Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

Class Format: seminar
Prerequisites: ENVI 101 or 102 suggested

ENGL 352  (F)  Anticolonial Avant Gardes: Literature, Film, Theory
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Theatre majors; Comparative Literature or English majors
Expected Class Size: 8-10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 355 (D1) ENGL 349 (D1) THEA 345 (D1)
Not offered current academic year
Chic, sophisticated, experimental, bohemian, radical: the words we think of when we think of the "avant garde" call to mind the great cities of Europe and America in the early decades of the twentieth century. The usual suspects hail from Paris, London, Moscow, Rome, and New York, but many of them claimed to be mining the "naïve arts" and primitive energies of the "uncivilized societies" in Africa, Asia, and beyond. Can we recover these Others, these understudied but essential artists, as more than unconscious transmitters of unfamiliar cultures, and locate in their work a distinct set of aesthetic and political practices? Can we trace the global vectors of a representational strategy that is not Euro-American but is nevertheless politically and formally radical? Writers, artists, and filmmakers like Jean Toomer, G.V. Desani, Amos Tutuola, Émile Habiby, Jean Genet, Aimé Césaire, Haroun Farocki, Patrick Chamoiseau, Claire Denis, and Antjie Krog will help us locate and consider the explosive diversity of a broader avant garde's experiments with image, sound, and language, as well as how these texts have contributed to and put pressure on more traditionally Western modernisms. In posing a question about the geographical and cultural purview of the Avant Garde around the time of the world wars, this class encourages students to interrogate the transmissibility of aesthetic practice in an age of global upheaval. We will look to writers and artists working in a variety of traditions and, equally importantly, against those traditions, in order to examine how power and resistance inflected the avant grade strains of modernist expression.

**Class Format:** seminar

**Requirements/Evaluation:** class participation; one short 2- to 3-page provocation paper to be revised into a formal 5- to 6-page essay; presentation; final 10- to 12-page research paper

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors

**Expected Class Size:** 25

**ENGL 353 (S) The Brontës**

**Cross-listings:** ENGL 353 WGSS 353

**Primary Cross-listing**

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel—two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte’s best-selling love story, Jane Eyre, to the underrated Anne’s brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily’s singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

**Class Format:** seminar

**Requirements/Evaluation:** discussion, two critical essays and two short creative pieces

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 355 (S) Asexuality and Other Absences

Cross-listings: ENGL 355 WGSS 355

Primary Cross-listing

What is asexuality? The asexual individual is commonly defined as "one who does not experience sexual attraction" but, under examination, this keyword quickly gives way a growing body of meanings, feelings, affiliations, and associations. How might asexuality transform or expand our understandings of sexuality, desire, romance, legibility, health, and violence? This seminar will explore the emergent field of asexuality studies while examining various kinds of sexual and romantic absences in contemporary fiction, film, and new media with particular attention to race and disability. How might asexuality disrupt or reify our conceptions of these terms of embodiment?

Class Format: seminar

Requirements/Evaluation: kindness and generosity; engaged classroom presence; online discussion; annotated bibliography; roundtable discussion; visual object analysis; comic memoir; final presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: AMST 323 ARTH 223 AFR 323 COMP 322 ENGL 356

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's Bayou and Ho Che Anderson's King: A Comic Biography, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Class Format: seminar

Requirements/Evaluation: evaluation will be based upon class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: none

ENGL 357  (S)  Spirits of Rebellion: The L.A. Rebellion Filmmakers
Cross-listings: AFR 351  AMST 359  ENGL 357

Secondary Cross-listing
When Beyoncé unveiled the Lemonade visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's Daughters of the Dust (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned Lemonade and Barry Jenkins' Moonlight (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Class Format: seminar
Requirements/Evaluation: attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

ENGL 358  (S)  The Myth of Venice and its Modern Aftermath
Cross-listings: ENGL 358  GBST 356  COMP 356

Secondary Cross-listing
The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in
the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

**Class Format:** seminar

**Requirements/Evaluation:** mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

**Prerequisites:** familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

**ENGL 359 (S) Unrequited Love**

In unrequited love, one confronts, in a deprivation as primal, almost, as hunger, the limits of one's power to shape the world, discovers the radically alien nature of others' desires and minds. This course will explore the many complexities of that painful mismatch, and the ways its unresolved contradictions—one is at once singular and replaceable, for instance, trapped in a place simultaneously fated and contingent—leads one to large, intractable literary and aesthetic questions (character, psychology, social embeddedness, ethics). Readings will include texts from many historical periods, fields, and genres: philosophy, psychoanalysis, novels, poems, opera, film, for example.

**Class Format:** Seminar

**Requirements/Evaluation:** about 20 pages of writing, distributed as students wish, between midterm and finals. There may also be a few short (less than a page) informal writing responses

**Prerequisites:** none

**Enrollment Limit:** none

Spring 2020

SEM Section: 01 M 7:00 pm - 9:40 pm Kevin Ohi

**ENGL 360 (S) James Joyce's "Ulysses"**

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce's *Ulysses*, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing *Ulysses* as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative
In addition to Joyce's novel, readings will include its epic precursor, Homer's *Odyssey*, as well as critical essays. Students unfamiliar with Joyce's short novel *A Portrait of the Artist as a Young Man*, which introduces characters later followed in *Ulysses*, are urged to read it in advance of the course.

**Class Format:** seminar

**Requirements/Evaluation:** active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

**ENGL 362 (S) Approaches to W. B. Yeats**

We will read the poetry and selected prose and plays of William Butler Yeats. Widely regarded as one of the most influential English-language poets of the twentieth century, Yeats was also a novelist, playwright, critic, autobiographer, and a founder of the Irish national theater. We will consider how his writings were shaped by, and responded to, the literary and political contexts of his time; how he conceived of authorial selfhood, its construction in language, and the functions of literature; and his transactions with his contemporaries (from Wilde to Pound to Auden). Applying a range of critical and theoretical approaches to his writings, and giving particular attention to textual materialism, we will study closely Yeats's compositional process and his habits of repeated revision of published works, as well as his formal techniques.

**Class Format:** tutorial

**Requirements/Evaluation:** 5-7 page papers every other week, assessment of partner's essays, tutorial performance, and one substantial revision

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 363 (S) Literature and Psychoanalysis
Cross-listings: ENGL 363 COMP 340

Secondary Cross-listing
The British psychoanalyst D. W. Winnicott once wrote: “It is a joy to be hidden, and a disaster not to be found.” This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. All readings in English.

Class Format: lecture/discussion
Requirements/Evaluation: active engagement with the material and with each other, plus two 5-7-page papers, one 8-10-page paper, and a symposium presentation

Cross-listings: ENGL 365 COMP 365 THEA 365

Secondary Cross-listing
Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: Endgame, The Caretaker, Rosenkranz and Guildenstern are Dead, Krapp's Last Tape, The Homecoming, No Man's Land, Betrayal, Waiting for Godot, Dogg's Hamlet, The Invention of Love, Arcadia, Rock 'n' Roll, Not I, Rockaby, A Kind of Alaska, Catastrophe, The Real Thing, Indian Ink, Artist Descending a Staircase and One for the Road. Throughout, we will give consideration to these works as both literary and theatrical texts.

Class Format: seminar
Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

ENGL 365 (S) Wonderland(s): Alice in Translation
Cross-listings: COMP 345 ENGL 365 GBST 345
Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?"
The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there is the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight children and adults all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, rewriting, faithfulness, and ethics, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Class Format: seminar with some Friday workshops
Requirements/Evaluation: active and substantive class participation; leading discussion; frequent short writing assignments; final project
Prerequisites: students must have at least three years of college-level second-language instruction, or the equivalent (advanced proficiency), or permission of the instructor
Enrollment Limit: 15
Enrollment Preferences: COMP majors; language majors; language students

ENGL 367 (F) Documentary Fictions
Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing
The first movies excited viewers not by telling stories, but by reproducing the world: a dancer’s billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott’s “Sneeze” (1894) to Josh Oppenheimer’s *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Class Format: seminar
Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Attributes: ENGL Criticism Courses ENGL Literary Histories C FMST Core Courses
ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

ENGL 369 (S) American Poetry

This course is devoted to studying the work of key figures in American poetry, from Whitman and Dickinson to writers of our own moment, attentive to the social, historical, and aesthetic pressures that shape their work. We will read widely in the major poetic traditions, from Modernism, Objectivism, and the Harlem Renaissance through the mid-century work of the New York School, Beats, Black Arts, Confessional, and Language poets. We'll also keep a close eye on the contemporary scene, in part through interactions with visiting poets. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form in the long "American century."

**Class Format:** seminar

**Requirements/Evaluation:** engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper

ENGL 370 (F) Literary and Critical Theory in the Twentieth Century
Secondary Cross-listing

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, new varieties of hermeneutic criticism, and a welter of post-prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? The course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you; prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Class Format: seminar

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: at least one previous literature or theory course

Enrollment Limit: 15

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 370 (D1)

Attributes: AMST Critical and Cultural Theory Electives ENGL Criticism Courses

Not offered current academic year

ENGL 371 (S) The Brothers Karamazov

Cross-listings: ENGL 371 COMP 331 RUSS 331

Secondary Cross-listing

Widely hailed as one of the greatest novels ever written, Dostoevsky's The Brothers Karamazov contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside The Brothers Karamazov, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of The Brothers Karamazov.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: at least one 200-level literature class

Enrollment Limit: 10

Enrollment Preferences: students majoring or considering a major in Russian, Comparative Literature, or English

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 371 (D1) COMP 331 (D1) RUSS 331 (D1)

Attributes: JLST Interdepartmental Electives
ENGL 372  (F)  Taste in the Renaissance

How can we account for taste, and what does taste account for? In the Christian tradition, our knowledge of good and evil comes (as John Milton put it) "from out of the rind of one apple tasted." What other forms of knowledge does our talk about taste lay claim to, and what (and whom) does taste exclude? In this course, we will sample plays, poetry, and prose texts primarily from early modern England that are caught up in the aesthetic and social dramas of taste. Our primary assumption will be that metaphors of taste and consumption naturalize a set of discriminations pertaining to categories like class, gender, and race; and that by unpacking the cultural dynamics of taste and disgust, we can understand literary style's vital connections to its social contexts. We will consider Renaissance authors' appeals to the language of taste to define themselves through and against the authority of classical antiquity, the competition of the cosmopolitan early modern city, the otherness of the New World, and the transcendence of the divine. Our readings will include authors such as Seneca, Petronius, Martial, Montaigne, Jonson, Shakespeare, Nashe, Donne, Herbert, Marvell, Cavendish, and Milton.

Class Format: seminar

Requirements/Evaluation: one 7-page paper; one 12-page paper; short, informal writing assignments; participation in class discussions; one in-class presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 373  (S)  Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Keenan.

Class Format: seminar

Requirements/Evaluation: two or three short papers and a longer final paper of about fifteen pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 374  (S)  Mysticism: Vision, Writing, History  (WS)

Cross-listings: ENGL 374  REL 374  COMP 352

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear
witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

**Class Format:** Tutorial

**Requirements/Evaluation:** biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 10

**Enrollment Preferences:** English majors and those intending to major in English

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 374 (D1)  REL 374 (D2)  COMP 352 (D1)

**Writing Skills Notes:** This course will develop students' writing skills through biweekly 5-page analytical papers and biweekly 2-page response papers. Written feedback will be provided by the instructor and by the tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ENGL Literary Histories A

**ENGL 375 (S) New Asian American, African American, Native American, and Latina/o Writing**

**Cross-listings:** AFR 403  COMP 375  ENGL 375  LATS 403  AMST 403

**Secondary Cross-listing**

Critics reading minority writing often focus on its thematic--i.e., sociological--content. Such literature is usually presumed to be inseparable from the "identity/body of the writer and read as autobiographical, ethnographic, representational, exotic. At the other end of the spectrum, avant-garde writing is seen to concern itself "purely" with formal questions, divorced from the socio-historical (and certainly not sullied by the taint of race). In the critical realm we currently inhabit, in which "race" is opposed to the "avant-garde," an experimental minority writer can indeed seem an oxymoron. In this class we will closely read recent work by Asian American, African American, Native American and Latino/a writers which challenges preconceptions about ethnic literature, avant-garde writing, genre categorization, among other things. The writing done by these mostly young, mostly urban, poets and fiction writers is some of the most exciting being written in the United States today; their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. Reading them forces us to re-think our received notions about literature. Authors to be read include Will Alexander, Sherwin Bitsui, Monica de la Torre, Sesshu Foster, Renee Gladman, Bhanu Kapil, Tan Lin, Tao Lin, Ed Roberson, James Thomas Stevens, Roberto Tejada, and Edwin Torres.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** evaluation will be based on either one 16- to 18-page seminar paper or two shorter papers (one 7-8 pages and one 9-10 pages); short response papers; participation

**Enrollment Limit:** 15

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 376 (F) Landscapes in American Literature

Cross-listings: ENGL 376 STS 377 AMST 376

Primary Cross-listing

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson’s "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

Class Format: seminar

Requirements/Evaluation: discussion participation; five brief response papers (

On Leave Fall/Spring: Associate Professor N. Howe

Mystic Executive Director: T. Van Winkle.

John W. Thoman, Jr., Professor of Chemistry
Claire Ting, Professor of Biology
Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES
Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The major in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING
Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

STUDY AWAY
Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program.

Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have advance approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES
The Environmental Studies major is an eleven course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and the ENVI senior seminar, ENVI 412. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the junior year (or senior year under special circumstances), ENVI 302, Environmental Planning Workshop: Community-Based Experience (offered every fall), and ENVI 412, Environmental Studies Senior Seminar (offered every spring). The remaining component of the core is comprised of three foundational 200-level courses, one from each of three lists of courses (see below), with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven course foundation, each Environmental Studies major devises an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment, environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement under special circumstances.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a “living systems” course (this may be within their specialization cluster or as one of their 200-level foundational courses).

Submitting your Proposed Course Cluster and Plan of Study to the Major
Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study.
The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/Biol 203 (Ecology) or ENVI/Biol 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact Henry Art, Director or Sarah Gardner, Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies
ENVI 102 Introduction to Environmental Science

Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)

Culture/Humanities Foundational (1 course)

ENVI 217 / AMST 216 Landscape, Place and Power
  Taught by: Nicolas Howe
  Catalog details
ENVI 229 / HIST 264(S) Environmental History
  Taught by: Laura Martin
  Catalog details
ENVI 244 T / PHIL 244(S) Environmental Ethics
  Taught by: Julie Pedroni
  Catalog details
ENVI 250 / STS 250(S) Environmental Justice
  Taught by: Laura Martin
  Catalog details
ENVI 259 / AMST 259 / HIST 259 New England Environmental History
  Taught by: Laura Martin
  Catalog details

Environmental Science Foundational (with lab, 1 course)

BIOL 203 / ENVI 203(F) Ecology
  Taught by: Ron Bassar
  Catalog details
GEOS 201 / ENVI 205 Geomorphology
  Taught by: José Constantine
  Catalog details
GEOS 215 / ENVI 215 Climate Changes
  Taught by: Mea Cook
  Catalog details
GEOS 309 / ENVI 209(F) Modern Climate
  Taught by: Alice Bradley
  Catalog details

Social Science/Policy Foundational (1 course)

ECON 213 / ENVI 213(S) Introduction to Environmental and Natural Resource Economics
  Taught by: Sarah Jacobson
  Catalog details
ENVI 270 Environmental Problems: Social Causes, Consequences, and Policy Solutions
  Taught by: Pia Kohler
Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a “methods” course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the “cluster” entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student’s specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student’s proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student’s proposed route through the major must be from a designated list of “living systems” courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Methods (1 course)

This is not intended to be an exhaustive list. Students are expected to make the case for how their designated methods course complements their proposed specialization.
Experiential Required Course (1 course)

In the junior year, or under special circumstances in the senior year, students will take ENVI 302 Environmental Planning Workshop: Community-Based Experience. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban and rural land use planning and environmental design.

Senior Seminar Required Course (1 course)

In the senior year students will take ENVI 412, the senior seminar capstone course. Offered in the spring semester, the Senior Seminar engages students in research on a policy-related environmental problem.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.
ENVI 12 (W) Geology of the National Parks

Cross-listings: ENVI 12 GEOS 12

Secondary Cross-listing

A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text PARKS AND PLATES and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately $150 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 12 GEOS 12

Not offered current academic year

Cross-listings: JLST 13 ENVI 13

Secondary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.
ENVI 15 Bridges over Troubled Waters: Environmental and Public Health Advocacy for Safe Drinking Water

Go behind the headlines to learn about the issues and advocates involved in recent drinking water crises, including lead in Flint, Michigan, Pittsburgh, Pennsylvania, and Newark, New Jersey; chemicals in Hoosick Falls, New York; and crumbling infrastructure in Puerto Rico. This course will introduce students to basic drinking water science, public health data, laws and regulations, types of lawsuits, and advocacy tools involved in today's most pressing drinking water threats. We will discuss issues such as environmental justice, citizen science, corporate responsibility, grassroots organizing, and the role of government and law in addressing public health crises. The course is geared towards interested water consumers and students interested in pursuing careers in environmental or public health advocacy alike. Students will be assigned brief readings drawn from journal and popular news articles and excerpts from nonfiction books, and to view a couple films (either during evening group screenings or independently). In conjunction with this course, and in addition to attending hour-long Friday seminar discussions, students will be expected to attend Friday Log Lunches during Winter Study, which will feature drinking water advocates. Evaluation will be based on class participation and a short (3-5 page) paper and (5-10 minute) presentation on a topic of students' choice involving a drinking water threat or community that is experiencing or has confronted a drinking water threat. Adjunct Instructor Bio: Joya Sonnenfeldt '10 was Williams' first Environmental Policy major. She also holds a law degree and a masters in environmental management from Yale University. She has spent the majority of her career on the litigation team of the Natural Resources Defense Council, largely working to secure safe drinking water. Most recently, she clerked for the Honorable Patty Shwartz on the United States Court of Appeals for the Third Circuit.

ENVI 16 Sensing Place

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible? To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for two-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.
ENVI 17 Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to “care” for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students’ understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

ENVI 25 Tropical Marine Conservation

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of
the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading:

Materials/Lab Fee: cost of books

Attributes: TRVL Winter Study Travel Course

Not offered current academic year

ENVI 31 (W) Senior Research and Thesis: Environmental Studies
To be taken by students registered for Environmental Studies 493-494.

Class Format: thesis
Grading: pass/fail only
Distributions: (D2)

Winter 2020
HON Section: 01    TBA     Henry W. Art

ENVI 99 (W) Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D2)

Winter 2020
IND Section: 01    TBA     Henry W. Art

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Class Format: lecture
Requirements/Evaluation: Lab assignments, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies
Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: lecture/discussion
Requirements/Evaluation: participation, in-class exercises, several shorter writing assignments, and a final exam
Prerequisites: none
Enrollment Limit: 25/section

Expected Class Size: 25/section
Grading: yes pass/fail option, yes fifth course option
Unit Notes: required course for the Environmental Studies major and concentration

ENVI 102 (S) Introduction to Environmental Science
Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week
Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

Distributions: (D3)

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103  ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends are where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 104 (F) Oceanography

Cross-listings: GEOS 104  ENVI 104  MAST 104

Secondary Cross-listing

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.
ENVI 105  (F)  The Co-Evolution of Earth and Life

Cross-listings: GEOS 101  ENVI 105

Secondary Cross-listing
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture; one laboratory per week plus one all-day field trip
Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: underclassmen
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option

Cross-listings:  ENVI 108  PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation:  evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites:  high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit:  20

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How have we arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Class Format: tutorial

Requirements/Evaluation:  each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  first years and sophomores

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)
ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134  ENVI 134

Secondary Cross-listing

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: lectures and debates

Requirements/Evaluation: two hour exams, a short paper, panel preparation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students--in that order

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not count for major credit in Biology; does not satisfy the distribution requirement for the Biology major

Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and areas at higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and impacts of climate change. For each section we focus on differences in power and the inequities of resource distribution. We then debate potential policies to ameliorate these inequities.

Fall 2019

LEC Section: 01  MWF 9:00 am - 9:50 am  Joan Edwards

ENVI 203 (F) Ecology (QFR)

Cross-listings: BIOL 203  ENVI 203

Secondary Cross-listing

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: lecture/laboratory, six hours per week

Requirements/Evaluation: evaluation will be based on problem sets, lab reports, hour exams, and a final exam
ENVI 205  (F)  Geomorphology

Cross-listings:  ENVI 205  GEOS 201

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit:  18

Expected Class Size:  15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 207  (F)  Economic Geology and Earth Resources

Cross-listings:  ENVI 207  GEOS 205

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that
underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

**Class Format:** 2.5 hours lecture per week; one 3 hour lab per week, including some field labs

**Requirements/Evaluation:** one hour exam, a final exam, lab exercises, and a group project

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** sophomores and Geosciences majors

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**ENVI 208 (S) Saharan Imaginations** (DPE)

**Cross-listings:** ENVI 208  ARAB 209  COMP 234

**Secondary Cross-listing**

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies majors and certificate students

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 208 (D1) ARAB 209 (D1) COMP 234 (D1)

**Difference, Power, and Equity Notes:** Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Not offered current academic year
ENVI 209 (F) Modern Climate

Cross-listings: GEOS 309  ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere, and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gases in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: lecture and lab

Requirements/Evaluation: a series of lab projects, a midterm, and a final exam

Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

ENVI 211 (F) Race and the Environment

Cross-listings: ENVI 211  SOC 211  AMST 211  AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214  ECON 214  ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: tutorial, meeting with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

POEC 214 (D2) ECON 214 (D2) ENVI 212 (D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners papers. As the final assignment, each student will revise one of their five papers.

TUT Section: T1    TBA    Ralph M. Bradburd

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213  ENVI 213

Secondary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Class Format: lecture

Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

ENVI 214  (F) Mastering GIS  
Cross-listings: GEOS 214  ENVI 214  
Secondary Cross-listing  
The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.  
Class Format: lecture, three hours per week; laboratory, three hours per week  
Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam  
Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS  
Enrollment Limit: 20  
Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators  
Expected Class Size: 20  
Grading: no pass/fail option, no fifth course option

ENVI 215  (F) Climate Changes  
Cross-listings: ENVI 215  GEOS 215  
Secondary Cross-listing  
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their
causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**ENVI 216 (S) Philosophy of Animals**

**Cross-listings:** ENVI 216 PHIL 216

**Secondary Cross-listing**

Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

**Class Format:** seminar

**Requirements/Evaluation:** four 4- to 5-page papers and one 10- to 12-page final paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

**ENVI 217 (F) Landscape, Place and Power**

**Cross-listings:** ENVI 217 AMST 216

**Primary Cross-listing**

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and
social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Class Format: seminar

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies—including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism—inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Class Format: seminar

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"—economic, ecological, and cultural—forms Latin American responses to environmental degradation.

Not offered current academic year

ENVI 219 (S) Evolution of and on Volcanic Islands

Cross-listings: ENVI 219 GEOS 220

Secondary Cross-listing
Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Class Format: tutorial

Requirements/Evaluation: evaluation based on five written papers.

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students

ENVI 224 (F) The Rise and Fall of Civilizations
Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing
Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: lecture/class discussion
Requirements/Evaluation: midterm, final exam, paper, two quizzes
Prerequisites: none
Enrollment Limit: 30
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

ENVI 228  (F)  Water as a Scarce Resource

Cross-listings:  ENVI 228  ECON 228

Secondary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: tutorial, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers

Requirements/Evaluation: evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites:  ECON 110 or equivalent

Enrollment Limit:  10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size:  10

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 229  (S)  Environmental History

Cross-listings:  ENVI 229  HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: seminar with field trips
ENVI 231  (F)  The African Anthropocene  (DPE)

Cross-listings:  STS 231  AFR 231  ENVI 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, poetry, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Class Format: seminar; non-traditional technologies: web-streams; social media (Tumblr/Twitter)

Requirements/Evaluation: assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) AFR 231 (D2) ENVI 231 (D2)

Difference, Power, and Equity Notes: The African Anthropocene” considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

Fall 2019

ENVI 232  (S)  The Garden in the Ancient World

Cross-listings:  CLAS 235  REL 235  ENVI 232  COMP 235

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for
philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love in the garden. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors

Not offered current academic year

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENV 234 ECON 204

Secondary Cross-listing

The leaders of poor countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in poor countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: lecture/discussion

Requirements/Evaluation: short essays/assignments; exam; final group project, including a 15-page paper

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

LEC Section: 01 M 7:00 pm - 9:40 pm Michael Samson

ENVI 235 (S) Survival and Resistance: Environmental Political Theory

Cross-listings: ENV 235 PSCI 235
Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet’s health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: seminar
Requirements/Evaluation: formal and informal writing assignments and class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years and sophomores

ENVI 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Secondary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod’s Theogony and Ovid’s Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the “rediscovery” of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, “Naive and sentimental poetry,” Nietzsche, Birth of Tragedy, Mallermé, “L’Apres midi d’une faun,” Aby Warburg, and Stoppard’s Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Class Format: seminar
Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: first year graduate students, then second year graduate students, then advanced undergraduates
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

**ENVI 238 (F) Sustainable Economic Growth**

**Cross-listings:** ECON 238 ENVI 238

**Secondary Cross-listing**

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

**Class Format:** lecture

**Requirements/Evaluation:** midterms exams, final exam, problem sets, short writing assignments, class participation

**Prerequisites:** ECON 110 and ECON 120

**Enrollment Limit:** 30

**Enrollment Preferences:** potential or declared social science majors

**ENVI 240 (F) Conservation and Climate Change** (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

**Class Format:** tutorial

**Requirements/Evaluation:** one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

**Prerequisites:** ENVI101 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10
Grading: no pass/fail option, no fifth course option

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science—perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Class Format: Seminar

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

Enrollment Limit: 9

Enrollment Preferences: final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: CLAS 242 ENVI 242 ANTH 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes?
What are the values, stereotypes, and ideals—as well as artistic, literary, and architectural forms—associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside— not just as places, but also as states of mind. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 25

ENVI 243 (F) Reimagining Rivers

Cross-listings: ANTH 243 ENVI 243

Primary Cross-listing

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Class Format: seminar

Requirements/Evaluation: three 5- to 7-page papers and several short response papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This
course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Cross-listings: HIST 265 AMST 245 ENVI 246

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered “soul food”? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Class Format: seminar

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

ENVI 247  (S) Race and Religion in the American West

Cross-listings: LATS 247  REL 247  AMST 247  ENVI 247

Secondary Cross-listing

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

ENVI 248  (F) "Our Response Will Define Our Future": Climate Change Policy Analysis  

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Class Format: tutorial
ENVI 249 (S) Food, Agriculture, and Globalization
This course examines the history and current politics of the international political economy of food with a particular focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We will pay particular attention to the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, free trade and fair trade schemes, labor migration, the antiglobalization and local food movements, and transnational food businesses. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental and food history—there is a definite historical bent to this course—and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and activists. The written assignments will be a series of policy briefs on topics you design in consultation with me. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: seminar

Requirements/Evaluation: two oral presentations with handouts; 2 policy briefing papers (5-7 pages); 2 short concept papers (3-4 pages)

ENVI 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice,
urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Class Format: lecture

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores

ENVI 273  (F)  Politics without Humans?
Cross-listings:  ENVI 273  STS 273  PSCI 273

Secondary Cross-listing
Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants; shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: seminar
Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation
Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students
Prerequisites: none

ENVI 283  (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes
Cross-listings: ENVI 283  PSCI 283

Primary Cross-listing
Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Class Format: seminar
Requirements/Evaluation: participation, several smaller assignments, and a final research project
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19

ENVI 291  (S) Religion and the American Environmental Imagination

Cross-listings: REL 291  SOC 291  ENVI 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Cross-listings: ENVI 301  RLSP 401

Secondary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que soño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

Class Format: This is the senior seminar required for all Class of '20 Spanish majors. Other well-qualified students may enroll and take the course for a grade, up to the enrollment cap
**Requirements/Evaluation**: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

**Prerequisites**: One 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

**Enrollment Limit**: 19

**Enrollment Preferences**: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

**Expected Class Size**: 12

**Grading**: no pass/fail option, no fifth course option

**Distributions**: (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 301 (D1) RLSP 401 (D1)

**ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience**

**Cross-listings**: ENVI 302 AMST 302

**Primary Cross-listing**

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students’ academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team’s planning study.

**Class Format**: seminar discussion/group workshop/project lab

**Requirements/Evaluation**: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

**Prerequisites**: ENVI 101 or permission of instructor; open to juniors and seniors only

**Enrollment Limit**: 16

**Enrollment Preferences**: Environmental Studies majors and concentrators

**Expected Class Size**: 16

**Grading**: no pass/fail option, yes fifth course option

**Unit Notes**: required course for Environmental Studies major and concentration

**Distributions**: (D2)

ENVI 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Class Format: seminar

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 308  (S)  Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Class Format: seminar

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators, public health concentrators, and political science majors

ENVI 312  (F)  Communities and Ecosystems (QFR)

Cross-listings: ENVI 312  BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)
ENVI 313  (S)  Chicago

Cross-listings: AMST 312  ENVI 313  LATS 312

Secondary Cross-listing

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 315  (S)  Ecocriticism

Cross-listings: ENVI 315  ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Class Format: seminar

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam,
ENVI 318 (F) California: Myths, Peoples, Places

Cross-listings: COMP 328 AMST 318 ENVI 318 LATS 318 REL 318

Secondary Cross-listing

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

Class Format: seminar

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Cross-listings: GBST 322 ANTH 322 ENVI 322

Secondary Cross-listing

What is waste? What is filth? Why do titles or categories of sanitation workers--“garbage man,” for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional
Focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: lecture/discussion
Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors and juniors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

ENVI 324 (S) Corals and Sea Level
Cross-listings: MAST 324 ENVI 324 GEOS 324
Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory
Requirements/Evaluation: short papers, labs, participation in discussion, and a research project
Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 329  (S)  Our Planet's Plastic Plight

#stopsucking, #gotopless, #foodinthenude: these rallying calls to #rethinkplastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study international flows of this material, notably following China's decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

Class Format: seminar

Requirements/Evaluation: participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors, Public Health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

---

ENVI 339  (F)  Conservation Biology  (QFR)

Cross-listings: BIOL 329  ENVI 339

Secondary Cross-listing

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from
physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

**Class Format:** lecture and discussion three hours per week; lab three hours per week

**Requirements/Evaluation:** lab assignments, two exams, and discussion participation

**Prerequisites:** BIOL 203, or BIOL 202, or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** biology majors, seniors, and juniors

**Expected Class Size:** 24

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 329 (D3) ENVI 339 (D3)

**Quantitative/Formal Reasoning Notes:** This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

**Attributes:** ENVI Natural World Electives

Not offered current academic year

ENVI 340 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

**Cross-listings:** ENVI 340 GERM 339 COMP 339

**Secondary Cross-listing**

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include Mad Max: Fury Road, Metropolis, Ex-Machina, and episodes of West World and Black Mirror.

**Class Format:** Seminar

**Requirements/Evaluation:** four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

**Writing Skills Notes:** The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very
concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

ENVI 341  (S)  Toxicology and Cancer

Cross-listings:  ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelcus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: lecture, three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 342  (F)  The Nature of Gardens: From Eden to the High Line

The garden, since time immemorial, has been the touchstone for humans' interactions with the environment. The relationships between humans and their environments have been so intimate that the creation and origins mythologies of many cultures are set in the context of a garden or paradise. The garden is the environment in which humans have been created, and reciprocally gardens, by definition are the product of human design and environmental manipulation. This seminar examines the interactions between humans and gardens from the perspectives of creation mythologies, the origins of domestication of plants, the cultural expression and design of gardens, the historical exchange of cultivated plants, and evolution of garden design, and the interface of gardens and human biology. Each student will present a seminar based either on their own major interest, an historical, or garden design perspective. One all-day field trip will be scheduled for sometime during the semester.

Class Format: lecture-discussion classes, student-led seminars and one all-day field trip

Requirements/Evaluation: weekly reaction papers (500 words) to reading assignments, seminar presentation, final paper in lieu of final exam

Prerequisites: an application (e.g., online form, statement of interest)

Enrollment Limit: 16

Enrollment Preferences: senior and junior ENVI majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit
ENVI 346 (S) Environmental Psychology

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Class Format: seminar

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

Expected Class Size: 16

Spring 2020

ENVI 347 (S) Big Game: Adventure, Empire, Ecology (DPE)

Secondary Cross-listing

Big Game: Adventure, Empire, Ecology asks how the era of imperial expansion and the study of "natural history" leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin and Captain Cook's travel journals, and in-class work with archival materials like the Indian Botanical Survey Flora and the photographs of Subhankar Banerjee. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British empire in both the East Indies and India, and ramifications elsewhere in the Dutch, French, Spanish, Portuguese and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

Class Format: seminar

Requirements/Evaluation: presentation, short paper and revision, final research project

Prerequisites: one lower-division literature or related course

Enrollment Limit: 25

Enrollment Preferences: students with related course experience

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 387 (D1) ENGL 347 (D1) ENVI 347 (D1)

Difference, Power, and Equity Notes: This course will consider the relationship between the practice of the natural sciences (including the human sciences) and imperial power. We will read texts both from and against the aesthetics of empire. The DPE contribution will carry the course from philosophy and nature writing to literature and visual art.

Attributes: ENGL Literary Histories B

ENVI 348 (S) Telling Stories about Climate Change: Cultures of the Anthropocene

This environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization that simultaneously involves political economic and cultural processes. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems in the 19th and 20th centuries. We trace the intellectual genealogy of modern climate science, literary engagements with the natural world, and discuss the politics of indigenous knowledge as related to extractivism. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We conclude with fiction and creative responses to climate crisis. How might history inform social movements for climate resilience? How can the arts, theater, and cultural production promote climate action?

Class Format: seminar
Requirements/Evaluation: one short creative writing assignment; two short critical reviews (3-4 pages); final essay (10-15 pages)
Prerequisites: ENVI 101 or instructor permission
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies concentrators and majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: ENVI Humanities, Arts + Social Science Electives

Spring 2020

ENVI 351 (F)(S) Marine Policy

Cross-listings: ENVI 351 PSCI 319 MAST 351
Secondary Cross-listing

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore
Requirements/Evaluation: an independent research paper, a presentation, and a final exam
Extra Info: offered only at Mystic Seaport
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351 (D2) PSCI 319 (D2) MAST 351 (D2)
ENVI 352 (S) After Nature: Writing About Science and The Environment

**Cross-listings:** ENGL 351  ENVI 352

**Primary Cross-listing**

Over the last few decades, the nature of nature has changed and so, by necessity, has nature writing. In this course we will read some of the classic works of nature writing as well as essays and articles by contemporary authors. The emphasis will be on producing our own work. The class will include workshop sessions and group discussions. There will be frequent short exercises and a long final project.

**Class Format:** seminar

**Prerequisites:** ENVI 101 or 102 suggested

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 351 (D1) ENVI 352 (D1)

Not offered current academic year

ENVI 364 (S) Instrumental Methods of Analysis

**Cross-listings:** ENVI 364  CHEM 364

**Secondary Cross-listing**

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

**Class Format:** lecture, three hours per week; laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, and an independent project

**Prerequisites:** CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

**Enrollment Limit:** 9 per lab

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 364 (D3) CHEM 364 (D3)
ENVI 368  (F)  Technology and Modern Society

Cross-listings:  SOC 368  ENVI 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar

Requirements/Evaluation:  two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading:  no pass/fail option,  yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 378  (F)  Nature/Writing

Cross-listings:  ENGL 378  ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion/seminar

Requirements/Evaluation:  two 10-page papers, regular class attendance, and participation in discussions

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  25

Enrollment Preferences:  English majors and Environmental Studies concentrators

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

ENVI 387  (S)  Economics of Climate Change  (QFR)

Cross-listings:  ECON 522  ENVI 387  ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

Class Format: lecture

Requirements/Evaluation:  seven problem sets, midterm, group presentation, final exam

Prerequisites:  ECON 251, familiarity with statistics

Enrollment Limit:  19

Enrollment Preferences:  senior Economic majors and CDE fellows

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option
ENVI 397 (F) Independent Study of Environmental Problems

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Class Format: independent study

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind,
waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, tests, and an independent research project
Prerequisites: GEOS 104, GEOS 210, or permission of instructor
Enrollment Limit: none

ENVI 405 (F) Geochemistry: Understanding Earth’s Environment
Cross-listings: GEOS 405 ENVI 405
Secondary Cross-listing
Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth’s landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they’re linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.
Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies (WS)
Cross-listings: MAST 402  ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit
ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. In addition to 3 short writing assignments, there will be a scaffolded capstone project through which emphasis will be placed on honing writing skills, including for different audiences, and there will be opportunities to revise and resubmit work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENVI 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420  ARTH 420  ENVI 420  EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: travel funds will be provided by a Class of 1963 Sustainability development grant
Distributions: (D1)

ENVI 421 (S) Latinx Ecologies
Cross-listings: ENVI 421 LATS 420
Secondary Cross-listing
An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes' *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Class Format: seminar
Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper
Prerequisites: none
Enrollment Limit: 19

ENVI 422 (F) Ecology of Sustainable Agriculture
A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: seminar; two 75 minute sessions per week
Requirements/Evaluation: writing assignments, seminar presentation, and course participation
Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 423  (F)  Global Change Ecology
Cross-listings: BIOL 413  ENVI 423
Secondary Cross-listing
Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.
Class Format: seminar; Two 75-minute discussion sessions each week
Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL 203 or BIOL 305, or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 445  (F)  World’s End: Literary Ecologies of the Limit
Cross-listings: ENVI 445  ENGL 445
Secondary Cross-listing
Consciousness of the world’s finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha’s Animal’s People. Primary works will include: Shakespeare, As You Like It; Marvell, “Upon Appleton House”; Ovid, Metamorphosis; Browne, Um Burial; Titian, Wordsworth, McCarthy, The Road; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, “Question Concerning Technology”; Latour, “An Inquiry into Modes of Existence”; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.
Class Format: seminar; combination discussion seminar and tutorial conferences

Requirements/Evaluation: one 5-page paper and one final 15-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors; Comparative Studies majors

ENVI 478 (S) Cold War Landscapes

Cross-listings: HIST 478 ENVI 478 AMST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

ENVI 491 (S) The Suburbs

Cross-listings: AMST 490 ENVI 491 HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to
nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Environmental Studies senior research and thesis.

Class Format: independent study

Extra Info: this is part of a full-year thesis (493-494)

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

Spring 2020

HON Section: 01 TBA Henry W. Art

On Leave Fall/Spring: Associate Professor N. Howe

Mystic Executive Director: T. Van Winkle.

MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES

Alex Apotsos, Visiting Lecturer in Geosciences

Henry W. Art, Professor of Biology and Environmental Studies

Sonya Auer, Visiting Assistant Professor of Biology

Lois M. Banta, Professor of Biology

Ron D. Bassar, Assistant Professor of Biology

Ben Benedict, Lecturer in Art

Mary K. Bercaw-Edwards, Associate Professor for Literature of The Sea, Williams-Mystic Maritime Studies Program

Julie C. Blackwood, Assistant Professor of Mathematics

Roger E. Bolton, Professor of Economics, Emeritus

Alice C. Bradley, Assistant Professor of Geosciences

Cory E. Campbell, instructional Technology Specialist

Gregory Casey, Assistant Professor of Economics

David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Phoebe A. Cohen, Associate Professor of Geosciences

Jose E.A. Constantine, Assistant Professor of Geosciences

Mea S. Cook, Associate Professor of Geosciences

David P. Dethier, Professor of Geosciences, Emeritus

Joan Edwards, Professor of Biology

Laura Ephraim, Associate Professor of Political Science

Michael Evans, Assistant Director of The Zilkha Center for Environmental initiatives

Jessica M. Fisher, Assistant Professor of English

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish

Sarah S. Gardner, Lecturer in Environmental Studies
ENIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
Apply scientific methods to collect environmental data and evaluate environmental quality;

Understand the political and economic factors that inform, enable, and constrain environmental policy;

Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;

Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;

Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program.

Students considering either a semester or year away who intend to concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study away as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their concentration, but must have advance approval in writing from the Chair of Environmental Studies.

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a seven course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 302 and ENVI 412, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts, and Social Sciences; and Natural World.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Core Courses (4 courses)

ENVI 101(F) Nature and Society: An Introduction to Environmental Studies
   Taught by: Pia Kohler, Laura Martin, April Merleaux
   Catalog details
ENVI 102(S) Introduction to Environmental Science
   Taught by: Sonya Auer, Mea Cook
   Catalog details
ENVI 302 / AMST 302(F) Environmental Planning Workshop: Community-Based Experience
   Taught by: Henry Art, Sarah Gardner
   Catalog details
ENVI 412 / MAST 402(S) Senior Seminar: Perspectives on Environmental Studies
   Taught by: Pia Kohler
   Catalog details
Distribution Courses (3 courses, 1 from each group)

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major (it is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Sarah Gardner, Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

Environmental Policy Electives

**ECON 213 / ENVI 213(S)** Introduction to Environmental and Natural Resource Economics

Taught by: Sarah Jacobson
Catalog details

**ECON 214 T / ENVI 212 / POEC 214(S)** The Economics and Ethics of CO2 Offsets

Taught by: Ralph Bradburd
Catalog details

**ECON 238 / ENVI 238(F)** Sustainable Economic Growth

Taught by: Gregory Casey
Catalog details

**ECON 387 / ENVI 387 / ECON 522** Economics of Climate Change

Taught by: Matthew Gibson
Catalog details

**ECON 465** Pollution and the Labor Market

Taught by: Matthew Gibson
Catalog details

**ENGL 331(F)** Romantic Culture

Taught by: Peter Murphy
Catalog details

**ENVI 244 T / PHIL 244(S)** Environmental Ethics

Taught by: Julie Pedroni
Catalog details

**ENVI 248 T(F)** "Our Response Will Define Our Future": Climate Change Policy Analysis

Taught by: Pia Kohler
Catalog details

**ENVI 249(S)** Food, Agriculture, and Globalization

Taught by: April Merleaux
Catalog details

**ENVI 270** Environmental Problems: Social Causes, Consequences, and Policy Solutions

Taught by: Pia Kohler
Catalog details

**ENVI 283 / PSCI 283** Dirty Politics: Regulating Hazardous Chemicals and Wastes

Taught by: Pia Kohler
Catalog details

**ENVI 307 / PSCI 317(F)** Environmental Law

Taught by: David Cassuto
Catalog details

**ENVI 308** Science and Politics in Environmental Decision Making

Taught by: Pia Kohler
Catalog details

**ENVI 328 / PSCI 328** Global Environmental Politics

Taught by: Pia Kohler
Catalog details

**ENVI 329** Our Planet's Plastic Plight

Taught by: Pia Kohler
Catalog details

**MAST 351 / PSCI 319 / ENVI 351(F, S)** Marine Policy

Taught by: Catherine Robinson Hall
Catalog details

**PSCI 229** Global Political Economy

Taught by: Darel Paul
Catalog details

**PSCI 273 / ENVI 273 / STS 273(F)** Politics without Humans?

Taught by: Laura Ephraim
Catalog details

---

**Humanities, Arts, and Social Sciences Electives**
AFR 211 / AMST 211 / ENVI 211 / SOC 211 Race and the Environment
Taught by: James Manigault-Bryant
Catalog details

ANTH 214 / ENVI 224 The Rise and Fall of Civilizations
Taught by: Antonia Foias
Catalog details

ANTH 322 / ENVI 322 / GBST 322 Trash
Taught by: Joel Lee
Catalog details

ARTS 329 (F) Architectural Design II
Taught by: Ben Benedict
Catalog details

ENGL 312 / ENVI 315 (S) Ecocriticism
Taught by: Jessica Fisher
Catalog details

ENGL 331 (F) Romantic Culture
Taught by: Peter Murphy
Catalog details

ENGL 378 / ENVI 378 (F) Nature/Writing
Taught by: David Smith
Catalog details

ENVI 110 T The Anthropocene: Nature and Culture in the Human Age
Taught by: Nicolas Howe
Catalog details

ENVI 217 / AMST 216 Landscape, Place and Power
Taught by: Nicolas Howe
Catalog details

ENVI 229 / HIST 264 (S) Environmental History
Taught by: Laura Martin

   Taught by: Phoebe Cohen

GEOS 102 (S) An Unfinished Planet
   Taught by: Bud Wobus

GEOS 103 / ENVI 103 Global Warming and Environmental Change
   Taught by: José Constantine

GEOS 104 / ENVI 104 / MAST 104 (F) Oceanography
   Taught by: Mea Cook
INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies concentration requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES CONCENTRATION

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program.
Environmental Studies concentrators may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be approved by the department chair and the Chair of Environmental Studies by the end of the junior year. Students applying to conduct an honors thesis in Environmental Studies will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

ENVI 12  (W)  Geology of the National Parks

Cross-listings:  ENVI 12  GEOS 12

Secondary Cross-listing

A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text PARKS AND PLATES and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation:  final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately $150 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 12 GEOS 12

Not offered current academic year

Cross-listings: JLST 13  ENVI 13

Secondary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law’s early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as
to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble Mine, Alaska, permitting controversy

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: seniors first, then juniors, etc

Grading: pass/fail only

Materials/Lab Fee: approximately $100 for books

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

JLST 13 (D2) ENVI 13 (D2)

Not offered current academic year

ENVI 15  Bridges over Troubled Waters: Environmental and Public Health Advocacy for Safe Drinking Water

Go behind the headlines to learn about the issues and advocates involved in recent drinking water crises, including lead in Flint, Michigan, Pittsburgh, Pennsylvania, and Newark, New Jersey; chemicals in Hoosick Falls, New York; and crumbling infrastructure in Puerto Rico. This course will introduce students to basic drinking water science, public health data, laws and regulations, types of lawsuits, and advocacy tools involved in today's most pressing drinking water threats. We will discuss issues such as environmental justice, citizen science, corporate responsibility, grassroots organizing, and the role of government and law in addressing public health crises. The course is geared towards interested water consumers and students interested in pursuing careers in environmental or public health advocacy alike. Students will be assigned brief readings drawn from journal and popular news articles and excerpts from nonfiction books, and to view a couple films (either during evening group screenings or independently). In conjunction with this course, and in addition to attending hour-long Friday seminar discussions, students will be expected to attend Friday Log Lunches during Winter Study, which will feature drinking water advocates. Evaluation will be based on class participation and a short (3-5 page) paper and (5-10 minute) presentation on a topic of students' choice involving a drinking water threat or community that is experiencing or has confronted a drinking water threat. Adjunct Instructor Bio: Joya Sonnenfeldt '10 was Williams' first Environmental Policy major. She also holds a law degree and a masters in environmental management from Yale University. She has spent the majority of her career on the litigation team of the Natural Resources Defense Council, largely working to secure safe drinking water. Most recently, she clerked for the Honorable Patty Shwartz on the United States Court of Appeals for the Third Circuit.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Preferences: brief statement of interest

Grading:

Materials/Lab Fee: approximately $50 for books

Not offered current academic year

ENVI 16  Sensing Place

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of
landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how these histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible?

