and tea ceremonies. After and during these excursions, we will visit four artisan studios. They are a sacred mirror maker who could be the last of his kind, a textile weaver, a Noh mask maker, a sculptor of Buddhist statues. Some of these artisans are perpetuating hundreds of years of family tradition. Some started out as an apprentice and established his/her own studio. Students will also have hands on experiences at some studios. Students are expected to participate in all the scheduled activities, post a daily journal on the course website and share daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern craftsmanship to the local community and the Kyoto artisans at a public forum.

JLST 14 (W) Mock Trial
In the Mock Trial course, students are divided into two teams in which they play the roles of attorneys and witnesses during their preparation for and
participation in a simulated civil trial. They are given a series of witness statements and pleadings together with various documents and other data that they must evaluate for potential use as evidence as they plan to present their case as either the plaintiff or the defendant. Team members must prepare and deliver Opening Statements and Closing Arguments as well as handle direct and cross-examinations of the witnesses who testify for both sides. The "final exam" consists of two trials with the two teams switching sides on the second day such that they must evaluate the case from both sides. At the two trials, an experienced attorney plays the role of judge, and volunteer jurors from the community listen to the evidence and render their "verdict" based on the presentations. Adjunct Instructor Bio: David Olson ’71 has practiced as a civil trial attorney for 40 years with a firm currently with over 500 attorneys handling cases in state and federal courts. He has taught Mock Trial on 6 previous occasions, receiving strong reviews for the course. Adjunct Co-Instructor Bio: After graduating from Villanova Law School where he was Editor in Chief of the Law Review, Steve Brown has been a litigator and trial lawyer for 40 years concentrating his practice in white-collar criminal defense and civil rights. He was a partner at Dechert LLP from 1991 to 2016, when he retired and became Civil Rights Counsel to the firm. He has spent much of his career doing pro bono work including representing Guantanamo Bay detainees and people and prisoners whose constitutional rights have been violated, and supervising Dechert associates in 40 trials in federal courts.

LATS 16 (W)  True and Wild Tales: Argentine Cinema after 1985
Crosslistings: ARTH16 / LATS16
Secondary Crosslisting

The Argentine film industry is one of the most developed in the Spanish-speaking world. It is rich in genres and production scales, and in the issues raised by the films themselves. This immersive course encourages dynamic engagement with these issues, as we watch films that grapple with the country's painful legacy of dictatorial rule, coming-of-age road movies, familial dramas, and riotous comedies that feature that distinctive, biting Argentine humor. Our meetings consist of three mandatory screenings per week, two of which are followed by class discussion. In addition to learning about the Argentine context, we will learn vocabulary and tools for discussing and writing about film. No previous coursework in film, or fluency in Spanish required (the films are subtitled)--only an interest in contemporary Argentine cinema and culture.

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals. Adjunct Instructor Bio: William E. Simon, Jr., ’73. Businessman, lawyer, and philanthropist, Mr. Simon is Co-Chairman of William E. Simon & Sons, a private equity firm, and the William E. Simon Foundation. Early in his career he was Assistant U.S. Attorney in the Southern District of New York and later was the 2002 Republican gubernatorial nominee in California. Crosslistings: LEAD14 / PSCI14

Secondary Crosslisting

This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency.

Adjunct Instructor Bio: Donald Gregg '51 served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. **LEAD 15 (W) Barack Obama: A First Draft of Presidential History**

Crosslistings: LEAD15 / PSCI15

Barack Obama's election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement-and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama's leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read (and view) primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama's presidency; the final assignment will be the essay itself.

MAST 25 (W) Material Culture and Craft of 19th Century Coastal New England

Crosslistings: ENVI26 / MAST25

Primary Crosslisting

The goal in this course is to provide an opportunity for students to develop an intimate understanding of 19th century Mystic through lived experience. To appreciate a culture or a community so different from what we live and experience today, you must also understand the ways in which its residents shaped their world, specifically, the crafts they plied. There are few opportunities in life when this understanding can be delivered through lived experience. This will be one of them. Taking advantage of the extraordinary resources of Williams-Mystic, the coastal and ocean studies campus of Williams College located at the Mystic Seaport in Mystic, CT, this winter-study course, taught at Williams-Mystic, aims to: 1) provide rich hands-on participatory experiences that authentically mirror 19th century maritime craft and culture; and 2) offers learners a rare opportunity to delve deeply into the mindset of 19th century maritime culture by creating an authentic artifact that reflects understanding of the values and mores of this time period. There will be a number of instructors; including instructors employed by the Mystic Seaport in who specialize in chanteys, shipsmithing, ship Carving, scrimshaw, canvaworks, and boatbuilding.

MATH 13 (W) The Mathematics of SET (and other games)
SET is a popular game where players try to find certain collections of three cards, which share or fail to share properties like color, shape, and number. This seemingly simple game gives rise to an incredibly variety of mathematical ideas. These range from counting and probability, to the behavior of lines in strange models of geometry. Throughout this class we'll study these mathematical ideas, as well as those coming from other mathematically interesting games (and we'll of course play lots of SET and other games!). Previous experience with SET or with mathematics is not required! We will be meeting for 6 hours per week in class. Outside-of-class work will include readings (from the book "The Joy of SET" and short mathematical readings relevant to other board games), learning and practicing other mathematically relevant board games, working on small problem sets, and as a final project designing a new game based on mathematical ideas. These final projects will be showcased in a board game night at the end of Winter Study.

MATH 14 (W) Creative Dynamics
Crosslistings: MATH14 / CSCI14
Primary Crosslisting

Broadly defined, a dynamical system is an object whose future state can be calculated from its current state. Examples include ordinary and partial differential equations, discrete dynamics, cellular automata, billiards, spatial games, coupled/synchronized systems, agent models, evolutionary/selective dynamics, graph dynamics, Markov chains, and many more. The instructor will give a survey of such systems, and students will be free to imagine, create, and compute their own systems with an emphasis on graphical presentation of results.

Class Format: mornings
Requirements/Evaluation: grading will be based on class participation, presentation of results, and a final project
Prerequisites: solid computer programming skills in some language with good support for graphics
Enrollment Limit: 15
Enrollment Preferences: computational skills, math background, and enthusiasm; students will be asked to submit a brief description of their qualifications

Materials/Lab Fee: none

MATH 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy

Crosslistings: MATH15 / SPEC15

Primary Crosslisting

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

Class Format: mornings

Requirements/Evaluation: 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course

Extra Info: the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, students will be selected based on emailing the instructor the reasons behind choosing this course; preference will be given to seniors, and also to students with immediate wellness needs

MATH 17 (W) Modern Dance - Muller Technique

This dance class will be based on the modern dance technique developed by Jennifer Muller, with whom the instructor danced professionally for 5 years in New York City and in Europe. Jennifer Muller was a soloist in the dance company of José Limon before she started her own company in 1974. She has added her own style of movement to the Limon technique, creating an expansive, free flowing dance that is wonderful to do and to watch. The class will be multi leveled and open to both men and women alike. Students will have the opportunity to choreograph a short piece either as a soloist or in small groups. Adjunct Instructor Bio: Sylvia Logan received her B.A. in Slavic Literature from Stanford University. She danced professionally with several dance companies including Jennifer Muller and the Works, a modern company based in New York City for five years.

Class Format: mornings

Requirements/Evaluation: a 1/2-page journal entry is required after each class, a 1/2-page commentary on 10-12 dance videos, attendance, and a short performance at the end of winter study

Prerequisites: none; no previous dance experience necessary

Crosslistings: ENGL19 / MATH19  

**Primary Crosslisting**
The goal of this course is to draft a screenplay inspired by the last twelve years (1916-1928) of the remarkable Czech composer Leos Janacek's life. Before the course begins students will listen to a wide array of Janacek's music and read a number of essays about his life. Every weekday during winter study we will immerse ourselves in brainstorming and writing, with the aim of completing a draft by the end. The workload will be intense but (I hope) extremely rewarding. I particularly encourage students with a passion for writing and classical music to apply. A writing sample (any genre) and a brief description of what drew you to the course is required.

MUS 10 (W) Winter Study Chamber Orchestra (WiSCO)
I will organize a classical chamber orchestra to read and perform music of assorted periods and genres. Two student conductors will lead the orchestra, each one having completed my Fall conducting class. In addition to conducting the orchestra, they will act as personnel managers and librarians. I will coach them on every aspect involved in producing a symphonic performance. Berkshire Symphony members and players in the Chamber Orchestra of Williams will make up the majority of the ensemble. The backbone of the training for the orchestra and the student conductors will involve issues of intonation, articulation, balance, bowing, dynamics, tempo, and interpretation. During rehearsals, members of the orchestra will be encouraged to offer ideas and suggestions in order to take part in the ownership of the final product. There will be a final recorded and videotaped concert at the end of Winter Study. Maximum enrollment: Strings: 12 violins, 5 violas, 4 cellos, 2 basses, and Winds: 2 flutes, 2 oboes, 2 clarinets, 2 bassoons, 2 horns, 2 trumpets, timpani.

Class Format: MWF 7:00pm-9:00pm

MUS 11 (W) Sound and the City: New York on Film
Countless films take place in New York City, but not all foreground the city as an active character in the plot. In this course we will seek answers to the following questions: how does the urban environment participate in a film’s story? How can a movie soundtrack create a particularly urban atmosphere? How can sound represent or subvert the urban communities represented on screen? And more broadly: what does it mean to be a New Yorker? Films such as *The Naked City* (1948), *Thoroughly Modern Millie* (1967), *Taxi Driver* (1976), *Manhattan* (1979), and *Do the Right Thing* (1989)
are wildly diverse in terms of genre, cinematography, soundtrack, and the subject positions they represent, and yet their soundscapes all forge a distinctly New York "feel." Through close viewing--and listening--we will explore how the directors, mixers, editors, and composers deployed sound to forge distinct perspectives on the urban experience. Students will be expected to attend all screenings, read reviews and secondary literature, maintain a "sound journal," and produce a ten-page final paper.

Requirements/Evaluation: "sound journal" and a 10-page paper

The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country-and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook’s music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

**MUS 14 (W) Classic and Contemporary Musical Theater**

Crosslistings: MUS14 / THEA14

**Primary Crosslisting**

This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus—now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

**MUS 15 (W) Contemporary American Songwriting**

Crosslistings: MUS15 / AMST15

**Primary Crosslisting**

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio: Bernice Lewis is the Artist Associate in Songwriting at Williams College. She is an accomplished singer, songwriter, producer and educator and has been a national touring artist for over thirty years She has performed at the Kerrville Folk Festival, PBS's Mountain Stage, and the Kennedy Center in Washington D.C.
In 2009, she was chosen by the National Park Service to be an Artist in Residence. She has released seven recordings of original songs.

MUS 16 (W)  Zimbabwean Music Collaboration

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the participants.

MUS 25 (W)  Creative Art Projects inspired by Southern Florida Native American Indian History & Culture

This travel course will focus on creative work inspired by the history and culture of Native American Indians of Southern Florida. We will discuss the history and culture of Native Americans in the area, focusing mostly on the Calusa, their society, politics, system of government, trading customs, and religion. We will also talk about their construction of canal systems, and their architecture and engineering. Students will arrive to their own conclusion about the impact of Native Americans in our culture. They will also use their experiences during field trips, workshops, lectures, and group discussions as a source of inspiration for their creative work in one or more of the following fields: music composition, visual arts (video, photography), literature, poetry, and theater. They will create their projects individually or could form teams to create interdisciplinary works. If teamwork is selected for the creation of a project there will be a limit of one student per discipline in each team. We will visit archaeological and historical sites, Research Centers, and Museums focused in the History and Culture of Native American Indians of Southwest Florida. We will attend lectures offered by archaeologists, and will participate in the process of screening, cataloging, and analysis of samples extracted from the shell mounds of Useppa Island and Pineland at the Randell Research Center of the University of Florida. Calusa artifacts made with ceramic materials, wood carving, and painting, are recognized worldwide as remarkable examples of Native American artistic achievement. Samples of their art found during excavations in SW FL are part of exhibitions in the Historical Museums that we will visit. Students will learn about music inspired by pre columbian Native American instruments and art. We will discuss information and will visit the estuaries that sustained the world of the Calusas.

NSCI 10 (W) The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in collaborative research projects that will develop their use of the medical model to evaluate primary neuroscience research studies for validity. They will develop their own evaluation systems for identifying how valid research interventions and expanded opportunities for successful learning. Students will lead class discussions based on their reading of primary research. Small groups of 2-3 students will be assigned different articles on the same topic and spend time in class. Adjunct Instructor Bio: Dr. Judy Willis ’71 combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to develop her focus in the neuroscience of learning. **PHIL 11 (W) Spinoza’s Ethics**

Spinoza’s *Ethics* aims to prove that human happiness consists in our rationally perceiving that God is all there is, and that all there is— including you and I— is God. Yet the Christian Church immediately deemed the *Ethics* “a book which, perhaps since the beginning of the world until the present day, surpasses all others in godlessness and endeavors to do away with religion and set godlessness on the throne.” Spinoza's own Jewish community issued a writ of herem, excommunicating him for “monstrous deeds” and “abominable heresies.” In our Winter Study we will closely read Spinoza’s *Ethics* together, in order to understand how its doctrine that God is everything could be so profoundly godless. Our goal will be to view the universe from the standpoint of eternity. This may involve some monstrous deeds and abominable heresies of our own.

**PHIL 12 (W) Bioethics According to The Simpsons**

Active Euthanasia? Okely Dokely! Human cloning? Don’t have a cow, man! Over the past twenty years *The Simpsons* has included a healthy dose of stinging and sometimes surprisingly illuminating critique of numerous bioethical issues. In this winter study course we will use clips and episodes from the classic animated series as a launch pad for investigating the deeper philosophical concepts and ethical questions involved in a variety of bioethical topics. Good comedy has a way of driving straight to the core of contested issues and painful circumstances, providing a point of entry for students in the class to more serious, academic material. Along the way, the course will also investigate what makes *The Simpsons'* treatment of these bioethical issues “funny”—how its satire plays on common misunderstandings, contradictions and inconsistencies in social policy and individual decisions, and
how serious issues drive the comedic effect. During the first portion of the course, the instructor will present selections from The Simpsons that take up several core bioethical issues, paired with related readings from the bioethics literature. In the second portion of the course, the students themselves will identify and present clips pertaining to bioethical issues. The final project for the course will be collaborative in nature: small groups of students will be asked to develop and pitch (to the other class members) a storyline for a Simpsons episode (or portion thereof) that centers on a bioethical topic. Classes will meet two or three afternoons each week, and students will be expected to read a substantial amount of philosophical material in preparation for these meetings. In addition, students will need to spend significant amounts of time outside of class viewing videos and developing their final projects. Evaluation will be based on class participation, one in-class presentation, and the final collaborative project.

PHIL 13 (W)  Boxing

Boxing is one of the world's oldest sports, and there are 3000 year old artistic representations of boxing from ancient Egypt. The history of boxing in the United States during the nineteenth and twentieth centuries reflects the history of the nation. Issues of class, ethnicity, race, and gender have played a central role in the sport. Stories about boxing also play a central role in the popular culture. In this course we will look at some treatments of boxing by social historians, examine some depictions of boxing in documentary and dramatic films, and watch some classic fights. We will also learn some of the fundamental skills involved in boxing. Training as a boxer will give men and women a better appreciation of the physical demands involved. Four days a week we will engage in an intensive training regimen working on basic punching technique, footwork, defense and conditioning. The workouts will involve minimal contact, but will be physically demanding. Students will need to purchase boxing gloves, handwraps, and a jump rope.

PHIL 14 (W)  Yoga and a Grounded Life

"Yoga and a Grounded Life" will examine what the practice of yoga is, and how it can serve as a foundation, guide, and inspiration for living, particularly in the face of personal or societal challenges. Alongside the physical practice of yoga, the class will investigate the philosophical and ethical teachings of yoga's ancient text, the Yoga Sutras of Patanjali. Students will learn a number of basic yoga poses and breathing techniques in 1.75-hour classes that will meet 5 days a week. In addition, students will read and discuss portions of the Yoga Sutras and several different commentaries, such as those of BKS Iyengar and Chip Hartranft. Attendance at all classes is required. Missed classes must be made up before the end of Winter Study, usually by attending a regular class at Tasha Yoga. Students will be expected to practice on their own outside of class, to journal, and to participate in class discussions of the readings. Students will submit weekly written assignments in response to prompts relating to class material. Adjunct Instructor Bio: Yoga teacher Anne O'Connor is certified in the Iyengar yoga method, which she has been practicing for 20 years. O'Connor, a freelance editor, also serves on the Williamstown Select Board and is a member of the First Congregational Church of Williamstown.

PHIL 15 (W) Plato's Symposium and Its Afterlife

Crosslistings: CLAS15 / PHIL15 / WGSS15 / COMP15

Secondary Crosslisting

Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip.

PHLH 13 (W) Behavioral Health Prevention and Middle School Leadership Development
In this course, students will learn about behavioral health prevention and promotion, with an emphasis on the prevention of substance use disorders and the Substance Abuse & Mental Health Services Administration's (SAMHSA) Strategic Prevention Framework. Following this grounding in prevention science, students will learn about middle school leadership development and community action with a behavioral health and wellness focus, and be trained to deliver core components of the New Hampshire Teen Institute's (TI) Leaders in Prevention program for students in grades 6-8. The classroom portion of this course will prepare students to put this knowledge into practice as staff members at the January session of Leaders in Prevention, serving with other youth & adult staff members of TI to facilitate a weekend of education and networking for 50-60 middle school students from around NH and New England. Students in this course will work with teams of middle school students to help them create a student-led action plan for a school or community wellness event to be implemented in their home communities. During the first 2 weeks of the Winter Study period, students will meet on campus for approx. 15 hrs per week. The experiential portion of the course--serving as facilitators at the Leaders in Prevention weekend--will be an overnight trip from Thurs. 1/17 to Sun 1/20 to a conference center in Greenfield, NH. (Lodging & food will be provided to students free of charge while at the camp.) This trip is mandatory for the course, and involves working with middle school youth for 3 very full days. Students will meet once again during the final week of Winter Study to debrief and process their facilitation experiences. Academic work will be primarily contained to the classroom time of the first two weeks. A culminating 10-page reflection paper to demonstrate a synthesis of students’ classroom and practical learning will be the only sizeable out-of-class work. Adjunct Instructor Bio: Marissa is the Executive Director of the NH Teen Institute and a trainer for multiple workshops developed by SAMHSA’s CAPT and ATTC systems. She is the Secretary of the Prevention Certification Board of NH and the NH Prevention delegate to the IC&RC, and serves on the NH Governor’s Commission Prevention Task Force. Outside of prevention work, she is Assoc. Artistic Dir. of Mill City Productions in North Adams, MA.

PHLH 14 (W) Epidemiology, Public Health, and Leadership in the Health Professions

Secondary Crosslisting

More and more, decisions in the health professions are being made on evidence from the medical literature rather than solely from the "experience" of the physician or other health practitioner. What kinds of questions (hypotheses) are being asked, and how are they answered, and answered reliably? How does a conscientious health professional keep up with this evidence and evaluate it both critically and efficiently? After a brief introduction to the history of epidemiology, the class will study a selection of "unknown" historic epidemics, and contemporary data sets in small groups, and present their conclusions in class. The remainder of roughly the middle third or so of the class will explore systematically the approaches and research designs epidemiologists use to answer, among others, questions of treatment effectiveness, preventive strategies, and to study cause and effect, e.g., is this exposure reliably related to an outcome of interest. And finally, how does one decide whether that relationship might be a causal one, and therefore actionable. The various research design applications will be illustrated by appropriate historic--some from the "canon" of the public health and clinical literature--or by more current papers. Although the first two weeks of this ambitious course is more about design issues than one of current topics in public health, about week 3--through lecture and perhaps student presentations--will apply the methodological "tool kit" to major current athletic health issues, e.g., athletic concussions and their short and long-term effects. The last week of the course the class will operate as a Journal Club, with individual and/or groups of students responsible for presenting and critiquing the design, conduct and analysis of a paper(s) concerning a current issue. These presentations may also look at athletic health issues. This WS course is designed to be a serious academic experience, with the rigor of a regular course. Adjunct Instructor Bio: Dr. Wright is a medical epidemiologist who first worked with maternal and child health and family planning programs in Alabama and Georgia. Later, after training as an EIS officer at the CDC, he was a resident consultant to both the Sri Lankan and Thai Ministries of Public Health. Still later, he was a faculty member in the Robert Wood Johnson Medical School, in New Jersey.

Class Format: at least three times a week for a total of 6 hours
Requirements/Evaluation: 10-page paper, final project
Prerequisites: course in Biostat helpful, but not required
Enrollment Limit: 18
Department Notes: all interested students will be interviewed by the instructor

PHLH 15 (W) The Human Side of Medicine

In today's health care atmosphere of physician accountability, advanced medical technology, and evidence-based diagnosis, the "human side" of medical practice is often minimized or even disregarded. Medical schools debate how or whether to emphasize this more interpersonal aspect of medicine within their curriculums. This concern with the patient/physician relationship becomes particularly relevant with today's reliance upon personal devices and with a culture promoting medicine as a big business model. Increasingly research shows that the combination of both perspectives--patient centered understanding and technical proficiency--lead to better diagnosis and treatment; to improved patient compliance and satisfaction; and to increased physician professional satisfaction. Original thinking, examining personal/family experiences, in-class skill practice, and skype interviews with patients/student/health care professionals will provide much of the learning experience. This seminar works well for those who have shadowed physicians or are planning to shadow, but all majors are welcome. Adjunct Instructor Bio: Sandra Goodbody is a clinical social worker. She has maintained a psychotherapy practice in D.C., has a clinical appointment at The George Washington School of Medicine, and has served as a senior project director at the National Academy of Medicine.

Class Format: TWR, 10 a.m.-noon

PHLH 16 (W)  Addiction Studies and Diagnostics
This course is designed to assist students while at Williams and after graduation develop an effective understanding of the impact and treatment of addiction. It is designed for students planning to continue on to Med School and graduate work in the Humanities; work in public health; are a part of a family; a friend of an addict or those impacted by addiction; or to be an educated citizen. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Speakers will tell their stories in their journey from addiction to recovery as well as their experience working as therapists. Students will be expected to accurately diagnose the speakers according to the criteria in the DSM-5. Finally, an annotated bibliography and oral presentation will be presented in groups at the end of the course. 
Adjunct Instructor Bio: Mr. Berger has been teaching this course at Williams since 2010. He has advanced degrees from Springfield College and the Hazelden Graduate School of Addiction Studies, 30 years of recovery from addiction, and a decade of experience in community mental health and clinics.

Class Format: 7-9:30 PM, two evenings each week

Requirements/Evaluation: class participation, field experience of 12-step and other mutual aid recovery groups, experience with initial assessments for substance use disorders, initial experience with formal criteria for SUD diagnosis

PHLH 18 (W) "The Transformation of Silence": Exploring Campus Sexual Violence Prevention and Response
Crosslistings: PHLH18 / WGSS18

Secondary Crosslisting
Since 2011, student activism and federal guidance of dramatically changed how campuses address sexual violence. This class will explore response to and prevention of sexual violence on college campuses and more broadly, across topics related to gender and sexuality, race, constructs of accountability, and public health and social justice approaches to prevention. Class will be heavily comprised of interactive activities, along with reading, films, and reflective writing. Course will meet 3 days per week for 2 hours. Some outside of class work in the form of film viewing and attendance at talks. Adjunct Instructor Bio: Meg Bossong '05 is the Director of Sexual Assault Prevention and Response. Prior to returning to Williams, she was the Manager of Community Engagement for the Boston Area Rape Crisis Center, where she worked with community stakeholders in education, faith communities, medical and mental health care, law enforcement, and beyond on response and prevention initiatives.

PHLH 25 (W) Public Health, Education, and Community Action in Rural India
This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future in entirely
dependent upon the health of its population, specifically its most vulnerable--and most vital--members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in Spring of 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. With the support of a Fulbright-Nehru student researcher fellowship, she is currently conducting community-based participatory research with FPHED on reproductive health programs in rural UP. She has spent a cumulative 11 months to-date studying and researching reproductive health in rural India.

PHYS 12 (W)  Drawing as a Learnable Skill

Representational drawing is not merely a gift of birth, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will develop your ability to accurately see and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and teach creative problem solving abilities. Students need no previous artistic experience, just the willingness and desire to learn. Students will be expected to attend and participate in all sessions. They will also be required to keep a sketchbook recording their progress and complete a final project. Adjunct Instructor Bio: Stella Ehrich is a professional painter whose work includes portraits, landscapes and still life subjects. She studied for seven years at Studio Simi in Florence, she holds an MFA in painting from Bennington College and a BFA from the Memphis Academy of Art.

PHYS 13 (W)  Electronics
Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits and the Arduino, a microcontroller. Class will meet four afternoons a week for a mixture of lab and lecture, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or will write a 10-page paper. If students have prior experience with electronics, they should contact the instructor prior to enrollment.  Adjunct Instructor Bio: Daniel Maser is a postdoctoral research fellow in the Department of Physics, working with Professor Tiku Majumder in his atomic physics research laboratory.  Adjunct Co-Instructor Bio: Jason Mativi is the electro-mechanical technician in the Bronfman Science Center. He will teach the digital electronics portion of the course.

Class Format: afternoons
Requirements/Evaluation: 10-page paper; final project

PHYS 15 (W)  Cooking for the Real World
Crosslistings: PHYS15 / SPEC13

Primary Crosslisting
The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You’ll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac ‘n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: Kitchen Confidential, by Anthony Bourdain, The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America’s Most Imaginative Chefs, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

Class Format: MWF 3-5:30pm

How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet three afternoons a week for a mixture of lecture, discussion, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinkering. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice.

**Crosslistings:** ECON22 / POEC22

**Secondary Crosslisting**

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

**PSCI 11 (W) Editorial Cartooning and the Art of Propaganda**

Crosslistings: ARTH11 / PSCI11

Secondary Crosslisting

This hands-on course, taught jointly by a nationally syndicated editorial cartoonist, Chan Lowe, and a former member of the Art Department faculty, E. J. Johnson, introduces students to the "Ungentlemanly Art" of cartooning through discussions and an emphasis on the creation of their own work. It is not an art course as much as an exercise in disciplining the mind to distill abstract concepts and opinions into visual and verbal symbols that can be clearly, economically and persuasively communicated to the reader. Previous drawing experience is NOT a prerequisite, nor even an advantage. Non-art majors are particularly encouraged to enroll. The basics of perspective, proportion, and shading will be covered as needed to provide all students with the necessary skills to express themselves. Much more important are an inquisitive mind, a healthy interest in the current national discourse, a willingness to enter into spirited classroom discussion, and an appreciation of satire. The fact that the course will meet during the second month of a newly elected Congress means that there will be plenty of material ripe for cartooning. Class assignments will be critiqued in a non-threatening atmosphere. Lowe, who will be continuously producing daily cartoons, will also present his own work for criticism. Class meetings, at least two hours per meeting three days a week, will alternate between the studio experience and lectures, given by Johnson, that will acquaint students with aspects of the history of caricature, cartooning and art with a propagandistic or overtly political purpose. The lectures will provide students with knowledge they may use in producing their cartoon assignments. The success of this course depends on the commitment and motivation of all participants. Course requirements include the drawing of several editorial cartoons per week, daily reading and viewing of news media. Adjunct Instructor Bio: Chan Lowe has been an editorial cartoonist and opinion writer since graduating from Williams in 1975. He has worked for newspapers in Oklahoma, Florida and is now a member of the editorial board of *The Berkshire Eagle*. His drawing and writing work have won many journalism awards, and is nationally and internationally syndicated by Tribune Content Agency. Co-Instructor: E.J. Johnson, Amos Lawrence Professor of Art, Emeritus

**PSCI 12 (W) First Amendment Law and Policy**

The Constitution is a covenant among the people, the states and government of the United States that substantially defines the unique American experiment and experience. First numerically, and in importance to many Americans, is the Constitution's guarantee of free thought and expression, encompassing the First Amendment's freedoms of speech, press, assembly, petition and religion. Over time the Supreme Court of the United States ("SCOTUS") and the "inferior" federal courts and state courts have given the First Amendment special and exalted status, ruling it contains "preferred freedoms" that are the "matrix, the indispensable condition of nearly every other form of freedom," and the mechanisms Americans employ to "form a more perfect union" through democratic processes. The course will provide students an intensive examination of First Amendment law and policy, with substantially more time and attention devoted to these rights than possible in a survey civil liberties or constitutional law course. We will examine the most important First Amendment decisions and influential concurring and dissenting opinions dealing with government action purportedly infringing a First Amendment right. We will also examine how free expression fares in and shapes American society at large. A private employer's, college's or other institution's restriction of expression may not violate the First because it is not government action, but the First and its judicial interpretation affects the discussion and resolution of non-government conflicts involving speech, political activity and religious exercise. The course will explore the rationale and implications of permitting and fostering or limiting certain categories of free expression or in specific contexts (libel–obscenity–"fighting words"–hate speech–depictions of violence and cruelty–child pornography–and others) and in various settings, public and private, involving and
outside government. The course will be offered at a time when First Amendment rights are being challenged, especially press freedoms and free speech on college campuses, including Williams’. With the press held in historically low esteem by the public and under attack from the current federal administration the course will incorporate lessons and discussions involving these matters. Some portion of each class will be devoted to current free expression issues in America, in its local communities and on the Williams’ and other college campuses. Students will be assigned to identify, research and lead discussions of such issues. The course requires reading (https://docs.google.com/document/d/1puCX7gqZ8RiH3Km2tVCIZU0ELE7JS8RQaWmd5KTg84k/edit?usp=sharing), class participation and writing. Class participation will be important because the course will be taught Socratically (as most law school classes are with the teacher asking and students answering questions -- and many in the other direction). There will be an optional SCOTUS simulated oral argument at the end of the winter study. Adjunct Instructor Bio: Lloyd Constantine '69 has argued many constitutional law cases in SCOTUS and “inferior” federal courts. He has taught law school (Fordham) and both civil liberties and first amendment law and policy to undergraduates (SUNY).

Crosslistings: LEAD14 / PSCI14

Primary Crosslisting
This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency’s signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency. Adjunct Instructor Bio: Donald Gregg ’51 served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. He is now chairman emeritus of The Korea Society. 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. Barack Obama's election in 2008 seemed to many Americans to mark the dawn of a new era in American history. Eight tumultuous years later, he left office with a significant record of achievement—and his political opponents in control of the White House, Congress, and most of the states. This course will undertake a preliminary historical assessment of the Obama presidency. Looking at foreign policy and domestic issues (including economic policy, health care, immigration, and LGBTQ rights), we will examine Obama's leadership style and its relation to the structure of American politics in the early 21st century; the sources of his achievements and disappointments; and his enduring significance for American politics and history. Students will read and view primary sources as well as works of journalism and scholarly analysis, which we will discuss in seminar-style class meetings. Halfway through the course, students will propose an essay on some important aspect of Obama's presidency; the final assignment will be the essay itself.

**PSCI 16 (W)  The Martial Art of Politics--Aikido, Gandhi, and King**

"The techniques of Aikido are intended as tools for us to use in examining the nature of power, to engage in uncompromising self-scrutiny, and to realize our potential as powerful, compassionate, creative, self-aware human beings."—Mary Heiny Sensei Aikido is a Japanese martial tradition that combines the samurai arts of swordwork and grappling with the philosophical desire to forge a path of harmony in the face of determined opposition. As such, it addresses situations of conflict that manifest themselves physically, but also offers insight into how to redirect the energies—social, psychological, or political—that might otherwise become conflict in one or another aspect of our lives. As a martial art, Aikido teaches us more than simply how to survive; it also teaches us how to physically express our noblest intentions in movements that protect not only ourselves but the attacker as well. Martin Luther King famously observed that "Returning violence for violence multiplies violence, adding deeper darkness to a night already devoid of stars." Aikido, a physical expression of nonviolence, is the alternative approach made manifest—the light that can drive out darkness and the love that can drive out hate. The physical training (10 am-noon each weekday morning in Currier Ballroom) will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. The academic component of the course will engage with how the physical training resonates with selected writings on nonviolence (Mohandas Gandhi, Martin Luther King Jr., and theoretician Gene Sharp) and the tactical practices of successful nonviolent protest campaigns. Each student will research and profile a successful nonviolent campaign, explain why it worked, explain what was "aikido" about it, and in small groups will pick a target and draft a plan for a contemporary protest campaign on a topic of their choosing. Each group will be responsible for crafting speech text, a tactical analysis of their proposed campaign, and a social media plan. Actually implementing the campaign is not a part of the course. By integrating physical and intellectual components, the course seeks to forge in each student a stronger and
more coherent perspective on how the pursuit and embodiment of harmony can resolve the conflicts that we so often encounter. Joining us for several sessions will be local scholar Stewart Burns, author of the award-winning MLK biography *To the Mountaintop*. Additional relevant experiences, such as meditation practice, outdoor misogi, and feature films (Gandhi, Selma, etc.) will be woven into the course as schedules permit. Students do not have to be especially athletic, and in Aikido women train as equals with men. Students are encouraged to correspond with the instructor (rkent-at-williams.edu) before registration begins if they have questions. Adjunct Instructor Bio: Robert Kent ’84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan, where he helped run the youth program for 18 years. He is currently President of Aiki Extensions, Inc, a nonprofit that supports programs that bring the strategic insights and practical wisdom of Aikido into non-traditional settings. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity. This will be the twelfth year he’s offered a Winter Study class.

**Class Format:** daily, 10 am-noon for aikido training, + 2 times a week for academic discussions, typically over lunch

**Requirements/Evaluation:** quality of participation in both physical and intellectual course components (historical analysis, class discussions, final project)

**Prerequisites:** same physician’s approval on file as the school requires to participate on sports teams

**Enrollment Limit:** 20

**PSCI 17 (W) The Third World City**

Crosslistings: GBST17 / PSCI17

**Primary Crosslisting**

In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities’ path of urbanization diverges from the “normal” one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today’s world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.

**PSCI 18 (W) Girl Meets World: Films from 5 Continents**

Crosslistings: WGSS17 / PSCI18

**Primary Crosslisting**

This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls’ own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining
how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

PSCI 19 (W) Law as a Tool for Social Justice

The law may be deployed to achieve social justice in different ways: through the courts, legislation, and the ballot. While we will see the law work positively, we also will examine its limitations and failures due to societal, economic and human obstacles. We will read 2 books in full and 2 in part, all of which relate compelling stories. We begin with *Devil in the Grove* (winner, 2013 Pulitzer for non-fiction), which is about a 1949 Florida rape case involving 3 black men who are defended against the charge of raping a white woman by Thurgood Marshall, at risk to his life. While we encounter the brutal obstacles to obtaining justice in the deep South, the book also is in part a mini-biography of Marshall, and we will read about the great victories he achieved nationally in Supreme Ct. cases involving voting, housing and education. Next is *Gideon's Trumpet*, a classic in the field of constitutional law by Anthony Lewis about winning the right of a pauper to be provided with a lawyer in state felony cases. The book elegantly describes the structure of our Federal system, delineating the tension between the rights reserved to the states in the area of criminal law, and the protection provided to individuals by the Bill of Rights. The third book is *Winning Marriage* by Marc Solomon. It narrates the incredibly successful effort by the LGBT community to win for same-sex couples the right to marry, focusing on gritty political battles at the state level, moving to landfall Supreme Ct. decisions. We will read the penultimate Obergfell decision. The last book is Jonathan Harr's *A Civil Action* (winner, 1996 Nat'l Book Critics Circle Award for non-fiction). The issue is environmental justice and the case is a lawsuit between private litigants: Woburn MA residents who suffered leukemia and other illnesses arising out of toxic chemicals dumped by two large corporations. A David, a very small law firm, takes on Goliath, two giant companies and their huge law firms. Adjunct Instructor Bio: Richard Pollet graduated from Williams in 1969 cum laude, with Honors in Poli Sci, and thereafter obtained a law degree from Columbia Law School. He spent 40 years practicing law, the last 26 as General Counsel of J. Walter Thompson Company (JWT), retiring in 2013. Subsequently, he has done some consulting for WPP, JWT's parent company, and last taught this Winter Study course in Jan. 2018.

PSCI 20 (W) The Personal is Political: A Nonfiction Writing Workshop

Since St. Augustine's *Confessions*, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of
our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual...reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project--memoir, personal essay, or a hybrid form--the final draft of which will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom--roughly twenty hours a week--during which you'll be engaged in the writing process and reading for class. Readings for the course will be selected from: Baldwin, James. "Notes of a Native Son" Biss, Eula. Selections from Notes from No Man's Land Coates, Ta-Nehisi. Selections from Between the World and Me Hurston, Zora Neale. How It Feels to be Colored Me Khan-Cullors, Patrisse and Asha Bandele. Selections from When They Call You a Terrorist: A Black Lives Matter Memoir Nelson, Maggie. Selections from The Argonauts Rankine, Claudia. Selections from Citizen Smarch, Sarah. "Poor Teeth" and others Adjunct Instructor Bio: Julia Munemo holds her MFA in creative nonfiction and has completed a memoir about race, love, mental illness, and her father--a writer of racially charged pulp fiction. Her manuscript explores how her legacy conflicts with her present-day life as one half of an interracial marriage and the mother of mixed-race children. She teaches writing workshops in Williamstown and Maine.

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Class Format: Meeting prior to start of winter study and again after conclusion

Requirements/Evaluation: 10-page paper; 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; daily journal; participation in final meeting

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: selection will be based on a resume and letter of interest; at the time of preregistration interested students should send a resume and letter of interest to Paula Consolini (pconsolini@williams.edu)

PSCI 22 (W) Learning Intervention for Teens
This course pairs energetic Williams students with adolescents involved in the juvenile court system of Berkshire County. Judges assign teenagers (ages 13-17) to this program, an official Commonwealth of Massachusetts probation program. Our goal is to empower the teenagers through positive peer mentorship and by allowing them to take ownership of an independent project. Each Williams student helps a teen investigate, develop a final project, and present about a topic of the teen’s choosing. The project and other program activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting and communication, which the teenagers can transfer to their school, work, and home lives. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work to an audience that includes the Berkshire County Juvenile Court judges and probation officers, town and city chiefs of police, County District Attorney and assistant DAs, the teens’ peers and families, Williams faculty and community members. Williams students develop experience serving in an official capacity, learn to mentor teenagers, and gain insight into the juvenile justice system. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation, and keep a weekly journal detailing their meetings. This is a student-led course, sponsored by Chief Wynn and Professor Shanks but entirely run by trained Williams students who have served as mentors in the past. In order to enroll in the course, all students must write a paragraph explaining why they believe they’d be a successful mentor in this program. Students should email their paragraphs to student coordinator Nicholas Goldrosen at ncg1@williams.edu and cc: cshanks@williams.edu.

PSYC 11 (W) Designing your Life and Career After Williams

This course takes a psychological approach to helping you figure out what to do with your life. We start by reviewing your life story up until now and determining how it has shaped you. We discuss, for example, whether you feel pressured to go down a certain road, whether you feel torn between your head and your heart, or whether you feel directionless. Then we take stock of who you really are now, including your core interests, tendencies, strengths, and weaknesses. We try to identify life designs that play to your signature strengths, as opposed to situations that are a setup for frustration and failure. The class encourages you to let go of comparing yourself to your peers, as different people need different things. You explore your underlying values and what you find most important in life. You consider the level of meaning you need in your work, as well as how much you care about money, status, fame, independence, connection, and creativity. The class introduces you to the concept of "flow," the feeling you get when engaging in activities that provide ideal levels of challenge and mastery. By designing lives and careers that promote flow states, you will be most likely to thrive and not merely succeed. Indeed, it is important not to design a life that appears successful but feels miserable. Your choice of a romantic partner can also have huge implications for the trajectory of your life. The class helps you to identify typical traps, such as staying with someone who is a bad match, and discusses how to make constructive relationship choices. Ultimately, as there are likely multiple valid life and career paths for you to take, you identify and develop three different plans that feel authentic and inspiring to you.

Adjunct Instructor Bio: Dr. Johnson received his B.A. from Williams College, his Ph.D. in clinical psychology from Yale University, and is a Clinical Associate Professor at Brown University. He has taught this Winter Study for the last two years and deeply enjoys mentoring students around career issues.

Seventy-two percent of college students report that they used alcohol at least once within the past 30 days. Where is the line between fun and danger? This course will examine the realities of the role of alcohol in the social lives of college students. Students will engage in active discussions of readings, videos, and myths vs. facts, as well as personal observations and opinions. Class structure will involve 3-hour classes that meet twice weekly. Participants will learn scientific facts about alcohol, including how it gets metabolized in the body differently in men and women, and how to recognize and respond to the signs of alcohol poisoning. Films will include evocative footage and interviews, such as "College Binge Drinking and Sober Reflections." We will hear from an expert in trauma and sexual assault and explore the significant role of alcohol in sexual assault on college campuses. We will discuss alcohol-related medical emergencies and problem-solve strategies to stay safe when choosing to use alcohol. Statistical data from colleges here in the Northeast will be reviewed, including survey results from the Core Institute and the Harvard School of Public Health Alcohol study. The course culminates in a final peer education presentation each student develops over the first 3 weeks through independent study outside of class on a related topic of their own choosing approved by the instructor.

PSYC 13 (W) Practical Preparation for Work After Williams: Standing Out Instead of Fitting In!

Crosslistings: LEAD13 / PSYC13

Secondary Crosslisting

Students will dramatically enhance and expand their own practical professional competencies and personal attributes by gaining specific skills valuable and relevant for success in the real-world of work! Dynamic sessions are conducted by an exceptionally accomplished instructor focusing on character, interpersonal astuteness, communicating skills, leading effective change, financial statement literacy, decision-making under pressure, and thinking critically about and acting intentionally for personal development. Knowledge is transferred in the classroom through fast-paced, concise student-led discussion, live interaction with seven world-class guest speakers, individual communications exercises, role-playing, and personal one-on-one mentoring by the instructor. Preparing for productive class discussions and participation requires reading three short books (The Headmaster; Killer Angels; Breaking Through) and various articles, watching selected videos, understanding material provided in a subject matter guidebook, completing a private Birkman assessment online, as well understanding wide-ranging human performance though an encapsulated case study of the people at the Battle of Gettysburg. Benefits realized by students from all classes can be applied to any enterprise, including business, entrepreneurial initiatives, education, non-profits, and public sector governmental service. Students prepare a 5-page paper on a topic of their choosing that is work-shopped in a tutorial peer evaluation format prior to submission to the instructor. A one-page personal development action plan is also prepared that remains confidential between the student and the instructor in order to provide private individual mentoring and coaching. Class meetings are conducted with lots of fun starting in mid-morning for 1 hour and 45 minutes Monday through Thursday during Winter Study with an estimated three hours of daily preparation (about 20 hours per week) necessary by each student in order to take ownership for achieving and enjoying the full learning experience. Course Daily Agenda: http://www.intersolvegroup.com/wp-content/uploads/WilliamsWinterStudyAgenda2019.pdf  Adjunct Instructor Bio: http://www.intersolvegroup.com/leadership-profile/

Class Format: Monday through Thursday 10-11:50 AM

Requirements/Evaluation: class participation based on materials provided for daily preparation, a 5-page paper reviewed in a tutorial peer format and evaluated by the instructor, and a one-page personal development action plan

PSYC 14 (W)  JA SelCom: A Case Study in Selection Processes

This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in selection? These are just a few of the questions that we will seek to understand through guest speakers from The Davis Center, Psychology Department, Admissions, and the Career Center. The majority of the time will be dedicated towards applying these ideas in selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality.

PSYC 15 (W)  Ephquilts! An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: Pieces of the Past by Nancy J. Martin; Stitching Memories: African-American Story Quilts by Eva Ungar Grudin; Sunshine and Shadow: The Amish and Their Quilts by Phyllis Haders; A People and Their Quilts by John Rice Irwin; Treasury of American Quilts by Cyril Nelson and Carter Houck; The Quilt: New Directions for an American Tradition, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

PSYC 16 (W)  Self Compassion: The Benefits and Challenges

Ever put yourself down when things aren't going well? Offering yourself compassion is often recommended by therapists and is a skill taught in some modes of therapy. What is the basis for this recommendation? How is self-compassion put into practice? What makes it so challenging? You will learn about the elements of self-compassion, explore and experience different ways of offering yourself compassion, and discuss your experiences. You will
look at ways that self-compassion can positively impact your mental health, your work, your play, and your relationships. You will be taught self-compassion skills, including mindfulness practices and recognizing and challenging negative self-talk, among others. You will be asked to practice these skills between classes, do some reading, and reflect on your experiences. Adjunct Instructor Bio: Becky is a licensed clinical social worker. She has worked as a psychotherapist with Integrative Wellbeing Services here at Williams since 2014. She has explored the topics of compassion and self-compassion both professionally and personally.

**Class Format:** mornings and afternoons

**Requirements/Evaluation:** one 2- to 3-page reflection paper will be due each week; a weekly log of mindfulness activities will also be kept and submitted

**PSYC 17 (W) "Cultural Cliteracy": Introduction to Transformative Sexuality Education**

This course will introduce students to transformative sexuality education. Transformative sexuality education assumes students will experience major shifts in their sexual knowledge, attitudes, and behaviors. Undergraduates commonly report inadequate sex education in high school, concern that students are sexually harassed, assaulted, or raped during their four years in residence and that little opportunity exists on campus for students to talk with each other candidly about sexual issues. The course is designed to improve the sexual culture on the Williams College campus by expanding knowledge, fostering skills, and providing opportunities for intergroup dialogue. Students will explore topics such as communication and sexual communication, gender diversity, enthusiastic consent, pleasure in and out of committed relationships, hookup culture, models of sexual functioning, BDSM/kink culture, and sexual identity. Topics will be examined through an intersectional lens. A variety of methods will help engage students with course material. Lectures by the instructors, large and small group discussions, role-plays, practice of empathy, intimacy, interviewing skills, reading literary fiction, DVD screenings, anonymous class surveys, and taking sexual histories promote students’ learning. Sexually explicit material is used in this course, following trauma-informed practices and guidelines specifying best pedagogical practices. Each class session is designed to create activities that will lead students to achieve at least three learning objectives. Evaluation will be based on submission of a journal entry related to each class session and a journal entry related to a reading/movie due each class session. Students will submit a final paper and creative project. Attendance and participation are crucial to successful completion of this course.

**Class Format:** afternoons

**Crosslistings:** PSYC18 / SPEC18

**Secondary Crosslisting**

This course is the full training for students who would like to cover Call In Walk In shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Outside of class work will include readings, video viewings, information gathering, and a possible field trip to local agencies.
PSYC 21 (W) Psychology Internships

Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or other setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Class Format: by appointment
Requirements/Evaluation: evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation
Prerequisites: approval by Noah Sandstrom is required

PSYC 22 (W) Introduction to Research in Psychology

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be.

REL 12 (W)  The Mumonkan and Tathagata Zen: An Exploration of Mind
Zen is the sect of Buddhism that stresses experience over cognitive formulas and principles. Based on the tenet that all beings have what is called Buddha Nature, practice is entered into with the faith that one can have exactly the same experience that the historical Buddha, Shakyamuni, had and can thereby come to know the process that constitutes the nature of all beings and things that comprise the universe. The primary method of practice is the meditative technique known as zazen, and the type of Zen that focuses on the consciousness that develops from diligent zazen practice is known as Tathagata Zen. Through one's efforts in zazen, one may come to the intuitive experience of the Dharma Activity, the activity that gives birth to all things and into which all things return. Although the Dharma Activity cannot be described fully in words, it is possible to use words that point to it without running afoul of its truth. The Mumonkan (The Gateless Gate) is a classic Zen text containing 48 such pointers or koans. Utilizing this text as a focus of discussion, students will attempt to grasp the teaching contained in these pointers by means of the principles of Tathagata Zen. The practice of zazen will be part of each class, and the course will culminate in a two-day zen retreat. Those taking the course will keep a daily journal of their course-related experiences which will be reviewed by the instructor. They will also write a series of short papers on selected koan from The Mumonkan. The course will meet from 9am--Noon on Monday, Wednesday and Friday. Anyone wishing to take this course must submit a paragraph stating their purpose for doing so. Up to ten students will be accepted for this course and all are eligible, including those who have taken a prior Winter Study Zen course taught by this instructor. Adjunct Instructor Bio: Williams ’62, Retired psychiatrist. Zen practitioner for 48 years, 17 as a monk.

Class Format: mornings

REL 14 (W) Mountain Religion
Sacred mountains play a central role in the founding myths of many religious traditions. Mountains such as Sinai, Olympus, and Kailash are considered divine abodes, entry into which confers spiritual powers. For many religious practitioners, pilgrimage to and practicing in and around the mountains provides a special opportunity to encounter the gods and acquire spiritual benefits. In this comparative course, we will explore the special role and function of mountains in Buddhism, Hinduism, Judaism, and Islam, with a special focus on contemplative practices from Japan's Shugendo tradition and the kaihogyo nighttime hikes of Tendai monks, circumambulation of Himalayan peaks and mantra recitation, and pilgrimage journeys. Class will meet for three 2-hour sessions per week. Readings will consist mostly of journal articles and selections from books, with a 5-page reflective paper due at the end of the course. Depending on the weather, we will take advantage of the surrounding mountains for short contemplative hikes, applying some of the practices we will study.

Class Format: mornings
Requirements/Evaluation: 5-page paper

REL 17 (W) How to Write Auto-Fiction
Crosslistings: REL17 / ENGL17

Primary Crosslisting
You glanced eagerly over the course descriptions, looking for something that would allow you finally, at last, to wrestle with the ridiculous assumption that those literary genres-namely, "Fiction" and "Non-Fiction"-had intrinsically established identities and clear bounds. You wanted the class that would allow you to write the truth as you experienced it, the truth that was not entirely dependent on facts as markers of truth, but also not so flimsy as to bend in the gentle breeze of every casual opinion. Your eyes stopped on the title, "How to Write Auto-Fiction," and your attention was piqued. Will it all be written in the second person? you wondered, a thought that had you a little concerned, but the professor calmly stepped in to assure you that no, it would not, in fact it would be best if you avoided that particular narrative mode entirely. You would be focusing on writing stories from your life (10-20 pages each), narrated in the first-person, not entirely factual, but certainly not false. They would be workshopped by your peers, revised, and resubmitted. You would come to class ready to write on the first day, and you would be ruthless in your revisions of shitty first drafts. Adjunct Instructor Bio: Dalena Storm is local writer of fiction and non-fiction. She earned her BA from Williams College and her MFA from Bennington College where she participated in a number of combined workshops on memoir and fiction, and she began to explore the space between the genres in her own fiction in addition to completing a memoir.

REL 18 (W) Rare Bibles of Chapin Library
What does a Bible from 1462 feel like? Smell like? In this course, students will touch, smell, and examine early and rare Bibles from the world-class collection of Bibles housed in Williams's own Chapin Library. Highlights of the collection include multiple significant 15th and 16th century Bibles, as well as a 1611 King James Bible. Through class readings and discussions, as well as a small research project, students will learn about the history of the book, the history of the Bible as a book, and the specific histories of one or more rare Chapin Bibles of their choosing. The major project for the course will be for students to experiment with and curate a Twitter account and course website as online exhibits of the 'rare and wondrous' Bibles of Chapin Library.

REL 24 (W) Touring Black Religion in the 'New' South

Crosslistings: ENVI24 / AFR24 / REL24

Secondary Crosslisting
In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South." Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state." Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion. Taking Hurston's lead, this course will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique? To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the 'New South' including a small mainstream denominational church in Talleveast Florida; a Pentecostal-Holiness church in St. Petersburg, Florida; and a mega-church in Eaton, Florida. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. A 200-page course packet will contextualize the trip.