To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for two-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: more senior students will be given priority
Grading:
Materials/Lab Fee: $50
Not offered current academic year

ENVI 17 Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students’ understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: seniority; students may be asked to send the instructor and email explaining why they are interested in the course
Grading:
Materials/Lab Fee: approximately $80 for books
Not offered current academic year

ENVI 25 Tropical Marine Conservation

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity ‘hotspots’; they are home to an astounding variety of marine
organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems.

Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor
Enrollment Limit: 8
Enrollment Preferences: preference will be given to juniors and seniors
Grading:
Materials/Lab Fee: cost of books
Attributes: TRVL Winter Study Travel Course
Not offered current academic year

ENVI 31 (W) Senior Research and Thesis: Environmental Studies
To be taken by students registered for Environmental Studies 493-494.
Class Format: thesis
Grading: pass/fail only
Distributions: (D2)

Winter 2020
HON Section: 01 TBA Henry W. Art

ENVI 99 (W) Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: (D2)

Winter 2020

ENVI 100 (S) Introduction to Weather and Climate
Cross-listings: GEOS 100 ENVI 100
Secondary Cross-listing
How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and
extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

**Class Format:** lecture

**Requirements/Evaluation:** Lab assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 40

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

**ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies**

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** participation, in-class exercises, several shorter writing assignments, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 25/section

**Expected Class Size:** 25/section

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** required course for the Environmental Studies major and concentration

**ENVI 102 (S) Introduction to Environmental Science**

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere,
Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week

Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

Distributions: (D3)

**ENVI 103 (F) Global Warming and Environmental Change**

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends are where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

ENVI 104  (F)  Oceanography

Cross-listings:  GEOS 104  ENVI 104  MAST 104

Secondary Cross-listing
The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students, MAST concentrators

ENVI 105  (F)  The Co-Evolution of Earth and Life

Cross-listings:  GEOS 101  ENVI 105

Secondary Cross-listing
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture; one laboratory per week plus one all-day field trip

Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: underclassmen

ENVI 108 (F) Energy Science and Technology (QFR)
Cross-listings: ENVI 108 PHYS 108
Secondary Cross-listing
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: lecture twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: evaluation will be based on weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 20
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age
In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How have we arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.
Class Format: tutorial

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: lectures and debates

Requirements/Evaluation: two hour exams, a short paper, panel preparation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students—in that order

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not count for major credit in Biology; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and areas at higher latitudes. For each section we focus on difference—different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and impacts of climate change. For each section we focus on differences in power and the inequities of resource distribution. We then debate potential policies to ameliorate these inequities.

ENVI 205 (F)  Geomorphology

Cross-listings: ENVI 205  GEOS 201

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: ENVI 207 GEOS 205

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging-all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth’s resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week; one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

ENVI 208 (S) Saharan Imaginations (DPE)

Cross-listings: ENVI 208 ARAB 209 COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Class Format: seminar

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 208 (D1) ARAB 209 (D1) COMP 234 (D1)

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Not offered current academic year

ENVI 209 (F) Modern Climate

Cross-listings: GEOS 309 ENVI 209

Secondary Cross-listing

What will happen to the Earth’s climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: lecture and lab

Requirements/Evaluation: a series of lab projects, a midterm, and a final exam

Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

ENVI 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address “environmental racism,” like Robert Bullard’s Dumping in Dixie and David Pellow’s Garbage Wars. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions—like literature, film, and music—to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: lecture/discussion
ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: tutorial, meeting with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5-7 page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

POEC 214 (D2) ECON 214 (D2) ENVI 212 (D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners papers. As the final assignment, each student will revise one of their five papers.

ENVI 214 (F) Mastering GIS
Cross-listings: GEOS 214 ENVI 214
Secondary Cross-listing
The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.
Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam
Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS
Enrollment Limit: 20
Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

ENVI 215  (F)  Climate Changes
Cross-listings: ENVI 215  GEOS 215

Secondary Cross-listing
In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture, three hours per week; one three-hour lab per week
Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data
Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Geosciences majors

ENVI 216  (S)  Philosophy of Animals
Cross-listings: ENVI 216  PHIL 216

Secondary Cross-listing
Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Class Format: seminar
Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 216 (D2) PHIL 216 (D2)
ENVI 217  (F)  Landscape, Place and Power

Cross-listings:  ENVI 217  AMST 216

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Class Format: seminar

Requirements/Evaluation:  three 5- to 7-page essays; several shorter writing assignments

Prerequisites:  ENVI 101 or permission of instructor

Enrollment Limit:  19

Expected Class Size:  15

Grading:  no pass/fail option,  yes fifth course option

ENVI 218  (S)  "Ecologismo": Literature, Culture and the Environment in Latin America  (DPE)

Cross-listings:  RLSP 214  ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies—including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism—inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Class Format: seminar

Requirements/Evaluation:  brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites:  RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit:  19

Enrollment Preferences:  Spanish and Environmental Studies majors

Expected Class Size:  12

Grading:  no pass/fail option,  yes fifth course option

ENVI 219 (S) Evolution of and on Volcanic Islands

Cross-listings: ENVI 219 GEOS 220

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Class Format: tutorial

Requirements/Evaluation: evaluation based on five written papers.

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220 BIOL 220

Secondary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: lecture and both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department
ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: in what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: "There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system,
leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students

Expected Class Size: 10

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: lecture/class discussion

Requirements/Evaluation: midterm, final exam, paper, two quizzes

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 225 (F) Sustainable Food & Agriculture

Cross-listings: BIOL 225 ENVI 225

Secondary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field
experience will take place on a local farm.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation will be based on writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

**Prerequisites:** BIOL 102 or ENVI 102

**Enrollment Limit:** 10

**Enrollment Preferences:** open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**ENVI 228 (F) Water as a Scarce Resource**

**Cross-listings:** ENVI 228 ECON 228

**Secondary Cross-listing**

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

**Class Format:** tutorial, meeting with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers

**Requirements/Evaluation:** evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

**Prerequisites:** ECON 110 or equivalent

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ENVI 229 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** seminar with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Environmental Studies majors and concentrators; History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**ENVI 231 (F) The African Anthropocene** (DPE)

**Cross-listings:** STS 231  AFR 231  ENVI 231

**Primary Cross-listing**

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, poetry, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

**Class Format:** seminar; non-traditional technologies: web-streams; social media (Tumblr/Twitter)

**Requirements/Evaluation:** assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators; juniors and seniors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231 (D2) AFR 231 (D2) ENVI 231 (D2)

**Difference, Power, and Equity Notes:** The African Anthropocene” considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.
ENVI 232  (S)  The Garden in the Ancient World

Cross-listings: CLAS 235  REL 235  ENVI 232  COMP 235

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors

ENVI 234  (S)  Economics of Developing Countries  (DPE)

Cross-listings: ENVI 234  ECON 204

Secondary Cross-listing

The leaders of poor countries almost universally proclaim “economic development” to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in poor countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: lecture/discussion

Requirements/Evaluation: short essays/assignments; exam; final group project, including a 15-page paper

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the
course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 235  (S)  Survival and Resistance: Environmental Political Theory
Cross-listings: ENVI 235  PSCI 235

Secondary Cross-listing
Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have “rights”? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet’s health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory’s traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Class Format: seminar
Requirements/Evaluation: formal and informal writing assignments and class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years and sophomores

ENVI 236  (S)  Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern
Cross-listings: ARTH 236  ENVI 236  CLAS 236

Secondary Cross-listing
Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod’s Theogony and Ovid’s Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the “rediscovery” of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, “Naive and sentimental poetry,” Nietzsche, Birth of Tragedy, Mallermé, “L’Après midi d’une faun,”Aby Warburg, and Stoppard’s Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.
Class Format: seminar

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ECON 238 ENVI 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: lecture

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, class participation

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a
scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Class Format: tutorial

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit (WS)

ENVI 241  (S)  The Politics of Waste

Cross-listings: ENVI 241  PSCI 242

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Class Format: Seminar

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

Enrollment Limit: 9

Enrollment Preferences: final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

Expected Class Size: 9

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PSCI Political Theory Courses
ENVI 242 (S)  The Country and the City in the Classical World

**Cross-listings:** CLAS 242  ENVI 242  ANTH 242

**Secondary Cross-listing**

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

**Class Format:** seminar

**Requirements/Evaluation:** informed participation, two short papers (2-5 pages), final paper (8-10 pages)

**Prerequisites:** none, although prior knowledge of the ancient world will be useful

**Enrollment Limit:** 25

**Enrollment Preferences:** declared and intending majors in Classics and Environmental Studies

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

ENVI 243 (F)  Reimagining Rivers

**Cross-listings:** ANTH 243  ENVI 243

**Primary Cross-listing**

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

**Class Format:** seminar

**Requirements/Evaluation:** three 5- to 7-page papers and several short response papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)
ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Class Format: tutorial

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Class Format: seminar
Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option

ENVI 247 (S) Race and Religion in the American West
Cross-listings: LATS 247 REL 247 AMST 247 ENVI 247
Secondary Cross-listing
From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacrosapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion
Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

ENVI 248 (F) "Our Response Will Define Our Future": Climate Change Policy Analysis (WS)

In 2014, UN Secretary General Ban Ki-moon declared: climate change is “the defining issue of our age. It is defining our present. Our response will define our future.” In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies’ effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Class Format: tutorial

Requirements/Evaluation: students alternate in preparing 5- to 7-page papers and 2-page responses (five papers and five responses in total), final paper building on one of the 5- to 7-page papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: 1. second-year students 2. Environmental studies concentrators and majors 3. first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a particular focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We will pay particular attention to the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, free trade and fair trade schemes, labor migration, the antiglobalization and local food movements, and transnational food businesses. We will pay particular attention to theories about how producers and consumers are connected to one another through the political economy of food. The reading assignments are drawn from the fields of environmental and food history—there is a definite historical bent to this course—and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and activists. The written assignments will be a series of policy briefs on topics you design in consultation with me. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: seminar

Requirements/Evaluation: two oral presentations with handouts; 2 policy briefing papers (5-7 pages); 2 short concept papers (3-4 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 250  (S)  Environmental Justice  (DPE)
Cross-listings:  ENVI 250  STS 250

Primary Cross-listing

How are local and global environmental problems distributed unequally according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar
Requirements/Evaluation: several short essays, final essay
Prerequisites:  ENVI101 or permission of the instructor
Enrollment Limit:  12
Enrollment Preferences:  Environmental Studies concentrators
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option

ENVI 255  (F)  Environmental Observation
Cross-listings:  GEOS 255  ENVI 255
Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Class Format: lecture
Requirements/Evaluation: labs, quizzes, and a final project
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit:  20
Enrollment Preferences:  sophomores
Expected Class Size:  10
ENVI 259  (S) New England Environmental History  (WS)

Cross-listings:  ENVI 259  AMST 259  HIST 259

Primary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research.

Class Format: seminar
Requirements/Evaluation: several short essays, final project
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 15

ENVI 270  (S) Environmental Problems: Social Causes, Consequences, and Policy Solutions

This course will provide an overview of the social causes and consequences of environmental problems, especially within the US context. Special attention will be paid to the variety of actors that shape environmental outcomes, including legislators, administrators, the science community, civil society and the private sector. We will examine different proposed solutions to environmental problems and models of environmental policy-making, including at the local, state and federal level. This course will focus on several case studies, including air and water pollution, agricultural runoff, climate change and endangered species protection.

Class Format: seminar
Requirements/Evaluation: participation, midterm, several smaller assignments, and a final project analyzing an environmental policy
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators, and Political Science majors
Expected Class Size: 15
ENVI 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Class Format: seminar

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Extra Info: please note that this is an introductory-level course with no prerequisites. First year students and those with no background in political theory are welcome, as are more experienced students

ENVI 283 (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes

Cross-listings: ENVI 283 PSCI 283

Primary Cross-listing

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

ENV 291 (S) Religion and the American Environmental Imagination
Cross-listings: REL 291 SOC 291 ENVI 291
Primary Cross-listing
This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?
Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators

ENV 301 (F) Climate Changes (Latin America): Aesthetics, Politics, Science
Cross-listings: ENVI 301 RLSP 401
Secondary Cross-listing
In her 2007 book, In Catastrophic Times: Resisting the Coming Barbarism, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming—the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta
Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: La vorágine (José Eustasio Rivera, Colombia, 1924); Distancia de rescate (Samanta Schweblin, Argentina, 2014); Lo que soñó Sebastián (Rodrigo Rey Rosa, Guatemala, 1995); Serras da desordem (Andrea Tonacci, Brazil, 2006); Boi Neón (Gabriel Mascaro, Brazil, 2015); American Fork (George Handley, USA, 2018).

**Class Format:** This is the senior seminar required for all Class of '20 Spanish majors. Other well-qualified students may enroll and take the course for a grade, up to the enrollment cap

**Requirements/Evaluation:** rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

**Prerequisites:** One 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

**Cross-listings:** ENVI 302 AMST 302

**Primary Cross-listing**

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

**Class Format:** seminar discussion/group workshop/project lab

**Requirements/Evaluation:** short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

**Prerequisites:** ENVI 101 or permission of instructor; open to juniors and seniors only

**Enrollment Limit:** 16

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** required course for Environmental Studies major and concentration

ENVI 303  (S)  Cultures of Climate Change

Cross-listings: ENVI 303  SOC 303

Primary Cross-listing
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Class Format: seminar
Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments
Prerequisites: ENVI 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Primary Cross-listing
We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Class Format: seminar
ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Class Format: seminar

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment: 19

Enrollment Preferences: environmental studies majors and concentrators, public health concentrators, and political science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper
ENVI 312  (S)  Chicago
Cross-listings:  AMST 312  ENVI 313  LATS 312

Secondary Cross-listing
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221
Expected Class Size: 15

Cross-listings:  ENVI 315  ENGL 312

Secondary Cross-listing
How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate
change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

**Class Format:** seminar

**Requirements/Evaluation:** engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** majors in English or Environmental Studies

**Expected Class Size:** 25

**Cross-listings:** COMP 328  AMST 318  ENVI 318  LATS 318  REL 318

**Secondary Cross-listing**

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as “sprawling multicultural dystopia,” and California as “west of the west.”

**Class Format:** seminar

**Requirements/Evaluation:** this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

**Prerequisites:** none

**Enrollment Limit:** 19

What is waste? What is filth? Why do titles or categories of sanitation workers--“garbage man,” for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus – work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: lecture/discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 329  (S)  Our Planet's Plastic Plight

#stopsucking, #gotopless, #foodinthenude: these rallying calls to #rethinkplastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study international flows of this material, notably following China's decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

Class Format:  seminar

Requirements/Evaluation:  participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

Prerequisites:  ENVI 101 or permission of instructor

Enrollment Limit:  15

Enrollment Preferences:  Environmental Studies majors, Public Health concentrators

ENVI 339 (F) Conservation Biology (QFR)

Cross-listings: BIOL 329  ENVI 339

Secondary Cross-listing

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week; lab three hours per week

Requirements/Evaluation: lab assignments, two exams, and discussion participation

Prerequisites: BIOL 203, or BIOL 202, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 329 (D3) ENVI 339 (D3)

Quantative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

ENVI 340 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

Cross-listings: ENVI 340 GERM 339 COMP 339

Secondary Cross-listing

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include Mad Max: Fury Road, Metropolis, Ex-Machina, and episodes of West World and Black Mirror.

Class Format: Seminar

Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

ENVI 341 (S) Toxicology and Cancer
Cross-listings: ENVI 341 CHEM 341
Secondary Cross-listing
What is a poison and what makes it poisonous? Paracelcus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?
This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.
Class Format: lecture, three times per week
Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam
Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

ENVI 342 (F) The Nature of Gardens: From Eden to the High Line
The garden, since time immemorial, has been the touchstone for humans’ interactions with the environment. The relationships between humans and their environments have been so intimate that the creation and origins mythologies of many cultures are set in the context of a garden or paradise. The garden is the environment in which humans have been created, and reciprocally gardens, by definition are the product of human design and environmental manipulation. This seminar examines the interactions between humans and gardens from the perspectives of creation mythologies, the origins of domestication of plants, the cultural expression and design of gardens, the historical exchange of cultivated plants, and evolution of garden design, and the interface of gardens and human biology. Each student will present a seminar based either on their own major interest, an historical, or garden design perspective. One all-day field trip will be scheduled for sometime during the semester.
Class Format: lecture-discussion classes, student-led seminars and one all-day field trip
Requirements/Evaluation: weekly reaction papers (500 words) to reading assignments, seminar presentation, final paper in lieu of final exam
**Prerequisites:** an application (e.g., online form, statement of interest)

**Enrollment Limit:** 16

**Enrollment Preferences:** senior and junior ENVI majors and concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**ENVI 346 (S) Environmental Psychology**

**Cross-listings:** ENVI 346 PSYC 346

**Secondary Cross-listing**  
This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

**Class Format:** seminar

**Requirements/Evaluation:** a series of papers, two essay exams, written and oral reports of research

**Prerequisites:** PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Environmental Studies concentrators

**ENVI 347 (S) Big Game: Adventure, Empire, Ecology (DPE)**

**Cross-listings:** COMP 387 ENGL 347 ENVI 347

**Secondary Cross-listing**  
Big Game: Adventure, Empire, Ecology asks how the era of imperial expansion and the study of “natural history” leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin and Captain Cook’s travel journals, and in-class work with archival materials like the Indian Botanical Survey Flora and the photographs of Subhankar Banerjee. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British empire in both the East Indies and India, and ramifies elsewhere in the Dutch, French, Spanish, Portuguese and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

**Class Format:** seminar
ENVI 348 (S) Telling Stories about Climate Change: Cultures of the Anthropocene

This environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization that simultaneously involves political economic and cultural processes. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems in the 19th and 20th centuries. We trace the intellectual genealogy of modern climate science, literary engagements with the natural world, and discuss the politics of indigenous knowledge as related to extractivism. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We conclude with fiction and creative responses to climate crisis. How might history inform social movements for climate resilience? How can the arts, theater, and cultural production promote climate action?

Class Format: seminar

Requirements/Evaluation: one short creative writing assignment; two short critical reviews (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

ENVI 368  (F)  Technology and Modern Society

Cross-listings: SOC 368  ENVI 368

Secondary Cross-listing
With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar
Requirements/Evaluation: two short papers, a midterm exam, and a final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 376  (S)  Economics of Environmental Behavior  (QFR)

Cross-listings: ENVI 376  ECON 477

Secondary Cross-listing
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Class Format: seminar
Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using
Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

ENVI 378 (F) Nature/Writing

Cross-listings: ENGL 378 ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion/seminar

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ENVI 387 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.
Class Format: lecture
Requirements/Evaluation: seven problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 19
Enrollment Preferences: senior Economic majors and CDE fellows
Expected Class Size: 19

ENVI 397 (F) Independent Study of Environmental Problems
Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Class Format: independent study
Prerequisites: approval by the Chair of Environmental Studies
Grading: yes pass/fail option, yes fifth course option
Distributions: No divisional credit

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)
Cross-listings: MAST 404 ENVI 404 GEOS 404
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: GEOS 104, GEOS 210, or permission of instructor

Enrollment Limit: none

ENVI 405 (F) Geochemistry: Understanding Earth’s Environment

Cross-listings: GEOS 405 ENVI 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth’s landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they’re linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab

Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies  (WS)

Cross-listings: MAST 402 ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Class Format: seminar

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. In addition to 3 short writing assignments, there will be a scaffolded capstone project through which emphasis will be placed on honing writing skills, including for different audiences, and there will be opportunities to revise and resubmit work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENVI 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420 ARTH 420 ENVI 420 EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as “minimizing the negative impact of built form on the surrounding landscape,” and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.
Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: travel funds will be provided by a Class of 1963 Sustainability development grant

Distributions: (D1)

ENVI 421 (S) Latinx Ecologies

Cross-listings: ENVI 421 LATS 420

Secondary Cross-listing

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes' *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Class Format: seminar

Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper

Prerequisites: none

ENVI 422 (F) Ecology of Sustainable Agriculture

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the
relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

**Class Format:** seminar; two 75 minute sessions per week

**Requirements/Evaluation:** writing assignments, seminar presentation, and course participation

**Prerequisites:** BIOL/ENVI 203 or BIOL 302 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**ENVI 423 (F) Global Change Ecology**

**Cross-listings:** BIOL 413 ENVI 423

**Secondary Cross-listing**

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

**Class Format:** seminar; Two 75-minute discussion sessions each week

**Requirements/Evaluation:** class participation and several short papers

**Prerequisites:** BIOL 203 or BIOL 305, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Biology majors who have not yet taken a 400-level course

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3)

**Cross-listings:** ENVI 445 ENGL 445

**Secondary Cross-listing**
Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's Animal's People. Primary works will include: Shakespeare, As You Like It; Marvell, "Upon Appleton House"; Ovid, Metamorphosis; Browne, Urn Burial; Titian, Wordsworth, McCarthy, The Road; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, Slow Violence; Agamben, The Time that Remains; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, After Fukushima; Derrida, The animal that therefore I am and Beast and the Sovereign.

Class Format: seminar; combination discussion seminar and tutorial conferences

Requirements/Evaluation: one 5-page paper and one final 15-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors; Comparative Studies majors

ENVI 478 (S) Cold War Landscapes

Cross-listings: HIST 478 ENVI 478 AMST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Spring 2020
ENVI 491 (S) The Suburbs

Cross-listings: AMST 490  ENVI 491  HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to...
maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

INDEPENDENT STUDY AND WINTER STUDY  
In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:  
MAST 397, 398 Independent Study: Maritime Studies  
MAST 493-W31-494 Senior Thesis: Maritime Studies  
Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES  
Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum,
field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 31 (W) Sen Thesis: Maritime Studies
Maritime Studies senior thesis.
Class Format: independent study
Grading: pass/fail only

Winter 2020
HON Section: 01

MAST 99 (W) Independent Study: Maritime Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: No divisional credit

Winter 2020
IND Section: 01

MAST 104 (F) Oceanography
Cross-listings: GEOS 104 ENVI 104 MAST 104
Secondary Cross-listing
The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.
Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first-year and sophomore students, MAST concentrators
Expected Class Size: 48
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

**MAST 211  (F)(S)  Oceanographic Processes**

**Cross-listings:** MAST 211  GEOS 210

**Primary Cross-listing**

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

**Class Format:** lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Extra Info:** offered only at Mystic Seaport

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**MAST 231  (F)(S)  Literature of the Sea**

**Cross-listings:** MAST 231  ENGL 231

**Primary Cross-listing**

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students’ emerging knowledge of maritime history and marine science.

**Class Format:** small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final paper

**Extra Info:** offered only at Mystic Seaport

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

**Attributes:** AMST Arts in Context Electives  ENVI Humanities, Arts + Social Science Electives
MAST 311 (F)(S) Marine Ecology

Cross-listings: BIOL 231 MAST 311

Primary Cross-listing

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: yes pass/fail option, yes fifth course option

MAST 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352  MAST 352

Primary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs.
From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies (WS)**

**Cross-listings:** MAST 402  ENVI 412

**Secondary Cross-listing**
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

**Class Format:** seminar

**Requirements/Evaluation:** active participation, discussion leading, several smaller assignments and multi-step capstone project

**Prerequisites:** declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

**Enrollment Limit:** 14

**Enrollment Preferences:** Environmental Studies majors and concentrators, Maritime Studies concentrators

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** required course for students wishing to complete the Maritime Studies concentration

**Distributions:** No divisional credit  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. In addition to 3 short writing assignments, there will be a scaffolded capstone project through which emphasis will be placed on honing writing skills, including for different audiences, and there will be opportunities to revise and resubmit work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

MAST 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change.

Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Spring 2020
HON Section: 01
Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action website.

EXPE Experiential Education Courses

AFR 212  (S)  Jazz Theory and Improvisation I

Cross-listings: MUS 104  AFR 212

Secondary Cross-listing

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: evaluation will be based on weekly assignments, e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Extra Info: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 10 (W) Special Collections: Curating Rare Books and Manuscripts for Our Times

What makes a library’s books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing?

This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable -- and not just in terms of their cost.

We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and make a day trip to visit a bookseller and curators at a peer institution. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections.

Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography. Adjunct Instructor Bio: Lisa Conathan is Head of Special Collections at Williams College, overseeing the Chapin Library of Rare Books and the College Archives. She holds a BA in Linguistics from Dartmouth College, a PhD in Linguistics from the University of California, Berkeley, and a Master of Library Science from the University of Maryland.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: random, if course is oversubscribed

Grading: pass/fail only

Materials/Lab Fee: $0

Attributes: EXPE Experiential Education Courses

AMST 101 (F)(S) America: the Nation and Its Discontents (DPE) (WS)

America has always named something more than a geographical place; being "American" has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power,
citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Class Format: seminar

Requirements/Evaluation: total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course satisfies the writing skills requirement in its close attention to the processes of writing, argumentation, and revision; and in the total number of pages of writing produced. Total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities.

Not offered current academic year

AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for
building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

**Cross-listings:** ENGL 237 ARTH 237 SOC 236 AMST 236

**Secondary Cross-listing**

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

**Class Format:** seminar

**Requirements/Evaluation:** full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

**AMST 238 (F) Zen and the Art of American Literature**

**Cross-listings:** AMST 238 COMP 238 REL 228 ENGL 239

**Secondary Cross-listing**

In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice.
(from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: lecture

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

AMST 241  (F)  Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240  THEA 241  SOC 240  AMST 241  LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

On September 20, 2018, Maria—a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico.

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

Expected Class Size: 8

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research.

Class Format: seminar

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

AMST 302  (F)  Environmental Planning Workshop: Community-Based Experience

Cross-listings:  ENVI 302  AMST 302

Secondary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab

Requirements/Evaluation:  short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites:  ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit:  16

Enrollment Preferences:  Environmental Studies majors and concentrators

Expected Class Size:  16

Grading:  no pass/fail option,  yes fifth course option

AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: AMST 331 COMP 330 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafrcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none

SEM Section: 01 R 1:10 pm - 3:50 pm Deborah A. Brothers

ANSO 205 (S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation? What is the relationship between empirical data and the generation of social theory? How does the social organization of social research affect one's inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods, in which the students will design and undertake their own pilot field projects.

Class Format: seminar

Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: EVST Methods Courses EXPE Experiential Education Courses

Spring 2020
ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Class Format: seminar

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: EXPE Experiential Education Courses

ANTH 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE)

Cross-listings: WGSS 371 ANTH 371 STS 370

Primary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)
**Difference, Power, and Equity Notes:** This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

**ARTH 274 (S) Chinese Calligraphy: Theory and Practice**

**Cross-listings:** ARTH 274  ARTS 274  ASST 274

**Primary Cross-listing**

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos “beauty” + graphe “writing”). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

**Class Format:** lecture/studio instruction

**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening
**Prerequisites:** none

**Enrollment Limit:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course can count toward the Art History or Studio major

**Materials/Lab Fee:** TBD lab fee charged to term bill

Spring 2020

LEC Section: 01  W 1:10 pm - 3:50 pm  Ju-Yu Scarlett Jang

**ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects.

Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

**ARTS 13 (W) Creative Portraiture in the Darkroom**

**Cross-listings:** ARTS 13 RLFR 13

**Secondary Cross-listing**

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer; they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des
Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

ARTS 385 (S) The Sculptural Costume and It’s Performance Potential

Cross-listings: ARTS 385 THEA 385

Primary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica’s Parangole, and Nick Cave’s sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $125

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: EXPE Experiential Education Courses

Not offered current academic year

ASST 274 (S) Chinese Calligraphy: Theory and Practice

Cross-listings: ARTH 274 ARTS 274 ASST 274

Secondary Cross-listing

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos “beauty” + graphe “writing”). This course can be taken as an Art History, a Studio Art, or Asian Studies course.
**Class Format:** lecture/studio instruction

**Requirements/Evaluation:** weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

**Prerequisites:** none

**Enrollment Limit:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course can count toward the Art History or Studio major

**Materials/Lab Fee:** TBD lab fee charged to term bill

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

- ARTH 274 (D1)
- ARTS 274 (D1)
- ASST 274 (D1)

**Attributes:** EXPE Experiential Education Courses, GBST East Asian Studies Electives

**LEC Section:** 01    W 1:10 pm - 3:50 pm    Ju-Yu Scarlett Jang

**BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES**

BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week, students will learn to set up fish matings and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd-grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, Associate Director at The Center for Learning in Action, is a former third-grade teacher. She currently coordinates Williams Elementary Outreach, where Williams students teach and mentor K-6 students at area elementary schools. Adjunct Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

**Requirements/Evaluation:** final project or presentation; review of pre- and post-survey assessments

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** preference to seniors

**Grading:** pass/fail only

**Materials/Lab Fee:** $0

**Attributes:** EXPE Experiential Education Courses

---

**BIOL 13 (W) Introduction to Animal Tracking**

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Students will be expected to visit their study spots everyday for a minimum of 1 hour of tracking journaling and data collection. The course will meet twice a week for 4-5 hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4:00. Students are expected to have appropriate outdoor gear for winter. Adjunct Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education
centers in Massachusetts and New York as well as his own independent programs.

**Requirements/Evaluation:** attendance, participation, a final presentation of their study sites, maps and journals, a field test and a 3-page research paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** preference given to seniors

**Grading:** pass/fail only

**Materials/Lab Fee:** approximately $75 for books

**Attributes:** EXPE Experiential Education Courses

Not offered current academic year

**BIOL 211 (S) Paleobiology**

**Cross-listings:** BIOL 211 GEOS 212

**Secondary Cross-listing**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture/laboratory; field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** lab assignments, short quizzes and writing assignments, and a final exam

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomore and junior GEOS majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**BIOL 220 (S) Field Botany and Plant Natural History**

**Cross-listings:** ENVI 220 BIOL 220

**Primary Cross-listing**

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant
families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: lecture and both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

BIOL 302 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302
An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, and finding your happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions—an initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques. Books required for this class may include: *Integrative Nutrition: Feed Your Hunger For Health and Happiness* by Joshua Rosenthal, *Food Rules: An Eaters Manual* by Michael Pollan, *Mind Over Medicine: Scientific Proof That You Can Heal Yourself* by Lissa Rankin, and *The Mindful Twenty-Something* by Holly Rogers. Adjunct Instructor Bio: Nicole Anagnos is health coach and director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Kl¿ Organic Beauty. She also holds a master's degree in education.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: email statement of interest to nicole@zentreewellness.com

Grading: pass/fail only

Materials/Lab Fee: approximately $75 for books
CHEM 16 (W) Glass and Glassblowing

Cross-listings: ARTS 16 CHEM 16

Primary Cross-listing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.

Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: $75

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 16 (D3) CHEM 16 (D3)

Attributes: EXPE Experiential Education Courses

CHEM 22 (W) Introduction to Research in Environmental Analytical Chemistry

Representative projects include: Analysis of sediment and fish samples collected from the Hoosic River drainage basin for contamination with polychlorinated biphenyls (PCBs) and soil, plant and aquatic animal samples from southern Vermont for perfluorooctanoic acid (PFOA) and its chemical relatives. This project focuses on techniques used in environmental analysis including trace-level determination of persistent organic pollutants by GC-MS and/or LC-MS.

Class Format: mornings

Requirements/Evaluation: a 10-page written report

Prerequisites: variable, depending on the project (at least CHEM 151) and permission of the Dept. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors and with the Department Chair

Enrollment Limit: POI

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Not offered current academic year

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese.

All readings in English with some examples in Chinese.
Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project
Prerequisites: CHIN 101 or permission of instructor
Enrollment Limit: 19
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: EXPE Experiential Education Courses Linguistics

Not offered current academic year

COMP 238 (F) Zen and the Art of American Literature
Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Secondary Cross-listing
In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: lecture
Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay
Prerequisites: any literature course at Williams or permission of the instructor
Enrollment Limit: 45
Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years
Expected Class Size: 35
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City
Cross-listings: AMST 331 COMP 330 THEA 330

Secondary Cross-listing
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature,
music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Class Format: seminar

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

COMP 338 (F) The Culture of Carnival

Cross-listings: THEA 335 COMP 338

Secondary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Class Format: studio

Requirements/Evaluation: students will be evaluated on regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 12 (W) Geometry in Stained Glass
Geometry allows us to observe mathematical objects from different viewpoints. It may be approached both visually and algebraically. Building geometric structures in the real world allows us to view them from different angles and sometimes, gain new insights. In this class students will work together to design and build a pentagonal tiling in stained glass. There are only fifteen types of convex pentagons that can tile a two-dimensional surface, and the secret behind their assembly lies in the relationship between edges and angles. We will use Euclidian geometry, drafting by hand using only straightedge and compass, to figure out angles and dimensions. Students will then learn how to cut precise shapes in colored glass, wrap them in copper and solder together into a stained glass window. Students will also work individually or in small groups on projects of their own choosing. These may be two- or three-dimensional geometric figures, including those on non-Euclidian surfaces. In past years a student of organic chemistry modeled cyclohexane and a physics major, the spectral emissions of a star. In 2018 the class built a mirrored glass quasicrystal. Students interested in mathematical tiling patterns, networks, cellular or molecular assembly, crystallography, or simply curious about geometry would be welcome in this class. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up the exhibition and tiding the lab at the end of Winter Study. Please note: we will not be painting images on glass.

Adjunct Instructor Bio: Debora Coombs has an MFA from the Royal College of Art in London, England. Her stained glass work is commissioned and exhibited internationally. Debora’s interest in tiling patterns and mathematical projection led to a collaboration with Williams Professor of Computer Science Duane Bailey. Their sculptures are currently on exhibit in the SCHOW science library.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none, however, self-motivated students with good hand skills, patience and an interest in mathematics will find the course most rewarding

Enrollment Limit: 10

Enrollment Preferences: preference to seniors

Grading: pass/fail only

Materials/Lab Fee: $285

Attributes: EXPE Experiential Education Courses

Not offered current academic year

CSCI 28 (W) Solution Design and Product Management

Cross-listings: CSCI 28 ECON 28

Secondary Cross-listing

Google Glass, Blackberry Storm, and the initial Obamacare Website represent just a few of the many failures that litter the IT project graveyard: 40 to 60 percent of large technology projects fail. All too often, the cause has little to do with the quality of technical engineering. More often, companies choose the wrong problem to solve or the wrong way to solve it. Google failed to account for the Google Glass price tag and privacy concerns. Blackberry failed to fully appreciate the touchscreen revolution. The Obamacare website failed to address management issues. The underlying conflict is that engineers and IT teams like to be told what to build, but customers often do not know what they want or how to express it. Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams to develop their own product management toolkit and deploy it towards solving a technology problem of each team’s own choosing. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it

Grading: pass/fail only

Materials/Lab Fee: $10 and approximately $30 for books

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 28 ECON 28
ECON 13 (W) Tools for Moving from Good Ideas to Successful Businesses and Organizations

This course is based on a proven methodology for turning business ideas into successful businesses and organizations. Student working in teams generate business ideas and then work to develop a business model to take the ideas to start and beyond. The course provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business and engineering schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research results. The class is appropriate to all students regardless of major who want to learn how to build a startup that succeeds. The class meets for two and a half hours three days a week for short lectures, discussions, group work, and presentations. There will also be outside guests who have created successful businesses. Outside of class, students will be required to watch online lectures and videos, read handouts, and do short papers. The primary work is to work in teams to research their business idea using the Lean Launchpad approach. Teams will develop a research plan, interview potential customers, analyze the results, and revise their business models. The teams will meet with the instructor regularly. Each team will develop weekly progress presentations as well as a final presentation. They will also develop a team video showing lessons the team learned during the course. Students will also be required to provide a three-page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has worked with startup businesses for over 35 years. He has trained over 2,000 people who have started over 1,200 businesses and provided continuous support to a number of these businesses over the course of years. He has taught Winter Study nine times and is available to work with students throughout the year after the course ends.

Requirements/Evaluation: final project or presentation; contributions in class and as part of their teams based on presentations, papers and class participation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors first if the course is over-enrolled

Grading: pass/fail only

Materials/Lab Fee: approximately $40 for books

ECON 23 (W) Investing

ECON 23 is designed to provide students with a window into the world of endowment and investment management and is taught by members of the Williams College Investment Office. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, fixed income, and impact investing. Students will gain practical skills in excel and will have the opportunity to learn from experienced investment professionals through guest lectures. Through presentations, discussions, readings, and project work, students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored, from the perspective of an endowment. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors. To apply, please send an email with your resume and a short personal statement discussing why you are interested in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019. Adjunct Instructor Bio: Abigail Wattley serves as a Managing Director in the Williams College Investment Office where she oversees investments in hedge funds and credit. Ms. Wattley holds a B.A. from Williams College and an MBA from Harvard Business School.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: mail your resume and a short personal statement discussing your interest in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019; if overenrolled: phone interviews

Grading: pass/fail only

Materials/Lab Fee: approximately $40 for books

Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams to develop their own product management toolkit and deploy it towards solving a technology problem of each team's own choosing. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it

Grading: pass/fail only

Materials/Lab Fee: $10 and approximately $30 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113  (F) The Feminist Poetry Movement  (DPE) (WS)

Cross-listings: ENGL 113  AMST 113  WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit exhibit
with 7-page paper), presentations

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: none
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

ENGL 239 (F)  Zen and the Art of American Literature

Cross-listings: AMST 238  COMP 238  REL 228  ENGL 239

Primary Cross-listing

In 1844, the Transcendentalist magazine, The Dial, published an excerpt from the Lotus Sutra, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like Middle Passage, A Tale for the Time Being, and Lincoln in the Bardo. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: lecture

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

Grading:  yes pass/fail option,  yes fifth course option

ENGL 25 (W)  Journalism Today

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Requirements/Evaluation: final project or presentation
Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, with a preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)

Grading: pass/fail only

ENVI 100  (S)  Introduction to Weather and Climate

Cross-listings: GEOS 100  ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Class Format: lecture

Requirements/Evaluation: Lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

ENVI 102  (S)  Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week

Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation

Prerequisites: none
Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

ENVI 103  (F)  Global Warming and Environmental Change

Cross-listings: GEOS 103  ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

**ENVI 105  (F)  The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101  ENVI 105

**Secondary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture; one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** underclassmen

**Fall 2019**
**ENVI 205  (F) Geomorphology**

**Cross-listings:** ENVI 205  GEOS 201

**Secondary Cross-listing**

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

**Class Format:** lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

**Requirements/Evaluation:** evaluation will be based on two hour exams, a project, lab work and class participation

**Prerequisites:** any 100-level GEOS course or permission of instructor

**Enrollment Limit:** 18

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**ENVI 214  (F) Mastering GIS**

**Cross-listings:** GEOS 214  ENVI 214

**Secondary Cross-listing**

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

**Prerequisites:** at least one introductory course in BIOL, ENVI, or GEOS

**Enrollment Limit:** 20

**Enrollment Preferences:** Geosciences and Biology majors and Environmental Studies majors and concentrators

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
**ENVI 215 (F) Climate Changes**

**Cross-listings:** ENVI 215 GEOS 215

**Secondary Cross-listing**

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

ENVI 220  (D3) INTRODUCTION TO URBAN STUDIES: SHAPING AND LIVING THE CITY

Cross-listings: AMST 221  ENVI 220  LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

ENVI 222  (F) EXAMINING INCONVENIENT TRUTHS: CLIMATE SCIENCE MEETS U.S. SENATE POLITICS

Cross-listings: GEOS 221  ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: “There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information...
towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: seminar with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Cross-listings: ENVI 250  STS 250

Primary Cross-listing
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar
Requirements/Evaluation: several short essays, final essay
Prerequisites: ENVI101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: Environmental Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 250 (D2) STS 250 (D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

Spring 2020

ENVI 255  (F)  Environmental Observation

Cross-listings: GEOS 255  ENVI 255

Secondary Cross-listing
To study the environment, we need to observe and measure it. We collect data—numbers that represent system states—and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Class Format: lecture
Requirements/Evaluation: labs, quizzes, and a final project
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit: 20
Enrollment Preferences: sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ENVI 259 (S) New England Environmental History (WS)

Cross-listings: ENVI 259 AMST 259 HIST 259

Primary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Class Format: seminar
Requirements/Evaluation: several short essays, final project
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Primary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design
and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: seminar discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: lecture/laboratory, six hours a week

Requirements/Evaluation: evaluation will be based on lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 312 (D3) BIOL 302 (D3)
ENVI 324  (S)  Corals and Sea Level

Cross-listings: MAST 324  ENVI 324  GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Extra Info: offered only at Mystic Seaport

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100, ENVI 100

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Class Format: lecture

Requirements/Evaluation: Lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 101 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101, ENVI 105

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize
major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture; one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** underclassmen

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**GEOS 102  (S)  An Unfinished Planet**

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

**Class Format:** lecture, three hours per week; lab (several involving field work), two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

**Requirements/Evaluation:** evaluation will be based on two hour-tests, weekly lab work, and a scheduled final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** ENVI Natural World Electives  EXPE Experiential Education Courses  GEOS Group C Electives - Solid Earth

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Fall 2019
GEOS 201 (F) Geomorphology

Cross-listings: ENVI 205  GEOS 201

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

GEOS 202 (S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

GEOS 212  (S)  Paleobiology

Cross-listings:  BIOL 211  GEOS 212

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth’s climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams’ fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/laboratory; field trip to the the Paleozoic of New York State

Requirements/Evaluation:  lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites:  any 100-level GEOS course or BIOL 102, 203 or 205

GEOS 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

GEOS 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their
causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

**Class Format:** lecture, three hours per week; one three-hour lab per week

**Requirements/Evaluation:** evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics**

**Cross-listings:** GEOS 221 ENVI 222

**Primary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

**Class Format:** tutorial

**Requirements/Evaluation:** weekly papers and a final oral presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** second-year students, Geosciences and Environmental Studies third- and fourth-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

**Attributes:** EXPE Experiential Education Courses

Not offered current academic year

**GEOS 255 (F) Environmental Observation**
Cross-listings: GEOS 255  ENVI 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data—numbers that represent system states—and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Class Format: lecture

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 255 (D3) ENVI 255 (D3)

LAB Section: 02    R 1:00 pm - 4:00 pm    Alice C. Bradley

GEOS 302  (S)  Sedimentology  (WS)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and a final exam WS: Writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

Prerequisites: at least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (WS)

Writing Skills Notes: Writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: tutorial with weekly one-hour meetings; in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: Six 5- to 10-page papers throughout the semester based on data collected during field trips (3) and journal articles (3). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
**GEOS 411 (F) Geobiology**

Geobiology—the study of interactions between earth and life over geologic timescales—is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms—from bacteria to trees—have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biominerlization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

**Class Format:** seminar; two lecture/seminars a week plus a lab

**Requirements/Evaluation:** labs, short papers, final grant proposal and presentation

**Prerequisites:** GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Senior Geoscience majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

HIST 259 (S) New England Environmental History  (WS)

Cross-listings: ENVI 259 AMST 259 HIST 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research.

Class Format: seminar

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 264 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: seminar with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

HIST 352  (F)(S)  American Maritime History  (DPE) (WS)

Cross-listings:  HIST 352  MAST 352

Secondary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America’s maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America’s maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Extra Info: offered only at Mystic Seaport

Prerequisites:  BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes:  Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

LATS 220  (F)  Introduction to Urban Studies: Shaping and Living the City

Cross-listings:  AMST 221  ENVI 221  LATS 220

Primary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format:  lecture/discussion

Requirements/Evaluation:  evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites:  none

Enrollment Limit:  20
Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

LATS 241  (F)  Performing Masculinity in Global Popular Culture

Cross-listings:  WGSS 240  THEA 241  SOC 240  AMST 241  LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LATS 252  (S)  Puerto Rico and its Diaspora

Cross-listings:  AMST 252  LATS 252

Primary Cross-listing

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island’s status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar,
Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

**Class Format:** seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

**Requirements/Evaluation:** class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

**Prerequisites:** students should have some fluency with the Spanish language

**Enrollment Limit:** 8

**Enrollment Preferences:** should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

**Expected Class Size:** 8

**LEAD 18 (W) Wilderness Leadership in Emergency Care**

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM - 5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

**Requirements/Evaluation:** written and practical exam

**Prerequisites:** none

**Enrollment Limit:** 22

**Enrollment Preferences:** submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

**Grading:** pass/fail only

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

**Class Format:** classroom discussion as well as field seminars

**Requirements/Evaluation:** class participation, weekly response papers, three longer papers

**Extra Info:** offered only at Mystic Seaport

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**MATH 12 (W) The Mathematics of Lego Bricks**

This course is a modification of six previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach
an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell. Almost surely there will be a speed build challenge (college teams vs elementary school teams).