REL 25 (W) Yoga and Meditation in India: Theory and Practice
This course delves into the theory and practice of both Hindu and Buddhist yoga in their land of origin, India. In the first half, we stay in the North Indian town of Rishikesh, one of the main centers of Hindu yoga today, located on the banks of the Ganges River. There we practice yoga and meditation daily, study yoga philosophy, and visit leading yoga centers. In addition, we volunteer daily at Mother Miracle Community Development Program, where a K-12 school is dedicated to teaching exceptionally intelligent poor children. In the second part of the course, we travel to South India and stay at Sera Je Monastic University, the largest center of Tibetan Buddhist monastic learning in India. There we continue our daily practice of yoga and meditation, and study with a Tibetan monastic scholar the theory of Tibetan Buddhism. In the afternoons students volunteer with Tibetan students and visit Tibetan service organizations in the area. In this way we gain a solid overview of the practice of yoga and meditation in India. We come to appreciate and learn from the people upholding the living traditions of yoga, as well as helping these people to strengthen the education that will allow them to interact with the global world. Required Reading: The Path to Enlightenment by The Dalai Lama; Yoga and the Luminous: Patanjali's Spiritual Path to Freedom by Christopher Key Chapple; selected articles about yoga and contemporary yoga exchanges. Adjunct Co-Instructor Bio: Tasha Judson, M.Ed., is a certified alignment oriented Hatha yoga teacher and authorized meditation teacher. She has directed Tasha Yoga studio in Williamstown since 2003.

In this course we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use a view camera (a large format camera used shortly after the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, and sensitive media and use them as tools to make creative portraits in the darkroom. By the end of the course students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des rencontres Photographiques de Guyane.

RLSP 16 (W) The Ayn Rand Cult
Crosslistings: COMP16 / ANSO16 / RLSP16

Primary Crosslisting

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; Congressman Paul Ryan and Exxon CEO (and current Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.

Requirements/Evaluation: class attendance and participation, short weekly journal entries, and a final 10-page paper

RUSS 11 (W) Queer Russia
Crosslistings: RUSS11 / WGSS11 / COMP11

Primary Crosslisting
A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia’s suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country’s evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country’s queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

RUSS 16 (W) Russian Spies in DC: FX's "The Americans"

From the beginning of the Cold War to the present, the presence of Russian intelligence operatives in the nation's capital has been the subject of fascination and speculation. In this course, we will examine the FX channel's series *The Americans*, in light of both the popular imaginary about Russian spies in the United States and the actual history of intelligence wars in Washington. How does the series represent the lives of Russian political and intelligence operatives during the Reagan presidency, and how does it interpret the larger events of the Cold War in its final decade? Readings will draw from accounts on both side of the Cold War, focusing on signature developments such as Jewish immigration from the Soviet Union, the covert biological weapons programs, and Soviet attempts to build relations with progressive movements in the United States. Adjunct Instructor Bio: Alexandar Mihailovic has taught at Bennington College, Williams College, and Brown and Columbia Universities. His books include "Corporeal Words: Mikhail Bakhtin's Theology of Discourse," "Mitki: The Art of Postmodern Protest in Russia", and the edited volume "Tchaikovsky and His Contemporaries: A Centenary Symposium." He has also published articles about cultural relations during the Cold War, African-American studies, art history, and cinema studies.

RUSS 25 (W) Williams in Georgia

Crosslistings: RUSS25 / SPEC25

Primary Crosslisting

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-tsikhveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

SPEC 10 (W)  Counseling Skills Intensive

Are you the person your friends turn to for support? Good listening and communication skills are of benefit to everyone, but particularly for students with support responsibilities and those interested in helping professions. This course will prepare you to be a better listener and more effective, confident communicator. Develop a deeper sense of presence to help others feel more at ease with sharing, facilitate decision-making and problem-solving using validation and active listening skills, and learn effective strategies and boundaries appropriate to more urgent situations. We will practice fundamental counseling skills, learn about factors influencing our own communication styles and the roles we gravitate toward in our relationships with others. You will learn how to communicate about sensitive issues and find your own style in helping roles. Emphasis will be given to understanding one's limits within a given situation, knowing when to refer to other resources, and what resources are available to students. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings, journaling, and out of class exercises designed to deepen your understanding and practice.  Adjunct Instructor Bio: Karen Theiling is psychotherapist at Williams College where she has provided
counseling to students since 2000. She is a licensed mental health counselor whose particular interests include trauma, gender and sexuality, Dialectical Behavior Therapy and outreach of all kinds. **SPEC 11 (W) Pod Save Williams: Audio Stories about Making the College More Sustainable**

How can we all create a more sustainable Williams? In this course students will explore sustainability challenges, successes, obstacles, and opportunities on the Williams campus by interviewing staff, faculty, and fellow students and then weaving those interviews into compelling audio stories for the campus community. Students will study interviewing, storytelling, and podcasting best practices and will use what they learn to create interesting podcasts that are both rich in content and in sound. Guiding questions will include: How is sustainability being integrated - or not - into the operations of campus? What daily activities are most impactful both carbon emissions-wise and ethos-wise? How do social justice and environmental justice intersect with sustainability on campus and in this region? Who are the unsung "campus sustainability heroes"? What opportunities and challenges lay ahead related to these issues? How does one tell a story in a way that is universal or at least relevant to one's intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? Informative and impressive podcast creations will be used as resources on the Williams sustainability website and will be posted to Stitcher, iTunes, and Soundcloud. A number of assignments will involve listening to and critically analyzing podcasts. Our time together will be a combination of learning about campus sustainability issues, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College. Prior to working at Williams, he was the associate director of Utahns Against Hunger and founded and directed Real Food Rising, a youth-empowerment sustainable farming program.

**SPEC 12 (W) What's Advertising and Why Should We Care About It?**

Admittedly, only a handful of Williams students will enter the advertising business, especially the classic Madison Avenue version of it. On the other hand, an appreciable percentage of graduates will join fields where some form of advertising and promotion is a critical but complicated success factor, whether in NGOs, business, non-profit organizations or startup ventures. The proposed course is a high level view of one of the most important levers in society today. In one form or another, advertising influences not just our purchase decisions but also (and increasingly) politics, public policy, use of social media and a host of cultural issues, including perceptions about diversity, gender and the role of women in society. This course teaches how insights, strategy and positioning come to creative life, are assessed and how they percolate through brand experience and within the organization. We will consider why and how marketers align themselves with different demographic and age groups creatively and how they build positive perception. It will also help students understand why--after all the metrics and analysis and research--a brilliant creative idea is worth its
weight in gold. The course is intended as an overview and will necessarily proceed at a rapid pace. Course content will be a mix of case studies, examples drawn from the current marketing world and original research by students. Where appropriate and possible, guest speakers will be invited in order to provide particular insight or participate in debate. The final project presentation will ask student teams to ‘reverse engineer’ the observed advertising and communications strategies of a marketer (broadly defined) using publicly available data and course materials. The course would meet twice per week in three hour sessions. Out-of-class expectations are approximately 10 hours/class in research, writing and group work projects.

Adjunct Instructor Bio: Steve Harty worked in advertising for 30 years, spanning developments such as the launch of cable networks, interactive and digital platforms and into today's highly diversified communications environment. He was CEO or Chairman for four firms and served clients such as American Express, Johnnie Walker, Axe deodorant, Cadillac, Verizon, IBM and Miller Lite. He helped launch jetBlue Airlines, Ally Bank and the Voom HDTV service. He is a 1973 graduate of Williams and a trustee emeritus.

SPEC 13 (W)  Cooking for the Real World

Crosslistings: PHYS15 / SPEC13

Secondary Crosslisting

The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You'll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac 'n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: Kitchen Confidential, by Anthony Bourdain, The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America's Most Imaginative Chefs, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

Class Format: MWF 3-5:30pm

SPEC 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy

Crosslistings: MATH15 / SPEC15

Secondary Crosslisting

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using
acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

Class Format: mornings
Requirements/Evaluation: 16 out-of-class logged practice hours are required leading up to an in-class practical assessment for the acupressure and reflexology components of the course
Extra Info: the aromatherapy portion of the class will be evaluated by a presentation to the class on a particular aspect of aromatherapy and also in-class completion of specific tasks and products

SPEC 19 (W) Healthcare Internships
Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which healthcare is delivered. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the
individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus: from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions (3) will focus on "substance abuse" as a thematic construct for the discussion of related chronic and acute conditions frequently encountered in clinical and social/behavioral contexts. The thematic focus on substance abuse will allow students to reflect on their clinical experiences across a wide range of clinical specialties and also to engage in discussion of a public health crisis affecting quality of life across the lifespans of Berkshires residents. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions. Students will also demonstrate an enhanced awareness of the systems through which medical care is delivered and the challenges of health care delivery within a rural community. Students will also be expected to reflect on their clinical experiences through didactic sessions and case presentations, as well as in a final paper.

Adjunct Instructor Bio: Barbara Fuller is the Director of Science and Health Professions Advising.

Class Format: Students are shadowing healthcare providers for 20-25 hours per week.

SPEC 21 (W) Experience the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parents acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Students will be required to read one of two books selected for this course. There will also be reading selected from such works as What Should I do with My Life? by Po Bronson, 2003 and Working by Studs Terkel, 2004. Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific internships listed in the SPEC 21 syllabus. Application are submitted via Handshake.

Class Format: At least 30 hours per week, 5 days per week, 6 hours per day

Requirements/Evaluation: completion of readings, daily journal, and a 5- to 7-page expository review and evaluation that will become public record as a resource for other students

Prerequisites: qualifications for internships

Enrollment Preferences: placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

SPEC 22 (W) Outdoor Emergency Care

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in
outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon 1. National Ski Patrol’s Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care for: Wounds and Burns; Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion); Musculoskeletal Trauma (e.g., breaks, sprains, etc.); Shock, Respiratory, Poisoning, Substance abuse emergencies; Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 16 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Thomas Feist ('85) is a 35-year ski patroller, certified OEC Instructor and Instructor Trainer. He has taught chemistry at Williams College and served as acting director of the Williams Outing Club in 1990-91.

SPEC 23 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change

Liberal Arts for Epic Challenges is an introduction to the techniques of design thinking to help liberal arts students gain the necessary skills and confidence to tackle complex social and economic problems: attention to the human dimensions of problems and solutions, creative confidence, risk taking, learning from failure, effective collaboration, and story-telling. Design thinking has become an increasingly prevalent approach in encouraging innovative solutions among start-ups, corporations repositioning themselves, government agencies seeking to improve their citizen services, and NGOs addressing major social problems like rural health care. This winter study course will expose students to the tools of design thinking and then will take on several challenges selected by the students. Students will undertake the research phase in Williamstown, then go to the IBM Design Studio in Austin, Texas (or a similar consulting firm design lab) for the ideation phase in collaboration with designers at IBM and Watson, using the same facilities that IBM design thinkers use. Solving truly difficult problems facing society in the 21st century requires a purposeful approach that draws on a full range of the experiences and perspectives of those who have studied the liberal arts. Only with the advantage of those with an understanding of the social sciences, physical sciences, arts, and humanities provide a sensitivity to both the dimensions of difficult problems and how to address them for human-centered solutions. There will be two 3 hours workshops in the afternoons when in Williamstown, All day in the Design Studio in Austin for 3 days. Light reading, but necessary team meetings between classes.

Class Format: travel
Requirements/Evaluation: based on observation of active constructive participation in team efforts and evaluating a final team presentation for relevance,
Extra Info: sensitivity to human-centered concerns, completeness, effective communication, and realistic probability of success, all of which will be documented in an electronic field journal
Prerequisites: interested students must attend an informational meeting and submit a short essay about their interest in the course
Enrollment Limit: 10
Enrollment Preferences: none; not open to first-year students

SPEC 24 (W) Transformative Moments in the Education of a Preschool Child

This course will provide an opportunity for immersion in the life of a preschool community in the Bronx. Future of America Learning Center (FALC) is a nationally-accredited program that is recognized for its quality and standard of excellence in the field of Early Childhood Education. Students from varied educational institutions, teachers and instructional coaches are recommended by the Department of Education to visit FALC's classrooms to observe, experience and learn about the Plant-a-Dream curriculum. Winter Study students will actively participate in the daily classroom activities with the children in order to develop a sense of best practices in Early Childhood Education. Students will live with families whose children are in the program, in the model of Gaudino's experiential learning, to access a deeper sense of context and a better understanding of the issues facing children and families from this community. Opportunities for dialogue between families, staff, and students, will also be central to the learning experience. Furthermore, our mentors will guide students in robust self-reflection, as well as inquiry into the environment in which they are immersed, and the personal meaning derived from these experiences. More information about FALC and the course mentors can be found at https://goo.gl/PEJsoq.

SPEC 25 (W) Williams in Georgia

Crosslistings: RUSS25 / SPEC25

Secondary Crosslisting

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-Tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

SPEC 26 (W) Field Work in a Bay Area Start-Up

This course is designed to give students insight into how technology start-ups work and well as a chance to practice their problem-solving skills and gain deeper insight into the customer discovery process. The course will start in Williamstown with a review of idea development tools used in today's start-up environment, particularly those pioneered by Stanford d.School such as the Lean Start-up method, Business Model Canvas and Design Thinking. Reading will include The Lean Start-up by Eric Ries, Zero to One by Peter Thiel and Edward deBono's Thinking Course as well as articles and podcasts. The class will be split into three teams of four students and paired with a Bay Area start-up looking to enter a new market, a new customer segment or are considering certain product modifications. The student teams will work on identifying customer needs, qualifying customer feedback and making recommendations to management. The class will tap into the strong Bay Area alumni network which will allow for visits to several different start-ups and fast-growing tech companies and compare how they approach their markets. The final project will be a ten-minute presentation to management. Student should submit a short statement of why they would like to participate and what they expect to learn.

SPEC 27 (W) Social Justice, Activism, and Advocacy in New York City

This 2019 Winter Study course examines social justice advocacy and activism in New York City's nonprofit organizations, churches, and private and public universities. The focus is on antiviolence and human rights initiatives based in New York City's institutions that shape the perspectives not only of the city but influence debates about democratic values and political perspectives throughout the nation and the world. Students would work with non-profit and advocacy organizations such as the Social Justice Committee of Trinity Luther Church (TLC) Immigrants Rights Coalition; and ConnectNYC, a Harlem-based non-profit that works city-wide to end domestic, social, and religious violence. For three weeks in the city students would attend forums on social justice, anti-racism/feminist/lgbtq rights at Barnard; Columbia University; City College, and CUNY Graduate Center. The three weeks in NYC focus on three overlapping themes central to social justice advocacy: domestic/family safety; community values in policing and citizen's and prisoners' rights; immigration and human rights.

Class Format: travel

Requirements/Evaluation: daily journal; volunteer with one of the participating non-profits to assist in digital or community outreach and organizing for 3-4 hours daily;

Extra Info: attend a weekly educational event(s) at city universities or nonprofits; attend a mini-seminar to discuss readings and experiential learning;

Extra Info 2: write a 10-page analytical paper at the conclusion of the winter study evaluating political trends in each of the three areas; attend a community council meeting at the 24th Precinct in Manhattan (West 100th St.).

SPEC 28 (W) Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

SPEC 29 (W) The "Television" Industry: Legal, Business and Policy Issues in the Distribution of Video Content

This course will explore how video content is distributed in the United States and examine how a business deal to do so may actually take shape. Topics may include the history of television, various business models used to distribute video content to consumers, governmental policy and regulatory impacts on the television business, contract law and its application to video content distribution, and negotiation theory and practice. Students will explore the various ways video content is distributed, how content owners and distributors make money, the relationship between content ownership and distribution, and how the industry is changing. The course will provide students with a basic introduction to contract law and explore a video content distribution agreement in detail. Students will be expected to read articles from the trade press on a daily basis, lead and participate in class discussions, debates and negotiation case studies, analyze legal opinions, read and dissect a video distribution agreement, and, yes, watch "television." The class will culminate in students working in teams to negotiate and draft a video distribution agreement. Class is expected to meet for 6-8 hours per week. Adjunct Instructor Bio: Robert Goldstein has practiced law for over twenty years, the most recent fifteen of which have been in the television industry. He has been the General Counsel for a privately-held telecommunications venture, worked in-house at a Fortune 500 media company, and represented a wide range of communications companies in various stages of development.

SPEC 35 (W) Making Pottery on the Potter's Wheel

Learning to form pottery shapes with your hands on the potter's wheel is challenging but accessible to any student who invests time and effort. This is a very old-fashioned skill--archaeologists tell us potter's wheel skills were widespread in world culture by 3000 BCE. YouTube videos will not help you to learn the subtle hand positions and pressures needed to succeed in shaping symmetrical pleasing forms. A teacher/coach will help you understand
and learn these skills, but it is up to you to apply yourself with repeated practice, patience and persistence. Each class will begin with an explanatory demonstration followed by student practice on the potter's wheel. Woven into pottery making demonstrations will be presentations, in response to student interest, on various topics relating to the science and history of pottery making. Every student will have exclusive use of a potter's wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, spouts, and knobs. We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The eleventh meeting will be devoted to glazing your biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project positive-orientation critique" in the studio of your finished work.

Adjunct Instructor Bio: Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

SPEC 39 (W) Composing A Life: Finding Success and Balance in Life After Williams

"Composing a Life:" Finding Success and Balance in Life After Williams Description: To be at Williams you have experience as a successful student, but how do you learn to be successful in life? How will you define success in both your personal life and in your career? How will you achieve balance between the two? In short, what will constitute the "good life" for you? We borrow the concept of "composing a life" from Mary Catherine Bateson, as an apt metaphor for the ongoing process of defining success and balance in life. This course is designed: (1) To offer students an opportunity for self-reflection, as well as to examine and define their beliefs, values, and assumptions about their future personal and professional lives; (2) To encourage students to gain a better understanding of how culture, ideology, and opportunity affect their life choices; (3) To provide an opportunity for students to consider different models of success and balance through "living cases" (in the form of guests from various professions and lifestyles); and (4) To aid students in contemplating their own life/career options through individual advising and introducing various career and life planning resources. Using selected readings, cases, and guest speakers, we will explore both the public context of the workplace as well as the private context of individuals and their personal relationships in determining life choices. Weekly assignments include cases and readings from a variety of related fields, and some self-reflection exercises. Adjunct Instructor Bio: Geraldine Shen '01 is a former management consultant, development officer, curriculum coordinator, and admissions officer who currently leads a community non-profit organization in Williamstown. Adjunct Co-Instructor Bio: Joe Bergeron '01 is a technology consultant, entrepreneur, and software developer.

Crosslistings: MUS12 / STAT12

Primary Crosslisting
The Sacred Harp is a tunebook, a style, a community, and a tradition. One of the most distinctly American forms of music, with a continuous tradition dating back over 150 years, shape-note music continues to be sung in amateur communities around the country-and increasingly, the world. In the reading portion of the course, we will study the history and current culture of shape-note singing. We will discuss issues of tradition and community, including shifts and tensions with respect to geographical region, religious affiliation, and race. Meanwhile, we will engage in the actual practice of shape-note singing. For those with little formal training in music, this will include a quick introduction in the basics of music, but it will also highlight unique aspects of the Sacred Harp style in comparison to Western classical music, including the four-shape system of solfège. In addition to singing in class, we will visit one of the regular weekly singings in Northampton (mandatory). For the final project, students will have the opportunity to write a paper analyzing the tradition or stylistic aspects of the music; to write one or more tunes and compare them stylistically to those found in The Sacred Harp; or to undertake a quantitative analysis of the tunebook's music and its use in recorded singings. Assignments throughout the course will include smaller versions of these varied options, including short composition exercises and responses to the readings. Adjunct Instructor Bio: Micah Walter received his A.M. in Music from Harvard University and his B.A. in Music and Linguistics from Haverford College. He is interested particularly in non-performative forms of music, and the impact music and community have on each other. He feels strongly that all people, regardless of training, should be able to participate in music-making in a fulfilling way. An active Sacred Harp singer, he has attended all-day singings and conventions in seven states and written over thirty tunes.

THEA 14 (W) Classic and Contemporary Musical Theater
Crosslistings: MUS14 / THEA14

Secondary Crosslisting
This Winter Study will give participants an opportunity to study and perform numbers for one or more singers in great American musicals and European light operas. You have sung a solo, you have sung in chorus—now practice the exacting art of singing an ensemble on stage. The course will culminate with a performance of ensembles, solos, and duets from a variety of musical theater shows. Other ensembles from European models may also be included. Singers, actors, and pianists are all welcome to participate. The course is intended especially for singers who wish to have some stage time, and for actors who wish to work on their singing. Adjunct Instructor Bio: Keith Kibler has performed under some of the finest directors currently working including David Alden, Peter Sellars, Galina Vishnevskaya. He sang a major role in Kurt Weill's "Die Kleine Mahagonny" under Alvin Epstein with the American Repertory Theatre. He has been a featured soloist with the Boston Pops in American theater music. Keith Kibler is an Associate Artist in the Music Department at Williams College. He can be reached at kkibler@williams.edu.

Class Format: afternoons
Requirements/Evaluation: a student may fulfill the requirements of the course by performing challenging numbers from the great American songbook in the final class public performance

In this course, students will explore a range of techniques in shadow theater and build towards a culminating performance. We will survey the history of the form, from Asian traditions such as wayang kulit, through Victorian shadow plays, to the uses of shadow by contemporary theater makers and artists (e.g., William Kentridge, Kara Walker). Shadow puppeteer Karen Zasloff and visiting artists will guide students in creating shadow imagery from flat cutouts, sculpted objects and their bodies, and choreographing scenes on a classroom overhead projector and translucent screen. In small groups, we will interpret excerpts of prose and poetry through these handmade projections, exploring relationships among text, image sequences and music, culminating in a public performance. We will meet three times/week for three-hour sessions, with additional supervised lab and rehearsal periods according to our needs. Some basic equipment will be supplied, but students will be expected to purchase some of the materials. Adjunct Instructor Bio: Karen Zasloff has created performances in the US and abroad with shadows, toy theater, giant puppets and video, on themes of political violence and the unconscious. She has performed in NY at PS1, Saint Ann's Warehouse, National Sawdust, PS122 and Here Arts Center, and for 20 years with the Bread and Puppet Theater. Her drawings feature in "Banished", which premiered at Sundance 2007. Recent projects focus on Rwanda and South Africa, including a Fulbright with the Handspring Puppet Company.

What does it mean to represent your own body? How do we craft compelling performances of self in a social media marketplace that treats our bodies as currency? In this studio course, we look at the lineage of the self-portrait and the role it plays in the creation of our personal mythologies. We will consider the work of Frida Kahlo, Cindy Sherman, Carrie Mae Weems, Jacoby Satterwhite, Kim Kardashian West and others. How have artists, now and in the past, turned the camera on themselves? Is it possible to subvert the gendered and racialized gaze? Students will create their own kinetic self-portraits, exploring forms such as looping video, gifs, stop-motion, and animation. Crosslistings: RUSS11 / WGSS11 / COMP11
Secondary Crosslisting
A 2013 law banning “homosexual propaganda” represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia’s suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country’s evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country’s queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

**WGSS 15 (W) Plato's Symposium and Its Afterlife**

**Crosslistings:** CLAS15 / PHIL15 / WGSS15 / COMP15

**Secondary Crosslisting**

Plato's *Symposium* commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the *Symposium* to study its artistic and philosophical "afterlife."

**Crosslistings:** WGSS17 / PSCI18

**Secondary Crosslisting**

This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls' own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

WGSS 25 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health—especially HIV and AIDS—women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture with a female Prime Minister where women have created and continue to build cooperatively owned enterprises, a West African country that has consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even
celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.

Requirements: Before we leave campus, each student will choose a particular focus for the trip, and do preliminary research to inform their visit—including comparative material about the US. Upon our return to campus we will meet to discuss our findings, and students will write 10-page papers drawing upon existing research as well as our conversations and experiences in Senegal.

Winter Study Specials

SPEC, short for Specials, are courses with topics that are outside our academic department areas of study OR are being sponsored by the Winter Study Committee.

SPEC 10 (W)  Counseling Skills Intensive
Are you the person your friends turn to for support? Good listening and communication skills are of benefit to everyone, but particularly for students with support responsibilities and those interested in helping professions. This course will prepare you to be a better listener and more effective, confident communicator. Develop a deeper sense of presence to help others feel more at ease with sharing, facilitate decision-making and problem-solving using validation and active listening skills, and learn effective strategies and boundaries appropriate to more urgent situations. We will practice fundamental counseling skills, learn about factors influencing our own communication styles and the roles we gravitate toward in our relationships with others. You will learn how to communicate about sensitive issues and find your own style in helping roles. Emphasis will be given to understanding one's limits within a given situation, knowing when to refer to other resources, and what resources are available to students. We will meet twice a week for 3 hour sessions. This is an experiential training augmented by relevant readings, journaling, and out of class exercises designed to deepen your understanding and practice. Adjunct Instructor Bio: Karen Theiling is psychotherapist at Williams College where she has provided counseling to students since 2000. She is a licensed mental health counselor whose particular interests include trauma, gender and sexuality, Dialectical Behavior Therapy and outreach of all kinds. Adjunct Co-Instructor Bio: Laini Sporbert is a Health Educator at Williams College, focusing on substance abuse education and counseling, mental health awareness, sexuality education, and sleep. She has been at the college since 1997, and has been the Peer Health Staff Advisor since 2006. She has an M.Ed. in Counseling Psychology with a specialty in addictions.

SPEC 11 (W)  Pod Save Williams: Audio Stories about Making the College More Sustainable
How can we all create a more sustainable Williams? In this course students will explore sustainability challenges, successes, obstacles, and opportunities on the Williams campus by interviewing staff, faculty, and fellow students and then weaving those interviews into compelling audio stories for the campus community. Students will study interviewing, storytelling, and podcasting best practices and will use what they learn to create interesting podcasts that are both rich in content and in sound. Guiding questions will include: How is sustainability being integrated - or not - into the operations of campus? What daily activities are most impactful both carbon emissions-wise and ethos-wise? How do social justice and environmental justice intersect with sustainability on campus and in this region? Who are the unsung “campus sustainability heroes”? What opportunities and challenges lay ahead related to these issues? How does one tell a story in a way that is universal or at least relevant to one's intended audience? What are the opportunities to enhance storytelling by using an audio format as the medium? Informative and impressive podcast creations will be used as resources on the Williams sustainability website and will be posted to Stitcher, iTunes, and Soundcloud. A number of assignments will involve listening to and critically analyzing podcasts. Our time together will be a combination of learning about campus sustainability issues, analyzing content and audio choices, practicing interview techniques, and getting feedback from peers. Adjunct Instructor Bio: Mike Evans is the Assistant Director of the Zilkha Center for Environmental Initiatives at Williams College. Prior to working at Williams, he was the associate director of Utahns Against Hunger and founded and directed Real Food Rising, a youth-empowerment sustainable farming program.

SPEC 12 (W) What’s Advertising and Why Should We Care About It?
Admittedly, only a handful of Williams students will enter the advertising business, especially the classic Madison Avenue version of it. On the other hand, an appreciable percentage of graduates will join fields where some form of advertising and promotion is a critical but complicated success factor, whether in NGOs, business, non-profit organizations or startup ventures. The proposed course is a high level view of one of the most important levers in society today. In one form or another, advertising influences not just our purchase decisions but also (and increasingly) politics, public policy, use of social media and a host of cultural issues, including perceptions about diversity, gender and the role of women in society. This course teaches how insights, strategy and positioning come to creative life, are assessed and how they percolate through brand experience and within the organization. We will consider why and how marketers align themselves with different demographic and age groups creatively and how they build positive perception. It will also help students understand why—after all the metrics and analysis and research—a brilliant creative idea is worth its weight in gold. The course is intended as an overview and will necessarily proceed at a rapid pace. Course content will be a mix of case studies, examples drawn from the current marketing world and original research by students. Where appropriate and possible, guest speakers will be invited in order to provide particular insight or participate in debate. The final project presentation will ask student teams to ‘reverse engineer’ the observed advertising and communications strategies of a marketer (broadly defined) using publicly available data and course materials. The course would meet twice per week in three hour sessions. Out-of-class expectations are approximately 10 hours/class in research, writing and group work projects.
Adjunct Instructor Bio: Steve Harty worked in advertising for 30 years, spanning developments such as the launch of cable networks, interactive and digital platforms and into today’s highly diversified communications environment. He was CEO or Chairman for four firms and served clients such as American Express, Johnnie Walker, Axe deodorant, Cadillac, Verizon, IBM and Miller Lite. He helped launch jetBlue Airlines, Ally Bank and the Voom HDTV service. He is a 1973 graduate of Williams and a trustee emeritus.

SPEC 13 (W) Cooking for the Real World
Crosslistings: PHYS15 / SPEC13
Secondary Crosslisting
The course assumes you know nothing about cooking, and, with that in mind, will focus on the basics. The course will teach you how to prepare simple, healthy, and delicious food. You’ll learn about basic knife skills, sanitary kitchen practices, cooking equipment and menu planning. Some of the foods you will learn to make during the course of winter study will include Mac ‘n Cheese, quick breads, soups and salads, pie crusts and cookies. Time permitting, we may take a field trip to a local farm. You will also get to meet with some local chefs to help you understand why everything we do revolves around food. The reading list will include: Kitchen Confidential, by Anthony Bourdain, The Flavor Bible: The Essential Guide to Culinary Creativity, Based on the Wisdom of America’s Most Imaginative Chefs, by Karen Page and Andrew Dornenburg, and one of the basics cookbook.

**SPEC 15 (W) Self Care: Exploring Acupressure, Reflexology and Aromatherapy**

Crosslistings: MATH15 / SPEC15  
**Secondary Crosslisting**

Learn techniques to take care of yourself and others! In this course, students will explore acupressure and reflexology through hands-on practice with partners. Modalities will first be demonstrated by the instructor, and then will be reinforced through in-class practice. The course will also cover essential oils and the chemistry behind aromatherapy, studying chemical families and their main characteristics. With this knowledge, students will create custom aromatherapy blends to address specific health issues. These blends will be made in class, and can be taken home. This class is designed to be useful to students and their loved ones, providing the student with tools to cope with life events. The focus will be on using acupressure, reflexology and aromatherapy to help with stress, anxiety, sleep, skin health, and sickness. Assigned reading and/or online videos will be required to prepare for each class. In addition, students will complete 16 hours of acupressure and reflexology practice outside of class on volunteers. These hours will be signed off on a log sheet by the volunteers. In-class assessments of techniques will also occur. Each student will prepare at least one presentation to share with the class. Adjunct Instructor Bio: Graduate studies in zoology took Jennifer Turek to the University of Otago in New Zealand, where she also attended the Lotus College of Natural Therapies. After graduating, Jennifer opened up her business, Koru Therapies first in New Zealand, then California and now in Williamstown, MA. Jennifer provides a custom holistic health experience which is a unique blend of Eastern, Western, Kiwi and American techniques that is unlike what most have experienced before.

SPEC 19 (W)  Healthcare Internships
Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which healthcare is delivered. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions (3) will focus on "substance abuse" as a thematic construct for the discussion of related chronic and acute conditions frequently encountered in clinical and social/behavioral contexts. The thematic focus on substance abuse will allow students to reflect on their clinical experiences across a wide range of clinical specialties and also to engage in discussion of a public health crisis affecting quality of life across the lifespans of Berkshires residents. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions. Students will also demonstrate an enhanced awareness of the systems through which medical care is delivered and the challenges of health care delivery within a rural community. Students will also be expected to reflect on their clinical experiences through didactic sessions and case presentations, as well as in a final paper. Adjunct Instructor Bio: Barbara Fuller is the Director of Science and Health Professions Advising.

SPEC 21 (W) Experience the Workplace; an Internship with Williams Alumni/Parents
Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parents acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Students will be required to read one of two books selected for this course. There will also be reading selected from such works as What Should I do with My Life? by Po Bronson, 2003 and Working by Studs Terkel, 2004. Interested students must attend an information
meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific internships listed in the SPEC 21 syllabus. Application are submitted via Handshake.

**Class Format:** At least 30 hours per week, 5 days per week, 6 hours per day

**Requirements/Evaluation:** completion of readings, daily journal, and a 5- to 7-page expository review and evaluation that will become public record as a resource for other students

**Prerequisites:** qualifications for internships

**Enrollment Preferences:** placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview

**Materials/Lab Fee:** cost of books

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development. 2. CPR for the Professional Rescuer. 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques. Specifically, the course teaches how to recognize and provide emergency medical care for: Wounds and Burns; Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion); Musculoskeletal Trauma (e.g., breaks, sprains, etc.); Shock, Respiratory, Poisoning, Substance abuse emergencies; Medical emergencies (e.g., heart attack, stroke, seizures, etc.). The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 16 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Thomas Feist ('85) is a 35-year ski patroller, certified OEC Instructor and Instructor Trainer. He has taught chemistry at Williams College and served as acting director of the Williams Outing Club in 1990-91.

**SPEC 23 (W) Liberal Arts for Epic Challenges: Design Thinking for Social Change**

Liberal Arts for Epic Challenges is an introduction to the techniques of design thinking to help liberal arts students gain the necessary skills and confidence to tackle complex social and economic problems: attention to the human dimensions of problems and solutions, creative confidence, risk taking, learning from failure, effective collaboration, and story-telling. Design thinking has become an increasingly prevalent approach in encouraging innovative solutions among start-ups, corporations repositioning themselves, government agencies seeking to improve their citizen services, and NGOs addressing major social problems like rural health care. This winter study course will expose students to the tools of design thinking and then will take on several challenges selected by the students. Students will undertake the research phase in Williamstown, then go to the IBM Design
Studio in Austin, Texas (or a similar consulting firm design lab) for the ideation phase in collaboration with designers at IBM and Watson, using the same facilities that IBM design thinkers use. Solving truly difficult problems facing society in the 21st century requires a purposeful approach that draws on a full range of the experiences and perspectives of those who have studied the liberal arts. Only with the advantage of those with an understanding of the social sciences, physical sciences, arts, and humanities provide a sensitivity to both the dimensions of difficult problems and how to address them for human-centered solutions. There will be two 3 hours workshops in the afternoons when in Williamstown, All day in the Design Studio in Austin for 3 days. Light reading, but necessary team meetings between classes.

Class Format: travel

Requirements/Evaluation: based on observation of active constructive participation in team efforts and evaluating a final team presentation for relevance,

Extra Info: sensitivity to human-centered concerns, completeness, effective communication, and realistic probability of success, all of which will be documented in an electronic field journal

Prerequisites: interested students must attend an informational meeting and submit a short essay about their interest in the course

Enrollment Limit: 10

Enrollment Preferences: none; not open to first-year students

SPEC 24 (W) Transformative Moments in the Education of a Preschool Child

This course will provide an opportunity for immersion in the life of a preschool community in the Bronx. Future of America Learning Center (FALC) is a nationally-accredited program that is recognized for its quality and standard of excellence in the field of Early Childhood Education. Students from varied educational institutions, teachers and instructional coaches are recommended by the Department of Education to visit FALC's classrooms to observe, experience and learn about the Plant-a-Dream curriculum. Winter Study students will actively participate in the daily classroom activities with the children in order to develop a sense of best practices in Early Childhood Education. Students will live with families whose children are in the program, in the model of Gaudino's experiential learning, to access a deeper sense of context and a better understanding of the issues facing children and families from this community. Opportunities for dialogue between families, staff, and students, will also be central to the learning experience. Furthermore, our mentors will guide students in robust self-reflection, as well as inquiry into the environment in which they are immersed, and the personal meaning derived from these experiences. More information about FALC and the course mentors can be found at https://goo.gl/PEJsoq.

SPEC 25 (W) Williams in Georgia

Crosslistings: RUSS25 / SPEC25

Secondary Crosslisting

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students
experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-Tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birthplace of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their internship experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

SPEC 26 (W) Field Work in a Bay Area Start-Up
This course is designed to give students insight into how technology start-ups work and well as a chance to practice their problem-solving skills and gain deeper insight into the customer discovery process. The course will start in Williamstown with a review of idea development tools used in today's start-up environment, particularly those pioneered by Stanford d.School such as the Lean Start-up method, Business Model Canvas and Design Thinking. Reading will include The Lean Start-up by Eric Ries, Zero to One by Peter Thiel and Edward deBono's Thinking Course as well as articles and podcasts. The class will be split into three teams of four students and paired with a Bay Area start-up looking to enter a new market, a new customer segment or are considering certain product modifications. The student teams will work on identifying customer needs, qualifying customer feedback and making recommendations to management. The class will tap into the strong Bay Area alumni network which will allow for visits to several different start-ups and fast-growing tech companies and compare how they approach their markets. The final project will be a ten-minute presentation to management. Student should submit a short statement of why they would like to participate and what they expect to learn. Adjunct Instructor Bio: Entrepreneur-in-Residence at Williams.

Class Format: travel

SPEC 27 (W) Social Justice, Activism, and Advocacy in New York City
This 2019 Winter Study course examines social justice advocacy and activism in New York City's nonprofit organizations, churches, and private and public universities. The focus is on antiviolence and human rights initiatives based in New York City's institutions that shape the perspectives not only of the city but influence debates about democratic values and political perspectives throughout the nation and the world. Students would work with non-profit and advocacy organizations such as the Social Justice Committee of Trinity Luther Church (TLC) Immigrants Rights Coalition; and ConnectNYC, a Harlem-based non-profit that works city-wide to end domestic, social, and religious violence. For three weeks in the city students
would attend forums on social justice, anti-racism/feminist/lgbtq rights at Barnard; Columbia University; City College, and CUNY Graduate Center. The three weeks in NYC focus on three overlapping themes central to social justice advocacy: domestic/family safety; community values in policing and citizen's and prisoners' rights; immigration and human rights.

**Class Format:** travel

**Requirements/Evaluation:** daily journal; volunteer with one of the participating non-profits to assist in digital or community outreach and organizing for 3-4 hours daily;

**Extra Info:** attend a weekly educational event(s) at city universities or nonprofits; attend a mini-seminar to discuss readings and experiential learning;

**Extra Info 2:** write a 10-page analytical paper at the conclusion of the winter study evaluating political trends in each of the three areas; attend a community council meeting at the 24th Precinct in Manhattan (West 100th St.).

**SPEC 28 (W) Class of 1959 Teach NYC Urban Education Program**

Students in this course learn about the front-line challenges of urban public education by working in one of New York City’s public schools. Participants will be expected to pursue a full day’s program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

**SPEC 29 (W) The "Television" Industry: Legal, Business and Policy Issues in the Distribution of Video Content**

This course will explore how video content is distributed in the United States and examine how a business deal to do so may actually take shape. Topics may include the history of television, various business models used to distribute video content to consumers, governmental policy and regulatory impacts on the television business, contract law and its application to video content distribution, and negotiation theory and practice. Students will explore the various ways video content is distributed, how content owners and distributors make money, the relationship between content ownership and distribution, and how the industry is changing. The course will provide students with a basic introduction to contract law and explore a video content distribution agreement in detail. Students will be expected to read articles from the trade press on a daily basis, lead and participate in class discussions, debates and negotiation case studies, analyze legal opinions, read and dissect a video distribution agreement, and, yes, watch
"television." The class will culminate in students working in teams to negotiate and draft a video distribution agreement. Class is expected to meet for 6-8 hours per week. Adjunct Instructor Bio: Robert Goldstein has practiced law for over twenty years, the most recent fifteen of which have been in the television industry. He has been the General Counsel for a privately-held telecommunications venture, worked in-house at a Fortune 500 media company, and represented a wide range of communications companies in various stages of development.

**SPEC 35 (W) Making Pottery on the Potter's Wheel**

Learning to form pottery shapes with your hands on the potter's wheel is challenging but accessible to any student who invests time and effort. This is a very old-fashioned skill--archaeologists tell us potter's wheel skills were widespread in world culture by 3000 BCE. YouTube videos will not help you to learn the subtle hand positions and pressures needed to succeed in shaping symmetrical pleasing forms. A teacher/coach will help you understand and learn these skills, but it is up to you to apply yourself with repeated practice, patience and persistence. Each class will begin with an explanatory demonstration followed by student practice on the potter's wheel. Woven into pottery making demonstrations will be presentations, in response to student interest, on various topics relating to the science and history of pottery making. Every student will have exclusive use of a potter's wheel for each class. Pottery making classes will be held in the mornings, 9 AM to 12:00 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will use both stoneware and porcelain clay bodies, and will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes by trimming and adding handles, lugs, spouts, and knobs. We will also work on hand-building projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on campus. After the tenth pottery making class meeting, all completed work will be kiln-fired to biscuit, approximately 1750F. The eleventh meeting will be devoted to glazing your biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired to cone 5, approximately 2150F. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project positive-orientation critique" in the studio of your finished work. Adjunct Instructor Bio: Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

**SPEC 39 (W) Composing A Life: Finding Success and Balance in Life After Williams**

"Composing a Life:" Finding Success and Balance in Life After Williams Description: To be at Williams you have experience as a successful student, but how do you learn to be successful in life? How will you define success in both your personal life and in your career? How will you achieve balance between the two? In short, what will constitute the "good life" for you? We borrow the concept of "composing a life" from Mary Catherine Bateson, as an apt metaphor for the ongoing process of defining success and balance in life. This course is designed: (1) To offer students an opportunity for
self-reflection, as well as to examine and define their beliefs, values, and assumptions about their future personal and professional lives; (2) To encourage students to gain a better understanding of how culture, ideology, and opportunity affect their life choices; (3) To provide an opportunity for students to consider different models of success and balance through "living cases" (in the form of guests from various professions and lifestyles); and (4) To aid students in contemplating their own life/career options through individual advising and introducing various career and life planning resources. Using selected readings, cases, and guest speakers, we will explore both the public context of the workplace as well as the private context of individuals and their personal relationships in determining life choices. Weekly assignments include cases and readings from a variety of related fields, and some self-reflection exercises. Adjunct Instructor Bio: Geraldine Shen '01 is a former management consultant, development officer, curriculum coordinator, and admissions officer who currently leads a community non-profit organization in Williamstown. SPEC 99 (W) Independent Study: Special

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Winter 2019
IND Section: 01
Women's, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women's, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women's, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

**THE MAJOR**

The Women's, Gender and Sexuality Studies major encourages students' exposure to the interdisciplinary character of feminist and sexuality-focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300-level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the Chair of the Program.

**Required Courses**

The major consists of at least 9 courses. The following are required:

- WGSS 101 Introduction to Women's, Gender and Sexuality Studies
- WGSS 202 Foundations in Sexuality Studies
- WGSS 400-level Junior/Senior Seminar in Women's, Gender and Sexuality Studies. The seminar explores topics in Women's, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.

In addition to these three required courses, students are required to take six electives. In consultation with their major advisor and with approval from the chair, these six elective courses should include:

- Courses from at least 3 different disciplinary traditions.
- At least 3 courses at the 300-level.
- At least 1 course that emphasizes feminist/queer theories and/or methodologies.
- At least 1 course that emphasizes a diversity of racial, sexual, religious, and/or cultural identities and practices.

In the final semester of their senior year, all majors will be required to write a reflective intellectual autobiography of their WGSS major, in which they explain how their courses meet the goals of the major, and analyze the relationship among the courses they have taken, the papers they have written, and the research projects undertaken.

**THE DEGREE WITH HONORS**

Honors in Women's, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women's, Gender and Sexuality Studies Committee. The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women's, Gender and Sexuality Studies after the following criteria are
In April of the junior year, submission and Women’s, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;

In the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5- to 10-page “Plan of Action” (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women’s, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

STUDY ABROAD

The Williams College Women’s, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women’s issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

- Antioch College: Comparative Women’s Studies in Europe fall semester
- Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester
- School for International Training: The Balkans: Women and Democratization, fall or spring semester
- Jamaica: Gender and Development, fall or spring semester
- Mali: Gender and Development, fall or spring semester
- The Netherlands: Identity, Gender and Sexuality, fall or spring semester

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. Depends on the level for which the student is seeking major credit (200- vs 300-).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 101 and 402 cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Secondary Crosslisting
A 2013 law banning "homosexual propaganda" represents the latest in a long series of efforts by the Russian state to erase the existence and experience of its LGBTQ citizens. This course will explore Russia's suppressed queer archive from the imperial, Soviet, and post-Soviet eras, focusing on the vibrant literature, art, and film about LGBTQ Russians. We will examine works produced by and about queer Russians in an attempt to understand distinctly Russian notions of gender and sexual identity, as well as how LGBTQ Russians have formed their own identity within the country's evolving gender regime. Our survey will include works of fiction, poetry, visual art, and film from before and after the Bolshevik revolution, Stalinism and its aftermath, and the post-Soviet era. Throughout our discussions, we will work towards an alternative cultural history of Russia that will allow us to determine how and why the country's queer citizens have become the despised Other under Putin. Knowledge of Russian is not required. All readings will be in English, and all films will include English subtitles.

Plato's Symposium commemorates a gathering held at the home of the poet Agathon of Athens, in 416 BCE, shortly after his first victory in the tragedy contest. The attendees of Agathon's drinking party agree to dedicate their evening to delivering speeches in praise of love (eros/Eros). This dialogue has long been one of Plato's most widely appreciated works and its influence has ranged far beyond the purview of academic philosophy. We will read and analyze the dialogue itself, then turn to an eclectic array of works inspired by the Symposium to study its artistic and philosophical "afterlife."

WGSS 17 (W) Girl Meets World: Films from 5 Continents
Crosslistings: WGSS17 / PSCI18

Secondary Crosslisting
This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls’ own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls’ rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States. Readings to be completed outside of class time include children's books, young adult fiction, and international human rights documents.

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health--especially HIV and AIDS--women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture with a female Prime Minister where women have created and continue to build cooperatively owned enterprises, a West African country that has consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.

Requirements: Before we leave campus, each student will choose a particular focus for the trip, and do preliminary research to inform their visit--including comparative material about the US. Upon our return to campus we will meet to discuss our findings, and students will write 10-page papers drawing upon existing research as well as our conversations and experiences in Senegal.

WGSS 101 (F) Introduction to Women’s, Gender & Sexuality Studies (DPE)

This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues—historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: lecture; mix of lecture and seminar meetings
Requirements/Evaluation: two short papers, research proposal and final paper; participation
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none
Enrollment Limit: 15
Expected Class Size: 15
Department Notes: required course for the Women’s, Gender and Sexuality Studies major
Distributions: (D2) (DPE)
Distribution Notes: DPE: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies’ history, activism, and theory.

WGSS 102 (F) West Africa through Women’s Voices (DPE) (WI)

Crosslistings: HIST102 / WGSS102
Secondary Crosslisting

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources—oral tradition, legal records, women’s popular songs, Islamic pedagogical verse, personal correspondence and novels—we will consider how women’s experiences challenge dominant narratives of history that have often excluded them. The
course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

Class Format: lecture

Requirements/Evaluation: discussion participation, map quiz, weekly response papers and a 10-page final academic paper or creative writing project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: Texts in this class lay the groundwork for discussions about how different groups of women in West Africa have experienced power and inequality along differences of gender, race, slave/free status, marital and motherhood statuses, religion, and class. Close readings of primary texts equips students to understand how women in West Africa have understood and responded to structures of power and inequality, rather than applying frameworks of our own experiences and backgrounds.

WGSS 105 (F) American Girlhoods (DPE) (WI)

Crosslistings: AMST105 / WGSS105 / ENGL105

Secondary Crosslisting

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of “manners and morals” does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Class Format: seminar

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Extra Info: may not be taken on a pass/fail basis

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years without an AP5, IB 6 or 7; Women's, Gender and Sexuality Studies majors

Expected Class Size: 19

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences. Through analyzing diverse representations of girlhood, the course also gives students the critical tools to articulate and interrogate the texts' desire for equity and justice, and to describe what power and agency might mean within these works, as well as in the world. WI: Students do at least 20 pages of writing and have the chance to revise several papers. We also spend significant class time to talking about successful academic writing.

WGSS 113 (F)  The Feminist Poetry Movement  (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113

Secondary Crosslisting
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

DPE: This course examines difference, power, and equity during Feminism's Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 138 (S) Spectacular Sex

Crosslistings: ANTH138 / WGSS138

Primary Crosslisting

From Beyoncé’s Super Bowl halftime show to Donald Trump's presidential campaign, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

Secondary Crosslisting

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment’s meaning in the century that followed. Central themes in this course include the contested interpretations of “birthright citizenship,” due process, privileges and immunities, equal protection, life, liberty or property; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class further inform these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of...

WGSS 201 (F) War and Resistance: Two Centuries of War Literature in France (1804-2016)

Crosslistings: RLFR202 / WGSS201

Secondary Crosslisting

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingetorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Anglo, Pontecorvo, and Duras. Conducted in French.

This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.
Class Format: discussion
Requirements/Evaluation: short papers, possible creative assignments, final essay exam

WGSS 207 (F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings (WI)

Crosslistings: WGSS207 / COMP236 / AFR205

Secondary Crosslisting

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, The Bluest Eye (1970), Sula (1973), Song of Solomon (1977), Love (2003) and God Help the Child (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace—or to let us think we can replace—chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society’s interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

WGSS 213 (S) Race, Gender, and the Alien Body: Octavia Butler’s Science Fiction (WI)

Crosslistings: SCST213 / AFR213 / WGSS213

Secondary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler’s uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will
explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

WGSS 214 (F) From Putin to Pussy Riot: Discourses of Post-Soviet Gender (DPE)

Crosslistings: GBST213 / WGSS214 / COMP257 / RUSS213

**Secondary Crosslisting**

Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk-rock collective Pussy Riot protested Putin's regime by performing in day-glo balaclavas in Russia's largest cathedral. This course examines related post-Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post-Soviet era. We will focus on the ways in which gender and sexuality have come to mark post-Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so-called crisis of masculinity in post-Soviet Russia, the trafficking of women from the Former Soviet Union, the Ukrainian feminist collective Femen, the Eurovision Song Contest, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post-Soviet East at the very time they have attained normative status in the West. All readings will be in English, and all films with have English subtitles.

WGSS 215 (F) Ways of Knowing: Music, Movement, Memory

Secondary Crosslisting
This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the "civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive. The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic to close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing, remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities. Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to them critically not only through writing and discussion, but also through their own performance practices.

WGSS 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WI)
Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, gender, and sexuality. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels such as Octavia E. Butler's Kindred, Jewelle Gomez's Gilda Stories, visual art such as Kerry James Marshall's "Heirlooms and Accessories" and Glenn Ligon's "Runaways", and film such as Jordan Peele's Get Out.

Class Format: seminar
Requirements/Evaluation: weekly keyword responses, one presentation, four papers totaling about 20 pp. including an engaged feedback process, thoughtful class participation
Extra Info: may not be taken on a pass/fail basis
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Crosslistings: RLSP220 / WGSS222
From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.

WGSS 224 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France (DPE)

Crosslistings: WGSS224 / RLFR224

Secondary Crosslisting
In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers, a midterm, and a longer final paper

Extra Info: not available for the fifth course option

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if overenrolled, preference will be given to French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission

Expected Class Size: 18

Distributions: (D2) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS. DPE: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.
WGSS 225 (F)  Gender and Sexuality in Asian American Theater
Crosslistings: THEA225 / COMP218 / WGSS225

**Primary Crosslisting**

This class begins with the premise that intersectional and interdisciplinary studies of gender and sexuality need to be, and in significant ways already are, in conversation with Asian American studies and theater. How might contemporary Western discourses of masculinity and heterosexuality, for example, depend upon theatrical constructions of Eastern sexual alterity? How have Asian American artists managed and critiqued historically gendered and sexualized stereotypes (e.g., hypersexual Dragon Lady, virginal Lotus Blossom, asexual Charlie Chan) through theatrical intervention? This seminar will closely read dramatic literature written by Asian American artists, as well as engage scholarship in Asian American gender and sexuality studies and performance studies. We will read the work of playwrights including Ayad Akhtar, Ping Chong, Frances Ya-Chu Cowhig, Velina Hasu Houston, David Henry Hwang, Young Jean Lee, Diana Son, Lauren Yee, and Chay Yew.

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative values. We will examine a wide range of dance genres, from stage performance to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course but will also include attendance at live performances, film screenings, and discussions with guest artists. No previous dance experience required.

Crosslistings: PHIL228 / WGSS228

**Secondary Crosslisting**
In this course we'll explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we'll explore topics that might traditionally be considered "women's issues" in health care, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Primary Crosslisting

The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic's social, economic and political causes, impact, and conundrums—the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa.