**Requirements/Evaluation:** final project or presentation  
**Prerequisites:** none  
**Enrollment Limit:** 30  
**Enrollment Preferences:** discretion of the instructor  
**Grading:** pass/fail only  
**Materials/Lab Fee:** $45  
**Attributes:** EXPE Experiential Education Courses

MUS 104 (S) Jazz Theory and Improvisation I

**Cross-listings:** MUS 104 AFR 212  
**Primary Cross-listing**

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.  
**Class Format:** alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire  
**Requirements/Evaluation:** evaluation will be based on weekly assignments (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance  
**Extra Info:** this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly  
**Prerequisites:** MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged  
**Enrollment Limit:** 15  
**Enrollment Preferences:** prospective Music majors, then Jazz Ensemble members, then Music majors  
**Expected Class Size:** 12  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** (D1)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
MUS 104 (D1) AFR 212 (D2)  
**Attributes:** EXPE Experiential Education Courses

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content
will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we
will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the
participants.

Requirements/Evaluation: final performance
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: quick audition
Grading: pass/fail only
Materials/Lab Fee: none
Attributes: EXPE Experiential Education Courses

Not offered current academic year

MUS 174  (F)  The Singing Voice: Structure, Styles and Meaning
What makes an opera singer sound different than a rock singer? Why can’t one convincingly sing in the style of the other? And why is the former
granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple
angles: through listening, readings, film viewing and, above all, through singing. The class will learn the basics of yodeling, Tuvan throat singing, and
belting, among other styles, and will explore the cultural and historical contexts of each.

Class Format: lecture/studio/discussion
Requirements/Evaluation: evaluation will be based on one quiz, two papers, and a final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)
Attributes: EXPE Experiential Education Courses

Not offered current academic year

MUS 204  (S)  Jazz Theory and Improvisation II
Cross-listings: MUS 204  AFR 214
Primary Cross-listing
A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with
more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and
hexatonic scale shapes, and Coltrane’s “Three Tonic” harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions
Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project
Prerequisites: MUS 104b or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Music majors and Jazz Ensemble members
Expected Class Size: 5-8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
MUS 204 (D1) AFR 214 (D2)
Attributes: EXPE Experiential Education Courses
MUS 205  (F)(S) Composition I
Beginning courses in musical composition. Size and number of required projects will vary from 4 to 5. Each assignment will represent 25% of the student's final grade. A group meeting per week will deal with the presentation of the student's work in progress, analysis of models for composition, performance of work in class, and critiquing of work. There will be a weekly individual meeting with the instructor to discuss each student's progress. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

Class Format: seminar

Requirements/Evaluation: evaluation based on the quality and timeliness of composition projects, attendance, and class participation

Prerequisites: MUS 202 (may be taken concurrently) or permission of instructor

Enrollment Limit: 6

Enrollment Preferences: Music majors; consideration of non-majors based on qualifications and experience

Expected Class Size: 4

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

MUS 309  (S) Jazz Arranging and Composition
This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104b and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

NSCI 10 (W) The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in evaluating primary neuroscience research articles using the medical model to evaluate validity. They will develop their own evaluation systems for identifying valid research related to learning and the brain. Small groups of 2-3 students will be assigned different articles on the same topic and engage in class discussions based on their reading. These will include their interpretations of the research and potential applications to learning strategies and interventions. A final project will a paper and class presentation about topics they select based on their interests and goals for taking the course. Adjunct Instructor Bio: Judy Willis, M.D. combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to become a leading authority in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles for professional journals applying neuroscience research to successful teaching strategies. She is on expert consulting staff for NBC News Education Nation, Edutopia, and media liaison for American Academy of Neurology.

Requirements/Evaluation: short paper and final project or presentation

PHIL 25 (W) Eye Care and Culture in Nicaragua

We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where student--in conjunction with optometrists who volunteer their time for the tri--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip. We will spend nine days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students--in conjunction with the optometrists (usually three) who volunteer their time for the trip--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings.
Requirements/Evaluation: class participation and journals as described above, along with on-site observation of the students' participation in the eye clinics

Prerequisites: none, though it is helpful to include three to six students who are fluent in Spanish

Enrollment Limit: 12

Enrollment Preferences: students will submit applications indicating why they want to take the course

Grading: pass/fail only

Materials/Lab Fee: $3,350

PHLH 25  (W)  Public Health, Community Action, and Education in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable--and most vital--members: women and children. To understand how public health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (http://fphed.org/). A UP-based organization with its own campus, FPHED's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHED will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. She conducted community-based participatory research on government reproductive health programs in rural India through a Fulbright-Nehru Fellowship. She has spent a cumulative 17 months to-date studying and researching reproductive health in rural India. She is currently a Health Care Assistant at Planned Parenthood in Boston.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Public Health students, then by seniority

Grading: pass/fail only

PHLH 402  (S)  Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Class Format: seminar/lab

Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

Prerequisites: completion of at least four courses counting towards the PHLH concentration
Enrollment Limit: 14
Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: No divisional credit

PHYS 15  (W) Cooking for the Real World
Cross-listings: PHYS 15 SPEC 13
Primary Cross-listing
Students will learn the basic cooking techniques needed to survive for their lives after graduation. They will learn how to make cookies, pasta, pies, protein cookery, and knife skills to better prepare themselves after their time at William's. Please when applying for the class include year of graduation and why food matters so much to you. Normally students will email me why and how food means to them. Emails will help determine who gets into the class of 10. Adjunct Instructor Bio: CJ Hazell is currently working in Williams' dining services, preparing meals for over 2000 students. Prior to coming to the college, he ran a small cafe and before that was the kitchen manager and saucier at a French Fine Dining establishment.
Requirements/Evaluation: students will write a reflection comparing their initial email application and what they have learned throughout class
Prerequisites: Junior or Senior
Enrollment Limit: 10
Enrollment Preferences: email application explaining how much food means to them
Grading: pass/fail only
Materials/Lab Fee: cost of books
This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 16  (W) The Way Things Work
How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet four afternoons a week for a mixture of lecture, discussion, build time, local field trips, and lots of hands-on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. Early in the course we'll team-engineer and build a large project as a class. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice. These will culminate in either building a final project with a short writeup or writing a 6-page paper, and a presentation to the class.
Requirements/Evaluation: class participation; midterm group project; final project with short writeup or a 6-page paper; presentation of final project/paper to the class
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: by seniority, and by requesting an interest statement
Grading: pass/fail only
Materials/Lab Fee: $40 and approximately $35 for books
Attributes: EXPE Experiential Education Courses
POEC 402 (S) Political Economy of Public Policy Issues

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

Class Format: seminar with student presentations
Requirements/Evaluation: group policy projects including an 80- to 100-page paper and 2-hour presentation
Prerequisites: POEC 253 or ECON 255, POEC 250, POEC 401; open only to Political Economy majors
Grading: no pass/fail option, no fifth course option
Unit Notes: required for the Political Economy major
Distributions: (D2)
Attributes: EXPE Experiential Education Courses POEC Required Courses

PSCI 118 (F) Power to the People?
Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions by actively consulting political theory and empirical research in the social sciences. Our investigation will include class-time collaboration with a similarly structured undergraduate course being taught by a sociologist at the University of North Carolina and may include an optional weekend study trip.

Class Format: seminar
Requirements/Evaluation: active class participation, three 5-page essays, several short additional writing assignments, and class presentation
Prerequisites: first-year students
Enrollment Limit: 19
Enrollment Preferences: first-year students
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: EXPE Experiential Education Courses PSCI American Politics Courses

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits
This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to
the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

**PSYC 14  (W)  JA SelCom: A Case Study in Selection Processes**

The majority of the time will be dedicated toward selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in selection? These are just a few of the questions that we will seek to understand through guest speakers from the Davis Center, Psychology Department, Admissions, and the Career Center. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality.

**Requirements/Evaluation:**  short writing assignments totaling 10 pages

**Prerequisites:**  none

**Enrollment Limit:**  21-30

**Enrollment Preferences:**  at the discretion of the instructor

**Grading:**  pass/fail only

**PSYC 15  (W)  Ephquilts! An Introduction to Traditional Quilting**

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods
included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: *Pieces of the Past* by Nancy J. Martin; *Stitching Memories: African-American Story Quilts* by Eva Ungar Grudin; *Sunshine and Shadow: The Amish and Their Quilts* by Phyllis Haders; *A People and Their Quilts* by John Rice Irwin; *Treasury of American Quilts* by Cyril Nelson and Carter Houck; *The Quilt: New Directions for an American Tradition*, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects. Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**PSYC 21 (W) Psychology Internships**

Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

**Requirements/Evaluation:** 10-page minimum final paper summarizing the student’s experiences and reflections, a journal kept throughout the experience, and the supervisor’s evaluation

**Prerequisites:** approval by Ken Savitsky is required

**Enrollment Limit:** 20

**Enrollment Preferences:** random selection

**Grading:** pass/fail only

**Materials/Lab Fee:** none

**Attributes:** EXPE Experiential Education Courses

Not offered current academic year

**PSYC 352 (F) Clinical and Community Psychology**

This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. **Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.**

**Class Format:** seminar

**Requirements/Evaluation:** field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper
Prerequisites: PSYC 252

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course

PSYC 372 (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

Class Format: seminar

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and those who plan to become teachers

REL 110 (F) Living Religion: The Study of Religion in Everyday Life

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. This approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: seminar

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 12-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)
REL 228  (F)  Zen and the Art of American Literature

Cross-listings: AMST 238  COMP 238  REL 228  ENGL 239

Secondary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Class Format: lecture

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

RUSS 25 (W) Williams in Georgia
Cross-listings: SPEC 25 RUSS 25
Primary Cross-listing
Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia’s capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience. Adjunct Bio: Vladimir Ivantssov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.
Requirements/Evaluation: 10-page paper
Prerequisites: none; knowledge of Russian or Georgian is not required
Enrollment Limit: 8
Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course
Grading: pass/fail only

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

SOC 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of “males” at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

SPEC 19 (W) Healthcare Internships

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which health care is delivered. Students will be introduced to fundamental concepts related to patient interviewing and history taking, diagnosis and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Didactic sessions for (on-campus students) will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally. Students will be introduced to concepts of health and wellness, epigenetics, and environmental influences that have a demonstrable, sustained impact on individuals before and after clinical symptoms of illness emerge. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and factors affecting the health of individuals and communities.

Requirements/Evaluation: 10-page paper

Prerequisites: not open to first-years

Enrollment Preferences: grade level and potential as applicant to professional programs

Grading: pass/fail only

Materials/Lab Fee: none

Distributions: No divisional credit

Attributes: EXPE Experiential Education Courses

SPEC 21 (W) Experience in the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. In order to participate in this course, students must apply to the winter study internships listed in this syllabus. The expectation is that each
student will observe and participate in some aspect of the profession for at least 30 hours per week, 6 hours per day for 5 days each week. It is also expected that the instructor will assign a specific project to be completed within the 3-4 week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization, and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience.

Teaching Associates: Williams College Alumni/Parents will be recruited to become teaching associates for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course instructor in person or via telephone conference. Students will be required to read one of two books selected for this course. Bibliography: a bibliography of readings would be selected from such works as: What Should I do with My Life? by Po Bronson, 2003; Working by Studs Terkel, 2004.

Requirements/Evaluation: it is expected that students will complete assigned readings (read one of two books assigned to this course), write a daily journal, and write a 5- to 7-page expository review; evaluation will become public record as a resource for other students

Prerequisites: interested students must attend an information meeting in late September or early October and follow up with Dawn Della if students have questions about specific WS internships listed in the SPEC 21 syllabus; application are submitted via Handshake

Enrollment Preferences: 1st priority--students applying for winter study internships listed in the SPEC 21 syllabus; 2nd priority--students developing independent Internships with Williams alumni/parents; first-years limited to applying for local internships

Grading: pass/fail only

Materials/Lab Fee: cost of books

SPEC 22 (W) Outdoor Emergency Care

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extraction, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. Attendance at all classes is mandatory. The course is limited to 12 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Requirements/Evaluation: completion of daily homework; written and practical final exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading:

Materials/Lab Fee: $180 and approximately $110 for books

SPEC 26 (W) Essentials for Entrepreneurship: An Immersion In the San Francisco Start-Up Culture

Interested in Entrepreneurship and seeing first-hand what it takes to launch a venture? Visit over ten startups in the Bay area to find out! This course is designed to give students interested in Entrepreneurship in-depth insight into the Customer Discovery process, i.e. how startups figure out if their ideas are worth pursuing. We will meet with the founders of 10-15 start-ups in the Bay Area and track their professional and personal journeys. We will look at the impact of company culture, the Bay Area ecosystem and values, financing, and how a Liberal Arts background prepares students for the challenges of entrepreneurship. Student teams will have the opportunity to work on an actual project for one or more of the companies to be visited and present their findings to senior management. We will also visit the Google campus and Stanford School While many of the companies will be technology driven, no technical background is needed and we will strive to have a diverse background in the class. The course will start in Williamstown with a review of idea development tools used in today's startup environment, particularly those pioneered by Stanford d.School called the Business Model Canvas. Workshops on Design Thinking and maximizing the Williams network will round out the pre-trip coursework. Reading will include "The Lean Startup" by Eric Ries, "Zero to One" by Peter Thiel and Edward deBono's "Thinking Course" as well as articles and podcasts. Then we will go see what is actually happening in the market! Meeting times: 1/6/20 - 1/14/20 Williamstown. 10am-1pm 1/15/20 travel to San Francisco 1/16/20-1/28/20 San Francisco 10am-5pm or as needed based upon project 1/29/20 Travel back to Williamstown Adjunct Instructor Bio: Tonio Palmer is the Entrepreneur in Residence at Williams. Tonio has had a long career in international business and founded a number of companies. He holds an MBA from Wharton and MA from Upenn as a graduate of the Lauder Institute.

Requirements/Evaluation: final project or presentation
Prerequisites: none; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: preference given to students with a demonstrated interest in entrepreneurship
Grading: pass/fail only

STS 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Secondary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Class Format: seminar

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

STS 370 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE)

Cross-listings: WGSS 371 ANTH 371 STS 370

Secondary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies
DIFFERENCE, POWER, AND EQUITY NOTES: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to ‘improve’ health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

THEA 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: ARTS 385  THEA 385

Secondary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Class Format: studio

Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $125

Distributions: (D1)

WGSS 113 (F) The Feminist Poetry Movement (DPE) (WS)
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: seminar; discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poems of the Women's Liberation Movement.

WGSS 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LAT 241

Primary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J\K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire...
genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

WGSS 371  (F)  Medicine, Pathology, and Power: An Ethnographic View  (DPE)

Cross-listings: WGSS 371  ANTH 371  STS 370

Secondary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Class Format: seminar

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)

Difference, Power, and Equity Notes: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

Fall 2019
Advisors: Professors: B. Mladenovic, S. Rosenheim.

Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both about and with moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Morgan McGuire (Computer Science), Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

FMST Core Courses

**AFR 207** (F) "Out of Africa": Cinematic Portrayals of a Continent (DPE) (WS)

**Cross-listings:** AFR 207 ARTH 207

**Secondary Cross-listing**

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

**Class Format:** Tutorial

**Requirements/Evaluation:** targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History majors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 207 (D2) ARTH 207 (D1)

**Writing Skills Notes:** This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

**Difference, Power, and Equity Notes:** This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 ENGL 286 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

AFR 321  (F)  Trending Black: Race & Social Media in the 21st Century
The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

AFR 325  (F)  Television, Social Media, and Black Women 'Unscripted'
Cross-listings: WGSS 325  AFR 325
Primary Cross-listing
Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.
Class Format: seminar
Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

AMST 205 (F) Chicana/o Film and Video

Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, national and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays

AMST 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A.

Cross-listings: AMST 229 REL 229

Secondary Cross-listing

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystalize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

ANTH 225 (S) Fact/Fiction/Film

This course examines the potential of moving images to reveal aspects of culture normally obscured by the written word. We will consider both the theory and practice of documentary film from its inception around 1900 to the present, paying particular attention to the way documentary filmmakers have approached the representation of social reality in Western and non-Western cultural settings. Questions that we will consider include: What is the relationship between written text and image, or between image and story? What is the role of film in anthropology? What counts as a document?

Class Format: team-taught, through a mixture of lectures and discussions

Requirements/Evaluation: regular attendance at film screenings and active class participation, a 5-page paper on an assigned topic, a 12- to 15-page final paper, and a self-scheduled take-home final

Enrollment Limit: 30

Enrollment Preferences: Anthropology/Sociology majors, then to sophomores, and finally to first-year students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: FMST Core Courses

ANTH 330  (F) The Documentary Project: Ethnography and the Visual Narrative

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people’s lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or “engagement” between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about “truth” and “objectivity” in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Class Format: lecture
Requirements/Evaluation:  develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques
Prerequisites:  SOC 236 or permission of instructor
Enrollment Limit:  10
Enrollment Preferences:  Anthropology and Sociology majors
Expected Class Size:  8
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)

ARAB 401  (S)  Topics in Advanced Arabic I: Contemporary Arab Cinema
The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Class Format: lecture
Requirements/Evaluation:  essays, presentations, final paper, exam
Prerequisites:  ARAB 302
Enrollment Limit:  none
Expected Class Size:  5
Grading:  no pass/fail option,  no fifth course option

ARAB 415  (S)  Beyond Headlines: Surveying the Arab Landscape through Arabic Media
How does Arabic media represent the Arab landscape? This course will explore Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss Arabic media as a vehicle through which issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Class Format: lecture
Requirements/Evaluation:  active participation in class, assignments, blogs, quizzes, presentation, final project
Prerequisites:  ARAB 302
Enrollment Limit:  12
Enrollment Preferences:  Arabic majors

ARTh 203  (F)  Chicana/o Film and Video

Cross-listings:  ARTH 203  WGSS 203  LATS 203  AMST 205

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format:  film screenings will be scheduled as a lab

Requirements/Evaluation:  evaluation will be based on one short paper, mid-term exam, final exam and take home essays

Prerequisites:  none

Enrollment Limit:  30

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

ARTh 207  (F)  "Out of Africa": Cinematic Por(Be)trayals of a Continent  (DPE)  (WS)

Cross-listings:  AFR 207  ARTH 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Class Format:  Tutorial

Requirements/Evaluation:  targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  Art History majors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTH 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Secondary Cross-listing
The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's The Act of Killing (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Class Format: seminar
Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor
Enrollment Limit: 25
Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

ARTS 107 (S) Creating Games (QFR)
The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

**Class Format:** lecture and studio

**Requirements/Evaluation:** participation, studio work, and quizzes

**Prerequisites:** none; no programming or game experience is assumed

**Enrollment Limit:** 24

**Enrollment Preferences:** first-year students

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

**Materials/Lab Fee:** $25 lab fee charged to term bill

CHIN 226  (S) Chinese Film and Its Significant Others

**Cross-listings:** COMP 296  CHIN 226

**Primary Cross-listing**

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the $527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

**Class Format:** lecture

**Requirements/Evaluation:** attendance and participation, short response papers (1-2 pages each), one final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

CHIN 237  (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films

Cross-listings: CHIN 237 COMP 297

Primary Cross-listing
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical “past” remembered, forgotten, and subverted in a literary “presence”? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these “post” societies represent state-sponsored narratives of remembrance, dissidents’ collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include “root-seeking”, “new realist”, “avant-garde” and “hooligan” novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three “post” societies.

Class Format: tutorial
Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

COMP 221  (S) Hollywood Film

Cross-listings: COMP 221 ENGL 204

Secondary Cross-listing
For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho, Casablanca, The Godfather, Schindler's List, Bridesmaids, Groundhog Day, and 12 Years a Slave. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Class Format: lecture
Requirements/Evaluation: attendance at free Sunday 8:00 pm screenings, two 2-page essays analyzing a short film sequence, two film editing exercises, a midterm, and a final exam
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 60
Enrollment Preferences: English majors
Expected Class Size: 60
This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films Nosferatu by Murnau and Herzog, Dracula by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by Hardwicke, and Daybreakers by Spierig, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.
responses, three essays (1000-2000 words), three production exercises; and a final long paper or project

Prerequisites: no prior production experience is required

COMP 283  (F)  Haitian and French Caribbean Literatures and Films

Cross-listings:  COMP 283  AFR 261  RLFR 261

Secondary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

COMP 294 (S) Philosophy and Narrative Fiction

Cross-listings: PHIL 294 COMP 294

Secondary Cross-listing

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose--philosophers' preferred form of expression--clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

COMP 298 (S) Introduction to French and Francophone Film
Cross-listings: COMP 298  RLFR 228
Secondary Cross-listing
In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: RLFR 201, 202, or 203, or by permission of instructor

COMP 341 (F) Cinematic Representations of Work and Migration after the Wall
Cross-listings: WGSS 341  COMP 341
Primary Cross-listing
The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Meitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre and Time Out.

Class Format: seminar
Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: a 200-level ENGL or COMP course, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature and Women's Gender & Sexuality majors
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: FMST Core Courses
Not offered current academic year
CSCI 107 (S) Creating Games (QFR)

Cross-listings: ARTS 107 CSCI 107

Primary Cross-listing

The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: participation, studio work, and quizzes

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

Materials/Lab Fee: $25 lab fee charged to term bill

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 107 (D3) CSCI 107 (D3)

Attributes: FMST Core Courses

Not offered current academic year

CSCI 371 (F) Computational Graphics (QFR)

PhotoShop, medical MRIs, video games, and movie special effects all programmatically create and manipulate digital images. This course teaches the fundamental techniques behind these applications. We begin by building a mathematical model of the interaction of light with surfaces, lenses, and an imager. We then study the data structures and processor architectures that allow us to efficiently evaluate that physical model.

Students will complete a series of programming assignments for both photorealistic image creation and real-time 3D rendering using C++, OpenGL, and GLSL. These assignments cumulate in a multi-week final project. Topics covered in the course include: projective geometry, ray tracing, bidirectional surface scattering functions, binary space partition trees, matting and compositing, shadow maps, cache management, and parallel processing on GPUs.

Class Format: lecture, with optics laboratory exercises

Requirements/Evaluation: evaluation based on assignments, projects, and exams

Prerequisites: CSCI 136 and CSCI 237 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Attributes: FMST Core Courses

Not offered current academic year

ENGL 204 (S) Hollywood Film
Cross-listings: COMP 221  ENGL 204

Primary Cross-listing

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho, Casablanca, The Godfather, Schindler's List, Bridesmaids, Groundhog Day*, and 12 *Years a Slave*. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Class Format: lecture

Requirements/Evaluation: attendance at free Sunday 8:00 pm screenings, two 2-page essays analyzing a short film sequence, two film editing exercises, a midterm, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

LEC Section: 01    MR 2:35 pm - 3:50 pm     John E. Kleiner, James R. Shepard

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is not a course in journalism, but rather an experiment in documentary cinema for the ear. We'll do some reading in radio history and technique, and will listen to exemplary works (including episodes of *This American Life, RadioLab, Love & Radio*, and *Serial*), but most of our time—and this is a time-consuming course—will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Class Format: seminar

Requirements/Evaluation: five short audio pieces; attendance and active participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

ENGL 234 (S) The Video Essay

While students today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer
still have had the opportunity to think with the medium, exploiting the resources of film and video in their efforts to understand how they work on viewers. The Video Essay offers the chance to do that. After being introduced to the fundamentals of film analysis and trained in the use of Adobe Premiere Pro, students will spend the semester alternately making short video essays and commenting on the essays produced by their partners. Please note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required.

Class Format: we will meet as a group for three weeks, then break into groups of two with whom I will meet weekly; students will alternate between creating video essays on film topics, and writing commentaries on the essays of their partner

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays

Prerequisites: permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; first-year students; English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: course books

ENGL 274 (F) Film and Media Studies: An Introduction

Cross-listings: COMP 258  ENGL 274

Primary Cross-listing

This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio

Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project

Prerequisites: no prior production experience is required

Enrollment Limit: 30

Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283  ENGL 286  AFR 283  AMST 283
Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women’s, Gender and Sexuality Studies majors, then Africana Studies concentrators

**ENGL 287 (S) Bloody Vampires: From Fiction to Film and Fashion**

Cross-listings: ENGL 287 COMP 246

Secondary Cross-listing

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films Nosferatu by Murnau and Herzog, Dracula by Browning and Coppola, the Dance of Vampires by Polanski, The Hunger by Scott, Blade by Norrington, Twilight by Hardwicke, and Daybreakers by Spierig, as well as episodes of the TV series Buffy the Vampire Slayer, True Blood, and The Vampire Diaries. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar

Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring or considering a major in language or literature

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer’s billowing skirts, the sight of Niagara Falls, the arrival of a train at the station—such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean—whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA—still remains uncertain. We’ll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott’s “Sneeze” (1894) to Josh Oppenheimer’s The Act of Killing (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Class Format: seminar

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

LATS 203 (F) Chicana/o Film and Video

Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20
LATS 231  (S)  Approaches to Media Studies: Analyzing Mediated Difference
Cross-listings:  LATS 231  AMST 231  WGSS 232

Primary Cross-listing

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar
Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

LATS 346  (F)  Latinas/os and the Media: From Production to Consumption
Cross-listings: AMST 346  LATS 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Class Format: seminar
Requirements/Evaluation: evaluation to be based on student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages
Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

MUS 149 (S) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced YouTube videos. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: lecture/discussion

Requirements/Evaluation: assignments, quizzes, midterm essay, final creative project; midterm and final will also involve viewing/listening

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: given to juniors and seniors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Spring 2020

LEC Section: 01  TF 1:10 pm - 2:25 pm  Zachary Wadsworth

MUS 276 (F) Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: lecture/discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option
PHIL 294 (S) Philosophy and Narrative Fiction

Cross-listings: PHIL 294 COMP 294

Primary Cross-listing

What is it for a novel, a story, a play or a film to be a philosophical narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's Sophie's World. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose--philosophers' preferred form of expression--clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

REL 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A.

Cross-listings: AMST 229 REL 229

Primary Cross-listing

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as The Matrix (1999), The Passion of the Christ (2004), Jesus Christ Superstar (1973), The Shawshank Redemption (1994), The Omen (1976), Children of Men (2006), and The Book of Eli (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to
understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 12

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Class Format: seminar

Requirements/Evaluation: three response papers, one short essay on film adaption, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

Attributes: FMST Core Courses

Not offered current academic year

RLFR 228 (S) Introduction to French and Francophone Film

Cross-listings: COMP 298 RLFR 228

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malick, Varda, Palcy, Peck, and Sissako. Conducted in French.
Class Format: seminar
Requirements/Evaluation: response papers, midterm paper, TV show, colloquium
Prerequisites: RLFR 201, 202, or 203, or by permission of instructor
Enrollment Limit: 15

RLFR 261  (F)  Haitian and French Caribbean Literatures and Films
Cross-listings:  COMP 283  AFR 261  RLFR 261
Primary Cross-listing
Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.
Class Format: seminar
Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation
Prerequisites: French majors, French certificate, Africana and Comparative Literature students
Enrollment Limit: 15
Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

SCST 315 (S) Blackness 2.0: Race, Film and New Technologies

Cross-listings: AFR 315 AMST 315 SCST 315

Secondary Cross-listing

Are distinctions of race truly eliminated with digital technologies? Through an engagement with scholarship in media studies, cultural studies, gender studies, and Africana studies (to name a few), this course will investigate the nuanced ways blackness is (re)constructed and (re)presented in digital technologies. Although we will largely focus on representations of blackness in modern film, we will examine the impact of ‘new’ technologies upon the broader categories of race, gender, and sexuality. Additional topics may include: avatar-based entertainment; race in the ‘real’ vs ‘virtual’ world; emoji wars; blogosphere politics; internet and hashtag activism; social networking and a post-race future; and fandom in the twitter era.

Class Format: seminar

Requirements/Evaluation: evaluation based on participation and attendance, creation and maintenance of a personal blog, structural analyses for film, and design of an original multimedia project.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

SOC 212 (F) Understanding Social Media

Over just the last twenty years--beginning with Napster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

Class Format: seminar

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, final exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors
STS 276  (F)  Music and the Internet
Since the release of Napster in 1999, the Internet’s relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music’s place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: lecture/discussion
Requirements/Evaluation:  4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  none
Expected Class Size:  14
Grading:  
Distributions:  (D1)

WGSS 203  (F)  Chicana/o Film and Video
Cross-listings:  ARTH 203  WGSS 203  LATS 203  AMST 205
Secondary Cross-listing
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab
Requirements/Evaluation:  evaluation will be based on one short paper, mid-term exam, final exam and take home essays
Prerequisites:  none
Enrollment Limit:  30
Expected Class Size:  20
Grading:  yes pass/fail option, yes fifth course option
Distributions:  (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 232 (S) Approaches to Media Studies: Analyzing Mediated Difference

Cross-listings: LATS 231 AMST 231 WGSS 232

Secondary Cross-listing

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: WGSS 283 ENGL 286 AFR 283 AMST 283

Primary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Class Format: seminar

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20
WGSS 325 (F) Television, Social Media, and Black Women 'Unscripted'

Secondary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Class Format: seminar

Requirements/Evaluation: evaluation in this course will be based upon class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first, second, third, and fourth year students. If over enrolled, preference will be given to third and fourth year students

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 341 (F) Cinematic Representations of Work and Migration after the Wall

Secondary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: Illegal, Working Man's Death, NordSud.com, Lichter (Lights), Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre and Time Out.

Class Format: seminar

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper
In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Class Format: Seminar

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Course directly discusses structural oppression, forms of inequality, and social redress through the intersecting matrices of race, gender, sexuality and other ontological forms.

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237  ARTH 237  SOC 236  AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt
documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether “objective representation” is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

AMST 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products -- ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of “males” at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

ASST 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings: COMP 279  REL 271  WGSS 279  ASST 271

Secondary Cross-listing
"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and participation, weekly responses, final 15- to 18-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** REL, ASST, WGSS, and COMP majors will be given preference

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Attributes:** FMST Related Courses

**Not offered current academic year**

**COMP 111 (F) The Nature of Narrative (WS)**

**Cross-listings:** COMP 111 ENGL 120

**Primary Cross-listing**

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what"? We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

**Class Format:** seminar

**Requirements/Evaluation:** active and meaningful class participation; two shorter papers, longer final paper including a draft workshopped in tutorial format

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students considering a major in Comparative Literature and/or who have studied a foreign language

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 111 (D1) ENGL 120 (D1)

**Writing Skills Notes:** The two shorter papers will receive extensive comments from the instructor; the instructor will meet individually with students to
discuss their writing after the second paper. A partial draft of the final longer paper will be workshopped with the instructor plus a peer partner in
tutorials; the tutorials will provide feedback for expanding and deepening the final paper.

COMP 271 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film

Cross-listings: RUSS 232 COMP 271

Secondary Cross-listing

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This
situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the
story’s leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates
the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they
themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in
Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in
Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human
existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a
broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will
include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and
Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Class Format: Seminar

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an
oral presentation; a final paper (6 pages)

course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to
represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and
woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar
Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City
Cross-listings: AMST 331 COMP 330 THEA 330
Secondary Cross-listing
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as Harper's Weekly (Lafrcadio Hearn), The Awakening (Kate Chopin), A Streetcar Named Desire (Tennessee Williams), The Moviegoer (Walker Percy), Why New Orleans Matters (Tom Piazza), A Confederacy of Dunces (John Kennedy O'Toole), New Orleans Sketches (William Faulkner), One Dead in the Attic (Chris Rose). Film examples such as A Streetcar Named Desire, An Interview with a Vampire, The Curious Case of Benjamin Button, When the Levees Broke, Treme, Waiting for Godot (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.
Class Format: seminar
Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: none

Spring 2020
SEM Section: 01  R 1:10 pm - 3:50 pm  Deborah A. Brothers
This course provides an opportunity to develop an understanding of the theoretical and practical concepts underlying 2- and 3-dimensional computer graphics. The course will emphasize hands-on studio/laboratory experience, with student work focused around completing a series of projects. Students will experiment with modeling, color, lighting, perspective, and simple animation. As the course progresses, computer programming will be used to control the complexity of the models and their interactions. Lectures, augmented by guided viewings of state-of-the-art computer generated and enhanced images and animations, will be used to deepen understanding of the studio experience.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on progress in project work and two examinations

Prerequisites: this course is not open to students who have successfully completed a CSCI course numbered 136 or above

Enrollment Limit: 36

Enrollment Preferences: first-year students and sophomores who have not previously taken a computer science course

Expected Class Size: 36

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

Attributes: FMST Related Courses

ENGL 120  (F)  The Nature of Narrative  (WS)

Cross-listings: COMP 111  ENGL 120

Secondary Cross-listing

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Class Format: seminar

Requirements/Evaluation: active and meaningful class participation; two shorter papers, longer final paper including a draft workshopped in tutorial format

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111 (D1) ENGL 120 (D1)

Writing Skills Notes: The two shorter papers will receive extensive comments from the instructor; the instructor will meet individually with students to discuss their writing after the second paper. A partial draft of the final longer paper will be workshopped with the instructor plus a peer partner in tutorials; the tutorials will provide feedback for expanding and deepening the final paper.

ENGL 214  (S)  Writing for Stage and Screen

Cross-listings: ENGL 214  THEA 214
Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer’s individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Class Format: seminar

Requirements/Evaluation: A daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: Students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listing: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian’s role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether “objective representation” is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Class Format: seminar

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin’s first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country’s political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country’s newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: Man of Aran, The Informer, The Quiet Man, Eat the Peach, In the Name of the Father, Butcher Boy, Intermission, Into the West, The Field, The Crying Game, December Bride, The Commitments, Michael Collins, Ondine, Six Shooter, In Bruges and The Guard; and we will also assess one or more short independent films such as Budawanny and Adam and Paul. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Class Format: seminar
Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students
Enrollment Limit: 19
Enrollment Preferences: English majors

ENVI 368 (F) Technology and Modern Society

Cross-listings: SOC 368  ENVI 368

Secondary Cross-listing
With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Class Format: seminar
Requirements/Evaluation: two short papers, a midterm exam, and a final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors

LATS 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size: 20

REL 271  (F)  Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings:  COMP 279  REL 271  WGSS 279  ASST 271

Primary Cross-listing

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviances from "the normal" as it is constructed in a given culture and time period—they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

RLFR 108  (S)  Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery—especially in the context of immigration and coming of age—as they are represented in texts from France, Québec, and the Caribbean.

Class Format:  Lecture

Requirements/Evaluation:  class participation, grammar exercises, two short papers, midterm, and final project
**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French Majors and certificate students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

LEC Section: 01  TR 9:55 am - 11:10 am  Carl B. Cornell

**RLSP 280 (S) From Roma to Yahalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)**

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals’ skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

**Class Format:** Lecture

**Requirements/Evaluation:** essays, oral presentation, participation

**Prerequisites:** RLSP 105, placement exam results, permission from the instructor or the Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish major

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

**Writing Skills Notes:** Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

**RUSS 232 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film**

**Cross-listings:** RUSS 232  COMP 271

**Primary Cross-listing**

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human
existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Class Format: Seminar

THEA 241  (F) Performing Masculinity in Global Popular Culture

Cross-listings:  WGSS 240  THEA 241  SOC 240  AMST 241  LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation:  masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  in the event of over-enrollment, a short statement of interest will be solicited

Expected Class Size:  20
**THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

**Cross-listings:** AMST 331 COMP 330 THEA 330

**Primary Cross-listing**

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O’Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Class Format:** seminar

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

WGSS 279  (F)  Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings:  COMP 279  REL 271  WGSS 279  ASST 271

Secondary Cross-listing
"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from “the normal” as it is constructed in a given culture and time period—they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation—including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation:  attendance and participation, weekly responses, final 15- to 18-page research paper

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

- AFR 360 Political Thought Frantz Fanon
- ARTH 254 Manet to Matisse
- HIST 390 Haitian and French Revolutions
- RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and
if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 13 (W) Creative Portraiture in the Darkroom
Cross-listings: ARTS 13  RLFR 13

Primary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Grading: pass/fail only

Materials/Lab Fee: $120

This course is cross-listed and the prefixes carry the following divisional credit:

**RLFR 101 (F) Introduction to French Language and Francophone Cultures**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco.  *Conducted in French.*

**Class Format:** the class meets five hours a week

**Requirements/Evaluation:** evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Extra Info:** students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

**Prerequisites:** none; for students who have never formally studied French; students who have previously studied French must take the French Placement Test during First Days

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

LEC Section: 01 M-F 9:00 am - 9:50 am Theresa Brock

RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

Class Format: lecture; the class meets five days per week

Requirements/Evaluation: grade based on active participation, workbook homework, chapter tests, short papers, midterm exam, and final exam

Prerequisites: RLFR 101-102, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year

Distributions: (D1)

Fall 2019

LEC Section: 01 M-F 10:00 am - 10:50 am Cécile Tresfels
LEC Section: 02 M-F 9:00 am - 9:50 am Theresa Brock

RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

Class Format: Class meets twice a week with the professor (for 75 minutes each, on TR 11:20AM-12:30PM), plus a required 30-minute conversation session with the French TA, at a time to be mutually determined by the students and TA

Requirements/Evaluation: grade based on active participation, workbook homework, chapter tests, short papers, midterm exam, and final exam

Prerequisites: RLFR 103, or by placement test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: after successfully completing RLFR 104, students may register for RLFR 201

Distributions: (D1)
RLFR 105  (F)  Advanced French: Advanced Studies in French Language and Francophone Culture  
In this course, we will concentrate on polishing your oral and written expression and on expanding your vocabulary, while focusing on the analysis and discussion of French and Francophone cultures and the concepts that define them. In addition to helping you improve your speaking, listening comprehension, reading, and writing, as well as reviewing advanced grammar, we will explore key myths and practices linked to municipal, regional, and national identities in France and the Francophone world, and seek to understand the history of contemporary debates surrounding these identities. Topics of discussion will include: Which cultural practices represent what it means to be French? How do certain regions and cities derive a sense of identity distinct from that of the nation? How do overseas departments and territories inflect Frenchness by means of their own histories and geographies? Short literary, theoretical, and historical texts, along with films, music, photography, press articles, and websites, will inform our discussions. Class meets three times a week with the professor (for 50 minutes each), plus a required 30-minute conversation session with the French TA each week, at a time to be mutually determined by the students and TA.  

Class Format: weekly conference with TA  

Requirements/Evaluation: class participation, grammar exercises, short response papers, essays, presentations, final project  
Prerequisites: RLFR 104, placement exam, or by permission of instructor  
Enrollment Limit: 20-25  
Enrollment Preferences: French majors and certificate students  
Expected Class Size: 20  
Grading: yes pass/fail option, yes fifth course option  
Distributions: (D1)  

RLFR 106  (S)  Advanced French: Danger and Desire in French Film and Fiction  
This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1830 to 2010, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.  

Class Format: seminar  

Requirements/Evaluation: active class participation, grammar exercises, two short papers, midterm, and final paper  
Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor  
Enrollment Limit: 20  
Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission  
Expected Class Size: 20  
Grading: yes pass/fail option, no fifth course option  
Distributions: (D1)  

Not offered current academic year
RLFR 108  (S)  Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age as they are represented in texts from France, Québec, and the Caribbean.

Class Format: Lecture

Requirements/Evaluation: class participation, grammar exercises, two short papers, midterm, and final project

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

RLFR 202  (F)  War and Resistance: Two Centuries of War Literature in France (1804-2016)

Cross-listings:  WGSS 201   RLFR 202

Primary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angele, Pontecorvo, and Duras. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106 or 107; or by French placement exam; or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 201 (D2) RLFR 202 (D1)
RLFR 203  (F)  Introduction to Francophone Literatures
Cross-listings:  AFR 204  RLFR 203  COMP 282

Primary Cross-listing
What is the Francophone world comprised of? Who speaks French today and why? What does the idea of Francophonie really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the littérature-monde manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of Francophonie so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (l'hexagone), and Haiti among others.

Class Format: seminar
Requirements/Evaluation: presentation, journaling, final project, participation
Prerequisites: RLFR 105 and above, placement exam or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences:  French majors and certificate, Africana and Comp. Lit
Expected Class Size: 20
Grading:  no pass/fail option,  no fifth course option

RLFR 205  (S)  On Strike: Workers and Revolutions in the French Republic
The recent "yellow vests" (gilets jaunes) protests in France have attracted international attention to the experiences of French workers. Yet these protests are only the latest example in a series of workers' movements that have shaped French identity. From the revolutions of 1830 and 1848, to the Popular Front of the 1930s, to the general strike that fueled the events of May 1968, workers have played a significant role in determining France's sociocultural values and political orientation. In this course, we will study representations of workers in literary and filmic texts dating from the late nineteenth century to the present. We will consider how depictions of the worker have evolved amid changing sociocultural conditions in France: for instance, the arrival of immigrants from such countries as Spain, Italy, and Portugal, and later from the Maghreb; the entry of women into the workforce; the disappearance of the rural farm worker, or paysan; the creation of a nuclear power grid; and deindustrialization. Finally, we will examine how the memory of workers is preserved in twenty-first-century France.  Conducted in French.

Class Format: Seminar
Requirements/Evaluation: class participation, reaction papers, oral presentations, and a final project
Prerequisites:  strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences:  French Majors and certificate students
Expected Class Size: 20
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)

Spring 2020
SEM Section: 01    TF 2:35 pm - 3:50 pm     Carl B. Cornell
In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

**Class Format:** seminar

**Requirements/Evaluation:** three response papers, one short essay on film adaption, one video essay with a student partner

**Prerequisites:** students should have taken RLFR 105 or above, or placement test, or by permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Comparative Literature majors, Africana Studies concentrators, French majors and certificates

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

**Attributes:** FMST Core Courses

**RLFR 208 (F) Queens, Crusaders and Cannibals: Gender, Race and Religion in Medieval and Renaissance France**

The intersection of gender, race, and religion is at the heart of contemporary political and social debates. How to build a nation and how to live together were also key questions for Medieval and Renaissance writers. In this introductory course in Early Modern Literature, we will study how literary works from the 11th to the 16th centuries represented conflicting debates on gender, race, and religion, from the Crusades opposing Christians and Muslims, to the Wars of Religion opposing Catholics and Protestants. We will explore how these concepts were intertwined in courtly love poems and chivalric novels in Europe, and how they were redefined in humanist writings and travel narratives to the Americas. Through an investigation of epic poems, allegories, tales, sonnets, novels, travel narratives, and essays by Marie de France, Christine de Pisan, Pierre de Ronsard, Louise Labé, François Rabelais, Michel de Montaigne and Marguerite de Valois, students will compare cultural, political, and ideological debates in Early Modern France with 21st-century questions on racism, sexism and discrimination.

**Class Format:** Seminar

**Requirements/Evaluation:** grade based on active participation, weekly written responses, midterm exam, and final project

**Prerequisites:** exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and French certificate students, and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**RLFR 210 (F) Scientific Selves: Medicine, Technology, and Identity in Early Modern France**

The early modern period has long been associated with scientific discovery and shifting ideology in France. From Copernicus on, thinkers such as René Descartes, Blaise Pascal, and Antoine Lavoisier helped advance the Scientific Revolution, which led to medical and technological breakthroughs, as well as important advances in our understanding of the world and our solar system. This course examines the role that France played in pursuing such discoveries, as well as the ways newfound knowledge impacted notions of belonging and alterity. How did the Scientific Revolution and French colonization lead to the creation of social, cultural, and medical "others"? How did scientific discourse permeate verbal and
visual expression and depict those who did not fit into normative paradigms of gender, sexuality, ability, ethnicity, belief, and culture? What avenues for self-expression and definition were available to those whom society excluded? What parallels can we see with twenty-first-century questions of political activism, social justice, sciences, and technology? To explore these questions, we will analyze literary texts, visual representations, and historical documents, such as medical treatises, scientific diagrams, and texts on new technologies. Conducted in French.

Class Format: Seminar
Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper
Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

RLFR 212 (S) Scandalous News: Media and Transgression in Pre-Revolutionary France
Today’s twenty-four-hour news cycle bombards us with scandalous stories. On our smartphones, tablets, and screens, personal transgressions and their political consequences loom large. In this constant state of media immersion, scandal and its communication have come to define our time. Yet centuries ago in Pre-Revolutionary France, scandalous news played an even more crucial role, in a society centered on obedience to monarchy and monolithic institutions. In this course, we will consider how institutionalized codes of gender, social class, and religion shaped individual identity, how those who broke from these codes created individual autonomy, and how the scandals they caused were communicated to others. To pursue these questions, we will analyze literature, journalism, and legal texts that document scandalous figures and compare these early modern scandals with those of the twenty-first century.

Class Format: Seminar
Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper
Prerequisites: strong performance in RLFR 105; RLFR 106; another RLFR 200-level course; placement exam; or permission of instructor

RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age
The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the
French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of patrimoine, visual culture, and (trans)national identity. Conducted in French.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

**Prerequisites:** successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**RLFR 220 (S) Fairy Tales: Love and Politics at the Sun King's Court**

This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period—which critics have sometimes called the "Grand Siècle"—develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance. Conducted in French.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

**Prerequisites:** successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

**RLFR 224 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France** (DPE)

**Cross-listings:** WGSS 224 RLFR 224

**Primary Cross-listing**

In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert.

**Class Format:** seminar
Requirements/Evaluation: active class participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission; if the course is overenrolled, students will submit an online form

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Cross-listings: COMP 224 RLFR 225

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Class Format: seminar

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Not offered current academic year

**RLFR 226 (S) Black France/France Noire**

**Cross-listings:** RLFR 226 AFR 226

**Primary Cross-listing**

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone.

It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. Conducted in French.