Crosslistings: AMST231 / LATS231 / WGSS232

Secondary Crosslisting

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety
of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Crosslistings: ENGL243 / WGSS233 / ARTH243 / SCST233
Primary Crosslisting
This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geopolitically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between "actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

Technological innovation is vital for communities, businesses and nations seeking to adapt to a globalized, competitive world. But any innovation also has impacts on all three dimensions of sustainability: the ecological, the economic, and the social. For example, such impacts may either exacerbate or mitigate gender inequalities. This course uses a gender studies lens to study innovation in the development of sustainable practices in the present and for the future. We will look at the impact of gender stereotypes on innovation, including the co-construction of gender and technology. Since the course is taught by a visiting scholar from Sweden, a particular focus will be the EU's policy of "Gender Mainstreaming" which requires all proposed policies to be assessed for their impact on gender inequality. The course looks at technical development as necessary and valuable, while investigating power relations and taken-for-granted views embedded in the particular forms it takes. The course will rely largely on analysis of case studies, and students will be encouraged to apply the analytic tools of the course to develop US-based case studies of their own.

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

WGSS 240 (F) Performing Masculinity in Global Popular Culture

Crosslistings: LATS241 / SOC240 / WGSS240 / AMST241 / THEA241

Primary Crosslisting

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

From fear of the Shari'a to its implementation in so called ”Islamic countries,” Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

WGSS 244 (F)  Actually Existing Alternative Economies (DPE) (WI)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in
New York or Boston.

This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions -- Hindu/Muslim, rich/poor, high caste/outcaste, male/female? What are the historic roots and ongoing causes that produce structural violence around these axes of difference? We pay particular attention to key moments (Partition, communal riots in Gujarat in 2003, Hyderabad in 1990, Delhi in 1984), and places (Punjab, Bengal, Jammu & Kashmir) for our analysis of how religion, gender, and caste intersect to produce a landscape of communal violence, social hierarchy, and fragmented subjectivity in India today. We are as interested in discourses and practices that shore up these binaries as well as the third terms that attempt to transcend or diffuse them. For instance, we look at how Buddhism is and is not a middle path between Hindu/Muslim conflict in Indian Kashmir. Our course readings include ethnographic, sociological, and historical analyses, as well as oral histories and popular media.

What does it mean to acknowledge the literal land we stand upon--in Williamstown and beyond--as the occupied territory of indigenous peoples? This course strives to answer that question by offering an introduction to the histories, politics, knowledges, and arts of indigenous peoples across the Americas and Native Pacific. Foregrounding the ways in which indigenous peoples have resisted, refused, and reimagined ongoing histories of settler colonialism, we will survey scholarship in the interdisciplinary field of Native American and Indigenous Studies. By analyzing such scholarship alongside a range of primary sources--including historical documents, literature, film, visual art, music, and social media--we will examine the complex interweavings of indigeneity, race, gender, and sexuality. Throughout the course, we will discuss topics of both past and present importance, such as environmental justice, cultural representation, and self-determination.

Secondary Crosslisting
The story of the gypsy femme fatale Carmen has endured for over 150 years. In Western culture she exemplifies the seductive, exotic, independent, and forbidden woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée’s 1845 novella on which Bizet based his beloved 1875 opera Carmen. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all-black musical Carmen Jones, to the MTV version A Hip Hopera of 2004. Comic approaches will also be assessed, from Charlie Chaplin's Carmen Burlesque of 1915 through Spike Jones’ 1952 Carmen Murdered! and The Naked Carmen of 1970. We will explore remarkable dance interpretations ranging from Carlos Saura’s 1983 flamenco version through David Bourne’s choreography in his 2001 gay reading called The Car Man.

Class Format: tutorial; after initial group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week
Requirements/Evaluation: each student will write a 5- to 6-page essay every other week (five in all), and provide peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation

Secondary Crosslisting
This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the still understudied role of women in the arts, we will focus primarily on the transsecionalities of social identities under intersected systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherrie Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

Crosslistings: WGSS251 / ARAB252 / COMP252 / HIST309

Secondary Crosslisting
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlhood), Leila Ahmed (A Border Passage: From Cairo to America--a Woman's Journey), Fadia Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Women Writers), and Jumanah Haddad (I Killed Scheherazade: Confessions of an Angry Arab Woman), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Ambivalence has always been a vital part of literary responses to city life. Whether they praise the city or blame it, women writers react to the urban
environment in a significantly different way from men. While male writers have often emphasized alienation and strangeness, women writers have celebrated the mobility and public life of the city as liberating. We will look at issues of women's work, class politics, sexual freedom or restriction, rituals of consumption, the conservation of memory by architecture, and community-building in cities like London, New York, Berlin, Paris. We will examine novels and short stories about the modern city by writers as diverse as Virginia Woolf, Gertrude Stein, Anzia Yezierska, Ann Petry, Jean Rhys, Marguerite Duras, Margaret Drabble, Ntozake Shange, Verena Stefan and Jhumpa Lahiri and Edwidge Danticat. We will consider theoretical approaches to urban spaces by feminists (Beatriz Colomina, Elizabeth Wilson), architectural historians (Christine Boyer) and anthropologists and sociologists (Janet Abu-Lughod, David Sibley, Michael Sorkin). Several contemporary films will be discussed. All readings in English.

**WGSS 255 (F)  "Disease" in Modern Chinese Literature and Culture**

Crosslistings: WGSS255 / CHIN253 / COMP254

Secondary Crosslisting

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

Crosslistings: ANTH256 / REL256 / WGSS256 / ASST256

Secondary Crosslisting

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life-his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad
ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf), and socio-political propaganda (the "Black is Beautiful" movement). Crosslistings: PSCI260 / WGSS260

**Primary Crosslisting**

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice—the concept of power—from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, bell hooks, Catherine MacKinnon, Hannah Arendt, and Gloria E. Anzaldúa.

Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

**WGSS 262 (S) Gender and Conflict in International Relations**

**Crosslistings:** PSCI261 / WGSS262

**Secondary Crosslisting**

This course explores gender dynamics in modern conflicts from the perspective of civilian societies, state militaries and non-state armed groups. The course will look at gender roles, relations, and symbols, throughout different phases of conflict including the precursors to conflict, during a conflict, and finally in the aftermath of active conflict. We will examine contemporary security debates related to gender including violent extremism, women in the military, and post-conflict reconstruction. We also look at case studies from several regions including Uganda, El Salvador, Sierra Leone, and Northern Ireland. Gender, in this course, will be used as a lens to understand different identities in conflict and expectations for women, men, boys, and girls, as well as examine femininities and masculinities. The course will use literature from scholars in the field of gender and conflict but will also include literature on conflict that does not have a gender perspective, with the aim to encourage students to add their own gendered analysis or questioning of current theories of conflict in international relations.

WGSS 263 (F)  Transnational Activism: Practice, Problems, Ethics  (DPE)

Crosslistings: WGSS263 / SOC264

Primary Crosslisting

As more and more people, goods, ideas, and health hazards circulate across borders, transnational institutions and organizations proliferate, and problems recognized as regional or global intensity, there is both increasing need and opportunity for transnational activism. In such a context, it is vital to understand how activists have engaged peoples around the world and/or have influenced transnational institutions, as well as to attune oneself to the ethical and practical difficulties associated with this kind of activism. This course examines the different forms that transnational activism takes and how transnational activists have advanced their goals. We also look into why and how transnational activists’ efforts have failed, focusing in particular on the issue of neo-imperialism and the problems created by the “white savior.” Orienting our exploration is the following question: what is the relationship between ethics and efficacy in activism that crosses borders? What does “ethical” transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

Distribution Notes:  DPE: This course centers activism organized around various axes of difference, enabling students to learn about how various groups are defining and pursuing equity. It requires students to explicitly engage the question of ethical intervention in political movements, stressing attentiveness to the dynamics of privilege and marginalization internal to movements. It builds the skill to engage across difference by requiring students to work together to develop a transnational activist action plan.

WGSS 264 (F)  Bodies, Genders, and Sexualities in the Early Christian World  (DPE)

Crosslistings: REL264 / WGSS264

Secondary Crosslisting

What does it mean to be a woman or a man? To have body? A gender? A sexuality? In this course we will explore the ways in which bodies, genders, and sexualities were experienced and described in Mediterranean antiquity. Ancient experiences of and ideas about bodies, genders, and sexualities were often very different than those of the contemporary world. Nevertheless, because Greek and Roman antiquity and Christian beginnings often function as the imagined origins of "Western" (or European and American) "civilization," these ancient ideas about bodies, genders, and sexuality, maintain an out-sized presence in current debates about the "normal" body, gender practices, and the contour of sexuality. With a focus on early Christianity, the course seeks, on the one hand, to introduce students to the early history of Christianity through an inspection of its pluriform discourses on the meaning and regulation of bodies, genders, and sexuality, even as it keeps an eye toward the modern legacy of these ideas. On the other hand, the course gives students the opportunity to be introduced to key questions and theories in Women's, Gender, and Sexuality Studies through the study of early Christianity and its environs.

WGSS 267 (F) Performance Studies: An Introduction  (DPE)
Crosslistings: COMP267 / WGSS267 / DANC267 / THEA267

Secondary Crosslisting
Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origins in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatricals as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

Crosslistings: ENGL249 / THEA249 / WGSS269

Secondary Crosslisting
This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's Black Odyssey, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices
on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include *Annie John* (1985), *Lucy* (1990), *The Autobiography of My Mother* (1996), *My Brother* (1997), *Mr. Potter* (2002), and *See Now Then* (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

WGSS 275 (S)  Women's Contemporary Cultural Production in Latin America (DPE) (WI)

Crosslistings: WGSS275 / COMP286 / RLSP274

Secondary Crosslisting

In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Ollin, Cílilali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucía Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. In addition, we will read theoretical texts on diverse subjects corresponding to each specific cultural product.

WGSS 279 (F)  Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Crosslistings: ASST271 / REL271 / WGSS279 / COMP279

Secondary Crosslisting

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yognoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an
extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Crosslistings: AFR283 / AMST283 / WGSS283 / ENGL286

Primary Crosslisting

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Crosslistings: WGSS301 / ANTH301 / AMST334

Primary Crosslisting
This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.

Class Format: seminar

Requirements/Evaluation: midterm essay exam, final research paper, research proposal/annotated bibliography

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 20

Enrollment Preferences: based on statement of interest

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: DPE: We will study various questions related to sexual empowerment, agency, vulnerability, and exploitation in myriad global contexts. We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

WGSS 302 (F) Social Construction (DPE)

Crosslistings: WGSS302 / REL301 / COMP315 / SOC301 / SCST301

Secondary Crosslisting

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

What is the body? Does "the body" precede culture, or is "the body" society's own creation, a contingent assemblage of matter, sensations, and psychosomatics? How does the self, and various types of self, relate to the body? How do sexual selves, racial selves, and gendered selves relate to their own bodies, to other bodies and selves? How are these selves produced through or with the body? How does the self-sense its "own" body? And does the body construct the self, or the self the body? In this course, we'll ask big questions about the body, its relation to the self, and about embodiment, through reading the most important and timely theories of the body, the self, and embodiment, especially as found in psychoanalytic, phenomenological, feminist, trans, and queer theories and methods.

Crosslistings: GERM304 / WGSS304
Secondary Crosslisting
In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Eilsner, *Riesenwürge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, Faserland, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage---suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature--how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy's The Black Atlantic, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students' theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise'eke Tinsley, and Vanessa Agard-Jones. Primary texts will include The Big Sea by Langston Hughes, Sugar and Slate by Charlotte Williams, Barry Jenkins' Moonlight, and more.

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

For complex reasons, Shakespeare has always revealed as much about those who speculate on him as the speculators have revealed about him. In this course, we will engage a few plays in considerable depth: *The Merchant of Venice*, *Hamlet*, and *Antony and Cleopatra*. But we will also use these works as a means to engage some of the most compelling trends in recent critical thought, including cultural theory and post-Marxist analysis, political theology, deconstruction and rhetorical theory, psychoanalytic thought and theories of gender and sexuality. In some instances, we will look at applied criticism, in others we will simply place a theoretical work alongside a play and see what they have to say to each other, for instance, what would a Shakespearean reading of Jacques Lacan look like?

**WGSS 312 (S) An American Family and "Reality" Television**  (WI)

**Crosslistings:** COMP316 / AMST333 / ARTH310 / WGSS312

**Secondary Crosslisting**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16- to 20-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Class Format:** seminar

**Requirements/Evaluation:** class presentations, research assignments, and final 16- to 20-page research paper

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option
**WGSS 313 (F) Gender, Race, and the Power of Personal Aesthetics**

Crosslistings: AFR326 / AMST313 / WGSS313 / LATS313

Secondary Crosslisting

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

**Class Format:** seminar

**WGSS 314 (S) The Social Ecology of Racial and Gender Inequity** (DPE)

Crosslistings: SOC314 / WGSS314

Primary Crosslisting

Why the political furor over monuments? What would a feminist city look like? Does gentrification promote racial justice? This course trains your focus on space and place, asking you to take a socioecological perspective on race and gender. In it, we examine how ideas about race and gender shape space as well as how the location, demographic composition and design of cities, neighborhoods, parks, and uncultivated spaces reinforce ideas about race and gender and racial/gender power relations. What is distinctive about this perspective, as compared with other analytical lenses through which we approach race and gender, and what is its value? What does a socioecological perspective suggest about the efficacy of different types of efforts to facilitate greater equity in social relations?

**Class Format:** seminar

**Requirements/Evaluation:** class facilitation, critical responses (four 2- to 3-page responses), late-term exam, final essay (10-12 pages) or essay-equivalent (video essay, photo essay, or other)
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Enrollment Limit: none

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 20

Distributions: (D2) (DPE)

Distribution Notes: DPE: This course introduces students to social psychology's socioecological approach, giving them a lens which can help them understand how important axes of difference—race and gender—are socially constructed as well as the stubborn persistence of racial and gender power differentials. Students in this course will be required to apply this lens to their own experience, as well as to discuss difficult questions about different obstacles and potential paths to greater equity in social relations.

WGSS 315 (S)  Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Crosslistings: WGSS315 / RLFR316

Secondary Crosslisting

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Crosslistings: ASST316 / WGSS316 / COMP313

Primary Crosslisting
This advanced undergraduate seminar focuses on concepts, queries, and methodologies at the intersections of Asian Americanist critique, queer theory, and affect theory. How might we come to understand Asian gender, sexuality, and racialization less through a language of being or meaning, as through feeling? How do Asian/American discourses rely upon languages of gender and sexuality, and how might queerness depend upon Asianness? How might these theories identify, complicate, and call forth more expansive or alternative practices of belonging? The class will read theories including national abjection, racial melancholia, disaffection, queer diaspora, and homonationalism, as well as engage Asian American literatures.

WGSS 317 (F) The New Woman in Weimar Culture (WI)

Crosslistings: WGSS317 / GERM317

Secondary Crosslisting

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

WGSS 319 (F) Gender and the Family in Chinese History

Crosslistings: ASST319 / HIST319 / WGSS319

Secondary Crosslisting

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China.

WGSS 322 (S) Introduction to Critical Theory  (WI)

Crosslistings: PHIL321 / WGSS322

**Secondary Crosslisting**

"Dare to know! Have courage to use your own reason-that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet in 19th and 20th centuries we find the promise of Enlightenment tempered by the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed? In this tutorial we begin with short readings by Kant, Hegel and Marx, key sources for critical social theory in the 20th century. Possible topics may include: alienation, authoritarianism, "pathologies of reason," and reification, as well as recognition, the idea of socialism, and progress. Possible other figures read may include: Max Horkheimer, Theodor Adorno, Herbert Marcuse, Walter Benjamin, Jurgen Habermas, Nancy Fraser, Amy Allen, Noelle McAfee, Judith Butler, Elizabeth Grosz, Michel Foucault, Jean Baudrillard, and Gilles Deleuze, Georgio Agamben, Frantz Fanon, Edward Said and Achille Mbembe, as well as current critiques of neoliberal capitalism. This tutorial will be adapted for WGSS students seeking to meet a theory requirement.

**Class Format:** tutorial, students will work in pairs and meet for 75 minutes each week with the professor

WGSS 325 (F) Television, Social Media, and Black Women ‘Unscripted’

Crosslistings: AFR325 / WGSS325

Secondary Crosslisting

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and “unscripted”) and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages
negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on class attendance, analytical essays, responses, and revised essays

Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week’s reading. The other student will respond orally with a 2-page response to their partner's paper.

WGSS 328 (F) Austen and Eliot
Crosslistings: ENGL328 / WGSS328

Secondary Crosslisting

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer’s work in its political and philosophical context— in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism— we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*; Eliot's *The Mill on the Floss*, *The Lifted Veil*, and *Daniel Deronda*; selected letters and prose; and critical essays.

If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what constituted "sexualities" before that? This course will explore how sexualities were expressed, regulated, denied and embraced "before identity"
through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

How can contemporary performance expand ideas and practices of belonging in the United States, as figured through race, gender, and sexuality? This spring course will begin with readings of dramatic literature including Suzan-Lori Parks's Venus, David Henry Hwang's M. Butterfly, and Young Jean Lee's The Shipment to analyze literary and staged performance, then continue to discussions and readings on the performance of everyday life via the work of performance artists including Adrian Piper, Nao Bustamante, and Yoko Ono. We will develop shared vocabulary and methodologies of performance studies, including readings by scholars including J.L. Austin, Judith Butler, and José Esteban Muñoz. This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces?

WGSS 331 (S) Queer Europe: Sexualities and Politics since 1850 (DPE)

Crosslistings: HIST332 / WGSS331

Secondary Crosslisting

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions...
of identity, personal and national, in modern European society. Topics include: women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but Italy and Russia will also be the focus of some meetings. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

Class Format: seminar

Requirements/Evaluation: class discussion, the posting of four 500 word response papers, two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages

Distribution Notes: DPE: Queer Europe is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

WGSS 332 (S) Postwar Britain: Gender, Race, Sexuality, and Social Change, 1945-1990

Crosslistings: WGSS332 / HIST333

Secondary Crosslisting

A major theme in British historiography is the enormous social change that has taken place in Britain since the end of the Second World War. In the 1950s, sociologists argued about the extent to which postwar affluence was leading to the "embourgeoisement" of the working class; in the 1960s, the advent of the so-called "Permissive Society" witnessed the flourishing of a new culture of sex, drugs, and rock 'n roll; in the 1970s, the feminist and gay movements challenged gender roles that earlier had seemed so secure; in the 1980s, Thatcherism sought to halt the nation's apparent terminal decline, repudiating much of the progressive legislation of earlier decades by turning the clock back; finally, throughout this period successive waves of immigration appeared to many to challenge the cultural homogeneity of white Britain. This course will explore these themes, addressing the question of what it meant to be "postwar" in Britain, charting the gradual emergence of a new politics of class, gender, race, and sexuality in Britain that made the nation in 1990, at the end of the postwar period, a radically different place from what it had been in 1945. In attempting to make sense of these complex changes, we will consider a variety of documents and works by recent historians, along with a dozen films, which students will be required to view outside of class.

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling social issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories of everyday life are familiar as, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers’ understanding of themselves as subjects and agents of an ongoing social history.

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses so such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country’s unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related to women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: The seminar will include a mandatory spring break trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. These form the basis of their final research paper. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

WGSS 339 (S) Stereotypes, Prejudice, and Discrimination  (WI)

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

WGSS 340 (S) Elizabeth Bishop in the Americas  (DPE)

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: seminar; seminar, three hours per week, small group discussion, archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE)

Distribution Notes: meets Division 1 requirement if registration is under ENGL or COMP; meets Division 2 requirement if registration is under AMST or WGSS DPE. This course examines difference, power, and equity in poetry and other writing produced during the Cold War period in the Americas. As the course description indicates, Elizabeth Bishop provides the central focus of our interrogation of questions and constructions of race, class, sexuality, national identity, and power in the U.S. and Brazil during a time of intense exchange between the two nations. This course employs critical tools (case studies, translation theory, archival research, poetics, close reading, comparative approaches, postcolonial theory) to help students question and articulate the way that social injustice, such as racial inequality, poverty, and colonial conquest, shapes national and individual identities. Students will learn how to articulate how our aesthetic and cultural products also serve to shape these identities but also can challenge the dominant power structures.

Crosslistings: COMP341 / WGSS341

Secondary Crosslisting

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Āgustín, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man’s Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore’s Glory, Le Havre and Time Out.

WGSS 342 (S) American Genders, American Sexualities

Crosslistings: WGSS342 / AMST341 / ENGL341

Secondary Crosslisting

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods--roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and
the contemporary context of the "postmodern" 21-century--we will explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films.

Shakespeare's plays portray a remarkably wide range of female characters from serving women to queens, from innocent, subservient young women
to powerful authoritative adults. His plays explore female friendships, parents and children, love affairs and marriages, male actors playing female roles and female characters playing male roles. Looking closely at five plays—Twelfth Night, Much Ado Nothing, Hamlet, Macbeth, Antony and Cleopatra—we will examine the ways in which attitudes toward female stereotypes, sexuality, gender, subjectivity, social norms and performance evolve as Shakespeare’s poetic style and dramatic technique mature, and the genre shifts from comedy to tragedy.

Crosslistings: STST348 / WGSS348 / ARTH348 / ENGL348

Primary Crosslisting

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal—indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

WGSS 352 (S) Mystic Spirituality in Black Women's Social Justice Activism: Brazil-USA

Crosslistings: REL352 / AFR352 / WGSS352

Secondary Crosslisting

This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA
and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions—such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred—as resources for creativity, community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, *Jane Eyre*, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, *The Tenant of Wildfell Hall*, to Emily's singular masterpiece *Wuthering Heights*, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 *Life of Charlotte Bronte*, "the first full-length biography of a woman novelist by a woman novelist", which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Charlotte's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

**Crosslistings:** ARTH361 / WGSS361 / THEA361 / INTR361

**Secondary Crosslisting**

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as
memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Accocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

In “The Lover of Blue Writing above the Sea,” (1995) a poem written to console a lover after the death of his beloved, Syrian poet, Ghada al-Samman, pens: “If you are sad and burn the edge of my book/I shall come to you/like the genie in my grandmother’s Damascene stories…” As these lines imply, the fantastic grandmother’s Damascene stories have the power to equally amend broken hearts and restore memories of loss. In this course, we will adopt "the grandmother’s Damascene stories" as a conceptual metaphor that guides our line inquiry into the intersection of Arab women’s narrative and the city. We will read novels and short stories by Arab women writers about cities and capitals in the Arab world and the diaspora. The goal of this course is not only to familiarize students with prominent Arab women novelists, such as Hoda Barakat, Radwa Ashur, Liana Badr, Raja’a Alem, Alia Mamdouh, and Ahlam Mosteghanemi, among others, but also to introduce them to the literary and visual cartography of Beirut, Granada (via Cairo), Ramallah, Mecca, Baghdad, and Constantine, respectively. We will also read short stories about other cities in the world, such as New York, Paris, London, Buenos Aires and Tokyo among other world metropolis. Questions we will address include: How does the city appear as a protagonist? How do Arab women novelists represent nationhood, modernity, memory, love, war, sexuality and religion, among other themes, in their construction of urban narratives? How do these narratives map an Arab feminist metropolis? How do Arab women writers represent cities beyond the Arab world? To answer these questions, we will also look at Arab women's blogs and watch films that focus on the city as a site for spatial articulation of national histories, popular revolutions, and feminist public spheres.

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation—also known as as ‘deep hanging out.’ Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

WGSS 396 (F) Modern Pleasure

Crosslistings: ENGL394 / WGSS396

Primary Crosslisting

This course investigates modernist imaginations of pleasure, both sensual and aesthetic, with a particular focus on the ways that modernism's formal strategies might facilitate queer representations of pleasure, intimacy, and desire. In tandem with our discussion of literary form, we will consider the crucial role that visual media, music, and community spaces, like Harlem's cabarets and Natalie Barney's sapphic salon, played in the collaborative production and transatlantic circulation of modernism. Authors likely to be studied include Oscar Wilde, Langston Hughes, Gertrude Stein, Djuna Barnes, Nella Larsen, Radclyffe Hall, and James Baldwin. We will read the work of sexologists and situate modernist literature in relation to early 20th-century scientific conversations about human sexuality and the nature of pleasure. Queer and feminist theory will accompany these texts and provide a framework for our analysis of modernism's queer pleasures.

Crosslistings: GBST402 / HIST402 / AFR402 / WGSS400

Secondary Crosslisting

The family is the center of private life, but it has also been a topic of constant discussion and contention in Africa. In this class we will examine how political upheavals and economic pressures have changed the concept of the family and the role it plays in various African societies. We will also consider the changing views of gender, race, age, class, and sexuality on the idea of family.

WGSS 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)

Crosslistings: COMP401 / GERM401 / WGSS401

Secondary Crosslisting
Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate ‘entrepreneurs of self.’ This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

WGSS 405 (S) Sr.Sem: Sexual Rights, Gender Equality, and Religious Liberty: Conflicts in Law, Culture, and Politics (WI)

Crosslistings: WGSS405 / HIST458

Primary Crosslisting
Legal systems, political leaders, religious groups, and social movements, have generated and responded to conflicts and perceived conflicts between religious freedom, gender equality, and sexual rights in a variety of ways over the past twenty-five years. This course will consider these conflicts in a comparative context, and will examine when, why, and how appeals to religion, tradition and/or culture have been used to carve out exceptions to otherwise generally applicable laws.

Class Format: seminar

WGSS 408 (S)  Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers
Crosslistings: RLF412 / WGSS408

Secondary Crosslisting
In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arreta, Lelouch, Chabrol. Conducted in French.

WGSS 409 (F)  Transnationalism and Difference: Comparative Perspectives (WI)
Crosslistings: AMST411 / WGSS409 / LATS409

Secondary Crosslisting
In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to “be transnational”? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

**WGSS 412 (S) Graphic Sex: Queer Ethnographic Writing**

Crosslistings: ANTH412 / WGSS412

**Primary Crosslisting**

This seminar examines recent and canonical work in queer anthropology, exploring how different cultures construct sexual and gender identities and subjectivities, and what happens when dominant paradigms such as the Euro-American LGBT model become enmeshed in globalization, late capitalism, and consumerism. We begin with a series of case studies highlighting alternative gender and sexual formations in various cultures around the world, emphasizing how these seemingly “authentic” local categories are themselves the products of historical shifts, colonial relations, and political economy. We also examine how these categories overlap, conflict with, subvert, or syncretize with the increasingly global category of “gay.” In addition to reading queer ethnographies, we will also learn the methods required for doing ethnography ourselves, including interviewing techniques, participant observation, writing thick description, data analysis, and editing.