**Class Format:** seminar

**RLFR 228 (S) Introduction to French and Francophone Film**

**Cross-listings:** COMP 298 RLFR 228

**Primary Cross-listing**

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

**Class Format:** seminar

**Requirements/Evaluation:** response papers, midterm paper, TV show, colloquium

**Prerequisites:** RLFR 201, 202, or 203, or by permission of instructor

**Enrollment Limit:** 15

RLFR 261  (F) Haitian and French Caribbean Literatures and Films

Cross-listings:  COMP 283  AFR 261  RLFR 261

Primary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

RLFR 302  (S) Monsters of the Renaissance

Where did monsters appear before comics and blockbusters? Before cinematic ghosts, vampires, and zombies, the French Renaissance popularized the Scythian Lamb, the Monk Fish, the Monopod, the Wind-Eaters from the Island of Ruach, and the mythic giants Gargantua and Pantagruel. The Latin word monstrum referred to a prodigy that did not fit the laws of nature. Thus, the monster not only generated wonder, curiosity, and fear, but both challenged and disrupted normative social values. In this course, students will analyze novels, travel narratives, medical treatises, essays, and epic poems from 16th-century France, when writers, doctors, and travelers developed a critical reflection on monstrosity in order to deal with otherness. This encompassed fantastic creatures, non-human beings, and natural phenomena, as well as people whose gender, race, religion, and bodies deviated from established norms. In this course, students will think critically about race, gender, and disability, and study the complexities of fear, disgust, wonder, and fascination. Readings to include classical texts by Homer and Ovid, medieval texts like the Legend of Saint George and the Dragon, and Renaissance texts by Francois Rabelais, Jean de Léry, Marguerite de Navarre, Ambroise Paré, Michel de Montaigne, and Agrippa d'Aubigné.

Class Format: Seminar

Requirements/Evaluation: grade based on active participation, weekly written responses, midterm exam and final project

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

RLFR 305  (F) Where We Are & Where We Go: Spaces & Places of Contemporary France
How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from "here" or "there"? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. Conducted in French.

Class Format: seminar
Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)
Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad (Francophone countries) particularly welcome

RLFR 309 (F) Contemporary Short Stories from North Africa
Cross-listings: AFR 307 RLFR 309
Primary Cross-listing
Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zaizaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. Conducted in French.

Class Format: seminar/discussion
Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper
Prerequisites: RLFR 201, 202 or 203 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and those with compelling justification for admission

RLFR 310 (S) Le Moyen Âge en images: Decoding the Middle Ages
This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to bandes dessinées that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning
to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? Conducted in French

Class Format: seminar

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, mid-semester project: une bande dessinée, and final paper

Prerequisites: successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 316  (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Cross-listings: WGSS 315  RLFR 316

Primary Cross-listing

During the 1830s, Balzac described Paris as a “surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world,” but also characterized the French capital as a “land of contrasts,” a “monstrous wonder,” a “moral sewer.” Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris’s urban poor. Since 1889, Paris has been feted as the “City of Light” for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler’s ominous 1944 question, “Is Paris burning?” and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Class Format: seminar

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Women’s, Gender, and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: GBST Urbanizing World Electives

Not offered current academic year

RLFR 318  (F) Twentieth-Century French Novel: From Adversity to Modernity

Cross-listings: COMP 318  RLFR 318
In his futurist novel *Paris in the Twentieth Century* (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martineau, Téchiné, Charef. *Conducted in French.*

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, midterm exam, and two to three papers

**Prerequisites:** a 200-level course; or by placement test; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission; seniors returning from study abroad (in France or other Francophone countries) are particularly welcome

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 318 (D1) RLFR 318 (D1)

Not offered current academic year

**RLFR 412 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers**

**Cross-listings:** RLFR 412 WGSS 408

**Primary Cross-listing**

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. *Conducted in French.*

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, midterm exam, and two to three papers

**Prerequisites:** a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film (DPE)

Cross-listings: RLFR 414 COMP 414

Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Michel Ocelot, Claude Pinoteau, Abdellatif Kéchiche, Laurent Cantet, and Raoul Peck.

Class Format: seminar

Requirements/Evaluation: three, three-page response papers; thesis statement, methodology, and works cited list on one page; one script of a video essay

Prerequisites: 200 RLFR level courses

Enrollment Limit: 19

Enrollment Preferences: French and Comparative Literature majors and certificate students

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 414 (D1) COMP 414 (D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post-slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 493 (F) Senior Thesis: French

**RLFR 511 (F) Intensive French Grammar and Translation**

This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.

**Class Format:** classes meet twice weekly and are conducted in English

**Requirements/Evaluation:** evaluation will be based on class participation, papers, a midterm, and a final examination

**Prerequisites:** a strong interest and need to learn French

**Enrollment Preferences:** although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

**Grading:** pass/fail option only

**Distributions:** (D1)

**RLFR 512 (S) Readings in French Art History and Criticism**

This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read (excerpts from museum catalogues; the *Gazette des Beaux-Arts* and other publications; *Salons* by Diderot, Baudelaire, and Thoré; artists on their works; and critics such as Francastel, Ch. Sterling, M. Faré, Valéry, Focillon) will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.
**Class Format:** seminar

**Requirements/Evaluation:** evaluation is based on class participation, papers, a midterm, and a final examination

**Prerequisites:** RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

**Grading:** pass/fail option only

**Distributions:** (D1)

MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geosciences provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised. The new requirements are immediately below, and the old requirements follow. Students who entered Williams in fall 2019 or after are under the new requirements. Students who entered Williams before fall 2019 are under the old requirements but may opt into the new requirements. Please talk to the Geosciences chair if you have questions about the major requirements.

Geosciences major requirements for students who entered Williams in fall 2019 or after:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate
GEOS 101 Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change
GEOS 104 Oceanography

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Earth Resources
GEOS 210 Oceanographic Processes
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 301 Structural Geology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
At least one of the following 400-level courses:
GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

In addition, courses taken for the major must include at least two courses from each of the following three groups:

**Climate and Oceans:**
GEOS 100 Introduction to Weather and Climate
GEOS 104 Oceanography
GEOS 210 Oceanographic Processes
GEOS 215 Climate Changes
GEOS 255 Environmental Observation
GEOS 309 Modern Climate
GEOS 324 Corals and Sea Level

**Sediments and Life:**
GEOS 101 Co-Evolution of Earth and Life
GEOS 103 Global Warming and Environmental Change
GEOS 201 Geomorphology
GEOS 212 Paleobiology
GEOS 302 Sedimentology
GEOS 312T Mass Extinctions
GEOS 314 Analytical Historical Geology

**Solid Earth:**
GEOS 102 Unfinished Planet
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Tectonic Geomorphology and Landscape Evolution
GEOS 301 Structural Geology
GEOS 303 Igneous and Metamorphic Petrology

Geosciences major requirements for students who entered Williams before fall 2019:

At least one and at most two 100-level courses:
GEOS 100 Introduction to Weather and Climate
GEOS 101 The Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change the Reshaping of Landscapes
GEOS 104 Oceanography

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology
At least two 300-level courses selected from this group:

GEOS 301 Structural Geology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.
FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

GEOS 12 (W) Geology of the National Parks

Cross-listings: ENVI 12 GEOS 12

Primary Cross-listing
A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text PARKS AND PLATES and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student’s choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately $150 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 12 GEOS 12

Not offered current academic year

GEOS 22 (W) Geosciences Research
Students will spend part of Winter Study doing fieldwork collecting data. Back at Williams, they will analyze the data. Each student will have responsibility for a subset of the data, and the individual sub-projects will contribute to the overall research.

Class Format: to be arranged with instructor
Requirements/Evaluation: final project
Prerequisites: two Geosciences courses; permission of the instructor required before registering for the course
Enrollment Limit: 3
Expected Class Size: 3
Grading: pass/fail only
Materials/Lab Fee: $0

GEOS 31 (W) Senior Thesis: Geosciences
To be taken by students registered for Geosciences 493-494.
Class Format: thesis
Grading: pass/fail only
Distributions: (D3)

Winter 2020
HON Section: 01 TBA Mea S. Cook

GEOS 99 (W) Independent Study: Geosciences
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: (D3)

Winter 2020
IND Section: 01 TBA Mea S. Cook

GEOS 100 (S) Introduction to Weather and Climate
Cross-listings: GEOS 100 ENVI 100
Primary Cross-listing
How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop a basic understanding of earth’s climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.
Class Format: lecture
Requirements/Evaluation: Lab assignments, a midterm, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first-years and sophomores
Expected Class Size: 40
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 101 (F) The Co-Evolution of Earth and Life
Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing
Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture; one laboratory per week plus one all-day field trip
Requirements/Evaluation: evaluation will be based on lab work, short quizzes, midterms, an independent project, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: underclassmen
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)

GEOS 102 (S) An Unfinished Planet
The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still
strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

Class Format: lecture, three hours per week; lab (several involving field work), two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: evaluation will be based on two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

GEOS 103  (F)  Global Warming and Environmental Change

Cross-listings: GEOS 103  ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: evaluation based on written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses
GEOS 104  (F)  Oceanography

Cross-listings:  GEOS 104  ENVI 104  MAST 104

Primary Cross-listing

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts.

Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation:  evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam

Prerequisites:  none

Enrollment Limit:  48

Enrollment Preferences:  first-year and sophomore students, MAST concentrators

Expected Class Size:  48

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 106  (F)  Being Human in STEM  (DPE)

Cross-listings:  GEOS 106  PHYS 106  STS 106

Secondary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students’ abilities to participate in STEM fields.

Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

Class Format:  Class discussions, group project work (out of class time required)

Requirements/Evaluation:  Short response papers, class discussion participation, leading class discussions, group work, and final project.

Enrollment Limit:  15

Enrollment Preferences:  DIV III majors; statement of interest may be requested if course over-enrolls

Expected Class Size:  15

Grading:  no pass/fail option,  yes fifth course option

Unit Notes:  Does not count towards GEOS or PHYS major credit
Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 106 (D3)  PHYS 106 (D3)  STS 106 (D2)

Difference, Power, and Equity Notes: This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

GEOS 201  (F)  Geomorphology

Cross-listings:  ENVI 205  GEOS 201

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: evaluation will be based on two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

GEOS 202  (S)  Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

GEOS 203  (F) Field Methods and Structural Geology  (WS)
The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures and the large scale forces responsible for crustal deformation. The laboratories introduce students to best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, geologic maps and cross sections, folds, and faults. Students will develop skill for presenting field data in papers, figures, and oral presentations.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week
Requirements/Evaluation: short weekly writing assignments, two 10-page papers based on field trips, and a one-hour exam
Prerequisites: any 100-level Geosciences course or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $15 for field supplies
Distributions: (D3)  (WS)
Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip for evaluation by the instructor and peers. The shorter assignments will be incorporated in the field reports. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 205  (F) Economic Geology and Earth Resources
Cross-listings:  ENVI 207  GEOS 205
Primary Cross-listing
"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging-all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week; one 3 hour lab per week, including some field labs
Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project
Prerequisites: one 100-level GEOS course or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: sophomores and Geosciences majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option

GEOS 212 (S) Paleobiology
Cross-listings: BIOL 211 GEOS 212
Primary Cross-listing
The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of
extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture/laboratory; field trip to the Paleozoic of New York State

Requirements/Evaluation: lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

GEOS 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: based on weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

GEOS 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture, three hours per week; one three-hour lab per week
Requirements/Evaluation: evaluation will be based on lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data
Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Geosciences majors
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

GEOS 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Primary Cross-listing

This course will examine the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises.

Class Format: lecture and lab
Requirements/Evaluation: one mid-term and one final exam, lab exercises, class participation
Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 220 (S) Evolution of and on Volcanic Islands

**Cross-listings:** ENVI 219  GEOS 220

**Primary Cross-listing**

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

**Class Format:** tutorial

**Requirements/Evaluation:** evaluation based on five written papers.

**Prerequisites:** 100-level GEOS course or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** geosciences majors and students with a demonstrated interest in geosciences

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

**Cross-listings:** GEOS 221  ENVI 222

**Primary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate.
Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Class Format: tutorial

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: second-year students, Geosciences and Environmental Studies third- and fourth-year students

GEOS 234 (S) Introduction to Materials Science (QFR)

Cross-listings: PHYS 234 GEOS 234

Secondary Cross-listing

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week), plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: based on weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

GEOS 250 (S) Tectonic Geomorphology and Landscape Development (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. Tectonic geomorphology explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift,
methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate.

**Class Format:** after an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

**Requirements/Evaluation:** five 4- to 5-page papers based on journal articles

**Prerequisites:** at least one of the following courses: GEOS 101, 102, 201, 202, 301, 302, 303 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**GEOS 255 (F) Environmental Observation**

**Cross-listings:** GEOS 255  ENVI 255

**Primary Cross-listing**

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

**Class Format:** lecture

**Requirements/Evaluation:** labs, quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

LAB Section: 02 R 1:00 pm - 4:00 pm Ronadh Cox

GEOS 303 (F) Igneous and Metamorphic Petrology
Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks--volcanic, plutonic, and metamorphic--that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present.

Class Format: lecture/discussion, three hours per week; laboratory, three hours per week; several field trips including one full day trip to central New Hampshire

Requirements/Evaluation: evaluation will be based on lab work, one hour test, and a final exam

Prerequisites: GEOS 202 or permission of instructor

Enrollment Limit: none

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

LAB Section: 02 W 1:00 pm - 4:00 pm Bud Wobus

GEOS 309 (F) Modern Climate

Cross-listings: GEOS 309 ENVI 209
What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects—like the albedo feedback associated with sea ice and glacier loss—and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: lecture and lab
Requirements/Evaluation: a series of lab projects, a midterm, and a final exam
Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor
Enrollment Limit: 24
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 312 (S) Mass Extinctions: Patterns and Processes

Over the last 542 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct and groups like the dinosaurs vanished from the planet after over 100 million years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day.

Class Format: tutorial
Requirements/Evaluation: evaluation will be based on four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set
Prerequisites: GEOS 101 or GEOS 212; or permission of instructor + any 200 level GEOS course
Enrollment Limit: 10
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Not offered current academic year

GEOS 314 (S) Analytical Historical Geology (QFR)

In this course you will learn to collect, interpret, and analyze deep time paleontological, stratigraphic, and sedimentological records through readings, labs, and projects all coordinated around a week long spring break trip to explore the House Range of Utah. The Cambrian and Ordovician successions of Utah's West Desert offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology
and stratigraphy. Labs will focus on skill building including learning basic coding in R, and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including geological mapping, measuring stratigraphic section, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will determine what data we will collect in the field. Examples might be trilobite taxonomy and phylogenetic analyses, quantitative biostatigraphic correlation using conodont fossils, reconstructing paleoenvironment based on sedimentological analyses of thin sections, or building a sequence stratigraphic framework for a subset of the field locality.

Class Format: weekly lectures, paper discussions, and hands-on labs

Requirements/Evaluation: short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project

Prerequisites: GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 324, GEOS 401, GEOS 302, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: junior and senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

GEOS 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Primary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Class Format: lecture/laboratory

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 324 (D3) ENVI 324 (D3) GEOS 324 (D3)
GEOS 401  (F) Global Tectonics and the Rise of Mountains  (WS)
Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: tutorial with weekly one-hour meetings; in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $15 for field supplies

Distributions: (D3)  (WS)

Writing Skills Notes: Six 5- to 10-page papers throughout the semester based on data collected during field trips (3) and journal articles (3). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 404  (S) Coastal Processes and Geomorphology  (QFR)

Cross-listings:  MAST 404   ENVI 404   GEOS 404

Primary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

Prerequisites: GEOS 104, GEOS 210, or permission of instructor

GEOS 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: GEOS 405 ENVI 405

Primary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Class Format: seminar/lab
Requirements/Evaluation: evaluation will be based on seminar discussions, papers, labs and final project
Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303
Enrollment Limit: 10
Enrollment Preferences: senior Geosciences majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Class Format: seminar; two lecture/seminars a week plus a lab
Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Geoscience majors

Spring 2020
STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is a compact intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case.

THE CERTIFICATE IN GERMAN

To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.
Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

**Required Courses**

- German 101
- German 102
- German 103
- German 104
- German 201

**Elective Courses**

- at least one course (in German or English) on German cultural history (literature, art, drama, music)
- at least one course (in German or English) on German intellectual, political, or social history

**THE MAJOR**

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

**Examples of appropriate courses in other departments are:**

- Art History 267 Art in Germany: 1960 to the Present
- History 239 Modern German History
- History 338 The History of the Holocaust
- Music 108 The Symphony
- Music 117 Mozart
- Music 118 Bach
- Music 120 Beethoven
- Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

**THE DEGREE WITH HONORS IN GERMAN**

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**GERM 30 (W) Honors Project: German**

To be taken by honors candidates following other than the normal thesis route.
Class Format: honors
Grading: pass/fail only
Distributions: (D1)

Winter 2020
HON Section: 01    TBA     Helga Druxes

**GERM 31 (W) Senior Thesis: German**
To be taken by students registered for German 493-494.

Class Format: thesis
Grading: pass/fail only
Distributions: (D1)

Winter 2020
HON Section: 01    TBA     Helga Druxes

**GERM 99 (W) Independent Study: German**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D1)

Winter 2020
IND Section: 01    TBA     Helga Druxes

**GERM 101 (F) Elementary German**
German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

Class Format: lecture/discussion; meets five days a week
Requirements/Evaluation: active class participation, written homework, short compositions, oral exercises and tests
Extra Info: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken
Prerequisites: none
Enrollment Limit: 18
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

Fall 2019
LEC Section: 01    M-F 10:00 am - 10:50 am     Gail M. Newman
GERM 102 (S) Elementary German

German 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. This language course is conducted in German.

Class Format: seminar
Requirements/Evaluation: active class participation, midterm & final exams, essays, quizzes, homework
Extra Info: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken
Prerequisites: GERM 101 or equivalent
Enrollment Limit: 18
Enrollment Preferences: first-year students
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

Spring 2020
SEM Section: 01 M-F 10:00 am - 10:50 am Natalie E. Lozinski-Veach

GERM 103 (F) Intermediate German I

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, the students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts, to develop and consolidate students’ speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The course is taught in German. Active and dedicated participation including homework is expected.

Class Format: seminar
Requirements/Evaluation: active class participation, midterm and final exams, quizzes, essays, homework
Prerequisites: GERM 102 or equivalent
Enrollment Limit: 18
Enrollment Preferences: first-year students
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Fall 2019
SEM Section: 01 MWF 10:00 am - 10:50 am Christophe A. Kone

GERM 104 (S) Intermediate German II

The prerequisite to all advanced courses in German. Practice in speaking and writing; reading in a variety of contemporary texts ranging from interviews to social documentary to short stories. Conducted in German.

Class Format: discussion, small group work
Requirements/Evaluation: daily short writing assignments, small group work, midterm, and final
Prerequisites: GERM 103 or equivalent
Enrollment Limit: 20
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Spring 2020
LEC Section: 01    MWF 10:00 am - 10:50 am     Christophe A. Kone

GERM 118  (F)  Animal Subjects  (DPE)
Cross-listings: COMP 118  GERM 118
Secondary Cross-listing
Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Class Format: tutorial
Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 8
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 118 (D1)  GERM 118 (D1)

Difference, Power, and Equity Notes: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight.

Not offered current academic year

GERM 120  (S)  Turbodeutsch: Accelerated Elementary German
An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Class Format: seminar
Requirements/Evaluation: active participation, tests, quizzes, final exam
Prerequisites: students with demonstrated need to take the language in only one semester; students also need to show a strong commitment to learning German
Enrollment Limit: 12
Enrollment Preferences: students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German
GERM 201  (F)  Reisefieber: Germans On the Road for Adventure, Wealth, Escape

We will investigate potent myths of North America and Africa that fuelled German emigration and adventurism, and we will also look at inner-German travel stories. Our subjects are from diverse backgrounds and eras: Glikl, a Jewish businesswoman and mother of fourteen deals in pearls and gold in the seventeenth century, Johann Jacob Astor makes a fortune in the fur trade and real estate, in 1882, Hermann, a young worker exchanges his cramped life in an industrial slum for the Midwest, in 1909, a German worker travels to Cameroon to build a railway line through the jungle, in 1923, Martha, a young single woman, ships out from Bremerhaven to work in the United States, in 1988, Freya, a GDR peace activist is deported to the West, the 2016 documentary Heymatloz chronicles the escape of 1,000 German-Jewish academics from Nazi Germany to Atatürk's Turkey. We may also analyze films and tales about the potent myth of the "Wild West" and noble Indians, promoted by nineteenth-century bestselling author Karl May, and their afterlife in contemporary movies.

Class Format: seminar
Requirements/Evaluation: three short oral presentations, midterm, and 10-page final project
Prerequisites: GERM 104 or see instructor
Enrollment Limit: 15
Enrollment Preferences: German majors
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Materials/Lab Fee: reader packet
Distributions: (D1)

GERM 202  (S)  German Comics

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Tim Dinter, Line Hoven, Kati Rickenbach, and Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz, and Elke Steiner, not to forget German mangas Bloody Circus by Jürgen Seebeck! The course will also address a variety of genres such as humor with Der bewegte Mann by Ralf König, biography with Schiller by Horus, and autobiography with Smalltown Boy by Andreas Michalke, and Held by Flix. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. This course is conducted entirely in German.

Class Format: seminar
Requirements/Evaluation: three 3- to 5-page paper and one final project
Prerequisites: GERM 104 and GERM 201
Enrollment Limit: 19
Enrollment Preferences: German majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
GERM 202 (S) Hansestadt Hamburg

"Wenn Du in Hamborder Hopn platt snacken kannst, dann geiht immer eine Dör mer auf". Hamburg, the second largest city in Germany (with 1.8 million inhabitants), always had a particular significance within German cultural consciousness. Part of the Hanseatic League since the Middle Ages, the Free City of Hamburg quickly became an important commercial center in Northern Europe and a prosperous city of traders and merchants. Located on the river Elbe and in close proximity to the North Sea, the city-state Hamburg is still a major port city which has long benefited trading activities and fostered an exposure to other cultures. Called the gateway to the world (because the port was for a long time the gateway to the Americas) and the Venice of the North (the city is surrounded by water and features more canals, streams, and bridges than Amsterdam), later on completely destroyed by the World War II bombing raids, Hamburg is a city of contrasts: infamous for its dialect (Plattdeutsch) as well as its red light district (St Pauli), renowned for its journalism (Der Spiegel, Die Zeit) and culture scene, famous for its culinary specialties, (the burger might have been invented there) and its sports culture (soccer, handball, basketball), Hamburg has a rich past and a multicultural present that this course will examine. In order to gain a deeper insight into the geography, history, and culture of this fascinating city, we will read the autobiography by Hans-Jürgen Massaquoi, novels by Uwe Timm, short stories by Yoko Tawada and Siegfried Lenz, listen to songs by Hans Albers, Wolf Biermann, Udo Lindenberg, the Hip Hop band Fettes Brot, and watch movies by Fatih Akin, Sandra Nettelbeck, Christian Alvart, Özgür Yildirim, and Leander Haußmann. Taught in German.

Class Format: seminar
Requirements/Evaluation: oral presentations, four 3- to 5-page papers in German, midterm and final exams
Prerequisites: GERM 201 or equivalent
Enrollment Limit: 12
Enrollment Preferences: German majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

GERM 202 (S) Stranger Things: The German Novella

Goethe’s famous description of the novella as an "unheard of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. As we trace the development of the novella over the course of two hundred years of German literary history, we will explore how the eerie phenomena at the genre's core reflect specific historic moments only to transcend them. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? Taught in German.

Class Format: seminar
Requirements/Evaluation: three 2-page critical responses, oral presentation, 6-page final paper
Prerequisites: GERM 201 or equivalent
Enrollment Limit: 20
Enrollment Preferences: German majors
Expected Class Size: 8
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

GERM 209 (S) Green Germany: Literature, Film, and the Environment

Today, Germany is known as a world-wide leader in environmental policies, sustainable energy, and conservation efforts. This “green” culture,
however, is not a new phenomenon, but has long constituted an essential part of German identity. In this course, we will trace Germany's relationship with the environment over the course of 200 years of cultural production. Among other things, we will consider the Romantic fascination with the sublime powers of an uncontrollable wild nature, discuss the ecological underpinnings of Nazi ideology, analyze the effects of the nuclear disaster in Chernobyl on German society, and read about the role recycling currently plays as a practice of integration for refugees. Including texts and films by Alina Bronsky, Ilija Trojanow, Ludwig Tieck, Christa Wolf, Rainer Maria Rilke, Baran bo Odar and Jantje Friese, and Doris Dörrie. Taught in German.

Class Format: Seminar

Requirements/Evaluation: oral presentation, bi-weekly 1-page response papers, final project

Prerequisites: GERM 201 or equivalent

Enrollment Limit: none

Enrollment Preferences: German majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

GERM 276 (S) Black Europeans

Cross-listings: COMP 276 GERM 276 AFR 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Class Format: tutorial

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years, sophomores, and juniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2020
GERM 280 (F) Art at its Limits: Representing the Holocaust (DPE) (WS)

Cross-listings: COMP 280 JWST 280 GERM 280

Primary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman’s graphic novel Maus really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró’ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

Class Format: Seminar

Requirements/Evaluation: three 2-page critical responses, oral presentation, final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German and Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Fall 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Natalie E. Lozinski-Veach

GERM 300 (F) Mannweiber: Masculine Women in German Culture

The German word “Mannweib” is a literal translation of the Greek “androgynous” and is a derogatory term for a woman who acts in a masculine way. This survey course examines the recurrence of “masculine femininity” in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address. We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose. We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. Conducted in German.

Class Format: seminar
**GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall**

**Cross-listings:** GERM 304  WGSS 304

**Primary Cross-listing**

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Elsner, *Riesenzwerge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, *Faserland*, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

**Class Format:** tutorial

**Requirements/Evaluation:** alternating 4-page tutorial papers, and 2-page critiques

**Prerequisites:** GERM 202 and permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** German majors

**GERM 310 (S) The Holocaust in the German Imagination**

How do we think about an event that unsettles the very notion of representation? An indelible part of German history and culture, the Holocaust continues to challenge the artistic imagination by simultaneously calling for and resisting interpretation. This course examines the various ways in which German-speaking writers, artists, and directors have responded to this call since the 1930s. We will explore questions of memory and postmemory, the entanglements of trauma, guilt, and testimony, as well as the tensions and continuities between Germany's rich cultural heritage and portrayals of the Holocaust. Taking into consideration different forms of artistic expression, such as literature, film, and visual art, including sites of commemoration, this class will trace the relationship between past and present. What might it mean to write and think in the language of the perpetrators? How do texts by Holocaust survivors and first-hand witnesses relate to those created by later generations? What are the differences between West and East German representations of the Shoah, and how do they differ from how immigrants in Germany or Austrian artists engage with the event? Among others, we will read texts by Paul Celan, Nelly Sachs, Anna Seghers, Ruth Klüger, Ingeborg Bachmann, Elfriede Jelinek, Peter...
Weiss, W. G. Sebald, and Zafer Senocak, as well as watch films by Michael Haneke, Max Färberböck, Frank Beyer, Volker Schlöndorff, Stefan Ruzowitzky, and Caroline Link. Conducted in German.

Class Format: seminar

Requirements/Evaluation: short critical papers, oral presentation

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: prospective German majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

GERM 316 (S) "Wer ist wir?": Recent Debates over Multiculture in Germany

German chancellor Angela Merkel controversially claimed in 2010: "Multikulti ist gescheitert." (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany's integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the "economic miracle." How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidids, Rita Süssmuth and others.

Class Format: seminar

Requirements/Evaluation: four 5-page papers in German

Prerequisites: GERM 202 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: German majors, but open to all with appropriate language skills

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

GERM 317 (F) The New Woman in Weimar Culture (WS)

Cross-listings: GERM 317 WGSS 317

Primary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. Taught in German.

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature
Enrollment Limit: 19

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D2)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Christophe A. Kone

GERM 321 (F) Lust, Liebe und Gewalt

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include—if it provoke—it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. Conducted in German.

Class Format: seminar

Requirements/Evaluation: papers and oral presentations

Prerequisites: GERM 201 or the equivalent

Enrollment Limit: 10

Enrollment Preferences: German majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE)

Cross-listings: COMP 347 GERM 331

Primary Cross-listing

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of The Sound of Music, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series The Archives of Silence, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the
blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

Class Format: tutorial

Requirements/Evaluation: five 5-page papers, one revision, discussion

Prerequisites: for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

Enrollment Limit: 10

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 347 (D1) GERM 331 (D1)

Difference, Power, and Equity Notes: he course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Not offered current academic year

GERM 334  (S)  Playing with Language in Austrian Literature: Interpretation, Translation, Writing  (WS)

In his Chandos-Brief, Hugo von Hofmannsthal famously details a writer's crisis of language, in the process creating, ironically, a stunningly beautiful piece of linguistic art. Since 1902, when Hofmannsthal presented his paradoxical fictional manifesto, language has preoccupied many Austrian writers. This course will provide the opportunity to explore the intricacies of the German language via three routes: the study and interpretation of Austrian short stories from the twentieth and twenty-first centuries, experiments with translating poetry and prose from German to English, and creative writing in German. The latter will take place in the context of workshops with the contemporary Austrian writer Gabriele Petricek, who will spend two weeks in Williamstown as a Writer-in Residence. In addition to Hofmannsthal, authors read might include Arthur Schnitzler, Joseph Roth, Franz Kafka, Ingeborg Bachmann, Ilse Aichinger, Ernst Jandl, Elisabeth Reichart, and Gerhard Roth.

Class Format: Seminar

Requirements/Evaluation: active class participation, two 3- to 5-page analytical papers, one short translation plus a discussion of translation process, one short creative piece

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Two analytical papers, both revised; one translation, including a written reflection on process, and a workshopped creative piece. All writing in German.

Spring 2020

SEM Section: 01  MR 1:10 pm - 2:25 pm     Gail M. Newman

GERM 339  (F)  Posthuman Ecologies: Bodies, Environments, Art  (DPE) (WS)

Cross-listings: ENVI 340  GERM 339  COMP 339

Primary Cross-listing
What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of own bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include Mad Max: Fury Road, Metropolis, Ex-Machina, and episodes of West World and Black Mirror.

Class Format: Seminar
Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019
SEM Section: 01  TF 1:10 pm - 2:25 pm  Natalie E. Lozinski-Veach

GERM 401  (F)  Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism  (DPE)
Cross-listings:  COMP 401  WGSS 401  GERM 401
Secondary Cross-listing

Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: seminar; seminar three hours per week
Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper
Prerequisites: 300-level course
Enrollment Limit: 25
Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Materials/Lab Fee: course books and reader packet
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 401 (D1) WGSS 401 (D2) GERM 401 (D1)

Difference, Power, and Equity Notes: This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

Fall 2019

Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
GERM 515 (F) Reading German for Beginners

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for Art History and Criticism. In the first semester students learn the elements of grammar and acquire a core vocabulary. They begin reading and translating a variety of short texts.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on active class participation, homework, quizzes, tests, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 12

Grading: pass/fail option only

Distributions: (D1)

GERM 516 (S) Readings in German Art History and Criticism

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. They also learn how to work with dictionaries, encyclopedias, and other reference works. Texts are selected from fundamental works of art history and criticism and from the writings related to concurrent seminars in the Graduate Program. By the end of the course they will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on active class participation, homework, quizzes, tests, and a final project

Prerequisites: GERM 515 or equivalent preparation (placement test)

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 15

Grading: pass/fail option only

Distributions: (D1)
An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements
To complete the concentration, students must take a section of Global Studies 101; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in the track.

Global Studies 101
All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

Tracks
After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Area Tracks
- African Studies
- East Asian Studies
- Latin American Studies
- Middle Eastern Studies
- Russian and Eurasian Studies
- South and Southeast Asian Studies

Thematic Tracks
- Borders, Exile and Diaspora Studies
- Economic Development Studies
- Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

Senior Exercise
All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class or in a Global Studies colloquium, or in both.
Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student's engagement through comparative inquiry.

Honors
A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships
Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ
Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

GBST 101 (S) America and the World
Cross-listings: PSCI 120 GBST 101 LEAD 120
This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a “grand strategy.” By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion
Requirements/Evaluation: short papers, class participation, and final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-years and sophomores
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.
Class Format: lecture
Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Cross-listings: GBST 117  HIST 117  ASST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 117 (D2) HIST 117 (D2) ASST 117 (D2)

Writing Skills Notes: Weekly reading response (less than 1000 words), several short papers leading to a final research paper. Peer reviews and instructor feedback of all written work to improve writing skills.
GBST 210  (S)  The Challenge of ISIS  

Cross-listings:  HIST 210  ANTH 210  GBST 210  ARAB 210  REL 240  

Secondary Cross-listing  

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.  

Class Format:  lecture  

Requirements/Evaluation:  blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)  

Prerequisites:  none

PSCI 213 (D2) GBST 211 (D2)
GBST 212  (F)  Foundations of China

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Class Format: lecture
Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option

GBST 213  (F)  Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin’s Russia  (DPE)

Secondary Cross-listing
Since Vladimir Putin’s rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual” propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. All readings will be in English, and all films with have English subtitles.

Class Format: seminar
Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none

GBST 214 (S) Asian-American Identities in Motion  (DPE)

Cross-listings: THEA 216  DANC 216  GBST 214  AMST 213

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Class Format: seminar

Requirements/Evaluation: evaluation includes reading responses and essays, class participation, and presentations

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

GBST 215 (F) Performance Ethnography  (DPE)

Cross-listings: DANC 214  GBST 215  THEA 215  AMST 214  ANTH 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or
performance experience is assumed or required.

Class Format: community-based fieldwork

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 214 (D1) GBST 215 (D2) THEA 215 (D1) AMST 214 (D2) ANTH 215 (D2)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

GBST 216 (S) Urbanism in the Ancient World

Cross-listings: GBST 216 ANTH 216

Secondary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Class Format: tutorial

GBST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: GBST 221 ASST 221 HIST 221

Secondary Cross-listing
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

GBST 228 (S) Performance Practices of Global Youth Cultures
Cross-listings: GBST 228 THEA 228
Secondary Cross-listing
This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined “youth” by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

Class Format: seminar course based on reading and discussion
Requirements/Evaluation: includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation

GBST 230 (F) Who was Muhammad?
Cross-listings: REL 230 GBST 230 ARAB 230

Secondary Cross-listing

Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the "facts" of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad's life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar
Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

GBST 234 (F) What is Islam? (DPE)
Cross-listings: ARAB 234 GBST 234 REL 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

GBST 236  (S) Reading the Qur'an

**Cross-listings:** ARAB 236  COMP 213  GBST 236  REL 236

**Secondary Cross-listing**

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

**Class Format:** seminar

GBST 241  (S) History of Sexuality

**Cross-listings:** GBST 241  REL 241  HIST 292  WGSS 239

**Secondary Cross-listing**

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

**Class Format:** seminar

GBST 244 (S) Mediterranean Journeys (DPE)
Cross-listings: GBST 244 COMP 244

Secondary Cross-listing
Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of the so-called "migrant intellectuals and artists" who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as a literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Behind the medium of a national language, new cultures and identities are claiming inclusion into the core of the social fabric by speaking out from a marginal position. We read both literary works (Ali Farah, Guene, Lakhous, Scego) and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films and documentaries (Carpignano, Crialese, Godard).

Class Format: seminar
Requirements/Evaluation: weekly writing assignments, midterm and final exams, final paper, oral presentation

GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)
Cross-listings: AMST 249 GBST 246 THEA 246

Secondary Cross-listing
This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Class Format: Seminar
Requirements/Evaluation: 2 5-page critical essays, reading responses, class presentations, and active discussion participation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: sophomores and juniors
Expected Class Size: 15

GBST 247 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE)
Cross-listings: RUSS 248 GBST 247 SOC 248

Secondary Cross-listing
Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Class Format: tutorial
Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Anthropology, Sociology, and Russian majors

GBST 312 (F) The Mughal Empire: Power, Art, and Religion in India
Cross-listings: HIST 312 ASST 312 REL 312 GBST 312
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Cross-listings: GBST 322 ANTH 322 ENVI 322

Secondary Cross-listing

What is waste? What is filth? Why do titles or categories of sanitation workers—"garbage man," for instance—bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus—work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: lecture/discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

GBST 326 (S) Security in Africa

Cross-listings: GBST 326 PSCI 326

Secondary Cross-listing

Africa is the world's second largest and second most-populous continent. This course will explore this diverse region through the lens of human security which takes a broader understanding of security challenges and how they affect different individuals. We will begin by placing security challenges in Africa in the context of a colonial legacy and the changing nature of warfare. We will then examine specific security challenges including governance issues, gender relationships, and resource challenges, through the use of case studies. We will conclude by examining responses by the U.S. and UN to perceived security challenges in Africa.

Class Format: seminar

Requirements/Evaluation: short blog posts; research paper sections throughout semester; final research paper (15-20 pages); class participation

Prerequisites: PSCI 202 or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: political science majors

Spring 2020

SEM Section: 01 TR 11:20 am - 12:35 pm Phoebe G. Donnelly
Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

**Class Format:** seminar

**Requirements/Evaluation:** weekly postings of 1-page critical response papers and research paper or ethnographic final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** seniors, juniors, majors in ANSO, AFR, or ASST

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?"

The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there is the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight children and adults all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, rewriting, faithfulness, and ethics, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

**Class Format:** seminar with some Friday workshops

**Requirements/Evaluation:** active and substantive class participation; leading discussion; frequent short writing assignments; final project

**Prerequisites:** students must have at least three years of college-level second-language instruction, or the equivalent (advanced proficiency), or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** COMP majors; language majors; language students
GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: GBST 351 PSCI 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

Class Format: lecture/discussion, then seminar

Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 351 (D2) PSCI 351 (D2)

Difference, Power, and Equity Notes: The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

GBST 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Secondary Cross-listing

Geographical fate has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, and mixed feelings about the U.S. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, we consider politics and cultural policies around Mexican national identity in the twentieth century; rapid urbanization, especially in the valley of Mexico; the impact of migration and the rapid development of the northern border region; and the conflict between an emerging civil society and political corruption. After a brief review of recent elections and other political events, we turn to a seminar-style discussion of student research projects.

Class Format: lecture, discussion, then seminar
**Requirements/Evaluation:** map quiz, two short papers, and a 12- to 15-page research proposal

**Prerequisites:** some knowledge of Mexican history

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors and seniors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 352 (D2) PSCI 352 (D2)

**Difference, Power, and Equity Notes:** One unit of the course directly engages the tension between diversity and national identity in 20th century Mexico, while another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA.

**GBST 356 (S) The Myth of Venice and its Modern Aftermath**

**Cross-listings:** ENGL 358  GBST 356  COMP 356

**Secondary Cross-listing**

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron’s *Childe Harold's Pilgrimage*, John Ruskin’s *Stones of Venice*, as well as full readings of Thomas Mann’s *Death in Venice*, Marinetti’s Futurist manifestos, Italo Calvino’s *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti’s *Senso* and *Death in Venice* and Nicholas Roeg’s *Don’t Look Now*. This course is offered in English; all texts are provided in translation.

**Class Format:** seminar

**Requirements/Evaluation:** mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

**Prerequisites:** familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

**Enrollment Limit:** 20

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**GBST 358 (S) Religion and Law (DPE)**

**Cross-listings:** GBST 358  REL 358

**Secondary Cross-listing**

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will
look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

**Class Format:** seminar

**Requirements/Evaluation:** reading response, two essays, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 358 (D2) REL 358 (D2)

**Difference, Power, and Equity Notes:** Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

**GBST 369 (S) Indigenous Narratives: From the Fourth World to the Global South**

**Cross-listings:** GBST 369 COMP 369 HIST 306 ARAB 369

**Secondary Cross-listing**

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5-7 pages)

GBST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean

Cross-listings: GBST 391 ASST 391 HIST 391

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Class Format: seminar

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

GBST 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420  ARTH 420  ENVI 420  EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: seminar; with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

GBST 488  (S) Gandhi: Nationalism, Philosophy, and Legacy

Cross-listings: GBST 488  HIST 488  REL 388  ASST 488

Secondary Cross-listing

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: tutorial; students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester
Prerequisites: none
Enrollment Limit: 10

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

Classics: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

Classical Civilization: (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

Senior Colloquium: Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

Classical Civilization Courses: The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.
STUDY ABROAD

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

CLGR 99 (W) Independent Study: Greek

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D1)

Winter 2020
IND Section: 01 TBA Edan Dekel

CLGR 101 (F) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second
semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam

Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken

Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

Enrollment Limit: 15

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01 MWF 11:00 am - 12:15 pm Sarah E. Olsen

CLGR 102 (S) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, and a final exam

Extra Info: credit granted only if both semesters (CLGR 101 and 102) are taken

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

LEC Section: 01 MWF 11:00 am - 12:15 pm Kerry A. Christensen

CLGR 201 (F) Intermediate Greek

Reading of selections from Hesiod and from Plato, combined with grammar review. The primary goal of this course is to develop fluency in reading Greek. We will also read the texts closely to explore important continuities and changes in Greek culture between the archaic and classical periods. The emphasis will vary from year to year, but possible subjects to be explored include: the education and socialization of the community’s children and young adults; religion and cult practices; the performative aspects of epic (and choral) poetry and of prose genres like oratory and the philosophical dialogue; traditional oral poetry and storytelling and the growth of literacy; the construction of woman, of man; the development of the classical polis.

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on classroom participation, quizzes, tests, and a final exam

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01 MWF 8:30 am - 9:45 am Kerry A. Christensen
CLGR 401 (S) Homer: The Iliad

From the early archaic era through the classical and beyond, Homer's Iliad and Odyssey remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the Iliad in Greek and the entire epic in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

SEM Section: 01 MR 1:10 pm - 2:25 pm Sarah E. Olsen

CLGR 402 (S) Homer: The Odyssey

From the early archaic era through the classical and beyond, Homer's Iliad and Odyssey remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the Odyssey in Greek and the entire epic in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 404 (S) Tragedy

Tragedy was a hybrid genre invented in sixth-fifth century Athens, where tragic performances in the city's festival of the Greater Dionysia played a vital role in the democratic polis. This course will focus on reading in Greek a complete tragedy of Sophokles or Euripides; we will also read in translation several other tragedies, a satyr-play, and a comedy of Aristophanes. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Class Format: seminar/recitation/discussion

Requirements/Evaluation: evaluation will be based on contributions to class, several 1- to 2-page papers involving close textual analysis, perhaps a midterm exam, a final exam, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12
CLGR 405 (F) Greek Lyric Poetry

This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 409 (F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Class Format: seminar

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor
CLGR 414 (F) Thucydides

This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

Class Format: seminar

Requirements/Evaluation: class preparation and participation, a midterm exam, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01  MR 1:10 pm - 2:25 pm  Kerry A. Christensen

On leave Spring only: Professor J. Chapman, C. Dew, E. Siniawer, C. Whalen.

GENERAL STATEMENT OF GOALS
The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students’ intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students’ ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS
The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

First-Year Seminars and Tutorials (102-199): These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

Because first-year seminars and tutorials serve as an introduction to the study of history, only one course of each type may count toward the History major; these courses can also be used to meet the department’s group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.
Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492, 495): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

- Africa and the Middle East: 102-111, 202-211, 302-311, 402-411
- Asia: 112-121, 212-221, 312-321, 412-421
- Europe and Russia: 122-141, 222-241, 322-341, 422-441
- Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451
- United States: 152-191, 252-291, 352-387, 452-471
- Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

ADVISING

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

Required Courses in the Major
- One Major Seminar (History 301)
- At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses
- Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:
  - Group A: The History of Africa
  - Group B: The History of Asia
  - Group C: The History of Europe and Russia
  - Group D: The History of Latin America and the Caribbean
  - Group E: The History of the Middle East
  - Group F: The History of the United States and Canada
  - Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.
Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member’s agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department’s assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on “Historiography: Tacitus to Weber” that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. I'm not quite sure that I understand what "type" means here—the courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None recently.

HIST 10  (W)  North Adams: Past, Present and Future

Cross-listings: AMST 11  HIST 10

Primary Cross-listing

This class focuses on North Adams—the challenges, resources and assets of Massachusetts's smallest city and our neighbor. Readings, films, field trips and meetings with people who work with or lead nonprofits and civic organizations will introduce you to local history, contemporary issues, and plans for the city’s future cultural and economic development. Adjunct Instructor Bio: Annie Valk teaches U.S. history and oral history and supports faculty and students interested in public humanities projects. She has worked at Williams since 2014.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students preferred

Grading: pass/fail only

Materials/Lab Fee: $25

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 11 HIST 10

Attributes: EXPE Experiential Education Courses

Not offered current academic year

HIST 11  Excavating the Purple Bubble

People often describe Williams College as an "intense" place—a "purple bubble" with its own peculiar micro-culture. This bubble can be stressful,
exhausting, and work-obsessed, but also bursting with creative energy and a determination to change the world, not to mention creating experiences and relationships that become deeply nostalgic and lead to a lasting connection. How have these characteristic structures of feeling been built over time? In this course, we will attempt to build a picture of how the emotional cultures of Williams have evolved by excavating their histories. From the powerful emotions triggered by transitional moments in the College's history, such as feelings of inclusion and exclusion by women and people of color, to the everyday emotions of friendship, romance, and work stress, students will analyze materials from the college archives, the archive of the Record, and other sources of institutional memory to uncover the social history of emotions at Williams. Depending on enrollments, students will divide into research clusters focusing on particular topics, which might include: stress and work-obsession, turning points and change, wonder and discovery, nostalgias, staff morale, mental illness and wellness discourse, among other possible topics. Students will spend time in class discussing readings and curating a small collection of archival materials to be presented at the end of the course. Outside class, students will spend time in the archives. As a theoretical and methodological guide, we will draw primarily on scholarship from the sociology and history of emotion, including Norbert Elias, Cas Wouters, Raymond Williams, William Reddy, and Barbara Rosenswein.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: anthropology, sociology and history majors, followed by students' expression of interest
Grading:
Materials/Lab Fee: $0

Not offered current academic year

HIST 12 (W) The East is Red? Socialism in Asia
Cross-listings: ASST 12 HIST 12 PSCI 12
Secondary Cross-listing
This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, North Korea, Vietnam, and Cambodia, we will examine cases of "unsuccessful" socialist parties in Japan, Indonesia, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, M.N. Roy, etc), and cultural constructions such as revolutionary theatre, songs, and contemporary films. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we judge the effects of socialism in Asia? Evaluation will be based on two in-class presentations and a final research paper. Attendance and participation will also be taken into account. We will meet three times a week for two-hour sessions. Adjunct Bio: John Knight has a Ph.D in East Asian History with a focus on Modern China. He graduated in 2017 from The Ohio State University. He has previously taught East Asian and World History at the Rhode Island School of Design, Ohio State University, Capital University, and Seton Hall.