WGSS 420 (S)  Senior Seminar: The Drag of Black Masculinity (DPE)

Crosslistings: AMST420 / AFR331 / ENGL420 / WGSS420

Primary Crosslisting

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 19th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory, and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. By examining representations and presentations of Black masculinities, we will pursue questions such as: How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men’s sexuality inform representations of Black masculinities? Can we/should we be moving beyond heteropatriarchy and gender binaries? What is the future of Black Gender? By reading critical and creative texts, viewing films and engaging other kinds of media, students will hone their critical theorization skills.

WGSS 453 (S)  Women, Gender, and Social Movements in U.S. History (WI)

Crosslistings: HIST453 / WGSS453

Secondary Crosslisting

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women’s or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

WGSS 468 (S) Practicum in Curating: Visual Art for a Garden (WI)
Crosslistings: WGSS468 / ARTH468
Secondary Crosslisting
This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby’s new “Living Museum” initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks 2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.
Class Format: seminar; this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)
Requirements/Evaluation: in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments

The Writing-Intensive (WI) requirement is intended to improve student writing proficiency across disciplines. Students in these courses will receive guidance on style, argumentation, and other significant aspects of writing, as well as evaluation and criticism of their writing throughout the semester. This may be achieved through a variety of approaches: brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WI courses may also include multiple drafts, conferences, peer review, or class discussions designed to improve writing skills. A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered writing-intensive. WI courses require a minimum of 20 pages of writing and have a maximum enrollment of 19—this allows the instructor to devote appropriate attention to writing over the course of the semester.

All students are required to take TWO WI courses: one by the end of sophomore year and one by the end of the junior year. Students will benefit most from WI courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

The WI requirement expires at the end of 2018-19 and will be replaced by the new Writing Skills (WS) requirement.

AFR 126 (F) Black Literature Matters (DPE) (WI)
Crosslistings: AFR126 / AMST126 / ENGL126
Secondary Crosslisting
Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under AMST or AFR DPE: This course centers the relationship between black literature and black political movements from the 1920s to the present. Through discussions and short essays, students will develop skills for analyzing the essential role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present. WI: This course requires students to write four formal essays that total at least 20 pages. Students will also submit short in-class writing assignments.

From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Crosslistings: AFR164 / AMST165 / HIST164

Secondary Crosslisting
This writing intensive seminar will focus on slavery in the southern United States—one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects.

Secondary Crosslisting
This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

AFR 208 (F) Time and Blackness (WI)
Crosslistings: AFR208 / REL262 / AMST208

Primary Crosslisting
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial
Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

AFR 213 (S)  Race, Gender, and the Alien Body: Octavia Butler's Science Fiction  (WI)
Crosslistings: SCST213 / AFR213 / WGSS213

Primary Crosslisting
Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, gender, and sexuality. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels such as Octavia E. Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Secondary Crosslisting
This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

AFR 348 (S) The Black Radical Tradition (WI)
Crosslistings: LEAD348 / PSCI348 / AFR348

Primary Crosslisting
The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

**AFR 369 (S) African Art and the Western Museum** (DPE) (WI)

*Crosslistings: AFR369 / ARTH308*

**Secondary Crosslisting**

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Class Format:** tutorial

**Requirements/Evaluation:** field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

**AMST 101 (F) America: the Nation and Its Discontents** (DPE) (WI)

America has always named something more than a geographical place; being "American" has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

**Class Format:** seminar

**Requirements/Evaluation:** total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Secondary Crosslisting

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

DPE: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences. Through analyzing diverse representations of girlhood, the course also gives students the critical tools to articulate and interrogate the texts' desire for equity and justice, and to describe what power and agency might mean within these works, as well as in the world. WI: Students do at least 20 pages of writing and have the chance to revise several papers. We also spend significant class time to talking about successful academic writing.

AMST 113 (F) The Feminist Poetry Movement (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113
Secondary Crosslisting

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

DPE: This course examines difference, power, and equity during Feminism's Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.
AMST 126 (F) Black Literature Matters (DPE) (WI)
Crosslistings: AFR126 / AMST126 / ENGL126

Secondary Crosslisting

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

DPE: This course centers the relationship between black literature and black political movements from the 1920s to the present. Through discussions and short essays, students will develop skills for analyzing the essential role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present. WI: This course requires students to write four formal essays that total at least 20 pages. Students will also submit short in-class writing assignments.

AMST 167 (F)  Let Freedom Ring? African Americans and Emancipation  (WI)

Crosslistings: AFR167 / HIST167 / AMST167

Secondary Crosslisting

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. AMST 208 (F)  Time and Blackness  (WI)

Crosslistings: AFR208 / REL262 / AMST208

Secondary Crosslisting

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from—and create—paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race
shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Class Format: tutorial

And is Michelle Tea’s *Black Wave* fiction or something else? Along the way, we’ll also ask: What forms and themes define contemporary American fiction? This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of “home” into something that reflected their individual identity, and not one imposed by any national culture—American or foreign.

Class Format: seminar

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 324 (S) Indigenous Women's History  (DPE) (WI)
Crosslistings: AMST324 / HIST362 / WGSS324

Primary Crosslisting

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.

Class Format: seminar

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies, History, and Women's Studies, Gender and Sexuality majors

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: In this course, we examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives. WI: With substantial focus on students' development of independent research papers, this course satisfies the WI requirement.

AMST 339 (S) Latina/o Musical Cultures: Sounding out Gender, Race, and Sexuality  (WI)
Crosslistings: LATS338 / WGSS338 / AMST339

Secondary Crosslisting

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Class Format: seminar

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

AMST 343 (F) Representations of Racial-Sexual Violence from Enslavement to Emancipation (WI)

Crosslistings: WGSS343 / AMST343 / AFR343 / INTR343

Secondary Crosslisting

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include *Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street;* films include *Birth of a Nation; Bush Mama; To Kill a Mockingbird*. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.

Requirements/Evaluation: weekly primary and response papers

AMST 346 (F) Latinas/os and the Media: From Production to Consumption (WI)

Crosslistings: LATS346 / AMST346

Secondary Crosslisting

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

AMST 405 (S) Critical Indigenous Theory (DPE) (WI)

Intellectual decolonization is not a bounded project. On one hand, it demands a vocabulary of difference and refusal that rejects colonial theories and epistemologies. On the other, it demands that we interrogate our own intellectual and cultural traditions and trauma. Critical Indigenous theory is a tool in those projects, as it offers a corrective and an opening up of both dominant critical theory traditions that violently erase Indigenous bodies and political realities and of Indigenous theory that can essentialize difference and replicate oppressive dynamics in our communities. Critical Indigenous theory seeks to understand the structures and relations of power in settler colonialism, nested sovereignty, and culturally specific Indigenous philosophical traditions, like Indigenous studies more broadly, but also questions the key concepts that define Indigenous studies: tradition, sovereignty, authenticity, identity, race, gender, and sexuality. In this course, we will read major works in critical Indigenous theory that address indigeneity as it relates to race, postcolonial theory, feminist and two-spirit critique, alternative political engagement with the settler colonial state, and questions of "colonial unknowing." We will work on cultivating the reading practices needed to parse dense theoretical texts, and over the course of the semester you will develop a research project on a topic of your choosing that will allow you to take critical Indigenous theories and employ them as analytic tools and lenses.

Class Format: seminar

Requirements/Evaluation: attendance and participation, one discussion prospectus, and a 20-page research paper

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: junior or senior status and some background in American Studies, Native American Studies, or Critical Theory or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: Students will be invited to think deeply about the intersections of race, gender, colonialism, sexuality, and epistemology, and develop skills necessary to identify the theoretical basis of decolonial activism. WI: Students will be required to take the theories we read in class and use them as analytics in a 20-page research paper on a topic of their choosing. Over the course of the semester, we will model how to do this in class work, research question development, outlining, and workshop.

AMST 408 (F) Envisioning Urban Life: Objects, Subjects, and Everyday People (WI)

Crosslistings: LATS408 / AMST408

Secondary Crosslisting

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

**AMST 490 (S) The Suburbs** (WI)

Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

**ANTH 134 (S) Leaving the World Behind: The Literature of Reclusion** (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one’s artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely
separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Crosslistings: ANTH222 / REL273

Primary Crosslisting

This course examines the ways in which cultures select, ritually celebrate, institutionally harness, and ultimately devour people designated as 'extraordinary'. We will begin by considering cultural archetypes and theories of the hero and how heroism has been understood in different eras and cultural contexts. Using Weber's theory of charisma as a foundation, we will look at a number of specific case studies to evaluate the relationship between individual creativity and action and the demands of social conformity and control. Finally, we will examine how charisma is commoditized in the form of the celebrity in contemporary American culture.

ANTH 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE) (WI)

Crosslistings: ANTH256 / REL256 / WGSS256 / ASST256

Secondary Crosslisting

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic
sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

**ANTH 269 (S) Mindsight: Mindfulness and Medicine** (DPE) (WI)

**Crosslistings:** REL269 / ASST269 / ANTH269

**Primary Crosslisting**

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the ‘kindness curriculum’ in schools, and other areas of applied research on mindfulness that have generated a ‘science of personal transformation’. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Distribution Notes: DPE: This class fulfills the DPE requirement because it will explore the ways that stress related to poverty, social inequality, and structural violence can and have been alleviated by mindfulness-based practices. Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. ANTH 328 (F) Emotions and the Self  (WI)

Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

ANTH 334 (S) Imagining Joseph  (WI)

Crosslistings: REL334 / COMP334 / ANTH334 / JWST334

Primary Crosslisting

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

**Primary Crosslisting**

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature.

Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

**Class Format:** seminar

Finally, students will produce written assignments that address issues of power and environmental discrimination.

**Primary Crosslisting**

Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given a short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

Crosslistings: ARAB257 / PSCI257

Secondary Crosslisting

The title and inspiration for this course comes from Robin Wright's book The Last Great Revolution. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

ARAB 308 (S) The Nile (DPE) (WI)

Crosslistings: ARAB308 / HIST308

Secondary Crosslisting

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

ARAB 331 (F)  Popular Culture in the Arab World: Youth, Populism, and Politics  (DPE) (WI)
Crosslistings: COMP332 / ARAB331

Primary Crosslisting

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women, articulated a political language of popular resistance against the dual hegemony of state and colony.

ARAB 346 (S)  Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean  (DPE) (WI)
Crosslistings: COMP346 / ARAB346
This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Throughout we will read novels and watch films that focus on histories of social movements, post-independence revolutions, indigenous autonomies, dictatorship, and counter-revolutions with the aim to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. A comparative and critical reading of these texts will introduce you to the complex histories of national liberation, state terrorism and democratic imagination in two geographies in the Global South that share similar struggles against Euro-American imperialism. These texts will also familiarize you with an alternative, yet foundational, canon of Arabic, Latin American and Caribbean literatures and cinema, particularly from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Although this course is conceptualized as a South-South comparative reading of revolution and counter-revolution, it does not adhere to strict geographical parallels between the Arab World, Latin America and the Caribbean. It is mapped, however, according to major critical questions and thematic tropes that inform this topic. For example, how do contemporary Iraqi and Chilean writers and filmmakers write an aesthetic of evil in narratives that investigate the legacy of prolonged dictatorship? How do national novels in Mexico and Palestine depict parallel movements of indigenous resistance and anti-capitalist struggles? What motifs of dystopia are illustrated in narratives about post-revolution civil wars in Argentina and Syria? What histories of popular nationalism and socialism are revealed in feminist memoirs from Egypt and Cuba from the 1960s and 1970s?

ARAB 480 (F) Interpretations of the Israeli Palestinian Conflict  (DPE) (WI)
Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting
This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).
Class Format: tutorial
Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option
Prerequisites: none, though some academic experience with Middle East materials is preferred
Enrollment Limit: 10
Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators
Expected Class Size: 10
Distributions: (D2) (DPE) (WI)
Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will
develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

ARTH 228 (S) Velázquez, Goya, and Picasso (WI)
Crosslistings: RLS228 / ARTH228

Secondary Crosslisting
This course will provide an introduction to three major Spanish painters—Velázquez, Goya, and Picasso—who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Crosslistings: AFR369 / ARTH308

Primary Crosslisting
This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to
exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

ARTH 361 (F) Writing about Bodies  (WI)

Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Primary Crosslisting

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the ’62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Primary Crosslisting
What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Crosslistings: ARTH440 / LATS440

Primary Crosslisting

This seminar examines connections between Latina/o and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Class Format: seminar

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Also, a number of the exhibitions studied in the class explicitly take up issues of difference, power, and equity. Through discussion, presentations, and writing assignments students will develop and refine skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.  WI: This course is a Writing Intensive seminar. This means that there will be considerable focus on writing, revision, and peer-editing as a means of shaping critical thinking. ARTH 468 (S) Practicum in Curating: Visual Art for a Garden  (WI)

Crosslistings: WGSS468 / ARTH468

Primary Crosslisting

This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby’s new “Living Museum” initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc
Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks. 2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.

Class Format: seminar; this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)

Requirements/Evaluation: in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments

Crosslistings: HIST117 / GBST117 / ASST117

Secondary Crosslisting

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Crosslistings: ASST207 / JAPN407

Secondary Crosslisting
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Distributions: (D2) (DPE) (WI)

Distribution Notes: DPE: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality. WI: Class is WI because of its reading responses, in-class writing, a final research paper, and required writing chats with the instructor where we identify patterns, strengths, and weaknesses in student writing.

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the 'kindness curriculum' in schools, and other areas of applied research on mindfulness that have generated a 'science of personal transformation'. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Further it critiques the continuing misperception that mindfulness practices are elite, non-inclusive practices that cannot benefit populations suffering from pervasive NCDs (non-communicable diseases) like obesity and high blood pressure that are related to broader social inequities. This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Primary Crosslisting
We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius (atlas of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Hailey (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful
course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

**BIOL 219 (S) Dangerous Exposures: Environment, Immunity, and Infectious Disease (WI)**

Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioral mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used...
to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

CHEM 342 (S) Synthetic Organic Chemistry (WI)

The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester's final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. Laboratory sessions introduce students to techniques for synthesis and purification of natural products and their synthetic precursors.

CHIN 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)

Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Primary Crosslisting

Living in a time of political and social turmoil, Confucius told his followers: “When the realm has the Way, show yourself; when it lacks the way, hide.” Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the
philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Crosslistings: CLAS241 / COMP241 / WGSS241

Primary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students’ capacity to evaluate claims and dismantle false assumptions about the continuity of the “classical” past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

CLAS 306 (S) The Good Life in Greek and Roman Ethics (WI)

Crosslistings: CLAS306 / PHIL306

Secondary Crosslisting
Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to Aristotle's Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero's *On the Ends of Good and Evil*.

As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

Crosslistings: COMP115 / ENGL115
Secondary Crosslisting

The antagonism between the West and the rest has been a defining feature of contemporary thought, especially during the struggles of the colonies to establish themselves as independent nations at the turn of the twentieth century. While armies and politicians stayed busy using blunt tools of violence, class and caste warfare, and fanning the flames of religious and ethnic tension, many artists, writers, and theorists challenged simple binaries that made cultures out to be at odds with one another by giving voice to complex identities and histories. Our works will take us around the world, and stretch us across multiple histories of colonialism and its aftermaths. In addition to encountering a postcolonial serial killer, a pterodactyl in present-day India, and a famed boxing match sponsored by an African dictator, we will watch narrative and documentary cinema, look at visual art, and read poetry, fiction, essays, and philosophy, and consider how these media and genres work as forms of thoughtful resistance as well as creative expression. COMP 117 (F) Introduction to Cultural Theory (WI)

Crosslistings: ENGL117 / COMP117

Secondary Crosslisting

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study “culture,” what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word “culture” means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (Ferris Bueller's Day Off, Silence of the Lambs, The Lord of the Rings) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

COMP 134 (S) Leaving the World Behind: The Literature of Reclusion (WI)
Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting
Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion---living a life of seclusion from society---in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state---to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

COMP 234 (S) Saharan Imaginations (DPE) (WI)
Crosslistings: COMP234 / ARAB209 / ENVI208

Secondary Crosslisting
Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the
Sahara.

Class Format: seminar

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

COMP 239 (F) What is a Novel? (WI)
Crosslistings: COMP239 / ENGL240

Secondary Crosslisting
What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory--too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick, Edward Said, Leo Bersani, and Franco Moretti.

Secondary Crosslisting
This course introduces students to some of the most significant and compelling trends in modern criticism--such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can Othello be read as a feminist text? A site of class struggle? A staging of the
relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

Secondary Crosslisting

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

COMP 242 (S) Americans Abroad (DPE) (WI)
Crosslistings: AMST242 / COMP242 / ENGL250

Primary Crosslisting

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and
contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Class Format: seminar

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Secondary Crosslisting

Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given a short shift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

**COMP 268 (S) Novel Worlds (WI)**
Crosslistings: ENGL263 / COMP268

**Secondary Crosslisting**

Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail--each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world.

We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's *Emma*; Charles Dickens's *Bleak House*, *Carroll's* *Alice in Wonderland*, Italo Calvino's *Invisible Cities*, and Roberto Bolano's *Savage Detectives*.

**COMP 286 (S) Women's Contemporary Cultural Production in Latin America (DPE) (WI)**
Crosslistings: WGSS275 / COMP286 / RLSP274

**Secondary Crosslisting**

In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Olin, Citlali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucia Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. COMP 332 (F) Popular Culture in the Arab World: Youth, Populism, and Politics (DPE) (WI)
Crosslistings: COMP332 / ARAB331
Secondary Crosslisting
Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites
for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

COMP 346 (S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (DPE) (WI)

Crosslistings: COMP346 / ARAB346

Primary Crosslisting

This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Throughout we will read novels and watch films that focus on histories of social movements, post-independence revolutions, indigenous autonomies, dictatorship, and counter-revolutions with the aim to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. A comparative and critical reading of these texts will introduce you to the complex histories of national liberation, state terrorism and democratic imagination in two geographies in the Global South that share similar struggles against Euro-American imperialism. These texts will also familiarize you with an alternative, yet foundational, canon of Arabic, Latin American and Caribbean literatures and cinema, particularly from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Although this course is conceptualized as a South-South comparative reading of revolution and counter-revolution, it does not adhere to strict geographical parallels between the Arab World, Latin America and the Caribbean. It is mapped, however, according to major critical questions and thematic tropes that inform this topic. For example, how do contemporary Iraqi and Chilean writers and filmmakers write an aesthetic of evil in narratives that investigate the legacy of prolonged dictatorship? How do national novels in Mexico and Palestine depict parallel movements of indigenous resistance and anti-capitalist struggles? What motifs of dystopia are illustrated in narratives about post-revolution civil wars in Argentina and Syria? What histories of popular nationalism and socialism are revealed in feminist memoirs from Egypt and Cuba from the 1960s and 1970s?

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers (3-4 pages), two film reviews (1-page), two critical reflections (1-page), a performance, and a final paper (7-10 pages)
This course will explore difference, power, and equality through a comparative reading of narratives of dissent and revolt. The novels examines the effects of class, race, ethnicity, gender and sexuality on social and economic inequalities that ultimately have mobilized revolutions in the Arab world, Latin America, and the Caribbean since the 1960s. Reading narratives of socialist revolutions from the Global South, students will hone skills to address global injustices and neoliberalism.

COMP 347 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE) (WI)

Crosslistings: COMP347 / GERM331

Secondary Crosslisting

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother’s and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

Enrollment Limit: 10

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 10

Distributions: (D1) (DPE) (WI)

Distribution Notes: DPE: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

**Crosslistings:** COMP358 / ENGL332 / THEA332

**Secondary Crosslisting**

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered "classic" texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

**Class Format:** seminar/studio, three hours per week

**Requirements/Evaluation:** a 5-page paper, a performance analysis, a short creative work, and a longer final creative work

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Enrollment Preferences:** If the class is overenrolled, students will submit a letter of interest in the class

**Expected Class Size:** 14

**Distributions:** (D1) (DPE) (WI)

**Distribution Notes:** DPE: This course approaches questions of ownership, race, and power both critically and creatively. WI: There will be more than 20 pages of writing, both critical and creative in this course.

**Crosslistings:** RLFR414 / COMP414

**Secondary Crosslisting**

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardenne brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

**Class Format:** seminar

**Requirements/Evaluation:** three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay

ECON 212 (F) Markets And Morals (WI)
What are the moral foundations necessary to support a free market economy? Does capitalism need a moral base—and if so, does the operation of a market economy erode the moral and ethical foundations on which it rests? We read Adam Smith, Mill, Keynes, Galbraith and other neoclassical philosophers writing about the social fabric that holds an atomistic free market political economy together, with particular emphasis on Smith’s “other book”--Theory of Moral Sentiments--as an argument for limits to self-interested behavior inherent in human nature. (What is the sound of one Invisible Hand clapping?) We test our own articulated moral and political values against the existing political economy of Western democracies with help from more contemporary authors like Amartya Sen, Kenneth Boulding and Robert Kuttner. We will examine in depth the market for carbon offsets as a case study for the evaluation of the ethical validity of market-based solutions to climate problems. Students will write final papers on how well selected aspects of free market economies (organization of production, distribution of resources, mechanisms of inheritance, taxation) measure up to their own stated sense of justice—and how we might reform or perfect markets to align better with our morals.

Class Format: seminar

Requirements/Evaluation: 3- to 5-page opinion paper (15%), 5-page comparative paper (20%), final paper applying learning to a specific context (40%), class participation and discussion posts (25%)

Enrollment Limit: 19

Enrollment Preferences: letters written to instructor

Expected Class Size: 19

Distributions: (D2) (WI)

Distribution Notes: WI: Students will write a 3- to 5-page opinion/argumentation paper early in the semester with feedback on writing, clarity of expression, and logical argumentation. They will write a second 5-page paper comparing two works assigned to date and a final paper (12-14 pages) applying our shared learning to a particular aspect of market economies. For all of the papers, students are encouraged to submit iterative drafts incorporating instructor comments and critiques.

ECON 240 (F) Colonialism and Underdevelopment in South Asia  (DPE) (WI) (QFR)
British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, “nationalist” writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, “apologists,” argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between “nationalists” and “apologists” has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

ECON 390 (S) Financial Crises: Causes and Cures  (WI)

Crosslistings: ECON536 / ECON390

Primary Crosslisting

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

ECON 463 (F) Financial History (WI)

What can we learn from financial history to understand the successes and failures of finance today, and how finance and politics interact? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the relationship between finance and government, and the extent to which it has changed over time; the lessons from early asset bubbles for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier epochs to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation.

Class Format: seminar

ENGL 105 (F) American Girlhoods (DPE) (WI)
Crosslistings: AMST105 / WGSS105 / ENGL105

Primary Crosslisting
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these
differences. Through analyzing diverse representations of girlhood, the course also gives students the critical tools to articulate and interrogate the
texts' desire for equity and justice, and to describe what power and agency might mean within these works, as well as in the world. WI: Students do at
least 20 pages of writing and have the chance to revise several papers. We also spend significant class time to talking about successful academic

ENGL 111 (F) Poetry and Politics  (WI)

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy
irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury,"; in which
she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very
politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that
poetry would suffer from too much involvement with the "quarrel with others" that is politics, becoming, perhaps, something more like advertising
jingles for political dogma. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in
its irrelevance to politics as such. This course will focus on the vexed relationship between poetry and political struggle, reading predominantly poetry
and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do
for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad
poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers of poetry,
and better readers and writers of argumentative prose.

ENGL 113 (F) The Feminist Poetry Movement  (DPE) (WI)

Crosslistings: ENGL113 / WGSS113 / AMST113

Primary Crosslisting

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and
Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the
crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for
building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary
approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the
Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At
the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and
created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also
help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will
want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating
necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

DPE: This course examines difference, power, and equity during Feminism’s Second Wave. As the course description explains, the course considers how poetry can serve as an important tool for thinking through questions of power and injustice and play a key role in creating necessary imaginative space in the world for expression, critique, and change. The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

**Crosslistings:** COMP115 / ENGL115

**Primary Crosslisting**

The antagonism between the West and the rest has been a defining feature of contemporary thought, especially during the struggles of the colonies to establish themselves as independent nations at the turn of the twentieth century. While armies and politicians stayed busy using blunt tools of violence, class and caste warfare, and fanning the flames of religious and ethnic tension, many artists, writers, and theorists challenged simple binaries that made cultures out to be at odds with one another by giving voice to complex identities and histories. Our works will take us around the world, and stretch us across multiple histories of colonialism and its aftermaths. In addition to encountering a postcolonial serial killer, a pterodactyl in present-day India, and a famed boxing match sponsored by an African dictator, we will watch narrative and documentary cinema, look at visual art, and read poetry, fiction, essays, and philosophy, and consider how these media and genres work as forms of thoughtful resistance as well as creative expression. Key authors will include Frantz Fanon, Aimé Césaire, V.S. Naipaul, Albert Memmi, Edward Said, Salman Rushdie, and Mahasweta Devi.

ENGL 117 (F) Introduction to Cultural Theory  (WI)
Crosslistings: ENGL117 / COMP117

Primary Crosslisting

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (Ferris Bueller's Day Off, Silence of the Lambs, The Lord of the Rings) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

ENGL 119 (S) Missed Encounters  (DPE) (WI)

Although we all entertain the dream of reaching directly across boundaries of personal and cultural difference, such exchanges remain inseparable from fantasies of otherness. Those fantasies can be as reductive as a stereotype, but they can also be enormously nuanced and self-revealing--as rich as literature itself. We will study the missed encounter--the encounter in which the element of presupposition and fantasy is vividly apparent--in cultural contexts from the first English accounts of the inhabitants of Virginia to race relations in contemporary African fiction; we will consider such encounters in other contexts as well, including sexual relations, the relations between young and old, even the relation between past and present. But in every case, we will keep our gaze trained on what such events tell us about the nature of fantasy and the place of fiction. The course will consider novels, drama, film, opera, and non-fiction, works such as: Coetzee, Waiting for the Barbarians; Harriot, "Report of the New Found Land of Virginia"; Conrad, Heart of Darkness; Stephen Crane, "The Blue Hotel"; Nadine Gordimer, The Pick Up; Herzog, "Aguirre"; Shakespeare, Merchant of Venice; Puccini, Madame Butterfly; Huang, M. Butterfly; Austen, Pride and Prejudice; Gyasi, Homegoing; and theoretical writing, including texts by the psychoanalytic critic, Jacques Lacan.