Requirements/Evaluation: 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: preference will be given to students majoring in Asian Studies, History, or Political Science
Grading: pass/fail only
Materials/Lab Fee: $15

This course is cross-listed and the prefixes carry the following divisional credit:
ASST 12 HIST 12 PSCI 12

Not offered current academic year

HIST 13 (W) Eyewitness to the Civil Rights Movement: Mississippi 1964-65
During sixteen months in 1964-65, the instructor worked as a civil rights organizer in rural Mississippi with the Student Nonviolent Coordinating Committee (SNCC). He witnessed and aided in the heroic efforts by black citizens to dismantle the pervasive structure of Jim Crow that had oppressed them for generations. He met relatively uneducated people with the stature of giants. What he encountered was an apartheid America--a
vicious police state reinforced by government and vigilante violence—beyond the understanding of most Americans and certainly beyond the imagination of young people today. The course will explore this transformative moment in recent American history through documentary film, popular music of the time and discussion. Topics include nonviolence and armed self-defense, the role of the black church, women and whites, Malcolm X and Black Power and the third party politics of the Mississippi Freedom Democratic Party. Students will read and discuss three books. Evaluation will be based on class participation and a final project in any media. It is the intent of the instructor to convey the immediacy that only first person experience can invoke. Adjunct Instructor Bio: Chris Williams worked as the college architect at Williams for many years. Now retired, he lives on the back roads of Vermont with his wife and hound dog.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: random drawing
Grading: pass/fail only
Materials/Lab Fee: approximately $85 for books

HIST 14 Loyalty and Righteousness: Female Knight Errants in the Chinese Tradition
The aura of the Chinese knight-errant's alternative universe (jianghu, lit. rivers and lakes) has never waned thanks to the thriving literature of Chinese martial arts. Recognized as the oldest genre of Chinese popular fiction still being written today, the martial arts novel constructs a fascinating human sociality where chivalry and altruism govern, stateless subjects wander, and heroic grace unfolds. This course will examine the literary, artistic, and social imagination of this jianghu in selected modern martial arts novels written by Jin Yong (aka Louis Cha Leung-yung) and Gu Long. It also compares Jin Yong's oeuvre, endorsed by die-hard fans, with the breathtaking yet controversial C(H)ollywood martial arts extravaganzas that have been released in the current millennium. Students will inquire into the themes of righteousness and law, self and state, martial arts and medicine, body and gender, and the martial arts world and postcolonial history; as well as traditional philosophical concepts of yin and yang, and "between the people" (minjian) and "all under heaven" (tianxia). Finally, we will explore the genre's aestheticism via literary and visual constructions in the cultural text.

Requirements/Evaluation: short paper and final project or presentation
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: students will be asked to write an essay to explain their interest and rationale for this course
Grading:
Materials/Lab Fee: $35 and cost of books

HIST 15 Contemporary Indian Society
With a population of nearly 1.4 billion, India is one of the fastest growing regions of Asia and the world. It is also the largest and most diverse country in South Asia. What are some of the most important social and political concerns in India today? How do Indians think of questions of culture and identity in a globally connected world? What are the interests and aspirations of India's youth? How are forces of nationalism and divisive politics defining Indian society today? In this course, we will explore these questions through the most recent non-fiction books on Indian history and society. We will also watch a number of documentaries that address some of these questions. The objective of the course is to engage students in lively discussion and debates about these issues that shape India today.

Requirements/Evaluation: participation in discussions, student-led discussions in addition to a 10-page paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: short written application
Grading:
Materials/Lab Fee: cost of books

Not offered current academic year
Kurt Vonnegut, an Indiana native and former General Electric employee, rose to international prominence during the second half of the twentieth century as a cult novelist, anti-war activist, socialist, and humanist. Readers from seemingly disparate parts of a divided world—from prairie towns in the American midwest to university halls in the Soviet Union to smoky cafés in de Gaulle’s Paris—developed a voracious appetite for cult classics like *Slaughterhouse-Five*, *Cat’s Cradle*, and *Breakfast of Champions*. What explains Vonnegut’s appeal both past and present? In what ways did his views on free speech, technology, war, nuclear weapons, gender, human rights, labor, the environment, and the flaws of humankind reflect or subvert the norms of the postwar and cold war worlds. This course explores Kurt Vonnegut's place in the postwar world as a novelist, thinker, and celebrity. In addition to reading works from the Kurt Vonnegut canon, we will read newspaper articles and literary criticism, watch a film and a handful of interview clips, to examine both the world that Vonnegut created and the world that created him.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors and juniors have priority

**HIST 20 (W) France under the Nazis 1940-45: Democracy Abandoned, Antisemitism Unleashed**

**Cross-listings:** ASTR 20  HIST 20

**Secondary Cross-listing**

France was Europe's cultural avatar in the 17th century, father of the Rights of Man in the 18th century, Art Capital of the World in the 19th Century, and essential in the 20th to victory in World War I. How did it find itself subservient to the dictates of a foreign ruling power in 1940 and helpless to prevent the usurpation of its democracy? How did France fail to protect the very rights of man that it had long-struggled to establish and achieve? In this course we will examine what happened politically and socially during the Vichy regime of 1940 to 1945. And when Germany's hegemony was upended in 1945 with the victory of the Allies in World War II, how did the French explain to those allies, and to themselves, how France had achieved its salvation? To explain all this, we will examine break-through historical studies from the 1970s, novels written at the time of the occupation and popular today, films of the era and beyond, as well as examples of analyses of French and foreign thinkers following the war and continuing into this century. Classes will meet twice a week for 2-3 hours. Students will be responsible for daily reading of secondary sources in the reading packets. They will view on Glow films from the Vichy era and beyond and be asked to analyze and share their impressions. Each student will be assigned a novel set in Vichy times; they will prepare a concise report for the group and 5-page paper explaining how the novel confirmed or countered their impressions of the era. Adjunct Instructor Bio: Ms. Bowden graduated magna cum laude from Vassar College, studying European history there, and subsequently at Columbia University. She has taught history at independent schools in New York and in the Queen's College graduate Education division.

**Requirements/Evaluation:** active class participation re readings and film topics, 5-page paper assessing assigned novel, thoughtful synopsis for fellow students

**Prerequisites:** none, though knowledge of French enriches the experience

**Enrollment Limit:** 12

**Grading:** pass/fail only

**Materials/Lab Fee:** $36 plus cost of books

**This course is cross-listed and the prefixes carry the following divisional credit:**

**HIST 30 (W) Workshop in Independent Research**

This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis and would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians define good research questions; become familiar with the historiography; and identify primary sources. Students will pursue their own research on any
topic of their own choosing for a 10-page final paper, and we'll use a workshop format to discuss the research and writing of that paper.

**Class Format:** independent research

**Requirements/Evaluation:** 10-page paper; weekly assignment

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** interest in course subject determined by questionnaire

**Grading:** pass/fail only

**Materials/Lab Fee:** $25

---

**HIST 31 (W) Senior Thesis: History**

To be taken by all senior honors students who are registered for HIST 493 (Fall) and HIST 494 (Spring), HIST 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.

**Class Format:** thesis

**Grading:** pass/fail only

**Distributions:** (D2)

---

**HIST 99 (W) Independent Study: History**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

**Distributions:** (D2)

**HIST 102 (F) West Africa through Women's Voices** (DPE) (WS)

**Cross-listings:** WGSS 102  HIST 102

**Primary Cross-listing**

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources--oral tradition, legal records, women's popular songs, Islamic pedagogical verse, personal correspondence and novels--we will consider how women's experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

**Class Format:** lecture

**Requirements/Evaluation:** discussion participation, map quiz, weekly response papers and a 10-page final academic paper or creative writing project
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 102 (D2) HIST 102 (D2)

Writing Skills Notes: Students will write short papers (2 pages) each week in response to a prompt about the assigned reading. Instructor will provide feedback on argument and content for each paper, with suggestions for improvement. Students will also write a 10-page review of a recent novel that integrates historical research. The review project will be broken down into multiple drafts throughout the semester, with feedback provided by the instructor and peers.

Difference, Power, and Equity Notes: Texts in this class lay the groundwork for discussions about how different groups of women in West Africa have experienced power and inequality along differences of gender, race, slave/free status, marital and motherhood statuses, religion, and class. Close readings of primary texts equip students to understand how women in West Africa have understood and responded to structures of power and inequality. Students analyze how historical narratives change when marginalized actors are prioritized.

Attributes: HIST Group A Electives - Africa

HIST 103  (F)  Growing up in Africa/Growing up African  (DPE) (WS)

Most African nations today are youthful: while the median age in the United States is 38 years, the median age on the African continent is just 19. Young Africans are portrayed both outside and inside the continent in strikingly contradictory ways: as victims of oppression, dangerous threats to social order, or the saviors of their society. But beyond these stereotypes, what is it like to be young in Africa? This tutorial introduces students to the extremely diverse experiences of childhood and adolescence across the continent, from the 1800s to the present. We will draw on scholarly research as well as novels and biographies. In particular, the course focuses on how young Africans have boldly responded to dominant expectations about their gender formation, sexuality, and their relationship to authority--responses which have often provoked broader social conflicts. The first half of the class examines examples of the lives of children and adolescents born during the eras of slavery, colonial rule and apartheid, and how those institutions changed previous relationships between African youth and their elders. The second half of the course considers attempts by post-colonial African state leaders to mobilize "the youth" as nation builders and manage their behaviors since the 1950s-and how young Africans have reacted. In the class, we will also consider how migration and emigration have impacted Africans' experiences of growing up outside their home communities. Throughout the semester, students will track how the definition of childhood, adulthood, and intermediary statuses (e.g. youth), has differed across time and place, while also reflecting on how they perceive their own process of "growing up."

Class Format: tutorial
Requirements/Evaluation: five tutorial papers (5 pages each) and five short response papers (2 pages each), alternating each week; one paper will be revised and resubmitted
Prerequisites: first-years and sophomores
Enrollment Limit: 10
Enrollment Preferences: first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with permission of instructor
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Every week one student will produce an argument-driven essay (~5 pages) on the assigned reading, while the other student will write a 2- to 3-page response. These roles will swap weekly. Instructor will provide regular feedback on argument, content, and structure of the essays and students will choose one essay to revise for resubmission at the end of the semester.

Difference, Power, and Equity Notes: The course looks at how people in Africa have been subject to various forms of social control because of their status as children or youth. At the same time, the examples studied emphasize the creative and powerful ways that young Africans have defined their lives in opposition to various structures of power. The struggles we will examine take place because of differences in age, but also of marital status,
social background, class, gender, and race.

Fall 2019

HIST 110  (S)  The Veil: History and Interpretations  (DPE) (WS)

Cross-listings: ARAB 215  WGSS 110  HIST 110

Primary Cross-listing

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Class Format: tutorial

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 115  (F)  The World of the Mongol Empire  (WS)

Cross-listings:  HIST 115  ASST 115

Primary Cross-listing

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler’s accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

Class Format: seminar

HIST 117  (S)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)

Cross-listings:  GBST 117  HIST 117  ASST 117

Primary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore
themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

**Class Format:** seminar

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**HIST 121 (F) The Two Koreas (WS)**

**Cross-listings:** ASST 121 HIST 121

**Primary Cross-listing**

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

**Class Format:** tutorial

**Requirements/Evaluation:** students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 10

HIST 134  (S)  The Great War  (WS)
In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for the East and Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Class Format: tutorial
Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques

HIST 135  (F)  The Coffeehouse from Arabia to the Enlightenment
Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

Class Format: seminar
Requirements/Evaluation: attendance and participation; three short analytical papers; a final research paper

HIST 137  (F)  Victorian Britain and the Anglo-Afghan Wars  (WS)
Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals; the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of Britain's Afghan wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and a final research paper (10-12 pages)
Prerequisites: first-year or sophomore standing
Enrollment Limit: 19
Enrollment Preferences: first-year students, and then sophomores who have not taken a 100-level seminar
Expected Class Size: 15-19
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write two document analyses (750 words) and two guided research essays (5 pages), all of which will be letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus and a rough draft will be required in advance of submission of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 140 (S) Crime and Punishment in Russian History (WS)
Cross-listings: HIST 140 RUSS 140
Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Class Format: tutorial
Requirements/Evaluation: A student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 10
Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

HIST 143  (F) Soccer and History in Latin America: Making the Beautiful Game  (WS)
This course examines the rise of soccer (fútbol/futebol) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about race, masculinity, and regional and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, a series of short papers, and an 8- to 10-page research paper
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 19
Enrollment Preferences: first year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course
Expected Class Size: 19
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write three 3-page papers on set topics. They will revise the first of these. Topics involve interpreting different kinds of sources as well as conflicting arguments. They will also write an 8- to 10-page research paper, with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 152  (S) The Fourteenth Amendment and the Meanings of Equality  (DPE) (WS)

Cross-listings: HIST 152 WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Class Format: seminar
Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to second years

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 152 (D2) WGSS 152 (D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 153 (S) Establishment & Exercise: Religion and the Constitution in the United States

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." This 100-level tutorial examines the constitutional history of conflicts over religion in the United States, and asks how the law has weighed religious freedom against other cultural values, legal rights, and social needs. This course will consider the following questions: How has the interpretation of the First Amendment's religious clauses changed over time? What happens when the establishment clause and free exercise clause come into conflict with each other? Is the American state secular? What is the difference between religious beliefs and moral beliefs? How have constitutional arguments about religion intersected with social movements and political culture? Topics will include: the origins and early interpretations of the religion clauses; the changing scope of constitutional protections for the beliefs and practices of religious minorities; controversies over religion in schools, workplaces, and public spaces; debates about tax exemptions for religious organizations; the rights of conscientious objectors; and the emerging conflicts between claims for religious liberty and anti-discrimination laws. This course examines the ways these conflicts illuminate tensions between the competing values of equality and liberty, and interrogates the ways that the very act of legal decision-making defines the boundaries of what counts as religion.

Class Format: tutorial

Requirements/Evaluation: weekly essays

Prerequisites: First-Year Students, and then Sophomores

Enrollment Limit: 10

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

HIST 154 (S) History of American Feminisms (DPE) (WS)

Cross-listings: HIST 154 WGSS 154

Primary Cross-listing

This class studies the historical development of feminist movements and ideas in the United States from the women's rights movement in the 19th
century to the present. The class will examine how diverse groups of activists organized for and understood the goal of women’s and/or gender equality, focusing especially on the ways that race, class, and sexual identity intersected with political demands over time. This is a writing intensive class in which students will have the chance to analyze historical documents, assess scholarly studies of feminism, and conduct original research.

**Class Format:** seminar

**Requirements/Evaluation:** participation; three 5-page essays; one longer research paper due at the end of the semester with a research precis, annotated bibliography, and draft due earlier

**Prerequisites:** First-Year Students

**Enrollment Limit:** 19

**Enrollment Preferences:** First-Year Students

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 154 (D2) WGSS 154 (D2)

**Writing Skills Notes:** Three 5-page essays evenly spaced throughout the semester; one longer research paper (10 pages) due at the end of the semester with a research precis, annotated bibliography, and draft due earlier. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Looking historically at the ways that activists have mobilized to address sex-based inequalities and for social justice, this class examines ways that gender identities intersect with race, class, and sexual identity. The course encourages thoughtful discussion about how difference works historically, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity.

Not offered current academic year

**HIST 155 (F) School Wars (WS)**

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs.

Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

**Class Format:** tutorial

**Requirements/Evaluation:** four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

**Prerequisites:** first-years or sophomores

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills,
Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across different historical junctures in the U.S., frequent short essay assignments, and an original research project of students' own choosing.

Class Format: seminar
Requirements/Evaluation: three graded essays (3-5 pages each), handed in as drafts, given comments, with time for revision; 3-5 ungraded assignments; one graded, final research paper (6-8 pages)
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students and then sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate doing short graded and ungraded assignments in the first eight weeks of the class: the three graded assignments (3-5 pages in length) each will involve first a draft, and then a revision based on comments; the 3-5 ungraded assignments are either informal responses to the reading or discussion questions. Students also will write their own manifestos. The last month will focus on gaining the library skills to do a small research project (6-8 pages).

Attributes: HIST Group F Electives - U.S. + Canada

This 100-level seminar will introduce students to the craft of history through the study of the 1960s, an important decade in American history (indeed, the world). In the U.S., this decade was marked by the on-going war in Vietnam, the struggle against racial inequality and racist oppression, changes in attitudes toward sex and sexuality, music, the role of youth culture, advances in technology, the rise of new expressions of American conservatism, and other tumultuous transformations in politics, culture, and the economy.

Class Format: seminar
Requirements/Evaluation: two 3- to 5-page papers based on readings; a 5- to 7-page oral history project; research precis, annotated bibliography; final 10-page research paper; class participation
Prerequisites: first-years
Enrollment Limit: 19
Enrollment Preferences: first-years
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 157 (D2) AMST 157 (D2)

Writing Skills Notes: Precis and annotated bibliography will receive critical feedback from professor and peers, and dedicated time in class to discuss assignments and traits of effective history writing. On all papers students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2020
SEM Section: 01 MR 2:35 pm - 3:50 pm Annie Valk

HIST 162 (S) Unfamous Women, USA (DPE)
How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Tutorial pairs will spend at least one week investigating sources in the Chapin Library and perhaps looking at visual art at Williams College Museum of Art.

Class Format: tutorial
Requirements/Evaluation: students will write papers (4-6 pages) roughly every other week, students will also write one page critiques, students will make a formal oral presentation one week
Prerequisites: First-Years and Sophomores
Enrollment Limit: 10
Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course investigates women whose lack of political, economic and cultural power has persisted into the historical record. We will consciously think and write about the role of historians in recovering lives and stories. How much of someone's story can we really tell? How far should historians go in deploying peoples scanty records to make an intellectual argument?

HIST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)
Cross-listings: AMST 163 HIST 163
Primary Cross-listing
How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: seminar discussion
Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 163 (D2) HIST 163 (D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

HIST 164 (S) Slavery in the American South (WS)

Cross-listings: HIST 164 AFR 164 AMST 165

Primary Cross-listing

This writing intensive seminar will focus on slavery in the southern United States—one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects. Separate class sessions on approaches to research and available research materials held with Lori DuBois, Sawyer reference librarian, and Wayne Hammond, Chapin librarian. Instructor holds individual meetings with each student to help them with the selection of a viable research topic.

Class Format: seminar

Requirements/Evaluation: class discussion, weekly reading summaries, and final 8- to 10-page research paper

Extra Info: in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: First-Years and Sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

HIST 165  (F)  The Age of McCarthy: American Life in the Shadow of the Cold War  (WS)
The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19

Enrollment Preferences: First-Year Students, and then Sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

Writing Skills Notes: Students will write several short essays (2-4 pages each) as well as a final research paper (10-12 pages). Over the course of the semester, students will submit a research proposal as well as several working drafts of the final research paper. These drafts will be discussed in small group workshops, including the professor. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 167  (F)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings: AMST 167  AFR 167  HIST 167

Primary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Class Format: seminar

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: First-Years and Sophomores

Enrollment Limit: 19
Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

HIST 203  (F) Introduction to African History, 1800-Present  (DPE)

This survey explores some of the major themes in the history of continental Africa since 1800. While prominent figures and major events will be covered, the course emphasizes the experience of African women and other groups of people who often faced marginalization at various points over the past two centuries. To paint a richer picture of this expansive history, historical scholarship will be studied alongside autobiographical testimonies, films, songs, music videos, and podcasts. The beginning of the course looks at the extremely diverse political, social, and cultural conditions that shaped the lives of people in Africa in the nineteenth century. Particular attention will be paid to the changes brought about during this time by the slave trades, the spread of Islam, and new forms of African political organization. The second section shifts to look at the impact of European imperialism and African responses to the imposition of colonial rule. We will examine how colonialism produced major changes in African societies, even as colonial authorities often insisted that Africans remain locked within a mythical, unchanging past. The third section of the course turns to the rise of anti-colonial struggles and the fall of formal colonialism and apartheid in Africa from the 1950s to 1990s. Lastly, we will assess the trajectories of postcolonial African societies, examining contemporary issues such as new expressions of religious faith, conflicts over wealth inequality and political power, cultural decolonization, and changing health and environmental realities in the twenty-first century.

Class Format: lecture/discussion

Requirements/Evaluation: three essays of 5-7 pages spaced evenly throughout the semester, a map quiz, discussion participation

Prerequisites: none; no prior knowledge of African history required; open to all students

Enrollment Limit: 40

Enrollment Preferences: students interested in History or Africana Studies

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on the inequalities produced in Africa (and globally) by the international trade in African captives and later, the new structures of power and exploitation established under colonial rule. The class explores how race, gender, class, ethnicity, and religion were pivotal to these forms of inequality in Africa, many of which persist today.

HIST 204  (S) Anti-Colonialism & Social Movements in Africa Since World War II  (DPE)

This discussion-based survey introduces African-led social and political struggles that have aimed to create more just and equitable societies on the continent over the past eighty years. We begin with the anti-colonial and nationalist movements that flourished during and after Second World War and eventually brought about an end to formal colonial rule across the continent. This decolonization took place over many decades, and intertwined with this history, we look at popular and artistic struggles that sought to change the practices of independent governments in Africa, as well as confront
intervening forces—from the International Monetary Fund to regional militias. The last section of the course examines movements since the 1990s for
democratic rights, access to health and environmental resources, and freedom from gender and sexual oppression. We will focus on how movements
were organized, including those led by trade unions, women's groups, and student associations, but also those that have not been led by formal
organizations. As part of the course, students will work in groups to plan and carry out a solidarity event/campaign in consultation with a present-day
African-led social movement/organization.

Class Format: discussion/lecture

Requirements/Evaluation: discussion participation, short weekly papers (2 pages), map quiz, and a small-group solidarity project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History Majors, as well as Africana Studies, Global Studies, and Leadership Studies Concentrators

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: We will focus on how people in sub-Saharan Africa have sought to address issues of power, difference, and
equality in their societies through their own activity and organizing. Our discussions will focus on how inequality was structured by colonialism and how it
has impacted present-day African societies (and even African social movements). This class will also prepare students to understand their own
relationship to injustices in Africa and the differences between intervention and solidarity.

HIST 208 (F) What is Islam? (DPE)

Cross-listings: ARAB 234  GBST 234  REL 234  HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Class Format: seminar

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

HIST 210 (S) The Challenge of ISIS

Cross-listings: HIST 210 ANTH 210 GBST 210 ARAB 210 REL 240

Secondary Cross-listing

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

HIST 211  (S)  Understanding 9/11 and the War in Iraq  (DPE)
Cross-listings: HIST 211  ARAB 211

Primary Cross-listing
What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Class Format: lecture

Difference, Power, and Equity Notes: This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

HIST 212  (F)  Transforming the "Middle Kingdom": China, 2000 BCE-1600
Cross-listings: HIST 212  ASST 212

Primary Cross-listing
China expanded from scattered Neolithic settlements to become one of the world's most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the "early modern" seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the reinterpretation of Confucian thought, the transmission of Buddhism, the conquest of China proper by "barbarian" peoples, the composition of elites, and change in daily life, popular culture and China's place in the East Asian and world systems.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on class participation, two short papers, a midterm, and a self-scheduled final exam
**Prerequisites:** none; open to all

**Cross-listings:** HIST 213 ASST 213  
**Primary Cross-listing**  

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.  

**Class Format:** lecture/discussion

**HIST 214  (F)  Foundations of China**  
**Cross-listings:** ANTH 212 REL 218 GBST 212 CHIN 214 HIST 214  
**Secondary Cross-listing**  

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

HIST 217  (F)  Early Modern Japan
Cross-listings: ASST 217  HIST 217

Primary Cross-listing

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

Class Format: lecture/discussion

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese from politicians and
intellectuals to factory workers and farmers have understood, instigated, and lived the upheavals of the past century and a half. We will ask why a modernizing revolution emerged out of the ashes of the early modern order; how Japan's encounters with "the West" have shaped the country's political and cultural life; what democracy and its failures have wrought; how world war was experienced and what legacies it left in its wake; how national identity has been constructed and reconstructed; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual tracts, fiction, films, and oral histories.

Class Format: lecture/discussion

HIST 219 (S) Japanese Culture and History from Courtiers to Samurai and Beyond

Cross-listings: HIST 219 JAPN 219 ASST 219 COMP 229

Primary Cross-listing

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion

HIST 220 (S) History and Society in India and South Asia: c. 2000 to 1700s CE

Cross-listings: ASST 222 HIST 220

Primary Cross-listing

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the
period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such the as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

**HIST 221 (F) The Making of Modern South Asia: 1750-1950 CE**

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

**Class Format:** lecture/discussion

**HIST 222 (S) Greek History**

**Cross-listings:**  CLAS 222  HIST 222
Secondary Cross-listing
Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

HIST 223 (S) Roman History
Cross-listings: HIST 223 CLAS 223

Secondary Cross-listing
The study of Roman history involves questions central to the development of Western institutions, religion, and modes of thought. Scholars have looked to Rome both for actual antecedents of European cultural development and for paradigmatic scenes illustrating what they felt were cultural universals. Yet Roman history also encompasses the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until perhaps contemporary times. A close analysis of Roman history on its own terms shows the complex and fascinating results of an ambitious, self-confident nation's encounter both with unexpected events and crises at home, and with other peoples. As this course addresses the history of Rome from its mythologized beginnings through the reign of the emperor Constantine, it will place special emphasis on the impressive Roman ability to turn the unexpected into a rich source of cultural development, as well as the complex tendency later to interpret such ad hoc responses as predestined and inevitable. The Romans also provide a vivid portrait of the relationship between power and self-confidence on the one hand, and violence and ultimate disregard for dissent and difference on the other. Readings for this course will concentrate on a wide variety of original sources, and there will be a strong emphasis on the problems of historical interpretation.

HIST 226  (F)  Early Modern Europe
The three hundred years from the late Middle Ages to the French Revolution were Europe’s formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Machiavelli, Montaigne, Hobbes, Aphra Behn, Voltaire, and Mary Wollstonecraft.

HIST 228  (S)  Europe in the Twentieth Century
This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

HIST 230  (F)  Modern European Jewish History, 1789-1948

Cross-listings: HIST 230  JWST 230

Primary Cross-listing

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

HIST 240 (S) The Soviet Experiment

Cross-listings: HIST 240 RUSS 240

Primary Cross-listing

In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

Russia. The name alone evokes wonder, fear, romance, and history itself. Over the past ten centuries, the land that we now call the Russian Federation has witnessed dramatic transformations that underwrote its transition from feudal backwater to global superpower. Its journey from tribalism to imperialism, feudalism to autocracy, agrarianism to industrialization, monarchism to parliamentarianism, Orthodoxy to revolutionary atheism left a mark not just on the collective Russian conscious, but on a world that has grown accustomed to viewing Russia as a test case for ideas, projects, and processes both fortuitous and tragic. How did Russia become the site of such a diverse array of political, social, economic, and cultural experiments? In what ways did they contribute to the formation and exercise of Russian political power? How did they contribute to the creation of a "Russian" identity, and to what effect for Russian citizens? This course will seek to answer these questions through a survey of Russian history from its founding in Kievan Rus’ in the 9th century to the October Revolution of 1917.

HIST 242 (F) Latin America From Conquest to Independence
This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in—and perhaps consisted of—the normal elements of daily life in Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

Class Format: lecture/discussion

HIST 243 (F) Modern Latin America, 1822 to the Present
This course will examine salient issues in the history of the independent nations of Latin America. The first two sections of the course will focus on the turbulent formation of nation-states over the course of the "long nineteenth century," from the crises of the Spanish and Portuguese colonial empires in the late eighteenth century to the heyday of liberal political economies at the turn of the twentieth century. In this regard the course will analyze the social and economic changes of the period up to World War I and the possibilities they offered for both political order and disorder. Key topics addressed will include caudillismo, the role of the Church in politics, economic dependency and development, and the place of indigenous and African Latin-American peoples in new nations, and industrialization and urbanization. The latter two sections will examine the trend toward state-led national development in the twentieth century, considering the diverse forms it took and conflicts it generated in different nations and periods. Here we will take up questions the emergence of workers' and women's movements and the rise of mass politics; militarism, democracy, and authoritarian governments; the influence of the United States in the region; and the life and possible death of revolutionary options. Within this chronological framework of national and regional political economy, we will consider the ways that various Latin American social actors shaped their own lives and collective histories, sometimes challenging and sometimes accommodating the ideals of national elites. General regional trends will be illustrated by selected national cases, including Mexico, Brazil, Argentina, Cuba, Chile, Venezuela, Nicaragua, and Guatemala.

HIST 248 (S) The Caribbean: From Slavery to Independence
Cross-listings: AFR 248 HIST 248
Secondary Cross-listing
This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley 'Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Class Format: seminar

HIST 252 (S) From Contact to Civil War: A History of North America to 1865
This course will provide a survey of North American history from Europe's first expansion into the New World to the American Civil War. Cast as a contest between competing empires and their peoples, the course begins in Europe and Native North America before contact and studies the expansion of European nations into the New World. The course will emphasize the history of British North America and the interactions between and among the many peoples of colonial America. The course will then examine the coming, course, and consequence of the American Revolution (or what many at the time considered America's first civil war). The new nation unleashed massive and far-reaching economic, social and political changes. The last third of the course will explore these changes in the antebellum era and trace how they affected the coming of America's second civil war.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, mid-term, final exam, book review, and weekly writing assignments
HIST 253 (S) Modern U.S. History

This course surveys themes and issues that inform the historical landscape of the United States after the Civil War and Reconstruction, from the late 1800s to the present. With special attention to freedom and fragmentation, the course examines the dilemmas inherent to American democracy, including: westward expansion and Indian affairs; immigration and nationalism; progressivism and domestic policy; the expanding role of the United States in the world; race, gender, and rights; and the shifting terrains of liberalism and conservatism. The course also tunes into the connections between current affairs and the American past. Course materials include a range of primary sources (letters, political speeches, autobiography, film, oral histories, fiction, and photography) and historical interpretations.

Class Format: lecture/discussion
Requirements/Evaluation: evaluation will be based on some combination of quizzes, short papers, and a final exam or final paper
Prerequisites: none; open to all
Enrollment Limit: 40
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

HIST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations’ multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: lecture/discussion
Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first- and second-year students
Expected Class Size: 30
HIST 254 (D2) AMST 254 (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.

HIST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AMST 256 HIST 256 AFR 257

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today’s activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Class Format: seminar

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Enrollment Limit: 35

Enrollment Preferences: first years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 256 (D2) HIST 256 (D2) AFR 257 (D2)

Difference, Power, and Equity Notes: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

HIST 257 (F) Religion and American Politics

Cross-listings: HIST 257 REL 217

Secondary Cross-listing

This course examines the intersection of religion and American politics, from the colonial era to the present. It focuses especially on electoral politics and social movements, exploring the role of religion in conflicts over racial equality, capitalism, gender and sexuality, and church-state relations.
Students will tackle questions with both historical and present-day relevance, such as: Was America founded as a Christian nation? Has religion been a source of revolutionary change, or a mere ‘opiate of the masses?’ How have religious ethics shaped the politics of race, gender, and class? How has growing religious diversity affected civic unity? What role should religion play in American political life? The course will cover such topics as the religious views of the ‘Founders;’ debates over slavery; spiritualism & women’s rights; state treatment of religious minorities; the Scopes Trial and scientific modernity; the Social Gospel and modern capitalism; the New Left and the Moral Majority; and late 20th-century religious battles over war, civil rights, feminism, and democracy itself.

Class Format: Seminar
Requirements/Evaluation: class participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (8-10 pages)
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: none, open to all students

HIST 258 (S) The World Oil Made: A Modern History

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global modern history by keeping this energy source always in our sight, paying particular attention to its role in the political economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. In addition to having regular short assignments, students will work in groups through the semester, researching and learning how to make a 5-minute video documentary.

Class Format: lecture/discussion
Requirements/Evaluation: two short graded essays (3-5 pages); two short ungraded essays (2-3 pages); 2-3 short research assignments (1 page each); one storyboard (graded); one group video project (graded)
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: sophomores and first-years
Expected Class Size: 25

**HIST 260 (S) U.S. History Since the 1940s**

This course surveys the history of the United States since the 1940s. It will acquaint students with the key developments that defined the postwar order, focusing especially on the history of inequality, politics and public policy, social movements, and intellectual life. As students make their way through the course, they will learn to think historically in the broadest sense—situating texts within their social context, engaging with diverse and unfamiliar perspectives, and gaining an appreciation for the complexity of human experience. In the process, students will tackle historical questions with contemporary relevance. What forces have made American society more or less equal, and how should equality be measured in the first place? How have race, class, and gender affected opportunities and outcomes for different Americans over time? To what extent have everyday people shaped the broader history of American capitalism, democracy, and social thought? To what extent have these broader developments shaped the lives of everyday people? Are we now living in an age of fracture or an age of liberation? The course will cover such topics as Cold War culture; the mass consumer economy; racial inequality, both Southern and Northern; the changing role of women at home and in the workplace; the global dimensions of the 1960s; the origins of the New Right; and the roots of modern polarization in conflicts over such issues as—busing, abortion, and privatization.

**Class Format:** lecture

**Requirements/Evaluation:** attendance and participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (10 pages max)

**Prerequisites:** none, open to all students

**HIST 261 (F) America and the Cold War**
This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion
Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments
Prerequisites: none; PSCI 202 is recommended but not required
Enrollment Limit: 19

HIST 263 (F) The United States and the World, 1898 to the Present
Cross-listings: LEAD 261 HIST 263

This survey course examines the United States and the World since 1898. Students will be introduced to key diplomatic developments since the Spanish-American War, when the country began its ascendancy to hegemonic power from which it is now in retreat. American power reached its apex during the Cold War, but that conflict and its offshoots like the Vietnam War brought about crises over national identity and values that remain unresolved. Readings and discussions will focus on issues of ideology, empire and neo-imperialism, domestic politics and foreign policy, and the relationship between culture and foreign relations.

Class Format: lecture/discussion
Requirements/Evaluation: class participation, pop quizzes, short papers, a midterm exam, and a final exam
Prerequisites: none
Enrollment Limit: 40

HIST 264 (S) Environmental History
Cross-listings: ENVI 229 HIST 264
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: seminar with field trips

Requirements/Evaluation: several short essays; final research project

Secondary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Class Format: seminar

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

**Cross-listings:** HIST 281  AFR 246

**Primary Cross-listing**

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

**Class Format:** seminar

**Requirements/Evaluation:** class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

HIST 286 (F) Latina/o History, 1848 to the Present

Cross-listings: HIST 286 LATS 286

Secondary Cross-listing

From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups come to have sizeable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge?

HIST 292 (S) History of Sexuality

Cross-listings: GBST 241 REL 241 HIST 292 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Class Format: seminar
Requirements/Evaluation: reading responses, two essays, and final research paper

Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Spring 2020
SEM Section: F1    W 1:10 pm - 3:50 pm     Scott Wong

HIST 301  (F)  Approaching the Past: History, Theory, Practice
This course will explore how the discipline of "History" has come to assume its present form and how a number of historians since the 1830s have understood their craft. We will begin by discussing the work of three great nineteenth-century historians (Macaulay, Marx, and Ranke) who believed that historical "truth" existed and could, with skill, be deciphered. Next we will explore the philosophy and practice of the cultural and social historians of the 1960s-1980s, comparing and contrasting their work with that of their nineteenth-century predecessors. We will then consider the writing of those recent theorists who have tried to refute historians' claims to be able to capture the "truth" of the past, focusing on the state of the field in the wake of challenges posed to its epistemological foundations by postmodernism. Finally, we will conclude with an assessment of the state of the discipline today. In general, we will be less concerned with "the past" than with what historians do with "the past." Consequently, we will focus primarily on those abstract, philosophical assumptions that have informed the various practices of history from the 1830s to the present.
Class Format: discussion
Requirements/Evaluation: evaluation will be based on class participation, a 250-word position statement ("What is History?"), two 9- to 11-page interpretive essays, and a take-home final exam
Prerequisites: restricted to HIST majors and sophomores planning to major in HIST
Enrollment Limit: 19
Enrollment Preferences: senior, then junior, History majors
Expected Class Size: 15-19
HIST 301 (F) Approaching the Past: Practices of Modern History

What is history? What is it that historians do? In this course, students will explore how and why we historians practice our craft. The first section of the course will examine how historians think about and come to know the past. Issues of the nature of historical truth, objectivity and bias, and the uses of different types of evidence will be discussed. Next, we will explore how historians attempt to make sense of the past. We will consider the perspectives, scale, and categories of analysis that historians can bring to bear on the past, and how history can be told. Finally, the third section of the course will pose questions about the purposes, uses, and misuses of history. And we will ask what the moral, political, and historical responsibilities of historians may be. The class will meet once a week, and each session will focus on some theoretical material as well as readings on a broad range of topics that concretely illustrate the methodological issues at stake.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final paper

Prerequisites: restricted to HIST majors and sophomores planning to major in HIST

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year
HIST 301  (S)  Approaching the Past: Varieties of Historical Thinking
This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides' *The Peloponnesian War*, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why--or even if--we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

Class Format: seminar

Requirements/Evaluation: in preparation for class discussion, students are required to produce a one-page critical response to the assigned reading each week, which will form the basis for class discussion; in addition to writing ten critical responses, students are also required to make an oral presentation of approximately twenty minutes on a professor they have had in a history course at Williams College

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

HIST 301  (F)  Approaching the Past: Modern National, Transnational, and Postcolonial Histories
This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly seminar meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, response papers, short essays, and a final paper

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

HIST 301  (S)  Approaching the Past: Other People's History
From antiquity to the present, most historians have chosen to write about their own community, whether they have defined it by ethnicity, nationhood, language, or creed. Only a minority have chosen instead to record the history of a group of which they are not a member. This seminar asks: what does it mean to write other people's history? We will consider, first, the motivations that might lead someone to dedicate their lives to studying a foreign culture. What practical challenges are involved? What languages, archives, and forms of knowledge does the historian have to master, and how is this achieved (or not achieved)? Further, we will inquire: what unique problems and opportunities emerge? What mental categories mediate the inevitable comparisons that arise in the study of other people's history? What kind of histories can be written this way, and what kind cannot? Throughout, we will take seriously the ethical challenges and opportunities of this peculiar historiographic position. Finally, we will determine the lessons that can be drawn for our own practice as historians. Authors to be read will range from antiquity to the present and include Herodotus,
al-Biruni, José de Acosta, and Edward Gibbon among others.

**Class Format:** seminar

**Requirements/Evaluation:** participation, short papers, presentations, and a longer final paper

**Prerequisites:** restricted to History majors and sophomores planning to major in History

**HIST 301 (S) Approaching the Past: The American Civil War**

How have historians told the story of the Civil War? Even before Lee's surrender at Appomattox Court house in the spring of 1865, historians and local communities strove to craft a coherent story of a war that left 620,000 soldiers dead and set formally enslaved people on a long road towards freedom. Civil War historiography began in the 19th century and has been reinvented numerous times in the last century. Biographies of Lincoln, of Generals--Union and Confederate still appear regularly. Historians of gender have tried to capture women's experiences on the homefront and on the front lines. Histories of battles, of legislation, of the era's music, literature, and art all fill rows of shelves in Sawyer. We will not attempt to "understand" the Civil War. Rather we will examine a few very different histories of the event. We will read authors who center African Americans and authors who ignore them. We will read a biography and cultural history. We'll look at new attempts to tell local histories of the war through interactive web sites and film. We'll also study historical re-enactors, North and South. We will end with an examination of the recent struggles over Confederate Memorials.

**Class Format:** seminar

**Requirements/Evaluation:** one presentation, one formal paper and/or a book review, a final paper

**Prerequisites:** restricted to History majors and sophomores planning to major in History

**Enrollment Limit:** 12

**HIST 302 (F) Islamic Law: Past and Present**

Cross-listings: WGSS 243  ARAB 243  HIST 302  REL 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

**Class Format:** seminar

**Requirements/Evaluation:** weekly responses, four 2- to 3-page essays

**Prerequisites:** none

**Enrollment Limit:** 19

HIST 304 (S) Africa and the United States: From the Atlantic Slave Trade to Black Panther (DPE)
This course examines the history of Africa since the eighteenth century by exploring the connections between the African continent and United States. By taking a Pan-African and international approach, the class will highlight how the histories of both places have been deeply intertwined. The course is organized around four themes. The first is the impact of African enslavement on both continents and the way African social practices were carried across the ocean and transformed by slavery and abolition. We will then turn to the "back to Africa" movements of the nineteenth and twentieth centuries and explore why different groups of African-Americans sought to return to the continent of their origin, and what impact this had on those living in Africa. The third theme is the deepening involvement of American missionaries, the US government and non-governmental organizations in Africa, which accelerated in the twentieth century. The final section explores the important links between Black freedom movements in the United States and anti-colonial and anti-apartheid movements in Africa. The course will conclude with a consideration of the current state of Africa-US connections in light of the recent blockbuster film, Black Panther. Against this backdrop, students will engage in new research over the course of the semester on the history of Williams' historical links with Africa.

Class Format: discussion/lecture
Requirements/Evaluation: discussion participation, map quiz, two short papers (~4 pages), and a final research paper (6-8 pages)
Prerequisites: none, open to all students; some background in African history will be useful
Enrollment Limit: 25
Enrollment Preferences: History majors, Africana Studies concentrators, American Studies majors; seniors, juniors, sophomores; or first-year students with some background in African history
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on the effects of racism and colonialism on different peoples of African descent and key episodes when Black solidarity was forged across great physical distance between the United States and Africa, as well as episodes where it was compromised (by forms of difference based on place of birth, language, religion, and class.) Through class readings, discussion, and the final group project, the course will help students assess what foundations have allowed for trans-Atlantic col

HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South
Cross-listings: GBST 369 COMP 369 HIST 306 ARAB 369
Secondary Cross-listing
In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will
consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Class Format: seminar

Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5-7 pages)

Prerequisites: none

HIST 307 (S) Is Africa Poor? (DPE)

Poverty is widespread across Africa, yet exists alongside the continent's fantastic wealth in natural resources. Despite a decade of excitement about "Africa rising" as a new economic powerhouse, African countries still occupy 36 of the bottom 40 positions in the most recent UN Human Development Report. How can we make sense of this contradiction? In this debate-focused seminar, we will delve deeply into the work of historians, international organizations, and African activists who have argued over the causes of poverty and inequality in Africa and arrived at different conclusions about the appropriate solutions. Taking a historical approach, we will explore how the current challenges faced by African societies are rooted in the slave trade, colonial rule, the Cold War, and more recently, the imposition of neoliberal economic policies in Africa. Key issues of contemporary debate will include the role of state-centered development, privatization, resource extraction, foreign development aid, and climate change.

Class Format: discussion with organized debates

Requirements/Evaluation: discussion participation, map quiz & multiple papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History Majors, Political Economy Majors, Africana Studies Concentrators, Global Studies Concentrators

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The class is grounded in extensive reading and debate about how economic inequality became structured on a global scale. This will entail studying how interconnected economic, political, and social differences developed both between Africa and the rest of the world and within the African continent. Building on the wide-range of texts that we will analyze, the discussions and assignments will equip students to better understand and respond to current issues of global economic justice.

HIST 308 (S) The Nile (DPE)

Cross-listings: ARAB 308 HIST 308
For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Class Format: seminar

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 308 (D2) HIST 308 (D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

HIST 309  (S)  Fire and Ice: The History of Modern Iceland

How have a few wretched souls been able to survive on a frozen tundra in the middle of the north Atlantic for over 1100 years? This course will explore the curious history of Iceland, a small and unimportant country, that despite, or because of its geographic isolation and lack of any valuable natural resources, has been able to develop a distinct national and cultural identity. What lessons can be drawn from the historical experiences of Icelanders? The course will start with the paradigmatic sagas (Egil’s and Njal’s Saga) that have played an out-sized role in the development of Icelandic culture. Then we will assess the nation’s independence, the impact of the world wars, the building of the modern welfare state, and how the country has fared through economic peaks and valleys. At the end of the semester, students will be able to understand the significance of the following phrases: “Fögur er hliðin,” “Deyr fé, deyr frændr,” “Petta reddast,” “dugleg/ur,” and “Áfram Ísland.” This comprehension is, of course, very practical since 320,000 people understand the Icelandic language.

HIST 311  (S)  Where are all the Jews?  (DPE) (WS)

Cross-listings:  ARAB 363  COMP 363  JWST 268  HIST 311  REL 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: Seminar

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: None

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 363 (D1) COMP 363 (D1) JWST 268 (D2) HIST 311 (D2) REL 268 (D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final.
Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

**HIST 312 (F) The Mughal Empire: Power, Art, and Religion in India**

**Cross-listings:** HIST 312 ASST 312 REL 312 GBST 312

**Primary Cross-listing**

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor’s memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**Class Format:** seminar

**HIST 313 (F) The People's Republic: China since 1949**

**Cross-listings:** HIST 313 ASST 313

**Primary Cross-listing**

This course provides a close examination of the six decades of the history of the People’s Republic of China, from the 1949 Revolution to the present day. Through readings and discussion, we will explore the multiple political, economic, social, and cultural factors that contributed to the idealism of the "golden age" of Communist Party leadership (1949-65), the political violence of the Cultural Revolution (1966-76), the profound transformation of the Reform Era (1978-present) as well as the motors of change in China today. Course materials will include films, novels, and ethnographies, as well as secondary analyses. Please note that this is a discussion seminar and not a survey course.
HIST 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: ARTH 314 HIST 314 ASST 314

Primary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

HIST 319 (F) Gender and the Family in Chinese History

Cross-listings: ASST 319 WGSS 319 HIST 319

Primary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China.

HIST 321 (F) History of U.S.-Japan Relations

Cross-listings: HIST 321 ASST 321

Primary Cross-listing
An unabating tension between conflict and cooperation has been an undercurrent of U.S.-Japan relations for over 150 years, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. Topics will include early U.S.-Japan encounters; the rise of both countries as imperial powers; the road to, and experience of, World War II; the politics and social history of the postwar American occupation of Japan; the U.S.-Japan security alliance; trade relations; and popular culture. Contemporary topics will also be discussed.

Class Format: lecture/discussion

HIST 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: CLAS 323  LEAD 323  HIST 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

The Protestant Reformation has long been understood as the first salvo of modernity. Martin Luther and his followers upheld the faith of the individual believer against the authority of the established Church. They sparked a series of transformations that created not just Protestantism in all its varieties but, it has been argued, the state as we know it, the modern self, capitalism and even, as an unintended consequence, secularism. While considering these classic interpretations, this seminar will also probe more recent research on the plural Reformations: not just Protestant but also Catholic, and not solely the elite movement of Luther and John Calvin but also the less orthodox Reformation of non-elite believers such as tradesmen, artisans, and peasants. Moreover, in this same period, European missionaries traveled to Africa and Asia, making Christianity a global religion. We will ask: what was at stake in these sweeping transformations of what it meant to be a Christian? To what extent was the Reformation a step towards the disenchantment of the world? And how did Reformations of the faith intersect with the expansion of Europe? Historical developments to be considered include theological debates about human agency, the changing relationship of religion and the state, female mysticism, religious warfare, and overseas missions. Authors to be read include Luther, Calvin, Teresa of Ávila, John Hooper, Ignatius of Loyola, and others.

Spring 2020

SEM Section: 01   MW 11:00 am - 12:15 pm   Alexander Bevilacqua

The scholars and philosophers of early modern Europe set the agenda for much of modern thought concerning epistemology, morality, religion, and politics. Many of their debates still inform our intellectual world: How do we know what we know? Is human nature intrinsically selfish? What is the nature of God, and of His revelation? Should we prefer individual freedom or political stability? Our seminar will retrace the long and winding path from the intellectual culture of late medieval Europe to that of the Enlightenment. We will try to understand how a Christian culture of manuscript books, whose inquiries were conducted in Latin, transformed into a secular culture of public debate in new printed publications such as journals and newspapers in vernacular languages (English, French, German, etc.). In the process, we will encounter the foundational movements that structured European thought and the making of knowledge in these centuries: scholasticism, humanism, the new philosophy and the Enlightenment. Ultimately, we will recover the arguments of major thinkers and consider what they can teach us today. Authors to be read include Petrarch, Christine de Pizan, Thomas More, Descartes, Leibniz, Montesquieu and Rousseau.

Class Format: seminar

HIST 332 (S) Queer Europe: Sexualities and Politics since 1850 (DPE)

Cross-listings: WGSS 331  HIST 332

Primary Cross-listing

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but Italy and Russia will also be the focus of some meetings. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

Class Format: seminar

Requirements/Evaluation: class discussion, the posting of four 500 word response papers, two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages

Prerequisites: none

Enrollment Limit: 25

Difference, Power, and Equity Notes: Queer Europe is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

HIST 334 (F) Victorian Psychology from the Phrenologists to Freud

Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents, including: professional literature in psychiatry, from the phrenologists to Freud; manuals on child rearing, education, sexual practice, and living the wholesome life; and cultural documents.

Class Format: seminar

Requirements/Evaluation: participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Prerequisites: none

Enrollment Limit: 25
HIST 335  (F)  Weimar Germany

The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany’s past or as harbingers of its future.

Class Format: discussion
Requirements/Evaluation: evaluation will be based upon participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: students with background in European history, or History majors

HIST 336  (S)  National-Socialist Germany

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate and assess some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the experiential reality of the Volksgemeinschaft; the popularity of National Socialism; youth and women in the Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime's euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the "Final Solution to the Jewish Problem"; German knowledge of and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

Class Format: lecture/discussion
Requirements/Evaluation: active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay: the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)
Prerequisites: none; open to all
Enrollment Limit: 25
Expected Class Size: 20-25
Grading: no pass/fail option, yes fifth course option

HIST 337 (F) After Stalin: Soviet History from “Thaw” to Collapse

Cross-listings: RUSS 337  HIST 337

Primary Cross-listing

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule infected on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? How did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

Class Format: seminar

Requirements/Evaluation: evaluation based on active class participation, three short essays (2-3 pages), and one long essay (8-10 pages)

HIST 338 (F) The History of the Holocaust

Cross-listings: HIST 338  JWST 338  REL 296

Primary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion
On Christmas Day 1991, Mikhail Gorbachev ended two things: his tenure as President of the Soviet Union, and the Soviet Union itself. The following day, Boris Yeltsin entered office as the first president of the Russian Federation, and without delay, began to institute radical economic and social reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most commonly used to describe Russia in the early 1990s is “disappear”: money, jobs, food, and people. The very things that Soviet-style socialism had committed itself to providing for started to vanish as a result of invisible and market forces. This course will explore what emerged in the spaces left empty after Soviet-style socialism's demise in three parts. The first part of the semester will examine the origins of the Soviet Union's collapse and its breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the collapse. Finally, the third part of the course will focus on Putin's ascendancy to the presidency and its consequences for Russian citizens at home and Russia’s image abroad. By semester's end, students will have acquired the content and analytical literacy to place present-day Russia in its specific historical context and identify multiple sources of causation that may help explain Russia's transition from socialism to capitalism to Putinism during the past quarter century.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on active class participation, three short essays (3-5 pages), and one long essay (10-12 pages)

hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity—for if the label suggests Brazil’s potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a “bloodless” independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: lecture/discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

HIST 347 (S) Democracy and Dictatorship in Latin America

The inability—or failure—of Latin American countries to establish stable and democratic governments has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies in Brazil, Argentina, Mexico, Peru, and the countries of Central America. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes "democratic" or "dictatorial"—and the implications of our choice of criteria.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response papers, two short papers, and a longer (10-12-page) final essay

HIST 352 (F)(S) American Maritime History (DPE) (WS)
Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 354 (F) The Revolutionary Generation: Galaxy of Leaders

Cross-listings: PSCI 285 LEAD 285 HIST 354

Secondary Cross-listing

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments--a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: seminar

Requirements/Evaluation: three papers, several class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

HIST 361 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: AMST 360 HIST 361

Primary Cross-listing

Early Americans inhabited an interconnected world through which people, beliefs, and objects circulated. This course explores the "Atlantic World" as both a place and a concept: an ocean surrounded by diverse communities and empires, and an imagined space of shared or competing affiliations. Moving from the tenth century to the nineteenth, it examines ecological, cultural, political, economic, intellectual, and religious exchanges among Native Americans, Europeans and colonizers, and Africans and African Americans. It introduces both conceptual dimensions of this Atlantic paradigm and case studies that investigate its human subtleties, with the goal of examining early American history through a transnational lens. The course will take up the stories of Wabanaki mariners and Norse/Viking expansionists; Pocahontas, a trio of Inuit people, and myriad other Indigenous travelers to Europe; West African survivors of the Middle Passage and their enslaved descendants who pushed for survival and recognition of their humanity overseas; New England religious dissidents, intellectuals, and profiteers from Caribbean slavery; Touissant L'Ouverture and the reverberations of the Haitian Revolution; and whaling ship crews who pursued cetaceans ever farther out at sea, among other topics. The course also delves into new methodologies for telling histories that have been unevenly presented or seemingly silenced in traditional documentary archives, probing ways that oral traditions, songs, archaeology, material culture, and other forms of expression and representation can help recast the nature and meanings of
these connected spaces and histories. Additionally, it provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

**Class Format:** lecture will alternate with seminar-type discussion of readings

**Requirements/Evaluation:** active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

HIST 366  (S)  What They Saw in America

Cross-listings: AMST 244  SOC 244  HIST 366

Secondary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider’s view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

Class Format: seminar

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages

Prerequisites: none

Enrollment Limit: 9

Enrollment Preferences: juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor

Expected Class Size: 9

Grading: no pass/fail option, no fifth course option

HIST 371  (F)  Oral History: Theory, Methods and Practice

Cross-listings: AMST 371  HIST 371

Primary Cross-listing

Oral history offers a powerful means to document history "from the bottom up," filling gaps in the historical record and creating ways to make new community connections. This class introduces methods for conducting oral history interviews and provides an opportunity to record interviews and use them in a public project. This semester we will use oral history interviews and other sources to explore the lived experience of LGBTQ individuals in the United States. The class combined history, theory, and practice, giving you the chance to conduct and interpret oral history interviews.

Class Format: seminar; community-based field work

Requirements/Evaluation: two recorded and transcribed oral history interviews; three three-pages papers; one final project (e.g., audio essay or multi-media presentation)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors or seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

HIST 372 (F) The North American West: Histories and Meanings

This course will explore the various and contested histories of the geographical region in North America that Americans often call "the West". With porous boundaries; changing empires and national borders; an extraordinarily diverse mix of peoples; and most importantly, continuous indigenous presence to the present day, this region both has a remarkably rich history and poses central questions to how we view American history. What if, from the vantage point of the 1780s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? Or what if, instead of understanding "the West" as a place that people migrated "to" from "the East," we think about "the West" as a place diversely inhabited for thousands of years that experienced both very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? And where do Americans' stories of western individualism fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, 5 short-to-moderate writing assignments and one 8-10 page research paper, due at the end of reading period

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors

HIST 373 (S) Sites of Memory and American Wars

This course will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. We will ask such questions as: How and why have the memorializations of wars in America changed over time? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do sites of memory tell us about history, about society's views of wars and of soldiers, and about America? We will look at these questions both throughout U.S. history and through case studies, including the American Civil War, the wars against indigenous nations, World Wars I and II, and Vietnam.

Class Format: lecture

Requirements/Evaluation: short papers, one longer research paper, and presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 376 (S) Sex, Gender, and the Law in U.S. History (DPE)

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and
development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly
gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing
others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout
the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include
the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty,
work, and military service.

Class Format: seminar

Requirements/Evaluation: four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors, Women’s, Gender and Sexuality Studies majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it examines the legal, social, and political constructions and
theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to
fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 378 (S) American Conservatism

Cross-listings: REL 378 HIST 378

Primary Cross-listing

This course will explore the history of modern conservatism in the United States, from the early 20th century to today. Employing a chronological
approach, it will examine the key intellectuals, politicians, and social movements that have fueled the rise and ascendance of the modern right. Going
beyond formal politics, students will explore the influence of conservatism on American life more broadly—especially in the realms of race relations,
gender and sexuality, religion, global capitalism, and international relations. Students will be asked to think historically, considering how the right rose
from obscurity to political ascendance over the course of the 20th century. And they will be asked to engage theoretically, considering what (if
anything) has defined conservatism in principle and in practice. In the process, they will learn to think critically in the broadest sense: situating texts
within their context, engaging with diverse perspectives, and gaining an appreciation for the complexity of human experience. The course will cover
such topics as Cold War nationalism; the GOP’s ‘Southern Strategy;’ law and order politics; anti-feminism and the culture wars; neoliberal economics;
neoconservative foreign policy; and late-20th century battles over such divisive issues as affirmative action, abortion, and taxation.

Class Format: seminar

Requirements/Evaluation: participation in group discussion; six informal response papers (300-400 words); two unit essays (4-6 pages); final paper
(8-10 pages)

Prerequisites: none, open to all students

Enrollment Limit: 25

Enrollment Preferences: History and Religion majors, and students with a demonstrated interest in either field

HIST 379  (F)  Black Women in the United States
Cross-listings:  WGSS 379  AFR 379  HIST 379

Primary Cross-listing
As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

Class Format: discussion
Requirements/Evaluation: evaluation will be based on student participation, three papers, and a brief oral presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors and Africana Studies concentrators

HIST 380  (F)  Comparative American Immigration History  (DPE)
This course covers the history of immigration to the U.S. from the 1800s to the present. It compares the experiences of immigrants from Europe, Asia, Latin America, and the Middle East.

Class Format: lecture/discussion
Requirements/Evaluation: a series of papers and a final oral history or family history
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first come, first served
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: By examining American history through immigration law and texts (novels, census materials, legal cases, oral histories, and secondary sources) this class will reveal a constant tension in American society that vacillates between welcoming and shunning immigrants, depending on their race, religion, class, gender, and sexuality. The power to include and exclude various people wishing to become part of our society has been a conflict that has played out for nearly all of our national history.

HIST 385  (S)  Politics and Everyday Life: Latinas/os in New York City and Beyond  (DPE)

Cross-listings:  HIST 385  LATS 385

Primary Cross-listing

This course asks how everyday life shapes politics, from the definition of politics, to the issues addressed, to the wide variety of forms that activism takes. Focusing on Latinas/os in New York City from World War II to the present, we explore activism that has included collective organizing and community building to meet immediate needs, social service approaches and community-based organizing, radical political and social movements, participation in pre-existing unions and political groups, as well as electoral politics. Activists addressed a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, immigration rights and legal status, environmental justice, LBGTQ+ visibility and rights, as well as others. Reflecting the histories of migration, politics have sometimes been rooted in one national origin group, while other efforts were explicitly Latinx. To make the connections between everyday lives and politics, our readings will include autobiographies and other narrative sources, as well as documentaries. For final projects, students will delve deeper into autobiographies and other narrative sources, and/or explore a particular contemporary political issue(s), and/or explore parallels in the broader northeast.

Class Format: discussion-based course

Requirements/Evaluation: class participation, two essays of 3-5 pages each, final project of 7- to 10-pages, and final presentation

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History majors and Latina/o Studies concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 385 (D2) LATS 385 (D2)

Difference, Power, and Equity Notes: This course explores how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. At times working within existing structures, Latinx communities also questioned and challenged those existing structures. Questions of difference, power and equity are explored at the structural, community, and individual levels.

HIST 386  (S)  Latinas in the Global Economy: Work, Migration, and Households

Cross-listings:  LATS 386  HIST 386  WGSS 386

Secondary Cross-listing

An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

Class Format: discussion

Requirements/Evaluation: evaluation based on class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

Prerequisites: open to first-year students with instructor's permission

HIST 387  (F)  Going Nuclear: American Culture in the Atomic Age

Cross-listings:  SOC 386  HIST 387

Secondary Cross-listing

Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

Class Format: lecture/discussion

HIST 388  (F)  Decolonization and the Cold War

The second half of the twentieth century came to be defined by two distinct, yet overlapping and intertwined phenomena: the Cold War and decolonization. In the two decades that followed the end of WWII, forty new nation-states were born amidst the bipolar struggle for global supremacy between the Soviet Union and the United States. Those new nations were swept up in the Cold War competition in ways that profoundly influenced their paths to independence and their postcolonial orders, but they often had transformative effects on the Soviet-American rivalry as well. In this course, students will focus on two related questions: How did decolonization influence the Cold War and the international behavior and priorities of the two superpowers? And what impact did the Cold War exert on the developing states and societies of Asia, Africa, the Middle East, and Latin America? Course materials will consist of scholarly texts, primary sources, memoirs, films, and fiction.

Class Format: seminar

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors; juniors and seniors

Expected Class Size: 15

HIST 389 (S) The Vietnam Wars

**Cross-listings:** HIST 389 LEAD 389 ASST 389

**Primary Cross-listing**

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community.

Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

HIST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean

**Cross-listings:** GBST 391 ASST 391 HIST 391

**Primary Cross-listing**

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Class Format:** seminar

**Requirements/Evaluation:** assessment will be based on class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

HIST 393 (S) Sister Revolutions in France and America
Cross-listings: HIST 393 LEAD 212
Secondary Cross-listing
In the late-eighteenth century, two revolutions burst forth—they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.
Class Format: seminar
Requirements/Evaluation: evaluation will be based on three papers, several class presentations, and active participation in class discussions

HIST 394 (S) The History of Panics
What is a panic? This course takes up questions of what has defined, caused, and shaped panics of various kinds-political, societal, moral, medical, and financial. We will consider what has fueled panics, what has prevented them, what their effects have been, how they have ended, who has panicked, who has been the victim of panics, and what has distinguished premodern from modern incarnations of the phenomenon. Central themes will include the relationship between panics and emotions (anxiety, fear, insecurity, irrationality, hysteria), communication (rumor, gossip, mass media), technology (electricity, vaccines, the computer), and violence (persecution, revolution, psychological torment). With a multidisciplinary approach informed by sociology, economics, psychology, and history, our examination will span different times and different places and will encompass witch hunts of many sorts, infectious diseases, financial crises, cultural scares, and more.
Class Format: seminar
Requirements/Evaluation: class participation, response papers, one short 5-page paper, and a research paper
HIST 395 (F) Signs of History

Cross-listings: COMP 395 HIST 395 ENGL 395

Secondary Cross-listing
What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Class Format: seminar

Requirements/Evaluation: evaluation based on two papers, one 6 and one 10-12 pages in length, and general participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

HIST 411 (F) Happy Holidays! A Comparative History of Commemorations and Festivals

Cross-listings: HIST 411 REL 321 ARAB 411

Primary Cross-listing
What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Class Format: seminar
Requirements/Evaluation: several short response papers and a 20- to 25-page final paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: seniors, especially History and Arabic Studies majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)

Cross-listings: HIST 434 REL 335 JWST 434

Primary Cross-listing
Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews¿ diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students¿ work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant
secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 434 (D2) REL 335 (D2) JWST 434 (D2)

Writing Skills Notes: Students will write two drafts of their research paper before submitting the final paper for a grade. They will receive timely comments on drafts from professor and peers, to be incorporated into their final paper.

SEM Section: 01 M 7:00 pm - 9:40 pm Alexandra Garbarini

HIST 443 (S) Race and Ethnicity in Latin America

Cross-listings: AFR 383 HIST 443

Primary Cross-listing

Race and ethnicity have been central to the formation of national identities in Latin America, as well as to the creation of transnational networks that include Latin Americans. This seminar will critically examine familiar characterizations of Brazil and other countries as "racial democracies" and look at the historical roots and political impact of both "positive" and "negative" stereotypes of race relations in the region. To do this we will explore the rise and decline of slavery, the changing constructions of indigenous and Afro-Latin American identities at national and transnational levels, and to the emergence of new Black Movements and other racial and ethnic activism in Colombia, Guatemala, Brazil, and elsewhere.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, one short paper, and a substantial (20-25 page) research paper

Enrollment Limit: 15

Enrollment Preferences: History majors and Latino/a Studies concentrators

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

HIST 453 (S) Women, Gender, and Social Movements in U.S. History

Cross-listings: WGSS 453 HIST 453

Primary Cross-listing

This seminar is devoted to researching and writing a substantial research paper on some aspect of U.S. women's or gender history, with a particular focus on social movements. Social movements organized around gender issues and identities have been significant sources of social and political change in U.S. History. Drawing on online archival collections of personal letters and diaries, published writings, organizational records, and oral histories, students will research an individual, social group, organization, event, or movement that invites them to explore that particular subject in
depth, while also considering some of the following issues and questions: the different strategies, tactics, and ideologies used for organizing and movement building across the political spectrum; the ways that gender has united and divided grassroots movements; how and when it has been useful for women to act through women’s groups versus other types of organizations; the ways that ethnicity, race, religion, and class have been resources for organizing and coalition building; how social movements have shaped and been shaped by larger political and economic developments; the ways that various gendered identities have served as both agents and objects of political and social change; and the relative importance of formally organized politics versus less formal strategies to effect political change.

Class Format: seminar
Requirements/Evaluation: 20- to 25-page research paper
Prerequisites: none
Enrollment Limit: 15

HIST 455 (S) The Afterlives of Objects: Telling American Histories through Material Culture and Museums (DPE)
Cross-listings: AMST 455 HIST 455
Primary Cross-listing
Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

Class Format: seminar
Requirements/Evaluation: active participation in class discussion and museum visits, in-class presentation about one week’s readings, research project prospectus, research project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: junior and senior History and American Studies majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 455 (D2) HIST 455 (D2)
Difference, Power, and Equity Notes: This course examines diverse historical experiences of North American peoples, including Native Americans and African Americans, in conjunction with responses to Euro-American settler colonialism. It introduces students to foundational methodologies in object studies including decolonizing approaches, and explores key debates about possession, interpretation, and repatriation of objects to descendant communities, such as the Native American Graves Protection and Repatriation Act (NAGPRA).
HIST 456 (F) Civil War and Reconstruction

**Cross-listings:** AMST 456  HIST 456  AFR 385

**Primary Cross-listing**

An examination of one of the most turbulent periods in American history, with special emphasis on the changing status of Afro-Americans during the era. During the war years, we shall study both the war itself and homefront conditions: military, naval, political, economic, and especially social aspects will be examined in some detail. Our study of Reconstruction will concentrate on the evolution of federal policy toward the Southern states and the workings out of that policy in the South, particularly as it relates to the freedmen.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation based on class participation and a substantial research paper based at least in part on primary source materials

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

HIST 457 (S) Floridas (DPE) (WS)

Florida, the sunshine state with 1350 miles of coastline was once an outpost of Spain's 17th century empire. Its history comprises Disney World, the largest Cuban community outside of Cuba, a haven for enslaved Catholics in the 17th century and for an aging, largely white middle class in the 20th. It is the site of the nation's oldest city, and the home to range of Native peoples. A land of swamps, plantations, cities, islands, strip malls and theme parks is now ground zero in climate change discussions. This "purple state" has decided more than one presidential election. This course will explore the history of the many Floridas. We will move roughly through time as we seek to understand Florida and its place in United States culture. Why do people often think of Florida as "not quite southern" although it borders Georgia and Alabama? When and why did Spain colonize the area? How did they lose it? What is the history of the original inhabitants of Florida and how does that story help us understand it now?

**Class Format:** seminar

**Requirements/Evaluation:** students will be evaluated on class discussion, three short writing assignments and a final research paper of 15-20 pages on a topic that grows out of our reading

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** seniors and History majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Students will be writing three shorter papers throughout the semester. Two of these will be building up towards the final research paper. The third will be more "experimental"... perhaps a piece of historical fiction or eye witness account. The final paper should exceed 15 pages. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
**Difference, Power, and Equity Notes:** We will consider how Florida has defined itself, and been defined throughout American history largely based on various groups that occupied space with combinations of military, technological and economic power. This class will investigate the histories and dynamics of these various occupations and settlements, paying close attention the conflicts over space in rural and urban areas. Histories of African Americans and Native people will be central to our investigation.

**HIST 471  (S)  Comparative Latina/o Migrations**

**Cross-listings:** HIST 471  LATS 471

**Secondary Cross-listing**

Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.

**Class Format:** discussion/seminar

HIST 476  (F)  CAPSTONE: Black Radicalism

Cross-listings:  AFR 476  HIST 476

Secondary Cross-listing

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance--transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study--through the formation of Africana/African-American/Black-Studies--and the ways in which we express ideas--through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

Class Format: seminar

Requirements/Evaluation: evaluation to be based on student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

HIST 478  (S)  Cold War Landscapes

Cross-listings:  HIST 478  ENVI 478  AMST 478

Primary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also
see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct “Cold War landscapes” in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on class participation, weekly critical writing, and a final 20- to 25-page research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History, Environmental Studies majors if over-enrolled

SEM Section: 01 W 1:10 pm - 3:50 pm Karen R. Merrill

HIST 479 (F) Recent U.S. History: The 1970s and 1980s
The 1970s and 1980s are decades that mark the beginning of many of the phenomenon shaping the United States today: the rise of economic inequality; the origins of globalization; the first awareness of an "energy crisis;" the birth of social movements like feminism, gay rights, and black power; the deepening of urban poverty and the expansion of the criminal justice system; the ascendance of stock market and financial deregulation; the transition to a service economy; the growth of new forms of art and music like hip-hop and punk; the rise of evangelical Christianity as a political force; the emergence of a conservative movement; the end of Soviet Communism. This course will look at the political, economic, cultural and intellectual history of the 1970s and 1980s in the United States, with a special eye to the question of how and why conservative politics and a neoliberal economic order developed alongside liberal social and cultural values. We will consider the connection between the right and the left over this period, asking how we should think about the rise of the gay rights movement, the legacy of the civil rights movement, and the evolution of feminism in the broader context of American political and economic history. The course will also address some of the transnational aspects of recent American history, both the ways that ideas from other parts of the world have shaped American politics and society and the impact that the United States has had on the rest of the world. We will make use mostly of primary documents-political speeches, manifestos, music and lyrics, film, journalism and fiction-but we will also consider the ways that scholars have tried to conceptualize such recent history. While we will look at political leaders, intellectuals and the evolution of national politics, we will also consider the role of social movements, popular culture and the actions and ideas of people with no special access to power in shaping the history of the period. Throughout, we will ask: what are the connections between this history and the present? What lessons can we draw to think about our contemporary political and economic situation? Students will develop their own research questions and will produce a 20-page paper based on original research.
Class Format: seminar
Requirements/Evaluation: 20-page research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: senior History majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

HIST 480  (F)  Interpretations of the Israeli Palestinian Conflict  (DPE)

Cross-listings: GBST 480  ARAB 480  JWST 480  HIST 480

Primary Cross-listing

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Class Format: tutorial

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

HIST 481  (S)  History of Taiwan  (WS)

Cross-listings: ASST 413  HIST 481

Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Class Format: tutorial

Requirements/Evaluation: weekly papers and critiques

HIST 482 (F) The Great War, 1914-1918
Cross-listings: LEAD 382 HIST 482

Primary Cross-listing
During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

Class Format: tutorial
Requirements/Evaluation: paper or critique every week

HIST 483 (S) Sport and Diplomacy

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

Class Format: tutorial
Requirements/Evaluation: students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-page written critique
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with some prior course work in foreign relations and/or international history
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Attributes: HIST Group F Electives - U.S. + Canada HIST Group G Electives - Global History
HIST 484 (F) The Second World War: Origins, Course, Outcomes, and Meaning (WS)

1991 marked the 50th anniversaries of the Nazi invasion of Russia and the Japanese attack on Pearl Harbor. Though war had come to Europe as early as 1939, when Germany invaded Poland, after 1941 the war became a truly global conflict of unprecedented extent, ferocity, and destructiveness. As late as 1943 it still appeared that the Axis powers might win the war. But, by the end of 1945, the bombed-out ruins of Germany and Japan were occupied by the Allies, who were preparing to put the surviving Axis leaders and generals on trial for war crimes. This tutorial will concentrate on important questions and issues that arise from a study of WWII. What were the origins of this central event of the 20th century? How and why did the war begin? How and why did the war take the course it did? What were the most crucial or decisive episodes or events? How did the Allies win? Why did the Axis lose? Could the outcome have been different? Many of the topics examined will also have to deal with important questions of human responsibility and the moral or ethical dimensions of the war. Why did France, Britain, and the Soviet Union not stop Hitler earlier? Who was to blame for the fall of France and the Pearl Harbor fiasco? Why did the Allies adopt a policy of extensive firebombing of civilian targets? How could the Holocaust have happened? Could it have been stopped? Did the Atomic bomb have to be dropped? Were the war crime trials justified? By the end of this tutorial, students will have become thoroughly familiar with the general course the war followed as well as acquiring in-depth knowledge of the most decisive and important aspects of the conflict. Students will also have grappled with the task of systematically assessing what combinations of material and human factors can best explain the outcomes of the major turning points of the war, and also have dealt with the problem of assessing the moral and ethical responsibility of those persons, organizations, and institutions involved.

Class Format: will write and present orally an essay of approximately seven double-spaced pages every other week on a topic assigned by the instructor; students not presenting an essay have the responsibility of critiquing the work of their colleague

Requirements/Evaluation: weekly essays and critiques and a final written exercise

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: junior and senior History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will present 7 double-spaced pages every other week and a 7-10 page final written exercise. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 485 (F) Freud: A Tutorial (WS)

Cross-listings: HIST 485 PSYC 158

Primary Cross-listing

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, “Analysis Terminable and Interminable.” In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was “right” or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

Class Format: students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

Requirements/Evaluation: student grades will be assigned only at the end of the semester based on their papers, their critiques, and their

**HIST 486 (S) Islam in European Culture from Muhammad to Modernity (DPE)**

**Cross-listings:** REL 486  HIST 486

**Primary Cross-listing**

From the Crusades to modern colonialism, the relationship between Muslims and Western Christians has often been recounted as the clash of two opposing civilizations, a history of warfare and of incompatible values. This tutorial takes a different point of departure, namely the recent scholarly recognition that relationships between Muslims and Western Christians were often rooted in the intimacy of frequent interaction. We will delve into the many ways in which Muslim peoples shaped European culture from the Middle Ages to the present. We will explore different domains, from one of the first translations of the Qur'an into any language, the Latin version done in Toledo in 1143, to the many goods made by Muslim craftsmen that filled the homes of Renaissance Europe, and the roles of early modern Muslims as captives, slaves, diplomats, travelers, and converts. In the modern period, Muslims continued to inflect European culture both as colonial subjects and as domestic minorities, producing and inspiring art, imaginative literature, and critiques of European power. Our investigation will encompass music, visual art and film in addition to written works. How do we make sense of this intricately interwoven history? And what are its legacies for the present? Sources both primary and secondary will include Leo Africanus, Lady Montagu, Montesquieu, Mozart, al-Tahtawi, Flaubert, Sayyid Qutb and Fatima Mernissi.

**Class Format:** Tutorial

**Requirements/Evaluation:** five tutorial papers (5-7 pages.) and five shorter responses; occasional presentations

**Prerequisites:** History majors; juniors and seniors

**Enrollment Limit:** 10

**Enrollment Preferences:** if the course is overenrolled, a statement of interest will be requested

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 486 (D2) HIST 486 (D2)

**Difference, Power, and Equity Notes:** This tutorial takes the approach of cultural history; discussions will heed the politics of translation across religious, cultural, and linguistic boundaries. We will historicize the way “difference” has been understood, and see that the alterity that was once viewed as theological was in other eras seen as the product of culture or politics. In addition, the tutorial recovers the rich artistic and literary production that intercultural interactions inspired—a legacy worthy of study.

HIST 487 (S) Archive Stories (WS)
What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, Archive Fever, historians, archivists, and cultural theorists have been asking questions about the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is not a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

Class Format: tutorial
Requirements/Evaluation: each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final paper about their work on the Williams archives
Prerequisites: open to all junior and senior History majors and others with permission of instructor
Enrollment Limit: 10
Enrollment Preferences: History majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 488 (S) Gandhi: Nationalism, Philosophy, and Legacy
Cross-listings: GBST 488 HIST 488 REL 388 ASST 488

Primary Cross-listing
This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?
**Class Format:** tutorial; students will meet with the instructor each week for one hour sessions in pairs

**Requirements/Evaluation:** 5 to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** upper level History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**HIST 490** (S) Memory, History, and the Extermination of the Jews of Europe

**Cross-listings:** JWST 490 HIST 490

**Primary Cross-listing**

The atrocities committed by Nazi Germany during the Second World War continue to trouble historians in their attempts to understand and represent them in all their magnitude and horror. Beyond historians, the complicity of segments of European societies in perpetrating those atrocities continues to raise thorny questions for postwar European nations about what their responsibilities are toward that past. This tutorial will focus on a series of questions relating to the historicization and memorialization of the extermination of European Jews. They include: Is the Holocaust unique? Is it a Jewish story or universal story? Does the Holocaust raise different issues for the historian than other historical events? How should the Holocaust be represented and what are the implications of different means of representing it? What role, if any, did European Jews play in their own destruction? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the “bystanders” as compared to the “perpetrators”? Were the postwar trials of perpetrators a travesty of justice? How appropriate are the different uses that Israel and the United States have made of the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, governments, and lay people about the meaning (and meaninglessness) of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and more and more nations’ pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated should prove relevant for future consideration of other societies’ efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; additional requirements on alternate weeks, the student will write a 2-page critique of the fellow student’s paper; a final written exercise, a thought piece on the issues raised in the tutorial, will cap off the semester’s work

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**HIST 491** (S) The Suburbs

**Cross-listings:** AMST 490 ENVI 491 HIST 491
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: tutorial
Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with previous coursework in History

HIST 492 (S) Revolutionary Thought in Latin America
For much of Latin America's postcolonial history, political and business elites in the United States have viewed the region as a source of revolutionary threats. Too often histories of actual revolutionary movements and the ideas they promulgated have followed either the self-serving narratives that the revolutionaries have laid out or the similarly limited stories composed by their opponents. This tutorial, by contrast, will delve into the complex, contingent, and at times counterintuitive history of revolutionary thought in modern Latin America. Our readings and discussions will carry us from the nineteenth century to the rise of the “New Left” in the last few years. Throughout the course our principle goal will be to examine the internal logic of the most influential programs of revolutionary thought as well as their relationship to circumstances external to them, both in their home regions and globally. At the same time, we will consider the human or moral promise and price of revolutionary options: did the proposed or alleged aims of revolutionary ideals justify the costs they would impose?
Class Format: tutorial; students will meet with the instructor in pairs for an hour each week
Requirements/Evaluation: each student will write and present a 5- to 7-page essay on the readings or offer an oral critique of the work of their partner each week; evaluation will be based on written work and analysis of their partner's work
Prerequisites: none; open to all
Enrollment Limit: 10
Enrollment Preferences: History majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Spring 2020
TUT Section: T1   TBA   Roger A. Kittleson
HIST 493  (F)  Senior Thesis: Research Seminar

This seminar is intended solely for writers of senior theses. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 31 and HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation and completed written work, and will determine if a student will continue in the thesis program

Prerequisites: limited to seniors accepted into the History Department's Thesis Program

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)

HIST 495  (F)  Memoirs, Memory and the Modern Jewish Experience  (DPE) (WS)

Cross-listings:  HIST 495  JWST 495

Primary Cross-listing

Memoirs have proven to be an increasingly important source for Jewish historians, and particularly for those interested in the impact of modern society on Jewish identity. This tutorial will consider modern Jewish history by focusing on such individual voices. By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as Europe, the United States, Latin America, and the Middle East, we will consider how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as the historian's role in this relationship. In each case, we will ask such questions as: How does the role/importance of religion and ritual shift over time and place? How does the surrounding society shape the author's sense of self and his/her place in society? Similarly, we will consider the impact of economic, occupational, and political factors on understandings of Jewish identity as well as the impact of gender and generational splits on such understandings. In broad terms we will question what (if anything) links the different individuals under study. In other words, is there something about Jewish identity that transcends the historical specificity of the author's setting? Throughout the course, we will also consider how a memoir can be used as an historical source. Can we generalize from individual experience, and if so how do we reconcile contradictions among the multiple voices?

Class Format: tutorial
Requirements/Evaluation: each student will write and present orally a 3- to 5-page response paper on the assigned readings of the week (alternating weeks); there will be one final 10-page paper

Prerequisites: none

Enrollment Limit: 6

Enrollment Preferences: upperclass students, History majors and Jewish Studies concentrators, or those with documented academic interests in the subject matter

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HISTORY OF SCIENCE  
(Div II and III, see course descriptions)  
Chair: Professor Jason Storm

A major in the History of Science is not offered, but the occasional Contract Major or a related interdisciplinary field is possible. Courses in the History of Science are designed primarily to complement and strengthen work in other major fields. Although any of the courses may be taken separately, studying related courses in other departments will enhance their value, because by nature, History of Science is interdisciplinary.

The following will serve as examples: HSCI 101 is an introduction to science and technology studies, and concentrates on key aspects of contemporary science and technology relevant to many issues of living in a technological society. HSCI 224 Scientific Revolutions deals with the emergence of modern science in the 1600s and 1700s, and with subsequent revolutions in scientific thought; as such it complements courses related to modern European history. HSCI 240 traces the influential role of science and invention in the shaping of American culture, and complements offerings in American Studies and American History. HSCI 320, an historical overview of the ideas, practice, and organization of medicine, provides context for related coursework in History, Philosophy, and the Premed Program.

HSCI 101 (S) Science, Technology, and Human Values
Cross-listings: HSCI 101 STS 101 SOC 201
Secondary Cross-listing
This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field. Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Class Format: seminar
**Requirements/Evaluation:** two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams

**HSCI 240 (F) Great Astronomers and Their Original Publications**

**Cross-listings:** LEAD 240 HSCI 240 ASTR 240 SCST 240

**Secondary Cross-listing**

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlas of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell
Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Class Format: seminar

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper

Secondary Cross-listing

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper

HSCI 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 HSCI 338 REL 338 SOC 338

Secondary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Medicalization: those processes by which previously non-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture

Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm
Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: preference will be given to Anthropology and Sociology students

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year
This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

**INTR 19**  The Restless, Living, Incomplete, Agitated, Incredible, Conjectural Collection

This course takes a behind-the-scenes look at the WCMA art collection--its origins, contents, accessibility, and future--as a singular resource for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, protest, power, agitation, and rebellion, students will conduct both a broad survey of the collection and in depth case studies of several artworks. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries. The course further offers the chance to collaborate with WMCA staff, including representatives from various departments, including archives, curatorial, collections, and more. The course’s final project includes generating a speculative exhibition proposal for the museum in the fall of 2020.

Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition making, history as medium, and the practice of research.

Requirements/Evaluation: exhibition proposal
Prerequisites: keen interest in museums, art collections and culture
Enrollment Limit: 12
Enrollment Preferences: random selection
Grading: 
Materials/Lab Fee: $0

Not offered current academic year

**INTR 99 (W) Indep Study: Interdisciplinary**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

**INTR 219 (S) Women in National Politics**

Cross-listings: INTR 219  WGSS 219  PSCI 219
Primary Cross-listing

This tutorial focuses on the writings and memoirs of black women who have shaped national politics through civil rights and human rights movements in the 21st century. Women studied include: Fannie Lou Hamer, Barbara Jordan, Shirley Chisholm, Angela Davis, Ella Baker, Kathleen Cleaver.

Class Format: tutorial
**Course Title:** Image, Imaging, and Imagining: The Brain and Visual Arts

**Course Code:** INTR 223  PSYC 318

**Secondary Cross-listing**

This course will study the intersections of neuroscience and art. The brain interprets the visual world and generates cognitive and emotional responses to what the eyes see. It is also responsible for creating mental images and then directing the artist's motor output. We will first examine the neural mechanisms of how we perceive what we see. We will investigate how visual artists have used or challenged perceptual cues in their work. Understanding how the brain perceives faces will be used to analyze portraiture. We will consider the influence of neurological and psychological disorders on artistic work. We will examine neuroimaging studies questioning whether the brains of visual artists are specialized differently from non-artists. Finally, we will explore how contemporary artists are using brain images in their artwork, and how "outsider" artists have portrayed brain syndromes and mental states. Students will conduct an empirical laboratory project that will explore their own experimental question in response to the course material. The class will include field trips to local museums.

**Class Format:** Seminar

**Requirements/Evaluation:**
- A midterm, in class writing assignments, participation in class discussions, and a final project

**Prerequisites:**
- PSYC 101, an ARTH or ARTS course, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Studio Art majors; Psychology majors

**Expected Class Size:** 12

**Grading:**
- No pass/fail option, yes fifth course option

**Distributions:** (D3)

INT 223 (D3) PSYC 318 (D3)

**Attributes:** PSYC Area 1 - Behavioral Neuroscience

---

**Course Title:** Philosophy of Education

**Course Code:** INTR 240

**Secondary Cross-listing**

Why are you here? What do you expect to learn? How do you expect to learn? The College Mission Statement says that "Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character." How have you already been taught the academic and civic virtues? Where have you been taught them? In school? On the sports field? At home? How did you develop your character? This first-year seminar will examine the philosophy of education through educational autobiographies: works that tell the story of a moral and intellectual education. Each book was chosen by and will be introduced by a professor from a different department, and then Professor
of Philosophy Steve Gerrard will continue the discussion.

Class Format: seminar
Requirements/Evaluation: several short papers
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: only first-year students
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

INTR 330 (S) Femininity, Captivity, and Cultural Politics
This tutorial examines female, pro-feminist leadership for human rights that shapes cultural norms and perceptions of social justice. The tutorial will examine contributions to: activism, literature, art, film, music, theory focused on advocacy democracy.

Class Format: tutorial
Requirements/Evaluation: students write primary papers and review papers each week
Prerequisites: none
Enrollment Limit: 10
Expected Class Size: 4
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)
INTR 334 (S) Radical Theories of Political Struggle: Anti-Black Racism and the Obama Administration

Cross-listings: AFR 334 PSCI 346 INTR 334

Primary Cross-listing
This seminar reviews contemporary theories of "anti-black racism"; their articulation or assimilation within current political movements and mobilizations; and the influence and impact such theories-expressed in and/or as activism-on social justice and civil rights. Critical race theory, Afro-pessimism, feminist/queer theory and the works of the incarcerated are studied. Theorists studied include: Frank Wilderson; Angela Davis; Derrick Bell; Cheryl Harris. Students write weekly mini-reflection papers on assigned readings and collectively make analytical presentations.

Class Format: seminar
Requirements/Evaluation: 1 research paper (50%); 2 presentations with summaries (40%); active engagement in class discussions (10%). Weekly student presentations consist of 15 minutes of analysis with written summaries and Q/A.

Extra Info: 1st quarter of semester: thesis and outline; 2nd and 3rd quarters: 2-page summaries integrating assigned texts into research analysis; 4th quarter: edit final paper.

Prerequisites: familiarity with one of the following: critical race theory; Africana/Black studies; feminist anti-racist political movements

Enrollment Limit: 15
Enrollment Preferences: if over enrolled students will be asked to submit a paragraph on their research interest relevant to the seminar.

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

INTR 343 (S) Representations of Racial-Sexual Violence from Enslavement to Emancipation

Cross-listings: AFR 343 INTR 343 WGSS 343 AMST 343

Primary Cross-listing
This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: tutorial; students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence.

Requirements/Evaluation: weekly primary and response papers

Prerequisites: none

Enrollment Limit: 10
Enrollment Preferences: preference given to juniors and seniors

Expected Class Size: 8
Grading: no pass/fail option, no fifth course option

Spring 2020
TUT Section: T1  Cancelled

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

RLIT 99 (W) Independent Study: Italian
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Distributions: (D1)

Winter 2020
IND Section: 01 TBA Jennifer L. French

RLIT 101 (F) Elementary Italian
This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester you will be given training in grammar, pronunciation, aural-oral skills, reading and writing in Italian through the study of a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, to describe your family, your town, your friends and to discuss about your interests. You will also be able to talk in Italian about present and past events and to converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, to watch clips from mainstream Italian films, and to write short compositions. Conducted entirely in Italian.

Class Format: five hours a week with the professor
Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams
Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken
Prerequisites: none; not open to those who have had one year or more of high school Italian
Enrollment Limit: 20
Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
RLIT 102 (S) Elementary Italian

This course is designed for beginners who have already some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester you will continue to learn grammar, vocabulary, pronunciation, while improving your aural-oral skills, reading and writing in Italian. To achieve these goals, you will be presented with a wide range of communication patterns and real-life situations. At the end of the semester you will be able to use Italian to talk about yourself, your life, to describe your town and its history, your dreams and interests, and to express your opinion on complex topics. You will also be able to talk in Italian about present, past, and future events and to express doubts and hopes. You will be able to understand more complex conversations and clips from mainstream Italian films, and to write longer compositions. Conducted entirely in Italian.

Class Format: five hours a week with the professor

Requirements/Evaluation: evaluation will be based on participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Extra Info: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

Prerequisites: RLIT 101; not open to those who have had one year or more of high school Italian

RLIT 105 (F) Pathway to Proficiency

The course taught in Italian aims primarily at fine-tuning the student's speaking, reading and writing ability, while providing an introduction to the formal study of Italian culture and society through the analysis of short literary texts, articles, films, and plays. Students will review and expand the grammar structures learned in the previous semesters with the goal of achieving a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll.

Class Format: seminar

Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation

Prerequisites: RLIT 101/102 or by permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
MISSION STATEMENT AND LEARNING OBJECTIVES

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

LEARNING OBJECTIVES FOR THE JAPANESE MAJOR

Students who complete the requirements for a major in Japanese will be able to:

• Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL intermediate-high to advanced levels.
• Critically read and analyze a variety of Japanese primary sources for academic and professional purposes
• Conduct research by engaging in cross-linguistic, cross-cultural, and comparative historical analysis with problem-solving and critical thinking skills.
• Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
• Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
• Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.
Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Japanese are indicated below:

**Japanese Major**

- Four additional semesters of Japanese language (300-level or higher).
- One approved course in Japanese language (400-level), literature or culture.
- One approved elective on Japan.

**STUDY ABROAD**

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

**FAQ**

- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

  **Can your department or program typically pre-approve courses for major/concentration credit?**

  Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

  **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

  Course title and description, complete syllabus including readings/assignments, and exams or other written work.

  **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

  Yes, maximum of four courses.

  **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

  Approved courses only.

  **Are there specific major requirements that cannot be fulfilled while on study away?**

  No.

  **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

  Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

  **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**

  There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

**THE DEGREE WITH HONORS**

Students interested in writing an honors thesis in Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for JAPN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student’s performance in the oral defense.
THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

JAPN 101  (F)  Elementary Japanese
An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.
Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: evaluation will be based on daily classroom performance, homework, quizzes, a midterm, and a final exam
Extra Info: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken
Prerequisites: none
Enrollment Limit: none

JAPN 131 (F) Introduction to Japanese Linguistics
This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Class Format: lecture
Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam
Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: Linguistics
Not offered current academic year

JAPN 201 (F) Intermediate Japanese
This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam

**Prerequisites:** JAPN 101-102 or permission of instructor

**Enrollment Limit:** none

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**JAPN 220 (S) Being Korean in Japan**

**Cross-listings:** ASST 220  JAPN 220

**Primary Cross-listing**

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

**Class Format:** Lecture

**Requirements/Evaluation:** attendance/participation; short written responses at end of each class; three to five unannounced quizzes; midterm exam; group presentation; final essay (6-7 pages)

**Prerequisites:** None
**JAPN 223 (S) Japanese Food Culture in a Global Context**

**Cross-listings:** JAPN 223 COMP 223

**Primary Cross-listing**

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, three response papers, two small projects (including descriptions & class presentations), and one research paper & presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

**Not offered current academic year**

---

**JAPN 258 (S) Language and Literacy Development**

**Cross-listings:** JAPN 258 PSYC 258

**Primary Cross-listing**

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

**Class Format:** seminar

**Requirements/Evaluation:** active participation in the class discussion, weekly reaction paper, quiz, final paper

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Japanese, Chinese, Asian Studies, and Psychology majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: Linguistics
Not offered current academic year

JAPN 260 (F) Japanese Theatre and its Contemporary Context

Cross-listings: JAPN 260 COMP 262 THEA 262

Primary Cross-listing
Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? All readings and discussion will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper
Prerequisites: none; open to all
Enrollment Limit: 20
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

JAPN 274 (F) Confronting Japan

Cross-listings: COMP 274 JAPN 274

Primary Cross-listing
This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Class Format: tutorial
Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Japanese majors
Expected Class Size: 10
JAPN 276  (S)  Premodern Japanese Literature and Performance

Cross-listings:  JAPN 276  COMP 278

Primary Cross-listing

Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts. All readings and discussions will be in English.