ENGL 123 (F)  The Short Story  (WI)
The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, probably by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: seminar; class meetings will be devoted almost entirely to discussion

ENGL 125 (F)  Theater and Politics  (WI)
Crosslistings: ENGL125 / THEA125

Primary Crosslisting
This seminar traces the surprisingly close and controversial relationship between theater and politics from ancient Greek tragedy to modern literature, contemporary film and philosophy. When Plato kicked off political philosophy by outlining his ideal city-state, one of his first moves was to ban theatrical performance on the grounds that play-acting would make men poor governors of themselves. In more recent times, however, the work of artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud have provocatively suggested that theater itself could remedy the ills that Plato thought it caused. In today's age of global spectatorship, writers, artists, and activists continue to ask: who are the real actors and spectators of today's digital world-stage, when governments and other powerful institutions have increasingly sophisticated tools for gathering information about and controlling the on-looking masses, but revolutions are nevertheless organized via social media or triggered by cell phone images? May include works by Plato, Euripides, Melville, Woolf, Rancière, and Claire Denis.

ENGL 126 (F) Black Literature Matters (DPE) (WI)
Crosslistings: AFR126 / AMST126 / ENGL126

Primary Crosslisting
Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts—essays, novels, drama, music, and poetry—by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Class Format: seminar
Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

DPE: This course centers the relationship between black literature and black political movements from the 1920s to the present. Through discussions and short essays, students will develop skills for analyzing the essential role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present. WI: This course requires students to write four formal essays that total at least 20 pages. Students will also submit short in-class writing assignments.

ENGL 129 (F) Twentieth-Century Black Poets (WI)
Crosslistings: AFR129 / ENGL129

Primary Crosslisting
From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask why black poetry has been defined and whether there is a single black poetic tradition or several.

ENGL 130 (F) Dream Work  (WI)
Like art, dreams both require and resist interpretation. In this class, we will consider a wide range of texts, including ancient oneirocritica, medieval dream visions, and psychoanalytic and anthropological case studies, before moving on to modern and contemporary attempts to capture the "underside of consciousness" that dream represents through examples drawn from fiction, drama, poetry and film. Along the way, we'll uncover competing understandings of dream, trace the function of dream as a literary device, and ask what different media uncover and conceal about the dream's form of thinking. This course is designed to immerse you in the strategies of textual interpretation while fostering an openness between creativity and analysis.

ENGL 132 (F) Black Writing To, From, and About Prison  (DPE) (WI)
Crosslistings: WGSS132 / ENGL132

Primary Crosslisting

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. Course texts will include letters from Angela Davis's edited collection If They Come in the Morning, autobiographies like that by Malcolm X, poetry by Ericka Huggins and Huey Newton, as well as critical interventions by scholars like Nikki Jones, WEB Du Bois, and selections from Eric Stanley and Nat Smith's edited collection Captive Genders. We will also look at contemporary groups organizing around the question of prisons and justice including Critical Resistance, BYP100 (Black Youth Project 100), and TGIJP (Transgender Gender Variant Intersex Justice Project).

Class Format: seminar

Requirements/Evaluation: three 4- to 5-page individual papers, one 4- to 5-page hybrid paper, informal writing, letter writing

**ENGL 133 (F) Shakespeare's Uncertain Ends (WI)**

We've come to expect that the heroes of Shakespeare's tragedies learn something. Othello, Lear, Hamlet, Macbeth, and all the others, are supposed to achieve some kind of clarifying self-knowledge as a reward for their terrible suffering. After all, the heroes' flaws are revealed and their delusions are exposed so that they can eventually understand what has happened to them and why. They are meant to learn from their suffering. Or so we'd like to think. But the plays don't always cooperate with our desire for some compensating enlightenment. We don't always come away with a clear sense that Shakespeare's tragic heroes have arrived at a true self-recognition; in other words, they don't always fully grasp how their fate is implicated in their character. Nor are we granted an obvious, edifying moral to compensate for the misery we witness. What, then, do we discover at the end of a Shakespeare tragedy?

This expository writing course aims at developing skills in academic writing by analyzing and interpreting stories meant to make us laugh. "Comedy" is the name we usually give to such stories, but historically comedy has been defined in other ways as well: as leading to a happy ending, often to marriage or some other kind of social harmony; or as being concerned with everyday life, with characters we recognize as amusingly or disturbingly like ourselves. In this course we'll examine how and why these different features have gone together in texts from ancient Greek drama to The Marvelous Mrs. Maisel. Comic laughter can show our potential for solidarity, reconciliation, and forgiveness, and also for indifference, aggression, and exclusion. We'll explore comedy's insights into both possibilities while keeping our focus on how to construct effective arguments and develop them in clear, elegant prose. Authors to be studied may include Aristophanes, Molière, and Wilde as well as classic and contemporary film and television.

ENGL 138 (F) What is a Self? Investigations in Literature, Philosophy, and Psychology  (WI)
The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what, exactly, is a self? Is it the unchanging essence of who we are as individuals (like what Christians call the soul)? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and neuroscientists have argued in their own different idioms more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it. Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and science. Works we may study include: Tim O'Brien's The Things They Carried, Toni Morrison's Beloved, Romantic poetry, and classic philosophical writings on the self by Descartes, Locke, Hume, and Sartre, among others. We'll also study scientific findings about the relationship between the mind and the brain that have come from the fields of psychology and neuroscience, perhaps in conjunction with one of a wave of recently published "neuro-novels" (like Richard Powers' The Echo Maker) that portray the self in terms borrowed from the brain sciences. Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

ENGL 142 (S) Idleness  (WI)
What happens when nothing is happening? Is inactivity the mark of sinful sloth, the mind's freedom to reflect in tranquility, or an act of political resistance? In this course, we will survey the long history of idleness as represented in literary texts, philosophical writing, and other cultural documents like Reconstruction-era vagrancy laws and op-eds about automation and the future of work. We will be interested in the many things that not working has been made to mean, especially as the bearer of human identity and privileges of class, race, and/or gender. Who gets to draw the line between leisure and laziness, and why? We will pursue these questions by reading authors such as Homer, Hesiod, Horace, Augustine, Petrarch, Langland, Marvell, Eliot, Melville, Dickinson, Wilde, Weber, Woolf, McKay, Adorno, Foucault, and Kincaid.

This course is designed to improve your essay-writing skills. We will try to figure out how to write effective college essays in an assortment of disciplines, and get away from the one-size-fits-all template you remember from high school. We will learn how to write introductions that grab you, exposition that thrills you, climaxes that fill you with suspense, and conclusions that feel both surprising and inevitable. We will also read short stories in this class, both as source material for analysis and interpretation, and for story-telling techniques that we can steal. There will be weekly writing assignments, leading up to a twelve- to twenty-page final project.

Crosslistings: ENGL153 / SCST153

Primary Crosslisting
In this expository writing course, we will analyze and argue about how near-human or partly human bodies and intelligences are imagined in fiction and film. When do these bodies, these intelligences, improve the worlds in which they appear, and when do they threaten them? How are they gendered, how are they raced, and why? And what do they want? As we will see, authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in radically different ways. This course focuses on articulating these differences and developing significant claims about them in clear, argumentative prose. We will spend half or more of our class time discussing and practicing writing skills. Texts may include R.U.R., "The Bicentennial Man," Blade Runner, Metropolis (Suite 1: The Chase), and Her.

ENGL 154 (F)  Imagination and Authority  (WI)
A course on the subject of who gets to write about what when it comes to fiction. Among the questions we'll be taking up: What are the outer boundaries of those imaginative acts that should be attempted? The central goal of this course is to teach you how to write a well-argued and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, this is also a literature class, designed as well to prepare you for upper level courses in the English Department.

ENGL 162 (S)  Robots, Puppets, and Dolls  (WI)
Is Pinocchio alive? How about Furby, or the Terminator? This course explores the persistent interest in human simulacra (robots, puppets, and dolls; but also automata, replicants, cyborgs) and what this suggests about our ideas of identity, independence, and free will. We'll look at a wide range of such simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for many real people?
**ENGL 205 (S) The Art of Poetry: The History and Theory of Lyric** (WI)

"If I read a book and it makes my whole body so cold no fire can ever warm me I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only way I know it. Is there any other way?" This excerpt from a letter by Emily Dickinson indicates both the particular pleasures of reading poetry, and also the persistent difficulty of defining poetry as a genre. In this course, we will train our focus on lyric poetry in particular, tracing its long history as well as trends in the theory of lyric. We'll begin by uncovering the roots of lyric in both the Greek tradition and in Anglo-Saxon riddles and spells, and will then consider several key moments in the development of lyric poetry in English, from the Renaissance to the present. We'll read closely the work of such poets as Wyatt, Donne, Blake, Keats, Hopkins, Dickinson, Yeats, Stevens, Hughes, Bishop, Ashbery, and Plath before turning to the contemporary scene. Along the way, we'll examine the trends in criticism responsible for the conflation of lyric and poetry in our time, and will get a strong sense of the current state of lyric theory.

**ENGL 206 (S) We Aren't The World: "Global" Literature in the 20th Century** (DPE) (WI)

An eighteenth-century diplomat once referred to the British colonies as a "vast empire on which the sun never set," and at the time, he was right: the British controlled an enormous portion of the globe for nearly three centuries, from the Caribbean to South Asia, from Oceania to Africa. One outcome of this vast empire was the creation of a rich and diverse literary tradition in the English language--now called Anglophone literature--from far-flung places around the globe. This course will introduce students to select works of global Anglophone literature in the twentieth century, and consider the ways in which writers from around the world have used a variety of literary forms, such as the bildungsroman, national allegory, and testimony, to participate in and reshape conversations about culture, globalization, aesthetics, and politics. Readings will include novels, poetry, short stories, and film by writers including Kipling, Kincaid, Achebe, Rushdie, Conrad, Coetzee, and Roy, among others. The course will expose students to a variety of global English idioms, as well as literary traditions from, or in conversation with, non-Western countries.

Crosslistings: WGSS218 / AFR218 / AMST218 / ENGL218
Primary Crosslisting
Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. “Ungendering,” one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, gender, and sexuality. Throughout this course we will wrestle with the questions: How does the designation “slave” rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels such as Octavia E. Butler’s Kindred, Jewelle Gomez’s Gilda Stories, visual art such as Kerry James Marshall’s “Heirlooms and Accessories” and Glenn Ligon’s “Runaways”, and film such as Jordan Peele’s Get Out.

ENGL 226 (S)  The Irish Literary Revival  (WI)
This course will focus on the Irish Literary Revival of c.1885-1920, during which Irish literature in the English language became firmly established as a canon clearly separate from the English tradition, and writers such as W.B. Yeats and James Joyce achieved international renown. Readings will include drama, poetry, fiction and non-fiction prose by Yeats, J.M. Synge, Joyce, George Moore, George Bernard Shaw, Lady Gregory, Douglas Hyde, Sean O'Casey and others. We will foreground key fault-lines of the period: competing visions of what constituted "authentic" Irish identity; debate over the propriety of writing in English, drawing on British literary traditions, or seeking a non-Irish audience; the work of "self-exiles" such as Shaw and Joyce, versus that of writers who stayed in Ireland; and the long-entrenched political tensions between Catholics and Protestants, and Unionists and Nationalists. Throughout, we will consider the functions and efficacy of literature in promoting cultural or political change. The course will conclude by considering the extraordinary vitality of post-independence and contemporary Irish literary culture, with readings of work by Seamus Heaney, Colm Toibín, Anne Enright and Martin McDonagh, and discussion of recent Irish film. Key considerations here will be the ways traditional notions of Irish Nationalism and national identity have been revised or abandoned under the impact of independence, economic prosperity and globalization, contemporary sexual politics and other forms of change.

ENGL 227 (F)  Elegies  (WI)

This tutorial--intended primarily for sophomores--explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900--including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists--Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

Class Format: tutorial; weekly meetings with instructor, 60-75 minutes

Requirements/Evaluation: active participation in tutorial meetings, students will write a 5- to 6-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

ENGL 229 (S) Contemporary American Fiction  (WI)
Crosslistings: ENGL229 / AMST230

Primary Crosslisting
In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's Giovanni's Room American in the same way as Alice Munro's Dear Life? And is Michelle Tea's Black Wave fiction or something else? Along the way, we'll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the "contemporary" period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer Egan, and Colson Whitehead.

ENGL 230 (F) Introduction to Literary Theory  (WI)
Crosslistings: COMP240 / ENGL230

Primary Crosslisting
This course introduces students to some of the most significant and compelling trends in modern criticism--such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism--in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can Othello be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

Secondary Crosslisting
Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville’s masterpiece Moby-Dick aboard Mystic Seaport's historic whaleship, the Charles W. Morgan, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

ENGL 240 (F) What is a Novel? (WI)
Crosslistings: COMP239 / ENGL240

Primary Crosslisting
What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory—too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick, Edward Said, Leo Bersani, and Franco Moretti.

If love "makes the world go 'round," then literature, love's chronicler, may contain the key for understanding this world-formative passion. In this seminar, we will explore representations of love in works of poetry, drama, prose fiction, and philosophy from antiquity to the present. From the philosophical love extolled in Plato's dramatic dialogue The Symposium to the Christian love of Paul's epistles; the Romantic love of Goethe's Elective Affinities to the modern love of Woolf's To the Lighthouse and beyond, we will see how love, like literature, at once reflects and produces historically significant changes in the ways that human beings relate to one another, to themselves, and to the world in which they live. In addition to the authors already mentioned, readings may include literary works by Virgil, Mary Shelley, Wordsworth, Baldwin, and theoretical works by Freud, Foucault, and Luhmann.

Crosslistings: ENGL249 / THEA249 / WGSS269

Primary Crosslisting
This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's Black Odyssey, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection.
We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include Annie John (1985), Lucy (1990), The Autobiography of My Mother (1996), My Brother (1997), Mr. Potter (2002), and See Now Then (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

The personal essay as a literary form encompasses a wide range of genres including literary journalism, creative nonfiction and the lyric essay. Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography. As we become more mindful of our particular points of view (and of ways to exploit this subjectivity), we will turn the focus outside of ourselves. We will experiment with writing that is extra- rather than introspective. While this is primarily a course in creative writing, we will give much of our time to literary analysis and imitation of exemplary essayists (primarily from the 20th and 21st centuries, and primarily from the U.S.) including Baldwin, Agee, Dillard, McPhee, Eggers, Carson, Delaney, Nelson, Chee, Yuknavitch and Karen Green.

ENGL 258 (S) Poetry and the City (WI)

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui and Rankine. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as Man with a Movie Camera, Rear Window, and Breathless.

This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail—each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems—ways of belonging that are constantly being made and remade? This course is about the specific world—imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world. We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing—science fiction and the detective novel—as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's *Emma*, Charles Dickens's *Bleak House*, Carroll's *Alice in Wonderland*, Italo Calvino's *Invisible Cities*, and Roberto Bolano's *Savage Detectives*.

ENGL 269 (F) Writing Looking: Ekphrasis & Poetics  (WI)
"As is painting, so is poetry," wrote the Roman poet Horace. This comparison would be clarifying, if it weren't so maddeningly opaque. Why, and how, should we compare the verbal to the visual? When poets write about looking, they address not only formal contrasts between the arts but also the fundamental concerns of representation that these contrasts make visible: the eternizing aspirations of art; the relationship between body and soul; the interplay of politics and aesthetics; the power dynamics of gazing at gendered and raced bodies; and the processes of identification and objectification. In this course, we will survey a range of texts that respond to works of visual art and to the act of looking itself. The long history of comparisons between the verbal and the visual constitutes a major strand of literary theory and criticism from antiquity to modernity. Our goal will be to study how such questions of representational rivalry are continuous with questions about how we live with things, and with each other. We will read authors from the historical canon, like Homer, Virgil, Ovid, Spenser, Shakespeare, Keats, Browning, and Melville; and poets from the recent past and present, like W. H. Auden, Frank O'Hara, Thom Gunn, John Ashbery, Adrienne Rich, Jorie Graham, Fred Moten, and Claudia Rankine.

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered "classic" texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

ENGL 343 (S) Whitman and Dickinson in Context (WI)
In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Class Format: seminar

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

**Secondary Crosslisting**

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is
scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental
ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms,
gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioral mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

ENVI 491 (S) The Suburbs (WI)
Crosslistings: HIST491 / ENVI491 / AMST490

Secondary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and
analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

GBST 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Secondary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop
critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WI)
Crosslistings: GEOS221 / ENVI222

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

GERM 118 (F) Animal Subjects (DPE) (WI)
Crosslistings: GERM118 / COMP118

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be
represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

GERM 316 (S) "Wer ist wir?:" Recent Debates over Multiculture in Germany  (WI)
German chancellor Angela Merkel controversially claimed in 2010: “Multikulti ist gescheitert.” (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany's integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the “economic miracle.” How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidids, Rita Süssmuth and others.

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present  (DPE) (WI)
Crosslistings: COMP347 / GERM331

Primary Crosslisting
One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in
Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

HIST 102 (F)  West Africa through Women's Voices  (DPE) (WI)

Crosslistings: HIST102 / WGSS102

Primary Crosslisting

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources--oral tradition, legal records, women's popular songs, Islamic pedagogical verse, personal correspondence and novels--we will consider how women's experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

Class Format: lecture

Primary Crosslisting
Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Primary Crosslisting
The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds,
including political documents, intellectual treatises, films, and short stories.

**HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment (WI)**

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

**HIST 137 (F) Victorian Britain and the Anglo-Afghan Wars (WI)**

Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of Britain's Afghan wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," due process, privileges and immunities, equal protection, and life, liberty or property; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and
experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

HIST 155 (F)  School Wars in U.S. History  (WI)
Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars”? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

HIST 156 (F) Manifestos in American Politics  (WI)

Is there an American style or tradition of writing political manifestos? Given the United States's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will explore that claim. How would we choose to define the very term, "manifesto?" Why have so many American writings been embraced as having the characteristics of a manifesto? We will explore these questions in two ways: first, through close readings and analyses of manifestos at three historical junctures in U.S. history (the Revolutionary era; the 1830s-1850s; and the decades following World War II); and second, through students' original research projects into manifestos of their own choosing.

How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Primary Crosslisting

This writing intensive seminar will focus on slavery in the southern United States—one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects.

Class Format: seminar

Requirements/Evaluation: class discussion critical part of this course; brief weekly writing assignments based on the reading done for that class; the final piece of written work will be a research paper on a subject of student's choosing due at the end of the semester

Extra Info: in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

HIST 165 (F) The Age of McCarthy: American Life in the Shadow of the Cold War (WI)

The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

HIST 167 (F)  Let Freedom Ring? African Americans and Emancipation  (WI)

Crosslistings: AFR167 / HIST167 / AMST167

Primary Crosslisting

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

HIST 259 (S)  New England Environmental History  (WI)

Crosslistings: AMST259 / ENVI259 / HIST259

Secondary Crosslisting

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

HIST 308 (S) The Nile  (DPE) (WI)
Crosslistings: ARAB308 / HIST308

Primary Crosslisting
For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Class Format: seminar
Requirements/Evaluation: short papers and final project/paper
Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

HIST 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece  (WI)
Crosslistings: CLAS323 / HIST323 / LEAD323

Secondary Crosslisting
Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the “tyrants” who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

HIST 352 (F) Americans and the Maritime Environment (WI)
Crosslistings: HIST352 / MAST352

Secondary Crosslisting

This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

HIST 362 (S) Indigenous Women's History (DPE) (WI)
Crosslistings: AMST324 / HIST362 / WGSS324

Secondary Crosslisting

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.

Class Format: seminar

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives. Crosslistings: HIST453 / WGSS453

Primary Crosslisting

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women's groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

HIST 471 (S) Comparative Latina/o Migrations (WI)

Crosslistings: LATS471 / HIST471

Secondary Crosslisting

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence
of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

HIST 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE) (WI)

Crosslistings: JWST480 / GBST480 / ARAB480 / HIST480

Primary Crosslisting

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Distributions: (D2) (DPE) (WI)

Distribution Notes: meets Division 2 requirement if registration is under ARAB DPE: This course challenges students to engage with difference and power in the longstanding Israeli Palestinian conflict though the reading of historical works that have different political motivations. Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing- intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

HIST 481 (S) History of Taiwan (WI)
Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

**HIST 482 (F) The Great War, 1914-1918 (WI)**

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

**HIST 483 (S) Sport and Diplomacy (WI)**
Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Class Format: tutorial

Requirements/Evaluation: students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-page written critique

HIST 491 (S) The Suburbs (WI)

Crosslistings: HIST491 / ENVI491 / AMST490

Primary Crosslisting

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include:  how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also
consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the ’62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Students will develop tools to comprehend the complexities of perspectives in Israel and Palestine, that often have to do with power and difference. Students will gain a better understanding of nationalism, state power, inequality, victimhood, desperation, corruption, and injustice and will hopefully therefore gain tools to seek equitable solutions to the conflict in the future. WI: As a tutorial, this course is writing-intensive while students employ and develop critical tools to interpret conflicting narratives of history and facts. Each week, students will develop their writing by providing constructive criticism of their partner’s papers. They will also learn how to receive criticism and ways to incorporate those suggestions in their future writings. Students will be given the opportunity to substantially revise their work on a regular basis.

JWST 492 (S) Modern Jewish Political Theory (WI)

Crosslistings: JWST492 / PSCI375 / REL330

Secondary Crosslisting

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

LATS 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color (DPE) (WI)

This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that
have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

Primary Crosslisting

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Secondary Crosslisting

This seminar examines connections between Latina/o and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

critical exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Also, a number of the exhibitions studied in the class explicitly take up issues of difference, power, and equity. Through discussion, presentations, and writing assignments students will develop and refine skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice. WI: This course is a Writing Intensive seminar. This means that there will be considerable focus on writing, revision, and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus.

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

LEAD 206 (F) Dangerous Leadership in American Politics (WI)
Crosslistings: PSCI206 / LEAD206

Secondary Crosslisting
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?" A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will
explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the “tyrants” who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

LEAD 360 (F)  The Political Thought of Frantz Fanon  (WI)
Crosslistings: PSCI370 / LEAD360 / PHIL360 / AFR360

Secondary Crosslisting

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Class Format: seminar
Requirements/Evaluation: evaluation will be based upon attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

### LEAD 382 (F) The Great War, 1914-1918 (WI)

**Crosslistings:** LEAD382 / HIST482

**Secondary Crosslisting**

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

**Crosslistings:** MAST231 / ENGL231

**Primary Crosslisting**

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

**Class Format:** small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final paper

**Extra Info:** offered only at Mystic Seaport

MAST 352 (F) Americans and the Maritime Environment  (WI)
Crosslistings: HIST352 / MAST352

Primary Crosslisting
This course examines the impact of the maritime environment (both salt water and fresh) on human affairs from the age of European expansion to the opening decades of the 21st century. Taught using the collections of Mystic Seaport Museum and on several distant field seminars, Americans and the Maritime Environment examines en situ such things as race, gender, revolution, and humankind's changing relationship with the world's oceans. Readings in primary sources and secondary works on the social, economic, and technological implications of maritime activities culminate in an original research paper.

Class Format: lecture/discussion, including coastal and near-shore field trips, 10 days offshore, and an independent, primary source research project

Requirements/Evaluation: two papers, and short presentation, and final exam. Student papers will be a 5-page minimum and a 15-page minimum essay; the 15-page paper will be critiqued in three steps, as a proposal, a draft, and a final paper, with attention to reasoning and style

MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies  (WI)
Crosslistings: ENVI412 / MAST402

Secondary Crosslisting
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: evaluation is based on active participation, discussion leading, several smaller assignments and capstone project

Extra Info: may not be taken on a pass/fail basis; not available for the fifth course option

Prerequisites: ENVI 302 or MAST 351 Maritime Policy or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: limited to senior Environmental Studies majors and concentrators and Maritime Studies concentrators

Expected Class Size: 20

Department Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: (WI)

Distribution Notes: does not meet Division 1, 2, or 3 requirements Each student in this course will complete a semester-long research project
resulting in a final report of 20-25 pages. The project will proceed in phases, with significant pieces of writing due at regular intervals throughout the semester, and with multiple opportunities for revision and peer review. There will also be several short reading response papers during the first half of the semester.

MUS 211 (S) Music, Nationalism, and Popular Culture  (DPE) (WI)

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel, Joao Gilberto, Youssou N'Dour), international forums for the expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Ernest Gellner, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

Class Format: lecture/discussion

Requirements/Evaluation: class participation, two 4- to 6-page papers, Midterm paper, a Final Paper/Project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: upperclass students and Music majors

Distribution Notes: DPE: Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

MUS 261 (S) The Saint and the Countess: Lost Voices of Medieval Women  (WI)

Crosslistings: WGSS261 / MUS261

Primary Crosslisting

Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

Class Format: seminar
MUS 275 (F) Shakespeare through Music (WI)
The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies Romeo and Juliet and Othello, and the comedy Midsummer Night's Dream--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

Class Format: tutorial

MUS 472 (S) Bach's Legacy (WI)
How have composers after Bach engaged with his legacy? This seminar will trace the course of the Classical and early Romantic period "Bach Revival" through Mozart, Beethoven, Mendelssohn, and Clara and Robert Schumann, and explore how he was venerated in the later Romantic era by Brahms and Busoni. Our main focus, however, will be on how composers of the modern era have viewed him and used his music. We will test critical conceptual frameworks offered by David Lowenthal's "The Past is a Foreign Country" and Harold Bloom's "The Anxiety of Influence," using them as lenses through which to view contemporary classical composers' Bach-inspired creations, ranging from Schoenberg and Webern through Sophia Gubaidulina, George Crumb, and David Lang. Finally, we will consider both the musical techniques and meanings of reworkings and quotations of Bach's music in film, jazz and popular music.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several papers totaling at least 20 pages, presentations, and class participation
PHIL 114 (F) Freedom and Society (WI)
Freedom is one of our fundamental values as Americans. It is emphasized in our founding documents, and it occupies a central place in our contemporary political discourse. But do we ask: What is freedom? and Why do we value it? In the first unit of this course, we will consider the relationship between freedom and social order. Do society's laws limit our freedom in order to make us safe? Or do laws somehow enhance or enable our freedom? We will read Thomas Hobbes, John Locke, and Jean-Jacques Rousseau in seeking answers to these questions. We will then turn to some specific social forms in the second unit. We will ask whether they promote or preclude our freedom. We will read Adam Smith and Karl Marx on capitalism, and Simone de Beauvoir on gender.