Class Format: lecture/discussion
Requirements/Evaluation: active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events
Prerequisites: none; open to all
Enrollment Limit: 20

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

JAPN 301  (F)  Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will, further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes
Requirements/Evaluation: evaluation will be based on daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 202 or permission of instructor
Enrollment Limit: none

Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

JAPN 407  (F)  An Exploration of Japanese Language and Culture

Cross-listings: ASST 207  JAPN 407

Primary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

Prerequisites: none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):

- REL 201 / COMP 201 / JWST 201: The Hebrew Bible
  Taught by: Edan Dekel
  [Catalog details](catalog.html)
- REL 203 / JWST 101: Judaism: Before The Law
  Taught by: Jeffrey Israel
  [Catalog details](catalog.html)

Core Courses

- ANTH 334 / COMP 334 / JWST 334 / REL 334(S): Imagining Joseph
  Taught by: Peter Just
  [Catalog details](catalog.html)
- ARAB 363 / JWST 268 / REL 268 / HIST 311 / COMP 363(S): Where are all the Jews?
  Taught by: Brahim El Guabli
  [Catalog details](catalog.html)
- HIST 230 / JWST 230(F): Modern European Jewish History, 1789-1948
  Taught by: Alexandra Garbarini
  [Catalog details](catalog.html)
- HIST 338 / REL 296 / JWST 338(F): The History of the Holocaust
  Taught by: Alexandra Garbarini
  [Catalog details](catalog.html)
- HIST 434 / REL 335 / JWST 434(S): The Meaning of Diaspora and the Jews of Europe
  Taught by: Alexandra Garbarini
  [Catalog details](catalog.html)
- HIST 480 T / ARAB 480 / GBST 480 / JWST 480: Interpretations of the Israeli Palestinian Conflict
  Taught by: Magnús Bernhardsson
  [Catalog details](catalog.html)
- HIST 490 T / JWST 490: Memory, History, and the Extermination of the Jews of Europe
  Taught by: Alexandra Garbarini
  [Catalog details](catalog.html)
- HIST 495 T / JWST 495(F): Memoirs, Memory and the Modern Jewish Experience
  Taught by: Maud Mandel
  [Catalog details](catalog.html)
- REL 202 / JWST 202 / COMP 214: Moses: Stranger in a Strange Land
  Taught by: Edan Dekel
  [Catalog details](catalog.html)
- REL 205 / CLAS 205 / JWST 205 / COMP 217: Ancient Wisdom Literature
  [Catalog details](catalog.html)
Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

CRHE 101(F) Hebrew
  Taught by: Jane Canova
  Catalog details
CRHE 102(S) Hebrew
  Taught by: Jane Canova
  Catalog details
HIST 111 / ARAB 111 / LEAD 150 Movers and Shakers in the Middle East
  Taught by: Magnús Bernhardsson
  Catalog details
HIST 207 / GBST 101 / ARAB 207 / LEAD 207 / JWST 217 / REL 239(F) The Modern Middle East
  Taught by: Magnús Bernhardsson
  Catalog details
HIST 239(F) Germany in the Twentieth Century
  Taught by: Thomas Kohut
  Catalog details
HIST 409 / ARAB 409 / GBST 409(F) Crescent, Cross, and Star. Religion and Politics in the Middle East

THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

Croghan Professorship

Each year, in addition to the regular course offerings listed above, Williams sponsors the Crogan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Gateway course and Capstone course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

FUNDING

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman ’50, Samuel Bronfman II ’75, and Matthew Bronfman ’80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College’s formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener ’56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener ’56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.
JWST 31 (W) Senior Thesis: Jewish Studies

Jewish Studies senior thesis.

Class Format: thesis
Grading: pass/fail only

IND Section: 01     TBA     Edan Dekel

JWST 101 (F) Judaism: Before The Law

Cross-listings: REL 203  JWST 101

Secondary Cross-listing
This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Kafka's The Trial with his parable "Before The Law," Woody Allen's film Crimes and Misdemeanors, and ethnographic accounts of contemporary Jewish observance. All readings will be in translation.

Class Format: seminar
Requirements/Evaluation: class participation, three short papers, and a final longer paper
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Jewish Studies concentrators, Religion majors and students who are considering these options
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

JWST 201 (F) The Hebrew Bible
Cross-listings:  COMP 201  REL 201  JWST 201

Secondary Cross-listing

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, short written assignments, and two to three longer papers

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Jewish Studies concentrators, Religion and Comparative Literature majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

JWST 202  (S)  Moses: Stranger in a Strange Land

Cross-listings:  JWST 202  COMP 214  REL 202

Secondary Cross-listing

As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick-tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self-described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. All readings are in translation.

Class Format: seminar

Requirements/Evaluation: class participation, short written assignments, and two or three longer papers

SEM Section: 01    TF 2:35 pm - 3:50 pm     Phillip J. Webster

JWST 205  (S)  Ancient Wisdom Literature
Cross-listings:  COMP 217  REL 205  JWST 205  CLAS 205

Secondary Cross-listing
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack.
All readings are in translation.

**JWST 205 (S) The Book of Job and Joban Literature**

**Cross-listings:** COMP 206 REL 206 JWST 206

**Secondary Cross-listing**

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. All readings are in translation.

**JWST 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis**

**Cross-listings:** CLAS 207 COMP 250 REL 207 JWST 207

**Secondary Cross-listing**

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. All readings are in translation.

JWST 208 (S) Genesis: The Family Saga
Cross-listings: REL 208 COMP 207 JWST 208
Secondary Cross-listing
The Book of Genesis has rightly been described as the masterpiece of Hebrew biblical narrative. In particular, the continuous tale that begins with Abraham and Sarah and extends four generations to the children of Jacob, Leah, and Rachel is one of the most extraordinary examples of literary artistry in any time or tradition. As one family wrestles with the promise of becoming a chosen people, the narrative explores themes of marriage, parenthood, sibling rivalry, land, violence, wandering, and, above all, the complex relationship between humanity and God. This course will examine those themes through a close reading of Genesis in translation, from Abraham and Sarah's first appearance on the scene to the death of Jacob. We will consider the text from multiple perspectives with an eye toward understanding the literary, philosophical, and psychological dimensions that continue to amaze and perplex readers to this day.

JWST 209 (S) Jewish America
Cross-listings: JWST 209 REL 209
Secondary Cross-listing
Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilanty on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall; read John Updike's Beech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about
the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Class Format: seminar

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

JWST 219 (S) Judaism Under Ancient Greek and Roman Imperialisms

Cross-listings: CLAS 219 REL 219 JWST 219

Secondary Cross-listing
How did ancient Greek and Roman empires shape the beginnings of Judaism? In this course, we will examine how Greek and Roman imperial systems of identity, ethnicity, law, religion, and knowledge affected Judaism as a religious and cultural system. We will pay particular attention to the ways that Jews/Judeans responded to these imperial pressures, especially as those responses articulated "hybrid" versions of Judaism that were informed both by resistance to imperial centers as well as the sheer hegemony of those cultural systems. The course thus uses (and introduces students to) postcolonial theory to study the history of Judaism under Greek and Roman empires. Readings for this course will include a wide array of ancient Jewish works, such as the books of Maccabees, Flavius Josephus, Philo of Alexandria, the Dead Sea Scrolls, and the Mishnah. The course will also include select readings from early Christian texts and postcolonial theory.

JWST 222 (F) The Jewish Art of Interpretation
Cross-listings: REL 222 JWST 222 COMP 211
Secondary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Class Format: seminar
Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

JWST 230  (F)  Modern European Jewish History, 1789-1948

Cross-listings: HIST 230  JWST 230

Secondary Cross-listing

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

Class Format: lecture/discussion

JWST 259 (S) Ethics of Jewish American Fiction

Cross-listings: REL 259 ENGL 259 JWST 259

Secondary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Class Format: seminar

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden
disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Class Format: Seminar

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

JWST 280  (F)  Art at its Limits: Representing the Holocaust  (DPE) (WS)

Cross-listings:  COMP 280  JWST 280  GERM 280

Secondary Cross-listing
The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró'ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Pawe' Pawlikowski, and Steven Spielberg.

Class Format: Seminar
Requirements/Evaluation: three 2-page critical responses, oral presentation, final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: German and Comparative Literature majors

JWST 334 (S) Imagining Joseph
Cross-listings: COMP 334 REL 334 ANTH 334 JWST 334
Secondary Cross-listing
Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

JWST 339 (F) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities--as some recent commentators have--that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

JWST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)

Cross-listings: HIST 434 REL 335 JWST 434

Secondary Cross-listing

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short papers, oral presentations, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Class Format: seminar

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Memoirs have proven to be an increasingly important source for Jewish historians, and particularly for those interested in the impact of modern society on Jewish identity. This tutorial will consider modern Jewish history by focusing on such individual voices. By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as Europe, the United States, Latin America, and the Middle East, we will consider how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as the historian's role in this relationship. In each case, we will ask such questions as: How does the role/importance of religion and ritual shift over time and place? How does the surrounding society shape the author's sense of self and his/her place in society? Similarly, we will consider the impact of economic, occupational, and political factors on understandings of Jewish identity as well as the impact of gender and generational splits on such understandings. In broad terms we will question what (if anything) links the different individuals under study. In other words, is there something about Jewish identity that transcends the historical specificity of the author's setting? Throughout the course, we will also consider how a memoir can be used as an historical source. Can we generalize from individual experience, and if so how do we reconcile contradictions among the multiple voices?

**Class Format:** tutorial

**Requirements/Evaluation:** each student will write and present orally a 3- to 5-page response paper on the assigned readings of the week (alternating weeks); there will be one final 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 6

**Enrollment Preferences:** upperclass students, History majors and Jewish Studies concentrators, or those with documented academic interests in the subject matter

On leave Fall only: Associate Professor M. Barry. Professor James Nolan.

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair.

Students may declare a program concentration at any point during their academic career.

Senior Seminar

In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

Cross-listings:  JLST 13  ENVI 13

Primary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as
to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble Mine, Alaska, permitting controversy
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: seniors first, then juniors, etc
Grading: pass/fail only
Materials/Lab Fee: approximately $100 for books
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

JLST 14 (W) Mock Trial
Offered for the seventh time as a Winter Study Program, Mock Trial provides students with the opportunity for collaboration, teamwork to solve common problems, and critical analysis of facts and documents in the context of a legal dispute. Two teams are formed, and the teams work as units to review and analyze a fact pattern secured from the American Mock Trial Association. The "final exam" is the presentation of two trials with the teams switching sides for the two trials. The adjunct professors (both Williams graduates) are experienced trial attorneys. The class is limited to 16 students to form the two 8-member teams. The course has been well received as a Winter Study offering, and potential students are encouraged to review prior evaluations. As a Leadership Studies offering, this course allows students to work together to select a case strategy, determine what facts and documents will support the selected strategy, perform direct and cross examination of witnesses, and deliver opening statements and closing arguments. The course meets twice a week, usually on Mondays and Tuesdays for 3.5 hours each day. Adjunct Instructor Bio: Mr. Olson graduated from Williams in 1971 and practiced civil litigation for 40 years with the same firm in Cincinnati, Ohio. In 2019 he relocated to Boston to be nearer his family but continues to practice law. The practice focuses on construction law and specifically suretyship. In 2019 he argued a suretyship case in the Federal Court of Appeals. He has taught the Mock Trial Winter Study Course in 6 prior years and has enjoyed the opportunity to work with his students. Adjunct Instructor Bio: Steve Brown graduated from Williams in 1971. After graduating from Villanova Law School where he was Editor-in-Chief of the Law Review, Steve has been a litigator and trial lawyer for 40 years concentrating his practice in white-collar criminal defense and civil rights. He was a partner at Dechert LLP from 1991 to 2016, when he retired and became Civil Rights Counsel to the firm. He has spent much of his career doing pro bono work including representing Guantanamo Bay detainees and people and prisoners whose constitutional rights have been violated. Steve has represented or supervised young lawyers at Dechert in over 150 prisoner civil rights cases, including 40 trials in federal courts
Requirements/Evaluation: final project or presentation; two trials presented by the students
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: preference to upperclass students
Grading: pass/fail only
Materials/Lab Fee: $0
Distributions: (D2)
Not offered current academic year
JLST 15  (W) The Work of the Supreme Court: A Simulation

Cross-listings: JLST 15 CHEM 15

The objective of this course is to provide students with an understanding of the personal, theoretical, and institutional characteristics that impact the decision-making process of the nation’s highest court. At the beginning of the course, the students will be provided with briefs, relevant decisions and other materials for a case currently pending before the court. Where possible, cases will be selected that address constitutional issues that also have a political and/or historical significance. Past examples include the constitutionality of provisions in the Affordable Care Act, rights of prisoners held in Guantanamo, the extent of First Amendment rights of students, and the applicability of the State Secrets doctrine to the country’s extraordinary rendition program. Four students (two on each side) will be assigned to prepare and present oral arguments to the “Court,” which will consist of the other eight students, each playing the role of a Supreme Court Justice. An instructor will act as the Chief Justice to coordinate the student Justices and keep them on focus. After the oral argument, the “Court” will confer and prepare majority and minority opinions, which will be announced in “open court” at the conclusion of the term.

Adjunct Instructor Bio: Robert Groban is a former Assistant U.S. Attorney, SDNY, and current partner in Berry Appleman & Leiden LLP. Adjunct Instructor Bio: Thomas Sweeney retired former litigator with Hogan & Hartson and Hogan Lovells.

Requirements/Evaluation: short paper and final project or presentation; oral argument, or written court opinions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniority

Grading: pass/fail only

Materials/Lab Fee: $10 and approximately $45 for books

JLST 17  State Constitutions, State Courts, and Individual Rights

Most people are familiar with the idea that the federal constitution, as interpreted by the U.S. Supreme Court, can serve as an important (albeit controversial) tool for vindicating individual rights. Cases involving rights to same-sex marriage, abortion, and gun ownership are just a few recent examples of the U.S. Supreme Court and the federal constitution taking center stage in battles over individual rights. But there is another, equally important, source of individual rights that is sometimes overlooked and understudied: state constitutions. Each state has its own constitution, which may contain different rights and protections from those in the federal constitution, and its own courts, which interpret that constitution. In this class, we’ll take a look at the role of state constitutions and courts in protecting individual rights and influencing federal constitutional interpretation. From assessing the constitutionality of compelled sterilization to protecting citizens from unreasonable searches and seizures, we’ll examine the interplay between state and federal courts and constitutions. To do this, we’ll read the book 51 Imperfect Solutions: States and the Making of American Constitutional Law by Judge Jeffrey S. Sutton (class of 1983). As a final project, students will choose a legal issue, evaluate its chances of success under the federal constitution and their home state constitution (or state constitution of their choosing), develop a basic litigation strategy aimed at achieving their objectives, and present that evaluation and strategy to the class. Adjunct Instructor Bio: Erin Lagesen (class of 1991) is a judge on the Oregon Court of Appeals. At Williams, she double majored in Mathematics and English. Adjunct Instructor Bio: Susan Yorke (class of 2006) is an appellate attorney in San Francisco, and she also graduated from Williams with a double major in Mathematics and English.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to juniors and seniors; students may be asked to submit a short statement of interest

Grading:

Materials/Lab Fee: approximately $30 for books

Not offered current academic year

JLST 99  (W) Independent Study: Legal Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study  
**Grading:** pass/fail only  
**Distributions:** (D2)

Winter 2020

**JLST 272 (F) Free Will and Responsibility** *(WS)*

**Cross-listings:** PHIL 272 JLST 272  
**Secondary Cross-listing**

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

**Class Format:** tutorial; students meet with the instructor in pairs for roughly an hour each week  
**Requirements/Evaluation:** five 5-page papers and five 2-page papers

JLST 401 (S) The Unwritten Constitution
"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book America's Unwritten Constitution. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists (including Antonin Scalia, Robert Bork, Laurence Tribe, Ronald Dworkin, and Richard Posner), we will probe different ways of thinking about the Supreme Law of the Land.

Spring 2020
JLST 402 (S) International and Transitional Justice

Cross-listings: JLST 402  PSCI 325

Secondary Cross-listing

Before the 1990s, the world saw only occasional, discrete war crimes trials after major-power cataclysms. In the last two decades, trials expanded dramatically in number, scope, and philosophy. Separate Ad Hoc Tribunals for crimes in Yugoslavia and those in Rwanda, in Sierra Leone and in Cambodia are giving way to a permanent International Criminal Court, which has begun to hand down indictments and refine its jurisdiction. The UN Security Council, alongside national governments, decides on legitimacy and punishment. At the same time, worries about residual impunity or the effect that punishment might have on societies' futures has led to the development of national and social courts, as well as national military tribunals, to complement those at the international level. Meanwhile, national activists look to international apologies and reparations for models of what to demand. Examples of internationalized transitional justice abound. This research seminar examines the intent, process, meaning and consequence of these new practices, particularly in terms of national constitutions, international law, and principles of justice.

JLST 403 (S) Senior Seminar in Human Rights in International Politics and Law

Cross-listings: JLST 403  PSCI 420

Secondary Cross-listing

The idea that all humans have rights simply because they are human-independent of anything they might do or achieve-has transformed local and international politics, probably permanently. This concept's place in international politics, its strengths and limitations, depend on how people use it. Beginning with the 18th-century's transatlantic movement to abolish slavery, we will examine international movements and institutions that have affected what human rights mean, to whom, and where. Readings draw on philosophy, history, sociology, and international relations, but as a political science class we emphasize politics. Who benefits from the idea of universal human rights? Who loses? How does this idea about individual value liberate and entrap? Does this idea ultimately reinforce American hegemony, or plant the seeds of a non-American order?

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

**MAJOR**

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

**Classics:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

**Classical Civilization:** (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Two additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

**Senior Colloquium:** Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

**Classical Civilization Courses:** The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.
STUDY ABROAD
We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLLA 99 (W) Independent Study: Latin
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Distributions: (D1)

Winter 2020
IND Section: 01 TBA Edan Dekel

CLLA 101 (F) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the
rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam

Extra Info: credit granted only if both semesters (CLLA 101 and 102) are taken

Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

Enrollment Limit: 15

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01    MWF 11:00 am - 12:15 pm     Nicole G. Brown

CLLA 102  (S)  Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. The first semester and part of the second emphasize learning basic grammar; the rest of the second semester is devoted to reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and from Latin prose (e.g., Pliny's Letters).

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on frequent quizzes, tests, classroom exercises, and a final exam

Extra Info: credit granted only if both semesters (CLLA 101 and 102) are taken

Prerequisites: CLLA 101 or permission of department

Enrollment Limit: 18

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

LEC Section: 01    MWF 11:00 am - 12:15 pm     Nicole G. Brown

CLLA 201  (F)  Intermediate Latin: The Late Republic

Reading of selections from Latin prose and poetry, normally from a speech or letters by Cicero and from the poetry of Catullus. This course includes a comprehensive review of Latin grammar and aims primarily at developing fluency in reading Latin. At the same time it acquaints students with one of the most turbulent and important periods in Roman history and attends to the development of their interpretative and analytic skills.

Class Format: recitation/discussion

Requirements/Evaluation: evaluation will be based on classroom performance, quizzes, a midterm, and a final exam; occasional oral presentations or short essays may be required as well

Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

Enrollment Limit: 12

Expected Class Size: 6-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
CLLA 302  (S)  Vergil's "Aeneid"

This course is a comprehensive introduction to Vergil's Aeneid. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.

Class Format: discussion/recitation

Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

Prerequisites:  CLLA 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Spring 2020

CLLA 405  (F)  Livy and Tacitus: Myth, Scandal, and Morality in Ancient Rome

Mythical stories of Rome's founding, which were formulated by many generations of Roman authors and public figures, served as a framework for these very thinkers to analyze and articulate Roman self-image in rich and creative ways; one who stands out among these figures is the Augustan historian Livy. The "second founding" of the Republic by Augustus, and the careers of his successors, in turn gave later Roman writers like Tacitus fresh inspiration for Roman self-imagining and self-analysis. We will begin the semester in mythical Rome, reading selections from Book 1 of Livy's history which present figures like Aeneas, the Trojan refugee whose arrival in Italy was conceptually crucial to Rome's development and position in Italy and the Mediterranean; Romulus, by whom Rome was founded in an act of fratricide; the Sabine women, whose nobility prevented a deadly war between their fathers and their Roman kidnappers; and Lucretia, whose virtue and self-sacrifice led to the liberation of Rome from a decadent and violent monarchy and to the founding of the Roman Republic. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation, and sympathy; we will examine as well how Livy often filters his account of mythical Rome through the lens of his own time, thereby constructing Rome's past through the Augustan present. Writing more than a century after Livy, Tacitus offers a different view of Augustus, and his account of the rude and dissolute Tiberius, the unscrupulous Livia, Rome's craven and dispirited senators, and the many scandals attached to the imperial family, figures a Rome once again suffering under a decadent monarchy. Tacitus's compressed, fastidious, inimitable prose is the vehicle for his stern yet often sardonic psychological insights, which subtly manage to combine moral judgment with prurient pleasure in the scandals of others.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam

Prerequisites:  CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 6

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Not offered current academic year

CLLA 406  (F)  Horace's Odes

This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.
Class Format: seminar
Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Classics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Fall 2019
SEM Section: 01 TF 2:35 pm - 3:50 pm Edan Dekel

CLLA 407 (F) Caesar and Cicero
The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: recitation/discussion
Requirements/Evaluation: evaluation will be based on class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6-9
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 408 (S) Roman Comedy
Roman comedy flourished only briefly, between the second and third Punic Wars, but its cultural-historical importance is undeniable. In these fabulae palliatae, Latin comedies staged in Greek costume and featuring ostensibly Greek characters, Roman attitudes are questioned and mocked but ultimately reasserted. We will read the Menaechmi of Plautus and the Adelphoe of Terence, two plays that burlesque the stereotypical relationships between fathers, brothers, sons, and slaves. We may also consider selections from Cato the Elder, Cicero's letters, and other primary and secondary texts that shed additional light on Roman familial relationships and their place in republican society.

Class Format: discussion/recitation
Requirements/Evaluation: evaluation will be based on class participation, several papers of varying length, a midterm and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: if the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature
Expected Class Size: 8-10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 409 (S) Seneca and the Self

Class Format: seminar
Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Classics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Not offered current academic year

CLLA 409 (S) Seneca and the Self
This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the persona theory of Panaetius as transmitted by Cicero's De Officiis. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short written and oral assignments, midterm and final exams, and a final paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 414 (F) Vergil's Eclogues and Georgics

This course will explore the two major works of Vergil that precede the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

Class Format: seminar

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 415 (S) Ovid's Metamorphoses

This course will explore Ovid's greatest work, an epic poem in fifteen books entitled Metamorphoses. Ovid's poem narrates the story of the world from its beginning down to his own day, the reign of Augustus, via a series of tales closely woven together through the theme of change. We will translate and discuss large portions of the Latin text along with selections from contemporary scholarship in order to consider the poem in its original political and cultural context as well as its relationship to earlier models and its post-classical reception.

Class Format: Seminar

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
LATINA/O STUDIES (Div II)
Chair: Professor Maria Elena Cepeda & Professor Carmen Whalen (Fall); Professor Maria Elena Cepeda & Professor Roger Kittleson (Spring)

Professors: M. E. Cepeda, O. Chavoya, M. Rúa, C. Whalen; Associate Professor: J. Hidalgo; Affiliated Faculty: Associate Professor G. Mitchell;
Visiting Artist in Residence: N. Rosario; Pre-doctoral Fellow: S. Rosado.
On leave Fall/Spring: Professor M. Rúa
On leave Spring only: Professor Carmen Whalen

Latina/o Studies is an interdisciplinary and comparative field of study that explores the histories, representations, and experiences of Latinas and Latinos in the United States. Latinas and Latinos include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as more recent migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest growing populations in the contemporary era, provides an opportunity to explore complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION
The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:
One of the following 400-level seminars:

LATS 408 / AMST 408 Envisioning Urban Life: Objects, Subjects, and Everyday People
  Taught by: Mérida Rúa
  Catalog details
LATS 409 / WGSS 409 / AMST 411 Transnationalism and Difference: Comparative Perspectives
  Taught by: Maria Elena Cepeda
  Catalog details
LATS 420 / ENVI 421 Latinx Ecologies
  Taught by: Jacqueline Hidalgo
  Catalog details
LATS 471 / HIST 471 Comparative Latina/o Migrations
  Taught by: Carmen Whalen
  Catalog details

Two of the following core electives:

HIST 385 / LATS 385 Politics and Everyday Life: Latinas/os in New York City and Beyond
  Taught by: TBA
  Catalog details
LATS 106 T Coming of Age in the City: Growing up and Growing Older in Communities of Color
  Taught by: TBA
  Catalog details
LATS 112 Caribbean Diasporic Aesthetics: An Introduction
  Taught by: Sebastian Perez
  Catalog details
LATS 114 / AMST 114 Of Caravans and Narcos: U.S. Media Narratives about Central and South America
  Taught by: Maria Elena Cepeda
  Catalog details
LATS 203 / ARTH 203 / WGSS 203 / AMST 205 Chicana/o Film and Video
LATS 220 / AMST 221 / ENVI 221 Introduction to Urban Studies: Shaping and Living the City
Taught by: C. Ondine Chavoya

LATS 222 / ENGL 252(F, S) Ficciones: A Writing Workshop
Taught by: Nelly Rosario

LATS 224 / AMST 224 / REL 224 U.S. Latinx Religions
Taught by: Jacqueline Hidalgo

LATS 228 / REL 223 / AFR 228 / AMST 228 Revolt and Revelation in 20th-Century Americas
Taught by: Jacqueline Hidalgo

LATS 231 / AMST 231 / WGSS 232 Approaches to Media Studies: Analyzing Mediated Difference
Taught by: Maria Elena Cepeda

LATS 232 / ENGL 232 We the People in the Stacks: Democracy and Literatures of Archives
Taught by: Nelly Rosario

LATS 234(F) From Conga to Hip Hop: Center-staging Latinidades on Broadway
Taught by: Alberto Sandoval-Sanchez

LATS 240 / COMP 210 / AMST 240(F) Latina/o Language Politics: Hybrid Voices
Taught by: Maria Elena Cepeda

LATS 246 / AMST 246 Aesthetics and Place-making in Latina/o New York
Taught by: Sebastian Perez

LATS 252 / AMST 252 Puerto Rico and its Diaspora
Taught by: Mérida Rúa

LATS 286 / HIST 286 Latina/o History, 1848 to the Present
Taught by: Carmen Whalen

LATS 312 / AMST 312 / ENVI 313 Chicago
Taught by: Mérida Rúa

LATS 313 / AMST 313 / WGSS 313 / AFR 326(S) Gender, Race, and the Power of Personal Aesthetics
Taught by: Maria Elena Cepeda

LATS 316(F) The Graphic Narrative: A "Global South" Perspective
Taught by: TBA

LATS 318 / AMST 318 / ENVI 318 / REL 318 / COMP 328 California: Myths, Peoples, Places
Taught by: Jacqueline Hidalgo

LATS 320(S) The Latina/o AIDS Archive: A Cultural Recovery and Revisionary Project in Progress
Taught by: Alberto Sandoval-Sanchez

LATS 330(S) DNA + Latinx: Decoding the "Cosmic Race"
Taught by: Nelly Rosario

LATS 338 / COMP 338 / AMST 339 Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality
Taught by: Maria Elena Cepeda

LATS 340(F) U.S. Afro-Latinidades
Taught by: Shantee Rosado

LATS 346 / AMST 346 Latinas/os and the Media: From Production to Consumption
Taught by: Maria Elena Cepeda

LATS 348 / AMST 348 / COMP 348 Graphic Narratives as Democratic Ideals
Taught by: Nelly Rosario

LATS 358 / ARTH 358(S) Latinx Installation and Site-Specific Art
Taught by: C. Ondine Chavoya
Catalog details
LATS 386 / HIST 386 / WGSS 386Latinas in the Global Economy: Work, Migration, and Households

Taught by: Carmen Whalen
Catalog details
LATS 397(F)Independent Study: Latina/o Studies

Taught by: Mérida Rúa
Catalog details
LATS 398(S)Independent Study: Latina/o Studies

Taught by: Maria Elena Cepeda
Catalog details
REL 309 T / AFR 309 / LATS 309Scriptures and Race

Taught by: Jacqueline Hidalgo
Catalog details
REL 326 T / COMP 326 / WGSS 326 / LATS 426Queer Temporalities

One additional related course from either of the following subcategories OR from the core electives above:

Countries of Origin and Transnationalism

AFR 248 / HIST 248The Caribbean: From Slavery to Independence

Taught by: Shanti Singham
Catalog details
ARTH 210(F)Intro to Latin American and Latina/o Art: Contradictions & Continuities, Postcolonial to the Present

Taught by: Mari Rodriguez Binnie
Catalog details
ARTH 440 / LATS 440(F)Contemporary Exhibitions: Los Angeles and Latin America

Taught by: C. Ondine Chavoya
Catalog details
HIST 143(F)Soccer and History in Latin America: Making the Beautiful Game

Taught by: Roger Kittleson
Catalog details
HIST 243Modern Latin America, 1822 to the Present

Taught by: Roger Kittleson
Catalog details
HIST 346 / AFR 346(S)Modern Brazil

Taught by: Roger Kittleson
Catalog details
HIST 347Democracy and Dictatorship in Latin America

Taught by: Roger Kittleson
Catalog details
HIST 492 T(S)Revolutionary Thought in Latin America

Taught by: Maria Elena Cepeda
Catalog details
PSCI 266The United States and Latin America

Taught by: James Mahon
Catalog details
PSCI 349 T(S)Cuba and the United States

Taught by: James Mahon
Catalog details

Taught by: Gregory Mitchell
Catalog details

Students can check with the program chair to see if other courses not listed here might count as electives.

THE DEGREE WITH HONORS

Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by her/his advisor and two other faculty readers. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The honors project will be completed over one semester plus winter study. It may consist of a conventional research thesis of 40-70 pages or of other forms of presentation (e.g., video, art, theater). It may also combine a shorter research thesis with another medium.

To be accepted as a candidate for honors in Latina/o Studies, a student must meet these criteria:

Submit and earn approval of a project proposal in April of the junior year. The proposal should be no longer than 5 pages and should lay out the project's aim and methodology, identify the student's advisor for the work, and include evidence of competence in the necessary media for projects that include non-thesis forms.

Achieve a grade point average generally of at least 3.33 in LATS courses at the time of application.

Students admitted to the honors program must submit a 5-to 8-page revised proposal, with an annotated bibliography, by the second week of classes in the fall semester of her/his senior year. They should register either for LATS 493 in the fall semester and LATS 031 in Winter Study, or for LATS 031 in Winter Study and LATS 494 in the spring semester. These courses will be in addition to the 5 courses that make up the regular concentration.

STUDY ABROAD

Study abroad and other off-campus programs offer excellent opportunities for students to build on, and expand, the intellectual interests they develop as part of the Latina/o Studies concentration. Through their connections to various institutions in the U.S. and other nations, Latina/o Studies faculty can help place students in U.S. borderlands programs as well as programs in Mexico, Cuba, and other "countries of origin." Any student seeking to include courses as part of a concentration in Latina/o Studies should feel free to contact the Program chair or other faculty. A maximum of 1 course taken away from Williams can count (as an elective) toward the completion of the concentration.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description. Although syllabus and description, including readings and assignments, would be preferable.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LATS 31 (W) Senior Thesis: Latina/o Studies
Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.

Class Format: thesis
Prerequisites: approval of program chair
Enrollment Preferences: limited to senior honors candidates
Grading: pass/fail only
Distributions: (D2)

LATS 99 (W) Independent Study: Latina/o Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

LATS 105 (F) Latina/o Identities: Constructions, Contestations, and Expressions
What, or who, is a Hispanic or Latina/o? At present, individuals living in the United States who are classified as such number approximately 57 million, constituting the country's largest "minority" group. In this course, we will study the interdisciplinary field that has emerged in response to this growing population, as we focus on the complex nature of "identity." Viewing identities as historically and socially constructed, we begin with a brief assessment of how racial, ethnic, class, and gendered identities take shape in the Hispanic Caribbean and Latin America. We then examine the impact of (im)migration and the rearticulation of identities in the United States, as we compare each group's unique history, settlement patterns, and transnational activity. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others
seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. In this light, we conclude the course with an exploration of these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: discussion
Requirements/Evaluation: participation and several short papers (1-5 pages) throughout the semester
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Latina/o Studies concentrators
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

LATS 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color (DPE)
This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

Class Format: tutorial
Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: first- and second-years, students considering an American Studies major or Latina/o Studies concentration
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This DPE tutorial foregrounds the significance of age, as it crosscuts with race, class, and gender, in explorations of urban inequality in the United States.

LATS 112 (F) Caribbean Diasporic Aesthetics: An Introduction
This course explores how aesthetics can serve as an organizing principle for the critique, analysis, and theorizing of racial and diasporic formations across the 20th century, with a specific focus on Caribbean diasporic populations and their cultural production. We will think about aesthetics as literary, visual, and sonic representations authored by and about communities of color in response to the uneven processes of racialization, migration, colonization, and nation-state formation that inflect how identity is shaped and experienced across time and space. Engaging the work of artists like Hew Locke, María Magdalena Campos-Pons, Kara Walker, and Miguel Luciano in conversation with Stuart Hall, José Quiroga, Krista Thompson, and Michelle Ann Stephens among others will illuminate these inquiries. The circuits of culture, goods, ideas, labor, and peoples that flow between the archipelagos of the Caribbean and the metropoles such as Miami, New York, and London will serve as critical sites to map our interventions.

Class Format: seminar
Requirements/Evaluation: attendance and class participation, short writing assignments, a 4- to 5-page midterm paper, and a 10-page final paper
Prerequisites: none
LATS 114  (S)  Of Caravans and Narcos: U.S. Media Narratives about Central and South America  (DPE)

Cross-listings:  LATS 114  AMST 114

Primary Cross-listing

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

Class Format: Discussion

Requirements/Evaluation:  two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

Prerequisites:  None

Enrollment Limit:  12

Enrollment Preferences:  LATS concentrators by seniority; AMST majors by seniority

Expected Class Size:  12

LATS 203  (F) Chicana/o Film and Video

Cross-listings:  ARTH 203  WGSS 203  LATS 203  AMST 205

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood “border” and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.
Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: evaluation will be based on one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

LATS 220  (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221  ENVI 221  LATS 220

Primary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first and second year students as well as American Studies majors and Latina/o Studies concentrators

LATS 222  (F)(S) Ficciones: A Writing Workshop  (DPE)

Cross-listings: ENGL 252  LATS 222

Primary Cross-listing

This course is focused on the art and practice of writing fiction. Sessions are divided into workshop and seminar. Workshop: Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Seminar: We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students further strengthen their narrative skills.
**LATS 224 (S) U.S. Latinx Religions**

**Cross-listings:** AMST 224 REL 224 LATS 224

**Primary Cross-listing**

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. We examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latinx communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería—by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. We will also consider, though more briefly, questions of how one studies Latinx religions.

**Class Format:** discussion

**Requirements/Evaluation:** based upon class participation, short writing exercises, a 5-page essay, and an 8-12-page final review essay

**LATS 228 (F) Revolt and Revelation in 20th-Century Americas**

**Cross-listings:** AMST 228 AFR 228 LATS 228 REL 223

**Primary Cross-listing**

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and
other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Class Format: seminar
Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

LATS 231 (S) Approaches to Media Studies: Analyzing Mediated Difference
Cross-listings: LATS 231 AMST 231 WGSS 232
Primary Cross-listing
Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hand-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar
Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives
Cross-listings: ENGL 232 LATS 232
Primary Cross-listing
"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." -- Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University

This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives—their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on attendance and class participation, short writing exercises, midterm project, final creative project

Prerequisites: none

Enrollment Limit: 15

LATS 234 (F) From Conga to Hip Hop: Center-staging Latinidades on Broadway

Carmen Miranda and Desi Arnaz caused a sensation when they appeared on Broadway musicals in 1939 and 1940 respectively. Little did they know that their spectacular performances would inaugurate the stereotypes of the Latin Bombshell and the Latin Lover within the American national imaginary. In this course, we will examine Latina/o representation in The Great White Way at the intersection between identity, ethnicity, race, class, and gender. The course will introduce students to the Broadway musical genre and focus on the politics of Latina/o Otherness and Difference across time and space within the framing of a chronological and hemispheric/domestic perspective. Emphasis will be placed on how stereotypes are constructed, mobilized, and circulated and how Latinidades, agency, and empowerment result from the entanglement between ideology and given structures of feeling. In so doing, students will critically explore the cultural dynamics, historical contexts, and power relations at work in West Side Story, A Chorus Line, The Capeman, Rent, In the Heights, and other musicals.

Class Format: discussion

Requirements/Evaluation: Evaluation based on attendance, class presentations, 2-page essays; 5-page take-home midterm essay, 10-page final researched archival project on a topic of interest

Prerequisites: none

LATS 240 (F) Latina/o Language Politics: Hybrid Voices

Cross-listings: AMST 240 LATS 240 COMP 210
Primary Cross-listing

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Class Format: seminar

LATS 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Class Format: seminar

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

LATS 247  (S)  Race and Religion in the American West

Cross-listings:  LATS 247  REL 247  AMST 247  ENVI 247

Secondary Cross-listing

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacroscapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation:  student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

LATS 252  (S)  Puerto Rico and its Diaspora

Cross-listings:  AMST 252  LATS 252

Primary Cross-listing

On September 20, 2018, Maria—a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: seminar; to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation:  class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Latina/o groups come to have sizeable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge?

LATS 309 (S) Scriptures and Race

Cross-listings: LATS 309 REL 309 AFR 309

Secondary Cross-listing

This course focuses on the relationships between constructions of race in the post-1492 American world and “Christian scriptures.” The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage “scriptures”? In what ways have “scriptures” informed how people imagine themselves, their communities, and their relationship to religious and racial “others”? How did “scriptures” and “race” inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Class Format: tutorial

Requirements/Evaluation: evaluation based upon participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

Cross-listings: AMST 312 ENVI 313 LATS 312

Primary Cross-listing
"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind room has been made for diversity—social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

**Class Format:** discussion

**Requirements/Evaluation:** evaluation will be based on attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**LATS 313 (S) Gender, Race, and the Power of Personal Aesthetics**

**Cross-listings:** LATS 313 AMST 313 AFR 326 WGSS 313

**Primary Cross-listing**

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

**Class Format:** seminar

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

**Prerequisites:** LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

LATS 316  (F)  The Graphic Narrative: A “Global South” Perspective  (DPE)

"[I]n a media-saturated world in which a huge preponderance of the world's news images are controlled and diffused by a handful of men' a stream of comic book images and words, assertively etched' can provide a remarkable antidote." --Edward Said, *Introduction to Palestine* by Joe Sacco. This course examines graphic narratives (and related texts and film) rooted in the "Global South," with particular emphasis on Latina/o and Latin American experiences. We will focus on how each author/artist deploys visual and narrative elements to express social, political, economic, and cultural realities. Regular assignments will offer students opportunities to create their own graphic narratives.

**Class Format:** seminar

**Requirements/Evaluation:** attendance and class participation, short writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Latina/o Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Readings in the course offer students the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

LATS 318  (F)  California: Myths, Peoples, Places

**Cross-listings:** COMP 328  AMST 318  ENVI 318  LATS 318  REL 318

**Primary Cross-listing**

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

**Class Format:** seminar

**Requirements/Evaluation:** this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

**Prerequisites:** none

LATS 320  (S)  The Latina/o AIDS Archive: A Cultural Recovery and Revisionary Project in Progress

The AIDS crisis is not over. The protease inhibitors made HIV/AIDS a treatable, chronic disease since 1996, but we must ask who has access to the health care system and the cocktail. The official story only showcased the experience of urban privileged white middle-class gay men. Minorities and women were marginalized and ignored. Puerto Rico and the Mexican Borderlands must be included in the AIDS archive since Latino/a bodies continually inhabited transnational spaces and circuits of migration that propagated the transmission of the virus since the beginning of the AIDS crisis. For many, addressing AIDS four decades into the epidemic, its effects on the Latina/o communities and familias is nothing but an anachronism. In this course students will visit alternative archives in order to recover the silenced history of the Latino/a AIDS crisis toward a revisioning of the hegemonic cultural narrative and rhetorical representation of the epidemic. Given that the Latino/a AIDS crisis remains untold, students will piece together the fragmentary narratives and images, reconsider critical moments, and collect the relegated voices of those who died and are still unaccounted for--los/as desaparecidos/as. Can the SIDA cultural production, material conditions, and lived experiences be recovered, touched, and felt to honor the dead? From an interdisciplinary perspective, this course will critically analyze film, documentaries, video, theater, solo performances, artwork, testimonials, interviews, poems, novels, memorials, the AIDS Quilt, and obituaries that document the Latino/a AIDS everyday experiences, survival practices, and artistic expressions. Among the topics to be covered are: the temporality of illness, mourning, memorialization, activism, and aesthetic intervention. The students will be introduced to the notions of "AmnesiAIDS" and "NostalgiAIDS" to theoretically understand a wide spectrum of conceptual issues such as memory, canonization, temporality, and historicism.

Class Format: discussion
Requirements/Evaluation: evaluation to be based on attendance, class presentations, 2-page critical essays; a 5-page take-home midterm essay and a 10-page final researched archival project essay
Prerequisites: none

LATS 327  (S)  Racial and Religious Mixture  (DPE)

Cross-listings: AMST 327  AFR 357  LATS 327  REL 314

Primary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion
Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework
Expected Class Size: 10
Difference, Power, and Equity Notes: Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this Difference, Power, and Equity course investigates the ways that knowledge about mixture and difference—and their roles in hierarchical distributions of social and political power—have been critically constructed and transformed.

LATS 330  (S)  DNA + Latinx: Decoding the "Cosmic Race"  (DPE)

Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. In this interdisciplinary course, we will explore Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Readings will include *The Cosmic Race* by José Vasconcelos, *The Cosmic Serpent* by Jeremy Narby, *Bird of Paradise: How I Became Latina* by Raquel Cepeda, and *The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome* by Alondra Nelson.

Class Format: seminar

LATS 338  (S)  Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality  (WS)

Cross-listings: LATS 338  AMST 339  WGSS 338

Primary Cross-listing

In this class we will investigate a wide variety of Latina/o/x popular musical forms, with particular attention to issues of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o/x popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are hybrid Latina/o/x identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and identity?

Class Format: seminar

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students
Enrollment Limit: 12
Enrollment Preferences: Latina/o Studies concentrators, Women’s, Gender, and Sexuality Studies majors, and American Studies majors by seniority

LATS 340 (F) U.S. Afro-Latinidades
This course takes an interdisciplinary approach to examine the history, lived experiences, and cultural productions of Afro-Latinx in the United States. Discussions in the course will center on three related questions: What is Afro-Latinidad? How does Blackness in Latin America differ from its articulation among Afro-Latinx in the United States? And, how have migration and sociopolitical processes impacted the lives of U.S. Afro-Latinx and our collective understanding of Afro-Latinidad? Throughout the course, we will draw on literature in the social sciences and humanities to examine the transnational nature of race and Blackness across the Americas, as well as the intersection between these identities and gender, sexuality, and class. We will also examine several media and cultural productions of U.S. Afro-Latinx (poems, novels, documentary films, blogs, and social media sites) and critically analyze their articulation of the Afro-Latinx experience.
Class Format: seminar
Requirements/Evaluation: evaluation based on participation, reading reflections, leading discussion, a 5- to 8-page midterm essay, and a 12- to 15-page final essay or a final collaborative project
Prerequisites: none

LATS 348 (F) Graphic Narratives as Democratic Ideals

Primary Cross-listing

This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. The primary focus will be on texts that explore themes of democracy and Latinidades. We will also discuss the "graphic activism" of artists like Sharon Lee De La Cruz of Digital Citizens Lab, a design collective with a focus on civic technology. Throughout the course, students will have the opportunity to create their own graphic narratives, either digitally or in print. Possible guest speaker: comic book artist Ivan Vélez (Planet Bronx, 2015 Creative Capital Award in Visual Arts).

Class Format: seminar/workshop

Requirements/Evaluation: based on attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper

LATS 358 (S) Latinx Installation and Site-Specific Art

Primary Cross-listing

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works’ meanings and the viewer’s experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: lecture/discussion
**Requirements/Evaluation:** two short papers, periodic research reports, final research paper, and presentation

**LATS 385 (S) Politics and Everyday Life: Latinas/os in New York City and Beyond (DPE)**

**Cross-listings:** HIST 385 LATS 385

**Secondary Cross-listing**

This course asks how everyday life shapes politics, from the definition of politics, to the issues addressed, to the wide variety of forms that activism takes. Focusing on Latinas/os in New York City from World War II to the present, we explore activism that has included collective organizing and community building to meet immediate needs, social service approaches and community-based organizing, radical political and social movements, participation in pre-existing unions and political groups, as well as electoral politics. Activists addressed a wide variety of often intersecting issues including education, workers' rights, women's rights and feminism, immigration rights and legal status, environmental justice, LBGTQ+ visibility and rights, as well as others. Reflecting the histories of migration, politics have sometimes been rooted in one national origin group, while other efforts were explicitly Latinx. To make the connections between everyday lives and politics, our readings will include autobiographies and other narrative sources, as well as documentaries. For final projects, students will delve deeper into autobiographies and other narrative sources, and/or explore a particular contemporary political issue(s), and/or explore parallels in the broader northeast.