PHIL 119 (F)  Plato with Footnotes: Ethics and Politics  (WI)
This course addresses a central question in practical philosophy: How should we live? The question has two parts: What is the best life for individuals? And what social and political arrangements make such a life possible? In attempting to answer these questions we also engage related theoretical questions concerning what is real and how we have access to it. We begin with readings from Plato's Republic—a seminal work in the history of philosophy that illustrates the inseparability of theoretical and practical questions and has exerted a powerful influence on nearly every subsequent attempt to answer these questions in the context of the Western philosophical tradition. While reading the Republic, we also consider some of the best of these attempts in the Western philosophical canon ("footnotes on Plato." Possible footnotes include Aristotle, Hobbes, Rousseau, Kant, Mill, Nietzsche, Adorno, and Foucault as well as contemporary philosophers. We will focus especially on questions concerning assumptions (about human nature, justice, and freedom, and the idea of a good life) that underpin democratic theories.

PHIL 121 (F)  Truth, Goodness, and Beauty  (WI)
In our everyday lives, we routinely assume that our clocks can tell us the truth about what time it is, that committing murder is wrong, and that there are people, landscapes, and works of art that are beautiful. But we are also aware that people can and often do disagree about what is true, what is good or right, and what is beautiful. Should the fact of such disagreement lead us to conclude that truth, goodness, and beauty are in some basic sense relative to human beings, perhaps as individuals, perhaps as members of societies or cultures? Some philosophers defend such conclusions, but others argue that truth, goodness, and beauty are "objective," in some important sense, despite the fact that people disagree about them. This introductory course addresses these and related issues.

PHIL 122 (F) Philosophical Approaches to Contemporary Moral Issues (WI)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, capital punishment, the ethics of protest, and torture and terrorism. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

PHIL 126 (S) Paradoxes (WI)
There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand--I don't know what she wants with all this
sand, but I'm starting to worry about that girl--there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong? What we have here is an example of the sorites paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise exam paradox, paradoxes of material constitution, Newcomb's Problem, and the Prisoner's Dilemma.

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

**PHIL 220 (F)  Happiness (WI)**

According to Aristotle the ultimate good is happiness—everything we desire we desire for the sake of happiness. Yet what is it to be happy? Should we value other things (say justice or passionate commitment and curiosity) over happiness? Are happiness and pleasure the same thing? Is
happiness an emotional or mental state or is it a social construct? What do the social and psychological sciences have to teach us about happiness? Philosophy? Is the happy life a life of virtue? Does being virtuous guarantee happiness? How important are honor, money, love, work, friendship and our connections to others to our happiness? In this tutorial we will read from Ancient, modern and contemporary philosophical sources as well several relevant studies in the social sciences and positive psychology movement in order to engage questions concerning happiness.

PHIL 232 (F) Modern Political Thought (WI)

Crosslistings: PHIL232 / PSCI232

Secondary Crosslisting

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

PHIL 235 (S) Morality and Partiality: Loyalty, Friendship, Patriotism (WI)

The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious and political communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people--such as friendships, familial ties, love, patriotism--seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in
having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

In this course, we will examine a number of issues in contemporary metaphysics through a discussion of the nature of kinds. The problem of universals has vexed philosophers at least since the time of Plato. Oscar is a dog and Annie is a dog. Oscar and Annie aren't identical but they have something in common; each of them is a dog, each of them belongs to a single kind and they share the property of being a dog. But what is going on here? We, at least most of us, are happy to say that Oscar and Annie exist. But is there a third entity that we need to countenance: the universal caninity? If we do think that there is such a thing as caninity, what sort of thing is it? If we don't, what accounts for the truth of our judgment that Oscar and Annie have something in common? Scientists often give explanations for the behavior of objects in terms of their properties. What role do properties play in causation, explanation and laws of nature? Finally there are different kinds of kind. Some kinds or properties seem to be pretty natural, e.g. being an electron or a dog. Other kinds seem to be less natural and seem somehow to be socially constructed, e.g. being a work of art, an American or a sausage. But are there really natural kinds? Can we, as Plato put it, "carve nature at the joints", or are all kinds constructed rather than discovered? Furthermore what is involved in the social construction of a kind? Finally, the nature and existence of some kinds is a hotly contested political matter. How should we think about racial kinds or about gender kinds? While we will be concerned to place our discussions of these issues in historical context, most of the reading for the class will consist in articles written by contemporary philosophers.

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical
materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

PHIL 291 (F) Violence: Its Trajectory and Its Causes (WI)

This tutorial focuses on two books by Harvard psychologist Steven Pinker: The Better Angels of our Nature, Why Violence Has Declined (2011) and Enlightenment Now: The Case for Reason, Science, Humanism, and Progress (2018). We focus first on the controversial theses that—despite two world wars and the Holocaust—the twentieth century was not the most violent so far, and that, over the entire course of history, human beings have become decreasingly violent. We then turn to the books' explanations of the factors they identify as leading us to be violent—our "inner demons"—and as curbing our violence—our "better angels," among which the books particularly emphasize reason, science, and humanism.

PHIL 306 (S) The Good Life in Greek and Roman Ethics (WI)

Crosslistings: CLAS306 / PHIL306

Primary Crosslisting

Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to
Aristotle's Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero's On the Ends of Good and Evil.

As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern.

PHIL 337 (F) Justice in Health Care  (WI)

Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice within the health care context. This will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform, which may itself include an analysis of the Affordable Care Act or current legislative proposals; justice in health care rationing, with particular attention to the relationship between rationing criteria and gender, "race," disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in less developed countries.

PHIL 360 (F) The Political Thought of Frantz Fanon  (WI)

Crosslistings: PSCI370 / LEAD360 / PHIL360 / AFR360

Secondary Crosslisting

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth
century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

**PHIL 388 (S) Consciousness (WI)**

The nature of consciousness remains a fundamental mystery of the universe. Our internal, felt experience—what chocolate tastes like to oneself, what it is like to see the color red, or, more broadly, what it is like to have a first person, waking perspective at all—resists explanation in any terms other than the conscious experience itself in spite of centuries of intense effort by philosophers and, more recently, by scientists. As a result, some prominent researchers propose that the existence of consciousness requires a revision of basic physics, while others (seemingly desperately) deny that consciousness exists at all. Those positions remain extreme, but the challenge that consciousness poses is dramatic. It is at the same time the most intimately known fact of our humanity and science's most elusive puzzle. In this tutorial we will read the contemporary literature on consciousness. We will concentrate both on making precise the philosophical problem of consciousness and on understanding the role of the relevant neuroscientific and cognitive research. Tutorial partners will have an opportunity to spend the end of the semester working on a special topic of their choosing including, for instance, consciousness and free will, pain and anesthesia, consciousness and artificial intelligence, or disorders of consciousness.

**Class Format:** tutorial; expect several short lectures by the instructor over the course of the semester where all the tutorial members convene

**PHIL 401 (F) Senior Seminar: Contemporary Moral Psychology and Virtue Ethic (WI)**
The seminar will focus on contemporary philosophical work on practical and intellectual virtues considered indispensable for a good, meaningful human life. We will begin by reading selections from seminal ethical writings by Plato, Aristotle and Hume, then move on to the 20th century revival of eudaimonistic and sentimentalist traditions of virtue ethics. Special stress will be placed on discussing the nature of virtues such as integrity, empathy, self-knowledge, authenticity and emotional maturity, and on articulating realistic psychological and social preconditions for their development.

**PHLH 220 (F) Nutrition in the Developing World  (DPE) (WI)**

Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and over-nutrition beginning as early as in utero can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and program proposal writing. Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America.

**Class Format: seminar**

**Requirements/Evaluation:** six 1-page essays, one situation analysis paper (5-7 pages), one final term paper (10-15 pages), one oral presentation, and active class participation

**Extra Info:** may not be taken on a pass/fail basis; not available for the fifth course option

**Distribution Notes:** DPE: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of nutrition program design and implementation. WI: As a WI course, students will write six 1-page essays (each with an optional rewrite) and a 5- to 7-page, country assessment paper which will help build the specific writing skills necessary for the final 10- to 15-page paper.

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx’s revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant recent contributions relevant to the themes of the course, with applications to current public policy issues, including topics such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; economic nationalism and new trade theory; behavioral economics; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

PSCI 160 (S) Refugees in International Politics (DPE) (WI)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be–how a crisis can be chronic. We investigate who refugees are, in international law and popular understanding; examine international and national laws distinguishing refugees from other categories of migrants, evaluate international organizations’ roles in managing population displacement, and consider refugee camps in theory and example. In whose interest is the prevailing system? Who might change it, and how?

TUT Section: T1 TBA Cheryl Shanks
"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?". A common assumption is that those who do it well—whether in the presidency, the parties, social movements, organizations, or local communities—are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention—as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition’s leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Crosslistings: ENVI235 / PSCI235

Primary Crosslisting
Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet’s health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. PSCI 257 (F) Iran, Islam, and the Last Great Revolution (WI)
Crosslistings: ARAB257 / PSCI257

Primary Crosslisting

The title and inspiration for this course comes from Robin Wright's book The Last Great Revolution. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

Crosslistings: PSCI260 / WGSS260

Secondary Crosslisting
This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice—the concept of power—from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, bell hooks, Catherine MacKinnon, Hannah Arendt, and Gloria E. Anzaldúa.

PSCI 274 (S) Revolutions (WI)

Why do revolutions occur, or perhaps more to the point, why do they fail to occur? When do they end and what do they actually achieve? What, in other words, is so revolutionary about revolutions? This course considers whether and how revolutions differ from social movements, coups d'etats, and armed rebellions by looking at a broad range of uprisings, from the "colored revolutions" and liberating "springs" of recent years to the classical examples of the French, American, Mexican, Chinese, Cuban, and Iranian revolutions, as well as the challenging cases of Haiti and South Africa. This class seeks a subversive politics of its own. There is a certain, shiny allure to revolutions, particularly within political science. In a field committed to the dry study and explanation of social phenomena, revolutions are the sexy exception, the example of politics par excellence. Our goal ought to be to call the allure into question, to ask whether this is a merit of undeserved distinction, particularly given recent developments in Egypt and Syria, as well as the ongoing consequences of revolutions in Russia, Iran, China, many years after the fact, after the last triumphant regiment rolled through capital
streets.

PSCI 291 (S) American Political Events (WI)

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

PSCI 316 (S) Policy Making Process (WI)

Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Africa is the world's second largest and second most-populous continent. This course will explore this diverse region through the lens of human security which takes a broader understanding of security challenges and how they affect different individuals. We will begin by placing security challenges in Africa in the context of a colonial legacy and the changing nature of warfare. We will then examine specific security challenges including governance issues, gender relationships, and resource challenges, through the use of case studies. We will conclude by examining responses by the U.S. and UN to perceived security challenges in Africa.

PSCI 345 (S)  Cosmology and Rulership in Ancient Chinese Political Thought  (WI)

This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese political thought. The purpose is to gain an understanding of a number of different perspectives on politics and leadership, especially Confucianism, Legalism and Taoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: *The Analects, Mencius, the Daodejing, Zhuangzi, and Han Feizi*.

PSCI 348 (S) The Black Radical Tradition (WI)

Crosslistings: LEAD348 / PSCI348 / AFR348

Secondary Crosslisting

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Crosslistings: GBST351 / PSCI351

Primary Crosslisting

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

Geographical fate has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, and mixed feelings about the U.S. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, we consider politics and cultural policies around Mexican national identity in the twentieth century; rapid urbanization, especially in the valley of Mexico; the impact of migration and the rapid development of the northern border region; and the conflict between an emerging civil society and political corruption. After a brief review of recent elections and other political events, we turn to a seminar-style discussion of student research projects.

PSCI 359 (S) The Body as Property  (DPE) (WI)

From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan “my body, my choice”; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Crosslistings: JWST492 / PSCI375 / REL330

Secondary Crosslisting

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish
nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

**PSCI 420 (F) Senior Seminar: The Nuclear Revolution (WI)**

This is a course about the "long shadow" nuclear weapons cast over the international system. In its simplest terms, the class focuses on whether international politics still works essentially the same way in the nuclear age as it did prior to 1945 or if the world has truly experienced a nuclear "revolution" in the word's most basic sense. The course begins with an examination of the key events and theories that led ultimately to the development of the world's first nuclear weapons, including some basic technical concepts and the Manhattan Project. From there, the course covers a number of topics, both conceptual and historical, that bear directly on the question of how nuclear weapons shape international politics. Specifically, the course will cover the U.S. decision to drop the atomic bombs on Hiroshima and Nagasaki, as well as the Japanese response; the body of theory and concepts that underpin fundamental debates over nuclear strategy; the U.S.-Soviet nuclear rivalry; the influence of nuclear weapons in crises; how nuclear weapons shape alliance politics; whether nuclear weapons have political utility; nuclear accidents; nuclear technologies; the problem of nuclear proliferation and the nonproliferation regime; the importance of regional nuclear powers; and contemporary issues like the North Korean and Iranian nuclear questions.

This is a course about remembering. This is a class about how we learn to forget. Above all, it is about power--power close to the bone, power made sublime, how power is made and unmade. This course takes as its central thesis the claim that power, external and objective, is also internal and subjective, invisibly working to shape understandings of who we are even as it performs the visible rituals of bureaucratic regulation typically associated with states and governments. To take this claim one step further, we'll hypothesize that immaterial and invisible forms of domination are power's most effective form even as they are the most difficult to measure and understand. Alternating between case and theory, looking at power both naked and sublime, we will examine the struggle by state and elite actors to shape subjectivities through culture and identity formation in order to secure quiescence and rule. Close attention will be paid to how socializing agents, including schools and educational systems, media and film, families and local communities, shape and reshape efforts to have ordinary citizens internalize what Stuart Hall describes as "the horizon of the taken-for-granted," those ruling ideas and beliefs that consist "of things that go without saying because---they come without saying." The course is set up as a deliberate conversation between the works of Antonio Gramsci, Michel Foucault, Friedrich Nietzsche, and Stuart Hall, as well as their interlocutors and critics, most notably James C. Scott. The trajectory of this literature carries us from domination "thinly" centered in class and mediated by culture, to power completely de-centered from material forms of rule. Though each author is distinct, if heterodox, in his approach to the question of power, Gramsci, Foucault, Nietzsche, and Hall are bound together by the shared belief that power is relationship, between class and culture, culture and identity, state and society.

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

REL 134 (S) Leaving the World Behind: The Literature of Reclusion  (WI)
Crosslistings: ANTH134 / REL134 / COMP134 / CHIN134

Secondary Crosslisting
Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state--to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; and 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

REL 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE) (WI)
Crosslistings: ANTH256 / REL256 / WGSS256 / ASST256

Primary Crosslisting
This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decry harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Crosslistings: AFR208 / REL262 / AMST208

**Secondary Crosslisting**

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

**Secondary Crosslisting**

This course offers a social analysis and historical genealogy of mindfulness meditations from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals, clinics, schools, communities, and even prisons to improve health and other social
outcomes. We explore the scientific evidence including clinical research and other qualitative studies that have shown how mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were first taught the Buddha two millennia ago in monastic and lay settings before turning to the modern studies and applications of mindfulness training. How has research on mindfulness exploded since 2000 and how does this relate to better models of the human brain and behavior? We critically examine the models developed by clinical psychiatry, neuroscience, and biomedicine, including brain imaging technologies like the fMRI, that have improved our understanding of the relationship between the brain, behavior, and emotions. We consider research on mindfulness-based stress reduction (MBSR) within clinical medicine, the rise of the 'kindness curriculum' in schools, and other areas of applied research on mindfulness that have generated a 'science of personal transformation'. Last but not least, we ask how mindfulness has been used to improve the interpersonal skills and training of doctors, teachers, and social workers to help improve social and learning outcomes as well as enhance patient/provider encounters. Students will be expected to engage in a mindfulness practice during the semester.

Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

REL 334 (S) Imagining Joseph  (WI)
Crosslistings: REL334 / COMP334 / ANTH334 / JWST334

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

**RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts** (DPE) (WI)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

**Class Format:** seminar

**Requirements/Evaluation:** three response papers, one short essay on film adaption, one video essay with a student partner

**Extra Info:** not available for the fifth course option

**Prerequisites:** students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

**RLSP 200 (S) Advanced Grammar and Composition through Literature**  (WI)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 105, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

**Class Format:** lecture/discussion

**RLSP 228 (S) Velázquez, Goya, and Picasso**  (WI)

Crosslistings: RLSP228 / ARTH228

**Primary Crosslisting**

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

RLSP 274 (S) Women's Contemporary Cultural Production in Latin America  (DPE) (WI)
Crosslistings: WGSS275 / COMP286 / RLSP274

Primary Crosslisting
In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Ollin, Citlali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucía Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. In addition, we will read theoretical texts on diverse subjects corresponding to each specific cultural product.

Crosslistings: RUSS140 / HIST140

Secondary Crosslisting
For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can
speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of
original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval
Muscovy to the publication of Alexander Solzhenitsyn’s Gulag Archipelago in 1962 and beyond. By semester’s end, students will have developed an
understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked
among contemporaries and present day scholars alike.

Secondary Crosslisting

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very
reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in
rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference
emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the
Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic
studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus
especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE
requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of
the postsocialist condition.

RUSS 331 (S)  The Brothers Karamazov  (WI)
Crosslistings: COMP331 / ENGL371 / RUSS331

Primary Crosslisting
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

In this expository writing course, we will analyze and argue about how near-human or partly human bodies and intelligences are imagined in fiction and film. When do these bodies, these intelligences, improve the worlds in which they appear, and when do they threaten them? How are they gendered, how are they raced, and why? And what do they want? As we will see, authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in radically different ways. This course focuses on articulating these differences and developing significant claims about them in clear, argumentative prose. We will spend half or more of our class time discussing and practicing writing skills. Texts may include *R.U.R.*, "The Bicentennial Man," *Blade Runner*, *Metropolis (Suite 1: The Chase)*, and *Her*.

Topics will range from consideration of “mundane” technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. SCST 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction  (WI)
Crosslistings: SCST213 / AFR213 / WGSS213

Secondary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering;
interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

SOC 329 (F) Work and Future of Capitalism  (WI)
What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as global commodity chains, the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. Through a series of essays, culminating in a final paper, the course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about restructuring (or even overturning) capitalism to allow them to flourish?

Class Format: seminar
Requirements/Evaluation: participation, three utopia essays (3-5 pages), paper workshop, final paper (10-12 pages)
Prerequisites: none
Enrollment Preferences: Anthropology and Sociology majors
Distributions: (D2) (WI)
Distribution Notes: WI: This course requires a series of 3- to 5-page essays that work toward a paper workshop and final paper on the topic of the future of work. Students will use the essays to research "real utopias"—currently existing organizations, workplaces, and policy regimes that challenge traditional capitalist labor relations. This research will inform a workshop and final paper, which will ask them to envision their own organization, workplace, or policy regime.

Secondary Crosslisting

This seminar traces the surprisingly close and controversial relationship between theater and politics from ancient Greek tragedy to modern literature, contemporary film and philosophy. When Plato kicked off political philosophy by outlining his ideal city-state, one of his first moves was to ban theatrical performance on the grounds that play-acting would make men poor governors of themselves. In more recent times, however, the work of artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud have provocatively suggested that theater itself could remedy the ills that Plato thought it caused. In today’s age of global spectatorship, writers, artists, and activists continue to ask: who are the real actors and spectators of today’s digital world-stage, when governments and other powerful institutions have increasingly sophisticated tools for gathering information about and controlling the on-looking masses, but revolutions are nevertheless organized via social media or triggered by cell phone images? May include works by Platon, Euripides, Melville, Woolf, Rancière, and Claire Denis.

Crosslistings: ENGL249 / THEA249 / WGSS269

Secondary Crosslisting

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley’s Black Odyssey, a 21st century production of a black man’s coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O’Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered “classic” texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources--oral tradition, legal records, women's popular songs, Islamic pedagogical verse, personal correspondence and novels--we will consider how women's experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences. Through analyzing diverse representations of girlhood, the course also gives students the critical tools to articulate and interrogate the texts' desire for equity and justice, and to describe what power and agency might mean within these works, as well as in the world. WGSS 113 (F) The Feminist Poetry Movement (DPE) (WI)
Crosslistings: ENGL113 / WGSS113 / AMST113
Secondary Crosslisting

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Secondary Crosslisting
For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment’s meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," "life, liberty or property," the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, and post-mortem gamete procurement. Secondary Crosslisting

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text Kindred (1979), the haunting dystopian novel Parable of the Sower (1994), the popular vampire text Fledgling (2005), and the collection Bloodchild and Other Stories (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book Dawn (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. WGSS 244 (F) Actually Existing Alternative Economies    (DPE) (WI)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha’s inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and ‘she devils’ alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue and intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy—gender, sexuality, race, and class—that Buddhism has attempted to transcend. We begin by considering three women in the Buddha’s life—his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)—as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

**Enrollment Limit:** 19

**Enrollment Preferences:** Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

**Expected Class Size:** 15

**Distributions:** (D2) (DPE) (WI)

**Distribution Notes:** DPE: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality. WI: Class is WI because of its reading responses, in-class writing, a final research paper, and required writing chats with the instructor where we identify patterns, strengths, and weaknesses in student writing.

**Primary Crosslisting**

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice—the concept of power—from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the
way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, bell hooks, Catherine MacKinnon, Hannah Arendt, and Gloria E. Anzaldúa.

Class Format: seminar

Requirements/Evaluation: class facilitation, critical reflections (four 3- to 4-page assignments), review of peer's essay (2-3 pages), essay draft and revision (8-10 pages)

WGSS 261 (S)  The Saint and the Countess: Lost Voices of Medieval Women  (WI)

Crosslistings: WGSS261 / MUS261

Secondary Crosslisting

Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th-century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.

WGSS 269 (F)  Staging Race and Gender  (DPE) (WI)
This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's Black Odyssey, a 21st century production of a black man’s coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O’Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

Secondary Crosslisting

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include Annie John (1985), Lucy (1990), The Autobiography of My Mother (1996), My Brother (1997), Mr. Potter (2002), and See Now Then (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

WGSS 275 (S) Women's Contemporary Cultural Production in Latin America (DPE) (WI)
Crosslistings: WGSS275 / COMP286 / RLSP274

In Latin America, women have been largely displaced as historical subjects and reduced, in many ways, to symbolic figures or icons whose trajectories have been depicted as essential to the construction of diverse social projects within the context of patriarchal nation-states. Each country has formed a specific idea of what a woman is, and can be, through its cultural production, and this constant erasure/objectification has led to a complex problematic when it comes to addressing women as cultural producers. Keeping this in mind, in this course we will explore the concept of "Woman" as a representation and women as cultural producers in contemporary Latin America. We will address intersections of race/ethnic positioning, sexual identity, and social class to explore their role in the reception and understanding of the work of these female artists. Through the analysis of varied cultural production, the syllabus will present an interdisciplinary approach to the contributions of female artists to the cultural representation of race/ethnicity, masculinity, femininity, violence, sexuality, gender identity, nationalism, citizenship, and social movements. We will explore the work of artists such as Sara Castrejón, Nahui Ollin, Citlali Fabián, Amparo Dávila, Alejandra Pizarnik, Rosario Castellanos, Reina Roffé, Ana Tijoux, Lucrecia Martel, Chavela Vargas, Graciela Iturbide, Celia Cruz, Lucía Puenzo, Cecilia Barriga, Cristina Rivera Garza, María Novaro, Cristina Peri Rossi, Maruch Sántiz Gómez, Leonora Carrington, and Maris Bustamante, among others. In addition, we will read theoretical texts on diverse subjects corresponding to each specific cultural product.

WGSS 324 (S) Indigenous Women's History (DPE) (WI)
Crosslistings: AMST324 / HIST362 / WGSS324

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and
artists.

Class Format: seminar

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

Distribution Notes: DPE: In this course, we examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives. WI: With substantial focus on students' development of independent research papers, this course satisfies the WI requirement.

In this class we will investigate a wide variety of Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are the various facets of Latina/o identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Secondary Crosslisting
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

**WGSS 361 (F) Writing about Bodies** (WI)
Crosslistings: ARTH361 / WGSS361 / THEA361 / INTR361

Secondary Crosslisting

The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies--actors, dancers, singers--and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations--art, theatre, literature, anthropology, philosophy--and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person. Among possible readings: Roland Barthes on cultural theory and representation; Claudia Rankine and Robin Coste Lewis on black bodies; Tamar Garb on portraiture; Elaine Scarry on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Marvin Carlson and Terry Castle on haunting; and Bill Brown and Mark Doty on things. In addition to readings, assignments include performances at the '62 Center and works on view at WCMA, as well as selected tapes of live performances as well as films and selected tapes of live performances.

Crosslistings: SCST370 / ANTH371 / WGSS371

Secondary Crosslisting

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Secondary Crosslisting
This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women’s groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

WGSS 468 (S) Practicum in Curating: Visual Art for a Garden  (WI)
Crosslistings: WGSS468 / ARTH468

Secondary Crosslisting
This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby’s new “Living Museum” initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the
concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks. 2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.

**Class Format:** seminar; this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)

**Requirements/Evaluation:** in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments

**Extra Info:** (e.g. letters, queries, reviews), reading and critiques of others' work, in-class presentation of two drafts of the final paper and installation