**Class Format:** discussion-based course

**Requirements/Evaluation:** class participation, two essays of 3-5 pages each, final project of 7- to 10-pages, and final presentation

**LATS 386 (S) Latinas in the Global Economy: Work, Migration, and Households**

**Cross-listings:** LATS 386 HIST 386 WGSS 386

**Primary Cross-listing**
An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs?

LATS 408 (F) Envisioning Urban Life: Objects, Subjects, and Everyday People

Cross-listings: AMST 408 LATS 408

Primary Cross-listing

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This
course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, a short essay, a series of writing exercises, and a semester-long final project

LATS 409  Transnationalism and Difference: Comparative Perspectives

Cross-listings: LATS 409  AMST 411  WGSS 409

Primary Cross-listing

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar

**LATS 420 (S) Latinx Ecologies**

**Cross-listings:** ENVI 421  LATS 420  

**Primary Cross-listing**

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes’ *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez’s theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

**Secondary Cross-listing**

Birth, childhood, adolescence, college, adulthood, career, marriage, family, mid-life, old age, death, afterlife. How are all these facets of being human imagined as stages in time, as axes on certain progressive lines that delineate human social relations? How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? How have our conceptions of time and our demarcations of lifecycles shifted historically? How do people whose experiences do not align with dominant cultural social stages negotiate ideas of lifecycle and timing? Especially for individuals and peoples who have been denied self-representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Muñoz) we will examine some non-linear, non-normative, and interruptive approaches to making sense of time, space-time, and self within time.

**Class Format:** tutorial  

**Requirements/Evaluation:** Class attendance, analytical essays, responses, and revised essays. Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5-page analysis of the week’s reading. The other student will respond orally with a 2-page response to their partner's paper. Pairs will also prepare a midterm synthesis, students will revise two of their 5-page analytical papers: one from the first half of the semester, one from the second half due at the end of the semester.

**Prerequisites:** none  

**Enrollment Limit:** 10
Enrollment Preferences: majors and concentrators in Religion, Latina/o Studies, Comparative Literature, and Women's, Gender, and Sexuality Studies or students who have previous coursework in those programs

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalization and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Class Format: seminar

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)

Enrollment Limit: 15

Enrollment Preferences: senior Art majors and senior Latina/o Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a
series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Class Format: seminar
Requirements/Evaluation: evaluation will be based on several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester
Prerequisites: ARTH 102
Enrollment Limit: 15
Enrollment Preferences: senior Art major and senior Latina/o Studies concentrators

LATS 471 (S) Comparative Latina/o Migrations
Cross-listings: HIST 471 LATS 471
Primary Cross-listing
Since the 1970s, policymakers, scholars, the media, and popular discourses have used the umbrella terms "Hispanic" and "Latina/o" to refer to Mexicans, Puerto Ricans, Cubans, Dominicans and more recent immigrants from Central and South American countries. As a form of racial/ethnic categorization, however, these umbrella terms can mask widely divergent migration histories and experiences in the United States. In this course, we develop theoretical perspectives and comparative analyses to untangle a complicated web of similarities and differences among Latino groups. How important were their time of arrival and region of settlement? How do we explain differences in socioeconomic status? How fruitful and appropriate are comparative analyses with other racial/ethnic groups, such as African Americans or European immigrants? Along the way, we explore the emergence of Latina/o Studies as an interdisciplinary and comparative field of study, as well as methods used in Latino and Latina history, specifically oral histories, government documents, newspapers, and interdisciplinary approaches.
Class Format: discussion/seminar
Requirements/Evaluation: evaluation will be based on class participation and presentations, a proposal, an annotated bibliography, a short historiographical essay, and a research paper based in part on primary sources
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History majors and Latina/o Studies concentrators

Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, a number of questions are addressed through the curriculum. How have men and women defined leadership and what are the bases of leaders’ legitimacy in different historical contexts? How do leaders in different contexts emerge? Through tradition, charisma, or legal sanction? How do different types of leaders exercise and maintain their domination? What are the distinctive habits of mind of leaders in different historical contexts? What are the moral dilemmas that leaders in different contexts face? What are the typical challenges to established leadership in different historical contexts? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year.

**LEADERSHIP STUDIES—TRADITIONAL TRACK**

**The introductory course:**

LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

**One required course on ethical issues related to leadership, typically:**

PHIL 119(S) Justice, Democracy and Freedom: Plato with Footnotes
- Taught by: Jana Sawicki
- [Catalog details](#)

PSCI 203(F, S) Introduction to Political Theory
- Taught by: Nimu Njoya, Mark Reinhardt
- [Catalog details](#)

**Two core courses dealing with specific facets or domains of leadership, such as:**

ARTH 501 / LEAD 301 / ARTH 303(S) Museums: History and Practice
- Taught by: Michael Conforti
- [Catalog details](#)

ASTR 240 / HSCI 240 / LEAD 240 / SCST 240 Great Astronomers and Their Original Publications
- Taught by: Jay Pasachoff
- [Catalog details](#)

CLAS 323 / HIST 323 / LEAD 323 From Achilles to Alexander: Leadership and Community in Ancient Greece
- Taught by: Kerry Christensen
- [Catalog details](#)

HIST 111 / ARAB 111 / LEAD 150 Movers and Shakers in the Middle East
- Taught by: Magnús Bernhardsson
- [Catalog details](#)

HIST 207 / GBST 101 / ARAB 207 / LEAD 207 / JWST 217 / REL 239(F) The Modern Middle East
- Taught by: Magnús Bernhardsson
- [Catalog details](#)

LEAD 205 / PSCI 212(S) From Tocqueville to Trump: Leadership and the Making of American Democracy
- [Catalog details](#)
Taught by: Mason Williams
Catalog details
LEAD 212 / HIST 393(S)Sister Revolutions in France and America

Taught by: Susan Dunn
Catalog details
LEAD 285 / PSCI 285 / HIST 354(F)The Revolutionary Generation: Galaxy of Leaders

Taught by: Susan Dunn
Catalog details
LEAD 293 / PSCI 293(F)Leadership and Political Change

Taught by: Chris Gibson
Catalog details
LEAD 302 / PSCI 302Leadership in a Global World

Taught by: Howard Dean
Catalog details

PSCI 206 T / LEAD 206Dangerous Leadership in American Politics

Taught by: Nicole Mellow
Catalog details
PSCI 215 / LEAD 215(S)Race and Inequality in the American City

Taught by: Mason Williams
Catalog details
PSCI 216 / LEAD 216American Constitutionalism I: Structures of Power

Taught by: Justin Crowe
Catalog details
PSCI 217 / LEAD 217American Constitutionalism II: Rights and Liberties

Taught by: Justin Crowe
Catalog details
PSCI 218 / LEAD 218The American Presidency

Taught by: Nicole Mellow
Catalog details
PSCI 312 T / LEAD 312American Political Thought

Taught by: Justin Crowe
Catalog details
PSCI 314 / LEAD 314(S)How Change Happens in American Politics

Taught by: Nicole Mellow
Catalog details
PSCI 327 / LEAD 327Leadership and Strategy

Taught by: Galen E Jackson
Catalog details
PSCI 332 / LEAD 332(F)New York City Politics from the Blackout to Bloomberg

Taught by: Mason Williams
Catalog details
PSCI 345Cosmology and Rulership in Ancient Chinese Political Thought

Taught by: George Crane
Catalog details
PSCI 355 T / LEAD 355American Realism: Kennan, Kissinger and the American Style of Foreign Policy

Taught by: James McAllister
Catalog details
PSCI 367 / LEAD 367(S)The Politics of American National Security

Taught by: Chris Gibson
Catalog details

One Leadership Studies Winter Study course (listed separately in the catalog)

Capstone course:

LEAD 402 The Art of Presidential Leadership

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK
An introductory course:
One required course on issues related to American domestic leadership, such as:

LEAD 205 / PSCI 212(S) From Tocqueville to Trump: Leadership and the Making of American Democracy
  Taught by: Mason Williams
  Catalog details
LEAD 285 / PSCI 285 / HIST 354(F) The Revolutionary Generation: Galaxy of Leaders
  Taught by: Susan Dunn
  Catalog details
LEAD 293 / PSCI 293(F) Leadership and Political Change
  Taught by: Chris Gibson
  Catalog details
LEAD 302 / PSCI 302 Leadership in a Global World
  Taught by: Howard Dean
  Catalog details
LEAD 320 / PSCI 320 Heroes and Villains: Iconic Leadership and the Politics of Memory
  Taught by: Mason Williams
  Catalog details
LEAD 369 / PSCI 369 The Crisis of Leadership
  Taught by: Mason Williams
  Catalog details
PSCI 206 T / LEAD 206 Dangerous Leadership in American Politics
  Taught by: Nicole Mellow
  Catalog details
PSCI 218 / LEAD 218 The American Presidency
  Taught by: Nicole Mellow
  Catalog details
PSCI 332 / LEAD 332(F) New York City Politics from the Blackout to Bloomberg
  Taught by: Mason Williams
  Catalog details

Three required courses dealing with specific facets of American foreign policy leadership, such as:

HIST 263 / LEAD 261 The United States and the World, 1898 to the Present
  Taught by: Jessica Chapman
  Catalog details
HIST 388(F) Decolonization and the Cold War
  Taught by: Jessica Chapman
  Catalog details
HIST 389 / ASST 389 / LEAD 389 The Vietnam Wars
  Taught by: Jessica Chapman
  Catalog details
PSCI 225 / LEAD 225(F) International Security
  Taught by: Galen E Jackson
  Catalog details
PSCI 262 / HIST 261 / LEAD 262 America and the Cold War
  Taught by: Robert McMahon
  Catalog details
PSCI 266 The United States and Latin America
  Taught by: James Mahon
  Catalog details
PSCI 355 T / LEAD 355 American Realism: Kennan, Kissinger and the American Style of Foreign Policy
  Taught by: James McAllister
  Catalog details
PSCI 367 / LEAD 367(S) The Politics of American National Security
  Taught by: Chris Gibson
  Catalog details
One capstone course:

- LEAD 402 The Art of Presidential Leadership
- PSCI/LEAD 327 Leadership and Strategy
- PSCI/LEAD 365 U.S. Grand Strategy (W)
- PSCI/LEAD 367 The Politics of American National Security

(There is no winter study component to the American Foreign Policy Leadership track.)

Students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, not formally, but it is not been an issue yet. To the best of my knowledge, students have requested one course be counted toward the concentration at most.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Introductory course, Winter Study course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The Introductory course has historically been taught only in the fall.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

LEAD 12  (W)  Principles of Effective Leadership

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. Each student will be asked to host a guest at dinner or breakfast before we meet, to introduce him or her to the class, and to
stimulate discussion. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 10-page final paper which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals.

Requirements/Evaluation: 10-page paper and an in-class presentation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Leadership Studies concentrators, preference to seniors and juniors
Grading: pass/fail only
Materials/Lab Fee: cost of books

LEAD 16 Speechwriting as Craft and Career

Whether your ideal is Reverend Martin Luther King, Jr., telling Americans "I have a dream" or Ronald Reagan ordering Mikhail Gorbachev to "tear down this wall!", speeches can change cultures or minds, move a nation or a single human heart. This writing-intensive course will introduce you to the history and importance of speechwriting and rhetoric, provide you with direct experience writing and delivering speeches, and introduce you to career possibilities in speechwriting and related fields. Our course materials, professional guests and class discussions will consider diverse rhetorical traditions within the U.S. and around the world. The modern profession of speechwriting involves much more than writing remarks for someone using a podium or teleprompter. It may include developing a TED Talk, producing a video, writing social media posts or ghostwriting op-eds and even memoirs (!). That's because speechwriters at their best are more than writers: They're trusted advisors on the art of persuasive communication, and of leadership more generally. Whether you want to develop your own public speaking skills or write for a politician, CEO, or cultural leader, this class will teach you about poetics, persuasion, and the pretty peculiar principles involved in writing words that another human being will be credited (or blamed) for—not to mention a sense of the career opportunities in politics, education, the arts and industry. The course will meet 3x/week for 2 hours at a time. Work outside class—including readings, film viewings, writing assignments and associated research, rehearsal of speeches, etc.—will require another 20 hours per week. During the course all students will be expected to write and deliver multiple speeches. Adjunct Instructor Bio: Jim Reisch is Chief Communications Officer at Williams College.

Requirements/Evaluation: final project or presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: at the discretion of the instructor
Grading: pass/fail only
Materials/Lab Fee: approximately $40 for books
Not offered current academic year

LEAD 18 (W) Wilderness Leadership in Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM - 5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

Requirements/Evaluation: written and practical exam
Prerequisites: none
Enrollment Limit: 22
Enrollment Preferences: submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience
Grading: pass/fail only
Materials/Lab Fee: $450
Attributes: EXPE Experiential Education Courses
LEAD 19  The Restless, Living, Incomplete, Agitated, Incredible, Conjectural Collection

This course takes a behind-the-scenes look at the WCMA art collection--its origins, contents, accessibility, and future--as a singular resource for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, protest, power, agitation, and rebellion, students will conduct both a broad survey of the collection and in depth case studies of several artworks. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries. The course further offers the chance to collaborate with WMCA staff, including representatives from various departments, including archives, curatorial, collections, and more. The course’s final project includes generating a speculative exhibition proposal for the museum in the fall of 2020. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition making, history as medium, and the practice of research.

Requirements/Evaluation: exhibition proposal

Prerequisites: keen interest in museums, art collections and culture

Enrollment Limit: 12

Enrollment Preferences: random selection

Grading:

Materials/Lab Fee: $0

Not offered current academic year

LEAD 20  "Real" World Problem Solving

This course will introduce you to tools and techniques to solve problems for impact not in the classroom, but in the White House Situation Room, the corporate board room, and even a forward operating base. We will focus on how to define and structure policy or strategy problems, and then identify and test hypotheses for impact. We will explore the necessity of using pragmatic "mental models" to inform our analyses and decision making. Along the way, we will explore cognitive biases, implementation challenges, and techniques to manage them. The best recommendations only come to life through compelling communication. We will build these skills, therefore, through "real" life exercises. These will include drafting talking points for a "principal" (e.g., the President, Secretary of State, a CEO, or a Governor), preparing a policy or strategy memo, and developing a compelling PowerPoint briefing for a senior executive audience. Case studies will provide the foundation for many class discussions. The class will be "tri-sector"--open to examples from the private, government, and nonprofit sectors. Source material will include: Graham Allison and Philip Zelikow, The Essence of Decision: Explaining the Cuban Missile Crisis (2nd edition); Richard Haass, The Bureaucratic Entrepreneur: How to be Effective in Any Unruly Organization; Richard Neustadt and Ernest May, Thinking in Time: The Uses of History for Decision Makers; Michael Lewis, The Undoing Project: A Friendship that Changed Our Minds; select podcasts and journal articles; and three films "Thirteen Days," "Moneyball," and "The Big Short." Assessment: class participation; final memo (5-8 pages) and class presentation on a real world issue. Adjunct Instructor Bio: Drew Erdmann ’88 is Chief Operating Officer of the State of Missouri with responsibility for managing the ~50,000 employee, $28 billion enterprise. After receiving his PhD in American History, Drew's career included government service with the State Department, Defense Department in Iraq, and White House, and over a decade with the global consultancy McKinsey & Company where his experience spanned the retail, media, energy, aerospace & defense industries, and the public and nonprofit sectors.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: preference for juniors and sophomores; students will have to send brief memo explaining why they are interested in course, with their resume

Grading:

Materials/Lab Fee: $20 and cost of books

Not offered current academic year

LEAD 21 Wilderness Leadership and Outdoor Skills Development

Not offered current academic year
This Winter Study course is for students who would like to participate in a nationally recognized outdoor skills program, for example NOLS (National Outdoor Leadership School) or Outward Bound program. The individual student would meet with the current Director of the Williams Outing Club to identify a program that best fits the student's needs and meets the minimum criteria of at least a 14 day instructed program. The potential student would also meet to discuss the educational goals of learning about leadership and group dynamics in a wilderness setting.

Requirements/Evaluation: final project or presentation
Prerequisites: none; not open to first-year student
Enrollment Limit: none
Enrollment Preferences: none
Grading:
Materials/Lab Fee: varies, depending on the program
Not offered current academic year

LEAD 99  (W)  Independent Study: Leadership Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Winter 2020
IND Section: 01    TBA     James McAllister

LEAD 120  (S)  America and the World

Cross-listings: PSCI 120  GBST 101  LEAD 120

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion
Requirements/Evaluation: short papers, class participation, and final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-years and sophomores
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 120 (D2) GBST 101 (D2) LEAD 120 (D2)

Not offered current academic year
LEAD 125 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Cross-listings: PSCI 125 LEAD 125

Primary Cross-listing

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: subfield open in Political Science major

Distributions: (D2)

LEAD 127 (S) America First? The Trump Era and the Future of World Politics

Cross-listings: LEAD 127 PSCI 127

Secondary Cross-listing

"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindberg in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal international internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.

Class Format: lecture

Requirements/Evaluation: two analytical essays, short response papers, and final group project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: potential political science majors and leadership studies concentrators (foreign policy track)

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
LEAD 150  (F) Movers and Shakers in the Middle East

**Cross-listings:** HIST 111  ARAB 111  LEAD 150

**Secondary Cross-listing**

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

**Class Format:** seminar

**Requirements/Evaluation:** evaluation will be based on class participation, short essays, and a final paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 15-19

**Grading:** yes pass/fail option, yes fifth course option

LEAD 205  (S) From Tocqueville to Trump: Leadership and the Making of American Democracy  (DPE)

**Cross-listings:** PSCI 212  LEAD 205

**Primary Cross-listing**

America’s founders didn’t mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America’s democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

**Class Format:** lecture

**Requirements/Evaluation:** bi-weekly short writing assignments, term paper, midterm and final in-class exams

**Prerequisites:** none
LEAD 206 (F) Dangerous Leadership in American Politics

Cross-listings: LEAD 206 PSCI 206

Secondary Cross-listing

"Donald Trump, Hillary Clinton, Ted Cruz, Bernie Sanders. What do Americans want from their political leaders?”. A common assumption is that those who do it well--whether in the presidency, the parties, social movements, organizations, or local communities--are just and legitimate agents of democratic change, and those most celebrated are those who have helped the country make progress toward its ideals. Yet to rest on this is too simple as it is, in part, an artifact of historical construction. Assessing leadership in the moment is complicated because leaders press against the bounds of political convention--as do ideologues, malcontents, and lunatics. Indeed, a central concern of the founders was that democracy would invite demagogues who would bring the nation to ruin. Complicating things further, the nature of democratic competition is such that those vying for power have incentive to portray the opposition's leadership as dangerous. How do we distinguish desirable leadership from dangerous leadership? Can they be the same thing? Many who today are recognized as great leaders were, in their historical moment, branded dangerous. Others, whose ambitions and initiatives arguably undermined progress toward American ideals, were not recognized as dangerous at the time. In this tutorial, we will explore the concept of dangerous leadership in American history, from inside as well as outside of government. What constitutes dangerous leadership, and what makes a leader dangerous? Is it the person or the context? Who decides? How do we distinguish truly dangerous leadership from the perception of dangerous leadership? Does dangerous describe the means or the ends of leadership? Does it matter? Is leadership that privileges desirable ends, such as justice or security, at the expense of democratic means acceptable? Is democratic leadership in service of "dangerous" goals acceptable, and what are these goals?

Class Format: tutorial

Requirements/Evaluation: six 5-page essays; six 2-page response papers; and one final 5-page rewritten essay

Prerequisites: none

LEAD 212 (S) Sister Revolutions in France and America

Cross-listings: HIST 393 LEAD 212

Primary Cross-listing

In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

Class Format: seminar

Requirements/Evaluation: evaluation will be based on three papers, several class presentations, and active participation in class discussions

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with backgrounds in American history, French history or Political Science

Expected Class Size: 15

LEAD 215 (S) Race and Inequality in the American City

Cross-listings: LEAD 215 PSCI 215

Secondary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Class Format: seminar

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

Prerequisites: none

LEAD 216 (F) American Constitutionalism I: Structures of Power

Cross-listings: LEAD 216 PSCI 216

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power – the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the conservative ascendancy of the late twentieth century. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

LEAD 225 (F) International Security

Cross-listings: LEAD 225 PSCI 225

Secondary Cross-listing

This course deals with basic questions about war and peace. What are the major causes of war? Why do leaders choose to use violence in the pursuit of political objectives? How does the threat of war shape international politics and diplomatic outcomes? How are wars fought? What are their consequences? And why do states sometimes seek to cooperate to achieve their objectives and other times settle disputes through force or the threat of force? To address these questions, this course covers a number of specific topics: the causes, conduct, and consequences of the two world wars; the origins, course, and end of the Cold War; the influence of nuclear weapons on international security; regional conflicts and rivalries; regime type and international conflict; alliances and patron-client relationships; diplomacy; crisis decision-making; asymmetric conflicts; and great power politics, grand strategy, and international order.

LEAD 240 (F) Great Astronomers and Their Original Publications

Cross-listings: LEAD 240 HSCI 240 ASTR 240 SCST 240

Secondary Cross-listing

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and
examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th-century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Class Format: seminar

LEAD 262 (F) America and the Cold War

Cross-listings: PSCI 262 HIST 261 LEAD 262
Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

LEAD 285 (F) The Revolutionary Generation: Galaxy of Leaders

Cross-listings: PSCI 285 LEAD 285 HIST 354

Primary Cross-listing

The American Revolution produced a galaxy of brilliant politicians, statesmen, and military leaders of extraordinary courage, intellect, creativity, and character: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments—a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

Class Format: seminar

Requirements/Evaluation: three papers, several class presentations, and active participation in all discussions

Prerequisites: none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

Cross-listings: LEAD 302  PSCI 302

Primary Cross-listing

The events and forces of the twenty-first century have fundamentally challenged our previous assumptions of how individuals relate to one another and how societal progress occurs---that is to say, of how leadership occurs in a global world. In this course we will explore different styles of leadership, followership, failure, and team-building. Over the course of the semester, we will consider topics ranging from teaching to politics, civil society to social media, all with an eye toward how individuals engage with the teams they seek to lead as well as how they engage in both short- and long-term thinking to avoid obstacles, mobilize support, and accomplish their goals. Since leadership is a phenomenon relevant to all individuals and all paths, the course will also include introspection and self-analysis of one's own capacities and weaknesses around the core questions and dilemmas of leadership.

Class Format: seminar

Requirements/Evaluation: three 2-page memos, 5-page midterm essay, 25-page final paper, class presentation, and class participation

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Does the rise of Donald Trump signal something new in the U.S.? How unprecedented is the current political moment? What might we expect to come next? From the Founding to the present, the American political order has undergone incredible, cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that individual leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor demands, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

Class Format: research seminar

Requirements/Evaluation: several short essays, weekly writing assignments, and a longer research paper with presentation

Prerequisites: previous course in American politics or American history

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)
LEAD 320  (F) Heroes and Villains: Iconic Leadership and the Politics of Memory

Cross-listings: LEAD 320  PSCI 320

Primary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write a 10-12 page paper examining the politics of memory for a leader of their choice.

Class Format: seminar

Requirements/Evaluation: two short (5- to 6-page) essays and a 10- to 12-page research paper

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Leadership Studies concentrators, Political Science majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

LEAD 323  (F) From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: CLAS 323  LEAD 323  HIST 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.
LEAD 325 (S) The Roosevelt Style of Leadership
Cross-listings: HIST 358 LEAD 325

Primary Cross-listing
In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies, their writings and speeches, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

Class Format: seminar
Requirements/Evaluation: evaluation based on participation in class discussions, oral reports, two research papers
Prerequisites: none; courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar
Enrollment Limit: 15
Enrollment Preferences: Leadership Studies concentrators and students with a background in American history and Political Science

LEAD 327 (S) Leadership and Strategy
Cross-listings: LEAD 327 PSCI 327

Secondary Cross-listing
This class is about the role of leaders and statecraft in international relations. In particular, this course examines the relationship between political and military objectives. The aim is to identify and analyze the principal structural and situational constraints--both foreign and domestic--that limit leaders’ freedom of action, and which they must manage effectively to achieve their diplomatic and military goals. The course integrates theoretical perspectives related to a range of international security issues--including the causes of war, alliance politics, nuclear strategy, deterrence, coercion,
reassurance, misperception, and credibility concerns—with illustrative case studies of decision-makers in action. The basic structure of the class is interdisciplinary; the goal of this approach is to utilize key conceptual arguments to gain greater leverage for the examination of major historical decisions in national security policy. Students will be asked to analyze and evaluate the strategic choices we examine, as well as the process by which they were reached. The primary objective of the course is for students to improve dramatically their understanding of the role of leaders and strategic choice in international relations.

**Class Format:** seminar

**Requirements/Evaluation:** active class participation, two 6-8 page papers, and a final exam

**LEAD 332 (F) New York City Politics from the Blackout to Bloomberg (WS)**

**Cross-listings:** LEAD 332  PSCI 332

**Secondary Cross-listing**

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

**Class Format:** Seminar

**Requirements/Evaluation:** active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent “Science Wars” over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in Fads and Fallacies in the Name of Science, and using such recent journals as The Skeptical Inquirer and The Scientific Review of Alternative Medicine, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's Arcadia and Michael Frayn's Copenhagen.

Class Format: seminar

Requirements/Evaluation:  evaluation will be based on biweekly 5-page papers, participation in discussions, and a 15-page final paper

LEAD 348  (S) The Black Radical Tradition

Cross-listings:  AFR 348  PSCI 348  LEAD 348

Secondary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of “radical”; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Class Format: tutorial
LEAD 355  (S)  American Realism: Kennan, Kissinger and the American Style of Foreign Policy
Cross-listings:  LEAD 355  PSCI 355

Secondary Cross-listing
George Kennan is widely considered to be the author of the containment strategy that ultimately won the Cold War. Henry Kissinger served as National Security Advisor and Secretary of State. In addition to their distinguished careers in government, both men have published well regarded and popular scholarship on various aspects of American foreign policy, international relations, and nuclear weapons. This tutorial will first examine the nature of their relationship to both Realist and Wilsonian perspectives on American foreign relations. We will then examine their experiences as strategists and policymakers during the most crucial moments of the Cold War. One of the key questions we will seek to answer is why Kennan and Kissinger disagreed on so many important issues, ranging from the Vietnam War to the role of nuclear weapons, despite their shared intellectual commitment to Realism. Finally, we will also examine some of the more recent biographies of both men, including John Lewis Gaddis’s Pulitzer prize-winning George F. Kennan: An American Life and Niall Ferguson’s Kissinger: 1923-1968: The Idealist.

Class Format: tutorial

Liberal democracies face the challenge of establishing effective civil-military relations in order to protect and promote their cherished way of life while preserving civilian control of the armed forces. A lot is at stake in getting it right -- everything from national survival to the preservation of liberty. In the process, countries must decide on policies for the armed forces: should they be forced to adopt the values of the society they protect, and should the military be used to drive social change in the country? This course provides an extensive examination of American civil-military relations from the Founding era to the current day. The constitutional, legal, and theoretical frameworks for civil-military relations are explored to set the conditions for students to assess contemporary US grand strategy and the merits and consequences (including moral-ethical) of using military force to achieve political ends. The course concludes with a section on the future of American civil-military relations.

**LEAD 369 (S) The Crisis of Leadership**

**Cross-listings:** PSCI 369 LEAD 369

**Primary Cross-listing**
It is now a commonplace that the liberal democracies of Europe and North America (and beyond) are facing a "crisis of leadership." In country after country, champions of cosmopolitan values and moderate reform are struggling to build sufficient popular support for their programs. These failures have created space for a politics of populism, ethno-nationalism, and resentment—an "anti-leadership insurgency" which, paradoxically, has catapulted charismatic (their critics would say demagogic) leaders to the highest offices of some of the largest nations on earth. In this course, we will seek to understand the challenges liberal, cosmopolitan leadership has encountered in the 21st century and the reasons why populist, nationalist leadership has proven resurgent. We will begin by examining institutional constraints facing political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment. Then we will look at some important factors which shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. Our primary questions will be these: Why is transformative leadership so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world?

Class Format: seminar

Requirements/Evaluation: class participation, regular response papers, research proposal, research paper

LEAD 382  (F)  The Great War, 1914-1918

Cross-listings: LEAD 382  HIST 482

Secondary Cross-listing

During the nineteenth and early twentieth century Europeans and their immediate offspring created the modern world. European industry, science, trade, weapons, and culture dominated the globe. After a century of general peace the continual "progress" of Western Civilization seemed assured. Then, in August, 1914, the major European powers went to war with one another. After four years of unprecedented carnage, violence, and destruction, Europe was left exhausted and bitter, its previous optimism replaced by pessimism, its world position undermined, and its future clouded by a deeply flawed peace settlement. What were the fundamental causes of the Great War? How and why did it break out when it did and who was responsible? Why was it so long, ferocious, wasteful, and, until the very end, indecisive? Why did the Allies, rather than the Central Powers, emerge victorious? What did the peace settlement settle? How was Europe changed? What is the historical significance of the conflict?

Cross-listings:  HIST 389  LEAD 389  ASST 389

Secondary Cross-listing
This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

LINGUISTICS
Advisor: Professor Gail Newman

How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.

Linguistics

ANTH 227 (F) Language and Society: What Does Your Speech Say About You?
Cross-listings: ANTH 227 ARAB 227
Secondary Cross-listing
Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Class Format: lecture
Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors, students who need to fulfill Arabic major or Anthropology major requirements, students interested in linguistics
Expected Class Size: 20

Not offered current academic year

ANTH 262 (S) Language and Power
"A language is a dialect with an army and a navy." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to American presidential elections. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in the Williams or Berkshire County community.

Class Format: lecture
Requirements/Evaluation: regular postings of critical response papers and an ethnographic final project
ARAB 224 (S) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers’ feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner’s identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Class Format: lecture

Requirements/Evaluation: active class participation, assignments, article presentation and leading a class discussion, language learner interview, a research paper

**ASST 207 (F) An Exploration of Japanese Language and Culture**

**Cross-listings:** ASST 207 JAPN 407

**Secondary Cross-listing**
Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

**Class Format:** tutorial

**Requirements/Evaluation:** attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN 407T will meet twice a week

**Prerequisites:** none for ASST 207T; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407T

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective Japanese, Chinese, and Asian Studies majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**
ASST 207 (D1) JAPN 407 (D1)

**Attributes:** Linguistics

**Not offered current academic year**

**BIOL 409 (F) Cultural Evolution in Biological Systems**

The evolution of genetically transmitted traits has been the subject of extensive study since the "modern synthesis" combined Darwin's and Mendel's ideas--later enriched by molecular approaches to developmental biology. More recently, the study of evolution has been extended to traits that are transmitted via social learning. The cultural evolution that occurs in such behavioral traits has many parallels with evolution based on genes: errors and innovation correspond to genetic mutations, immigration may bring in new forms of the behavior, and population bottlenecks can result in loss of behavioral traits. However, there is also a crucial difference between genetic and social transmission of traits: social learners can potentially acquire traits from many members of their population, including unrelated individuals. This difference has many implications, including the acceleration of the evolutionary time scale. We will explore the ways socially learned behaviors evolve, using systems such as tool use (primates, crows), vocal learning (songbirds, orcas), and social organization (baboons). Among the topics we will consider are the role of neutral models and random processes, how neural constraints guide social learning, how social status influences the choice of tutors, and how competition and sexual selection drive changes in learned behavior. We will also consider how these processes interact and how they generate differences as well as parallels between cultural and
genetic evolution.

Class Format: tutorial

Requirements/Evaluation: five 4- to 5-page papers; five 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL 305 or BIOL 204

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distributional requirement for the Biology major

Distributions: (D3)

Attributes: Linguistics

Not offered current academic year

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one’s native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. All readings in English with some examples in Chinese.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses Linguistics

Not offered current academic year

CHIN 272 (S) The History and Mythology of Chinese Scripts

Written scripts using what are most often called “Chinese characters” have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatical studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

Class Format: lecture/discussion

Requirements/Evaluation: quizzes, short writing assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none
CHIN 431  (S)  Introduction to Chinese Linguistics

Is Chinese--whose nouns "lack" number and whose verbs have no tense--a monosyllabic, "primitive" language? Are the Chinese characters a system of logical symbols or "ideographs," which indicate meaning directly without regard to sound? Could (and should) the characters be done away with and alphabetized? Are Cantonese, Hakka, and Taiwanese dialects or languages? And what is the relationship between Chinese, Japanese, Korean, and Vietnamese? These are some of the questions we will be taking up in this one-semester introduction to the scientific study of the Chinese language. Topics to be covered include: the phonological, syntactical, and lexical structure of Modern Standard Chinese; the Chinese writing system; the modern Chinese dialects; the history of the Chinese language; sociolinguistic aspects of Chinese; and language and politics in various Chinese-speaking societies. *Readings in English and Chinese, with class discussion in Mandarin*

**Class Format:** lecture/discussion

**Requirements/Evaluation:** evaluation will be based on classroom performance, homework, two short papers, and one longer paper

**Prerequisites:** CHIN 302 or permission of instructor

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: Linguistics

COGS 222  (F)  Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science

**Cross-listings:** PSYC 222  COGS 222  PHIL 222

**Primary Cross-listing**

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** midterm and final exams, and self-paced weekly exercises

**Prerequisites:** PSYC 101 or any introduction to PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended

Enrollment Limit: 25

**Enrollment Preferences:** first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

JAPN 131  (F) Introduction to Japanese Linguistics
This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.
Class Format: lecture
Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam
Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
JAPN 258 (S) Language and Literacy Development

Cross-listings: JAPN 258 PSYC 258

Primary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Class Format: seminar

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese , Chinese , Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

JAPN 407 (F) An Exploration of Japanese Language and Culture

Cross-listings: ASST 207 JAPN 407

Primary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Class Format: tutorial

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207T will meet once a week; JAPN
PHIL 203  (S) Logic and Language  (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

Class Format: lecture/discussion
Requirements/Evaluation: a midterm, a final, frequent homework and problem sets
Prerequisites: none
Enrollment Limit: none
Expected Class Size: 50-80
Grading: yes pass/fail option, yes fifth course option
Distributions:  (D2)  (QFR)

Grading: yes pass/fail option, no fifth course option
PHIL 280  (S)  Frege, Russell, and the Early Wittgenstein
The last line of Ludwig Wittgenstein's Tractatus famously reads: "Whereof one cannot speak, thereof one must be silent." Are there things that cannot be put into words? What are the limits of language? What is the nature of language? How do logic and language relate? We will examine these (and other questions) in the context of the great philosophical revolution at the beginning of the last century: the linguistic turn and the birth of analytic philosophy. We will see how a focus on language affects our understanding of many traditional philosophical questions, ranging from epistemology and metaphysics to aesthetics and ethics. Our texts will include Gottlob Frege, The Foundations of Arithmetic, Bertrand Russell, Principles of Mathematics, and Ludwig Wittgenstein, Tractatus Logico-Philosophicus. While you're debating whether to take this class, consider the following puzzle. There is a village where the barber shaves (a) all those and (b) only those who do not shave themselves. Now, ask yourself: who shaves the barber? You will see that if the barber does not shave himself, then by condition (a) he does shave himself. And, if the barber does shave himself, then by condition (b) he does not shave himself. Thus, the barber shaves himself if and only if he does not shave himself. See if you can figure out why this is sometimes called a paradox, and then ask yourself what this has to do with our opening questions.

Class Format: seminar
Requirements/Evaluation: two short papers (5 pages) and one longer final paper (12-15 pages)
Prerequisites: at least two PHIL courses; PHIL 202 and 203 recommended
Enrollment Preferences: Philosophy majors, then seniors and juniors of any major

Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: Linguistics  PHIL History Courses

Not offered current academic year

PHIL 308  (F)  Wittgenstein's "Philosophical Investigations"
Bertrand Russell claimed that Ludwig Wittgenstein was "perhaps the most perfect example I have ever known of genius as traditionally conceived--passionate, profound, intense, and dominating." Wittgenstein's two masterpieces, the Tractatus Logico-Philosophicus and the Philosophical Investigations, stand like opposing poles around which schools of twentieth-century analytic philosophy revolve. The Wittgenstein of the Tractatus is known as the "earlier Wittgenstein," the Wittgenstein of the Investigations is known as the "later Wittgenstein." This course is an intensive, line-by-line study of the Investigations--one of the greatest (and thus, one of the most controversial) books in the history of philosophy. Aside from its overwhelming influence on 20th and 21st century philosophy and intellectual culture, any book which contains the remark, " if a lion could talk, we could not understand him," deserves serious attention.

Class Format: seminar
Requirements/Evaluation: one short midterm paper (5-7 pages) and one longer final paper (12-15 pages)
Prerequisites: at least two Philosophy Courses, PHIL 202 highly recommended
Enrollment Limit: 19
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: Linguistics  PHIL History Courses
PHIL 310  (F)  Wittgenstein's Later Philosophy  (WS)

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published *Philosophical Investigations*, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's *Philosophical Investigations*, one of the greatest books ever written. In the second part of the course, we will read Wittgenstein's *On Certainty*, and selections from other of Wittgenstein's posthumously published works: *Zettel*, *Philosophical Grammar*, *Remarks on the Philosophy of Psychology, Culture and Value*, *Lectures and Conversations on Aesthetics, Psychology and Religious Belief*, and the *Big Typescript*. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

**Class Format:** tutorial

**Requirements/Evaluation:** tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

**Prerequisites:** two Philosophy courses

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

**Expected Class Size:** 10

**Grading:** no pass/fail option,  no fifth course option

**Distributions:** (D2)  (WS)

**Writing Skills Notes:** Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner's papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

**Attributes:** Linguistics  PHIL History Courses

Fall 2019

TUT Section: T1    TF 1:10 pm - 2:25 pm     Bojana  Mladenovic

PHIL 338  (F)  Intermediate Logic  (QFR)

**Cross-listings:** MATH 338  PHIL 338

**Primary Cross-listing**

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

**Class Format:** Seminar

**Requirements/Evaluation:** problem sets and exams
Prerequisites: some class in which student has studied formal reasoning

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
• Understand ecological principles and the nature of living systems;

• Apply scientific methods to collect environmental data and evaluate environmental quality;

• Understand the political and economic factors that inform, enable, and constrain environmental policy;

• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;

• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;

• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to
maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

AFR 248 / HIST 248 The Caribbean: From Slavery to Independence
  Taught by: Shanti Singham
  Catalog details

BIOL 414 Life at Extremes: Molecular Mechanisms
  Taught by: Claire Ting
  Catalog details

ECON 213 / ENVI 213(S) Introduction to Environmental and Natural Resource Economics
  Taught by: Sarah Jacobson
  Catalog details

ECON 215 / GBST 315 Globalization
  Taught by: Will Olney
  Catalog details

ECON 387 / ENVI 387 / ECON 522 Economics of Climate Change
  Taught by: Matthew Gibson
  Catalog details

ECON 477 / ENVI 376 Economics of Environmental Behavior
  Taught by: Sarah Jacobson
  Catalog details

ENVI 307 / PSCI 317(F) Environmental Law
  Taught by: David Cassuto
  Catalog details

ENVI 328 / PSCI 328 Global Environmental Politics
  Taught by: Pia Kohler
  Catalog details

GEOS 212 / BIOL 211(S) Paleobiology
  Taught by: Phoebe Cohen
  Catalog details

GEOS 215 / ENVI 215 Climate Changes
  Taught by: Mea Cook
  Catalog details

HIST 321 / ASST 321 History of U.S.-Japan Relations
  Taught by: Eiko Maruko Sinawer
  Catalog details

HIST 391 / ASST 391 / GBST 391 When India was the World: Trade, Travel and History in the Indian Ocean
  Taught by: Aparna Kapadia
  Catalog details

INDEPENDENT STUDY AND WINTER STUDY
  In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

  MAST 397, 398 Independent Study: Maritime Studies
  MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES
  Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum,
field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 31 (W) Sen Thesis: Maritime Studies
Maritime Studies senior thesis.
Class Format: independent study
Grading: pass/fail only

Winter 2020
HON Section: 01

MAST 99 (W) Independent Study: Maritime Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: No divisional credit

Winter 2020
IND Section: 01

MAST 104 (F) Oceanography
Cross-listings: GEOS 104  ENVI 104  MAST 104

Secondary Cross-listing

The oceans cover about 72% of Earth’s surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: lecture/discussion, three hours per week; laboratory, two hours per week in alternate weeks/one all-day field trip
Requirements/Evaluation: evaluation will be based on two hour exams, lab work, participation in the field trip, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first-year and sophomore students, MAST concentrators
Expected Class Size: 48
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 104 (D3) ENVI 104 (D3) MAST 104 (D3)

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses  GEOS Group A Electives - Climate + Oceans
MAST 211  (F)(S)  Oceanographic Processes

Cross-listings:  MAST 211  GEOS 210

Primary Cross-listing

This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean-atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams-Mystic program.

Class Format: lecture/laboratory, including coastal and near-shore field trips, 11 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Extra Info: offered only at Mystic Seaport

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231  (F)(S)  Literature of the Sea

Cross-listings:  MAST 231  ENGL 231

Primary Cross-listing

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece Moby-Dick aboard Mystic Seaport's historic whaleship, the Charles W. Morgan, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: small group tutorials with weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Extra Info: offered only at Mystic Seaport

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (D1) ENGL 231 (D1)

**Attributes:** ENVI Natural World Electives  EVST Living Systems Courses  EXPE Experiential Education Courses

**MAST 324 (S) Corals and Sea Level**

**Cross-listings:** MAST 324  ENVI 324  GEOS 324

**Secondary Cross-listing**

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

**Class Format:** lecture/laboratory

**Requirements/Evaluation:** short papers, labs, participation in discussion, and a research project

**Prerequisites:** GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geoscience majors, students who commit to the Spring Break trip

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing
This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Extra Info: offered only at Mystic Seaport

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs.
From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**MAST 404 (S) Coastal Processes and Geomorphology (QFR)**

**Cross-listings:** MAST 404  ENVI 404  GEOS 404

**Secondary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, tests, and an independent research project

HON Section: 01
Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

MTSC Courses

CHEM 336 (S) Materials Chemistry
Materials Science focuses on the study of bulk physical properties such as hardness, electrical conductivity, optical behavior, and elasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and organic electronics. We'll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: lecture, three hours per week
Requirements/Evaluation: evaluation is based on problem sets, reviews of research articles, hour exams, and a final exam
Prerequisites: CHEM 155 or 256 and 251/255
Enrollment Limit: 24
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: MTSC Courses

CHEM 348 (F) Polymer Chemistry
From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: lecture, three hours per week
Requirements/Evaluation: problem sets, participation, two exams, and a final project
Prerequisites: CHEM 251/255

CHEM 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Primary Cross-listing

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture, three hours per week; laboratory, four hours per week

Requirements/Evaluation: evaluation is based on class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, and an independent project

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 9 per lab

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

GEOS 202 (S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals–Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture, three hours per week; laboratory, three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: evaluation will be based on one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor
Spring 2023

**GEOS 301 (S) Introduction to Materials Science** (QFR)

**Cross-listings**: PHYS 301, PHYS 302, PHYS 303

**Secondary Cross-listing**

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format**: lecture (3 hours per week), plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation**: based on weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites**: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit**: 20

**Enrollment Preferences**: based on students' scientific background and seniority

**Expected Class Size**: 10

**Grading**: yes pass/fail option, yes fifth course option

**Distributions**: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 301 (D3) GEOS 301 (D3)

**Attributes**: MTSC Courses

--------------------------------------------------------------------------------------------------------------------------------------------
MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

Calculus (2 courses)

Mathematics 140 Calculus II
Mathematics 150 or 151 Multivariable Calculus

Applied/Discrete Mathematics/Statistics (1 course)

Mathematics 209 Differential Equations
or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
or Mathematics 200 Discrete Mathematics
or Statistics 201 Statistics and Data Analysis
or Statistics 231 Statistical Design of Experiments
or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)

Mathematics 250 Linear Algebra
Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis
Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)

Two electives from courses numbered 300 and above, or STAT 231

One Senior Seminar: Any course numbered between 400 and 479, taken in the senior year.

Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia, and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

ADVANCED PLACEMENT

Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level
in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT

Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:

- BC 1, 2 or AB 2, 3 Math 140
- AB 4 or 5 Math 150
- BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the “Budapest Semester in Mathematics” are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away.

- Double Counting: No course may count towards two different majors.

- Early Senior Seminar: The senior seminar is designed and intended to be taken during the senior year. Students who have made significant progress towards the major may request to fulfill this requirement with a senior seminar taken during their junior year. Such requests should be submitted to the department chair, and should include a plan for completing the major and the rationale for taking their senior seminar as a Junior.

- Planning Courses: Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

- Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

- Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

- Can your department or program typically pre-approve courses for major/concentration credit?

  Yes, in many cases, though students should be sure to contact the department.

- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

  Course title and description, and complete syllabus including readings/assignments.

- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

  No.

- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

  Yes. They have to be approved MATH/STAT courses.

- Are there specific major requirements that cannot be fulfilled while on study away?

  Yes. Colloquium requirement, Senior Seminar requirement.

- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

  Yes. The highly cumulative structure of the major.

- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then...
THE DEGREE WITH HONORS IN MATHEMATICS

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a “minithesis” and a presentation. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

APPLIED MATHEMATICS TRACK

Students interested in applied mathematics, engineering, or other sciences should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Statistics 201 Statistics and Data Analysis
- Mathematics 250 Linear Algebra
- Mathematics 351 Applied Real Analysis
- Mathematics 355 Abstract Algebra
- Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you've had CSCI 134)
- MATH 309 or Post-core Differential Equations/Numerical Methods
- Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Mathematics 250 Linear Algebra
- Mathematics 350 Real Analysis
- Mathematics 355 Abstract Algebra
- Complex Analysis
- Topology
- Some second semester analysis
- Some second semester algebra
- Some post-core geometry
Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.
